Purpose

This guide is designed to help acquaint you with the Oracle® Banking Supply Chain Finance.

It provides an overview of the system, and guides you through the various steps involved in setting up and providing the supply chain finance services for the customers of your bank.

Audience

This guide is primarily intended for the following user/user roles:

Table 1 Audience

Role	Function
Back office executive	Input functions for transactions
Back office managers/officers	Authorization of functions
Product Managers	Product definition and authorization

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Related Resources

For more information, refer to the following resources:

Conventions

The following text conventions are used in this document:

Convention	Meaning	
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.	
italic	Italic type indicates book titles, emphasis, or placeholder variables for whic you supply particular values.	
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.	

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of the acronyms and abbreviations used in this guide are as follows:

Abbreviation	Description
OBSCF	Oracle Banking Supply Chain Finance
SCF	Supply Chain Finance
OBSCFCM	Oracle Banking Supply Chain Finance and Cash Management
FCUBS	FlexCube Universal Banking System
OBDX	Oracle Banking Digital Experience
ELCM	Enterprise Limits and Collateral Management
API	Application Programming Interface
EOD	End of Day
FIFO	First In First Out
LIFO	Last In First Out
HAFO	Highest Amount First Out
LAFO	Lowest Amount First Out
STP	Straight Through Processing
PO	Purchase Order
UI	User Interface

Table 2Acronyms and Abbreviations

Basic Actions

The basic actions performed in the screens are as follows:

Actions	Description
New	 Click New to add a new record. The system displays a new record to specify the required data. The fields marked with Required are mandatory. This button is displayed only for the records that are already created.
Save	Click Save to save the details entered or selected in the screen.
Unlock	 Click Unlock to update the details of an existing record. The system displays an existing record in editable mode. This button is displayed only for the records that are already created.
Authorize	 Click Authorize to authorize the record created. A maker of the screen is not allowed to authorize the same. Only a checker can authorize a record. This button is displayed only for the already created records. For more information on the process, refer Authorization Process.
Approve	Click Approve to approve the initiated record. • This button is displayed once you click Authorize .
Reject	Click Reject to reject the initiated record.This button is displayed once you click Authorize.
Audit	 Click Audit to view the maker details, checker details of the particular record. This button is displayed only for the records that are already created.

Table 3 Basic Actions

Actions	Description
Close	Click Close to close a record. This action is available only when a record is created.
Confirm	Click Confirm to confirm the action performed.
Cancel	Click Cancel to cancel the action performed.
Compare	 Click Compare to view the comparison through the field values of old record and the current record. This button is displayed in the widget once you click Authorize.
View	 Click View to view the details in a particular modification stage. This button is displayed in the widget once you click Authorize.
View Difference only	 Click View Difference only to view a comparison through the field element values of old record and the current record, which has undergone changes. This button is displayed once you click Compare.
Expand All	Click Expand All to expand and view all the details in the sections. • This button is displayed once you click Compare .
Collapse All	Click Collapse All to hide the details in the sections. • This button is displayed once you click Compare .
ОК	Click OK to confirm the details in the screen.

1 Supply Chain Finance

This topic describes the information on the overview, benefits and functionalities of Supply Chain Finance module.

Overview

Oracle® Banking Supply Chain Finance is a comprehensive digitized end-to-end solution that supports the full lifecycle of supply chain finance across receivables and payables, offering supplier-centric and buyer-centric financing. The solution addresses each of the supply chain processes from design through execution thereby enabling banks to optimize the working capital and supply chain operations of their corporate customers. Its unique value lies in its ability to provide the business with predefined processes and a world-class framework that takes care of business risk and compliance needs.

Benefits

- Suppliers are paid early
- Buyers can extend their payment terms
- Financial Institutions get their fee income at less risk and less cost.

The Oracle® Banking Supply Chain Finance platform enables the interaction between all the parties of the trade. This requires an involvement of an external finance provider, such as a Bank who settles supplier invoices in advance or on due date of the invoice, for a lower financing cost than the suppliers' own source of funds. When the external finance provider extends finance, it can be at the request of the supplier or at the request of the buyer by earmarking the credit limits of the concerned party. Different types of finances come into picture depending upon the party requesting for finance.

Functionality

One of the core functionalities or the foundations of Oracle® Banking Supply Chain Finance is the support for creation of flexible and parametrized program or linkage of a buyer to multiple suppliers or a supplier to multiple buyers.

There are two types of supply chain finance programs:

- **Supplier Centric Program** When the Supplier is a large corporate; then the buyer with whom the supplier is dealing becomes the **Counter Party/Spoke** and the supplier becomes the **Anchor** of the SCF program. This program is called as **Supplier Centric Program**. The anchor onboards all his counter parties or spokes to the SCF program.
- Buyer Centric Program When the Buyer is a large corporate; then the seller with whom the buyer is dealing becomes the Counter party/spoke and buyer becomes the Anchor of the SCF program. This program is called as Buyer Centric Program. The anchor onboards all his counter parties or spokes to the SCF program.

Home: Dashboard

Successfully signing into the Oracle® Banking Supply Chain Finance application displays the Dashboard as your home screen. It is a collection of various portlets that are displayed based on your role and access rights. The Dashboard enables easy access and analysis of

transactional and static data through these interactive and contextual portlets. User can drag and move different portlets, resize, auto adjust the size, and expand/collapse the portlet.

On starting the Oracle® Banking Supply Chain Finance system, the below login screen is displayed:

ORACLE
User Name
Password
Sign In

Figure 1-1 Login

- 1. Specify your User Name and Password to access the application.
- 2. Click **Sign In** to log into application. The **Dashboard** screen displays.

Figure 1-2 Dashboard

Oracle® Banking Supply Chain Finance Dashboard currently consists of the following mentioned portlets for Supply Chain Finance :

- **Facility Utilization:** This widget classifies all facilities into three categories i.e., nearing breach, breached, and under-utilized. The drilldown allows the user to view these details at an entity level. There is an option to search and filter the details for a specific entity also.
 - Nearing Breach: When utilized amount is more than 85% of the sanctioned amount.
 - Breached: When utilized amount equals to the sanctioned amount.
 - Under Utilized: When utilized amount is less than 20% of the sanctioned amount.
- Facilities Expiring: This widget lists all facilities nearing expiry or expired and offers a drilldown at each entity level. The user can filter the facilities expired for a specific time period, and facilities near expiry within the specific days.
- Top 5 Corporates: This widget displays information of the top five customers; with respect to their total Receivables and Payables. On clicking the table icon at the topright, the graph populates the business volume data of the same top 5 customers in tabular format.
- Aging of Invoices: This widget displays invoice aging information in the form of a doughnut. The graph displays the invoice amount volume split as per aging buckets which are configurable at the time of implementation i.e., 0-30 days, 30-60 days, and so on. Range criteria can be defined with a maximum of 6 ranges. On clicking any of the range buckets on the graph, a pop-up window appears with the list of corporates whose invoices are due for that aging bucket and further clicking on the '+' (expand) icon beside corporate name launches the Receivables Inquiry screen with data of supplier name, issue date, due date, etc., as per the selected date. Click the bar-chart icon on the top-right corner to change the view from doughnut (default) to bar chart. You can also flip the widget to view the same details for aging of overdue invoices.
- **Finance Maturing:** This widget displays the list of the invoice finances, purchase order finances, and the total outstanding finances which are maturing each week in the form of a trend line. While the default view is for the upcoming month, this time frame to can be changed to view further details. On flipping the widget, a detailed list of finances maturing is shown. The user can the filter to view the finances for a specific borrower.
- **Top Borrowers:** This widget is a bar graph which shows the top 5 borrowers for the previous year and current year. Clicking the bar-chart for any borrower offers a drilldown list of finances for the borrower.
- **Top Defaulters:** This widget displays the list of top defaulters for the previous and current months.
- Transaction Status Details: Transactions are grouped product-wise into groups as disbursed, partially settled, or fully settled for a specific date range, which is editable. The user can select on any product to view further details of transaction for the product.
- Invoices Raised: This widget displays the data for financed and non-financed Invoices on monthly basis as a bar graph. On clicking the table icon on the top-right corner, the same data is displayed in tabular format with financed/non-financed invoices grouped into monthly buckets. On clicking the bar graph, the screen will popup with corporate name and aggregated invoice amount and further clicking on the '+' (expand) icon beside corporate name launches the Invoice Inquiry screen with data of supplier name; 'To Date' and 'From Date' as per the selected date.

- Business Volume Trends: This widget displays the business trends (total receivables and payables) of the previous six months including the current month based on historic data. The trend line/bar graph is plotted based on the highs/peak.
- Payments Invoice Recon: This widget provides a snapshot of the reconciliation details of payments against the entity selected, i.e., invoice, cash flow, allocation, or finance. Click the respective icons to view these details as a doughnut or as a line graph. You can view the volume percentage of payment records that are manually reconciled, auto-reconciled, partially reconciled, and unreconciled. Using the filter options, you can select a specific customer and/or modify the date range. Click the refresh icon to reset the data. If you have selected the line-graph option, you can click on specific trend-line points where the Volume (Y) axis meets the Month (X) axis. A pop-up window appears, displaying the names of the corporates and the count of records for that particular month and the reconciliation status.
- **Customer wise utilization trend:** This widget gives a bird's eye view of the utilization for each program plotted for each month. The limit type and date range can be selected from the filter option.
- Facility Wise Sanctioned Limit trend: This widget displays the sanctioned limit as a trend-line plotted over the preceding the six months. The filter option allows the user to select a specific entity and limit type along with time frame to plot this line.
- **Upcoming Repayments**: This widget displays the finance and interest payments that are due in the next 7 days as a bar graph. Each day displays the finance payment dues combined with the interest payment dues. A separate Interest payment due bar is displayed only if the underlying finance is not matured. On clicking the bar graph, the screen will pop-up with list of dues displaying the Finance Reference Number, Amount, and the Borrower name. The filter option allows the user to filter based on the start date, and currency
- Outstanding Pre-Shipment Finances: This widget displays the list of outstanding pre-shipment finances in form of doughnut. The finances are displayed separately for Finances with Linked Invoices (Eligible for Conversion to Post Shipment Finances) and Finances without Linked Invoices. On clicking the doughnut, the screen will pop-up with the list of finances displaying the Finance Reference No, Maturity Date, Total Outstanding Amount, Program Name, Buyer Name, and Supplier Name. The filter option allows the user to filter based on supplier, program, and buyer
- Settlement Trend for Pre-Shipment Finances: This widget displays the list of settled pre-shipment finances in form of trend line plotted over the preceding six months by default. The user can view the finances for 12 months. The settled finances are displayed in the following categories; Settled Through Post-Shipment Disbursement, Settled Through Invoice Payment, and Settled Through Direct Finance Payment. The filter option allows the user to filter the finances based on the borrower

Perform following actions on the **Dashboard** screen:

- To add more portlets, click the Add icon located at the top-right corner of the Dashboard.
- To remove a portlet, click the Remove icon located at the portlet's top-right corner.
- To configure the portlet, click the **Configure Tile** located at the portlet's top-left corner.
- To flip the portlet view, click the **Flip Forward** or **Flip Back** icon.
- To change the portlet's position, click and hold the Drag to reorder icon at the portlet's bottom-center and then move portlet to the desired position.
- To apply filter on the portlet's data, click the Filter icon to view the pop-up select filter values.

2 Maintenance for Supply Chain Finance

This topic describes the maintenance of reference data to be set on day zero to use the Supply Chain Finance module.

To enable the functioning of Supply Chain Finance application, certain reference data needs to be set up on day zero. The user need to set up reference data like products, programs, limits, charge details, interest pricing, etc. The user may also need to identify administrators to perform admin related tasks (creating users, assigning tasks and functions to the users as per their profile, etc.,).

Maintaining Core Reference Data

Certain core reference data is required to be set up for execution of Supply Chain Finance transactions such as country list, currency, customer category, holiday list, list of financial institutions/banks, branch, FX rates, and so on.

Refer the Oracle Banking Common Core User Guide for setting up core reference data.

This topic contains the following subtopics:

• System Parameters Maintenance

This topic describes the information to view and modify the day-zero system parameters for Supply Chain Finance module.

- Product Parameters Maintenance This topic describes the information to create new products and set its attributes.
- Program Parameters Maintenance This topic describes the information to create a new program for financing along with its attributes.
- Accounting Maintenance

This topic describes the information to setup the reference data for Accounting such as account mapping, entry codes, roles, and accounting entries in Supply Chain Finance system.

- Alerts Maintenance This topic describes the information to setup the reference data for Alerts such as contact details, definition, and decisioning in Supply Chain Finance system.
- Charges Maintenance This topic describes the information to maintain the charges in Supply Chain system.
- Insurance Maintenance

This topic describes the information to maintain details of the insurance company from where the banks intends to purchase insurance policies for covering the default risk of the debtor/borrower corporate.

- Interest Maintenance This topic describes the information to maintain the interest in Supply Chain Finance system.
- Limits Structure Maintenance

This topic describes the information to configure limit structures by mapping various limit types to appropriate entities.

2.1 System Parameters Maintenance

This topic describes the information to view and modify the day-zero system parameters for Supply Chain Finance module.

This screen displays the day-zero system parameters which are setup during implementation. This set up will be configured as part of Day 1 delivery of the application and can be modified by the bank through a UI, if required. The system parameters are segregated into the following data segments.

- Workflow Parameters
- Finance Parameters
- Dashboard Parameters
- Product Parameters
- Delinquency Parameters
- View System Parameters

This topic describes the systematic instruction to view, modify, or authorize the day zero system parameters for Supply Chain Finance module.

2.1.1 View System Parameters

This topic describes the systematic instruction to view, modify, or authorize the day zero system parameters for Supply Chain Finance module.

A tile is present for each record that has been created. The bottom portion of each record-tile displays the following:

- The status, whether Authorized, Unauthorized, or Rejected
- Open or Closed
- The number of times the record has been submitted by the Maker added.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance. Under Maintenance, Click System Parameters.
- 2. Under System Parameters, click View System Parameters.

The View System Parameters screen displays.

4. On **Workflow Parameters** tab, specify the fields to configure the workflow parameters. For more information on fields, refer to the field description table.

 Table 2-1
 Workflow Parameters - Field Description

Field Name	Description	
Limit Block – Finance	Switch the toggle ON to enable limit blocking during finance transactions.	
Limit Utilization – Finance	Switch the toggle ON to enable limit utilization and release during finance transactions.	
Limit Block – Invoice	Switch the toggle ON to enable limit blocking during invoice transactions.	
Limit Utilization – Finance	Switch the toggle ON to enable limit utilization and release during invoice transactions.	
Limit Type for Invoice Approval	Select the limit type required for invoice approval. The available options are: • Credit Cover • Invoice • Assignment	
FCI Enabled	Switch the toggle ON to enable or disable the FCI integration.	
External NPA Integration	Switch the toggle ON to enable the NPA integration with external system.	
Lending System Integration	Switch the toggle ON to enable the Integration with lending system.	
Invoke Lending System EOD	Switch the toggle ON to enable the Integration of EOD process with the Lending System.	
Synchronous Account Response	Switch the toggle ON to enable the account response as synchronous.	
Auto Auth – Refund	Switch the toggle ON to enable the auto authorization required for the refund transactions.	
Synchronous Payment Response	Switch the toggle ON to enable the payment response as synchronous.	
Liquidate Pre-Shipment finances with Invoice Payment †	Switch this toggle ON to enable the liquidation of pre-shipment finances where post-shipment finance is not identified for an invoice.	

Field Name	Description
Pre-Shipment Finance Liquidation Preference	Select the liquidation preference for the settlement of pre-shipment finance.
	The available options are: • FIFO
	Invoice linked with PO and FIFO
	Invoice linked with PO
	This field is mandatory if Liquidate Pre-Shipment finances with Invoice Payment is enabled.

Table 2-1 (Cont.) Workflow Parameters - Field Description

Note:

† For existing implementations where pre-shipment finances exist, a new parameter **Liquidate Pre-Shipment finances for Invoice Disbursement** is introduced at the system level.

Note:

During upgrade, the system will read the value of Liquidate Pre-Shipment finances for Invoice Disbursement and update the data for **Pre-Shipment Finance Liquidation Preference** and **Liquidation Order for Auto Debit** fields in Post-shipment programs based on this maintenance in the System Parameters. A migration script will be prepared for relevant Post-shipment programs during upgrade.

5. Click **Next** button.

The System Parameters - Finance Parameters screen displays.

6. On **Finance Parameters** tab, specify the fields to configure the finance parameters. For more information on fields, refer to the field description table.

Field Name	Description	
Preferred Disbursement Mode	Select the preferred disbursement mode for the finance transaction. The available options are: • Account Transfer • Cheque • EFT	
Auto-Initiate Finance	Switch the toggle ON to enable the Auto-Initiation of the finance disbursement transaction.	
Disbursement Auto – Processing	Switch the toggle ON to enable the auto processing of the finance disbursement transaction.	
Disbursement Auth Required	Switch the toggle ON to enable the authorization required for the disbursement of the finance transaction.	
Minimum Finance Percentage	Specify the minimum finance percentage of Invoice amount allowed for financing.	
Maximum Finance Percentage	Specify the minimum finance percentage of Invoice amount allowed for financing.	
Minimum Tenor Days	Specify the minimum tenor allowed for a finance.	
Maximum Tenor Days	Specify the maximum tenor allowed for a finance.	
Stale Period	Specify the stale period in days after which the invoice cannot be financed any more. Stale period is calculated from Invoice date.	
Multiple Disbursement	Switch this toggle ON if multiple disbursement is allowed on same invoice.	
Auto Populate PO Required	Switch this toggle ON to auto populate the PO required.	

Table 2-2 Finance Parameters - Field Description

Field Name	Description			
Credit Limit Applicable	Switch the toggle ON to enable the credit limits applicability to the product.			
Default Limit Exception	Select the default exception handling for the Limit services.			
Handling	The available options are:			
	Stop Skip			
	Utilize			
Sub Limit - Validate Expiry	Switch the toggle ON to enable the Expiry date validation for the limits.			
Recourse	Switch the toggle ON to enable recourse for the program.			
Allow Auto-Processing - Overdue Borrower	Switch the toggle ON to enable the auto processing of disbursement for Overdue borrower.			
Allow Disbursement - NPA Borrower	Switch the toggle ON to enable the disbursement for NPA borrower			
Amendment Auto- Processing	Switch the toggle ON to enable the auto processing of finance amendment transaction.			
Amendment Auth Required	Switch the toggle ON to enable the authorization required for the amendment of the finance transaction.			
Validate Limits for Finance Amendment	Switch this toggle ON to enable limits validation for finance amendment transaction.			
Maximum Records for Amendment Request	Specify the maximum number of finance amendment requests that can be raised.			
Auto Settlement Applicable	Switch the toggle ON to enable Auto-Initiation of the finance repayment transaction.			
Preferred Settlement Mode	Select the preferred settlement mode for the finance transaction.			
	The available options are:			
	Account Transfer Cheque			
	• EFT			
Settlement Auto –	Switch the toggle ON to enable the auto processing of the finance			
Processing	repayment transaction.			
Settlement Auth Required	Switch the toggle ON to enable the authorization required for the repayment of the finance transaction.			
Prepayment Allowed	Switch the toggle ON to enable the prepayment for the finance. i.e Part, or full repayment before the finance due date.			
Part Repayment Allowed	Switch the toggle ON to enable the part repayment for the finance			
Minimum Waiting Period	Specify the minimum period up to which the finance cannot be closed. This should be enabled only if pre-closure is allowed.			
Maturity Date Calculation	Select the finance maturity date calculation method.			
	The available options are:			
	 Business Date + Maximum Tenor Payment Due Date 			
	Invoice Due Date			
	Invoice Due Date + Maximum Tenor			
Finance Settlement on Invoice Payment	Switch the toggle ON to enable the underlying Finance repayment post the manual recon for the Invoice payment.			

Table 2-2 (Cont.) Finance Parameters - Field Description

Field Name	Description
Interest Refund Generation on	 Select the type of payment for Interest Refund to be generated. The available options are: Part Payment Full Payment
Excess Handling	Select how excess payment made towards settling of outstanding invoice/finance should be handled. The available options are: • Auto-Reconcile • Auto-Reconcile and Refund • Manually-Reconcile • Refund to beneficiary or payment party
Excess Refund Party	Select the party to refund the excess amount. The available options are: • Beneficiary/Counter Party • Payment Party
Appr Seq Before Due Date	 Specify the appropriation sequence for the repayment amount if the payment is received before due date. The available options are: I - Interest P - Principal E - Penalty on Interest Valid Values – PIE, PEI, IPE, IEP, EIP, EPI
Excess Refund Payment Mode	Select the mode of payment for the excess payment refund. The available options are: • Account Transfer • Cheque • EFT
Appr Seq On Due Date	 Specify the appropriation sequence for the repayment amount if payment is received on due date. The available options are: I - Interest P - Principal E - Penalty on Interest Valid Values – PIE, PEI, IPE, IEP, EIP, EPI
Appr Seq After Due Date	 Specify the appropriation sequence for the repayment amount if payment is received after due date. The available options are: I - Interest P - Principal O - Penalty on Principal E - Penalty on Interest Valid Values – EOIP, EIOP, etc.,

 Table 2-2
 (Cont.) Finance Parameters - Field Description

Field Name	Description
NPA Appropriation Sequence	Specify the appropriation sequence for the repayment amount if payment is received after the finance has turned NPA.
	The available options are:
	I - Interest
	• P - Principal
	O - Penalty on Principal
	E - Penalty on Interest
	Valid Values – EOIP, EIOP, etc.,
Liquidation Order for Auto Debit	Specify the default auto-debit liquidation order to be applied in case partial funds are debited from the payment party on auto-debit.
	The available options are:
	E - Penalty on Interest Outstanding
	O - Penalty on Principal Outstanding
	I – Monthly Interest Due
	D - Overdue Finance (Delinquent finances)
	• F - Finance Due or Overdue (Outstanding Finances)
	This field is mandatory if Auto Debit Applicable is enabled.

Figure 2-6 System Parameters - Delinquency Parameters

13. On **Delinquency Parameters** tab, specify the fields to configure the product parameters. For more information on fields, refer to the field description table.

Field Name	Description
Delinquency Status	 Select the delinquency status as per the regulatory requirements. Relevant statuses maintained in lending system gets populated here. Example: NORM SOBU WACH
Status Description	Displays the description of the delinquency status selected. Example: NORM - Normal Status NAB1 - Non-Accrual Basis WACH - Watch Status
Priority	Displays the priority of the delinquency status selected.
Active	Switch the toggle ON to enable the type of delinquency status as Active depending on regulatory requirements.

 Table 2-5
 Delinquency Parameters - Field Description

14. Once you enter the details, click Add. or click Reset to reset the fields, if required

- Once an entry is made in the grid, click in the Action column, to Edit or Delete it.
- 15. Click Save & Close to save the record and send for authorization (if applicable).

Note:

If any flag in the system parameters is changed, the system promptly updates it upon authorization. However, processing the impact of the flag takes approximately 1-2 hours.

- On the View System Parameters screen, click Options icon and then select any of the following options:
 - Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record and click Approve to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
 - b. View To view the record details.

2.2 Product Parameters Maintenance

This topic describes the information to create new products and set its attributes.

Banks can create and categorize various products for financing.

This topic contains the following subtopics:

- Create Product Parameters This topic describes the systematic instruction to create products and maintain its parameters.
- View Product Parameters This topic describes the systematic instruction to view, modify, delete, or authorize product records that have been created.

2.2.1 Create Product Parameters

This topic describes the systematic instruction to create products and maintain its parameters.

The product parameters are segregated into the following data segments.

- Basic Details
- Finance Parameters
- Repayment Parameters
- Credit Limit Mapping

Specify User ID and Password, and login to Home screen.

- **1.** On **Home** screen, click **Supply Chain Finance**. Under **Supply Chain Finance**, click **Maintenance**.
- 2. Under Maintenance, Click Product Parameters. Under Product Parameters, Click Create Product Parameters.

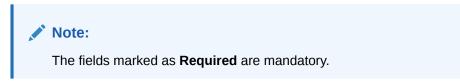

The Create Product Parameters - Basic Details screen displays.

No data to display.						

Figure 2-7 Create Product Parameters - Basic Details

3. On **Basic Details** tab, specify the fields to configure the basic details for the product being created.

For more information on fields, refer to the field description table.

Table 2-6	Basic Details -	Field Description
-----------	-----------------	-------------------

Field Name	Description
Branch†	 Select the option under which the product is to be created. All - Product defined is applicable to all the branches. Allowed - Product defined is applicable to only the selected branches. Restricted - Product defined is applicable to all the branches except the selected branches. You can select only one of the options at any given time.
Product Code	Specify a unique code to identify the product.
Product Description	Specify a description for the product.
Product Type	Select whether the product is Buyer Centric or Supplier Centric .
Product Category	Select the category to be financed under the product, whether Invoice or Purchase Order .
Effective From	Click the Calendar icon to select the date from when the product is active. If the field is left blank, then the branch date is considered by default.
Expires On	Click the calendar icon to select the date up to when the product is valid.
Borrower	Select the borrower to be associated with the product, whether Anchor or Spoke .

Field Name	Description
Assignment Applicable	Switch the toggle ON if assignment on invoice is applicable for financing.
Auto Assignment	Switch the toggle ON if the assignment is to be performed automatically post invoice upload.
Acceptance Applicable	Switch the toggle ON if acceptance on invoice is applicable for financing.
Auto Acceptance	Switch the toggle ON if the acceptance is to be performed automatically post invoice upload.
Auto Acceptance (Days)	Specify the number of days after which the instrument is automatically deemed as accepted.
Credit Limit Applicable	Switch the toggle ON to map credit limits to the product.
	If you enable this toggle, the Credit Limit Mapping tab appears. You can map the limit type and related entities.
Accounting Applicable	Switch the toggle ON if accounting is applicable.

Table 2-6 (Cont.) Basic Details - Field Description

Note:

† On maintenance screens where product selection is required, only products relevant to the logged-in user's branch will be displayed.

Note:

For existing implementations where the application is used in a single branch, the existing products can be mapped to either **ALL** or **Allowed** branch options at the discretion of the bank or Financial Institution during upgrade to current release version.

For existing implementations where the application is used in multiple branches, the existing products must be mapped to respective branches under **Allowed** branch option at the discretion of the bank or Financial Institution during upgrade to current release version. Refer to **Services Installation Guide** for migration support.

- On selection of Allowed or Restricted branch type, the Allowed/Restricted Branches section displays. Perform the below actions to add branch(es) for the product being created.
 - a. Click Add to add a row.
 - **b.** In the **Branch Code** field, click **Search**.

The Branch Code pop-up screen displays.

- c. Enter the partial or complete code/name of the branch in the respective fields.
- d. Click Fetch. The relevant branch(es) appears.
- e. Select the required branch.
- f. Click **Save** in the **Action** column to save the row.

- g. Click Edit in the Action column to edit the row or click Delete in the Action column to delete the row.
- 5. Click Finance Parameters tab.

The Create Product Parameters - Finance Parameters screen displays.

6. On **Finance Parameters** tab, specify the fields to configure the finance parameters for the product being created.

For more information on fields, refer to the field description table.

Table 2-7 Finance Parameters - Field Description

Field Name	Description
Auto Initiate Finance	Switch the toggle ON to enable automated financing (Straight Through Processing) of instruments such as invoices, debit notes, and so on.
Preferred Disbursement Mode	Select the preferred mode of disbursement for this product. The available options are:
	 Account Transfer Cheque EFT
	This field is mandatory when Auto Initiate Finance is enabled.
Auto Settlement Applicable †	Switch the toggle ON to enable automated settlement (repayment) for this product.
Preferred Settlement Mode	Select the preferred mode of settlement for this product. The available options are: Account Transfer Cheque EFT

Field Name	Description	
Min. Finance (%)	Specify the minimum finance percentage allowed for financing a transaction of this product.	
Max. Finance (%)	Specify the maximum finance percentage allowed for financing a transaction of this product.	
Min. Tenor (Days)	Specify the minimum tenor allowed for financing a transaction of this product.	
Max. Tenor (Days)	Specify the maximum tenor allowed for financing a transaction of this product.	
Grace Days	Specify the number of grace days. This is the period post the finance due date, within which the finance can be settled without penalty.	
Stale Period (Days)	Specify the number of stale days. This is the period post the invoice date, after which the invoice becomes stale and will not be financed automatically any more for this product.	
Min Waiting Period (Days)	Specify the minimum period up to which the finance cannot be closed for this product.	
With Recourse	Select Yes to specify that the finance is allowed with recourse, else select No .	
Assignment Amount Basis	 Select the assignment amount type for financing a transaction of this product. The available options are: Acceptance Amount Net Invoice Amount 	
Min. Assignment (%)	Specify the minimum percentage of the assignment amount allowed for financing a transaction of this product.	
Max. Assignment (%)	Specify the maximum percentage of the assignment amount allowed for financing a transaction of this product.	
Disbursement Auth Required	Switch the toggle ON to enable authorization for STP disbursement transactions.	
Disbursement Auto Processing	Switch the toggle ON to enable automatic processing of disbursement transactions.	
Settlement Auth Required	Switch the toggle ON to enable authorization for STP finance settlement transactions.	
Settlement Auto Processing	Switch the toggle ON to enable automatic processing of settlement transactions.	
Amendment Applicable	Switch the toggle ON to enable amendment for this product.	
Amendment Auth Required	Switch the toggle ON to enable authorization for the finance amendment transactions.	
Amendment Auto Processing	Switch the toggle ON to enable automatic processing of finance amendment transactions.	
Multiple Disbursement Allowed	Switch the toggle ON to enable multiple finance disbursements for an invoice.	
Holiday Treatment for Future Funding	Select the day to consider if the finance disbursement falls on a holiday. The available options are:	
	Next Business Day	
	 Previous Business Day 	

 Table 2-7
 (Cont.) Finance Parameters - Field Description

Note: † Pre-Shipment settlement gets initiated only if the Auto Settlement Applicable is enabled.

7. Click Repayment Parameters tab.

12. On **Sub Level Exception Handling** screen, specify the fields to set the exception handling behavior.

For more information on fields, refer to the field description table.

Table 2-10	Sub Level Exception Handling - Field Description
------------	--

Field Name	Description	
Sub Levels Applicable	Displays the selected sub-level entities/nodes.	
Expired Limit Exception Handling	elect the exception handling behavior when the limit is expired. ne available options are: Skip Stop Utilize	

Field Name	Description
Breach Limit Exception Handling	 Select the exception handling behavior when the limit is breached. The available options are: Skip Stop Utilize
Expired and Breach Limit Exception Handling	 Select the exception handling behavior when the limit is both expired and breached. The available options are: Skip Stop Utilize

Table 2-10 (Cont.) Sub Level Exception Handling - Field Description

- Select the required exception behaviors and click **Ok** to save the details.
- **13**. Click **Add/Edit** to add the details to the grid.
- 14. Click **Reset** to clear the selected values, if required.
- **15.** Perform the following steps to take action on the records in the grid.
 - Click **Options** icon in the **Action** column to edit or delete the row.
- 16. Click Save to save the record and send it for authorization (if applicable).

2.2.2 View Product Parameters

This topic describes the systematic instruction to view, modify, delete, or authorize product records that have been created.

A tile is present for each record that has been created. The bottom portion of each record-tile displays the following:

- The status, whether Authorized, Unauthorized, or Rejected
- Open or Closed
- The number of times the record has been submitted by the Maker added.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, click Product Parameters. Under Product Parameters, click View Product Parameters.

The View Product Parameters screen displays.

- 3. Filter the records in the **View** screen:
 - a. Click **Search** icon to view the filters. The user can filter the records by Product Code, Product Type, Product Category, Borrower, Authorization Status, and Record Status.
 - b. Select the required filter criteria and click Search button to filter the records.
 - c. Click Reset to reset the filter criteria.
- 4. Click **Refresh** icon to refresh the records.
- 5. Click **Options** icon and then, select any of the following options:
 - a. **Unlock** To modify the record details. Refer to the **Create** screen for the field level details.
 - Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record and click Approve to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
 - c. Delete/Close To remove the record.
 - Optional: In the confirmation pop-up window, click View to view the record details.
 - Click Proceed to delete the record.
 - d. Copy To copy the record parameters for creating a new record.
 - e. View To view the record details.
 - f. Reopen To reopen the closed record.

2.3 Program Parameters Maintenance

This topic describes the information to create a new program for financing along with its attributes.

A program is a linkage of a buyer to one or more suppliers or linkage of a supplier to one or more buyers.

This topic contains the following subtopics:

Create Program Parameters

This topic describes the systematic instruction to create products and maintain its parameters.

View Program Parameters
 This topic describes the systematic instruction to view, modify, delete, or authorize program
 records that have been created.

2.3.1 Create Program Parameters

This topic describes the systematic instruction to create products and maintain its parameters.

The program parameters are segregated into the following data segments.

- Basic Information
- Finance Parameters
- Link Spokes

Specify User ID and Password, and login to Home screen.

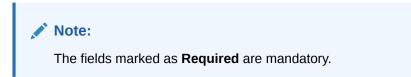

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, Click Program Parameters. Under Program Parameters, Click Create Program Parameters.

The Create Program Parameters - Basic Information screen displays.

Figure 2-13 Create Program Parameters - Basic Information

Create Program Parameters			₿.	Errors & Overrides	;; ×

				Cancel	Save

3. On **Basic Information** tab, specify the fields to configure the basic information for the program being created.

Field Name	Description
Program Code	Specify a unique code to identify the program.
Program Name	Specify a name for the program.
Product †	Select the underlying finance product to be associated with the program.
Anchor	Click the search icon to select the anchor for the program. An anchor can be a customer or a non-customer.
Relationship	Click the search icon to select the relationship associated with the selected anchor.
Effective From	Click the Calendar icon to select the date from when the program is active.
	If the field is left blank, then the branch date is considered by default.
Expires On	Click the calendar icon and select the date up to when the program is valid.
Reconciliation towards	Select whether the reconciliation is towards Invoice or Finance.
Assignment Applicable	Switch the toggle ON to enable assignment on invoice applicable for financing.
Auto Assignment	Switch the toggle ON to enable assignment automatically post invoice upload.
Acceptance Applicable	Switch the toggle ON to enable acceptance for invoice applicable for financing
Auto Acceptance	Switch the toggle ON to enable automatic acceptance of an instrument for the program.
Auto Acceptance (Days)	Specify the number of days after which the instrument is automatically deemed as accepted under this program.
	This field is displayed only if Auto Acceptance Applicable is enabled.
Two Factor Applicable	Switch the toggle ON to enable a two-factor system for the program in case the anchor is trading with foreign buyers/suppliers.
Factoring Profile	Select the profile for factoring as Import Factoring or Export Factoring .
	This field is displayed only if Two Factor Applicable toggle is enabled.
Insurance Applicable	Switch the toggle ON to enable insurance for the program.

Table 2-11 Basic Information - Field Description

Note:

† On maintenance screens where program selection is required, programs linked to the products that are relevant to the logged-in user's branch gets displayed.

4. Click Finance Parameters tab.

The Create Program Parameters - Finance Parameters screen displays.

5. On **Finance Parameters** tab, specify the fields to configure the finance parameters for the program being created.

Note:

The fields marked as **Required** are mandatory.

Table 2-12 Finance Parameters - Field Description	Table 2-12	Finance Parameters -	Field Description
---	------------	----------------------	-------------------

Field Name	Description
Auto-Initiate Finance	Select Yes to enable auto financing under this program. Else select No .
Preferred Disbursement Mode	 Select the preferred mode of disbursement for this program. The available options are: Account Transfer Cheque EFT This field is mandatory if Auto-Initiate Finance is enabled.
Auto Settlement Applicable †	Select Yes to enable automated settlement (repayment), under this program. Else select No .
Preferred Settlement Mode	 Select the preferred mode of settlement for this program. The available options are: Account Transfer Cheque EFT
Min. Finance (%)	Specify the minimum finance percentage allowed for financing a transaction of this program.
Max. Finance (%)	Specify the maximum finance percentage allowed for financing a transaction of this program.
Min. Tenor (Days)	Specify the minimum tenor allowed for financing a transaction of this program.

Field Name	Description
Max. Tenor (Days)	Specify the maximum tenor allowed for financing a transaction of this program.
Grace Days	Specify the number of grace days.
	This is the period post the finance due date, within which the finance can be settled without penalty.
Stale Period (Days)	Specify the number of stale days.
	This is the period post the invoice date, after which the invoice becomes stale and will not be financed automatically any more for this program.
With Recourse	Select Yes to specify that the finance is allowed with recourse, else select No .
Disbursement Currency	Select the currency in which the finance should be disbursed.
	This field is mandatory when Auto-Initiate Finance is enabled.
Auto Debit Applicable	Select Yes to enable auto debit to recover the outstanding finance due from the borrower for this program. Else select No .
Liquidation Order for Auto Debit	Specify the default auto-debit liquidation order to be applied in case partial funds are debited from the payment party on auto-debit.
	The available options are:
	 E - Penalty on Interest Outstanding O - Penalty on Principal Outstanding
	 I – Monthly Interest Due
	 D - Overdue Finance (Delinquent finances)
	• F - Finance Due or Overdue (Outstanding Finances)
	This field is mandatory if Auto Debit Applicable is enabled.
Disbursement Auth Required	Select Yes to enable authorization for the disbursement transactions under this program. Else select No .
Disbursement Auto Processing	Select Yes to enable automatic processing of disbursement transactions under this program. Else select No .
Amendment Auth Required	Select Yes to enable authorization for the amendment transactions under this program. Else select No .
	This field appears only if the Product selected has Amendment Applicable enabled.
Amendment Auto Processing	Select Yes to enable automatic processing of amendment transactions under this program. Else select No .
	This field appears only if the Product selected has Amendment Applicable enabled.
Settlement Auth Required	Select Yes to enable authorization for the settlement transactions under this program. Else select No .
Settlement Auto Processing	Select Yes enable automatic processing of settlement transactions under this program. Else select No .
Interest Bearing Party	Select the party that bears the interest.
	The available options are:
	Anchor
	Spoke

Table 2-12 (Cont.) Finance Parameters - Field Description

Field Name	Description
Margin Handling	 Select how the margin should be handled. The available options are: Auto-Settle and Refund to Supplier Manually Settle O/s Finances Refund to the Supplier Settle with Outstanding Finances This field is displayed only if the Product selected in this program has Product Category selected as Invoice.
Margin Payment Mode	 Select the mode of payment for the margin amount. The available options are: Account Transfer Cheque EFT This field is displayed only if Margin Handling is selected as Refund to the Supplier or Auto-Settle and Refund to Supplier.
Interest Refund Handling	 Select how the interest refund should be handled. The available options are: Auto-Settle and Refund to IBP Manually Settle O/s Finances Refund to the Interest Bearing Party Settle with Outstanding Finances
Interest Refund Payment Mode	 Select the mode of payment for the interest refunds. The available options are: Account Transfer Cheque EFT This field is displayed only if Interest Refund Handling is selected as Refund to the Interest Bearing Party or Auto-Settle and Refund to IBP.
Excess Handling	Select how excess payment made towards settling of outstanding invoice/finance, should be handled. The available options are: • Auto-Reconcile • Auto-Reconcile and Refund • Manually-Reconcile • Refund to beneficiary or payment party
Excess Refund Party	Select the party to refund the excess amount to. The available options are: • Beneficiary/Counter Party • Payment Party
Excess Refund Payment Mode	Select the mode of payment for the excess payment refund. The available options are: • Account Transfer • Cheque • EFT
Multiple Disbursement Allowed	Select Yes to enable multiple finance disbursements for an invoice. Else select No .

 Table 2-12
 (Cont.) Finance Parameters - Field Description

Field Name	Description
Holiday Treatment for Future Funding	Select the day to consider if the finance disbursement falls on a holiday.
	The available options are: Next Business Day Previous Business Day
	,
Min Assignment (%)	Specify the minimum percentage of the assignment amount allowed for financing a transaction of this program.
Max Assignment (%)	Specify the maximum percentage of the assignment amount allowed for financing a transaction of this program.
Credit Cover (%)	Specify the credit cover percentage allowed for the transaction under this program.
	This field is displayed only if the Product selected in this program has Limit Type selected as Assignment .
Credit Cover Start Date	Specify the credit cover start date for the transaction under this program.
	This field is displayed only if the Product selected in this program has Limit Type selected as Assignment .
Credit Cover End Date	Specify the credit cover end date for the transaction under this program.
	This field is displayed only if the Product selected in this program has Limit Type selected as Assignment .

Table 2-12 (Cont.) Finance Parameters - Field Description

Note:

† Pre-Shipment settlement gets initiated only if the **Auto Settlement Applicable** is enabled.

Note:

The application supports defining a specific assignment amount during a transaction. Similarly, a specific credit cover percentage can be defined against exposure on the import factor or buyer.

Figure 2-15 Create Program Parameters - Link Spokes

7. On Link Spokes tab, specify the fields to link multiple spokes/counterparties to the anchor and configure the finance parameters.

Table 2-13	Link Spokes - Field Description
	Enne oponeo i leia besonption

Field Name	Description
Spoke	Click the search icon to select a spoke for the program. A Spoke can be a customer or a non-customer.
Interest Bearing Party	Select the party that bears the interest.
	The available options are: Anchor Spoke
Import Factor	Click the search icon to select the import factor to be linked to the spoke.
	This field is displayed only if Two Factor Applicable is enabled in the Basic Information tab.

Field Name	Description
Insurance Company	Click the search icon to select the insurance company to be linked to the spoke.
	This field is displayed only if Insurance Applicable is enabled in the Basic Information tab.
Auto-Initiate Finance	Select Yes to enable auto financing for this spoke. Else select No.
Preferred Disbursement	Select the preferred mode of disbursement for this spoke.
Mode	The available options are: • Account Transfer
	Cheque EFT
	This field is mandatory if Auto-Initiate Finance is enabled.
Auto Settlement Applicable †	Select Yes to enable automated settlement (repayment) for this spoke. Else select No .
Preferred Settlement Mode	
	The available options are: • Account Transfer
	Cheque
	• EFT
Min. Finance (%)	Specify the minimum finance percentage allowed for financing a transaction of this spoke.
Max. Finance (%)	Specify the maximum finance percentage allowed for financing a transaction of this spoke.
Min. Tenor (Days)	Specify the minimum tenor allowed for financing a transaction of this spoke.
Max. Tenor (Days)	Specify the maximum tenor allowed for financing a transaction of this spoke.
Grace Days	Specify the number of grace days.
	This is the period post the finance due date, within which the finance can be settled without penalty.
Stale Period (Days)	Specify the number of stale days.
	This is the period post the invoice date, after which the invoice becomes stale and will not be financed automatically any more for this program.
With Recourse	Select Yes to specify that the finance is allowed with recourse, else select No .
Disbursement Currency	Select the currency in which the finance should be disbursed for this spoke.
	This field is mandatory when Auto-Initiate Finance is enabled.
Auto Debit Applicable	Select Yes to enable auto debit to recover the outstanding finance due from the borrower for this spoke. Else select No .

Table 2-13 (Cont.) Link Spokes - Field Description

Field Name	Description						
Liquidation Order for Auto Debit	Specify the default auto-debit liquidation order to be applied in case partial funds are debited from the payment party on auto-debit.						
	The available options are:						
	E - Penalty on Interest Outstanding						
	O - Penalty on Principal Outstanding						
	 I – Monthly Interest Due D - Overdue Finance (Delinquent finances) 						
	 F - Finance Due or Overdue (Outstanding Finances) 						
	This field is mandatory if Auto Debit Applicable is enabled.						
Disbursement Auth Required	Select Yes to enable authorization for the disbursement transactions for this spoke. Else select No .						
Disbursement Auto Processing	Select Yes to enable automatic processing of disbursement transactions for this spoke. Else select No .						
Amendment Auth Required	Select Yes to enable authorization for the amendment transactions for this spoke. Else select No .						
	This field appears only if the Product selected has Amendment Applicable enabled.						
Amendment Auto Processing	Select Yes to enable automatic processing of amendment transactions for this spoke. Else select No .						
	This field appears only if the Product selected has Amendment Applicable enabled.						
Settlement Auth Required	Select Yes to enable authorization for the settlement transactions for this spoke. Else select No .						
Settlement Auto Processing	Select Yes enable automatic processing of settlement transactions for this spoke. Else select No .						
Margin Handling	Select how the margin should be handled.						
	The available options are:						
	Auto-Settle and Refund to Supplier						
	Manually Settle O/s Finances						
	 Refund to the Supplier Settle with Outstanding Finances 						
	This field is displayed only if the Product selected in this program

			Save external Code

a. In the Spoke External Code field, click the search icon to select the external spoke code. The corresponding Spoke Division Code and Anchor Division Code gets displayed in the adjacent columns.

- b. Click Add/Edit to add the details in the grid.
- c. Repeat these steps to add more external codes.
- d. If required, click **Options** icon under the **Action** column in the grid and then click **Delete** to remove the record.
- e. Click Save external Code to save the external code details.
- 9. Click **Add/Edit** to add the record to the grid.
- **10.** Click **Reset** to clear the selected values, if required.
- **11**. Perform the following steps to take action on the records in the grid.
 - Click Options icon in the Action column to edit or delete the row.
- 12. In the Document Upload section, click Add to upload the documents.
 - Click the Document Status drop-down to filter the documents based on status.
- 13. Click Save to save the record and send it for authorization (if applicable).

2.3.2 View Program Parameters

This topic describes the systematic instruction to view, modify, delete, or authorize program records that have been created.

A tile is present for each record that has been created. The bottom portion of each record-tile displays the following:

- The status, whether Authorized, Unauthorized, or Rejected
- Open or Closed
- The number of times the record has been submitted by the Maker added.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, click Program Parameters. Under Program Parameters, click View Program Parameters.

The View Program Parameters screen displays.

3. Filter the records in the View screen:

- a. Click **Search** icon to view the filters. The user can filter the records by Program Code, Program Name, Product Code, Anchor Id, Authorization Status, and Record Status.
- b. Select the required filter criteria and click Search button to filter the records.
- c. Click **Reset** to reset the filter criteria.
- 4. Click **Refresh** icon to refresh the records.
- 5. Click **Options** icon and then, select any of the following options:
 - a. **Unlock** To modify the record details. Refer to the **Create** screen for the field level details.
 - **b.** Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record and click **Approve** to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
 - c. Delete/Close To remove the record.
 - Optional: In the confirmation pop-up window, click View to view the record details.
 - Click **Proceed** to delete the record.
 - d. Copy To copy the record parameters for creating a new record.
 - e. View To view the record details.
 - f. **Reopen** To reopen the closed record.

2.4 Accounting Maintenance

This topic describes the information to setup the reference data for Accounting such as account mapping, entry codes, roles, and accounting entries in Supply Chain Finance system.

This topic contains the following subtopics:

Accounting Role

This topic describes the information to setup the reference data for Accounting roles in Supply Chain Finance system.

Entry Codes

This topic describes the information to setup the reference data for entry codes in Supply Chain Finance system.

- Accounting Entries This topic describes the information to setup the reference data for Accounting entries in Supply Chain Finance system.
- External Account Mapping

This topic describes the information to create external account mapping. i.e., mapping of a customer external account to a specific product, event, etc.

Internal Account Mapping
 This topic describes the information to setup the reference data for internal account
 mapping in Supply Chain Finance system.

2.4.1 Accounting Role

This topic describes the information to setup the reference data for Accounting roles in Supply Chain Finance system.

This topic contains the following subtopics:

Create Account Role

This topic describes the systematic instruction to create role codes for the purpose of accounting.

View Account Role

This topic describes the systematic instruction to view, modify, delete, or authorize accounting role records that have been created.

2.4.1.1 Create Account Role

This topic describes the systematic instruction to create role codes for the purpose of accounting.

This is required to identify the Dr or Cr leg in an accounting entry. Dr or Cr legs with other parameters like amount type, are created through **Entry Codes** submenu.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, click Accounting. Under Accounting, click Role.
- 3. Under Role, click Create Account Role.

The Create Account Role screen displays.

Figure 2-18 Create Account Role

- 3. Filter the records in the View screen:
 - a. Click **Search** icon to view the filters. The user can filter the records by Accounting Role Code, Accounting Role Description, Authorization Status, and Record Status.
 - b. Select the required filter criteria and click Search button to filter the records.
 - c. Click **Reset** to reset the filter criteria.
- 4. Click **Refresh** icon to refresh the records.
- 5. Click **Options** icon and then, select any of the following options:
 - a. **Unlock** To modify the record details. Refer to the **Create** screen for the field level details.

- **b.** Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record and click **Approve** to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
- c. **Delete/Close** To remove the record.
 - Optional: In the confirmation pop-up window, click View to view the record details.
 - Click **Proceed** to delete the record.
- d. Copy To copy the record parameters for creating a new record.
- e. View To view the record details.
- f. **Reopen** To reopen the closed record.

2.4.2 Entry Codes

This topic describes the information to setup the reference data for entry codes in Supply Chain Finance system.

This topic contains the following subtopics:

- Create Account Entry Code
 This topic describes the systematic instruction to create entry codes, or Dr and Cr legs for an accounting entry.
- View Account Entry Code This topic describes the systematic instruction to view, modify, delete, or authorize accounting entry code records that have been created.

2.4.2.1 Create Account Entry Code

This topic describes the systematic instruction to create entry codes, or Dr and Cr legs for an accounting entry.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, click Accounting. Under Accounting, click Entry Codes.
- 3. Under Entry Codes, click Create Account Entry Code.

The Create Account Entry Code screen displays.

 - b. Select the required filter criteria and click Search button to filter the records.
 - c. Click Reset to reset the filter criteria.
- 4. Click Refresh icon to refresh the records.
- 5. Click **Options** icon and then, select any of the following options:
 - Unlock To modify the record details. Refer to the Create screen for the field level details.
 - Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record and click **Approve** to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.

- c. **Delete/Close** To remove the record.
 - Optional: In the confirmation pop-up window, click View to view the record details.
 - Click **Proceed** to delete the record.
- d. Copy To copy the record parameters for creating a new record.
- e. View To view the record details.
- f. Reopen To reopen the closed record.

2.4.3 Accounting Entries

This topic describes the information to setup the reference data for Accounting entries in Supply Chain Finance system.

This topic contains the following subtopics:

- Create Accounting Entries
 This topic describes the systematic instruction to create accounting entries by mapping
 entry codes with appropriate product, event, payment mode, and so on.
- View Account Entries

This topic describes the systematic instruction to view, modify, delete, or authorize accounting entry records that have been created.

2.4.3.1 Create Accounting Entries

This topic describes the systematic instruction to create accounting entries by mapping entry codes with appropriate product, event, payment mode, and so on.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, click Accounting. Under Accounting, click Accounting Entries.
- 3. Under Accounting Entries, click Create Account Entries.

The Create Account Entries screen displays.

Account in Transaction Currency	Switch this toggle ON specify whether the accounting should be done in transaction currency or not.
Filter Criteria	Select the appropriate filter criteria for specific application of accounting entries.
	The available options are: Event, Program, and Party Based
	Program and Party Based
	Party and Division Code Based Event and Party Based
	 Event and Party Based Program Based
	Party Based
	Event Based
	Charge Code Based
	• Default
Program	Click the search icon and select the program to map the account with.
	This field is displayed only if Filter Criteria selected as Program.
Party	Click the search icon and select the party to whose account is to be mapped.
	This field is displayed only if Filter Criteria selected as Party.
Division Code	Click the search icon and select the applicable division code.
	This field is displayed only if Filter Criteria selected as Division Code .
Event	Select an event for account mapping. This field is displayed only if Filter Criteria selected as Event .
Charge Code	Select the charge code to map the account with.
	This field is displayed only if Filter Criteria selected as Charge Code .
Account Currency	Select the currency of the account to be mapped.
Account Number	Click the Search icon and select real/virtual account number.
Default Account	Switch this toggle ON to specify if this account should be considered as the default one.

Table 2-19 (Cont.) Create Internal Account Mapping - Field Description

- 5. Click Add/ Edit to add the details to the grid.
 - Click **Options** icon in the **Action** column to edit or delete the row.
- 6. Click **Reset** to clear the selected values, if required.
- 7. Click **Save** to save the data and send it for authorization.

2.4.5.2 View Internal Account Mapping

This topic describes the systematic instruction to view, modify, delete, or authorize internal account mapping records that have been created.

A tile is present for each record that has been created. The bottom portion of each record-tile displays the following:

- The status, whether Authorized, Unauthorized, or Rejected
- Open or Closed
- The number of times the record has been submitted by the Maker added.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, click Accounting. Under Accounting, click Internal Account Mapping. Under Internal Account Mapping, click View Internal Account Mapping.

The View Internal Account Mapping screen displays.

 - e. View To view the record details.

f. Reopen – To reopen the closed record.

2.5 Alerts Maintenance

This topic describes the information to setup the reference data for Alerts such as contact details, definition, and decisioning in Supply Chain Finance system.

This topic contains the following subtopics:

Alert Contact Details

This topic describes the information to setup the reference data to maintain the contact details of the party for alert codes.

Alert Definition

This topic describes the information to maintain the alert definitions in Supply Chain Finance system.

Alert Decisioning
 This topic describes the information to set and manage the alerts in Supply Chain Finance system.

2.5.1 Alert Contact Details

This topic describes the information to setup the reference data to maintain the contact details of the party for alert codes.

The user can maintain contact details for multiple alerts for a selected party.

This topic contains the following subtopics:

- Create Alert Contact Details
 This topic describes the systematic instruction to create a record of party contact details for alerts.
- View Alert Contact Details
 This topic describes the systematic instruction to view, modify, delete, or authorize alert contact detail records that have been created.

2.5.1.1 Create Alert Contact Details

This topic describes the systematic instruction to create a record of party contact details for alerts.

A newly created contact details record takes effect once authorized and cannot be modified thereafter.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, click Alerts. Under Alerts, click Alert Contact Details.
- 3. Under Alert Contact Details, click Create Alert Contact Details.

The Create Alert Contact Details screen displays.

 - b. Select the required filter criteria and click **Search** button to filter the records.
 - c. Click Reset to reset the filter criteria.
- 4. Click Refresh icon to refresh the records.
- 5. Click **Options** icon and then, select any of the following options:
 - Unlock To modify the record details. Refer to the Create screen for the field level details.
 - Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record and click Approve to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
 - c. Delete/Close To remove the record.
 - Optional: In the confirmation pop-up window, click View to view the record details.
 - Click Proceed to delete the record.
 - d. **Copy** To copy the record parameters for creating a new record.
 - e. View To view the record details.
 - Reopen To reopen the closed record.

2.5.2 Alert Definition

This topic describes the information to maintain the alert definitions in Supply Chain Finance system.

The **Alert Definition** functionality can be used to configure and manage the types of alerts. User can define alert categories for various events. These defined alerts can be further used in the **Alert Decisioning** screen to set alerts.

This topic contains the following subtopics:

Create Alert Definition

This topic describes the systematic instruction to configure and manage various types of alerts.

View Alert Definition This topic describes the systematic instruction to view, modify, delete, or authorize alert definition records that have been created.

2.5.2.1 Create Alert Definition

This topic describes the systematic instruction to configure and manage various types of alerts.

Newly created alert types take effect once authorized and cannot be modified thereafter.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, click Alerts. Under Alerts, click Alert Definition.
- 3. Under Alert Definition, click Create Alert Definition.

The Create Alert Definition screen displays.

2.5.3 Alert Decisioning

This topic describes the information to set and manage the alerts in Supply Chain Finance system.

The **Alert Decisioning** functionality is used to choose from the defined alerts and set the same for a recipient. The delivery mode and frequency for sending the alerts can also be defined.

This topic contains the following subtopics:

- Create Alert Decisioning
 This topic describes the systematic instruction to set the delivery mode and frequency of sending alerts to a recipient.
- View Alert Decisioning
 This topic describes the systematic instruction to view, modify, delete, or authorize alert decisioning records that have been created.

2.5.3.1 Create Alert Decisioning

This topic describes the systematic instruction to set the delivery mode and frequency of sending alerts to a recipient.

Newly set decisioning records take effect once authorized. The phone number and email ID are obtained from the records maintained in the **Alert Contact Details** screen. Additional contact information can be entered in this screen.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, click Alerts. Under Alerts, click Alert Decisioning.
- 3. Under Alert Decisioning, click Create Alert Decisioning.

The Create Alert Decisioning screen displays.

2.6 Charges Maintenance

This topic describes the information to maintain the charges in Supply Chain system.

Banks are empowered to configure flexible and preferential pricing as per corporate profile and assessment. The levying of the charges can be triggered by specific events such as auto-debit, EOD, etc. Once configured, the charges would get levied for manual as well as auto processing mode for transactions.

Charge pricing is determined by configuring various pricing methods such as fixed amount, fixed percentage, slab based pricing, tier based pricing and so on. The frequency of calculation and collection, such as, daily/weekly/monthly/yearly, can also be defined for a charge. Both standard and discount type of charge is supported.

This topic contains the following subtopics:

Charge Code

This topic describes the information to setup the reference data for charge codes in Supply Chain Finance system.

Charge Rule Maintenance

This topic describes the information to setup the rules for charge pricing/charge calculation based on the bank's requirements. Charge rule enables user to create a template for pricing method and link the same to a product/program or corporate through other submenus like charge decisioning and preferential charge pricing

Charge Decisioning

This topic describes the information to map the charge rule template and charge code to a specific products, program, event etc. The party, calculation, and collection frequencies for the charge can be defined as well.

Charge Preferential Pricing

This topic describes the information to configure the special pricing or charge application for a specific corporate.

2.6.1 Charge Code

This topic describes the information to setup the reference data for charge codes in Supply Chain Finance system.

This topic contains the following subtopics:

Create Charge Code

This topic describes the systematic instruction to manage the charge code for a specific charge group, charge type, and charge category.

• View Charge Code

This topic describes the systematic instruction to view, modify, delete, or authorize charge code records that have been created.

2.6.1.1 Create Charge Code

This topic describes the systematic instruction to manage the charge code for a specific charge group, charge type, and charge category.

Specify User ID and Password, and login to Home screen.

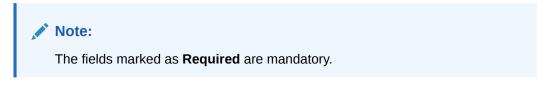

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, click Charges. Under Charges, click Charge Code.
- 3. Under Charge Code, click Create Charge Code.

The Create Charge Code screen displays.

Figure 2-38 Create Charge Code

Charge Code Charge Description Charge Group	
	Charge Category
CD1 Charges for Finance Fee	Tax
Charge Type Effective Date Expiry Date	
Debit 👻 January 20, 2020 🛗 July 28, 2023 🛗	

4. Specify the fields on **Create Charge Code** screen.

For more information on fields, refer to the field description table.

Table 2-26	Create Charge (Code - Field	Description
------------	-----------------	--------------	-------------

Field	Description
Charge Code	Specify the unique charge code to be created.
Charge Description	Specify the description of the charge.
Charge Group	Select the group to which this charge code belongs. This field is purely for the purpose of maintaining information in the Management Information System (MIS). The available options are: • Rebates
	 Tax Commission Fee
Charge Category	Select the value to specify whether charge is of Tax or Standard category.
Charge Type	Specify if this charge code is of Debit or Credit type.
Effective Date	Click the calendar icon to select the start date of the charge code validity.
Expiry Date	Click the calendar icon to select the end date of the charge code validity.

5. Click Save to save the record and send it for authorization.

2.6.1.2 View Charge Code

This topic describes the systematic instruction to view, modify, delete, or authorize charge code records that have been created.

A tile is present for each record that has been created. The bottom portion of each record-tile displays the following:

- The status, whether Authorized, Unauthorized, or Rejected
- Open or Closed
- The number of times the record has been submitted by the Maker added.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, click Charges. Under Charges, click Charge Code. Under Charge Code, click View Charge Code.

The View Charge Code screen displays.

 - Select the record and click **Approve** to approve the record.

- Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
- c. Delete/Close To remove the record.
 - Optional: In the confirmation pop-up window, click **View** to view the record details.
 - Click **Proceed** to delete the record.
- d. **Copy** To copy the record parameters for creating a new record.
- e. View To view the record details.
- f. **Reopen** To reopen the closed record.

2.6.2 Charge Rule Maintenance

This topic describes the information to setup the rules for charge pricing/charge calculation based on the bank's requirements. Charge rule enables user to create a template for pricing method and link the same to a product/program or corporate through other submenus like charge decisioning and preferential charge pricing

This topic contains the following subtopics:

- Create Charge Rule Maintenance This topic describes the systematic instruction to define rules for charge pricing/charge calculation based on the bank's requirements.
- View Charge Rule This topic describes the systematic instruction to view, modify, delete, or authorize program records that have been created.

2.6.2.1 Create Charge Rule Maintenance

This topic describes the systematic instruction to define rules for charge pricing/charge calculation based on the bank's requirements.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, click Charges. Under Charges, click Charge Rule Maintenance.
- 3. Under Charge Rule Maintenance, click Create Rule Maintenance.

The Create Rule Maintenance screen displays.

Figure 2-40 Create Rule Maintenance

4. Specify the fields on **Create Rule Maintenance** screen.

For more information on fields, refer to the field description table.

cription
5

Field	Description
Charge Pricing Description	Specify the pricing description of charge.
Annum Basis	Select the number of days to be considered in a year for tenor-based calculations.
Pricing Category	Select the pricing category. Based on the selected category, pricing methods will be loaded.
Pricing Method	Select the method to configure the charge pricing.
Pricing Currency	Select the currency in which pricing is to be done.
Charge in Txn Currency	Switch the toggle ON if the charge should be levied in transaction currency otherwise charge will get levied in pricing currency.
Min/Max Validation Criteria	Specify whether the charges should be applied based on the range of amount or percentage.
Min. Charge Amount/ Percent	Specify the minimum charge amount/ percentage to be considered. This field is displayed based on the value selected in the Min/Max Validation Criteria field.
Max. Charge Amount/ Percent	Specify the maximum charge amount/ percentage to be considered. This field is displayed based on the value selected in the Min/Max Validation Criteria field.
Fixed Amount	Specify the charge amount. This field is displayed only if Pricing Category is selected as Fixed Amount .
Flat Charge	Switch the toggle ON if flat charge should be applied. This field is displayed only if Pricing Category is selected as Fixed Percent .

Field	Description
Fixed Percent	Specify the charge percentage. This field is displayed only if Pricing Category is selected as Fixed Percent .
From	Displays the start value of the amount/ percent/ duration range. This field is displayed only if Pricing Category is selected as Tier Based Categories.
То	Specify the end value of the amount/ percent/ duration range. This field is displayed only if Pricing Category is selected as Tier Based Categories.
Amount	Specify the charge amount. This field is displayed only if Pricing Category is selected as Tier Based Amount or Tier Based Mixed .
Units	Specify the number of charge unit. This field is displayed only if Pricing Category is selected as Tier Based Amount and Pricing Method is selected as count-based.
Percent	Specify the charge percentage. This field is displayed only if Pricing Category is selected as Tier Based Percent or Tier Based Mixed .

Table 2-27 (Cont.) Create Rule Maintenance - Field Description

- 5. Click **Add** to add the charge rule details to the grid.
 - a. Select the record in the grid and then click **Options** icon in the **Action** column.
 - b. Click Edit to edit the selected row.
 - c. Click Delete to delete the selected row.
- 6. Click Reset to reset the fields, if required.
- 7. Click Save to save the record and send it for authorization.

2.6.2.2 View Charge Rule

This topic describes the systematic instruction to view, modify, delete, or authorize program records that have been created.

A tile is present for each record that has been created. The bottom portion of each record-tile displays the following:

- The status, whether Authorized, Unauthorized, or Rejected
- Open or Closed
- The number of times the record has been submitted by the Maker added.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, click Charges. Under Charges, click Charge Rule. Under Charge Rule, click View Charge Rule.

The View Charge Rule screen displays.

4. Specify the fields on Create Charge Decisioning screen.

Note:

The fields marked as **Required** are mandatory.

For more information on fields, refer to the field description table.

Table 2-28 Create Charge Decisioning - Field Description

Field	Description	
Event	Select the event on the occurrence of which, the charge should be applied. The available options are: • Amendment • Disbursement • Settlement	
Filter Criteria	Select the appropriate filter criteria on which the charge is required be calculated and debited. The available options are: Program Instrument Type Status Based Instrument Type Status Based Program Based Product Based Default	
Program	Click the search icon to select the program for which the charge is to be mapped. This field appears only if the Filter Criteria is selected as Program Based .	
Instrument Type	 Select the instrument type for which the charge is to be mapped. The available options are: PO Invoice Cheque Debit Note This field appears only if the Filter Criteria is selected as Instrument Type. 	
Instrument Status	Select the relevant status of the instrument based on which the charge would get levied. Different charges and pricing can be configured for combination of instruments and their status. This field appears only if the Filter Criteria is selected as Instrument Type .	
Product	Select the product for which the charge is to be mapped. This field appears only if the Filter Criteria is selected as Product Based .	

Field	Description
Inherit Charges	Specify if default charges should be inherited as set up for default filter criteria or should be overridden as well.
	The available options are:
	 Inherit Default Charges Inherit Default Charges and Override
Charge Cade	
Charge Code	Click the search icon to select the charge code for which the decisioning is to be configured.
Charge Sharing	Switch the toggle ON if charge sharing is applicable.
Sharing Percentage Allocation	Click the link to specify the sharing percentage for each party. Refe Sharing Percentage Allocation.
	This link is displayed only if the Charge Sharing toggle is enabled.
Party To Charge	Select the party to be charged.
	The available options are: • Buyer
	Import Factor
	Insurance Party
	• Supplier
	This field appears only if the Charge Sharing toggle is disabled.
Charge Pricing Rule	Click the search icon to select the charge pricing rule to be applied
External Pricing	Switch the toggle ON to allow the user to configure the external pricing.
	By default, this toggle will be OFF.
Charge Criteria	Select the criteria to be considered based on which the charge should be calculated.
	The available options are: • Finance Amount
	Invoice Amount
	Parent Charge Code
External Pricing System	Select the external pricing system from the drop-down list for which the external charges needs to be configured.
	This field appears only if the External Pricing toggle is ON.
External Pricing Identifier	Specify the unique identifier for the external pricing system.
	This field appears only if the External Pricing toggle is ON.
External Pricing Identifier Description	Specify the brief description about the external pricing identifier. This field appears only if the External Pricing toggle is ON.
Reference Tenor Start Date	Specify which date should be considered to calculate the start of charge tenor duration.
	The available options are:
	Business Date
	Finance Maturity Date
Reference Tenor End Date	Specify which date should be considered to calculate the end of charge tenor duration.
	The available options are:
	Business Date
	Finance Maturity Date
Effective Date	Click the calendar icon to select the start date of the charge decisioning validity.

Table 2-28 (Co	nt.) Create Charge	e Decisioning -	Field Description
----------------	--------------------	-----------------	--------------------------

Field	Description
Expiry Date	Click the calendar icon to select the end date of the charge decisioning validity.
Auto Waive	Switch the toggle ON to enable automatic charge waiving at the time of transaction processing.
Allow Waiver	Switch the toggle ON to enable manual charge waiving at the time of transaction processing. If the Auto Waive toggle is switched ON, then this toggle is switched OFF and disabled by default.
Allow Pricing Modification	Switch the toggle On to allow pricing rule modification at the time of transaction processing. If the Auto Waive toggle is switched ON, then this toggle is switched OFF and disabled by default.
Allow Override	Switch the toggle On to enable overriding of charge amount at the time of transaction processing. If the Auto Waive toggle is switched ON, then this toggle is switched OFF and disabled by default
Collection Parameters	Displays the fields related to Collection Parameters under this section.
Collection Type	Select how the charge should be collected.
	The available options are:
	PeriodicOnline
Frequency	Select the frequency of charge collection.
rioquonoy	The available options are:
	Daily
	Weekly
	Monthly Half Yearly
	This field is displayed only if the Collection Type is selected as Periodic .
Reference Period	Select when the collection should take place for the selected frequency.
	For monthly or half-yearly frequency, the collection can take place either at the beginning of the period (BOP) or end of the period (EOP).
	For weekly frequency, the collection can happen on a specific day of the week.
	This field is displayed only if the Collection Type is selected as Periodic .
Units	Specify whether the charge collection should take place as per units of specified frequency. If the monthly frequency is specified and the number of units is 2, then the charge would be collected once in two months.
	This field is displayed only if the Collection Type is selected as Periodic .
Calculation Parameters	Displays the fields related to Calculation Parameters under this section.

 - a. Click **Search** icon to view the filters. The user can filter the records by Program, Party, Customer Category, Authorization Status, and Record Status.
 - b. Select the required filter criteria and click Search button to filter the records.
 - c. Click Reset to reset the filter criteria.
- 4. Click **Refresh** icon to refresh the records.
- 5. Click **Options** icon and then, select any of the following options:
 - Unlock To modify the record details. Refer to the Create screen for the field level details.
 - Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record and click **Approve** to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
 - c. Delete/Close To remove the record.
 - Optional: In the confirmation pop-up window, click View to view the record details.
 - Click Proceed to delete the record.
 - d. Copy To copy the record parameters for creating a new record.
 - e. View To view the record details.
 - f. Reopen To reopen the closed record.

2.7 Insurance Maintenance

This topic describes the information to maintain details of the insurance company from where the banks intends to purchase insurance policies for covering the default risk of the debtor/ borrower corporate.

Details of various insurance policies availed through that insurance agent can also be maintained. Individual policies can be linked to debtor/borrower party to track limit related exposure at policy level.

This topic contains the following subtopics:

- Create Insurance
 This topic describes the systematic instruction to create insurance details.
- View Insurance

This topic describes the systematic instruction to view, modify, delete, or authorize insurance records that have been created.

2.7.1 Create Insurance

This topic describes the systematic instruction to create insurance details.

Specify User ID and Password, and login to Home screen.

1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.

2. Under Maintenance, click Insurance. Under Insurance, click Create Insurance.

The **Create Insurance** screen displays.

2.8 Interest Maintenance

This topic describes the information to maintain the interest in Supply Chain Finance system.

Banks levies interest on the borrower party basis the parameters such as loan amount, tenor, etc. Interest pricing is determined by configuring various pricing methods such as fixed rate type, floating rate type, interest basis, and so on. The interest payment schedule, and collection period can also be defined for the interest.

This topic contains the following subtopics:

Interest Pricing

This topic describes the information to configure the template for interest pricing. Once created the same can be linked to a product/program/party through Interest Decisioning.

Interest Rate Decisioning

This topic describes the information to map the pricing rule or template to appropriate product/program/party.

2.8.1 Interest Pricing

This topic describes the information to configure the template for interest pricing. Once created the same can be linked to a product/program/party through Interest Decisioning.

This topic contains the following subtopics:

Create Interest Pricing

This topic describes the systematic instruction to define rules for interest pricing based on the bank's requirements.

View Interest Pricing

This topic describes the systematic instruction to view, modify, delete, or authorize interest pricing records that have been created.

 Table 2-31
 Create Interest Pricing - Field Description

Field Name	Description
Pricing Description	Specify a description for the interest pricing.
Rate Type	Select whether the rate type is Fixed or Floating .
Fixed Rate Type	Select whether the fixed rate should be Standard or User Input.
	This field is displayed only if the Rate Type is selected as Fixed .
Rate	Specify the interest pricing rate.
	This field is displayed only if the Fixed Rate Type is selected as User Input .
Alternative Risk Free Rate	Select Yes if the rate code needs to be risk free. Else select No .
	This field is displayed only if the Rate Type is selected as Floating .
Interest Basis	Select the basis for calculation of interest.
	The available options are:
	Actual/Actual
	Actual/360 Actual/365
Rate Code	
Rate Code	Select the base rate code. Required base rates can be configured and are listed in this field.
	Some of the rate code options are:
	 Secured Overnight Finance Rates Swiss Average Rate Overnight
	Sterling Overnight Index Average
	EURO Short Term Rate
	This field is disabled if the Fixed Rate Type is selected as User Input .
Rate Calculation Type	Select the type of rate calculation.
	The available options are: • Down
	Interpolate
	• Round
	• Up
	This field is displayed only if the Rate Type is selected as Floating .
Rate Code Usage	Select whether the rate should be updated automatically whenever there is a base rate change or updated periodically.
	This field is displayed only if the Rate Type is selected as Floating .
Reset Tenor	Specify the tenor to reset the floating rate (in days).
	This field is displayed only if the Rate Type is selected as Floating .

Field Name	Description
Rate Revision Frequency	Select the frequency of updating the rate. The available options are:
	Daily
	Weekly Monthly
	 Monthly Half Yearly
	This field is displayed only if the Rate Code Usage is selected as Periodic .
Tier Based Spread	Select Yes if the spread is tier-based. Else select No.
Spread	Specify the spread value.
	This field is displayed only if the Tier Based Spread is selected as No .
Tier Type	Select the tier type for applying the spread.
	The available options are:
	Amount Based Amount and Tenor Based
	Tenor Based
	This field is displayed only if the Tier Based Spread is selected as
	Yes.
Spread Application	Select Slab to apply the spread slab-wise and Variable to apply it variable-wise.
	This field is enabled only if the Tier Type is selected as Tenor Based .
Amount/Tenor Based Spread	This section displays the following fields to specify spread details for the interest pricing.
Currency	Select the currency of spread.
	This field is displayed only if the Tier Type is selected as Amount Based or Amount and Tenor Based .
From Amount	Displays the lower limit for the amount based spread.
	This field is displayed only if the Tier Type is selected as Amount Based or Amount and Tenor Based .
To Amount	Specify the upper limit for the amount based spread.
	This field is displayed only if the Tier Type is selected as Amount Based or Amount and Tenor Based .
From Tenor	Displays the lower limit for the tenor based spread.
	This field is displayed only if the Tier Type is selected as Amount and Tenor Based or Tenor Based .
To Tenor	Specify the upper limit for the tenor based spread.
	This field is displayed only if the Tier Type is selected as Amount and Tenor Based or Tenor Based .
Spread	Specify the spread value for amount or tenor.
	This field is displayed only if the Tier Based Spread is selected as Yes .
RFR Details	This section appears only if Alternative Risk Free Rate is selected as Yes.

4. Specify the fields on Create Interest Rate Decisioning screen.

Note:

The fields marked as **Required** are mandatory.

Field Name	Description
Product	Select the product to create the rate decisioning for.
Effective Date	Click the calendar icon to select the date from when the rate decisioning is effective.
Expiry Date	Click the calendar icon to select the date when the rate decisioning expires.
Filter Criteria	Select the appropriate filter criteria for the rate decisioning. The available options are: Program Party Based Party Based Program Based Program Customer Category Based Customer Category Based Default
Program	Click the search icon to select the program for which the interest rate is to be mapped. This field appears only if the Filter Criteria is selected as Program Based .
Party	 Click the search icon to select the party for which the interest rate is to be mapped. This field appears only if the Filter Criteria is selected as Party Based.
Customer Category	Click the search icon to select the customer category for which the interest rate is to be mapped. This field appears only if the Filter Criteria is selected as Customer Category Based .
Interest Pricing	Click the search icon to select the interest pricing to be applied for the rate decisioning.
Interest Component	 Select the interest component. The available options are: Interest Penalty on Principal Penalty on Interest This field is defaulted to Interest if the Interest Pricing selected is defined as a risk free rate, and the RFR Method is selected as Lockout or Interest Rollover.
Interest Collection Type	 Select whether the interest collection type is Front Ended or Rear Ended. This field is defaulted to the Rear Ended if the Interest Component is selected as Penalty on Principal or Penalty or Interest. This field is defaulted to Rear Ended if the Interest Pricing selected is defined as a risk free rate, and the RFR Method is selected as Look Back, Lockout, Interest Rollover or Plain.

Table 2-32 Create Interest Rate Decisioning - Field Description

Field Name	Description
Schedule Type	Select whether the interest rate scheduling type is Compounding or Normal .
	This field is defaulted to Normal if the Interest Collection Type is selected as Front Ended and the Interest Component is selected as Interest .
Spread/Margin Computation Method	Select whether the spread/margin computation method is Compounding or Normal .
	This field is displayed only if the Interest Pricing selected is defined as a risk free rate.
Spread Adjustment Computation Method	Select whether the spread adjustment computation method is Compounding or Normal .
	This field is displayed only if the Interest Pricing selected is defined as a risk free rate.
Rate Compounding Method	 Select the rate compounding method. The available options are: CCR (Cumulative Compounding Rate) NCCR (Non Cumulative Compounding Rate)
	This field is displayed only if the Interest Pricing selected is defined as a risk free rate, and Rate Compounding checkbox is selected.
Adhoc Pricing	Switch the toggle ON to enable adhoc pricing if the adhoc limits are utilized during finance disbursement.
Interest Payment Schedule	Select whether the interest collection schedule is Bullet or Monthly.
	This field is displayed only if Interest Collection Type is selected as Rear Ended and Interest Component is selected as Interest .
Interest Collection Period	Select the time period of the month for interest collection. This is calculated from the disbursement date.
	 The available options are: End of Period - The interest will be collected on the last working day of the month.
	 Beginning of Period - The interest will be collected on the 1st working day of the next month. Value Date - The interest will be collected on the same date as
	the disbursement for the subsequent months.
	This field is displayed only if Interest Payment Schedule is selected as Monthly .
Holiday Treatment	Select the day to consider if the interest date falls on a holiday.
	The available options are: Next Business Date

 - Click **Proceed** to delete the record.
- d. Copy To copy the record parameters for creating a new record.
- e. View To view the record details.
- f. **Reopen** To reopen the closed record.

2.9 Limits Structure Maintenance

This topic describes the information to configure limit structures by mapping various limit types to appropriate entities.

Banks can configure hierarchical limit structures by mapping various limit types like finance, credit cover, recourse, and so on, to appropriate entities such as Buyer, Supplier, Import factor, and so on. Sub limits such as product, program and so on, for buyer/supplier parties can also be configured to enable bank to control the exposure at sub limit level. Each entity like buyer, supplier, product, and so on forms a node in the structure.

This topic contains the following subtopics:

- Create Limits Structure
 This topic describes the systematic instruction to create limit structures.
- View Limits

This topic describes the systematic instruction to view, modify, delete, or authorize limits records that have been created.

2.9.1 Create Limits Structure

This topic describes the systematic instruction to create limit structures.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- 2. Under Maintenance, click Limits Structure. Under Limits Structure, click Create Limits. The Create Limits screen displays.

Figure 2	2-55 C	Create L	imits.

3. Specify the fields on **Create Limits** screen.

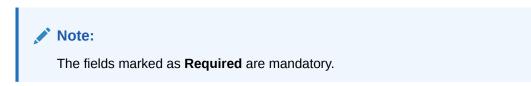

Table 2-33 Create Limits - Field Description

Field Name	Description
Structure Description	Specify the description for the limits structure being created.
Limit Type	Select the type of limit to map with the entity. The available options are: • Advance Payment • Assignment • Concentrate • Credit Cover
	 Credit Cover Finance Invoice Main Recourse Non-Recourse Committed Uncommitted
Entity	Select the entity for which limits should be set. The available options are: Buyer Import Factor Insurance Company Pool Product Program Supplier
Buyer	Click the search icon to select the buyer for whom the limit needs to be defined.
Import Factor	Click the search icon to select the import factor for whom the limit needs to be defined.
Insurance Company	Click the search icon to select the insurance company for whom the limit needs to be defined.

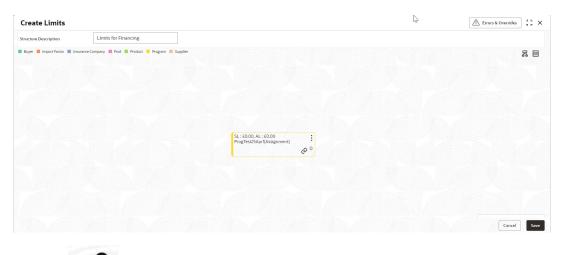

Field Name	Description
Pool Id	Click the search icon to select the pool id for whom the limit needs to be defined.
Pool Description	Specify the description for the pool id selected.
Product	Click the search icon to select the product for whom the limit needs to be defined.
Program	Click the search icon to select the program for whom the limit needs to be defined.
Supplier	Click the search icon to select the supplier for whom the limit needs to be defined.

Table 2-33 (Cont.) Create Limits - Field Description

4. Click Add to add the selected entity to the structure pane.

A tile or a node for the entity is created in the structure pane.

Figure 2-56 Entity added to Structure Pane

5.

Click the **Click the** create a child node.

An overlay window displays. Select the limit type, entity and the entity details to add a child node under the main node.

Figure 2-57 Create Limits - Child Node Overlay

8. Specify the fields on **Create Insurance** screen.

Note:

The fields marked as **Required** are mandatory.

Field Name	Description
Limit Type	Displays the type of limit selected.
Entity	Displays the entity for which the limit is being defined.
Entity Id / Code	Displays the unique ID or code of the selected entity.
Entity Name	Displays the name of the selected entity.
External Line Id	Click the search icon to select the limit line ID in case the limits are to be retrieved from an external system. The sanctioned limit is fetched from the external system and populated in Sanctioned Limit , which then cannot be edited.
Limit Currency	Select the currency in which the limits are to be defined.
Limit Freeze	Switch this toggle ON to stop all limit-booking transactions in which the entity is involved, with respect to the limit structure. The transactions can be finance disbursement for invoices, purchase orders, or debit notes.
	Releasing of limits are however not affected by this toggle. Therefore, transactions such as settlements, continue to be processed even if this toggle is switched ON.
Add Policy	Switch this toggle ON to link an insurance policy to the entity.
	This toggle appears only for a Buyer or Supplier entity type, when the main node is Insurance Company .
Link Policy	Click the search icon to select the required insurance policy to link.
	This field is displayed only if the Add Policy toggle is enabled.
Policy Allocation Amount	Specify the amount to be allocated from the policy. By default, the actual policy amount is displayed.
	This field is displayed only if the Add Policy toggle is enabled.
Add	Click this button to add the selected policy to the grid.
Reset	Click this button to clear the selected values in the fields.
Overall Approved Limit	Displays the overall approved limit for the selected entity.
Sanctioned Limit	Specify the limit amount to be allotted to the entity for the selected limit type.
	If an external limits system is linked, this field displays the limit value fetched from the system and the field becomes non-editable.
Available Limit	Displays the limit amount that is available to the entity.
Utilized Limit	Displays the limit amount that has been utilized.
Blocked Limit	Displays the limit amount that has been blocked or reserved for in progress transactions.

Table 2-34 Limit Details - Field Description

Field Name	Description					
Effective From	Click the calendar icon and select the date from when the limit is effective.					
Expires On	Click the calendar icon and select the date when the limit expires.					
Adhoc Limit	Specify the adhoc amount to be allotted if the available limit falls short of the required amount for a specific transaction.					
Available Adhoc Limit	Displays the adhoc limit that is available to the entity.					
Utilized Adhoc Limit	Displays the adhoc limit amount that has been utilized.					
Blocked Adhoc Limit	Displays the adhoc limit amount that has been blocked or reserved for in progress transactions.					
Adhoc Limit Effective Date	Click the calendar icon and select the date from when the adhoc limit is effective.					
Adhoc Limit Expiry Date	Click the calendar icon and select the date when the adhoc limit expires.					
Exchange Rate	Displays the exchange rate between the parent entity's limit currency and the child entity's limit currency.					
Interchangeability Allowed	Switch this toggle ON to set the sanctioned limit of each child entity to the same value as that of the parent entity.					
	If this toggle is switched off, then the sum of sanctioned limits of all child entities cannot exceed (must be less than or equal) that of the parent entity.					
Add Structure	Switch the toggle ON to link an existing limit structure to the entity. This linking can only be done for Buyer or Supplier entity types. This feature is used for linking the insurance or import factor limits to the buyer/supplier.					
Root Entity	Select the root entity to be added. This field is displayed only if Add Structure toggle is enabled.					
Link Structure	Click the search icon to select the required structure to link.					
	This field is displayed only if Add Structure toggle is enabled.					
% Allocation	Displays the allocated limit percentage for the entity. This field displays the following value: (Sanctioned Limit + Adhoc Limit)/Total Sanctioned Limit.					
	This field is displayed only if Add Structure toggle is enabled.					
View Details	Click this hyperlink to view the details of the linked structure.					
	This field is displayed only if Add Structure toggle is enabled.					
Add	Click this button to add the limit structure to the grid.					
	This field is displayed only if Add Structure toggle is enabled.					
Reset	Click this button to clear the selected values.					
	This field is displayed only if Add Structure toggle is enabled.					
Total Sanctioned Limit	Displays the total sanctioned limit.					
Total Available Limit	Displays the total available limit.					
Total Utilized Limit	Displays the total utilized limit.					
Total Block Limit	Displays the total blocked limit.					

Table 2-34	(Cont.) Limit Details - Field Description

9. Click Add Details to save the limit details for the entity.

The sum of the sanctioned and adhoc limits appears in the node tile.

Figure 2-60 Post Addition of Limit Details

Note:

If the **Limits Freeze** toggle is enabled for a specific node, then it is displayed in the node tile.

- **10.** Perform the following steps to take action on the entity nodes.
 - Click Options in any node and click Edit to modify the limit details, if required.
 - Click Options in the main entity node and click Delete Hierarchy to delete all the nodes created.
 - Click **Options** in the child entity node and click **Delete** to delete the particular node.
- **11.** Click **Save** to save the record and send it for authorization.

2.9.2 View Limits

This topic describes the systematic instruction to view, modify, delete, or authorize limits records that have been created.

A tile is present for each record that has been created. The bottom portion of each record-tile displays the following:

- The status, whether Authorized, Unauthorized, or Rejected
- Open or Closed
- The number of times the record has been submitted by the Maker added.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Maintenance.
- Under Maintenance, click Limits Structure. Under Limits Structure, click View Limits. The View Limits screen displays.

- 3. Filter the records in the View screen:
 - a. Click **Search** icon to view the filters. The user can filter the records by Structure Description, Limit Type, Entity Type, Entity Id, Entity Description, Record Status, and Authorization Status.
 - b. Select the required filter criteria and click **Search** button to filter the records.
 - c. Click Reset to reset the filter criteria.
- 4. Click Refresh icon to refresh the records.
- 5. Click **Options** icon and then, select any of the following options:
 - Unlock To modify the record details. Refer to the Create screen for the field level details.
 - Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record and click Approve to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
 - c. Delete/Close To remove the record.
 - Optional: In the confirmation pop-up window, click View to view the record details.
 - Click Proceed to delete the record.
 - d. Copy To copy the record parameters for creating a new record.
 - e. View To view the record details.
 - f. Reopen To reopen the closed record.

3 Finance Disbursement

This topic describes the information on the disbursement initiation and processing of the disbursement task.

The Bank user can manually initiate a finance on behalf of a corporate customer, for funds required against financial instruments such as invoices, debit notes, and purchase orders. To initiate finances manually, refer to **Initiate Finance** section in *Receivables and Payables User Guide*.

This topic contains the following subtopics:

• Processing Disbursement Task This topic describes the steps to process the disbursement record.

3.1 Processing Disbursement Task

This topic describes the steps to process the disbursement record.

When a finance is manually initiated, a disbursement task is created in the system.

Manual disbursement tasks are also generated in the following cases:

- When automatic disbursement fails.
- When a borrower has overdue transactions (only if the configuration flag Allow Auto **Processing for Overdue Borrowers** has been disabled).
- When a borrower is delinquent (only if the configuration flag **Allow Disbursements for NPA Borrowers** has been enabled).
- When finance is initiated for overdue invoices and debit notes.

Note:

Only authorized users can process and authorize the disbursement tasks.

The disbursement tasks are segregated into the following data segments:

- Basic Info
- Pre-Shipment Liquidation
- Party
- Limits
- Interest
- Charges
- Accounting
- Summary

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Tasks.
- 2. Under Tasks, click Finance. Under Finance, click Free Tasks.

The Finance - Free Tasks screen displays.

- 3. Perform any of the below action from the Free Tasks screen.
 - Click the Acquire and Edit link beside the required disbursement tasks to process.
 - Select the checkbox of the required tasks and click Acquire button above the grid to acquire multiple tasks. Once you acquire a task, it is moved to the My Tasks list. You can then navigate to My Tasks screen and click Edit link beside the required disbursement tasks to process.

Note:

The following information is displayed at the top of the disbursement tasks screen for each data segment.

- The reference number, the stage, and the operation name of the transaction acquired for processing.
- · Click Remarks button to add any comments about the transaction .
- Click **Documents** button to upload any new documents or view the uploaded documents relevant to the transaction.

Basic Info

4. Click the Acquire and Edit link beside the required disbursement tasks.

The **Basic Info** screen displays.

Figure 3-2 Disbursement - Basic Info

5. Specify the fields on **Basic Info** screen.

✓ Note: The fields marked as Required are mandatory.

Table 3-1 Basic Info - Field Description

Field Name	Description
Branch	Select the branch where the disbursement is being processed. By default, the logged-in user's branch is displayed.
Program	Displays the name of the program that is linked to the receivables being financed.
Product	Displays the name of the product associated with the program.
Anchor	Displays the name of the anchor party in the program.
Linked Receivables/PO	Click the link to view a list of receivables (invoices/debit notes) / PO that is being financed.
Spoke	Displays the name of the counter party in the program.
Start Date	Displays the start date of the finance. By default, it is the current business date.
Tenor	Specify the tenor of the finance. It should be lesser than the maximum tenor and greater than the minimum tenor as defined in product/program and spoke parameter.
	The tenor of the finance gets defaulted basis start date and maturity date.
Maturity Date	Specify the maturity date of the finance. Maturity date gets calculated basis maturity date parameter selected at product level.
Grace Days	Specify the number of days, post maturity, within which the finance can be repaid without incurring penalty.
Past Due Date	Specify the new maturity date post the initial finance maturity date. By default, the date displayed is Maturity Date + Grace Days.
Total Receivable/PO Amount	Displays the total amount of the receivables/PO being financed.

Field Name	Description					
Finance (%)	Specify the percentage of the total receivable/PO amount to be financed. The finance percentage should be less than the maximum finance percentage and greater than the minimum finance percentage as configured in product/program and spoke parameters					
Currency	Select the currency of the finance amount.					
Finance Amount	Specify the amount to be financed. By default, this field displays the Finance (%) value of the Total Receivable Amount.					
Exchange Rate	Specify the exchange rate between the receivable/PO amount currency and the finance currency.					
Processing Date	Displays the date of processing of the disbursement.					
Preferred Disbursement Mode	 Select the preferred mode of finance disbursement. The available options are: Account Transfer Cheque EFT 					
Adhoc Limits Utilized	This checkbox is auto-selected if adhoc limits are being utilized in the transaction.					
Skip Pre-Shipment Liquidation	Switch the toggle ON to skip the liquidation of Pre-Shipment finance from the proceeds of the post-shipment finance. This field is displayed only if any outstanding pre-shipment finance is identified for the respective parties of the post-shipment finance.					

Table 3-1 (Cont.) Basic Info - Field Description

- 6. Perform any of the below actions from the **Basic Info** screen.
 - Click Next to go to the Pre-Shipment Liquidation screen.
 - Click Save and Close to save the details and complete the processing stage of the disbursement.

Note:

If the **Disbursement Auth Required** toggle is enabled for the program associated with the transaction, an approval task is created in the system.

- Click **Reject** to purge the disbursement transaction.
- Click Hold to move the transaction to the Hold Tasks list.
- Click **Cancel** to cancel the transaction and return to the **Free Tasks** screen.

Pre-Shipment Liquidation

Pre-Shipment Liquidation screen displays the details of the pre-shipment finances which will be liquidated on completion of the post-shipment disbursement. This tab is displayed only if the **Skip Pre-Shipment Liquidation** toggle is disabled and if there are any outstanding pre-shipment finances identified for the buyer-seller combination.

7. Click **Next** on the **Basic Info** tab.

The Pre-Shipment Liquidation screen displays.

Table 3-2	Pre-Shipment Lic	uidation - Field Description

Field Name	Description
Branch	Displays the branch where the disbursement is being processed. By default, the logged-in user's branch is displayed.
Product	Displays the name of the product associated with the program.
Program	Displays the name of the program that is linked to the receivables being financed.
Anchor	Displays the name of the anchor party in the program.
Linked Receivables/PO	Click the link to view a list of receivables (invoices/debit notes) / PO that is being financed.
Spoke	Displays the name of the counter party in the program.
Start Date	Displays the start date of the finance. By default, it is the current business date.
Maturity Date	Displays the maturity date of the finance. Maturity date gets calculated basis maturity date parameter selected at product level.
Total Receivable/PO Amount	Displays the total amount of the receivables/PO being financed.
Finance (%)	Displays the percentage of the total receivable/PO amount to be financed.
Finance Amount	Displays the amount that has been financed. By default, this field displays the Finance (%) value of the total receivable amount.
Exchange Rate	Displays the exchange rate between the receivable/PO amount currency and the finance currency.
Processing Date	Displays the date of processing of the disbursement.
Pre-Shipment Settlement Amount	Displays the total pre-shipment settlement amount appropriated against the relevant outstanding pre-shipment finances.

Field Name	Description
Net Disbursed Amount	Displays the disbursed amount from post-shipment finance i.e., Net Disbursed Amount = Post-Shipment Finance Amount – Pre-Shipment Settlement Amount.
Pre-Shipment to be Liquidated	The list of pre-shipment finances to be liquidated are displayed in this section.
Finance Reference Number	Displays the reference number of the pre-shipment finance settled. Click the hyperlink data to view more details of the finance.
Finance Due Date	Displays the maturity date of the pre-shipment finance.
Finance Outstanding	Displays the total outstanding amount of the pre-shipment finance.
Finance Appropriated (Invoice Finance Currency)	Displays the amount appropriated against the total outstanding of the pre-shipment finance in invoice currency.
Exchange Rate	Displays the exchange rate between invoice finance currency and PO finance currency.
Finance Appropriated (Purchase Order Finance Currency)	Displays the amount appropriated against the total outstanding of the pre-shipment finance in purchase order currency.
Principal Outstanding	Displays the outstanding principal amount of the pre-shipment finance.
Principal Appropriated	Displays the amount appropriated against the outstanding principal of the pre-shipment finance.
Interest Outstanding	Displays the outstanding interest amount of the pre-shipment finance.
Interest Appropriated	Displays the amount appropriated against the outstanding interest of the pre-shipment finance.
Penalty On Interest Outstanding	Displays the outstanding penalty on interest amount of the pre- shipment finance.
Penalty On Interest Appropriated	Displays the amount appropriated against the outstanding penalty on interest of the pre-shipment finance.
Penalty On Principal Outstanding	Displays the outstanding penalty on principal amount of the pre- shipment finance.
Penalty On Principal Appropriated	Displays the amount appropriated against the outstanding penalty on principal of the pre-shipment finance.

Table 3-2 (Cont.) Pre-Shipment Liquidation - Field Description

- 9. Perform any of the below actions from the **Pre-Shipment Liquidation** screen.
 - Click **Next** to go to the **Party** screen.
 - Click Save and Close to save the details and complete the processing stage of the disbursement.

Note:

If the **Disbursement Auth Required** toggle is enabled for the program associated with the transaction, an approval task is created in the system.

- Click **Back** to go to the **Basic Info** screen.
- Click **Reject** to purge the disbursement transaction.
- Click Hold to move the transaction to the Hold Tasks list.
- Click **Cancel** to cancel the transaction and return to the **Free Tasks** screen.

Figure 3-4 Disbursement - Party

11. Specify the fields on **Party** screen.

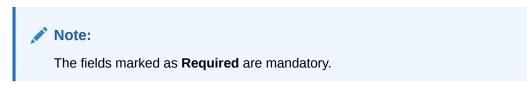

Table 3-3 Party - Field Description

Field Name	Description
Branch	Displays the branch where the disbursement is being processed. By default, the logged-in user's branch is displayed.
Product	Displays the name of the product associated with the program.
Program	Displays the name of the program that is linked to the receivables being financed.
Anchor	Displays the name of the anchor party in the program.
Linked Receivables/PO	Click the link to view a list of receivables (invoices/debit notes) / PO that is being financed.
Spoke	Displays the name of the counter party in the program.
Start Date	Displays the start date of the finance. By default, it is the current business date.
Maturity Date	Displays the maturity date of the finance. Maturity date gets calculated basis maturity date parameter selected at product level.
Total Receivable/PO Amount	Displays the total amount of the receivables/PO being financed.
Finance (%)	Displays the percentage of the total receivable/PO amount to be financed.

Field Name	Description
Finance Amount	Displays the amount that has been financed. By default, this field displays the Finance (%) value of the total receivable amount.
Exchange Rate	Displays the exchange rate between the receivable/PO amount currency and the finance currency.
Processing Date	Displays the date of processing of the disbursement.
Pre-Shipment Settlement Amount	Displays the total pre-shipment settlement amount appropriated against the relevant outstanding pre-shipment finances.
	This field is displayed only if Pre-Shipment Liquidation is applicable.
Net Disbursed Amount	Displays the disbursed amount from post-shipment finance i.e., Net Disbursed Amount = Post-Shipment Finance Amount – Pre-Shipment Settlement Amount.
	This field is displayed only if Pre-Shipment Liquidation is applicable.
Party Details	Parties with specific roles in the program can be added in this section.
Party Details	Select the party role to be added.
	The available options are:
	Buyer Sumplier
	Supplier Import Factor
	Export Factor
	Insurance
	Beneficiary/Counter Party
Search Party	Click the search icon to select the party.
Division	Click the search icon to select the division code of the party.
Address	Specify the address of the selected party.
Add New Row	Click this button to add the selected party to the grid.
Party Role	Displays the role of the party.
Party Id	Displays the unique ID of the party.
Party Name	Displays the name of the party
Address	Displays the address of the party.
Division Code	Displays the division code of the party.
Division Name	Displays the division name of the party.
Action	Click Options icon to view the actions that can be taken on the party record.

Table 3-3 (Cont.) Party - Field Description

12. Perform the following steps to take action on the parties in the grid:

- Click Add New Row to add more parties.
- Select the record in the grid and click **Options** icon under the **Actions** column and then click **Delete** to remove the party.
- **13.** Perform any of the below actions from the **Party** screen.
 - Click Next to go to the Limits screen.
 - Click Save and Close to save the details and complete the processing stage of the disbursement.

Note:

If the **Disbursement Auth Required** toggle is enabled for the program associated with the transaction, an approval task is created in the system.

- Click Back to go to the Pre-Shipment Liquidation screen.
- Click Reject to purge the disbursement transaction.
- Click Hold to move the transaction to the Hold Tasks list.
- Click Cancel to cancel the transaction and return to the Free Tasks screen.

Limits

Limits are assigned to corporate parties and their associated entities (counter parties, products, programs, and so on) for the finances being requested. In some cases, apart from the sanctioned main limits, adhoc limits are also assigned to these entities. Adhoc limits will be booked once the main limits are exhausted. In other words, adhoc limits are utilized if a finance request exceeds the available main limits, but not the total available limits. In such cases, two separate disbursement transactions are created – one for the main limits utilized, and one for the adhoc limits utilized. The interest rates applicable may also differ for the finance availed under the main limit and the finance availed under the adhoc limit.

If there is a limit freeze on any of the entities involved, then the disbursement transaction cannot be processed. It can only be processed once the limit freeze is lifted.

14. Click Next on the Party tab.

The Limits screen displays.

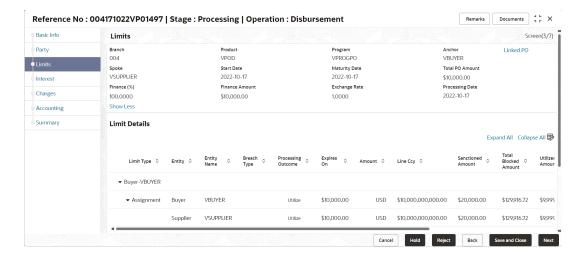

Figure 3-5 Disbursement - Limits

Note:

When the main limits are being utilized, the Limit Details grid displays details related to the main limits. You can add columns related to the adhoc limits by clicking **Add/Remove Columns** icon, if required. If adhoc limits are being utilized, then the Limit Details grid displays the Sanctioned Adhoc Amount, Utilized Adhoc Amount, and Available Adhoc Amount columns. You can add the columns related to the Main Limits using **Add/Remove Columns** icon, if required.

15. Specify the fields on Limits screen.

The fields marked as **Required** are mandatory.

Table 3-4 Limits - Field Description

Field Name	Description
Branch	Displays the branch where the disbursement is being processed. By default, the logged-in user's branch is displayed.
Product	Displays the name of the product associated with the program.
Program	Displays the name of the program that is linked to the receivables being financed.
Anchor	Displays the name of the anchor party in the program.
Linked Receivables/PO	Click the link to view a list of receivables (invoices/debit notes) / PO that is being financed.
Spoke	Displays the name of the counter party in the program.
Start Date	Displays the start date of the finance. By default, it is the current business date.
Maturity Date	Displays the maturity date of the finance. Maturity date gets calculated basis maturity date parameter selected at product level.
Total Receivable/PO Amount	Displays the total amount of the receivables/PO being financed.
Finance (%)	Displays the percentage of the total receivable/PO amount to be financed.
Finance Amount	Displays the amount that has been financed. By default, this field displays the Finance (%) value of the total receivable amount.
Exchange Rate	Displays the exchange rate between the receivable/PO amount currency and the finance currency.
Processing Date	Displays the date of processing of the disbursement.
Pre-Shipment Settlement Amount	Displays the total pre-shipment settlement amount appropriated against the relevant outstanding pre-shipment finances.
	This field is displayed only if Pre-Shipment Liquidation is applicable.

Field Name	Description
Net Disbursed Amount	Displays the disbursed amount from post-shipment finance i.e., Net Disbursed Amount = Post-Shipment Finance Amount – Pre-Shipment Settlement Amount.
	This field is displayed only if Pre-Shipment Liquidation is applicable.
Limit Details	Limit details of the entity that is being financed is displayed in this section.
Limit Type	Displays a label of the entity and the linked limit type.
Entity	Displays the entity – Anchor / Product / Program / Spoke and so on.
Entity Name	Displays the name of the entity.
Breach Type	Displays any limit breach exception that has occurred with respect to the entity. (Limits Frozen, Amount Breach, Limits Expired).
Processing Outcome	 Displays the action that will be taken on the limit as a result of disbursement. Utilize - If the limit is being booked. Stop - If in case of an exception, the transaction should be blocked and not allowed to be processed further. Skip - If in case of an exception, the transaction is to be processed without limit booking. This behavior is driven by the credit limit mapping as configured in product parameters.
Amount	Displays the finance amount.
Line Ccy	Displays the currency of the limit line.
Exchange Rate	Displays the exchange rate between the finance amount currency and the line currency.
Amount (In line CCY)	Displays the finance amount in line currency.
Sanctioned Amount	Displays the limit amount assigned to the entity.
Total Blocked Amount	Displays the total amount that has been blocked for finances that are currently being processed, with respect to the entity.
Total Utilized Amount	Displays the limit amount that has already been utilized.
Available Amount	Displays the limit amount available for financing.
Line Id	Displays the unique ID of the limit line of the entity.
Action	Displays the action being taken on the finance amount earmarked for disbursement.
Actual Available Limits	Displays the actual limit available to the entity for financing.

Table 3-4 (Cont.) Limits - Field Description

16. Perform any of the below actions from the **Limits** screen.

- Click **Next** to go to the **Interest** screen.
- Click **Save and Close** to save the details and complete the processing stage of the disbursement.

Note:

If the **Disbursement Auth Required** toggle is enabled for the program associated with the transaction, an approval task is created in the system.

• Click Back to go to the Party screen.

- Click **Reject** to purge the disbursement transaction.
- Click Hold to move the transaction to the Hold Tasks list.
- Click Cancel to cancel the transaction and return to the Free Tasks screen.

Interest

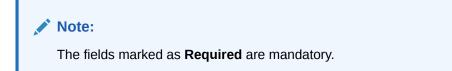

17. Click Next on the Limits tab.

The Interest screen displays.

- 28. Review the details of the disbursement transaction and perform any of the following action from the **Summary** screen.
 - Click each tile to view the detailed information of the data segments.
 - Click Save and Close to save the details and complete the processing stage of the disbursement.

Note:

If the **Disbursement Auth Required** toggle is enabled for the program associated with the transaction, an approval task is created in the system.

- Click Back to go to the Accounting screen.
- Click **Reject** to purge the disbursement transaction.
- Click Hold to move the transaction to the Hold Tasks list.
- Click **Cancel** to cancel the transaction and return to the **Free Tasks** screen.

Finance Settlement

This topic describes the information to initiate settlement and processing the settlement task.

Finance Settlement functionality enables the banks to settle outstanding finances/loans for corporate customers in the supp;y chain finance system. Based on your role, you can initiate the settlement of a loan on behalf of the corporate customer. The settlement request can either be initiated from the **Finance Settlement** screen or through file upload (payment file).

The Finance Settlement process involves the below steps:

- Initiate Finance Settlement
 This topic describes the systematic instruction to initiate finance settlement to settle the
 outstanding finances/loans for corporate customers.
- Processing Settlement Task This topic describes the steps to process the settlement record.

4.1 Initiate Finance Settlement

This topic describes the systematic instruction to initiate finance settlement to settle the outstanding finances/loans for corporate customers.

A settlement transaction is initiated automatically based on finance-payment reconciliation, in which case a settlement task record is created in the **Free Tasks**.

The user can manually initiate a settlement transaction in the **Finance Settlement** screen. You can search and select the finances to settle, and initiate the settlement process. Multiple finances can be selected for settlement. For each finance reference number you select, a settlement transaction is created under **Free Tasks**.

Specify User ID and Password, and login to Home screen.

 On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Finance Settlement.

The Finance Settlement screen displays.

PARTIAL_SETTLED		

8. Click Initiate Settlement to initiate settlement against the selected finances.

A settlement task is created in the system based on the associated program/product parameters.

4.2 Processing Settlement Task

This topic describes the steps to process the settlement record.

When a finance settlement is initiated, a settlement task is created in the system based on the associated program/product parameters.

Settlement Tasks are also initiated automatically basis configuration in the following cases:

- When a payment is made against an invoice and an underlying finance is outstanding.
- When invoice disbursement proceeds are used to liquidate outstanding pre-shipment finances.

Note:

Only authorized users can process and authorize the settlement tasks.

The settlement tasks are segregated into the following data segments:

- Basic Info
- Party
- Limits
- Interest
- Charges

- Accounting
- Summary

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Tasks.
- 2. Under Tasks, click Finance. Under Finance, click Free Tasks.

The Finance - Free Tasks screen displays.

 Table 4-4
 Basic Info - Field Description

Field Name	Description
Basic Info	Basic information of the finance being settled is displayed in this section.
Branch	Displays the branch where the settlement is being processed. By default, the logged-in user's branch is displayed.
Program	Displays the name of the program that is linked to the receivables that have been financed.

Field Name	Description
Product	Displays the name of the product associated with the program.
Anchor	Displays the name of the anchor party in the program.
Linked Receivables/PO	Click the link to view a list of receivables (invoices/debit notes) / PO that have been financed.
Spoke	Displays the name of the counter party in the program.
Start Date	Displays the start date of the finance. By default, it is the current business date.
Tenor	Displays the tenor of the finance. The tenor of the finance gets defaulted basis start date and maturity date.
Maturity Date	Displays the maturity date of the finance. Maturity date gets calculated basis maturity date parameter selected at product level.
Total Receivable/PO Amount	Displays the total amount of the receivables/PO that have been financed.
Finance (%)	Displays the percentage of the total receivable/PO amount that have been financed.
Currency	Displays the currency of the finance amount.
Finance Amount	Displays the amount that has been financed. By default, this field displays the Finance (%) value of the Total Receivable Amount.
Exchange Rate	Displays the exchange rate between the receivable/PO amount currency and the finance currency.
Settlement Details	Settlement details of the finance is displayed in this section.
Settlement Ref No	Displays the reference number of the settlement.
Payment Mode	Displays the mode of payment of the settlement amount.
Payment Amount	Enter the total amount being paid by the payment party.
Payment Party	Displays the name of the party making the payment.
Settlement Processing Date	Displays the date of processing the settlement.
Settlement / Value Date	Displays the date on which the settlement process was initiated.
Exchange Rate	Displays the exchange rate between the finance currency and the settlement currency.
Appropriated Payment Amount	Displays the amount that is appropriated for the settlement of the selected finances.
Grace Days	Displays the number of days past the finance due date, within which the finance can be settled without penalty.
Past Due Date	Displays the new due date post the initial finance maturity date.
Post-Shipment Disbursement Details	This section is displayed only when post-shipment disbursement proceeds are used to liquidate a pre-shipment finance.
Finance Reference Number	Displays the reference number of the post-shipment finance. Click the hyperlink in the Finance Reference Number field to view more details on the finance
Settlement Processing Date	Displays the date of processing of the settlement.
Finance Start Date	Displays the start date of the finance.
Finance Maturity Date	Displays the maturity date of the finance.
Finance Amount	Displays the amount financed.
Pre-Shipment Settlement Amount	Displays the total pre-shipment settlement amount appropriated against the relevant outstanding pre-shipment finances.

Table 4-4 (Cont.) Basic Info - Field Description

Note:

When the main limits are being utilized, the Limit Details grid displays details related to the main limits. You can add columns related to the adhoc limits by clicking **Add/Remove Columns** icon, if required. If adhoc limits are being utilized, then the Limit Details grid displays the Sanctioned Adhoc Amount, Utilized Adhoc Amount, and Available Adhoc Amount columns. You can add the columns related to the Main Limits using **Add/Remove Columns** icon, if required.

12. Specify the fields on Limits screen.

Note:

The fields marked as **Required** are mandatory.

For more information on fields, refer to the field description table.

Table 4-6 Limits - Field Description

Field Name	Description
Branch	Displays the branch code where the settlement is being processed. By default, the logged-in user's branch code is displayed.

Field Name	Description					
Product	Displays the name of the product associated with the program.					
Program	Displays the name of the program that is linked to the receivables that have been financed.					
Anchor	Displays the name of the anchor party in the program.					
Linked Receivables/PO	Click the link to view a list of receivables (invoices/debit notes) / PO that have been financed.					
Spoke	Displays the name of the counter party in the program.					
Settlement Processing Date	Displays the start date of the finance. By default, it is the current business date.					
Settlement Processing Date	Displays the date of processing the settlement.					
Settlement / Value Date	Displays the actual date of settlement.					
Settlement Amount	Displays the amount being settled.					
Limit Details	Limit details of the entity that is being settled is displayed in thi section.					
Limit Type	Displays a label of the entity and the linked limit type.					
Entity	Displays the entity – Anchor / Product / Program / Spoke and so on.					
Entity Name	Displays the name of the entity.					
Breach Type	Displays any limit breach exception that has occurred with respect the entity. (Limits Frozen, Amount Breach, Limits Expired).					
Processing Outcome	 Displays the action that will be taken on the limit as a result of settlement. Utilize - If the limit is being booked. Stop - If in case of an exception, the transaction should be blocked and not allowed to be processed further. Skip - If in case of an exception, the transaction is to be processed without limit booking. This behavior is driven by the credit limit mapping as configured in 					
-	product parameters.					
Amount	Displays the settlement amount with respect to the entity.					
Line Ccy Exchange Rate	Displays the currency of the limit line. Displays the exchange rate between the settlement amount currency and the line currency.					
Amount (In line CCY)	Displays the settlement amount in line currency.					
Sanctioned Amount	Displays the limit amount assigned to the entity, in line currency.					
Total Blocked Amount	Displays the total amount that has been blocked for finances that are currently being processed, with respect to the entity.					
Total Utilized Amount	Displays the limit amount that has already been utilized.					
Available Amount	Displays the limit amount available to the entity for financing.					
Line Id	Displays the unique ID of the limit line of the entity.					
Action	Displays the action being taken on the amount being settled.					
Actual Available Limits	Displays the actual limit available to the entity for financing.					

Table 4-6 (Cont.) Limits - Field Description

13. Perform any of the below actions from the **Limits** screen.

- Click **Next** to go to the **Interest** screen.
- Click **Save and Close** to save the details and complete the processing stage of the settlement.

If the **Settlement Auth Required** toggle is enabled for the program associated with the transaction, an approval task is created in the system.

- Click **Back** to go to the **Party** screen.
- Click **Reject** to purge the settlement transaction.
- Click Hold to move the transaction to the Hold Tasks list.
- Click Cancel to cancel the transaction and return to the Free Tasks screen.

Figure 4-15 Settlement - Summary

- **25.** Review the details of the settlement transaction and perform any of the following action from the **Summary** screen.
 - Click each tile to view the detailed information of the data segments.
 - Click **Save and Close** to save the details and complete the processing stage of the settlement.

Note:

If the **Settlement Auth Required** toggle is enabled for the program associated with the transaction, an approval task is created in the system. Once approved, the finance gets settled in the core lending system, which inturn will return the settlement status to Supply Chain Finance system.

- Click **Back** to go to the **Accounting** screen.
- Click **Reject** to purge the settlement transaction.
- Click Hold to move the transaction to the Hold Tasks list.
- Click Cancel to cancel the transaction and return to the Free Tasks screen.

Finance Amendment

This topic describes the information to initiate amendment and processing the amendment task.

Finance Amendment functionality enables the banks to modify the tenor of the outstanding finances/loans for corporate customers in the supply chain finance system. Based on your role, you can initiate the amendment of a loan on behalf of the corporate customer. The amendment request can initiated from the **Finance Amendment** screen.

The Finance Amendment process involves the below steps:

- Initiate Finance Amendment
 This topic describes the systematic instruction to initiate finance amendment to modify the outstanding finances/loans for corporate customers.
- Processing Amendment Task This topic describes the steps to process the amendment record.

5.1 Initiate Finance Amendment

This topic describes the systematic instruction to initiate finance amendment to modify the outstanding finances/loans for corporate customers.

The user can manually initiate an amendment transaction in the **Finance Amendment** screen. You can search and select the finances to amend, and initiate the amendment process. Multiple finances can be selected for amendment. For each finance reference number you select, an amendment transaction is created under **Free Tasks**.

Specify User ID and Password, and login to Home screen.

1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Finance Amendment.

The Finance Amendment screen displays.

Program	Displays the name of the program that is linked to the receivables that have been financed.
Supplier	Displays the name of the supplier for the finance.
Buyer	Displays the name of the buyer for the finance.
Finance Start Date	Displays the start date of the finance.
Tenor	Displays the tenor of the finance.
Finance Maturity Date	Displays the maturity date of the finance.
Grace Days	Displays the number of days past the finance due date, within which the finance can be settled without penalty.
Past Due Date	Displays the new due date post the initial finance maturity date.
Finance Amount	Displays the amount that has been financed.
O/S Amount	Displays the total outstanding amount of the finance.
View Amendments	Click the hyperlink to view the modified details of the finance amendment transaction.
	This field column appears only if any finance(s) is modified for amendment.
Amendment section	This field displays the following fields to modify the finance details to inititae amendment.
Maturity Date	Enter the new maturity date of the finance. This date has to be greater than the current business date.

Field Name	Description
Grace Days	Displays the number of days past the finance due date, within which the finance can be settled without penalty.
	This field is displayed only if a single finance is selected.
Past Due Date	Displays the new due date post the initial finance maturity date. This field is displayed only if a single finance is selected.
Total Finances	Displays the total number of the finance(s) amended.
Total Finance Amount	Displays the total finance amount of the finance(s) amended.

Table 5-2 (Cont.) List of Finances - Field Description

- 4. Click the checkbox to select the required finance(s) for which amendment needs to be initiated. Switch the **Bulk Amendment** toggle ON to select multiple finances.
 - Click the hyperlink in the **Finance Reference Number** column to view more details on the finance. The **Finance Details** pop-up screen displays.

Figure 5-3 Finance Details

Figure 5-4 View Amendment Details

- 7. Click **Submit** to initiate amendment against the selected finances.
 - Click Cancel to cancel the amendment initiation process.

An amendment task is created in the system based on the associated program/product parameters.

5.2 Processing Amendment Task

This topic describes the steps to process the amendment record.

When a finance amendment is initiated, an amendment task is created in the system based on the associated program/product parameters.

Note:

Only authorized users can process and authorize the amendment tasks.

The amendment tasks are segregated into the following data segments:

- Basic Info
- Party
- Interest
- Charges
- Accounting
- Amendment
- Limits
- Summary

Specify User ID and Password, and login to Home screen.

1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Tasks.

2. Under Tasks, click Finance. Under Finance, click Free Tasks.

The Finance - Free Tasks screen displays.

15. Specify the fields on **Charges** screen.

Table 5-6 Charges - Field Description

Field Name	Description
Branch	Displays the branch where the amendment is being processed. By default, the logged-in user's branch is displayed.
Program	Displays the name of the program that is linked to the receivables that have been financed.
Product	Displays the name of the product associated with the program.
Anchor	Displays the name of the anchor party in the program.
Linked Receivables/PO	Click the link to view the list of receivables (invoices/debit notes) / PO that have been financed.

Field Name	Description			
Spoke	Displays the name of the counter party in the program.			
Start Date	Displays the start date of the finance. By default, it is the current business date.			
Tenor	Displays the tenor of the finance. The tenor of the finance gets defaulted basis start date and maturity date.			
Maturity Date	Displays the maturity date of the finance. Maturity date gets calculated basis maturity date parameter selected at product level.			
Grace Days	Displays the number of days past the finance due date, within which the finance can be settled without penalty.			
Past Due Date	Displays the new due date post the initial finance maturity date.			
Total Receivable/PO Amount	Displays the total amount of the receivables/PO that have been financed.			
Finance (%)	Displays the percentage of the total receivable/PO amount that have been financed.			
Currency	Displays the currency of the finance amount.			
Finance Amount	Displays the amount that has been financed. By default, this field displays the Finance (%) value of the Total Receivable Amount.			
Exchange Rate	Displays the exchange rate between the receivable/PO amount currency and the finance currency.			
Processing Date	Displays the date of processing of the amendment.			
Charge Details	Charge details of the finance is displayed in this section.			
Charge	Displays the charge code.			
Charge Pricing Rule	Displays the charge pricing rule applicable to the transaction.			
	This field becomes editable if Modify Pricing radio button is selected in the Actions column.			
	Click the search icon in the Charge Pricing Rule column. The Charge Pricing Rule pop-up screen displays.			
	a. Enter complete or partial value in the Charge Pricing Id or Charge Pricing Description fields .			
	b. Click Fetch . The relevant pricing rule(s) displays.			
	c. Select the pricing rule to be applied.			
Charge Collection Type	Displays the type of charge collection applicable to the transaction.			
Party	Displays the ID of the party that has been charged.			
Party Role	Displays the role of the party that has been charged.			
Charge Amount	Displays the amount charged along with the currency. If the charge is Auto Waived , then the charge amount field defaults to zero.			

 Table 5-6
 (Cont.) Charges - Field Description

Field Name	Description
Actions	 Displays the below radio buttons. Waive – Click the button to waive the charge amount. If selected, the charge amount field defaults to zero. Override – Click the button to modify the existing charge amount . For Charge Collection Type selected as Periodic, the override charge amount entered will be proportionately adjusted across the schedule. Modify Pricing – Click the button to modify the charge pricing rule. Charge Pricing Rule field becomes editable to select a different pricing rule. Reset – Click the button to reset to the original calculation of charges and charge pricing rule. These fields are enabled or disabled as per the charge maintenance
	parameters set in the Charge Decisioning and the Charge Preferential Pricing screens.
Status	Displays the status of the charge and View Original Charges hyperlink is enabled. Click the link to view the system calculated charges.
	This field is displayed only if Auto Waive is selected in the Charge Decisioning screen or if the amendment transaction is viewed from checker login.
Details	Click the link to view the charge details, external pricing details, and schedule of periodic charges.
	External Pricing Details tab is displayed only if External Pricing switch is enabled in the Charge Decisioning and Charge Preferential Pricing screens.
	Schedule of Periodic Charges tab is displayed only if the Charge Collection Type or Charge Calculation Type is selected as Periodic.

Figure 5-14 Amendment - Limits

Note:

When the main limits are being utilized, the Limit Details grid displays details related to the main limits. You can add columns related to the adhoc limits by clicking **Add/Remove Columns** icon, if required. If adhoc limits are being utilized, then the Limit Details grid displays the Sanctioned Adhoc Amount, Utilized Adhoc Amount, and Available Adhoc Amount columns. You can add the columns related to the Main Limits using **Add/Remove Columns** icon, if required.

25. Specify the fields on Limits screen.

The fields marked as **Required** are mandatory.

For more information on fields, refer to the field description table.

Field Name	Description
Branch	Displays the branch where the amendment is being processed. By default, the logged-in user's branch is displayed.
Program	Displays the name of the program that is linked to the receivables that have been financed.
Product	Displays the name of the product associated with the program.
Anchor	Displays the name of the anchor party in the program.
Linked Receivables/PO	Click the link to view the list of receivables (invoices/debit notes) / PO that have been financed.

Table 5-9 Limits - Field Description

Field Name	Description
Spoke	Displays the name of the counter party in the program.
Start Date	Displays the start date of the finance. By default, it is the current business date.
Tenor	Displays the tenor of the finance. The tenor of the finance gets defaulted basis start date and maturity date.
Maturity Date	Displays the maturity date of the finance. Maturity date gets calculated basis maturity date parameter selected at product level.
Grace Days	Displays the number of days past the finance due date, within which the finance can be settled without penalty.
Past Due Date	Displays the new due date post the initial finance maturity date.
Total Receivable/PO Amount	Displays the total amount of the receivables/PO that have been financed.
Finance (%)	Displays the percentage of the total receivable/PO amount that have been financed.
Currency	Displays the currency of the finance amount.
Finance Amount	Displays the amount that has been financed. By default, this field displays the Finance (%) value of the Total Receivable Amount.
Exchange Rate	Displays the exchange rate between the receivable/PO amount currency and the finance currency.
Processing Date	Displays the date of processing of the amendment.
Limit Details	Limit details of the entity is displayed in this section.
Limit Type	Displays a label of the entity and the linked limit type.
Entity	Displays the entity – Anchor / Product / Program / Spoke and so on.
Entity Name	Displays the name of the entity.
Breach Type	Displays any limit breach exception that has occurred with respect to the entity. (Limits Frozen, Amount Breach, Limits Expired).
Processing Outcome	 Displays the action that will be taken on the limit as a result of settlement. Utilize - If the limit is being booked. Stop - If in case of an exception, the transaction should be blocked and not allowed to be processed further. Skip - If in case of an exception, the transaction is to be processed without limit booking. This behavior is driven by the credit limit mapping as configured in
•	product parameters.
Amount	Displays the finance amount with respect to the entity.
Line Ccy Exchange Rate	Displays the currency of the limit line. Displays the exchange rate between the finance amount currency and the line currency.
Amount (In line CCY)	Displays the finance amount in line currency.
Sanctioned Amount	Displays the limit amount assigned to the entity, in line currency.
Total Blocked Amount	Displays the total amount that has been blocked for finances that are currently being processed, with respect to the entity.
Total Utilized Amount	Displays the limit amount that has already been utilized.
Available Amount	Displays the limit amount available to the entity for financing.
Line Id	Displays the unique ID of the limit line of the entity.
Action	Displays the action being taken on the amount being settled.
Actual Available Limits	Displays the actual limit available to the entity for financing.

Table 5-9 (Cont.) Limits - Field Description

- 26. Perform any of the below actions from the Limits screen.
 - Click Next to go to the Summary screen.
 - Click Save and Close to save the details and complete the processing stage of the amendment.

Note:

If the **Amendment Auth Required** toggle is enabled for the program associated with the transaction, an approval task is created in the system.

- Click Back to go to the Amendment screen.
- Click **Reject** to purge the amendment transaction.
- Click Hold to move the transaction to the Hold Tasks list.
- Click Cancel to cancel the transaction and return to the Free Tasks screen.

Summary

The Amendment Summary tab shows a snapshot of the complete amendment transaction along with finance amount, interest applicable, amendment details, terms, and so on. A tile is displayed for each data segment.

27. Click Next on the Limits tab.

The **Summary** screen displays.

Figure 5-15 Amendment - Summary

- **28.** Review the details of the amendment transaction and perform any of the following action from the **Summary** screen.
 - Click each tile to view the detailed information of the data segments.

 Click Save and Close to save the details and complete the processing stage of the amendment.

Note:

If the **Amendment Auth Required** toggle is enabled for the program associated with the transaction, an approval task is created in the system. Once approved, the finance gets modified in the core lending system, which in-turn will return the amendment status to Supply Chain Finance system.

- Click **Back** to go to the **Limits** screen.
- Click **Reject** to purge the amendment transaction.
- Click Hold to move the transaction to the Hold Tasks list.
- Click Cancel to cancel the transaction and return to the Free Tasks screen.

6 Inquiries

This topic describes the information on the various inquiries supported in the Supply Chain Finance module.

This topic contains the following subtopics:

Accounting Inquiry

This topic describes the systematic instruction to search for accounting entries based on various criteria such as File Reference Number, Event, Product, Party, Account Number, and so on.

Charge Inquiry

This topic describes the systematic instruction to search for charges based on various criteria such as Branch, Event, Party, Party Role, Product, Charge Type, and so on.

Finance Inquiry

This topic describes the systematic instruction to search for finances based on various criteria such as File Reference Number, Buyer, Supplier, Processing Date, Finance Date, Finance Amount, and so on.

Message Inquiry

This topic describes the systematic instruction to search for FCI messages based on various criteria such as Inward/Outward, Message Type, Buyer, Supplier, Message Reference Number, Status, Date Range, and so on.

Structure Limits Inquiry

This topic describes the systematic instruction to search for party limits based on various criteria such as Limit Type, Entity, Party Id, External Line Id, Date Reference Basis, Date Range, and so on.

Structure Limits Txn Inquiry

This topic describes the systematic instruction to search for party limits with respect to a specific transaction based on various criteria such as Reference Basis, Limit Entity Type, Limit Type, Limit Event, External Line Id, Date Range, and so on.

6.1 Accounting Inquiry

This topic describes the systematic instruction to search for accounting entries based on various criteria such as File Reference Number, Event, Product, Party, Account Number, and so on.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Supply Chain Finance. Under Supply Chain Finance, click Inquiry.
- 2. Under Inquiry, click Accounting Inquiry.

The Accounting Inquiry screen displays.

7 Batch Jobs

This topic describes the events that are part of Beginning of Day (BOD) and End of Day (EOD) batch jobs run by the system on daily basis. These activities are run by the system as a batch job at the beginning and/or end of the day.

This topic contains the following subtopics:

- EOD Batch
- Independent Batch

7.1 EOD Batch

Sr. No.	Job Name	Description
1	Mark Cut Off	This job marks the successful completion of EOD and beginning of the new day.
2	Pre-EOD	If there are any finance transactions pending to be processed, this job will not be completed. For example: Finance request waiting for approval or with exception. This job is the first one to get executed as part of EOD batch job.
3	Outstanding Transaction	This job does accrual processing, and fetches the updated interest amount.
4	Modify Contract	This job processes repricing for tenor-based spread.
5	Limits Structure Refresh	This job is triggered for synchronizing the limits data with external system.
6	Invoice Limit Approval Marking	This job is triggered to approve limits associated with the invoices. This job is only triggered when assignment is applicable for products.
7	Stale Invoice	This job marks the Invoices as stale based on the configured settings for each product.
8	Stale PO	This job marks the PO's as stale based on the configured settings for each product.
9	Invoice Acceptance	This job changes invoice status as accepted based on the configurations set in the system.
10	Overdue Invoices	This job updates the invoices as overdue.
11	Invoice Charges	This job calculates the charges for invoices. Invoices are grouped into different bunches and all the applicable charges are applied for a particular bunch. Once the charges are applied, those are calculated immediately if they are online charges. In case of periodic charges, charges are calculated if the charge calculation date matches with the business date on which EOD is run. Accounting entries are posted once charges are calculated.

Table 7-1 EOD Batch

Table 7-1	(Cont.) EOD Batch
-----------	-------------------

Sr. No.	Job Name	Description
12	PO Charges	This job calculates charges for the purchase orders. Purchase orders are grouped into different bunches and all the applicable charges are applied for a particular bunch. Once the charges are applied, those are calculated immediately if they are online charges. In case of periodic charges, charges are calculated if the charge calculation date matches with the business date on which EOD is run. Accounting entries posted once charges are calculated.
13	Charges Batch Processing	This job calculates & collect periodic charges. All the charges for all the transactions present in the system are calculated and account entries are posted if the charge calculation date matches with the business date on which EOD is run.
14	NPA	This job evaluates status of the loans and marks the delinquency status of the customer along with identification of Non-Performing Asset (NPA)/Inactive customers.
15	External NPA	This job consolidates the customer delinquency status which is sent from external system with the delinquency status arrived in the previous event. If external system integration is not applicable for NPA, this job is not executed.
16	Product Expired	This job closes the product as per expiry date configured in the system.
17	Program Expired	This job closes the program as per expiry date configured in the system.
18	Limit Structure Expired	This job closes the limits structure as per expiry date configured in the system.
19	Alerts	This job identifies all the alerts that are to be sent in EOD, generates, and sends them.
20	Mark EOFI	This job is used to identify the end of SCF EOD and initiates the common core events.
21	Forget Core Accounts	This is a common core event which marks forget flag for the customer accounts as per expiry date.
22	Forget Core Customers	This is a common core event which marks forget flag for the customer as per expiry date.
23	Change Date Job	This job flips the business date to the next working date.
24	Release Cut Off	This job designates the end of common core EOD.
25	Mark TI	This job prepares for the next day transactions.
26	FCI Message Job	This job finds out the eligible FCI messages which have not been sent and creates an FCI message for them and sends them via a configurable workflow.

Note:

Refer the **Branch EOD** section in *Oracle Banking Common Core User Guide* to configure, invoke, and view the EOD batch jobs.

During the execution of EOD batch jobs, there is a possibility of occurrence of technical or functional errors. These errors are captured and displayed on the UI itself, enabling the user to rectify them.

7.2 Independent Batch

S No	Event Name	Description
1	Auto-Reconciliation	This job reconciles transactions for invoice, debit note, and finance, with payment/credit note based on configured auto-recon rules.
2	Future Dated Disbursement Processing	This job processes transactions with future dated disbursements.
3	Auto Debit Finance	This job processes auto debits for finance transactions as per configurations set in the system.
4	Auto Debit Invoice	This job processes auto debits for invoice transactions as per configurations set in the system.

Table 7-2	Independent Batch
-----------	-------------------

Note:

Refer the **Task Management** section in **Tasks User Guide** to create, view, configure, trigger, and view status of the tasks.

8 Process Codes

This topic describes the information on the manual stages along with the functional activity codes.

The following table represents the manual stages in Finance workflow along with the functional activity codes which can be used for mapping in role activity screen under Security Management System menu.

Stage	Functional Activity Code	Description	
Limit Processing Exception	LimitProcessingException	This is a stage before authorization and transactior falls in this stage when maintenance of limits is not done properly.	
Credit Approval Exception	CreditApprovalException	This is a stage before authorization and transaction falls in this stage when exception handling behavior has been maintained as STOP in the Product Parameters screen for limit amount and limit expiry breach.	
Create Adhoc Limits Transaction Exception	CreateAdhocLimitsTransactio nException	This is a stage before authorization and transaction falls in this stage if there is a technical error while identifying Adhoc limits applicability in transaction.	
Initiate Workflow for Adhoc Limit Txn Exception	InitiateWorkflowForAdhocLimi tTxnException	This is a stage before authorization and transaction falls in this stage if there is a technical error due to which a transaction for Adhoc limits is not initiated in the system.	
Auto Finance Exception	AUTOFIN_EXCEPTION	This is a stage before authorization and after limit is blocked. Transaction falls in this stage when auto processing is enabled and it fails due to financing validations being done as per finance parameters maintained in Product/Program/Interest/ Accounting/Charges.	
Processing	PROCESSING	This is a stage before authorization and after limit is blocked. Transaction falls in this stage when auto-processing is disabled in Program/Product parameters.	
Authorization	AUTHORIZATION	This is authorization step wherein user can either Approve/Reject the record. Transaction falls in this stage when auto-authorization is disabled in Product/Program parameters.	
Loan Integration Exception	OBCL_EXCEPTION	This stage is after authorization and transaction falls in this stage when integration with lending product (OBCL) to create contracts or make payment fails.	
Accounting Entries Post Exception	ACC_ENTRIES_EXCEPTION	This stage is after authorization and transaction falls in this stage when accounting entries posting integration is configured as 'Yes' in system parameters with another product and posting fails.	

Table 8-1

Table 8-1 (Cont.)

Stage	Functional Activity Code	Description
Account Posting Response Awaited	ACCPOSTING_RESPONSE_ AWAITED (Not be mapped on screen)	This stage is after authorization and transaction falls in this stage if accounting entries posting integration is configured as 'Yes' in system parameters with another product and the mode of integration is asynchronous and transaction is waiting for response.
External Payment Exception	EXTERNAL_PAYMENT_EXC EPTION	This stage is after authorization and transaction falls in this stage when external payment integration is required as per payment mode in transaction and external payment system integration fails.
Outgoing Payment Response Awaited	OUTPAY_RESPONSE_AWAI TED (Not be mapped on screen)	This stage is after authorization and transaction falls in this stage when external payment integration is required as per payment mode in transaction and integration is asynchronous and transaction is waiting for response.
Limits Update Exception	LIMITS_UPDATE_EXCEPTIO N	This stage is after authorization and transaction falls in this stage when limits utilization/release fails due to technical error. The user can retry the transaction after the technical error is resolved.
Finance Master Update	POSTAUTH_UPDATE_EXCE PTION	This stage is after authorization and transaction falls in this stage when work table to main table approval update fails due to technical errors. The user can retry the transaction after the technical error is resolved.
Instrument Update Exception	INSTRUMENT_UPDATE_EX CEPTION	This stage is after authorization and transaction falls in this stage when update of linked invoice/PO as financed/paid fails due to technical errors. The user can retry the transaction after the technical error is resolved.
Alerts Exception	ALERTS_EXCEPTION	This stage is after authorization and transaction falls in this stage when alerts generation for transaction fails due to technical errors. The user can retry the transaction after the technical error is resolved.
Recon Completion Exception	RECON_COMPLETION_EX CEPTION	This stage is after authorization and transaction falls in this stage for settlement transactions when payment is initiated through Finance Payment Recon (FPR) and FIFO (First In First Out) is not completed and status of the same cannot be found due to technical errors. The user can retry the transaction after the technical error is resolved.
Recon Authorization Exception	RECON_AUTHORIZATION_ EXCEPTION	This stage is after authorization and transaction falls in this stage for settlement transactions when payment is initiated through Finance Payment Recon (FPR) and FIFO (First In First Out) is not completed and status of recon of current finance settlement is not updated due to technical errors. The user can retry the transaction after the technical error is resolved.

Table 8-1 (Cont.)

Stage	Functional Activity Code	Description
Recon Step Authorization Exception	RECON_STEP_AUTHORIZA TION_EXCEPTION	This stage is after authorization and transaction falls in this stage for settlement transactions when payment is initiated through Finance Payment Recon (FPR) and FIFO (First In First Out) is not completed and status of payment corresponding to current finance settlement is not updated due to technical errors. The user can retry the transaction after the technical error is resolved.

Note:

Refer the **Role** section in *Oracle Banking Security Management System User Guide* to understand procedure for creating roles and assigning activity to it.

A Functional Activity Codes

Screen Name/API Name	Functional Activity Code	Action	Description
Accounting Entries	SCF_FA_ACCNT_ENTR IES_CREATE_SERVICE	Create	Create Accounting Entries
Accounting Entries	SCF_FA_ACCNT_ENTR IES_VIEW_SERVICE	View	View Accounting Entries
Accounting Entries	SCF_FA_ACCNT_ENTR IES_VIEW_AUTHORIZE _SERVICE	Authorize	Authorize the Accounting Entries record
Accounting Entries	SCF_FA_ACCNT_ENTR IES_VIEW_UPDATE_S ERVICE	Unlock	Unlock and edit the Accounting Entries record
Accounting Entries	SCF_FA_ACCNT_ENTR IES_VIEW_DELETE_S ERVICE	Delete	Delete the Accounting Entries record
Accounting Entries	SCF_FA_ACCNT_ENTR IES_VIEW_CLOSE_SE RVICE	Close	Close the Accounting Entries record
Accounting Entries	SCF_FA_ACCNT_ENTR IES_VIEW_REOPEN_S ERVICE	Reopen	Reopen a closed Accounting Entries record
Accounting Entries	SCF_FA_ACCNT_ENTR IES_VIEW_COPY_SER VICE	Сору	Copy and create a new Accounting Entries record
Entry Codes	SCF_FA_ACCNT_ENTR YCODE_CREATE_SER VICE	Create	Create Entry Codes
Entry Codes	SCF_FA_ACCNT_ENTR YCODE_VIEW_SERVIC E	View	View Entry Codes
