Index

Preface

- Purpose
- Audience

This document is intended for the following audience:

- Documentation Accessibility
- Critical Patches
- Structure

This manual is organized into the following chapters:

- Diversity and Inclusion
- Conventions
- Related Documents
- Screenshot Disclaimer
- Acronyms and Abbreviations
- Basic Actions
- Symbols and Icons

Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service **Import LC Internal Amendment** process.

Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins Critical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance Oracle Software Security Assurance.

Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Documents

For more information on any related features, you can refer to the following documents:

Oracle Banking Trade Finance Process Management Cloud Service

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service process.

Welcome to the Oracle Banking Trade Finance Process Management Cloud Service User Guide. This guide provides an overview on the OBTFPMCS application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPMCS:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

Oracle Banking Trade Finance Process Management Cloud Service is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. Oracle Banking Trade Finance Process Management Cloud Service enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

Oracle Banking Trade Finance Process Management Cloud Service helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPMCS allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import LC Internal Amendment

Import LC Internal Amendment process enables the user to make an amendment to the underlying LC details without impacting the terms and conditions of the LC.

This topic contains following subtopics:

Common Initiation Stage

This topic provides the systematic instructions to initiate the new import LC internal amendment request.

Registration

This topic provides the systematic instructions to initiate the Registration stage of **Import LC Internal Amendment** request.

Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of import Ic internal amendment request.

Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

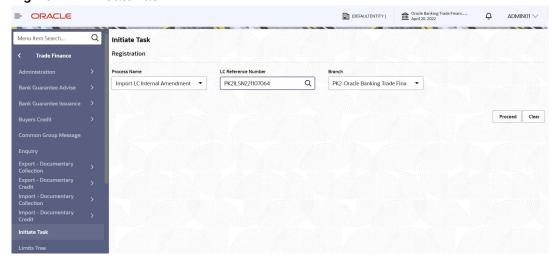

2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the new import LC internal amendment request.

Specify **User ID** and **Password**, and login to **Home** screen.

On Home screen, click Trade Finance. Under Trade Finance, click Initiate Task.
 The Initiate Task screen displays.

Figure 2-1 Initiate Task

2. On Initiate Task screen, specify the fields.

(i) Note

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-1 Initiate Task - Field Description

Field	Description
Process Name	Select a process name from the drop-down list.
Branch	Select the required branch code from the drop-down list.

For more information on action buttons, refer to the field description table below.

Table 2-2 Action Buttons - Field Description

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	Click to clear the contents update and enter the values again.

3. Click **Proceed** to proceed to the next step.

2.2 Registration

This topic provides the systematic instructions to initiate the Registration stage of Import LC Internal Amendment request.

User can register request of new Import LC internal amendment received at the front desk through branch either by fax, mail, or physical application form, the Import LC internal amendment process starts from the Registration Stage.

During Registration stage, user can capture the basic details of the amendment application, check the signature of the applicant and upload the related documents of the applicant. On submit of the request, the customer will be notified with an acknowledgment and the request will be available for an LC expert to handle the request in the next stage.

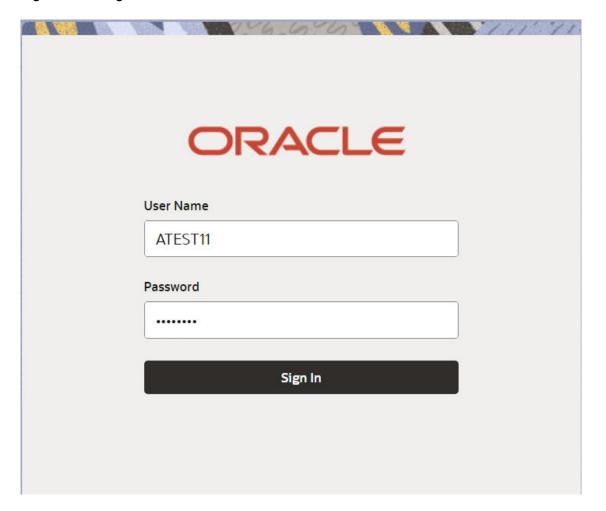

The OBTFPMCS user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPMCS verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPMCS user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

Specify **User ID** and **Password**, and login to **Home** screen.

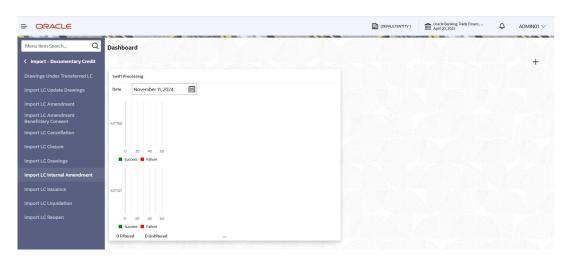

Figure 2-2 LogIn Screen

Document Linkage

This topic provides the systematic instructions to initiate the document linkage.

2.2.1 Document Linkage

This topic provides the systematic instructions to initiate the document linkage.

In Oracle Banking Trade Finance Process Management Cloud Service, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/ queried in the Process flow stage screens to link with the task by using the Document ID.

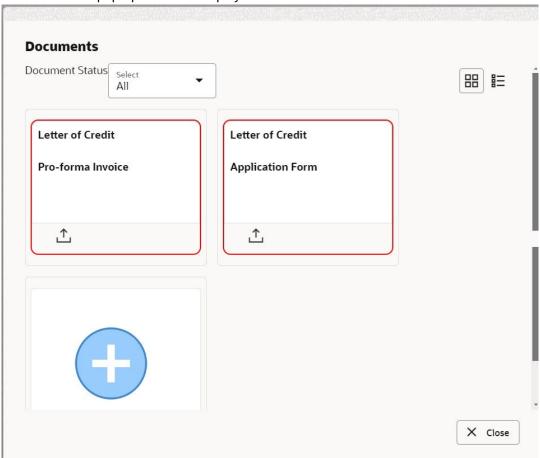

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

Specify **User ID** and **Password**, and navigate to **Registration** screen.

1. On the header of **Registration** screen, click, **Documents**.

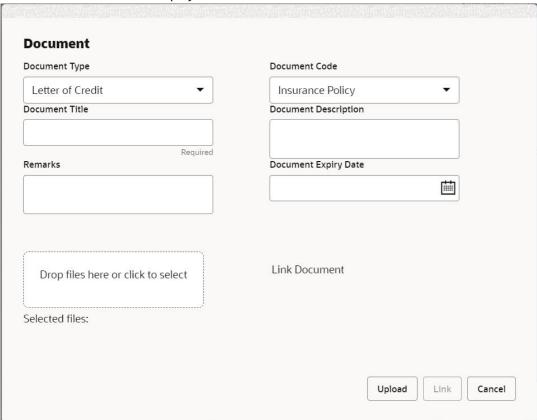

The **Document** pop-up screen is displayed.

2. Click the Add Additional Documents button/ link.

The **Document** screen is displayed.

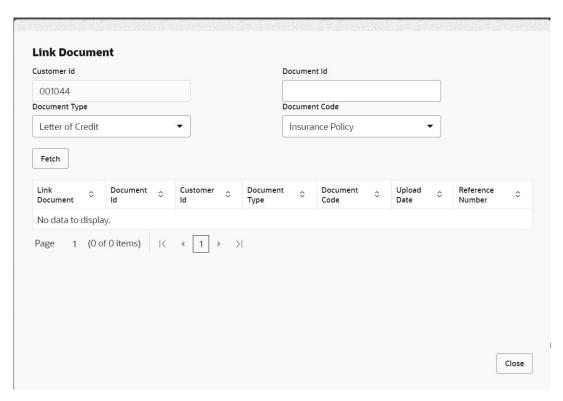

Field	Description
Document Type	Select the document type from list. Indicates the document type from metadata.
Document Code	Select the document Code from list. Indicates the document Code from metadata.
Document Title	Specify the document title.
Document Description	Specify the document description.
Remarks	Specify the remarks.
Document Expiry Date	Select the document expiry date.
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.

3. Select the document to be uploaded or linked and click the **Link Document** link.

The link **Document** pop up screen is displayed.

The value selected in **Document Type** and **Document Code** of **Document** screen are defaulted in the **Link Document Search** screen.

Click Fetch to retrieve the details from DMS.

System displays all the documents available for the given **Document Type** and **Document Code** for the customer.

Field	Description
Customer ID	This field displays the transaction Customer ID.
Document ID	Specify the document ID.
Document Type	Select the document type from list.
Document Code	Select the document Code from list.
Search Result	
Document ID	This field displays the document ID from metadata.
Customer ID	This field displays the transaction customer ID.
Document Type	This field displays the document type from metadata.
Document Code	This field displays the document code from metadata.
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.
Upload Date	The field displays the upload date of the document.
Reference Number	The field displays the reference number of the document.

5. Click **Link** to link the particular document required for the current transaction.

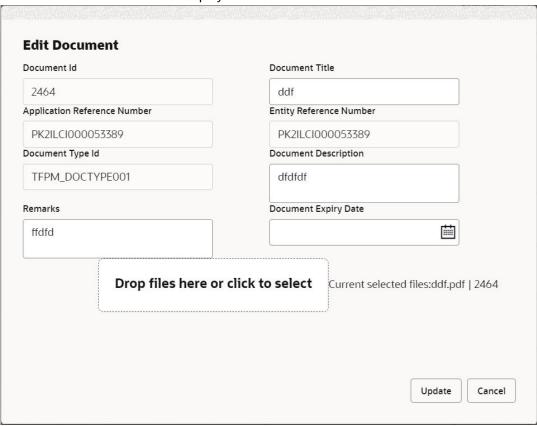

Post linking the document, the user can View, Edit and Download the document.

Click Edit icon to edit the documents.

The **Edit Document** screen is displayed.

2.3 Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of import lc internal amendment request.

On successful completion of Registration of an Import LC internal amendment, the task moves to Data Enrichment stage. As part of Data Enrichment, user can enter/update basic details of the amendment request and can verify if the request can be progressed further.

Non-Online Channel - Internal LC Amendment request that were received at the desk will move to Data Enrichment stage post successful Registration. The transaction will have the details entered during the Registration stage.

Online Channel - Requests that are received via SWIFT (MT730) are available directly for further processing in OBTFPM from Data Enrichment stage and relevant data should be auto populated.

For MT 730, system should validate the incoming MT 730 based on Related Reference field to identify whether it is Acknowledgment for Import LC or Export LC. If the MT 730 is for Import LC, system should process the MT 730 under Internal Amendment to Import LC.

Note

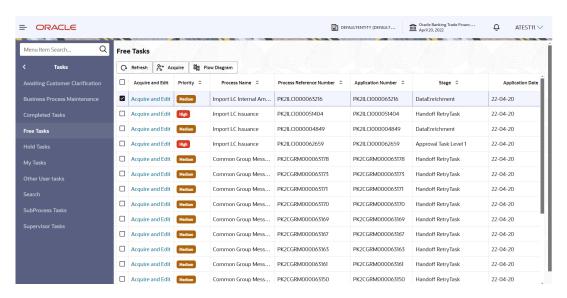

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task currently at Data Enrichment stage:

Specify **User ID** and **Password**, and login to **Home** screen.

- On Home screen, click, Tasks.
- Under Tasks, click Free Tasks.

Figure 2-5 Free Tasks

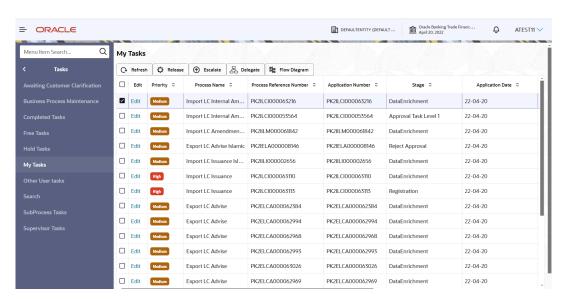

The **Free Tasks** gets displayed.

- Select the appropriate task and click Acquire & Edit to edit the task or click Acquire to edit the task from My Tasks.
- The acquired task will be available in My Tasks tab. Click Edit to scrutinize the registered task.

Figure 2-6 My Tasks

Let's look at the details for Data Enrichment stage. User can enter/update basic details of the incoming request. Do the following steps to acquire a task at Data Enrichment stage. The Data Enrichment stage has the following hops for data capture:

Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of **Import LC Internal Amendment** request.

Acknowledgement Details

This topic provides the systematic instructions to capture the acknowledgement details.

Additional Fields

This topic provides the systematic instructions to capture the additional fields.

Advices

This topic provides the systematic instructions to capture the advices details.

Additional Details

This topic provides the systematic instructions to capture the additional details.

Settlement Details

This topic provides the systematic instructions to capture the settlement details of import LC Internal amendment request.

Summary

This topic provides the systematic instructions to view the summary of **Import LC Internal Amendment** request.

2.3.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of **Import LC Internal Amendment** request.

Main details section has two sub section as follows:

- Application Details
- LC Amendment Details.

Application Details

All fields displayed under main details section, would be read only except the **Priority**. For more information on the fields, refer **Application Details** of **Registration** stage .

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

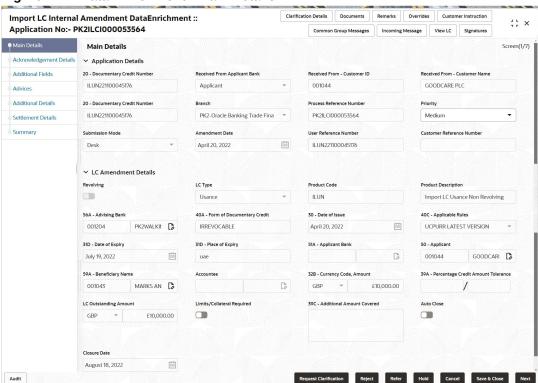

Figure 2-7 Data Enrichment - Main Details

Table 2-6 Data Enrichment - Main Details - Application Details - Field Description

Field	Description
Documentary Credit Number	Non Online: Ready only defaults from Registration stage. Online: Read only. Received from the online request/ Incoming MT730.
Received from Applicant Bank	Read only field. Value will be defaulted as available in LC.

Table 2-6 (Cont.) Data Enrichment - Main Details - Application Details - Field Description

Field	Description
Received From - Customer ID	Read only field.
	Customer ID will be auto-populated based on the selected LC from the lookup in Registration stage.
Received From - Customer	Read only field.
Name	Customer name will be defaulted as available in LC.
Documentary Credit Number	Non Online: Ready only defaults from Registration stage. Online: Read only.
	Received from the online request/ Incoming MT730.
Branch	Read only field.
	Branch details will be auto-populated based on the selected LC from the lookup.
Process Reference	Read only field.
Number	Unique OBTFPMCS task reference number for the transaction. This is auto generated by the system based on process name and branch code.
Priority	Priority is defaulted from Registration stage as: Essential Critical Low Medium High If priority is not maintained for the customer, system will populate 'Medium' as the default priority.
	User can change the priority populated any time before submit of Registration stage.

LINE ID-DESCRIPTION will be available for selection along with Line ID. When you click on 'verify', the system will return value if the limit check was successful or Limit not Available. If limit check fails, the outstanding limit after the transaction value will be shown in the limit outstanding amount. The user can click the Line Id link to view the limit details.
	O Note User can also select expired Line ID from the lookup and on clicking the verify button, system should default "The Earmarking cannot be performed as the Line ID is Expired" in the "Response Message" field. This field is disabled and read only, if Linkage Type is Liability.
Limit/Liability Currency	Read only field. This field displays the limit currency, when the user select the Liability Number.
Limits Description	Read only field. This field displays the limits description.
Limit Check Response	Read only field. This field displays the limit check response. Response can be 'Success' or 'Limit not Available' based on the limit service call response. The value in this field appears, if you click the Verify button.

Table 2-15 (Cont.) Limit Details - Field Description

Field	Description
Amount to Earmark	This field defaults the amount to earmark. Contribution amount will default based on the contribution %.
	User can change the value.
Expiry Date	Read only field. This field displays the date up to which the Line is valid.
Limit Available Amount	Read only field. This field displays the value of available limit, i.e., limit available without any earmark. The Limit Available Amount must be greater than the Contribution Amount.
	The value in this field appears, if you click the Verify button.
Response Message	Read only field. This field displays the detailed response message. The value in this field appears, if you click the Verify button.
ELCM Reference Number	Read only field. This field displays the ELCM reference number.
Limit Details grid	Below fields appear in the Limit Details grid along with the above fields.
Line Serial	Displays the serial of the various lines available and mapped under the customer id.
Edit	Click the link to edit the Limit Details .
Cash Collateral Details	Specify the Collateral details based on the description of following table:
Collateral Percentage	System populates the Collateral % maintained in the Customer / Product for the counter party of the contract. User can modify the collateral percentage.
	Specify the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
Collateral Currency and amount	System populates the contract currency as collateral currency by default. User can modify the collateral Currency and amount.
Exchange Rate	System populates the exchange rate maintained. System validates for the Override Limit and the Stop limit if defaulted exchange rate is modified.
Collateral Details	Below fields are displayed on the Collateral Details pop-up screen, if the user clicks plus icon.
Total Collateral Amount	Read only field. This field displays the total collateral amount provided by the user.
Collateral Amount to be Collected	Read only field. This field displays the collateral amount yet to be collected as part of the collateral split.
Sequence Number	Read only field. The sequence number is auto populated with the value, generated by the system.

Table 2-15 (Cont.) Limit Details - Field Description

Field	Description
Collateral Split %	Specify the collateral split% to be collected against the selected settlement account.
Collateral Contribution Amount	Specify the collateral amount to be collected against the selected settlement account. User can either provide the collateral % where the collateral amount will be auto populated or modifying the collateral amount will auto correct the collateral %.
Settlement Account	Click Search to search and select the settlement account for the collateral.
Settlement Account Currency	Read only field. This field displays the settlement account currency defaulted by the system.
Exchange Rate	Read only field. This field displays the exchange rate, if the settlement account currency is different from the collateral currency.
Contribution Amount in Account Currency	Read only field. This field displays the contribution amount in the settlement account currency as defaulted by the system.
Account Available Amount	Read only field. System populates the account available amount on clicking the Verify button.
Response	Read only field. System populates the response on clicking the Verify button.
Response Message	Read only field. System populates the response message on clicking the Verify button.
Verify	Click to verify the account balance of the Settlement Account.
Save	Click to to save and close the record.
Close	Click to cancel the entry.
Cash Collateral Details grid	Below fields appear in the along with the above fields.
Contribution Amount	This field displays the collateral contribution amount. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
Account Balance Check Response	This field displays the account balance check response.
Edit	Click edit link to edit the collateral details.
Account Available Amount	This field displays the account available amount which will be auto-populated based on the settlement account selection.
Deposit Linkage Details	Specify the deposit linkage details based on the description of following table: System should allow the user to Link one or more existing Deposits as a contribution to secure underlying transactions. On Submit of DE stage, system will create Linkage of the Deposit/modification of existing Linkage by calling Back-office system (DDA) system directly.

Table 2-15 (Cont.) Limit Details - Field Description

Field	Description
Deposit Linkage Details pop-up screen	Click plus icon to add new deposit linkage details. Below fields are displayed on the Deposit Linkage Details pop-up screen, if the user clicks plus icon.
Customer Id	This field displays the defaulted from the application. The user can change the Customer ID.
Deposit Account	Click Search to search and select deposit for linkage from the list of all the customer Deposits.
	All the Deposits of the customer should be listed in the LOV search. User should be able to select the deposit for linkage.
Deposit Branch	Read only field. This field displays the deposit branch which will be auto-populated based on the deposit account selection.
Deposit Available Amount	Read only field. This field displays the deposit available amount and currency which will be auto-populated based on the deposit account selection.
Deposit Maturity Date	Read only field. This field displays the maturity date of deposit based on the deposit account selection.
Exchange Rate	Read only field. This field displays the latest exchange rate for deposit linkage. This will be picked up from the exchange rate maintenance from the common core.
Deposit Available In Transaction Currency	Read only field. This field displays the deposit amount available, after exchange rate conversion, if applicable.
Linkage Percentage %	Specify the value for linkage percentage.
Linkage Amount (Transaction Currency)	This field displays the transaction amount, user can change the value.
	System validates the linking amount with available Deposit balance and should not allow to link more than the available amount.
Deposit Details grid	Below fields appear in the Deposit Details grid along with the above fields.
Deposit Currency	This field displays the deposit currency.
Transaction Currency	This field displays the transaction currency.
Edit	Click edit link to edit the deposit linkage details.

3. Click **Save and Close** to save the details and close the screen.

Charge Details

This section displays charge details, commission and tax components mapped to the product from the back office system. If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

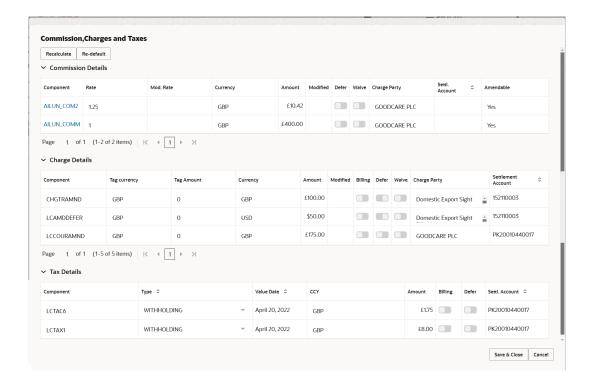

Table 2-16 Charge Details - Field Description

Field	Description
Commission Details	This section displays the commission details. By default, all the charges, commission and margin are collected from the counter-party.
Component	Displays the commission component. Click the link to view the component details.
Rate	Displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPMCS.
	If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Mod. Rate	From the default value, if the rate is changed the value gets updated in this field. The user can change the value.
Currency	Displays the currency in which the commission have to be collected.
Amount	Displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPMCS. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPMCS.
	If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.

Table 2-16 (Cont.) Charge Details - Field Description

On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPMCS. The user can not enable/disable the option, if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled. Defer Switch to to defer the charges and collect at any future step. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPMCS. The user can enable/disable the option the check box. On deselection the user has to click on 'Recalculate' charges button for resimulation. Waive Switch to to waive the charges. Based on the customer maintenance, the charges should be marked for Billing or for Defer.	Field	Description
Waive Switch to to waive the charges/commissions. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the "Remarks" place holder. Charge Party Charge party is "Applicant" by default. User can change the value to Beneficiary. Settl. Account The settlement account. Amendable Displays if the field is amendable or not. Charge Details This section displays the charge details. Component Displays the charge component type. Tag Currency Displays the tag currency in which the charges have to be collected. Table 2-16 (Cont.) Charge Details - Field Description

Field	Description
Charge Party	Displays the charge party. By default the charge party is 'Applicant'.
Settlement Account	Click Search icon to search and select the settlement account.
Tax Details	This section displays the tax details. The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/commission will be available on click of Re-Calculate button or on hand off to back-end system.
Component	Displays the tax component.
Туре	Displays the type of tax component.
Value Date	Displays the value date of tax component.
Ссу	Displays the currency in which the tax have to be collected. The tax currency is the same as the commission.
Amount	Displays the tax amount based on the percentage of commission maintained. The user can edit the tax amount, if applicable.
Billing	Switch to to make the details available for billing engine for further processing, if taxes are handled by separate billing engine. This field is disabled, if 'Defer' toggle is enabled.
Defer	Switch to to defer the taxes and collect at any future step. Switch to if you do not want to defer the taxes. On disabling the user has to click on 'Recalculate' charges button for re-simulation.
Settl. Account	System defaults the settlement account. The user can modify the settlement account.

4. Click **Save and Close** to save the details and close the screen.

Preview Messages

The draft LC message from the back office should be simulated and displayed in the Preview Message tile.

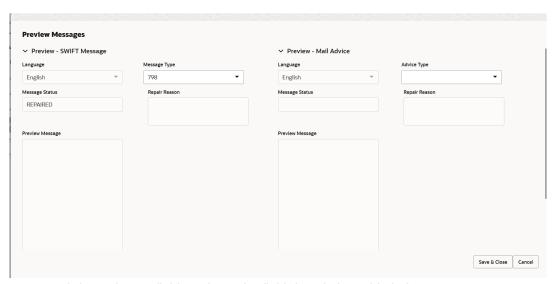

Table 2-17 Preview Messages - Field Description

Field	Description
Preview SWIFT Message	This section displays the preview of SWIFT Messages fields.
Language	Read only field. English is set as default language for the preview.
Message Type	Select the message type.
Message Status	Read only field. Display the message status of draft message of internal amendment details.
Repair Reason	Read only field. Display the message repair reason of draft message of internal amendment details.
Preview Message	This field displays a preview of the draft message.
Preview Mail Advice	This section displays the preview of Mail Advice fields.
Language	Read only field. English is set as default language for the preview.
Advice Type	Select the advice type.
Message Status	Read only field. Display the message status of draft message of internal amendment details.
Repair Reason	Read only field. Display the message repair reason of draft message of internal amendment details.
Preview Message	This field displays a preview of the advice.
Draft Confirmation	This section displays the draft confirmation fields.
Draft Confirmation Required	Switch to , if draft confirmation is required.
Customer Response	Specify the response received from customer. If the response is received online, the response is auto populated in this field by the system.

Table 2-17 (Cont.) Preview Messages - Field Description

Field	Description
Customer Remarks	Read only field. Display the remarks from the customer for the draft.
Response Date	Read only field. Display the customer response received date.
Customer Email ID 1	Click Search icon to search and select the Email ID from lookup. The user can select from the Customer Email Address field of the customer maintenance in Back Office and replicated in OBTFPMCS. By default this field is blank.

5. Click **Save and Close** to save the details and close the screen.

Insurance Details

Provide the Insurance details based on the description in the following table.

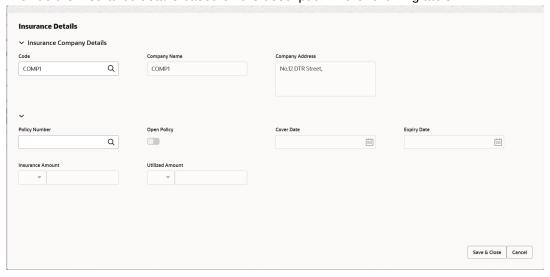

Table 2-18 Insurance Details - Field Description

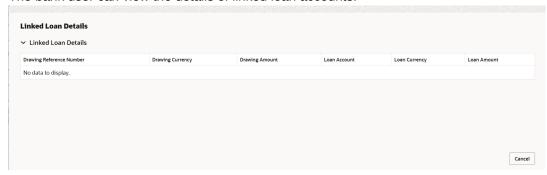

Field	Description
Code	Click Search icon to search and select insurance company code.
Company Name	This field displays the insurance company name as per the selected company code.
Company Address	This field displays the insurance company adress details as per the selected company code.
Policy Number	Click Search icon to search and select the policy number of the insurance.
Open Policy	Read only field. If enabled, this field denotes whether the policy is an open policy.
Cover Date	The cover date of the policy.
Expiry Date	The Expiry Date of the Policy. System displays an override if the policy is expired.
Insurance Amount	The insurance amount for the policy.
Utilized Amount	This field displays the utilized amount, if the policy is an Open Policy.

6. Click **Save and Close** to save the details and close the screen.

Linked Loan Details

The bank user can view the details of linked loan accounts.

For more information on fields, refer to the field description table below.

Table 2-19 Linked Loan Details - Field Description

Field	Description
Linked Loan Details	
Drawing Reference Number	This field displays the drawing reference number of the linked loan account.
Drawing Currency	This field displays the drawing currency of the linked loan account.
Drawing Amount	This field displays the drawing amount of the linked loan account.
Loan Account	This field displays the loan account number.
Loan Currency	This field displays the currency of the loan account.
Loan Amount	This field displays the loan amount.

Click Save and Close to save the details and close the screen.

FX Linkage

Following are the conditions of FX Linkage:

- If any LC Amendment is pending for beneficiary confirmation with FX changes, then the system, will not allow another amendment on this contract further.
- FX request will be processed in external system, only after successful amendment confirmation has been done.
- Sum of Linked amount will not be greater than LC contract amount. Linked amount will
 not be greater than the available amount for linkage.
- Delink of linked FX or Reduction of linked amount from the LC is allowed if the same is not attached to any Bills.
- Reduction of LC contract amount with FX, through LC amendment will be restricted, when the contract amount goes below the FX linkage amount. User will be intimated with the message.

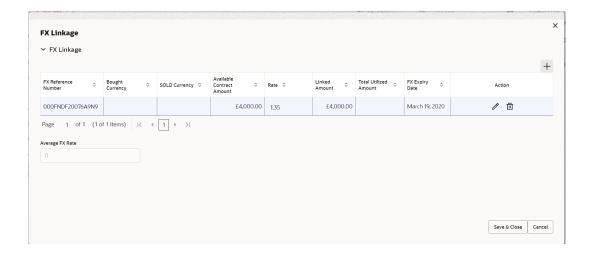

Figure 2-16 FX Linkage Details

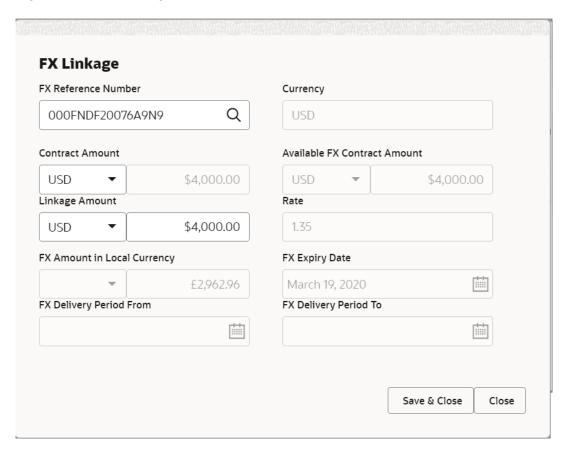

Table 2-20 FX Linkage - Field Description

Field	Description
FX Details.	Below fields are displayed on the FX Linkage pop-up screen, if the user clicks the plus icon.

Table 2-20 (Cont.) FX Linkage - Field Description

Field	Description
FX Reference Number	Click Search to search and select the FX contract reference number. On select and save and close, system defaults the available amount, bot currency, sold currency and rate. Forward FX Linkage available for selection at bill would be as follows, • Counterparty of the FX contract should be the counterparty of the Bill contract. • Active Forward FX transactions authorized not marked for auto liquidation. Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.
Currency	Read only field. This field displays the FX SOLD currency from the linked FX contract.
