Preface

- [Purpose](#)
- [Audience](#)
This document is intended for the following audience:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Structure](#)
This manual is organized into the following chapters:
- [Conventions](#)
- [Related Documents](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)
- [Basic Actions](#)
- [Symbols and Icons](#)

1.1 Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service **Export Documentary Collection Booking Update** process.

1.2 Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

- [Access to Oracle Support](#)

1.3.1 Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

1.4 Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

1.5 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.6 Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

1.7 Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1.8 Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

1.9 Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1.10 Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1-1 Acronyms and Abbreviations

Abbreviation	Description
OBTFSM	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange
CCY	Currency
LCY	Local Currency
FCY	Foreign Currency
LOV	List of Values
CIF	Customer Information File
UDF	User Defined Fields
FFT	Free Format Text
SBLC	Standby Letter of Credit

Oracle Banking Trade Finance Process Management Cloud Service

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service process.

Welcome to the Oracle Banking Trade Finance Process Management Cloud Service User Guide. This guide provides an overview on the OBTFPMCS application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPMCS:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

Oracle Banking Trade Finance Process Management Cloud Service is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. Oracle Banking Trade Finance Process Management Cloud Service enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

Oracle Banking Trade Finance Process Management Cloud Service helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPMCS allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

3

Export Documentary Collection Booking Update

Export Documentary Collection Booking Update process involves update of an Existing Documentary Collection under Export LC.

This topic contains following sub-topics:

- [Common Initiation Stage](#)
This topic provides the systematic instructions to initiate the export documentary collection booking update Islamic request.
- [Registration](#)
This topic provides the systematic instructions to initiate the Registration stage of **Export Documentary Collection Booking Update** request.
- [Data Enrichment](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection booking update request.
- [Exceptions](#)
This topic helps you quickly get acquainted with the Exceptions process.
- [Multi Level Approval](#)
This topic helps you quickly get acquainted with the Multi Level Approval process.

3.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the export documentary collection booking update Islamic request.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Initiate Task**.

The **Initiate Task** screen appears.

Figure 3-1 Initiate Task

The screenshot displays the Oracle 'Initiate Task' interface. On the left, a sidebar menu lists various options under 'Trade Finance', with 'Initiate Task' at the bottom. The main content area is titled 'Initiate Task' and 'Registration'. It contains three input fields: 'Process Name' (set to 'Export Documentary Collector'), 'Documentary Collection Number' (set to 'PK2ESUC22107523'), and 'Branch' (set to 'PK2-Oracle Banking Trade Fine'). At the bottom right of the form, there are 'Proceed' and 'Clear' buttons. The top of the screen shows the Oracle logo and user session information.

2. On **Initiate Task** screen, specify the fields.

Note

The fields which are marked in asterisk are mandatory.

For more information on fields, refer to the field description table below.

Table 3-1 Initiate Task - Field Description

Field	Description
Process Name	Select a process name from the drop-down list.
Documentary Collection Number	Click Search to search and select the required documentary collection number.
Branch	Select the required branch code from the drop-down list.

For more information on action buttons, refer to the field description table below.

Table 3-2 Action Buttons - Field Description

Field	Description
Proceed	Task will get initiated to next logical stage..
Clear	Click to clear the contents update and enter the values again.

3. Click **Proceed** to proceed to the next step.

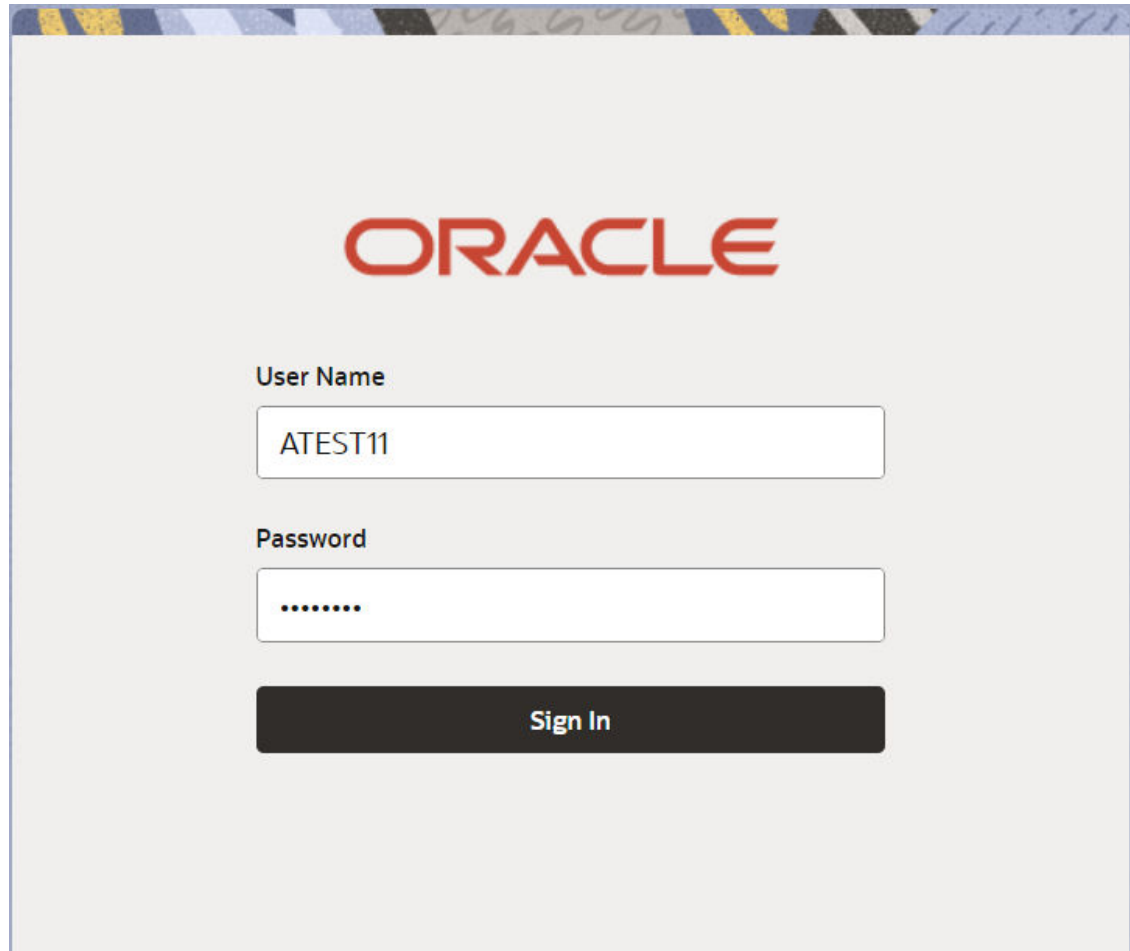

3.2 Registration

This topic provides the systematic instructions to initiate the Registration stage of **Export Documentary Collection Booking Update** request.

The process starts with Registration stage, on registering the task in OBTFPMCS , user can capture the basic details of the transaction and upload related documents. On submit, the request will be available for an collection expert to handle the request in the next stage.

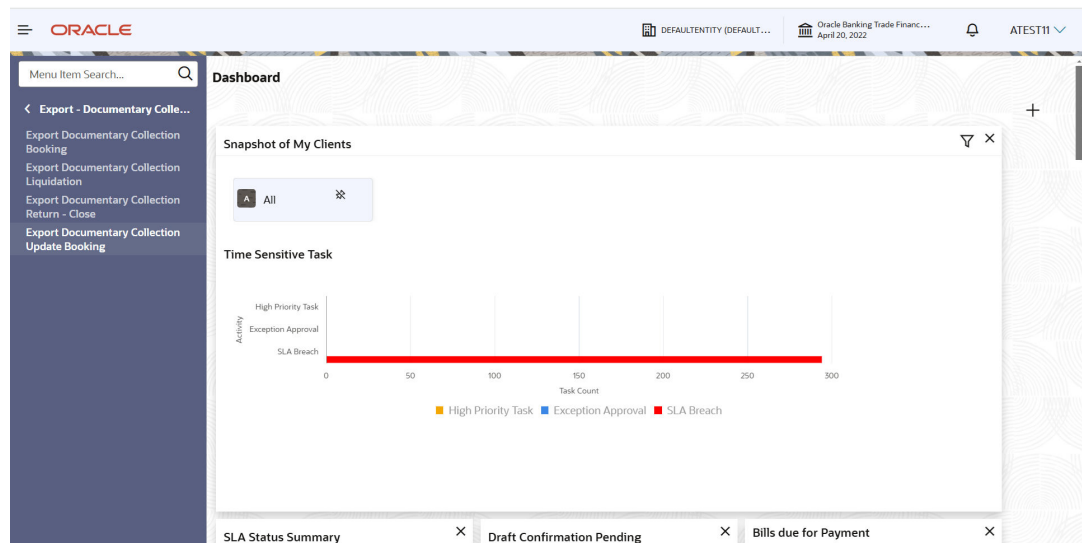

Specify **User ID** and **Password**, and login to **Home** screen.

Figure 3-2 LogIn Screen

The image shows the Oracle login screen. At the top, the Oracle logo is displayed in red. Below the logo, there are two input fields. The first is labeled "User Name" and contains the text "ATEST11". The second is labeled "Password" and contains a series of dots, indicating a masked password. Below these fields is a dark gray button with the text "Sign In" in white.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Export - Documentary Collection**.
2. Under **Export - Documentary Collection**, click **Export Documentary Collection Booking Update**.

Figure 3-3 Export Documentary Collection Booking Update

- [Document Linkage](#)
This topic provides the systematic instructions to initiate the document linkage.
- [Bi-Directional Flow for Offline Transactions Initiated from Oracle Banking Trade Finance Process Management Cloud Service](#)
This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from Oracle Banking Trade Finance Process Management Cloud Service.

3.2.1 Document Linkage

This topic provides the systematic instructions to initiate the document linkage.

In Oracle Banking Trade Finance Process Management Cloud Service, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/ queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

Specify **User ID** and **Password**, and navigate to **Registration** screen.

1. On the header of **Registration** screen, click, **Documents**.

The **Document** pop-up screen is displayed.

2. Click the **Add Additional Documents** button/ link.

The **Document** screen is displayed.

3.2.2 Bi-Directional Flow for Offline Transactions Initiated from Oracle Banking Trade Finance Process Management Cloud Service

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from Oracle Banking Trade Finance Process Management Cloud Service.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in Oracle Banking Trade Finance Process Management Cloud Service upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to Oracle Banking Trade Finance Process Management Cloud Service.
 - Task is initiated in Oracle Banking Trade Finance Process Management Cloud Service, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to Oracle Banking Trade Finance Process Management Cloud Service.
 2. In Oracle Banking Trade Finance Process Management Cloud Service, user clicks **Request Clarification**, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online". In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder.
 3. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

3.3 Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection booking update request.

On successful completion of Registration of an Export Documentary Collection Booking Update, the task moves to Data Enrichment stage. At this stage the gathered information during Registration are validated.

① Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Task**.
2. Under **Tasks**, click **Free Tasks**.

Let's look at the details for Data Enrichment stage. User can enter/update the fields. Some of the application details that are already having value from Registration/online channels may not be editable.

The Data Enrichment stage has the following hops for data capture:

- [Main Details](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of Export Documentary Collection Update booking request.
- [Maturity Details](#)
This topic provides the systematic instructions to capture the maturity details.
- [Additional Fields](#)
This topic provides the systematic instructions to capture the additional fields.
- [Other Details](#)
This topic provides the systematic instructions to capture the other details like Credit Value Date, Debit Value Date, Other Bank charges etc.
- [Advices](#)
This topic provides the systematic instructions to capture the advices details.
- [Additional Details](#)
This topic provides the systematic instructions to capture the additional details
- [Settlement Details](#)
This topic provides the systematic instructions to capture the settlement details of export documentary collection update booking request.
- [Updated Details](#)
This topic provides the systematic instructions to capture the updated details.
- [Summary](#)
This topic provides the systematic instructions to view the summary of export documentary collection update booking request.

3.3.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of Export Documentary Collection Update booking request.

Main details section has two sub section as follows:

- Application Details
- Collection Details.

Application Details

The fields listed under this section are same as the fields listed under the Application Details section in Registration. For more information on the fields, refer **Registration** stage.

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

2. Click **Next**.

The task will move to next data segment.

Table 3-8 Main Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
Remarks	Specify any additional information regarding the collection. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPMCS user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Common Group Messages	Click to send MT799 and MT999 messages from within the task.
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767.
View Collection	Enables the user to view the latest collection values displayed in the respective fields.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.

Table 3-8 (Cont.) Main Details - Action Buttons - Field Description

Field	Description
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>
Refer	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
Cancel	<p>Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.</p>
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.</p>
Next	<p>On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>

3.3.2 Maturity Details

This topic provides the systematic instructions to capture the maturity details.

1. On **Maturity Details** screen, specify the fields.

Figure 3-9 Maturity Details

For more information on fields, refer to the field description table below.

Table 3-9 Maturity Details - Field Description

Field	Description
Draft Details The user can click + to add multiple Draft Details .	
Draft Code	Specify the draft code or click Search to search and select the draft code.
Draft Amount	Specify the draft amount.
Action	Click Edit icon to edit the draft code/ draft amount. Click Delete icon to delete the draft code.
Maturity and Multi Tenor Liquidation Details In case of multi tenor, user can provide multiple maturity details by clicking the plus '+' icon.	
S. No	Serial number of the tenor record.
Tenor Basis	System defaults the tenor basis, user can update the tenor basis. Click Search to search and select the tenor basis. <div> <i>Note</i> This field is disabled if the Tenor Type is 'Mixed'. </div>
Tenor Description	The tenor base code description is displayed based on the selected tenor basis. The user to can edit the tenor description.
Start Date	System defaults the tenor date, user can update the same.
Tenor Days	Specify the number of tenor days, if required.
Transit Days	Specify the transit days, if the tenor is sight.

Table 3-9 (Cont.) Maturity Details - Field Description

Field	Description
Maturity Date	<p>System displays the due date for the bill based on tenor and tenor basis.</p> <p>If tenor is sight, system will calculate the maturity date as five working days from Document Received Date. User can change this value to any date earlier than the maturity date up to system date. User cannot change the value to later than maturity date.</p> <p>If tenor is Usance, system will calculate the maturity date based on the tenor basis and populate the maturity date.</p> <div> <p> Note</p> <p>In case if the Operation Type is FOP, Due date (Maturity date) is not applicable in this case and current branch date will be populated in the Maturity date field.</p> </div>
Bill Amount	Specify the bill amount.
Liquidated Amount	Specify the the liquidation amount.
Exchange Rate	Specify the exchange rate.
Liquidation Date	Specify the liquidation date.
Liquidation Amount	Specify the liquidation amount.
Action	<p>Click Edit icon to edit the tenor record.</p> <p>Click Delete icon to delete the tenor record.</p>
Interest From Date	<p>Indicates the interest from date. The interest from date cannot be earlier than branch date and later than maturity date.</p> <p>User can update the Interest From Date.</p>
Interest To Date	<p>Indicates the interest to date. The interest to date cannot be earlier than branch date and later than maturity date.</p> <p>User can update the Interest To Date.</p>
Acceptance Commission From Date	Indicates the accept commission from date.
Acceptance Commission To Date	Indicates the accept commission to date.

2. Click **Next**.

The task will move to next data segment. For more information refer [Other Details](#).
For more information on action buttons, refer to the field description table below.

Table 3-10 Maturity Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.

Table 3-10 (Cont.) Maturity Details - Action Buttons - Field Description

Field	Description
Documents	<p>View/Upload the required document.</p> <p>Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application</p>
Remarks	<p>Specify any additional information regarding the collection. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to 'Remarks' field in backend application.</p>
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFCMCS user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767.
View Collection	Enables the user to view the latest collection values displayed in the respective fields.
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
Request Clarification	Click the Request Clarification button to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.

Table 3-10 (Cont.) Maturity Details - Action Buttons - Field Description

Field	Description
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject description. This reject reason will be available in the remarks window throughout the process.</p>
Refer	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Back	Click the Back button, to go back to the previous screen.
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

3.3.3 Additional Fields

This topic provides the systematic instructions to capture the additional fields.

Banks can configure user defined fields as per their requirement in the Additional Fields screen.

1. On **Additional Fields** screen, specify the fields, if any.

Figure 3-10 Additional Fields

The screenshot shows the 'Export Documentary Collection Booking Update' application. The top header includes tabs for 'Clarification Details', 'Documents', 'Remarks', 'Override', and 'Other Details saved successfully'. Below these are buttons for 'Common Group Messages', 'Incoming Message', 'View Collection', and 'Signatures'. The left sidebar contains a navigation menu with options: 'Main Details', 'Document Details', 'Shipment Details', 'Maturity Details', 'Other Details', 'Additional Fields' (selected), 'Advices', 'Additional Details', 'Settlement Details', 'Updated Details', and 'Summary'. The main content area is titled 'Additional Fields' and shows a message 'No Additional fields configured!'. At the bottom, there is an 'Audit' button and a row of action buttons: 'Request Clarification', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

2. Click **Next**.

The task will move to next data segment. For more information refer [Advices](#).
For more information on action buttons, refer to the field description table below.

Table 3-11 Additional Fields - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
Remarks	Specify any additional information regarding the collection. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to 'Remarks' field in backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following <ul style="list-style-type: none"> Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.

Table 3-11 (Cont.) Additional Fields - Action Buttons - Field Description

Field	Description
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767.
View Collection	Enables the user to view the latest collection values displayed in the respective fields.
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
Request Clarification	Click the Request Clarification button to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject description. This reject reason will be available in the remarks window throughout the process.</p>
Refer	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Back	Click the Back button, to go back to the previous screen.

Table 3-11 (Cont.) Additional Fields - Action Buttons - Field Description

Field	Description
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

3.3.4 Other Details

This topic provides the systematic instructions to capture the other details like Credit Value Date, Debit Value Date, Other Bank charges etc.

1. On **Other Details** screen, specify the fields that were not entered at Registration stage.

Table 3-17 Charge Details - Field Description

Field	Description
Commission Details	
Event	Read only field. This field displays the event name.

Table 3-17 (Cont.) Charge Details - Field Description

Field	Description
Event Description	Read only field. This field displays the description of the event.
Component	This field displays the commission component.
Rate	This field displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPMCS. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Rate	From the default value, if the rate is changed the value gets updated in this field.
Currency	This field displays the currency in which the commission have to be collected.
Amount	This field defaults the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPMCS. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPMCS. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Amount	From the default value, if the amount is changed, the value gets updated in the modified amount field.
Defer	If enabled, charges/commissions has to be deferred and collected at any future step. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPMCS. The user can not select/de-select the check box if it is de-selected by default.
Waive	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
Charge Party	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
Settlement Account	Select the settlement account.
Amendable	The value is auto-populated as the commission can be amended or not.
Charge Details	
Component	This field defaults the charge component type.
Tag Currency	This field defaults the tag currency in which the charges have to be collected.
Tag Amount	This field defaults the tag amount that is maintained under the product code.
Currency	This field defaults the currency in which the charges have to be collected.

Table 3-17 (Cont.) Charge Details - Field Description

Field	Description
Amount	This field defaults the amount that is maintained under the product code.
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPMCS.</p> <p>The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>
Waive	<p>Enable the toggle, if charges has to be waived.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if Defer toggle is enabled.</p>
Charge Party	Charge party is applicant by default. User can change the value to beneficiary.
Settlement Account	Indicates the settlement account.
Tax Details	The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/commission will be available on click of Re-Calculate button or on hand off to back-end system.
Component	This field displays the tax component.
Type	This field displays the type of tax component.
Value Date	This field displays the value date of tax component.
Currency	This field displays the currency in which the tax have to be collected. The tax currency is the same as the commission.
Amount	This field displays the tax amount based on the percentage of commission maintained.
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.
Defer	<p>If taxes have to be deferred and collected at any future step, this option has to be enabled.</p> <p>The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>
Settlement Account	<p>System defaults the settlement account.</p> <p>The user can modify the settlement account.</p>

FX Linkage

This section enables the user to link the existing FX contract(s) to the Bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

3.3.8 Updated Details

This topic provides the systematic instructions to capture the updated details.

This section enables the user to view the details of the updated fields along with the old values for the Data Enrichment user to compare.

1. On **Updated Details** screen, view the fields.

Figure 3-19 Updated Details

2. Click **Next**.

The task will move to next data segment. For more information refer [Summary](#).
For more information on action buttons, refer to the field description table below.

Table 3-28 Updated Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
Remarks	Specify any additional information regarding the collection. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to 'Remarks' field in backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following <ul style="list-style-type: none"> Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767.
View Collection	Enables the user to view the latest collection values displayed in the respective fields.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.
Request Clarification	Click the Request Clarification button to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.

Table 3-28 (Cont.) Updated Details - Action Buttons - Field Description

Field	Description
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject description. Checklist	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit..

3.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Export Collection Update Booking request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage

Log in into OBTFPMCS application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.

Summary

Back	Task moves to previous logical step.

3.5 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

1. Log in into OBTFPMCS application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFPMCS displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

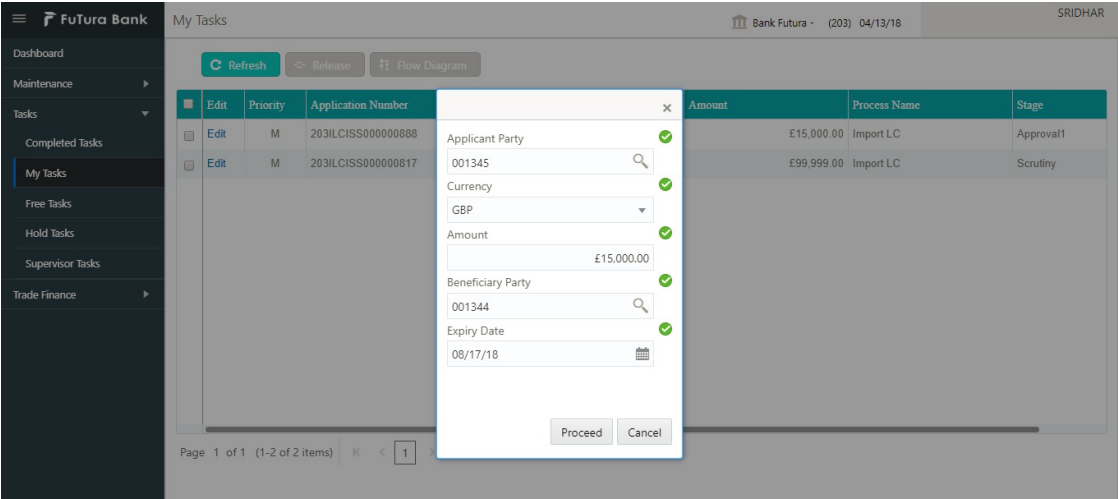

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Bill Currency Code
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
