Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Export LC Advise** process.

Audience

This user guide is intended for the central administrator of the Bank who controls the system and application parameters and ensures smooth functionality and flexibility of the banking application.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

| Convention | Meaning |
|-----------------|--|
| boldface | Boldface type indicates graphical user interface elements associated with an action, or terms defined in text. |
| <i>italic</i> | Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values. |
| monospace | Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter. |

Related Documents

Formore information on any related features, you can refer to the following documents:

- Oracle Banking SecurityManagement System User Guide
- GettingStarted User Guide

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1 Acronyms and Abbreviations

| Abbreviation | Description |
|--------------|---|
| OBTFFPM | Oracle Banking Trade Finance Process Management |
| LC | Letter of Credit |
| BC | Bankers Cheque |
| FX | Foreign Exchange |
| CCY | Currency |
| LCY | Local Currency |
| FCY | Foreign Currency |
| LOV | List of Values |
| CIF | Customer Information File |
| UDF | User Defined Fields |
| FFT | Free Format Text |
| SBLC | Standby Letter of Credit |

Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table 2 Common Action Buttons and its Definitions

| Action Buttons | Description |
|----------------|---|
| Reject | <p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p> |
| Refer | <p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others |

Table 2 (Cont.) Common Action Buttons and its Definitions

| Action Buttons | Description |
|-------------------------|---|
| Hold | The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant. |
| Cancel | Click Cancel to cancel the transaction input midway without saving any data. |
| Save & Close | Click Save & Close to save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request. |
| Next | Click Next , system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment. |
| Submit | Click Submit to complete the transaction after you specify all the input parameters for a particular process. The task will get moved to next logical stage of the process. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided. |

Symbols and Icons

The list of symbols and icons available on the screens are as follows:

1

Oracle Banking Trade Finance Process Management Cloud Service

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service process.

Welcome to the Oracle Banking Trade Finance Process Management Cloud Service User Guide. This guide provides an overview on the OBTFPMCS application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPMCS:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

Oracle Banking Trade Finance Process Management Cloud Service is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. Oracle Banking Trade Finance Process Management Cloud Service enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

Oracle Banking Trade Finance Process Management Cloud Service helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPMCS allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

2

Export LC Advise

This chapter is documented to get familiar with the Export LC Advise process of Oracle Banking Trade Finance Process Management.

As part of Export LC Advise, the advising bank receives the LC to be advised to the beneficiary from the issuing bank. The letter of credit is advised to the beneficiary through the advising bank. The various stages involved for advice of an Export Letter of Credit are:

- Receive and verify documents (Non Online Channel) - Registration stage
- Input application details
- Upload of related mandatory and non mandatory documents
- Verify documents and capture details
- Input/Modify details of LC - Data Enrichment stage
- Check for limit availability (In case of confirmation)
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges, if applicable.
- Capture remarks for other users to check and act.
- Hand off request to back office

Note

The user can initiate the transfer of LC advise process from the Export LC Advise screen. The process can be initiated manually at the branch or by parsing the incoming MT 700/720.

In the following sections, let's look at the details for Export LC Advising process:

This topic contains following subtopics:

- [Common Initiation Stage](#)
This topic provides the systematic instructions to initiate the **Export LC Advise** request.
- [Registration](#)
This topic provides the systematic instructions to initiate the Registration stage of **Export LC Advise** request.
- [Scrutiny](#)
This topic provides the systematic instructions to initiate the Scrutiny stage of Export LC Advise request.
- [Data Enrichment](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of Export LC Advise request.
- [Exceptions](#)
This topic helps you quickly get acquainted with the Exceptions process.

- [Multi Level Approval](#)
This topic helps you quickly get acquainted with the Multi Level Approval process.
- [Reject Approval](#)
This topic helps you quickly get acquainted with the Reject Approval process.

2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the **Export LC Advise** request. Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Initiate Task**.
The **Initiate Task** screen appears.

Figure 2-1 Initiate Task

2. On **Initiate Task** screen, specify the fields.

Note

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-1 Initiate Task - Field Description

| Field | Description |
|---------------------|---|
| Process Name | Select a process name from the drop-down list. |
| Customer Id | Click Search to search and select the customer id of the applicant or applicant's bank from the look-up. |
| Branch | Select the required branch code from the drop-down list. |

For more information on action buttons, refer to the field description table below.

Table 2-2 Action Buttons - Field Description

| Field | Description |
|----------------|--|
| Proceed | Task will get initiated to next logical stage. |
| Clear | Click to clear the contents update and enter the values again. |

3. Click **Proceed** to proceed to the next step.

2.2 Registration

This topic provides the systematic instructions to initiate the Registration stage of **Export LC Advise** request.

A user can register a request for an Islamic Export LC Advise received by mail/Courier at the front desk. During registration, user captures the basic details of the request, check the signature of authorized signatory of the issuing bank, and then upload related documents. On submit of the request, the task should be available for an LC expert to handle in the next stage. The OBTFPMCS user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPMCS verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPMCS user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

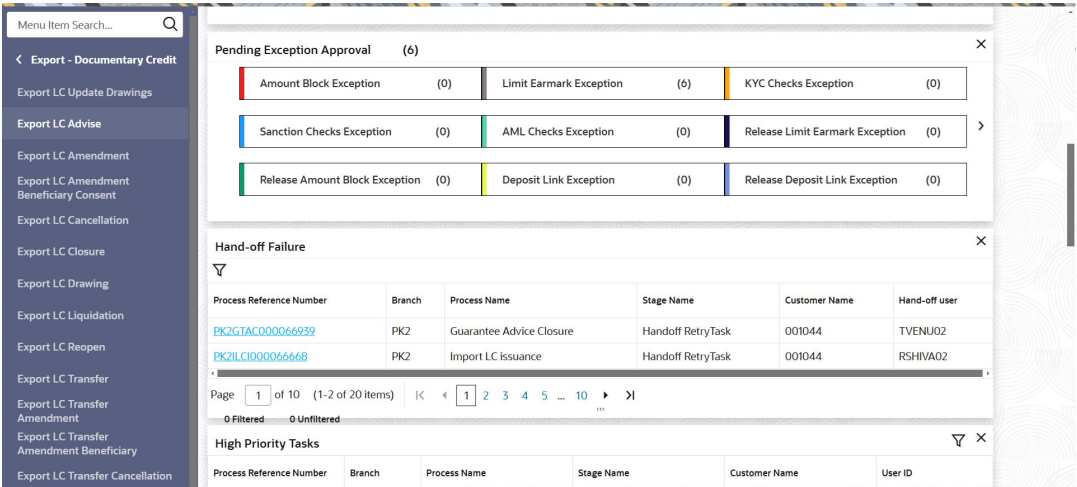

Specify **User ID** and **Password**, and login to **Home** screen.

Figure 2-2 LogIn Screen

- 1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Export Documentary Credit**.
- 2. Under **Export Documentary Credi**, click **Export LC Advise**.

Figure 2-3 Export LC Advise

The **Export LC Advise - Registration** screen is displayed.
The Export LC Advise - Registration stage has two sections Application Details and LC Details. Let's look at the details of Registration screens below:

| Hold | <p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p> |
| Cancel | Cancels the Export LC Advise task. Details entered will not be saved and the task will be removed |

Table 2-5 (Cont.) Export LC Advise - Registration - Action Buttons - Field Description

| Field | Description |
|-------------------------|---|
| Save & Close | Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request. |
| Submit | On Submit , system will trigger acknowledgment to the customer and give confirmation message for successful submission. Task will get moved to next logical stage of Export LC Advise. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided. |
| Checklist | Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit. |

- [Document Linkage](#)
This topic provides the systematic instructions to initiate the document linkage.

2.2.1 Document Linkage

This topic provides the systematic instructions to initiate the document linkage.

In Oracle Banking Trade Finance Process Management Cloud Service, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/ queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

Specify **User ID** and **Password**, and navigate to **Registration** screen.

1. On the header of **Registration** screen, click, **Documents**.

The **Document** pop-up screen is displayed.

2. Click the **Add Additional Documents** button/ link.

The **Document** screen is displayed.

2.3 Scrutiny

This topic provides the systematic instructions to initiate the Scrutiny stage of Export LC Advise request.

On successful completion of Registration of an Export LC Advise request, the request moves to Scrutiny stage. At this stage the gathered information during Registration are scrutinized.

Non Online Channel - Export LC Advice requests that were received at the desk will move to Scrutiny stage post successful Registration. The request will have the details entered during the Registration stage.

Online Channel - Requests that are received via online channels like trade portal, external system and SWIFT are available directly for further processing from Scrutiny stage and available data for all data segments from Application stage to Data Enrichment stage would be auto populated.

Note

In case of SWIFT MT720, requests that are received via online channels like trade portal, external system and SWIFT should be available directly for further processing in OBTFPM from Scrutiny stage.

Do the following steps to acquire a task currently at Scrutiny stage:

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Tasks**.
2. Under **Tasks**, click **Free Tasks**.

Let's look at the details for scrutiny stage. User can enter/update the following fields. Some of the fields that are already having value from Registration/online channels may not be editable.

The Scrutiny stage has the following hops for data capture:

- [Main Details](#)
This topic provides the systematic instructions to initiate the main details of Scrutiny stage of Export LC Advise request.
- [Availability Shipment](#)
This topic provides the systematic instructions to capture the availability and shipment details.
- [Payment Details](#)
This topic provides the systematic instructions to initiate the Payment in Scrutiny stage of Export LC Advise request.
- [Additional Fields](#)
This topic provides the systematic instructions to capture the additional fields of Export LC Advise process.
- [Additional Details](#)
This topic provides the systematic instructions to capture the additional details in Scrutiny stage of **Export LC Advise** process.
- [Summary](#)
This topic provides the systematic instructions to view the summary details in Scrutiny stage of Export LC Advise request.

2.3.1 Main Details

This topic provides the systematic instructions to initiate the main details of Scrutiny stage of Export LC Advise request.

Main details section has two sub section as follows:

- Application Details
- LC Details.

Application Details

All fields displayed under Application Details section, would be read only except for the 'Priority'.

1. On **Scrutiny - Main Details** screen, specify the fields that were not entered at Registration stage.

Figure 2-7 Scrutiny - Main Details

For more information on fields, refer to the field description table below.

Table 2-6 Export LC Advise - Main Details - Application Details - Field Description

| Field | Description |
|----------------------|--|
| MT 720 – Transfer LC | Read only field. The value is auto-populated from the Registration stage. |

Table 2-6 (Cont.) Export LC Advise - Main Details - Application Details - Field Description

| Field | Description |
|---------------------------------------|--|
| Beneficiary/Second Beneficiary | Read only field. The value is auto-populated from the Export LC Advise. If MT 720 – Transfer LC toggle is enabled at Registration stage, this field will be renamed as Second Beneficiary . |
| Branch | Read only field. Branch details is auto-populated based on the selected Beneficiary from the Registration stage. |
| Priority | System populates the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit. |
| Submission Mode | Read only field. System populates the submission mode of Export LC Advise request. By default the submission mode will have the value as 'Desk'. <ul style="list-style-type: none"> • Courier - Request received through Courier • Desk - Request received through Desk • SWIFT-Non STP - Request received through SWIFT-Non STP to register the task for the failed STP messages (MT798 and other MT Messages) |
| Currency Code, Amount | Read only field. The currency code and amount is auto-populated from the Export LC Advise. |
| Process Reference Number | Read only field. Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code. |
| Advising Date | Read only field. By default, the application will display branch's current date. |
| Issuing Bank/OLD Advising Bank | Read only field. The issuing bank/OLD Advising Bank details is auto-populated from the Export LC Advise. |

LC Details

The fields listed under this section are same as the fields listed under the **LC Details** section in Registration stage. 2. Click **Next**.

The task will move to next data segment.

Table 2-9 Main Details - Action Buttons - Field Description

| Field | Description |
|------------------------------|---|
| Clarification Details | Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'. |
| Documents | Upload the required documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application. |
| Remarks | Specify any additional information regarding the Export LC Advise. This information can be viewed by other users handling the request. |
| Overrides | Click to view the overrides accepted by the user. |
| Customer Instruction | Click to view/ input the following. <ul style="list-style-type: none"> Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFCMCS user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. |
| Incoming Message | This button displays the multiple messages (MT760 + up to 7 MT761). In case of MT798, the User can click and view the MT798 message(770,700/701). In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task. In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task. |

Table 2-9 (Cont.) Main Details - Action Buttons - Field Description

| Field | Description |
|------------------------------|---|
| Signatures | <p>Click the Signature button to verify the signature of the customer/bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p> |
| Request Clarification | User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline. |
| Reject | <p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p> |
| Refer | <p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others |
| Hold | <p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p> |
| Cancel | Cancels the Export LC Advise task. Details entered will not be saved and the task will be removed |
| Save & Close | <p>Save the information provided and holds the task in 'My Task' queue for working later.</p> <p>This option will not submit the request.</p> |
| Next | On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment. |
| Checklist | Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit. |

2.3.2 Availability Shipment

This topic provides the systematic instructions to capture the availability and shipment details.

User must verify/input/update Availability, Shipment and Goods details of an Export LC request for the different fields under the respective data segments.

1. On **Availability Shipment** screen, specify the fields.

Figure 2-9 Availability Shipment

For more information on fields, refer to the field description table below.

Table 2-10 Availability Shipment - Field Description

| Field | Description |
|-----------------------------|--|
| Availability Details | Specify the availability details in this section based on the description in the following table. |
| Available with | <p>Click Search to search and select the bank with which the credit is available, in case of Non - Online channel.</p> <ul style="list-style-type: none"> If the LC is restricted to any particular bank, search the bank with SWIFT code (BIC) or Bank Name. <p>On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address gets defaulted.</p> <ul style="list-style-type: none"> If the LC is not restricted to any bank, provide free text - (YOURSELVES, WITH ANY BANK etc.). <p>In case of Online channel, this field is read only.</p> |

Table 2-10 (Cont.) Availability Shipment - Field Description

| Field | Description |

| Limit Details | Below fields are displayed on the Limit Details pop-up screen, if the user clicks plus icon. |
| Customer ID | This field displays the applicant's/applicant bank customer ID defaulted from the application. The user can change the Customer ID. |
| Linkage Type | Select the linkage type. Linkage type can be: <ul style="list-style-type: none">FacilityLiability By default Linkage Type should be "Facility". |

Table 2-16 (Cont.) Limit Details - Field Description

| Field | Description |
|---------------------------------|---|
| Contribution % | <p>System defaults this field to 100%. User can modify this value. If contribution is more than 100%, system displays an alert message, if modified.</p> <p>Once contribution % is provided, system defaults the amount.</p> <p>System validates that if Limit Contribution% plus Collateral% is equal to 100. If the total percentage is not equal to 100 application will display an alert message.</p> <div> <p>Note</p> <p>The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message “Defaulted Collateral Percentage modified.”</p> </div> |
| Liability Number | <p>Click Search to search and select the Liability Number from the look-up.</p> <p>The list has all the Liabilities mapped to the customer.</p> |
| Contribution Currency | <p>Read only field.</p> <p>This field displays the contribution currency.</p> |
| Line ID/Linkage Ref No | <p>Click Search to search and select from the various lines available and mapped under the customer id list.</p> <p>LINE ID-DESCRIPTION will be available for selection along with Line ID. When you click on 'verify', the system will return value if the limit check was successful or Limit not Available. If limit check fails, the outstanding limit after the transaction value will be shown in the limit outstanding amount.</p> <p>The user can click the Line Id link to view the limit details.</p> <div> <p>Note</p> <p>User can also select expired Line ID from the lookup and on clicking the verify button, system should default “The Earmarking cannot be performed as the Line ID is Expired” in the “Response Message” field.</p> </div> <p>This field is disabled and read only, if Linkage Type is Liability.</p> |
| Limit/Liability Currency | <p>Read only field.</p> <p>This field displays the limit currency, when the user select the Liability Number.</p> |
| Limits Description | <p>Read only field.</p> <p>This field displays the limits description.</p> |
| Limit Check Response | <p>Read only field. This field displays the limit check response. Response can be 'Success' or 'Limit not Available' based on the limit service call response.</p> <p>The value in this field appears, if you click the Verify button.</p> |

Table 2-16 (Cont.) Limit Details - Field Description

| Field | Description |
|--|--|
| Amount to Earmark | This field defaults the amount to earmark. Contribution amount will default based on the contribution %. User can change the value. |
| Expiry Date | Read only field. This field displays the date up to which the Line is valid. |
| Limit Available Amount | Read only field. This field displays the value of available limit, i.e., limit available without any earmark. The Limit Available Amount must be greater than the Contribution Amount. The value in this field appears, if you click the Verify button. |
| Response Message | Read only field. This field displays the detailed response message. The value in this field appears, if you click the Verify button. |
| ELCM Reference Number | Read only field. This field displays the ELCM reference number. |
| Limit Details grid | Below fields appear in the Limit Details grid along with the above fields. |
| Line Serial | Displays the serial of the various lines available and mapped under the customer id. |
| Edit | Click the link to edit the Limit Details . |
| Cash Collateral Details | Specify the Collateral details based on the description of following table: |
| Collateral Percentage | System populates the Collateral % maintained in the Customer / Product for the counter party of the contract. User can modify the collateral percentage. Specify the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified." |
| Collateral Currency and amount | System populates the contract currency as collateral currency by default. User can modify the collateral Currency and amount. |
| Exchange Rate | System populates the exchange rate maintained. System validates for the Override Limit and the Stop limit if defaulted exchange rate is modified. |
| Collateral Details | Below fields are displayed on the Collateral Details pop-up screen, if the user clicks plus icon. |
| Total Collateral Amount | Read only field. This field displays the total collateral amount provided by the user. |
| Collateral Amount to be Collected | Read only field. This field displays the collateral amount yet to be collected as part of the collateral split. |
| Sequence Number | Read only field. The sequence number is auto populated with the value, generated by the system. |

Table 2-16 (Cont.) Limit Details - Field Description

| Field | Description |
|--|---|
| Collateral Split % | Specify the collateral split% to be collected against the selected settlement account. |
| Collateral Contribution Amount | Specify the collateral amount to be collected against the selected settlement account. User can either provide the collateral % where the collateral amount will be auto populated or modifying the collateral amount will auto correct the collateral %. |
| Settlement Account | Click Search to search and select the settlement account for the collateral. |
| Settlement Account Currency | Read only field. This field displays the settlement account currency defaulted by the system. |
| Exchange Rate | Read only field. This field displays the exchange rate, if the settlement account currency is different from the collateral currency. |
| Contribution Amount in Account Currency | Read only field. This field displays the contribution amount in the settlement account currency as defaulted by the system. |
| Account Available Amount | Read only field. System populates the account available amount on clicking the Verify button. |
| Response | Read only field. System populates the response on clicking the Verify button. |
| Response Message | Read only field. System populates the response message on clicking the Verify button. |
| Verify | Click to verify the account balance of the Settlement Account. |
| Save | Click to to save and close the record. |
| Close | Click to cancel the entry. |
| Cash Collateral Details grid | Below fields appear in the along with the above fields. |
| Contribution Amount | This field displays the collateral contribution amount. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified. |
| Account Balance Check Response | This field displays the account balance check response. |
| Edit | Click edit link to edit the collateral details. |
| Account Available Amount | This field displays the account available amount which will be auto-populated based on the settlement account selection. |

Table 2-16 (Cont.) Limit Details - Field Description

| Field | Description |
|--|---|
| Deposit Linkage Details | Specify the deposit linkage details based on the description of following table: System should allow the user to Link one or more existing Deposits as a contribution to secure underlying transactions. On Submit of DE stage, system will create Linkage of the Deposit/modification of existing Linkage by calling Back-office system (DDA) system directly. Below fields are displayed on the Deposit Linkage Details pop-up screen, if the user clicks plus icon. |
| Customer Id | This field displays the defaulted from the application. The user can change the Customer ID. |
| Deposit Account | Click Search to search and select deposit for linkage from the list of all the customer Deposits. All the Deposits of the customer should be listed in the LOV search. User should be able to select the deposit for linkage. |
| Deposit Branch | Read only field. This field displays the deposit branch which will be auto-populated based on the deposit account selection. |
| Deposit Available Amount | Read only field. This field displays the deposit available amount and currency which will be auto-populated based on the deposit account selection. |
| Deposit Maturity Date | Read only field. This field displays the maturity date of deposit based on the deposit account selection. |
| Exchange Rate | Read only field. This field displays the latest exchange rate for deposit linkage. This will be picked up from the exchange rate maintenance from the common core. |
| Deposit Available In Transaction Currency | Read only field. This field displays the deposit amount available, after exchange rate conversion, if applicable. |
| Linkage Percentage % | Specify the value for linkage percentage. |
| Linkage Amount (Transaction Currency) | This field displays the transaction amount, user can change the value. System validates the linking amount with available Deposit balance and should not allow to link more than the available amount. |
| Deposit Details grid | Below fields appear in the Deposit Details grid along with the above fields. |
| Deposit Currency | This field displays the deposit currency. |
| Transaction Currency | This field displays the transaction currency. |
| Edit | Click edit link to edit the deposit linkage details. |

- Click **Save and Close** to save the details and close the screen.

Commission, Charges and Taxes

This section displays Commission, Charges and Taxes details. On landing the additional tab, charges and tax if any will get defaulted from back end simulation. If default charges are available under the product, they should be defaulted here with values. If customer or

customer group specific charges are maintained, then the same will be defaulted from back end system.

The system also default the Charges/Commission Party maintained for the customer as per defined Class Maintenance in OBTF. System simulates the Charges, Commission and Tax details from the Back office.

Table 2-17 Commission, Charges and Taxes - Field Description

| Field | Description |
|--------------------|---|
| Commission Details | This section displays the commission details. By default, all the charges, commission and margin are collected from the counter-party. |
| Component | Displays the commission component. |

Table 2-17 (Cont.) Commission, Charges and Taxes - Field Description

| Field | Description |
|-----------------------|--|
| Rate | Displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPMCS. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field. |
| Mod. Rate | From the default value, if the rate is changed the value gets updated in this field. |
| Currency | Displays the currency in which the commission have to be collected. |
| Amount | Displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPMCS. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPMCS. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field. |
| Modified | From the default value, if the amount is changed, the value gets updated in the modified amount field. |
| Defer | Switch to  for charges/commissions has to be deferred and collected at any future step. |
| Waive | Switch to  to waive the charges/commissions. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder. |
| Split | Switch to  for splitting the Commission. Switch to  if splitting of commission is not required. |
| Charge Party | Charge party is 'Applicant' by default. User can change the value to Beneficiary. |
| Settl. Account | The settlement account. |
| Amend | Displays if the field is amendable or not. |
| Charge Details | This section displays the charge details. |
| Component | Displays the charge component type. |
| Tag Currency | Displays the tag currency in which the charges have to be collected. |
| Tag Amount | Displays the tag amount that is maintained under the product code. |
| Currency | Displays the currency in which the charges have to be collected. |
| Amount | This field displays the amount that is maintained under the product code. |
| Modified | From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field. |

Table 2-17 (Cont.) Commission, Charges and Taxes - Field Description

| Field | Description |
|---------------------------|--|
| Billing |  <p>Switch to  to make the details available for billing engine for further processing, if charges are handled by separate billing engine. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPMCS.</p> <p>The user can not enable/disable the option, if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p> |
| Defer |  <p>Switch to  to defer the charges and collect at any future step. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPMCS.</p> <p>The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p> |
| Waive |  <p>Switch to  to waive the charges. Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if Defer toggle is enabled.</p> |
| Split |  <p>Switch to  for splitting the Commission.</p>  <p>Switch to , if splitting of commission is not required.</p> |
| Charge Party | Displays the charge party. By default the charge party is 'Applicant'. |
| Settlement Account | Click Search icon to search and select the settlement account. |
| Tax Details | <p>This section displays the tax details.</p> <p>The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/commission will be available on click of Re-Calculate button or on hand off to back-end system.</p> |
| Component | Displays the tax component. |
| Type | Displays the type of tax component. |
| Value Date | Displays the value date of tax component. |
| Ccy | <p>Displays the currency in which the tax have to be collected.</p> <p>The tax currency is the same as the commission.</p> |
| Amount | <p>Displays the tax amount based on the percentage of commission maintained.</p> <p>The user can edit the tax amount, if applicable.</p> |
| Billing |  <p>Switch to  to make the details available for billing engine for further processing, if taxes are handled by separate billing engine.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p> |

Table 2-17 (Cont.) Commission, Charges and Taxes - Field Description

| Field | Description |
|---------------------------------|---|
| Defer | <p>Switch to  to defer the taxes and collect at any future step.</p> <p>Switch to  if you do not want to defer the taxes.</p> <p>On disabling the user has to click on 'Recalculate' charges button for re-simulation.</p> |
| Settl. Account | System defaults the settlement account. The user can modify the settlement account. |
| Split Settlement | <p>This section displays the Split Settlement.</p> <p>This section is displayed if the user clicks on the Recalculate button to fetch the Split Settlement details from Backoffice.</p> <p>The default parties in Split row should be fetched from OBTF.</p> |
| Select | The option to select the split settlement record. |
| Component | Displays the split component type eligible for Split . |
| Currency | Displays the currency of split settlement. |
| Amount | Displays the amount of split settlement. |
| Split Settlement Details | This section displays the Split Settlement details. Split Settlement details section appears from Back office, when the user clicks on the Recalculate button. |
| Sequence | Displays the sequence number is auto populated with the value, generated by the system. |
| Component | Displays the split component type eligible for Split. |
| Amount | <p>The system splits the respective Charge/Commission amount automatically between counter party and third party with 50% value by default.</p> <p>The bank user can modify the amount.</p> <p>More than two splits are not allowed.</p> |
| Customer | Indicates the ID of the Customer in Split Settlement Details section. |
| GL Account | The system defaults the GL account. |
| Account | <p>The system defaults the Settlement account.</p> <p>User can modify the settlement account. System initiates a call to common core tables within OBTFPMCS to select the account.</p> |
| Account Currency | This field defaults the currency of the account. |
| Branch | Indicates the branch of the customer where transaction is getting processed. |
| Percentage | <p>The system splits the respective Charge/Commission percentage automatically between counter party and third party with 50% value by default.</p> <p>More than two splits are not allowed.</p> <p>The bank user can modify the amount.</p> <p>The system should validate that the total percentage of each component doesn't exceed 100 and the total amount of each component doesn't exceed total component amount.</p> |
| Exchange Rate | System populates the exchange rate maintained. |
| Original Exchange Rate | Displays the Original Exchange Rate as simulated in split settlement details section. |
| Party Type | Displays the party type in split settlement details section. |
| Negotiation Reference | Specify the negotiation reference number. |

Table 2-17 (Cont.) Commission, Charges and Taxes - Field Description

| Field | Description |
|------------------------------|--|
| AR-AP Tracking | Indicates to defer the charge/ commission in Split Settlement Details section. The user can modify the AR-AP Tracking flag as per the requirements. |
| Loan/Finance Account | Displays the loan account. |
| Negotiation Rate | Displays the negotiation rate. |
| Negotiation Reference | Displays the negotiation reference. |

4. Click **Save and Close** to save the details and close the screen.

FX Linkage

This section enables the user to link the existing FX contract(s) to the LC transactions. User can link multiple forward FX contracts.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the Bill.

The screenshot shows the 'FX Linkage' window. It contains a table with the following columns: FX Reference Number, Bought Currency, SOLD Currency, Available Contract Amount, Rate, Linked Amount, Total Utilized Amount, FX Expiry Date, and Action. The table has one row with the following values: 000FNDF20076A9N9, (empty), (empty), £4,000.00, 1.35, £4,000.00, (empty), March 19, 2020, and a pencil icon. Below the table is a pagination bar showing 'Page 1 of 1 (1 of 1 items)' and a search bar for 'Average FX Rate' with the value '0'. At the bottom right are 'Save & Close' and 'Cancel' buttons.

| FX Reference Number | Bought Currency | SOLD Currency | Available Contract Amount | Rate | Linked Amount | Total Utilized Amount | FX Expiry Date | Action |

Table 2-18 FX Linkage - Field Description

| Field | Description |
|---------------------------------|---|
| FX Linkage pop-up screen | Specify the FX Linkage details. Below fields are displayed on the FX Linkage pop-up screen, if the user clicks the plus icon. |
| FX Reference Number | Click Search to search and select the FX contract reference number. On select and save and close, system defaults the available amount, bot currency, sold currency and rate. Forward FX Linkage available for selection at bill would be as follows, <ul style="list-style-type: none"> Counterparty of the FX contract should be the counterparty of the Bill contract. Active Forward FX transactions authorized not marked for auto liquidation. Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill. |
| Currency | Read only field. This field displays the FX BOT currency from the linked FX contract. |
| Contract Amount | This field displays the FX BOT currency and Amount. The user can change the currency. |

Table 2-18 (Cont.) FX Linkage - Field Description

| Field | Description |
|-------------------------------------|--|
| Available FX Contract Amount | Read only field. This field displays the available FX contract amount. The value is from the "Available Amount" in FXDLINKG screen in OBTR. Available Amount BOT currency and Amount is displayed. |
| Linkage Amount | System defaults the amount available for linkage. The Linkage amount should default the LC Contract Currency and allowed to change the linkage amount alone. The validation "Sum of Linked amount will not be greater than contract amount" or "Linkage amount will not be greater than the available amount for linkage" should be triggered on save of the FX linkage screen when trying to link the single FX or multiple FX. |
| Rate | Read only field. This field displays the rate at which the contract is booked. |
| FX Amount in Local Currency | Read only field. This field displays the FX amount in local currency. The value is defaulted as FX BOT currency and Amount from FXDTRONL |
| FX Expiry Date | Read only field. This field displays the expiry date from the linked FX contract. |
| FX Delivery Period - From | Read only field. This field displays the date from which the contract is valid for utilization. |
| FX Delivery Period - To | Read only field. This field displays the date to which the contract is valid for utilization. |
| FX Linkage grid | Below fields appear in the FX linkage grid along with the above fields. |
| Bought Currency | Read only field. This field displays the currency from the linked FX contract. |
| Sold Currency | Read only field. This field displays the currency from the linked FX contract. |
| Available Contract Amount | Read only field. Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero. |
| Linked Amount | Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage. |
| Total Utilized Amount | Read only field. This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version. The value is Total Utilized Amount BOT currency and Amount for Import LC/Guarantee Issuance from FXDLINKG . |

Table 2-18 (Cont.) FX Linkage - Field Description

| Field | Description |
|------------------------|--|
| Average FX Rate | Read only field. Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate. |
| Action | Click Edit icon to edit the FX details. Click Delete icon to delete the FX details. |

5. Click **Save and Close** to save the details and close the screen.
6. Click **Next**.

The task will move to next data segment.

For more information on action buttons, refer to the field description table below.

Table 2-19 Additional Details - Action Buttons - Field Description

| Field | Description |
|------------------------------|---|
| Clarification Details | Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'. |
| Documents | Upload the required documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application. |
| Remarks | Specify any additional information regarding the Export LC Advise. This information can be viewed by other users handling the request. Content from Remarks field should be handed off to Remarks field in Backend application. |
| Overrides | Click to view the overrides accepted by the user. |
| Customer Instruction | Click to view/ input the following. <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPMCS user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. |

Table 2-19 (Cont.) Additional Details - Action Buttons - Field Description

| Field | Description |

| Incoming Message | <p>This button displays the multiple messages (MT760 + up to 7 MT761).</p> <p>In case of MT798, the User can click and view the MT798 message(770,700/701).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p> |
| Signatures | <p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p> |
| Request Clarification | User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline. |
| Reject | <p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p> |
| Refer | <p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others |
| Hold | <p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p> |

Table 2-19 (Cont.) Additional Details - Action Buttons - Field Description

| Field | Description |
|-------------------------|---|
| Cancel | Cancel the Scrutiny stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue. |
| Save & Close | Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request. |
| Back | On click of Back, task moves to previous logical step. |
| Next | On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment. |

2.3.6 Summary

This topic provides the systematic instructions to view the summary details in Scrutiny stage of Export LC Advise request.

User can review the summary of details updated in Scrutiny stage of Export LC Advise request.

The Summary tiles display a list of important fields with values. User can drill down from Summary tiles into respective data segments.

1. On **Summary** screen, click  on any tile to view the details.

Figure 2-18 Summary

Tiles Displayed in Summary

- Main Details - User can view and modify the application details and LC details, if required.

- Availability Shipment - User can view and modify availability and shipment details, if required.
- Payment Details - User can view and modify all details related to payments, if required.
- Additional Fields - User can view the details of additional fields.
- Revolving Details - User can view and modify revolving details on revolving LC, if applicable.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Commission, Charges and taxes - User can view and modify Commission, charges and taxes details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- FX Linkage - User can view at the FX linkage details.

2. Click **Submit**.

The task will move to next logical stage.

Table 2-20 Summary - Action Buttons - Field Description

| Field | Description |
|------------------------------|---|
| Clarification Details | Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'. |
| Documents | Upload the required documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application. |
| Remarks | Specify any additional information regarding the Export LC Advise. This information can be viewed by other users handling the request. Content from Remarks field should be handed off to Remarks field in Backend application. |
| Overrides | Click to view the overrides accepted by the user. |
| Customer Instruction | Click to view/ input the following. <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPMCS user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. |

Table 2-20 (Cont.) Summary - Action Buttons - Field Description

| Field | Description |
|------------------------------|---|
| Incoming Message | <p>This button displays the multiple messages (MT760 + up to 7 MT761).</p> <p>In case of MT798, the User can click and view the MT798 message(770,700/701).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p> |
| Signatures | <p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p> |
| Request Clarification | User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline. |
| Reject | <p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p> |
| Refer | <p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others |
| Hold | <p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p> |

Table 2-20 (Cont.) Summary - Action Buttons - Field Description

| Field | Description |
|-------------------------|--|
| Cancel | Cancel the Scrutiny stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue. |
| Save & Close | Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request. |
| Back | On click of Back, task moves to previous logical step. |
| Submit | Task will get moved to next logical stage of Export LC Advice. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided. |

2.4 Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of Export LC Advise request.

A DE User can input new Export LC Advise request. As part of data enrichment user can enter/update basic details of the incoming request.

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task which completed the registration and currently at Data enrichment stage.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click, **Tasks**.
2. Under **Tasks**, click **Free Tasks**.

Let's look at the details for Data Enrichment stage. User can enter/update the fields in Data Enrichment stage. Some of the fields that are already having value from Registration/online channels may not be editable.

The Data Enrichment stage has the following hops for data capture:

- [Main Details](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of Export LC Advise request.
- [Availability Shipment](#)
This topic provides the systematic instructions to capture the availability and shipment details.
- [Document Details](#)
This topic provides the systematic instructions to capture the details of the documents received.
- [Payment Details](#)
This topic provides the systematic instructions to initiate the Payment in Data Enrichment stage of Export LC Advise request.
- [Additional Fields](#)
This topic provides the systematic instructions to capture the additional fields.
- [Advices](#)
This topic provides the systematic instructions to capture the advices details of Export LC Advise process.
- [Additional Details](#)
This topic provides the systematic instructions to capture the additional details in Data Enrichment stage of Export LC Advise process.
- [Settlement Details](#)
This topic provides the systematic instructions to capture the settlement details of Export LC Advise request.
- [Summary](#)
This topic provides the systematic instructions to view the summary details in Data Enrichment stage of Export LC Advise request.

2.4.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of Export LC Advise request.

Main details section has two sub section as follows:

- Application Details
- LC Details.

Application Details

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

- FX Linkage - User can view the FX linkage details.

2. Click **Submit**.

The task will move to next logical stage.

For more information on action buttons, refer [Table 2-20](#) of **Scrutiny** stage.

2.5 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Export LC Advice request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Amount Block Exception Approval

| Type | Contract Currency | Block Amount | Account | Branch | Account Currency | Block Ref No | Block Status | Block Status Details |
|--------|-------------------|--------------|---------------|--------|------------------|--------------|--------------|----------------------|
| Charge | GBP | 50 | PK20010440017 | PK2 | GBP | | Failed | |
| Tax | GBP | 4 | PK20010440017 | PK2 | GBP | | Failed | |

At the bottom of the screen, there are buttons for 'Reject', 'Refer', 'Hold', 'Approve', and 'Next'.

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in

suspense account for blocks created for collateral. Amount block check will be done for all the parties related to the LC.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPMCS Application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the “Amount Block Reference Number” to the back office. On successful handoff, back office will make use of these “Amount Block Reference Number” to release the Amount Block done in the mid office (OBTFPMCS) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off
- Refer:
 - Refer Refer back to DE providing alternate settlement account to be used for block.
 - Different collateral to be mapped or utilize lines in place of collateral.
- Reject: Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

Proceed

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

5. Open the task and re-key some of the critical field values from the request in the **Approval Re-Key** screen.

Some of the fields below will dynamically be available for re-key.:

- Currency

- Contract Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

6. Click **Proceed** to proceed for the approval.

The **Approval Summary** screen appears. The user can view the Summary tiles which displays list of important fields with values.

7. Click each tile to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.
