Oracle Banking Trade Finance IB Import Under LC, Release 14.8.1.0.0

G46077-01

Contents

Preface

Purpose

This manual is designed to help you to quickly get familiar with the Accelarator Pack Product Document - IB Import Under LC module of Oracle Banking Trade Finance.

Audience

This document is intended for the following audience:

- Back Office Data Entry Clerk
- Back Office Managers/ Officers
- Product Managers, End of Day Operators, and
- Bank’s Financial Controller/Trade Finance Department Manager

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup? ctx=acc&id=docacc.

- Access to Oracle Support

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
`monospace`	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Documents

For more information on any related features, you can refer to the following documents:

- Procedures User Manual
- Messaging User Manual
- Core Entities and Services User Manual
- Settlements User Manual
- Oracle Banking Common Core User Guide

1

Overview & Objectives

1.1 Introduction

A bill, as an instrument of international trade, is the most commonly used method for a seller to be paid through banking channels. Besides credit risk considerations, bills are the customary business practice for trade and a particularly important fee-earning service for any bank.

The Bills and Collections (BC) module supports the processing of all types of bills, both domestic and international. It handles the necessary activities during the entire lifecycle of a bill once it is booked.

In an effort to empower your bank in handling a high volume of credit and to enable you to provide superior services to the customers of your bank, Oracle Banking Trade Finance provides you with the following features:

- The Bills and Collections module supports the processing of all types of international and domestic bills like:
  - Incoming Bills under LCs
  - Incoming Bills not under LCs
  - Outgoing Bills under LCs
  - Outgoing Bills not under LCs
  - Incoming Collections
  - Outgoing Collections
  - Usance or Sight Bills
  - Documentary or Clean Bills

You can create products, templates, or even copy the details of an existing bill on to a new one and modify it to suit your requirements. This renders the input of the details of a bill faster and easier.

- You have the flexibility to create and customize a product to suit almost any requirement under a bill. The bills associated with the product will bear characteristics that you define for it.
- The BC module is designed to handle the interest, charges, or fees related to a bill and record amendments to the original terms of the bill.
- The BC module actively interacts with the LC module of Oracle Banking Trade Finance . This enables easy retrieval of information for bills drawn under an LC that was issued at your bank. Most of the details maintained for the LC will be defaulted to the bill when you indicate the reference number of the LC involved in the bill. This eliminates the need to re-enter the details of the LC all over again.
- The Central Liability sub-system automatically controls the booking of a bill against the credit lines assigned to the customer before the bookings are made. Oracle Banking Trade Finance also supports tracking your bank’s exposure for a bill to several parties.
- You have the option to automate periodic processes such as:

  - The application of floating interest rates to the components of a bill as and when they change
  - The movement of a bill from a given status to another
  - Accrual of interest due to a bill
  - Liquidation of bills on the liquidation date that you indicate
  - Generation of tracers on the due date

These will be processed as part of the batch processes run at BOD or EOD. The system automatically calculates the date on which the events should take place, based on the frequency and the date specified for the bill.

- The module also supports automated follow-up and tracer facility for payments and acceptance. Tracers can be automatically generated at an indicated frequency until a discrepancy is resolved.
- When a repayment against the bill, is not made on the due date, you may want to do an aging analysis for the bill. You can define the number of days that the bill should remain in a given status, the sequence in which a bill should move from one status to another and also indicate the direction of movement (forward or reverse). You can follow-up on the repayment of a bill by generating reports which detail the status of aging bills.
- Depending on the processing requirements of your bank, you can define and store the standard documents, clauses, and instructions and free format texts. These details can be incorporated and printed onto the output document of the bill, by entering the relevant code. This eliminates entering the details of standard components of a bill every time you need to use them.
- Bills can be carried over several stages during the day. After a bill has been entered, it can be verified and authorized on-line before further processing.
- Information services for managerial and statistical reporting such as on-line transactions, status report and the immediate retrieval of information of the bills processed at your bank can be generated.
- Oracle Banking Trade Finance ’s Graphic User Interface (GUI) facilitates ease of input. Picklists are provided wherever possible. This makes the module both efficient and easy to use.
- The media supported include Mail, Telex and SWIFT.
- The BC module supports and handles the following functions:
  - Open/Amend a bill
  - The authorization of bill contracts
  - The reversal and liquidation of interest and charges
  - Customer inquiries
  - The generation of tracers and advices
  - The generation and printing of reports
- On-line help - indicates that you can invoke global help by making use of the Help option in the Menu bar. You can also invoke on-line context sensitive help, which is made available to you, if you strike the hot key <F1> while in the application. A window pops up displaying information associated with the field from which you invoked it.
- Event reversal for previous version created event
- If the import Bill contract is liquidated using a loan, then on final liquidation of the contract the status of the contract should be changed to 'Devolved.

Limitations

- BC Contract Online- Exception tab -Proper updation of ' Tracers to Be sent ' will not happen
- BC Tracers getting generated in EOD has to be generated by going to Outgoing browser
- For Bills under LC, Acceptance has to be generated by using the Common Group Messages.

2.2 Product Code – IBLL/IBLM

IBLL - Incoming Usance Bills under LC Acceptance

IBLM - Incoming Documentary Multi Tenor Bills under LC on Acceptance Interest In Advance

- Reports Availability
- Additional information (ex. UDF & other Special Maintenance)

2.2.1 Introduction

These Products are used to book the Incoming Usance/Multi Tenor Bills under LC Acceptance, for both Credit Compliant & Discrepant Document Submitted by the Negotiating bank. These Products can be used for even Remitting Proceeds thru the Reimbursing Bank to negotiating Bank.

This Product can be used to provide Discount or Advance (On Behalf of Applicant/Drawee) to negotiating Bank.

Change of Operation Acceptance to Discount (Before Maturity), Acceptance to Advance (On Maturity).

2.2.2 Business Scenario

Scenario 1 - Credit Compliant Doc Submission

Issuing bank received Documents from Negotiating bank, and scrutinizes the docs. If the docs are Credit Compliant, Send MT740 during while booking the Bill to the Reimbursing Bank (If the Payment is routed through reimbursing Bank) & Mark Bills as Credit Compliant.

If required to inform about the acceptance Issuing bank will send MT799 (Free Format - Acceptance Message) to the Negotiating bank.

On Maturity Issuing bank Debit the Customer & credit the Nostro for the Bill Amount.

MT756 has to be generated to the Negotiating bank or Reimbursing Bank (If Payment is routed thru reimbursing bank).

Scenario 2 - Discrepant Doc Submission and Acceptance by Importer

Issuing bank received Documents from Negotiating bank, along with MT 754 and scrutinizes the docs. If Issuing bank find discrepancy the same will be informed to the importer, if the importer is ok with the discrepancy, Issuing bank will send MT732 (Informing the Negotiating bank that docs are taken up with discrepancies).

On receipt of MT732 Negotiating bank will inform the same to exporter.

Issuing bank will send MT740 during while booking the Bill to the Reimbursing Bank (If the Payment is routed through reimbursing Bank).

If required to inform about the acceptance Issuing bank will send MT799 (Free Format - Acceptance Message) to the Negotiating bank.

On Maturity Issuing bank Debit the Customer & credit the Nostro for the Bill Amount.

MT756 has to be generated to the Negotiating bank or Reimbursing Bank (If Payment is routed thru reimbursing bank).

Scenario 3 - Discrepant Doc Submission and Refusal by Importer

Issuing bank received Documents from Negotiating bank, along with MT 754 and scrutinizes the docs. If Issuing bank find discrepancy the same will be informed to the importer, if the importer is not ok with the discrepancy, Issuing bank will send MT734 (Informing the Negotiating bank that docs are refused to accept by the importer).

On receipt of MT734, Negotiating bank will inform the same to the exporter. If the exporter submits all the documents with Credit Compliant, the same will be scrutinized by the Negotiating bank send to issuing bank.

Upon receipt of documents issuing bank will scrutinize the docs, if documents are Credit Compliant, sends MT740 to the Reimbursing Bank (If the Payment is routed through reimbursing Bank) & will send MT732 to the Negotiating Bank (Informing that docs are taken up).

On Maturity Issuing bank Debit the Customer & credit the Nostro for the Bill Amount.

MT756 has to be generated to the Negotiating bank or Reimbursing Bank (If Payment is routed thru reimbursing bank).

Scenario 4 – Prior to Doc Submission request for acceptance from Importer

Issuing bank received MT 750(Discrepancy Request) from Negotiating bank. The same will be informed to the importer, if the importer is ok with the discrepancy, Issuing bank will send MT752 (Informing the Negotiating bank that importer is ok with discrepancies).

On receipt of MT752, Negotiating bank mark the discrepancies are sorted out and will send MT754 along with the Documents to Issuing Bank.

Upon receipt of MT 754 & Documents, Issuing bank will scrutinize the docs, if documents are Credit Compliant, sends MT740 to the Reimbursing Bank (If the Payment is routed through reimbursing Bank) & will send MT732 to the Negotiating Bank (Informing that docs are taken up).

On Maturity Issuing bank Debit the Customer & credit the Nostro for the Bill Amount.

MT756 has to be generated to the Negotiating bank or Reimbursing Bank (If Payment is routed thru reimbursing bank).

Scenario 5 – Prior to Doc Submission Refusal by Importer.

Issuing bank received MT 750(Discrepancy Request) from Negotiating bank. The same will be informed to the importer, if the importer is not ok with the discrepancy, Issuing bank will send MT796 (Informing the Negotiating bank that importer is not ok with discrepancies).

On receipt of MT796, Negotiating bank will inform the same to the exporter. If the exporter submits all the documents with Credit Compliant, the same will be scrutinized by the Negotiating bank and MT754 will send to issuing bank with Documents.

If Issuing bank find discrepancy the same will be informed to the importer, if the importer is not ok with the discrepancy, Issuing bank will send MT734 (Informing the Negotiating bank that docs are refused to accept by the importer).

On receipt of MT734, Negotiating bank will inform the same to the exporter. If the exporter submits all the documents with Credit Compliant, the same will be scrutinized by the Negotiating bank send to issuing bank.

Upon receipt of documents issuing bank will scrutinize the docs, if documents are Credit Compliant, sends MT740 to the Reimbursing Bank (If the Payment is routed through reimbursing Bank) & will send MT732 to the Negotiating Bank (Informing that docs are taken up).

On Maturity Issuing bank Debit the Customer & credit the Nostro for the Bill Amount.

MT756 has to be generated to the Negotiating bank or Reimbursing Bank (If Payment is routed thru reimbursing bank).

Scenario 6 – Advance Request from the Importer.

On Maturity if the importer requests for bill Advance, Issuing bank can provide advance to the customer using the change of operation Acceptance to Advance.

During Advance Issuing bank debit the Bill Advanced GL and credit the nostro account. During realization Issuing bank will debit the customer account for advanced amount and interest and credit the respective bill advanced and income GLs.
