This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

- [Purpose](#)
- [Audience](#)
This document is intended for the following audience:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Structure](#)
This manual is organized into the following chapters:
- [Conventions](#)
- [Related Documents](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)
- [Basic Actions](#)
- [Symbols and Icons](#)

1.1 Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Export Documentary Collection Booking** process.

1.2 Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

- [Access to Oracle Support](#)

1.3.1 Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

1.4 Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

1.5 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.6 Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

1.7 Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1.8 Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

1.9 Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1.10 Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1-1 Acronyms and Abbreviations

Abbreviation	Description
OBTFSM	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange
CCY	Currency
LCY	Local Currency
FCY	Foreign Currency
LOV	List of Values
CIF	Customer Information File
UDF	User Defined Fields
FFT	Free Format Text
SBLC	Standby Letter of Credit

1.11 Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table 1-2 Common Action Buttons and its Definitions

Action Buttons	Description
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.

Table 1-2 (Cont.) Common Action Buttons and its Definitions

Action Buttons	Description
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Click Cancel to cancel the transaction input midway without saving any data.
Save & Close	Click Save & Close to save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Next	Click Next , system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.
Submit	Click Submit to complete the transaction after you specify all the input parameters for a particular process. The task will get moved to next logical stage of the process. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

1.12 Symbols and Icons

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

3

Export Documentary Collection Booking

Export Documentary Collection Booking process enables the Drawee (Exporter) to collect payment for document under collection from the Drawer (Importer) through intermediate banks (Remitting/Collecting Bank).

This topic contains following subtopics:

- [Common Initiation Stage](#)
- [Registration](#)
- [Data Enrichment](#)
- [Exceptions](#)
- [Multi Level Approval](#)
- [Reject Approval](#)
- [Common Initiation Stage](#)
This topic provides the systematic instructions to initiate the Export Documentary Collection Booking request.
- [Registration](#)
This topic provides the systematic instructions to initiate the Registration stage of **Export Documentary Collection Booking** request.
- [Data Enrichment](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection booking request.
- [Exceptions](#)
This topic helps you quickly get acquainted with the Exceptions process.
- [Multi Level Approval](#)
This topic helps you quickly get acquainted with the Multi Level Approval process.
- [Reject Approval](#)
This topic helps you quickly get acquainted with the Reject Approval process.

3.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the Export Documentary Collection Booking request.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Initiate Task**.
The **Initiate Task** screen appears.

Figure 3-1 Initiate Task

The screenshot shows the Oracle 'Initiate Task' registration screen. On the left is a navigation menu with options like Trade Finance, Administration, Bank Guarantee, etc., with 'Initiate Task' highlighted. The main content area is titled 'Initiate Task' and 'Registration'. It contains three input fields: 'Process Name' with a dropdown menu showing 'Export Documentary Collection', 'Customer Id' with a text input containing '0005753' and a search icon, and 'Branch' with a dropdown menu showing '000-FLEXCUBE UNIVERSAL B'. At the bottom right of the main area are 'Proceed' and 'Clear' buttons.

2. On **Initiate Task** screen, specify the fields.

Note

The fields which are marked in asterisk are mandatory.

For more information on fields, refer to the field description table below.

Table 3-1 Initiate Task - Field Description

Field	Description
Process Name	Select a process name from the drop-down list.
Customer ID	Click Search to search and select the required customer ID.
Branch	Select the required branch code from the drop-down list.

For more information on action buttons, refer to the field description table below.

Table 3-2 Action Buttons - Field Description

Field	Description
Proceed	Task will get initiated to next logical stage..
Clear	Click to clear the contents update and enter the values again.

3. Click **Proceed** to proceed to the next step.

3.2 Registration

This topic provides the systematic instructions to initiate the Registration stage of **Export Documentary Collection Booking** request.

User captures the basic details of the transaction and upload related documents. On submit, the request will be available for an collection expert to handle the request in the next stage.

Specify **User ID** and **Password**, and login to **Home** screen.

Figure 3-2 LogIn ScreenThe image shows the Oracle login screen. At the top, the Oracle logo is displayed in red. Below the logo, there are two input fields. The first is labeled "User Name" and contains the text "ATEST11". The second is labeled "Password" and contains a series of dots. Below these fields is a dark gray button with the text "Sign In" in white. The background of the screen is light gray with a decorative header bar at the top.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Export - Documentary Collection**.
2. Under **Export - Documentary Collection**, click **Export Documentary Collection Booking**.

Figure 3-3 Export Documentary Collection Booking

The **Export Documentary Collection Booking - Registration** screen appears. The Export Documentary Collection Booking - Registration stage has two sections Application Details and Collection Details. Let's look at the details of Registration screens below:

Figure 3-4 Export Documentary Collection Booking - Registration - Application Details

- On **Export Documentary Collection Booking - Registration - Application Details** screen, specify the fields.

Note

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 3-3 Export Documentary Collection Booking - Registration - Application Details - Field Description

Field	Description
Drawer	Specify the Drawer ID. Alternatively, click Search to search and select the Drawing reference number. In the lookup, you can search giving any combination details of party ID and the Party Name to fetch the drawing details. Based on the search result, select the applicable Drawer. Note If the selected Drawer ID/party is blacklisted the system displays a warning message.
Branch	Read only field. Branch details is auto-populated based on the selected Drawer ID.
Bill Amount	Select the bill currency and specify the bill amount.
Amount In Local Currency	Read only field. System fetches the local currency equivalent value for the LC amount from back office (with decimal places).
Process Reference Number	Read only field. Unique OBTFPM task reference number for the transaction. This is auto generated by the system based on process name and branch code.
Customer Reference Number	Specify the customer reference number if available.
Priority	System populates the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit.
Submission Mode	Select the submission mode of Export Documentary Collection Booking request from the drop-down list. By default the submission mode will have the value as 'Desk'. Desk - Request received through Desk Courier - Request received through Courier
Booking Date	Read only field. System displays the booking date of the application. By default, the application displays branch's current date.

Collection Details

Registration user can provide collection details in this section. Alternately, details can be provided by Data Enrichment user.

4. On **Export Documentary Collection Booking - Registration - Collection Details** screen, specify the fields.

Note

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 3-4 Export Documentary Collection Booking - Registration - Collection Details - Field Description

Field	Description
Documents Received	Select the number of sets of documents received from the drop-down list. First Second Both
Tenor Type	Select the tenor type based on the document received. The options are: Sight Usance Multi Tenor
Product Code	Click Search to search and select the product code for the collection booking from the look-up.
Product Description	Read only field. This field displays the description of the product as per the product code.
Operation Type	Read only field. This field displays the operation type as per the product code. User can book a documentary collection using the Operation Type as FOP , to indicate if the documents are to be delivered Free of Payment to the Drawee by the Collecting Bank.

Table 3-4 (Cont.) Export Documentary Collection Booking - Registration - Collection Details - Field Description

Field	Description
Stage	Select the stage from the drop-down list. The options are: • Initial • Final By default, stage is set to 'Initial'. For Operation Type, FOP the Stage to be defaulted to Final as Free of Payment is not applicable for Bills in Initial stage.
Contract Reference Number	Read only field. System populates the contract reference number from the back end system once the product code is selected.
User Reference Number	System defaults the User reference number based on the description of the product as per the product code. The user can change the value.

The Data Enrichment stage has the following hops for data capture:

- [Main Details](#)
- [Document Details](#)
- [Other Details](#)
- [Shipment Details](#)
- [Maturity Details](#)
- [Additional Fields](#)

- [Advices](#)
- [Additional Details](#)
- [Settlement Details](#)
- [Summary](#)

Let's look at the details for Data Enrichment stage. User can enter/update the following fields. Some of the application details that are already having value from Registration channels may not be editable.

- [Main Details](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection booking request.
- [Document Details](#)
This topic provides the systematic instructions to capture the details of the documents received.
- [Other Details](#)
This topic provides the systematic instructions to capture the other details like Credit Value Date, Debit Value Date, Other Bank charges etc.
- [Shipment Details](#)
This topic provides the systematic instructions to capture the shipment details of export documentary collection booking request.
- [Maturity Details](#)
This topic provides the systematic instructions to capture the maturity details.
- [Additional Fields](#)
This topic provides the systematic instructions to capture the additional fields.
- [Advices](#)
This topic provides the systematic instructions to capture the advices details.
- [Additional Details](#)
This topic provides the systematic instructions to capture the additional details.
- [Settlement Details](#)
This topic provides the systematic instructions to capture the settlement details of export documentary collection booking request.
- [Summary](#)
This topic provides the systematic instructions to view the summary of Export Documentary Collection Booking process.

3.3.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection booking request.

Main details section has two sub section as follows:

- Application Details
- Collection Details.

Application Details

All fields displayed under Basic details section, would be read only except the 'Customer Reference Number', 'Priority' and 'Submission Mode' fields. For more information on the fields, refer [Table 3-3](#) of **Registration** stage.

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

Figure 3-6 Data Enrichment - Main Details

For more information on fields, refer to the field description table below.

Table 3-6 Export Documentary Collection Booking - Main Details - Application Details - Field Description

Field	Description
Drawer	Read only field. This field displays the Drawer as selected in Registration stage.
Branch	Read only field. Branch details is auto-populated based on the selected Drawer ID.
Bill Amount	Read only field. This field displays the bill currency defaulted from the Registration stage.
Amount In Local Currency	Read only field. System fetches the local currency equivalent value for the LC amount from back office (with decimal places).
Process Reference Number	Read only field. Unique OBTFPM task reference number for the transaction. This is auto generated by the system based on process name and branch code.
Customer Reference Number	Specify the customer reference number if available.

Table 3-6 (Cont.) Export Documentary Collection Booking - Main Details - Application Details - Field Description

Field	Description
Priority	System populates the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority.
Submission Mode	System populates the submission mode of Export Documentary Collection Booking request. By default the submission mode will have the value as 'Desk'. Desk - Request received through Desk Courier - Request received through Courier User can change the submission mode.
Booking Date	Read only field. System displays the booking date of the application. By default, the application displays branch's current date.

Collection Details

The fields listed under this section are same as the fields listed under the Collection Details section in Registration. During Registration, if user has not captured input, then user can capture the details in this section.

Note

In case field Operation Type has value FOP (Free of Payment) that is populated from OBDX, system should retain the value and should not allow the user to edit the same.(Display only field if Submission mode is Online.

Figure 3-7 Collection Details

For more information on fields, refer to the field description table below.

Table 3-7 Export Documentary Collection Booking - Main Details - Collection Details - Field Description

Field	Description
Documents Received	Select the number of sets of documents received from the drop-down list. • First • Second • Both
Tenor Type	Select the tenor type based on the document received. The options are: • Sight • Usance • Multi Tenor
Product Code	Read only field. Product Code is defaulted from the Registration stage.
Product Description	Read only field. This field displays the description of the product as per the product code.
Operation Type	Read only field. This field displays the operation type as per the product code. User can book a documentary collection using the Operation Type as FOP , to indicate if the documents are to be delivered Free of Payment to the Drawee by the Collecting Bank.
Stage	Stage value is defaulted from the Registration stage. The options are: • Initial • Final User can change the Stage value. By default, stage is set to 'Initial'. For Operation Type , FOP the Stage to be defaulted to Final as Free of Payment is not applicable for Bills in Initial stage.

Figure 3-19 Charge Details

For more information on fields, refer to the field description table below.

Table 3-21 Charge Details - Field Description

Field	Description
Commission Details	
Event	Read only field. This field displays the event name.
Event Description	Read only field. This field displays the description of the event.
Component	This field displays the commission component.
Rate	This field displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Rate	From the default value, if the rate is changed the value gets updated in this field.
Currency	This field displays the currency in which the commission have to be collected.
Amount	This field defaults the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Amount	From the default value, if the amount is changed, the value gets updated in the modified amount field.
Defer	If enabled, charges/commissions has to be deferred and collected at any future step. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM. The user can not select/de-select the check box if it is de-selected by default.
Waive	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
Charge Party	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
Settlement Account	Select the settlement account.
Amendable	The value is auto-populated as the commission can be amended or not.

Table 3-21 (Cont.) Charge Details - Field Description

Field	Description
Charge Details	
Component	This field defaults the charge component type.
Tag Currency	This field defaults the tag currency in which the charges have to be collected.
Tag Amount	This field defaults the tag amount that is maintained under the product code.
Currency	This field defaults the currency in which the charges have to be collected.
Amount	This field defaults the amount that is maintained under the product code.
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.
Defer	If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.
Waive	Enable the toggle, if charges has to be waived. Based on the customer maintenance, the charges should be marked for Billing or for Defer.
Charge Party	Charge party is applicant by default. User can change the value to beneficiary.
Settlement Account	Indicates the settlement account.
Tax Details	
The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

FX Linkage

This section enables the user to link the existing FX contract(s) to the Bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

Field	Description
The user can click + to add multiple FX Details .	
FX Reference Number	Click Search to search and select the FX contract reference number. On select and save and close, system defaults the available amount, bot currency, sold currency and rate. Forward FX Linkage available for selection at bill would be as follows, - Counterparty of the FX contract should be the counterparty of the Bill contract. - Active Forward FX transactions authorized not marked for auto liquidation. Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.
The user can click + to add multiple FX Details .	
Bought Currency	This field displays the currency from the linked FX contract.
Sold Currency	This field displays the currency from the linked FX contract.
Available Contract Amount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.
Rate	This field displays the rate at which the contract is booked.

Table 3-24 (Cont.) FX Linkage - Field Description

Field	Description
Linked Amount	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.
Current Utilized amount	This field displays the liquidated /purchased /discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.
Total Utilized Amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.
FX Expiry Date	This field displays the expiry date from the linked FX contract.
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.
Action	Click Edit icon to edit the FX details. Click Delete icon to delete the FX details.
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.

6. Click **Save and Close** to save the details and close the screen.

Interest Details

The user can view and modify the Interest details simulated from the back office system. On update of the Interest rate user has to click on Recalculate button. System will trigger a simulation call to the back office and the updated Interest details will be reflected in this section.

For more information on fields, refer to the field description table below.

Table 3-25 Interest Details - Field Description

Field	Description
Component	This field displays the component maintained in the back office.

Table 3-25 (Cont.) Interest Details - Field Description

Field	Description
Component Description	This field displays the description of the component.
Rate Type	This field displays the rate type maintained for the component in back office. - Fixed Floating - Special
Rate Code	This field displays the rate code applicable for the component.
Min Spread	This field displays the minimum spread applicable for the Rate Code. This field have value, if the Rate Type is Floating .
Max Spread	This field displays the maximum spread applicable for the Rate Code. This field have value, if the Rate Type is Floating .
Spread	This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value. System validates whether the spread input is within the Minimum to Maximum Spread.
Min Rate	This field displays the minimum rate applicable for the Rate Code.
Max Rate	This field displays the maximum rate applicable for the Rate Code.
Rate	This field displays the value applicable for the Rate Code. You can modify the value, if the Rate Type is Fixed . System validates whether the Rate input is between the Minimum and Maximum Rate.
Modified Rate	This field displays the modified rate.
Special Pricing Reference Number	Specify the Special Pricing Reference Number, when there is a special Interest rate to be provided for that customer against the interest component (Main Component). Special Pricing Reference is not applicable for Penal Interest components. For transactions initiated from OBDX, the Special Pricing Reference Number will be populated from OBDX and user cannot edit the same. Note System displays an override as “Special Pricing Applicable”, on clicking “Save” in the Interest Details screen, if Special Pricing Reference number has been provided.
Currency	This field displays the interest currency.
Amount	Specify the interest amount, if the Rate Type is Special . In other cases , the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained.
Waive	User can waive the Interest applicable. System displays an override, if the user has waived the Interest.

Table 3-25 (Cont.) Interest Details - Field Description

Field	Description
Charge Party	This field displays the Charge Party based on the type of transaction. In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills.
Settlement Account	This field displays the settlement account of the Charge Party for debit of Interest. User can change the value. System displays an error if a different customer is chosen. If different account of the Charge Party is selected, system should display a override. In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTFPM).
Settlement Currency	System defaults the currency of the Settlement Account as maintained for the Charge Party.
Settlement Branch	System defaults the branch of the Settlement Account as maintained for the Charge Party.

7. Click **Save and Close** to save the details and close the screen.

Tracer Details

This section enables the user to view the default Tracer details from back end application. It also allows the user to add new Tracer details. Add new Tracer details based on the description in the following table:

Acknowledgement Tracer, Acceptance Tracer and Payment Tracer are applicable for this process.

For more information on fields, refer to the field description table below.

Table 3-26 Tracer Details - Field Description

Field	Description
Payment Tracer/ Acceptance Tracer	
Tracer Required	Enable the option, if tracer is required. • Toggle On: Required • Toggle Off: Not required.

Table 3-26 (Cont.) Tracer Details - Field Description

Field	Description
Number of Tracers	Specify the number of tracers required.
Tracer Frequency	Select the frequency for generation of the Tracer. The options are: - Daily - Weekly - Fortnightly
Tracer Medium	Select the tracer medium from the drop-down list. The options are: - MAIL - EMAIL - SWIFT
Tracer Receiver Party	Click Search to search and select the tracer receiver party.
Tracer Start Date	Select the tracer start date. Start date cannot be earlier than the branch date.
Template ID	Click Search to search and select the template ID. <i>Note</i> This field is enabled if Tracer Medium has value as SWIFT.

8. Click **Save and Close** to save the details and close the screen.

Pre-Shipment Details

This section links an existing Preshipment Credit.

Checklist	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit..

3.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Export Collection Booking request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

3.5 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

1. Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Bill Currency Code
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
