Preface

- [Purpose](#)
- [Audience](#)
This document is intended for the following audience:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Structure](#)
This manual is organized into the following chapters:
- [Conventions](#)
- [Related Documents](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)
- [Basic Actions](#)
- [Symbols and Icons](#)

1.1 Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Import Documentary Collection Liquidation** process.

1.2 Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

1.4 Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

1.5 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.6 Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

1.7 Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1.8 Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

1.9 Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1.10 Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1-1 Acronyms and Abbreviations

Abbreviation	Description
OBTFSM	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange
CCY	Currency
LCY	Local Currency
FCY	Foreign Currency
LOV	List of Values
CIF	Customer Information File
UDF	User Defined Fields
FFT	Free Format Text
SBLC	Standby Letter of Credit

1.11 Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table 1-2 Common Action Buttons and its Definitions

Action Buttons	Description
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.

Table 1-2 (Cont.) Common Action Buttons and its Definitions

Action Buttons	Description
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Click Cancel to cancel the transaction input midway without saving any data.
Save & Close	Click Save & Close to save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Next	Click Next , system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.
Submit	Click Submit to complete the transaction after you specify all the input parameters for a particular process. The task will get moved to next logical stage of the process. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

1.12 Symbols and Icons

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

Oracle Banking Trade Finance Process Management is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. Oracle Banking Trade Finance Process Management enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

Oracle Banking Trade Finance Process Management helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

3

Import Documentary Collection Liquidation

Import Documentary Collection Liquidation process facilitates the user to handle the payment under a Documentary Collection.

This topic contains following sub-topics:

- [Common Initiation Stage](#)
This topic provides the systematic instructions to initiate the **Import Documentary Collection Liquidation** request.
- [Registration](#)
This topic provides the systematic instructions to initiate the Registration stage of Import Documentary Collection Liquidation request.
- [Data Enrichment](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of Import Documentary Collection Liquidation request.
- [Exceptions](#)
This topic helps you quickly get acquainted with the Exceptions process.
- [Multi Level Approval](#)
This topic helps you quickly get acquainted with the Multi Level Approval process.
- [Reject Approval](#)
This topic helps you quickly get acquainted with the Reject Approval process.

3.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the **Import Documentary Collection Liquidation** request.

Specify **User ID** and **Password**, and login to **Home** screen.

View Collection	Enables the user to view the latest collection values displayed in the respective fields.
Events	On click, system will display the details of all the events

Table 3-5 (Cont.) Import Documentary Collection Liquidation - Registration - Action Buttons - Field Description

Field	Description
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancels the Import Documentary Collection Liquidation Task. Details entered will not be saved and the task will be removed
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.
Submit	The task will move to next logical stage of Import Documentary Collection Liquidation. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

- [OBTFPM- OBDX Bidirectional Flow](#)

This topic provides the systematic instructions to initiate the OBTFPM- OBDX Bidirectional Flow for the import documentary collection liquidation process.

3.2.1 OBTFPM- OBDX Bidirectional Flow

This topic provides the systematic instructions to initiate the OBTFPM- OBDX Bidirectional Flow for the import documentary collection liquidation process.

As a part of Digital Experience, customers can initiate Trade Finance Transactions from online channels and the respective task will be available in OBTFPM for further handling. OBTFPM user, for task received from online channel, raise clarification and receive response from the customer.

Specify **User ID** and **Password**, and login to **Home** screen of OBDX application.

1. Customer initiates the Trade Finance transaction in Online channel (OBDX) and upload the necessary documents.

The screenshot shows the Oracle OBTFPM application interface. A 'Documents' window is open, allowing the user to upload documents. The window displays a document titled 'Proforma Inv 1.pdf' with a red PDF icon and a plus sign for additional uploads. The background shows the 'Application Details' and 'LC Details' sections of the task.

The task created will land in the **Scrutiny** stage of OBTFPM for handling by Trade expert for reviewing and identifying mismatch/incomplete data.

- In the **Scrutiny**, **Data Enrichment** or **Approval** stage, the OBTFPM user clicks **Request Clarification** button to request for online clarification from customer.

The screenshot shows the 'Request Clarification' screen in the Oracle OBTFPM system. The form is titled 'Import Documentary Collection Liquidation - Data Enrichment :: Application No: PK2IDCL000042600'. The form is divided into several sections:

- Main Details:**
 - Application Details:** Includes fields for Document Collection Number (PK2IDCL19081A3UY), Drawee (001044 - GOODCARE PLS), Branch (PK2-FLEXCUBE UNIVERSAL BANK), Priority (Medium), Remitting Bank/Remitter (001041 - WELLS FARGO), Remitting Bank/Remitter Reference (ABC1234), Process Reference Number (PK2IDCL000042600), Submission Mode (Desk), Remitting Bank Date/Remitting Date (Mar 22, 2019), and Version Number (2).
 - Collection Details:** Includes fields for Documents Received (COL), Operation Type (COL), Bill Amount (GBP - £1,002.00), Tenor Type (Sight), Stage (FINAL), Product Code (ICLL), Co Acceptance Required (No), Product Description (INCOMING CLEAN SIGHT BILLS NOT U), Contract Reference Number (PK2IDCL19081A3UY), Finance Amount (GBP -), and Drawer (001043 - MARKS AND SPENCER).

At the bottom right, there is a 'Request Clarification' button highlighted in red, along with other buttons like 'Report', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

The **Request Clarification** detailed screen appears.

- Specify the required information and click **Save**.

The information is sent to the customer.

- You can view the details in the **View Clarification** window and the status will be **Clarification Requested**. Click **Re clarification**, if required.

The screenshot shows the 'View Clarification' window in the Oracle OBTFPM system. The window is titled 'Clarification Details - Application No: PK2IDCL000042424'. It contains a text area with the following message:

Proforma Invoice is not uploaded. Instead some other document is uploaded as proforma invoice.
Please delete the present document and upload the proforma invoice]

At the bottom right, there is a 'Save & Close' button highlighted in red.

The task goes to **Awaiting Customer Clarification** state, until the response received from the customer.

5. Click **Edit**.

6. Click **Accept Clarification**, if the query raised has been answered by the customer.

The status should change to **Clarification Accepted** on next the task moves to the next logical stage.

7. View the clarification and click **Documents** Tab.

System displays both the new document uploaded and the metadata for deleted document and the deleted document is displayed in a blurred way. User can open the new document, the deleted document cannot be opened. System should also increment the version

number of the documents.

3.3 Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of Import Documentary Collection Liquidation request.

On successful completion of Registration of an Import Documentary Collection Liquidation, the task moves to Data Enrichment stage. In this stage the gathered information during registration are scrutinized.

Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Tasks**.
2. Under **Tasks**, click **Free Tasks**.

Let's look at the details for Data Enrichment stage. User can enter/update the fields. Some of the application details that are already having value from Registration channels may not be editable.

The Data Enrichment stage has the following hops for data capture:

- [Main Details](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of Import Documentary Collection Liquidation request.
- [Liquidation](#)
This topic provides the systematic instructions to capture the liquidation details of import documentary collection liquidation request.
- [Additional Fields](#)
This topic provides the systematic instructions to capture the additional fields.
- [Advices](#)
This topic provides the systematic instructions to capture the advices details.
- [Additional Details](#)
This topic provides the systematic instructions to capture the additional details
- [Settlement Details](#)
This topic provides the systematic instructions to capture the settlement details of Import Documentary Collection Liquidation request.
- [Summary](#)
This topic provides the systematic instructions to view the summary of Import Documentary Collection Liquidation request.

3.3.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of Import Documentary Collection Liquidation request.

Main details section has two sub section as follows:

- Application Details

- Collection Details.

Application Details

All fields displayed under Application details section, would be read only except the **Priority** field. For more information on the fields, refer **Registration** stage.

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

Figure 3-7 Data Enrichment - Main Details - Application Details

Note

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 3-6 Main - Application Details - Field Description

Field	Description
Documentary Collection Number	Read only field. This field displays the documentary collection reference number as selected in Registration stage.
Drawee	Read only field. Drawee ID and Drawee Name will be auto-populated from Registration stage.

Table 3-6 (Cont.) Main - Application Details - Field Description

Field	Description
Branch	Read only field. Branch details is auto-populated from Registration stage.
Priority	System populates the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit.
Submission Mode	The submission mode of Import Collection Liquidation request. By default the submission mode will have the value as 'Desk'.
Remitting Bank/Remitter	Read only field. Remitting Bank/Remitter will be auto-populated based on the selected Documentary Collection Number in Registration stage.
Remitting Bank/Remitter Reference	Read only field. Remitting Bank/Remitting Bank Reference will be auto-populated based on the selected Documentary Collection Number in Registration stage.
Process Reference Number	Read only field. Unique OBTFPM task reference number for the transaction. This is auto generated by the system based on process name and branch code.
Remitting Bank Date/Remitting Date	Read only field. Remitting Bank Date/Remitting Date will be auto-populated from Registration stage.
Liquidation Date	Read only field. By default, the application displays branch's current date. User can change the liquidation date.
Version Number	Read only field. This field displays the latest version of the bill.

Collection Details

The fields listed under this section are same as the fields listed under the Collection Details section in Registration. For more information of the fields, refer **Registration** stage. During Registration, if user has not captured input, then user can capture the details in this section.

Figure 3-8 Data Enrichment - Collection Details

Table 3-7 Main - Collection Details - Field Description

Field	Description
Documents Received	Read only field. Documents received details will be auto-populated from Registration stage.
Tenor Type	Read only field. Tenor will be auto-populated from Registration stage.
Product Code	Read only field. Product code will be auto-populated from Registration stage.
Product Description	Read only field. This field displays the description of the product as per the product code.
User Reference Number	Read only field. User reference number is defaulted based on the description of the product as per the product code.
Operation Type	Read only field. Operation Code will be auto-populated from the collection booking.
Stage	Read only field. System displays the stage of the transaction.
Co Acceptance Required	Read only field. Co-Acceptance Required will be auto-populated from Registration stage.
Contract Reference Number	Read only field. System populates contract reference number from the back end system once the Documentary Collection Number is selected in Registration stage..

Table 3-7 (Cont.) Main - Collection Details - Field Description

Field	Description
Bill Amount	Read only field. Bill currency and amount will be auto-populated from Registration stage.
Amount In Local Currency	Read only field. System fetches the local currency equivalent value for the LC amount from back office (with decimal places).
Bill Outstanding Amount	Read only field. Bill Outstanding Amount will be auto-populated from Registration stage.
Liquidation Amount	Specify the bill amount to be liquidated. If Tenor Type is Both , system disables the user to input in this field. On Submit and on click of Next, system displays message "This is a Multi-Tenor bill. Liquidation Details are to be input in Multi-Tenor Grid".
Finance Amount	Read only field. Finance Amount will be auto-populated from Registration stage.
Drawer	Read only field. Drawer ID and Drawer Name will be auto-populated from Registration stage.
Unlinked FX Rate	Specify the unlinked FX rate. If Tenor Type is Both , system disables the user to input in this field. On Submit and on click of Next, system displays message "This is a Multi-Tenor bill. Liquidation Details are to be input in Multi-Tenor Grid".
Rebate Amount	Read only field. This field displays the rebate to the bill outstanding amount.

2. Click **Next**.

The task will move to next data segment.

Table 3-8 Main Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.

Table 3-8 (Cont.) Main Details - Action Buttons - Field Description

Field	Description
Documents	View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
Remarks	Specify any additional information regarding the collection. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
View Collection	Enables the user to view the latest collection values displayed in the respective fields.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.
Request Clarification	User can specify the clarification details for requests received online.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.

Table 3-8 (Cont.) Main Details - Action Buttons - Field Description

Field	Description
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

3.3.2 Liquidation

This topic provides the systematic instructions to capture the liquidation details of import documentary collection liquidation request.

Liquidation hop enables the user to view Documents, Shipment, Maturity Details and Draft Details to process the liquidation.

1. On **Liquidation** screen, specify the fields.

For more information on fields, refer to the field description table below.

Table 3-17 Charge Details - Field Description

Field	Description
Commission Details	This section displays the commission details. By default, all the charges, commission and margin are collected from the counter-party.
Component	Displays the commission component. Click the link to view the commission component details.

Table 3-17 (Cont.) Charge Details - Field Description

Field	Description
Rate	Displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Mod. Rate	From the default value, if the rate is changed the value gets updated in this field.
Currency	This field displays the currency in which the commission have to be collected.
Amount	Displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
Defer	Switch to  for charges/commissions has to be deferred and collected at any future step. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.
Waive	Switch to  to waive the charges/commissions. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
Charge Party	Charge party will be applicant by default. User can change the value to beneficiary.
Settlement Account	Click Search to search and select the settlement account.
Amendable	The value is auto-populated as the commission can be amended or not.
Charge Details	This section displays the charge details.
Component	Displays the charge component type.
Tag Currency	Displays the tag currency in which the charges have to be collected.
Tag Amount	Displays the tag amount that is maintained under the product code.
Currency	This field displays the currency in which the charges have to be collected.
Amount	This field displays the amount that is maintained under the product code.
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.

Table 3-17 (Cont.) Charge Details - Field Description

Field	Description
Billing	Switch to  to make the details available for billing engine for further processing, if charges are handled by separate billing engine. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPM. The user can not enable/disable the option, if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled.
Defer	Switch to  to defer the charges and collect at any future step. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.
Waive	Switch to  to waive the charges. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if Defer toggle is enabled.
Charge Party	Read only field. Displays the charge party. By default the charge party is 'Applicant'.
Settlement Account	System defaults the Settlement Account. User can change the settlement account.
Tax Details	This section displays the tax details. The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/commission will be available on click of Re-Calculate button or on hand off to back-end system.
Component	Read only field. This field displays the tax component type.
Currency	Read only field. This field displays the currency in which the tax have to be collected. The tax currency is the same as the commission.
Amount	Read only field. This field displays the tax amount based on the percentage of commission maintained.
Billing	Switch to  to make the details available for billing engine for further processing, if taxes are handled by separate billing engine. This field is disabled, if 'Defer' toggle is enabled.

Table 3-17 (Cont.) Charge Details - Field Description

Field	Description
Defer	Switch to  to defer the taxes and collect at any future step. Switch to  if you do not want to defer the taxes. On disabling the user has to click on 'Recalculate' charges button for re-simulation.
Settlement Account	System defaults the Settlement Account. Click Search to search and select the settlement account.

- Click **Save and Close** to save the details and close the screen.

Preview Message

The bank user can view a preview of the outgoing SWIFT message and advise simulated from back office.

Account Customer	This field displays customer account based on the selected settlement account.
Account Currency	This field displays currency of the account based on the selected settlement account.
Account Branch	This field displays branch of the customer's account.
Original Exchange Rate	System displays the Original Exchange Rate as simulated in settlement details section from OBTF. Click the Fetch Exchange Rate button, the field displays the exchange rate for the split settlement.
Exchange Rate	Specify the exchange rate for the split settlement.
Deal Reference Number	Specify the exchange deal reference number.
Action	Click Edit icon to edit the Split Settlement. Click Delete icon to delete the Split Settlement.

4. Click **Save and Close** to save the details and close the screen.

FX Linkage

This section enables the user to link the existing FX contract(s) to the Bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

FX Delivery Period - From	Read only field. This field displays the date from which the contract is valid for utilization.
FX Delivery Period - To	Read only field. This field displays the date to which the contract is valid for utilization.
FX Linkage grid	Below fields appear in the FX linkage grid along with the above fields.
Bought Currency	Read only field. This field displays the currency from the linked FX contract.
Sold Currency	Read only field. This field displays the currency from the linked FX contract.
Available Contract Amount	Read only field. Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.
Linked Amount	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.
Total Utilized Amount	Read only field. This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version. The value is Total Utilized Amount SOLD currency and Amount for Import LC/Guarantee Issuance from FXDLINKG .

Table 3-20 (Cont.) FX Linkage - Field Description

Field	Description
Average FX Rate	Read only field. Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.
Action	Click Edit icon to edit the FX details. Click Delete icon to delete the FX details.

5. Click **Save and Close** to save the details and close the screen.

Loan Preferences

This section enables the user to link a loan to liquidate the document under collection. This section will be enabled based on the product selected for documents under collection.

For more information on fields, refer to the field description table below.

Table 3-21 Loan Preferences

Field	Description
Drawing/Collection Ref	Defaults from the underlying task. User cannot change the value.
Bill Currency-Amount	Outstanding Drawing/ Collection Currency and Amount, defaults from the underlying task. User cannot change the value.
Customer Id	Customer Id defaults from the underlying task. User cannot change the value.
Customer Name	Applicant/ Drawee Name defaults from the underlying task. User cannot change the value.

Table 3-21 (Cont.) Loan Preferences

Field	Description
Product Code	Product Code defaults from the underlying Collection/ Drawing Product maintenance. User can change the value.
Loan Currency-Amount	Loan currency is defaulted from the bill currency. System should displays an error message on tab out if the currency is not a Bill currency or Local Currency. If collateral amount is linked to the underlying drawing/ collection bill, the Loan Currency- amount to be utilized for liquidation to be input by the user here.
Original Exchange Rate	This field displays the original exchange rate applicable for Local Currency. System displays the Exchange rate from maintenance. User cannot change the value. System validates the exchange rate is within the allowed range.
Exchange Rate	The exchange rate.
Loan Tenor Units	Indicates the period of loan defaults from the underlying task. The numerical value for Days or months or Years is applicable.
Tenor Type	System defaults the tenor type. User cannot change the value. Values are Days, Months and Years. The numerical value for Days or months or Years is applicable.
Rate Type	Defaults from the underlying task. User cannot change the value.
Rate Code	Defaults from the underlying task. User cannot change the value.
Loan/Finance Value Date	This field displays the branch date as Value date. User cannot change the value.
Loan Maturity Date	Loan maturity date defaults based on Tenor type and Tenor units.
Loan Interest/UDE Details	
User Defined Element ID	This field displays the UDE Element ID as part of simulation.
UDE Description	This field displays the UDE description as part of simulation.
Rate Code	This field displays the Rate code as part of simulation.
Usage	This field displays the details as part of simulation.
UDE Value	This field displays the UDE value as part of simulation.
Limits	Specify the limit details. Click + to add limits. Clicking the plus icon displays a pop windows and allows the user to select the line code.
Serial Number	This field displays the serial number.
Linkage Type	This field displays the linkage type as "Facility" from back office.
Linkage Reference Number	This field displays the Linkage reference as part of simulation. User can change the value. Linkages available for the customer should be displayed for selection.
Linked Percentage	Specify the value for linked percentage. Maximum value is 100. User cannot enter negative values.
Limit Amount	This field displays the value for limit amount. System populates the value based on the contribution percentage.

6. Click **Save and Close** to save the details and close the screen.

Linked Loan Details

The bank user can view the details of linked loan accounts.

For more information on fields, refer to the field description table below.

Table 3-22 Linked Loan Details - Field Description

Field	Description
Linked Loan Details	
Loan Account	This field displays the loan account number.
Loan Currency	This field displays the currency of the loan account.
Loan Amount	This field displays the loan amount.

7. Click **Save and Close** to save the details and close the screen.
8. **Next.**

The task will move to next data segment.

For more information on action buttons, refer to the field description table below.

Table 3-23 Additional Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
Remarks	Specify any additional information regarding the collection. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.

Table 3-23 (Cont.) Additional Details - Action Buttons - Field Description

Field	Description
Customer Instructions	Click to view/ input the following • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
View Collection	Enables the user to view the latest collection values displayed in the respective fields.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.
Request Clarification	User can specify the clarification details for requests received online.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others

Table 3-23 (Cont.) Additional Details - Action Buttons - Field Description

Field	Description
Back	On click of Back, system moves the task back to previous data segment.
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

3.3.6 Settlement Details

This topic provides the systematic instructions to capture the settlement details of Import Documentary Collection Liquidation request.

1. On **Settlement Details** screen, specify the fields.

Figure 3-15 Settlement Details

For more information on fields, refer to the field description table below.

Table 3-24 Settlement Details – Field Description

Field	Description
Current Event	Select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event
Component	This field displays the components based on the product selected
Currency	This field displays the default currency for the component.
Debit/Credit	This field displays the debit/credit indicators for the components.
Account	This field displays the account details for the components.
Account Description	This field displays the the description of the selected account.

Table 3-24 (Cont.) Settlement Details – Field Description

Field	Description
Account Currency	This field displays the currency for all the items based on the account number.
Netting Indicator	This field displays the applicable netting indicator.
Current Event	This field displays the current event current event as Y or N.

- Click any component in the grid.

The application displays Party Details, Payment Details and Remittance Information.

Table 3-25 Party Details - Field Description

Field	Description

Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

3.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Import Collection Liquidation request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

3.5 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

1. Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Applicant Party
- Application Date

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
