Preface

- [Purpose](#)
- [Audience](#)
This document is intended for the following audience:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Structure](#)
This manual is organized into the following chapters:
- [Conventions](#)
- [Related Documents](#)
- [Acronyms and Abbreviations](#)
- [Screenshot Disclaimer](#)
- [Symbols and Icons](#)
- [Basic Actions](#)

Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Import LC Amendment Beneficiary Consent** process.

Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

- [Access to Oracle Support](#)

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide

- Oracle Banking Common Core User Guide

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1 Acronyms and Abbreviations

Next	Click Next , system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.
Submit	Click Submit to complete the transaction after you specify all the input parameters for a particular process. The task will get moved to next logical stage of the process. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

1

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

Oracle Banking Trade Finance Process Management is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. Oracle Banking Trade Finance Process Management enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

Oracle Banking Trade Finance Process Management helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

2

Import LC Amendment - Beneficiary Consent

Import LC Amendment - Beneficiary Consent process enables the user to register the beneficiary consent response received for an amendment made to a LC.

This topic contains following subtopics:

- [Common Initiation Stage](#)
This topic provides the systematic instructions to initiate the new **Import LC amendment - Beneficiary Consent** request.
- [Registration](#)
This topic provides the systematic instructions to initiate the Registration stage of **Import LC Amendment Beneficiary Consent** request.
- [Data Enrichment](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of **Import LC Amendment Beneficiary Consent** request.
- [Exceptions](#)
This topic helps you quickly get acquainted with the Exceptions process.
- [Multi Level Approval](#)
This topic helps you quickly get acquainted with the Multi Level Approval process.

2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the new **Import LC amendment - Beneficiary Consent** request.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Initiate Task**.
The **Initiate Task** screen appears.

Figure 2-1 Initiate Task

The screenshot shows the Oracle Trade Finance application interface. On the left is a sidebar menu with 'Trade Finance' selected, showing sub-items like Administration, Bank Guarantee Advise, Bank Guarantee Issuance, Buyers Credit, Common Group Message, Enquiry, Export - Documentary Collection, Export - Documentary Credit, Import - Documentary Collection, Import - Documentary Credit, Initiate Task, and Limits Tree. The main content area has a header with 'ORACLE' and user information. Below the header, there's a 'Menu Item Search...' bar. The main section is titled 'Initiate Task' and contains a 'Registration' tab. Under the 'Registration' tab, there are three input fields: 'Process Name' with a dropdown menu showing 'Import LC Amendment Benefic', 'LC Reference Number' with a text input containing 'PK2ILSN22110A95B' and a search icon, and 'Branch' with a dropdown menu showing 'PK2-Oracle Banking Trade Fina'. At the bottom right of the form are 'Proceed' and 'Clear' buttons.

2. On **Initiate Task** screen, specify the fields.

Note

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-1 Initiate Task - Field Description

Field	Description
Process Name	Select a process name from the drop-down list.
LC Reference Number	Click Search to search and select the required LC reference number.
Branch	Select the required branch code from the drop-down list.

For more information on action buttons, refer to the field description table below.

Table 2-2 Action Buttons - Field Description

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	Click to clear the contents update and enter the values again.

3. Click **Proceed** to proceed to the next step.

2.2 Registration

This topic provides the systematic instructions to initiate the Registration stage of **Import LC Amendment Beneficiary Consent** request.

If beneficiary response is given through branch either by fax, mail, or paper, the **Import LC amendment - Beneficiary Consent** process starts from the Registration Stage. During Registration stage, user can capture the basic details of the response, check the signature of the signatory from the advising bank and upload the related documents. It also enables the user to capture beneficiary response.

Specify **User ID** and **Password**, and login to **Home** screen.

Figure 2-2 Login ScreenThe image shows the Oracle login screen. At the top, the Oracle logo is displayed in red. Below the logo, there are two input fields. The first is labeled "User Name" and contains the text "ATEST11". The second is labeled "Password" and contains a series of dots. Below these fields is a dark gray button with the text "Sign In" in white. The background of the login area is light gray, and there is a decorative header bar with a blue and yellow pattern at the very top.

Let's look at the details for Data Enrichment stage. User can enter/update basic details of the incoming request. Some of the fields that are already having value from Registration/online channels may not be editable.

Do the following steps to acquire a task at Data Enrichment stage.

The Data Enrichment stage has the following hops for data capture:

- [Main Details](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of **Import LC Amendment Beneficiary Consent** request.
- [Advices](#)
This topic provides the systematic instructions to capture the advices details.
- [Additional Fields](#)
This topic provides the systematic instructions to capture the additional fields.
- [Additional Details](#)
This topic provides the systematic instructions to capture the additional details
- [Settlement Details](#)
This topic provides the systematic instructions to capture the settlement details of import LC amendment beneficiary consent request.
- [Summary](#)
This topic provides the systematic instructions to view the summary of import LC amendment Beneficiary Consent request.

2.3.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of **Import LC Amendment Beneficiary Consent** request.

Main details section has two sub section as follows:

- Application Details
- Beneficiary Response Capture

Application Details

All fields displayed under main details section, would be read only except the **Priority**. For more information on the fields, refer **Application Details** of **Registration** stage.

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

Figure 2-7 Data Enrichment - Main Details

Table 2-6 Data Enrichment - Main Details - Application Details - Field Description

Field	Description
Documentary Credit Number	Read only field. Documentary credit number is defaulted from LC.
Received From - Customer ID	Read only field. Customer ID will be auto-populated based on the selected LC in Registration stage.
Received From - Customer Name	Read only field. Customer name will be defaulted as available in LC.
Branch	Read only field. Branch details will be auto-populated based on the selected LC from the lookup.
Process Reference Number	Read only field. Unique Oracle Banking Trade Finance Process Management task reference number for the transaction. This is auto generated by the system based on process name and branch code.

Table 2-6 (Cont.) Data Enrichment - Main Details - Application Details - Field Description

Field	Description
Priority	Set the priority of the Import LC Amendment - Beneficiary Consent request as: • Essential • Critical • Low • Medium • High If priority is not maintained for the customer, system will populate 'Medium' as the default priority.
Submission Mode	Read only field. Submission mode will be defaulted based on the selected LC in Registration stage.
User Reference Number	Read only field. User reference number will be defaulted based on the selected LC in Registration stage.
Response Received Date	Read only field. The application displays the branch's current date by default.

Beneficiary Response Capture

The fields listed under this section are same as the fields listed under the **Beneficiary Response Capture** section in **Registration**. For more information on the fields refer **Beneficiary Response Capture** in the **Registration** stage. If user has not captured input, then user can capture the details in this section.

This button provides information about user initiated the transaction, initiated date, stage wise detail etc.

For more information on fields, refer to the field description table below.

Table 2-9 Audit - Field Description

Field	Description
Application No.	This field displays the application number of the process.
Branch Code	This field displays the branch code.
Initiated Date	This field displays the date on which process is initiated.
Initiated By	This field displays the user ID of the user who had initiated the process.
Process Name	This field displays the name of the process which is initiated.
S. No	This field displays the serial number of the audit record.
Stage Name	This field displays the current stage of the process.
Completed Time	This field displays the time on which the audit of the current stage is completed.
Completed By	This field displays the user ID of the user who had completed the audit.
Outcome	This field displays the outcome of the audit.

2. Click **Next**.

The task will move to next data segment.

Table 2-10 Main Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	Click to View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
Remarks	Specify any additional information regarding the LC amendment beneficiary consent. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the various overrides that have been generated and accepted.

Table 2-10 (Cont.) Main Details - Action Buttons - Field Description

Field	Description
Customer Instruction	Click to view/ input the following • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, Oracle Banking Trade Finance Process Management user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
View LC	Click to view the details of the LC.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.
Request Clarification	Submit the request for clarification to the “Trade Finance Portal” for the transactions initiated offline.
Save & Close	Save the details provided and holds the task in ‘My Task’ queue for further update. This option will not submit the request.
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in ‘My Task’ queue.
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others

Table 2-10 (Cont.) Main Details - Action Buttons - Field Description

Field	Description
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

2.3.2 Advices

This topic provides the systematic instructions to capture the advices details.

Advices menu displays the advices available under a product code from the back office as tiles. User can edit the fields in the tile, if required. User can suppress the advice, if required.

1. On **Advices** screen, click  on any advice tile to view the advice details.

Figure 2-10 Advices

The screenshot displays the Oracle Advices screen for application PK2ILCA000063225. The interface includes a top navigation bar with the Oracle logo, user information (ADMIN01), and a date (April 20, 2022). The main content area is titled "Import LC Amendment Beneficiary Consent DataEnrichment :: Application No:- PK2ILCA000063225". On the left, there is a sidebar with navigation options: Main Details, Advices (selected), Additional Fields, Additional Details, Settlement Details, and Summary. The Advices section shows a grid of six advice tiles, each with a title and details:

Table 2-14 Charge Details - Field Description

Field	Description
Commission Details	This section displays the commission details. By default, all the charges, commission and margin are collected from the counter-party.
Single Collection Cycle for Commission	This field is display only. The value displays as available in Bank Parameter at Back office When Single Cycle toggle is on, back office system follows single cycle for collecting commission as per the issuance commission cycle period for periodic commission.

Table 2-14 (Cont.) Charge Details - Field Description

Field	Description
Commission Collection Method	Select the Commission Collection Method from the following values: • Advance • Arrears The values are defaulted for commission Collection method as per product, which user can change. Based on collection method provided at contract level, for all commission component commission are collected and same is applicable for life cycle of the transaction.
Component	Displays the commission component. Click the link to view the commission component details.
Rate	Displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Mod. Rate	From the default value, if the rate is changed the value gets updated in this field.
Currency	Displays the currency in which the commission have to be collected.
Amount	Displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified	From the default value, if the amount is changed, the value gets updated in the modified amount field.
Defer	Switch to  for charges/commissions has to be deferred and collected at any future step.
Waive	Switch to  to waive the charges/commissions. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
Split	Switch to  for splitting the Commission. Switch to  if splitting of commission is not required.
Charge Party	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
Settl. Account	The settlement account.
Amend	Displays if the field is amendable or not.
Charge Details	This section displays the charge details.
Component	Displays the charge component type.

Table 2-14 (Cont.) Charge Details - Field Description

Field	Description
Tag Currency	Displays the tag currency in which the charges have to be collected.
Tag Amount	Displays the tag amount that is maintained under the product code.
Currency	Displays the currency in which the charges have to be collected.
Amount	This field displays the amount that is maintained under the product code.
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
Billing	Switch to  to make the details available for billing engine for further processing, if charges are handled by separate billing engine. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPM. The user can not enable/disable the option, if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled.
Defer	Switch to  to defer the charges and collect at any future step. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.
Waive	Switch to  to waive the charges. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if Defer toggle is enabled.
Split	Switch to  for splitting the Commission. Switch to , if splitting of commission is not required.
Charge Party	Displays the charge party. By default the charge party is 'Applicant'.
Settlement Account	Click Search icon to search and select the settlement account.
Tax Details	This section displays the tax details. The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/commission will be available on click of Re-Calculate button or on hand off to back-end system.
Component	Displays the tax component.
Type	Displays the type of tax component.
Value Date	Displays the value date of tax component.
Ccy	Displays the currency in which the tax have to be collected. The tax currency is the same as the commission.

Table 2-14 (Cont.) Charge Details - Field Description

Field	Description
Amount	Displays the tax amount based on the percentage of commission maintained. The user can edit the tax amount, if applicable.
Billing	Switch to  to make the details available for billing engine for further processing, if taxes are handled by separate billing engine. This field is disabled, if 'Defer' toggle is enabled.
Defer	Switch to  to defer the taxes and collect at any future step. Switch to  if you do not want to defer the taxes. On disabling the user has to click on 'Recalculate' charges button for re-simulation.

2.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Import LC Amendment Beneficiary Consent request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into Oracle Banking Trade Finance Process Management application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account.

Amount Bock Exception

This section will display the amount block exception details.

For more information on Action Buttons, refer to the field description table below.

Table 2-24 Approval Summary - Action Buttons - Field Description

Field	Description
Documents	View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
Remarks	Specify any additional information regarding the Import LC Amendment Beneficiary Consent. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following - Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. - Transaction Level Instructions – In this section, Oracle Banking Trade Finance Process Management user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
View LC	Click to view the details of the LC.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: - R1- Documents missing - R2- Signature Missing - R3- Input Error - R4- Insufficient Balance/Limits - R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.

Table 2-24 (Cont.) Approval Summary - Action Buttons - Field Description

Field	Description
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Cancel	Cancel the Approval stage. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.

- Click **Approve** to approve the transaction. The transaction is approved and handed off to the back end system for posting.
