Preface

- [Purpose](#)
- [Audience](#)
This document is intended for the following audience:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Structure](#)
This manual is organized into the following chapters:
- [Conventions](#)
- [Related Documents](#)
- [Screenshot Disclaimer](#)
- [Basic Actions](#)
- [Symbols and Icons](#)

Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Shipping Guarantee Issuance** process.

Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Structure

This manual is organized into the following chapters:

- Preface: Preface gives information on the intended audience, structure, and related documents for this User Manual.
- Chapters: The subsequent chapters provide an overview to the module.
- Screen Shot Disclaimer - The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; information used in the interface or documents are dummy, it does not exist in real world, and its only for reference purpose.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table 1 Common Action Buttons and its Definitions

Action Buttons	Description
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Click Cancel to cancel the transaction input midway without saving any data.
Save & Close	Click Save & Close to save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Next	Click Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

Table 1 (Cont.) Common Action Buttons and its Definitions

Action Buttons	Description
Submit	Click Submit to complete the transaction after you specify all the input parameters for a particular process. The task will get moved to next logical stage of the process. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

Symbols and Icons

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

Oracle Banking Trade Finance Process Management is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. Oracle Banking Trade Finance Process Management enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

Oracle Banking Trade Finance Process Management helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

2

Shipping Guarantee Issuance

This User Manual describes the various stages of Shipping Guarantee Issuance process.

As a part of Shipping Guarantee Issuance, the applicant approaches a Bank and requests the bank to issue a Shipping Guarantee on their behalf to the Beneficiary (Shipping Company).

This topic contains following sub-topics:

- [Common Initiation Stage](#)
This topic provides the systematic instructions to initiate the new **Shipping Guarantee Issuance** request.
- [Registration](#)
This topic provides the systematic instructions to initiate the Registration stage of Shipping Guarantee Issuance request.
- [Data Enrichment](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of Shipping Guarantee Issuance request.
- [Exceptions](#)
This topic helps you quickly get acquainted with the Exceptions process.
- [Multi Level Approval](#)
This topic helps you quickly get acquainted with the Multi Level Approval process.

2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the new **Shipping Guarantee Issuance** request.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Initiate Task**.
The **Initiate Task** screen appears.

Figure 2-1 Initiate Task

The screenshot shows the Oracle 'Initiate Task' screen for 'Registration'. The left sidebar lists various trade finance options, with 'Initiate Task' selected. The main form area contains four input fields: 'Process Name' (Shipping Guarantee Issuance), 'Issued Against' (Documentary Credit), 'LC Reference Number' (PK2ELAT221106018), and 'Branch' (PK2-Oracle Banking Trade Fina). Search icons are present next to the LC Reference Number and Branch fields. At the bottom right, there are 'Proceed' and 'Clear' buttons.

- On **Initiate Task** screen, specify the fields.

Note

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-1 Initiate Task - Field Description

Field	Description
Process Name	Select a process name from the drop-down list.
Customer ID	Click search icon to search and select the customer ID from the look up.
Branch	Select the required branch code from the drop-down list.

For more information on action buttons, refer to the field description table below.

Table 2-2 Action Buttons - Field Description

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	Click to clear the contents update and enter the values again.

- Click **Proceed** to proceed to the next step.

2.2 Registration

This topic provides the systematic instructions to initiate the Registration stage of Shipping Guarantee Issuance request.

The first stage of Shipping Guarantee Issuance process starts from the Registration Stage. The user can initiate Shipping Guarantee issuance from the Registration process. The first stage of Shipping Guarantee Issuance process starts from the Registration Stage. The user can initiate Shipping Guarantee issuance from the Registration process. The

OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

Specify **User ID** and **Password**, and login to **Home** screen.

Figure 2-2 Login Screen

The image shows the Oracle login screen. At the top, the Oracle logo is displayed in red. Below the logo, there are two input fields. The first field is labeled "User Name" and contains the text "ATEST11". The second field is labeled "Password" and contains seven dots. Below these fields is a dark gray button with the text "Sign In" in white.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Shipping Guarantee**.
2. Under **Shipping Guarantee**, click **Shipping Guarantee Issuance**.

Figure 2-3 Shipping Guarantee Issuance

The **Shipping Guarantee Issuance** screen appears. The Shipping Guarantee Issuance - Registration stage has two sections Application Details and Shipping Guarantee Details. Let's look at the details of Registration screens below:

Figure 2-4 Application Details

The request is received at the Branch/ Front office or Processing centre. The user should be able to input the following details.

- On **Shipping Guarantee Issuance - Registration - Application Details** screen, specify the fields.

Note

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-3 Shipping Guarantee Issuance - Registration - Application Details

Field	Description
Issued Against	Select whether this Shipping Guarantee is issued against Documentary Credit or against a Documentary Collection from the drop-down. The options are: • Documentary Credit • Documentary Collection
Documentary Credit Number	Specify the Documentary Credit number. Alternatively, click Search icon to search and select the Documentary Credit number from the look-up. This field is enabled if Documentary Credit is selected from the Issued Against field.
Customer	The customer ID for the selected Documentary credit is populated in this field, if Documentary Credit is selected from the Issued Against field. The user can not change the value. Specify the customer ID or click Search to search and select the customer ID from the look-up, if Documentary Collection is selected from the Issued Against field.
Branch	System defaults the branch name from shipping Guarantee / SBLC issuance.
Process Reference Number	Read only field. Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.
Customer Reference Number	Specify the customer reference number.
Priority	Priority maintained will be populated as either 'Low or Medium or High or Essential or Critical'. If priority is not maintained for a customer, 'Medium' priority will be defaulted. User can change the priority populated any time before submit of Registration stage.
Submission Mode	System defaults the submission mode from Shipping Guarantee. By default the submission mode will have the value as 'Desk'. • Desk - Request received through Desk • Courier - Request received through Courier • Online - Request received through Email User can change the submission mode populated.
Booking Date	Read only field. By default, the application displays the branch's current date. User cannot change the value. If the task gets approved on a later date, system will populate that date as the booking date.

Shipping Guarantee Details

Registration user can provide Shipping Guarantee details in this section. Alternately, Shipping guarantee details can be provided by Data Enrichment user.

4. On **Shipping Guarantee Issuance - Registration - Guarantee Details** screen, specify the fields.

Note

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-4 Shipping Guarantee Issuance - Registration - Shipping Guarantee Details - Field Description

Field	Description
Product Code	Specify the applicable Shipping Guarantee product code. On tab out system will validate and populate the selected product description. The product codes will be listed based on the selected value in Form of Undertaking. Alternatively, click Search icon to search and select the product code from the look-up.
Product Description	Read only field. Product description is auto populated by the application based on the selected Product Code.
Outstanding LC Amount	Read only field. System defaults outstanding LC amount, if any.
SG/DO Amount	Specify the amount for which the shipping guarantee has to be issued. The currency is defaulted by the system, user can change the currency.
Amount In Local Currency	Read only field. System fetches the local currency equivalent value for the LC amount from back office (with decimal places).
Contract Reference Number	Read only field. Auto-generated by back end application. Shipping guarantee back office reference gets simulated and displayed.

Table 2-4 (Cont.) Shipping Guarantee Issuance - Registration - Shipping Guarantee Details - Field Description

Field	Description
User Reference Number	User Reference Number will be auto populated by the system based on selection of Product Code. The user can change the User Reference Number.
SG/DO Beneficiary	Specify the Shipping Guarantee beneficiary details or click Search to search and select the Shipping Guarantee beneficiary details from the look-up.
SG/DO Expiry Date	Specify or select the expiry date of the Shipping Guarantee Issuance.
Mode of Transport	Select the mode of shipment from the drop-down The values are: • Sea • Air • Road • Rail • Multimodal • Other

- [Document Linkage](#)
This topic provides the systematic instructions to initiate the document linkage.

2.2.1 Document Linkage

This topic provides the systematic instructions to initiate the document linkage.

In Oracle Banking Trade Finance Process Management, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

Specify **User ID** and **Password**, and navigate to **Registration** screen.

1. On the header of **Registration** screen, click, **Documents**.

The **Document** pop-up screen is displayed.

2. Click the **Add Additional Documents** button/ link.

The **Document** screen is displayed.

2.3 Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of Shipping Guarantee Issuance request.

On successful completion of Registration of an Shipping Guarantee Issuance request, the request moves to Data Enrichment stage. At this stage the bank user would be able to update fields, check the limits and other legal and financial risks the bank is exposed to and either approve or reject or refer the transaction to the customer for changes. The user should also be able to input transaction details.

Requests that are created online (Trade Portal) the task will be created in DE stage directly and the fields will be populated based on the incoming request. Submission mode for online requests will be "Online".

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task currently at Data Enrichment stage:

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Task**.
2. Under **Task**, click **Free Task**.

The Data Enrichment stage has the following hops for data capture:

- [Main Details](#)
- [Shipment Details](#)
- [Additional Fields](#)
- [Advices](#)
- [Additional Details](#)
- [Settlement Details](#)
- [Summary](#)

Let's look at the details for Data Enrichment stage. User can enter/update the following fields as part of Shipping Guarantee Issuance - Data Enrichment Stage.

- [Main Details](#)
This topic provides the systematic instructions to initiate the main details of Data Enrichment stage of Shipping Guarantee Issuance request.
- [Shipment Details](#)
This topic provides the systematic instructions to capture the shipment details of Shipping Guarantee Issuance request.
- [Additional Fields](#)
This topic provides the systematic instructions to capture the additional fields.
- [Advices](#)
This topic provides the systematic instructions to capture the advices details of Shipping Guarantee Issuance process.
- [Additional Details](#)
This topic provides the systematic instructions to capture the additional details in Data Enrichment stage of Shipping Guarantee Issuance process.

- [Settlement Details](#)
This topic provides the systematic instructions to capture the settlement details of Shipping Guarantee Issuance request.
- [Summary](#)
This topic provides the systematic instructions to view the summary details in Data Enrichment stage of Shipping Guarantee Issuance process.

2.3.1 Main Details

This topic provides the systematic instructions to initiate the main details of Data Enrichment stage of Shipping Guarantee Issuance request.

Main details section has two sub section as follows:

- Application Details
- Shipping Guarantee Details.

Application Details

Applications from Online channels will be directly available in the Data Enrichment stage and the fields will be populated with the details from incoming request.

1. On **Data Enrichment - Main** screen, specify the fields that were not entered at Registration stage.

Table 2-9 Main Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	Click to View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
Remarks	Specify any additional information regarding the Guarantee Issuance Claim Settlement. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures
Request Clarification	Clicking this button allows the user to submit the request for clarification to the "Trade Finance Portal" for the transactions that are initiated offline.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.

Table 2-9 (Cont.) Main Details - Action Buttons - Field Description

Field	Description
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancel the Scrutiny stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

2.3.2 Shipment Details

This topic provides the systematic instructions to capture the shipment details of Shipping Guarantee Issuance request.

User can view the shipment details updated during Shipping Guarantee Issuance.

1. On **Shipment Details** screen, specify the fields.

Limits & Collateral

On Approval, system should not release the Earmarking against each limit line and system should handoff the "Limit Earmark Reference Number" to the back office. On successful handoff, back office will make use of these "Limit Earmark Reference Number" to release the Limit Earmark done in the mid office (OBTFFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office.

LINE ID-DESCRIPTION will be available for selection along with Line ID. When you click on 'verify', the system will return value if the limit check was successful or Limit not Available. If limit check fails, the outstanding limit after the transaction value will be shown in the limit outstanding amount. The user can click the Line Id link to view the limit details. Note User can also select expired Line ID from the lookup and on clicking the verify button, system should default "The Earmarking cannot be performed as the Line ID is Expired" in the "Response Message" field. This field is disabled and read only, if Linkage Type is Liability.
Limit/Liability Currency	This field displays the limit currency, when the user select the Liability Number .
Limits Description	This field displays the limits description.
Limit Check Response	This field displays the limit check response. Response can be 'Success' or 'Limit not Available' based on the limit service call response. The value in this field appears, if you click the Verify button.
Amount to Earmark	Amount to Earmark will default based on the contribution %. User can change the value.
Expiry Date	This field displays the date up to which the Line is valid.

Table 2-15 (Cont.) Limit Details - Field Description

Field	Description
Limit Available Amount	This field displays the value of available limit, i.e., limit available without any earmark. The Limit Available Amount must be greater than the Contribution Amount. The value in this field appears, if you click the Verify button.
Response Message	This field displays the detailed response message. The value in this field appears, if you click the Verify button.
ELCM Reference Number	This field displays the ELCM reference number.
Limit Details grid	Below fields appear in the Limit Details grid along with the above fields.
Line Serial	Displays the serial of the various lines available and mapped under the customer id. This field appears on the Limits grid.
View	Click the link to view the Limit Details .
Cash Collateral Details	Click plus icon to add new collateral details.
Collateral Percentage	Specify the percentage of collateral to be linked to this transaction.
Collateral Currency and amount	System populates the contract currency as collateral currency by default. User can modify the collateral Currency and amount.
Exchange Rate	System populates the exchange rate maintained. User can modify the collateral Currency and amount. System validates for the Override Limit and the Stop limit if defaulted exchange rate is modified.
Collateral Details pop-up screen	Click + plus icon or View link to add/view collateral details. Provide the collateral details based on the description provided in the following table: Below fields are displayed on the Collateral Details pop-up screen, if the user clicks plus icon or View link.
Total Collateral Amount	Read only field. This field displays the total collateral amount provided by the user.
Collateral Amount to be Collected	Read only field. This field displays the collateral amount yet to be collected as part of the collateral split.
Sequence Number	Read only field. The sequence number is auto populated with the value, generated by the system.
Collateral Split %	Specify the collateral split% to be collected against the selected settlement account.
Collateral Contribution Amount	Specify the collateral amount to be collected against the selected settlement account. User can either provide the collateral % where the collateral amount will be auto populated or modifying the collateral amount will auto correct the collateral %.
Settlement Account	Click Search to search and select the settlement account for the collateral.
Settlement Account Currency	Read only field. This field displays the settlement account currency defaulted by the system.

Table 2-15 (Cont.) Limit Details - Field Description

Field	Description
Exchange Rate	Read only field. This field displays the exchange rate, if the settlement account currency is different from the collateral currency.
Contribution Amount in Account Currency	Read only field. This field displays the contribution amount in the settlement account currency as defaulted by the system.
Account Available Amount	Read only field. System populates the account available amount on clicking the Verify button.
Response	Read only field. System populates the response on clicking the Verify button.
Response Message	Read only field. System populates the response message on clicking the Verify button.
Verify	Click to verify the account balance of the Settlement Account.
Save & Close	Click to to save and close the record.
Cancel	Click to cancel the entry.
Cash Collateral Details grid	Below fields appear in the Cash Collateral Details grid along with the above fields.
Collateral %	Specify the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
Contribution Amount	This field displays the collateral contribution amount. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
Account Balance Check Response	Read only field. System populates the account balance check response on clicking the Verify button.
Edit/ View	Click Edit/ View link to edit/view the collateral details.
Deposit Linkage Details	Click plus icon to add new deposit linkage details. System allows the user to Link one or more existing Deposits as a contribution to secure underlying transactions. On Submit of DE stage, system will create Linkage of the Deposit/modification of existing Linkage by calling Back-office system (DDA) system directly.Click + plus icon to add new Deposit Linkage details. Below fields are displayed on the Deposit Linkage Details pop-up screen, if the user clicks plus icon.
Customer ID	This field displays the applicant's/applicant bank customer ID defaulted from the application. User can change the customer ID.

Table 2-15 (Cont.) Limit Details - Field Description

Field	Description
Deposit Account	Click Search to search and select deposit for linkage from the list of all the customer Deposits. All the deposits of the customer should be listed in the look-up search. User can select the deposit for linkage.
Deposit Branch	This field displays the deposit branch that is auto-populated based on the deposit account selection.
Deposit Available Amount	This field displays the deposit available amount and currency that is auto-populated based on the deposit account selection.
Deposit Maturity Date	This field displays the maturity date of deposit.
Exchange Rate	This field displays the latest exchange rate for deposit linkage. This will be picked up from the exchange rate maintenance from the common core.
Deposit Available In Transaction Currency	This field displays the deposit amount available, after exchange rate conversion, if applicable.
Linkage Percentage %	Specify the value for linkage percentage.
Linkage Amount (Transaction Currency)	This field displays the transaction amount, user can change the value. System validates the linking amount with available Deposit balance and should not allow to link more than the available amount.
Deposit Linkage Details grid	Below fields appear in the Deposit Linkage Details grid along with the above fields.
Deposit Currency	Deposit currency will get defaulted in this field.
Transaction Currency	Transaction currency will get defaulted in this field from the underlying task.
Edit	Click edit link to edit the deposit linkage details.

2. Click **Save and Close** to save the details and close the screen.

Charge Details

This section displays charge details. On Charge Details screen, charges and tax if any will get defaulted from Back end simulation. If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

For more information on fields, refer to the field description table below.

Table 2-16 Charge Details - Field Description

Field	Description
Commission Details	This section displays the commission details. All charges, commission and margin are collected from the counter-party by default.
Component	This field displays the commission component.
Rate	This field displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Rate	From the default value, if the rate is changed the value gets updated in this field.
Currency	This field displays the currency in which the commission have to be collected.
Amount	This field displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Amount	From the default value, if the amount is changed, the value gets updated in the modified amount field.

Table 2-16 (Cont.) Charge Details - Field Description

Field	Description
Defer	If enabled, charges/commissions has to be deferred and collected at any future step.
Waive	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
Charge Party	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
Settlement Account	Select the settlement account.
Amendable	Displays if the field is amendable or not.
Charge Details	This section displays the Charge Details .
Component	This field displays the charge component type.
Tag Currency	This field displays the tag currency in which the charges have to be collected.
Tag Amount	This field displays the tag amount that is maintained under the product code.
Currency	This field displays the currency in which the charges have to be collected.
Amount	This field displays the amount that is maintained under the product code.
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPM. The user can not enable/disable the option, if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled.
Defer	If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.
Waive	Enable the toggle, if charges has to be waived. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if Defer toggle is enabled.
Charge Party	Charge party is applicant by default. User can change the value to beneficiary.
Settlement Account	Select the settlement account.

Table 2-16 (Cont.) Charge Details - Field Description

Field	Description
Tax Details	Displays the tax details. The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.
Component	This field displays the tax component.
Type	This field displays the type of tax component.
Value Date	This field displays the value date of tax component.
Currency	This field displays the currency in which the tax have to be collected. The tax currency is the same as the commission.
Amount	This field displays the tax amount based on the percentage of commission maintained. You can edit the tax amount, if applicable.
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.
Settlement Account	System defaults the settlement account. The user can modify the settlement account.

2. Click **Submit**.

The task will move to next logical stage.

Table 2-24 Summary - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	Click to View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
Remarks	Specify any additional information regarding the Shipping Guarantee Issuance. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.

Table 2-24 (Cont.) Summary - Action Buttons - Field Description

Field	Description
Signatures	Click the Signature button to verify the signature of the customer/bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.
Request Clarification	Clicking this button allows the user to submit the request for clarification to the "Trade Finance Portal" for the transactions that are initiated offline.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancel the Scrutiny stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Back	Clicking on Back button, takes the user to the previous screen.
Submit	Task will get moved to next logical stage of Shipping Guarantee Issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided. In case of duplicate documents' system will terminate the process after handing off the details to back office.

2.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Shipping Guarantee Issuance request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Amount Block Exception Approval

User can review the amount block exception for Trade Finance requests that failed to create Amount Block in backend system.

Log in into Oracle Banking Trade Finance Process Management (OBTfPM) system amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue.

Open the task to view the summary tiles. The tiles should display a list of important fields with values.

In Amount block, system checks whether the sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTfPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off
- Refer:
 - Refer Refer back to DE providing alternate settlement account to be used for block.
 - Different collateral to be mapped or utilize lines in place of collateral.
- Reject: Reject the transaction due to non-availability of sufficient balance in settlement account

GBP

Contract Amount

GBP £1,000.00

Refer Close Proceed

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message and user will not be able to approve the task.

5. Open the task and re-key some of the critical field values from the request in the **Approval Re-Key** screen.

Some of the fields below will dynamically be available for re-key.:

- Currency
- Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

6. Click **Proceed** to proceed for the approval.

The **Approval Summary** screen appears. The user can view the Summary tiles which displays list of important fields with values.

7. Click each tile to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.
