This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

1 Building Application for Setup

Preface

This manual explains the EAR building process for Oracle Banking Treasury Management.

This preface has the following topics:

- [Audience](#)
- [Acronyms and Abbreviations](#)
- [Related Resources](#)

Audience

This guide is primarily intended for Developers for Oracle Banking Treasury Management and third party or vendor software's. Some information may be relevant to IT decision makers and users of the application are also included. Readers are assumed to possess basic operating system, network, and system administration skills with awareness of vendor/third-party software's and knowledge of Oracle Banking Treasury Management.

Acronyms and Abbreviations

The acronyms and abbreviations are listed in this below table:

Table 1 Acronyms and Abbreviations

Abbreviations or Acronyms	Definition
DV	Derivatives
EAR	Enterprise archive
ETD	Exchange Traded Derivatives
FX	Foreign Exchange
FCUBS	Oracle FLEXCUBE Universal Banking
LDAP	Lightweight Directory Access Protocol
MM	Money Market
MDB	Message Driven Bean
OBTR	Oracle Banking Treasury Management
OT	Over the Counter Options
SE	Securities
SR	Securities Repo
SMS	Security Management System
UI	User interface

Building Application for Setup

The process of building EAR for various application types files includes the following steps:

1. The process of building EAR files includes the following steps:
 - a. Obtain the fcubs.properties file generated by the GUI Installer, which is saved in the required path.
For more information, refer to Treasury Management Installer Property File Creation document
 - b. fcubs.properties file will be used for building the ear. This will be created as part of the initial property file creation.
 - c. env.properties file parameters get updated during every property file creation (like OBTR, Gateway, Scheduler, etc.). After Property file creation, proceed with respective EAR build and then proceed with other components property file creations and build.
 - d. Run the respective **EAR.bat** (Windows) or respective **EAR.sh** (Linux) file.
 - e. The command window closes after the EAR is generated.
 - f. The EAR will be generated in the EAR destination path provided during property file creation.
 - g. JS and UIXML will also be generated in the EAR destination path if external JS/UIXML is selected during property file creation.
 - h. The external path for JS/UIXML and EAR destination path can be referred to in the env.properties file.
 - i. Manually copy the JS/UIXML generated in the EAR destination .path, to external JS/UIXML path.
2. Maintain the following Application Type accordingly for building respective EAR's.

Table 1-1 EAR Creation

Product Type	Application Type	EAR Name	BAT/sh file to be run	Property file to be used
TR	OBTR	Any Distinct Name	TREarRun.bat or TREarRun.sh	fcubs.properties
GW-Integrated	INTEGRATED	Any Distinct Name	TRGatewayEarRun.bat or TRGatewayEarRun.sh	GW_WS_Prop.properties
GW-Individual	INDIVIDUAL	Not Required	TRGatewayEarRun.bat or TRGatewayEarRun.sh	GW_WS_Prop.properties
GW-REST	INDIVIDUAL	Any Distinct Name	TRGatewayRestEarRun.bat or TRGatewayRestEarRun.sh	GW_RESTEJB_Prop.properties and GW_RESTEJB_Prop.properties

Table 1-1 (Cont.) EAR Creation

Product Type	Application Type	EAR Name	BAT/sh file to be run	Property file to be used
GW-MDB	GATEWAY	Any Distinct Name	GWMDBEarRun.bat GWMDBEarRun.sh	GW_MDB_Prop.properties
GW-HTTP	GATEWAY	Any Distinct Name	GWHTTPEarRun.bat GWHTTPEarRun.sh	GW_HTTP_Prop.properties
GW- EJB	GATEWAY	Any Distinct Name	GWEJBEarRun.bat or GWEJBEarRun	GW_EJB_Prop.properties
Scheduler	SCHDLR	Any Distinct Name	TRSchedulerEarRun.bat or TRSchedulerEarRun.sh	Scheduler.properties
ODT	ODT	Any Distinct Name	ODTWarRun.bat or ODTWarRun.sh	ODT.properties

3. The env.properties will have the appropriate application type set.
4. Go to \INSTALLER\SOFT path and execute the **<product Type>EarRun** bat file for EAR build.

For Example, **<product type>EarRun.bat**: - **TREarRun.bat** (**TREarRun.sh** for running in Linux machine) for TR and so on.
5. EAR file will be generated in the mentioned destination path. Similarly, all the EAR Build follow the same steps.
 - a. For Gateway EAR, execute **<Product Name>GatewayEarRun.bat** (**<Product Name>GatewayEarRun.sh**)
 - b. For EJB, MDB and HTTP gateways , run the respective bat files i.e. **GWEJBEarRun.bat** (**GWEJBEarRun.sh**), **GWMDBEarRun.bat** (**GWMDBEarRun.sh**) and **GWHTTPEarRun.bat** (**GWHTTPEarRun.sh**).
6. For ODT, execute **ODTWarRun.bat** in Windows (**ODTWarRun.sh** in Linux) after building odt.properties.
7. For STAND ALONE SCHEDULER, execute **TRSchedulerEarRun.bat** in Windows (**TRSchedulerEarRun.sh** in Linux).
8. After this, deploy the EAR in the application console.

 **Note:**

Please ensure the necessary resources are created in the application server as mentioned in the Resources to be Created document
