# 1 Create Resources on Application Server

Configure the application server for Oracle Banking Treasury Management Application. Ensure that the following resources are available before deployment:

- Data source
- JMS resources
- Debug paths for host and branch

#### Note:

In case of Multi Entity, all data sources must be created separately for each entity. The JNDI name will be differentiated by suffixing entity name.

Resource prerequisites for Plug-ins

# 1.1 Resource prerequisites for Plug-ins

Resource prerequisites for different plug-ins are explained below. In case you wish to include a plug-in, ensure that the corresponding resources are created.

This topic has the following sub-topic:

- Oracle Banking Treasury Management
- Scheduler
- Gateway
- ELCM
- REST API Services

### 1.1.1 Oracle Banking Treasury Management

OBTR needs below resources before deployment. Create the following queues and connection factories in the application server.

## 1.1.2 Scheduler

If the scheduler is included in the property file, create the following queues and connection factories in the application server.

In the case of Remote Scheduler, create the following queues, connection factories, and Datasources in the application server where scheduler EAR will be deployed.

QCF Label	QCF
Notify Destination QCF	NotifyDestQCF
Deferred QCF	DefferedDestQCF
Notify QCF	NOTIFY_MDB_QCF
Incoming QCF	EmsQcf
Sanction Check QCF	SNCKREQQCF

All these must be XA enabled.

#### Торіс

NOTIFY\_DEST\_TOPIC

To configure scheduler and EMS with MQ series, follow the steps given below.

- Create queues in MQ Series.
- Create binding file.
- Copy the MQ series JAR files to Oracle WebLogic domain library folder.

#### Table 1-6 Datasources

Datasource Name	Datasource Label	Туре	Default Value
INIT_DATASOURCE	Data Source	NON-XA	jdbc/fcjdevDS
SCHEDULER_DS	Scheduler Datasource	ХА	jdbc/fcjSchedulerDS

Note the following:

 You need to create another XA data source for Oracle FCUBS with the JNDI name '\_XA' for Scheduler. For example, if the Oracle FCUBS HOST Non-XA data source JNDI name is jdbc/fcjdevDS', then you need to create another data source for FCUBS with the JNDI name jdbc/fcjdevDS\_XA.

#### **Security Provider Libraries**

If you wish to include the signing process for SFMS messages, you need to set the following library.

File Name	Download Location	Instructions
<b>bcprovjdk.jar</b> (Latest Qualified Version)	https://www.bouncycastle.org/ latest_releases.html	Copy the file <b>bcprovjdk.jar</b> (Latest Qualified Version) to the directory {WL_JAVA_HOME}/jre/l ib/ext
		Here, <b>WL_JAVA_HOME</b> is the Java root directory from which the WebLogic server is running. Restart Oracle WebLogic server.

Table 1-7	Security	Provider	Libraries

For details on the latest version of the software qualified with Oracle Banking Treasury Management, refer to the release certificate.

### 1.1.3 Gateway

If scheduler is included in the property file, create the following queues and connection factories in the application server.

Table 1-8	Connection	Factories

QCF Label	QCF
MDB QCF	MDBQCF

All these must be XA enabled.

#### Table 1-9 Queues

### 1.1.4 ELCM

If the ELCM application has to be deployed, create the following queues and connection factories in the application server.
