This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

- [Purpose](#)
- [Audience](#)
- [Abbreviations](#)
- [List of Topics](#)
- [Related Documents](#)

Background

Oracle Financial Services Software Limited has developed new product processor, Oracle Banking Treasury Management (OBTR), which is a comprehensive solution for managing Treasury operations for Banks. Oracle Banking Treasury Management is an online Real-time solution and enabled for a multi-entity, multi-currency, multi-lingual operations. OBTR is built on highly adaptable and modular architecture with leading edge industry standards and supports multi-tenancy deployments.

OBTR offers financial institutions, the flexibility to adapt to changing regulatory reforms in treasury markets and enable banks to improve their overall operational efficiency. OBTR provides end-to end trading capabilities for diverse range of Trading Instruments in Foreign Exchange, Money Markets, Securities, Derivatives and Over-the-counter products. OBTR is equipped with an innovative pre- settlement manager that expedites and simplifies the operational flow of the Treasury Deals.

Purpose

The purpose of this Release Note is to propagate the features of Oracle Banking Treasury Management 14.7.6.0.0

Audience

This document is intended for the following audience:

- Customers
- Partners

Abbreviations

Table 1 Abbreviation

Abbreviation	Description
ELCM	Enterprise Limits and Collateral Management
EA	External Accounting
ECA	External Credit Approval
OBTR	Oracle Banking Treasury Management
ELCM	Enterprise Limits and Collateral Management
FCUBS	Oracle FLEXCUBE Universal Banking
JDK	Java Development Kit
OBPM	Oracle Banking Payments
OHC	Oracle Help Center
OJET	Oracle JavaScript Extension Toolkit
RDMS	Relational Database Management System
RFR	Risk Free Rates
SME	Small and Medium Sized Enterprises
SWIFT	Society for Worldwide Interbank Financial Telecommunication
UDF	User Defined Fields
UI	User Interface

Table 2 Module Code and Description

Module Code	Description
FX	Foreign Exchange
MM	Money market
SE	Securities
DV	Derivatives
ED	Exchange Traded Derivatives
OT	Options
ID	Islamic Derivatives
MC	Islamic Money Markets
SR	Securities Repo and Reverse Repo

List of Topics

Topics	Description
Release Notes - Introduction	This topic provides the information on the release enhancements for Oracle Banking Treasury Management.
Components of the Software	This topic consists of the technology pre-requisites required for Oracle Banking Treasury Management.
Environment Details	This topic provides the information on the environment details for Oracle Banking Treasury Management.

Topics	Description
Third Party Software Details	This topic provides the information on licensing of third-party software that are packaged with Oracle Banking Treasury Management.

- *Oracle Banking Treasury Management User Manuals*
- *Oracle Banking Treasury Management License Guide*

1

Release Notes - Introduction

This topic contains the following subtopics:

- [Release Highlights](#)
- [Release Enhancements](#)

1.1 Release Highlights

The rationale for the new product release of Oracle Banking Treasury Management version 14.7.6.0.0 is to enhance the existing product with newer Treasury functionality, enabling Banks to choose a diverse range of Treasury products designed to support multiple currencies, facilitate, and manage handling of trades efficiently and to support the regulatory requirements and to have features that are essential for Capital markets.

- Oracle Banking Treasury Management has the below major modules:
 - Foreign Exchange
 - Money Market
 - Securities
 - Repo and reverse repo
 - Over The Counter Currency Options
 - Over The Counter Interest Rate Options
 - Over The Counter Interest rate and Cross currency Swaps
 - Forward Rate Agreement (FRA)
 - Exchange Traded Derivatives for Commodities Futures and Options
 - Exchange Traded Derivatives for Interest Rate Futures and Options
 - Exchange Traded Derivatives for Currency Futures and Options
 - Exchange Traded Derivatives for Bonds and Equity Futures and Options
 - Exchange Traded Derivatives for Index Futures and Options
 - Islamic Money Market
 - Islamic Derivatives
- Oracle Banking Treasury Management product consists of common sub systems for processing Settlements, Messages, Tax, Brokerage, Interest, Charges, Commission and Fees and so on in the various modules mentioned above.
- Oracle Banking Treasury Management product consists of Pre-Settlement Manager layer, which can receive request from front office and the below features are available:
 - Defining the rules for queue processing and for product derivation
 - Settlement pick up
 - Exception handling

- Confirmation message generation
- Pre-Settlement queue monitor enables the user to get a consolidated view of the exceptions and enables the resolution
- Oracle Banking Treasury Management product can work as a stand-alone system or can work in tandem with other Oracle Banking products such as OBPM, OBTF, OBDX, Oracle Banking Limits and Collateral Management, and OFSAA
- Oracle Banking Treasury Management can integrate with DDA systems like Oracle FLEXCUBE Universal Banking System for DDA Posting, Accounting and MIS.
- Following are the additional features included in the release along with forward porting of applicable fixes related to the incidences reported in previous versions and technical qualification to comply with approved Tech Stack.

1.2 Release Enhancements

Regulatory Enhancements

- As part of SWIFT 2023 Guidelines, the below changes are introduced:
 - In an Option contract, Expiration style is made applicable only for the Plain Vanilla Option style and does not applicable for other option styles.
 - Four additional barrier types, Up and in Knock in (UIKI), Up and out Knock out (UOKO), Down and in Knock in (DIKI) and Down and out Knock out (DOKO) and its processing are introduced replacing the existing barrier types Single knock in (SKIN) and Single knock out (SKOT).
 - Option styles, Digital and No touch behave similarly to the Binary option style.
 - A new field/Tag- Barrier Time Type is introduced with a default value as CONT.
 - Settlement of currency option contracts occur at Hit or Maturity considering the Payment Lag Days.
 - Rebate settlement to consider the rebate payment days for deriving the final settlement date.
 - Holiday preference is supported for the Exercise Pay date and Rebate pay date.
 - An additional new code “Financial Market Infrastructure Act (FMIA)” is introduced as part of reporting jurisdiction field, impacting category 3 messages.
 - MT306 message is enhanced as below.
 - * tag name changes are introduced as per the guidelines.
 - * new tag 17C for Barrier Event Equal Modifier,
 - * new tag 33Z for populating Rebate Amount
 - * tag 30a(30F/30J) is populated with Rebate Amount Payment Date

Product Enhancements

1. Accounting Enhancements

a. External Accounting (EA)

- EA processing call to an external system (FCUBS) can be synchronous (Existing) or asynchronous (New).
- Asynchronous Communication mode of EA processing is achieved by maintaining MDB Queue. Based on the MDB queue maintenance, system post the request to the respective queue and receives a response Asynchronously.

- Account handoff preference is introduced to maintain Multiple DDAs based on the source system maintenance at account level. Posting of External Accounting entries can be done with or without offset entries based on the source system maintenance.
- Requests and Responses of External Accounting posted can be viewed from the newly introduced External Accounting Entries Browser screen. Also, Manual Retry of Failures can be done from this screen.

b. External Credit Approval (ECA)

- System is enhanced to send External Credit Approval request to DDA synchronously on save of the contract based on the configured OBTR_ECA_ONLINE parameter. If the available is insufficient for a transaction on the overdraft account, system considers the overdraft limit maintained for that customer and allows the transaction if the transaction amount is within the maintained limit.
- Support for External Credit Approval check is provided during the save of reversal operation. In case of insufficient balance in the settlement account, system displays the ECA error message.

2. Entity Length changes

- The length of the below mentioned entities are increased and standardized.
- Branch Code
- User ID
- Customer Number
- Customer Name
- Account Number
- Account Description
- GL Code
- Entity Code

3. Service Enhancements

- Web service is supported for FX linkage screen for querying the linked data
- Support for REST service is made available for Instrument creation screen

4. Rollover changes for RFR contracts

- Interest details call form in Rollover preference of a RFR contract is enhanced to capture additional details like Computation calendar, Weighted average, Payment Movement and Financial Center.

5. User Defined Field screen - design change

- User Defined Field (UDF) callform for online screens is redesigned to have separate multiple entry blocks for Character, Date and Number data types.

6. Fund ID Support in Islamic Money Market

- System is enhanced to support Fund ID association in Islamic Money Market Contract screen.
- The fund id maintained in FCUBS can be fetched and mapped for Profit distribution.

Non-Functional Requirements

- System is enhanced to qualify JDK11 features.

- Redwood theme adoption is achieved for all OBTR screens.

2

Components of the Software

Documents Accompanying the Software

The various documents accompanying the software are as follows:

- *Release Notes*
- *Installation Manuals*
- *User Manuals*

Software Components

Software Components of Oracle Banking Treasury Management 14.8.0.0.0 that are part of this release are as follows:

Host

- UI Components (JS,XML)
- Stored Procedures (Packages, Functions, Procedures, Triggers, Views)
- Tables, Types, Sequences, INC
- Reporting Components(Data models (xdmz), Reports (xdoz),Sub-template (xsbz))

Java application layer

- Java sources
- Configuration files used for deployment

Integration Gateway

REST Services

Java application layer

- Java sources
- Configuration files used for deployment

Conversion Utilities

Installation utilities

ADF files used by Generic Interface (GI) – incoming and outgoing

Tools

- ODT

Environment Details

Tech Stack – Oracle

Table 3-1 Tech Stack – Oracle

Component	Deployment option	Machine	Operating System	Software	Version Number
Oracle Banking Treasury Management	UI-Host and Centralized	Application Server	Oracle Enterprise Linux Server 8.3 (x86 64 Bit)	Oracle Fusion Middleware Infrastructure	14.1.2.0.0
				Java HotSpot(TM) JDK (with WebLogic Application Server)	JDK 17.0.12
		Database Server	Oracle Enterprise Linux Server 8.3 (x86 64 Bit)	Oracle RDBMS Enterprise Edition	19.26.0. 0.0
		Client Machines# For detailed information on Browser Support, please refer to the Oracle Software Web Browser Support Policy at https://www.oracle.com/middleware/technologies/browserpolicy.html	Client Machine	Mozilla Firefox	132+
			Client Machine	Google Chrome	131+
			Client Machine	Microsoft Edge	131+
			Client Machine	Safari	17+
Oracle Banking Treasury Integration Gateway	Web services (incoming)	Integration Server	Oracle Enterprise Linux Server 8.3 (x86 64 Bit)	Oracle WebLogic Server	14.1.2.0. 0

Table 3-1 (Cont.) Tech Stack – Oracle

Component	Deployment option	Machine	Operating System	Software	Version Number
	HTTP Servlet (incoming)		Oracle Enterprise Linux Server 8.3 (x86 64 Bit)	Oracle WebLogic Server	14.1.2.0. 0
	EJB (incoming)		Oracle Enterprise Linux Server 8.3 (x86 64 Bit)	Oracle WebLogic Server	14.1.2.0. 0
	MDB (incoming)		Oracle Enterprise Linux Server 8.3 (x86 64 Bit)	Oracle WebLogic Server	14.1.2.0. 0
	Notifications (outgoing)		Oracle Enterprise Linux Server 8.3 (x86 64 Bit)	Oracle WebLogic Server	14.1.2.0. 0

4

Third Party Software Details

For details on the third party software used, see Oracle Banking Treasury Management 14.8.0.0.0 Licensing Guide available in the OHC Documentation Library.
