This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Contents

1 Building Application for Setup

Preface

This topic contains the following sub-topics:

- [Purpose](#)
- [Audience](#)
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Related Resources](#)
- [Conventions](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)

Purpose

This manual explains the EAR building process for Oracle Banking Treasury Management.

Audience

This guide is primarily intended for Developers for Oracle Banking Treasury Management and third party or vendor software's. Some information may be relevant to IT decision makers and users of the application are also included. Readers are assumed to possess basic operating system, network, and system administration skills with awareness of vendor/third-party software's and knowledge of Oracle Banking Treasury Management.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to make sure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Related Resources

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The acronyms and abbreviations are listed in this below table:

Table Acronyms and Abbreviations

Abbreviations or Acronyms	Definition
DV	Derivatives
EAR	Enterprise archive
ETD	Exchange Traded Derivatives
FX	Foreign Exchange

Table (Cont.) Acronyms and Abbreviations

Abbreviations or Acronyms	Definition
FCUBS	Oracle FLEXCUBE Universal Banking
LDAP	Lightweight Directory Access Protocol
MM	Money Market
MDB	Message Driven Bean
OBTR	Oracle Banking Treasury Management
OT	Over the Counter Options
SE	Securities
SR	Securities Repo
SMS	Security Management System
UI	User interface

1

Building Application for Setup

The process of building EAR/WAR for various application types files includes the following steps:

1. The process of building EAR/WAR files includes the following steps:
 - a. Obtain the fcubs.properties file generated by the GUI Installer, which is saved in the required path.
For more information, refer to Treasury Management Installer Property File Creation document
 - b. fcubs.properties file will be used for building the WAR. This will be created as part of the initial property file creation.
 - c. env.properties file parameters get updated during every property file creation (like OBTR, Gateway, Scheduler, etc.). After Property file creation, proceed with respective EAR/WAR build and then proceed with other components property file creations and build.
 - d. Run the respective **.bat** (Windows) or respective **.sh** (Linux) file.
 - e. The command window closes after the EAR/WAR is generated.
 - f. The EAR/WAR will be generated in the EAR/WAR destination path provided during property file creation.
 - g. JS and UIXML will also be generated in the EAR/WAR destination path if external JS/UIXML is selected during property file creation.
 - h. The external path for JS/UIXML and EAR/WAR destination path can be referred to in the env.properties file.
 - i. Manually copy the JS/UIXML generated in the EAR/WAR destination .path, to external JS/UIXML path.
2. Maintain the following Application Type accordingly for building respective EAR/WAR's.

Table 1-1 EAR/WAR Creation

Product Type	Application Type	EAR Name	BAT/sh file to be run	Property file to be used	Folder Location in Destination Path
TR	OBTR	Any Distinct Name	TREarRun.bat or TREarRun.sh	fcubs.properties	WAR file in 'build' folder
GW-Integrated	INTEGRATED	Any Distinct Name	TRGatewayEarRun.b at or TRGatewayEarRun.sh	GW_WS_Prop.properties	OBTRWeb.war is generated in the destination folder
GW-Individual	INDIVIDUAL	Not Required	TRGatewayEarRun.b at or TRGatewayEarRun.sh	GW_WS_Prop.properties	OBTRWeb.war is generated in the destination folder

Table 1-1 (Cont.) EAR/WAR Creation

Product Type	Application Type	EAR Name	BAT/sh file to be run	Property file to be used	Folder Location in Destination Path
GW-REST	INDIVIDUAL	Any Distinct Name	TRGatewayRestEar Run.bat or TRGatewayRestEar Run.sh	GW_REST_Property.properties and GW_RESTEJB_Prop.properties	WAR file in 'gatewayBuild' folder
GW-REST	INTEGRATED	Any Distinct Name	TRGatewayRestEar Run.bat or TRGatewayRestEar Run.sh	GW_REST_Property.properties and GW_RESTEJB_Prop.properties	EAR file in Destination folder
GW-MDB	GATEWAY	Any Distinct Name	GWMDBEarRun.bat or GWMDBEarRun.sh	GW_MDB_Property.properties	WAR file in 'GWMDBBuild' folder
GW-HTTP	GATEWAY	Any Distinct Name	GWHTTPEarRun.bat or GWHTTPEarRun.sh	GW_HTTP_Property.properties	WAR file in 'GWHTTPBuild' folder
Scheduler	SCHDLR	Any Distinct Name	TRSchedulerEarRun.bat or TRSchedulerEarRun.sh	Scheduler.properties	WAR file in 'buildScheduler' folder
ODT	ODT	Any Distinct Name	ODTWarRun.bat or ODTWarRun.sh	ODT.properties	NA

3. The env.properties will have the appropriate application type set.
4. Go to \INSTALLER\SOFT path and execute the **<product Type>EarRun** bat file for EAR build.
For Example, **<product type>EarRun.bat**: - **TREarRun.bat** (**TREarRun.sh** for running in Linux machine) for TR and so on.
5. EAR/WAR file will be generated in the mentioned destination path. Similarly, all the EAR Build follow the same steps.
 - a. For Gateway WAR, execute **<Product Name>GatewayEarRun.bat** (**<Product Name>GatewayEarRun.sh**)
 - b. For MDB and HTTP gateways, run the respective bat files i.e. **GWMDBEarRun.bat** (**GWMDBEarRun.sh**) and **GWHTTPEarRun.bat** (**GWHTTPEarRun.sh**).
6. For ODT, execute **ODTWarRun.bat** in Windows (**ODTWarRun.sh** in Linux) after building odt.properties.
7. For STAND ALONE SCHEDULER, execute **TRSchedulerEarRun.bat** in Windows (**TRSchedulerEarRun.sh** in Linux).
8. After this, deploy the EAR/WAR in the application console.

Note

Please ensure the necessary resources are created in the application server as mentioned in the Resources to be Created document.
