This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

Oracle FLEXCUBE Investor Servicing is a comprehensive mutual funds automation software from Oracle® Financial Servicing Software Ltd.©.

You can use the system to achieve optimum automation of all your mutual fund investor servicing processes, as it provides guidelines for specific tasks, descriptions of various features and processes, and general information.

This topic contains the following sub-topics:

- [Purpose](#)
- [Audience](#)
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Conventions](#)
- [Screenshot Disclaimer](#)
- [Prerequisite](#)
- [Related Resources](#)

Purpose

This manual is designed to help FLEXCUBE Application developers/users to familiarize with ORACLE FLEXCUBE Development Workbench for Investor Servicing.

Audience

This document is intended for FLEXCUBE Application developers/users that use Development Workbench to develop various FLEXCUBE components.

To Use this manual, you need conceptual and working knowledge of the below:

Table 1 Proficiency and Resources

Proficiency	Resources
FLEXCUBE Functional Architecture	Training programs from Oracle Financial Software Services.
FLEXCUBE Technical Architecture	Training programs from Oracle Financial Software Services.
FLEXCUBE Object Naming Conventions	Development Overview Guide

Table 1 (Cont.) Proficiency and Resources

Proficiency	Resources
Working knowledge of Web based Applications	Self-Acquired
Working knowledge of Oracle Database	Oracle Documentations
Working knowledge of PLSQL developer	Respective vendor documents
Working knowledge of PLSQL and SQL Language	Self-Acquired
Working knowledge of XML files	Self-Acquired

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches](#), [Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Prerequisite

Specify **User ID** and **Password**, and log in to **Home Screen**.

Related Resources

The functions of ORACLE FLEXCUBE Development Workbench for Investor Servicing system is organized into various guides, each discussing a component.

For more information, see these Open Development Tool documents:

Screen Customizer

This topic describes Screen Customizer functionality available in Oracle Flexcube Development Workbench.

The Oracle Flexcube Development Workbench Screen Customizer allows users to do UI changes on a screen. If only the screen layout of the function id has to be modified, the developer can use the **Screen Customizer** feature rather than the **Function Generation** feature.

Only the screen layout changes and UI field properties will be allowed to change in the Screen Customizer.

Note:

Only Load action is possible in Screen Customizer.

Only three nodes will be present in Screen Customizer as shown in the figure:

Figure 1-1 Screen Customization

- [DataBlocks](#)
This topic describes about data blocks in Screen Customizer.
- [Screens](#)
This topic describes about screens in Screen Customizer.

- **FieldSets**
This topic describes about FieldSets in Screen Customizer.

1.1 DataBlocks

This topic describes about data blocks in Screen Customizer.

Data Block properties would not be allowed to change in Screen Customizer. New Data Blocks and Block Fields also cannot be added. Deletion/Renaming of blocks and fields are also not allowed in Screen Customizer.

Figure 1-2 Screen Customization_DataBlocks

The user will be allowed to change the below properties at the data block field level.

- Display Type
- Field Size
- Preview Value
- Popup Edit Required
- Visible
- Upper Case only
- Read Only

1.2 Screens

This topic describes about screens in Screen Customizer.

All the actions can be performed at the screen level. Developers can add, modify, delete, and rename the screens, tabs, and sections. Note that deletion and renaming will be allowed only if the element is created in the working release.

Figure 1-3 Screen Customization_Screens

1.3 FieldSets

This topic describes about FieldSets in Screen Customizer.

In fieldset, the developer can change screen properties, display type from Vertical to Horizontal, read-only property, and so on. Data Block to which fieldset is attached cannot be changed. Fieldset fields can be rearranged as per requirement.

Figure 1-4 Screen Customization_FieldSets

2

Generated Units

This topic describes the UI related generated units in the Screen Customizer.

Development Workbench will generate only UI related units in Screen Customizer:

1. Radxml
2. Screen XML (i.e. Lang XML)
3. System JS (JavaScript File)

Deploy language XML and system JavaScript file in Flexcube application server to reflect the changes done to the function id in Screen Customizer.

Figure 2-1 Generation of files in Screen Customizer

3

Examples

This topic provides different examples for customizing the screens.

Example 1

Requirement: Hide a Field in the screen

Below screenshots shows how Screen Customizer can be used for this purpose.

Figure 3-1 Preview with the Transaction Category field displayed

The screenshot displays a web application interface for managing transactions. The top navigation bar includes 'New' and 'Enter Query' buttons. The main content area is divided into two sections: 'Transaction Information' and 'Transaction Value'. The 'Transaction Information' section contains fields for Unit Holder ID, Fund ID, Order Received Date, Order Received Time Zone, Transaction Date, Payment Mode, and Payment Mode Description. The 'Transaction Value' section includes Transaction Number, Transaction Currency, Reference Number, Order Received Time (HH24:MI), Transaction Type, Description, Transaction Mode, Units Applied, Amount Applied, and Percent Applied. A red box highlights the 'Transaction Category' field in the 'Transaction Information' section. Below the main content area, there is a tabbed interface with tabs for 'UH And Fund', 'Transaction', 'Other', 'Intermediary', 'Load Override', 'KYC And Document', 'Add Info', 'Fee Payment', 'Certificate', and 'Limit Order'. The 'UH And Fund' tab is currently selected, showing fields for CIF Number, Unit Holder Name, ISIN No, Fund Name, Fund Base Currency, Price Currency, and Currency of Expression. At the bottom, there is a footer section with fields for Input By, Authorized By, DateTime, Mod No, Authorization Status, and Record Status, along with 'Ok' and 'Exit' buttons.

If **Transaction Category** field is not required, uncheck the **Visible** flag.

Example 2

Requirement: Adding a new Tab to the screen and move fields from one tab to another.

As shown in the screenshot below, the Main Tab contains the Unique Identifier Fieldset, which needs to be moved to a new tab.

Figure 3-4 Fields in UH and Fund Tab

The screenshot shows the 'Transaction Information' form in Oracle Flexcube. The form is divided into two main sections: 'Transaction Information' and 'Transaction Value'. The 'Transaction Information' section contains fields for Unit Holder ID, Fund ID, Order Received Date, Order Received Time Zone, Transaction Date, Payment Mode, Payment Mode Description, Transaction Number, Transaction Currency, Reference Number, Order Received Time (HH24:MI), Transaction Type, Description, and Transaction Category. The 'Transaction Value' section contains fields for Transaction Mode, Units Applied, Amount Applied, and Percent Applied. Below these sections is a tabbed interface with tabs for 'UH And Fund', 'Transaction', 'Other', 'Intermediary', 'Load Override', 'KYC And Document', 'Add Info', 'Fee Payment', 'Certificate', and 'Limit Order'. The 'UH And Fund' tab is currently selected, showing fields for CIF Number, Unit Holder Name, ISIN No, Fund Name, Fund Base Currency, and Price Currency. The 'ISIN No' and 'Fund Name' fields are highlighted with a red box. At the bottom of the form, there are fields for Input By, Authorized By, Date/Time, Mod No, Authorization Status, and Record Status, along with 'OK' and 'Exit' buttons.

In Screen Customizer, the developer can add a new tab and modify the properties of the field set, such as attaching it to the newly created tab.

Figure 3-5 New Tab Created_Details

The screenshot shows the Oracle Flexcube Development Workbench for Universal Banking. The main window displays the 'Transaction Information' form, which is the same form as in Figure 3-4. However, a new tab labeled 'Details' has been added to the tabbed interface, and it is currently selected. The 'Details' tab contains fields for ISIN No and Fund Name, which are highlighted with a red box. The left sidebar shows the 'Function Generation' tree, with the 'TAB_NEW_SEC_1' tab highlighted. The top of the window shows the 'ORACLE FLEXCUBE' logo and the 'Development Workbench for Universal Banking' title. The bottom of the window shows the 'Input By', 'Authorized By', 'Date/Time', 'Mod No', 'Authorization Status', and 'Record Status' fields, along with 'OK' and 'Exit' buttons.
