This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

# Preface

**Oracle FLEXCUBE Investor Servicing** is a comprehensive mutual funds automation software from Oracle® Financial Servicing Software Ltd.©.

You can use the system to achieve optimum automation of all your mutual fund investor servicing processes, as it provides guidelines for specific tasks, descriptions of various features and processes, and general information.

This topic contains the following sub-topics:

- [Purpose](#)
- [Audience](#)
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Conventions](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)

## Purpose

This manual is designed to help acquaint you with the installation of **Oracle FLEXCUBE Investor Servicing** application.

## Audience

This manual is intended for the following User/User Roles:

**Table 1 Users and Roles**

Users	Roles
Implementation team	Implementation of Oracle FLEXCUBE Investor Servicing
Presales team	Install Oracle FLEXCUBE Investor Servicing for demo purpose
Bank personnel	Who installs Oracle FLEXCUBE Investor Servicing

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

## Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

## Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

## Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## Conventions

The following text conventions are used in this document:

Convention	Meaning
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

## Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

## Acronyms and Abbreviations

The list of the acronyms and abbreviations used are as follows:

**Table 2 Acronyms and Abbreviations**

Abbreviation	Description
<b>FCIS</b>	Oracle FLEXCUBE Investor Servicing
<b>OEM</b>	Oracle Enterprise Manager

**Table 2 (Cont.) Acronyms and Abbreviations**

Abbreviation	Description
<b>EMS</b>	Electronic Messaging Service
<b>EJB</b>	Enterprise Java Bean
<b>MDB</b>	Message Driven Beans

## Build EAR Files

This topic explains the creation of .war file using ODT and setting up database for ODT installation.

Create the following property file before building the application.

This topic contains the following sub-topic:

- [Set up Open Development Tool](#)  
This topic explains the steps to set up the Open Development Tool Application.

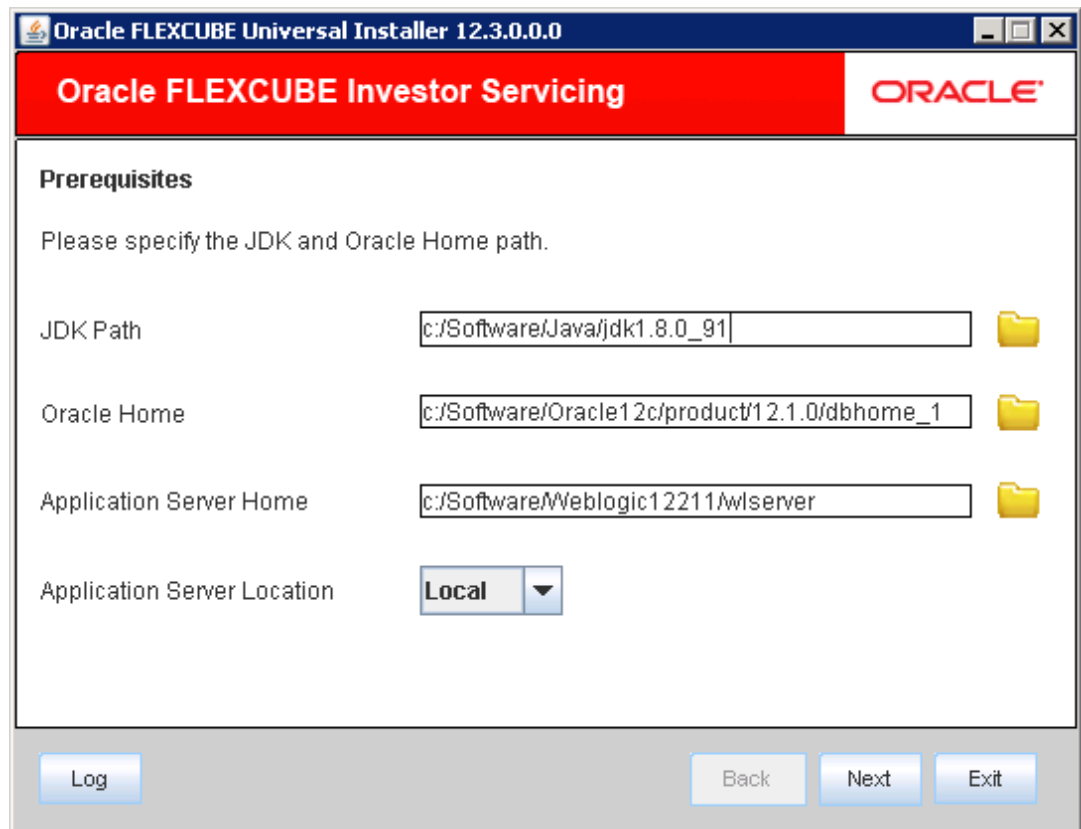

### 1.1 Set up Open Development Tool

This topic explains the steps to set up the Open Development Tool Application.

1. Start **Oracle FLEXCUBE Universal Installer**.

The **Oracle FLEXCUBE Universal Installer** is displayed.

**Figure 1-1 Oracle FLEXCUBE Universal Installer**

2. On **Oracle FLEXCUBE Universal Installer** screen, enter the following details.

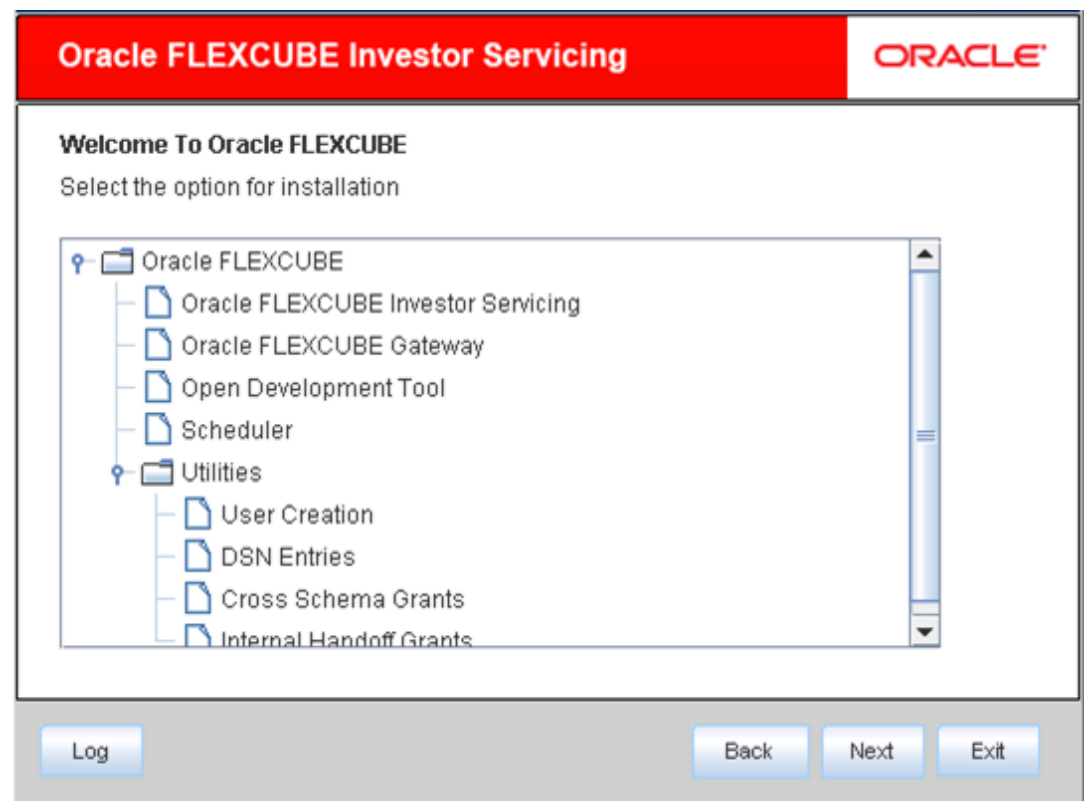

Refer to the table for JDK and Oracle Home path.

Table 1-1 JDK and Oracle Home path

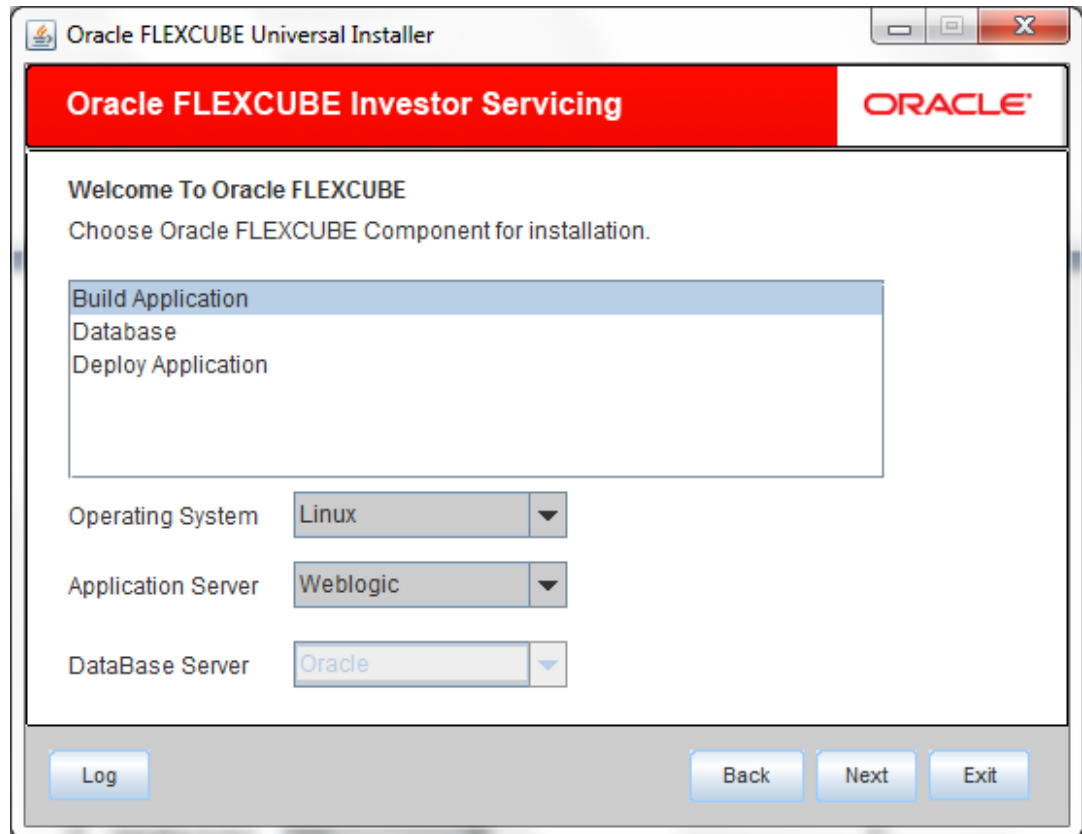

Field	Description
<b>JDK Path</b>	Provide Home folder path of JDK1.8.
<b>Oracle Home</b>	Provide home folder path of Oracle Client or Database.
<b>Application Server Home</b>	Provide home folder path of Application Server.
<b>Application Server Location</b>	Select location of the application server either local or remote.

3. Click **Next** to select the option for installation.
4. Select **Open Development Tool** from the lists of **Oracle FLEXCUBE** options.  
The available options for installation are displayed.

Figure 1-2 Oracle FLEXCUBE\_Open Development Tool

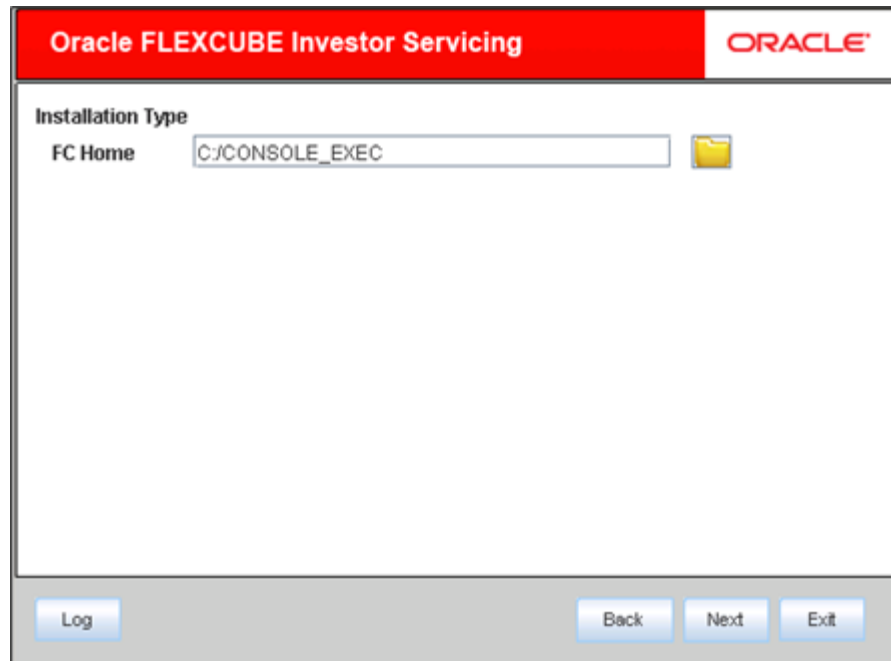

5. Click **Next** to choose **Oracle FLEXCUBE** component for installation.
6. Select **Build Application**.  
The available options **Property File**, **Database**, **Build Application**, and **Deploy Application** are displayed.

**Figure 1-3 Build Application**

7. Specify the operating system in which you are creating the property file. Choose the appropriate one from the drop-down list.
8. Specify the application server in which you are creating the property file. Choose the appropriate one from the drop-down list.
9. Specify the database server in which you are creating the property file. Choose the appropriate one from the drop-down list.
10. Specify the FC Home details and click **Next**.

The following screen is displayed.

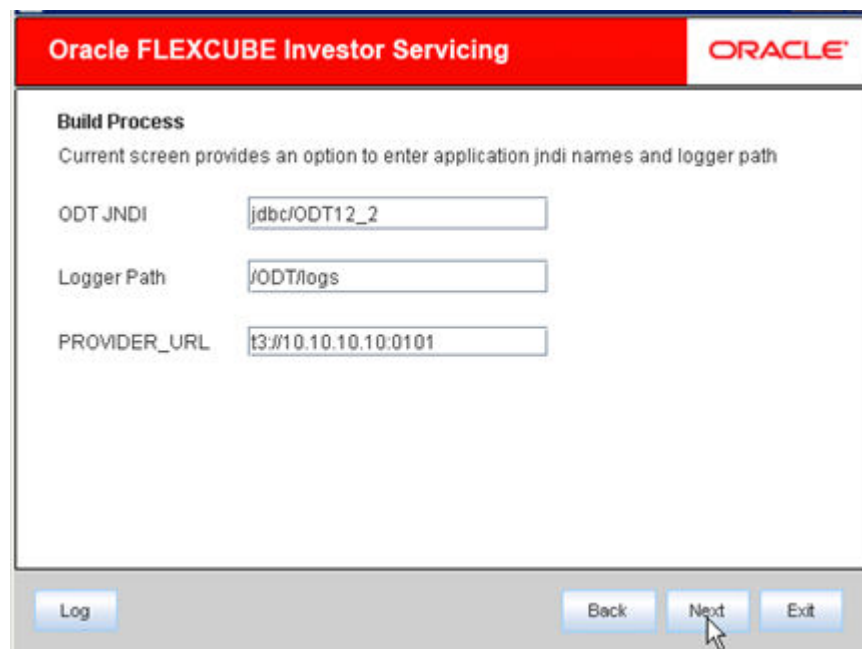

Figure 1-4 FC Home

11. Select the console type and click **Next**.

The following screen is displayed.

Figure 1-5 Application JNDI Name

12. Specify the following details:
  - a. **ODT JNDI:** Specify the JNDI for the ODT.
  - b. **Logger Path:** Specify the path where the logs have to be written.

- c. **Provider\_URL**: Specify the provider URL.
13. In this screen, you are provided with an option to enable **Single Sign On**.

**Figure 1-6 Single Sign On Details**

**Oracle FLEXCUBE Investor Servicing** ORACLE

**Property File Creation**

Current screen provides an option for Enabling Single Sign on

SSO Required ☐

SSO KEY

Authentication details maintained external to FLEXCUBE

External Password Required ☐ Authentication Type

External User Login Required ☐

Single sign-on (SSO) is a property of access control of multiple related, but independent software systems. With this property a user logs in once and gains access to all systems without being prompted to log in again at each of them. Conversely, Single sign-off is the property whereby a single action of signing out terminates access to multiple software systems. This screen provides an option for External Authentication. If External Authentication is not required, keep the

Log Back Next Exit

14. On **Single Sign On** screen, enter the following details.
- Refer to the table for Single Sign On details.

**Table 1-2 Single Sign On details**

Field	Description
<b>SSO Required</b>	Check this box to enable <b>Single Sign On (SSO)</b> . If you check this box, you need to enter the SSO Key.
<b>SSO KEY</b>	Specify the SSO key. If you have checked the box <b>SSO Required</b> , it is mandatory to specify the SSO key.

15. Select the **External Password Required** to allow the user login using MSAD/LDAP password irrespective of the user ID. This option is unchecked by default.
- If you check this box, the user ID can be either the MSAD/LDAP user ID or the FCIS user ID. And the password can be MSAD/LDAP server password only.

Figure 1-7 Authentication Details maintained external to FLEXCUBE

16. Select the **External User Login Required** to enable user login using MSAD/LDAP user ID.

If you check this box, the user can log in using MSAD/LDAP server user ID as well as FCIS user ID.

17. Select the **Authentication Type** from the adjoining drop-down list. This is the type of external server that is used.

The following options are available:

- **Microsoft Active Directory (MSAD)** The default option is **MSAD**. However, you can change it.
- **Lightweight Directory Access Protocol (LDAP)**

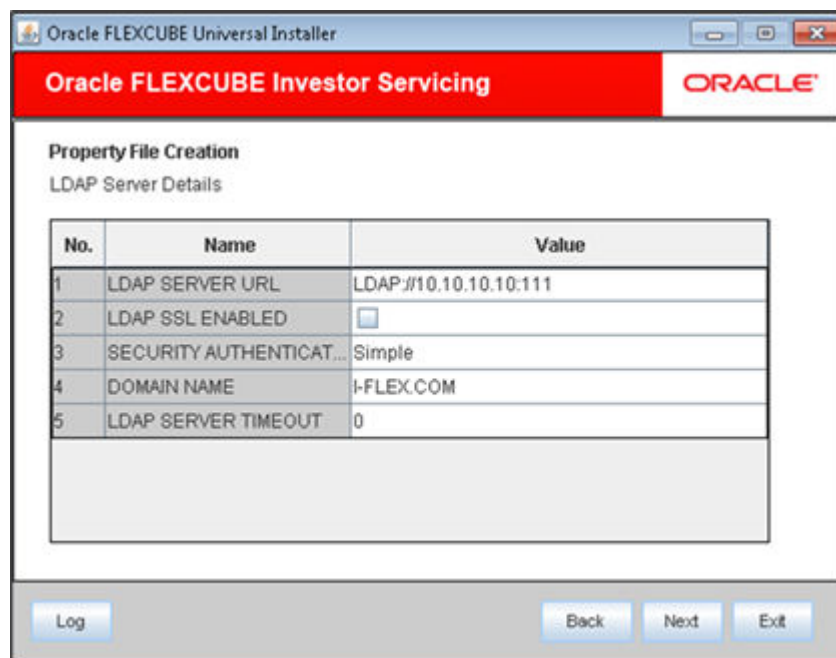

Figure 1-8 Authentication Type

18. Choose the **Authentication Type** as **LDAP** and click **Next**.

The LDAP server details screen is displayed.

Figure 1-9 LDAP Server Details

19. On **LDAP Server Details** screen, enter the following details.

Refer to the table for LDAP Server details.

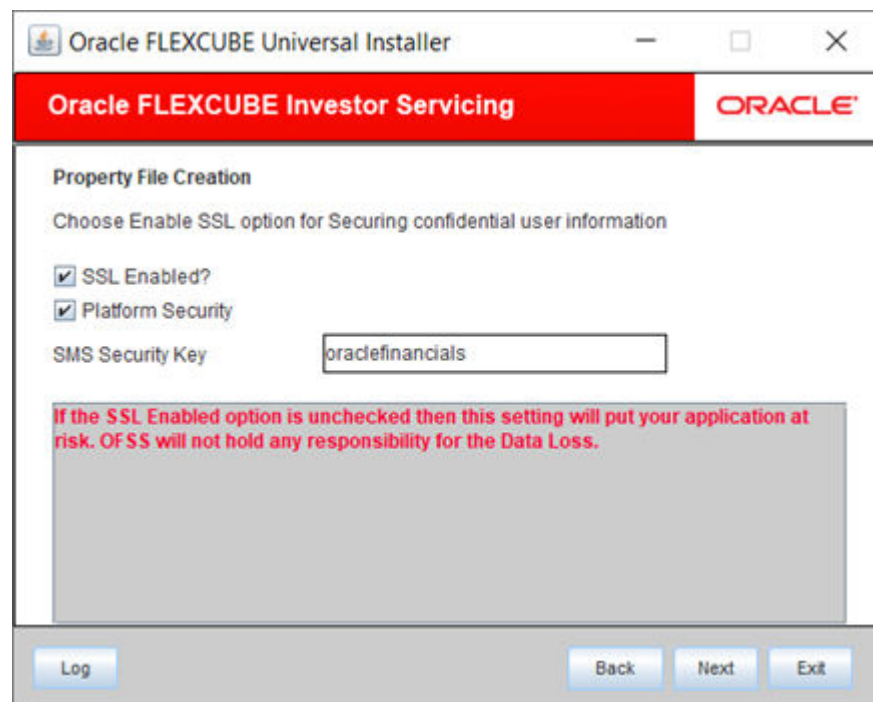

Table 1-3 LDAP Server details

Field	Description
<b>LDAP Server URL</b>	Specify the URL to access the LDAP server where the external user Ids or passwords are maintained.
<b>LDAP SSL Enabled</b>	Check this box if the LDAP server is SSL enabled. <b>Note:</b> If you check this box, then you need to specify the SSL port in the field <b>LDAP SERVER URL</b> .
<b>Security Authentication Type</b>	Depending on the authentication mechanism supported by the LDAP server, you need to select one of the following: <ul style="list-style-type: none"> <li>• <b>Simple</b></li> <li>• <b>Strong</b></li> </ul> <b>Note:</b> Different servers support different authentication mechanisms. By default, the security authentication type is <b>Simple</b> ; however, you can change it.
<b>Domain Name</b>	Specify the domain name.
<b>LDAP Server Timeout</b>	Specify the LDAP server timeout in milliseconds. <b>Note:</b> <ul style="list-style-type: none"> <li>• By default, the LDAP server timeout is zero; however, you can change this.</li> <li>• You must enter a positive integer value. For example, 1000, 10000, 5000, etc.,</li> <li>• If the value specified is zero or less, it indicates that no read timeout is specified. Then, the wait for the response infinite until it is received.</li> </ul>

20. Click **Next** after the LDAP server details are specified.

The following screen is displayed.

Figure 1-10 Enable SSL for Securing Confidential User Information

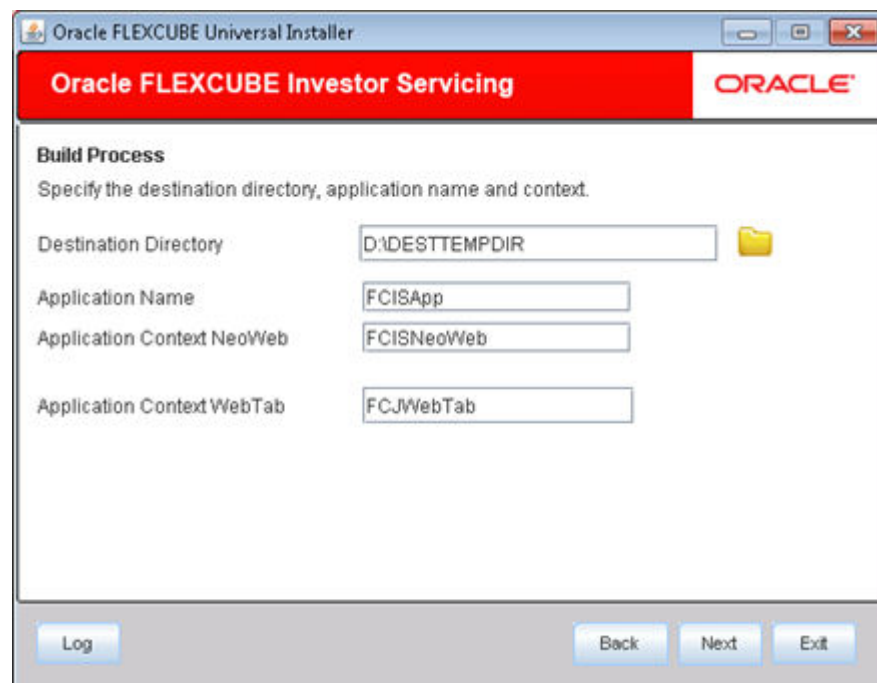

21. On the **Build Process** screen, specify the following details.  
Refer to the Build Process table.

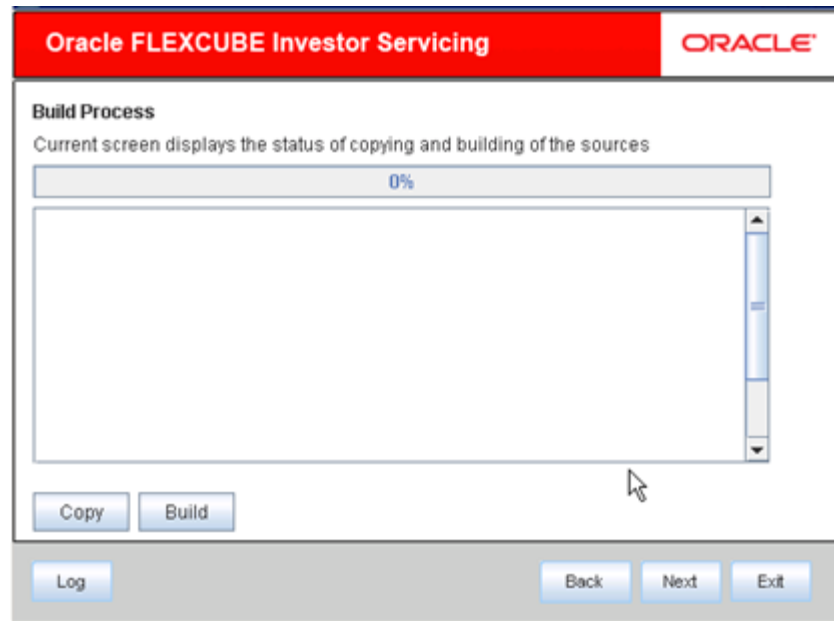

**Table 1-4 Build Process**

Field	Description
<b>Destination Directory</b>	Specify the destination folder where EAR will be built.
<b>Application Name</b>	Specify the name of the application.

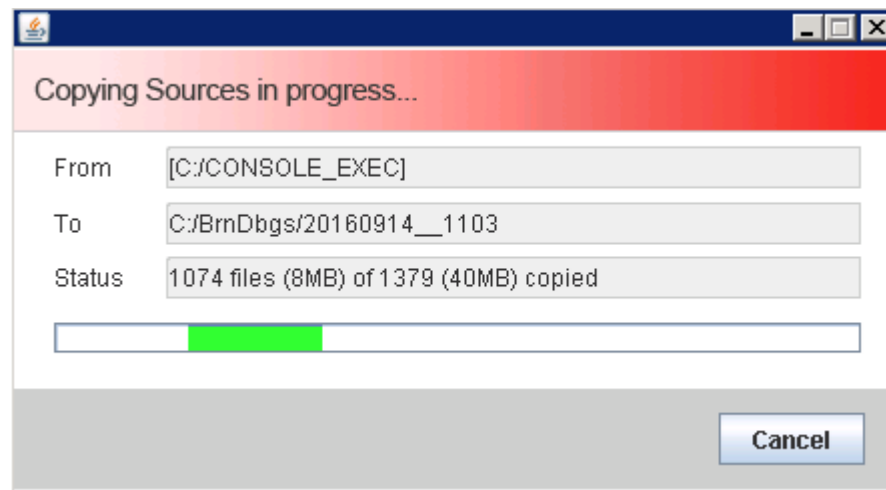

**Figure 1-11 Application and Destination Details**

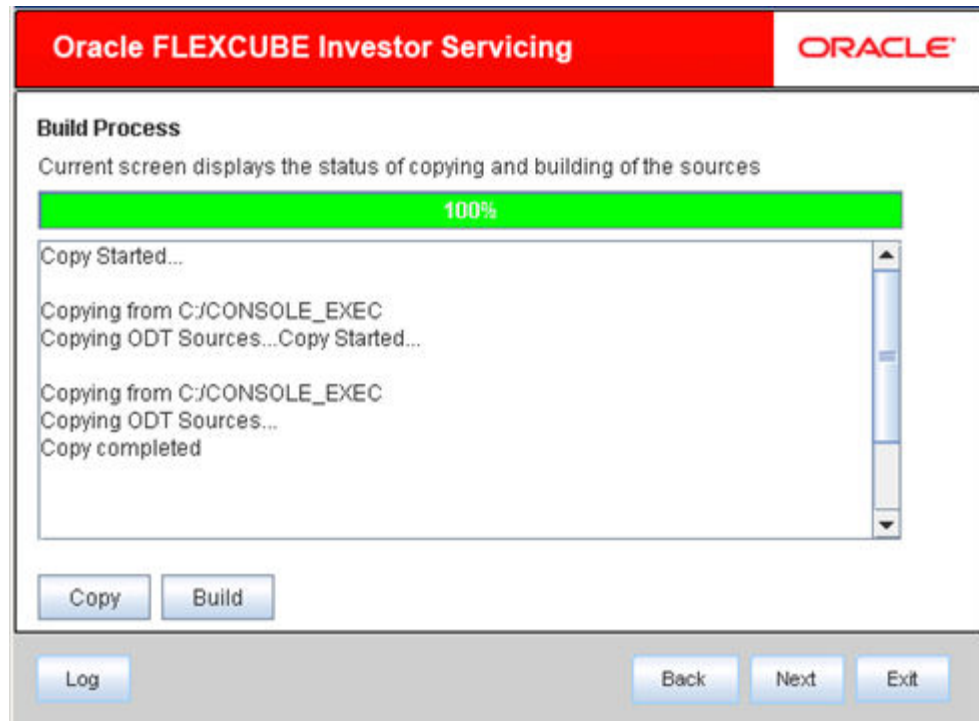

22. Click **Next** to view the status of sources being copied.  
The following screen is displayed.

**Figure 1-12** Status of sources being Copied

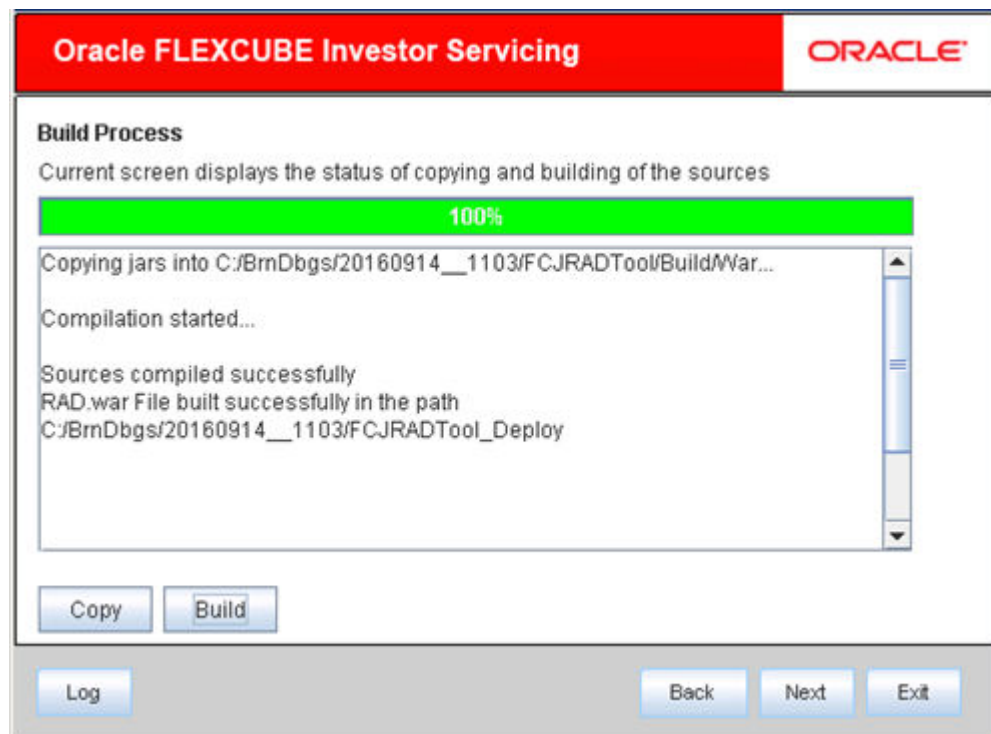

23. Click **Copy** button.  
The installer copies the files.

**Figure 1-13** Click Copy

24. Click **Next** to view the status of sources being built.  
The following screen is displayed.

**Figure 1-14 Status of sources being Copied**

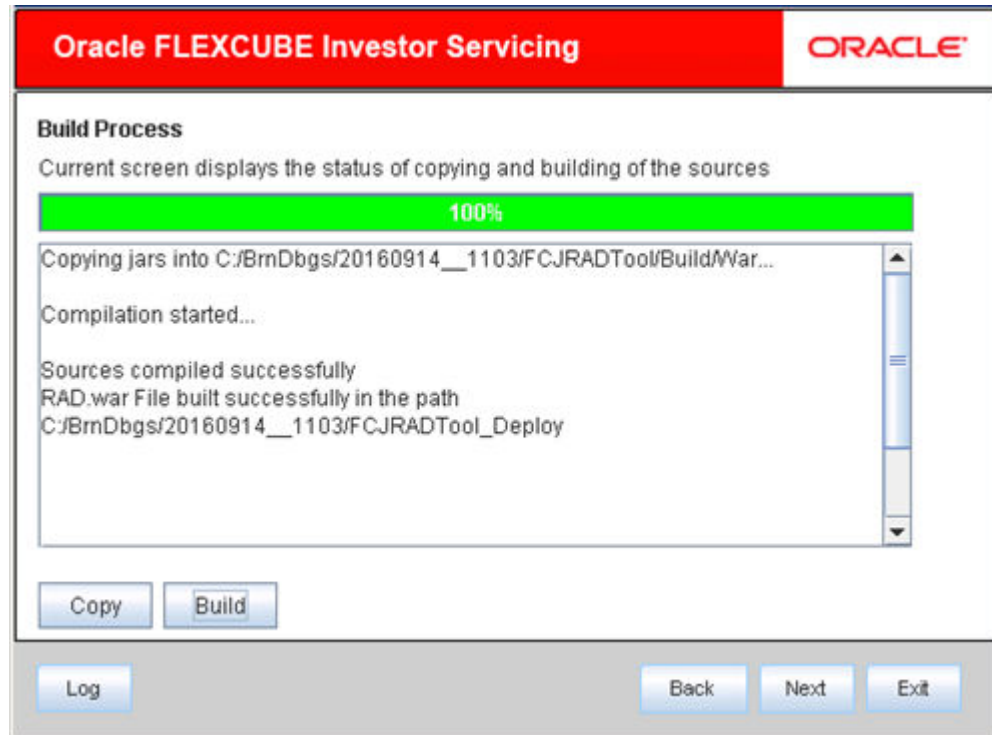

25. Click **Build** button to start the build process.  
The installer builds the source files.

**Figure 1-15 Status of sources being Built**

26. Click **Ok**.

The following screen is displayed.

**Figure 1-16 Status of sources being Built**

This completes the file generation process using ODT.
