This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

Oracle FLEXCUBE Investor Servicing is a comprehensive mutual funds automation software from Oracle® Financial Servicing Software Ltd.©.

You can use the system to achieve optimum automation of all your mutual fund investor servicing processes, as it provides guidelines for specific tasks, descriptions of various features and processes, and general information.

This topic contains the following sub-topics:

- [Purpose](#)
- [Audience](#)
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Conventions](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)

Purpose

This User Guide is intended to familiarize you with the light-weight REST based services of **Oracle Flexcube Investor Servicing**. The manual gives you an overview of the services developed, input/request parameters and the response of the each REST service.

Audience

The manual is intended for integrating external systems to Oracle FLEXCUBE Investor Servicing using RESTFUL framework.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which user supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that user enter.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of the acronyms and abbreviations used are as follows:

Table 1 Acronyms and Abbreviations

Abbreviation	Description
FCIS	Oracle FLEXCUBE Investor Servicing
REST	Representational State Transfer
JWT	JSON Web Token

1

Rest API Services - Overview

This topic provides information on overview of Rest API Services.

This topic contains the following sub-topic:

- [REST Services](#)
This topic provides information on Rest Services.

1.1 REST Services

This topic provides information on Rest Services.

Oracle FLEXCUBE Investor Servicing has adopted the industry standard of providing lightweight services through **Representational State Transfer (popularly known as REST)** Services.

These lightweight services support the current trend of mobile/tablet based applications. These services help to improve the response time for tablet/mobile applications, as these applications are very chatty, involves numerous hits to the server and the expected response time is minimal for each of the requests. The REST service requests can either use **GET** or **POST** methods.

The REST services using **GET** methods are listed as follows:

- Fetch Unitholder details by ID
- Fetch customer
- Fetch the transaction details
- Fetch Standing Instructions details
- Fetch Fund details
- Fetch Fund Price details
- Fetch Broker details

The following are the services using **POST** methods:

- Create Unitholder
- Create a Transaction
- Create a Standing Instruction
- Create a Policy

Each of the services listed above will be a URL. These URLs can be tested using any of the available browser plug-ins (For instance, Postman, RestEasy etc.) or these services can also be integrated with an API manager depending on its use. Below is the format of a Get unitholder service example which will take the unitholder ID as the input.

```
http://( IP ) :( Port ) /Unitholder/QueryUnitholder/unitholderid/  
{unitholderid}
```

The input for the GET services is passed as a part of the URL and if more than one input needs to be passed they should be separated by a forward slash (/). Apart from passing the unitholder ID as a part of the URL, the services also expect a few header parameters to be passed to the service.

The following are the header parameters passed:

- **userId** : FLEXCUBE Investor Servicing login user ID
- **password** : Encrypted FLEXCUBE Investor Servicing password of the user
- **branch** : The branch to which the user belongs
- **msgId** : A alphanumeric input from the consumer
- **source** : Source of the request whether it is FCUBS or an external system
- **Content-Type**: This mentions the format of the input /output. Since we are using the JSON format we will give the content-type as application/json.

The following parameter are available in the Authorization tab:

- **Type**: Bearer Token
- **Token**: JSON Web Token

UserId, password and msgId are for authenticating the user accessing the service. More information on authentication can be found in Section 2.

For the POST services we need to provide data input in JSON format. An example of JSON input is shown below. The output of REST services will also be in JSON format.

- [Rest Services Security/ Authentication Scheme](#)
This topic provides information on rest services security/ authentication scheme details.
- [Rest HTTP Headers](#)
This topic provides information on Rest HTTP headers details.

1.1.1 Rest Services Security/ Authentication Scheme

This topic provides information on rest services security/ authentication scheme details.

Authentication in Restful Services is implemented using two ways as per maintained in the Source Maintenance screen:

- Oracle FLEXCUBE Investor Servicing SMS Authentication system
- JSON web token (JWT)

If the Authentication is implemented in FLEXCUBE authentication system the requests to the Restful services needs to contain the headers as follows:

- **userId** - Oracle FLEXCUBE Investor Servicing login user name
- **password** – Encrypted Oracle FLEXCUBE Investor Servicing login password
- **msgId** –This message ID will be a unique id to identify the request

The **userId** and **password** headers should contain the **userId** and **password** that is created in the **Oracle FLEXCUBE Investor Servicing** application.

The **password** field should be encrypted with the **msgId** as the key.

The Rest API application will decrypt the password and validate the same against the **Oracle FLEXCUBE Investor Servicing** SMS maintenance, and will service the request only if the validation succeeds.

If the Authentication is implemented through JSON web token (JWT) then the authorization tab must contain the

- **Type** : Bearer Token
- **Token** : JSON Web token which is generated with the algorithm (HSA,RSA and ECDSA)

The token will be generated by the external system using any one of the algorithm HSA, RSA or ECDSA with the claims. In FCIS system we will maintain the public key and the clock skew, shared by the external system in the database table **SSTB_AUTH_DETAILS** and the key value pair (claims) are maintained in the table **STB_JWT_PAYLOAD_DETAILS**. The JWT token sent by the external system is validated against the public key and the key value pair (claims) maintained in FCIS system.

1.1.2 Rest HTTP Headers

This topic provides information on Rest HTTP headers details.

The following are the headers that are expected in all the requests that are sent to the Rest API application:

- **userId** - Oracle FLEXCUBE Investor Servicing login user name
- **password** - Encrypted Oracle FLEXCUBE Investor Servicing login password
- **msgId** –This message id will be a unique id to identify the request
- **branch** - The branch code from where the request is sent
- **source** - The source code of the external system

2

Rest API Services – Details

This topic provides information on Oracle FLEXCUBE Investor Servicing Rest API Services.

This topic contains the following sub-topic:

- [Oracle FLEXCUBE Investor Servicing Rest API Services](#)
This topic lists the available Oracle FLEXCUBE Investor Servicing Rest API Services.

2.1 Oracle FLEXCUBE Investor Servicing Rest API Services

This topic lists the available Oracle FLEXCUBE Investor Servicing Rest API Services.

Following are the list of **Oracle FLEXCUBE Investor Servicing** Rest API Services that are available:

Table 2-1 Rest API Services

Rest Service Name	Service Type	API URI
Account Type service	Get	https://{hostname}:{Port}/AccountType/QueryAccountType/accounttype/{accounttype}/effectivedate/{effectivedate}
Agency Branch Bank Service	Get	https://{hostname}:{Port}/AgencyBranchBank/QueryAgencyBranchBank/moduleId/{moduleId}/bankcode/{bankcode}/branchcode/{branchcode}/accountnumber/{accountnumber}
-	Post	https://{hostname}:{Port}/AgencyBranchBank/CreateAgencyBranchBank
-	Post	https://{hostname}:{Port}/AgencyBranchBank/ModifyAgencyBranchBank
-	Post	https://{hostname}:{Port}/AgencyBranchBank/AuthorizeAgencyBranchBank
-	Post	https://{hostname}:{Port}/AgencyBranchBank/DeleteAgencyBranchBank
Amount Block Service	Get	https://{hostname}:{Port}/AmountBlock/QueryAmountBlock/blockunblockid/{blockunblockid}/transactiondate/{transactiondate}
-	Post	https://{hostname}:{Port}/AmountBlock/AuthorizeAmountBlock
-	Post	https://{hostname}:{Port}/AmountBlock/DeleteAmountBlock
-	Post	https://{hostname}:{Port}/AmountBlock/ModifyAmountBlock
-	Post	https://{hostname}:{Port}/AmountBlock/CreateAmountBlock
Amount Unblock Service	Get	https://{hostname}:{Port}/AmountUnblock/QueryAmountUnblock/blockunblockid/{blockunblockid}/txndate/{txndate}

Table 2-1 (Cont.) Rest API Services

Rest Service Name	Service Type	API URI
-	Post	https://{hostname}:{Port}/AmountUnblock/AuthorizeAmountUnblock
-	Post	https://{hostname}:{Port}/AmountUnblock/AuthorizeAmountUnblock
-	Post	https://{hostname}:{Port}/AmountUnblock/ModifyAmountUnblock
-	Post	https://{hostname}:{Port}/AmountUnblock/CreateAmountUnblock
AuthRep Service	Get	https://{hostname}:{Port}/AuthRep/QueryAuthRep/authrepid/{authre pid}
-	Post	https://{hostname}:{Port}/AuthRep/AuthorizeAuthRep
-	Post	https://{hostname}:{Port}/AuthRep/ModifyAuthRep
-	Post	https://{hostname}:{Port}/AuthRep/CreateAuthRep
-	Post	https://{hostname}:{Port}/AuthRep/DeleteAuthRep
Block Service	Get	https://{hostname}:{Port}/Block/QueryBlock/transactionnumber/{transactionnumber}
-	Post	https://{hostname}:{Port}/Block/DeleteBlock
-	Post	https://{hostname}:{Port}/Block/CreateBlock
-	Post	https://{hostname}:{Port}/Block/ModifyBlock
-	Post	https://{hostname}:{Port}/Block/AuthorizeBlock
Broker Client Relation Service	Get	https://{hostname}:{Port}/BrokerClientRelation/QueryBrokerClientRelation/brokercode/{brokercode}
Broker Currency Service	Get	https://{hostname}:{Port}/BrokerCurrency/QueryBrokerCcy/brokercode/{brokercode}/effectivedate/{effectivedate}
-	Post	https://{hostname}:{Port}/BrokerCurrency/CreateBrokerCcy
-	Post	https://{hostname}:{Port}/BrokerCurrency/DeleteBrokerCcy
-	Post	https://{hostname}:{Port}/BrokerCurrency/ModifyBrokerCcy
-	Post	https://{hostname}:{Port}/BrokerCurrency/AuthorizeBrokerCcy
Broker IDS Service	Get	https://{hostname}:{Port}/BrokerIDS/QueryBrokerIDS/entityid/{entity id}/entitytype/{entitytype}/fundid/{fundid}/paymentcurrency/{payment currency}
-	Post	https://{hostname}:{Port}/BrokerIDS/CreateBrokerIDS
-	Post	https://{hostname}:{Port}/BrokerIDS/CloseBrokerIDS
-	Post	https://{hostname}:{Port}/BrokerIDS/ModifyBrokerIDS
-	Post	https://{hostname}:{Port}/BrokerIDS/DeleteBrokerIDS

Rest Service Name	Service Type	API URI
-	Post	https://{hostname}:{Port}/BrokerIDS/ReopenBrokerIDS
-	Post	https://{hostname}:{Port}/BrokerIDS/AuthorizeBrokerIDS
Broker Service	Get	https://{hostname}:{Port}/Broker/QueryBroker/brokercode/{brokercode}/ruleeffectivedate/{ruleeffectivedate}
-	Post	https://{hostname}:{Port}/Broker/AuthorizeBroker
-	Post	https://{hostname}:{Port}/Broker/CreateBroker
-	Post	https://{hostname}:{Port}/Broker/ModifyBroker
-	Post	https://{hostname}:{Port}/Broker/DeleteBroker
-	Get	https://{hostname}:{Port}/Broker/SummaryQueryBroker
CIF Address Service	Get	https://{hostname}:{Port}/CIFAddress/QueryCIFAddress/cifnumber/{cifnumber}/media/{media}/location/{location}
-	Post	https://{hostname}:{Port}/CIFAddress/ModifyCIFAddress
-	Post	https://{hostname}:{Port}/CIFAddress/CreateCIFAddress
-	Post	https://{hostname}:{Port}/CIFAddress/DeleteCIFAddress
-	Post	https://{hostname}:{Port}/CIFAddress/AuthorizeCIFAddress
CIF Fund Mapping Service	Get	https://{hostname}:{Port}/CIFFundMapping/DeleteCIFFundMapping
-	Post	https://{hostname}:{Port}/CIFFundMapping/DeleteCIFFundMapping
-	Post	https://{hostname}:{Port}/CIFFundMapping/AuthorizeCIFFundMapping
-	Post	https://{hostname}:{Port}/CIFFundMapping/ModifyCIFFundMapping
-	Post	https://{hostname}:{Port}/CIFFundMapping/CreateCIFFundMapping
CIF UH Mapping Service	Get	https://{hostname}:{Port}/CIFUHMMapping/QueryCIFUHMMapping/referencenumber/{referencenumber}
-	Post	https://{hostname}:{Port}/CIFUHMMapping/ModifyCIFUHMMapping
-	Post	https://{hostname}:{Port}/CIFUHMMapping/CreateCIFUHMMapping
-	Post	https://{hostname}:{Port}/CIFUHMMapping/AuthorizeCIFUHMMapping
Customer Service	Get	https://{hostname}:{Port}/Customer/QueryCustomer/customerNo/{customerNo}
Fund Price Service	Post	https://{hostname}:{Port}/FundPrice/ModifyFundPrice

Table 2-1 (Cont.) Rest API Services

Rest Service Name	Service Type	API URI
-	Get	https://{hostname}:{Port}/FundPrice/QueryFundPrice/fundid/{fundid}/effective date/{effective date}
Help Desk Service	Get	https://{hostname}:{Port}/HelpDesk/QueryHelpDesk/helpdeskrefno/{ helpdeskrefno}
Holiday Service	Get	https://{hostname}:{Port}/Holiday/QueryHoliday/year/{year}/calendarType/{calendarType}/entityid/{entityid}
-	Post	https://{hostname}:{Port}/Holiday/ModifyHoliday
HWM Service	Get	https://{hostname}:{Port}/HWM/QueryHWM/fundid/{fundid}/effective date/{effective date}
-	Post	https://{hostname}:{Port}/HWM/AuthorizeHWM
-	Post	https://{hostname}:{Port}/HWM/ModifyHWM
-	Post	https://{hostname}:{Port}/HWM/CreateHWM
IPO Subscription Service	Get	https://{hostname}:{Port}/IPOSubscription/QueryIPOSubscription/transactionnumber/{transactionnumber}
-	Post	https://{hostname}:{Port}/IPOSubscription/QueryIPOSubscription/transactionnumber/{transactionnumber}
-	Post	https://{hostname}:{Port}/IPOSubscription/ModifyIPOSubscription

Adjustment Order Service	Post	https://{hostname}:{Port}/AdjustmentOrder/ModifyAdjustmentOrder
-	Post	https://{hostname}:{Port}/AdjustmentOrder/AuthorizeAdjustmentOrder
-	Post	https://{hostname}:{Port}/AdjustmentOrder/DeleteAdjustmentOrder
-	Get	https://{hostname}:{Port}/AdjustmentOrder/QueryAdjustmentOrder/ ordernumber/ {ordernumber}
-	Post	https://{hostname}:{Port}/AdjustmentOrder/CreateAdjustmentOrder

- [Rest Services Additional Information](#)
This topic provides information on Rest services additional information details.

2.1.1 Rest Services Additional Information

This topic provides information on Rest services additional information details.

- Date Format YYYY-MM-DD
- Cannot pass NULL value in Get API URI
- Support for Rest Services are enhanced to all modules through ODT. In ODT at RAD level user can opt for which Rest services are required, ODT automatically generate rest artefacts for Function IDs opted. These Rest Services can be deployed into application.

List of services enabled:

The document attached will have the services introduced newly along the existing services.

Refer the webservice page [Rest Services List](#) for the list of Rest Services.

Rest Documentations

Refer to **Rest Documentaion.zip** to access swagger.json files for the ODT generated services. Replace "host": "null" with the I.P. address and port of the server where the REST service is deployed. This has to be done for all the swagger.json files.

If any service is getting updated or a new service is getting generated, then follow the below steps to generate swagger.json for those services:

- Generate service EAR file and deploy the service.
- Once the service is running, to obtain swagger.json, type service URL followed by swagger.json in the browser. E.g. `https://10.10.10.10:1010/unitholderService/swagger.json`

Refer the webservice page [Rest Documentation](#) for **Rest Documentaion.zip**.
