#### Role

This topic describes about the maintenance of role and the respective access rights.

The users who works in the same department at the same level of hierarchy need to have similar user profiles. In such cases, the user can define a Role Profile that includes access rights to the functional activities that are common to a group of users. A user can be linked to a Role Profile by giving the user access rights to all the functional activities in the Role Profile.

The roles defined is effective only after the dual authorization.

- Create Role
  - This topic provides the systematic instructions to create role.
- View Role
   This topic provides the systematic instructions to view the list of configured roles.

#### 1.1 Create Role

This topic provides the systematic instructions to create role.

#### User

This topic describes about the maintenance of the user and their access.

Controlled access to the system is a basic parameter that determines the robustness of the security in banking software. Only authorized users can access the system with the help of a unique User Login ID and password. The user profile of a user contains the details of the user in four sections - User details, Status, Other details and User role branches.

- Create User
  - This topic provides the systematic instructions to create the user and assign their activities.
- View User
   This topic provides the systematic instructions to view the list of configured users.
