This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

# 1

## Financial Services Advanced Analytical Applications Infrastructure Application Pack v8.1.2.0.0 Maintenance Release #4 (v8.1.2.4.0)

OFS AAI Application Pack v8.1.2.0.0 Maintenance Release #4 8.1.2.4.0 (ID **35681234**) is a cumulative release of all enhancements and bug fixes completed since the v8.1.2.0.0 release.

### Note:

- Before you apply the OFS AAI 8.1.2.4.0 ML, contact [My Oracle Support](#) to ascertain the compatibility of the OFSAA applications in the OFSAA instance.
- For information about the Hardware and Software Requirements for this release, see the [Oracle Financial Services Analytical Applications 8.1.2.0.0 Technology Matrix](#).
- In case the OFSAA environment has the ERF suite of applications installed, refer to the Compatibility Matrix of OFSAAI with ERF Applications ([DOC ID 2997813.1](#)) and install the appropriate compatibility patches.
- In case the OFSAA environment has the FCCM suite of applications installed, refer to the Compatibility Matrix of OFSAAI with FCCM Applications ([DOC ID 2997860.1](#)) and install the appropriate compatibility patches.
- SQL Rule is a deprecated feature and is not supported. For more information, contact Oracle support.

### Additional Licensing Information

To use the **Data Maintenance Interface** feature, Oracle Financial Services Analytical Applications Infrastructure Extension Pack (OFS AAIEP) is required. For more information, refer to [OFS AAIEP Release Notes](#).

### Prerequisites

The minimum patch set level should be OFS AAI/AAAI Application Pack v8.1.2.0.0.

### Note:

Upgrade the OFS AAI Platform on any OFSAA Application Pack.

## How to Apply this Release?

For instructions on how to install this OFS AAI Application Pack release, see the [OFS AAI Application Pack Installation and Configuration Guide 8.1.2.4.0](#).

# 1.1 New Features and Enhancements

Features and improvements introduced in this release.

The following list provides details for the new features and enhancements in this release. For detailed information on how to use these features, see the [Oracle Financial Services Advanced Analytical Applications Infrastructure v8.1.2.x User Documentation](#).

## Administration

- Added System for Cross-Domain Identity Management (SCIM) feature. The System for Cross-domain Identity Management (SCIM) simplifies the process of managing user identities in On-Premise applications and services. This system can use the existing schemas and deployments and utilize the existing authentication, authorization, and privacy models.
- Availability of Restful APIs for object migration.
- Introduced following Restful APIs for Security Management System and Identity Management:
  - To create and delete an Infodom.
  - To restrict creating aai and metadata related tables while creating infodom with flag.
  - To create and delete application ID for an Infodom.
  - To create and authorize a new user group.
  - To create a new segment.
  - To map and authorize multiple roles to an user group.
  - To map and authorize user group to a domain.
- Option to log out the inactive session from the previous logged in session.
- User group name now supports more than 20 characters.

## Data Loading

Ability to configure date formats of the source records in F2T.

## Inline Processing

Model ID and Version are supported in simulation feature.

## OJET Framework

Ability to configure user access validation.

## Operations

The object name is now displayed in the Batch Monitor Event log section.

### **Questionnaire**

Option to enable/disable configuration for RFI access with token based approach.

### **Rules Framework**

Ability to pass additional parameters to the T2T component.

### **Security Management System**

Support of special character underscore ( \_ ) in the Role Name while creating a role from the UI.

### **Unified Metadata Manager**

Added a new property 'Source Fetch Size' for T2T, T2H, and T2F object types that enables users to specify the batch size.

### **Data Maintenance Interface**

Added Data exporter feature.

### **System Configuration**

Enhanced custom headers to capture client IP instead of X-Forwarded-For header.

### **Process Modelling Framework**

RunSky as a parameter sent to DQ task during PMF execution.

## **1.2 Library Upgrade Information**

Libraries that are upgraded in this release.

This release includes upgrades to the following libraries.

- Apache Commons Compress - 1.24.0
- Xalan – 2.7.3
- Google Guava – 32.1.2
- TinyMCE – 6.7.2
- Apache ActiveMQ - 5.18.3
- Xmlsec – 2.2.6

## 1.3 List of One-offs Regularized

The list of one-offs that have been regularized in this release.

### One-offs Released on v8.1.2.3.0

Component/Sub-component	One-Off Patch Number	Bug ID	Description
Others	8.1.2.3.1	35320767	Adjustment screens are not loading after applying AAI April CPU on 812 and 8121 versions
Administration	8.1.2.3.2	35372280	Invalid error while entering wrong username and wrong password
Security Management System	8.1.2.3.3	35384601	Forward port for the bug 35330648 - search issue on user maintenance screen
Others	8.1.2.3.4	35340701	Consolidated fixes for issues found on OFSAAI v8123 post library upgrade
Others	8.1.2.3.5	35307360	Consolidated fixes for issues found on OFSAAI v8123
OJET Framework	8.1.2.3.6	35400424	Consolidate ECM LP issues on 8123
OJET Framework	8.1.2.3.7	35547019	Event details screen is broken after upgrade of JS library
Security Management System	8.1.2.3.8	35526369	User - User Group map details are not coming under user group authorization
OJET Framework	8.1.2.3.9	35599570	Customer detail screens are not loading via load balancer URL
Administration	8.1.2.3.10	35304742	ECM attachments slow download
Others	8.1.2.3.11	35382114	Standard upgrade of libraries for common usage in OFSAA v81x - July2023
System Configuration/ Configuration	8.1.2.3.12	35677879	User account does not get locked after exceeding number of invalid login attempts specified in configuration screen
Data Maintenance Interface	8.1.2.3.13	35464170	Inclusion of data exporter feature
Forms Framework	8.1.2.3.14	35688363	Masking is not working in case screens

Component/Sub-component	One-Off Patch Number	Bug ID	Description
Administration	8.1.2.3.15	35386514	Could not start message server after upgrading to 8123
Questionnaire	8.1.2.3.16	35667722	Option to configure the RFI token based approach
Administration	8.1.2.3.17	35322369	Consolidated sanction simulation API requests
Administration	8.1.2.3.18	35708201	Request interception issues found in OFSAA application
OJET Framework	8.1.2.3.19	35644568	Consolidate ECM 8124 LP issues
Administration	8.1.2.3.20	35780491	Could not start message server after upgrading to 8123
All Common Apps	8.1.2.3.21	35704380	OFSAA allows unauthorized access to resources
OJET Framework	8.1.2.3.22	35719715	Duplicate involved parties are added when user click multiple times save button.
Inline Processing	8.1.2.3.23	35653122	Inline dataset in IPE it's not saving
OJET Framework	8.1.2.3.24	35842235	CTR issues after applying the OFSAA fixes shared for ADP penetration testing
System Configuration	8.1.2.3.25	35829211	Avoid creating AAI and some other related tables while creating Infodom through REST-API
Metadata	8.1.2.3.26	35584468	OFSAA 8.1.2: "code validation failed" error when opening the edit tab for random OFSAA column in post load changes
Inline Processing	8.1.2.3.27	35814104	Enhancements in IPE to support simulation requirements (model id, version)
Others	8.1.2.3.28	35598249	Consolidated fixes for issues dependent on FCCM release
Process Modelling Framework	8.1.2.3.29	35997595	Unable to pass OFSAA parameters such as run_skey as filter for a DQ rule in PMF
Administration	8.1.2.3.30	36029065	System for cross-domain identity management (SCIM)

Component/Sub-component	One-Off Patch Number	Bug ID	Description
Process Modelling Framework	8.1.2.3.31	35681148	Support of the process execution to continue on failure of a task

#### One-offs Released on v8.1.2.2.0

Component/ Sub-component	One-Off Patch Number	Bug ID	Description
Security Management System	8.1.2.2.8	35278955	ESIC batch execution is failing with the LDAP users
Unified Metadata Manager/ Business Metadata Management	8.1.2.2.9	35282057	Unable to view hierarchy info/mapping info in rule screen
Administration	8.1.2.2.10	35330648	Search issue on user maintenance screen
Process Modelling Framework	8.1.2.2.11	35335686	PMF execute API creates instance when wrong process ID is sent for execution
OJET Framework	8.1.2.2.12	35330434	Alignment issue in the UI
Workflow Framework/ Activity Registration Interface	8.1.2.2.13	35420401	Unable to import custom workflow
OJET Framework	8.1.2.2.14	35450397	Customer detail screens are not loading via load balancer URL
Advanced Analytics Infrastructure/ Modeling	8.1.2.2.15	35404056	While orchestrating PMF process, adding mfmodel widgets doesn't display available models for selection
Administration	8.1.2.2.16	35225801	Invalid login prompt message shows blank screen when logging with LDAP user
Data Entry Forms and Queries	8.1.2.2.17	35648918	Copy is not working in defi data entry screen OFSAA version 8.1.2.2
Data Loading	8.1.2.2.18	35425189	Date format configuration required for each column of the source in F2T
Process Modelling Framework	8.1.2.2.19	35976900	Pipelineexecutor.sh does not trigger PMF run

**One-offs Released on v8.1.2.1.0**

Component/ Sub-component	One-Off Patch Number	Bug ID	Description
Administration	8.1.2.1.18	35264569	The old session should be logged out and new user should be able to login automatically
Model Upload	8.1.2.1.19	35297030	The data model elements (table_name and column_name) to have more than 30 characters
Security Management System	8.1.2.1.20	35348384	The session not expired after the user password reset from different browsers
Administration/ Security Management	8.1.2.1.21	35251850	Authorization tasks does not appear post administration changes
Administration	8.1.2.1.22	35521052	No error for invalid login

**One-offs Released on v8.1.2.0.0**

Component/ Sub-component	One-Off Patch Number	Bug ID	Description
Administration	8.1.2.0.25	35584594	Metadata during dimensions migrations from lower to higher environments are not moving correctly
Administration/ Security Management	8.1.2.0.26	35999789	While user logins 2nd time with multi login disabled, it was still allowed to log in
Administration	8.1.2.0.27	35782844	Email notification not sending any emails after batch execution

## 1.4 Bugs Fixed in This Release

The following bugs are fixed in this release.

**Administration**

Bug ID	Description
35782844	Email notification not sending any emails after ICC batch execution
35708201	Request interception issues found in OFSAA application
35584594	Metadata during dimensions migrations from lower to higher environment are not moving correctly

Bug ID	Description
35372280	Invalid error while entering wrong username and wrong password
35521052	No error for invalid login
35248190	Requesting user email-id as part of user access report
34282753	User profile report alignment issue
<b>Utilities</b>	
35386514	Could not start message server after upgrading to 8123
<b>Security Management</b>	
35999789	While user logins 2nd time with multi login disabled, it was still allowed to log in
35251850	Authorization tasks does not appear post administration changes
<b>Object Migration</b>	
35537937	Migration of objects from on-perm setup to cloud

### Advanced Analytics Infrastructure

Bug ID	Description
36037390	AAI_STF module build compilation is failing with upgraded version of commons-fileupload jar i.e. 1.5

### Common Apps

Bug ID	Description
35704380	OFSAAs allows unauthorized access to resources

### Data Entry Forms and Queries

Bug ID	Description
35648918	Copy is not working in DEFI data entry screen OFSAA version 8.1.2.2

### Data Maintenance Interface

Bug ID	Description
33309330	VPAT OATB issues
33299876	VPAT keystroke issues
33268706	AAI - DMI - broken access control
33118894	8111 – DMI - missing session invalidation - access restrictions
35381178	Data entry - unable to edit the ready record field having decimal values
35559881	Data exporter - downloaded json file contains no table data, contains [object object]
35302190	Unable to create data exporter definition
35272940	Bulk table STG_PARTY_MASTER attributes page is showing empty
35272934	Data entry columns are not showing in UI if field set is not selected

Bug ID	Description
35272448	Excel upload - only 50 records are getting into schema out of 20000
35212846	Definitions are not getting approved either manual or auto approval
34889317	Data exporter functionality is not working
34885103	The audit trail must show both created by and authorized by with timestamps
34089473	Able to view the updated audit history only after 2 clicks
<b>Data Forms Entry</b>	
35107016	Unable to see un-redacted data from DMI screen

### Dimension Management

Bug ID	Description
<b>Members</b>	
33432474	811 LP - under AMHM screens dimension entities are not showing in UI for Spanish language

### Forms Framework

Bug ID	Description
35688363	Masking is not working in case screens

### Log Viewer

Bug ID	Description
33882580	OILM 81200: not displaying log files in UI after batch execution
35468494	ALM 8.1.2.2: unable to see logs for cash flow edits in UI / Blank view logger screen

### Metadata

Bug ID	Description
35584468	OFSAA 8.1.2: "code validation failed" error when opening the Edit tab for random OFSAA column in post load changes

### Model Upload

Bug ID	Description
33006519	Provision to resume model upload process in case of any issue during AAI_DMM_METADATA population
35297030	The data model elements (table_name and column_name) to have more than 30 characters
36088684	Model upload is failing while altering composite PK

**OJET Framework**

<b>Bug ID</b>	<b>Description</b>
36103723	Error message is displayed on accessing the preferences pop-up in websphere setup
36098889	DMT mapping UI distortion
35856153	Action buttons are not working after adding the records
35851646	Acropalypse affected Oracle images need to be patched
35842235	CTR issues after applying the OFSAA fixes shared for ADP penetration testing
35836455	All alerts are preloading before filter is applied upon entering alert viewer screen
35748828	Unable to sort any column in any grid from inside a case
35719715	Duplicate involved parties are added when user click multiple times Save button
35701355	VPAT issues reported in 8126 AML UI
35644568	Consolidate ECM 8124 LP issues
35639117	Clicking on Save button repeatedly saves the same involved party multiple times
35638748	Date control (type 11) is not working when we enable through field chooser
35593306	Sorting is not working for number control
35463596	Inclusion of TinyMce library for rich text control as replacement to ckeditor
35450397	Customer detail screens are not loading via load balancer URL
35443990	HTTPS URL CTR search and list freezes
35400424	Consolidate ECM LP issues on 8123
33887435	BD812-OAT- error in structure in alert details page
33887376	BD812-OAT- error in structure in BD menu page
33885159	BD812-OAT- issue in structure and level/form in login page
33885098	BD812-OAT- issue in structure and level/form in alert search page
34995895	Data is not loading in any grid
35330434	Alignment issue in the UI
35153462	Exception while invoking GETOLDFINALQUERYSTRING method
35130536	Consolidate issues on AAI 8123
35101177	Parameter values not set when navigated from different page
35569465	Indonesian LP - narrative not displayed in related case history

**Others**

<b>Bug ID</b>	<b>Description</b>
36103309	Records per page is 15 but only 13 are displayed in account list grid
35998422	CVE-2023-46604 APACHE ACTIVEMQ
35598249	Consolidated fixes for issues dependent on FCCM release
35320767	Adjustment screens are not loading after applying AAI April CPU on 812 and 8121 versions
35340701	Consolidated fixes for issues found on OFSAAI v8123 post library upgrade
35307360	Consolidated fixes for issues found on OFSAAI v8123

## Process Modelling Framework

Bug ID	Description
36098578	Rule type 2 and rule type 3 metadata is not listed in EST
35976900	Pipelineexecutor.sh does not trigger PMF run
35917230	CVE-2023-2976: GOOGLE GUAVA update to at least 32.0.0
35522397	Rest service JSON data gets altered after parameter resolving
35508660	When executing from wfexecexternal.sh by default going to resumererunabort
35831763	Right click should not be allowed in PMF screen
35386220	Execute API creates instance and does not send emails for notification/task
35335686	Execute API creates instance when wrong process ID is sent for execution
35268827	DT with stored procedure in run pipeline invoked from PMF sends extra parameters
33482286	Build screens for kafka metadata maintenance
31953506	PMF when publishing to MDB should consider the composite key of process_id and activity_id

## Questionnaire

Bug ID	Description
35249913	Not able to view questionnaire details from Evidence tab
34218468	Questionnaire is not working in websphere setup
35546987	Reflected cross site scripting vulnerability in OFSAA application
35660722	Issue in accessing the RFI response page in websphere setup
35258530	Unable to create questions in websphere setup

## Security Management System

Bug ID	Description
36068772	LDAP FIC server dependency removal for dashboard visibility
36067267	System for Cross-domain Identity Management (SCIM)
35999968	8124ML- security configurations to be verified in HTTPS protocol
35766879	8123 ADP: additional popups to be removed
35598502	User administration activity report issues
35526369	User - User group map details are not coming under user group authorization
35503834	8123 websphere setup - preference screen shown invalid request error page
35386191	UI mapping is not as expected for APIs authorize role group and authorize domain group
35384601	Search issue on user maintenance screen
35278955	ESIC batch execution is failing with the LDAP users
35348384	The session not expired after the user password reset from different browsers
35330648	Search issue on user maintenance screen
36022263	Expression for data source exp should be changed to accommodate dot (".") in aai_validator_expression

## Information Domain

Bug ID	Description
35877027	Avoid creating AAI and some other related tables while creating infodom through REST API

### Unified Metadata Manager

Bug ID	Description
<b>Business Metadata Management</b>	
33248973	Client IP, Application server host, DB server host info captured in various log files where as client IP commonly logged in UMM service log file for BMM metadata
35883861	XSS protection in business processor
35282057	OFSAAI 8122: unable to view hierarchy info/mapping info in rule screen
<b>Technical Metadata Management</b>	
36040107	DMT summary - unable to view records in summary
35676016	Data sources pages are accessible without having required function code
35488400	OJET - DMT data mapping description field shows invalid data
35254893	Unable to save PLC definition if there are any special character in the code
35085693	Internal error ORA-21500 with core dump file when T2T failed again after patching 32743561
34763333	DMT - key not found displayed in DMT summary pages for pagination
34742267	DMT - invalid alert on change of load type with empty grid data in 81220

### Workflow Framework

Bug ID	Description
35045830	Timer use case has to be mentioned in PMF guide with the latest feature (order) usage
<b>Activity Registration Interface</b>	
35420401	OFSAAI 8122: unable to import custom workflow

## 1.5 Bugs Fixed and Enhancements in Previous Releases Ported to This Release

The bugs fixed and enhancements in previous release versions that are ported to this release.

### Administration

Bug ID	Description
35225801	Invalid login prompt message shows blank screen when logging with LDAP user.
35790006	Request interception issues found in OFSAA application
35738081	Authentication fail when sending multiple request onboarding
35712097	Role function mappings and unmappings are not working as expected

Bug ID	Description
35415589	User able to login simultaneously from different browsers or machine when multilogin is disabled
<b>Security Management</b>	
35225965	Encountering a dynamic value in the web request which is not generated by the application server
35841755	Unable to receive email on batch failure
<b>SQL Rule</b>	
36052282	SQL rules screen is opening and shortly re-directing to OFSAA login page after 5 seconds

### Advanced Analytics Infrastructure

Bug ID	Description
<b>Modeling</b>	
35569456	FP - while orchestrating process modelling framework process, adding MFMODEL widgets does not display available models for selection

### Big Data Option

Bug ID	Description
34931160	FP- T2H is failing with communication link error
<b>Security Model</b>	
33219596	FP - OFSAAI 8074 submit spark session with LIVY impersonate enabled as true
33219444	OFSAAI 8074 submit spark session with LIVY impersonate enabled as true

### Data Entry Forms and Queries

Bug ID	Description
<b>Data Entry</b>	
35781404	No column values in excel file after exporting from advance search in data entry form

### OJET Framework

Bug ID	Description
35997895	User access control to be handled in Forms framework API
35907174	Date control (type 11) is not working when we enable through field chooser
35884364	Few icons are missing in framework OJET CTR
35842397	All alerts are preloading before filter is applied upon entering alert viewer screen
35959786	Pagination is not working correctly in CTR search and list
35822269	Duplicate involved parties are added when user click multiple times Save button
35822242	Unable to sort any column in any grid from inside a case
35790469	Indonesian LP - narrative not displayed in related case history
35599570	Customer detail screens are not loading via load balancer URL
35735821	Masking is not working in case screens

Bug ID	Description
35583543	Data is not loading in grid if servertime zone is set
35579101	Event details screen is broken after applying 81231 ECM and 81230 AAI patches
35577808	Selected language not getting saved in preferences screen
