This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

1

Preface

This section provides supporting information for Oracle Financial Service Balance Sheet Planning Application Pack (OFS BSP Application Pack) Release Notes.

Topics:

- [Purpose of this Document](#)
- [Intended Audience](#)
- [Access to Oracle Support](#)
- [Related Information Sources](#)
- [Additional Documents to Read](#)

1.1 Purpose of this Document

This document contains release information of OFS BSP Application Pack, Release 8.1.2.0.0.

1.2 Intended Audience

This document is intended for users of OFS BSP Application Pack, Release 8.1.2.0.0.

1.3 Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For more information, visit [My Oracle Support](#) or visit [Oracle Accessibility Learning and Support](#) if you are hearing impaired.

1.4 Related Information Sources

We strive to keep this and all other related documents updated regularly.

Visit the [OHC Documentation Library](#) to download the latest version available there. The list of related documents is provided here.

- OFS Balance Sheet Planning Application Pack Installation and Configuration Guide, Release 8.1.2.0.0
- OFS Balance Sheet Planning System Administrator User Guide, Release 8.1.2.0.0
- OFS Balance Sheet Planning-Planning Administrator and Planning Analyst User Guide, Release 8.1.2.0.0
- OFS Balance Sheet Planning Analytics User Guide Release 8.1.2.0.0
- OFS Balance Sheet Planning Cloning Reference Guide Release 8.1.x
- OFS Balance Sheet Planning Security Guide Release 8.1.x

1.5 Additional Documents to Read

Oracle Financial Services Balance Sheet Planning Application is built on the Oracle Financial Services Advanced Analytical Applications Infrastructure (OFS AAI).

See the following OFS AAI Documents ([OHC Documentation Library](#)) as no separate documents are required at the pack or application level for Oracle Financial Services Balance Sheet Planning Application Pack:

- [OFS Analytical Applications Infrastructure \(OFS AAAI\) Application Pack Installation and Configuration Guide Release 8.1.2.0.0](#)
- [OFS Analytical Applications Infrastructure Administration Guide Release 8.1.x](#)
- [OFS Analytical Applications Infrastructure Cloning Reference Guide Release 8.1.x](#)
- [OFS Analytical Applications Infrastructure Security Guide Release 8.1.x](#)
- [OFS Analytical Applications Infrastructure User Guide Release 8.1.2.0.0](#)

You can access the common document from the OHC Documentation Library:

- [OFS Analytical Applications 8.1.2.0.0 Technology Matrix](#)
- [OFS Data Model Utilities Guide](#)
- [OFS Cash Flow Engine Reference Guide](#)

2

Introduction to Oracle Financial Services Balance Sheet Planning Application Pack

Oracle Financial Services Balance Sheet Planning Application pack includes Oracle Financial Service Analytical Applications Infrastructure and Balance Sheet Planning applications.

- **Oracle Financial Services Analytical Applications Infrastructure:** In today's turbulent markets, financial institutions require a better understanding of their risk-return, while strengthening competitive advantage, and enhancing long-term customer value. Oracle Financial Services Analytical Applications (OFSAA) enables financial institutions to measure and meet the risk-adjusted performance objectives, cultivate a risk management culture through transparency, lower the costs of compliance and regulation, and improve insight into customer behavior.

OFSAA uses industry-leading analytical methods, shared data models, and applications architecture to enable integrated risk management, performance management, customer insight, and compliance management. OFSAA actively incorporates risk into decision making, enables to achieve a consistent view of performance, promotes a transparent risk management culture, and provides pervasive intelligence.

OFSAA delivers a comprehensive, integrated suite of financial services analytical applications for both banking and insurance domains.

- **Oracle Financial Services Balance Sheet Planning:** The Oracle Financial Services Balance Sheet Planning application is a packaged web-based application built on top of Oracle Financial Services Advanced Analytical Applications Infrastructure (OFS AAI). It is designed to enable financial institutions to budget or forecast a full balance sheet and associated interest income and interest expense. The provision of balance sheet and net interest margin planning capability, when combined with a complimentary fee and expense planning solution such as Oracle's Enterprise Planning and Budgeting cloud service, results in a complete and comprehensive planning solution for financial institutions. The high-level features of Balance Sheet Planning include:
 - Calculation of future projected cash flows for balance sheet products, including output of comprehensive balance, interest income/expense and interest rate data elements.
 - The output of cash flow data for the current book of business separate from future new business volume cash flows, with aggregation to total balance sheet account level.
 - Provision of broad balance sheet product support.
 - Creation of budgets or forecasts in denominated and/or functional currencies.
 - Employment of market interest rate based pricing, where new add volumes and repricing balances are priced at spreads to market interest rate indices.
 - Provision of funds transfer pricing capabilities, integrating with and leveraging the existing Oracle Financial Services Funds Transfer Pricing engine. This functionality includes a full set of cash flow and non-cash flow-based Transfer Pricing methodologies, as well as the ability to generate transfer pricing adjustments such as liquidity premiums, pricing incentives, and other.

- Fully integrated with other OFSAA EPM applications.

 **Note:**

Release v8.1.2.0.0 of OFS BSP is not certified for AIX and Solaris x86 Operating Systems. If you are currently running OFSAA v8.0.x on AIX or Solaris x86 Operating Systems, then you must migrate from AIX or Solaris x86 to Linux or Solaris Spark. See the [MOS Doc ID 2700084.1](#) for details.

3

Oracle Financial Services Balance Sheet Planning

This chapter includes the following topics:

- [New Features](#)
- [Bugs Fixed in this Release](#)
- [Known Issues/Limitations in this Release](#)

3.1 New Features

Following is the list of new features incorporated in this release.

1. **Stratification Support for Partial Aggregation:** Stratification Engine now supports Partial Aggregation. If Customers want to aggregate the accounts falling only under Tier criteria but want to move left over accounts as is from source to destination table without aggregation, they can do the same. Also, a new check-box (Apply Column Mapping for Non Aggregated Accounts) is introduced to choose to apply column mapping given in the Aggregation tab or not.
2. **Non-Maturity Model:** User selects a projection period over which current balance will be decaying and eventually become zero. Sometime, at the end of projection period there is some left over balance, calculations are enhanced to account for this left over balance as well, while calculating instrument's weighted average life.

3.2 Bugs Fixed in this Release

There are no fixed bugs in this release.

3.3 Known Issues/Limitations in this Release

There are no known issues or limitations in this release of the OFS Balance Sheet Planning Application.

4

Oracle Financial Services Analytical Applications Infrastructure

See the [Oracle Financial Services Advanced Analytical Applications Infrastructure Application Pack Readme file](#) for the details on the New Features, List of Bugs Fixed, and Known Issues and Limitations.

5

Hardware and Software Tech Stack Details

The hardware and software combinations required for OFS AAI 8.1.2.0.0 are available at [OFS Analytical Applications Technology Matrix](#).

6

Licensing Information

For details on the third party software tool used, see the [OFSAA Licensing Information User Manual Release 8.1.2.0.0](#).
