This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

## Introduction to OFS Loan Loss Forecasting and Provisioning Application Pack

In today's turbulent markets, financial institutions require a better understanding of their risk-return, while strengthening competitive advantage and enhancing long-term customer value. Oracle Financial Services Analytical Applications (OFSAA) enable financial institutions to measure and meet risk-adjusted performance objectives, cultivate a risk management culture through transparency, lower the costs of compliance and regulation, and improve insight into customer behavior.

OFSAA uses industry-leading analytical methods, shared data models, and applications architecture to enable integrated risk management, performance management, customer insight, and compliance management. OFSAA actively incorporates risk into decision making, enables to achieve a consistent view of performance, promote a transparent risk management culture, and provide pervasive intelligence.

Oracle Financial Services Analytical Applications delivers a comprehensive, integrated suite of financial services analytical applications for both banking and insurance domains.

## OFS Loan Loss Forecasting and Provisioning Application Pack (OFS LLFP) Release

Oracle Insurance Accounting Analyzer v8.1.2.10.0 Maintenance Level (ML) release includes all the bug fixes and minor enhancements since the previous release v8.1.2.9.0.

### Pre Installation Requirements

The prerequisites are as follows:

- OFS AAI 8.1.2.5.0 must be installed.
- The minimum patch set level must be 8.1.2.0.0.

For more information on the OFS AAI requirements, see OFS Advanced Analytical Applications Infrastructure Application Pack 8.1.2.0.0 Release Notes in [OHC Documentation Library](#).

### Installing this Maintenance Level Release

#### Installing this Maintenance Level Release

To install this Maintenance Level Release, follow these steps:

1. Login to [My Oracle Support](#) and search for **39039315** under the **Patches & Updates** tab.
2. Download the latest Erwin data model **39192644** patch.
3. Download the archive file and copy it to your OFSAA server in Binary mode.

#### Note

There are different archive files for different operating systems such as Solaris, and RHEL/OEL.

4. Stop all the OFSAAI Services. For more information, see the Start/Stop Infrastructure Services section in [OFS LLFP 8.1.2.0.0 Installation Guide](#).
5. Login to the OFSAA Server as a non-root user and navigate to the \$FIC\_HOME folder.
6. Assign WRITE permission to the file/folders such as common scripts, EXEWebService, ficapp, and ficweb, and find them in the \$FIC\_HOME folder by executing the command:  

```
chmod -R 775 *
```
7. If you have to Unzip utility, skip to the next step or download the Unzip utility (OS-specific) and copy it in Binary mode to the directory that is included in your PATH variable, typically \$HOME path or directory in which you have copied the 8.1.2.10.0 ML.
  - Uncompress the unzip installer file using the command:  

```
uncompress unzip_<os>.Z
```

**Note**

If you notice an error message "*uncompress: not found [No such file or directory]*" when the package is not installed, contact your UNIX administrator.

8. Give EXECUTE permission to the utility by using the command:  
`chmod 751 unzip_<os>`
9. Extract the contents of the 8.1.2.10.0 ML archive file by using either of the following commands:  
`unzip <name of the file to be unzipped>`
10. Update the configuration file `params.conf` file present in the `OFS_LLFP_PACK/appsLibConfig/conf` folder before triggering the installation. The update instructions are present in this file itself.  
In case of customized Data Model Upload, then update the `params.conf` file present in the `OFS_LLFP_PACK/appsLibConfig/conf` folder accordingly.
11. Give EXECUTE permission to the ML Patch Installer Script. Navigate to the `OFS_AAI` directory and execute the command:  
`chmod 755 OFSAAIUpdate.sh`
12. Execute the following command:  
`./OFSAAIUpdate.sh`
13. Verify if the ML is applied successfully by checking the log files generated in `OFS_LLFP_PACK/OFS_LLFP_PACK/logs` directories. You must also verify the Data Model logs, the path can be found in the `silent.props` file of the release `v8.1.2.0.0` file. You can ignore `ORA-00001` and `ORA-02292` in the log file. In case of any other errors, contact [My Oracle Support](#).
14. After successful installation of the ML, perform the following steps:
  - Clear the Application Cache. Navigate to the following path depending on the configured Web Application Server and delete the files.
    - a. **Tomcat:** `<Tomcat installation folder>/work/Catalina/localhost/<Application name>/org/apache/jsp`
    - b. **Weblogic:** `<Weblogic installation location>/domains/<Domain name>/servers/<Server name>/tmp/_WL_user/<Application name>`
    - c. **Websphere:** `<Websphere installation directory>/AppServer/profiles/<Profile name>/temp/<Node name>/server1/<Application name>/<.war file name>`
15. Delete the existing EAR/WAR file available in the folder `$FIC_HOME/ficweb`.
16. Generate the application EAR/WAR file and redeploy the application onto your configured Web Application Server. For more information on generating and deploying the EAR/ WAR file, see [Create and Deploy the EAR or WAR Files](#) in OFS AAI Release 8.1.2.0.0 Installation and Configuration Guide.
17. Restart all the OFSAAI Services. For more information, refer to the [Start/Stop Infrastructure Services](#) section in OFS AAI Release 8.1.2.0.0 Installation and Configuration Guide.

## Post Installation Configurations

This section provides information on the post-installation configurations.
