This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Conventions

The following text conventions are used in this document.

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

2

Introduction to OFS Profitability Management Pack

In today's turbulent markets, financial institutions require a better understanding of their risk-return, while strengthening competitive advantage, and enhancing long-term customer value. Oracle Financial Services Analytical Applications (OFSAA) enables financial institutions to measure and meet the risk-adjusted performance objectives, cultivate a risk management culture through transparency, lower the costs of compliance and regulation, and improve insight into customer behavior.

OFSAA uses industry-leading analytical methods, shared data models, and applications architecture to enable integrated risk management, performance management, customer insight, and compliance management. OFSAA actively incorporates risk into decision making, enables to achieve a consistent view of performance, promotes a transparent risk management culture, and provides pervasive intelligence.

OFSAA delivers a comprehensive, integrated suite of financial services analytical applications for both banking and insurance domains.

OFS Profitability Management (OFS PAM) pack includes the following applications.

- **Oracle Financial Services Analytical Applications Infrastructure:** Provides the pre-requisite foundation services required to run all OFSAA applications including user and security management, object administration, and other foundational level services.
- **Oracle Financial Services Profitability Management:** Helps Banks and Financial services institutions measure and manage profitability at the lowest level of detail, the account level, allowing for a rollup of profitability results across any dimension including customer, channel, product, or organizational unit. The application provides robust allocation functionality supporting both top-down and bottom-up allocation methodologies.

See the subsequent chapters to know more about this release.

Note:

Release v8.1.2.5.0 of OFS PFT Application Pack is not certified for AIX and Solaris x86 Operating Systems. If you are currently running OFSAA v8.0.x on AIX or Solaris x86 Operating Systems, then you must migrate from AIX or Solaris x86 to Linux or Solaris Spark. See the [MOS Doc ID 2700084.1](#) for details.

3

Oracle Financial Services Profitability Management Application

This chapter describes the new features, bugs addressed, and known issues in this release of OFS Profitability Management.

- [New Features in this Release](#)
- [Bugs Fixed in this Release](#)
- [Known Issues and Limitations in this Release](#)

3.1 New Features in this Release

The following is the new features in this release.

Oracle Linux compatibility: Support for Oracle Linux 9 Server is included from this release onwards.

3.2 Bugs Fixed in this Release

The list of bugs fixed as part of this maintenance release is as follows:

Table 3-1 List of Bugs Fixed for OFS Profitability Management Application

Sl. No.	Bug ID	Bug Description
1	36881685	GTT creation fails when same Allocation Rule is triggered in parallel for different As-of-Dates.
2	35864331	Performance enhancements to Allocation Global Temp Table (GTT).
3	35130637	Uniform allocation distribution doesn't include the month in driver.
4	34351339	Functional balance and entered balance from Allocation Rule are reversed.
5	33248073	Undo utility is failing the GL load "external" load undo.
6	37019599	Factor operator is not getting applied on the source in dynamic Driver Rule for YTD_AMOUNT macro.
7	36394051	F/W port bug for Bug 35175773 - Entered balance and functional balance are reversed for Static Driver Allocation.
8	36153279	Why is parallel DML disabled which causes Allocation Rule to not run in parallel and take longer to complete?
9	33002890	Help section of OFSAA 8.1 contains snapshots which are snapshot of OFSAA 8.0.x series.
10	34114772	Place holder bug for one-off patch 8.1.1.1.3.
11	33684761	Improve performance of loading the Allocation definition screen.

Table 3-1 (Cont.) List of Bugs Fixed for OFS Profitability Management Application

Sl. No.	Bug ID	Bug Description
12	34943316	Import function(update the values of the drivers) not working for custom FE with "," inside FE description.
13	33646960	Improper handling of error when searching in rules screens in PFT.
14	37504785	Static Table Driver does not allow to move to next page after adding a COA.
15	37479490	Insurance Profitability object migration issues.

3.3 Known Issues and Limitations in this Release

There are no known issues or limitations in this release of the OFS Profitability Management Application.
