This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Description

Learn about the Oracle Financial Services Compliance Regulatory Reporting v8.1.2.0.0 Minor Release.

Oracle Financial Services Compliance Regulatory Reporting (OFS CRR) is a separately licensed product.

Description

Oracle Financial Services Compliance Regulatory Reporting v8.1.2.0.0 Minor Release #10 8.1.2.10.0 (ID 37766307).

This OFS CRR Application Pack release is cumulative of all enhancements and bug fixes since the v8.1.2.0.0 release.

Prerequisites

Refer to the following prerequisites:

- Before applying OFS CRR v8.1.2.10.0, it is required to install OFS CRR v8.1.2.0.0. For detailed instructions on installing this OFSCRR Release, see [OFSCRR Application Pack Installation Guide 8.1.2.0.0](#).

How to Apply This Patch

For detailed instructions on installing the OFS CRR 8.1.2.10.0 release, see the [OFS CRR ML Installation Guide](#).

About this Release

Learn more about Oracle Financial Services Compliance Regulatory Reporting Application Pack v8.1.2.10.0.

This section describes the new features, bugs addressed, and known issues in this release of OFS Compliance Regulatory Reporting.

- [New Features](#)
- [Bugs Fixed in This Release](#)
- [Known Issues](#)

2.1 New Features

New, changed, and deprecated features of OFS CRR are described, with pointers to additional information.

The following list describes new features and enhancements for OFS CRR Release 8.1.2.10.0:

- **ECM Milestone:** Updating ECM milestone actions through a web service call. CRR will send feedback on any milestone changes to the ECM audit history. This integration covers all three templates: US SAR, CA-STR, and goAML. Implementing this change as a web service allows ECM investigators to view the current status of a SAR-filed report in real time.
- **Configuring Actions using PMF:** In CRR, action buttons are managed through Process Management Framework (PMF) configurations. Administrators can define which actions are available at each workflow stage by adjusting the PMF settings. This dynamic display helps streamline the user experience, enforces process compliance, and ensures that actions align with organizational policies.
- **Multi Template Support:** This enhancement allows institutions to configure and manage multiple templates—such as CA-STR, goAML, and US SAR—within a single CRR instance. The solution ensures that template-specific metadata is maintained separately, preventing any overlap or conflicts between templates.

2.2 Bugs Fixed in This Release

This section describes the issues which were resolved in this release.

The following bugs have been addressed in OFS CRR Release 8.1.2.10.0.

Table 2-1 Resolved Issues

Bug ID	Description
38351057	goAML – Posted Report: Approve Button Not Visible- It has been observed that, in the goAML module, the "Approve" button is not visible on reports that have already been posted. As a result, users are unable to take further approval actions on these posted reports.
38288965	POP Wallet Setup: goAML Posting Not Working- During the POP Wallet setup, an issue has been identified where the posting to goAML is not functioning as expected
38280716	Multiple Templates Support Not Working as Expected - An issue has been identified where the functionality for supporting multiple templates is not operating as intended. This feature is designed to allow institutions to configure and manage several reporting templates—such as CA-STR, goAML, and US SAR
38233703	ECM Milestones for CA-STR: Duplicate Multiple Entries Issue-It has been observed that the ECM (Enterprise Case Management) milestones for CA-STR (Canadian Suspicious Transaction Report) are showing duplicate or multiple entries for the same milestone event.
38221540	Unable to Save WebConfiguration in RRADMN for POP WebService-There is an issue where users are unable to save the WebConfiguration settings for the POP WebService within the RRADMN (Risk and Reporting Administration) interface.
38186610	SAR Reports Are Not Getting Approved After Applying ECM Milestones - An issue has been identified where Suspicious Activity Reports (SARs) are not moving to an approved state after the application of ECM (Enterprise Case Management) milestones.
38029877	SAR Reports Are Not Getting Approved Properly Due to Package (PKG_RRCA_SAVE) Failure in Data Model During Forward Port from 8128 to 81210 -An issue has been encountered during the forward porting process from version 8128 to 81210, where the approval of Suspicious Activity Reports (SAR) is failing. The root cause appears to be the failure of the database package PKG_RRCA_SAVE within the data model. As a result, SAR reports are not moving into an approved status as expected after workflow actions are performed.

2.3 Known Issues

Learn about the issues you may encounter and how to work around them.

There are no known issues/limitations in OFS CRR Release 8.1.2.10.0.
