Simulate Deal	Used to perform different types of simulation based on the pricing and commitments of the price item to determine the best price that can be offered to the clients as per their requirements.
Check Limits	Used to execute the price item ceil and floor validation for an approver as per the limits set on the price item screen.
	Note: The **Check Limits** is run only for the price items which are in the **Pending for Approval** or **Error** status after the **Pricing Simulation** is executed. The **Check Limits** button is activated when the **Price Item Approval Required** option is set to **Yes** in the **Deal Type** using which the deal is created.
Send Deal for Approval	Used to move the deal from the current role to the next role of the next level in the approval hierarchy for approval.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Button Name	Button Description
	Note: On clicking the **Send Deal for Approval** button, a To Do notification is created for the users of the next level to indicate that approval of the deal is required. A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed. This button is activated after **Pricing Simulation** is completed for the deal and if the **Approve Deal** option is set to **Yes** for the approver in the **Approval Hierarchy** of the **Deal Approval Profile**.
Approve Deal	Used to approve the deal. To approve a deal the following conditions should be met: • All the price items should be in the **Approved** status if the **Price Item Approval Required** option is set to **Yes** in the **Deal Type** used for creating the deal. • All the division level approvals must be completed if the **Division Level Approval Required** field is set to **Yes** in the **Deal Type** used for creating the deal. • All the product level approvals must be completed if the **Product Level Approval Required** field is set to **Yes** in the **Deal Type** used for creating the deal. • The deal should be in the **Ready for Approval** status for the approver to initiate the deal approval process. **Note:** The **Approve Deal** button is activated only when the deal is in the **Ready for Approval** status and the **Approve Deal** option is set to **Yes** for the approver in the **Approval Hierarchy** of the **Deal Approval Profile**. **Note:** An email notification is sent to the users in the approval hierarchy for approving the deal once the deal is in the **Ready for Approval** status
Return to Submitter	Used to move the deal from the current role to the previous role of the previous level in the approval hierarchy for approval. It is also used to send the deal to the relationship manager for approval if you have recommended a new pricing for the price item. **Note:** On clicking the **Return to Submitter** button, a To Do notification is created for the users of the previous level to indicate that the deal is returned for approval. A To Do is also created for the deal creator to indicate that the ownership of the deal has changed.
Finalize Deal	Used to finalize the deal so that it is ready to be presented to the customer for approval.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Button Name	Button Description
	Note: This button is activated when the deal is in the **Approved** status. **Tip:** You can also finalize a deal by clicking the **Finalize** ( ) icon in the **Finalize Deal** column corresponding to the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
Accept Deal	Used to accept the deal in the system after receiving confirmation of acceptance from the customer. **Note:** This button is activated only when the deal is in the **Finalized** status. **Tip:** You can also accept a deal by clicking the **Accept** ( ) icon in the **Accept Deal** column corresponding to the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
Reject Deal	Used to reject the deal in the system after receiving confirmation of rejection from the customer. **Note:** This button is activated only when the deal is in the **Finalized** status. **Tip:** You can also reject a deal by clicking the **Reject** ( ) icon in the **Reject Deal** column corresponding to the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
Create Deal Version	Used to create a deal version for the existing deal to optimize the deal pricing process and to make better pricing decisions. **Note:** You can add a new deal version to a deal even if the version of any deal version of a deal is in the **Finalized** status and the status of the deal is **Pending for Approval** or **Approved**.
Discard Deal	Used to discard the deal. **Note:** You cannot discard a deal if it has reached the **Finalized** status.
Print Deal	Used to extract relevant information about the deal in the pdf or excel format which is published either to the customer for receiving approvals or for internal reviews and validations.
Apply Back	Used to activate the proposed pricelist assignments, overridden pricing, and product enrollments for the existing customer or account in the system.
Download	Used to download the consolidated pricing and commitments of the entities in a deal. **Note:** This button is enabled only when the user has access to the **C1_DEALDWLDUPLD** application service.
Upload	Used to upload the consolidated pricing and commitments of the entities in a deal.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Button Name	Button Description
	Note: This button is enabled only when the user has access to the **C1_DEALDWLDUPLD** application service.
Previous	Used to view information about the previous status of the deal.

In addition, the **Deal Information** zone header area contains the following links:

Link Name	Link Description
Terms and Conditions	Used to associate, disassociate, edit, or view the deal terms and conditions. It is also used to add adhoc terms and conditions for the deal.
Deal Log	Used to view the complete trail of actions performed on the deal. It also allows you to manually add a log entry for the deal.
Deal Version Log	Used to view the complete trail of actions performed on the deal version. It also allows you to manually add a log entry for the deal version.
Adhoc Revenue and Cost	Used to add, edit, delete, or view additional charges that are applicable for the deal while deal creation.

Deal Information

The **Deal Information** section allows you to view the details of the deal or the deal version. It contains the following fields:

Field Name	Field Description
Division	Indicates the division with which the deal is associated.
Deal Type	Indicates the deal type using which the deal is created in the system.
Review Date	Displays the date which is scheduled for calculating the deal usage as per the commitments made by the customer.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	Note: This field is populated when the deal has reached the **Full Orchestrated** status.
Deal Version Information	Displays the concatenated string of information about the deal version separated by a comma (,).
Access Group	Indicates the group of users who can view and edit the details of the entity (i.e. the customer, account, or prospect person) for which the deal is created.
Review Frequency	Indicates the duration for which the deal is monitored to calculate the usage of the deal as per the commitments made by the customer.
Effective Start Date	Displays the date from when the deal is effective for the entity (i.e. the customer, account, or prospect person). **Note:** This field is populated when the deal has reached the **Customer Accepted** status.
Deal Description	Displays the description of the deal.
Customer Segment	Displays the business component to which the entity (i.e. the customer, account, or prospect person) belongs.
Creation Date	Displays the date when the deal is created in the system.
Effective End Date	Displays the date till when the deal is effective for the entity (i.e. the customer, account, or prospect person). **Note:** This field is populated when the deal has reached the **Customer Accepted** status.
Customer Tier	Indicates the customer tier of the customer segment to which the entity (i.e. the customer, account, or prospect person) belongs.
Start Date	Displays the date from when the price list, price assignment, and price item pricing is available for the deal.
Acceptance Date	Displays the date when the customer has reviewed and accepted the deal. **Note:** This field is populated when the deal has reached the **Customer Accepted** status. If the **Deal Status** is **Rejected** then the **Acceptance Date** specifies the date when the deal is rejected by the customer.
Deal Currency	Indicates the currency in which the financial summary and profitability is calculated for the deal.
End Date	Displays the date till when the price list and price assignment is available for the deal.
Finalized Date	Displays the date when the deal is finalized in the system.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	Note: This field is populated when the deal has reached the **Customer Accepted** status.
Simulation Type	Indicates the simulation type using which the financial summary and profitability is calculated for the deal. The valid values are: • Account • Customer • Deal
Usage Period	Indicates the period for which you want to aggregate the deal data to determine the scope of the deal. The valid values are: • Biannually • Monthly • Quarterly • Yearly
Deal Frequency	Indicates the duration in which you want to simulate the deal for calculating the financial summary and deal profitability. The valid values are: • Biannually • Monthly • Quarterly • Yearly

In addition, the **Deal Information** section header area contains the following fields:

Field Name	Field Description
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).
Deal Status	Indicates the current status of the deal. The valid values are: • Applied/Processed • Approved • Closed • Customer Accepted • Discarded • Draft • Error • Finalized • Fully Orchestrated • Hierarchy Creation Deferred • Inactive • Orchestration Deferred • Partially Orchestrated • Pending for Approval • Pending for Review • Pending Simulation • Pending for Orchestration • Person Simulation Deferred

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	• Ready for Approval • Rejected • Simulated • Simulation Deferred
Deal Version Status	Indicates the status of the deal version.

Deal Financial Summary

The **Deal Financial Summary** section displays the financial summary at the deal level. It contains the following columns:

Column Name	Column Description
Revenue	Displays the revenue generated from the proposed, original, standard, and recommended price item pricing and commitments at the deal level. **Note:** The revenue generated from the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The revenue generated from the recommended pricing appears only when there is a recommended pricing defined for the price item. If division level approval is required, then, the revenue includes the sum of revenues calculated at each division level.
Cost	Displays the proposed, original, standard, and recommended cost calculated at the deal level. **Note:** The cost calculated from the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The cost calculated from the recommended pricing appears only when there is a recommended pricing defined for the price item. The cost includes the total price item cost and the adhoc cost. If division level approval is required, then, the cost includes the sum of costs calculated at each division level.
Profit	Displays the profit generated from the proposed, original, standard, and recommended price item pricing and commitments at the deal level. It is calculated using the following formula: Profit = Revenue - Cost

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: The profit generated from the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The profit generated from the recommended pricing appears only when there is a recommended pricing defined for the price item. If division level approval is required, then, the profit includes the sum of profits calculated at each division level.
Profitability (%)	Displays the profit percentage calculated for the proposed, original, standard, and recommended price item pricing and commitments at the deal level. It is calculated using the following formula: Profitability % = (Revenue - Cost)*100/ Revenue
	Note: The profitability calculated for the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The profitability calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.
Revenue Variation (%)	Displays the difference of revenue variation percentage calculated for the proposed, original, standard, and recommended price item pricing and commitments at the deal level. It is calculated using the following formula: Revenue Variation (%) = (Proposed Revenue - Original Revenue)*100/ Original Revenue
	Note: The revenue variation calculated for the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The revenue variation calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item. The **Green Arrow** ( ) or the **Red Arrow** ( ) corresponding to the revenue variation (%) indicates whether there is an increase or decrease in the revenue variation (%) respectively.
Profit Variation (%)	Displays the difference of profit variation percentage calculated from the proposed, original, standard, and recommended price item pricing and commitments at the deal level. It is calculated using the following formula: Profit Variation (%) = (Proposed Profit - Original Profit)*100/ Original Profit

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: The profit variation calculated for the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. It is calculated using the following formula: Standard Pricing Profit Variation (%) = (Standard Profit - Original Profit)*100/ Original Profit The profit variation calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item. The **Green Arrow** ( ) or the **Red Arrow** ( ) corresponding to the profit variation (%) indicates whether there is an increase or decrease in the profit variation (%) respectively.

Note:

Alternatively, you can also view the proposed statistic of the deal financial summary in the header area of this section.

The system highlights the cells of the deal financial summary in green color if the proposed statistic is within the range of the deal creator or the approver. Whereas, the system highlights the cells of the deal financial summary in red color if the proposed statistic is not within the range of the deal creator or the approver.

The data in the **Deal Financial Summary** sections appears when the deal has reached the **Simulated** status.

Division Financial Summary

The **Division Financial Summary** section displays the financial summary at the division level. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the financial summary is displayed.
Approval Status	Indicates the current approval status of the financial summary at the division level.
Revenue	Displays the revenue generated from the proposed, original, standard, and recommended price item pricing and commitments at the division level.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: The revenue generated from the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The revenue generated from the recommended pricing appears only when there is a recommended pricing defined for the price item.
Cost	Displays the proposed, original, standard, and recommended cost calculated at the division level.
	Note: The cost calculated from the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The cost calculated from the recommended pricing appears only when there is a recommended pricing defined for the price item. The cost includes the total price item cost and the adhoc cost.
Profit	Displays the profit generated from the proposed, original, standard, and recommended price item pricing and commitments at the division level. It is calculated using the following formula: Profit = Revenue - Cost
	Note: The profit generated from the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The profit generated from the recommended pricing appears only when there is a recommended pricing defined for the price item.
Profitability (%)	Displays the profit percentage calculated for the proposed, original, standard, and recommended price item pricing and commitments at the division level. It is calculated using the following formula: Profitability % = (Revenue - Cost)*100/ Revenue
	Note: The profitability calculated for the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The profitability calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.
Revenue Variation (%)	Displays the difference of revenue variation percentage calculated for the proposed, original, standard, and recommended price item pricing and commitments at the division level. It is calculated using the following formula:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Revenue Variation (%) = (Proposed Revenue - Original Revenue)*100/ Original Revenue
	Note: The revenue variation calculated for the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The revenue variation calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item. The **Green Arrow** ( ) or the **Red Arrow** ( ) corresponding to the revenue variation (%) indicates whether there is an increase or decrease in the revenue variation (%) respectively.
Profit Variation (%)	Displays the difference of profit variation percentage calculated from the proposed, original, standard, and recommended price item pricing and commitments at the division level. It is calculated using the following formula: Profit Variation (%) = (Proposed Profit - Original Profit)*100/ Original Profit
	Note: The profit variation calculated for the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. It is calculated using the following formula: Standard Pricing Profit Variation (%) = (Standard Profit - Original Profit)*100/ Original Profit The profit variation calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item. The **Green Arrow** ( ) or the **Red Arrow** ( ) corresponding to the profit variation (%) indicates whether there is an increase or decrease in the profit variation (%) respectively.

Note:

The system highlights the cells of the division financial summary in green color if the proposed statistic is within the range of the deal creator or the approver. Whereas, the system highlights the cells of the division financial summary in red color if the proposed statistic is not within the range of the deal creator or the approver.

The **Division Financial Summary** section appears in the **Deal Information** zone when the **Division Level Approval Required** field is set to **Yes** in the **Deal Type** using which the deal is created in the system.

The data in the **Division Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the division financial summary is displayed in the deal currency. You can view the division financial summary in the division currency by clicking the toggle switch towards **Division Currency** available in the header area of this section.

Entity Hierarchy

The **Entity Hierarchy** section allows you to do the following:

- View the deal financial summary
- View the division financial summary
- View the product financial summary
- View the customer hierarchy
- View the assigned price lists of a person or account
- View the proposed price list assignments of a person or account
- View the enrolled products for an account
- View the proposed product enrollments for an account
- View the pricing and commitment details of a person or account
- View the division financial summary in the division currency
- View the product financial summary in the division currency
- View the revenue and cost in the division or account currency

The **Simulation Details** zone contains the following sections:

Copyright © 2009, 2025, Oracle and/or its affiliates.

- **Symbol Legends** - Indicates the symbols used to identify the current status of the deal level, division level, and product level financial summary. It also differentiates the existing, proposed and recommended pricing statistics. It contains the following symbols:

Symbol Name	Symbol Description
IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is within the limits defined for the user for approval.
NOT IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is not within the limits defined for the user for approval.
PROJECTED	Indicates the revenue, cost, and profit generated from the proposed price item pricing and price assignments.
RECOMMENDED	Indicates the revenue, cost, and profit generated from the recommended price item pricing and price assignments.
ORIGINAL	Indicates the revenue, cost, and profit generated from the existing price item pricing and price assignments.
APPROVED	Indicates whether the deal level, division level, or product level financial summary is approved or not.
PENDING FOR APPROVAL	Indicates that the approval for deal level, division level, or product level financial summary is pending.

- **Deal Financial Summary** - Displays the financial summary at the deal level. It contains the following columns:

Column Name	Column Description
Approval Status	Indicates the current approval status of the financial summary at the deal level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the deal level. **Note:** If division level approval is required, then the revenue includes the sum of revenues calculated at each division level.
Cost	Displays the proposed, recommended, and original cost calculated at the deal level. **Note:** The cost includes the total price item cost and the adhoc cost. If division level approval is required, then the cost includes the sum of costs calculated at each division level.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the deal level. It is calculated using the following formula: Profit = Revenue - Cost

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: If division level approval is required, then the profit includes the sum of profits calculated at each division level.
Profitability (%)	Displays the proposed, recommended, and original profit created in percentage at the deal level from the price item pricing and price assignments. It is calculated using the following formula: Profitability % = (Revenue - Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the deal level. It is calculated using the following formula: Profit Variation (%) = (Proposed Profit - Original Profit)*100/ Original Profit

Note: The data in the **Deal Financial Summary** sections appears when the deal has reached the **Simulated** status.

- **Division Financial Summary** - Displays the financial summary at the division level. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the financial summary is displayed.
Approval Status	Indicates the current approval status of the financial summary at the division level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the division level.
Cost	Displays the proposed, recommended, and original cost calculated at the division level.
	Note: The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the division level. It is calculated using the following formula: Profit = Revenue - Cost
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage at the division level from the price item pricing and price assignments. It is calculated using the following formula: Profitability % = (Revenue - Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the division level. It is calculated using the following formula:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Profit Variation (%) = (Proposed Profit - Original Profit)*100/ Original Profit

Note:

The **Division Financial Summary** sections appears in the **Simulation Details** zone when the **Division Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Division Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the division financial summary is displayed in the deal currency. You can view the division financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Product Financial Summary** - Displays the financial summary at the product level. It contains the following columns:

Column Name	Column Description
Product	Indicates the product whose financial summary is displayed.
Division	Indicates the division to which the product belongs.
Approval Status	Indicates the current approval status of the financial summary at the product level.
Revenue	Displays the proposed, recommended, and original revenue generated from the product.
Cost	Displays the proposed, recommended, and original cost calculated for the product. **Note:** The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the product level. It is calculated using the following formula: Profit = Revenue - Cost
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage from the price item pricing and price assignments at the product level . It is calculated using the following formula: Profitability % = (Revenue - Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the product level. It is calculated using the following formula:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Profit Variation (%) = (Proposed Profit - Original Profit)*100/ Original Profit

Note:

The **Product Financial Summary** sections appears in the **Simulation Details** zone when the **Product Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Product Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the product financial summary is displayed in the deal currency. You can view the product financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Customer Hierarchy** - Indicates the main customer and its associated accounts as well as the child persons and its accounts that are associated with the main customer. It also enables you to do the following:
  - View and edit the pricing and commitments at the person and account level
  - View the revenue variation from the proposed and original pricing and commitments
  - View the proposed price lists of a person or account
  - Assign proposed price list to a person or account
  - View the enrolled products of an account
  - Enroll accounts for a product
  - View the original price list of a person or account
  - View the original enrolled products for an account
  - View the proposed or the original revenue and cost generated at the person an account level.

  The **Customer Hierarchy** section contains the following columns:

Column Name	Column Description
Person Name	Indicates the main customer and its related persons and accounts.
Division	Indicates the division to which the main customer and it related persons and accounts are associated.
Pricing and Commitments	On clicking the **Edit** (✎) icon in the **Pricing and Commitments** column corresponding to a person or account in the hierarchy, the **Pricing and Commitments** screen appears where you can view and edit the pricing and commitments of the price items for the respective person or account. **Note:** You cannot edit the pricing or commitments of the price items if the deal has reached the **Finalized** status.
Status	Indicates the approval status of the price item pricing and price assignments for the respective person or account.
Revenue Variation (%)	Displays the average revenue generated from a customer or account in percentage. It is calculated using the following formula: Revenue Variation (%) = (Proposed Revenue - Original Revenue)*100/Original Revenue.
Price List Assignment	On clicking the **Edit** (✎) icon in the **Price List Assignment** column corresponding to a person or account in the hierarchy, the **Price List Assignment** screen appears where you can view and assign proposed price list to the respective person or account.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: You cannot assign proposed price list to the person or account if the deal has reached the **Finalized** status.
Product Enrollment	On clicking the **Edit** (✎) icon in the **Product Enrollment** column corresponding to the person or account in the hierarchy, the **Product Enrollment** screen appears where you can view or enroll the respective account or accounts of the customer for a product. You can also view a list of recommended products for which you want to enroll the account or accounts of the customer. The recommended products appear in the **Product Enrollment** screen when you add products in the **Recommended Products** section while defining a deal. **Note:** You cannot enroll an account for a product if the deal has reached the **Finalized** status.
Price Item Group Selection	On clicking the **Edit** (✎) icon in the **Price Item Group Selection** column corresponding to the main person in the hierarchy, the **Select Price Item Group** screen appears where you can select and/or deselect the price items and/or hierarchy entities based on which you want to simulate the deal.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the proposed price item pricing and commitments.
Cost	Indicates the sum of the proposed costs from all accounts under the customer. **Note:** If the person is a parent customer, then the sum of the proposed costs of all the child customers is considered.
Pricelist	On clicking the **View** ( ) icon in the **Price List** column corresponding to the person or account in the hierarchy, the **Price List Assignment** screen appears where you can view the original price list assigned to the respective person or account.
Product	On clicking the **Edit** (✎) icon in the **Product** column corresponding to the person or account in the hierarchy, the **Product Enrollment** screen appears where you can view the products to which the account is already enrolled.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the original price item pricing and commitments.
Cost	Indicates the sum of the original costs from all accounts under the customer. **Note:** If the person is a parent customer, then the sum of the original costs of all the child customers is considered.

Note: The system also considers the prospect persons and prospect accounts associated with the main customer along with the child and grandchild persons and their accounts in the customer hierarchy.

In addition, the **Simulation Details** zone contains the following buttons:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Button Name	Button Description
Deal Pricing and Commitments	Used to define the consolidated pricing and commitments for the customers or accounts in a deal.
Simulate Deal	Used to perform different types of simulation based on the pricing and commitments of the price item to determine the best price that can be offered to the clients as per their requirements.
Check Limits	Used to execute the price item ceil and floor validation for an approver as per the limits set on the price item screen. **Note:** The **Check Limits** is run only for the price items which are in the **Pending for Approval** or **Error** status after the **Pricing Simulation** is executed. The **Check Limits** button is activated when the **Price Item Approval Required** option is set to **Yes** in the **Deal Type** using which the deal is created.
Send Deal for Approval	Used to move the deal from the current role to the next role of the next level in the approval hierarchy for approval. **Note:** On clicking the **Send Deal for Approval** button, a To Do notification is created for the users of the next level to indicate that approval of the deal is required. A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed. This button is activated after **Pricing Simulation** is completed for the deal and if the **Approve Deal** option is set to **Yes** for the approver in the **Approval Hierarchy** of the **Deal Approval Profile**.
Approve Deal	Used to approve the deal. To approve a deal the following conditions should be met: • All the price items should be in the **Approved** status if the **Price Item Approval Required** option is set to **Yes** in the **Deal Type** used for creating the deal. • All the division level approvals must be completed if the **Division Level Approval Required** field is set to **Yes** in the **Deal Type** used for creating the deal. • All the product level approvals must be completed if the **Product Level Approval Required** field is set to **Yes** in the **Deal Type** used for creating the deal. • The deal should be in the **Ready for Approval** status for the approver to initiate the deal approval process. **Note:** The **Approve Deal** button is activated only when the deal is in the **Ready for Approval** status and the **Approve Deal** option is set to **Yes** for the approver in the **Approval Hierarchy** of the **Deal Approval Profile**.
Return to Submitter	Used to move the deal from the current role to the previous role of the previous level in the approval hierarchy for approval. It is also used to send the deal to the relationship manager for approval if you have recommended a new pricing for the price item.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Button Name	Button Description
	Note: On clicking the **Return to Submitter** button, a To Do notification is created for the users of the previous level to indicate that the deal is returned for approval. A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed.
Finalize Deal	Used to finalize the deal so that it is ready to be presented to the customer for approval.
	Note: This button is activated when the deal is in the **Approved** status.
	Tip: You can also finalize a deal by clicking the **Finalize** ( ) icon in the **Finalize Deal** column corresponding to the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
Accept Deal	Used to accept the deal in the system after receiving confirmation of acceptance from the customer.
	Note: This button is activated only when the deal is in the **Finalized** status.
	Tip: You can also accept a deal by clicking the **Accept** ( ) icon in the **Accept Deal** column corresponding to the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
Reject Deal	Used to reject the deal in the system after receiving confirmation of rejection from the customer.
	Note: This button is activated only when the deal is in the **Finalized** status.
	Tip: You can also reject a deal by clicking the **Reject** ( ) icon in the **Reject Deal** column corresponding to the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
Create Deal Version	Used to create a deal version for the existing deal to optimize the deal pricing process and to make better pricing decisions.
	Note: You can add a new deal version to a deal even if the version of any deal version of a deal is in the **Finalized** status and the status of the deal is **Pending for Approval** or **Approved**.
Discard Deal	Used to discard the deal.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Button Name	Button Description
	Note: You cannot discard a deal if it has reached the **Finalized** status.
Print Deal	Used to extract relevant information about the deal in the pdf or excel format which is published either to the customer for receiving approvals or for internal reviews and validations.
Apply Back	Used to activate the proposed pricelist assignments, overridden pricing, and product enrollments for the existing customer or account in the system.
Previous	Used to view information about the previous status of the deal.

Searching for an Entity

Copyright © 2009, 2025, Oracle and/or its affiliates.

Prerequisites

To search for an entity, you should have:

- Entities (i.e. customers, accounts, and prospect persons) defined in the application

Procedure

To search for an entity:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Deal Pricing Management** and then click **Deal Dashboard**.
   The **Deal Dashboard** screen appears.
3. Click the **Create Deal** button in the page title area of the **Deal Dashboard** screen.
   The **Deal Information** screen appears.
4. Enter the search criteria in the **Search Entity** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of entities (i.e. customers, accounts, or prospect persons) that meet the search criteria appears in the **Search Results** section.

   Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Recommending a Product for a Deal

Prerequisites

To recommend a product for a deal, you should have:

- Products defined in the application

Procedure

To recommend a product for a deal:

1. Ensure that the **Product** section is expanded in the **Deal** zone when you are defining a *d*eal.

   The **Product** section contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Product	Used to indicate the product that you want to recommend for the deal.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to the **Product** field. On clicking the **Search** icon, the **Product Search** window appears. On specifying the product, the description of the product appears corresponding to the **Product** field.	

Note:

The system automatically derives recommended products for the deal when the questionnaire contains questions where the question applicability is set to **Package and Product Reference**.

The system derives the recommended products from the reference deals. It only considers automatically recommended products of the reference deals and not manually recommended products of the reference deals.

2. Enter the required details in the **Product** section.
3. If you want to recommend more than one product for the deal, click the **Add** (+) icon and then *r*epeat step 2.

Note: However, if you want to remove a recommended product from the deal, click the **Delete** (🗑) icon corresponding to the product.

4. Click **Save**.
   The products is recommended for the deal.

Defining a Characteristic for a Deal

Prerequisites

To define a characteristic for a deal, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Deal**)

Procedure

To define a characteristic for a deal:

1. Ensure that the **Characteristics** section is expanded in the **Deal** zone when you are defining a deal.

   The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the deal.	Yes (Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
		Note: This field is required while defining a characteristic for the deal.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	Note: The list includes only those characteristic types where the characteristic entity is set to **Deal**.	**Note:** This field is required while defining a characteristic for the deal.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	**Note:** This field is required while defining a characteristic for the deal.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the deal, click the **Add** (+) icon and then repeat step 3.

Note: However, if you want to remove a characteristic from the deal, click the **Delete** (🗑) icon corresponding to the characteristic.

4. Click **Save**.
   The characteristic is defined for the deal.

Answering a Questionnaire for a Deal

Procedure

To answer a questionnaire for a deal:

1. Ensure that the **Questionnaire** zone is expanded in the **Deal Information** screen.
   A list of questions appear in the **Questionnaire** zone if the **Question Display Order** is set to **Sequence Based** in the **Questionnaire Template** associated with the deal type. Whereas, if the **Question Display Order** is set to **Rule Based** in the **Questionnaire Template** associated with the deal type, the questions appear based on the answer provided for the previous question.

Copyright © 2009, 2025, Oracle and/or its affiliates.

2. Click the **Previous** (⇦) or **Next** (⇨) icons to navigate through the questions or question sets of a rule based or sequence based questionnaire respectively.
3. Answer the questions as per the **Answer Type** set for the questions in the **Questionnaire Template**.
4. Click the **Next** button.
   A list of reference customers appear based on the answers provided in the questionnaire.

Searching for a Reference

Prerequisites

To search for a reference, you should have:

- Reference customers and reference deals defined in the application
- Pricing and commitments defined for the references

Procedure

To search for a reference:

1. Ensure that the **Select Reference** zone is expanded in the **Deal Information** screen when you are searching a reference for a deal.

Copyright © 2009, 2025, Oracle and/or its affiliates.

> **Note:** The **Select Reference** zone appears when you do not select the check box corresponding to the **Skip Reference** option in the **Deal** zone of the **Deal Information** screen while defining a deal.

2. Enter the search criteria in the **Select Reference** zone.

> **Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

3. Click **Search**.
   A list of reference customers or reference deals that meet the search criteria appears in the **Search Results** section.

> **Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Selecting a Reference for a Deal

Prerequisites

To select a reference for a deal, you should have:

- Reference customers and reference deals defined in the application
- Pricing and commitments defined for the references

Procedure

To select a reference for a deal:

1. Search for the reference in the **Select Reference** zone of the **Deal Information** screen.
2. Click the **Broadcast** (📡) icon corresponding to the deal in the **Search Results** section of the **Select Reference** zone whose pricing and commitments you want to use as a reference for defining the deal.
   The **Reference Details** zone appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Name	Displays the name of the primary person for whom the customer or deal is defined in the system whose pricing or commitments you want to use as a reference for defining the deal.	Not applicable
Reference Deal	Displays the concatenated string of deal information separated by a comma (,) whose pricing or commitments you want to use as a reference for defining the deal.	Not applicable

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when you select a deal as a reference.	
Reference Deal Version	Displays the concatenated string of deal version information separated by a comma (,) whose pricing or commitments you want to use as a reference for defining the deal. **Note:** This field appears when you are copying reference from a deal which is created for a prospect person.	Not applicable
Division	Indicates the division to which the reference customer or deal belongs.	Not applicable
Customer Segment	Indicates the business component using which the reference customer or deal is defined in the system.	Not applicable
Customer Tier	Indicates the customer tier of the customer segment using which the reference customer or deal is defined in the system.	Not applicable
Refer Usage	Used to indicate whether you want to copy commitments from the SQI-based billable charges of the reference customer or deal.	Yes
Refer Pricing	Used to indicate whether you want to copy the price list assignments and price assignments of the reference customer or deal.	Yes

3. Enter the required details in the **Reference Details** zone.
4. Click **Save**.
   The reference is selected for the deal.

Requesting the Submitter to Resubmit the Deal for Approval

Prerequisites

To request the submitter to resubmit the deal for approval you should have:

- Reasons defined in the **Approval Workflow Reason** screen where the **Reason Category** is set to **Deal Return**

Procedure

To request the submitter to resubmit the deal for approval:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.

   Tip: You can also click the link in the **Deal Information** column for the deal that is assigned to you for an approval in the **Deal To Do** zone.

2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal that you want to resubmit to the submitter for approval.
   The **Deal Information** screen appears.
3. Click the **Return to Submitter** button in the **Deal Information** zone.
   The **Deal Approval Return To Submitter** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal ID	Displays the deal that you want to request the submitter to resubmit for approval.	Not applicable
Model ID	Displays the deal version that you want to request the submitter to resubmit for approval.	Not applicable
Deal Return Reason	Lists the reasons why you want the submitter to resubmit the deal for approval. **Note:** This list includes only those values which are defined in the **Approval Workflow Reason** screen where the **Reason Category** is set to **Deal Return**.	Yes
Send Deal Back with Approvals	Used to indicate whether you want to send the deal or the deal version to the submitter with the already approved pricing and commitments or not. The valid values are:	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	• No • Yes	
Comments	Used to specify additional information about sending the deal to the submitter for resubmitting the deal for an approval.	Yes

4. Enter the required details in the **Deal Approval Return To Submitter** window.
5. Click **Save**.
   A message appears confirming that the deal is sent to the submitter for resubmitting the deal for approval.
6. Click **OK**.
   The deal is sent to the submitter to resubmit the deal for approval.

Extracting a Deal in the PDF or Excel Format

Procedure

To extract a deal in the pdf or excel format:

1. Do either of the following:

If you want to...	Then...
Extract a deal in the PDF or Excel format from the Deal Dashboard screen	**a.** Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen. **b.** In the **Search Results** section, click the **Print** (🖶) icon in the **Print Deal** column corresponding to the deal which you want to extract in the pdf or excel format.

Copyright © 2009, 2025, Oracle and/or its affiliates.

If you want to...	Then...
	Note: If the deal has multiple versions, click the **Print** ( ) icon in the **Print Deal** column corresponding to the deal version in the **Deal Versions** zone.
Extract a deal in the PDF or Excel format from the Deal Information screen	**a.** Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen. **b.** In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal which you want to extract in the pdf or excel format. **Note:** If you want to extract the deal version in the pdf of excel format, click the link in the **Deal Version Information** column corresponding to the deal version from the **Deal Versions** zone. The **Deal Information** screen appears. **c.** In the **Deal Information** zone, click the **Print Deal** button.
Extract a deal in the PDF or Excel format from the Deal Approver Dashboard screen	**a.** Search for the deal in the **Search Deal** zone of the **Deal Approver Dashboard** screen. **b.** In the **Search Results** section, click the **Print** ( ) icon in the **Print Deal** column corresponding to the deal which you want to extract in the pdf or excel format.

The **Deal Extraction** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Extract Format	Used to specify the format in which you want to extract the deal information. The valid values are: • Excel • PDF	Yes (Conditional) **Note:** This field is required while extracting a deal in the pdf or excel format.
Extract Type	Used to indicate the type of deal information that you want to extract for publishing. The valid values are: • **External** - Used to extract deal information which is published to the customer for approval. It contains the following details: **a.** Extraction information i.e. the extraction date-time and the user who has done the extraction. **b.** Details of the filters selected for extraction. **c.** Deal details such as the deal creator user ID, deal creation date and time, deal ID, deal type, prospect/customer, currency, deal status etc.	Yes (Conditional) **Note:** This field is required while extracting a deal in the pdf or excel format.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	d. Customer hierarchy, accounts and price item details as per the filter option selected in the **Deal Extraction** screen. **e.** Price item details such as the original price with assignment level, commitments, negotiated price with assignment level, approval status, etc. **f.** Terms and conditions. **Note:** The **External** extract type controls the extraction of certain data which may or may not be published to the customer. You can select the **External** option from the **Extract Type** list when the deal is in the **Finalized**, **Customer Accepted**, **Rejected**, **Fully Orchestrated**, **Pending for Review**, or **Closed** status.	
	• **Internal** - Used to extract deal information which is published for internal reviews and validations. It contains the following details: **a.** Deal summary details and Division summary details with the applicable cost, profitability, revenue and other calculations. **b.** Price item details such as the cost and revenue details etc. **c.** Adhoc revenue and cost entries. **Note:** By default, the **Internal** option is selected from the **Extract Type** list for deals which are not in the **Finalized**, **Customer Accepted**, **Rejected**, **Fully Orchestrated**, **Pending for Review**, or **Closed** status. The list includes only those values which are present in the **DEAL_EXTRACT_TYPE_FLG** lookup field.	
Extract Filter	Used to indicate the price item information that you want to extract in the pdf or excel format. The valid values are: • Account • Additional Filter Criteria • All • Customer • Division • Only Hierarchy	Yes (Conditional) **Note:** This field is required while extracting a deal in the pdf or excel format.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	• Price Assignment Level • Price Item • Price Item Group **Note:** The list includes only those values which are present in the **DEAL_EXTRACT_FILTER_FLG** lookup field.	

In addition, the **Deal Extraction** screen contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to specify the persons or prospects account for which you want to extract the price item pricing details. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Prospect Account Search** window appears where you can search for the respective account. Defining a Deal Version

Prerequisites

To define a deal version, you should have:

- Deal for which you want to define a deal version defined in the application

Procedure

To define a deal version:

1. Search for the deal for which you want to define a deal version in the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal for *w*hich you want to define a deal version.
   The **Deal Information** screen appears.

Copyright © 2009, 2025, Oracle and/or its affiliates.

3. In the **Deal Information** zone, click the **Create Deal Version** button.

   The **Deal Version** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Information	Displays a concatenated string of information about the deal separated by a comma (,) for which you want to define a deal version.	Not applicable
Deal Version Description	Used to specify the description for the deal version	Yes
Deal Version Creation Method	Used to indicate the method using which you want to create the deal version. The valid values are: • **Copy From Current Version With Changes** - Used to indicate that you want to copy the customer hierarchy and pricing and commitment details from the current deal version to the new deal version. • **Fetch Latest Hierarchy** - Used to indicate that you want to derive the latest customer hierarchy from the system. **Note:** In this case, you will have to select the price items, assign the required price lists to the entities, override or edit the required proposed pricing, and add commitments from scratch in the new deal version. Also, the system will include all the prospect persons and accounts associated with the customer in the entity hierarchy of the deal version.	Yes

4. Enter the required details in the**Deal Version** screen.
5. Click **Save**.
   The deal version is created and the **Deal Information** screen appears with the details of the deal version updated in the **Deal Information** zone.

Note: Earlier, when any deal version of a deal was in the **Finalized** status and deal was in the **Pending for Approval** or **Approved** status, you were not able to add a new deal version to the deal. Now, in such scenarios, you can add a new deal version to the deal. In addition, after adding a new deal version to the deal, the deal status would be set to the highest deal version status.

Downloading the Pricing and Commitments of a Deal Version

Prerequisites

To download the pricing and commitments of a deal version, you should have:

- The report code using which you want to extract the data in the **Excel** format specified in the **Deal Pricing Download** option type of the **C1-Deal** feature configuration
- Required access to the **C1_DEALDWLDUPLD** application service

Procedure

To download the pricing and commitments of a deal version:

1. Search for the deal version whose pricing and commitments you want to download in the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal version whose pricing and commitments you want to download.
   The **Deal Information** screen appears.
3. Click the **Download** button in the **Deal Information** zone.

   The system extracts the pricing and commitments of the deal version in the Excel format and the web browser screen appears where the downloading process takes place.
4. Navigate to the path where the downloaded content is saved on your local machine.
   The pricing and commitments of the deal is downloaded in the Excel format on your local machine.

Note: The **Download** button is enabled for the user groups who have access to the **C1_DEALDWLDUPLD** application service and where the **Access Mode** is set to **Change**.

Uploading the Pricing and Commitments of a Deal Version

Prerequisites

To upload the pricing and commitments of a deal version, you should have:

Copyright © 2009, 2025, Oracle and/or its affiliates.

- The report code using which you want to extract the data in the **Excel** format specified in the **Deal Pricing Download** option type of the **C1-Deal** feature configuration
- Required access to the **C1_DEALDWLDUPLD** application service

Procedure

To upload the pricing and commitments of a deal version:

1. Search for the deal version in the **Deal Dashboard** screen whose pricing and commitments you want to upload in the system.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal version whose pricing and commitments you want to upload in the system.
   The **Deal Information** screen appears.
3. Click the **Upload** button in the **Deal Information** zone.

   The **Upload Deal Data File** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
File Name	Used to upload the Excel format of the pricing and commitments data file in the system. **Note:** On clicking the **Choose File** button corresponding to this field, you can navigate to locate the file on your local machine.	Yes

4. Select the required pricing and commitments file.
5. Click **Upload**.
   The pricing and commitments of the deal version is uploaded in the system and the status of the deal is changed to **Pending Simulation**.

Note: The **Upload** button is enabled for the user groups who have access to the **C1_DEALDWLDUPLD** application service and where the **Access Mode** is set to **Change**.

Price Item Selection

The **Price Item Selection** screen enables you to select the price items which you want to offer in a deal. It contains the following zones:

- Filters on page 2851
- Price Item Hierarchy on page 2853
- Additional Price Items on page 2855

In addition, the **Price Item Selection** screen contains the following buttons:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Button Name	Button Description
Save	On clicking the **Save** button, the price item selection made in the price item hierarchy is saved.
Save and View Pricing and Commitments	On clicking the **Save and View Pricing and Commitments** button, the price item selection made in the price item hierarchy is saved and the **Pricing and Commitments** screen appears.
Back	Used to access the previous screen.

Filters

The **Filters** zone enables you to search for price items in the customer hierarchy using various filter criteria. It contains the following fields:

Field Name	Field Description
Hierarchy Entity	Used to search for price items which are associated with a hierarchy entity in an entity hierarchy relationship. **Note:** It is a multi-combo box field which enables you to select one or more hierarchy entities from the list. The list includes all those hierarchy entities to which the price items assigned in the customer's hierarchy are associated.
Price Item	Used to search for a particular price item. **Note:** It is a multi-combo box field which enables you to select one or more price items from the list. If you select a hierarchy entity from the **Hierarchy Entity** field, the list includes all those price items which are associated the selected hierarchy entity. However, if you do not select a hierarchy entity from the **Hierarchy Entity** field, the list includes all price items which are assigned in the customer's hierarchy.
Pricing Parameters	Used to search for price items for which the pricing is defined using a particular parameter and parameter value combination. **Note:** It is a multi-combo box field which enables you to select one or more pricing parameters from the list. If you select a price item from the **Price Item** field, the list includes all the pricing parameters using which the pricing is defined for the selected price item.
Assignment Level	Used to search for price items whose price assignment is defined at a particular level. The valid values are: • **Account Agreed** - Used to indicate whether the price item pricing is agreed for the account.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	• **Account Inherited Price List** - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account. • **Account Price List** - Used to indicate whether the price item pricing is defined in the price list which is assigned to the account. • **Bundle Pricing** - Used to indicate whether the price item pricing is defined for the bundle which is available for the retail banking. • **Customer Agreed** - Used to indicate whether the price item pricing is agreed for the customer in the customer hierarchy. • **Customer Inherited Price List** - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer. • **Customer Price List** - Used to indicate whether the price item pricing is defined in the price list which is assigned to the customer. • **Default Price List** - Used to indicate whether the price item pricing defined in the price list is available in the default price list. • **Global Price List** - Used to indicate whether the price item pricing defined in the price list is available in the global price list. • **Market Product Pricing** - Used to indicate whether the price item pricing is defined for the market product which is available for the retail banking. • **Offer Pricing** - Used to indicate whether the price item pricing is defined for the offer which is available for the retail banking. • **Parent Customer Agreed** - Used to indicate whether the price item pricing is agreed for the parent customer in the customer hierarchy. • **Parent Customer Inherited Price List** - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer. • **Parent Customer Price List** - Used to indicate whether the price item pricing is defined in the price list which is assigned to the parent customer. • **Price List** - Used to indicate whether the price item pricing is defined in the price list. • **Product Pricing** - Used to indicate whether the price item pricing defined in the price list is available for the product pricing.
Advanced Filter	Used to search for price items based on the following two options: • **Selected Price Items** - Used to search for price items which are selected for the simulation in the deal. • **Price Items with Usage** - Used to search for price items for which charges exist for the entity.

In addition, the **Filters** zone contains the following buttons:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Button Name	Button Description
Clear All	Used to clear all the filter criteria.
Apply	Used to filter the data based on the specified criteria.

Price Item Hierarchy

The **Price Item Hierarchy** zone displays the price items and the entity hierarchies to which they are associated. It contains the following columns:

Column Name	Column Description
Hierarchy Entity/Price Item	Displays the price items, root level hierarchy entities, and non-root level hierarchy entities in the price item hierarchy which you can offer in the deal. **Note:** A check box appears corresponding to the price items and the hierarchy entities which you can select or deselect to include or exclude the price items or the hierarchy entities respectively from the deal. If the deal is created for an existing customer, the system, by default, selects the following price items: • Whose pricing is directly assigned to the customer • Whose pricing is inherited by the customer If the deal is created for an account, the system, by default, considers the following price items: • Whose pricing is directly assigned to the account • Whose pricing is inherited by the account If required, you can select or deselect the price item by clicking the check box corresponding to the price item in the price item hierarchy. Only the selected price items are considered in the deal for simulation. The hierarchy entities and price items are sorted in the price item hierarchy based on their respective sort sequence. If two or more hierarchy entities and price items have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string. Also, if the sort sequence is not defined for the hierarchy entities and price items, then the system sorts them in the ascending alphabetical order of the information string. Similarly, the system sorts the hierarchy entities and price items in the price item hierarchy when the deal information is extracted in the Excel or PDF format for internal or external use.
Pricing Parameters	Displays the concatenated string of information about the parameters using which the pricing is defined for the price item. **Note:** All price assignments of the price item are sorted in the alphabetical order of the pricing information in the **Pricing Parameter** column.
Assignment Level	Displays the level at which the pricing is defined for the price item. The valid values are:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	• **Account Agreed** - Indicates whether the price item pricing is agreed for the account. • **Account Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account. • **Account Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the account. • **Bundle Pricing** - Indicates whether the price item pricing is defined for the bundle which is available for the retail banking. • **Customer Agreed** - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy. • **Customer Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer. • **Customer Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the customer. • **Default Price List** - Indicates whether the price item pricing defined in the price list is available in the default price list. • **Global Price List** - Indicates whether the price item pricing defined in the price list is available in the global price list. • **Market Product Pricing** - Indicates whether the price item pricing is defined for the market product which is available for the retail banking. • **Offer Pricing** - Indicates whether the price item pricing is defined for the offer which is available for the retail banking. • **Parent Customer Agreed** - Indicates whether the price item pricing is agreed for the parent customer in the customer hierarchy. • **Parent Customer Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer. • **Parent Customer Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the parent customer. • **Price List** - Indicates whether the price item pricing is defined in the price list. • **Product Pricing** - Indicates whether the price item pricing defined in the price list is available for the product pricing.

In addition, the header area of the **Price Item Hierarchy** zone contains the following buttons:

Button Name	Button Description
Previous	On clicking the **Previous** button, the previous page appears in the **Price Item Hierarchy** zone. **Note:** The **Previous** button appears only when the **C1-DPIG-ELIG** algorithm is attached to the **Price Item Group List Filter** system event in the deal type used for creating the deal.
Next	On clicking the **Next** button, the next page appears in the **Price Item Hierarchy** zone.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Button Name	Button Description
	Note: The **Next** button appears only when the **C1-DPIG-ELIG** algorithm is attached to the **Price Item Group List Filter** system event in the deal type used for creating the deal.
Clear Filter	On clicking the **Clear Filter** button, the filter criteria for selecting the price item is cleared and the entire price item hierarchy appears in the **Price Item Hierarchy** column.
Expand All	On clicking the **Expand All** button, all nodes in the price item hierarchy are expanded at once.
Collapse All	On clicking the **Collapse All** button, all nodes in the price item hierarchy are collapsed at once.
Select All	On clicking the **Select All** button, all the price items and the hierarchy entities in the price item hierarchy are selected i.e. the check box corresponding to each price item and hierarchy entity in the price item hierarchy is selected.
De-Select All	On clicking the **De-Select All** button, all the price items and the hierarchy entities in the price item hierarchy are de-selected i.e. the check box corresponding to each price item and hierarchy entity in the price item hierarchy is unchecked.

Note: The width of the columns in the **Price Item Hierarchy** zone can now be resized and adjusted based on the requirement.

Additional Price Items

The **Additional Price Items** zone lists the additional price items that are associated to the entity for which the deal is created. It contains the following columns:

Column Name	Column Description
Hierarchy Entity/Price Item	Displays the additional price items with their root level and non-root level hierarchy entities which you can offer in the deal.
	Note: A check box appears corresponding to the price items and the hierarchy entities which you can select or deselect to include or exclude the additional price items respectively from the deal. Only the selected price items are considered in the deal for simulation.
Pricing Parameters	Displays the concatenated string of information about the parameters using which the pricing is defined for the price item.
	Note: All price assignments of the price item are sorted in the alphabetical order of the pricing information in the **Pricing Parameter** column.
Assignment Level	Displays the level at which the pricing is defined for the price item. The valid values are: • **Account Agreed** - Indicates whether the price item pricing is agreed for the account.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	• **Customer Agreed** - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy.

Note: The width of the columns in the **Additional Price Items** zone can be resized and adjusted based on the requirement.

Pricing and Commitments

The **Pricing and Commitments** screen allows you to view the existing and proposed price items pricing and commitments for the person or account in the customer hierarchy of a deal. It also allows you to do the following:

- View the pass through charge information of an account
- View the product financial summary of a person or an account
- Filter the pricing of a person or an account

The **Pricing and Commitments** screen contains the following sections:

- Pass Through Charge Information on page 2856
- Product Financial Summary on page 2810
- Filters on page 2859
- Pricing and Commitments on page 2860
-

Pass Through Charge Information

The **Pass Through Charge Information** section allows you to view the pass through billable charges of an account while calculating the original revenue of the account and customer in a deal. It contains the following columns:

Field Name	Field Description
Price Item	Displays the price item for which you want to view the pass through billable charge for an account in the customer hierarchy.
Amount in Deal Currency	Displays the pass through billable charge in the deal currency.
Amount in Account Currency	Displays the pass through billable charge in the account's invoice currency.

Product Financial Summary

The **Product Financial Summary** section displays the financial summary at the product level. It contains the following columns:

Column Name	Column Description
Product	Indicates the product whose financial summary is displayed.
Division	Indicates the division to which the product belongs.
Approval Status	Indicates the current approval status of the financial summary at the product level.
Revenue	Displays the revenue generated from the proposed, original, standard, and recommended price item pricing and commitments at the product level. **Note:** The revenue generated from the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The revenue generated from the recommended pricing appears only when there is a recommended pricing defined for the price item.
Cost	Displays the proposed, original, standard, and recommended cost calculated at the product level. **Note:** The cost calculated from the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The cost calculated from the recommended pricing appears only when there is a recommended pricing defined for the price item. The cost includes the total price item cost and the adhoc cost.
Profit	Displays the profit generated from the proposed, original, standard, and recommended price item pricing and commitments at the product level. It is calculated using the following formula: Profit = Revenue - Cost

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: The profit generated from the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The profit generated from the recommended pricing appears only when there is a recommended pricing defined for the price item.
Profitability (%)	Displays the profit percentage calculated for the proposed, original, standard, and recommended price item pricing and commitments at the product level. It is calculated using the following formula: Profitability % = (Revenue - Cost)*100/ Revenue
	Note: The profitability calculated for the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The profitability calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.
Revenue Variation (%)	Displays the difference of revenue variation percentage calculated for the proposed, original, standard, and recommended price item pricing and commitments at the product level. It is calculated using the following formula: Revenue Variation (%) = (Proposed Revenue - Original Revenue)*100/ Original Revenue
	Note: The revenue variation calculated for the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. The revenue variation calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item. The **Green Arrow** ( ) or the **Red Arrow** ( ) corresponding to the revenue variation (%) indicates whether there is an increase or decrease in the revenue variation (%) respectively.
Profit Variation (%)	Displays the difference of profit variation percentage calculated from the proposed, original, standard, and recommended price item pricing and commitments at the product level. It is calculated using the following formula: Profit Variation (%) = (Proposed Profit - Original Profit)*100/ Original Profit

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: The profit variation calculated for the standard pricing appears only when the **Standard Pricing Comparison** field is set to **Yes** in the deal type using which the deal is created in the system. It is calculated using the following formula: Standard Pricing Profit Variation (%) = (Standard Profit - Original Profit)*100/ Original Profit The profit variation calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item. The **Green Arrow** ( ) or the **Red Arrow** ( ) corresponding to the profit variation (%) indicates whether there is an increase or decrease in the profit variation (%) respectively.

Note:

The system highlights the cells of the product financial summary in green color if the proposed statistic is within the range of the deal creator or the approver. Whereas, the system highlights the cells of the product financial summary in red color if the proposed statistic is not within the range of the deal creator or the approver.

The **Product Financial Summary** sections appears in the **Deal Information** zone when the **Product Level Approval Required** field is set to **Yes** in the **Deal Type** using which the deal is created in the system.

The data in the **Product Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the product financial summary is displayed in the deal currency. You can view the product financial summary in the division currency by clicking the toggle switch towards **Division Currency** available in the header area of this section.

Filters

The **Filters** section allows you to filter the pricing and commitments of a person or account in the customer hierarchy using various criteria. It contains the following fields in a grid:

Field Name	Field Description
Search	Used to search for the pricing and commitments of a price item associated with a person or account using a specific search criteria.
Effective Date	Used to search for price items pricing whose effective date is later than the deal start date.

In addition, the **Filters** section contains the following buttons:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Button Name	Button Description
Search	Used to search for price item pricing as per the criteria specified in the **Search** or **Effective Date** fields.
Show All Pricing	Used to show all the pricing and commitments of the price items associated with the person or account in the customer hierarchy.
Show Customer or Account Level Pricing	Used to filter customer agreed or account agreed price item pricing for the person or account in the customer hierarchy.
Show Changed Data	Used to display the following for the existing customer, account, or prospect: • Agreed pricing of a price item assigned to the customer, account, or prospect in the deal • Seasonal pricing of a price item assigned to the customer, account, or prospect in the deal • Proposed pricing of a price item from the price list with higher priority when the pricing is inherited from two or more price lists assigned to the customer, account, or prospect • Proposed pricing of a price item which is edited in the deal • Price item pricing whose default or reference commitments are edited in the deal • Price item pricing for which commitments are added in the deal from the Pricing and Commitments screen • Price item pricing where there is difference between original and proposed cost • Price item pricing where there is difference between original and proposed average price • Price item pricing where there is difference between original and proposed revenue

Pricing and Commitments screen	Pricing and Commitments on page 2856

Pricing and Commitments

The **Pricing and Commitments** section allows you to do the following:

- View the original and proposed commitments of a price item
- View the original and proposed pricing of a price item
- Viewing the original pricing and commitments of a person or an account
- View the pricing and commitments of a person in the division currency
- View the pricing and commitments of an account in the account's invoice currency
- Approve pricing of a price item
- Submit a price item for approval
- Recommend a new pricing for a price item
- View the deal-specific terms and conditions of a price item or a hierarchy entity
- Edit the deal-specific terms and conditions of a price item or a hierarchy entity

The **Pricing and Commitments** section contains the following sub-sections:

Copyright © 2009, 2025, Oracle and/or its affiliates.

- **Symbol Legends** - Used to differentiate between the original, proposed, recommended, and changed pricing and commitments of the price item. It contains the following color codes:

Symbol Name	Symbol Description
PROJECTED	Indicates the proposed price item pricing and commitments.
RECOMMENDED	Indicates the recommended price item pricing and commitments.
ORIGINAL	Indicates the original price item pricing and commitments.
CHANGED	Indicates the changed price item pricing and commitments.

- **Price Item Hierarchy** - Lists the price items and its pricing and commitments information along with the price item hierarchy associated with the person or account. It contains the following columns:

Column Name	Column Description
Price Item Hierarchy	Displays the price item, non-root level hierarchy entity, and root level hierarchy entity associated with the person or account. **Note:** The hierarchy entities and price items are sorted in the price item hierarchy based on their respective sort sequence. If two or more hierarchy entities and price items have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string. Also, if the sort sequence is not defined for the hierarchy entities and price items, then the system sorts them in the ascending alphabetical order of the information string.
Parameters	Indicates the parameters using which the pricing for the price item is defined.
Start Date	Displays the date from when the price item pricing is effective. **Note:** This column appears only when you define a seasonal pricing for the price item. The **Expand or Collapse** (▸) icon appears in the **Start Date** column corresponding to the proposed pricing of the price item. On clicking the **Expand or Collapse** icon, you can view the row for seasonal pricing of the price item.
End Date	Displays the date till when the price item pricing is effective. **Note:** This column appears only when you define a seasonal pricing for the price item.
Pricing Information	Displays the concatenated string of information about the proposed, original, recommended, and changed price item pricing separated by a comma (,).

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: It has a link. On clicking the link, the **Pricing and Commitments** screen appears where you can view the details of the original and proposed price item pricing. The **Delete** ( ) icon appears in the **Pricing Information** column corresponding to the proposed, seasonal, and recommended pricing of the price item. On clicking the **Delete** icon, you can delete the proposed, seasonal, and recommended pricing of the price item. The **Delete** icon appears corresponding to the proposed pricing only when its price assignment level is different from the price assignment level of the original pricing. The recommended pricing of the price item can only be deleted by the approver who has recommended the new price for the price item. The **Expand or Collapse** ( ) icon appears in the **Pricing Information** column corresponding to the proposed pricing of the price item. On clicking the **Expand or Collapse** icon, you can view the row for original pricing of the price item. You can also edit or override the proposed pricing of the price item through this screen. You can directly change the rate of a price item from this screen when there is only one price component in the pricing and the pricing is negotiable for the price item.
Average Price	Displays the average proposed, original, and recommended cost of the price item as per the proposed, original, and recommended commitments respectively. It is calculated using the following formula: Avg. Price = Proposed Revenue/Proposed Usage Avg. Price = Original Revenue/Original Usage Avg. Price = Recommended Revenue/Recommended Usage
Volume	On clicking the **Edit** ( ) icon corresponding to a price item, the **Pricing and Commitments** screen appears where you can view the original and proposed commitments of the price item. Whereas, on clicking the **View** icon ( ) corresponding to a hierarchy entity, the **Pricing and Commitments** screen appears where you can view the original and proposed commitments of the price item at the hierarchy entity level. **Note:** You can directly change the proposed commitment of a price item when there is only one SQI used in the SQI-based billable charges.
Revenue	Displays the proposed, original, and recommended revenue generated from the proposed, original, and recommended price item pricing and commitments respectively.
Revenue Variation (%)	Displays the variation between the original, proposed, and recommended revenue in percentage generated from the original, proposed, and recommended pricing of the price item. It is calculated using the following formula:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Revenue Variation (%) = (Proposed Revenue - Original Revenue)*100/ Original Revenue.
Cost	Displays the proposed, original, and recommended cost of the price item based on the proposed, original, and recommended usage.
Price List Information	Indicates the price list from where the proposed and original pricing of the price item is derived for the person or account in the customer hierarchy.
Assignment Level	Indicates the level at which the proposed and original pricing of the price tem is defined in the customer hierarchy. The valid values are: • **Account Agreed** - Indicates whether the price item pricing is agreed for the account. • **Account Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account. • **Account Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the account. • **Bundle Pricing** - Indicates whether the price item pricing is defined for the bundle which is available for the retail banking. • **Customer Agreed** - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy. • **Customer Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer. • **Customer Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the customer. • **Default Price List** - Indicates whether the price item pricing defined in the price list is available in the default price list. • **Global Price List** - Indicates whether the price item pricing defined in the price list is available in the global price list. • **Market Product Pricing** - Indicates whether the price item pricing is defined for the market product which is available for the retail banking. • **Offer Pricing** - Indicates whether the price item pricing is defined for the offer which is available for the retail banking. • **Parent Customer Agreed** - Indicates whether the price item pricing is agreed for the parent customer in the customer hierarchy. • **Parent Customer Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer. • **Parent Customer Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the parent customer. • **Price List** - Indicates whether the price item pricing is defined in the price list.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	• **Product Pricing** - Indicates whether the price item pricing defined in the price list is available for the product pricing.
Status	Indicates the current approval status of the price item pricing and commitments.
Approver	Indicates the user who has approved the price item pricing and commitments.
Terms and Conditions	On clicking the **Edit** (✎) icon, the **Mapping Terms and Conditions** screen appears where you can view or delete the deal-specific terms and conditions associated with the price item.

Note:

In addition, a check box appears corresponding to the price item which is assigned to the user for approval.

By default, you can view the proposed and recommended pricing details of the price item in the price item hierarchy table. To view or hide the original pricing details of the price item, click the **Original Data** toggle switch available in the **Pricing and Commitments** section.

By default, the price item pricing details are displayed in the deal currency. You can view the price item pricing details in the division currency by clicking the **Currency** toggle switch available in the **Pricing and Commitments** section.

In addition, the **Pricing and Commitments** section contains the following buttons:

Button Name	Button Description
Send Price Items for Approval	On clicking the **Send Price Items for Approval** button, the status of the price item is changed to **Assigned to Price Item Manager**.
	Note: An approver can send a price item for approval when the following conditions are met: • The price item is assigned to the approver for approval • The **Propose Pricing** option is set to **Yes** in the **Deal Approval Profile** for the approver • The **Submit Price Item for Approval** option is set to **Yes** in the **Deal Approval Profile** for the approver
Check Limits	On clicking the **Check Limits** button the system verifies whether the average price of the price item falls within the floor and ceil values defined for the approver in the price item screen.
	Note: If the average price falls within the floor and ceil values defined for the approver, then the status of the price item is changed to **Approved**. If the average price does not fall within the floor and ceil values defined for the approver, then the status of the price item is changed to **Pending For Approval**.

Viewing the Pass Through Charge Information of an Account

Procedure

To view the pass through charge information of an account:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal whose accounts pass through charge information you want to view.
   The **Deal Information** screen appears.
3. Ensure that the **Customer Hierarchy** section is expanded in the **Simulation Details** zone.
4. Click the **Edit** (✎) icon in the **Pricing and Commitments** column corresponding to the account whose pass through charge information you want to view.
   The **Pricing and Commitments** screen appears.
5. Ensure that the **Pass Through Charge Information** section is expanded in the **Pricing and Commitments** screen.
6. View the pass through charge information of the account in the **Pass Through Charge Information** section.

Viewing the Product Financial Summary of a Person or an Account

Procedure

To view the product financial summary of a person or an account:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal whose persons or accounts product financial summary you want to view.
   The **Deal Information** screen appears.
3. Ensure that the **Customer Hierarchy** section is expanded in the **Simulation Details** zone.
4. Click the **Edit** (✎) icon in the **Pricing and Commitments** column corresponding to the person or account whose product financial summary you want to view.
   The **Pricing and Commitments** screen appears.
5. Ensure that the **Product Financial Summary** section is expanded in the **Pricing and Commitments** screen.
6. View the product financial summary of the person or account in the **Product Financial Summary** section.

Filtering the Pricing of a Person or an Account

Procedure

To filter the pricing of a person or an account:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal whose persons or accounts pricing you want to filter.
   The **Deal Information** screen appears.
3. Ensure that the **Customer Hierarchy** section is expanded in the **Simulation Details** zone.

Copyright © 2009, 2025, Oracle and/or its affiliates.

4. Click the **Edit** (✎) icon in the **Pricing and Commitments** column corresponding to the person or account whose pricing you want to filter.
   The **Pricing and Commitments** screen appears.
5. Ensure that the **Filters** section is expanded in the **Pricing and Commitments** screen.

   The **Filters** section contains the following fields:

Field Name	Field Description
Search	Used to search for the pricing and commitments of a price item associated with a person or account using a specific search criteria.
Effective Date	Used to search for price items pricing whose effective date is later than the deal start date.

   In addition, the **Filters** section contains the following buttons:

Button Name	Button Description
Search	Used to search for price item pricing as per the criteria specified in the **Search** or **Effective Date** fields.
Show All Pricing	Used to show all the pricing and commitments of the price items associated with the person or account in the customer hierarchy.
Show Customer or Account Level Pricing	Used to filter customer agreed or account agreed price item pricing for the person or account in the customer hierarchy.
Show Changed Data	Used to display the following for the existing customer, account, or prospect: • Agreed pricing of a price item assigned to the customer, account, or prospect in the deal • Seasonal pricing of a price item assigned to the customer, account, or prospect in the deal • Proposed pricing of a price item from the price list with higher priority when the pricing is inherited from two or more price lists assigned to the customer, account, or prospect • Proposed pricing of a price item which is edited in the deal • Price item pricing whose default or reference commitments are edited in the deal • Price item pricing for which commitments are added in the deal from the Pricing and Commitments screen • Price item pricing where there is difference between original and proposed cost • Price item pricing where there is difference between original and proposed average price • Price item pricing where there is difference between original and proposed revenue

6. Enter the required details in the **Filters** section.
7. Click **Search**.
   The pricing of the person or the account is filtered in the **Pricing and Commitments** section.

Approving Pricing of a Price Item

Procedure

To approve a price item in a deal:

1. In the **Simulation Details** zone, click the **Edit** (✎) icon in the **Pricing and Commitments** column corresponding to the person *o*r account whose price item pricing you want to approve.

Copyright © 2009, 2025, Oracle and/or its affiliates.

The **Pricing and Commitments** screen appears.

2. In the **Pricing and Commitments** section, ensure that the **Price Item Hierarchy** sub-section is expanded when you are *a*pproving the pricing of a price item.
3. Click the check box corresponding to the price item that you want to approve for the deal.

> **Note:**
>
> The check box appears when the price item is assigned to the user for approval.
>
> You can select multiple price items at a time for approving.

The **Check Limits** button is activated.

4. Click the **Check Limits** button.
   A message appears confirming the approval status of the price item.
5. Click **OK**
   The price item is approved for the deal.

> **Note:**
>
> The price item can be approved by the approver when the average price of the price item falls within the floor and ceil values defined for the approver in the price item screen.
>
> If the average price of the price item falls within the floor and ceil values defined for the approver, then the status of the price item is changed to **Approved**.
>
> If the average price of the price item does not fall within the floor and ceil values defined for the approver, then the status of the price item is changed to **Pending For Approval**.

Selecting a Price Item or Hierarchy Entity

Procedure

To select a price item or hierarchy entity:

1. Do either of the following:

If you want to...	Then...
Select a price item or hierarchy entity from the Deal Information screen	**a.** Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen. **b.** In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the deal for which you want to select the price item or hierarchy entity. The **Deal Versions** zone appears. **c.** In the **Deal Versions** zone, click the deal version in the **Deal Version Information** column for which you want to select the price item or hierarchy entity. The **Deal Information** screen appears. **d.** Ensure that the customer hierarchy is expanded in the **Simulation Details** zone. **e.** Click the **Edit** (✎) icon in the **Price Item Selection** column corresponding to the main person of the customer hierarchy.
Select a price item or hierarchy entity from the Pricing and Commitments screen	**a.** Ensure that the customer hierarchy is expanded in the **Simulation Details** zone. **b.** Click the **Edit** (✎) icon in the **Pricing and Commitments** column corresponding to the person

Copyright © 2009, 2025, Oracle and/or its affiliates.

If you want to...	Then...
	or account for which you want to select the price item or hierarchy entity. The **Pricing and Commitments** screen appears. **c.** Click the **Select Price Item Group** button available in the header area of the **Pricing and Commitments** screen.
Select a price item or hierarchy entity from the Price List Assignment screen	**a.** Ensure that the customer hierarchy is expanded in the **Simulation Details** zone. **b.** Click the **Edit** (✎) icon in the **Price List Assignment** column corresponding to the person or account for whose price list you want to select the price item or hierarchy entity. The **Price List Assignment** screen appears. **c.** In the **Proposed Price Lists** zone, click the link in the **Price List Information** column corresponding to price list whose price item or hierarchy entity you want to select. **Note:** You can also search for a price list that you want to assign to the person or account in the **Assign Price List** zone of the **Price List Assignment** screen and then select the required price item or hierarchy entity. **d.** Click the **Save and Select Price Item Group** button.

The **Select Price Item Group** screen appears. It contains the following sections:

- **Filters** - Used to filter the price assignment in the price item hierarchy which you want to consider while simulating the deal. It contains the following fields:

Field Name	Field Description	
Search	Used to search for a particular price item, root level hierarchy entity, or non-root level hierarchy entity in the customer hierarchy.	
Assignment Level	Used to search for price items in the price item hierarchy whose price assignment is defined at a particular level. The valid values are: • **Account Agreed** - Used to indicate whether the price item pricing is agreed for the account. • **Account Inherited Price List** - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account. • **Account Price List** - Used to indicate whether the price item pricing is defined in the price list which is assigned to the account.	

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	
	• **Bundle Pricing** - Used to indicate whether the price item pricing is defined for the bundle which is available for the retail banking. • **Customer Agreed** - Used to indicate whether the price item pricing is agreed for the customer in the customer hierarchy. • **Customer Inherited Price List** - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer. • **Customer Price List** - Used to indicate whether the price item pricing is defined in the price list which is assigned to the customer. • **Default Price List** - Used to indicate whether the price item pricing defined in the price list is available in the default price list. • **Global Price List** - Used to indicate whether the price item pricing defined in the price list is available in the global price list. • **Market Product Pricing** - Used to indicate whether the price item pricing is defined for the market product which is available for the retail banking. • **Offer Pricing** - Used to indicate whether the price item pricing is defined for the offer which is available for the retail banking. • **Parent Customer Agreed** - Used to indicate whether the price item pricing is agreed for the parent customer in the customer hierarchy. • **Parent Customer Inherited Price List** - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer. • **Parent Customer Price List** - Used to indicate whether the price item pricing is defined in the price list which is assigned to the parent customer. • **Price List** - Used to indicate whether the price item pricing is defined in the price list. • **Product Pricing** - Used to indicate whether the price item pricing defined in the price list is available for the product pricing.	

- **Price Item Group** - Displays the price item hierarchy. It contains the following columns:

Column Name	Column Description	
Price Item Hierarchy	Displays the price items, root level hierarchy entities, and non-root level hierarchy entities in	

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description	
	the price item hierarchy which you can select for simulating the deal. **Note:** A check box appears corresponding to the price items and the hierarchy entities which you can select to include the respective price assignments for deal simulation. The hierarchy entities and price items are sorted in the price item hierarchy based on their respective sort sequence. If two or more hierarchy entities and price items have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string. Also, if the sort sequence is not defined for the hierarchy entities and price items, then the system sorts them in the ascending alphabetical order of the information string. Similarly, the system sorts the hierarchy entities and price items in the price item hierarchy when the deal information is extracted in the Excel or PDF format for internal or external use.	
Parameter	Displays the comma separated parameters using which the pricing of the price item is determined. **Note:** All price assignments of a price item are sorted in the alphabetical order of the pricing information in the **Parameter** column.	
Assignment Level	Displays the level at which the price assignment is defined for the price item. The valid values are: • **Account Agreed** - Indicates whether the price item pricing is agreed for the account. • **Account Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account. • **Account Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the account. • **Bundle Pricing** - Indicates whether the price item pricing is defined for the bundle which is available for the retail banking. • **Customer Agreed** - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy.	

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description	
	• **Customer Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer. • **Customer Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the customer. • **Default Price List** - Indicates whether the price item pricing defined in the price list is available in the default price list. • **Global Price List** - Indicates whether the price item pricing defined in the price list is available in the global price list. • **Market Product Pricing** - Indicates whether the price item pricing is defined for the market product which is available for the retail banking. • **Offer Pricing** - Indicates whether the price item pricing is defined for the offer which is available for the retail banking. • **Parent Customer Agreed** - Indicates whether the price item pricing is agreed for the parent customer in the customer hierarchy. • **Parent Customer Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer. • **Parent Customer Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the parent customer. • **Price List** - Indicates whether the price item pricing is defined in the price list. • **Product Pricing** - Indicates whether the price item pricing defined in the price list is available for the product pricing.	

Note: The width of the columns in the **Price Item Selection** section of the **Select Price Item Group** screen can now be resized and adjusted based on the requirement.

In addition, the **Price Item Selection** section contains the following buttons:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Button Name	Button Description
Expand All	On clicking the **Expand All** button, all nodes in the price item hierarchy are expanded at once.
Collapse All	On clicking the **Collapse All** button, all nodes in the price item hierarchy are collapsed at once.
Select All	On clicking the **Select All** button, all the price items and the hierarchy entities in the price item hierarchy are selected i.e. the check box corresponding to each price item and hierarchy entity in the price item hierarchy is selected.
De-Select All	On clicking the **De-Select All** button, all the price items and the hierarchy entities in the price item hierarchy are de-selected i.e. the check box corresponding to each price item and hierarchy entity in the price item hierarchy is unchecked.
Save	On clicking the **Save** button, the price item selection made in the price item hierarchy is saved.
Save & View Pricing & Commitment	On clicking the **Save & View Pricing & Commitment** button, the price item selection made in the price item hierarchy is saved and the **Pricing and Commitments** screen appears.
Back	Used to access the previous screen.

2. Ensure that the price item hierarchy is expanded in the **Price Item Group** section.

Note:

The system, by default, selects the price items and hierarchy entities in the **Select Price Item Group** screen when the following conditions are met:

- Deal is created for an existing customer or account
- Default commitments are not defined in the respective deal type

However, if the deal is created for a proposed customer or if the default commitments are defined in the respective deal type, the system does not select the price items and hierarchy entities, by default, in the **Select Price Item Group** screen. You have to manually select the required price items and hierarchy entities in the **Select Price Item Group** screen. Only then, the system considers the pricing and commitments of the selected price items in the deal.

3. Select the check box corresponding to the price item or the hierarchy entity that you want to consider while simulating the deal.

Note: If you select a hierarchy entity, then all its corresponding non-root level hierarchy entities and price items are selected for the deal simulation.

4. Click **Save**.
   The price item or hierarchy entity is selected.

Recommending a New Pricing for a Price Item

Procedure

To recommend a new pricing for a price item:

1. Ensure that the price item hierarchy is expanded in the **Pricing and Commitments** section of the **Pricing and Commitments** screen when you are recommending a new pricing for a price item of a person or account in a deal.
2. Click the **Recommend** link in the **Pricing Information** column corresponding to the price item for which you want to recommend a new pricing.
   The **Pricing and Commitments** screen appears.

   Note: The **Recommend** link appears in the **Pricing Information** column only when the **Propose Pricing** option is set to **Yes** for the user in the **Deal Approval Profile** associated with the **Deal Type** using which the deal is created in the system.
3. Ensure that the **Recommend Pricing** zone is expanded in the **Pricing and Commitments** screen.
   The **Recommend Pricing** zone contains the following sections:
   - **Main** - Used to specify basic details about the recommended price item pricing. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment ID	Displays the price assignment ID. **Note:** It is a read-only field and cannot be edited. A new price assignment ID is created automatically by the system when you recommend a new pricing for a price item.	Not Applicable
Price Item	Displays the price item whose pricing you want to edit. **Note:** It is a read-only field and cannot be edited.	Not Applicable
Start Date	Displays the date from when the pricing of the price item is effective for the deal.	Not Applicable
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: • **Regular** - Used to indicate that the pricing is used to generate regular bill segment.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	• **Post Processing** - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. **Note:** The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item Relationship Type**. • **Post Processing - Invoice Based** - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This is not applicable for price items whose **Price Item Usage** field is set to **Pricing**. • **Post Processing - Price Item Based** - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. **Note:** This field is not applicable for price items whose **Price Item Usage** field is set to **Pricing**.	
End Date	Displays the date till when the pricing of the price item is effective for the deal.	Not Applicable
Pricing Currency	Used to indicate the currency in which you want to define the pricing of the price item.	No
Pricing Eligibility	Used to define the pricing eligibility criteria for the price item pricing. **Note:** If you select the check box you can define the pricing eligibility of the price item in the **Price Component** section of this zone.	No
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: • Yes	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	• No	
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. **Note:** Rate schedules control how the bills for the price item will be calculated. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Rate Schedule Search** window appears where you can search for the respective rate schedule.	No

- **TFM Information** - Used to map the transaction details with the price item. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: • Aggregate Transactions and Then Rate Aggregated SQs • Do Not Rate Transactions • Rate Transaction and Aggregate Calc Lines Across Transaction • Rate Transactions	No
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: • Daily • Weekly • Monthly • Quarterly • Yearly	No
Do Not Aggregate Switch	Used to Indicate whether aggregation is required while rating the transactions before billing. The valid values are: • Yes - Used to Indicate aggregation is not required while rating the transactions before billing. • No - Used to Indicate aggregation is required while rating the transactions before billing.	No
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: • Yes	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	• No	

- **Parameters** - Used to associate the parameters based on which you want to recommend the pricing of the price item. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter that you want to associate with the price item pricing. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Parameter Search** window appears. The parameter search results displays only those parameters where the **Price Item** check box is selected.	No
Parameter Value	Used to specify the value of the parameter.	No

- **Characteristics** - Used to define a list of characteristics for the recommended price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for price item pricing.	No
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Projected Pricing**.	No
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the**Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	No

- **Price Component** - Used to define a list of price components of the rate component that you want to map with the recommended price item pricing. It contains the following columns:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description	Mandatory (Yes or No)
Rate Component	Displays the concatenated string of information about the rate component separated by comma (,). **Note:** It is a read-only field and cannot be edited. This ID is generated automatically when you define the tiering setup of the rate component.	Not applicable
Display Sequence	Used to specify the sequence of price component whose rate is used for calculating the pricing of the price item.	No
Description	Used to specify the description of the price component.	No
Show Price Component	Used to indicate whether you want to display the price component in the bill.	No
Rate	Used to specify the rate defined for the price component.	Yes
Eligibility and Tier Details	Used to specify the tiering criteria and eligibility criteria of the price component for the price item pricing.	No
Tier Details	On clicking the **Add** (+) icon, you can view and edit the **Tiering Criteria** of the price component for the price item pricing. It contains the following columns: **Column Name** / **Column Description** Display Sequence: Used to specify the sequence of the tiering criteria. Tiering Criterion: Used to indicate the tiering criteria. Lower Limit: Used to specify the lower limit of the tiering range. Upper Limit: Used to specify the upper limit of the tiering range. **Note:** You can edit the tiering criteria of a price component only when the **Tiering Type** of its rate component is **STEP** or **THRESHOLD**.	No
Eligibility Details	On clicking the **Add** (+) icon, you can view and edit the eligibility criteria of the price component for the price item pricing. It contains the following columns:	No

4. Enter the required details in the **Main** section.
5. Map the transaction details in the **TFM Information** section, if required.
6. Associate or disassociate parameters with the price item pricing in the **Pricing Parameter Information** section, if required.
7. Add, edit, or delete characteristics from the price item pricing in the **Characteristics** section, if required.
8. Define price component for the rate component associated with the price item pricing in the **Price Component** section, if required.
9. Click **Recommend**.
   A new pricing is recommended for the price item.

Note: On recommending a new pricing for a price item, the **Delete** (🗑) icon appears corresponding to the recommended pricing of the respective price item in the **Pricing and Commitments** zone of the **Pricing and Commitments** screen.

Associating Deal-Specific Terms and Conditions with a Price Item

Prerequisites

To associate deal-specific terms and conditions with a price item you should have:

- Terms and conditions defined in the application
- Terms and conditions mapped to the price item

Procedure

To associate deal-specific terms and conditions with a price item:

1. Ensure that the **Pricing and Commitments** zone is expanded when you are associating deal-specific terms and conditions with a price item of a prospect person or a prospect account in the **Pricing and Commitments** screen.
2. In the **Pricing and Commitments** zone, click the **Edit** (✎) icon in the **Terms and Conditions** column corresponding to the price *i*tem to which you want to associate deal-specific terms and conditions.
   The **Terms and Conditions** screen appears. It contains the following field:

Field Name	Field Description
Price Item Information	Indicates the price item to which you want to associate deal-specific terms and conditions.

   In addition, the **Terms and Conditions** screen contains the following sections:

   - **Terms and Conditions Section** - Lists the terms and conditions that are mapped to the price item. It contains the following buttons:

Button Name	Button Description
Select All	Used to select all the available terms and conditions for the price item from the list.
De-select All	Used to de-select all the terms and conditions from the list.
Refresh Terms and Conditions	Used to de-select the terms and conditions that are selected for the price item from the list.

     Note: You can also select or de-select the terms and conditions by clicking the check box corresponding to the respective terms and conditions.

     On clicking the **Edit** (✎) icon corresponding to the terms and conditions in the **Terms and Conditions Section** section, you can view and edit the terms and conditions of the price item.
   - **Adhoc Terms and Conditions** - Used to add deal-specific adhoc terms and conditions for the price item.
3. Select the required terms and conditions for the price item from the **Terms and Conditions Section** section.
4. Click **Save**.
   The deal-specific terms and conditions are associated with the price item.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Note: You can associate deal-specific terms and conditions with a price item until the deal is in the **Customer Accepted** or **Rejected** status.

Associating Deal-Specific Terms and Conditions with a Hierarchy Entity

Prerequisites

To associate deal-specific terms and conditions with a hierarchy entity you should have:

- Terms and conditions defined in the application
- Terms and conditions mapped to the hierarchy entity

Procedure

To associate deal-specific terms and conditions with a hierarchy entity:

1. Ensure that the **Pricing and Commitments** zone is expanded when you are associating deal-specific terms and conditions with a hierarchy entity of a prospect person or a prospect account in the **Pricing and Commitments** screen.
2. In the **Pricing and Commitments** zone, click the **Edit** (✎) icon in the **Terms and Conditions** column corresponding to the hierarchy entity to which you want to associate deal-specific terms and conditions.
   The **Terms and Conditions** screen appears. It contains the following field:

Field Name	Field Description
Hierarchy Entity Information	Indicates the hierarchy entity to which you want to associate deal-specific terms and conditions.

In addition, the **Terms and Conditions** screen contains the following sections:

- **Terms and Conditions Section** - Lists the terms and conditions that are mapped to the hierarchy entity. It contains the following buttons:

Button Name	Button Description
Select All	Used to select all the available terms and conditions for the hierarchy entity from the list.
De-select All	Used to de-select all the terms and conditions from the list.
Refresh Terms and Conditions	Used to de-select the terms and conditions that are selected for the hierarchy entity from the list.

Note: You can also select or de-select the terms and conditions by clicking the check box corresponding to the respective terms and conditions.

Copyright © 2009, 2025, Oracle and/or its affiliates.

On clicking the **Edit** (✎) icon corresponding to the terms and conditions in the **Terms and Conditions Section** section, you can view and edit the terms and conditions of the price item.

- **Adhoc Terms and Conditions** - Used to add deal-specific adhoc terms and conditions for the hierarchy entity.

3. Select the required terms and conditions for the hierarchy entity from the **Terms and Conditions Section** section.
4. Click **Save**.
   The deal-specific terms and conditions are associated with the hierarchy entity.

> **Note:** You can associate deal-specific terms and conditions with a hierarchy entity until the deal is in the **Customer Accepted** or **Rejected** status.

Editing the Deal-Specific Terms and Conditions of a Price Item or a Hierarchy Entity

Prerequisites

To edit the deal-specific terms and conditions of a price item or a hierarchy entity, you should have:

- Terms and conditions associated with the price item
- Terms and conditions associated with the hierarchy entity.

Procedure

To edit the deal-specific terms and conditions of a price item or a hierarchy entity:

1. Ensure that the **Pricing and Commitments** section is expanded in the **Pricing and Commitments** screen.
2. In the **Pricing and Commitments** section, click the **Edit** (✎) icon in the **Terms and Conditions** column corresponding to the price *i*tem or the hierarchy entity whose deal-specific terms and conditions you want to edit.
   The **Terms and Conditions** screen appears.
3. Ensure that the **Terms and Conditions Section** section is expanded in the **Terms and Conditions** screen.
4. Click the **Edit** (✎) icon corresponding to the terms and conditions which you want to edit.
   The **Terms and Conditions** window appears. It contains the following fields:

Field Name	Field Description
Terms and Conditions	Indicates the terms and conditions associated with the price item or the hierarchy entity.
Description	Displays the description of the terms and conditions.
Attached File Name	Indicates the terms and conditions document name.
Terms and Conditions Text	Displays the terms and conditions.

5. Click **Edit**.
   The **Terms and Conditions Text** field is enabled.
6. Modify the required information from the terms and conditions in the **Terms and Conditions Text** field.

Copyright © 2009, 2025, Oracle and/or its affiliates.

7. Click **Save**.
   The changes made to the terms and conditions are saved.

> **Note:** You can edit the terms and conditions of a price item or a hierarchy entity until the deal is in the **Customer Accepted** or **Rejected** status.

Viewing the Deal-Specific Terms and Conditions of a Price Item or a Hierarchy Entity

Prerequisites

To view the deal-specific terms and conditions of a price item or a hierarchy entity, you should have:

- Terms and conditions associated with the price item
- Terms and conditions associated with the hierarchy entity.

Procedure

To view the deal-specific terms and conditions of a price item or a hierarchy entity:

1. Ensure that the **Pricing and Commitments** section is expanded in the **Pricing and Commitments** screen.
2. In the **Pricing and Commitments** section, click the **Edit** (✎) icon in the **Terms and Conditions** column corresponding to the price *i*tem or the hierarchy entity whose deal-specific terms and conditions you want to view.
   The **Terms and Conditions** screen appears.
3. Ensure that the **Terms and Conditions Section** section is expanded in the **Terms and Conditions** screen.
4. Click the **Edit** (✎) icon corresponding to the terms and conditions which you want to view.
   The **Terms and Conditions** window appears.
5. View the deal-specific terms and conditions of the price item or the hierarchy entity in the **Terms and Conditions Text** field of the **Terms and Conditions** window.

Deal Pricing and Commitments

The **Deal Pricing and Commitments** screen allows you to view the original and proposed price item pricing and commitments along with the price item hierarchy and the hierarchy entity. It also allows you to edit the proposed pricing and commitments of the price items. It contains the following sections:

- **Deal Information** - Displays information about the deal version. It contains the following field:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
Deal Version Information	Displays the concatenated string consisting of deal ID, deal version ID and deal description separated by a comma (,).

- **Search Pricing and Commitments** - Used to search pricing and commitments of a price item using various criteria. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate the criteria using which you want to search for the pricing and commitments of a price item. The valid values are: • **Account** - Used to indicate whether you want to search for the pricing and commitments of price items which belong to a particular account. • **All** - Used to indicate whether you want to view the pricing and commitments of all the price items in the deal. • **Customer** - Used to indicate whether you want to search for the pricing and commitments of price items which belong to a particular person. • **Price Item** - Used to indicate whether you want to search for the pricing and commitments of a particular price item. • **Root Level Hierarchy Entity** - Used to indicate whether you want to search for the pricing and commitments of price items which belong to a particular hierarchy entity.	Yes
Account ID	Used to search for the pricing and commitments of a price item which belongs to a particular account in the customer hierarchy. **Note:** The **Search** (🔍) icon appears corresponding to the **Account ID** field. On clicking the **Search** icon, the **Prospect Account Search** window appears where you can search for the respective account.	Yes (Conditional) **Note:** This field is required for searching the price item pricing and commitments of a particular account.
Price Item	Used to search for the price item pricing and commitments of a particular person, account, or hierarchy entity.	Yes (Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to the **Price Item** field. On clicking the **Search** icon, the **Price Item Search** window appears where you can search for the respective price item. You can specify a list of price items whose pricing and commitments you want to view when you select the **Price Item** option from the **Search By** list.	**Note:** This field is required for searching the pricing and commitments of a particular price item.
Price Item Approval Status	Used to search for the pricing and commitments of price items which are in a particular approval status. The valid values are: • Approved • Approved-Existing • Approver-Recommended • Error • Unapproved .	No
Assignment Level	Used to search for the pricing and commitments of price items which are defined at a particular level in the customer hierarchy. The valid values are: • **Account Agreed** - Indicates whether the price item pricing is agreed for the account. • **Account Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account. • **Account Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the account. • **Bundle Pricing** - Indicates whether the price item pricing is defined for the bundle which is available for the retail banking. • **Customer Agreed** - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy. • **Customer Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer. • **Customer Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the customer.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	• **Default Price List** - Indicates whether the price item pricing defined in the price list is available in the default price list. • **Global Price List** - Indicates whether the price item pricing defined in the price list is available in the global price list. • **Market Product Pricing** - Indicates whether the price item pricing is defined for the market product which is available for the retail banking. • **Offer Pricing** - Indicates whether the price item pricing is defined for the offer which is available for the retail banking. • **Parent Customer Agreed** - Indicates whether the price item pricing is agreed for the parent customer in the customer hierarchy. • **Parent Customer Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer. • **Parent Customer Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the parent customer. • **Price List** - Indicates whether the price item pricing is defined in the price list. • **Product Pricing** - Indicates whether the price item pricing defined in the price list is available for the product pricing.	
Person ID	Used to search for the pricing and commitments of a price item which belongs to a particular person in the customer hierarchy. **Note:** The **Search** (🔍) icon appears corresponding to the **Account ID** field. On clicking the **Search** icon, the **Prospect Account Search** window appears where you can search for the respective account.	Yes (Conditional) **Note:** This field is required for searching the price item pricing and commitments of a particular person.
Root Level Hierarchy Entity	Used to search for the pricing and commitments of price items which belongs to a particular hierarchy entity.	Yes (Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to the **Root Level Hierarchy Entity** field. On clicking the **Search** icon, the **Root Level Hierarchy Entity Search** window appears where you can search for the respective hierarchy entity.	**Note:** This field is required for searching the price item pricing and commitments of a particular hierarchy entity.

In addition, the **Search Pricing and Commitments** section contains the following buttons:

Button Name	Button Description
Show All Pricing	Used to display all the price item pricing and commitments available for the specified search criteria.
Show Customer or Account Level Pricing	Used to show only the customer agreed and account agreed price item pricing and commitments available for the specified search criteria.

- **Symbol Legends** - Used to indicate the current status of the price item pricing and commitments. It also differentiates between the proposed and the original price item pricing statistics. It contains the following symbols:

Symbol Name	Symbol Description
PROJECTED	Indicates the proposed price item pricing statistics.
ORIGINAL	Indicates the existing price item pricing statistics.
APPROVED	Indicates whether the pricing of the price item is approved.
PENDING FOR APPROVAL	Indicates whether the pricing of the price item is pending for approval.
Pre-Approved	Indicates whether the original pricing of the price item is approved for the deal.
APPROVER-RECOMMENDED	Indicates whether a new pricing for the price item is recommended by the approver.
Error	Indicates whether an error occurred while validating the price item pricing during pricing simulation.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Symbol Name	Symbol Description
	Note: If the approver clicks the **Check Limits** button in the **Pricing And Commitment Details** screen and if the price item floor and ceil value falls within the approvers limit, then the status of the price item is changed to **Approved**. If the approver clicks the **Check Limits** button in the **Pricing And Commitment Details** screen and if the price item floor and ceil value does not fall within the approvers limit, then the status of the price item is changed to **Pending For Approval**. If the approver clicks the **Send Price Items for Approval** button in the **Pricing And Commitment Details** screen, the status of the price item is changed to **Assigned to Price Item Manager**.
Assigned to Price Item Manager	Indicates whether the price item pricing is sent to the price item manager for approval.

- **Pricing and Commitments** - Lists the price items as specified in the search criteria whose proposed and original pricing and commitment details you want to view. It contains the following columns:

Column Name	Column Description
Entity Information	Displays the concatenated string of information about the person or account in the customer hierarchy whose price item pricing and commitment details you want to view separated by a comma (,). **Note:** The hierarchy entity is sorted in the price item hierarchy based on its respective sort sequence. If two or more hierarchy entities have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string. Also, if the sort sequence is not defined for the hierarchy entities, then the system sorts them in the ascending alphabetical order of the information string.
Price Item	Displays the price item whose pricing and commitment details you want to view.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: The price item is sorted in the price item hierarchy based on its respective sort sequence. If two or more price items have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string. Also, if the sort sequence is not defined for the price items, then the system sorts them in the ascending alphabetical order of the information string.
Price Item Hierarchy	Displays the concatenated string consisting of the root level and non-root level hierarchy entity of the price item separated by a comma (,).
Pricing Parameters	Indicates the parameters using which the pricing of the price item is defined.
Revenue Variation (%)	Displays the variation between the original, proposed, and recommended revenue in percentage generated from the original, proposed, and recommended pricing of the price item. It is calculated using the following formula: Revenue Variation (%) = (Proposed Revenue - Original Revenue)*100/ Original Revenue.
Status	Indicates the current approval status of the price item pricing and commitments.
Approver	Indicates the user who has approved the price item pricing and commitments.
Pricing Information	Displays the concatenated string of information about the proposed and original price item pricing separated by a comma (,). **Note:** It has a link. On clicking the link, the **Deal Pricing** screen appears where you can view the details of the original and proposed price item pricing. You can also edit or override the proposed pricing of the price item through this screen.
Price List Information	Indicates the price list from where the proposed and original pricing of the price item is derived for the person or account in the customer hierarchy.
Assignment Level	Indicates the level at which the proposed and original pricing of the price tem is defined in the customer hierarchy. The valid values are: • **Account Agreed** - Indicates whether the price item pricing is agreed for the account. • **Account Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account. • **Account Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the account. • **Bundle Pricing** - Indicates whether the price item pricing is defined for the bundle which is available for the retail banking. • **Customer Agreed** - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	• **Customer Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer. • **Customer Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the customer. • **Default Price List** - Indicates whether the price item pricing defined in the price list is available in the default price list. • **Global Price List** - Indicates whether the price item pricing defined in the price list is available in the global price list. • **Market Product Pricing** - Indicates whether the price item pricing is defined for the market product which is available for the retail banking. • **Offer Pricing** - Indicates whether the price item pricing is defined for the offer which is available for the retail banking. • **Parent Customer Agreed** - Indicates whether the price item pricing is agreed for the parent customer in the customer hierarchy. • **Parent Customer Inherited Price List** - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer. • **Parent Customer Price List** - Indicates whether the price item pricing is defined in the price list which is assigned to the parent customer. • **Price List** - Indicates whether the price item pricing is defined in the price list. • **Product Pricing** - Indicates whether the price item pricing defined in the price list is available for the product pricing.
Average Price	Displays the average proposed and original cost of the price item as per the proposed and original commitments. It is calculated using the following formula: Avg. Price = Proposed Revenue/Proposed Usage
Volume and Commitments	On clicking the **Edit** (✎) icon, the **Pricing and Commitments** screen appears where you can view the original and proposed commitments of the price item.
Revenue	Displays the proposed and original revenue generated from the proposed and original price item pricing and commitments.
Cost	Displays the proposed and original cost of the price item based on the proposed and original usage.
Terms and Conditions	On clicking the **Edit** (✎) icon, the **Mapping Terms and Conditions** screen appears where you can view or delete the deal-specific terms and conditions associated with the price item.

In addition, the **Pricing and Commitments** section contains the following buttons:

Button Name	Button Description
Send Price Items for Approval	On clicking the **Send Price Items for Approval** button, the status of the price item is changed to **Assigned to Price Item Manager**.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Button Name	Button Description
	Note: An approver can send a price item for approval when the following conditions are met: • The price item is assigned to the approver for approval • The **Propose Pricing** option is set to **Yes** in the **Deal Approval Profile** for the approver • The **Submit Price Item for Approval** option is set to **Yes** in the **Deal Approval Profile** for the approver
Check Limits	On clicking the **Check Limits** button the system verifies whether the average price of the price item falls within the floor and ceil values defined for the approver in the price item screen.
	Note: If the average price falls within the floor and ceil values defined for the approver, then the status of the price item is changed to **Approved**. If the average price does not fall within the floor and ceil values defined for the approver, then the status of the price item is changed to **Pending For Approval**.

Note: A check box appears corresponding to the price item if the price item is assigned to the approver for approval.

Price List Assignment

The **Price List Assignment** screen enables you to view the existing and proposed price lists of the person or account in a deal. It also enables you to edit or assign proposed price list to the person or account in a deal. It contains the following sections:

- **Deal** - Displays basic information about the deal. It contains the following fields:

Field Name	Field Description
Deal Version Information	Displays the deal version to which the person or account belongs.
Person ID	Displays the person whose price list assignment details you want to view or edit. **Note:** This field appears in the following scenarios: • If you are viewing the existing price lists of a person. • If you are editing the proposed price list of a person. • If you are assigning a proposed price list to a person. This field appears when you are viewing, editing, or assigning a price list to a person in the customer hierarchy.
Person Information	Displays the concatenated string of information about the person separated by a comma (,). **Note:** This field appears when you are viewing, editing, or assigning a price list to a person in the customer hierarchy.
Account ID	Displays the account whose price list assignment details you want to view or edit.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	Note: This field appears in the following scenarios: • If you are viewing the existing price lists of an account. • If you are editing the proposed price list of an account. • If you are assigning a proposed price list to an account This field appears when you are viewing, editing, or assigning a price list to an account in the customer hierarchy.
Account Information	Displays the concatenated string of information about the account separated by a comma (,). **Note:** This field appears when you are viewing, editing, or assigning a price list to an account in the customer hierarchy.

- **Existing Price Lists** - Lists the price lists that are already assigned to the person or account of the customer hierarchy in a deal. It contains the following columns:

Column Name	Column Description
Price List ID	Displays the existing price list of the person or account of the customer hierarchy.
Price List Information	Displays the description of the price list. **Note:** It has a link. On clicking the link, the **Price List** screen appears where you can view the details of the respective price list.
Effective Start Date	Displays the date from when the price list is effective for the deal. **Note:** By default, this date is set to the deal start date and cannot be edited.
Effective End Date	Displays the date till when the price list is effective for the deal. **Note:** The **Effective End Date** cannot be earlier than the **Effective Start Date**.
Price List Inheritance	Indicates whether the person or account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, it indicates whether the person or account can inherit the price item pricing from the price list hierarchy.
Assignment Status	Indicates the current status of the price list. The valid values are: • Active • Inactive
Priority	Indicates the order in which the price list must be considered while determining the price item pricing for the person or account.

Note: The **Existing Price Lists** section appears in the **Price List Assignment** screen when you are viewing the original pricelist assignment of the person or account from the customer hierarchy.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Proposed Price Lists - Lists the price lists that are proposed for the person or account in the customer hierarchy of a deal. It contains the following columns:

Column Name	Column Description
Price List ID	Displays the price list that is proposed for the person or account of the customer hierarchy.
Price List Information	Displays the description of the price list.
	Note: It has a link. On clicking the link, the details of the respective price list appears in the **Assign Price List** section for editing. You can activate or deactivate a proposed price list by editing its **Effective End Date** in the **Assign Price List** section.
Effective Start Date	Displays the date from when the proposed price list is effective for the deal.
	Note: By default, this date is set to the deal start date and cannot be edited.
Effective End Date	Displays the date till when the proposed price list is effective for the deal.
	Note: The **Effective End Date** cannot be earlier than the **Effective Start Date**.
Price List Inheritance	Indicates whether the person or account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, it indicates whether the person or account can inherit the price item pricing from the price list hierarchy.
Assignment Status	Indicates the current status of the proposed price list. The valid value is: • Proposed
Priority	Indicates the order in which the price list must be considered while determining the price item pricing for the person or account.

Note:

The **Proposed Price List** section appears in the **Price List Assignment** screen when you are viewing, editing, or assigning a proposed price list to a person or an account of the customer hierarchy.

You can delete a proposed price list by clicking the **Delete** (🗑) icon corresponding to the respective proposed price list.

The **Delete** icon appears corresponding to only those price lists which are newly assigned to the customer or account in the deal.

You cannot delete a proposed price list assignment which is created using the original price list assignments.

If you delete a proposed price list, the price item pricing inherited from the price list is also deleted from the **Pricing and Commitments** screen. But, if you have created the customer or account agreed pricing using the price list pricing, then such customer or account agreed pricing is not deleted from the **Pricing and Commitments** screen.

Assign Price List - Enables you to assign a proposed price list to a person or an account of the customer hierarchy in a deal. It contains the following fields:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
Price List ID	Used to indicate a particular price list that you want to assign to the proposed price list of a person or account. **Note:** The **Search** (🔍) icon appears corresponding to the **Price List ID** field. On clicking the **Search** icon, the **Fetch Eligible Price Lists** window appears. On indicating the price list, the price list information appears corresponding to the **Price List ID** field separated by a comma (,).
Effective Start Date	Displays the date from when the price list assignment is effective for the person or account. **Note:** By default this field is set to the deal start date and cannot be changed.
Effective End Date	Used to specify the date till when the price list assignment is effective for the person or account.
Priority	Used to specify the order in which the assigned price list must be considered while determining the price item pricing for the person or account.
Price list Inheritance	Indicates whether the person or account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, it indicates whether the person or account can inherit the price item pricing from the price list hierarchy. The valid values are: • **Yes** - Used to indicate that the person can inherit the price item pricing from the price list hierarchy. • **No** -Used to indicate that the person cannot inherit the price item pricing from the price list hierarchy.

Note: You cannot assign a proposed price list to a person or account if a deal has reached the **Finalized** status.

In addition, the **Price List Assignment** screen contains the following button:

Button Name	Button Description
Save and Select Price Item Group	On clicking the **Save and Select Price Item Group** button, the assigned price list is saved as the proposed price list and the **Select Price Item Group** screen appears where you can select and/or deselect the price items and/or hierarchy entities from the respective price list.

Product Enrollment

The **Product Enrollment** screen enables you to view the existing and proposed products to which the account is enrolled. It also enables you to edit or enroll an account or accounts of a person for a product. It contains the following sections:

- **Deal** - Displays basic information about the deal. It contains the following fields:

Field Name	Field Description
Deal Version Information	Displays the deal version to which the person or account belongs.
Person ID	Displays the person whose accounts you want to enroll for a product..
	Note: This field appears when you want to enroll all the accounts of the person for a product.
Person Information	Displays the concatenated string of information about the person separated by a comma (,).
	Note: This field appears when you want to enroll all the accounts of the person for a product.
Account ID	Displays the account whose product enrollment details you want to view.
	Note: This field appears in the following scenarios: • If you are viewing the existing products enrolled for an account. • If you are editing the existing products enrolled for an account. • If you are enrolling an account for a product.
Account Information	Displays the concatenated string of information about the account separated by a comma (,).
	Note: This field appears when you are viewing, editing, or enrolling an account for a product.

- **Enrolled Products** - Lists the products to which the account is enrolled. It contains the following columns:

Column Name	Column Description
Enrollment ID	Displays the enrollment ID of the enrolled product.
Product Code	Displays the code of the enrolled product.
	Note: This column appears only when you are viewing the proposed product enrollment details of an account.
Product Description	Displays the description of the enrolled product.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: It has a link. On clicking the link while viewing the existing product to which the account is enrolled, the **Product** screen appears where you can view the details of the respective product.
Version Description	Displays the version of the enrolled product. **Note:** This column appears only when you are viewing the proposed product enrollment details of an account.
Product Type	Displays the type of product which is enrolled for the account. **Note:** Whereas, if you click the link while editing the proposed products to which the account is enrolled, the details of the product and its services appears in the **Products and Services** section of the **Product Enrollment** screen where you can edit the respective product. You cannot edit an enrolled product if the deal version has reached the **Finalized** status.
Product Category	Indicates the category to which the product belongs. **Note:** This column appears only when you are viewing the proposed product enrollment details of an account.
Priority	Displays the priority in which the enrolled product is considered for the account. **Note:** This column appears only when you are viewing the proposed product enrollment details of an account.
Start Date	Displays the date from when the enrolled product is effective for the account. **Note:** By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the enrolled product is effective for the account. **Note:** The **End Date** cannot be earlier than the **Start Date**.

- **Proposed Products** - Lists the products that are proposed for the account for enrollment. It contains the following columns:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
Product Code	Displays the code of the enrolled product.
Product Description	Displays the description of the enrolled product.
Version Description	Displays the version of the enrolled product.
Product Type	Displays the type of product which is enrolled for the account.
Product Category	Indicates the category to which the product belongs.
Priority	Displays the priority in which the enrolled product is considered for the account.
Start Date	Displays the date from when the enrolled product is effective for the account. **Note:** By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the enrolled product is effective for the account. **Note:** The **End Date** cannot be earlier than the **Start Date**.

Note:

On clicking the **Broadcast** ( ) icon corresponding to a proposed enrolled product, the details of the product appears in the **Enroll Product** and **Product and Services** sections for editing.

Note: You cannot edit an enrolled product if the deal or deal version has reached the **Finalized** status.

You can delete the proposed product to which the account is enrolled by clicking the **Delete** ( ) icon corresponding to a proposed enrolled product.

- **System Recommended Products & Packages** - Lists the products that you have recommended for enrollment while creating the deal. It contains the following columns:

Column Name	Column Description
Product Code	Displays the code of the recommended product.
Product Description	Displays the description of the recommended product.
Version Description	Displays the version of the recommended product.
Product Type	Displays the type of product which is recommended for the account.
Product Category	Indicates the category to which the recommended product belongs.
Start Date	Displays the date from when the recommended product is effective for the account. **Note:** By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the recommended product is effective for the account. **Note:** The **End Date** cannot be earlier than the **Start Date**.

- **Enroll Product** - The **Enroll Product** section contains the following fields:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
Enrollment ID	Used to specify the enrollment ID once the product is defined for an enrollment. **Note:** Enrollment ID is displayed when the product is added for enrollment.
Start Date	Displays the date from when the product enrollment is effective. **Note:** By default, this date is set to the deal start date and cannot be changed.
End Date	Displays the date till when the product enrollment is effective.

Note:

The **Enroll Product** section appears in the **Product Enrollment** screen only when you are enrolling an account or accounts of a person for a product.

- **Products and Services** - Used to define products and services for a product. It contains the following fields in a grid:

Field Name	Field Description
Product	Used to indicate the product to which you want to enroll an account or accounts of a person. **Note:** The **Search** (🔍) icon appears corresponding to the **Product** field. On clicking the **Search** icon, the **Fetch Eligible Products** window appears. On indicating the product, the description of the product appears in the **Product** field. Also, when you select a product, the **Standard Product**, **Product Services**, and the **Add-On Product Services** that are eligible for the product appears corresponding to the product.
Start Date	Used to specify the date from when the product is effective for the account or accounts of a person. **Note:** By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the product is effective for the account or accounts of a person. **Note:** The **End Date** cannot be earlier than the **Start Date**.
Priority	Used to specify the priority in which you want the product to be considered while calculating the financial summary of the deal.
Inclusion	Used to indicate whether you want to include the services of the product for the account.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	Note: By default, all the check boxes of the services provided by the product are selected. You can exclude a service by deselecting the check box corresponding to the respective service.
Standard Product	Displays the standard product which is included within the main product.
Start Date	Used to specify the date from when the standard product is effective. **Note:** By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the standard product is effective. **Note:** The **End Date** cannot be earlier than the **Start Date**.
Inclusion	Used to indicate whether the standard product is used for enrollment.
Product Services	Displays the service that is a part of the standard product.
Start Date	Used to specify the date from when the service is effective. **Note:** By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the service is effective. **Note:** The **End Date** cannot be earlier than the **Start Date**.
Inclusion	Used to indicate whether the service is used for enrollment.
Add on Services	Displays the add-on service which is a part of the packaged product.
Start Date	Used to specify the date from when the add-on service is effective. **Note:** By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the add-on service is effective. **Note:** The **End Date** cannot be earlier than the **Start Date**.
Inclusion	Used to indicate whether the add-on service is used for enrollment.

Enrolling All Accounts of a Person for a Product

Procedure

To enroll all accounts of person for a product:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal whose persons accounts you want to enroll for a product.
   The **Deal Information** screen appears.
3. In the **Simulation Details** zone, ensure that the customer hierarchy section is expanded when you are enrolling all accounts of a person for a product.
4. Click the **Edit** (✎) icon in the **Product Enrollment** column corresponding to the person whose accounts you want to enroll for a product.
   The **Product Enrollment** screen appears. It contains the following sections:
   - **Deal** - Displays basic information about the deal. It contains the following fields:

Field Name	Field Description
Deal Version Information	Displays the deal version to which the person or account belongs.
Person ID	Displays the person whose accounts you want to enroll for a product..
	Note: This field appears when you want to enroll all the accounts of the person for a product.
Person Information	Displays the concatenated string of information about the person separated by a comma (,).
	Note: This field appears when you want to enroll all the accounts of the person for a product.

   - **Enrolled Products** - Lists the products to which the accounts of the person are enrolled. It contains the following columns:

Column Name	Column Description
Enrollment ID	Displays the enrollment ID of the enrolled product.
Product Code	Displays the code of the enrolled product.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: This column appears only when you are viewing the proposed product enrollment details of an account.
Product Description	Displays the description of the enrolled product.
	Note: It has a link. On clicking the link while viewing the existing product to which the account is enrolled, the **Product** screen appears where you can view the details of the respective product.
Version Description	Displays the version of the enrolled product.
	Note: This column appears only when you are viewing the proposed product enrollment details of an account.
Product Type	Displays the type of product which is enrolled for the account.
	Note: Whereas, if you click the link while editing the proposed products to which the account is enrolled, the details of the product and its services appears in the **Products and Services** section of the **Product Enrollment** screen where you can edit the respective product. You cannot edit an enrolled product if the deal version has reached the **Finalized** status.
Product Category	Indicates the category to which the product belongs.
	Note: This column appears only when you are viewing the proposed product enrollment details of an account.
Priority	Displays the priority in which the enrolled product is considered for the account.
	Note: This column appears only when you are viewing the proposed product enrollment details of an account.
Start Date	Displays the date from when the enrolled product is effective for the account.
	Note: By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the enrolled product is effective for the account.
	Note: The **End Date** cannot be earlier than the **Start Date**.

- **Proposed Products** - Lists the products that are proposed for the accounts of the person for enrollment. It contains the following columns:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
Product Code	Displays the code of the enrolled product.
Product Description	Displays the description of the enrolled product.
Version Description	Displays the version of the enrolled product.
Product Type	Displays the type of product which is enrolled for the account.
Product Category	Indicates the category to which the product belongs.
Priority	Displays the priority in which the enrolled product is considered for the account.
Start Date	Displays the date from when the enrolled product is effective for the account. **Note:** By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the enrolled product is effective for the account. **Note:** The **End Date** cannot be earlier than the **Start Date**.

Note:

On clicking the **Broadcast** ( ) icon corresponding to a proposed enrolled product, the details of the product appears in the **Enroll Product** and **Product and Services** sections for editing.

Note: You cannot edit an enrolled product if the deal or deal version has reached the **Finalized** status.

You can delete the proposed product to which the account is enrolled by clicking the **Delete** ( ) icon corresponding to a proposed enrolled product.

- **System Recommended Products & Packages** - Lists the products that you have recommended for enrollment while creating the deal. It contains the following columns:

Column Name	Column Description
Product Code	Displays the code of the recommended product.
Product Description	Displays the description of the recommended product.
Version Description	Displays the version of the recommended product.
Product Type	Displays the type of product which is recommended for the account.
Product Category	Indicates the category to which the recommended product belongs.
Start Date	Displays the date from when the recommended product is effective for the account. **Note:** By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the recommended product is effective for the account.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: The **End Date** cannot be earlier than the **Start Date**.

- **Enroll Product** - The **Enroll Product** section contains the following fields:

Field Name	Field Description
Enrollment ID	Displays the enrollment ID once the product is defined for an enrollment. **Note:** This field is auto-populated when a product is added for enrollment.
Start Date	Displays the date from when the product enrollment is effective. **Note:** By default, this date is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the product enrollment is effective for the accounts of the person.

Note:

The **Enroll Product** section appears in the **Product Enrollment** screen only when you are enrolling an account or accounts of a person for a product.

- **Products and Services** - Used to define the product and its services for enrollment. It contains the following fields in a grid:

Field Name	Field Description
Product	Used to indicate the product to which you want to enroll the accounts of a person. **Note:** The **Search** (🔍) icon appears corresponding to the **Product** field. On clicking the **Search** icon, the **Fetch Eligible Products** window appears. On indicating the product, the description of the product appears in the **Product** field. Also, when you select a product, the **Standard Product**, **Product Services**, and the **Add-On Product Services** that are eligible for the product appears corresponding to the product.
Start Date	Used to specify the date from when the product is effective for the accounts of the person. **Note:** By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the product is effective for the accounts of the person.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	Note: The **End Date** cannot be earlier than the **Start Date**.
Priority	Used to specify the priority in which you want the product to be considered while calculating the financial summary of the deal.
Inclusion	Used to indicate whether you want to include the services of the product for the accounts of the person.
	Note: By default, all the check boxes of the services provided by the product are selected. You can exclude a service by deselecting the check box corresponding to the respective service.
Standard Product	Displays the standard product which is included within the main product.
Start Date	Used to specify the date from when the standard product is effective.
	Note: By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the standard product is effective.
	Note: The **End Date** cannot be earlier than the **Start Date**.
Inclusion	Used to indicate whether the standard product is used for enrollment.
Product Services	Displays the service that is a part of the standard product.
Start Date	Used to specify the date from when the service is effective.
	Note: By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the service is effective.
	Note: The **End Date** cannot be earlier than the **Start Date**.
Inclusion	Used to indicate whether the service is used for enrollment.
Add on Services	Displays the add-on service which is a part of the packaged product.
Start Date	Used to specify the date from when the add-on service is effective.
	Note: By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the add-on service is effective.
	Note: The **End Date** cannot be earlier than the **Start Date**.
Inclusion	Used to indicate whether the add-on service is used for enrollment.

5. Enter the required details in the **Products and Services** section.
6. Click **Save**.
   The accounts of the person are enrolled for the product.

Enrolling an Account for a Product

Procedure

To enroll an account for a product:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal whose *a*ccount you want to enroll for a product.
   The **Deal Information** screen appears.
3. In the **Simulation Details** zone, ensure that the customer hierarchy section is expanded when you are enrolling an account for a product.
4. Click the **Edit** (✎) icon in the **Product Enrollment** column corresponding to the account which you want to *e*nroll for a product.
   The **Product Enrollment** screen appears. It contains the following sections:
   - **Deal** - Displays basic information about the deal. It contains the following fields:

Field Name	Field Description
Deal Version Information	Displays the deal version to which the person or account belongs.
Account ID	Displays the account whose product enrollment details you want to view. **Note:** This field appears in the following scenarios: • If you are viewing the existing products enrolled for an account. • If you are editing the existing products enrolled for an account. • If you are enrolling an account for a product.
Account Information	Displays the concatenated string of information about the account separated by a comma (,). **Note:** This field appears when you are viewing, editing, or enrolling an account for a product.

   - **Enrolled Products** - Lists the products to which the account is enrolled. It contains the following columns:

Column Name	Column Description
Enrollment ID	Displays the enrollment ID of the enrolled product.
Product Code	Displays the code of the enrolled product.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: This column appears only when you are viewing the proposed product enrollment details of an account.
Product Description	Displays the description of the enrolled product.
	Note: It has a link. On clicking the link while viewing the existing product to which the account is enrolled, the **Product** screen appears where you can view the details of the respective product.
Version Description	Displays the version of the enrolled product.
	Note: This column appears only when you are viewing the proposed product enrollment details of an account.
Product Type	Displays the type of product which is enrolled for the account.
	Note: Whereas, if you click the link while editing the proposed products to which the account is enrolled, the details of the product and its services appears in the **Products and Services** section of the **Product Enrollment** screen where you can edit the respective product. You cannot edit an enrolled product if the deal version has reached the **Finalized** status.
Product Category	Indicates the category to which the product belongs.
	Note: This column appears only when you are viewing the proposed product enrollment details of an account.
Priority	Displays the priority in which the enrolled product is considered for the account.
	Note: This column appears only when you are viewing the proposed product enrollment details of an account.
Start Date	Displays the date from when the enrolled product is effective for the account.
	Note: By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the enrolled product is effective for the account.
	Note: The **End Date** cannot be earlier than the **Start Date**.

- **Proposed Products** - Lists the products that are proposed for the account for enrollment. It contains the following columns:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
Product Code	Displays the code of the enrolled product.
Product Description	Displays the description of the enrolled product.
Version Description	Displays the version of the enrolled product.
Product Type	Displays the type of product which is enrolled for the account.
Product Category	Indicates the category to which the product belongs.
Priority	Displays the priority in which the enrolled product is considered for the account.
Start Date	Displays the date from when the enrolled product is effective for the account. **Note:** By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the enrolled product is effective for the account. **Note:** The **End Date** cannot be earlier than the **Start Date**.

Note:

On clicking the **Broadcast** ( ) icon corresponding to a proposed enrolled product, the details of the product appears in the **Enroll Product** and **Product and Services** sections for editing.

Note: You cannot edit an enrolled product if the deal or deal version has reached the **Finalized** status.

You can delete the proposed product to which the account is enrolled by clicking the **Delete** ( ) icon corresponding to a proposed enrolled product.

- **System Recommended Products & Packages** - Lists the products that you have recommended for enrollment while creating the deal. It contains the following columns:

Column Name	Column Description
Product Code	Displays the code of the recommended product.
Product Description	Displays the description of the recommended product.
Version Description	Displays the version of the recommended product.
Product Type	Displays the type of product which is recommended for the account.
Product Category	Indicates the category to which the recommended product belongs.
Start Date	Displays the date from when the recommended product is effective for the account. **Note:** By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the recommended product is effective for the account.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: The **End Date** cannot be earlier than the **Start Date**.

- **Enroll Product** - The **Enroll Product** section contains the following fields:

Field Name	Field Description
Enrollment ID	Displays the enrollment ID once the product is defined for an enrollment. **Note:** This field is auto-populated when a product is added for enrollment.
Start Date	Displays the date from when the product enrollment is effective. **Note:** By default, this date is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the product enrollment is effective for the accounts of the person.

Note:

The **Enroll Product** section appears in the **Product Enrollment** screen only when you are enrolling an account or accounts of a person for a product.

- **Products and Services** - Used to define the product and its services for enrollment. It contains the following fields in a grid:

Field Name	Field Description
Product	Used to indicate the product to which you want to enroll the account. **Note:** The **Search** (🔍) icon appears corresponding to the **Product** field. On clicking the **Search** icon, the **Fetch Eligible Products** window appears. On indicating the product, the description of the product appears in the **Product** field. Also, when you select a product, the **Standard Product**, **Product Services**, and the **Add-On Product Services** that are eligible for the product appears corresponding to the product.
Start Date	Used to specify the date from when the product is effective for the account. **Note:** By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the product is effective for the account.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	Note: The **End Date** cannot be earlier than the **Start Date**.
Priority	Used to specify the priority in which you want the product to be considered while calculating the financial summary of the deal.
Inclusion	Used to indicate whether you want to include the services of the product for the account.
	Note: By default, all the check boxes of the services provided by the product are selected. You can exclude a service by deselecting the check box corresponding to the respective service.
Standard Product	Displays the standard product which is included within the main product.
Start Date	Used to specify the date from when the standard product is effective.
	Note: By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the standard product is effective.
	Note: The **End Date** cannot be earlier than the **Start Date**.
Inclusion	Used to indicate whether the standard product is used for enrollment.
Product Services	Displays the service that is a part of the standard product.
Start Date	Used to specify the date from when the service is effective.
	Note: By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the service is effective.
	Note: The **End Date** cannot be earlier than the **Start Date**.
Inclusion	Used to indicate whether the service is used for enrollment.
Add on Services	Displays the add-on service which is a part of the packaged product.
Start Date	Used to specify the date from when the add-on service is effective.
	Note: By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the add-on service is effective.
	Note: The **End Date** cannot be earlier than the **Start Date**.
Inclusion	Used to indicate whether the add-on service is used for enrollment.

5. Enter the required details in the **Products and Services** section.
6. Click **Save**.
   The account is enrolled for a product.

Pricing and Commitments

The **Pricing and Commitments** screen allows you to do the following:

- View the original and proposed pricing of the price item
- Edit the proposed pricing of the price item
- Override the proposed pricing of the price item
- View the original and proposed commitments of the price item
- Edit the proposed commitments of the price item

The **Pricing and Commitments** screen contains the following sections:

- **Pricing** - Used to view the original and proposed pricing of the price item. It also allows you to edit or override the proposed pricing of the price item. It contains the following zones:
  - Projected Pricing on page 2926
  - Original Pricing on page 2932
- **Commitments** - Used to view the original and proposed commitments of the price item. It also allows you to edit the proposed commitments of the price item. It contains the following zones:
  - Proposed Commitments on page 2936
  - Original Volume on page 2937

Copyright © 2009, 2025, Oracle and/or its affiliates.

Projected Pricing

The **Projected Pricing** zone allows to view, edit, or override the proposed pricing of the price item. It contains the following field:

Field Name	Field Description
Override	Used to indicate whether you want to override the price item pricing.

In addition, the **Projected Pricing** zone contains the following sections:

- **Main** - Displays basic information about the price item pricing. It contains the following fields:

Field Name	Field Description
Price Assignment ID	Displays the price assignment ID. **Note:** It is a read-only field and cannot be edited. A new **Price Assignment ID** is generated if you override the proposed pricing of the price item.
Price Item	Displays the price item for which the proposed pricing is defined. **Note:** It is a read-only field and cannot be edited.
Start Date	Use to specify the date from when the pricing of the price item is effective for the deal. **Note:** By default the deal start date appears in this field. You can define a seasonal pricing for the price item by overriding the price item pricing with a price assignment start date greater than the deal start date.
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: • **Regular** - Used to indicate that the pricing is used to generate regular bill segment. • **Post Processing** - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. **Note:** The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item Relationship Type**. • **Post Processing - Invoice Based** - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	Note: This is not applicable for price items whose **Price Item Usage** field is set to **Pricing**. • **Post Processing - Price Item Based** - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. **Note:** This field is not applicable for price items whose **Price Item Usage** field is set to **Pricing**.
End Date	Used to specify the date till when the pricing of the price item is effective for the deal.
Pricing Currency	Used to indicate the currency in which you want to define the pricing of the price item.
Pricing Eligibility	Used to select the pricing eligibility criteria for the price item pricing. **Note:** If you select the check box you can define the pricing eligibility of the price item in the **Price Component** section of this zone.
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: • Yes • No
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. **Note:** Rate schedules control how the bills for the price item will be calculated. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Rate Schedule Search** window appears where you can search for the respective rate schedule.

- **TFM Information** - Displays the transaction information mapped with the price item. It contains the following fields:

Field Name	Field Description
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: • Aggregate Transactions and Then Rate Aggregated SQs • Do Not Rate Transactions • Rate Transaction and Aggregate Calc Lines Across Transaction • Rate Transactions
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: • Daily • Weekly • Monthly

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	• Quarterly • Yearly
Do Not Aggregate Switch	Used to Indicate whether aggregation is required while rating the transactions before billing. The valid values are: • Yes - Used to Indicate aggregation is not required while rating the transactions before billing. • No - Used to Indicate aggregation is required while rating the transactions before billing.
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: • Yes • No

- **Pricing Parameter Information** - Displays the parameters based on which the price item pricing is defined. It contains the following columns:

Column Name	Column Description
Parameter	Indicates the parameter that is associated with the price item pricing.
	Note: The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Parameter Search** window appears. The parameter search results displays only those parameters where the **Price Item** check box is selected.
Parameter Value	Displays the value of the parameter.

- **Characteristics** - Lists the characteristics defined for the price item pricing. It contains the following columns:

Column Name	Column Description
Effective Date	Used to specify the date from when the characteristic is effective for the price item pricing.
Characteristic Type	Used to indicate the characteristic type.
	Note: The list includes only those characteristic types where the characteristic entity is set to **Projected Pricing**.
Characteristic Value	Used to specify the value for the characteristic type.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: If you select a predefined characteristic type, the**Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.

- **Price Component** - Used to define a list of price components of the rate component that you want to map with the price item pricing. It contains the following columns:

Column Name	Column Description
Rate Component	Displays the concatenated string of information about the rate component separated by comma (,).
	Note: It is a read-only field and cannot be edited. This ID is generated automatically when you define the tiering setup of the rate component.
Display Sequence	Used to specify the sequence of price component whose rate is used for calculating the pricing of the price item.
Description	Used to specify the description of the price component.
Show Price Component	Used to indicate whether you want to display the price component in the bill.
Rate	Used to specify the rate defined for the price component.
Eligibility and Tier Details	Used to specify the tiering criteria and eligibility criteria of the price component for the price item pricing.
Tier Details	On clicking the **Add** (➕) icon, you can define the **Tiering Criteria** of the price component for the price item pricing. It contains the following columns:

Copyright © 2009, 2025, Oracle and/or its affiliates.

<table>
<tr><th>Column Name</th><th>Column Description</th></tr>
<tr><td></td><td>
<table>

Original Pricing

The **Original Pricing** zone allows you to view the details of the existing pricing of the price item. It contains the following sections:

- **Main** - Displays basic information about the price item pricing. It contains the following fields:

Field Name	Field Description
Price Assignment ID	Displays the price assignment ID.
Price Item	Displays the price item for which the original pricing is defined.
Start Date	Displays the date from when the pricing of the price item is effective for the deal.
Price Assignment Type	Indicates the type of price assignment. The valid values are: • **Regular** - Indicates that the pricing is used to generate regular bill segment. • **Post Processing** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. **Note:** The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item Relationship Type**. • **Post Processing - Invoice Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	Note: This is not applicable for price items whose **Price Item Usage** field is set to **Pricing**. • **Post Processing - Price Item Based** - Indicates that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. **Note:** This is not applicable for price items whose **Price Item Usage** field is set to **Pricing**.
End Date	Displays the date till when the pricing of the price item is effective for the deal.
Pricing Currency	Indicates the currency in which you want to define the pricing of the price item.
Pricing Eligibility	Indicates whether the pricing eligibility criteria is defined for the price item pricing in the **Price Component** section.
Print Zero	Indicates whether zero pricing should be displayed in the bill. The valid values are: • Yes • No
Rate Schedule	Displays the rate schedule that you want to use while defining price item pricing. **Note:** Rate schedules control how the bills for the price item is calculated.

- **TFM Information** - Displays the transaction information mapped with the price item. It contains the following fields:

Field Name	Field Description
Transaction Rating Criteria	Indicates how and when the transaction legs mapped to the price item are rated. The valid values are: • Aggregate Transactions and Then Rate Aggregated SQs • Do Not Rate Transactions • Rate Transaction and Aggregate Calc Lines Across Transaction • Rate Transactions
Do Not Aggregate Switch	Indicates whether aggregation is required while rating the transactions before billing. The valid values are: • **Yes** - Indicates aggregation is not required while rating the transactions before billing. • **No** - Indicates aggregation is required while rating the transactions before billing.
Ignore Transaction	Indicates whether the transactions mapped to the price item is considered for billing. The valid values are: • Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	• No
Aggregation Schedule	Indicates the transaction aggregation cycle. The valid values are: • Daily • Weekly • Monthly • Quarterly • Yearly

- **Pricing Parameter Information** - Displays the parameters based on which the price item pricing is defined. It contains the following columns:

Column Name	Column Description
Parameter	Indicates the parameter that is associated with the price item pricing.
Parameter Value	Displays the value of the parameter.

- **Characteristics** - Lists the characteristics defined for the price item pricing. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price item pricing.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value for the characteristic type.

- **Price Component** - Lists the price components of the rate component that is mapped with the price item pricing. It contains the following columns:

Column Name	Column Description
Rate Component	Displays the concatenated string of information about the rate component separated by comma (,).
Display Sequence	Displays the sequence of price component whose rate is used for calculating the pricing of the price item.
Description	Displays the description of the price component.
Show Price Component	Indicates whether you want to display the price component in the bill.
Rate	Displays the rate defined for the price component.
Eligibility and Tier Details	Displays the tiering criteria and eligibility criteria for the price item pricing.
Tier Details	Displays information about the tiering criteria of the price component for the price item pricing. It contains the following columns:

Copyright © 2009, 2025, Oracle and/or its affiliates.

<table>
<tr><th>Column Name</th><th>Column Description</th></tr>
<tr><td></td><td>
<table>
<tr><th>Column Name</th><th>Column Description</th></tr>
<tr><td>Display Sequence</td><td>Displays the sequence of the tiering criteria.</td></tr>
<tr><td>Tiering Criterion</td><td>Indicates the tiering criteria.</td></tr>
<tr><td>Lower Limit</td><td>Displays the lower limit of the tiering range.</td></tr>
<tr><td>Upper Limit</td><td>Displays the upper limit of the tiering range.</td></tr>
</table>

Note: You can define the tiering criteria of a price component only when the Tiering Type of its rate component is STEP or THRESHOLD.
</td></tr>
<tr><td>Eligibility Details</td><td>Displays information about the eligibility criteria of the price component for the price item pricing. It contains the following columns:
<table>
<tr><th>Column Name</th><th>Column Description</th></tr>
<tr><td>Display Sequence</td><td>Displays the order in which the eligibility criteria is executed in the rule.</td></tr>
<tr><td>Parameter</td><td>Indicates the left hand side parameter which is used along with the price item for price determination.</td></tr>
<tr><td>Operator</td><td>Indicates the relational operator that is used to define the relation between the left hand side and the right hand side parameters.</td></tr>
<tr><td>Parameter Value Type</td><td>Indicates the type of pricing eligibility. The valid values are:
• Parameter - Indicates the type of parameter.
• Value - Indicates the type of value.</td></tr>
<tr><td>Parameter</td><td>Displays the value for the Parameter Value Type as the right hand side parameter which you want to use along with the price item for price determination.</td></tr>
<tr><td>Is True</td><td>Indicates what happens when the condition is true (satisfied). The valid values are:
• Check next condition - Indicates that the condition with the consecutive sequence number is executed.
• Rule is false - Indicates that the action specified in the Rule False Action field is executed.</td></tr>
</table>
</td></tr>
</table>

Proposed Commitments

The **Proposed Commitments** zone allows to view or edit the proposed commitments of the price item for a person or account based on which the revenue is calculated for the deal. It contains the following columns:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
Price Item	Displays the price item.
Pricing Parameters	Indicates the parameter based on which the pricing is defined for the price item.
SQI	Indicates the service quantity identifier that is associated with the price item.
Service Quantity	Used to specify the proposed SQI value using which the rates engine calculates the price item pricing.

Editing a Proposed Price Item Pricing

Prerequisites

To edit a proposed price item pricing, you should have:

- Values defined for the **Price Assignment Type** in the **PA_TYPE_FLAG** lookup field
- Currencies defined in the application
- Rate schedules, rate versions, and rate components defined in the application
- Values defined for **Transaction Rating Criteria** in the **TXN_RATING_CRITERIA** lookup field
- Values defined for **Pricing Rule Type** in the **PRC_RULE_TYPE_FLG** lookup field
- Aggregation schedules defined in the application
- Parameters defined in the application (where the **Price Item** option is selected in the **Parameter Usage** section)
- Characteristic types defined in the application (where the characteristic entity is set to **Price Item Pricing**)
- Transactions mapped to the price item defined in the application
- Tiering criteria defined in the application
- Tiering setup for the rate components defined in the application

Copyright © 2009, 2025, Oracle and/or its affiliates.

- Pricing eligibility defined in the application

Procedure

To edit a proposed price item pricing:

1. Ensure that the **Projected Pricing** zone is expanded in the **Pricing and Commitments** screen when you are editing the *p*roposed pricing of a price item.

   The **Projected Pricing** zone contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Override	Used to indicate whether you want to override the price item pricing.	No **Note:** This field is required only while overriding the price item pricing.

   In addition, the **Projected Pricing** zone contains the following sections:

   - **Main** - Used to specify basic details about the price item pricing. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment ID	Displays the price assignment ID. **Note:** It is a read-only field and cannot be edited.	Not Applicable
Price Item	Displays the price item whose pricing you want to edit. **Note:** It is a read-only field and cannot be edited.	Not Applicable
Start Date	Use to specify the date from when the pricing of the price item is effective for the deal. **Note:** By default the deal start date appears in this field.	Yes
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: • **Regular** - Used to indicate that the pricing is used to generate regular bill segment. • **Post Processing** - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. **Note:** The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item Relationship Type**.	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	• **Post Processing - Invoice Based** - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This is not applicable for price items whose **Price Item Usage** field is set to **Pricing**. • **Post Processing - Price Item Based** - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. **Note:** This field is not applicable for price items whose **Price Item Usage** field is set to **Pricing**.	
End Date	Used to specify the date till when the pricing of the price item is effective for the deal.	No
Pricing Currency	Used to indicate the currency in which you want to define the pricing of the price item.	Yes
Pricing Eligibility	Used to define the pricing eligibility criteria for the price item pricing. **Note:** If you select the check box you can define the pricing eligibility of the price item in the **Price Component** section of this zone.	No
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: • Yes • No	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. **Note:** Rate schedules control how the bills for the price item will be calculated. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Rate Schedule Search** window appears where you can search for the respective rate schedule.	Yes

- **TFM Information** - Used to map the transaction details with the price item. It contains the following fields:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: • Aggregate Transactions and Then Rate Aggregated SQs • Do Not Rate Transactions • Rate Transaction and Aggregate Calc Lines Across Transaction • Rate Transactions	Yes
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: • Daily • Weekly • Monthly • Quarterly • Yearly	Yes
Do Not Aggregate Switch	Used to Indicate whether aggregation is required while rating the transactions before billing. The valid values are: • Yes - Used to Indicate aggregation is not required while rating the transactions before billing. • No - Used to Indicate aggregation is required while rating the transactions before billing.	Yes
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: • Yes • No	Yes

- **Parameters** - Used to associate the parameters based on which you want to define the pricing of the price item. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter that you want to associate with the price item pricing. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Parameter Search** window appears. The parameter search results displays only those parameters where the **Price Item** check box is selected.	Yes (Conditional) **Note:** This field is required while associating parameters with the price item pricing.
Parameter Value	Used to specify the value of the parameter.	Yes (Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description	Mandatory (Yes or No)
		Note: This field is required while associating parameters with the price item pricing.

- **Characteristics** - Used to define a list of characteristics for the price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for price item pricing.	Yes (Conditional) **Note:** This field is required while defining characteristics for the price item pricing
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Projected Pricing**.	Yes (Conditional) **Note:** This field is required while defining characteristics for the price item pricing
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the**Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required while defining characteristics for the price item pricing

- **Price Component** - Used to define a list of price components of the rate component that you want to map with the price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Rate Component	Displays the concatenated string of information about the rate component separated by comma (,).	Not applicable

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description	Mandatory (Yes or No)
	Note: It is a read-only field and cannot be edited. This ID is generated automatically when you define the tiering setup of the rate component.	
Display Sequence	Used to specify the sequence of price component whose rate is used for calculating the pricing of the price item.	Yes
Description	Used to specify the description of the price component.	Yes
Show Price Component	Used to indicate whether you want to display the price component in the bill.	Yes (Conditional) **Note:** This field is required for displaying the price component in the bill.
Rate	Used to specify the rate defined for the price component.	Yes
Eligibility and Tier Details	Used to specify the tiering criteria and eligibility criteria of the price component for the price item pricing.	Yes (Conditional) **Note:** This field is required for specifying the tiering criteria and eligibility criteria of the price component for the price item pricing.
Tier Details	On clicking the **Add** (+) icon, you can view and edit the **Tiering Criteria** of the price component for the price item pricing. It contains the following columns:	Yes (Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

<table>

Overriding a Proposed Price Item Pricing

Prerequisites

To override a proposed price item pricing, you should have:

- Values defined for the **Price Assignment Type** in the **PA_TYPE_FLAG** lookup field
- Currencies defined in the application
- Rate schedules, rate versions, and rate components defined in the application
- Values defined for **Transaction Rating Criteria** in the **TXN_RATING_CRITERIA** lookup field
- Values defined for **Pricing Rule Type** in the **PRC_RULE_TYPE_FLG** lookup field
- Aggregation schedules defined in the application
- Parameters defined in the application (where the **Price Item** option is selected in the **Parameter Usage** section)
- Characteristic types defined in the application (where the characteristic entity is set to **Price Item Pricing**)
- Transactions mapped to the price item defined in the application

Copyright © 2009, 2025, Oracle and/or its affiliates.

- Tiering criteria defined in the application
- Tiering setup for the rate components defined in the application
- Pricing eligibility defined in the application

Procedure

To override a proposed price item pricing:

1. Ensure that the **Projected Pricing** zone is expanded in the **Pricing and Commitments** screen when you are overriding the *p*roposed pricing of a price item.

   The **Projected Pricing** zone contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Override	Used to indicate whether you want to override the price item pricing.	Yes

Note:

A new price assignment ID is created when you override a proposed price item pricing.

While overriding a price item pricing, you can define a seasonal pricing for a price item by changing the pricing effective date to a date greater than the deal start date.

   In addition, the **Projected Pricing** zone contains the following sections:

   - **Main** - Used to specify basic details about the price item pricing. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment ID	Displays the price assignment ID. **Note:** It is a read-only field and cannot be edited.	Not Applicable
Price Item	Displays the price item whose pricing you want to edit. **Note:** It is a read-only field and cannot be edited.	Not Applicable
Start Date	Use to specify the date from when the pricing of the price item is effective for the deal. **Note:** By default the deal start date appears in this field.	Yes
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: • **Regular** - Used to indicate that the pricing is used to generate regular bill segment. • **Post Processing** - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item Relationship Type**. • **Post Processing - Invoice Based** - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This is not applicable for price items whose **Price Item Usage** field is set to **Pricing**. • **Post Processing - Price Item Based** - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. **Note:** This field is not applicable for price items whose **Price Item Usage** field is set to **Pricing**.	
End Date	Used to specify the date till when the pricing of the price item is effective for the deal.	No
Pricing Currency	Used to indicate the currency in which you want to define the pricing of the price item.	Yes
Pricing Eligibility	Used to define the pricing eligibility criteria for the price item pricing. **Note:** If you select the check box you can define the pricing eligibility of the price item in the **Price Component** section of this zone.	No
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: • Yes • No	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing.	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: Rate schedules control how the bills for the price item will be calculated. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Rate Schedule Search** window appears where you can search for the respective rate schedule.	

- **TFM Information** - Used to map the transaction details with the price item. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: • Aggregate Transactions and Then Rate Aggregated SQs • Do Not Rate Transactions • Rate Transaction and Aggregate Calc Lines Across Transaction • Rate Transactions	Yes
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: • Daily • Weekly • Monthly • Quarterly • Yearly	Yes
Do Not Aggregate Switch	Used to Indicate whether aggregation is required while rating the transactions before billing. The valid values are: • Yes - Used to Indicate aggregation is not required while rating the transactions before billing. • No - Used to Indicate aggregation is required while rating the transactions before billing.	Yes
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: • Yes • No	Yes

- **Parameters** - Used to associate the parameters based on which you want to define the pricing of the price item. It contains the following columns:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter that you want to associate with the price item pricing. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Parameter Search** window appears. The parameter search results displays only those parameters where the **Price Item** check box is selected.	Yes (Conditional) **Note:** This field is required while associating parameters with the price item pricing.
Parameter Value	Used to specify the value of the parameter.	Yes (Conditional) **Note:** This field is required while associating parameters with the price item pricing.

- **Characteristics** - Used to define a list of characteristics for the price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for price item pricing.	Yes (Conditional) **Note:** This field is required while defining characteristics for the price item pricing
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Projected Pricing**.	Yes (Conditional) **Note:** This field is required while defining characteristics for the price item pricing
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description	Mandatory (Yes or No)
	Note: If you select a predefined characteristic type, the**Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	**Note:** This field is required while defining characteristics for the price item pricing

- **Price Component** - Used to define a list of price components of the rate component that you want to map with the price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Rate Component	Displays the concatenated string of information about the rate component separated by comma (,). **Note:** It is a read-only field and cannot be edited. This ID is generated automatically when you define the tiering setup of the rate component.	Not applicable
Display Sequence	Used to specify the sequence of price component whose rate is used for calculating the pricing of the price item.	Yes
Description	Used to specify the description of the price component.	Yes
Show Price Component	Used to indicate whether you want to display the price component in the bill.	Yes (Conditional) **Note:** This field is required for displaying the price component in the bill.
Rate	Used to specify the rate defined for the price component.	Yes
Eligibility and Tier Details	Used to specify the tiering criteria and eligibility criteria of the price component for the price item pricing.	Yes (Conditional) **Note:** This field is required for specifying the tiering criteria and eligibility criteria of the price component for the price item pricing.
Tier Details	On clicking the **Add** (📄) icon, you can view and edit the **Tiering Criteria** of the price component	Yes (Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Editing a Proposed Commitment

Prerequisites

To edit a proposed commitment you should have:

- Proposed commitments defined for a price item

Procedure

To edit a proposed commitment:

1. Ensure that price item hierarchy is expanded in the **Pricing and Commitments** section of the **Pricing and Commitments** screen.
2. In the **Pricing and Commitments** section, click the **Edit** (✎) icon in the **Volume and Commitments** column *c*orresponding to the price item whose proposed commitment you want to edit.

   The **Pricing and Commitments** screen appears. It contains the following sections:

   - **Proposed Commitments** - Used to view or edit the proposed commitments of the price item for a customer or an account in a deal.
   - **Original Volume** - Displays information about the existing commitments of the price item.

   The **Proposed Commitments** section contains the following columns:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description	Mandatory (Yes or No)
Price Item	Displays the price item.	Not applicable
Pricing Parameters	Indicates the price item parameters which are used along with the price item for determining the price item pricing.	Not applicable
SQI	Indicates the service quantity identifier.	Not applicable
Service Quantity	Used to specify the SQI value using which the rates engine calculates the price item pricing.	Yes

3. Modify the required details in the **Proposed Commitments** section.

Note: You cannot edit a proposed commitment of a price item if the deal or deal version is in the **Finalized** status.

4. Click **Save**.
The changes made to the proposed commitment is saved.

Mapping Terms and Conditions

The **Mapping Terms and Conditions** screen enables you to associate deal-specific terms and conditions with a price item or hierarchy entity of a person or account from the customer hierarchy in a deal. It contains the following sections:

- **Main** - The **Main** section indicates the price item or hierarchy entity with which you want to associate deal-specific terms and conditions. It contains the following fields:

Field Name	Field Description
Price Item	Indicates the price item of the person or account from the customer hierarchy in a deal with which you want to associate deal-specific terms and conditions. **Note:** This field appears when you are associating deal-specific terms and conditions with a price item.
Hierarchy Entity	Indicates the hierarchy entity of the person or account from the customer hierarchy in a deal with which you want to associate deal-specific terms and conditions. **Note:** This field appears when you are associating deal-specific terms and conditions with a hierarchy entity.

- **Deal-Specific Terms and Conditions** - The **Deal-Specific Terms and Conditions** section allows you to associate or disassociate deal-specific terms and conditions from the price item or hierarchy entity of a person or account from the customer hierarchy in a deal. It contains the following columns:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
Terms and Conditions	Used to indicate a deal-specific term and condition which you want to associate with the price item or the hierarchy entity of the person or account.
Default	Used to indicate whether the term and condition is default or not.

Editing Deal-Specific Terms and Conditions

Prerequisites

To edit deal-specific terms and conditions you should have:

- Terms and conditions associated with the deal

Procedure

To edit deal-specific terms and conditions:

1. Search for the deal in the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal whose terms and conditions you want to edit.
   The **Deal Information** screen appears.
3. Ensure that the customer hierarchy is expanded in the **Simulation Details** zone.
4. Click the **Edit** (✎) icon in the **Pricing and Commitments** column corresponding to the person or account whose terms and conditions you want to edit.
   The **Pricing and Commitments** screen appears.
5. Ensure that the **Price Item Hierarchy** sub-section is expanded in the **Pricing and Commitments** section when you are editing the deal-specific terms and conditions.
6. Click the **Edit** (✎) icon in the **Terms and Conditions** column corresponding to the price item, root level hierarchy entity, or non-level hierarchy entity whose terms and conditions you want to edit.

   The **Mapping Terms and Conditions** screen appears. It contains the following sections:

   - **Main** - The **Main** section displays the hierarchy entity to which the deal-specific terms and conditions are associated. It contains the following fields:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Indicates the price item whose deal-specific terms and conditions you want to edit. **Note:** This field appears when you are editing the deal-specific terms and conditions of a price item.	Not applicable
Root Level Hierarchy Entity	Indicates the root level hierarchy entity whose deal-specific terms and conditions you want to edit. **Note:** This field appears only when you are editing the deal-specific terms and conditions of a root level hierarchy entity.	Not applicable
Non-Root Level Hierarchy Entity	Indicates the non-root level hierarchy entity whose deal-specific terms and conditions you want to edit. **Note:** This field appears only when you are editing the deal-specific terms and conditions of a non-root level hierarchy entity.	Not applicable

- **Deal-Specific Terms and Conditions** - The **Deal-Specific Terms and Conditions** section lists the deal-specific terms and conditions associated with the hierarchy entity. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Terms and Conditions	Indicates the deal-specific terms and conditions associated with the price item, root level hierarchy entity, or non-root level hierarchy entity.	Not applicable
Default	Indicates whether the term and condition is default or not.	Not applicable

7. Edit the required term and condition in the **Deal-Specific Terms and Conditions** section.

Note: You can only disassociate a deal-specific term and condition from the **Deal-Specific Terms and Conditions** section.

8. Click the **Delete** (🗑) icon corresponding to the term and condition that you want to disassociate from the deal.

Note: You cannot delete a term and condition which is set as default for the hierarchy entity.

9. Click **Save**.
   The changes are made to the deal-specific terms and conditions.

Terms and Conditions

The **Terms and Conditions** screen allows you to associate, disassociate, edit, or view the terms and conditions of the deal. It also allows you to add adhoc terms and conditions for the deal. It contains the following field:

Field Name	Field Description
Deal Information	Displays the concatenated string of information about the deal.

In addition, the **Terms and Conditions** screen contains the following sections:

- **Terms and Conditions Section** - Lists the terms and conditions that are mapped to the deal. It contains the following buttons:

Button Name	Button Description
Select All	Used to select all the available terms and conditions for the deal from the list.
De-select All	Used to de-select all the terms and conditions from the list.
Refresh Terms and Conditions	Used to de-select the terms and conditions that are selected for the deal from the list.

Note: You can also select or de-select the terms and conditions by clicking the check box corresponding to the respective terms and conditions.

On clicking the **Edit** (✎) icon corresponding to the terms and conditions in the **Terms and Conditions Section** section, you can view and edit the terms and conditions of the deal.

- **Adhoc Terms and Conditions** - Used to add adhoc terms and conditions for the deal.

Deal Log and Comments

The **Deal Log and Comments** screen allows you to view the complete trail of actions performed on the deal. It also allows you to manually add a log entry for the deal. It contains the following sections:

- **Log** - The **Log** section contains the following fields:

Field Name	Field Description
Deal ID	Displays the deal ID.
Deal Information	Displays the concatenated string of deal information separated by a comma (,).

In addition, the **Log** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the deal due to which the log is created in the system.
Details	Displays the details of the actions performed on the deal.
User	Indicates the user who has performed the action on the deal.
Log Type	Indicates the type of log using which the action is performed on the deal.
Related Object	Indicates the object or entity which is created when the action is performed on the deal. **Note:** At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the action is performed on the deal.

- **Comments** - The **Comments** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the log entry is created for the deal in the system.
User	Indicates the user who has created the log entry for the deal in the system.
Comments	Displays additional information about the log entry created for the deal.
Reason	Displays the reason why the log entry is created for the deal.

In addition, the **Comments** section contains the following fields:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
Reason	Used to specify the reason why the log entry is created for the deal.
	Note: This list includes only those values which are defined in the **Approval Workflow Reason** screen where the **Reason Category** is set to **Deal General**.
Comment	Used to specify the reason for creating a new log entry for the deal.

Adding Adhoc Revenue and Cost for a Deal

Prerequisites

To add an adhoc revenue and cost for a deal, you should have:

- Currencies defined in the application
- Values defined for the **Revenue/Cost Type** and **Revenue Type** in the **REVENU_COST_GRP_FLG** and **REV_TYPE_FLG** lookup fields respectively.

Procedure

To add an adhoc revenue and cost for a deal:

Copyright © 2009, 2025, Oracle and/or its affiliates.

1. Search for the deal or deal version in the **Search Deal** zone of the **Deal Dashboard** screen for which you want to add an adhoc revenue and cost.
2. Click the **Adhoc Revenue and Cost** link at the top right corner of the **Deal Information** zone.
   The **Adhoc Revenue And Cost** screen appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence number of the adhoc revenue or cost for the deal.	Yes
Currency	Used to indicate the currency in which you want to specify the adhoc charge for the deal. **Note:** The list includes only those currencies which are defined in the system.	Yes
Amount	Used to specify the amount for the adhoc revenue or cost. **Note:** You can also specify negative value in this field.	Yes
Division	Used to indicate the division for which the adhoc charge is applicable. **Note:** You can view only those divisions to which you have access in the **Division** list.	Yes
Price Item	Used to indicate the price item for which you want to add the adhoc charge. **Note:** By default, this field is inactive. This field appears when the **Price Item Level** option is selected from the **Revenue/Cost Type** list. The **Search** (🔍) icon appears corresponding to the **Price Item** field. On clicking the **Search** icon, the **Price Item Search** window appears. On indicating the price item, the description of the price item appears corresponding to the **Price Item** field.	Yes (Conditional) **Note:** This field is required while adding adhoc revenue and cost for price items.
Revenue/Cost Type	Used to indicate the group to which the adhoc charge belongs. The valid values are: • Adhoc Revenue • Courier Cost • Deal Commission • Price Item Level • Travel Cost	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The list includes only those values which are present in the **REVENU_COST_GRP_FLG** lookup field.

	Note: The list includes only those values which are present in the **REV_TYPE_FLG** lookup field.	

3. Enter the required details in the **Adhoc Revenue And Cost** screen.
4. If you want to associate more than one adhoc revenue and cost for the deal, click the **Add** (+) icon corresponding to the adhoc revenue and cost and then repeat step 3.

Note: However, if you want to remove an adhoc revenue and cost from the deal, click the **Delete** ( ) icon corresponding to the adhoc revenue and cost.

5. Click **Save**.
The adhoc revenue and cost is added for the deal.

Note: You cannot add or edit an adhoc revenue and cost if the deal has reached the **Finalized** status.

Terms and Conditions Mapping

The **Terms and Conditions Mapping** screen enables you to associate terms and conditions with a price item, root level hierarchy entity, or non-root level hierarchy entity. It also allows you to view and edit the terms and conditions of a price item, root level hierarchy entity, or non-root level hierarchy entity. It contains the following zones:

- Terms and Conditions Mapping List on page 2971
- Terms and Conditions Mapping Details on page 2972

Terms and Conditions Mapping List

The **Terms and Conditions Mapping List** zone lists the terms and conditions that are already mapped to a price item, root-level hierarchy entity, or a non-root level hierarchy entity in the system. It contains the following columns:

Column Name	Column Description
Mapping Information	Displays the concatenated string of information about the mapped terms and conditions. **Note:** It has a link. On clicking the link, the **Terms and Conditions Mapping Details** zone appears where you can view the mapping details of the respective terms and conditions.
Mapping Entity Type	Indicates the type of entity using which the terms and conditions are mapped in the system. The valid values are: • Price Item • Non-Root Level Hierarchy Entity • Root Level Hierarchy Entity
Mapping Entity	Displays the entity to which the terms and conditions are mapped.

You can filter the list using various search criteria (such as, **Mapping ID**, **Terms and Conditions**, and **Mapping Entity Type**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

On clicking the **Broadcast** (ᯤ) icon corresponding to the terms and conditions mapping information, the **Terms and Conditions Mapping Details** zone appears with the mapping details of the respective terms and conditions.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Terms and Conditions Mapping Details

The **Terms and Conditions Mapping Details** zone displays the mapping details of the terms and conditions. It contains the following sections:

- **Main** - Displays the basic mapping information about the terms and conditions. It contains the following fields:

Field Name	Field Description
Mapping ID	Displays the mapping ID of the terms and conditions.
Mapping Entity Type	Indicates the type of entity using which the terms and conditions are mapped in the system. The valid values are: • Price Item • Non-Root Level Hierarchy Entity • Root Level Hierarchy Entity
Mapping Entity	Indicates the entity to which the terms and conditions are mapped.
Price Item	Indicates the price item to which the terms and conditions are mapped. **Note:** This field appears when the terms and conditions are mapped using the **Mapping Entity Type** as **Price Item**.
Non-Root Level Hierarchy Entity	Indicates the non-root level hierarchy entity to which the terms and conditions are mapped. **Note:** This field appears when the terms and conditions are mapped using the **Mapping Entity Type** as **Non-Root Level Hierarchy Entity**.
Root Level Hierarchy Entity	Indicates the root level hierarchy entity to which the terms and conditions are mapped. **Note:** This field appears when the terms and conditions are mapped using the **Mapping Entity Type** as **Root Level Hierarchy Entity**.

- **Record Actions** - This section contains the following button:

Button Name	Button Description
Edit	Used to edit the mapping details of the terms and conditions.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the terms and conditions are mapped to the entity. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	Note: It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

- **Terms and Conditions** - Lists the terms and conditions which are mapped to the entity. It contains the following columns:

Column Name	Column Description
Terms and Conditions	Displays the terms and conditions which are mapped to the entity.
	Note: It has a link. On clicking the link, the **Terms and Conditions** screen appears where you can view the details of the respective terms and conditions.
Start Date	Displays the date from when the terms and conditions are effective for the entity.
	Note: The start date cannot be later than the end date.
End Date	Displays the date till when the terms and conditions are effective for the entity.
	Note: The end date cannot be earlier than the start date.
Default	Indicates whether the mapped term and condition is default or not.

By default, the **Terms and Conditions Mapping Details** zone does not appear in the **Terms and Conditions Mapping** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the terms and conditions mapping information in the **Terms and Conditions Mapping List** zone.

Associating the Terms and Conditions with a Price Item

Prerequisites

To associate the terms and conditions with a price item, you should have:

- Price item with which you want to associate the terms and conditions defined in the application
- Terms and conditions defined in the application

Procedure

To associate the terms and conditions with a price item:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Deal Pricing Management** and then click **Terms and Conditions Mapping**.
   A sub-menu appears.

Copyright © 2009, 2025, Oracle and/or its affiliates.

3. Click the **Add** option from the **Terms and Conditions Mapping** sub-menu.

   The **Terms and Conditions Mapping** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity) with which you want to associate the terms and conditions. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Mapping Entity Type	Used to indicate the type of entity using which you want to associate the terms and conditions. The valid values are: • **Price Item** - Used to indicate that you want to associate the terms and conditions with a price item. • **Non-Root Level Hierarchy Entity** - Used to indicate that you want to associate the terms and conditions with a non-root level hierarchy entity. • **Root Level Hierarchy Entity** - Used to indicate that you want to associate the terms and conditions with a root level hierarchy entity.	Yes
Mapping Entity	Used to indicate the entity with which you want to associate the terms and conditions. **Note:** The **Search** (🔍) icon appears corresponding to the **Mapping Entity** field. On clicking the **Search** icon, the **Price Item Terms and Conditions Mapping Search**, **Non-Root Level Hierarchy Entity Terms and Conditions Mapping Search**, or **Root Level Hierarchy Entity Terms and Conditions Mapping Search** window appears depending upon whether you select the **Price Item**, **Non-Root Level Hierarchy Entity**, or **Root-Level Hierarchy Entity** option from the **Mapping Entity Type** field respectively. On indicating the mapping entity, the description of the mapping entity appears corresponding to the **Mapping Entity** field. This field appears when you select the mapping entity type from the **Mapping Entity Type** field.	Yes

   - **Terms and Conditions** - Used to associate the terms and conditions with the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity). It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Terms and Conditions	Used to indicate the terms and conditions that you want to associate with the entity.	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to the **Terms and Conditions** field. On clicking the **Search** icon, the **Terms and Conditions Search** window appears. On indicating the terms and conditions, the description of the terms and conditions appear corresponding to the **Terms and Conditions** field. You can search for only those terms and conditions whose **Terms and Conditions Usage** is set to **Deal** or **Invoice and Deal**.	
Start Date	Used to specify the date from when the terms and conditions are associated with the entity. **Note:** The start date cannot be later than the end date.	Yes
End Date	Used to specify the date till when the terms and conditions are associated with the entity. **Note:** The end date cannot be earlier than the start date.	No
Default	Used to indicate whether the terms and conditions should be defaulted for the entity. **Note:** You must specify atleast one default terms and conditions for an entity.	No

4. Select the **Price Item** option from the **Mapping Entity Type** field in the **Main** section.
   The **Mapping Entity** field appears.
5. Search for the price item with which you want to associate the terms and conditions in the **Mapping Entity** field.
6. Associate terms and conditions with the price item in the **Terms and Conditions** section.

   Note: The valid file extensions for associating terms and conditions are doc, xls, pdf, jpg, txt, avi, bmp, mp3 and rtf.
7. If you want to associate more than one terms and conditions with the price item, click the **Add** (+) icon.

   Note: However, if you want to disassociate the terms and conditions from the price item, click the **Delete** (🗑) icon corresponding to the respective terms and conditions.
8. Click **Save**.
   The terms and conditions are associated with the price item.

Associating the Terms and Conditions with a Root Level Hierarchy Entity

Prerequisites

To associate the terms and conditions with a root level hierarchy entity, you should have:

- Hierarchy entity with which you want to associate the terms and conditions defined in the application
- Terms and conditions defined in the application

Procedure

To associate the terms and conditions with a root level hierarchy entity:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Deal Pricing Management** and then click **Terms and Conditions Mapping**.
   A sub-menu appears.
3. Click the **Add** option from the **Terms and Conditions Mapping** sub-menu.

   The **Terms and Conditions Mapping** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity) with which you want to associate the terms and conditions. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Mapping Entity Type	Used to indicate the type of entity using which you want to associate the terms and conditions. The valid values are: • **Price Item** - Used to indicate that you want to associate the terms and conditions with a price item. • **Non-Root Level Hierarchy Entity** - Used to indicate that you want to associate the terms and conditions with a non-root level hierarchy entity. • **Root Level Hierarchy Entity** - Used to indicate that you want to associate the terms and conditions with a root level hierarchy entity.	Yes
Mapping Entity	Used to indicate the entity with which you want to associate the terms and conditions.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to the **Mapping Entity** field. On clicking the **Search** icon, the **Price Item Terms and Conditions Mapping Search**, **Non-Root Level Hierarchy Entity Terms and Conditions Mapping Search**, or **Root Level Hierarchy Entity Terms and Conditions Mapping Search** window appears depending upon whether you select the **Price Item**, **Non-Root Level Hierarchy Entity**, or **Root-Level Hierarchy Entity** option from the **Mapping Entity Type** field respectively. On indicating the mapping entity, the description of the mapping entity appears corresponding to the **Mapping Entity** field. This field appears when you select the mapping entity type from the **Mapping Entity Type** field.	

- **Terms and Conditions** - Used to associate the terms and conditions with the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity). It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Terms and Conditions	Used to indicate the terms and conditions that you want to associate with the entity. **Note:** The **Search** (🔍) icon appears corresponding to the **Terms and Conditions** field. On clicking the **Search** icon, the **Terms and Conditions Search** window appears. On indicating the terms and conditions, the description of the terms and conditions appear corresponding to the **Terms and Conditions** field. You can search for only those terms and conditions whose **Terms and Conditions Usage** is set to **Deal** or **Invoice and Deal**.	Yes
Start Date	Used to specify the date from when the terms and conditions are associated with the entity. **Note:** The start date cannot be later than the end date.	Yes
End Date	Used to specify the date till when the terms and conditions are associated with the entity.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The end date cannot be earlier than the start date.	
Default	Used to indicate whether the terms and conditions should be defaulted for the entity.	No
	Note: You must specify atleast one default terms and conditions for an entity.	

4. Select the **Root Level Hierarchy Entity** option from the **Mapping Entity Type** field in the **Main** section.
   The **Mapping Entity** field appears.
5. Search for the root level hierarchy entity with which you want to associate the terms and conditions in the **Mapping Entity** field.
6. Associate terms and conditions with the root level hierarchy entity in the **Terms and Conditions** section.

   Note: The valid file extensions for associating terms and conditions are doc, xls, pdf, jpg, txt, avi, bmp, mp3 and rtf.
7. If you want to associate more than one terms and conditions with the root level hierarchy entity, click the **Add** (+) icon.

   Note: However, if you want to disassociate the terms and conditions from the root level hierarchy entity, click the **Delete** ( ) icon corresponding to the respective terms and conditions.
8. Click **Save**.
   The terms and conditions are associated with the root level hierarchy entity.

Prerequisites

To view the terms and conditions mapping details, you should have:

- Terms and conditions mapped with the entity (i.e. price item, root level hierarchy entity, or non-root level hierarchy entity).

Procedure

To view the terms and conditions mapping details:

1. Search for the entity in the **Terms and Conditions Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the entity whose terms and conditions mapping details you want to view.
   The **Terms And Conditions Mapping Details** zone appears.
3. View the terms and conditions mapping details in the **Terms And Conditions Mapping Details** zone.

Deal Approver Dashboard

The **Deal Approver Dashboard** screen allows you to view the To Do tasks assigned to the user that belongs to the access group as defined in the approval hierarchy of the **Deal Approval Profile** screen. It also allows you to search for deals which are assigned to the user for approval. It contains the following zones:

- Deal Metrics on page 2987
- Deal To Do on page 2988
- Search Deal on page 2988

Deal Metrics

The **Deal Metrics** zone enables you to view the following information through a tiles chart for deals which are assigned to the user for approval:

- Number of deals created by the user
- Number of deals in the **Pending for Approval** status
- Number of deals yet to be finalized
- Number of deals yet to be accepted by the customer
- Number of deals accepted by the customer

Copyright © 2009, 2025, Oracle and/or its affiliates.

- Number of deals rejected by the customer

In addition, you can view the above information through a bar and line chart by toggling the **Tiles/Chart** switch available in the **Deal Metrics** zone.

The bar chart indicates the number of deals in different statuses for an existing customer, existing account, and prospect. Whereas, the line chart indicates the deal revenue from an existing customer, existing account, and prospect.

Note: By default, the above information is shown for the period which is specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the period if required.

You can filter the information using various criteria (such as, **Period From**, **Period To**, **Division**, **Customer Tier**, and **Customer Segment**) available in the **Deal Metrics** zone.

Deal To Do

The **Deal To Do** zone lists the deal approval To Do's assigned to the user that belongs to the access group as defined in the approval hierarchy of the **Deal Approval Profile** screen. It also lists the deal information for which the deal approval To Do is generated. It contains the following columns:

Column name	Column Description
To Do	On clicking the **To Do** icon (), the **To Do Entry** screen appears where you can view the details of the respective To Do assigned to the user.
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,) for which the To Do is created.
	Note: It has a link. On clicking the link, the **Deal Information** screen appears where you can perform the required action.

Note: By default, the system lists the To Do's for the user that are created in the period which is specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the period if required.

You can filter the list using various criteria (such as, **To Do Type**, **Priority**, **Start Date**, and **End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** ( ) icon in the upper right corner of this zone.

Search Deal

The **Search Deal** zone allows you to search deals for which the next required action has to be performed by the user as per the deal approval workflow. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a deal using the deal, customer, or account details. The valid values are: • Deal Details • Customer Details • Account Details **Note:** By default, the **Deal Details** option is selected.	Yes
Division	Used to search deals which are associated with a particular division to which the user belongs. **Note:** You can only view those divisions to which you have access in the **Division** list.	No
Deal ID	Used to search for a particular deal. **Note:** This field appears when the **Deal Details** option is selected from the **Search By** list.	No
Start Date	Used to search deals which are effective from a particular date onwards. **Note:** This field appears when the **Deal Details** option is selected from the **Search By** list. The start date cannot be later than the end date.	No
End Date	Used to search deals which are effective till a particular date. **Note:** This field appears when the **Deal Details** option is selected from the **Search By** list. The end date cannot be earlier than the start date.	No
Status	Used to search deals with a particular status. **Note:** This field appears when the **Deal Details** option is selected from the **Search By** list.	No
Created By	Used to search deals which are created by a particular user.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **User Search** window appears. On specifying the creator, the description of the creator appears corresponding to the **Created By** field. This field appears when the **Deal Details** option is selected from the **Search By** list.	
Customer Segment	Used to search deals which are created for customers associated to a particular business component. **Note:** This field appears when the **Customer Details** option is selected from the **Search By** list.	No
Person ID	Used to search deals which are created for a particular customer. **Note:** This field appears when the **Customer Details** option is selected from the **Search By** list.	No
Person Name	Used to search deals which are created for persons or accounts with a particular name. **Note:** This field appears when the **Customer Details** or **Account Details** option is selected from the **Search By** list.	No
Person Identifier Type	Used to search deals which are created for persons using a particular identifier type. **Note:** This field appears when the **Customer Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** If you enter person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to specify the value for the person identifier type for searching deals created for the persons. **Note:** This field appears when the **Customer Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** If you enter person identifier type as a search criteria, you have to specify the person identifier.
Account ID	Used to search deal which is created for a particular account.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when the **Account Details** option is selected from the **Search By** list.	
Account Identifier Type	Used to search deals which are created for accounts using a particular identifier type. **Note:** This field appears when the **Account Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** If you enter account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to specify the value of the account identifier type for searching deals created for accounts. **Note:** This field appears when the **Account Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** If you enter account identifier type as a search criteria, you have to select the primary account identifier.
Deal Entity	Used to search deals which are created for a particular entity. The valid values are: • **Account** - Used to search deals which are created for the existing accounts in the system. **Note:** This value appears when you select the **Deal Details** or **Account Details** option from the **Search By** list. • **Customer** - Used to search deals which are created for the existing customers in the system. **Note:** This value appears when you select the **Deal Details** or **Customer Details** option from the **Search By** list. • **Prospect** - Used to search deals which are created for the existing prospects in the system. **Note:** This value appears when you select the **Deal Details** or **Customer Details** option from the **Search By** list.	Yes (Conditional) **Note:** This field is required while searching for deals created for the respective entities.
Deal Type	Used to search deals which are created using a particular deal type.	Yes (Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Deal Type Search** window appears. On specifying the deal type, the description of the deal type appears corresponding to the **Deal Type** field. This field appears when the **Deal Details** option is selected from the **Search By** list.	**Note:** This field is required while searching deals using the **Deal Details**.
Deal Creation From Date	Used to search deals which are created from a particular date onwards. **Note:** By default, the system displays the date which is specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the date if required.	No
Deal Creation To Date	Used to search deals which are created till a particular date. **Note:** By default, the system displays the date which is specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the date if required.	No
Deal Identifier	Used to search deals which are created using a particular deal identifier. **Note:** This field appears when the **Deal Details** option is selected from the **Search By** list.	No
Assigned To My Role	Used to search only those deals to which the user has access for approval. **Note:** On clicking the check box you can search for deals as per the access group defined in the **Approval Hierarchy** of the **Deal Approval Profile** to which the user belongs.	Yes (Conditional) **Note:** This field is required while searching deals which are assigned to the user for approval.

- **Search Results** - On clicking the **Search** button, a list of deals appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	Note: It has a link. On clicking the link, the **Deal Information** screen appears where you can view the details of the respective deal.
Person Information	Displays the concatenated string of information about the main person for whom the deal is created in the system.
	Note: It has a link. On clicking the link, the **Customer 360° Information** or the **Prospect Person** screen appears where you can view the details of the respective person. The **Customer 360° Information** screen appears when you select the **Account** or **Customer** option from the **Deal Entity** list in the **Search Criteria** while searching for a deal. Whereas, the **Prospect Person** screen appears when you select the **Prospect** option from the **Deal Entity** list in the **Search Criteria** while searching for a deal.
Deal Entity	Indicates the entity for which the deal is created in the system. The valid values are: • Account • Customer • Prospect
Start Date	Displays the date from when the deal is effective for the deal entity.
End Date	Displays the date till when the deal is effective for the deal entity.
Status	Indicates the current status of the deal.
Created By	Displays the user who has created the deal in the system.
View Approval Workflow	On clicking the **View Approval Workflow** (⚯) icon, the **Deal Approval Workflow** screen appears where you can view the details of the approval workflow of the respective deal.
Print Deal	On clicking the **Print** (🖶) icon, the **Deal Extraction** screen appears where you can filter the options as per your requirement and extract the deal information in the PDF or Excel format.

Note:

By default, the **Search Results** section lists all the deals which are assigned to the user for the period as specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (⧩) icon in the upper right corner of this zone.

Searching for a Deal

Prerequisites

Copyright © 2009, 2025, Oracle and/or its affiliates.

To search for a deal, you should have:

- Divisions defined in the application
- Deals or deal versions associated with the division to which the user belongs
- Deal types defined in the application
- Deal entities defined in the application

Procedure

To search for a deal:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Deal Pricing Management** and then click **Deal Approver Dashboard**.
   The **Deal Approver Dashboard** screen appears.
3. Enter the search criteria in the **Search Deal** zone.

> **Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.
   A list of deals that meet the search criteria appears in the **Search Results** section.

> **Note:**
>
> Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.
>
> By default, the **Search Results** section lists all the deals which are assigned to user and are in the **Pending for Approval** status for the period as specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration.
>
> You must specify at least one search criterion while searching for a deal. One more search criterion is required when you are searching for a deal using the deal entity.
>
> You must specify one more search criterion when you are searching for a deal using the division with the **Deal Details** option selected from the **Search By** list.

Extracting a Deal in the PDF or Excel Format

Procedure

To extract a deal in the pdf or excel format:

1. Do either of the following:

If you want to...	Then...
Extract a deal in the PDF or Excel format from the Deal Dashboard screen	**a.** Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen. **b.** In the **Search Results** section, click the **Print** ( ) icon in the **Print Deal** column corresponding to the deal which you want to extract in the pdf or excel format. **Note:** If the deal has multiple versions, click the **Print** ( ) icon in the **Print Deal** column corresponding to the deal version in the **Deal Versions** zone.
Extract a deal in the PDF or Excel format from the Deal Information screen	**a.** Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen. **b.** In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal which you want to extract in the pdf or excel format. **Note:** If you want to extract the deal version in the pdf of excel format, click the link in the **Deal Version Information** column corresponding to the deal version from the **Deal Versions** zone. The **Deal Information** screen appears. **c.** In the **Deal Information** zone, click the **Print Deal** button.
Extract a deal in the PDF or Excel format from the Deal Approver Dashboard screen	**a.** Search for the deal in the **Search Deal** zone of the **Deal Approver Dashboard** screen. **b.** In the **Search Results** section, click the **Print** ( ) icon in the **Print Deal** column corresponding to the deal which you want to extract in the pdf or excel format.

The **Deal Extraction** screen appears. It contains the following fields:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
Extract Format	Used to specify the format in which you want to extract the deal information. The valid values are: • Excel • PDF	Yes (Conditional) **Note:** This field is required while extracting a deal in the pdf or excel format.
Extract Type	Used to indicate the type of deal information that you want to extract for publishing. The valid values are: • **External** - Used to extract deal information which is published to the customer for approval. It contains the following details: **a.** Extraction information i.e. the extraction date-time and the user who has done the extraction. **b.** Details of the filters selected for extraction. **c.** Deal details such as the deal creator user ID, deal creation date and time, deal ID, deal type, prospect/customer, currency, deal status etc. **d.** Customer hierarchy, accounts and price item details as per the filter option selected in the **Deal Extraction** screen. **e.** Price item details such as the original price with assignment level, commitments, negotiated price with assignment level, approval status, etc. **f.** Terms and conditions. **Note:** The **External** extract type controls the extraction of certain data which may or may not be published to the customer. You can select the **External** option from the **Extract Type** list when the deal is in the **Finalized**, **Customer Accepted**, **Rejected**, **Fully Orchestrated**, **Pending for Review**, or **Closed** status.	Yes (Conditional) **Note:** This field is required while extracting a deal in the pdf or excel format.
	• **Internal** - Used to extract deal information which is published for internal reviews and validations. It contains the following details: **a.** Deal summary details and Division summary details with the applicable cost, profitability, revenue and other calculations. **b.** Price item details such as the cost and revenue details etc. **c.** Adhoc revenue and cost entries.	

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: By default, the **Internal** option is selected from the **Extract Type** list for deals which are not in the **Finalized**, **Customer Accepted**, **Rejected**, **Fully Orchestrated**, **Pending for Review**, or **Closed** status. The list includes only those values which are present in the **DEAL_EXTRACT_TYPE_FLG** lookup field.	
Extract Filter	Used to indicate the price item information that you want to extract in the pdf or excel format. The valid values are: • Account • Additional Filter Criteria • All • Customer • Division • Only Hierarchy • Price Assignment Level • Price Item • Price Item Group **Note:** The list includes only those values which are present in the **DEAL_EXTRACT_FILTER_FLG** lookup field.	Yes (Conditional) **Note:** This field is required while extracting a deal in the pdf or excel format.

In addition, the **Deal Extraction** screen contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to specify the persons or prospects account for which you want to extract the price item pricing details. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Prospect Account Search** window appears where you can search for the respective account. This field appears when you select the **Account** option from the **Extract Filter** list.	Yes (Conditional) **Note:** This field is required while extracting the proposed price item pricing details of an account.
Price Item	Used to specify the price item for which you want to extract the pricing details.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Search** window appears where you can search for the respective price item. This field appears when you select the **Account**, **Customer**, and **Price Item** options from the **Extract Filter** list.	
Price Item Group Code	Used to specify the root level hierarchy entity for which you want to extract the price item pricing details. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Hierarchy Entity Search** window appears where you can search for the respective root level hierarchy entity. This field appears when you select the **Account**, **Customer**, and **Price Item Group** options from the **Extract Filter** list.	No
Proposed Price Assignment Level	Used to extract the proposed price item pricing details for a particular assignment level. **Note:** The list includes only those values which are present in the **PA_LVL_FLG** lookup field. This field appears when you select the **Account**, **Customer**, **Price Assignment Level**, **Price Item**, and **Price Item Group** options from the **Extract Filter** list. This field is disabled when you select the **Show Price Assignment for Child Entities** field check box.	No
Show Price Assignment for Child Entities	Used to indicate whether you want to extract the proposed price item price assignment details of the non-root level hierarchy entity.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when you select the **Account**, **Customer**, **Price Assignment Level**, **Price Item**, and **Price Item Group** options from the **Extract Filter** list.	
Current Approval User ID	Used to extract the details of the proposed price item pricing which is approved by a particular user. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **User Search** window appears where you can search for the respective root user. This field appears when you select the **Additional Filter Criteria** option from the **Extract Filter** list. This field is disabled when you specify the **Price Item Manager To Do Role** or **Price Approval Status**.	Yes (Conditional) **Note:** This field is required while extracting the proposed price item pricing details approved by a particular user.
Price Item Manager To Do Role	Used to extract the details of the proposed price item pricing which is assigned using a particular price item manager To Do role. **Note:** This field appears when you select the **Additional Filter Criteria** option from the **Extract Filter** list. This field is disabled when you specify the **Current Approval User ID** or **Price Approval Status**.	Yes (Conditional) **Note:** This field is required while extracting the proposed price item pricing details assigned to a particular price item manager To Do role.
Price Approval Status	Used to extract the details of the proposed price item pricing which are in a particular status. The valid values are: • Approved • Approved-Existing • Approved-Recommended • Error • Initial • Unapproved	Yes (Conditional) **Note:** This field is required while extracting the details of the proposed price item pricing in a particular status.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when you select the **Additional Filter Criteria** option from the **Extract Filter** list. This field is disabled when you specify the **Current Approval User ID** or **Price Item Manager To Do Role**.	
Person ID	Used to extract the details of the proposed price items pricing of a particular person.	Yes (Conditional)
	Note: The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Prospect Person Search** window appears where you can search for the respective person. This field appears when you select the **Additional Filter Criteria** option from the **Extract Filter** list.	**Note:** This field is required while extracting the details of the proposed price item pricing of a particular person.
Division	Used to extract the details of the proposed price items pricing from a particular division.	Yes (Conditional)
	Note: This field appears when you select the **Customer** option from the **Extract Filter** list.	**Note:** This field is required while extracting the details of the proposed price item pricing from a particular division.

2. Enter the required details in the **Deal Extraction** screen.
3. Click **Extract**.
   The deal is extracted in the pdf or excel format.

Note: You cannot extract a deal which is in the **Discarded** status.

Chapter 43

Relationship Manager Workbench

Topics:

- Relationship Manager Workbench
- Unpaid Invoices Page
- Inactive Customer Details
- Revenue Dashboard

Oracle Revenue Management and Billing provides you one-point-destination for all the relationship/account managers an unified view of all customers under a single relationship manager on a screen named **Relationship Manager Workbench**. This data can then be easily used for analysis, such as:

- Cumulated revenue, average revenue, and unpaid revenue details of the customers
- Cumulated details, active, inactive, and newly added customers under the relationship manager based on number of months that customer has done the transaction from any account
- Number of deals in difference status

In other words, this feature allows you to drill down to see or act on all current and historical revenue management and billing details. This allows you professionally and efficiently to drive the customer engagement effectively and elevate customer relationships.

Relationship Manager Workbench

The **Relationship Manager Workbench** screen is designed for a relationship manager wherein the relationship manager can obtain a holistic view of all its customers. It is designed to provide the following statistics to a relationship manager:

- Revenue Metrics on page 3005
- Customer Metrics on page 3006
- Customer Hierarchy on page 3006
- Deal Snapshot on page 3009
- Top 10 Customers by Revenue on page 3011
- Top 10 Product By Revenue on page 3012
- Top 10 Price Items by Revenue on page 3011
- Top 10 Customers Revenue Variations on page 3012

In addition, a relationship manager can also view all the assigned To Dos from the **Relationship Manager Workbench** screen.

For more information on...	**See...**
RM Workbench To Do Notification zone	RM Workbench To Do Notification on page 3010

RM Workbench

The **RM Workbench** zone allows you to search for a customer using various search criteria. It contains the following fields:

- **Search Criteria**- The **Search Criteria** contains the following fields:

Field Name	**Field Description**	**Mandatory (Yes or No)**
Period From	Used to indicate the period from when the customer is active. **Note:** By default, month and year is selected.	Yes
Period To	Used to indicate the period till when the customer is active. **Note:** By default, month and year is selected.	Yes
Relationship Manager	Used to search customers which belong to a particular relationship manager. **Note:** The list includes only those users where the **Supervisor Role Flag (C1SUPFLG)** charateristic is set to **Y**.	Yes
Division	Used to search customers which belong to a particular division.	No
Customer Segment	Used to search for a customers which belong to a particular customer segment.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The list includes only those values which are defined in the **CUST_SEG_FLG** lookup field.	
Customer Tier	Used to search for a customers which belong to a particular customer tier.	No
	Note: The list includes only those values which are defined in the **CUST_TIER_FLG** lookup field.	

Note:

You must specify at least one search criterion while searching for customers. One more search criterion is required when you are searching for customers using the division and/or customer segment.

If you have specified any other search criterion along with the system ignores the additional search criterion and searches using the respectively.

Revenue Metrics

The **Revenue Metrics** zone enables you to view the following information through a tiles chart:

- Total revenue from all the customers under the relationship manager
- Average revenue under the relationship manager
- Total bill amount from all invoices that are unpaid for all the customers under relationship manager

In addition, you can view the above information through a trend by selecting the **Trend** option available in the **Revenue Metrics** zone.

Note: By default, the above information is shown for the period which is specified in the **RM Workbench** zone. You can change the period if required.

You can filter the information using various criteria (such as, **Period From**, **Period To**, **Division**, **Customer Tier**, and **Customer Segment**) available in the **Deal Metrics** zone.

Searching for a Customer

Procedure

To search for a customer:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Relationship Manager Workbench**.
   The **Relationship Manager Workbench** screen appears.

Copyright © 2009, 2025, Oracle and/or its affiliates.

3. Enter the search criteria in the **Customer Hierarchy** zone.

> **Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.
   A list of customers that meet the search criteria appears in the **Search Results** section.

Chapter 44

Hold Request Creation, Modification, Release, and View Through Inbound Web Service

Topics:

- Prerequisites
- C1-CreateHoldRequest Business Service
- C1-GetHoldRequestHistory Business Service
- C1-ReleaseHoldRequest Business Service
- C1-UpdateHoldRequest Business Service

Oracle Revenue Management and Billing enables you to create, edit, and release a hold request through a web service. It also enables you to view the details of a hold request through a web service. You can send the hold request creation, modification, release, or view request from the external system through an inbound web service. The following business services are shipped with the product to support different hold request operations:

- **C1-CreateHoldRequest** – Used to create a hold request for a single entity (i.e. for a particular person, account, or bill). For more information, see C1-CreateHoldRequest Business Service on page 3025
- **C1-UpdateHoldRequest** – Used to edit an active hold request. For more information, see C1-UpdateHoldRequest Business Service on page 3063
- **C1-GetHoldRequestHistory** – Used to fetch the details of an active hold request with a single entity (i.e. person, account, or bill). The system enables you to track the hold request view response sent to the external system using the Inbound Web Service History feature. For more information, see C1-GetHoldRequestHistory Business Service on page 3041
- **C1-ReleaseHoldRequest** – Used to release an active hold request with a single entity (i.e. person, account, or bill). For more information, see C1-ReleaseHoldRequest Business Service on page 3054

You can create one inbound web service which supports all four operations - hold request creation, hold request update, hold request release, and hold request view. Alternatively, you can create four different inbound web services - one for hold request creation, another for hold request update, third for hold request release, and fourth for hold request view.

You can create a SOAP or REST based inbound web service. If you want to send the request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service. However, if you want to send the request in the XML format, you can create a SOAP or REST based inbound web service.

For more information on how to setup this feature, see Prerequisites on page 3024.

Prerequisites

The following table lists the prerequisites for hold request creation, modification, release, and view through an inbound web service:

If you want to...	Then...
C1-CreateHoldRequest	You need to do the following: • Define a REST or SOAP based inbound web service to call the **C1-CreateHoldRequest** business service where the HTTP Method is set to Post and the URI Component is set to **/createHold**. • Authorize the ORMB user to access the required application service • Define the required hold request type for the hold request where the **Activation Approval** flag is configured as **No**. • Define the required values for the **HOLD_REASON_FLG** lookup field. • Define the required values for the **HOLD_ENTITY_LVL_FLG** lookup field. • Define the required values for the **HOLD_PROCESS_FLG** lookup field. • Define the required characteristic types where the characteristic entity is set to **Hold Request**
C1-UpdateHoldRequest	You need to do the following: • Define a REST or SOAP based inbound web service to call the **C1-UpdateHoldRequest** business service where the HTTP Method is set to Post and the URI Component is set to **/updateHold**. • Authorize the ORMB user to access the required application service • Define the required hold request type for the hold request where the **Activation Approval** flag is configured as **No**. • Define the required values for the **HOLD_REASON_FLG** lookup field. • Define the required values for the **HOLD_ENTITY_LVL_FLG** lookup field. • Define the required values for the **HOLD_PROCESS_FLG** lookup field. • Define the required characteristic types where the characteristic entity is set to **Hold Request**
C1-GetHoldRequestHistory	You need to do the following: • Define a REST or SOAP based inbound web service to call the **C1-GetHoldRequestHistory** business service where the HTTP Method is set to Post and the URI Component is set to **/inquire**. • Authorize the ORMB user to access the required application service • Define the required hold request type for the hold request where the **Activation Approval** flag is configured as **No**. • Define the required values for the **HOLD_REASON_FLG** lookup field. • Define the required values for the **HOLD_ENTITY_LVL_FLG** lookup field. • Define the required values for the **HOLD_PROCESS_FLG** lookup field. • Define the required characteristic types where the characteristic entity is set to **Hold Request**
C1-ReleaseHoldRequest	You need to do the following: • Define a REST or SOAP based inbound web service to call the **C1-ReleaseHoldRequest** business service where the HTTP Method is set to Post and the URI Component is set to **/releaseHold**.

Copyright © 2009, 2025, Oracle and/or its affiliates.

If you want to...	Then...
	• Authorize the ORMB user to access the required application service • Define the required hold request type for the hold request where the **Release Approval** flag is configured as **No**. • Define the required values for the **HOLD_REASON_FLG** lookup field. • Define the required values for the **HOLD_ENTITY_LVL_FLG** lookup field. • Define the required values for the **HOLD_PROCESS_FLG** lookup field. • Define the required characteristic types where the characteristic entity is set to **Hold Request**

How to setup the **C1-HOLDSRCH** feature configuration	Setting the C1-HOLDSRCH Feature Configuration

C1-CreateHoldRequest Business Service

The **Create Hold Request (C1-CreateHoldRequest)** business service enables you to create a hold request for a single entity (i.e. for a particular account, bill, or person). You can call this business service from an external system through an inbound web service. If you want to send the hold request creation request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the hold request creation request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

While sending the request for hold request creation, you need to specify the following details:

- Hold request type, hold request start date, and hold request end date or hold days (which is used to calculate hold request end date if not specified)
- Entity (i.e. ACCT, BILL, or PERS) for which you want to create the hold request
- Hold reason and comments
- Entity identifiers when the entity is an account or a person, and the entity ID when the entity is a bill.
- Hold entity and hold process end dates
- Business processes (i.e. ATPY, BILL, FNDG, OVDU, REFD) which you want to hold for the entity
- Characteristics of the hold request

Points to Note:

- You must specify an active hold request type where the approval process is not configured for activation and release.
- If you do not specify the hold request type, the system, by default, considers the hold request type specified in the **Default Hold Request Type for IWS** option type of the **C1-HOLDSRCH** feature configuration.
- This business service does not allow you to create past dated or future dated hold request. Therefore, you must always set the hold request start date to the system date.
- Even if you explicitly specify a value for the defer processing count in the hold request type, it is no longer considered by this business service while creating a hold request.
- The upstream system may provide the hold request type to override the default hold request type, mentioned in the hold request inbound web service.
- If the hold request is in **DRAFT** status, this business service continues to operate in the background until the status of the hold request is set to **ACTIVE**.

On creating a hold request, the status of the hold request is set to **ACTIVE**. Once the hold request is created through the service, the hold request ID is sent in the response along with its status. The system enables you to track the hold request

Hold Request Creation Request and Response - Tags in XML Format

Note: We recommend you to refer theHold Request Creation Request in the XML Format on page 3026 and Hold Request Creation Response in the XML Format on page 3027 topics in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1-CreateHoldRequest** business service through an inbound web service, you need to ensure that the hold request creation request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-CreateHoldRequest	Used to indicate that you want to invoke the **C1-CreateHoldRequest** business service.	Yes
holdRequest	Used to specify the details of the hold request.	Yes
sourceSystem	Used to indicate the external system from which the hold creation request is sent. **Note:** You must specify an external system which is already defined in the system. The external system is used when the **Inbound Web Service History** feature is enabled. The specified external system should match the external system which is associated with the outbound message type specified in the **C1-IWSHIST** algorithm. If the external system is not specified in the hold request creation request, the system, by default, stamps the external system associated with the outbound message type (specified in the **C1-IWSHIST** algorithm) corresponding to the record in the **C1_IWS_HIST** table. For more information, see Inbound Web Service History.	No
externalTransactionId	Used to indicate the transaction in the external system through which the hold request creation request is sent. **Note:** The external transaction ID is used when the **Inbound Web Service History** feature is enabled.	No
externalSourceId	Used to specify the external source system ID.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
	Note: The external source system ID is used when the **Inbound Web Service History** feature is enabled.	
holdStartDate	Used to specify the date from when the hold request is effective.	Yes
holdEndDate	Used to specify the date till when the hold request is effective.	Yes (Conditional)
	Note: The hold request end date must be either derived or provided by the upstream system before creating a hold request in an **Active** status.	**Note:** This data is required if the **holdDays** is not specified.
holdDays	Used to specify the number of days an entity should be kept on hold in the hold request.	Yes (Conditional)
	Note: If the **holdEndDate** is not specified, the system calculates the **holdEndDate** by adding the **holdDays** to the **holdStartDate**. The system considers the **holdDays** as calendar days which include all the 7 days in a week.	**Note:** This data is required if **holdEndDate** is not specified.
holdRequestType	Used to specify an active hold request type where the approval process is not configured for activation and release.	No
	Note: If an active hold request type is used where the approval process is configured, the system throws an error with a failure response.	
holdEntity	Used to indicate the type of the entity for which you want to create the hold request. The valid values are: • **ACCT** - Used when you want to specify the account. • **BILL** - Used when you want to specify the bill. • **PERS** - Used when you want to specify the person.	Yes
	Note: • If you are creating the hold request for an ACCT entity then you can add **Auto Pay**, **Bill Generation**, **Delinquency**, **Funding**, **Overdue** and **Refund** process in the hold request. • If you are creating the hold request for a **BILL** entity then you can only add **Funding** process in the hold request. • If you are creating the hold request for a **PERS** entity then you can add **Bill Generation**, **Delinquency** and **Funding** process in the hold request. You must specify a value which is already defined in the **HOLD_ENTITY_LVL_FLG** lookup field. It must be in the **Active** status.	
holdReason	Used to specify the reason why you want to hold the entity.	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
	Note: You must specify a value which is already defined in the **HOLD_REASON_FLG** lookup field and is in the **Active** status.	
holdComments	Used to specify additional information about the hold request.	No
entityIdentifierType	Used to specify the entity type.	Yes (Conditional)
	Note: You cannot specify **BILL** as a type for the entity identifier.	**Note:** This data is required while defining or editing a hold request.
entityIdentifierValue	Used to specify the entity identifier (i.e. account or person).	Yes (Conditional)
	Note: You cannot specify **BILL** as a value for the entity identifier.	**Note:** This data is required while defining or editing a hold request.
entityId	Used to specify a list of entities for which you want to create a hold request.	Yes (Conditional)
	Note: You need to specify the entity ID when the hold entity is **BILL**.	**Note:** This data is required while defining or editing a hold request.
holdEntityEndDate	Used to specify the date till when the entity is effective for hold request.	No
hierarchySwitch	Used to associate the hold entity with the entity hierarchy relationship.	No
holdProcessData	Used to specify process information for the hold request.	Yes
holdProcess	Used to specify the process that you want to keep on hold for an entity through a hold request. The valid values are: • **ATPY** - Used when you want to specify the auto pay process. • **BILL** - Used when you want to specify the bill generation process. • **DELQ** - Used when you want to specify the delinquency process. • **FNDG** - Used when you want to specify the funding process. • **OVDU** - Used when you want to specify the overdue process. • **REFD** - Used when you want to specify the refund process.	Yes
	Note: You must specify a value which is already defined in the **HOLD_PROCESS_FLG** lookup field. It must be in the **Active** status.	
holdProcessEndDate	Used to specify the date till when the process of an entity is kept on hold.	No
characteristics	Used to specify a characteristic for the hold request.	Yes
characteristicType	Used to indicate the characteristic type.	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
	Note: You must specify a characteristic type where the characteristic entity is set to **Hold Request**.	
characteristicValue	Used to specify the value for the characteristic type.	Yes
effectiveDate	Used to specify the date from when the characteristic is effective.	Yes

The following table lists and describes the tags which appear in the hold request creation response in the XML format:

Tag Name	Tag Description
statusCd	Indicates whether the hold request creation request is successfully processed or not. The valid values are: • Success • Failure
holdRequestId	Displays the hold request ID.
holdStatus	Indicates the current status of the hold request.
messageText	Indicates the error that occurred while creating the hold request.
	Note: This tag appears when the value in the **statusCd** tag is set to **Failure**.

Attribute Name	Attribute Description	Mandatory (Yes or No)
		Note: This data is required while defining or editing a hold request.
entityId	Used to specify a list of entities for which you want to create a hold request. **Note:** You need to specify the entityId when **BILL** is used as a hold entity.	Yes (Conditional) **Note:** This data is required while defining or editing a hold request.
holdEntityEndDate	Used to specify the date till when the entity is effective for hold request.	No
hierarchySwitch	Used to associate the hold entity with the entity hierarchy relationship.	No
holdProcessData	Used to specify process information for the hold request.	Yes
holdProcess	Used to specify the process that you want to keep on hold in the hold request. The valid values are: • **ATPY** - Used when you want to specify the auto pay process. • **BILL** - Used when you want to specify the bill generation process. • **DELQ** - Used when you want to specify the delinquency process. • **FNDG** - Used when you want to specify the funding process. • **OVDU** - Used when you want to specify the overdue process. • **REFD** - Used when you want to specify the refund process. **Note:** You must specify a value which is already defined in the **HOLD_PROCESS_FLG** lookup field. It must be in the **Active** status.	Yes
holdProcessEndDate	Used to specify the date till when the entity is effective for hold request.	No
characteristics	Used to specify a characteristic for the hold request.	Yes
characteristicType	Used to indicate the characteristic type. **Note:** You must specify a characteristic type where the characteristic entity is set to **Hold Request** and which is associated with the hold request type.	Yes
characteristicValue	Used to specify the value for the characteristic type.	Yes
effectiveDate	Used to specify the date from when the characteristic is effective.	Yes

The following table lists and describes the tags which appear in the hold request creation response in the JSON format:

Attribute Name	Attribute Description
statusCd	Indicates whether the hold request creation request is successfully processed or not. The valid values are:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Attribute Name	Attribute Description
	• Success • Failure
holdRequestId	Displays the hold request ID.
holdStatus	Indicates the current status of the hold request.
messageText	Indicates the error that occurred while creating the hold request. **Note:** This tag appears when the value in the **statusCd** tag is set to **Failure**.

C1-GetHoldRequestHistory Business Service

The **Inquire Hold Request Details (C1-GetHoldRequestHistory)** business service enables you to view the details of an active hold request for a single entity (i.e. person, account, or bill). You can call this business service from an external system through an inbound web service. If you want to send the hold request view request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the hold request view request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

While sending the hold request view request, you need to specify the following details:

- Either the entity identifier type and entity identifier value or the entity ID.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Note: Specify a valid entity ID in the hold request view request which is used in the system.

The system enables you to track the hold request view response sent to the external system using the Inbound Web Service History feature. For more information, see Inbound Web Service History

Hold Request View Request and Response - Tags in XML Format

Note: We recommend you to refer the Hold Request View Request in the XML Format on page 3042 and Hold Request View Response in the XML Format on page 3043 topics in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1-GetHoldRequestHistory** business service through an inbound web service, you need to ensure that the hold request view request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-GetHoldRequestHistory	Used to indicate that you want to invoke the **C1-GetHoldRequestHistory** business service.	Yes
getHoldReqHistRequest	Used to specify the details of the hold request which you want to view.	Yes
sourceSystem	Used to indicate the external system from which the hold view request is received. **Note:** You must specify an external system which is already defined in the system. The external system is used when the **Inbound Web Service History** feature is enabled. The specified external system should match the external system which is associated with the outbound message type specified in the **C1-IWSHIST** algorithm. If the external system is not specified in the hold request view request, the system, by default, stamps the external system associated with the outbound message type (specified in the **C1-IWSHIST** algorithm) corresponding to the record in the **C1_IWS_HIST** table. For more information, see Inbound Web Service History.	No
c1ExternalTransactionId	Used to indicate the transaction in the external system through which the hold request view request is sent. **Note:** The external transaction ID is used when the **Inbound Web Service History** feature is enabled.	No
externalSourceId	Used to specify the external source system ID.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
	Note: The external source system ID is used when the **Inbound Web Service History** feature is enabled.	
getHoldReqStartDt	Used when you want to view hold request details which are created from a particular date onwards.	Yes
getHoldReqEndDt	Used when you want to view hold request details which are created till a particular date.	No
getHoldReqEntity	Used when you want to view the hold request details for a particular entity. The valid values are: • **ACCT** • **BILL** • **PERS**	Yes
getHoldReqReason	Used when you want to view the hold request details based on a specific reason. **Note:** You must specify a value which is already defined in the **HOLD_REASON_FLG** lookup field and is in the **Active** status.	Yes
getHoldReqEntIdentType	Used to specify the entity type. **Note:** You cannot specify **BILL** as a type for the entity identifier.	Yes (Conditional) **Note:** This data is required while viewing a hold request.
getHoldReqEntIdentValue	Used to specify the entity identifier (i.e. account or person). **Note:** You cannot specify **BILL** as a value for the entity identifier.	Yes (Conditional) **Note:** This data is required while viewing a hold request.
getHoldReqEntityId	Used to specify a list of entities for which you want to create a hold request. **Note:** You need to specify the entityId when **BILL** is used as a hold entity.	Yes (Conditional) **Note:** This data is required while viewing a hold request.
getHoldReqProcess	Used when you want to view the hold request details for a specific process. The valid values are: • **ATPY** • **BILL** • **DELQ** • **FNDG** • **OVDU** • **REFD**	Yes

The following table lists and describes the tags which appear in the hold request view response in the XML format:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description
holdReqHistResponse	Displays the response returned by the business service in relation to the hold request.
statusCd	Indicates whether the hold request view request is successfully processed or not. The valid values are: • Success • Failure
messageText	Indicates the error that occurred while creating the hold request. **Note:** This tag appears when the value in the **statusCd** tag is set to **Failure**.
holdReqHistList	Displays the details of a hold request.
holdRequestId	Displays the hold request ID.
holdReqStartDt	Displays the date from when the hold request was effective.
holdReqEndDt	Displays the date till when the hold request was effective.
holdStatus	Indicates the current status of the hold request.
holdReqType	Indicates the type using which the hold request was created.
holdReqReason	Indicates the reason which was specified when the hold request was created.
holdReqEntity	Indicates the entity for which the hold request was created.
holdReqProcesses	Indicates the process which was kept on hold in the hold request.

Hold Request View Request and Response - Attribute/Value Pairs in JSON Format

Note: We recommend you to refer the Hold Request View Request in the JSON Format on page 3046 and Hold Request View Response in the JSON Format on page 3047 topics in parallel while understanding the below mentioned attributes. This will help you to understand how the attribute/value pairs are structured in the JSON format.

Before calling the **C1-GetHoldRequestHistory** business service through an inbound web service, you need to ensure that the hold request view request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-GetHoldRequestHistory	Used to indicate that you want to invoke the **C1-GetHoldRequestHistory** business service.	Yes
getHoldReqHistRequest	Used to specify the details of the hold request which you want to view.	Yes
sourceSystem	Used to indicate the external system from which the hold view request is received. **Note:** You must specify an external system which is already defined in the system. The external system is used when the **Inbound Web Service History** feature is enabled. The specified external system should match the external system which is associated with the outbound message type specified in the **C1-IWSHIST** algorithm. If the external system is not specified in the hold request view request, the system, by default, stamps the external system associated with the outbound message type (specified in the **C1-IWSHIST** algorithm) corresponding to the record in the **C1_IWS_HIST** table. For more information, see Inbound Web Service History.	No
c1ExternalTransactionId	Used to indicate the transaction in the external system through which the hold request view request is sent. **Note:** The external transaction ID is used when the **Inbound Web Service History** feature is enabled.	No
externalSourceId	Used to specify the external source system ID.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
	Note: The external source system ID is used when the **Inbound Web Service History** feature is enabled.	
getHoldReqStartDt	Used when you want to view hold request details which are created from a particular date onwards.	Yes
getHoldReqEndDt	Used when you want to view hold request details which are created till a particular date.	No
getHoldReqEntity	Used when you want to view the hold request details for a particular entity. The valid values are: • **ACCT** • **BILL** • **PERS**	Yes
getHoldReqReason	Used when you want to view the hold request details based on a specific reason. **Note:** You must specify a value which is already defined in the **HOLD_REASON_FLG** lookup field and is in the **Active** status.	Yes
getHoldReqEntIdentType	Used to specify the entity type. **Note:** You cannot specify **BILL** as a type for the entity identifier.	Yes (Conditional) **Note:** This data is required while viewing a hold request.
getHoldReqEntIdentValue	Used to specify the entity identifier (i.e. account or person). **Note:** You cannot specify **BILL** as a value for the entity identifier.	Yes (Conditional) **Note:** This data is required while viewing a hold request.
getHoldReqEntityId	Used to specify a list of entities for which you want to create a hold request. **Note:** You need to specify the entityId when **BILL** is used as a hold entity.	Yes (Conditional) **Note:** This data is required while viewing a hold request.
getHoldReqProcess	Used when you want to view the hold request details for a specific process. The valid values are: • **ATPY** • **BILL** • **DELQ** • **FNDG** • **OVDU**	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
	• **REFD**	

The following table lists and describes the tags which appear in the hold request view response in the XML format:

Tag Name	Tag Description
holdReqHistResponse	Displays the response returned by the business service in relation to the hold request.
statusCd	Indicates whether the hold request view request is successfully processed or not. The valid values are: • Success • Failure
messageText	Indicates the error that occurred while creating the hold request. **Note:** This tag appears when the value in the **statusCd** tag is set to **Failure**.
holdReqHistList	Displays the details of a hold request.
holdRequestId	Displays the hold request ID.
holdReqStartDt	Displays the date from when the hold request was effective.
holdReqEndDt	Displays the date till when the hold request was effective.
holdStatus	Indicates the current status of the hold request.
holdReqType	Indicates the type using which the hold request was created.
holdReqReason	Indicates the reason which was specified when the hold request was created.
holdReqEntity	Indicates the entity for which the hold request was created.
holdReqProcesses	Indicates the process which was kept on hold in the hold request.

Sample Hold Request View Request and Response in the XML Format

Using the below example, you can view a hold request for the **ACCT** account entity where **ATPY** auto pay process is on hold.

Sample Hold Request View Request in the XML Format

```
<C1-GetHoldRequestHistory>
    <getHoldReqHistRequest>
        <sourceSystem>SIMPLE_PRIME_HOLD</sourceSystem>
        <externalSourceId>ESI1</externalSourceId>
        <c1ExternalTransactionId>ETI1</c1ExternalTransactionId>
        <getHoldReqStartDt>2022-01-01</getHoldReqStartDt>
        <getHoldReqEndDt></getHoldReqEndDt>
```

Copyright © 2009, 2025, Oracle and/or its affiliates.

```
        <getHoldReqEntity>ACCT</getHoldReqEntity>
        <getHoldReqReason>TORNADO_IN_TX</getHoldReqReason>
        <getHoldReqEntIdentType>SSN_NO</getHoldReqEntIdentType>
        <getHoldReqEntIdentValue>987-65-4321</getHoldReqEntIdentValue>
        <getHoldReqEntityId>003526636627</getHoldReqEntityId>
        <getHoldReqProcess>ATPY</getHoldReqProcess>
    </getHoldReqHistRequest>
</C1-GetHoldRequestHistory>
```

Sample Hold Request View Response in the XML Format

The following information is received as response when the hold request is processed successfully.

```
<C1-GetHoldRequestHistory>
    <getHoldReqHistRequest>
        <sourceSystem>SIMPLE_PRIME_HOLD</sourceSystem>
        <externalSourceId>ESI1</externalSourceId>
        <c1ExternalTransactionId>ETI1</c1ExternalTransactionId>
        <getHoldReqStartDt>2022-01-01</getHoldReqStartDt>
        <getHoldReqEndDt></getHoldReqEndDt>
        <getHoldReqEntity>ACCT</getHoldReqEntity>
        <getHoldReqReason>TORNADO_IN_TX</getHoldReqReason>
        <getHoldReqEntIdentType>SSN_NO</getHoldReqEntIdentType>
        <getHoldReqEntIdentValue>987-65-4321</getHoldReqEntIdentValue>
        <getHoldReqEntityId>003526636627</getHoldReqEntityId>
        <getHoldReqProcess>ATPY</getHoldReqProcess>
    </getHoldReqHistRequest>
    <holdReqHistResponse>
        <statusCd>SUCCESS</statusCd>
        <messageText></messageText>
        <holdReqHistList>
            <holdReqId>006046575162</holdReqId>
            <holdReqStartDt>2022-01-01</holdReqStartDt>
            <holdReqEndDt></holdReqEndDt>
            <holdReqStatus>ACTIVE</holdReqStatus>
            <holdReqType>HOLD_WITHOUT_APPROVAL</holdReqType>
            <holdReqReason>TORNADO_IN_TX</holdReqReason>
            <holdReqEntity>003526636627</holdReqEntity>
            <holdReqProcesses>ATPY</holdReqProcesses>
        </holdReqHistList>
    </holdReqHistResponse>
</C1-GetHoldRequestHistory>
```

The following information is received from the hold request when the requested search parameters fail to return any search results.

```
<C1-GetHoldRequestHistory>
    <getHoldReqHistRequest>
        <sourceSystem>SIMPLE_PRIME_TEST</sourceSystem>
        <externalSourceId>ESI55</externalSourceId>
        <c1ExternalTransactionId>ETI33</c1ExternalTransactionId>
        <getHoldReqStartDt>2021-12-01</getHoldReqStartDt>
        <getHoldReqEndDt></getHoldReqEndDt>
        <getHoldReqEntity>PERS</getHoldReqEntity>
        <getHoldReqReason>FLOODS_IN_TX</getHoldReqReason>
        <getHoldReqEntIdentType>SSN_NO</getHoldReqEntIdentType>
        <getHoldReqEntIdentValue>987-65-4323</getHoldReqEntIdentValue>
        <getHoldReqEntityId>004556623427</getHoldReqEntityId>
        <getHoldReqProcess>ATPY</getHoldReqProcess>
    </getHoldReqHistRequest>
    <holdReqHistResponse>
        <statusCd>FAILURE</statusCd>
```

Copyright © 2009, 2025, Oracle and/or its affiliates.

```
        <messageText>The system could not retrieve hold request ID based '
on the search parameters.
        </messageText>
        <holdReqHistList>
            <holdReqId></holdReqId>
            <holdReqStartDt></holdReqStartDt>
            <holdReqEndDt></holdReqEndDt>
            <holdReqStatus></holdReqStatus>
            <holdReqType></holdReqType>
            <holdReqReason></holdReqReason>
            <holdReqEntity></holdReqEntity>
            <holdReqProcesses></holdReqProcesses>
        </holdReqHistList>
    </holdReqHistResponse>
</C1-GetHoldRequestHistory>
```

Note: We have given the above request and response samples to illustrate how the tags should be nested while sending a hold view request from the external system. However, you should not seamlessly use this request sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

C1-ReleaseHoldRequest Business Service

The **Release Hold Request (C1-ReleaseHoldRequest)** business service enables you to release an active hold request for a single entity (i.e. person, account, or bill). You can call this business service from an external system through an inbound web service. If you want to send the hold request release request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the hold request release request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

While sending the hold request release request, you need to specify the following details:

- Hold request ID
- Hold release reason and comments

Once the hold request is released through this business service, the hold request ID is sent in the response along with its status and end date. Note that the hold request end date is set to the system date. The system enables you to track the hold request release response sent to the external system using the Inbound Web Service History feature. For more information, see Inbound Web Service History

For more information, see Inbound Web Service History.	No
externalTransactionId	Used to indicate the transaction in the external system through which the hold request release request is sent. **Note:** The external transaction ID is used when the **Inbound Web Service History** feature is enabled.	No
externalSourceId	Used to specify the external source system ID. **Note:** The external source system ID is used when the **Inbound Web Service History** feature is enabled.	No
holdRequestId	Used to specify the hold request ID of the hold request for which the hold request release request is sent. **Note:** You must specify the hold request ID which is already defined in the system.	Yes
holdReleaseReason	Used to specify the reason for releasing the hold request. **Note:** You must specify a value which is already defined in the **HOLD_REASON_FLG** lookup field. It must be in the **Active** status.	Yes
holdComments	Used to specify additional information about the hold request.	No

The following table lists and describes the tags which appear in the hold request view response in the XML format:

Tag Name	Tag Description
requestProcessStatus	Indicates whether the hold request view request is successfully processed or not. The valid values are: • Success

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description
	• Failure
holdRequestId	Displays the hold request ID.
holdReleaseReason	Indicates the reason which was specified when the hold request was released.
holdComments	Displays additional information about the hold request.
errormsg	Indicates the error that occurred while creating the hold request. **Note:** This tag appears when the value in the **requestProcessStatus** tag is set to **Failure**.
holdEndDate	Displays the date till when the hold request was effective.
holdStatus	Indicates the current status of the hold request.

Hold Request Release Request and Response - Tags in JSON Format

Note: We recommend you to refer the Hold Request Release Request in the JSON Format on page 3058 and Hold Request Release Response in the JSON Format on page 3059 topics in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1-ReleaseHoldRequest** business service through an inbound web service, you need to ensure that the hold request view request contains the following tags:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
C1-ReleaseHoldRequest	Used to indicate that you want to invoke the **C1-ReleaseHoldRequest** business service.	Yes
sourceSystem	Used to indicate the external system from which the hold release request is received. **Note:** You must specify an external system which is already defined in the system. The external system is used when the **Inbound Web Service History** feature is enabled. The specified external system should match the external system which is associated with the outbound message type specified in the **C1-IWSHIST** algorithm. If the external system is not specified in the hold request view request, the system, by default, stamps the external system associated with the outbound message type (specified in the **C1-IWSHIST** algorithm) corresponding to the record in the **C1_IWS_HIST** table. For more information, see Inbound Web Service History.	No
externalTransactionId	Used to indicate the transaction in the external system through which the hold request release request is sent. **Note:** The external transaction ID is used when the **Inbound Web Service History** feature is enabled.	No
externalSourceId	Used to specify the external source system ID. **Note:** The external source system ID is used when the **Inbound Web Service History** feature is enabled.	No
holdRequestId	Used to specify the hold request ID of the hold request for which the hold request release request is sent. **Note:** You must specify the hold request ID which is already defined in the system.	Yes
holdReleaseReason	Used to specify the reason for releasing the hold request. **Note:** You must specify a value which is already defined in the **HOLD_REASON_FLG** lookup field. It must be in the **Active** status.	Yes
holdComments	Used to specify additional information about the hold request.	No

The following table lists and describes the tags which appear in the hold request view response in the XML format:

Tag Name	Tag Description
requestProcessStatus	Indicates whether the hold request view request is successfully processed or not. The valid values are: • Success

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description
	• Failure
holdRequestId	Displays the hold request ID.
holdReleaseReason	Indicates the reason which was specified when the hold request was released.
holdComments	Displays additional information about the hold request.
errormsg	Indicates the error that occurred while creating the hold request.
	Note: This tag appears when the value in the **requestProcessStatus** tag is set to **Failure**.
holdEndDate	Displays the date till when the hold request was effective.
holdStatus	Indicates the current status of the hold request.

Sample Hold Request Release Request and Response in the XML Format

Using the below example, you can release a hold request with an **Active** status for the **22559977334488** hold request ID.

Sample Hold Request Release Request in the XML Format

```
<C1-ReleaseHoldRequest>
    <sourceSystem>SRC_AMER_PRIME</sourceSystem>
    <externalTransactionId>ETI44</externalTransactionId>
    <externalSourceId>ESI77</externalSourceId>
    <holdRequestId>22559977334488</holdRequestId>
    <holdReleaseReason>TROPICAL_CYCLONE</holdReleaseReason>
    <holdComments>CYCLONE PHENOMENON WAS SEEN</holdComments>
 </C1-ReleaseHoldRequest>
```

Sample Hold Request Release Response in the XML Format

The following information is received as response when the hold request is processed successfully.

```
<C1-ReleaseHoldRequest>
    <requestProcessStatus>SUCCESS</requestProcessStatus>
    <sourceSystem>SRC_AMER_PRIME</sourceSystem>
    <externalTransactionId>ETI44</externalTransactionId>
    <externalSourceId>ESI77</externalSourceId>
    <holdRequestId>22559977334488</holdRequestId>
    <holdReleaseReason>TROPICAL_CYCLONE</holdReleaseReason>
    <holdComments>CYCLONE PHENOMENON WAS SEEN</holdComments>
    <holdEndDate>2022-31-01</holdEndDate>
    <holdRequestStatus>RELEASE</holdRequestStatus>
    <errormsg></errormsg>
 </C1-ReleaseHoldRequest>
```

Copyright © 2009, 2025, Oracle and/or its affiliates.

The following information is received from the hold request when the hold request ID passed in the release request is invalid.

```
<C1-ReleaseHoldRequest>
    <requestProcessStatus>FAILURE</requestProcessStatus>
    <sourceSystem>SRC_AMER_PRIME</sourceSystem>
    <externalTransactionId>ETI44</externalTransactionId>
    <externalSourceId>ESI77</externalSourceId>
    <holdRequestId>790420762397</holdRequestId>
    <holdReleaseReason>TROPICAL_CYCLONE</holdReleaseReason>
    <holdComments>CYCLONE PHENOMENON WAS SEEN</holdComments>
    <holdEndDate></holdEndDate>
    <holdRequestStatus></holdRequestStatus>
    <errormsg>The hold request ID 790420762397 is invalid</errormsg>
 </C1-ReleaseHoldRequest>
```

Note: We have given the above request and response samples to illustrate how the tags should be nested while sending a hold release request from the external system. However, you should not seamlessly use this request sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Sample Hold Request Release Request and Response in the JSON Format

Using the below example, you can release a hold request with an **Active** status for the **44776611339988** hold request ID.

Sample Hold Request View Request in the JSON Format

```
{
    -"C1-ReleaseHoldRequest":
    {
        -"sourceSystem": -"SRC_PANAMER_PRIME"
        -"externalTransactionId": -"ETI01"
        -"externalSourceId": -"ESI05"
        -"holdRequestId": -"44776611339988"
        -"holdReleaseReason": -"FLOODS"
        -"holdComments": -"HEAVY FLOODS IN DOWNTOWN"
    -}
}
```

Sample Hold Request Release Response in the JSON Format

```
{
    -"C1-ReleaseHoldRequest":
    {
        -"requestProcessStatus": -"SUCCESS"
        -"sourceSystem": -"SRC_PANAMER_PRIME"
        -"externalTransactionId": -"ETI01"
        -"externalSourceId": -"ESI05"
        -"holdRequestId": -"44776611339988"
        -"holdReleaseReason": -"FLOODS"
        -"holdComments": -"HEAVY FLOODS IN DOWNTOWN"
```

Copyright © 2009, 2025, Oracle and/or its affiliates.

```
        -"holdEndDate": -"2022-02-28"
        -"holdRequestStatus": -"RELEASE"
        -"errormsg": -""
    -}
}
```

The following information is received from the hold request when the hold request ID passed in the release request is invalid.

```
{
    -"C1-ReleaseHoldRequest":
    {
        -"requestProcessStatus": -"FAILURE"
        -"sourceSystem": -"SRC_PANAMER_PRIME"
        -"externalTransactionId": -"ETI01"
        -"externalSourceId": -"ESI05"
        -"holdRequestId": -"55772211339988"
        -"holdReleaseReason": -"FLOODS"
        -"holdComments": -"HEAVY FLOODS IN DOWNTOWN"
        -"holdEndDate": -""
        -"holdRequestStatus": -""
        -"errormsg": -"The hold request ID 55772211339988 is invalid"
    -}
}
```

Note: We have given the above request and response samples to illustrate how the attribute value pairs should be structured while sending a hold release request from the external system. However, you should not seamlessly use this request sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

C1-UpdateHoldRequest Business Service

The **Update Hold Request (C1-UpdateHoldRequest)** business service enables you to edit an active hold request. You can call this business service from an external system through an inbound web service. If you want to send the hold request update request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the hold request update request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

While sending the hold request update request, you need to specify the following details:

- Hold request ID
- Hold entity ID (i.e. person ID, account ID, or bill ID)

Through this service, you can edit the following details of an active hold request:

- End date, comments, and characteristics of a hold request
- End date of a single hold entity in a hold request
- End date of multiple hold processes in a hold request

Copyright © 2009, 2025, Oracle and/or its affiliates.

Once the hold request is edited through the service, the hold request ID is sent in the response. The system enables you to track the hold request release response sent to the external system using the Inbound Web Service History feature. For more information, see Inbound Web Service History

Hold Request Update Request and Response - Tags in XML Format

Note: We recommend you to refer the Hold Request Update Request in the XML Format on page 3064 and Hold Request Update Response in the XML Format on page 3065 topics in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1-UpdateHoldRequest** business service through an inbound web service, you need to ensure that the hold request update request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-UpdateHoldRequest	Used to indicate that you want to invoke the **C1-UpdateHoldRequest** business service.	Yes
sourceSystem	Used to indicate the external system from which the hold update request is received. **Note:** You must specify an external system which is already defined in the system. The external system is used when the **Inbound Web Service History** feature is enabled. The specified external system should match the external system which is associated with the outbound message type specified in the **C1-IWSHIST** algorithm. If the external system is not specified in the hold request update request, the system, by default, stamps the external system associated with the outbound message type (specified in the **C1-IWSHIST** algorithm) corresponding to the record in the **C1_IWS_HIST** table. For more information, see Inbound Web Service History.	No
externalTransactionId	Used to indicate the transaction in the external system through which the hold request update request is sent. **Note:** The external transaction ID is used when the **Inbound Web Service History** feature is enabled.	No
externalSourceId	Used to specify the external source system ID.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
	Note: The external source system ID is used when the **Inbound Web Service History** feature is enabled.	
holdRequestId	Used to specify the hold request ID of the hold request for which the hold request update request is sent. **Note:** You must specify the hold request ID which is already defined in the system.	Yes
holdComments	Used to specify additional information about the hold request.	No
holdEndDate	Used to specify the date till when the hold request is effective. **Note:** The hold request end date must be either derived or provided by the upstream system before creating a hold request in an **Active** status. The hold request end date cannot be earlier than the hold process end date.	No
entityId	Used to specify a list of entities for which you want to create a hold request. **Note:** You need to specify the entity ID when the hold entity is **BILL**.	No
entityEndDate	Used to specify the date till when the entity is effective for hold request. **Note:** The entity end date cannot be later than the hold end date and earlier than the hold process end date. The entity end date cannot be later than the system date. At present, you can only update the end date of a single entity specified in the hold request update request. If there are two or more entities on hold, you need to initiate a separate hold request update request for each entity in order to update its respective end date.	No
holdProcessData	Used to specify the details of the hold process.	No
holdProcess	Used to specify the process that you want to keep on hold for an entity through a hold request. The valid values are: • **ATPY** - Used when you want to specify the auto pay process. • **BILL** - Used when you want to specify the bill generation process. • **DELQ** - Used when you want to specify the delinquency process. • **FNDG** - Used when you want to specify the funding process.	Yes (Conditional) **Note:** This data is required while updating the hold request information.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
	• **OVDU** - Used when you want to specify the overdue process. • **REFD** - Used when you want to specify the refund process. **Note:** You must specify a value which is already defined in the **HOLD_PROCESS_FLG** lookup field. It must be in the **Active** status.	
holdProcessEndDate	Used to specify the date till when the process of an entity is kept on hold. **Note:** The hold process end date cannot be later than the hold end date. At present, you can only update the end date of a single process specified in the hold request update request. If there are two or more processes on hold, you need to initiate a separate hold request update request for each process in order to update its respective end date.	No
characteristics	Used to specify a characteristic for the hold request.	Yes (Conditional) **Note:** This data is required while updating the hold request information.
action	Used to specify the action to be performed on the characteristic. The valid values are: • **Update** • **Delete**	Yes (Conditional) **Note:** This data is required while updating the hold request information.
characteristicType	Used to indicate the characteristic type. **Note:** You must specify a characteristic type where the characteristic entity is set to **Hold Request**.	Yes (Conditional) **Note:** This data is required while updating the hold request information.
characteristicValue	Used to specify the value for the characteristic type. **Note:** You must specify a characteristic value which is associated with the characteristic type and is present in the system.	Yes (Conditional) **Note:** This data is required while updating the hold request information.
effectiveDate	Used to specify the date from when the characteristic is effective.	Yes (Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
		Note: This data is required while updating the hold request information.

The following table lists and describes the tags which appear in the hold request view response in the XML format:

Tag Name	Tag Description
requestProcessStatus	Indicates whether the hold request update request is successfully processed or not. The valid values are: • Success • Failure
holdRequestId	Displays the hold request ID.
errormsg	Indicates the error that occurred while updating the hold request.
	Note: This tag appears when the value in the **requestProcessStatus** tag is set to **Failure**.

	Note: The external source system ID is used when the **Inbound Web Service History** feature is enabled.	
holdRequestId	Used to specify the hold request ID of the hold request for which the hold request update request is sent. **Note:** You must specify the hold request ID which is already defined in the system.	Yes
holdComments	Used to specify additional information about the hold request.	No
holdEndDate	Used to specify the date till when the hold request is effective. **Note:** The hold request end date must be either derived or provided by the upstream system before creating a hold request in an **Active** status. The hold request end date cannot be earlier than the hold process end date.	No
entityId	Used to specify a list of entities for which you want to create a hold request. **Note:** You need to specify the entity ID when the hold entity is **BILL**.	No
entityEndDate	Used to specify the date till when the entity is effective for hold request. **Note:** The entity end date cannot be later than the hold end date and earlier than the hold process end date. The entity end date cannot be later than the system date. At present, you can only update the end date of a single entity specified in the hold request update request. If there are two or more entities on hold, you need to initiate a separate hold request update request for each entity in order to update its respective end date.	No
holdProcessData	Used to specify the details of the hold process.	No
holdProcess	Used to specify the process that you want to keep on hold in the hold request. The valid values are: • **ATPY** - Used when you want to specify the auto pay process. • **BILL** - Used when you want to specify the bill generation process. • **DELQ** - Used when you want to specify the delinquency process. • **FNDG** - Used when you want to specify the funding process. • **OVDU** - Used when you want to specify the overdue process. • **REFD** - Used when you want to specify the refund process.	Yes (Conditional) **Note:** This data is required while updating the hold request information.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
	Note: You must specify a value which is already defined in the **HOLD_PROCESS_FLG** lookup field. It must be in the **Active** status.	
holdProcessEndDate	Used to specify the date till when the entity is effective for hold request.	Yes (Conditional)
	Note: The hold process end date cannot be later than the hold end date. At present, you can only update the end date of a single process specified in the hold request update request. If there are two or more processes on hold, you need to initiate a separate hold request update request for each process in order to update its respective end date.	**Note:** This data is required while updating the hold request information.
characteristics	Used to specify a characteristic for the hold request.	Yes (Conditional)
		Note: This data is required while updating the hold request information.
action	Used to specify the action to be performed on the characteristic. The valid values are: • **Update** • **Delete**	Yes (Conditional)
		Note: This data is required while updating the hold request information.
characteristicType	Used to indicate the characteristic type.	Yes (Conditional)
	Note: You must specify a characteristic type where the characteristic entity is set to **Hold Request** and which is associated with the hold request type.	**Note:** This data is required while updating the hold request information.
characteristicValue	Used to specify the value for the characteristic type.	Yes (Conditional)
	Note: You must specify a characteristic value which is associated with the characteristic type and is present in the system.	**Note:** This data is required while updating the hold request information.
effectiveDate	Used to specify the date from when the characteristic is effective.	Yes (Conditional)
		Note: This data is required while updating the hold request information.

The following table lists and describes the tags which appear in the hold request view response in the XML format:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description
requestProcessStatus	Indicates whether the hold request update request is successfully processed or not. The valid values are: • Success • Failure
holdRequestId	Displays the hold request ID.
errormsg	Indicates the error that occurred while updating the hold request. **Note:** This tag appears when the value in the **requestProcessStatus** tag is set to **Failure**.

Chapter 45

Hold Direct Debit Instruction

Topics:

- Prerequisites
- Algorithms Used in C1-AutoPayRequest
- Auto Pay Request Status Transition without Approval
- Auto Pay Request Status Transition with Approval
- Auto Pay Request Type
- Auto Pay Request (Used for Searching)
- Auto Pay Request (Used for Viewing)

In the financial services and health insurance domains, there might be scenarios wherein the customers would like to review their invoices before the charges are directly debited from their accounts. In such scenarios, there is a need to hold a direct debit (i.e. automatic payment) for a bill until the confirmation is received from the customer.

Oracle Revenue Management and Billing provides the ability to hold a direct debit (i.e. automatic payment) for a bill until the confirmation is received from the customer. A new field named **Auto Pay Review Required** is added in the **Auto Pay** tab of the **Account** screen. On completing a bill for an account, the system creates the automatic payment records in the **CI_BILL_ACH** table as per the auto pay instructions defined for the account. If the **Auto Pay Review Required** option is selected, the system sets the **EXTRACT_ELIG_SW** column corresponding to the automatic payment records in the **CI_BILL_ACH** table to **N**. However, if the **Auto Pay Review Required** option is not selected, the system sets the **EXTRACT_ELIG_SW** column corresponding to the automatic payment records in the **CI_BILL_ACH** table to **Y**. The **EXTRACT_ELIG_SW** column indicates whether the automatic payment record is eligible for the extraction. If the **EXTRACT_ELIG_SW** column is set to **N**, the **APAYCRET** batch does not consider the automatic payment record in the **CI_BILL_ACH** table for automatic payment creation.

Once the confirmation is received for one or more bills, the system enables you to create an automatic payment request for the bills. While creating an automatic payment request, you need to specify an automatic payment request type using which you want to create the automatic payment request. It is the automatic payment request type which helps the system to determine:

- The business object using which the automatic payment request should be created in the system
- Whether the approval is required for the automatic payment request

Once you specify the automatic payment request type, the system creates the automatic payment request in the **Draft** status. You can then include the bills for which invoice confirmation is received from the customers in the automatic payment request. At least one bill should be included in the automatic payment request. Before submitting an automatic payment request, you need to do the following:

- Edit the Schedule Extract Date (if required) of each bill
- Set the **Eligible for Extraction** field of each bill to **Y**

You can also delete a bill from an automatic payment request when it is in the **Draft** status. Once you edit the required details of the bills in an automatic payment request, you can submit the automatic payment request. If the approval process is not configured in the respective automatic payment request type, the system does the following:

- Updates the **ELIG_EXTRACT_SW** and **APAY_CRE_DT** columns corresponding to the automatic payment records in the **CI_BILL_ACH** table
- Changes the status of the automatic payment request to **Processed**

If the approval process is configured in the respective automatic payment request type, the system changes the status of the automatic payment request to **Approval In Progress**. A To Do notification is created for the approver using the approval To Do type (specified in the respective automatic payment request type) and assigned to the users with the approval To Do role (specified in the respective automatic payment request type). Once the approver reviews an automatic payment request, the approver can approve, reject, or resubmit the automatic payment request based on the observations. If the approver approves the automatic payment request, the system does the following:

- Updates the **ELIG_EXTRACT_SW** and **APAY_CRE_DT** columns corresponding to the automatic payment records in the **CI_BILL_ACH** table
- Changes the status of the automatic payment request to **Processed**

If the approver rejects an automatic payment request, the status of the automatic payment request is changed to **Rejected**. However, if the approver requests the submitter to resubmit an automatic payment request, the status of the automatic payment request is changed to **Draft**. A To Do notification is created for the submitter using the submitter To Do type (specified in the respective automatic payment request type) and assigned to the users with the submitter To Do role (specified in the respective automatic payment request type). While rejecting or resubmitting an automatic payment request, the approver needs to specify the reason for rejection or resubmission.

To implement the hold direct debit feature, the following new screens are introduced in this release:

- **Auto Pay Request Type** - Enables you to create, edit, delete, and copy an automatic payment request type.
- **Auto Pay Request (Used for Searching)** - Enables you to search for an automatic payment request. It also enables you to create an automatic payment request.
- **Auto Pay Request (Used for Viewing)** - Enables you to edit, delete, submit, approve, reject, and resubmit the automatic payment request. It also enables you to add, edit, and delete bills from the automatic payment request.

In addition, the following changes are made to the system:

- **Auto Pay Review Required** - This field is added in the **Auto Pay** tab of the **Account** screen. It indicates whether you want to hold direct debit (i.e. automatic payment) for the bills of the account until the confirmation is received from the customer.
- **Eligible for Extraction** - This column is added in the **Auto Pay** tab of the **Bill** screen. It indicates whether the automatic payment record for the bill is eligible for extraction.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Prerequisites

To setup the auto pay request feature, you need to do the following:

- Auto pay request type business object defined in the application
- Auto pay request types defined in the system.
- Approval To Do types and To Do roles defined in the application
- Submitter To Do types and To Do roles defined in the application
- Characteristic types defined in the application

Algorithms Used in C1-AutoPayRequest

The following table lists the algorithm which is attached to the **C1-AutoPayRequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-APAYRQINF	C1-APAYRQINF	Refer to C1-APAYRQINF on page 3081

The following table lists the algorithms which are used in the lifecycle of the **C1-AutoPayRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Exit	F1-TODOCOMPL	F1-TODOCOMPL	Refer to F1-TODOCOMPL on page 1280
Submitted	Enter	C1-APAYSUB	C1-APAYSUB	Refer to C1-APAYSUB on page 3082
Approval In Progress	Enter	C1-APAYAPP	C1-APAYAPP	Refer to C1-APAYAPP on page 3082
	Exit	F1-TODOCOMPL	F1-TODOCOMPL	Refer to F1-TODOCOMPL on page 1280
Update Auto Pay Record	Enter	C1-UPDAPAY	C1-UPDAPAY	Refer to C1-UPDAPAY on page 3082
Approved	Enter	C1-APAYAPRVD	C1-APAYAPRVD	Refer to C1-APAYAPRVD on page 3083
Return to Submitter	Enter	C1-APAYRESUB	C1-APAYRESUB	Refer to C1-APAYRESUB on page 3083
Processed	-	-	-	-
Rejected	-	-	-	-

C1-APAYRQINF

The **C1-APAYRQINF** algorithm generates the auto pay request information string and is plugged in at **System Event**: **Information** of business object: **C1-AutoPayRequest**.

It concatenates the following fields:

- Auto Pay Request Type Description

Copyright © 2009, 2025, Oracle and/or its affiliates.

- Auto Pay Request Status Description
- Auto Pay Request ID

F1-TODOCOMPL

This algorithm completes the To Do entries that are linked to an object when the object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion (F1-EXLTD)** characteristic is set to **Y** for a To Do type, the system does not automatically complete the respective To Do entry.

This algorithm contains the following parameter:

- **'Do Not Complete To Do Type' Char Type** – Used to specify the characteristic type that indicates whether the To Do entries should be automatically completed or not.

> **Note:** The **F1-EXLTD** characteristic type is shipped with the product. You can either use the **F1-EXLTD** characteristic type or a custom characteristic type, if required. Note that you must specify a predefined characteristic type where the characteristic entity is set to **To Do Type** and the predefined values are set to **Y** or **N**.

C1-APAYSUB

The **C1-APAYSUB** algorithm will be plugged at the **"Enter" System event** of the business object (**C1-AutoPayRequest**) life cycle status: **SUBMITTED**.

This algorithm checks the following:

1. Whether the approval is required for the auto pay request based on the configuration in auto pay request type (**IS_APPR_REQ** = **Y**).
   a. If the approval is required for the auto pay request, the status of the auto pay request is changed to **Approval In Progress**.
   b. If the approval is not required for the auto pay request, the status of the auto pay request is changed to **UPDATEAPAY**.
2. At least one auto pay record is selected in the auto pay request.
3. Updated scheduled extraction date cannot be less than system date.
4. **Auto Pay Request** cannot be created for any auto pay record if the same auto pay record is selected in another request which is in the **Approval In Progress** status.

C1-APAYAPP

The **C1-APAYAPP** algorithm creates the following:

1. A To Do using the To Do type specified in the approval profile which is attached to the **Auto Pay Request Type**. The To Do is sent to the appropriate users in the approval hierarchy depending on whether hierarchical approval is required or not.
2. A log entry is added when a To Do is created using the To Do type. It will create To Do Entry when **Auto Pay Request** enters in the **Approval in Progress** status from **Submit** status.

C1-UPDAPAY

The **C1-UPDAPAY** algorithm will be plugged in at **"Enter" System event** of the business object (**C1-AutoPayRequest**) life cycle status: **UPDATEAPAY**.

1. The **Extract Eligible Switch** and **Auto Pay Creation Date** are updated in the **CI_BILL_ACH** table with the latest values present in **Auto Pay Request Details** table. The auto pay request status is then changed to **PROCESSED**.

Copyright © 2009, 2025, Oracle and/or its affiliates.

2. If the bill which is present in the **Auto Pay Request** is cancelled then the latest details of **Extract Eligible Switch** and **Auto Pay Creation Date** are not updated in the **CI_BILL_ACH** table and the auto pay request status is changed to **PROCESSED**.

C1-APAYAPRVD

The **C1-APAYAPRVD** algorithm is the **Enter** status algorithm. This algorithm is invoked when you approve an **Auto Pay Request**. It confirms whether the approval flag is true and the status of the **Auto Pay request** is **APPROVED** to transit it to the next level.

C1-APAYRESUB

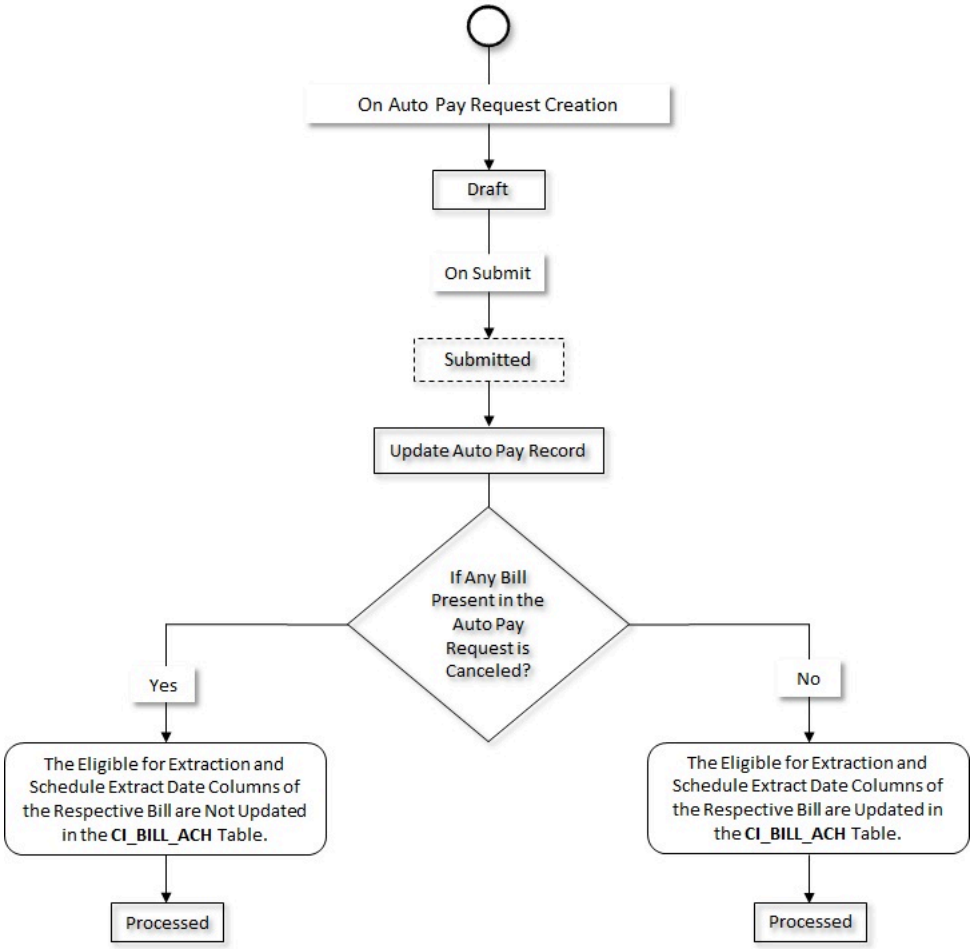
The **C1-APAYRESUB** algorithm is invoked on the **Re-Submit** button. It moves the status of the **Auto Pay Request** to **Draft**.

A To Do is generated for the user as submitter whose To Do type and To Do role are fetched from the **Auto Pay Request Type**. This algorithm creates the To Do entry when the **Auto Pay Request** enters into the **Return to Submitter** status from the **Approval In Progress** status.

Auto Pay Request Status Transition without Approval

The following figure graphically indicates how an auto pay request moves from one status to another when the approval process is not configured in the auto pay request type:

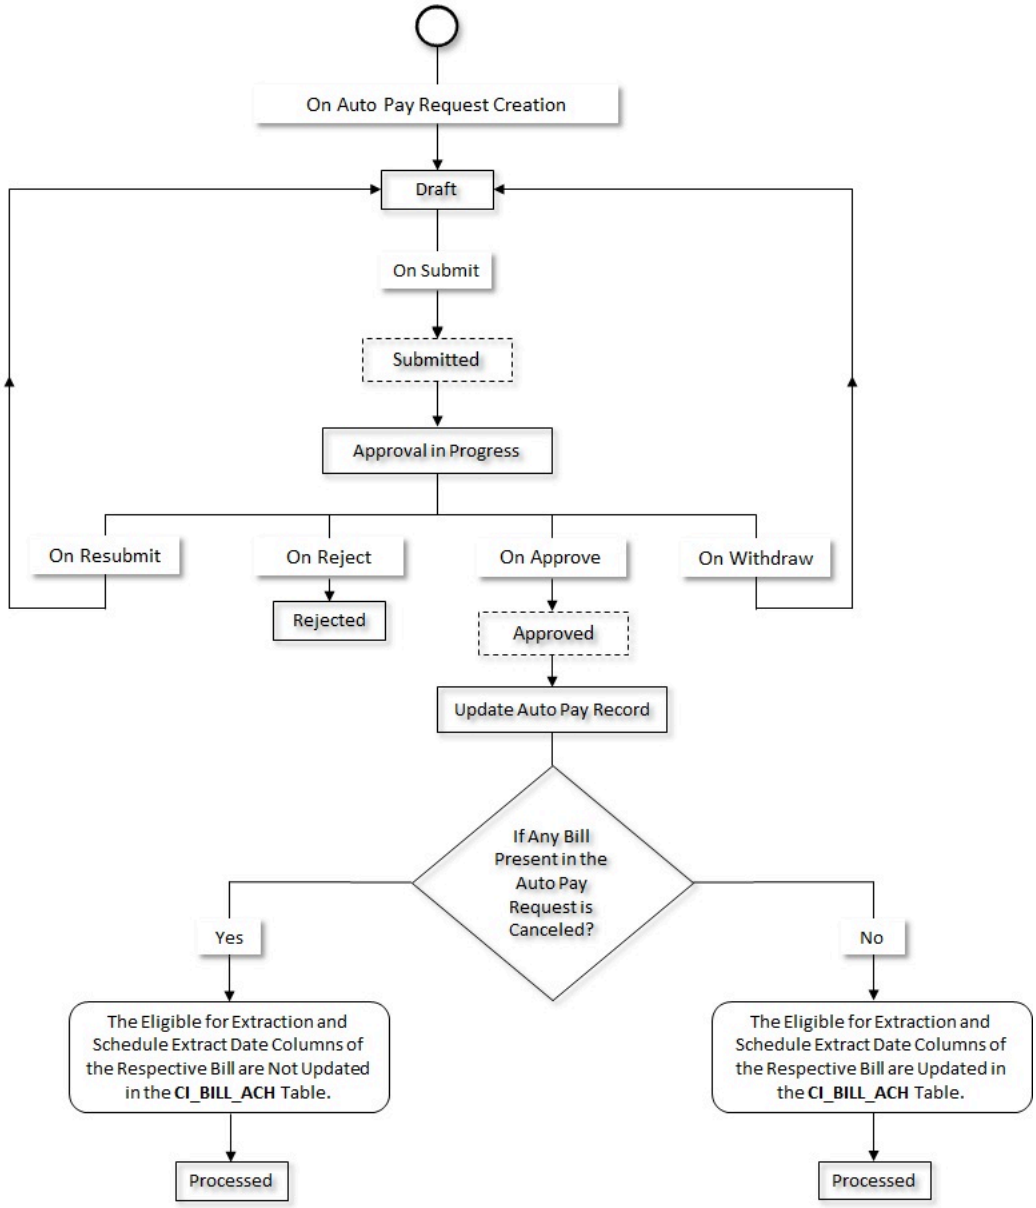
Copyright © 2009, 2025, Oracle and/or its affiliates.



Auto Pay Request Status Transition with Approval

The following figure graphically indicates how an auto pay request moves from one status to another when the approval process is configured in the auto pay request type:

Copyright © 2009, 2025, Oracle and/or its affiliates.



Auto Pay Request Type

The **Auto Pay Request Type** screen allows you to define, edit, copy, and delete an auto pay request type. It also allows you to view the details of an auto pay request type. It contains the following zones:

- Auto Pay Request Type List on page 3085
- Auto Pay Request Type on page 3086

Auto Pay Request Type List

The **Auto Pay Request Type List** zone lists the auto pay request types that are already defined in the system. It contains the following columns:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
Auto Pay Request Type	Displays the auto pay request type.
Description	Displays the description of the auto pay request type.
Edit	On clicking the **Edit** (✎) icon, the **Auto Pay Request Type** screen appears where you can edit the details of the auto pay request type.
Duplicate	On clicking the **Duplicate** (⧉) icon, the **Auto Pay Request Type** screen appears where you can define an auto pay request type using an existing auto pay request type.
Delete	On clicking the **Delete** (🗑) icon, you can delete the auto pay request type.
	Note: You can delete an auto pay request type only when an auto pay request is not yet created using the auto pay request type.

On clicking the **Broadcast** (📡) icon corresponding to an auto pay request type, the **Auto Pay Request Type** zone appears with the details of the respective auto pay request type.

Auto Pay Request Type

The **Auto Pay Request Type** zone displays the details of the auto pay request type. It contains the following sections:

- **Main** - Displays basic information about the auto pay request type. It contains the following fields:

Field Name	Field Description
Auto Pay Request Type	Displays the auto pay request type.
Description	Displays the description of the auto pay request type.
Related Transaction BO	Indicates the business object using which the auto pay transaction is performed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	Note: It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the auto pay request type.
Auto Pay Request Action	Indicates the action which is performed on the auto pay request using the auto pay request type.
Status	Indicates the current status of the auto pay request type. The valid values are: • Active • Inactive
Approval Required	Indicates whether approval is required for the auto pay request which is created using the auto pay request type.
Approval To Do Type	Indicates that the To Do entry of the specified To Do Type is created when you submit the auto pay request for an approval.
	Note: It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of the respective To Do type. This field appears only when the **Approval Required** option is selected.
Approval To Do Role	Indicates that the users which belong to the specified To Do role can only approve the auto pay request when it is submitted for an approval.
	Note: It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role. This field appears only when the **Approval Required** option is selected.
Submitter To Do Type	Indicates that the To Do entry of the specified To Do task is created when an auto pay request is resubmitted by an approver.
	Note: It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of the respective To Do type.
Submitter To Do Role	Indicates that the approvers which belong to the specified To Do role can only resubmit the auto pay request.
	Note: It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.

- **Characteristic** - Lists the characteristics defined for the auto pay request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Button Name	Button Description
Edit	Used to edit the details of the auto pay request type.
Delete	Used to delete the auto pay request type.
	Note: You can delete an auto pay request type only when an auto pay request is not yet created using the auto pay request type.
Duplicate	Used to create a new auto pay request type using an existing auto pay request type.

- **Record Information** - The **Record Information** section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the auto pay request type is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

By default, the **Auto Pay Request Type** zone does not appear in the **Auto Pay Request Type** screen. It appears only when you click the **Broadcast** (📡) icon corresponding to an auto pay request type in the **Auto Pay Request Type List** zone.

Defining an Auto Pay Request Type

Prerequisites

To define an auto pay request type, you should have:

- Auto pay request type business objects defined in the application
- Approval To Do Types and To Do roles defined in the application
- Submitter To Do Types and To Do roles defined in the application

Procedure

To define an auto pay request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.

Copyright © 2009, 2025, Oracle and/or its affiliates.

2. From the **Admin** menu, select **A** and then click **Auto Pay Request Type**.
   A sub-menu appears.
3. Click the **Add** option from the **Auto Pay Request Type** sub-menu.

> **Tip:** Alternatively, you can access the **Auto Pay Request Type** screen by clicking the **Add** button in the **Page Title** area of the **Auto Pay Request Type** screen.

> **Note:** The **Select Business Object** screen appears when there are multiple auto pay request type business objects defined in the application. If there is only one auto pay request type business object defined in the application, the **Auto Pay Request Type** screen appears.

4. Select the required auto pay request type business object from the respective field.
5. Click **OK**.

   The **Auto Pay Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the auto pay request type.
   - **Characteristics** - Used to define the characteristics for the auto pay request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Request Type	Used to specify the auto pay request type.	Yes
Business Object	Indicates the business object using which the auto pay request type is defined in the system.	Not applicable
Description	Used to specify the description for the auto pay request type.	Yes
Related Transaction BO	Used to indicate the business object using which the auto pay transaction is performed. The valid value is: • Auto Pay Request	Yes
Detailed Description	Used to specify additional information about the auto pay request type.	No
Auto Pay Request Action	Indicates the action which is performed on the auto pay request using the auto pay request type. The valid value is: • Update **Note:** By default, the **Update** option is selected and cannot be edited.	Not applicable
Status	Used to indicate the current status of the auto pay request type. The valid values are: • Active • Inactive	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: You cannot change the status of an auto pay request type to**Inactive** when an auto pay request created using the auto pay request type is in the **Draft** or **Rejected** status.	
Approval Required	Used to indicate whether approval is required for the auto pay request which is created using the auto pay request type.	No
Approval To Do Type	Used to specify the To Do entry of the specified To Do Type that is created when you submit the auto pay request for an approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears only when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required while approving an auto pay request which is created using the auto pay request type.
Approval To Do Role	Used to indicate the users which belong to the specified To Do role who can approve the auto pay request when it is submitted for an approval. **Note:** The list includes only those To Do roles which are associated with the specified **Approval To Do Type**. This field appears only when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required while approving an auto pay request which is created using the auto pay request type.
Submitter To Do Type	Used to indicate the To Do entry of the specified To Do Type that is created when an auto pay request is resubmitted by an approver.	Yes (Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to the **Submitter To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Submitter To Do Type** field. This field appears only when the **Approval Required** check box is selected.	**Note:** This field is required while resubmitting an auto pay request which is created using the auto pay request type.
Submitter To Do Role	Used to indicate the users which belong to the specified To Do role who can resubmit the auto pay request when it is submitted for an approval. **Note:** The list includes only those To Do roles which are associated with the specified **Submitter To Do Type**. This field appears only when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required while resubmitting an auto pay request which is created using the auto pay request type.

6. Enter the required details in the **Main** section.
7. Define a list of characteristics for the auto pay request type, if required.
8. Click **Save**.
   The auto pay request type is defined.

Defining a Characteristic for an Auto Pay Request Type

Prerequisites

To define a characteristic for an auto pay request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Auto Pay Request Type**)

Procedure

To define a characteristic for an auto pay request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying an auto pay request type.

   The **Characteristics** section contains the following fields in a grid:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	Note: The list includes only those characteristic types where the characteristic entity is set to **Auto Pay Request Type**.	**Note:** This field is required while defining a characteristic for the auto pay request type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for the respective characteristic value. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	**Note:** This field is required while defining a characteristic for the auto pay request type.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the auto pay request type, click the **Add** (+) icon and then *r*epeat step *2*.

Note: However, if you want to remove a characteristic from the auto pay request type, click the **Delete** (🗑) icon corresponding to the characteristic.

Editing an Auto Pay Request Type

Prerequisites

To edit an auto pay request type, you should have:

- Auto pay request type that you want to edit defined in the application

Procedure

To edit an auto pay request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **A** and then click **Auto Pay Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Auto Pay Request Type** sub-menu.

Copyright © 2009, 2025, Oracle and/or its affiliates.

The **Auto Pay Request Type** screen appears.

4. In the **Auto Pay Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the auto pay request type whose details you want to edit.

   The **Auto Pay Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the auto pay request type.
   - **Characteristics** - Used to define the characteristics for the auto pay request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Request Type	Displays the auto pay request type.	Not applicable
Business Object	Indicates the business object using which the auto pay request type is defined in the system.	Not applicable
Description	Used to specify the description for the auto pay request type.	Yes
Related Transaction BO	Used to indicate the business object using which the auto pay transaction is performed.	Yes
Detailed Description	Used to specify additional information about the auto pay request type.	No
Auto Pay Request Action	Displays the action which is performed on the auto pay request using the auto pay request type.	Not applicable
Status	Used to indicate the status of the auto pay request type. The valid values are: • Active • Inactive	Yes
Approval Required	Used to indicate whether approval is required for the auto pay request which is created using the auto pay request type.	No
Approval To Do Type	Used to indicate the To Do task which is performed by the approver while approving the auto pay request. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** (🔍) icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears when the **Approval Required** option is selected.	Yes
Approval To Do Role	Used to indicate the users with the specified To Do role who can approve the auto pay request.	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The list includes only those To Do roles which are associated with the approval To Do type. This field appears when the **Approval Required** option is selected.	
Submitter To Do Type	Used to indicate the To Do task created when an auto pay request is submitted by an approver. **Note:** The **Search** (🔍) icon appears corresponding to the **Submitter To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Submitter To Do Type** field.	Yes
Submitter To Do Role	Used to indicate the users with the specified To Do role who can submit the auto pay request for approval. **Note:** The list includes only those To Do roles which are associated with the submitter To Do type.	Yes

Tip: Alternatively, you can access this screen by clicking the **Edit** button in the **Auto Pay Request Type** zone.

5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics of the auto pay request type, if required.
7. Click **Save**.
   The changes made to the auto pay request type are saved.

Copying an Auto Pay Request Type

Instead of creating an auto pay request type from scratch, you can create a new auto pay request type using an existing auto pay request type. This is possible through copying an auto pay request type. On copying an auto pay request type, the details including the characteristics are copied to the new auto pay request type. You can then edit the details, if required.

Prerequisites

To copy an auto pay request type, you should have:

- Auto pay request type (whose copy you want to create) defined in the application
- Auto pay request business objects defined in the application

Procedure

To copy an auto pay request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **A** and then click **Auto Pay Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Auto Pay Request Type** sub-menu.
   The **Auto Pay Request Type** screen appears.
4. In the **Auto Pay Request Type List** zone, click the **Duplicate** (⎘) icon in the **Duplicate** column *c*orresponding to the auto pay request type whose copy you want to create.

   The **Auto Pay Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the auto pay request type.
   - **Characteristics** - Used to define the characteristics for the auto pay request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Request Type	Used to specify the auto pay request type.	Yes
Business Object	Indicates the business object using which the auto pay request type is defined in the system.	Not applicable
Description	Used to specify the description for the auto pay request type.	Yes
Related Transaction BO	Used to indicate the business object using which the auto pay transaction is performed.	Yes
Detailed Description	Used to specify additional information about the auto pay request type.	No
Status	Used to indicate the status of the auto pay request type. The valid values are:	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	• Active • Inactive	
Approval Required	Used to indicate whether approval is required for the auto pay request which is created using the auto pay request type.	No
Approval To Do Type	Used to indicate the To Do task which is performed by the approver while approving the auto pay request. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears when the **Approval Required** option is selected.	Yes
Approval To Do Role	Used to indicate the users with the specified To Do role who can approve the auto pay request. **Note:** The list includes only those To Do roles which are associated with the approval To Do type. This field appears when the **Approval Required** option is selected.	Yes
Submitter To Do Type	Used to indicate the To Do task created when an auto pay request is submitted by an approver. **Note:** The **Search** (🔍) icon appears corresponding to the **Submitter To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Submitter To Do Type** field.	Yes
Submitter To Do Role	Used to indicate the users with the specified To Do role who can submit the auto pay request for approval.	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The list includes only those To Do roles which are associated with the submitter To Do type.	

Tip: Alternatively, you can copy an auto pay request type by clicking the **Duplicate** button in the **Auto Pay Request Type** zone.

5. Enter the required details in the **Main** section.
6. Define, edit, or remove characteristics of the auto pay request type, if required.
7. Click **Save**.
   The new auto pay request type is defined.

Deleting an Auto Pay Request Type

Procedure

To delete an auto pay request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **A** and then click **Auto Pay Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Auto Pay Request Type** sub-menu.
   The **Auto Pay Request Type** screen appears.
4. In the **Auto Pay Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the *a*uto pay request type that you want to delete.

   A message appears confirming whether you want to delete the auto pay request type.

Tip: Alternatively, you can delete an auto pay request type by clicking the **Delete** button in the **Auto Pay Request Type** zone.

5. Click **OK**.
   The auto pay request type is deleted.

Searching for an Auto Pay Request

Prerequisites

To search for an auto pay request, you should have:

- Auto pay request types defined in the application

Procedure

To search for an auto pay request:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Auto Pay Request**.
   A sub-menu appears.
3. Click the **Search** option from the **Auto Pay Request** sub-menu.
   The **Auto Pay Request** screen appears.
4. Enter the search criteria in the **Search Auto Pay Request** zone.

> **Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.
   A list of auto pay requests that meet the search criteria appears in the **Search Results** section.

Auto Pay Request (Used for Viewing)

The **Auto Pay Request** screen allows you to do the following:

- View the details of the auto pay request
- View the debit and credit bills which are added to the auto pay request
- Edit the auto pay request details
- Delete the auto pay request
- Submit the auto pay request for an approval
- Search the bills
- Add bills in the auto pay request
- View the log of the auto pay request
- Add a log entry for the auto request

It consists of the following tabs:

- Auto Pay Request - Main on page 3104
- Auto Pay Request - Bills on page 3107
- Auto Pay Request - Log on page 3109

Auto Pay Request - Main

The **Main** tab displays information about the auto pay request. It contains the following zones:

- Auto Pay Request on page 3104
- Auto Pay Details on page 3106

Auto Pay Request

The **Auto Pay Request** zone displays the details of the auto pay request. It contains the following sections:

- **Main** - Displays basic information about the auto pay request. It contains the following fields:

Field Name	Field Description
Auto Pay Request Information	Displays information about the auto pay request.
Auto Pay Request Type	Indicates the auto pay request type using which the auto pay request is created. **Note:** It has a link. On clicking the link, the **Auto Pay Request Type** screen appears where you can view the details of the respective auto request type.
Status	Indicates the status of the auto pay request. The valid values are: • Approved • Approval in Progress • Draft • Processed

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
	• Rejected • Update Auto Pay Record
Status Reason	Indicates the reason why the auto pay request is rejected. **Note:** It has a link. On clicking the link, the **Status Reason** screen appears where you can view the details of the respective status reason. This field appears when the auto pay request is in the **Rejected** status.

- **Characteristics** - Lists the characteristics defined for the auto pay request. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the auto pay request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the auto pay request. **Note:** The **Edit** button appears when the auto pay request is in the **Draft** status.
Delete	Used to delete the auto pay request. **Note:** The **Delete** button appears when the auto request is in the **Draft** status.
Submit	Used to submit the auto pay request. **Note:** The **Submit** button appears when the auto request is in the **Draft** status.
Approve	Used to approve the auto pay request. **Note:** The **Approve** button appears when: • The auto pay request is in the **Approval In Progress** status. • A user with the approval To Do role is reviewing the auto pay request.
Reject	Used to reject the auto pay request. **Note:** The **Reject** button appears when: • The auto pay request is in the **Approval In Progress** status. • A user with the approval To Do role is reviewing the auto pay request.

- **Record Information** - This section contains the following fields:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description
Business Object	Indicates the business object using which the auto pay request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the auto pay request status is updated
Create Date/Time	Displays the date and time when the auto pay request is created.

Auto Pay Request screen	Auto Pay Request (Used for Viewing) on page 3104
Auto Pay Request Log zone	Auto Pay Request Log on page 3109
How to add a log entry for an auto pay request	Adding a Log Entry for an Auto Pay Request on page 3119

Adding a Log Entry for an Auto Pay Request

Procedure

To add a log entry for an auto pay request:

1. Search for the auto pay request in the **Search Auto Pay Request** zone of the **Auto Pay Request** screen.
2. In the **Search Results** section, click the link in the **Auto Pay Request Information** column corresponding to the *a*uto pay request for which you want to add a log entry.
   The **Auto Pay Request** screen appears.
3. Click the **Log** tab.
   The **Log** tab appears.
4. Click the **Add Log Entry** link in the upper right corner of the **Auto Pay Request Log** zone.

   The **Add Request Log** window appears. It contains the following fields:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Request ID	Displays the auto pay request ID.	Not applicable
Log Details	Used to specify additional comments for the auto pay request.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.
   The log entry is added in the **Auto Pay Request Log** zone.

Chapter 46

Garbling Customer Information

Oracle Revenue Management and Billing enables you to garble the personal information of a customer, such as the customer name, address, email ID, social security number or any other identifier, birth date, gender, and so on. On receiving the data erasure request from a customer, the data controller will garble the personal information of the customer by masking the data with random characters and then cease the access to the customer records.

To garble the information of one or more persons, you need to do the following:

1. Define the **Garble Data (C1-GRBL)** characteristic for each person whose data needs to be garbled and set its value to **Y**.
2. Execute the **Garble Person Information (C1-GRBPI)** batch. For more information about this batch, see *Oracle Revenue Management and Billing Batch Guide*.

On executing the **Garble Person Information (C1-GRBPI)** batch, the system identifies the persons where the **Garble Data (C1-GRBL)** characteristic is set to **Y** and the **Garbling Completed (C1-GBCM)** characteristic is either not defined or set to **N**. Note that the system considers the **Garble Data (C1-GRBL)** characteristic value which is effective on the batch business date.

Once the persons are identified, the data in the following fields is masked with random characters across all records in the system:

- ACCOUNT_NBR
- ACCT_NBR
- ADDRESS1
- ADDRESS1_UPR
- ADDRESS2
- ADDRESS3
- ADDRESS4
- BIRTH_DT
- BROKER_NAME
- CITY
- COUNTRY
- COUNTY
- CUSTOMER_NAME
- EMAILID
- ENTITY_NAME
- ENTITY_NAME1
- ENTITY_NAME2
- ENTITY_NAME3
- GEO_CODE
- HOUSE_TYPE

- IN_CITY_LIMIT
- NAME1
- OVRD_MAIL_NAME1
- OVRD_MAIL_NAME2
- OVRD_MAIL_NAME3
- PER_ID_NBR
- PHONE
- POSTAL
- POSTAL_UPR
- STATE

In other words, the personal and account related information of a customer is garbled across the system. In addition, this batch allows you to garble the required characteristics and identifiers of a person and account.

Note: An account may have one or more persons linked to it. The information of an account is garbled when the data erasure request is received for the main customer of the account.

Once the personal and account related information of a customer is garbled, the access group of the person is changed to **C1GB** (which does not have any data access role). This ensures that the data of the person and his or her accounts cannot be accessed from any screens in the system. If an approval transaction contains personal and account related information of a customer, you cannot even view the approval transaction in the system.

Note: The access is forbidden for performing any transaction for the person and account only from the user interface and web services and not through the background process.

You can also garble the data of a person using the **C1-GRBPI** inbound web service. However, you can garble the data of only one person at a time using this inbound web service.

Chapter 47

Deleting Inactive Customer or Closed Account Information

Oracle Revenue Management and Billing enables you to delete all records of a person or account from the system. A new batch named **C1-GDPR** is introduced in this release. It enables you to delete all records of a person or account from the system. You can either delete the records of a particular person or account using its ID or delete the records of a set of persons or accounts at once using its characteristic. A new characteristic type named **C1-GDPRE** is shipped with the product. While executing the batch, the system first checks whether the person or account ID is specified in the batch. If so, the batch deletes the records of the respective person or account from the system. You cannot specify both the person and account ID at the same time while executing the batch.

If the person or account ID is not specified while executing the batch, the system checks whether the **Delete Characteristic Type** parameter is defined in the **C1-GDPR** batch. You can define the **C1-GDPRE** characteristic for the persons or accounts whose records you want to delete from the system. If you set the **Delete Characteristic Type** parameter in the **C1-GDPR** batch to **C1-GDPRE**, the batch considers those person or accounts for deletion where the **C1-GDPRE** characteristic is set to **Y**.

The system deletes all records of a particular account only when the following conditions are met:

- account's closing date is earlier than or equal to system date
- All contracts of the account should either be in the **Closed** or **Canceled** status

The system deletes all records of a particular person only when the following conditions are met:

- The closing date of all its accounts is earlier than or equal to system date
- All contracts of all its accounts should either be in the **Closed** or **Canceled** status

The **C1-GDPR** batch contains the following parameters:

- **Account ID** - Used to indicate the account whose records you want to delete from the system.
- **Person ID** - Used to indicate the person whose records you want to delete from the system.
- **Delete Characteristic Type** - Used to specify the characteristic type. Here, you must specify the **C1-GDPRE** characteristic type. The system then considers those person or accounts for deletion where the **C1-GDPRE** characteristic is set to **Y**.
- **Clear CLOB Data** - Used to indicate whether you want to delete the references of the persons or accounts considered for deletion from the CLOB data. The valid values are **Y** and **N**. Note that if you set the value for this

parameter to **Y**, the performance of the batch would be impacted when there is voluminous data.

- **Thread Pool Name** - Used to specify the thread pool on which you want to execute the batch.

The **C1-GDPR** batch is a multi-threaded batch. The multi-threading is based on the person or account ID and chunks for multi-threading are created based on numerical distribution of person or account ID.

- Offer (Used for Searching)
- Offer (Used for Adding)
- Bundle (Used for Searching)
- Bundle (Used for Adding)

Oracle Revenue Management and Billing facilitates you to maintain and bill a variety of products and services for the retail banking domain. You can define the following types of products in the system:

- Product
- Product Group

As the name indicates, a product group is a group of products. A product group are maintained in the system mainly for the reporting purposes. You can define a product and product group which may belong to different product categories, such as Checking, Loans, Savings, etc. A product or product group must be associated with at least one division. You can associate a product or product group with more than one division.

The system enables you to add one or more product services in a product. A product service may include one or more services which are defined as price items in the system. You can define, edit, delete, and copy a product service using an existing screen named **Product Service**. You can add multiple product services in a product. The system enables you to indicate whether the product service is a mandatory or optional service offered with the product. A product must have at least one mandatory product service.

A product consists of one or more market products. For example, the Loan product can include different market products, such as Personal Loan, Auto Loan, Home Equity Loan, Education Loan, etc. An account can enroll for a market product. While creating a market product for a product, the system inherits the list of divisions and product services from the product. You can associate a market product with only those divisions to which the product belongs. By default, the market product includes the mandatory services of the product. You may or may not include the optional services of the product in the market product. You can define eligibility rules for a market product. The system executes the eligibility rule which is effective while enrolling an account for a market product. If the eligibility rule is met, the system enrolls the account for the market product. However, if the eligibility rule is not met, the system does not enroll the account for the market product. A market product must be associated with at least one price list. You can associate multiple price lists with a market product.

The system enables you to define an offer which can be included in more than one market product. For example, the Car Loan and Two-Wheeler Loan market products may provide same offers, such as No Processing Cost, No Collateral, etc. An account can enroll for an offer. While creating an offer, the system inherits the list of divisions and product services from all market products in which it is included. By default, the offer includes the mandatory services of the product. You may or may not include the optional services of the market product in the offer. You can define eligibility rules for an offer.

The system executes the eligibility rule which is effective while enrolling an account for an offer. If the eligibility rule is met, the system enrolls the account for the offer. However, if the eligibility rule is not met, the system does not enroll the account for the offer. An offer must be associated with at least one price list. You can associate multiple price lists with an offer.

The system enables you to define a bundle which can be included in more than one market product. For example, you can define a bundle of services, such as Car Loan, Loan Insurance, etc. in the Car Loan market product. An account can enroll for a bundle. While creating a bundle, the system derives the divisions which are common in all market products in which it is included. It also inherits the list of product services from all market products. By default, the bundle includes the mandatory services of the product. You may or may not include the optional services of the market product in the bundle. Here, you can include additional services which are not included in the product or market product. You can define eligibility rules for a bundle. The system executes the eligibility rule which is effective while enrolling an account for a bundle. If the eligibility rule is met, the system enrolls the account for the bundle. However, if the eligibility rule is not met, the system does not enroll the account for the bundle. A bundle must be associated with at least one price list. You can associate multiple price lists with a bundle.

A product, market product, offer, and bundle goes through a lifecycle in the system. On creating a product, market product, offer, and bundle, their status is set to **Draft**. On submitting a product, market product, offer, and bundle, their status is set to **Active**. A new batch named **C1-PDTRN** is introduced in this release. It transitions the status of a product, market product, offer, and bundle to **Retired** when its end date is earlier than the batch business date.

To implement this new feature, the following new screens are introduced in this release:

- Product
- Product Information
- Market Product
- Market Product Information
- Offer
- Offer Information
- Bundle
- Bundle Information

You can access these screens from the **Retail Banking** menu.

Copyright © 2009, 2025, Oracle and/or its affiliates.

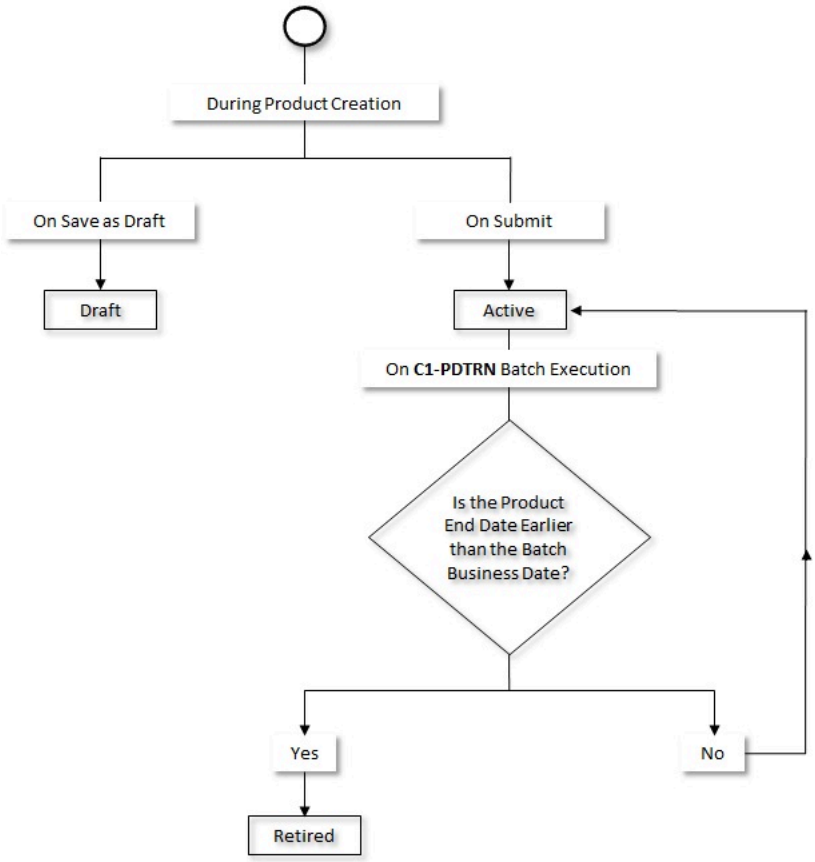
Prerequisites

To setup the retail banking feature, you need to do the following:

- Product Categories and Product Types define in the application.
- Define the Terms and Conditions in the application.
- Product Manager's To Do Roles define in the application.
- Divisions associated with the access group to which the user belongs.
- Characteristics Types defined in the application(where the characteristic entity is set to the product, market product, offer or bundle.
- Parent Groups define in the application.
- Product Services define in the application.
- Parameters and Parameter Value Types (based on which you want to define eligibility criteria of the market product) define in the application.
- Price Lists define in the application.

Product Status Transition

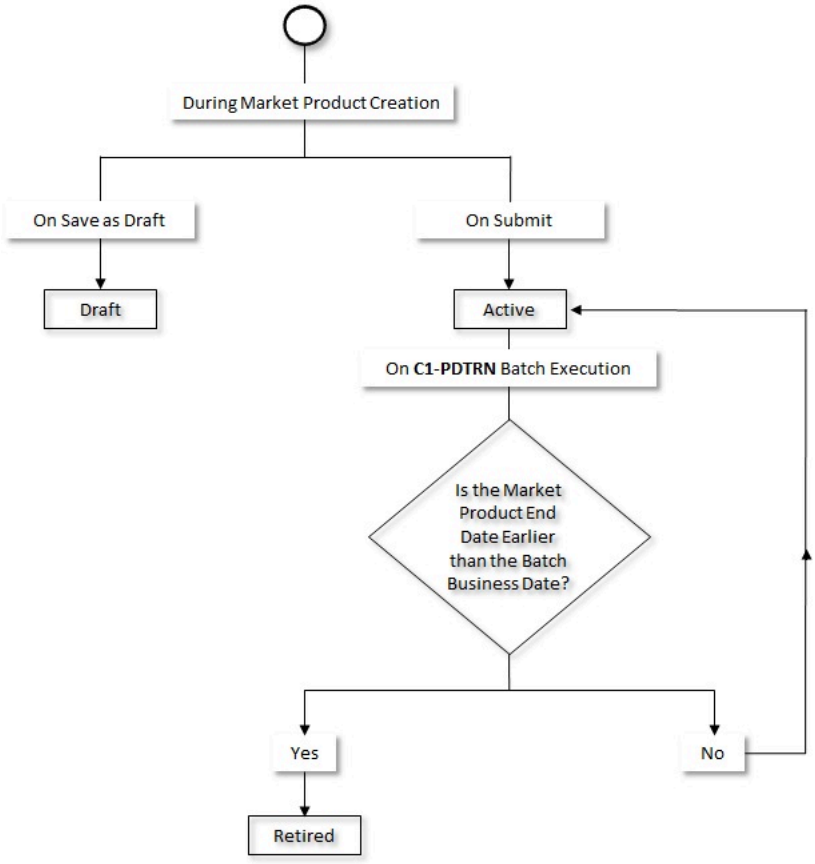
The following figure graphically indicates how the product moves from one status to another when the approval process is configured in the product:



Copyright © 2009, 2025, Oracle and/or its affiliates.

Market Product Status Transition

The following figure graphically indicates how the market product moves from one status to another when the approval process is configured in the market product:



Offer Status Transition

The following figure graphically indicates how the offer moves from one status to another when the approval process is configured in the offer:

Draft	-	-	-	-
Active	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer toF1-AT-RQJ on page 1393
Retired	-	-	-	-

C1-APPTXNBAS

The **C1-APPTXNBAS** is the standard audit algorithm used by approval workflow responsible for creating approval transactions. This algorithm is to be specified on the business object audit algorithm spot, for the business objects that are part of approval workflow groups.

Parameters: **Approval Request Generation (Y/N)** - Used to indicate whether the approval workflow request must be created when no changes are made while editing the object. If you set the value to **N**, the approval workflow request is not created when no changes are made while editing the object. However, if you leave this field blank or set the value to **Y**, the approval workflow request is created irrespective of whether any changes are made or not in the object.

C1-PRDINFO

The **C1-PRDINFO** algorithm generates the product information string. It concatenates the provided fields in the parameters, separated by the provided separator in the specified order. The eligible field parameters are listed below:

- PRODUCT_CD
- DESCR
- PROD_TYP_FLG
- PRODUCT_CAT_FLG
- BO_STATUS_CD
- START_DT
- END_DT

Copyright © 2009, 2025, Oracle and/or its affiliates.

- PROD_MNGR
- PROD_MNGR_TD_ROLE
- TC_TYPE_CD

C1-PRDPSPR

Product Post Processing Algorithm.

C1-PRDCT-VAL

The **C1-PRDCT-VAL** algorithm validates the product before saving it to the database.

C1-PRD-TRN

The **C1-PRD-TRN** algorithm is responsible for monitoring the product end date. It transitions the status of a product, market product, offer, and bundle to **Retired** when its end date is earlier than the batch business date.

C1-MPINFO

The **C1-MPINFO** algorithm generates the market product, offer, and bundle information string. It concatenates the provided fields in the parameters, separated by the provided separator in the specified order: The eligible field parameters are listed below:

- ENTITY_CODE
- ENTITY_TYPE
- DESCR
- DESCRLONG
- START_DT
- END_DT
- TC_TYPE_CD
- BO_STATUS_CD
- PRODUCT_CD

C1-MP-VAL

The **C1-MP-VAL** algorithm validates the market product before saving it to the database.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

Copyright © 2009, 2025, Oracle and/or its affiliates.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-OFFRINFO

The **C1-OFFRINFO** algorithm generates the market product, offer, and bundle information string. It concatenates the provided fields in the parameters, separated by the provided separator in the specified order: The eligible field parameters are listed below:

- ENTITY_CODE
- ENTITY_TYPE
- DESCR
- DESCRLONG
- START_DT
- END_DT
- TC_TYPE_CD
- BO_STATUS_CD PRODUCT_CD

C1-OFFER-VAL

The **C1-OFFER-VAL** algorithm validates the offer before saving it to the database.

C1-BNDLINFO

The**C1-BNDLINFO** algorithm generates the market product, offer, and bundle information string. It concatenates the provided fields in the parameters, separated by the provided separator in the specified order: The eligible field parameters are listed below:

- ENTITY_CODE
- ENTITY_TYPE
- DESCR
- DESCRLONG
- START_DT
- END_DT
- TC_TYPE_CD
- BO_STATUS_CD PRODUCT_CD

C1-BUNDL-VAL

The **C1-BUNDL-VAL** algorithm validates the bundle before saving it to the database.

Product (Used for Searching)

The **Product** screen allows you to search for a product using various search criteria. It also allows you to add, edit, or copy an existing product. It contains the following zone:

- Search Product on page 3135

Copyright © 2009, 2025, Oracle and/or its affiliates.

Related Topics

For more information on...	See...

How to copy a product	Copying a Product on page 3139

Search Product

The **Search Product** zone allows you to search for a product using various search criteria. It contains the two following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search products which are added by you or search all the products available in the system. The valid values are: • My Products • All Products **Note:** By default, the **My Products** option is selected.	No
Product Code	Used to search for a particular product.	No
Product Type	Used to search products of a particular type.	No
Product Category	Used to search products which belong to a particular category.	No
Status	Used to search products having a particular status. The valid values are: • Active • Draft • Retired	No
Start Date	Used to search products which are effective from a particular date onwards.	No
End Date	Used to search products which are effective till a particular date.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Product Information	Displays the concatenated string of information about the product separated by a comma (,).
Status	Indicates the current status of the product. The valid values are:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column Name	Column Description
	• Active • Draft • Retired
	Note: If the product is in the active status, it is indicated by the **Active** (Active) icon. If the product is in the draft status, it is indicated by the **Draft** (Draft) icon. If the product is in the retried status, it is indicated by the **Retried** (Retire) icon.
Product Type	Indicates the type of the product.
Product Category	Indicates the category to which the product belongs.
Start Date	Displays the date from when the product is effective in the system.
End Date	Displays the date till when the product is effective in the system.
Copy	On clicking the **Copy** (⧉) icon, the **Product Information** screen appears where you can add a new product using an existing product.
Edit	On clicking the **Edit** (✎) icon, the **Product Information** screen appears where you can edit the details of the existing product.

Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, **Search Results** section lists all the products added by the user.

Searching for a Product

Prerequisites

To search a product, you should have:

- Product defined in the application.

Procedure

To search a product:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Product** sub-menu.

Copyright © 2009, 2025, Oracle and/or its affiliates.

A sub-menu appears.

3. Click the **Search** option from the **Product** sub-menu.
   The **Product** screen appears.
4. Enter the search criteria in the **Search Product** zone.

> **Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search** button.
   A list of product that meet the search criteria appears in the **Search Results** section.

> **Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Editing a Product

Procedure

To edit a product:

1. Search for the product in the **Product** screen whose details you want to edit.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the product whose details you want to edit.
   The **Product Information** screen appears. It contains the following pages:

   - Product Information - Basic Details on page 3141
   - Product Information - Other Details on page 3142
   - Product Information - Services on page 3143

   The **Basic Details** page contains the following zone:

   - Basic Details on page 3141

   The **Basic Details** zone contains the following fields:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
Product Category	Displays the category of the product.	Not applicable
Product Code	Displays the product code.	Not applicable
Product Name	Used to specify the product.	Not applicable
Description	Used to specify the description of the product.	Yes
Product Type	Displays the product type.	Not applicable
Start Date	Displays the date from when the product is effective in the system.	Not applicable
End Date	Used to specify the date till when the product is effective in the system.	No
Terms and Conditions	Used to associate terms and conditions with the product. **Note:** The **Search** (🔍) appears corresponding to the **Terms and Conditions** field. On clicking the **Search** icon, the **Terms and Conditions Search for Product** window appears where you can associate the terms and conditions with the product.	No
Product Manager	Used to assign the product to the product manager for the approval process. **Note:** The **Search** (🔍) icon appears corresponding to the **Product Manager** field. On clicking the **Search** icon, the **User Search** window appears where you can search for the user.	No
Product Manager To Do Role	Used to specify the To Do role for the To Do task which is performed by the product manager. **Note:** The **Search** (🔍) icon appears corresponding to the **Product Manager To Do Role** field. On clicking the **Search** icon, the **To Do Role Search** window appears where you can search for the To Do role.	No

3. Modify the required details in the **Basic Details** page.
4. Associate or disassociate the product from a division in the **Other Details** page, if required.
5. Add, edit, or remove the characteristics from the product in the **Other Details** page, if required.
6. Associate or disassociate the product from the parent group in the **Other Details** page, if required.
7. Add, edit, or remove services from the product in the **Services** page, if required.
8. Click **Submit**.
   A window appears confirming the product is submitted in the system.
9. Click the **Close** button in the confirmation window.
   The product is modified.

Copying a Product

Instead of creating a product from scratch, you can create a new product using an existing product. This is possible through copying a product. On copying a product, the details including the associated divisions, characteristics, associated parent groups, and the services are copied to the new product. You can then edit the details, if required.

Prerequisites

To copy a product, you should have:

- Product (whose copy you want to create) defined in the application

Procedure

To copy a product:

1. Search for the product in the **Product** screen whose copy you want to create.
2. In the **Search Results** section, click the **Copy** (⎘) icon in the **Copy** column corresponding to the product whose copy you want to create.
   The **Product Information** screen appears. It contains the following pages:
   - Product Information - Basic Details on page 3141
   - Product Information - Other Details on page 3142
   - Product Information - Services on page 3143

   The **Basic Details** page contains the following zone:
   - Basic Details on page 3141

   The **Basic Details** zone contains the following fields:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
Product Category	Used to indicate the category of the product.	Yes
Product Code	Used to specify the product code.	Yes
Product Name	Used to specify the product.	Yes
Description	Used to specify the description for the product.	Yes
Product Type	Used to indicate the type of the product.	Yes
Start Date	Used to specify the date from when the product is effective.	Yes
End Date	Used to specify the date till when the product is effective.	No
Terms and Conditions	Used to associate terms and conditions with the product. **Note:** The **Search** (🔍) appears corresponding to the **Terms and Conditions** field. On clicking the **Search** icon, the **Terms and Conditions Search for Product** window appears where you can associate the terms and conditions with the product.	No

Adding a Product

Prerequisites

To add a product, you should have:

- Product categories defined in the application.
- Product types defined in the application.
- Terms and conditions defined in the application.
- Product manager's To Do roles defined in the application.

Procedure

To add a product:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Product** sub-menu.
   A sub-menu appears.
3. Click the **Add** option from the **Product** sub-menu.

   The **Product Information** screen appears. It contains the following pages:

   - Product Information - Basic Details on page 3141
   - Product Information - Other Details on page 3142
   - Product Information - Services on page 3143

   The **Basic Details** page contains the following zone:

   - Basic Details on page 3141

   The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Category	Used to indicate the category of the product.	Yes
Product Code	Used to specify the product code.	Yes
Product Name	Used to specify the product.	Yes
Description	Used to specify the description for the product.	Yes
Product Type	Used to indicate the type of the product.	Yes
Start Date	Used to specify the date from when the product is effective.	Yes
End Date	Used to specify the date till when the product is effective.	No
Terms and Conditions	Used to associate terms and conditions with the product.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) appears corresponding to the **Terms and Conditions** field. On clicking the **Search** icon, the **Terms and Conditions Search for Product** window appears where you can associate the terms and conditions with the product.	
Product Manager	Used to assign the product to the product manager for the approval process. **Note:** The **Search** (🔍) icon appears corresponding to the **Product Manager** field. On clicking the **Search** icon, the **User Search** window appears where you can search for the user.	No
Product Manager To Do Role	Used to specify the To Do role for the To Do task which is performed by the product manager. **Note:** The **Search** (🔍) icon appears corresponding to the **Product Manager To Do Role** field. On clicking the **Search** icon, the **To Do Role Search** window appears where you can search for the To Do role.	No

4. Enter the required details in the **Basic Details** page.
5. Associate the product with divisions in the **Other Details** page, if required.
6. Define characteristics for the product in the **Other Details** page, if required.
7. Associate the product to a parent group in the **Other Details** page, if required.
8. Add a service for the product in the **Services** page, if required.
9. Click **Submit**.
   A window appears confirming the product is submitted in the system.
10. Click the **Close** button in the confirmation window.
    The product is added.

Tip: Alternatively, you can access the **Product Information** screen by clicking the **Add Product** button in the **Page Title** area of the **Product** screen.

Searching for a Market Product

Prerequisites

To search a market product, you should have:

- Market Product defined in the application.
- Product defined in the application.
- Product Group defined in the application.

Procedure

To search a market product:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Market Product** sub-menu.
   A sub-menu appears.
3. Click the **Search** option from the **Market Product** sub-menu.
   The **Market Product** screen appears.
4. Enter the search criteria in the **Search Market Product** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search** button.
   A list of market product that meet the search criteria appears in the **Search Results** section.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Copying a Market Product

Instead of creating a market product from scratch, you can create a new market product using an existing market product. This is possible through copying a market product. On copying a market product, the details including the associated divisions, characteristics, services, and the price list are copied to the new market product. You can then edit the details, if required.

Prerequisites

To copy a market product, you should have:

- Market Product (whose copy you want to create) defined in the application

Procedure

To copy a market product:

1. Search for the market product in the **Market Product** screen whose copy you want to create.
2. In the **Search Results** section, click the **Copy** (⎘) icon in the **Copy** column corresponding to the market product whose copy you want to create.
   The **Market Product** screen appears. It contains the following pages:
   - Market Product Information - Basic Details on page 3155
   - Market Product Information - Other Details on page 3157
   - Market Product Information - Eligibility on page 3158
   - Market Product Information - Services on page 3160
   - Market Product Information - Price List on page 3161

Copyright © 2009, 2025, Oracle and/or its affiliates.

The **Basic Details** page contains the following zone:

- Basic Details on page 3156

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Market Product Code	Used to specify the market product code.	Yes
Market Product Name	Used to specify the market product.	Yes
Description	Used to specify the description for the market product.	No
Start Date	Used to specify the date from when the market product is effective.	Yes
End Date	Used to specify the date till when the market product is effective.	No
Terms and Conditions	Used to associate terms and conditions with the market product. **Note:** The **Search** (🔍) appears corresponding to the **Terms and Conditions** field. On clicking the **Search** icon, the **Terms and Conditions Search for Product** window appears where you can associate the terms and conditions with the market product.	No

3. Enter the required details in the **Basic Details** page.
4. Associate or disassociate the market product from a division in the **Other Details** page, if required.
5. Add, edit, or remove the characteristics from the market product in the **Other Details** page, if required.
6. Add, edit, or remove the eligibility rule from the market product in the **Eligibility** page, if required
7. Add, edit, or remove the price list from the market product in the **Price List** page, if required
8. Click **Submit**.
   A window appears confirming the market product is submitted in the system.
9. Click the **Close** button in the confirmation window.

Note: You cannot edit fields from the **Services** page when a service is already associated to the product.

The new market product is added.

Adding a Market Product

Prerequisites

To add a market product, you should have:

- Product defined in the application.

Procedure

To add a market product:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Market Product** sub-menu.
   A sub-menu appears.
3. Click the **Add** option from the **Market Product** sub-menu.

   The **Market Product Information** screen appears. It contains the following pages:

   - Market Product Information - Basic Details on page 3155
   - Market Product Information - Other Details on page 3157
   - Market Product Information - Eligibility on page 3158
   - Market Product Information - Services on page 3160
   - Market Product Information - Price List on page 3161

   The **Basic Details** page contains the following zone:

   - Search Product on page 3156
   - Basic Details on page 3156

   The **Search Product** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for product using product details. The valid value is:	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The default value is **Product Details**.	
Product Name	Used to specify the product.	No
Description	Used to specify the description for the product.	No
Product Category	Used to indicate the category of the product.	No
Product Type	Used to indicate the type of the product.	No

On clicking **Search** button, the search results appear based on the specified search criteria. The search results include product code, description, product category, product type, effective start date and effective end date that are associated with the product.

The **Search Results** section contains the following columns:

Column Name	Column Description
Product Code	Used to specify the product code.
Description	Used to specify the description for the product.
Product Category	Used to indicate the category of the product.
Product Type	Used to indicate the type of the product.
Start Date	Used to specify the date from when the product is effective.
End Date	Used to specify the date till when the product is effective.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

4. Select the required product from the search result.

Note: You cannot add more than one product to the market product.

5. On clicking **Select and Proceed** button, the **Basic Details** page of **Market Product Information** screen appears.

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Market Product Code	Used to specify the market product code.	Yes
Market Product Name	Used to specify the market product.	Yes
Description	Used to specify the description for the market product.	No
Start Date	Used to specify the date from when the product is effective.	Yes
End Date	Used to specify the date till when the product is effective.	No
Terms and Conditions	Used to associate terms and conditions with the product.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) appears corresponding to the **Terms and Conditions** field. On clicking the **Search** icon, the **Terms and Conditions Search for Product** window appears where you can associate the terms and conditions with the product.	

6. Enter the required details in the **Basic Details** page.
7. Associate the market product with divisions in the **Other Details** page, if required.
8. Define characteristics for the market product in the **Other Details** page, if required.
9. Define and add eligibility rule and parameter for the market product in the **Eligibility** page, if required.
10. Add a service for the market product in the **Services** page, if required.
11. Search and select the price list for the market product in the **Price List** page, if required..
12. Click **Submit**.
    A window appears confirming the market product is submitted in the system.
13. Click the **Close** button in the confirmation window.
    The market product is added.

Tip: Alternatively, you can access the **Market Product Information** screen by clicking the **Add Market Product** button in the **Page Title** area of the **Market Product** screen.

Searching for an Offer

Prerequisites

To search an offer, you should have:

- Offer defined in the application.

Procedure

To search an offer:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Offer** sub-menu.
   A sub-menu appears.
3. Click the **Search** option from the **Offer** sub-menu.
   The **Offer** screen appears.
4. Enter the search criteria in the **Search Offer** zone.

> **Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search** button.
   A list of offer that meet the search criteria appears in the **Search Results** section.

> **Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Copying an Offer

Instead of creating an offer from scratch, you can create a new offer using an existing offer. This is possible through copying an offer. On copying an offer, the details including the associated divisions, characteristics, services, and the price list are copied to the new offer. You can then edit the details, if required.

Prerequisites

To copy an offer, you should have:

- Offer(whose copy you want to create) defined in the application

Procedure

To copy an offer:

1. Search for an offer in the **Offer** screen whose copy you want to create.
2. In the **Search Results** section, click the **Copy** (⎘) icon in the **Copy** column corresponding to the offer whose copy you want to create.
   The **Offer Information** screen appears. It contains the following pages:
   - Offer Information - Basic Details on page 3177
   - Offer Information - Other Details on page 3178
   - Offer Information - Eligibility on page 3179
   - Offer Information - Services on page 3181
   - Offer Information - Price List on page 3182

   The **Basic Details** page contains the following zone:
   - Basic Details on page 3178

   The **Basic Details** zone contains the following fields:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
Offer Code	Used to specify the offer code.	Yes
Offer Name	Used to specify the offer.	Yes
Description	Used to specify the description for the offer.	No
Start Date	Used to specify the date from when the offer is effective.	Yes
End Date	Used to specify the date till when the offer is effective.	Yes
Terms and Conditions	Used to associate terms and conditions with the offer. **Note:** The **Search** (🔍) appears corresponding to the **Terms and Conditions** field. On clicking the **Search** icon, the **Terms and Conditions Search for Product** window appears where you can associate the terms and conditions with the offer.	No

The **Basic Details** zone contains the **Add Market Products** section. This section contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Market Product Name	Used to indicate the search value of the market product name. **Note:** The **Search** (🔍) appears corresponding to the **Market Product Name** field. On clicking the **Search** icon, the window appears where you can associate the terms and conditions with the product.	No
Product Category	Displays the product category associated with the selected market product.	Not applicable
Product Type	Displays the product type associated with the selected market product.	Not applicable
Product Name	Displays the product associated with the selected market product.	Not applicable

3. Enter the required details in the **Basic Details** page.
4. Associate or disassociate the offer with a market product in the **Basic Details** page.
5. Associate or disassociate the offer from a division in the **Other Details** page, if required.
6. Add, edit, or remove the characteristics from the offer in the **Other Details** page, if required.
7. Add, edit, or remove the eligibility rule from the offer in the **Eligibility** page, if required
8. Add, edit, or remove the services from the offer in the **Eligibility** page, if required
9. Add, edit, or remove the price list from the offer in the **Price List** page, if required
10. Click **Submit**.
    A window appears confirming the offer is submitted in the system.
11. Click the **Close** button in the confirmation window.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Note: You cannot edit fields from the **Services** page when a service is already associated to the product.

The new offer is added.

Priority	Indicates the order in which the assigned price list must be considered while determining the price item pricing for the offer.	No
Price List ID or Description	Used to indicate whether you want to search for a price list using the price list details.	No
Validity Period	Used to specify the period date range or number of days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to the offer. The valid values are: • Date Range • Number of Days	No

6. Add, edit or delete the required price list in the grid, to associate with the offer.
7. Click **Add More** button, to go back to previous section to add and associate the price list with the offer.
8. Click **Back** button, to go back to **Services** page.
9. Click **Save as Draft**, to save the offer in the draft.
   The offer is saved as draft in the application.
10. Click **Submit**.
    A window appears confirming the offer is submitted in the system.
11. Click the **Close** button in the confirmation window.
    The offer is added.

Tip: Alternatively, you can access the **Offer Information** screen by clicking the **Add Market Product** button in the **Page Title** area of the **Offer** screen.

Search Bundle

The **Search Bundle** zone allows you to search for a bundle using various search criteria. It contains the two following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search bundles which are added by you or search all the bundles available in the system. The valid value is: • All Bundles	No
Bundle Code	Used to search for a particular bundle.	No
Bundle Name	Used to search for bundle having a particular name.	No
Market Product Code	Used to search bundles which are associated to a particular market product.	No
Market Product Name	Used to search bundles which are associated to market products having a particular name.	No
Product Category	Used to search bundles which belong to a particular product category. The valid values are: • Checking • Loans • Others	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	• Savings	
Status	Used to search bundles having a particular status. The valid values are: • Active • Draft • Retired	No
Start Date	Used to search bundles which are effective from a particular date onwards.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bundle Information	Displays the concatenated string of information about the bundle separated by a comma (,).
Start Date	Displays the date from when the bundle is effective in the system.
End Date	Displays the date till when the bundle is effective in the system.
Product Category	Indicates the category to which the product belongs.
Market Product Information	Displays the concatenated string of information about the market product separated by a comma (,).
Status	Indicates the current status of the bundle. The valid values are: • Active • Draft • Retired
	Note: If the bundle is in the active status, it is indicated by the **Active** (Active) icon. If the bundle is in the draft status, it is indicated by the **Draft** (Draft) icon. If the bundle is in the retried status, it is indicated by the **Retried** (Retire) icon.
Copy	On clicking the **Copy** (⎘) icon, the **Product Bundle** screen appears where you can add a new bundle using an existing bundle.
Edit	On clicking the **Edit** (✎) icon, the **Product Bundle** screen appears where you can edit the details of the existing bundle.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for a Bundle

Prerequisites

To search a bundle, you should have:

- Bundle defined in the application.
- Market Product defined in the application.
- Product defined in the application.

Procedure

To search a bundle:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Bundle** sub-menu.
   A sub-menu appears.
3. Click the **Search** option from the **Bundle** sub-menu.
   The **Bundle** screen appears.
4. Enter the search criteria in the **Search Bundle** zone.

> **Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search** button.
   A list of bundle that meet the search criteria appears in the **Search Results** section.

> **Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Editing a Bundle

Procedure

To edit a bundle:

Copyright © 2009, 2025, Oracle and/or its affiliates.

1. Search for the bundle in the **Bundle** screen whose details you want to edit.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the bundle whose details you want to edit.
   The **Bundle Information** screen appears. It contains the following pages:

   - Bundle Information - Basic Details on page 3198
   - Bundle Information - Other Details on page 3199
   - Bundle Information - Eligibility on page 3200
   - Bundle Information - Services on page 3202
   - Bundle Information - Price List on page 3203

   The **Basic Details** page contains the following zone:

   - Basic Details

   The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Bundle Code	Displays the bundle code.	Not applicable
Bundle Name	Used to specify the bundle.	Yes
Description	Used to specify the description of the bundle.	No
Start Date	Displays the date from when the bundle is effective in the system.	Not applicable
End Date	Used to specify the date till when the bundle is effective in the system.	No
Terms and Conditions	Used to associate terms and conditions with the bundle. **Note:** The **Search** (🔍) appears corresponding to the **Terms and Conditions** field. On clicking the **Search** icon, the **Terms and Conditions Search for Product** window appears where you can associate the terms and conditions with the bundle.	No
Market Product Name	Used to specify the market product. **Note:** The **Search** (🔍) appears corresponding to the **Market Product Name** field. On clicking the **Search** icon, the **Search Market Product to Offer** window appears where you can associate the market product with the offer.	No
Product Category	Displays the product category.	Not applicable
Product Type	Displays the product type.	Not applicable
Product Name	Displays the concatenated string of information about the product separated by a comma (,).	Not applicable

3. Modify the required details in the **Basic Details** page.
4. Associate or disassociate the bundle with a market product in the **Basic Details** page.
5. Associate or disassociate the bundle from a division in the **Other Details** page, if required.
6. Add, edit, or remove the characteristics from the bundle in the **Other Details** page, if required.

Copyright © 2009, 2025, Oracle and/or its affiliates.

7. Add, edit, or remove the eligibility rule from the bundle in the **Eligibility** page, if required.
8. Add, edit, or remove the price list from the bundle in the **Price List** page, if required.
9. Click **Submit**.
   A window appears confirming the bundle is submitted in the system.
10. Click the **Close** button in the confirmation window.

> **Note:** You cannot edit fields from the **Services** page when a service is already associated to the product.

The bundle is modified.

Copying a Bundle

Instead of creating a bundle from scratch, you can create a new bundle using an existing bundle. This is possible through copying a bundle. On copying a bundle, the details including the associated divisions, characteristics, services and the price list are copied to the new bundle. You can then edit the details, if required.

Prerequisites

To copy a bundle, you should have:

- Bundle(whose copy you want to create) defined in the application

Procedure

To copy a bundle:

1. Search for a bundle in the **Bundle** screen whose copy you want to create.
2. In the **Search Results** section, click the **Copy** (⎘) icon in the **Copy** column corresponding to the bundle whose copy you want to create.
   The **Bundle Information** screen appears. It contains the following pages:
   - Bundle Information - Basic Details on page 3198
   - Bundle Information - Other Details on page 3199
   - Bundle Information - Eligibility on page 3200
   - Bundle Information - Services on page 3202
   - Bundle Information - Price List on page 3203

   The **Basic Details** page contains the following zone:
   - Basic Details on page 3198

   The **Basic Details** zone contains the following fields:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
Bundle Code	Used to specify the bundle code.	Yes
Bundle Name	Used to specify the bundle.	Yes
Description	Used to specify the description for the bundle.	No
Start Date	Used to specify the date from when the bundle is effective.	Yes
End Date	Used to specify the date till when the bundle is effective.	No
Terms and Conditions	Used to associate terms and conditions with the bundle. **Note:** The **Search** (🔍) appears corresponding to the **Terms and Conditions** field. On clicking the **Search** icon, the **Terms and Conditions Search for Product** window appears where you can associate the terms and conditions with the bundle.	No
Market Product Name	Used to specify the market product. **Note:** The **Search** (🔍) appears corresponding to the **Market Product Name** field. On clicking the **Search** icon, the **Search Market Product to Offer** window appears where you can associate the market product with the offer.	Yes
Product Category	Displays the product category.	Not applicable
Product Type	Displays the product type.	Not applicable
Product Name	Displays the concatenated string of information about the product separated by a comma (,).	Not applicable

3. Modify the required details in the **Basic Details** page.
4. Associate or disassociate the bundle with a market product in the **Basic Details** page
5. Associate or disassociate the bundle from a division in the **Other Details** page, if required.
6. Add, edit, or remove the characteristics from the bundle in the **Other Details** page, if required.
7. Add, edit, or remove the eligibility rule from the bundle in the **Eligibility** page, if required.
8. Add, edit, or remove the price list from the bundle in the **Price List** page, if required.
9. Click **Submit**.
   A window appears confirming the bundle is submitted in the system.
10. Click the **Close** button in the confirmation window.

Note: You cannot edit fields from the **Services** page when a service is already associated to the product.

The new bundle is added.

Defining a Characteristic for the Bundle

Prerequisites

To define a characteristic to the bundle, you should have:

- Characteristic type defined in the application.

Procedure

To define characteristic type to the bundle:

1. Ensure that the **Additional Attributes** section is expanded in the **Other Details** zone of **Other Details** page when you are defining characteristic type to the bundle.

   The **Additional Attributes** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristics type and characteristics value is effective.	Yes
Characteristics Type	Used to indicate the characteristic type.	Yes
Characteristics Value	Used to specify the value for the characteristic type.	Yes

2. Enter the required details in the **Additional Attributes** section.
3. Click **Save as Draft**, to save the bundle in the draft.
4. Click **Next**, to go to **Eligibility**page.
   The bundle is saved as draft in the application.

Defining Eligibility Criteria for the Bundle

Prerequisites

To define eligibility criteria for the bundle, you should have:

- Parameter defined in the application.

Procedure

To define eligibility criteria for the bundle:

1. Ensure that the **Eligibility** zone is expanded in the **Eligibility** page when you are defining eligibility criteria for the bundle.

   The **Eligibility** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Eligibility Rule	Used to specify a eligibility rule for the bundle.	Yes
Start Date	Used to specify the date from when the eligibility rule will be effective.	Yes
End Date	Used to specify the date till when the eligibility rule will be effective.	No
Parameter	Used to search the parameter which you want to associate with the eligibility rule. **Note:** The **Search** (🔍) appears corresponding to the fields. On clicking the **Search** icon, the **Parameter Search** window appears where you can search for the required parameter.	Yes
Operator	Used to specify the relational operator to define the relation between the parameter name and value.	Yes
Parameter Value Type	Used to indicate the parameter value against which you want to compare the parameter. The valid values are: • Parameter • Value	Yes
Parameter	Used to search the parameter (on the right hand side) against which you want to compare the parameter (on the left hand side).	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) appears corresponding to the fields. On clicking the **Search** icon, the **Parameter Search** window appears where you can search for the required parameter.	
Is True	Used to indicate what happens when the condition is true (satisfied). The valid values are: • **Check Next Condition** - Indicates that the condition with consecutive sequence number should be executed. • **Rule Is Falsee** - Indicates that the action specified in the **Rule False Action** field should be executed. • **Rule Is True** - Indicates that the action specified in the **Rule True Action** field should be executed.	Yes
Is False	Used to indicate what happens when the condition is false (not satisfied). The valid values are: • **Check Next Condition** - Indicates that the condition with consecutive sequence number should be executed. • **Rule Is False** - Indicates that the action specified in the **Rule False Action** field should be executed. • **Rule Is True** - Indicates that the action specified in the **Rule True Action** field should be executed.	Yes
Is Sufficient	Used to indicate what happens when the data is insufficient. The valid values are: • **Check Next Condition** - Indicates that the condition with consecutive sequence number should be executed. • **Rule Is False** - Indicates that the action specified in the **Rule False Action** field should be executed. • **Rule Is True** - Indicates that the action specified in the **Rule True Action** field should be executed.	Yes

The**Eligibility** zone contains the **Eligibility Rules** table which contain following columns:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Column	Column Description
Eligibility Rule	Displays eligibility rule of the bundle.
Start Date	Displays the date from when the eligibility rule is effective.
End Date	Displays the date till when the eligibility rule is effective.

2. Enter the required details in the **Eligibility** zone.
3. Click **Save as Draft**, to save the bundle in the draft.
4. Click **Next**, to go to **Services**page.
   The bundle is saved as draft in the application.

Adding a Service for a Bundle

Prerequisites

To add a service to a bundle, you should have:

- Market product defined in the application.
- Service defined in the application.

Procedure

To add a service to a bundle:

1. Ensure that the **Services** section is expanded in the **Services** zone of **Services** page when you are add service to a bundle.

   The **Services** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Service	Used to specify the product service.	Not applicable
Description	Used to specify the description of the product service.	Not applicable
Start Date	Used to specify the date from when the product service will be effective. **Note:** The product service end date cannot be earlier than the product service start date.	Not applicable
End Date	Used to specify the date till when the product service will be effective.	Not applicable

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The product service end date cannot be earlier than the product service start date.	
Mandatory	Indicates whether the product service is mandatory or not.	Not applicable
Mandatory Services	Displays the services associated with the selected product.	Not applicable
Optional Services	Used to add the service for a bundle.	No

2. Enter the required details in the **Services** section.
3. Click **Save as Draft**, to save the bundle in the draft.
4. Click **Submit**, to save the bundle.

Associating a Price List with the Bundle

Prerequisites

To associate the bundle with a price list, you should have:

- Price list defined in the application.

Procedure

To associate the bundle with a price list:

1. Ensure that the is **Price List** zone expanded in the of **Price List** page when you are associating the bundle with the price list.

   The **Price List** zone contains **Search Price List** section.

   The **Search Price List** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List ID or Description	Used to indicate whether you want to search for a price list using the price list details.	Yes
Start Date	Used to specify the date from when the price list of the product is effective.	Yes
End Date	Used to specify the date till when the price list of the product is effective.	No

   The **Search Results** section contains the following fields:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Field Name	Field Description	Mandatory (Yes or No)
Select	Used to indicate whether the price list is selected or not.	Yes
Price List ID and Description	Displays the price list id and name.	Not applicable
Start Date	Displays the date from when the price list of the product is effective.	Not applicable
End Date	Displays the date till when the price list of the product is effective.	Not applicable

2. Select the required price list in the grid, to associate with the bundle.
3. Click **Back** button, to go back to **Services** page.
4. Click **Save as Draft**, to save the bundle in the draft.
5. Click **Select and Proceed**, to go to **Price List Added** section. It contains the following fields in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Priority	Indicates the order in which the assigned price list must be considered while determining the price item pricing for the bundle.	Yes
Price List ID or Description	Used to indicate whether you want to search for a price list using the price list details.	Not applicable
Validity Period	Used to specify the period date range or number of days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to the bundle. The valid values are: • Date Range • Number of Days	Not applicable

6. Add, edit or delete the required price list in the grid, to associate with the bundle.
7. Click **Add More** button, to go back to previous section to add and associate the price list with the bundle.
8. Click **Back** button, to go back to **Services** page.
9. Click **Save as Draft**, to save the bundle in the draft.
   The bundle is saved as draft in the application.
10. Click **Submit**.
    A window appears confirming the bundle is submitted in the system.
11. Click the **Close** button in the confirmation window.
    The bundle is added.

Tip: Alternatively, you can access the **Bundle Information** screen by clicking the **Add Bundle** button in the **Page Title** area of the **Bundle** screen.

Chapter 49

Retail Banking Product Inbound Web Services

Topics:

- Prerequisites
- C1_GETELIGIBLEPROD Business Service
- C1-GetProdDetail Business Service
- C1PRDCTENRL Business Service

Oracle Revenue Management and Billing provides the ability to do the following through an inbound web service:

- View the details of a retail banking product, market product, offer, and bundle
- Derive the eligible market product, offer, and bundle for a person or an account

The following inbound web services are shipped with the product:

- **C1-GetEligibleProduct** - This is a SOAP based inbound web service. It supports the XML format. It enables you to derive eligible active market products, offers, and bundles for the person or account on the processing date. You can specify the eligibility parameters along with the person or account details when you want to simulate the response. It also enables you to view the details of an active product, market product, offer, and/or bundle which is effective on the processing date. You can extract the data in the following templates:
  - **Summary** - Used when you want to extract the details of the market product, offer, and/or bundle without pricing.
  - **Detail** - Used when you want to extract the details of the market product, offer, and/or bundle with pricing.
- **C1-GetEligibleProductRest** - This is a REST based inbound web service. It supports the JSON and XML formats. It enables you to derive eligible active market products, offers, and bundles for the person or account on the processing date. You can specify the eligibility parameters along with the person or account details when you want to simulate the response. It also enables you to view the details of an active product, market product, offer, and/or bundle which is effective on the processing date. You can extract the data in the following templates:
  - **Summary** - Used when you want to extract the details of the market product, offer, and/or bundle without pricing.
  - **Detail** - Used when you want to extract the details of the market product, offer, and/or bundle with pricing.
- **C1-GetProdDetail** - This is a SOAP based inbound web service. It supports the XML format. It enables you to view the details of an active market product, offer, or bundle which is effective on the processing date. You can extract the data in the following templates:
  - **Summary** - Used when you want to extract the details of the market product, offer, or bundle without pricing.
  - **Detail** - Used when you want to extract the details of the market product, offer, or bundle with pricing.
- **C1-GetProdDetailRest** - This is a REST based inbound web service. It supports the JSON and XML formats. It enables you to view the details of an

active market product, offer, or bundle which is effective on the processing date. You can extract the data in the following templates:

- **Summary** - Used when you want to extract the details of the market product, offer, or bundle without pricing.
- **Detail** - Used when you want to extract the details of the market product, offer, or bundle with pricing.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Prerequisites

The following table lists the prerequisites for eligible derivation of the active market products, offers, or bundles, to view the details of the active market products, offers, or bundles, and to enroll the account to market products, offers, or bundles through an inbound web service:

If you want to...	**Then...**

Drive eligible market products, offers, or bundles through an inbound web service	You need to do the following:
	• Retail banking product catalog definitions are created in the system.
	• Price item pricing defined for all the retail banking product catalog definition in the system
	• Define a REST or SOAP based inbound web service to call the **C1_GETELIGIBLEPROD** business service.
	• Active market products, offers, or bundles are required in the system.
	• Provide the required input parameters, such as,
	  • Product Category
	  • Product Code
	  • Product Type
	  • Entity Code
	  • Entity Type
	  • Person account
	  • Process Date

View the details of the active market product, offer, or bundle through an inbound web service	You need to do the following:
	• Retail banking product catalog definitions are created in the system.
	• Price item pricing defined for all the retail banking product catalog definition in the system
	• Define a REST or SOAP based inbound web service to call the **C1-GetProdDetail** business service.
	• Active market products, offers, or bundles are required in the system.
	• Provide the required input parameters, such as,
	  • Entity Code
	  • Entity Type
	  • Person account

Enroll the account to market products, offers, or bundles through an inbound web service	You need to do the following: • Division, Contract Type, Customer Class, and Customer details setup defined in the application to enroll the account to market products, offers, or bundles.

Copyright © 2009, 2025, Oracle and/or its affiliates.

If you want to...	Then...
	• Definition of market products, offers, or bundles should be created in the system before sending enrollment request.

C1_GETELIGIBLEPROD Business Service

The **C1_GETELIGIBLEPROD** business service enables you to derive the eligible active market products, offers, or bundles for the person or an account on the processing date. It also enables you to view the details of an eligible active market products, offers, or bundles which are effective on the processing date. You can call this business service from an external system through an inbound web service. If you want to send the request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

You can extract the data in the following template:

- **Summary**: Used to derive the details of the eligible active market products, offers, and/or bundles without pricing.
- **Detail**: Used to derive the details of the eligible active market products, offers, and/or bundles with pricing.

To drive for an eligible active market products, offers, or bundles for the person or account, provide the following input parameters:

- Product Category
- Product Code
- Product Type
- Entity Type
- Entity Code
- Person account
- Process Date

Note: Entity is referred to market product, offer or bundle.

Eligible Market Products, Offers, or Bundles Derivation Request and Response - Tags in XML Format

Note: We recommend you to refer the topics Eligible Market Products, Offers, or Bundles Derivation Request in the XML Format on page 3217 and Eligible Market Products, Offers, or Bundles Derivation Response in the XML Format on page 3218 in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1_GETELIGIBLEPROD** business service through an inbound web service, you need to ensure that the eligible active market products, offers, or bundles derivation request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
productCode	Used to specify the product code to derive the details of the eligible active entities. **Note:** Entity is referred to market product, offer or bundle.	Yes(Conditional) **Note:** This field is required if the product category, entity type, or entity code are not entered.
productCategoryFlg	Used to specify the product category flag to derive the details of the eligible active entities.	No

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
	Note: Entity is referred to market product, offer or bundle.	
division	Used to specify the division to derive the details of the eligible active entities which are associated with a particular division.	Yes(Conditional) **Note:** This field is required with product code, product category, entity type or entity code to derive the entities of the specific division.
entityType	Used to indicate the entity type to derive the details of the eligible active entities.	Yes(Conditional) **Note:** This field is required if the entity code is entered. **Note:** This field is required if the product code, or product category are not entered.
entityCode	Used to specify the entity code to derive the details of the eligible active entities.	Yes(Conditional) **Note:** This field is required if the product code or product category are not entered.
processDate	Used to specify the date to derive the details of effective market products, offers, or bundles for that date.	Yes(Conditional) **Note:** If the date is not entered then it will display the default date from the system on which the enquiry is made.
accountId	Used to indicate the account for which you want to derive the details of the active entities.	Yes(Conditional) **Note:** If this field is not entered then all active entities will be extract. **Note:** This field is required if you want to derive the details of eligible active entities for specific person or account.
acctIdtype	Used to indicate the type of account identifier type for which you to derive the details of the eligible active entity.	No
acctIdentifierValue	Used to specify the value for the account identifier type for which you to derive the details of the eligible active entities.	Yes(Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
		Note: This field is required if you want to derive the details of eligible active entities for specific person or account.
personId	Used to specify the person account for which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) **Note:** This field is required if you want to derive the details of eligible active entities for specific person or account.
custIdTypeCd	Used to indicate the customer ID type for which you want to derive the details of eligible active market products, offers, or bundles.	No
perIdentifireVal	Used to specify the value of person identifier for which you want to derive the details of eligible active market products, offers, or bundles.	No
productLinkedEntity	Used to specify product linked entity(market product code) for which you want to derive the details of eligible active offers or bundles linked with that particular code.	No
linkedEntityCode	Used to specify code of the linked entity(market product code) for which you want to derive the details of eligible active offers or bundles linked with that particular code.	Yes(Conditional) **Note:** This field is required when you want to derive offer or bundle linked with the particular market product.
linkedEntityType	Used to indicate type of the linked entity(market product code) for which you want to derive the details of eligible active offer or bundle linked with that particular code.	Yes(Conditional) **Note:** This field is required when you want to derive offer or bundle linked with the particular market product.
eligibleParameter	Used to specify the eligibility parameter based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) **Note:** If this field is not entered then system will take the eligibility details from the person or account.
priceParmCode	Used to specify the eligibility parameter code based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional)

Tag Name	Tag Description	Mandatory (Yes or No)
		Note: If this field is not entered then system will take the eligibility details from the person or account.
priceParmVal	Used to specify the eligibility parameter value based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) **Note:** If this field is not entered then system will take the eligibility details from the person or account.

The following table lists and describes the tags which appear in the eligible active market products, offers, or bundles derivation response XML format:

Tag Name	Tag Description
entityList	Displays the list of eligible market products, offers, or bundles.
entityCode	Displays the entity code.
entityType	Displays the entity type.
entityName	Displays the entity name.
entityStartDate	Displays the date from when the entity is effective.
entityEndDate	Displays the date till when the entity is effective.
entityCodeDescr	Displays the description of the entity code.
termsAndCondition	Displays the terms and condition of the entity.
termAndConditionDescr	Displays the description of the terms and conditions of the entity.
status	Displays the status of the entity.
productList	Displays the list of the eligible products to which the requested entity belongs.
productCode	Displays the code of the eligible product to which the requested entity belongs.
productDescription	Displays the description of the eligible product to which the requested entity belongs.
productTypFlgDesc	Displays the description of the eligible product type flag to which the requested entity belongs.
productCategoryFlgDesc	Displays the description of the eligible product category flag to which the requested entity belongs.
productLinkedEntity	Displays the list of eligible market products, offers, and bundles.
linkedEntityStartDate	Displays the date from when the linked entity is effective.
linkedEntityEndDate	Displays the date till when the linked entity is effective.
linkedEntityCode	Displays the linked entity code for the requested entity code.
linkedEntityType	Displays the linked entity type for the requested entity code.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description
	Note: It is applicable in case of offer and bundle.
EntityDivision	Displays the division to which the requested entity belongs.
divisionCode	Displays the division code to which the requested entity belongs.
eligibilityDetails	Indicates the name of group tag.
eligibilityStartDate	Displays the date from when the eligibility of the entity is effective.
eligibilityEndDate	Displays the date till when the eligibility of the entity is effective.
eligibilityDescription	Displays the description of the eligibility to which the requested entity belongs.
eligibilityRule	Indicates the name of group tag.
sequenceNumber	Indicates the sequence number of eligibility condition.
lhsPriceParmCd	Indicates the left side parameter code of the eligibility condition.
operator	Indicates the operator to evaluate the condition.
rhsPriceParmCd	Indicates the right side parameter code of the eligibility condition.
rhsPriceParmVal	Indicates the right side parameter value of the eligibility condition.
lhsPriceParmCd1	Indicates the left side parameter code of the eligibility condition.
rhsPriceParmTypeFlg	Indicates the value of the right side flag.
trueFlag	Indicates the true eligibility condition.
falseFlag	Indicates the false eligibility condition.
insufficientFlag	Indicates the insufficient eligibility condition.
services	Indicates the name of group tag.
serviceName	Displays the service configured to the requested entity code.
mandatoryFlag	Indicates the mandatory or optional type of the services.
pricing	Indicates the name of group tag.
priority	Displays the priority in sequence of the price list of the entities.
priceListId	Displays the Price List ID.
priceListDescription	Displays the description of the price list.
priceListStartDate	Displays the date from when the price list of the entity is effective.
priceListEndDate	Displays the date till when the price list of the entity is effective.
noOfDays	Displays the validity of price list in number of days.
priceItemCode	Displays the price item code.
priceitemDescr	Displays the description of the price item.
priceAsgnId	Displays the price assignment ID.
validityFlag	Indicates the validity of the price item.
sourceEntityType	Displays the source entity type.
sourceEntityCode	Displays the source entity code.
priceListInfo	Displays the information of the price list.
priceComponent	Indicates the name of group tag.
priceCompId	Displays the price component ID.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description
	Note: If the inquiry type flag value is **SMRY** then service will provide details of eligible entities without price component and if the inquiry type flag value is **DETL** then service will provide details of eligible entities with price component

Sample Eligible Bundle Derivation Request and Response in the XML Format

Using the below example, you can derive the eligible bundles which are processed on **2022-01-11**.

Sample Eligible Bundle Request in the XML Format

```
<C1_GETELIGIBLEPROD>
    <productCode>LOAN_001</productCode>
    <productCategoryFlg></productCategoryFlg>
    <division>IND</division>
    <entityType>BNDL</entityType>
    <entityCode>CHECKBUND_003</entityCode>
    <processDate>2022-01-11</processDate>
    <accountId></accountId>
    <acctIdtype></acctIdtype
    <acctIdentifierValue></acctIdentifierValue
    <personId></personId
    <custIdTypeCd></custIdTypeCd
    <perIdentifireVal></perIdentifireVal
    <productLinkedEntity>
        <linkedEntityCode>CHECKMP_001</linkedEntityCode>
        <linkedEntityType>MP</linkedEntityType>
    </productLinkedEntity>
    <eligibleParameter>
        <priceParmCode>ACC_DIVISION</priceParmCode>
        <priceParmVal>IND</priceParmVal>
    </eligibleParameter>
    <eligibleParameter>
        <priceParmCode>PERSON_STATE</priceParmCode>
        <priceParmVal>MH</priceParmVal>
    </eligibleParameter>
</C1_GETELIGIBLEPROD>
```

Sample Eligible Bundle Response in the XML Format

```
<C1_GETELIGIBLEPROD>
    <productCode>LOAN_001</productCode>
    <productCategoryFlg></productCategoryFlg>
    <division>IND</division>

Before calling the **C1_GETELIGIBLEPROD** business service through an inbound web service, you need to ensure that the eligible active market products, offers, or bundles derivation request contains the following attributes:

Attribute Name	Attribute Description	Mandatory (Yes or No)
productCode	Used to specify the product code to derive the details of the eligible active entities. **Note:** Entity is referred to market product, offer or bundle.	Yes(Conditional) **Note:** This field is required if the product category, entity type, or entity code are not entered.
productCategoryFlg	Used to specify the product category flag to derive the details of the eligible active entities. **Note:** Entity is referred to market product, offer or bundle.	No
division	Used to specify the division to derive the details of the eligible active entities which are associated with a particular division.	Yes(Conditional) **Note:** This field is required with product code, product category, entity type or entity code to extract the entities of the specific division.
entityType	Used to indicate the entity type to derive the details of the eligible active entities.	Yes(Conditional) **Note:** This field is required if the entity code is entered. **Note:** This field is required if the product code, or product category are not entered.
entityCode	Used to specify the entity code to derive the details of the eligible active entities.	Yes(Conditional) **Note:** This field is required if the product code or product category are not entered.
processDate	Used to specify the date to derive the details of effective market products, offers, or bundles for that date.	Yes(Conditional) **Note:** If the date is not entered then it will display the default date from the system on which the enquiry is made.
accountId	Used to indicate the account for which you want to derive the details of the eligible active entities.	Yes(Conditional) **Note:** If this field is not entered then all active entity will be extract.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Attribute Name	Attribute Description	Mandatory (Yes or No)
		Note: This field is required if you want to derive the details of eligible active entities for specific person or account.
acctIdtype	Used to indicate the type of account identifier type for which you to derive the details of the eligible active entities.	No
acctIdentifierValue	Used to specify the value for the account identifier type for which you to derive the details of the eligible active entity.	Yes(Conditional) **Note:** This field is required if you want to derive the details of eligible active entities for specific person or account.
personId	Used to specify the person account for which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) **Note:** This field is required if you want to derive the details of eligible active entities for specific person or account.
custIdTypeCd	Used to indicate the customer ID type for which you want to derive the details of eligible active market products, offers, or bundles.	No
perIdentifireVal	Used to specify the value of person identifier for which you want to derive the details of eligible active market products, offers, or bundles.	No
productLinkedEntity	Used to specify product linked entity(market product code) for which you want to derive the details of eligible active offers or bundles linked with that particular code.	No
linkedEntityCode	Used to specify code of the linked entity(market product code) for which you want to derive the details of eligible active offers or bundles linked with that particular code.	Yes(Conditional) **Note:** This field is required when you want to derive offer or bundle linked with the particular market product.
linkedEntityType	Used to indicate type of the linked entity(market product code) for which you want to derive the details of eligible active offer or bundle linked with that particular code.	Yes(Conditional) **Note:** This field is required when you want to derive offer or bundle linked with the particular market product.
eligibleParameter	Used to specify the eligibility parameter based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Attribute Name	Attribute Description	Mandatory (Yes or No)
		Note: If this field is not entered then system will take the eligibility details from the person or account.
priceParmCode	Used to specify the eligibility parameter code based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) **Note:** If this field is not entered then system will take the eligibility details from the person or account.
priceParmVal	Used to specify the eligibility parameter value based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) **Note:** If this field is not entered then system will take the eligibility details from the person or account.

The following table lists and describes the attributes which appear in the eligible active market products, offers, or bundles derivation response JSON format:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Attribute Name	Attribute Description
entityList	Displays the list of eligible market products, offers, or bundles.
entityCode	Displays the entity code.
entityType	Displays the entity type.
entityName	Displays the entity name.
entityStartDate	Displays the date from when the entity is effective.
entityEndDate	Displays the date till when the entity is effective.
entityCodeDescr	Displays the description of the entity.
termsAndCondition	Displays the terms and condition of the entity.
termAndConditionDescr	Displays the description of the terms and conditions of the entity.
status	Displays the status of the entity.
productList	Displays the list of the eligible products to which the requested entity belongs.
productCode	Displays the code of the eligible product to which the requested entity belongs.
productDescription	Displays the description of the eligible product to which the requested entity belongs.
productTypFlgDesc	Displays the description of the eligible product type flag to which the requested entity belongs.
productCategoryFlgDesc	Displays the description of the eligible product category flag to which the requested entity belongs.
productLinkedEntity	Displays the list of eligible market products, offers, and bundles.
linkedEntityStartDate	Displays the date from when the linked entity is effective.
linkedEntityEndDate	Displays the date till when the linked entity is effective.
linkedEntityCode	Displays the linked entity code for the requested entity code.
linkedEntityType	Displays the linked entity for the requested entity code.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Attribute Name	Attribute Description
	Note: It is applicable in case of offer and bundle.
EntityDivision	Displays the division to which the requested entity belongs.
divisionCode	Displays the division code to which the requested entity belongs.
eligibilityDetails	Indicates the name of group tag.
eligibilityStartDate	Displays the date from when the eligibility of the entity is effective.
eligibilityEndDate	Displays the date till when the eligibility of the entity is effective.
eligibilityDescription	Displays the description of the eligibility to which the requested entity belongs.
eligibilityRule	Indicates the name of group tag.
sequenceNumber	Indicates the sequence number of eligibility condition.
lhsPriceParmCd	Indicates the left side parameter code of the eligibility condition.
operator	Indicates the operator to evaluate the condition
rhsPriceParmCd	Indicates the right side parameter code of the eligibility condition.
rhsPriceParmVal	Indicates the right side parameter value of the eligibility condition.
lhsPriceParmCd1	Indicates the left side parameter code of the eligibility condition.
rhsPriceParmTypeFlg	Indicates the value of the right side flag.
trueFlag	Indicates the true condition.
falseFlag	Indicates the false condition.
insufficientFlag	Indicates the insufficient condition.
services	Indicates the name of group tag.
serviceName	Displays the service configured at the requested entity code.
mandatoryFlag	Indicates the mandatory or optional type of the services.
pricing	Indicates the name of group tag.
priority	Displays the priority in sequence of the price list of the entities.
priceListId	Displays the Price List ID.
priceListDescription	Displays the description of the price list.
priceListStartDate	Displays the date from when the price list of the entity is effective.
priceListEndDate	Displays the date till when the price list of the entity is effective.
noOfDays	Displays the validity of price list in number of days.
priceItemCode	Displays the price item code.
priceitemDescr	Displays the description of the price item.
priceAsgnId	Displays the price assignment ID.
validityFlag	Indicates the validity of the price item.
sourceEntityType	Displays the source entity type.
sourceEntityCode	Displays the source entity code.
priceListInfo	Displays the information of the price list.
priceComponent	Indicates the name of group tag.
priceCompId	Displays the price component ID.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Attribute Name	Attribute Description
	Note: If the inquiry type flag value is **SMRY** then service will provide details of eligible entities without price component and if the inquiry type flag value is **DETL** then service will provide details of eligible entities with price component

Sample Eligible Bundle Derivation Request and Response in the JSON Format

Using the below example, you can derive eligible bundles of the **2406432705** account which is processed on date 2022-01-11.

Sample Eligible Bundle Request in the JSON Format

```
{
    -"C1_GETELIGIBLEPROD": '
    {
        -"productCode": -"LOAN_001",
        -"productCategoryFlg": -"",
        -"division": -"IND",
        -"entityType": -"BNDL",
        -"entityCode": -"CHECKBUND_003",
        -"processDate": -"2022-01-11",
        -"accountId": -"",
        -"acctIdtype": -"",
        -"acctIdentifierValue": -"",
        -"personId": -"",
        -"custIdTypeCd": -"",
        -"perIdentifireVal": -"",
        -"productLinkedEntity": '
        {
            -"linkedEntityCode": -"CHECKMP_001",
            -"linkedEntityType": -"MP",
        -}
        -"eligibleParameter":
        {
            -"priceParmCode": -"",
            -"priceParmVal": -"",
        -}
    -}
}
```

Sample Eligible Bundle Response in the JSON Format

```
{
    -"C1_GETELIGIBLEPROD": '
    {
        -"productCode": -"LOAN_001",
        -"productCategoryFlg": -"",

C1-GetProdDetail Business Service

The **C1-GetProdDetail** business service enables you to view the details of an active market product, offer, or bundle for the person or account which is effective on the processing date. You can call this business service from an external system through an inbound web service. You can send the request in XML or JSON format through inbound web service in Oracle Revenue Management and Billing.

If you want to send the request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

You can extract the data in the following template:

- **Summary**: Used to extract the details of the market product, offer, and/or bundle without pricing.
- **Detail**: Used to extract the details of the market product, offer, and/or bundle with pricing.

To search for viewing the details active market product, offer, or bundle for the person or account, provide the following input parameters:

- Entity Code
- Entity Type
- Person account

Note: Entity is referred to market product, offer or bundle.

Market Product, Offer, or Bundle View Request - Tags in XML Format

Note: We recommend you to refer the topics Market Product, Offer, or Bundle View Request in the XML Format on page 3399 and Market Product, Offer, or Bundle View Response in the XML Format on page 3400 in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1-GetProdDetail** business service through an inbound web service, you need to ensure that the active market products, offers, or bundles view request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
entityCode	Used to specify the entity code to get details of the active entity. **Note:** Entity is referred to market product, offer or bundle.	Yes
entityType	Used to indicate the entity type to get details of the active entity. **Note:** Entity is referred to market product, offer or bundle.	Yes **Note:** This field is required if the entity code is entered.
processDate	Used to specify the date to get the effective market product, offer, or bundle for that date.	Yes(Conditional) **Note:** If the date is not entered then it will display the default date from the system on which the enquiry is made.
inquiryTypeFlag	Used to indicate whether you want to view the basic details without price components or the complete details with price components of the entity. The valid values are:	Yes(Conditional) **Note:** The default value is **SMRY**.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
	• Detail (DETL) - Used to indicate whether you want to view the complete details with price components of the entity. • Summary (SMRY) - Used to indicate whether you want to view the basic details without price components of the product.	
division	Used to indicate the division to which the entity belongs.	Yes(Conditional) **Note:** This field is required with product code, product category, entity type or entity code to extract the entity of the specific division.

The following table lists and describes the tags which appear in the view active market products, offers, or bundles derivation response XML format:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description
entityName	Displays the entity name.
entityStartDate	Displays the date from when the entity is effective.
entityEndDate	Displays the date till when the entity is effective.
termsAndCondition	Displays the terms and condition of the entity.
status	Displays the status of the entity.
termsAndCondnDescr	Displays the description of the terms and conditions of the entity.
messageCategory	Indicates the category of the message.
messageNumber	Indicates the number of the message.
messageText	Displays the message.
longDescription	Displays the long description.
productlist	Displays the list of the eligible product to which the requested entity belongs.
productCode	Used to display the code of the parent product.
productName	Used to display the parent product.
prodTypFlg	Displays the code of the eligible product to which the requested entity belongs.
productCategoryFlgDesc	Displays the description of the eligible product category flag to which the requested entity belongs.
EntityDivision	Used to indicate the division of the requested entity.
divisionCode	Displays the division to which the requested entity belongs.
productLinkedEntity	Displays the list of eligible market product, offer, and bundle.
linkedEntityCode	Displays the linked entity code for the requested entity code.
linkedEntityName	Displays the linked entity for the requested entity code.
linkedEntityType	Displays the linked entity type for the requested entity code.
eligibilityDetails	Indicates the name of group tag.
eligibilityDescription	Displays the description of the eligibility to which the requested entity belongs.
eligibilityStartDate	Displays the date from when the eligibility of the entity is effective.
eligibilityEndDate	Displays the date till when the eligibility of the entity is effective.
eligibilityRule	This is group tag under the eligibility details.
rhsPriceParmCd	Indicates the right side parameter code of the eligibility condition.
rhsPriceParmVal	Indicates the right side parameter value of the eligibility condition.
lhsPriceParmCd	Indicates the left side parameter code of the eligibility condition.
rhsPriceParmTypeFlg	Indicates the value of the right side flag.
trueFlag	Indicates the true condition.
trueFlagDescr	Displays the description for the true flag condition.
falseFlag	Indicates the false condition.
falseFlagDescr	Displays the description for the false flag condition.
insufficientFlag	Indicates the insufficient condition.
insufficientFlagDescr	Displays the description for the insufficient flag condition.
eligibilityRuleFlg	Indicates the eligibility rule flag condition.

Market Product, Offer, or Bundle View Request and Response - Attribute/Value Pairs in JSON Format

Note: We recommend you to refer the topics Market Product, Offer, or Bundle View Request in the JSON Format on page 3494 and Market Product, Offer, or Bundle View Response in the JSON Format on page 3494 in parallel while understanding the below mentioned tags. This will help you to understand how the attribute/value pairs structured in the JSON format.

Before calling the **C1-GetProdDetail** business service through an inbound web service, you need to ensure that the active market products, offers, or bundles view request contains the following attributes:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Attribute Name	Attribute Description	Mandatory (Yes or No)
entityCode	Used to specify the entity code to get the active entity. **Note:** Entity is referred to market product, offer or bundle.	Yes
entityType	Used to indicate the entity type to get the active entity.	Yes
processDate	Used to specify the date to get the effective market product, offer, or bundle for that date.	Yes(Conditional) **Note:** If the date is not entered then it will display the default date from the system on which the enquiry is made.
inquiryTypeFlag	Used to indicate whether you want to view the basic details without price components or the complete details with price components of the entity. The valid values are: • Detail (DETL) - Used to indicate whether you want to view the complete details with price components of the entity. • Summary (SMRY) - Used to indicate whether you want to view the basic details without price components of the entity.	Yes(Conditional) **Note:** The default is **SMRY**.
division	Used to indicate the division to which the entity belongs.	Yes(Conditional) **Note:** This field is required with product code, product category, entity type or entity code to extract the entity of the specific division.

The following table lists and describes the attributes which appear in the view active market products, offers, or bundles derivation response JSON format:

Copyright © 2009, 2025, Oracle and/or its affiliates.

Attribute Name	Attribute Description
entityName	Displays the entity name.
entityStartDate	Displays the date from when the entity is effective.
entityEndDate	Displays the date till when the entity is effective.
termsAndCondition	Displays the terms and condition of the entity.
status	Displays the status of the entity.
termsAndCondnDescr	Displays the description of the terms and conditions of the entity.
messageCategory	Indicates the category of the message.
messageNumber	Indicates the number of the message.
messageText	Displays the message.
longDescription	Displays the long description.
productlist	Displays the list of the eligible product to which the requested entity belongs.
productCode	Used to display the code of the parent product.
productName	Used to display the parent product.
prodTypFlg	Displays the code of the eligible product to which the requested entity belongs.
productCategoryFlgDesc	Displays the description of the eligible product category flag to which the requested entity belongs.
EntityDivision	Used to indicate the division of the requested entity.
divisionCode	Displays the division to which the requested entity belongs.
productLinkedEntity	Displays the list of eligible market product, offer, and bundle.
linkedEntityCode	Displays the linked entity code for the requested entity code.
linkedEntityName	Displays the linked entity for the requested entity code.
linkedEntityType	Displays the linked entity type for the requested entity code.
eligibilityDetails	Indicates the name of group tag.
eligibilityDescription	Displays the description of the eligibility to which the requested entity belongs.
eligibilityStartDate	Displays the date from when the eligibility of the entity is effective.
eligibilityEndDate	Displays the date till when the eligibility of the entity is effective.
eligibilityRule	This is group tag under the eligibility details.
rhsPriceParmCd	Indicates the right side parameter code of the eligibility condition.
rhsPriceParmVal	Indicates the right side parameter value of the eligibility condition.
lhsPriceParmCd	Indicates the left side parameter code of the eligibility condition.
rhsPriceParmTypeFlg	Indicates the value of the right side flag.
trueFlag	Indicates the true condition.
trueFlagDescr	Displays the description for the true flag condition.
falseFlag	Indicates the false condition.
falseFlagDescr	Displays the description for the false flag condition.
insufficientFlag	Indicates the insufficient condition.
insufficientFlagDescr	Displays the description for the insufficient flag condition.
eligibilityRuleFlg	Indicates the eligibility rule flag condition.

Sample Offer View Request and Response in the JSON Format

Using the below example, you can view offers which are processed on **2022-01-11**.

Sample Offer View Request in the JSON Format

```
{
    -"C1-GetProdDetail": '
    {
        -"entityCode": -"CHECKOFF_01",
        -"entityType": -"OFFR",
        -"processDate": -"2022-02-11",
        -"inquiryTypeFlag": -"DETL",
        -"division": -"IND",
    -}
}
```

Sample Offer View Response in the JSON Format

```
{
    -"C1-GetProdDetail": '
    {
        -"entityCode": -"CHECKOFF_01",
        -"entityType": -"OFFR",
        -"processDate": -"2022-02-11",
        -"inquiryTypeFlag": -"",
```

Sample Bundle View Request and Response in the JSON Format

Using the below example, you can view bundles which are processed on the date 2022-01-11.

Sample Bundle View Request in the JSON Format

```
{
    -"C1-GetProdDetail": '
    {
        -"entityCode": -"CHECKBUND_003",
        -"entityType": -"BNDL",
        -"processDate": -"2022-02-11",
        -"inquiryTypeFlag": -"DETL",
        -"division": -"IND",
    -}
}
```

Sample Bundle View Response in the JSON Format

```
{
    -"C1-GetProdDetail": '
    {
```

Sample Bundle View Summary Request and Response in the JSON Format

Using the below example, you can view summary of bundles which are processed on the date 2022-01-11.

Sample Bundle View Summary Request in the JSON Format

```
{
    -"C1-GetProdDetail": '
    {
        -"entityCode": -"CHECKBUND_003",
        -"entityType": -"BNDL",
        -"processDate": -"2022-02-11",
        -"inquiryTypeFlag": -"SMRY",
        -"division": -"IND",
    -}
}
```

Sample Bundle View Summary Response in the JSON Format

```
{
    -"C1-GetProdDetail": '
    {
        -"entityCode": -"CHECKBUND_003",
        -"entityType": -"BNDL",
        -"processDate": -"2022-02-11",

C1PRDCTENRL Business Service

The **C1PRDCTENRL** business service enables you to enroll the account to market product, offer, or bundle for the person.

The **C1-CUSTACCSA** algorithm is invoked to create new person, account, and contract, if the person, account, and contract is not created while account enrollment with passing parameter values received for this service. This algorithm is attached at Division's algorithm. This algorithm do the following:

- Checks input service parameters which are required person such as person identifier type, person identifier type/value, account identifier, account identifier type/value, or division are not null. If the parameters are null the system send the error message.

Copyright © 2009, 2025, Oracle and/or its affiliates.

- Checks whether the person id or person identifier type values exist in the system. If the values are exist in the system then it retrieve the person details or set the values to create the new person in the system. The values are:
  - Person Type
  - Primary Person Name Type
  - Person Name
  - Primary Person Identifier Type
  - Primary Person Identifier Type Value
  - Division Code
  - Date of Birth
  - Effective Date
  - Address Type
  - Address Line 1
  - Address Line 2
  - Address Line 3
  - Address Line 4
  - Phone
  - City
  - State
  - Zip Code
  - Country
  - Email
  - Characteristic Effective Date
  - Characteristic Type
  - Characteristic Value
- Get the required default values by fetching values configured at person defaulting template code passed as input to the algorithm. For example, Access Group
- Invoke the personDTO.new.entity() or person BO to create new person in the system.
- Create new account for person on successful person creation/retrieval.
- Get the required default values by fetching values configured at account defaulting template code passed as input to the algorithm.
- Sets required values to create new account in the system. The values are:
  - Customer Class - It can be fetched from account default template.
  - Access Group - It can be fetched from account default template.
  - Person ID - It can be used from retrieved or newly created person.
  - Account Source - It can be fetched from account default template.
  - Bill Route Type - It can be fetched from account default template. For example, Postal
  - Account Category - It can be fetched from account default template. For example, Usage
  - Relationship Type - It can be fetched from account default template. For example, Main Customer

  The input values from service are:

  - Setup Date - Account Opening Date
  - Invoice Currency - Account Currency Code
  - Account Closure Date - Closing date
  - Account Closure Date - Closing date

  Note: If the account closing date is provided then should not be less than Account Opening Date.

  - Account Number Type code - Account Identifier Type
  - Account Number - Account Identifier Value
  - Division - Division Code
- Invokes the accountDTO.new.entity() or account BO to create new person in the system.

Copyright © 2009, 2025, Oracle and/or its affiliates.

- On successful account creation, to retrieve the distinct contract types configured at price items associated with market product. The values for contract creation are:
  - Account ID
  - Division
  - Contract Type
  - Start Date
  - End Date

The soft parameter of the algorithm are:

- Person Defaulting Template - This parameter value is person defaulting template code. The parameter value is used to fetch default values required in the process of new person creation process.
- Account Defaulting Template - This parameter value is account defaulting template code. The parameter value is used to fetch default values required in the process of new account creation process.

This business service enables to edit the enrollment status and close/stop the enrollment by using action flag. The valid values of action flag are:

- Active
- Inactive
- Closed

The validation algorithm is executed before persisting the data using the business object. There are different validation for different action flag (Add, Edit, and Close) and different entities (Market Product, Offer and Bundle). The scenarios are:

If...	**Then...**
The entity type is Market Product and value of action flag is **Add**	• The market product should be in **Active** status while enrolling to the account. The account enrollment date should be within market product start date and end date. • The division code of the respective market product should be defined in which the account is opened.
The entity type is Market Product and value of action flag is **Edit**	
The entity type is Market Product and value of action flag is **Close**	• The system should not accept future date as account close date.
The entity type is Offer and value of action flag is **Add**/**Edit**	• The account can be enrolled to only one active offer at a time. • The offer should be active while enrolling to the account. • The offer subscription date should be within offer start date and end date. • The account can be enrolled to the offer only if the market product in which that particular offer is defined is enrolled to the account. • If the enrollment status is either **Active** or **Inactive** for "Account ID + Offer Code" combination then the same account ID cannot be enrolled to that offer once again. • If there is Active offer subscribed to the account then same account cannot enroll to the other offer.

Copyright © 2009, 2025, Oracle and/or its affiliates.

If...	Then...
	• The division code of the respective offer should be defined in which the account is opened.
The entity type is Offer and value of action flag is **Close**	• The system should not accept future date as account close date.
The entity type is Bundle and value of action flag is **Add**/**Edit**	• The account can be enrolled to only one active bundle at a time. • The bundle should be active while enrolling to the account. • The bundle subscription date should be within bundle start date and end date. • The account numbers which are enrolled to the bundle should belongs to the same person. • The division code of the respective offer should be defined in which the account is opened. • If there is Active bundle subscribed to the account then same account cannot enroll to the other bundle.
The entity type is Bundle and value of action flag is **Close**	• The system should not accept future date as account close date.

You can call this business service from an external system through an inbound web service. You can send the request in XML or JSON format through inbound web service in Oracle Revenue Management and Billing.

If you want to send the request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

To search for viewing the details active market product, offer, or bundle for the person or account, provide the following input parameters:

- Person Detail
- Account Detail
- Market Product Detail
- Offer Detail
- Bundle Detail

Market Product, Offer, or Bundle Enrollment Request and Response - Tags in XML Format

Note: We recommend you to refer the topics Market Product, Offer, or Bundle Enrollment Request in the XML Format on page 3577 and Market Product, Offer, or Bundle Enrollment Response in the XML Format on page 3579 in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1PRDCTENRL** business service through an inbound web service, you need to ensure that the market product, offer, or bundle enrollment request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
enrollment	Indicates the name of group tag which encapsulates the single enrollment request.	No **Note:** The market product should be enrolled to the account in the system before the offer or bundle is enrolled. The enrollment status for market product should be **Active** during enrollment and will change to **Closed** when action flag is pass as close.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
		Note: The market product, offer or bundle should be in **Active** status while enrolling to the account.
		Note: When the service is called to enroll the account to offer / bundle subscription then offer / bundle subscription will created with the account which is already enrolled to market product.
		Note: The enrollment start date of offer or bundle should be between start date and end date of the offer or bundle definition.
		Note: If there is 'Active Offer or Bundle subscription' exists in the system then same account cannot be enrolled to other offer or bundle.
		Note: Only one account can be enroll to one market product.
		Note: The account can be enrolled to another offer if the existing offer enrollment is closed.
		Note: The account can be enrolled to another bundle if the existing bundle enrollment is closed.
		Note: Multiple accounts of the same person can be enrolled to the bundle. If multiple accounts of the person are enrolled to the bundle then bundle enrollment/ subscription date and enrollment characteristics will be same for all accounts which are enrolled/ subscribed to the bundle.
		Note: The service will create new account if the account is not exist in the system while enrolling a market product to the person account.
		Note: The service will create new person if the person is not exist in the system while enrolling a market product to the person account.

Tag Name	Tag Description	Mandatory (Yes or No)
		Note: The Market Product is set to **Active** during the enrollment and remains the same even after the enrollment end date is stamped. The status will change to **Closed** only when the action flag passes the **Close** value.
		Note: • The account can be enrolled to the offer if the status of the existing offer enrollment is **Closed**. • The account cannot be enrolled to another offer if **Active** offer enrollment already exists in the system.
		Note: You cannot enroll to another bundle if one bundle enrollment is already exists for an account in the system. It can be enrolled if the status of existing bundle is **Closed**.
		Note: The services which are associated with market product, offer, or bundle will be enrolled to the account. You cannot select or exclude the service available in market product, offer, or bundle.
closingDate	Used to indicate the account close date.	Yes(Conditional)
	Note: This will be considered as account enrollment end date.	**Note:** This field is required if the entity type is market product.
	Note: If the close date is specified, then the close date should be not be less than account opening date.	
accountId	Used to indicate the account ID.	Yes(Conditional)
		Note: This field is required if the entity type is market product.
currency	Used to indicate the currency code of account.	Yes
setUpDate	Used to specify the date which is used as account enrollment date and new account setup date.	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
	Note: This date should not be the future date.	
division	Used to indicate the division to which the account belongs.	Yes
accountNumber	Used to indicate the bank account number.	Yes(Conditional) **Note:** This field is required if the account identifier type is specified.
accountIdentifierType	Used to indicate the account identifier type.	Yes(Conditional) **Note:** This field is required if the Account ID is not specified.
personcharlist	Indicates the name of group tag.	No
characteristicValue3	Used to specify the characteristic value.	Yes(Conditional) **Note:** This field is required if other characteristic value fields are not specified.
characteristicType3	Used to specify the characteristic type for characteristics.	Yes
effectiveDate3	Used to specify the effective date for characteristics.	Yes
actionFlag3		
emailAddress	Used to specify email address of the person.	Yes(Conditional) **Note:** This field is required for new customer.
country	Used to indicate the country where person belongs to.	Yes(Conditional) **Note:** This field is required for new customer.
state	Used to indicate the state where person belongs to.	Yes(Conditional) **Note:** This field is required for new customer.
city	Used to indicate the city where person belongs to.	Yes(Conditional) **Note:** This field is required for new customer.
address4	Used to indicate address line.	Yes(Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
		Note: This field is required for new customer.
address3	Used to indicate address line.	Yes(Conditional) **Note:** This field is required for new customer.
address2	Used to indicate address line.	Yes(Conditional) **Note:** This field is required for new customer.
address1	Used to indicate address line.	Yes(Conditional) **Note:** This field is required for new customer.
addressTypeFlg	Used to indicate type of address.	Yes(Conditional) **Note:** This field is required for new customer.
creationDateTime	Used to specify the date and time when the person exists in the system.	Yes(Conditional) **Note:** This field is required for new customer.
birthDate	Used to indicate the date of birth of the person.	Yes(Conditional) **Note:** This field is required for new customer.
division2	Used to indicate the division to which the person account belongs.	No
personIdNumber	Used to indicate the person ID.	Yes(Conditional) **Note:** This field is required if the person identifier type and value is not specified.
personIdentifiers	Used to indicate the person identifier.	Yes(Conditional) **Note:** This field is required either person type or ID.
personNames	Used to specify the person name whose account you want to create.	Yes(Conditional) **Note:** This field is required for new customer.
nameType	Used to indicate the person name type of the person name.	Yes(Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Tag Name	Tag Description	Mandatory (Yes or No)
		Note: This field is required for new customer.
personOrBusiness		
startDate	Used to indicate offer/bundle enrollment start date. This date should not be back date. **Note:** It is applicable only to the offer/bundle .	Yes(Conditional) **Note:** This field is required if action flag is set to add and entity type is offer or bundle. **Note:** If the date is not specified then the field is set to the system date.
comments	Used to specify additional comments while enrollment.	No
entityCode	Used to indicate the entity code. **Note:** Entity is referred to market product, offer or bundle.	Yes
entityType	Used to indicate the type of entity for which enrollment is done.	Yes
enrollmentAction		

The following table lists and describes the tags which appear in the eligible active market products, offers, or bundles derivation response XML format:

Tag Name	Tag Description
error	Indicates the name of group tag.
errorDescription	Displays the error description.
errorMsgText	Displays the error message.
messageNumber	Displays the number of the message.
erroCategory	Displays the category of the error.
enrollResponse	Indicates the name of group tag which encloses the complete response of the service.
messageText	Displays the success message of the enrollment.
productEnrollmentId	Displays the product enrollment ID.

Market Product, Offer, or Bundle Enrollment Request and Response - Attribute/Value Pairs in JSON Format

Note: We recommend you to refer the topics Market Product, Offer, or Bundle Enrollment Request in the JSON Format on page 3603 and Market Product, Offer, or Bundle Enrollment Response in the JSON Format on page 3604 in parallel while understanding the below mentioned attributes/values. This will help you to understand how the attributes/values are structured in the JSON format.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Before calling the **C1PRDCTENRL** business service through an inbound web service, you need to ensure that the market product, offer, or bundle enrollment request contains the following attribute:

Attribute Name	Attribute Description	Mandatory (Yes or No)
enrollment	Indicates the name of group attribute which encapsulates the single enrollment request.	No **Note:** The market product should be enroll to the account in the system before the offer or bundle is enrolled. **Note:** The market product, offer or bundle should be in active status while enrolling to the account. **Note:** The enrollment start date of offer or bundle should be between start date and end date of the offer or bundle definition. **Note:** If there is 'Active Offer or Bundle subscription' exists in the system then same account cannot be enrolled to other offer or bundle. **Note:** Only one account can be enroll to one market product, offer, or bundle. **Note:** Multiple accounts of the same person can be enrolled to the bundle. If multiple accounts of the person are enrolled to the bundle then bundle enrollment/ subscription date and enrollment characteristics will be same for all accounts which are enrolled/ subscribed to the bundle. **Note:** The service will create new account if the account is not exist in the system while enrolling a market product to the person account. **Note:** The service will create new person if the person is not exist in the system while enrolling a market product to the person account.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Attribute Name	Attribute Description	Mandatory (Yes or No)
		Note: The service will find contract types which are assigned to price items of the market product and creates the contract for each contract type.
enrollmentcharlist	Indicates the name of group attribute.	No
characteristicValue	Used to specify the characteristic value.	Yes(Conditional) **Note:** This field is required if other characteristic value fields are not specified.
characteristicType	Used to indicate the characteristic type for characteristics.	Yes
effectiveDate	Used to specify the effective date for characteristics.	Yes
actionFlag	Used to indicate for which action service is called. This service is called to add, edit, or close the enrollment. The valid values are: • Add • Edit • Close **Note:** In edit market product scenario, the account closing date should not be null and it should be greater than account opening date. **Note:** In edit market product scenario, you can only edit account characteristics. You cannot edit the other details. **Note:** In edit offer/bundle scenario, you can only modify the status from**Active** to **Inactive** or **Inactive** to **Active**. **Note:** If service invokes **Close** account enrollment request to market product, then it will only close the enrollment to market product and not to offer or bundle. **Note:** You should invoke another **Close** request to close enrollment to offer or bundle.	Yes
personDetails	Indicates the name of group attribute.	No
personId	Used to indicate Person ID.	Yes(Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Attribute Name	Attribute Description	Mandatory (Yes or No)
		Note: This field is required if person identifier type and value are not specified.
accountdetailslist	Indicates the name of group attribute.	No
accountcharlist	Indicates the name of group attribute.	No
characteristicValue2	Used to specify the characteristic value.	Yes(Conditional) **Note:** This field is required if other characteristic value fields are not specified.
characteristicType2	Used to specify the characteristic type for characteristics.	Yes
effectiveDate2	Used to specify the effective date for characteristics.	Yes
actionFlag2	Used to indicate for which action service is called. This service is called to add, edit, or close the enrollment. The valid values are: • Add • Edit • Close **Note:** In edit market product scenario, you can only edit account characteristics. You cannot edit the other details. **Note:** In edit offer/bundle scenario, you can only modify the status from**Active** to **Inactive** or **Inactive** to **Active**. **Note:** If service invokes **Close** account enrollment request to the market product, then it will only close the enrollment to market product and not to the offer or bundle. **Note:** You should invoke another **Close** request to close enrollment to offer or bundle.	No
enrollmentStatus	Used to indicate status of enrollment/subscription. The valid values are: • Active • Inactive • Closed	Yes(Conditional) **Note:** You can edit enrollment status only if the entity type is either offer or bundle.

Copyright © 2009, 2025, Oracle and/or its affiliates.

Attribute Name	Attribute Description	Mandatory (Yes or No)
		Note: The Market Product is set to **Active** during the enrollment and remains the same even after the enrollment end date is stamped. The status will change to **Closed** only when the action flag passes the **Close** value.
		Note: • The account can be enrolled to the offer if the status of the existing offer enrollment is **Closed**. • The account cannot be enrolled to another offer if **Active** offer enrollment already exists in the system.
		Note: You cannot enroll to another bundle if one bundle enrollment is already exists for an account in the system. It can be enrolled if the status of existing bundle is **Closed**.
		Note: The services which are associated with market product, offer, or bundle will be enrolled to the account. You cannot select or exclude the service available in market product, offer, or bundle.
closingDate	Used to indicate the account close date.	Yes(Conditional)
	Note: This will be considered as account enrollment end date.	**Note:** This field is required if the entity type is market product.
	Note: If the close date is specified, then the close date should be not be less than account opening date.	
accountId	Used to indicate the account ID.	Yes(Conditional)
		Note: This field is required if the entity type is market product.
currency	Used to indicate the currency code of account.	Yes
setUpDate	Used to specify the date which is used as account enrollment date and new account setup date.	Yes

Copyright © 2009, 2025, Oracle and/or its affiliates.

Attribute Name	Attribute Description	Mandatory (Yes or No)
	Note: This date should not be the future date.	
division	Used to indicate the division to which the account belongs.	Yes
accountNumber	Used to indicate the bank account number.	Yes(Conditional) **Note:** This field is required if the account identifier type is specified.
accountIdentifierType	Used to indicate the account identifier type.	Yes(Conditional) **Note:** This field is required if the Account ID is not specified.
personcharlist	Indicates the name of group attribute.	No
characteristicValue3	Used to specify the characteristic value.	Yes(Conditional) **Note:** This field is required if other characteristic value fields are not specified.
characteristicType3	Used to specify the characteristic type for characteristics.	Yes
effectiveDate3	Used to specify the effective date for characteristics.	Yes
actionFlag3		
emailAddress	Used to specify email address of the person.	Yes(Conditional) **Note:** This field is required for new customer.
country	Used to indicate the country where person belongs to.	Yes(Conditional) **Note:** This field is required for new customer.
state	Used to indicate the state where person belongs to.	Yes(Conditional) **Note:** This field is required for new customer.
city	Used to indicate the city where person belongs to.	Yes(Conditional) **Note:** This field is required for new customer.
address4	Used to indicate address line.	Yes(Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Attribute Name	Attribute Description	Mandatory (Yes or No)
		Note: This field is required for new customer.
address3	Used to indicate address line.	Yes(Conditional) **Note:** This field is required for new customer.
address2	Used to indicate address line.	Yes(Conditional) **Note:** This field is required for new customer.
address1	Used to indicate address line.	Yes(Conditional) **Note:** This field is required for new customer.
addressTypeFlg	Used to indicate type of address.	Yes(Conditional) **Note:** This field is required for new customer.
creationDateTime	Used to specify the date and time when the person exists in the system.	Yes(Conditional) **Note:** This field is required for new customer.
birthDate	Used to indicate the date of birth of the person.	Yes(Conditional) **Note:** This field is required for new customer.
division2	Used to indicate the division to which the person account belongs.	No
personIdNumber	Used to indicate the person ID.	Yes(Conditional) **Note:** This field is required if the person identifier type and value is not specified.
personIdentifiers	Used to indicate the person identifier type and person ID.	Yes(Conditional) **Note:** This field is required either person type or ID.
personNames	Used to specify the person name whose account you want to create.	Yes(Conditional) **Note:** This field is required for new customer.
nameType	Used to indicate the person name type of the person name.	Yes(Conditional)

Copyright © 2009, 2025, Oracle and/or its affiliates.

Attribute Name	Attribute Description	Mandatory (Yes or No)
		Note: This field is required for new customer.
personOrBusiness		
startDate	Used to indicate offer/bundle enrollment start date. This date should not be back date. **Note:** It is applicable only to the offer/bundle .	Yes(Conditional) **Note:** This field is required if action flag is set to add and entity type is offer or bundle. **Note:** If the date is not specified then the field is set to the system date.
comments	Used to specify additional comments while enrollment.	No
entityCode	Used to indicate the entity code. **Note:** Entity is referred to market product, offer or bundle.	Yes
entityType	Used to indicate the type of entity for which enrollment is done.	Yes
enrollmentAction		

The following table lists and describes the attribute which appear in the eligible active market products, offers, or bundles derivation response JSON format:

Attribute Name	Attribute Description
error	Indicates the name of group attribute.
errorDescription	Displays the error description.
errorMsgText	Displays the error message.
messageNumber	Displays the number of the message.
erroCategory	Displays the category of the error.
enrollResponse	Indicates the name of group attribute which encloses the complete response of the service.
messageText	Displays the success message of the enrollment.
productEnrollmentId	Displays the product enrollment ID.

Prospect Creation, Modification, and View through Inbound Web Service

Oracle Revenue Management and Billing enables you to create and edit a prospect person and its accounts through a web service. It also enables you to view the details of a prospect person and its accounts through a web service. You can send the prospect person creation, modification, or view request from the external system through an inbound web service. We have shipped the following two inbound web services in this release:

- **C1-ProspectPerson** – This is a SOAP based web service. You can use this web service when you want to send the prospect person creation, modification, or view request in the XML format.
- **C1-ProspectPersonREST** – This is a REST based web service. You can use this web service when you want to send the prospect person creation, modification, or view request in the XML or JSON format.

Both these inbound web services call the **C1-ADDPROSPERSON** business service. This business service is used to do the following:

- **Create or edit a prospect person** – While creating a prospect person, you can specify the following details:
  - Name, division, customer segment, customer tier, access group, date of birth, e-mail address, and residential address of the prospect person
  - Characteristics of the prospect person
  - Identifiers of the prospect person
  - Parent and child persons of the prospect person

  Note: Other prospect person can be a child of the prospect person. But, only existing person can be a parent of the prospect person.

  To add a prospect person through the web service, you must set the action flag to **ADD**. However, to edit a prospect person through the web service, you must set the action flag to **UPD**. While editing a prospect person, you need to specify the prospect person ID to identify the prospect person whose details you want to change. During the update operation, the system replaces the prospect person data instead of editing it. Therefore, you should provide all the details of prospect person including the data that you want to change. For example, if you want to update the characteristics of a prospect person through the web service, you need to provide all details of the prospect person including the new characteristics. While updating the prospect person, the system deletes the old characteristics and creates the new characteristics for the prospect person.
