This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Preface

This preface contains the following sections:

Documentation accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1

Oracle Health Response Readiness

Oracle Health Response Readiness is a suite of web-based portals that enable large organizations (for example, government agencies) that own stockpiles of critical supplies to push the critical or limited resources from a central location to many different end sites.

A large organization receives order requests for those supplies from smaller organizations. The large organizations approve requests based on thresholds and prioritization, and then begin the distribution processes.

You can use Oracle Health Response Readiness to manage:

- Urgent and emergency situations (such as public health emergencies)
- Scenarios when supplies may be limited (such as limited water after a hurricane)
- Circumstances where new receiving sites are actively being created and organized. Oracle Health Response Readiness includes the ability to transfer resources between sites.

You can access the Oracle Health Response Readiness portals on your computer, mobile phone, or tablet.

Caution:

Your implementation of Oracle Health Response Readiness may use a custom name for use in the banner that appears at the top of every page. For more information, contact your Oracle Customer Success manager.

New in this release

Oracle Health Response Readiness includes the following features depending on the portal you use.

- Access all Oracle Health Response Readiness portals with a single URL. A Launchpad opens automatically after you sign in that provides links to all the portals you have the rights to access.
- Submit an application to become an approved site that can order and manage response products (Self-Service Request Portal).
- Review, approve, and activate requests (Self-Service Approval Portal).
- Create response product orders for delivery and manage the inventory (Site Portal).
- Approve and process orders for response products, and create new orders, if needed (Partner Portal).
- Pick up orders ready for distribution and upload shipping information (Distributor Portal).

- Set up partner, responses, response products, product types, products, product units, and response product types to identify specific combinations of items for users to order and process, and other administrative tasks (Administrator Portal).
- Define users and contacts for both partners and sites (Partner Portal and Administrator Portal).
- Search for items specific to the page you are working in based on feature-related criteria.
