  - **Example 2:** If the requested date range is January 1, 2011 – December 30, 2011, then profile\_monthly\_statistics will be used for January 1 – November 30 and company\_stat\_daily will be used for December 1 – December 30.

## Statistics Reports

---

### Gaming

**Comp Analysis Statistics** (stat\_comp\_analysis) - shows a breakdown of Cash Rooms, Cash Room Revenue, Comp Rooms, Comp Room Revenue, and the Average Daily Rate (ADR). When the report is run, the report output is divided into the three sections of Day, Month to Date, and Year to Date.

**Country by Revenue Statistics** (stat\_country\_revenue) - displays a year to date comparison of room revenue and room night totals for statistical tracking of country information. Print this report for forecasting and budget projection purposes.

**Country Revenue Day/Month-to-Date/Year-to-Date** (country\_revenue\_statistics) - displays daily country statistics based on information entered in the primary profile on each reservation. The report provides daily, monthly, and yearly figures.

**Country Specific Statistics** (stat\_countryspec) - meets the reporting requirements for properties in Norway and Sweden.

**Extended Stay Summary and Detail**(extended\_stay\_stats) — displays a breakdown of extended stay reservations.

**Matrix Report** (matrix\_report) - allows you to cross-reference market, region, room type, rate category, rate code, origin or source statistics for a specified month.

**Nationality/Country Statistics by Day** (stat\_countrybyday) - generates both nationality and country statistics per day. The statistics output can include room nights or persons.

**Nationality/Country Statistics by Month** (stat\_countrybymon) - allows the properties to generate both nationality and country statistics per month.

**On the Books Sales Statistics** (otb\_sales\_statistics) - provides the ability to view reservations booked per room type for a past date and for a future date. The information includes individual and group reservations, definite and tentative block reservations, waitlisted individual and group reservations, total number of reserved rooms, out of order and service rooms, turnaways, available rooms, occupancy in percent, overbooking level, projected occupancy in percent, number of guests in house, double occupancy in percent and the individual and group revenue and average rate.

**Region Statistics Year View** (stat\_region\_yearview) - displays a breakdown per month, for the current year, a breakdown of reservation arrivals, room nights and revenue production per configured region.

**Reservation Statistics** (res\_statistics1 and res\_statistics2) - shows a statistical breakdown of reservations generated from a variety of filter options.

**Sales Tiered Statistics** (sales\_tiered\_stats) - displays a breakdown of the Room Nights, Room Revenue, and ADR by guest Length of Stay.

**Special Requests Statistics** (specials\_statistics) - displays daily, month- to-date, and year-to-date statistics per specials code. Details include rooms sold, guests in house, room revenue, food and beverage revenue, other revenue, total revenue, average room rate, arrival rooms, arrival guests, no-show rooms, no-show guests, cancellation rooms, and cancellation guests.

**Statistics - Room** (statroom) - displays revenue and room usage by room for each month. Use this report to monitor room usage, keep track of rooms needing repairs, or to change the room-ordering sequence.

**Statistics - Room Type** (statroomtype) - displays by room the amount of room revenue generated per Room Type, the Potential Rooms that are available for a date, and the number of rooms occupied in the room type for a specific date or a date range.

**Statistics by Length of Stay** (sales\_tiered\_stats2) - displays a breakdown of the Room Nights, Room Revenue and ADR by guest length of stay.

## Yield Management Reports

**Revenue Management System Hurdle Point** (hurdle\_point) - displays all hurdle points (rates) for a property for a date range specified. The report can be used to check the hurdle point by product class/yield category for up to a year and also indicates the sell to capacity values that have been set for the hotel in addition to providing you with inventory information.

**Revenue Management System Hurdle Point 2** (hurdle\_point2) - displays all hurdle points (rates) for a property for a date range specified, including total rooms sold and delta. The report can be used to check the hurdle point by product class/yield category

for up to a year and also indicates the sell to capacity values that have been set for the hotel in addition to providing you with inventory information.

**Revenue Management System Rate Code** (yield\_rate\_code) - used to determine the Rate Strategies) that have been set for indicated rate codes.

**Revenue Management System Setup** (yield\_room\_type) - displays room type, product class, and flow through statistics. This report can be used to determine what product class is assigned to each room type in OPERA Cloud as well as indicating which room type is the flow through room type.

## Managing Reports

On provisioning of your property, all standard OPERA Cloud reports are loaded into their respective [report groups](#). These reports are detailed in the reports description section, for more information, see [Report Descriptions](#)

You can also configure additional instances of these reports to suit your needs by duplicating the report and pre-selecting the search criteria, the column display options and layout options (group-by and/or sort-order) for the report and giving your report a unique report name. For example, the standard Arrival Report - res\_detail Arrival Report can be configured multiple times in the Arrival Reports report group with various filters, sort order and column selections selected. You could have an **Arrivals by Name**, **Arrivals - VIP Only by Name**, **Arrivals by ETA (Time)** reports - all of which generate the same RES\_DETAIL arrival report, but with different parameters preset for search criteria, display and layout options.

When the OPERA Multi-Property Reservation Cloud Service is active, you can copy reports to other properties. For more information, see [Copying Reports to Multiple Properties](#). You can also add these reports to shift batch reports. For more information, see [Managing Shift Reports](#) or schedule them to generate via the report scheduler. For more information, see [Managing Scheduled Reports](#)

### Adding Reports

1. From the **OPERA Cloud** menu, select **Reports**, and then select **Manage Reports**.
2. Click **New Report** and complete the following:
  - a. **Property**: Enter or select the property.
  - b. **Report Type**:
    - i. **Oracle Report**: Select for all standard reports provided as part of OPERA Cloud provisioning. For more information, see [Report Descriptions](#).
    - ii. **Rich Text Format**: Select for standard RTF-based reports provided as part of OPERA Cloud provisioning (Various Sales and Event Management reports use this format). For more information, see [Report Descriptions](#).
    - iii. **Customized Report**. Select to setup a stationery template. For more information, see [Configuring Stationery Templates](#).
  - c. **Internal Name**: Select a report from the list, for example res\_detail (Arrival Report).
  - d. **Report Group**: Select a group in which the report is to be listed.

 **Note:**

You can configure additional report groups, as needed. For more information, see [Managing Report Groups](#)

- e. **Display Name:** Enter a descriptive name for the report; this appears in [Run Reports](#) and [Shift Reports](#).
  - i. **Manage Translation:** Click to enter the description in other languages. (Available when the Multi-Language OPERA Control is active).
- f. **Print Copies:** Enter the number of copies of this report to be run by default.
- g. **Protected:** Select to allow users only with the **Print Protected Reports** user task assigned to their roles to generate the report.
- h. **Language:** Select the language that the report needs to display.

 **Note:**

This is only applicable to RTF stationery templates, not Oracle reports.

- i. **Parameter Form:** Select the existing parameter form for the selected **Report Name**. For example, `res1` parameter form for the `RES_DETAIL` report. Ensure you select the correct parameter form for the report selected.  
  
The report parameters are then displayed. Setup the report Search Criteria, Filter, Include, Display and Layout options as desired.
  - j. **Watermark:** Select the watermark option. For more information, see [Working with Watermarks](#).
3. Click **Save** or **Save and continue** to save and create another report

### Editing Reports

1. From the **OPERA Cloud** menu, select **Reports**, and then select **Manage Reports**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From the search results, select a report then click the vertical ellipsis **Action** menu and select **Edit**.
4. Update configuration and report parameters as required.
5. Click **Save**.

### Duplicating Reports

You can copy reports in the same property to store it with a different name and different default parameter values.

1. From the **OPERA Cloud** menu, select **Reports**, and then select **Manage Reports**.
2. Enter search criteria, and click **Search**.

3. From the search results, select a report then click the vertical ellipsis **Action** menu and select **Duplicate**.
4. Complete the following:
  - a. **Internal Name**: Select a report from the list, for example res\_detail (Arrival Report).
  - b. **Report Group**: Select a group in which the report is to be listed.  
Note: You can configure additional report groups, as needed. For more information, see [Managing Report Groups](#)
  - c. **Display Name**: Enter a descriptive name for the report; this appears in [Run Reports](#).
    - i. **Manage Translation**: Click to enter the description in other languages.
  - d. **Print Copies**: Enter the number of copies of this report to be run by default.
  - e. **Protected**: Select to allow users only with the Print Protected Reports user task assigned to their roles to generate the report.
  - f. **Language**: Select the language that the report needs to display.

 **Note:**

This is only applicable to RTF stationery templates, not Oracle reports.

- g. **Parameter Form**: Select the existing parameter form for the selected Report Name. For example, res1 parameter form for the RES\_DETAIL report. Ensure you select the correct parameter form for the report selected.  
The report parameters are then displayed. Setup the report Search Criteria, Filter, Include, Display and Layout options as desired.
  - h. **Watermark**: Select the watermark option. For more information, see [Working with Watermarks](#)
5. Click **Save**.

### Deleting Reports

1. From the **OPERA Cloud** menu, select **Reports**, and then select **Manage Reports**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From the search results, select a report then click the vertical ellipsis **Action** menu and select **Delete**.
4. Click **Delete** to confirm.

## Managing Shift Reports

Shift Reports are a grouping of reports; enabling you to generate multiple reports, in a batch process, by selecting the one shift report. For example, you may wish to configure 'Downtime Reports' for unplanned power or data outages - generating reports such as Arrivals, Inhouse, Departures, Housekeeping Room Status, Guest Ledger Balances etc. All reports selected for a Shift Report generate with the default parameters (filter, display options, sort order) configured on the report. See [Configuring Reports](#).

When the Report Scheduler OPERA Control is active you can setup Shift Reports to auto-generate periodically. See [Managing Scheduled Reports](#) .

### Viewing (Generating) Shift Reports

A new browser window will be launched to generate shift reports; this window can be minimized while reports are generating. All reports generated are combined in a single PDF file.

1. From the OPERA Cloud menu, select **Reports**, and then **Shift Reports**.
2. Enter search criteria and click **Search**.
3. In the search result, select a Shift Report and click **vertical ellipsis**.
4. Select **View**
5. Select the report destination:
  - a. **Leave Destination as selected:** Reports will generate to destination as listed above; use **Change to Email**, **Print** options to modify the destination for a specific report.
  - b. **Change Destination for all reports:** Allows you to change the destination
    - i. **Preview:** Generates a PDF file that can be printed or downloaded
    - ii. **Email to Print :** Generates a PDF and emails direct to a printer for printing; select a printer from the list
    - iii. **Email:** Generates a PDF and emails file as attachment to specified email address

### Adding Shift Reports

1. From the OPERA Cloud menu, select **Reports**, and then **Shift Reports**.
2. Click **New** and enter the following details:
  - a. **Property:** Confirm or select a property.
  - b. **Report Name:** Enter a code or name for the shift report.
  - c. **Description :** Enter a description for the shift report.
  - d. From the **Available** list search and select a report to be added to the Shift Report grouping.
  - e. To search for a report, enter the report name and click **Go**.
  - f. Press the **Ctrl** key to select multiple reports in search result.
  - g. Click the forward arrow **>** to move the selected report(s) to the **Selected** panel.
  - h. Repeat these steps to add more reports to the Selected panel.
3. Click **Save**.

### Editing Shift Reports

1. From the OPERA Cloud menu, select **Reports**, and then **Shift Reports**.
2. Enter search criteria and click **Search**.
3. From search results, select the row level **vertical ellipsis** of the template and select **Edit**.

4. Update the shift report selection.
5. Click **Save**.

#### Deleting Shift Reports

1. From the OPERA Cloud menu, select **Reports**, and then **Shift Reports**.
2. Enter search criteria and click **Search**.
3. From search results, select the row level **vertical ellipsis** of the template and select **Delete**.
4. Click **Delete** to confirm.

## Managing Scheduled Reports

### Prerequisites Manage Scheduled Reports

#### Watch Video

The Reports Scheduler enables you to schedule reports to generate at a specified interval and frequency (example - every 2 weeks); by default reports are generated as a file for manual download at a later time.

As many reports require date parameters; the report scheduler supports the setup of calculated dates (ie +/- offset from the business date) so that a recurring report generates with the required date criteria.

For each report scheduled you can select additional delivery methods (destinations).

1. **Email** - deliver report to one or more email addresses
2. **Printer** - deliver report to an email-addressable printer. See [Configuring Printers](#).
3. **SFTP** - deliver report to secure FTP (SFTP) server.

#### Scheduling a Standard Report

1. From the **OPERA Cloud** menu, select **Reports**, then select **Manage Reports**
2. Enter search criteria and click **Search**.
3. In the search results, select the report from the list and click the **vertical ellipsis** and select **Schedule Report**.

#### Note:

You can also schedule a report by clicking **Manage Scheduled Reports** and then click **New**.

4. **Reports Parameter** : Review and update the following criteria.
  - a. **Property**: Select or confirm the Property.
  - b. **Dates/Date Range**: Enter a fixed date or use a dynamically calculated date; see **Set Date** below.
  - c. **Filter**: Select or enter the filter criteria.

- d. **Include:** Select the Include options.
  - e. **Layout:** Select the Layout option.
5. Click **Next**.
6. **Set Date** (Date Options)
- You can setup a dynamic, calculated date value for any report date parameter by using date modifiers. Use the **Validate Date** option to evaluate your setup.
- a. **Date Option:** Select a value from the list.
  - b. **Offset:** Enter a negative (past) or positive (future) date value.
  - c. **Days:** Select for a Days offset.
  - d. **Months:** Select for a Month offset.
  - e. **Validate Date:** Based on the current business date two dates are displayed:
    - **If Report is Started on**
    - **Date Parameter Value**

When you update the **If Report is Started on** date value, the **Date Parameter Value** is indicated.
7. **Repeat Interval:**
- a. **Start Date:** Enter the date when you want the report schedule to Start.
  - b. **Start Time:** Enter the time when you want the report schedule to Start.
  - c. **End Date:** Enter the date when you want the report schedule to stop. ( null is indefinite).
  - d. **End Time:** Enter the time associated with the End Date when you want the report schedule to stop ( null is indefinite).
  - e. **Report Language:** Select a language from the list.
  - f. **Recurrence Pattern:**
    - i. **Once Only:** Select this option if you want the report to only generate once. Otherwise, proceed to select the Repeat option.
    - ii. **Repeat:** Repeat the schedule according to the **Interval** and **Frequency**.
      - i. **Interval:** Enter a frequency interval
      - ii. **Frequency:**
        - i. **Hours:** Select this option button to run the report on an hourly basis based on the **Interval** set.
        - ii. **Days:** Select this option button to run the report on a weekly basis based on the **Interval** set.
        - iii. **Weeks:** Select this option button to run the report on a weekly basis based on the **Interval** set.
          - i. **Days of the Week:** Select the days of the week that you would like to repeat the report, based on the Start Date/Time.
      - iii. **Months:** Select this option button to run the report on a monthly basis based on the **Interval** set:
        - i. **Days of the Week:** Select the days of the week that you would like to repeat the report, based on the Start Date/Time.

- ii. **Week Number to Repeat:** Select a week in the month from the list.
  - g. Click **Next**.
8. **Destination (Delivery Method):**
- a. **Filename:** Enter a filename.
  - b. **File Format:** Select a file format from the list. Available options are HTML, RTF, PDF, XML, Delimited, Delimited Data and Excel (for selected BI Publisher-based reports).

 **Note:**

It is recommended to use only Delimited and Delimited Data file formats for reports with simple tabular layouts. Delimited and Delimited Data file formats should not be selected for reports that have group-by's or other complex layouts that can cause duplication of rows or prevent rows from generating in the report.

To add an additional destination, click **New** and complete the following.

1. **Mode:** Select the destination and provide the additional details.
  - a. **Email:** Enter an email address; separate multiple addressed with a semi-colon.
  - b. **Printer:** Select a printer from the list. See [Configuring Printers](#) .
  - c. **SFTP:** Enter SFTP address.
    - i. **SFTP Code.** Select a SFTP destination from the list.
    - ii. **Folder Name.** Select a destination folder from the list.
    - iii. Click **Save**.
    - iv. See [Configuring SFTP Connections](#)
  - d. **SFTP (Legacy):**
    - i. **Additional Details.** Select the SFTP destination from the list
    - ii. For more information, see [Managing Export File Delivery Configuration](#).

To delete a destination,

1. Select the destination, then click the vertical ellipsis **Action** menu and select **Delete**.
  2. Click **Delete** to confirm.
9. Click **Save**.

### Scheduling Shift Reports

1. From the **OPERA Cloud** menu, select **Reports**, then select **Manage Reports**
2. Click **Manage Scheduled Reports** and then click **New**.
3. **Report Name:** Enter the name of Shift Report.
4. Click **Search**.
5. Select the Shift Report in the result and click **Select**.
6. Click **Next** on report parameters (not applicable).
7. **Repeat Interval:**

- a. **Start Date:** Enter the date when you want the report schedule to Start.
  - b. **Start Time:** Enter the time when you want the report schedule to Start.
  - c. **End Date:** Enter the date when you want the report schedule to stop. ( null is indefinite).
  - d. **End Time:** Enter the time associated with the End Date when you want the report schedule to stop ( null is indefinite).
8. **Recurrence:**
- a. **Once Only:** Select this option button if you want the report to be run only once. Otherwise, proceed to select the frequency option buttons.
  - b. **Repeat:** Repeat the schedule according to the frequency and interval.
  - c. **Interval :** Enter a number to indicate how many times the report should be run per hours, days, weeks, or months.
  - d. **Frequency:**
    - i. **Hours:** Select this option button to run the report on an hourly basis. The Every field appears where you can enter the "every number" of hours you want the report to be run.
    - ii. **Days:** Select this option button to run the report on a daily basis. The Every field appears where you can enter the "every number of days" you want the report to be run.
    - iii. **Weeks:** Select this option button to run the report on a weekly basis. The Every field appears where you can enter the "every number of weeks" you want the report to be run.  
  
When Weeks is selected, the Days of the Week option buttons display. You can select the days of the week that you would like to repeat the report, based on the Start Date/Time.
    - iv. **Months:** Select this option button to run the report on a monthly basis. Several options provide further scheduling flexibility.
      - In the **Every** field, enter the every "number of months" you want the report to run. As an example, if 1 is selected, the report will repeat every month after the Start Date/Time. If the Start Date is 11/30/11 and the Time is 4:05 pm, the report will run every month on the 30th day at 4:05 PM.
      - When **Months** is selected, the Repeat option displays. You can select which week in the month you want the report to repeat after the initial Start Date and Time. You can select either the First, Second, Third, Fourth, or Last week you want the report to repeat. If the Second week is selected, the report will run every second week of the month at the time selected in Start.
      - When **Week** option is selected, the Days of the Week option buttons display. You can select the days of the week that you would like to run the report. Using our example, if you select Monday and Friday, the report will run the second week of every month, on Monday and Friday at 4:05 pm. If you have selected a week for Repeat, in our example, if you still want the report to run on a Wednesday, you will have to select Wednesday DOW.
    - v. **Days of the Week:** (Only available when the Weeks or Months option button is selected.) Select the day, or days, of the week in which you want

the report to be run (Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday) on a Weekly or Monthly basis.

9. Click **Next**.
10. **Destination:** By default report destination is PDF file. The file can be downloaded (previewed) from **Report Scheduler > Executed Reports**. To add a destination:
  - a. Click **New**.
  - b. **Mode:** Select the destination and provide the additional details.
    - **Email** : Enter an email address; separate multiple addressed with a semi-colon.
    - **Printer:** Select a printer from the list [Configuring Printers](#).
    - **SFTP:** Enter SFTP address.
  - c. Click **Save**.

### Editing Scheduled Reports

1. From the **OPERA Cloud** menu, select **Reports**, then select **Manage Reports**
2. Click **Manage Scheduled Reports**.
3. Enter search criteria and click **Search**.
4. In the search results, select the scheduled report and click the vertical ellipsis **Action** menu and select **Edit**.
5. Update the scheduled report configuration and parameters.
6. Click **Save**.

### Deleting Scheduled Reports

1. From the **OPERA Cloud** menu, select **Reports**, then select **Manage Reports**
2. Click **Manage Scheduled Reports**.
3. Enter search criteria and click **Search**.
4. In the search results, select the scheduled report and click the vertical ellipsis **Action** menu and select **Delete**.
5. Confirm Delete.

### Pausing Scheduled Reports

1. From the **OPERA Cloud** menu, select **Reports**, then select **Manage Reports**
2. Click **Manage Scheduled Reports**.
3. Enter search criteria and click **Search**.
4. In the search results, toggle the ON/OFF status button for the report in the list of **Report Scheduled**.

### To Force Run a Scheduled Report

1. From the **OPERA Cloud** menu, select **Reports**, then select **Manage Reports**
2. Click **Manage Scheduled Reports**.
3. Enter search criteria and click **Search**.

4. In the search results, select the scheduled report and click the vertical ellipsis **Actions** menu and select **Run Reports**.

#### Viewing Scheduled Report Destinations

1. From the **OPERA Cloud** menu, select **Reports**, then select **Manage Reports**
2. Click **Manage Scheduled Reports**.
3. Enter search criteria and click **Search**.
4. In the search results, select the scheduled report and click the vertical ellipsis **Actions** menu and select **View Destinations**.

#### Viewing Executed Scheduled Reports

#### Note:

The **Detailed Status** column indicates the destination mode, address and delivery status for each report. Shift reports are indicated with +/-, click + to expand.

1. From the **OPERA Cloud** menu, select **Reports**, then select **Manage Reports**
2. Click **Manage Scheduled Reports**.
3. Click **View Executed Reports**.
4. Enter search criteria and click **Search**.
5. In the search results, select the scheduled report and click the vertical ellipsis **Actions** menu and select **Preview**.

#### Deleting Executed Scheduled Reports

1. From the **OPERA Cloud** menu, select **Reports**, then select **Manage Reports**
2. Click **Manage Scheduled Reports**.
3. Click **View Executed Reports**.
4. Enter search criteria and click **Search**.
5. In the search results, select the scheduled report and click the vertical ellipsis **Actions** menu and select **Delete**.

## Prerequisites Manage Scheduled Reports

### OPERA Controls

**Group:** General

**Functions:** Report Scheduler

### OPERA Cloud Tasks

**Group:** Reports

**Tasks:** Manage Scheduled Reports

- New/Edit Scheduled Reports
- Delete Scheduled Report

## Report Groups

Standard report groups and their [reports](#) are setup on provisioning of OPERA Cloud. You can configure additional [report groups](#) and then [setup reports](#) to suit your needs. For example, you could configure a 'Club Floor' report group and configure various reports preset with the club floor room class filter.

OPERA Cloud automatically creates a [report group user task](#) for each report group created; these tasks must then be assigned to [roles](#) to enable user access to the reports in the report group.

Report groups marked **Internal** are used for managing stationery templates such as contracts, statements, confirmation letters, folios and receipts. These report groups do not display in the report group list in Manage Reports and do not need a report group task to be assigned to roles. Your role must be granted the View Internal Reports / Report Groups task to access these report groups however. For more information, see [Stationery Report Groups](#)

The following report groups are automatically created on provisioning of your OPERA Cloud property.

**Table 9-10 Report Groups**

Report Group	Service	Standard Reports
Account (Sales)	Sales and Event Management	<a href="#">Sales Account Reports</a>
Activity (Sales)	Sales and Event Management	<a href="#">Activity Reports</a>
Accounts Receivable	Property Management	<a href="#">Accounts Receivable Reports</a>
Arrival	Property Management	<a href="#">Arrivals Reports</a>
Blocks & Groups	<ul style="list-style-type: none"> <li>• Property Management</li> <li>• Sales and Event Management</li> </ul>	<a href="#">Blocks and Groups Reports</a>
Catering Configuration	Sales and Event Management	<a href="#">Catering Configuration Reports</a>
Commission (Agent)	Property Management	<a href="#">Commissions Reports</a>
Configuration	<ul style="list-style-type: none"> <li>• Property Management</li> <li>• Sales and Event Management</li> </ul>	<a href="#">Configuration Reports</a>
Departure	Property Management	<a href="#">Departures Reports</a>
Events	Sales and Event Management	<a href="#">Event Reports</a>
Financial	Property Management	<a href="#">Financials Reports</a>
Forecast	Property Management	<a href="#">Forecast Reports</a>
Guests in House	Property Management	<a href="#">Guests In-House Reports</a>
Housekeeping	Property Management	<a href="#">Housekeeping Reports</a>
Miscellaneous	Property Management	<a href="#">Miscellaneous Reports</a>
Profiles	Property Management	<a href="#">Profiles Reports</a>
Reservations	Property Management	<a href="#">Reservations Reports</a>

Table 9-10 (Cont.) Report Groups

Report Group	Service	Standard Reports
Statistical	<ul style="list-style-type: none"> <li>Property Management</li> <li>Sales and Event Management</li> </ul>	<a href="#">Statistics Reports</a>
Yield Management	Property Management	<a href="#">Yield Management Reports</a>

## Managing Report Groups

### Adding Report Groups

#### Note:

Remember to access [role manager](#) and assign the auto-created report group user task to roles.

1. From the **OPERA Cloud** menu, select **Reports**, then select **Manage Reports**.
2. Click **Manage Report Groups**.
  - a. Click **New** and complete the following information..
    - i. **Group Name:** Enter a code or name of the report group, Report Group names are limited to a maximum of 30 characters and cannot be changed when editing a group.
    - ii. **Description:** Enter the description for the report group.
      - i. **Manage Translation:** Click to enter the description in other languages.
    - iii. **Type:** Select **Report**.
    - iv. **Watermark Mode:** Select a watermark mode. For more information, see [Working with Watermarks](#). This appears when Enable Watermark For Reports OPERA control is active.
3. Click **Save**.

### Editing a Report Group

1. From the **OPERA Cloud** menu, select **Reports**, then select **Manage Reports**.
2. Click **Manage Report Groups**.
  - a. Enter search criteria and click **Search**.
  - b. In the search results, select the report group, click the vertical ellipsis **Actions** menu, then click **Edit**
  - c. Update configuration.
  - d. Click **Save**.

### Deleting a Report Group

1. From the **OPERA Cloud** menu, select **Reports**, then select **Manage Reports**.
2. Click **Manage Report Groups**.
  - a. Enter search criteria and then click **Search**.
  - b. In the search results, select the report group, click the vertical ellipsis **Actions** menu, then click **Delete**.
  - c. Click **Delete** to confirm.

## Stationery Report Groups

The following report groups are available for the management of customized stationery templates. These internal report groups are not displayed to users in the list of report groups in [Managing Reports](#) unless the **Show Internal** check box is selected. Your role must be granted the View Internal Reports / Report Groups tasks to access these report groups.

Create one or more templates in these report groups to specify which template OPERA Cloud should generate for the respective area of the application; the sample template to use for your customized template(s) is listed below.

Many of the stationery report groups only require one template to be setup and customized. However, when the Multi-language OPERA Control is active, a template per language would apply. The setup of each template would reference a specific language code. OPERA Cloud generates the template matching the language code selected in the profile. For example, a guest folio template with French text has the French language code selected in [Configuring Stationery Templates](#) and this template is used when generating a folio for guests, companies or agents with French selected as the language in their profile. The French translation for transaction codes and other configuration is output on the folio.

Other stationery report groups support multiple templates regardless of the Multi-language OPERA Control; for these stationery report groups a user either selects from a list of templates or there is related configuration which determines the specific template to be used. For example Global Alert configuration references the templates configured in the Alerts stationery report group and Commission Bank Account configuration reference the commission check templates setup in the Commission Check report group.

**Table 9-11 Stationery Report Groups**

Report Group	Description	Template Quantity	Sample RTF Template

## Managing Definable Managers Report

This option allows you to customize the selection and the sequence of the statistical calculations included on the Manager's Report. You can also define your own calculations for certain item types.

To format the report into sections, you can also configure the report to print horizontal lines and add extra line spacing after values, as needed .

Once the report is configured you can generate it at any time from [Run Reports](#) or [schedule the report](#).

You can also add the Manager's Report to the [End of Day final reports](#) to generate automatically during the End of Day process.

### View Managers Report Configuration

Perform a search to view the current setup of the Managers Report; the result indicates the statistics selected for inclusion and the sequence in which they appear on the report.

1. From the OPERA Cloud menu, select **Reports**, select **Configure Reports**, and then **Definable Manager's Report**.
2. Select or confirm the Property, click **Search**.

The current selection and sequence of statistics to output on the report are listed in search result.

- a. **Active:** A tick in this column indicates that the statistical item is included in the report.
- b. **Description:** Text description of the statistical displayed on the report.
- c. **User-defined:** A tick in this column indicates that the statistic is user defined.

- d. **Print Line:** Tick in the column indicated that a line drawn on the report after this item. Lines can be used to divide sections of the report or to call attention to a particular statistical item.
- e. **Blank Rows:** Number of blank rows following this item. Blank rows are used to create sections in the report for clarity or to call attention to a particular statistical item. The default is 0 rows (no extra space).
- f. **Seq:** Number indicating the relative position of the item in the report. Items are displayed from lowest number to highest number.

### Editing Statistics

To amend the setup or remove a statistic from the report you need to edit the statistic. Changing the display sequence results in the statistic relocating to the desired position in the list. Removing the active check box removes the statistic from appearing on the report.

1. From the OPERA Cloud menu, select **Reports**, select **Configure Reports**, and then **Definable Manager's Report**.
2. In the search results, select the statistic to update and click the vertical ellipsis and click **Edit**.
3. Modify or update the following information:
  - a. **Item Name:** Edit the unique item name, for user-defined entries. (value is read only for predefined items).
  - b. **Description:** Edit the description (output on report) for user-defined entries (value is read only for predefined items).
  - c. **Display Sequence:** Update value to change the position of the statistic on the report.
  - d. **Blank Rows:** Set the number of blank rows after this statistic.
  - e. **Print Line:** Check to generate a horizontal line after this statistic.
  - f. **Active:** When checked the statistical item is included in the report. Uncheck to remove the statistic from the output .
4. Click **Save**.

### Adding User-Defined Statistic

Use this option to add a user-defined items to the Managers Report. On this screen you can choose to add certain attributes to the base calculation of the item type. For example, you can choose to add Day Use Rooms and/or subtract House Use Rooms from the calculation for 'Rooms Occupied'.

1. From the OPERA Cloud menu, select **Reports**, select **Configure Reports**, and then **Definable Manager's Report**.
2. Click **New**.
3. In the Primary Details section, enter the following details.
  - a. **Item Type:** Select the Item Type from the drop-down.

**Table 9-12 Item type and its definition**

Item Type	Calculation/Definition
Rooms Occupied	Number of rooms In-House with a Front Office status of 'OCC'
% Rooms Occupied	Number of rooms In-House with a Front Office status of 'OCC' / Total Rooms in Hotel * 100
ADR	Total amount of all postings today where the Transaction Code is marked as 'Revenue' and the Transaction Type is 'Lodging' / Number of rooms In-House with a Front Office status of 'OCC'
ADR (Distributed)	Total amount of all postings today (Distributed) where the Transaction Code is marked as 'Revenue' and the Transaction Type is 'Lodging' / Number of rooms In-House with a Front Office status of 'OCC'
Rooms Occupied Tomorrow	Total number of deduct rooms reserved for tomorrow
% Rooms Occupied Tomorrow	Total number of deduct rooms reserved for tomorrow / Total Rooms in Hotel * 100
Rooms Occupied for the Next 7 Days	Total number of deduct rooms reserved starting tomorrow for 7 days
% Rooms Occupied for the Next 7 Days	Total number of deduct rooms reserved starting tomorrow for 7 days / Total Rooms in Hotel * 100
Rooms Occupied for the Next 31 Days	Total number of deduct rooms reserved starting tomorrow for 31 days
% Rooms Occupied for the Next 31 Days	(Total number of deduct rooms reserved starting tomorrow for 31 days) / (Total Rooms in Hotel) * 100
Rooms Occupied for the Next 365 Days	Total number of deduct rooms reserved starting tomorrow for 365 days
% Rooms Occupied for the Next 365 Days	Total number of deduct rooms reserved starting tomorrow for 365 days / Total Rooms in Hotel * 100
Projected Rooms Occupied for Current Month	Total number of deduct rooms reserved for the whole month
Projected % Rooms Occupied for Current Month	Total number of deduct rooms reserved for the whole month / Total Rooms in Hotel * 100
Projected Rooms Occupied for Current Year	Total number of deduct rooms reserved for the whole year
Projected % Rooms Occupied for Current Year	Total number of deduct rooms reserved for the whole year / Total Rooms in Hotel * 100

- b. Item Name:** Item name is automatically populated, but can you can manually edit.
- c. Description:** Enter the description of the statistical item that needs to be printed on the Manager's Report. This description is what is displayed on the report output for the Item Type.
- d. Blank Rows:** Set the number of blank rows after this statistic.
- e. Print Line:** Check to generate a horizontal line after this statistic.

- f. **Active:** When checked the statistical item is included in the report. Uncheck to remove the statistic.
4. In the Rooms Occupied section, select single or multiple options:
  - a. **Plus Day Use:** Select to add Day Use Rooms that are occupied to the Item Type calculation selected. (Day Use Rooms are Reservations with 0 Nights.)
  - b. **Plus No Shows:** Select to add No Show Rooms to the Item Type calculation selected.
  - c. **Minus Comp.:** Select to subtract Comp Rooms from the Item Type calculation selected. (Comp Rooms are Reservations with a Rate Code that has the 'Complimentary' check box checked on the Rate Setup screen within Rate Code configuration).
  - d. **Minus House:** Select to subtract House Use Rooms from the Item Type calculation selected. (House Rooms are Reservations with a Rate Code that has the 'House Use' check box checked on the Rate Setup screen within Rate Code configuration).
5. In the Total Rooms In Hotel, you can select the following options. This section allows for additional items to be added to the default calculations for the above Item Types.
  - a. **Minus Out of Order Rooms:** Available when the **Room Management > Out of Order** control is set to Active, select to subtract the total number of OOO rooms at the property from the Item Type calculation selected.
  - b. **Minus Out of Service Rooms:** Available when the **Room Management > Out of Order** control is set to Active, select to subtract the total number of OOS rooms at the property from the Item Type calculation selected.
6. In the Formula section, the area shows the Calculation/Definition of the Item Type that is selected and any additional Rooms Occupied and/or Total Rooms in Hotel options that are selected.
7. Click **Save**.

#### Deleting User Defined Statistics

1. From the OPERA Cloud menu, select **Reports**, select **Configure Reports**, and then **Definable Manager's Report**.
2. In the search results, select the statistic to update and click the vertical ellipsis and click **Delete**.
3. Click **Delete** and confirm the deletion.

#### Generating Definable Managers Report

You can test the changes made to the Managers Report layout by generating a preview of list of predefined statistics.

1. From the OPERA Cloud menu, select **Reports**, select **Configure Reports**, and then **Definable Manager's Report**.
2. On the Definable Manager's Report screen, click the vertical ellipsis and then click **Report**.
3. In the Report Destination pop-up, select **Preview**, **Email to Print**, **Email** or **Fax** option and click **Process**.

Following is the list of predefined statistics that can be included in the Manages Report.

**Table 9-13 Definable Managers Report - Item Descriptions**

Item Description	Calculation
% Beds Occupied	Total Adults and Children In House divided by Total Beds, calculated using the Max. Occupancy field in Rooms Configuration for each occupied room, multiplied by 100.
% Individual Member Departures	Number of Rooms with a Departure Date equal to today, a Membership number attached to the reservation, with no block code attached to the reservation, divided by Number of Rooms with a Departure Date equal to today, multiplied by 100.
% Member Departures	Number of Adults and Children with a Departure Date equal to today, with a Membership number attached to the reservation, divided by Number of Rooms with a Departure Date equal to today multiplied by 100.
% Multiple Occupancy	Number of Rooms Occupied where total persons is greater than 1 / Number of Rooms Occupied , multiplied by 100. EG: $(3/232) * 100$ which is $.0129 * 100 = 1.29\%$
% Occupancy for the Month	Total number of rooms reserved starting tomorrow for 1 calendar month, divided by Total Rooms in Hotel starting tomorrow for 1 calendar month, multiplied by 100.
% Occupancy for the Year	Total number of rooms reserved starting tomorrow for 1 calendar year, divided by Total Rooms in Hotel starting tomorrow for 1 calendar year, multiplied by 100.
% Occupancy Next 7 Days	Total number of deduct rooms reserved starting tomorrow for 7 days, divided by Total Rooms in Hotel starting tomorrow for 7 days, multiplied by 100
% Rooms Occupied	Rooms Occupied, divided by Total Rooms in Hotel, multiplied by 100.
% Rooms Occupied for the Next 31 Days	Total number of deduct rooms reserved starting tomorrow for 31 days, divided by Total Rooms in Hotel starting tomorrow for 31 days, multiplied by 100
% Rooms Occupied for the Next 365 Days	Total number of deduct rooms reserved starting tomorrow for 365 days, divided by Total Rooms in Hotel starting tomorrow for 365 days, multiplied by 100
% Rooms Occupied for Tomorrow	Number of Rooms Occupied tomorrow, divided by Total Rooms in Hotel, multiplied by 100.
% Rooms Occupied minus Comp	Rooms Occupied minus Comp, divided by Total Rooms in Hotel, multiplied by 100.
% Rooms Occupied minus Comp and House	Rooms Occupied minus Comp and House, divided by Total Rooms in Hotel, multiplied by 100.
% Rooms Occupied minus Comp and OOO	Rooms Occupied minus Comp, divided by Total Rooms in Hotel minus Out of Order, multiplied by 100.

**Table 9-13 (Cont.) Definable Managers Report - Item Descriptions**

<b>Item Description</b>	<b>Calculation</b>
% Rooms Occupied minus Comp, House, and OOO	Rooms Occupied minus Comp and House, divided by Total Rooms in Hotel minus Out of Order, multiplied by 100.
% Rooms Occupied minus House	Rooms Occupied minus House, divided by Total Rooms in Hotel, multiplied by 100.
% Rooms Occupied minus House and OOO	Rooms Occupied minus House, divided by Total Rooms in Hotel minus Out of Order, multiplied by 100.
% Rooms Occupied minus OOO	Rooms Occupied, divided by Total Rooms in Hotel minus Out of Order, multiplied by 100.
% Rooms Occupied plus Day Use	Rooms Occupied plus Day Use minus House Use, divided by Total Rooms in Hotel minus Out of Order, multiplied by 100.
% Rooms Occupied plus Day Use and No Show	Rooms Occupied plus Day Use and No Show, divided by Total Rooms in Hotel, multiplied by 100.
% Rooms Occupied plus Day Use for the next 31 Days	Total number of deduct rooms reserved plus Day Use starting tomorrow for 31 days, divided by Total Rooms in Hotel starting tomorrow for 31 days, multiplied by 100.
ADR	Room Revenue, divided by Rooms Occupied.
ADR (Distributed)	Room Revenue, divided by Rooms Occupied. When an Advance Bill is associated with the reservation, revenue is distributed over the stay period in order to reflect actual revenue generated per day, rather than recording all revenue on the day the advance bill is generated.
ADR minus Comp	Room Revenue, divided by Rooms Occupied minus Comp rooms.
ADR (Distributed) minus Comp	Room Revenue, divided by Rooms Occupied minus Comp rooms. When an Advance Bill is associated with the reservation, revenue is distributed over the stay period in order to reflect actual revenue generated per day, rather than recording all revenue on the day the advance bill is generated.
ADR minus Comp and House	Room Revenue, divided by Rooms Occupied minus Comp and House rooms.
ADR (Distributed) minus Comp and House	Room Revenue, divided by Rooms Occupied minus Comp and House rooms. When an Advance Bill is associated with the reservation, revenue is distributed over the stay period in order to reflect actual revenue generated per day, rather than recording all revenue on the day the advance bill is generated.
ADR minus House	Room Revenue, divided by Rooms Occupied minus House rooms.

**Table 9-13 (Cont.) Definable Managers Report - Item Descriptions**

Item Description	Calculation
ADR (Distributed) minus House	Room Revenue, divided by Rooms Occupied minus House rooms. When an Advance Bill is associated with the reservation, revenue is distributed over the stay period in order to reflect actual revenue generated per day, rather than recording all revenue on the day the advance bill is generated.
ADR plus Day Use	Room Revenue, divided by Rooms Occupied plus Day Use.
Adults Free	Number of Tax Free Adults for Rooms In House. Field available based on parameter setting for 'Tax Free Guests'.
Arrival Persons	Number of Adults and Children with an Arrival Date equal to today.
Arrival Persons for Tomorrow	Number of Adults and Children with an Arrival Date equal to tomorrow.
Arrival Reservations	Number of all the reservations with an arrival date equal to today.
Arrival Rooms	Number of Rooms with an Arrival Date equal to today. Only one reservation per room will be considered for this total.
Arrival Rooms for Tomorrow	Number of Rooms with an Arrival Date equal to tomorrow. Only one reservation per room will be considered for this total.
Available Rooms	Total Rooms in Hotel, minus Rooms Occupied.
Available Rooms minus OOO Rooms	Total Rooms in Hotel, minus Rooms Occupied, minus Out of Order Rooms.
Average Adults per Room minus House Use	Number of Adults divided by number of Rooms Occupied minus House Use Rooms (Index of Frequency 1).
Average Adults per Room	Number of Adults divided by number of Rooms Occupied (Index of Frequency 2).
Average Persons per Room minus House Use	Number of Adults and Children divided by number of Rooms Occupied minus House Use Rooms (Index of Frequency 3).
Average Persons per Room	Number of Adults and Children divided by number of Rooms Occupied (Index of Frequency 4).
Average Person Rate	Room Revenue, divided by number of Adults and Children.
Average Persons per Block Rooms	Adults and Children attached to the reservation with Reservation status of 'Checked In', divided by number of Rooms Occupied that have a Block Code attached.
Average Revenue per Block Rooms	Block Revenue, divided by Number of rooms that have a block code attached to the reservation with a reservation status of 'Checked In'.
Average Room Revenue per Block Rooms	Block Room Revenue, divided by Number of rooms that have a block code attached to the reservation with a reservation status of 'Checked In'.

**Table 9-13 (Cont.) Definable Managers Report - Item Descriptions**

<b>Item Description</b>	<b>Calculation</b>
Birthdays in House	Number of Rooms with the Birthday field from the profile equal to today.
Block Member Rooms	Total number of rooms today for those reservations which have a membership number of the default membership type attached to the reservation and have a block code attached to the reservation. If no default membership type is defined than any membership attached to the reservation will be considered.
Block Member % of Rooms	Total number of rooms today for those reservations which have a membership number of the default membership type attached to the reservation and have a block code attached to the reservation, divided by the number of total rooms today and multiplied by 100. If no default membership type is defined than any membership attached to the reservation will be considered.
Block Member Average Room Revenue	Total amount of postings today, where the Transaction Code is marked as 'Revenue' and the Transaction Code Type is 'Lodging', for reservations that have a membership number of the default membership type attached to the reservation and do not have a block code attached to the reservation divided by the number of rooms today for those same reservations. If no default membership type is defined then any membership attached to the reservation will be considered.
Block Member Average Total Revenue	Total amount of postings today, where the Transaction Code is marked as 'Revenue', for reservations that have a membership number of the default membership type attached to the reservation and do not have a block code attached to the reservation divided by the number of rooms today for those same reservations. If no default membership type is defined then any membership attached to the reservation will be considered.
Block Member Room Revenue	Total amount of postings today, where the Transaction Code is marked as 'Revenue' and the Transaction Code Type is 'Lodging', for reservations that have a membership number of the default membership type attached to the reservation and have a block code attached to the reservation. If no default membership type is defined then any membership attached to the reservation will be considered.
Block Member Total Revenue	Total amount of postings today, where the Transaction Code is marked as 'Revenue', for reservations that have a membership number of the default membership type attached to the reservation and a block code attached to the reservation. If no default membership type is defined then any membership attached to the reservation will be considered.

**Table 9-13 (Cont.) Definable Managers Report - Item Descriptions**

Item Description	Calculation
Block Member % of Room Revenue	Total amount of postings today, where the Transaction Code is marked as 'Revenue' and the Transaction Code Type is 'Lodging', for reservations that have a membership number of the default membership type attached to the reservation and a block code attached to the reservation, divided by the room revenue for all reservations and multiplied by 100. If no default membership type is defined then any membership attached to the reservation will be considered.
Block Member % of Total Revenue	Total amount of postings today, where the Transaction Code is marked as 'Revenue', for reservations that have a membership number of the default membership type attached to the reservation and a block code attached to the reservation, divided by the total revenue for all reservations and multiplied by 100. If no default membership type is defined then any membership attached to the reservation will be considered.
Block Member Average Length of Stay	Total number of nights for reservations that have a member number of the default membership type attached to the reservation and a block code attached to the reservation, divided by the count of those same reservations. If no default membership type is defined then any membership attached to the reservation will be considered.
Block Persons in House	Number of Adults and Children for Rooms In-House with a Block code attached to the reservation.
Block Revenue	Total amount of postings today where the Transaction Code is marked as 'Revenue' for reservations that have a Block Code attached.
Block Room Revenue	Total amount of postings today where the Transaction Code is marked as 'Revenue' and a Transaction Code Type is 'Lodging' for reservations that have a Block Code attached.
Block Rooms in House	Number of Rooms that have a block code attached to the reservation.
Blocks in House	Number of Blocks where today's date falls between the start date and end date.
Cancellations Made Today	Number of Cancellations that were taken today for any date.
Canceled Reservations for Today	Number of Reservations that were canceled with an arrival date equal to today.
Canceled Rooms for Today	Number of rooms that were canceled with an arrival date equal to today
Children Free	Number of Tax Free Children for Rooms In House. Field available based on parameter setting for 'Tax Free Guests'.
Clean Rooms	Number of Rooms that have a Housekeeping Status of 'CL'.

**Table 9-13 (Cont.) Definable Managers Report - Item Descriptions**

<b>Item Description</b>	<b>Calculation</b>
Company Revenue	Total amount of postings today where the transaction code is marked as 'Revenue' for reservations that have a company profile attached
Company Room Revenue	Total amount of postings today where the transaction code is marked as 'Revenue' and a transaction code type is 'Lodging' for reservations that have a company profile attached
Company Rooms in House	Number of Rooms that have a Company profile attached to the reservation.
Complimentary Adults	Total no of adults on complimentary reservations.
Complimentary Children	Total no of children on complimentary reservations.
Complimentary Persons	Adults + Children
Complimentary Rooms	Number of Rooms In-House that have a rate code marked as Complimentary.
Day Use Adults	Total no of adults on Day use reservations.
Day Use Children	Total no of children on Day use reservations.
Day Use Persons	Adults + Children
Day Use Reservations	Number of reservations where the arrival date and departure date are equal to today.
Day Use Rooms	Number of Reservations where the arrival date and departure date are equal to today.
Deducted Arrivals	Number of Rooms with an Arrival Date equal to today, and the reservation type is equal to deduct.
Departure Persons	Number of Adults and Children with a Departure Date equal to today.
Departure Persons for Tomorrow	Number of Adults and Children with a Departure Date equal to tomorrow.
Departure Rooms	Number of Rooms with a Departure Date equal to today. Only one reservation per room will be considered for this total.
Departure Rooms for Tomorrow	Number of Rooms with a Departure Date equal to tomorrow. Only one reservation per room will be considered for this total.
Dirty Rooms	Number of Rooms that have a Housekeeping Status of 'DI'.
Doubles as Singles	Number of Rooms where each room has Occupancy Max greater than 1, and Number of Persons In-House is less than or equal to 1.
Early Departure Persons	Number of Adults and Children for checked out rooms with an original departure date greater than today.
Early Departure Rooms	Number of checked out rooms with an original departure date greater than today.
Extended Stay Persons	Number of Adults and Children In-House where an original departure date equal to today.

**Table 9-13 (Cont.) Definable Managers Report - Item Descriptions**

Item Description	Calculation
Extended Stay Rooms	Number of Rooms In-House where an original departure date equal to today.
Food and Beverage Revenue	Total amount of all postings today where the Transaction Code is marked as 'Revenue' and the Transaction Type is 'Food and Beverage'.
Food and Beverage Revenue (Distributed)	Total amount of all postings today where the Transaction Code is marked as 'Revenue' and the Transaction Type is 'Food and Beverage'. When an Advance Bill is associated with the reservation, revenue is distributed over the stay period in order to reflect actual revenue generated per day, rather than recording all revenue on the day the advance bill is generated.
Group Rooms in House	Number of Rooms that have a Group profile attached to the reservation.
House Use Adults	Total no of adults on House use reservations.
House Use Children	Total no of children on House use reservations.
House Use Persons	Adults + Children
House Use Rooms	Number of Rooms In-House that have a rate code marked as House Use.
In-House Adults	Number of Adults for Rooms In-House.
In-House Children	Number of Adults for Rooms In-House.
Individual Departure Persons	Number of adults and children divided by number of room occupied ( include house use).
Individual Departure Rooms	Number of Rooms with a Departure Date equal to today and no block code attached to the reservation.
Individual Member Departure Persons	Number of Adults and Children with a Departure Date equal to today, a Membership number attached to the reservation, with no block code attached to the reservation.
Individual Member Departure Rooms	Number of Rooms with a Departure Date equal to today, a Membership number attached to the reservation, with no block code attached to the reservation.
Individual Member Rooms	Total number of rooms today for those reservations which have a membership number of the default membership type attached to the reservation and do not have a block code attached to the reservation. If no default membership type is defined than any membership attached to the reservation will be considered.
Individual Member % of Rooms	Total number of rooms today for those reservations which have a membership number of the default membership type attached to the reservation and do not have a block code attached to the reservation, divided by the number of total rooms today and multiplied by 100. If no default membership type is defined than any membership attached to the reservation will be considered.

**Table 9-13 (Cont.) Definable Managers Report - Item Descriptions**

Item Description	Calculation
Individual Member Average Room Revenue	Total amount of postings today, where the Transaction Code is marked as 'Revenue' and the Transaction Code Type is 'Lodging', for reservations that have a membership number of the default membership type attached to the reservation and do not have a block code attached to the reservation divided by the number of rooms today for those same reservations. If no default membership type is defined then any membership attached to the reservation will be considered.
Individual Member Average Total Revenue	Total amount of postings today, where the Transaction Code is marked as 'Revenue', for reservations that have a membership number of the default membership type attached to the reservation and do not have a block code attached to the reservation divided by the number of rooms today for those same reservations. If no default membership type is defined then any membership attached to the reservation will be considered.
Individual Member Room Revenue	Total amount of postings today, where the Transaction Code is marked as 'Revenue' and the Transaction Code Type is 'Lodging', for reservations that have a membership number of the default membership type attached to the reservation and do not have a block code attached to the reservation. If no default membership type is defined then any membership attached to the reservation will be considered.
Individual Member Total Revenue	Total amount of postings today, where the Transaction Code is marked as 'Revenue', for reservations that have a membership number of the default membership type attached to the reservation and do not have a block code attached to the reservation. If no default membership type is defined then any membership attached to the reservation will be considered.
Individual Member % of Room Revenue	Total amount of postings today, where the Transaction Code is marked as 'Revenue' and the Transaction Code Type is 'Lodging', for reservations that have a membership number of the default membership type attached to the reservation and do not have a block code attached to the reservation, divided by the room revenue for all reservations and multiplied by 100. If no default membership type is defined then any membership attached to the reservation will be considered.

**Table 9-13 (Cont.) Definable Managers Report - Item Descriptions**

Item Description	Calculation
Individual Member % of Total Revenue	Total amount of postings today, where the Transaction Code is marked as 'Revenue' for reservations that have a membership number of the default membership type attached to the reservation do not have a block code attached to the reservation, divided by the total revenue for all reservations and multiplied by 100. If no default membership type is defined then any membership attached to the reservation will be considered.
Individual Member Average Length of Stay	Total number of nights for reservations that have a membership number of the default membership type attached to the reservation and no block code attached to the reservation, divided by the count of those same reservations. If no default membership type is defined then any membership attached to the reservation will be considered.
Individual Persons in House	Number of Adults and Children for Rooms In-House with no Block code attached to the reservation.
Individual Revenue	Total amount of postings today where the Transaction Code is marked as 'Revenue' for reservations that do not have a Block Code attached.
Individual Room Revenue	Total amount of postings today where the Transaction Code is marked as 'Revenue' and a Transaction Code Type is 'Lodging' for reservations that do not have a Block Code attached.
Individual Rooms in House	Number of Rooms that do not have a block code attached to the reservation.
Inspected Rooms	Number of Rooms that have a Housekeeping Status of 'IP'. (Available when the Rooms Management > Inspected application function is set to Y.)
Late Cancellations for Today	Number of Reservations that were canceled today, with an arrival date equal to today.
Late Room Cancellations for Today	Number of rooms that were canceled today, with an arrival date equal to today.
Maximum Revenue	Amount of Brochure Rate on each room.
Maximum Revenue %	Amount of Room Revenue, divided by Brochure Rate on each room, multiplied by 100.
Maximum Revenue % per Rooms Occupied	Amount of Room Revenue, divided by Brochure Rate on each room listed as a Front Office status of 'OCC', multiplied by 100.
Maximum Revenue for Rooms Occupied	Amount of Brochure Rate on each room, with a Front Office status of 'OCC'.
Member Departure Persons	Number of Adults and Children with a Departure Date equal to today and a Membership number attached to the reservation.
Member Departure Rooms	Number of Rooms with a Departure Date equal to today and a Membership number attached to the reservation.

**Table 9-13 (Cont.) Definable Managers Report - Item Descriptions**

<b>Item Description</b>	<b>Calculation</b>
Member persons in House	Number of Adults and Children for Rooms In-House with a Membership Number attached to the reservation.
Member Revenue	Total amount of postings today where the Transaction Code is marked as 'Revenue' for reservations that have a Membership Number attached to the reservation.
Member Room Revenue	Total amount of postings today, where the Transaction Code is marked as 'Revenue' and a Transaction Code Type is 'Lodging', for reservations that have a Membership Number attached to the reservation.
No Show Extended Persons	Number of Persons Arrival extended to next day due to No Show
No Show Extended Reservations	Number of Reservations Arrival extended to next day
No Show Extended Rooms	Number of Rooms Arrival extended to next day due to No Show. This number calculates the number of physical rooms that had a rolling no show reservation. If a component room reservation is included in this calculation, then the actual number of rooms that make up the component room will be included in the calculation. For example, if there are 3 rooms that make up the component room, then this reservation would be represented by 3, not 1.
No Show Persons	Number of Adults and Children with a Reservation Status of No Show.
No Show Reservations	Number of reservations with a reservation status of No Show
No Show Rooms	Number of Rooms with a Reservation Status of No Show.
Non-Deducted Arrivals	Number of Rooms with an Arrival Date equal to today, and the reservation type is equal to non-deduct.
Other Revenue	Total amount of all postings today where the Transaction Code is marked as 'Revenue' and the Transaction Code Type is not 'Lodging', 'Food and Beverage', 'Tax', or 'Non Hotel Supplies'.
Other Revenue (Distributed)	Total amount of all postings today where the Transaction Code is marked as 'Revenue' and the Transaction Code Type is not 'Lodging', 'Food and Beverage', 'Tax', or 'Non Hotel Supplies'. When an Advance Bill is associated with the reservation, revenue is distributed over the stay period in order to reflect actual revenue generated per day, rather than recording all revenue on the day the advance bill is generated.
Out of Order rooms	Number of Rooms marked as Out of Order for today.

**Table 9-13 (Cont.) Definable Managers Report - Item Descriptions**

<b>Item Description</b>	<b>Calculation</b>
Out of Service Rooms	Number of Rooms marked as Out of Service for today. (Available when the Rooms Management > Out of Service application function is set to Y.)
Payments	Total amount of postings today that have a Transaction Code linked to a Group of 'Payment'. This amount includes passerby direct bill payments.
Person Rate Bucket 1	Number of Persons in House Belonging to Rate Bucket 1
Person Rate Bucket 2	Number of Persons in House Belonging to Rate Bucket 2
Person Rate Bucket 3	Number of Persons in House Belonging to Rate Bucket 3
Person Rate Bucket 4	Number of Persons in House Belonging to Rate Bucket 4
Person Rate Bucket 5	Number of Persons in House Belonging to Rate Bucket 5
Proj. Rooms Occ. + DU and NS for current Month	Total number of deduct rooms plus Day Use and No Show reserved for the whole month.
Proj. Rooms Occ. + DU and NS for current Year	Total number of deduct rooms reserved plus Day Use and No Show for the whole year.
Proj. % Rooms Occ. DU and NS for current Month	Total number of deduct rooms reserved plus Day Use and No Show for the whole month, divided by Total Rooms in Hotel for the whole month, multiplied by 100.
Proj. % Rooms Occ. DU and NS for current Year	Total number of deduct rooms reserved plus Day Use and No Show for the whole year, divided by Total Rooms in Hotel for the whole year, multiplied by 100
Projected % Rooms Occupied for Current Month	Total number of deduct rooms reserved for the whole month, divided by Total Rooms in Hotel for the whole month, multiplied by 100.
Projected % Rooms Occupied for Current Year	Total number of deduct rooms reserved for the whole year, divided by Total Rooms in Hotel for the whole year, multiplied by 100.
Projected Rooms Occupied for Current Month	Total number of deduct rooms reserved for the whole month.
Projected Rooms Occupied for Current Year	Total number of deduct rooms reserved for the whole year.
Repeat Guests Persons	Number of guests in-house for guests that have at least one prior check-out
Repeat Guests Revenue	Total amount of postings today where the transaction code is marked as 'Revenue' for reservations where the guest has at least one prior check-out.

**Table 9-13 (Cont.) Definable Managers Report - Item Descriptions**

Item Description	Calculation
Repeat Guests Room Revenue	Total amount of postings today where the transaction code is marked as 'Revenue' and a transaction code Type is 'Lodging' for reservations where the guest has at least one prior check-out.
Repeat Guests Rooms Occupied	Number of room occupied by guests that have at least one prior check-out.
Reservations Made Today	Number of Reservations that were created today for any date. Pseudo Room reservations are not included.
Revenue per Available Room	Room Revenue, divided by Available Rooms.
Revenue per Available Room minus OOO	Room Revenue, divided by Available Rooms minus OOO Rooms.
Room Nights Reserved Today	Total number of nights from all Reservations Made Today. Pseudo Room reservations are not included.
Room Revenue	Total amount of all postings today where the Transaction Code is marked as 'Revenue' and the Transaction Type is 'Lodging'. <b>Note:</b> An exception exists for this column that if a transaction was moved from a non-PM Room to a PM Room, then the revenue is displayed under the non-PM Room (originating room for the reservation). If the transaction is moved from a PM Room to another PM Room, then the transaction will be displayed under the Room Class of the PM Room the transaction was moved to.
Room Revenue (Distributed)	Total amount of all postings today where the Transaction Code is marked as 'Revenue' and the Transaction Type is 'Lodging'. When an Advance Bill is associated with the reservation, revenue is distributed over the stay period in order to reflect actual revenue generated per day, rather than recording all revenue on the day the advance bill is generated.
Rooms Cancelled Today	Number of rooms that were cancelled today for any date
Rooms Occupied	Number of rooms In-House with a Front Office status of 'OCC'.
Rooms Occupied including Owner and Auth. User Rooms	Number of Total rooms occupied plus occupied Owner Rooms (Rental Program), plus occupied Auth. Users (Rental Program), plus occupied Owner Rooms, plus occupied Auth. Users Rooms.
Rooms Occupied for Next 7 Days	Total number of deduct rooms reserved starting tomorrow for 7 days.
Rooms Occupied minus Comp	Number of Rooms In-House with a Front Office status of 'OCC', minus any Complimentary Rooms.
Rooms Occupied minus Comp and House Use	Number of Rooms In-House with a Front Office status of 'OCC', minus any Complimentary Rooms and House Rooms.

**Table 9-13 (Cont.) Definable Managers Report - Item Descriptions**

<b>Item Description</b>	<b>Calculation</b>
Rooms Occupied minus House Use	Number of Rooms In-House with a Front Office status of 'OCC', minus any House Rooms.
Rooms Occupied plus Day Use and No Show	Number of Rooms In-House with a Front Office status of 'OCC', plus any Dayuse Rooms and No-Show Rooms.
Rooms Occupied plus Day Use for the next 7 Days	Total number of deduct rooms reserved plus Day Use starting tomorrow for 7 days.
Source Rooms in House	Number of Rooms that have a Source profile attached to the reservation.
Today's Demand	Number of room Turnaways for today's date plus Number of Rooms Occupied In-House today.
Total In-House Persons	Number of Adults and Children for Rooms In-House.
Total Revenue	Total amount of Room Revenue, Food and Beverage Revenue and Other Revenue.
Total Revenue (Distributed)	Total amount of Room Revenue, Food and Beverage Revenue and Other Revenue. When an Advance Bill is associated with the reservation, revenue is distributed over the stay period in order to reflect actual revenue generated per day, rather than recording all revenue on the day the advance bill is generated.
Total Revenue per Person	Total amount of Room Revenue, Food and Beverage Revenue and Other Revenue, divided by Total Adults and Children In-House.
Total Rooms in Hotel	Sum of all rooms defined for the property.
Total Rooms in Hotel minus OOO Rooms	Number of Rooms in the Hotel minus Out of Order Rooms.
Travel Agent Revenue	Total amount of postings today where the transaction code is marked as 'Revenue' for reservations that have a travel agent profile attached
Travel Agent Room Revenue	Total amount of postings today where the transaction code is marked as 'Revenue' and a transaction code Type is 'Lodging' for reservations that have a travel agent profile attached
Travel Agent Rooms in House	Number of Rooms that have a Travel Agent profile attached to the reservation.
Turnaways	Number of Turn-aways with an arrival date of today. (Available when the Turnaways Functionality OPERA Control is active).
VIP Persons in House	Number of Adults and Children for Rooms In-House with a VIP code attached to the profile.
Walk-in Persons	Number of Adults and Children where the Walk-In button was used to make the reservation.
Walk-in Rooms	Number of Rooms where the Walk-In button was used to make the reservation.

## Copying Reports to Multiple Properties

With the Oracle Hospitality OPERA Multi-property Cross Reservation Cloud Service active you can copy reports and stationery templates created one in property to other properties. To copy reports first change your location to a [hub location](#) in order to be able to select properties assigned to the [hub](#).

### Note:

If the report(s) already exist in the destination property the copy process will fail and an error displayed.

### Watch Video

#### Copying Reports to Other Properties

1. From the **OPERA Cloud** menu, select **Reports**, and then select **Manage Reports**.
2. Select or confirm the Property, enter optional search criteria, and click **Search**.
3. Select the check box for report(s) to be copied and click **Copy to Property**.
4. On the Copy to Property screen, the selected report(s) are listed.
  - a. **Property**: Select the destination properties and click **Select**.
5. Click **Copy Report(s)**.

### Note:

If the report(s) already exist in the destination property the copy process will fail and an error displayed.

# Part II

## OPERA Cloud Mobile Application

This part of the OPERA Cloud Help system contains information on working with the OPERA Cloud Mobile Application.

# 10

## Overview

OPERA Cloud Mobile application extends key OPERA Cloud features to smartphone devices.

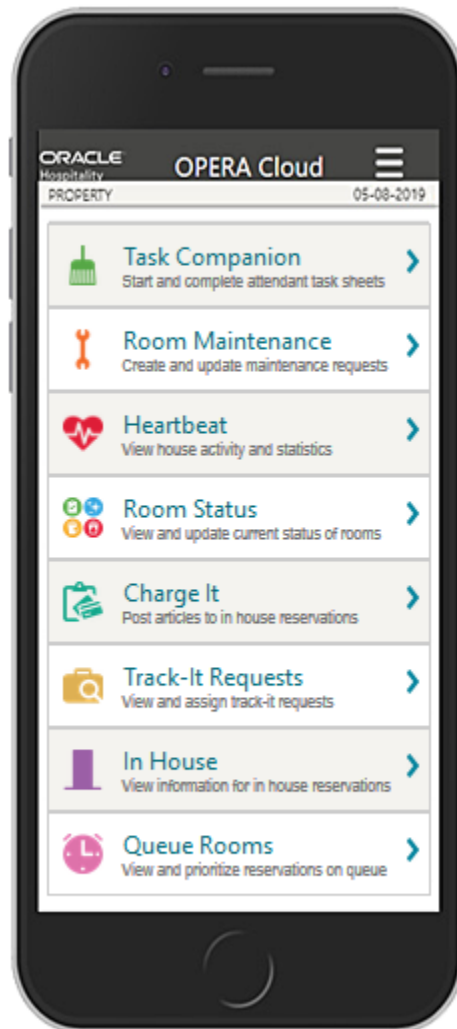

With it, you can view property activity and statistics, view in-house reservation information, and post article/item charges to in-house reservations. You can also manage task sheets, room status, queued rooms, room maintenance, and Track-It requests.

### Note:

Two finger scrolling is required in the screens with inner and out scrollbar such as In House, Post It, Room Status search results.

The OPERA Cloud mobile web-application is accessible through a browser app on any smartphone via the /mobile end-point for your OPERA Cloud URL. For example: <https://operacloud.oracleindustry.com/OPERA9/opera/mobile>.

### **Key Features:**

#### **Task Companion**

Start and complete attendant task sheets.

#### **Room Maintenance**

Create and update maintenance requests.

#### **Heartbeat**

View house activity and statistics.

#### **Room Status**

View and update current status of rooms.

#### **Charge It**

Post articles to in house reservations.

#### **Track-It Requests**

View and assign track-it requests.

#### **In House**

View information for in house reservations.

#### **Queue Rooms**

View and prioritize reservations on queue.

### **Hamburger Menu**

Find the following menu items within the hamburger (three-line icon ) menu at the top right of the screen:

- **Change Settings:** Select the language to use in the application, and then tap **Save**.
- **Change Location:** For multi-property operations, you can search and select another property location. From the search results, select the Hub or Property and then tap **Select**.

## **Task Companion (Housekeeping)**

### **Prerequisites for Mobile Task Companion**

The Task Companion replaces the need to generate and distribute task sheet reports by providing real-time, interactive housekeeping task management. Attendants can view reservation details, including reservation traces and send notifications to request assistance. When the Guest Service Status OPERA Control is active attendants can also set **Do Not Disturb** status on rooms. Room Attendants can indicate when they

are on a break and this status is indicated in the Task Sheet Overview screen (Summary & Detail) and the [Task Sheet presentation screen](#).

## Using The Task Companion

### Note:

When the Housekeeping Task Scheduling OPERA Control is active, multiple tasks are combined into a single task sheet. Select from the list of tasks. You can view all task sheets when the Access All Task Assignments in Task Companion task is assigned to your role(s).

### Note:

The Access All Task Assignments in Task Companion user task determines if you can view all task sheets or only task sheets assigned to you, based on the [attendant](#) assigned to the [task sheet](#).

1. Tap to select the assigned task sheet number. For easier identification and selection, you can indicate the assigned attendant for each task sheet.

On the summary page, the following information appears: the total count of allocated rooms, a count of rooms per room status, a list of the room numbers assigned to the task sheet, and task sheet instructions if applicable.

### Note:

Rooms listed in the task sheet are sequenced according to their [auto-priority](#).

2. Tap **Start** to begin the task. The following options appear for the first room:
  - a. **Start**: Tap to begin the task for the room.
  - b. **Skip**: Tap to skip the room.
  - c. **View Reservations**: Tap to view details of arrival, stay over, or departure reservations.
  - d. **View My Room List**: Tap to view a list of rooms assigned to the task sheet.
  - e. **View Traces**: Tap to create, view, or update traces for the room reservations (Available when the Reservation Traces OPERA Control is active).
    - **Resolve trace**: Tap to resolve a trace.
    - **Create trace**: Tap to create a trace by selecting a **Department**, selecting the **date range**, entering the message into the **Trace Text** field, and then tapping **Save**.
  - f. **Do not Disturb**: Tap to flag a room as DND. The room is skipped and the next room appears (Available when the Guest Service Status OPERA Control is active).
  - g. **Request Assistance**: Tap to send notifications to other users that assistance is required.

- Select from **General** or **Emergency** notifications.

 **Note:**

The **Request Assistance** action only sends a notification to users assigned a role with the **Receive Task Companion General Assistance Notifications** and/or **Receive Task Companion Emergency Assistance Notifications** tasks granted.

- h. **On-break:** Tap to pause a task and set its status as **on-break**. This status is indicated in the Housekeeping Attendant Console.
3. When **Start** is selected, the following specific room details appear:
- Preferred service time
  - Room specific task instructions
  - a. **Maintenance Requests:** Tap to create, view, or update maintenance requests for the room (Available when the Maintenance OPERA Control is active). For more information, see [Room Maintenance](#) .
  - b. **Request Assistance:** Tap to send notifications to other users that assistance is required. Select from the **General** or **Emergency** notification options.

 **Note:**

The **Request Assistance** action only sends a notification to users assigned a role with the **Receive Task Companion General Assistance Notifications** and/or **Receive Task Companion Emergency Assistance Notifications** tasks granted.

- c. **View Reservations:** Tap to view the details of arrival, stay over, or departure reservations.
- d. **View Traces:** Tap to create, view, or update traces for the room reservations.
- e. **Resolve Trace:** Tap to resolve a trace.
- f. **Create Trace:** Tap to create a trace by selecting a **Department**, selecting the **date range**, entering the message into the **Trace Text** field, and then tapping **Save**.
- g. **Room Status:** Once the task is complete select a room status from the options available. For example, update room status from Dirty to Clean or Inspected
- h. **Housekeeping Status:** Update the housekeeping status (to vacant or occupied). These housekeeping status options are used to report a discrepancy between housekeeping status and the front office status of the room; resulting in a Skip or Sleep discrepancy. (Available when the Discrepant Rooms OPERA Controls is active)

 **Note:**

Depending on the Task Companion Timer setting in OPERA Controls, a time counter might increment or decrement during completion of the task.

- i. **Finish this room:** Tap to complete the task, close the page and begin the next room in sequence.

 **Note:**

The room no longer shows in the room list since the task has been completed and the Task Companion advances to the task for the next room.

## Prerequisites for Mobile Task Companion

### OPERA Controls

**Group:** Room Management

**Functions:** Task Sheets or Advanced Task Sheets

- Housekeeping Task Scheduling (optional)
- Maintenance (optional)
- Guest Service Status (optional)
- Inspected Status (optional)
- Pickup Status (optional)

**Parameters:**

- Attendant Console (optional)
- Task Companion Assistance (optional)

**Group:** Reservations

**Functions:** Reservation Traces

### OPERA Cloud Tasks

The Request Assistance action sends a notification to other users assigned a role with the following tasks:

**Group:** Inventory

**Tasks:**

- Access All Task Assignments in Task Companion
- Room Management Workspace:
  - Receive Task Companion Emergency Assistance Notifications
  - Receive Task Companion General Assistance Notifications

# Room Maintenance

## Prerequisites for Room Maintenance

Room Maintenance enables you to record, view, or resolve maintenance requests for rooms, such as changing a light bulb or repairing a faulty lock, air conditioning unit, or leaky faucet. You can assign maintenance requests to staff according to a staff member's skills and/or qualifications.

## Watch Video

## Adding a Maintenance Request

1. Tap  to create a maintenance request.
2. Search for and select a **room**.
3. Select a **reason code** from the list.
4. Enter additional remarks.
5. To assign the request to a specific user, search for and select the user.
6. Tap **Create Maintenance Request** to save the request and close the page.

## Searching for Maintenance Requests

1. Use the search fields to filter and view existing maintenance requests by entering search criteria and tapping **Search**.

 **Note:**

The **Show** field is populated with the value "Unresolved" by default.

2. Tap the **Show** field and select **Resolved** to view resolved maintenance requests. Select **ALL** to list both resolved and unresolved maintenance requests.
3. Tap **Search** to view results.

 **Note:**

**My (Assigned) Requests** appear by default in the search results, listing all maintenance tasks assigned to you.

4. To view all other requests, change your selection to **All Requests** or **Unassigned Requests**.

## Updating Maintenance Requests

1. Tap a maintenance request to open, view, or update its details.
2. Tap the **User** field to search for and assign a user to the task.
3. Update the **Reason** and **Remarks** as needed.

4. Tap **Save** to save updates to the request.
5. Tap **Delete** to delete the request.

#### Resolving Maintenance Requests

1. Tap a maintenance request to open, view, or update its details.
2. Tap **Resolve** to update the status to resolved and close the page.

## Prerequisites for Room Maintenance

### OPERA Controls

**Group:** Room Management

**Functions:** Maintenance

## Heartbeat

You can use Heartbeat to view real-time statistics for your property.

Tap **Heartbeat** and select from the following options:

- **Activity** — Select to view arrivals, in-house, departure, and day-use room counts for today (current date), month to current date, and year to current date.
- **Room Status** — Select to view a summary of room status for occupied, vacant, and assigned rooms. View the number of rooms on queue and view any discrepant rooms.
- **60 Minutes** — Select to view activity in the past 60 minutes: Arrivals, Departures, Cleaned, and Inspected Rooms.
- **Comp / House Use** — Select to view a count of Arrival, Inhouse, and Departure Rooms flagged for house use and complimentary purposes.
- **Summary** — Select to view Rooms Sold, Average Rate, Total Revenue, and RevPAR for today (current date), month to current date, and year to current date.

## Room Status

### Prerequisites for Room Status

Use Room Status to update the status of a specific room (for example, clean to inspected). When the Discrepant Room OPERA Control is active, you can also update the housekeeping status to identify a Skip or Sleep discrepant room. For more information, see [Managing Room Discrepancies](#)

### Updating Room Status

1. Enter search criteria and tap **Search**.
2. Tap the room you want to update.
3. Select a new room status for the room.
4. Update the housekeeping status to report a room discrepancy.

- a. An occupied room set to a **Vacant** status registers a skip discrepancy.
  - b. A vacant room set to an **Occupied** status registers a sleep discrepancy.
5. Tap < to return to the search results.

## Prerequisites for Room Status

### OPERA Controls

The following OPERA Controls are optional.

**Group:** Room Management

**Functions:**

- Inspected Status
- Pickup Status
- Discrepant Rooms

## Post it

### Prerequisites for Post It

Post it enables you to post articles, such as mini bar items, to in-house reservation accounts.

To use Post it, you add items to a shopping cart and then post the balance of the cart to a reservation account.

**Note:**

User role(s) must be granted **Charge to Room (Settlement)** task.

**Note:**

Your user profile must be assigned a cashier ID to access Post It. For more information, see [Managing Users](#).

### Using Post it

1. Perform a search for a reservation by entering a **Name** or a **Room**.
2. Tap to select a reservation from the search results.
3. Tap items to post to the cart. You can tap the same item multiple times to add multiple quantities of the item.
4. To delete an item, tap **View Cart** and then tap the **X** next to the item you want to remove from the cart.

5. Tap **Post to Room** to post the cart balance to the reservation account. A confirmation message appears informing you the charges have been successfully posted to the room.
6. Tap < to return back to the search page.

## Prerequisites for Post It

### OPERA Controls

**Group:** Cashiering

**Functions:**

- Post It
- Articles

### OPERA Cloud Tasks

**Group:** Financials

**Tasks:** Cashiering Workspace

- Post It
- Fast Postings
- Post a Negative Post It Article
- Charge to Room (Post It)

## Track-It Requests

### Prerequisites for Track-It Requests

Track It enables you to manage the storage and delivery of guest luggage, parcels, vehicles (valet), and lost items.

If related to an arrival, in-house, or departure reservation, Track-It tickets are optionally linked to a reservation.

In Track It, a list of open Track-It requests appear, but only assigned tickets appear by default via the My Requests search filter.

### Using Track It

1. Tap **Unassigned** to view all unassigned requests.
2. Tap **All Requests** to view both assigned and unassigned requests.
3. To view a list of open Track-It requests for each group, toggle between **Parcel**, **Valet**, **Baggage** (Luggage), and **Lost** groups.
4. Tap any request in the search results to view and manage the Track-It request details.

### Managing a Track-It Request

Both the Track It request details and the linked reservation (if a reservation is linked) appear.

1. Tap **Action** and select the appropriate action from the list to update the status of the request.

2. To close the request, tap **Action** and select an appropriate **Action** from the list to close the request (for example, select **DONE**, **DELIVERED**, or **COMPLETE**).

## Prerequisites for Track-It Requests

### OPERA Controls

**Group:** General

**Functions:** Track It

## In House

In House enables you to view the primary details of in house reservations.

### Viewing In House Reservations

1. Select **In House**.
2. Enter a **Name** or **Room Number** and tap **Search**.

 **Note:**

Entering no criteria in the search fields results in a list of all in-house reservations.

3. Tap the reservation in the search results to view the details.
4. Tap < to return to the search results.

## Queue Rooms

### Prerequisites for Queue Rooms

Queue Rooms enables you to view and manage Arrival rooms on queue. The number of rooms on queue and the current and average wait times appear. The Room Type section lists the number of rooms on queue per room type and shows a count of rooms in each room status.

### Using Queue Rooms

1. Tap **View Reservation on Queue** to view a list of reservations.
2. Tap any reservation to view its reservation details, including the assigned room.
3. Tap **Prioritize** to set a reservation as a top (number one) priority.
4. Tap **Remove from Queue** to remove the reservation from the queue status.
5. Tap < to return to the results page.

## Prerequisites for Queue Rooms

**OPERA Controls**

**Group:** Room Management

**Functions:** Queue Rooms

# Part III

## Administration

The OPERA Cloud Administration menu enables the configuration and setup of Enterprise, Inventory, Financial, Booking, Client Relations, and Interfaces components. These components enable customer-facing and back office functions, channel and other external interfaces, user roles and tasks, and single and multi-property operations. You define your system by creating parameters, codes, rates, accounts, rules, types, groups, reasons, and a myriad of other configurations.

# Enterprise Administration

The Enterprise menu is for those responsible for global property and control settings, and configuring main interfaces, scheduling batch processes and reports, and managing images used throughout the system.

## User Interface Management

User Interface Management options are used in conjunction with [Page Composer](#) to support customization of the OPERA Cloud user interface.

You can configure a list of values for flex (that is, user defined fields) fields, configure display styles for the various presentation pages, and delete user, property/hub, or chain customizations.

## Deleting Page Composer Customization

### Prerequisites for Deleting Page Composer Customization

The Delete Customization feature enables you to delete [Page Composer](#) customization and personalization changes made by users at the Chain, Hub, or Property levels.

When a page panel is customized or personalized a custom file is created for storing the changes. Multiple changes made to the same area are stored within the custom file and deleting this file deletes all customization or personalization changes.

The Delete Customization screen provides the option to delete these files from a central location, thereby, enhancing the existing Delete Customization option in panels where customization is available.

The search results on the Delete Customization screen show the custom file name, user, updated date, and screen where the customization and/or personalization was made.

### Deleting Customizations

1. From the **Administration** menu, select **Enterprise**, select **User Interface Management**, and then select **Manage Customizations**.
2. In the Search fields, select a **Customization Layer** (Chain, Hub, Property, or User) and optionally enter a **Customization Area**, then click **Search**.
  - a. **Chain**: Allows deletion of Chain-level customization. Delete Chain Customization is only available for users assigned **Delete Customization for Chains** tasks through a chain role.
  - b. **Hub**: (Only available for users logged in at Hub level). A user logged in at the Hub level may delete customization at the logged in Hub.
  - c. **Property**: A user logged in at the Hub level may select a property to delete property-level customization. A user logged in at the Property level can only delete customization for the property currently logged in at.

- d. **User:** A user with the **Delete Users Personalization** task may delete personalization for self and personalization for other users. A user with the **Delete Personalization** task can only delete his or her own personalization.
3. The search results area provides columns for Path, Screen, File Name, User, and Updated Date.
  - a. **Path:** Shows the breadcrumbs path where customization or personalization was made.
  - b. **Screen:** The screen or area where the customization or personalization was made.
  - c. **File Name:** Shows the internal file name for the customized or personalized area.
  - d. **User:** The name of the user who last made a change to the listed area.
  - e. **Updated Date:** The date and time when the last change was made to the listed area.
4. Select the customization file(s) you want to delete and click **Delete**.
5. Click **Delete** again to confirm the deletion.

## Prerequisites for Deleting Page Composer Customization

### OPERA Cloud Tasks

**Group:** Enterprise Admin

**Tasks:** Manage Customizations

- Delete Customizations for Chains
- Delete Customizations for Hubs/Properties
- Delete Personalizations for Other Users
- Delete Personalizations for Current User

## Configuring Presentation Panel Tabs

### Prerequisites for Presentation Panel Tabs

Use presentation panel tabs to preselect the details panels to appear on [Presentation Pages](#) in both the Application and Administration areas of OPERA Cloud. The presentation pages available in the application are Manage Profile, Manage Reservations, Manage Block, Manage Event, Manage Activity and Manage Accounts Receivable. When a user selects a different panel tab, the details panels update on the presentation page. You can configure up to seven panel tabs for each presentation page, each with a maximum of five panels selected. You must select one panel tab as the default to display when the presentation page is opened for the first time by a user. Panel Tab configuration applies to all properties when the OPERA Multi-property Reservation Cloud Service is active.

### Adding a Presentation Panel Tab

You can configure up to seven panel tabs for each presentation page. When a user selects a different tab, the selected Details panels update on the presentation page.

 **Note:**

A maximum of five panels can be selected.

1. From the **Administration** menu, select **Enterprise**, select **User Interface Management**, and then select **Presentation Panel Tabs**.
2. Click **New** and complete the following.
  - a. **Location:**
    - i. **Application:** Select an application presentation page to setup.
    - ii. **Administration:** Select an administration presentation page to setup.
  - b. **Screen:** Select the presentation page from the list.
  - c. **Tab Label:** Enter the name that appears for the panel tab label, for example, **Tab 1**.
    - i. **Manage Translations:** Select this link to translate the Tab Label into other languages. (Available when the Multi-language OPERA Control is active).
  - d. **Sequence:** Set the display order for the panel tab. This is the order in which the tab appears on the presentation page.
  - e. **Default:** Select check box to make this panel tab the default for when the presentation page is opened for the first time by a user.
  - f. **Panels:** Select up to a maximum of five panels in **Available Panels** and click the right arrow buttons to move your selection over to the **Selected Panels**. These are the details panels that appear on the presentation page when this panel tab is selected.
    - i. Use the up / down arrows to set the display order of the **Select Panels**.

 **Note:**

All panels are listed regardless of active OPERA Controls.

3. Click **Save**.

### Editing a Presentation Panel Tab

1. From the **Administration** menu, select **Enterprise**, select **User Interface Management**, and then select **Presentation Panel Tabs**.
2. Enter search criteria, then click **Search**.
3. From the search results, select the panel tab, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Make the desired changes.
5. Click **Save**.

### Deleting a Presentation Panel Tab

1. From the **Administration** menu, select **Enterprise**, select **User Interface Management**, and then select **Presentation Panel Tabs**.
2. Enter search criteria, then click **Search**.

3. From the search results, select the panel tab, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Presentation Panel Tabs

### OPERA Cloud Tasks

**Group:** Enterprise Admin

**Tasks:** User Interface Management

- Presentation Styles:
  - New/Edit Presentation Styles
  - Delete Presentation Styles

## UDF Groups and Values

### [Prerequisites for User Defined Fields and Values](#)

A User Defined Field (UDF) Group is an identifier used to group a List of Values (LOV) together. A single UDF LOV group can have multiple values from which the user can select.

Using [Page Composer](#), you can reference a UDF Group in the [field properties](#) of a flex field. When a user clicks the flex field, the list of values appears.

For example, if you wanted a flex field on the Reservation Overview panel for guest vehicle type, you would configure a UDF Group for "Vehicle Type."

For each UDF Group you configure, the list of values are configured via the UDF LOV Values.

## Prerequisites for User Defined Fields and Values

### OPERA Cloud Tasks

**Group:** Enterprise Admin

**Tasks:** User Interface Management

User Defined Fields

- Edit User Defined Fields
- Delete User Defined Fields

## Configuring UDF Groups

### Adding a UDF Group

1. From the **Administration** menu, select **Enterprise**, select **User Interface Management**, and then select **UDF Groups**.

2. Click **New** and complete the following information:
  - a. **Code**. Enter the group name for the field.
  - b. **Description**. Enter a description that explains the group name.
  - c. **Data Type**. Select the down arrow to choose the data type for the field values of this group (Character or Numeric).
  - d. **Data Length**. Enter the length for field values in this group.
3. Click **Save** or click **Save and Continue** to add more groups.

#### Editing a UDF Group

1. From the **Administration** menu, select **Enterprise**, select **User Interface Management**, and then select **UDF Groups**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level vertical ellipsis **Actions** menu for the UDF Group and select **Edit**. Make the desired changes.
4. Click **Save**.

#### Deleting a UDF Group

1. From the **Administration** menu, select **Enterprise**, select **User Interface Management**, and then select **UDF Groups**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level vertical ellipsis **Actions** menu for the UDF Group and select **Delete**.
4. Click **Delete** to confirm.

## Configuring UDF Values

You can configure the list of values that appear for a flex field and link them to a specific UDF Group.

For example, you might have a Vehicle Type flex field on reservations containing the values GM, Ford, BMW, Mercedes, Honda, and so on. These values would then be linked to the Vehicle Type UDF Group.

#### Adding a UDF Value

1. From the **Administration** menu, select **Enterprise**, select **User Interface Management**, and then select **UDF Values**.
2. Click **New** and complete the following information:
  - a. **Group**. Select the [UDF Groups and Values](#) from the list.
  - b. **Code**. Enter the name for the UDF value list.
  - c. **Description**. Enter a description that explains the UDF value list. This description appears when users select from the list of values.
3. Click **Save** or click **Save and Continue** to add more groups.

### Editing a UDF Value

1. From the **Administration** menu, select **Enterprise**, select **User Interface Management**, and then select **UDF Values**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level vertical ellipsis **Actions** menu for the UDF Value and select **Edit**. Make the desired changes.
4. Click **Save**.

### Deleting a UDF Value

1. From the **Administration** menu, select **Enterprise**, select **User Interface Management**, and then select **UDF Values**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level vertical ellipsis **Actions** menu for the UDF Value and select **Delete**.
4. Click **Delete** to confirm.

## Copying Configuration Codes to Multiple Properties

When the OPERA Multi-property Cross Reservation Cloud Service is active you can copy configuration from one property (or template) to other properties when working from a [Hub location](#). This ability simplifies configuration and also ensures consistency of configuration throughout all properties. Provisioning of a new property can be easily achieved through the copy of the relevant configuration from a template or from other properties where applicable. OPERA Cloud provides two methods of copying configuration depending on the functionality.

### Copy the configuration from one property to other properties

1. From the Administration menu, select a **Configuration** menu and navigate to the desired configuration screen.
2. Select the source Property in which the configuration codes reside and click **Search**.
3. Click the **vertical ellipsis** next to the New button, and click **Copy**.
4. In the Configure Parameters panel complete the following:
  - a. **Source Property**: Select the Source Property with the configuration you want to copy.
  - b. **Codes**: Select the configuration codes to copy from the list.
  - c. **Target Properties**: Select the properties to copy the configuration codes to (the properties listed are linked to your Hub location).
  - d. Click **Save**.
  - e. In the Review and Copy Codes panel,
    - i. Verify the target property/properties and configuration code(s).
  - f. Click **Copy And Continue**.

- g. In the Confirmation panel.
  - i. Verify that no errors appear.
- h. Click **Print**.

 **Note:**

Your browser opens a separate tab showing the details of your copy process. If errors appear in the Confirmation area, close the tab and select the application tab to make changes as necessary.

### Copy the configuration from template to properties

 **Note:**

Your assigned role(s) must be granted the Template Configuration tasks (New/Edit, Delete) to configure and copy codes in the template. For more information, see [OPERA Tasks — General](#).

1. From the Administration menu, select a **Configuration** menu and navigate to the desired configuration screen.
2. Select the Template tab.
3. Click the **vertical ellipsis** next to the New button, and click **Copy**.
4. In the Configure Parameters panel complete the following:
  - a. **Codes:** Select the configuration codes to copy from the list.
  - b. **Target Properties:** Select the properties to copy the configuration codes to (the properties listed are linked to your Hub location).
  - c. Click **Save**.
  - d. In the Review and Copy Codes panel,
    - i. Verify the target property/properties and configuration code(s).
  - e. Click **Copy And Continue**.
  - f. In the Confirmation panel.
    - i. Verify that no errors appear.
  - g. Click **Print**.

 **Note:**

Your browser opens a separate tab showing the details of your copy process. If errors appear in the Confirmation area, close the tab and select the application tab to make changes as necessary.

# Chain and Property Management

Chain and Property Management enables you to configure a variety of options related to your chain, brands, and properties along with their locations, facilities, and local attractions. The available options are dependant on the active controls at your property.

## Configuring Properties

Properties are provisioned on activation of the Oracle Hospitality OPERA Cloud Service, Property Management Professional Foundation or Oracle Hospitality OPERA Cloud Service, Property Management Enterprise Foundation subscription.

Update the General Information and Property Controls sections to determine specific settings for OPERA Cloud.

Other properties details are required for property brochure and multi-property/central reservations operations.

### Editing Properties

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Properties**.
2. Enter search criteria and click **Search**.
3. Select the Property, click the **vertical ellipsis** and select **Edit**.

#### Note:

Details panels selected in the default or previously selected Presentation Panel tab appear. For more information, see [Presentation Pages](#)

### General Information

1. Click **Edit**.
  - a. **Name:** Enter the property name.
  - b. **Legal Owner:** Enter the legal owner / company name.
  - c. **Property Type:** Select a property type from the list.
  - d. **Number of Floors:** Enter the number of floors.
  - e. **Total Rooms:** Enter the total number of accommodation rooms.
  - f. **Number of Beds:** Enter the number of beds.
  - g. **Property Information URL:** Enter a URL of website with further property details.
  - h. **Check out Time:** Enter the default check out time.
  - i. **Check in Time:** Enter the default check in time.

- j. **Latitude:** Enter the location of the property (available through Google Maps).
  - k. **Longitude:** Enter the location of the property (available through Google Maps)
  - l. **Base Language:** Enter the primary configuration language of the property.
2. Click **Save**.

#### Accommodation Details

1. Click **Edit**.
  - a. **Single Rooms:** Enter the number of single / king single bed rooms.
  - b. **Double Rooms:** Enter the number of double bed rooms.
  - c. **Twin Rooms:** Enter the number of twin bed rooms.
  - d. **Suites:** Enter the number of suites.
  - e. **Guest Room Floors:** Enter the number of floors with accommodation.
  - f. **Guest Elevators:** Enter the number of guest elevators.
  - g. **Non smoking rooms:** Enter the number of non-smoking rooms.
  - h. **Connecting Rooms:** Enter the number interconnecting rooms.
  - i. **Accessible Rooms:** Enter the number of accessible rooms.
  - j. **Family Rooms:** Enter the number of family rooms.
  - k. **Max Adults in Family:** Enter the maximum number of adults for a family room.
  - l. **Max Child in Family:** Enter the maximum number of children for a family room.
  - m. **Executive Floor Number.** Enter the starting floor of executive floor.
  - n. **Room Amenities:** Enter details for standard room amenities.
2. Click **Save**.

#### Amenities

1. Click **New** and enter the following details:
  - a. **Code:** Select an Amenity from the list. See [Configuring Amenities](#).
  - b. **Description:** Description will default based on Code selected; you can update if needed.
  - c. **Type:** Select the Amenity type from the list (General or Meeting).
  - d. **Start Date:** Enter a start date.
  - e. **End Date:** Enter an (optional) end date.
  - f. **Hours:** Enter opening hour details.
  - g. **Price:** Enter price details.
  - h. **Sequence:** Enter a display sequence.

 **Note:**

Enter any notes about the Amenity.

2. Click **Save**.

3. Repeat to add another Amenity.
4. To update the details, click the vertical ellipsis **Actions** menu and select **Edit**.
5. To update the details, click the vertical ellipsis **Actions** menu and select **Delete**.

### Dining and Retail

1. Click **New** and enter the following details:
  - a. **Code**: Enter a code.
  - b. **Description**: Enter a description for Dining or Retail options.
  - c. **Type**: Enter a type.
  - d. **Category**: Select Dining or Retail.
  - e. **Start Date**: Enter a start date.
  - f. **End Date**: Enter an (optional) end date.
  - g. **Hours**: Enter opening hour details.
  - h. **Price**: Enter price details.
  - i. **Sequence**: Enter a display sequence.

 **Note:**

Enter any notes about the outlet.

2. Click **Save**.
3. Repeat to add another Dining or Retail outlet.
4. To update the details, click the vertical ellipsis **Actions** menu and select **Edit**.
5. To update the details, click the vertical ellipsis **Actions** menu and select **Delete**.

### Local Attractions

1. Click **New** and enter the following details:
  - a. **Code**: Select an Attraction from the list. See [Configuring Attractions](#).
  - b. **Description**: Description will default based on Code selected; you can update if needed.
  - c. **Category**: Select an Attraction category from the list. See [Configuring Attraction Categories](#).
  - d. **City**: Enter the City (suburb) name.
  - e. **State**: Select a State from the list.
  - f. **Website**: Enter the Attraction company website address.
  - g. **Distance**: Enter distance from your property.
  - h. **Distance Type**: Select the distance type (measure) from the list.
  - i. **Driving Time**: Enter the driving time to attraction.
  - j. **Price Range**: Enter the price range of the attraction.
  - k. **Hours**: Enter the hours of operation.

- l. **Sequence:** Enter a display sequence.
  - m. **Latitude:** Enter the location of the Attraction (available via Google Maps).
  - n. **Longitude:** Enter the location of the Attraction (available via Google Maps)
  - o. **General Directions:** Enter directions to the Attraction.
2. Click **Save**.
  3. Repeat to add another Attraction.
  4. To update the details, click the vertical ellipsis **Actions** menu and select **Edit**.
  5. To update the details, click the vertical ellipsis **Actions** menu and select **Delete**.

### Localization

1. Click **Edit** and enter the following details:
  - a. **Business ID:** Enter the company ID.
  - b. **Business Registration Code:** Enter the business registration code.
  - c. **Fiscal Year Begin Month:** Select a month from the list.
  - d. **Fiscal Year Begin Day:** Select a day from the list.

 **Note:**

Other fields specific to a country or region may appear in this panel. For more information, see [Oracle Hospitality Localization Center for Hotel](#).

2. Click **Save**.

### Property Controls

1. Click **Edit** and enter the following details:
  - a. **Hotel Code:** Enter a property code (unique code in multi-property operations).
  - b. **Begin Date:** Enter date the property is scheduled to become active and start accepting reservations.
  - c. **End Date:** End date the property is no longer considered active/operational.
  - d. **Chain Mode:** Indicates the chain mode for chain-specific features. (Read Only).
  - e. **Country Mode:** Select a country mode from the list; if applicable. This activates country-specific business logic and features.
  - f. **Currency:** Select the local (property) currency from the list. For more information, see [Configuring Foreign Currency Codes](#)
  - g. **Currency Format:** Select the currency format mask from the list.
  - h. **Catering Currency:** Select a Catering (Event) currency from the list. For more information, see [Configuring Foreign Currency Codes](#)
  - i. **Catering Currency Format:** Select the currency format mask from the list.
  - j. **Short Date Format:** Select the short date format from the list. This date format is used to display dates in OPERA Cloud and is available in stationery templates.
  - k. **Time Format:** Select the time format mask from the list.

### Address and Communication

1. Click **Edit** and enter the following details:
  - a. **Address:** Enter the street address.
  - b. **City:** Enter the city (suburb).
  - c. **Postal Code:** Enter the post code.
  - d. **Region:** Select a region from the list.
  - e. **State:** Select a state from the list.
  - f. **Country:** Select a country from the list.
  - g. **Phone:** Enter primary phone number for the property.
  - h. **Toll Free:** Enter toll-free phone number for the property.
  - i. **Fax:** Enter fax number for the property.
  - j. **Email:** Enter the email address of the property (eg GM email address).
  - k. **Web:** Enter the website URL for the property.
2. Click **Save**.

### Contacts

1. Click **New** and enter the following details:
  - a. **Name:** Search and select a user profile.
  - b. **Primary:** Select the mark the contact as the primary contact.
2. Click **Save**.
3. Repeat to add another Contact.
4. To update the details, click the vertical ellipsis **Actions** menu and select **Edit**.
5. To update the details, click the vertical ellipsis **Actions** menu and select **Delete**.

### Corporate Information

1. Click **Edit** and enter the following details:
  - a. **Hotel Category:** Select a category from the list.
  - b. **Brand Code:** Select a brand from the list.
2. **Business Units**
  - a. Select values from the **Available** panel and click to move to the **Selected** panel.
3. **Operating Units**
  - a. Select values from the **Available** panel and click to move to the **Selected** panel.
4. **Department Codes**
  - a. Select values from the **Available** panel and click to move to the **Selected** panel.
5. **Divisions.**
  - a. Select values from the **Available** panel and click to move to the **Selected** panel.
6. Click **Save**.

### Airports

1. Click **New** and enter the following details:
  - a. **Name:** Search and select a user profile.
  - b. **Primary:** Select the mark the contact as the primary contact.
2. Click **Save**.
3. Repeat to add another Contact.
4. To update the details, click the vertical ellipsis **Actions** menu and select **Edit**.
5. To update the details, click the vertical ellipsis **Actions** menu and select **Delete**.

### Transport

1. Click **New** and enter the following details:
  - a. **Code:** Select a transport type from the list.
  - b. **Label:** Enter a label.
  - c. **Description:** Enter a description for the transport method.
  - d. **Phone:** Enter contact phone number.
  - e. **Website:** Enter company website address.
  - f. **Price Range:** Enter price range.
  - g. **Distance:** Enter distance from property.
  - h. **Distance:** Select a distance type from the list.
  - i. **Sequence:** Enter a display sequence.

 **Note:**

Enter additional details for the transport service

2. Click **Save**.
3. Repeat to add another transport method.
4. To update the details, click the vertical ellipsis **Actions** menu and select **Edit**.
5. To update the details, click the vertical ellipsis **Actions** menu and select **Delete**.

## Configuring Departments

Use departments to group your employees into operational areas; a department is then assigned to each [user](#). You must also select a department when adding a [block trace](#) or [reservation trace](#).

A department is assigned to each user when configuring new users.

### Adding a Department

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property Management**, and then select **Departments**.
2. Click **New** and complete the following fields:

- a. **Global/Property:** Select **Global** to configure a department that is available in all properties or select **Property** to configure a department for a specific property.
  - b. **Code:** Enter a code for the department (for example, BAN, CAT, ENG, or EXE).
  - c. **Description:** Enter the full name for the department (for example, Banquets, Catering, Engineering, or Executive Office).
    - i. **Manage Translations:** Click to open the multi-language screen and configure a translated description for each language. (Available when the Multi-language OPERA Control is active).
  - d. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - e. **Email Address:** Enter the email address for the department. When delivery methods are configured for the department, this is the department's default email address.
3. Click **Save**.

### Editing a Department

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property Management**, and then select **Departments**.
2. Enter search criteria and click **Search**.
3. In the search results, select the department then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting a Department

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property Management**, and then select **Departments**.
2. Enter search criteria and click **Search**.
3. In the search results, select the department then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Electronic Registration Card Templates

### Prerequisites for Electronic Registration Cards

An electronic registration card appears when a user selects the action to create an eSign Registration Card for an arrival reservation. The guest can initial and sign the electronic registration card displayed on a tablet device and the resulting file is saved as an attachment on the reservation. For more information, see [Managing eSignature Registration Cards](#).

Electronic registration card template configuration enables you to define the content and layout of the template. When the Multi-language OPERA Control is active, you can configure registration card templates per language; OPERA Cloud displays the template according to the language selected in the guest profile. If a template is not configured for a specific language, OPERA Cloud displays a default registration card based on the Base Language setting in [Property configuration](#).

Electronic registration cards templates can also be configured per Membership Type.

- In multi-property operations (OPERA Multi-property Cross Reservation Cloud Service is active), you can copy templates to other properties.
- In multi-language operations (Multi-language OPERA Control is active), you can copy templates to other language(s).

### Adding Templates

1. From the Administration menu, select **Enterprise**, select **Chain and Property Management**, and select **Electronic Registration Card**.
2. Click **New**.
3. Enter or select the property or properties. You can select multiple properties when your session is initialized from a Hub location.
4. Enter or select the **Language(s)** if multi language control is enabled.
5. Enter or select the membership type(s).
6. Select **Rich Text** to use the WYSIWYG Editor or select **Source** to view and edit HTML source code.
7. Add or paste (CTRL+V) text and then format the text according to your needs. For more information, see [Using the Rich Text Editor](#).
8. Click **Save**.

### Previewing Templates

Use the Preview feature to view the appearance of your template.

1. From the Administration menu, select **Enterprise**, select **Chain and Property Management**, and select **Electronic Registration Card**.
2. Select or confirm the Property, enter optional search criteria, and click **Search**.
3. From search results, select the row level vertical ellipsis of the template and select **Preview**.
4. Click the **X** to close the preview.

### Editing Templates

1. From the Administration menu, select **Enterprise**, select **Chain and Property Management**, and select **Electronic Registration Card**.
2. Select or confirm the Property, enter optional search criteria, and click **Search**.
3. From search results, select the row level vertical ellipsis of the template and select **Edit**.
4. Make the desired changes. For more information, see [Using the Rich Text Editor](#)

 **Note:**

To delete a merge code, place cursor in front or behind the Merge Code and click either the delete key or the backspace key.

5. Click **Save**.

## Copying Templates

You can copy (clone) templates to current or other properties, other languages, and/or membership types as needed. As part of the copy process you can customize the layout of the new template(s), for example, copy the layout, update the boilerplate text, and change to a different language in the new template.

1. From the Administration menu, select **Enterprise**, select **Chain and Property Management**, and select **Electronic Registration Card**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, select the row level **vertical ellipsis** of the template and select **Copy**.
4. In the Target Electronic Registration Card Details section, select the destination property, the language of the new template, and a **Membership Type**.
5. Make required changes by editing text, merge codes, images.
6. Click **Save**.

## Deleting Templates

1. From the Administration menu, select **Enterprise**, select **Chain and Property Management**, and select **Electronic Registration Card**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, select the row level vertical ellipsis of the template and select **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Electronic Registration Cards

### OPERA Controls

**Group:** Front Desk

**Functions:** eSign Registration Card

### OPERA Cloud Tasks

**Group:** Enterprise Admin

**Tasks:** Chain and Property Management

Electronic Registration Card

- New/Edit Electronic Registration Card
- Delete Electronic Registration Card

## Configuring Hubs

Hubs are used in combination with [Chain and Property roles](#) to control user access to properties, functionality and data.

A default DFLT\_[TENANT] hub is created automatically upon provisioning and all properties provisioned for your tenancy are associated to this hub.

You can configure additional hubs and associate a subset of properties with one or more hubs; enabling you to cluster properties according to your business need.

Once configured you then assign hubs to users in order to grant them access to properties. If a user is not assigned a hub, the user will not be able to log in. See [Managing Users](#).

**Note:**

You are only able to manage hubs that are assigned to you. Hubs created by other users and not assigned to you will not be listed in search results.

### Adding a Hub

1. From **Administration** menu, select **Enterprise**, select **Chain and Property Management**, and then select **Hubs**.
2. Click **New** and enter the following details:
  - a. **Hub**. Enter a Hub.
  - b. **Name**. Enter the full descriptive name for the Hub/CRO.
  - c. **Address**. Enter the street address.
  - d. **City**. Enter the city location for the Hub/CRO from the list.
  - e. **Postal Code**. Enter the zip or postal code number.
  - f. **Country**. Select the country location for the Hub/CRO from the list.
  - g. **State**. Select the state location for the Hub/CRO from the state list of values.
  - h. **Telephone**. Enter an international phone number for the Hub/CRO.
  - i. **Toll Free**. Enter a toll-free 1-800 number for the Hub/CRO.
  - j. **Email**. Enter the email address to associate with the Hub.
  - k. **Currency**. Select the currency for the Hub/CRO. This is used as the default for all currency calculations unless specified elsewhere.
  - l. **Currency Format**. Select the currency format for the Hub.
  - m. **Short Date Format**. Select a format type for the short date.
  - n. **Long Date Format**. Select a format type for the long date (for example, ddth Month YYYY or Month ddth YYYY).
  - o. **Time Format**. Select the time format from the list of values. This is the format for the time stamp used by the property
  - p. **Time Zone**. Select the time zone where the Hub/CRO is located.
  - q. **Base Language**. Select a base language for the Hub.
3. Click **Save**.

### Assigning Properties to a Hub

1. From **Administration** menu, select **Enterprise**, select **Chain and Property Management**, and then select **Hubs**.
2. Enter a **Hub** and click **Search**.
3. Select the Hub, then click the **vertical ellipsis** and select **Edit**.
  - a. Click the **Manage** link located under the Associated Properties section.
  - b. Under **Available Properties**, select the property you want to associate with the hub and click the **down arrow** to move the selected property to the Associated Properties grid.
4. Click **Save**.

### Editing a Hub

1. From **Administration** menu, select **Enterprise**, select **Chain and Property Management**, and then select **Hubs**.
2. Enter a **Hub** and click **Search**.
3. Select the Hub, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting a Hub

1. From **Administration** menu, select **Enterprise**, select **Chain and Property Management**, and then select **Hubs**.
2. Enter a **Hub** and click **Search**.
3. Select the Hub, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Job Titles

You can configure job titles for employees at your property for the purpose of associating a specific job to the person.

### Adding a Job Title

1. Select the **Administration** menu, select **Enterprise**, select **Chain and Property Management**, and then select **Job Titles**.

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active new Job Titles are created by selecting the **Template** tab. Once created, you can copy Job Titles to specific properties using the **Copy** action. Refer to [Copying Configuration Codes to Multiple Properties](#) for more information.

2. Click **New** and complete the following fields:
  - a. **Job Code.** Enter a code for the job title (for example, BAN, CM, SET, or GM).
  - b. **Description.** Enter the full name for the job code (for example, Banquet Manager, Catering Manager, Convention Setup Manager, or General Manager).
  - c. **Manage Translations.** Select to translate the description into another language.
3. Click **Save**.

#### Editing a Job Title

1. Select the **Administration** menu, select **Enterprise**, select **Chain and Property Management**, and then select **Job Titles**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting a Job Title

1. Select the **Administration** menu, select **Enterprise**, select **Chain and Property Management**, and then select **Job Titles**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Property Brochure Master Data

Property Details and the Property Brochure reference information and images configured in various other areas of OPERA Cloud Administration. Refer to the following links for configuring master data content used in the Property Brochure.

[Property Note Types](#)

[Airports](#)

[Transportation](#)

[Amenities](#)

[Attractions](#)

[Attraction Categories](#)

[Images](#)

## Configuring Property Detail Categories

### Adding Property Detail Categories

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Property Detail Categories**.
2. Click **New** and complete the following
  - a. **Code**. Enter a code for the Property Detail Category.
  - b. **Description**. Enter a description for the Property Detail Category.
    - i. **Manage Translation**. Select to open the multi-language descriptions screen and configure a translated menu name for each language.
  - c. **Sequence**. Enter a display sequence.
3. Click **Save** or **Save and Continue** to add another.

### Editing Property Detail Categories

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Property Detail Categories**.
2. Enter search criteria and click **Search**.
3. Select the Property Detail Category, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Property Detail Categories

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Property Detail Categories**.
2. Enter search criteria and click **Search**.
3. Select the Property Detail Category, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm

## Configuring Property Details

### Adding Property Details

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Property Details are created by selecting the Template tab. Once created, you can copy Property Details to specific properties using **Copy** the action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Property Details**.
2. Click **New** and complete the following
  - a. **Code**. Enter a code for the Property Detail.
  - b. **Category**. Select the Property Details Category from the list.
  - c. **Sequence**. Enter a display sequence.
  - d. **Property Detail Values**:
    - i. To add a Property Detail value, click **New** and complete the following
      - i. **Code**. Enter a code for the property detail value.
      - ii. **Description**. Enter a description for the property detail value.
      - iii. **Sequence** . Enter a display sequence.
    - ii. To delete a Property Detail Value
      - i. Click a code, click Vertical Ellipsis and select **Delete**.
3. Click **Save**.

### Editing Property Details

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Property Details**.
2. Enter search criteria and click **Search**.
3. Select the Property Details, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Property Details

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Property Details**.
2. Enter search criteria and click **Search**.

3. Select the Property Details, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Property Types

Create categories of various types of properties that will be referenced in Property Configuration. Use Property Types to categorize your properties by their characteristics (Resort, 4 Star, Apartment, etc).

### Adding Property Types

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Property Types**.
2. Click **New** and complete the following
  - a. **Code**. Enter a code for the property type.
  - b. **Description**. Enter a description for the property type.
    - i. **Manage Translation**. Select to open the multi-language descriptions screen and configure a translated menu name for each language.
  - c. **Sequence**. Enter a display sequence.
3. Click **Save** or **Save and Continue** to add another.

### Editing Property Types

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Property Types**.
2. Enter search criteria and click **Search**.
3. Select the Property Type, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Property Types

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Property Types**.
2. Enter search criteria and click **Search**.
3. Select the Property Type, click the vertical ellipsis **Actions** menu **Delete**.
4. Click **Delete** to confirm.

## Configuring Closing Scripts

### [Prerequisites for Closing Scripts](#)

A closing script is displayed to reservation agents after completing or updating a guest reservation made through the [Look to Book Sales](#) screen. Agents can read the script to callers to confirm the details of their reservation.

You can configure different closing scripts for various membership types. When the Multi Language OPERA Control is active, you can configure closing scripts in multiple languages for multi-lingual reservation agents and callers.

### Adding a Closing Script

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property Management**, and select **Closing Scripts**.
2. Click **New**.
3. Confirm or select the **Property** or **Hub**. You can select multiple properties when your session is initialized from a Hub location.
4. Confirm or select the **Language(s)** if the **Multi Language** function is active in OPERA Controls.
5. Enter or select the **Membership Type(s)**. If one is not selected, the script applies to all membership types.
6. Select **Rich Text** to use the Rich Text Editor or select **View Source** to view and edit HTML source code.
7. Enter or paste (CTRL+V) text (in the applicable language) to the script body and insert merge codes for reservation and profile values where required. These merge codes are replaced with actual values when the closing script is generated. See [Using the Rich Text Editor](#).

 **Note:**

The flex field merge codes are related to the reservation.

8. Click **Save** when finished.

### Editing a Closing Script

1. From the Administration menu, select **Enterprise**, select **Chain and Property Management**, and select **Closing Scripts**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From the search results, click the row-level vertical ellipsis **Actions** menu for the script and select **Edit**.
4. Make the desired changes.
5. Click **Save**.

### Deleting a Closing Script

1. From the Administration menu, select **Enterprise**, select **Chain and Property Management**, and select **Closing Scripts**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From the search results, click the row-level vertical ellipsis **Actions** menu for the script and select **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Closing Scripts

### OPERA Controls

**Group:** Reservations

**Parameters:** Closing Script New and Update Reservation (Hub or Property)

### OPERA Cloud Tasks

**Group:** Enterprise Admin

**Tasks:** Chain and Property Management

- Closing Scripts
  - New/Edit Closing Scripts
  - Delete Closing Scripts

## Configuring Amenities

Configure the various amenities available at your properties. Amenities are classes as either General or Meeting and referenced in Property configuration.

If some amenities are seasonal enter date range accordingly.

### Adding Amenities

#### Note:

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Amenities are created by selecting the Template tab. Once created, you can copy Amenities to specific properties using the **Copy** action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Amenities**.
2. Click **New** and complete the following
  - a. **Code.** Enter a code for the amenity .
  - b. **Description.** Enter the name of the amenity.
  - c. **Type.** Select a type from the list: General or Meeting
  - d. **Start Date.** Enter or select a start date
  - e. **End Date.** Enter or select an end date
  - f. **Sequence.** Enter a sequence number that determines the position of this amenity in listings.
  - g. **Notes.** Enter any notes regarding this amenity
3. Click **Save**.

### Editing Amenities

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Amenities**.
2. Enter search criteria and click **Search**.
3. Select the Amenity, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Amenities

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Amenities**.
2. Enter search criteria and click **Search**.
3. Select the Amenity, click the **Actions** menu and select **Delete**.
4. Click **Delete** and confirm the deletion.

## Configuring Attraction Categories

Create categories for attractions - such as amusement parks, historic sites, zoos, or museums. This categorisation provides users with the ability to search for a category of attractions first and then view the individual attractions within that category.

### Adding Attraction Categories

#### Note:

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Attraction Categories are created by selecting the Template tab. Once created, you can copy Attraction Categories to specific properties using the **Copy** action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Attraction Categories**.
2. Click **New** and complete the following
  - a. **Code**. Enter an attraction category code.
  - b. **Description**. Enter the description for the attraction category.
    - i. **Manage Translation**. Select to open the multi-language descriptions screen and configure a translated menu name for each language
  - c. **Sequence**. Enter a display sequence.
3. Click **Save**.

### Editing Attraction Categories

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Attraction Categories**.
2. Enter search criteria and click **Search**.
3. Select the Attraction category, click the vertical ellipsis and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Attraction Categories

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Attraction Categories**.
2. Enter search criteria and click **Search**.
3. Select the Attraction category, click the vertical ellipsis and select **Delete**.
4. Click **Delete** and confirm the deletion.

## Configuring Attractions

Local attractions such as amusement parks, theme parks, historic sites, zoos, and museums can be created and described.

### Adding Attractions

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Attractions are created by selecting the Template tab. Once created, you can copy Attractions codes to specific properties using the **Copy** action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Attractions**.
2. Click **New** and complete the following
  - a. **Attraction Code**. Enter an attraction code.
  - b. **Attraction Name**. Enter the description for the attraction (Walt Disney World, Sears Tower, Air and Space museum, Regal Casino, The Galleria).
  - c. **Attraction Category**. Select the [attraction category](#) which the attraction belongs
  - d. **City**. Enter the city where the attraction is located.
  - e. **State**. Select the state from the list
  - f. **Distance**. Enter the distance from the property to the attraction.
  - g. **Distance Type**. Select the distance type (miles, kilometers, blocks) for the distance
  - h. **Driving Time**. Time required to drive to the attraction from the property.

- i. **Price Range.** Enter the lowest to the highest cost this attraction charges.
  - j. **Hours of Operation.** The hours (time frame) this attraction is open.
  - k. **Latitude.** Enter latitude for location of attraction
  - l. **Longitude.** Enter longitude for location of attraction
  - m. **General Directions.** General directions related to finding or navigating to the attraction.
3. Click **Save**.

### Editing Attractions

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Attractions**.
2. Enter search criteria and click **Search**.
3. Select the Attraction, click the vertical ellipsis and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Attractions

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Attractions**.
2. Enter search criteria and click **Search**.
3. Select the Attraction, click the vertical ellipsis and select **Delete**.
4. Click **Delete** and confirm the deletion.

## Configuring Chain

### Prerequisites for Configuring Chain

Chain is provisioned on activation of the Oracle Hospitality OPERA Cloud Service, Property Management Professional Foundation or Oracle Hospitality OPERA Cloud Service, Property Management Enterprise Foundation subscription. You can update the Chain details and activate profile sharing across all [properties](#).

### Editing Chain

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property Management** and select **Chain**.
2. Click **Edit** and update the details
  - a. **Name:** Enter a name for the chain.
  - b. **Description:** Enter a description for the chain.
3. Click **Save**.

## Enable Shared Profiles

### Note:

Your PIN is required to enable profile sharing; the option cannot be disabled once enabled.

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property Management** and select **Chain**.
2.
  - a. Click **Edit**.
    - i. Toggle **Shared Profiles** on to enable sharing of profiles across all properties.
  - b. Click **Save**.
  - c. Enter **PIN** and click **Enable** to enable share profiles.

## Prerequisites for Configuring Chain

### OPERA Cloud Tasks

**Group:** Enterprise Admin

**Tasks:** Chains

- Enable Share Profiles

## Configuring Airports

### Adding Airports

### Note:

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Airport codes are created by selecting the Template tab. Once created, you can copy Airport codes to specific properties using the **Copy** action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Airports**.
2. Click **New** and complete the following
  - a. **Code.** Enter the Airport code.
  - b. **Description.** Enter the Airport name.
  - c. **Website.** Enter Airport website URL
  - d. **Driving Directions.** Enter driving directions from the airport to the property, or geographical direction of the airport from the property.

- e. **Driving Time.** Enter the time needed to drive between the airport and the property.
  - f. **Distance.** Enter the distance of the airport from the hotel property.
  - g. **Distance Type.** Select the distance measurement (e.g., miles, kilometers)
  - h. **Sequence.** Enter a sequence number that determines the position of this airport in listings.
  - i. **Transportation.** Select the transportation carriers/services available at the airport. See [Transportation](#) for details.
3. Click **Save**.

### Editing Airports

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Airports**.
2. Enter search criteria and click **Search**.
3. Select the Airport, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Airports

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Airports**.
2. Enter search criteria and click **Search**.
3. Select the Airport, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** and confirm the deletion.

## Configuring Note Types

Notes are available for documenting various kinds of information that can then be made available at points throughout OPERA Cloud. For example, notes can be added to profiles, to reservations, to events, to business blocks and so on. Notes can be accessed in a variety of ways, but generally you can view and manage notes by selecting the Notes details link from the **I Want to . . .** or presentation page

### Adding Note Types

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Note Types**.
2. Click **New** and complete the following:
  - a. **Notes Group:** Select the note group from list for which this note type belongs.
  - b. **Code:** Enter a code for this note type.

 **Note:**

Note type codes cannot contain ampersands (&). Any note type code containing an ampersand will only display the characters just before/just after the ampersand. For example a note type code of S&C would display only as SC.

- c. **Description:** Enter a description for this note type code.
- d. **Display Seq:** Enter a number that controls the position of the note type in the Note Types in list. If left blank, notes will appear in alphabetical order.
- e. **Internal:** Select check box to designate notes of this note type as internal by default. Internal notes are not output on stationery or on reports (unless the report explicitly allows display of Internal Notes).
- f. **Override Internal:** Select this check box to allow a user to override the internal checkbox when adding a note.

 **Note:**

If **Internal** is selected and **Override Internal** is not selected, a note of this note type will be designated as internal and a user cannot update the designation. If **Internal** is selected and **Override Internal** is also selected, a note of this note type will, by default, be designated as internal, but a user may update the check box to remove the internal designation. If **Override Internal** is selected and **Internal** is not selected, the note of this type will not be designated as internal, but the **Internal** checkbox will be available for the user to update.

- g. **Default Note Type:** Select to specify the current note type as the default. The default note type will display whenever a note of that notes group is created. This applies to AR Account Notes, Business Block Notes, Profile Notes, Event Notes, Contract Notes and Property Notes When the Default Note Type has Default Note Text applied to it (see Default Note Text below), the default note text will also display when the note type is defaulted.
  - h. **Default Note Text:** Select check box to setup a default note text to populate to the comments field when when adding a note.
    - i. Click **New** to add a default note.
      - i. **Global:** Select to setup default note for all properties
      - ii. **Property:** Select to setup default note for a specific property
        - i. **Property:** Select a property from the list
      - iii. **Note Text:** Enter the note text to default to new note.
    - ii. Click **Save**.
    - iii. To edit, click the vertical ellipsis **Actions** menu and select **Edit**.
    - iv. To delete, click the vertical ellipsis **Actions** menu and select **Delete**.
3. Click **Save**.

### Editing Note Types

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Note Types**.
2. Enter search criteria and click **Search**.
3. Select the note type, click the vertical ellipsis **Actions** menu and select **Edit**
4. Update the configuration.
5. **Inactive**: Once a note type has been applied to a note, it cannot be deleted. Use the Inactive check box to remove the note type from use. Inactive notes will not be displayed in OPERA Cloud and will be treated as if they have been deleted. Inactive notes will be purged after 7 days by the purge process.
6. Click **Save**.

### Deleting Note Types

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Note Types**.
2. Enter search criteria and click **Search**.
3. Select the note type, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** and confirm the deletion.

## Configuring Transportation

### Adding Transportation

#### Note:

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Transportation codes are created by selecting the Template tab. Once created, you can copy Transportation to specific properties using the **Copy** action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Transportation**.
2. Click **New** and complete the following
  - a. **Transportation Code**. Enter the transportation code. .
  - b. **Label**. Enter a single-character code to designate this transportation carrier.
  - c. **Description**. Enter a description of the transportation service.
  - d. **Note**. This entry is required in order to make this carrier available in Airport setup. See [Airports](#) for details.
  - e. **Phone**. Enter the phone number for this transportation carrier.
  - f. **Distance**. The distance from the property to the transportation center/ company.

- g. Distance Type.** A distance type (miles, kilometers, blocks) for the transportation
  - h. Price Range.** Enter the lowest to the highest cost this transportation carrier charges for its services.
  - i. Notes.** Enter supplementary annotations or remarks about the transportation carrier that may be helpful to a reservation agent.
  - j. Display Sequence.** Enter the display sequence for items to appear in lists by assigning them a numeric order.
3. Click **Save**.

#### Editing Transportation

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Transportation**.
2. Enter search criteria and click **Search**.
3. Select the transport, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Transportation

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Transportation**.
2. Enter search criteria and click **Search**.
3. Select the transport, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** and confirm the deletion.

## Configuring Service Request Priorities

### [Prerequisites for Configuring Service Request Priorities](#)

#### Adding Service Request Priorities

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Service Request Priorities**.
2. Click **New** and complete the following
  - a. Code.** The Service Request code.
  - b. Description.** The description of the Service Request Priority
    - i. Manage Translation.** Select to open the multi-language descriptions screen and configure a translated menu name for each language
  - c. Sequence.** Enter a display sequence.
3. Click **Save**.

#### Editing Service Request Priorities

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Service Request Priorities**.

2. Enter search criteria and click **Search**.
3. Select the Service Request Priority, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. **Inactive**. When selected the code will become inactive and by will not be displayed in the search list results.
6. Click **Save**.

#### Deleting Service Request Priorities

1. From the **Administration** menu, select **Enterprise**, select **Chain and Property** and select **Service Request Priorities**.
2. Enter search criteria and click **Search**.
3. Select the **Service Type Priority**, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** and confirm the deletion.

## Prerequisites for Configuring Service Request Priorities

#### OPERA Controls

3. Select the Communication Method, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm

## Configuring Delivery Status

### [Prerequisites for Configuring Delivery Status](#)

Delivery status codes are used while displaying the reservation delivery status in the [Reservation Delivery History](#) panel.

Codes 1 - 5 are populated by default and correspond to information returned from OPERA Cloud eXchange Interface; the descriptions can be edited as required.

### Adding Delivery Statuses

1. From the **Administration** menu, select **Enterprise** select **Chain and Property** and select **Delivery Status**.
2. Click **New** and enter the following details:
  - a. **Code:** Enter a code for the delivery status.
  - b. **Description:** Enter the description of the delivery status.
    - i. **Manage Translation:** Click to open the multi-language screen and configure a translated description for each language

- c. **Sequence:** Enter a sequence number that determines the position of this delivery status in lists.
3. Click **Save**.

#### Editing Delivery Statuses

1. From the **Administration** menu, select **Enterprise** select **Chain and Property** and select **Delivery Status**.
2. Enter search criteria, click **Search**.
3. Select a delivery status, click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update configuration.
5. Click **Save**.

#### Deleting Delivery Statuses

1. From the **Administration** menu, select **Enterprise** select **Chain and Property** and select **Delivery Status**.
2. Enter search criteria, click **Search**.
3. Select a delivery status, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Configuring Delivery Status

#### OPERA Cloud Tasks

##### Chain and Property Management

- Delivery Status
  - New/Edit Delivery Status
  - Delete Delivery Status

## Configuring Corporate Information

#### Prerequisites for Configuring Corporate Information

Corporate Information details available to partners via integration with OPERA Cloud; these details do not display within OPERA Cloud.

The configuration options available are

- Hotel Categories
- Brand Codes
- Department Codes
- Business Units
- Divisions
- Operating Units

## Prerequisites for Configuring Corporate Information

### OPERA Cloud Tasks

- Chain and Property Management
- Corporate Information
  - Delete Corporate Information
  - New/Edit Corporate Information

## Configuring Brand Codes

### Adding Brand Codes

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Brand Codes**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the Brand Code.
  - b. **Description**: Enter a description for the Brand Code.
  - c. **Manage Translations**: Click to add translated descriptions for each language.
  - d. **Sequence**: Enter a display sequence.
3. Click **Save**.

### Editing Brand Codes

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Brand Codes**.
2. Enter search criteria and click **Search**.
3. Select the brand code, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. Click **Save**.

### Delete Brand Codes

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Brand Codes**.
2. Enter search criteria and click **Search**.
3. Select the brand code, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Business Units

### Adding Business Units

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Business Units**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the Business Unit.
  - b. **Description**: Enter a description for the Business Unit.
  - c. **Manage Translations**: Click to add translated descriptions for each language.
  - d. **Sequence**: Enter a display sequence.
3. Click **Save**.

### Configuring Business Units

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Business Units**.
2. Enter search criteria and click **Search**.
3. Select the Business Unit, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Business Units

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Business Units**.
2. Enter search criteria and click **Search**.
3. Select the Business Unit, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Department Codes

### Adding Department Codes

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information** and then select **Department Codes**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the Department Code.
  - b. **Description**: Enter a description for the Department Code.
  - c. **Manage Translations**: Click to add translated descriptions for each language.
  - d. **Sequence**: Enter a display sequence.
3. Click **Save**.

### Editing Department Codes

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information** and then select **Department Codes**.
2. Enter search criteria and click **Search**.
3. Select the Department Code, click the vertical ellipsis **Actions** menu and select **Edit**
4. Update details.
5. Click **Save**.

### Deleting Department Codes

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information** and then select **Department Codes**.
2. Enter search criteria and click **Search**.
3. Select the Department Code, click the vertical ellipsis **Actions** menu and select **Delete**
4. Click **Delete** to confirm.

## Configuring Divisions

### Adding Divisions

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Divisions**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the Division.
  - b. **Description**: Enter a description for the Division.
  - c. **Manage Translations**: Click to add translated descriptions for each language.
  - d. **Sequence**: Enter a display sequence.
3. Click **Save**.

### Editing Divisions

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Divisions**.
2. Enter search criteria and click **Search**.
3. Select the Division, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Divisions

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Divisions**.

2. Enter search criteria and click **Search**.
3. Select the Division, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Hotel Categories

### Adding Hotel Categories

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Hotel Categories**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the Hotel Category.
  - b. **Description**: Enter a description for the Hotel Category.
  - c. **Manage Translations**: Click to add translated descriptions for each language.
  - d. **Sequence**: Enter a display sequence.
3. Click **Save**.

### Editing Hotel Categories

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Hotel Categories**.
2. Enter search criteria and click **Search**.
3. Select the Hotel Category, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Hotel Categories

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Hotel Categories**.
2. Enter search criteria and click **Search**.
3. Select the Hotel Category, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Operating Units

### Adding Operating Units

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Operating Units**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the Operating Unit.

- b. Description:** Enter a description for the Operating Unit.
  - c. Manage Translations:** Click to add translated descriptions for each language.
  - d. Sequence:** Enter a display sequence.
3. Click **Save**.

### Editing Operating Units

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Operating Units**.
2. Enter search criteria and click **Search**.
3. Select the Operating Unit, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Operating Units

1. Select the **Administration** menu, select **Enterprise**, select **Corporate Information**, and then select **Operating Units**.
2. Enter search criteria and click **Search**.
3. Select the Operating Unit, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Images

### Prerequisites for Configuring Images

Use Image Management to configure images you'd like to display within various areas of OPERA Cloud, including a property logo image to output on stationery such as the guest registration card, folios and receipts.

You can either upload images from your device or workstation, or reference external images available on your website or content management system.

Using Image Management, you can configure images for the following configuration :

- **Attractions:** Images such as theme parks, historic sites, and so on. [Attractions](#) these to appear in the property brochure.
- **Floor Plan:** Layouts of each floor. You can configure areas for the rooms on these floor plan images. For more information, see [Configuring Floor Plans](#) . Floor plan images are used in Rooms Management and Front Desk. See [Viewing Floor Plans](#) for more information.
- **Function Space:** Function space images that can be viewed from the Function Diary. See [Function Space Management](#) for more information.
- **Item Inventory:** Images of equipment, products, supplies, or services that are sold in reservations or events.
- **Logo:** Images of your property's logo. See [Configuring Property Brochure Master Data](#) for more information. The property logo image also appears on stationery and reports.

- **Maps:** Add a locator or road map and directions to your property for the property brochure maps and directions. See [Configuring Property Brochure Master Data](#) for more information.
- **Nationality:** Images that symbolize different nationalities. See [Managing Nationality Codes](#) for more information.
- **Out Of Order / Service:** Images assigned to Out of Order and Out of Service codes as visual aides. Configure these for Room Management Floor Plan, Out of Order/Out of Service, EZ Task, or Task Companion. See [Configuring Out of Order and Out of Service Reasons](#) for more information.
- **Package:** Images representing packages and package components. Configure these for Reservations and Book Now enhancements. See [Package Codes](#) for more information.
- **Property:** Property images to appear in the property brochure. See [Configuring Property Brochure Master Data](#) for more information.
- **Room:** Images of specific rooms by room number/room name. See [Configuring Room Codes](#) for more information.
- **Room Condition:** Images that indicate room conditions. See [Room Conditions](#) for more information.
- **Room Maintenance:** Images for room maintenance requests. See [Room Maintenance](#) for more information.
- **Room Type:** Images of types, such as king or deluxe. See [Configuring Room Types](#) for more information.
- **Site Plan:** Images of the property layout, buildings, pools, restaurants, and so on. See [Configuring Property Brochure Master Data](#) for more information.
- **Track It Type:** Images that symbolize the different types of Track It items. See [Configuring Track It Types](#) for more information.

### Adding Images

You can upload images in PNG, JPG, JPEG, and GIF file formats. Images larger than 300 KB are automatically scaled and compressed upon upload.

1. From the **Administration** menu, select **Enterprise**, select **Image Management**, then select **Image Type** .
2. Click **New** and complete the following:
  - a. **Code:** Select a code from the list.
  - b. **Sequence:** Enter a sequence.
  - c. **Set Image as Primary:** Select check box to set as the primary image.
  - d. **Website:** Enter website URL.
  - e. **Description:** Enter a description.
  - f. Choose Image Source.
    - i. Image from Device.
      - i. Click **Choose Image** to upload image from your device or workstation.
      - ii. Navigate to the folder, select an image and click **Open**.
    - ii. External Image via URL. Select to reference an external web image.
      - i. **URL:** Enter or paste the image URL

- g. Click **Save**.

### Editing Images

1. From the **Administration** menu, select **Enterprise**, select **Image Management**, then select **Image Type** .
2. Enter search criteria then click **Search**.
3. Select an image in the search result, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details and image.
5. Click **Save**.

### Deleting Images

1. From the **Administration** menu, select **Enterprise**, select **Image Management**, then select **Image Type** .
2. Enter search criteria then click **Search**.
3. Select an image in the search result, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Configuring Images

### OPERA Cloud Tasks

**Group:** Enterprise Admin

**Tasks:** Image Management

- Property
- Memberships
- Attractions
- Packages
- Item Inventory
- Nationality
- Maps
- Site Plans
- Floor Plan
  - New/Edit Floor Plan
  - Delete Floor Plan
- Out Of Order/Service
  - Room
  - Room Type
  - Room Maintenance

- Room Condition
- Function Space
- Track It Type
- Logo

## Configuring Floor Plans

Floor plan configuration enables you to upload floor plan images and then draw areas (for rooms) on the image and link those areas to rooms.

### Adding a Floor Plan

1. From the **Administration** menu, select **Enterprise**, select **Image Management**, and then select **Floor Plan**.
2. Click **New** and complete the following fields:
  - a. **Floor Plan**. Enter a floor number.
  - b. **Description**. Enter a description of the floor plan.
3. Click **Choose Image** and select an image to upload. This can be a PNG, JPG, JPEG, or a GIF file.

 **Note:**

External web images are not supported for floor plans.

4. Click **Save**.

### Editing a Floor Plan

1. From the **Administration** menu, select **Enterprise**, select **Image Management**, and then select **Floor Plan**.
2. Enter search criteria and click **Search**.
3. In the search results, click the vertical ellipsis **Actions** menu for the floor plan and then select **Edit**.
4. Update the configuration
5. Click **Save**.

### Deleting a Floor Plan

1. From the **Administration** menu, select **Enterprise**, select **Image Management**, and then select **Floor Plan**.
2. Enter search criteria and click **Search**.
3. In the search results, click the vertical ellipsis **Actions** menu for the floor plan then select **Delete**
4. Click **Delete** to confirm the deletion.

### Mapping Rooms to an Area Drawn on a Floor Plan

1. From the **Administration** menu, select **Enterprise**, select **Image Management**, and then select **Floor Plan**.
2. Enter search criteria and click **Search**.
3. In the search results, click the **vertical ellipsis** for the floor plan and select **Map Rooms**.
4. In the Controls panel, activate the **Draw** control.
5. To begin drawing regions for each room on the image, click in the image, drag to draw the shape, and click again to finish.
  - a. To draw rectangles or squares, activate the **Rectangle/Square** control in the Controls panel, click the first point / corner of the rectangle or square, and then move your cursor to the opposite corner and click again to complete it.
  - b. To draw circles, activate the **Circle** control in the Controls panel, click where you want to draw the circle, drag to increase the size of the circle, and click again to complete it.
  - c. To draw polygons, activate the **Polygon** control in the Controls panel, click each point of the polygon, and then click the first point (red point) again to complete the shape.
  - d. To copy or paste onto the image, activate the **Copy/Paste** control in the Controls panel, click the shape you want to copy, and then click the area on the image where you want to paste it.
  - e. To move a shape, activate the **Move** control in the Controls panel, click the shape to pick it up, drag it to the new position, and then click again to drop it in place.
  - f. To delete a shape, activate the **Delete** control in the Controls panel and then click the shape you want to delete.
  - g. To cancel a shape, move your cursor outside the drawing area.
6. Click **Clear All** to clear any shapes you have drawn.
7. Click **Edit/Update Selections** to link a selection (room region) from the floor plan to a respective room number.
  - a. Search for and select the required room number for the selected room region.
8. Click **Save** when finished.

## Configuring Property Image for the Property Brochure

You can add an image (PNG, JPG, JPEG, or GIF formats) on the business card; the image selected as the primary image appears in the business card.

### Adding a Property Image

1. From the **Administration** menu, select **Enterprise**, select **Image Management**, and then select **Property**.
2. Select or confirm the **Property** name.
3. Click **New** and enter the following details:

- a. Enter or select the Property name.
  - b. Select Set Image as Primary and provide a description of the image.
  - c. Select either the image or URL path to the image:
    - i. Click **Choose Image** to upload an image from your local computer.
    - ii. Or, enter the **URL** path of a secured website image in the External Image via URL field to display an image from the internet or from an internal content management system.
4. Click **Save**.

#### Editing a Property Image

1. From the **Administration** menu, select **Enterprise**, select **Image Management**, and then select **Property**.
2. Select or confirm the **Property** name and click **Search**.
3. Click the vertical ellipsis **Actions** menu on the image and select **Edit**.
4. Use **Choose an Image Source** to select the image from either your computer or from a secured website image or content management system.
5. Select **Set Image as Primary** checkbox.
6. Click **Save**.

#### Deleting a Property Image

1. From the **Administration** menu, select **Enterprise**, select **Image Management**, and then select **Property**.
2. Select or confirm the **Property** name and click **Search**.
3. Click the vertical ellipsis **Actions** menu on the image and select **Delete**.
4. Click **Delete** to confirm.

## OPERA Controls

OPERA Controls determine the functionality, behavior and defaults for OPERA Cloud. The functions, parameters and settings available are determined by your Cloud Service subscriptions. Various functions are offered complimentary and do not count towards the Oracle Hospitality OPERA Cloud Service, Property Management Professional/Enterprise Foundation or the Oracle Hospitality OPERA Cloud Service, Property Management Standard Edition Add-On function limits.

You can customize the OPERA Cloud functionality and business logic by activating a variety of Functions and Parameters and selecting values for various Settings. The active Functions count towards the function limits for an Oracle Hospitality OPERA Cloud Foundation, Oracle Hospitality OPERA Cloud Service, Property Management Standard Edition Add-On or Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition subscription. Functions indicated with **Complimentary** are included as part of your Cloud Service subscriptions and do not count towards function limits.

## Configuring OPERA Controls

The OPERA Control descriptions indicate when a function is provided complimentary and does not affect your OPERA Cloud subscription.

**Tip:**

Use **View Options** to toggle display of internal control name and indicators.

indicates global controls.

Indicates Hub controls.

1. Select your [location](#).
2. From the **Administration** menu, select **Enterprise**, then select **OPERA Controls**.
3. OPERA Control groups are listed down the left side panel; select a control group to display various OPERA Controls.
4. Select an **OPERA Controls** to update
5. Activate or update the OPERA Control to suit your requirements.

## OPERA Controls — Accounts Receivables

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls Accounts Receivables group.

**Table 11-1 OPERA Controls — Accounts Receivables Functions**

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ACCOUNTS RECEIVABLE</b> [ACCOUNTS_RECEIVABLES]		Activates functionality for management of all debtor accounts and invoices along with the associated collection processes such as generating statements and reminder letters.
<b>FINANCE CHARGES</b> [AR_FINANCE_CHARGES]		Enables the ability to post a calculated percentage or fixed amount charge based on reminder cycle days – typically used for charging late payment fees
	<b>DEFAULT FINANCE CHARGES TRANSACTION CODE SETTING</b> [AR_FINANCE_CHARGES_TRN_CODE]	Identifies the transaction code used when automatically generating finance charges on an accounts receivables account.
<b>FIXED CHARGES</b> [AR_FIXED_CHARGES]		Enables the ability to auto-post a charge to an Accounts Receivables (AR) account based on defined posting cycle – daily, weekly, monthly

Table 11-1 (Cont.) OPERA Controls — Accounts Receivables Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
TRACES [AR_TRACES]		Enables the ability to record an actionable date-driven reminder on an Accounts Receivables (AR) account

Table 11-2 OPERA Controls — Accounts Receivables Parameters

PARAMETER	DESCRIPTION
<b>AUTOMATIC TRANSFER OF DIRECT BILL FOLIOS</b> [AUTO_TRANSFER_AR]	Activates the automatic transfer of direct bill settled folios from front office to their respective accounts receivables during End of Day routine. When inactive all front office folios settled to direct bill must be manually transferred to their AR Accounts via the Transfer Front Office option.
<b>CHARGES TRANSFER</b> [AR_POSTINGS_TRANSFER]	Enables you to transfer individual charges from one invoice to another invoice between different AR accounts. In order to enable, the <b>AR&gt;No Modify</b> application parameter must be inactive and the <b>Cashiering&gt;Folio No Reprint</b> application parameter must be inactive.
<b>CONSOLIDATE CREDIT CARDS</b> [CONSOLIDATE_CC]	Activated the automatic compression and transfer of credit card settlements to their respective AR accounts during the End of Day process. When inactive, all credit card settlements must be manually compressed into an invoice and the invoices manually transferred to their respective AR Accounts.
<b>CREATE INVOICES WITH NEGATIVE AMOUNTS</b> [CREATE_INVOICES_WITH_NEGATIVE_AMOUNTS]	Allow creation of invoices in AR with a total amount less than zero (that is, credit notes).
<b>CREDITS AGING</b> [AGE_CREDIT]	When active, unallocated payments will be included the respective aging buckets calculations. When inactive, unallocated payments always remain in the “Current” age bucket.
<b>DELAY DAYS REPORT</b> [DELAY_DAYS_REPORT]	Ability to create an <b>AR Unpaid Invoices</b> report with delay days defined on the account type.
<b>INVOICE FINALIZE DATE</b> [AR_CLOSE_INVOICE]	Enables functionality to finalize each invoice to prevent any further modifications. The invoice aging can then be based on the finalized date. Refer DATE FOR AGING setting.
<b>MARK INVOICES AS PRINTED</b> [AR_INVOICES_PRINTED_CHECK]	After generating a statement, mark the invoices listed on the statement as printed. This indicator appears in invoice management.
<b>NO MODIFY INVOICE</b> [AR_NOMODIFY_INVOICE]	Prevents an invoice from being modified (adjusted) after it is generated. Any adjustment must be made via a new invoice (that is, credit note). The <b>CREATE INVOICES WITH NEGATIVE AMOUNTS</b> parameter should be activated when this parameter is active.

Table 11-2 (Cont.) OPERA Controls — Accounts Receivables Parameters

PARAMETER	DESCRIPTION
<b>PAYMENT DUE DAYS</b> [PAYMENT_DUE_DAYS]	Ability to define on an Accounts Receivable Account, the number of days after which an invoice should be paid. If the Month End Calculation check box is also selected, the specified number of days will be added to the last day of the month when the invoice was generated, to determine the date the invoice should be paid.
<b>SIMPLE REMINDER</b> [SIMPLE_REMINDER]	<p>When the parameter is active, the Reminder Details screen sorts reminder letters in the order in which they were set up, starting with the first letter configured. This is typically the order in which these letters are generated for reminder letter mailings. There may be more than one letter "queued" to be generated for the account depending on the age of the account balance and which letters have already been generated.</p> <p>When the parameter is inactive, reminder letters are sorted based on the number of days in the reminder cycle, lowest to highest. For this parameter setting, reminder letters are generated depending on the age of the account balance, not on which letters have already been mailed. For example, assuming there are 30, 60, and 90-day cycles, if the account balance is 63 days old when letters are generated, the 60 day letter is sent, regardless of whether the 30 day letter was sent.</p>
<b>STATEMENT NUMBERS</b> [STATEMENT_NUMBERING]	Assigns a number to all AR statements generated, enabling you to search and manage invoices by statement number reference. Note - You must customize an AR statement template, using the sample_statement_numbering template, and reference your custom template in all AR account types as the template to generate.
<b>UNALLOCATED PAYMENTS ON REMINDERS</b> [UNALLOCATED_PAYMENT_ON_REMINDER]	When the parameter is active, any unallocated payments in an AR account will be included on the AR reminder letter generated.

Table 11-3 OPERA Controls — Accounts Receivables Settings

SETTING	DESCRIPTION
<b>AR INVOICE ADJUSTMENT PERIOD</b> ADJUSTMENT_ALLOWANCE	<p>Specifies allowance Period for Adjustments (DWMYU). This parameter is used to determine how long a charge can remain open to adjustment after it was posted in (or transferred to) Accounts Receivable. The possible entries here are:</p> <ul style="list-style-type: none"> <li>• D = within 1 day</li> <li>• W = up to one week</li> <li>• M = up to one month</li> <li>• Y = up to one year</li> <li>• U = unlimited time (the transaction may be adjusted any length of time after its posting).</li> </ul>

**Table 11-3 (Cont.) OPERA Controls — Accounts Receivables Settings**

SETTING	DESCRIPTION
<b>ACCOUNT PICTURE</b> [ACCOUNT_PICTURE]	<p>Defines the account number format mask used when creating new AR accounts.</p> <ul style="list-style-type: none"> <li>• X represents alphanumeric characters.</li> <li>• A represents letters.</li> <li>• 9 represents numbers.</li> <li>• Dash (-) is used to separate values by using double quotation marks "-". A dash cannot be at the end of the account number format.</li> </ul> <p>For example, XA99"-99 permits values such as ZD35-93, 2E76-12, and so on.</p>
<b>AGING LEVEL DETAILS</b> [AGING_LEVEL_DETAILS]	<p>Defines the aging periods for invoices. Set the ending number of days, and OPERA Cloud calculates the next beginning number. For example, if you enter 30 in the first field, aging period one (current) is 0 - 30 days. OPERA Cloud calculates that aging period two begins at day 31 and asks you to supply the end day for that period, such as 60. OPERA Cloud calculates the beginning of aging period three as day 61 and asks for the end of this aging period, and so on. This pattern continues until you have filled out all five fields. The last field calculates automatically as everything over the last number you entered.</p>
<b>CREDIT CARD TRANSACTION CODE</b> [AR_CREDIT_TRX_CODE]	<p>Identifies the transaction code to use when consolidating credit cards settlements as an invoice in AR.</p>
<b>DATE FOR AGING</b> [DATE_FOR_AGING]	<p>Ages invoices based on this date value.</p> <ul style="list-style-type: none"> <li>• ART (AR Transfer from Front Office Date)</li> <li>• INC (Invoice Finalized Date)</li> <li>• COD (Check Out Date)</li> <li>• ING (Invoice Generation Date)</li> </ul>
<b>DEFAULT AR FOLIO STYLE</b> [AR_FOLIO_STYLE]	<p>Identifies the folio style used when printing a folio from accounts receivables.</p>
<b>DEFAULT MARKET CODE</b> [AR_MARKET_CODE]	<p>Identifies the default market code for new postings and new invoices.</p>
<b>DEFAULT ROOM CLASS</b> [AR_ROOM_CLASS]	<p>Identifies the default room class for new postings, new invoices, and payments.</p>
<b>DEFAULT SOURCE CODE</b> [AR_SOURCE_CODE]	<p>Identifies the default source code for new postings and new invoices.</p>
<b>MANDATORY AR ACCOUNT FOR DIRECT BILL PAYMENT TYPE</b> MANDATORY_AR_ACCOUNT_FOR_DIRECT_BILL_PAYMENT_TYPE	<p>Create Reservation or check-in is not possible with Direct Bill payment for a reservation with no AR Account.</p>

**Table 11-3 (Cont.) OPERA Controls — Accounts Receivables Settings**

SETTING	DESCRIPTION
<b>MINIMUM REMINDER DAYS</b> [MINIMUM_REMINDER_DAYS]	Identifies the number of minimum days between sending 2 reminder letters to the same account.
<b>OLD BALANCE TRANSACTION CODE</b> [AR_BAL_TRX_CODE]	Identifies the old balance transaction code.
<b>RESTRICT FOLIO TYPES FOR PARTIAL TRANSFER OF INVOICES</b> [RESTRICT_FOLIO_Types_TRANSFER_INVOICE]	Selected folio types restrict users from changing the invoice amount to be transferred between accounts.
<b>ZERO INVOICE PURGE DAYS</b> ZERO_INVOICE_PURGE_DAYS	Number of days to purge zero balance invoices.

## OPERA Controls — Activity

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls Activity group. You can configure these functions, parameters, and settings only if you have the Oracle Hospitality OPERA Cloud Service, Sales, and Event Management Standard Edition or Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition subscription.

**Table 11-4 OPERA Controls — Activity Parameters**

PARAMETER	DESCRIPTION
<b>ACTIVITY RESULTS</b> [ACTIVITY_RESULTS]	When active, values can be configured that the user can select from as the resolution when an Activity is completed..

**Table 11-5 OPERA Controls — Activity Settings**

SETTING	DESCRIPTION
<b>ACTIVITY PURGE DAYS</b> [ACTIVITY_PURGE_DAYS]	This will be used to decide which records will be purged. Activity records with a Completed Date greater than this many days in the past will be purged. We will also purge non Activity records that were created earlier than this many days in the past. If no value is entered, no records in the activity change log will be purged..
<b>DEFAULT DURATION</b> [DEFAULT_DURATION]	The default activity duration (in minutes).

Table 11-5 (Cont.) OPERA Controls — Activity Settings

SETTING	DESCRIPTION
<b>DEFAULT NUMBER OF DAYS TO KEEP TO DO ACTIVITIES ON ACTIVITY DASHBOARD TILE</b> [DAYS_TO_KEEP_TO_DO_ITEMS_ON_CALENDAR]	Default Number of Days To Do's should be shown on Activity Dashboard Tiles.
<b>DEFAULT START TIME</b> [DEFAULT_STARTTIME]	The default start time (HH24:MI) for activity creation.

## OPERA Controls — Blocks

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Controls Blocks group.

Table 11-6 OPERA Controls — Blocks Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>Complimentary</b> <b>BUSINESS BLOCK</b> [BUSINESS_BLOCK]		Enables the ability to reserve multiple rooms of various room types between a start and end date range. Rooms can be held in non-deduct or deduct status and the inventory held can be washed manually or automatically based on a wash cycle. Individual reservations are then input via rooming list to deduct rooms from the block inventory rather than house inventory.
<b>BLOCK RESTRICTIONS</b> [SET_BLOCK_PICKUP_RESTRICTIONS]		Enables the ability to set restrictions for specific block and specific room types by date.
<b>GROUP ROOMING LIST IMPORT</b> [GROUP_ROOMING_LIST_IMPORT]		Enables the ability to import reservation data from an external file to form basis of rooming list entry for a group block
<b>MASTER SUB ALLOCATIONS</b> [MASTER_SUB_ALLOCATIONS]		Master and Sub allocation for allows for more control over the number of rooms designated for wholesale reservations by allowing for all required inventory to be placed on the Master so that the Sub-Allocation can pull its inventory from the Master. The Master Allocation, in turn pulls the allotted inventory from house availability.

Table 11-6 (Cont.) OPERA Controls — Blocks Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>MASTER SUB BLOCKS</b> [MASTER_SUB_BLOCKS]		Enables a 'roll-up' parent/sub hierarchy for group blocks for single or multiple properties. Updates to master blocks can be automatically synchronized to all sub-blocks.
	<b>SYNCHRONIZE MASTER SUB BLOCKS PARAMETER</b> [SYNCHRONIZE_MASTER_SUB]	Enables the synchronization of data from the master block to the sub block.
<b>OPPORTUNITIES</b> [OPPORTUNITIES]		Allows to quickly capture blocks and events inquiries and to track the business lost and won.
	<b>CONVERT OPPORTUNITY TO BLOCK STATUS</b> [CONVERT_OPP_TO_BLOCK_STATUS]	When converting an Opportunity to block, the new block will be created in the selected status.
	<b>RELEASE OPPORTUNITY STATUS</b> [RELEASE_OPP_STATUS]	When Opportunity is released, it will turn into status set here.
	<b>DEFAULT MARKET CODE FOR OPPORTUNITY</b> [DEFAULT_MARKET_CODE_OPP]	Allows to default the value for the Market Code for Opportunity. Market Code is hidden from Create Opportunity screen, but can be customized if needed.
	<b>DEFAULT SOURCE CODE FOR OPPORTUNITY</b> [DEFAULT_SOURCE_CODE_OPP]	Allows to default the value for the Source Code for Opportunity. Source Code is hidden from Create Opportunity screen, but can be customized if needed.
<b>SALES ALLOWANCE</b> [SALES_ALLOWANCE_ACTIVE]		Activate Sales Allowance Functionality allows you to set an availability ceiling for group rooms on a day-by-day basis, requiring the user to have the Overbook Sales Allowance user task to over book the sales allowance.
<b>SALES MANAGER GOALS</b> [SALES_MANAGER_GOALS]		Enables the ability to setup Sales Manager Goals for Group Rooms & Catering, Transient Rooms, and Activities
<b>TOUR SERIES</b> [TOUR_SERIES]		The tour series functionality allows the setup of reoccurring blocks on a define frequency.

Table 11-6 (Cont.) OPERA Controls — Blocks Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>TRACES</b> [BLOCK_TRACES]		Enables the ability to setup actionable date-driven reminders for specific blocks.

Table 11-7 OPERA Controls — Blocks Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ALIAS</b> [BOOKING_ALIAS]		Enables the entry of alias name that can be used instead of a Block name when searching for a block.
<b>ALLOW RATE EDITING WITH RATE CODE</b> [ALLOW_RATE_EDITING_WITH_RATE_CODE]		Provides the ability to change the rate amounts on a block room grid even when a rate code has been linked to the block.
<b>AMOUNT FORECAST</b> [AMOUNT_FORECAST]		Enables the ability to set up room night and revenue forecast on sales account profiles. Forecast is set up per property and by calendar month or fiscal period according to the Reporting Period OPERA Control.
<b>AUTO ASSIGN SUB BLOCK CODE</b> [AUTO_SUB_BLOCK_CODES]		Automatically generates sub block codes. Enables Periodic Tour Series in addition to custom tour series. When Inactive (N), Periodic Tour Series option is not available in Tour Series functionality.
<b>BLANK BUSINESS BLOCK START DATE</b> [DEFAULT_BLANK_BLOCK_START_DATE]		Sets the start date to blank for new block. If not active the Start Date is defaulted to the current business date.
<b>BLOCK CODE TEMPLATE</b> [BLOCK_CODE_TEMPLATE]		Activates the block code template pattern used for Central Reservation Systems.
	<b>TEMPLATE PATTERN SETTING</b> [BUSINESS_BLOCK_TEMPLATE]	Specifies the block code format to be used when a new block is created. Allows the user to configure the naming convention used in automatically generating block codes for new blocks. MON can be used as a code to insert the first three letters of the current month. Many properties have specific block template requirements for Central Reservation Systems. Note: this pattern must match the BLOCK CODE GENERATION PATTERN.

Table 11-7 (Cont.) OPERA Controls — Blocks Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>BLOCK CONTRACT GRID</b> [BLOCK_CONTRACT]		Shows the contract as a selectable option in the room rate grid. Contract grid is used to track the inventory commitments for a block. The Contact grid does not affect house inventory, it is only used for tracking purposes.
	<b>AUTOLOAD CONTRACT GRID PARAMETER</b> [AUTOLOAD_CONTRACT_GRID]	When active, the Original Grid is auto loaded into Contract grid. User has an option to 'Stop Auto Load Contract' on a block level.
<b>BLOCK OWNER LOCKING</b> [BLOCK_OWNER_LOCKING]		Once activated, user can select from what block status forward a block owners field will be uneditable.
	<b>BLOCK OWNER LOCKING STATUS SETTING</b> [BLOCK_OWNER_LOCKING_STATUS]	Specifies the status at which the Owner field becomes locked within the block status flow.
<b>BLOCK RANKING</b> [RANKING]		<b>Premium</b> Enables a Ranking field on blocks. The Ranking list field can be used to indicate the rank (or priority) of a block. This field will be editable on for blocks having a status configured as INQUIRY or NON DEDUCT. Ranking is displayed on the Group Rooms Control screen, Function Diary, and the Business Block Short List reports.
<b>BLOCK RATE CODE NO OVERLAP</b> [BLOCK_RATECODE_NO_OVERLAP]		Disables blocks with overlapping dates from having the same rate code.
<b>BUSINESS BLOCK TYPE</b> [BUSINESS_BLOCK_TYPE]		This feature allows users to attach a "category of business" designation to each booking. For example, they can identify the booking as a wedding, a tour, a conference, a meeting, a convention, and so on. This information can be used later for reporting purposes.

Table 11-7 (Cont.) OPERA Controls — Blocks Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CATERING ONLY BLOCK</b> [CATERING_ONLY]		<p>Controls the functionality of the Catering Only check box in the following manner:</p> <ul style="list-style-type: none"> <li>If the parameter is set to Y and the check box is checked on a block, the Room Details section on the Block Details is hidden. In addition, Room &amp; Rate Grid is not available for this block. User will not be able to allocate inventory for 'Catering Only' block. However, block reservations are allowed for this type of blocks. 'Catering Only' check box is also used in reports.</li> <li>If the parameter is set to N and the check box is checked on a block, no changes applied to the block and the check box is ONLY used for reports.</li> </ul>
<b>CONVERSION</b> [CONVERSION]		Enables Conversion field to be available on business blocks. Block conversion gives sales managers a way to assign a likelihood of conversion to blocks.
<b>COPY WITH DATE OPTION</b> [COPY_WITH_DATE_OPTION]		Copies blocks with the option to select a date range from the source block.
<b>CUTOFF</b> [CUTOFF]		Do you want OPERA Cloud to automatically release non-picked up block rooms back to the house on a given date or do you wish to manual manage the release of allocations? Allotted rooms for a group that are not picked up by a certain date or number of days prior to the group's arrival can be released back to house inventory for pickup by other group or individual reservations. To release all unused allotments at one time, the cutoff function is used. Rooms can be cut off for an individual block or for all blocks at one time. If the cutoff functionality is not activated, then OPERA Cloud will internally see the cutoff values for each of the days of the block as the actual block date and as such internally the rooms will be cutoff on the night that they were due to be used. This function does not affect the manual Cutoff button. A block can still be cutoff manually through the Cutoff button.
<b>ELASTIC BLOCK</b> [ELASTIC_BLOCK]		Activates the elastic block functionality that gives ability to book group reservations outside of the block dates, or for room types not included in the block.

Table 11-7 (Cont.) OPERA Controls — Blocks Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>Complimentary</b>	
	<b>SELL LIMITS</b> [SELL_LIMITS]	This function provides the ability to define a set number of rooms per room type that can be borrowed from house availability once the total rooms within the block have been picked up. Once the maximum number of rooms in the limit is reached, the user must have the appropriate permissions to continue pick up of reservation above the sell limit. Sell limits are not deducted from inventory and are based on house availability.
	<b>SHOULDER DATES</b> [SHOULDER_DATES]	If the block is marked as Elastic or Sell Limits in the Inventory Control section of the Block Details, shoulder dates can be added to the block prior to the start date and/or following the end date of the block. These dates are marked with red corner on the Rooms Grid. These 2 fields can be used to define a shoulder period start date and shoulder period end date. The start shoulder period will run from the Shoulder Start date until the start date of the block. The shoulder end period will run from the end date of the block to the Shoulder End date.
	<b>MAXIMUM SHOULDER DAYS</b> [MAX_SHOULDER_DAYS]	Some guests may arrive earlier or depart later than the start or end date for a block. This parameter controls the maximum number of days that the start or end date can exceed the group's dates.
<b>INCLUDE INQUIRY IN NONDEDUCT INVENTORY CALCULATIONS</b> [INCLUDE_INQUIRY_IN_NONDEDUCT]		Include Inquiry figures in the non-deduct total calculation in the Group Rooms Control and Function Diary screens.
<b>ENFORCE BLOCK CODE PATTERN LENGTH</b> [ENFORCE_BLOCKCODE_TEMPLATE_LENGTH]		Enforces the maximum length based on the block code pattern for manual entry when the block code template is not defined. This control is only visible when the control for Block Code Template is not active.

Table 11-7 (Cont.) OPERA Controls — Blocks Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>LOWEST GUARANTEED RATE</b> [RATE_PROTECT]		<p><b>Premium</b></p> <p>Enabled a Rate Protect checkbox on blocks. This is an indicator that no other groups should be booked using rates lower than those assigned to the block that is flagged as rate protect. The rate protect flag can be applied to all or selected dates of the flagged block. (OPERA Cloud does not enforce this restriction.) An indicator is displayed on the Group Rooms Control screen for any date that has a rate protect booking.</p>
<b>MULTI BLOCK RATES</b> [MULTI_BLOCK_RATES]		<p>When the parameter is active, users can select the Rate Codes for the block from a multi-select Rate Code LOV on the Create Block and Block Details screen. The multiple selected rates display on the Rooming List Pickup screen. If the parameter is not active, the Rate Code LOV only provides a single rate code selection.</p>
	<b>MAXIMUM BLOCK RATES</b> [MAXIMUM_BLOCK_RATES]	<p>If multiple rate codes are selected for a block, the Rate Code field will display a total count of them as a special indicator. If you select more than one rate code, one rate code must be selected as the primary rate code. The primary rate you select will be displayed in Rate Code field and carried over to the Room Grid. If the Elastic check box is selected, or if the Inventory Control value is Elastic or Sell Limits, you may select rate codes to apply to Allotments, Begin and End Shoulder periods, as applicable.</p>
<b>NAME VALIDATION IN ROOMING LIST</b> NAME_VALIDATION_ROOMING_LIST		<p>When enabled, first and last name entries in Group rooming list will require a minimum number of alpha-numeric characters. Last name requires 2 characters and first name requires 1 character. When disabled name field entries will not be validated</p>

Table 11-7 (Cont.) OPERA Controls — Blocks Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>NON_COMPETE</b> [NON_COMPETE]		<b>Premium</b> Makes Non-Compete flag available on business blocks. The Non Compete flag on a block can be used to indicate that no competing accounts (accounts having the designated NC Industry code) should be booked at the same time as this block. The non compete flag may be applied to all or selected dates of the flagged block. (OPERA Cloud does not enforce this restriction.) An indicator is displayed on the Group Rooms Control screen and Function Diary for any date that has a non compete booking.
<b>OCCUPANCY SPLIT PER ROOM TYPE</b> [USE_OCCUPANCY_FOR_ROOMBLOCK]		Determines whether rates for blocks can be split by occupancy or not. When the parameter is Y, room grids will be built based on room type and occupancy. The number of rooms for each occupancy level must be entered separately. This will result in a more accurate forecasting of the number of persons arriving with a group as well as the total revenue if rooms are priced differently based on the number of people in the room. When the parameter is set to N, room grids are built using only the total number of rooms of each room type and forecasted revenues are based on single occupancy of all rooms.
<b>QUICK ROOM GRID</b>		<b>Premium</b> When activated, you can select Room Type, Number of Rooms and Rate Amount to be populated into the grid upon saving the block.
<b>RATE CODE MANDATORY BLOCK HEADER</b> [MANDATORY_RATE_CODE_BLOCKS]		Determines whether or not a rate code is a mandatory field for blocks. If rate code is not mandatory, blocks can be made without a rate code.
<b>RETURN BLOCK TO HOUSE</b> [BLK_TO_HOUSE]		After a block has been cutoff, this parameter can either return the unused rooms ( cancelled block reservations or no shows from a block) to house availability or maintain them for the group. If this is not active, the rooms for cancelled reservations will always be returned to the block first, even after the cutoff date. However, the next night audit will cut the rooms off again.

Table 11-7 (Cont.) OPERA Controls — Blocks Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ROOM TRANSACTION CODE ON BLOCK</b> [ROOM_TRX_CODE_ON_BLOCK]		When active, the field Room Revenue Transaction Code is available on the block, Room Details section of the Block Details screen. It identifies the Transaction Code to be used when posting the room charge for reservations linked to the block. If the code entered is a valid Lodging Transaction Code, that Transaction Code is used when posting Room Revenue for Reservations linked to the current block. If the Transaction Code is not valid, or the field is left blank, then the Transaction Code linked to the Rate Code will be used. Or, if no Rate Code is attached to the Block, the Default Transaction Code will be used.
<b>SHIFT DATE</b> [SHIFT_DATE]		Enables the ability to move a block to a new arrival and departure dates when a block grid already exists. If there are any reservations (beside PM reservations) attached to the block, you will not be able to shift dates for the booking.
<b>UNIQUE BLOCK CODE</b> [UNIQUE_BLOCKCODE]		This parameter controls whether or not each block must have a unique block code. If the control is set to "N", the same block code can be used for several blocks. In the user interface, this will change certain features such as selecting a block code on a reservation, as the user will in the case of duplicate codes need to select the block they want to use based on and assuming that a different block name has been entered. Internally, OPERA Cloud stores the block ID so it know exactly which block the reservation is associated to for the purposes of availability, statistics, etc.
<b>USE SINGLE BLOCK STATUS FOR ROOMS AND CATERING</b> [USE_SINGLE_BLOCK_STATUS]		This parameter is only available when OPERA Cloud Controls Catering Events is active. It controls the visibility of the Block Catering Status the Block. When this parameter is active, the Catering Status is hidden. Instead, the rooms, catering, and event statuses are controlled by the Block Status. When this parameter is set to N, the Catering Status and Room Status are visible on a block.
<b>WASH SCHEDULE</b> [WASH_SCHEDULE]		Enables you to configure the wash schedule.

Table 11-8 OPERA Controls — Blocks Settings

SETTING	DESCRIPTION
<b>BLOCK CODE GENERATION PATTERN</b> [DEFAULT_BLOCK_CODE_TEMPLATE]	<p>Defines the block code pattern to auto generate the block code. Allows the user to configure the naming convention used in automatically generating block codes for new blocks. If BLOCK CODE TEMPLATE is active, the BLOCK CODE GENERATION PATTERN must match the TEMPLATE PATTERN SETTING.</p> <p>Valid values:</p> <ul style="list-style-type: none"> <li>• 'Y', 'YY', 'YYYY' for year</li> <li>• 'M', 'MM', for month number</li> <li>• 'MON' for the month name</li> <li>• 'D', 'DD' for the day number</li> <li>• '?' to define the increment position</li> <li>• 'A' for any alpha</li> </ul>
<b>BLOCK CODE VALIDATION RULE</b> [BLOCK_CODE_VALIDATION_RULE]	<p>Controls the validation of when a specific block code can be reused. Note: this setting is only available when the Unique Block Code parameter is inactive.</p> <p>Valid values:</p> <ul style="list-style-type: none"> <li>• NON_OVERLAPPING_DATES</li> <li>• START_OF_INVENTORY_WEEK</li> </ul> <p>For example, if the parameter value is set to 90 and the block is 91 nights, the block room nights and revenue will not be calculated when you access the Block presentation until you select the Calculate link.</p>
<b>CALCULATE BLOCK STATISTICS</b> [CALCULATE_BLOCK_STATISTICS]	<p>To improve performance, specify a nights value determining when Room and Revenue totals are not automatically calculated in the Block Overview panel. Blocks with nights exceeding this setting display a Calculate action for the totals to be calculated and displayed on-demand.</p>
<b>CATERING STATUS WHEN COPYING AN EVENT</b> [COPY_CATERING_STATUS]	<p>Identifies the catering status when copying an event.</p> <p>Valid values:</p> <ul style="list-style-type: none"> <li>• All status codes where the catering deduct inventory = N and starting status = Y.</li> </ul>
<b>COPY BOOKING NOTES</b> [COPY_BOOKING_NOTES]	<p>Copies booking notes by default.</p> <p>Valid values:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
<b>COPY BOOKING STATUS</b> [COPY_BOOKING_STATUS]	<p>Identifies the booking status while copying a booking.</p> <p>Valid values:</p> <ul style="list-style-type: none"> <li>• All status codes where the starting status = Y.</li> </ul>
<b>DEFAULT CATERING STATUS</b> [DEFAULT_BLOCK_CATERING_STATUS]	<p>This is the default catering status assigned to a block when new blocks are created. Valid values: All status codes where the catering deduct inventory = N and starting status = Y.</p>
<b>DEFAULT NEW BLOCK STATUS</b> [DEFAULT_NEW_BLOCK_STATUS]	<p>Identifies the default block status for new blocks.</p> <p>Valid values:</p> <ul style="list-style-type: none"> <li>• All status codes where the starting status = Y.</li> </ul>

Table 11-8 (Cont.) OPERA Controls — Blocks Settings

SETTING	DESCRIPTION
<b>MAXIMUM BLOCK AVAILABLE DAYS</b> [MAXIMUM_BLOCK_AVAILABLE_DAYS]	Defines the maximum number of days from the current business date, for which a block can be created.
<b>MAXIMUM BLOCK ADVANCED BOOKING DAYS</b> [MAX_BLOCK_ADV_BOOKING_DAYS]	Defines how far into the future from the current business date a group block can be created.
<b>MAXIMUM NUMBER OF NIGHTS FOR BLOCK RESERVATION</b> [MAXIMUM_NIGHTS_FOR_BLOCK_RESERVATIONS]	Defines the maximum number of nights a block reservation can be booked.
<b>MAXIMUM NUMBER OF BLOCK DAYS</b> [MAX_BLOCK_DAYS]	Defines the maximum number of nights allowed for a block.
<b>PROFILE PROMPT FOR BLOCKS</b> [PROMPT_PROFILE_BLOCKS]	This control determines if the user will be prompted to associate a profile to a block if one has not been attached. The control can be set to N (None), P (Prompt) or R (Require a profile for all blocks).
<b>REPORTING PERIOD</b> [REPORTING_PERIOD]	Default the reports to Calendar or Fiscal definitions.
<b>ROOMING LIST RESERVATION METHODS</b> [RESV_METHOD_TYPE]	Identifies the reservation methods that enable entry of the rooming list due date. Valid values: • All booking methods.
<b>REPORTING PERIOD</b> [REPORTING_PERIOD]	Default the reports to Calendar or Fiscal periods.
<b>TURN BOOKING INTO ACTUAL UPON</b> [TURN_BOOKING_INTENT_TO_ACTUAL_UPON]	Turns a booking into status ACTUAL upon booking arrival / booking departure. Valid values: • ARRIVAL (bookings turn to ACTUAL on the booking arrival date) • DEPARTURE (bookings turn to ACTUAL on the booking departure date) • NOTUSED (bookings do not turn to ACTUAL) When Not Used is selected, the booking will NOT be automatically updated to ACTUAL status, users will have to change the booking status manually.

## OPERA Controls — Cashiering

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls Cashiering group.

Table 11-9 OPERA Controls — Cashiering Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ADVANCED GENERATES</b> [ADVANCED_GENERATES]		Stops posting generates after specified days, adjustment of generates after a certain number of days.
<b>ARTICLES</b> [ARTICLES]		Articles allows the posting of individual items linked back to a single transaction code – mini bar items for example. Each article has a default price so users do not need to recall amount to post.
<b>AUTO SETTLEMENT RULES</b> [AUTO_FOLIO_SETTLEMENT]		This functions allows for folios to be automatically settled every X number of days during the end of day routine or manually settled via the batch folio option. Useful for extended-stay properties with guests who require their balance to be settled every X days for expense claiming purposes.
	<b>AUTO SETTLEMENT TO BE PERFORMED DURING END OF DAY</b> [AUTO_FOLIO_SETTLEMENT_EOD]	Activate to perform Auto Folio Settlement during the End of Day process. Enables or disables automatic settlement for end of day activities.
	<b>TRANSFER CHARGES TO WINDOW 8</b> [AUTO_FOLIO_MOVE_TO_WIN]	Activates the transferring of settled charges to billing window 8.
	<b>END OF DAY AUTO FOLIO SETTLEMENT TYPES</b> [AUTO_FOLIO_SETTLEMENT_TYPE]	Select Auto Folio Settlement Types to be settled automatically during the End of Day routine
	<b>BILLING WINDOWS TO PROCESS DURING END OF DAY</b> [AUTO_FOLIO_SETTLEMENT_WIN]	Select windows (1-8) that would be selected by default for Auto Settlement during the End of Day process.
	<b>DEFAULT AUTO SETTLEMENT ON RESERVATION</b> [AUTO_FOLIO_DEF_RS_V]	Specifies whether or not auto settlement is the default setting for reservations during creation. Enables or disables Auto Folio Settlement as the default value for reservation creation.

Table 11-9 (Cont.) OPERA Controls — Cashiering Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>AUTO FOLIO SETTLEMENT PREFERENCE</b> [AUTO FOLIO SETTLEMENT PREFERENCE]	Specifies the order of operations: to settle the charges and then transfer the folio, or transfer the charges and then settle the folio. Valid values: <ul style="list-style-type: none"> <li>• Transfer and Settle — The charges on the selected billing windows are first transferred to window 8 and then settled to the payment method on window 8. If none of the billing windows are selected for transfer, then OPERA Cloud settles those billing windows that are associated with the selected Payment Types. The check box for Window 1 is checked by default.</li> <li>• Settle and Transfer — The charges on the selected billing windows are first settled based on the selected Payment Types and then transferred to window 8 if any of the windows are selected for transfer; if none of the billing windows are settled, then transfer of unsettled charges does not occur either.</li> </ul>
	<b>DEFAULT FOLIO STYLE</b> [AUTO_FOLIO_DEF_ST YLE]	Enables you to select the default folio style to use when printing the settled folios.
	<b>PAYMENT METHODS</b> [AUTO_FOLIO_PAY_TYP E]	Enables you to select the payment methods that qualify for automatic settlement. Cash and check are not eligible payment methods for automatic settlement. Valid values: <ul style="list-style-type: none"> <li>• AX (American Express)</li> <li>• MC (Master Card)</li> <li>• VA (Visa)</li> <li>• DB (Direct Bill)</li> </ul>
	<b>SETTLE EVERY X DAYS SINCE LAST AUTO SETTLEMENT DAYS</b> [AUTO_FOLIO_SETTLE_ DAYS]	Enables you to configure the number of days to automatically settle the folio since the last automatic settlement was completed.

Table 11-9 (Cont.) OPERA Controls — Cashiering Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>BATCH POSTING</b> [BATCH_POSTING]		Enables the ability to post same transaction to selectable, multiple rooms in single batch transaction; the amount posted can be per room or per person.
<b>BUDGET FORECAST</b> [BUDGETS]		Activates the Budget Forecast functionality
<b>CANCELLATION HANDLING</b> [CANCELLATION_HANDLING]		Enabled the ability to define cancellation rules and scheduled for rates and enforce deposit retention when applicable.
	<b>CANCEL WITH DEPOSIT</b> [CANCEL_WITH_DEPOSIT]	Allow Reservations with Deposits to be Cancelled
<b>CREDIT BILL</b> [CREDIT_BILL]		Enables you to generate credit bills for folios.
	<b>CREDIT BILLS CAN ONLY BE CREATED FROM FOLIO HISTORY</b> [ALLOW_CREDIT_BILL_ONLY_FROM_FOLIO_HISTORY]	Credit Bills can only be created from Folio History.
	<b>ALLOW CREDIT BILL FOR CREDIT BILL FOLIOS</b> [CB_ALLOW_ON_CREDIT_FOLIOS]	Credit Bills can be created for Credit Bill Folios.
	<b>CHECK ALLOW CREDIT FLAG ON FOLIO TYPES</b> [CB_ALLOW_CREDIT_FLAG]	The Allow Credit Flag on the Folio Type will be checked to determine if a Credit Bill can be generated for that Folio Type (Country Specific functionality).
	<b>CHECK ALREADY GENERATED</b> [CB_ALREADY_GENERATED_CHECK]	Do not allow Credit Bill on a Folio for which a Credit Bill was already generated for a Folio.
	<b>CHECK FOR CREDIT BILL FOLIO ON SETTLEMENT</b> [CB_CHECK_ON_SETTLEMENT]	Check for Credit Bill Folio on Settlement for windows with negative revenue amount.

Table 11-9 (Cont.) OPERA Controls — Cashiering Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>DO NOT CHECK ON DB AMOUNT</b> [CB_DO_NOT_CHECK_ON_DB]	Credit bills can be made for folios with DB amounts.
	<b>DO NOT CHECK ON ORIGINAL FOLIO AMOUNT</b> [CB_DO_NOT_CHECK_ON_GROSS]	Check will not be done on the gross amount of the original folio.
	<b>NO CREDIT BILL ON CONVERSION FOLIO TYPES</b> [CB_CHECK_CONVERT_FLAG]	Credit Bill cannot be created for Conversion Folio Types (Country Specific functionality).
	<b>RESTRICT TRANSACTION CODES AND AMOUNTS</b> [CB_RESTRICT_TRX_CODES_AND_AMOUNTS]	Credit bill can have transactions and the amounts which were posted on the original folio.
	<b>MAX CREDIT DAYS BASED ON PROFILE TYPE</b> [CB_CHECK_ON_PROFILE_TYPE_MAX_CREDIT_DAYS]	The number of maximum credit days to be used for credit bills will be based on the profile type (Individuals or Others).
	<b>CREDIT BILL REASONS</b> [CREDIT_BILL_REASONS]	When active, the user will be prompted to select a reason when generating a Credit Bill.
	<b>SAME DAY CREDIT BILLS</b> [CB_ALLOW_SAMEDAY_CREDIT]	Credit bills can be created on folios on the same date the folio was generated.
	<b>MAXIMUM CREDIT DAYS</b> [MAX_CREDIT_DAYS]	Defines the period in which a credit bill can be issued.
	<b>MAXIMUM CREDIT DAYS FOR INDIVIDUALS</b> [MAX_CREDIT_DAYS_INDIVIDUALS]	Period Definition in which a Credit Bill can be issued for Individual Guests
	<b>MAXIMUM CREDIT DAYS FOR NON-INDIVIDUALS</b> [MAX_CREDIT_DAYS_OTHERS]	Period Definition in which a Credit Bill can be issued for Others(Non-Individual) Guests.

Table 11-9 (Cont.) OPERA Controls — Cashiering Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>DEPOSIT HANDLING</b> [DEPOSIT_HANDLING]		Activate the Deposit and Cancellation Rules/Schedule Functionality.
	<b>ADVANCED DEPOSIT MATURITY AND ALLOCATION</b> [ADVANCED_DEPOSIT_MATURITY_AND_ALLOCATION]	Applies the deposit maturity preference on the selected rate code to reservations. In addition, this gives more flexibility for managing deposits when modifications are done to reservations that impact deposits.
	<b>USE FOLIO NUMBER FOR DEPOSIT RECEIPT</b> [DEPOSIT_FOLNO]	Prints a folio number on the deposit receipt. If On, the next available folio number is assigned to each deposit receipt generated. If Off, a unique sequential number is assigned to each deposit receipt generated.
	<b>DEPOSIT REFUND RECEIPT</b> [DEPOSIT_REFUND_RECEIPT]	Enables a Reverse (refund) action within Reservation Dep/CXL and generates a Deposit Refund Receipt.
	<b>ADVANCED TAX HANDLING FOR DEPOSITS</b> [ADVANCED_TAX_HANDLING_FOR_DEPOSITS]	Enables you to set transaction codes exclusively for deposit postings.
	<b>ADVANCED DEPOSIT HANDLING SETTING</b> [EXT_DEPOSIT_HANDLING]	Specifies the advanced deposit handling setting. For more information, see <a href="#">About Reservation Advanced Deposit Handling</a>
	<b>DEFAULT RESERVATION TYPE FOR DEPOSIT PAYMENTS</b> [DEPOSIT_RESERVATION_TYPE]	Specifies the default reservation type for deposit payments setting.
	<b>DEPOSIT LEDGER TRANSACTION CODE</b> [DEPOSIT_LED_TRX_CODE]	Specifies the internal transaction code used to transfer deposit balances from the deposit ledger to the guest ledger at the time of check in.
	<b>DEPOSIT LEDGER TAX TRANSACTION CODE</b> [DEPOSIT_LED_TAX_TRANSACTION_CODE]	Specifies the tax transaction code used to transfer deposit tax amounts from the deposit ledger to the guest ledger at the time of deposit creation.
	<b>PSEUDO ROOM TO KEEP DEPOSITS</b> [PSEUDO_ROOM_TO_KEEP_DEPOSITS]	Specifies the pseudo room where all deposits forfeited by guests are transferred.

Table 11-9 (Cont.) OPERA Controls — Cashiering Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>PSEUDO ROOM TO RETURN DEPOSITS</b> [PSEUDO_ROOM_TO_RETURN_DEPOSITS]	Specifies the pseudo room where all deposits to be refunded are transferred.
	<b>DEPOSIT MATURITY PREFERENCE</b> [DEPOSIT_MATURITY_PREFERENCE]	Sets the preference for when deposits are transferred to the reservation folio.
<b>EARLY DEPARTURE PENALTY</b> [EARLY_DEPARTURE_PENALTY]		Enforces the posting of an early departure penalty if a guest reduces nights to less than min length of stay for the rate code.
	<b>CALCULATION RULE FOR THE EARLY DEPARTURE PENALTY AMOUNT</b> [CALCULATION_OF_EARLY_DEPARTURE_AMOUNT]	Specifies the calculation rule for the early departure penalty amount.
	<b>EARLY DEPARTURE PENALTY FUNCTIONALITY TRANSACTION CODE</b> [EARLY_DEPARTURE_PENALTY_TRANSACTION_CODE]	Specifies the early departure penalty functionality transaction code.
<b>FIXED CHARGES</b> [FIXED_CHARGES]		Enables recurring charges to be automatically posted to guest account during the end of day routine or whenever an advanced bill is generated. The Fixed Charges feature also offers a convenient way to automatically post a fixed charge once, on a specific date of the guest's stay.
<b>FOLIO ARRANGEMENTS</b> [FOLIO_ARRANGEMENTS]		Folio arrangements are a way in which to group similar transactions together and print the folio using this 'cosmetic' summarized style. For example: transaction codes for breakfast food and breakfast beverage can be linked to an arrangement code for Breakfast Charge. When the guest folio is printed in arrangement code style the individual postings for food and beverage are consolidated and printed as a single line item "Breakfast Charge".

Table 11-9 (Cont.) OPERA Controls — Cashiering Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>FOREIGN CURRENCY CODES</b> [FOREIGN_CURRENCY_ HANDLING]		Enables handling foreign currency payments, performing currency exchanges, configuring foreign currencies, and using the currency calculator.
	<b>EXCHANGE SERVICE TAX</b> [INDIA_EXCHANGE_SE RVICE_TAX]	Activates the Service Tax functionality for currency exchange.
	<b>CURRENCY EXCHANGE TAXABLE TRANSACTION CODE</b> [CURRENCY_EXCHANG E_TAX]	Transaction code to post taxable value determined based on the calculated local amount during Foreign Currency Exchange
	<b>SERVICE TAX BASED ON TRANSACTION CODE GENERATES</b> [SERVICE_TAX_BASED_ ON_TRX_GENERATES]	Service tax calculated based on Transaction Code Generates attached to the Transaction Code defined in the 'Currency Exchange Taxable Transaction Code' setting. When active, the option to set up a Base Amount for the calculation will be available. The folio and receipt will be generated for currency exchanges.
	<b>CURRENCY EXCHANGE TAXABLE OFFSET TRANSACTION CODE</b> [CURRENCY_EXCHANG E_TAX_OFFSET]	Transaction code to post offset of taxable value determined based on the calculated local amount during Foreign Currency Exchange
	<b>FOREIGN CURRENCY LIMITS</b> [FOREIGN_CURRENCY_ LIMITS]	Ability to configure Per Transaction Limits, Daily Limits and Monthly Limits for foreign and local currency transactions. When active in order to post a currency exchange or cash transaction, an Individual Profile is required with Nationality and any documentation selected in the Cashiering Setting for Mandatory Documents for Foreign Currency Limits.
	<b>SELL CURRENCY</b> [SELL_FOREIGN_CURR ENCY]	Enables selling foreign currency.
	<b>CURRENCY EXCHANGE PAID OUT TRANSACTION CODE</b> [CURRENCY_EXG_PAID OUT]	Specifies the transaction code to record a currency exchange paid out.

Table 11-9 (Cont.) OPERA Controls — Cashiering Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>REFERENCE CURRENCY CODE</b> [SUMMARY_CURRENCY_CODE]	Specifies the currency code used when printing folios.
	<b>DAILY CURRENCY EXCHANGE LIMIT AMOUNT</b> [DAILY_CURRENCY_EXCHANGE_LIMIT_AMOUNT]	Allowing the user to set a daily limit amount, for example 250. If left blank, no limit is set and the currency exchange functionality will behave as previously existing. If a daily limit amount is set, then a currency exchange can only be performed for an in house reservation.
	<b>DAILY CURRENCY EXCHANGE LIMIT CODE</b> [DAILY_CURRENCY_EXCHANGE_LIMIT_CODE]	Allowing the user to select a currency code. If left blank, local currency is assumed.
<b>FOLIO QR CODE</b> [FOLIO_QR_CODE]		When a folio is generated, OPERA Cloud generates a QR Code comprising of multiple details. Some details vary according to region of the property.
<b>NO SHOW AND CANCELLATION POSTINGS</b> [NOSHOW_AND_CANCELLATION_POSTINGS]		This functionality enables a property to post revenue or deposit refund against a no-show or cancelled reservation in order to recognize the revenue and clear the deposit from deposit ledger. The reservation remains in no-show status for historical and statistical purposes. When the billing screen is accessed for a canceled or no show reservation with a deposit balance a prompt asks the users if they would like to post the deposit amount to the folio.
	<b>POST REVENUE TO NO SHOWS</b> [POST_REVENUE_TO_NO_SHOWS]	Posts No Show charges to reservations based on No Show Posting rules and matures the deposit during the End of Day process.
	<b>NO SHOW POSTING TRANSACTION CODE</b> [NOSHOW_POSTING_TRANSACTION_CODE]	Specifies which transaction code to use during the End of Day no show posting process.
<b>PERIOD DEFINITION</b> [FISCAL_PERIOD_REPORTING]		Allows a property to setup fiscal periods and years, and have key reports give information based on Fiscal and/or Calendar periods.

Table 11-9 (Cont.) OPERA Controls — Cashiering Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>POST STAY CHARGES</b> [POST_STAY_CHARGES]		Allows sales charges to be posted to reservation with specific payment methods after departure of the reservation.
	<b>DEFAULT POST STAY CHARGES ON RESERVATION</b> [POST_STAY_CHG_RSV]	Selects the check box for Post Stay Charging on the reservation Payment Instructions screen by default and reservations are enabled for posting charges after check out regardless of the payment type associated with the reservation.
	<b>OPEN FOLIO</b> [OPEN_FOLIO]	Activates the Open Folio functionality.
	<b>OPEN FOLIO CLOSING PREFERENCES</b> [OPEN_FOLIO_CLOSING_LIMIT]	Determines when an open folio needs to be closed. Valid values: <ul style="list-style-type: none"> <li>SAMEDAY — The user cannot leave the billing screen with an open folio.</li> <li>UNRESTRICTED — The user is allowed to leave the billing screen with a folio in an open status.</li> </ul>
	<b>RESERVATION PAYMENT TYPES</b> [POST_RSV_PAYMENT_TYPE]	Defines the payment types that can be associated to a reservation to enable post stay charging.
	<b>ZERO BALANCE OPEN FOLIO CLOSE DAYS</b> [ZERO_BALANCE_OPEN_FOLIO_CLOSE_DAYS]	Specifies the number of days after checkout that an open folio with a zero balance will be automatically closed during end of day.
<b>PRE STAY CHARGES</b> [PRE_STAY_CHARGES]		Allows sales charges to be posted to reservation with specific payment methods prior to check in of a reservation.
	<b>DEFAULT PRE STAY CHARGES ON RESERVATION</b> [PRE_STAY_CHRG_RSV]	Enables the Pre Stay Charging option by default on the guests Privileges screen.
	<b>ONLY POST IF RESERVATION IS ON QUEUE</b> [POST_RSV_QUEUE]	Specifies that the reservation will be available for pre-stay charges only if the reservation is on queue and waiting to be checked in.
	<b>DAYS PRIOR TO ARRIVAL</b> [DAYS_PRIOR_TO_ARRIVAL]	Limits the number of days before the guests arrival that charges can be posted to their account.

Table 11-9 (Cont.) OPERA Controls — Cashiering Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>RESERVATION PAYMENT TYPES</b> [PRE_RSV_PAYMENT_TYPE]	Defines the payment types that can be associated to a reservation to enable pre stay charging.
	<b>RESERVATION TYPES</b> [RSV_TYPE]	Defines the reservation types that can be associated to a reservation to enable pre stay charging.
<b>ROUTING</b> [ROUTING]		Activate Routing Functionality.
	<b>REFRESH ROOM ROUTING</b> [REFRESH ROOM ROUTING]	Enables transferring the transactions using the Refresh Room Routing screen whenever a room routing instruction is created, edited or deleted, so that the latest room routing instructions are applied to the existing charges.
	<b>ALLOW ROUTING OF TAX TRANSACTIONS</b> [TAXROUTING_YN]	Enables the selection of tax transaction codes when setting room routing or window routing.
	<b>EXCLUDE DEPOSIT FROM AUTHORIZATION BASED ON ROUTING PARAMETER</b> [EXCLUDE_DEPOSIT_FROM_AUTH_BASED_ON_ROUTING]	Excludes deposits paid from the authorization amount when the deposit ledger transaction code is either routed to a window where the payee in the routing instructions is not the same as the guest, or it is routed to another reservation.
	<b>EXCLUDE RATE FROM AUTHORIZATION BASED ON ROUTING</b> [EXCLUDE_RATE_FROM_AUTH_BASED_ON_ROUTING]	Excludes the rate from authorization if the source payee name in the routing instruction is not the same as the target, and the transaction code for the accommodation exists in the routing instruction code. Also when the Oracle Hospitality OPERA Comp Accounting Cloud Service subscription is active and the comp routing is being set up to an authorizer with the Accommodation Transaction code for window 101-108, the rate is excluded from the authorization amount.
<b>ROUTING LIMITS</b> [ROUTING_LIMITS]		Routing Limits imposes a limit on the total value of a transaction that can be routed to a sub-account; the overage remaining in the default account.

Table 11-9 (Cont.) OPERA Controls — Cashiering Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>SCHEDULED CHECK OUT</b> [SCHEDULED_CHECKOUT]		This feature allows for automatic checkout of reservations at a specified time. Only reservations with a zero balance can be scheduled for check out. The reservation status remains due out and be will automatically updated to checked out at the specified time, provided the account balance remains at zero.
	<b>ROOM STATUS FOR SCHEDULED CHECK OUTS</b> [SCHEDULED_CHECKOUT_ROOM_STATUS]	Specifies the status of the room after a scheduled check out.
	<b>Complimentary</b>	
<b>SERVICE TYPES</b> [SERVICE_TYPES]		Associate a service type value with Revenue and Wrapper type transaction codes.
<b>TRANSACTION CODE BY USER ROLE</b> [TRANSACTION_USER_GROUPS]		Enables the ability to link transaction codes to users roles; limiting the types of charges users of specific role can post.
<b>TRANSACTION DIVERSIONS</b> [TRANSACTION_DIVERSIONS]		This feature enables the automatic diversion (routing) of charges for specific transaction codes to a specified pseudo room, based on a membership type and level or VIP code.

Table 11-10 OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ACCOUNTS RECEIVABLES SETTLEMENTS VISIBLE ON FOLIO</b> [SHOW_AR_SETTLEMENT]		Prints the account receivables settlement payment on the folio.
<b>ADDITIONAL FOLIO TEXT</b> [ADDITIONAL_FOLIO_TEXT]		Shows additional fields on the folio when entered on a guest reservation.
<b>ALLOW NEGATIVE POSTINGS (Charges)</b> [ALLOW_NEGATIVE_POSTINGS] (Charges)		Allows the posting of negative sales charges (revenue and non-revenue) to Reservation Accounts (Billing).

Table 11-10 (Cont.) OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ALLOW CREDIT BILL ONLY FROM FOLIO HISTORY</b> ALLOW_CREDIT_BILL_ONLY_FROM_FOLIO_HISTORY		When active credit bills can only be created from Folio History
<b>APPEND PREFIX FOR FOLIO NUMBER</b> [APPEND_PREFIX_FOR_FOLIO_NUMBER]		A static numeric or alphanumeric prefix value of 4 characters can be associated with each bill number assigned in OPERA Cloud. This 4 character prefix is unique per property.
<b>ALLOW DUPLICATE ACCOUNT NUMBERS</b> [ALLOW_DUPLICATE_ACCOUNT_NUMBERS]		Enables using the same accounts receivable account number on multiple accounts.
<b>ALLOW DEFERRED TAXES</b> ALLOW_DEFERRED_TAXES		Defers the calculating of VAT tax amounts until the time of reservation check out and folio generation.
Allow Positive Postings for Credit Bills ALLOW_POSITIVE_POSTINGS_FOR_CREDIT_BILLS		Allow positive amount revenue and non-revenue charges to be posted when generating a Credit Bill.
<b>AUTOMATICALLY ASSIGN ACCOUNT NUMBER</b> [AUTOMATIC_ASSIGN_ACCOUNT_NUMBER]		Assigns an accounts receivable account number automatically while creating a new account.
	<b>DEFINE ACCOUNT SEQUENCE</b>	Uses the account sequence defined by the Start Account Number and End Account Number setting.
	<b>START ACCOUNT NUMBER</b>	Specifies the start account number automatically assigned.
	<b>END ACCOUNT NUMBER</b>	Specifies the end account number automatically assigned.
<b>AUTOMATICALLY CHECK OUT ZERO BALANCE SHARED RESERVATIONS</b> [AUTO_OPEN_SHARE_WITH]		On check out of a shared reservation, automatically checks out share reservations with a zero balance.

Table 11-10 (Cont.) OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>AUTOMATICALLY TRANSFER GENERATES WITH MAIN TRANSACTION</b> [TRANSFER_GENERATE_D_TRX]		Transfers any generates attached to a transaction code automatically if the main or parent transaction code is transferred or routed.
<b>AUTO GENERATE CREDIT BILL FOR DEPOSIT UPON CHECK IN</b> AUTO_GENERATE_CREDIT_BILL_FOR_DEPOSIT_UPON_CHECK_IN		If a reservation has a deposit folio, upon check-in, an automatic credit bill is generated, and the payment is posted to the guest account using the payment transaction code as defined in the setting.
<b>BLIND CASHIER DROP</b> [BLIND_CASH_DROP_YN]		Activates the Blind Drop Cashier Closure functionality, which hides all cash transactions from reports and cashier closure.
	<b>ENTER SHIFT DROP AMOUNTS</b> [ENTER_SHIFT_DROP_AMOUNTS]	Determines if the user must enter the Actual Shift drop amounts during cashier shift closure.
<b>CALCULATE CHANGE DUE</b> [CALCULATE_CHANGE_DUE]		Activates the Change Due functionality when performing a settlement with cash payment method. The payment screen shows an additional field for Amount Received and a prompt shows for change due if the cash amount received is greater than the amount due.
<b>CREDIT CARD REBATE VALIDATION</b> [CREDIT_CARD_REBATE_VALIDATION]		Enables making a rebate by credit card and verifies that the rebate amount does not exceed the previously charged amount to the credit card.
<b>CREDIT CARD TRANSACTION SURCHARGE</b> [CC_SURCHARGE]		Enables posting a surcharge amount for a credit card transaction.
	<b>DEFAULT SURCHARGE TRANSACTION CODE</b> [DEFAULT_CC_SURCHARGE_TRX_CODE]	Default Transaction Code to use for Posting the Surcharge Amount.

Table 11-10 (Cont.) OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CUSTOM CHARGES</b> [CUSTOM_CHARGES]		Custom Charges functionality allows you to configure a charge (ie Tax) to be posted during the End of Day Posting Room & Tax procedure and other scenarios where the room & tax charges are posted. Custom Charge posts per person, per night. In addition, you can configure exemptions to the Custom Charge, which can be setup on reservations for the entire stay or for specific dates of the stay.
	<b>CUSTOM CHARGES TRANSACTION CODE</b> CUSTOM_CHARGES_TRANSACTION_CODE	Transaction Code to be used when posting Custom Charges.
<b>CUSTOM NUMBERS</b> CUSTOM_NUMBERS		Ability to configure formulas to define the generation and printing of Custom Numbers in folios for tracking of invoices.
	<b>CUSTOM NUMBERS IN AR ACCOUNT INVOICES</b> [CUSTOM_NUMBERS_IN_AR]	Enables filtering of invoices based on a Custom Number in Manage Account Invoices within Accounts Receivables
<b>DAILY PLANS</b> [FOLIO_PLANS]		Configures daily plan arrangements.
<b>DEBIT BILL</b> SUPPLEMENTAL_FOLIO		Ability to generate Debit Bill/ Supplemental Folio for existing Folios. Used when additional charges are required to be posted and linked to the original folio.
<b>DELAYED FISCAL RESPONSE</b> [DELAYED FISCAL RESPONSE]		
<b>DO NOT ROUTE EXCLUSIVE TAX TO COMP WINDOW</b> [DO NOT ROUTE EXCLUSIVE TAX TO COMP WINDOW]		Exclusive generates will remain on the guest window when the main posting is moved to a comp window. Available when the Automatically Transfer Generates with Main Transaction OPERA Control is active.
<b>EFOLIO EXPORT</b> [EFOLIO_EXPORT]		Activate Efolio Export Functionality.
	<b>PAYMENT METHODS</b> [PAYMENT_METHODS]	Specify the Payment Types for which Efolio Export should be initiated.

Table 11-10 (Cont.) OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>DELIVERY METHODS</b> [DELIVERY_METHODS ]	Specify the Delivery Methods for which eFolio Export should be initiated: <ol style="list-style-type: none"> <li><b>Electronic:</b> Sent automatically to the recipients bank.</li> <li><b>Email:</b> Sent as an email to the recipient.</li> <li><b>Printing:</b> Printed and sent by regular postal mail to the recipient.</li> </ol>
<b>EXCLUSIVE CASHIER ID</b> [EXCLUSIVE_CASHIER_ID]		Cashiers are exclusively assigned to a single user.
<b>FISCAL FOLIO PRINTING</b> [FISCAL_FOLIO_PRINTING]		Fiscal Folio Printing Functionality.
	<b>ASSOCIATED FOLIO DETAILS REQUIRED FOR A CREDIT BILL</b> [ASSOCIATED_FOLIO_DETAILS_REQUIRED]	As Before generating a Credit Bill, information regarding the original bill for which the Credit Bill is being created is required. This will be sent to the Fiscal System.
	<b>POSTING BUSINESS EVENTS FOR FISCAL</b> [BILLING AND AR BUSINESS EVENTS]	Generate business events for Postings on billing windows 1 to 8 for Fiscal.
	<b>PRINT FISCAL INFORMATION FOLIO</b> [PRINT_FISCAL_INFO_FOLIO]	Prints a fiscal folio when generating an information folio.
	<b>PRINT FISCAL RESPONSE ON FOLIO</b> [PRINT_FISCAL_RESPONSE_ON_FOLIO]	When active fiscal responses will display at the bottom of the folio.
	<b>RESEND FISCAL FOLIO</b> [RESEND_FISCAL_FOLIO]	Re-sends the fiscal folio to the fiscal service for past generated folios.
	<b>FISCAL SERVICE TERMINALS</b> [FISCAL_SERVICE_TERMINALS]	Enables the Fiscal Executable on different terminals, and enables the user to select the terminal at the time of folio generation.

Table 11-10 (Cont.) OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>OFFLINE FOLIO</b> [OFFLINE_FOLIO]	When active the ability to generate a Folio in Folio History is available when the Fiscal Service is Offline and the Payment Method is not Direct Bill.
	<b>FISCAL EXECUTABLE</b> [FISCAL_EXECUTABLE ]	Specifies the Fiscal Executable path and defines the location of the executable.
	<b>FISCAL PARTNER</b> [FISCAL_PARTNER]	Generates Business Events and partner specific payloads based on the selected setting value.
	<b>USE FISCAL SERVICE INVOICE CURRENCY</b> [INVOICING_CURRENC IES]	Enables a fiscal invoice currency to be selected prior to calling the fiscal system.

Table 11-10 (Cont.) OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>FIX BILL RESERVATION</b> [FIX_BILL_RESERVATIO N]		<p>Fixed Bill Number per Guest per Stay.</p> <p>When a folio number is generated, use the same number for each subsequent checkout/interim bill/advanced bill generated for the reservation regardless of the window. This bill number can be used to pull up all folio window totals in history. The folio that is settled to the Accounts Receivable account, when viewing from an Accounts Receivable account, shows the details for the respective transactions belonging to the invoice number that they were applied to.</p> <p>When the <b>Use Accounts Receivables Folio for Direct Bill Settlements</b> parameter is On and you are settling a Billing window that already has transactions settled to Direct Bill and has a bill number assigned, new charges without a bill number settled to a payment method other than Direct Bill use the Accounts Receivable Folio layout defined in Account Receivable Folios Report Group. This is because the folio already includes the direct bill transaction from the earlier settlement.</p> <p>If any one of the following parameters are set to <b>On</b>, the other parameters must be set to <b>Off</b>: <b>Fix Bill Reservation, Fix Bill Window, Folio No Reprint, and Folio Revision Number</b>. Therefore, only one of these parameters can be set to <b>On</b> at any given time. In addition, all in-house guests must be checked out before one of these parameters can be set to <b>On</b>.</p>

Table 11-10 (Cont.) OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>FIX BILL WINDOW</b> [FIX_BILL_WINDOW]		<p>Fixed Bill Number per Folio Window per Guest per Stay.</p> <p>When a folio number is generated use a separate bill number for each window. Each window is located in history using a separate bill number. When the <b>Cashiering —Permanent Folio Storage</b> parameter is On, the last folio created for the Window for that day will be stored. When <b>Fix Bill Window</b> parameter is On and <b>Generate Zero Bill</b> is Off, if a payment transaction from a settled window 1 is moved to another window (for example, window 2) and the reservation is checked out again by making a payment against window 1, the folio correctly prints if the Print Folio check box is selected on the Payment screen.</p> <p>When the <b>Use Accounts Receivables Folio for Direct Bill Settlements</b> parameter is On and you are settling a Billing window that already has transactions settled to Direct Bill and has a bill number assigned, new charges without a bill number settled to a payment method other than Direct Bill use the Accounts Receivable Folio layout defined in Account Receivable Folios Report Group. This is because the folio already includes the direct bill transaction from the earlier settlement.</p> <p>If any one of the following parameters are set to <b>On</b>, the other parameters must be set to <b>Off</b>: <b>Fix Bill Reservation</b>, <b>Fix Bill Window</b>, <b>Folio No Reprint</b>, and <b>Folio Revision Number</b>. Therefore, only one of these parameters can be set to <b>On</b> at any given time. In addition, all in-house guests must be checked out before one of these parameters can be set to <b>On</b>.</p>

Table 11-10 (Cont.) OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>FOLIO NO REPRINT</b> [FOLIO_NOREPRINT]		<p>Do not allow Reprint, Split, Transfer, Adjustments, or Corrections for postings with Bill Numbers.</p> <p>When printing a bill, those postings that have been previously printed (have a bill number) will not show on the folio. Charges that have been invoiced cannot be altered unless you first void the folio. When Voiding a Folio, the invoice is cancelled and the user can then make the necessary changes and re-issue the folio. If you void a Direct Bill invoice, the Accounts Receivable charge will also be removed. You cannot void an invoice that has already been transferred to Accounts Receivable. You cannot drag and drop transactions if the parameter is On and a folio has already been printed.</p> <p>If any one of the following parameters are set to <b>On</b>, the other parameters must be set to <b>Off</b>: <b>Fix Bill Reservation</b>, <b>Fix Bill Window</b>, <b>Folio No Reprint</b>, and <b>Folio Revision Number</b>. Therefore, only one of these parameters can be set to <b>On</b> at any given time. In addition, all in-house guests must be checked out before one of these parameters can be set to <b>On</b>.</p>
<b>FOLIO QR CODE</b> [FOLIO_QR_CODE]		<p>When a folio is generated, OPERA Cloud generates a QR Code that is comprised of multiple details. Some of these details are different based on the region of the property.</p>
<b>FOLIO REVISION NUMBER</b> [FOLIO_REVISION_NUMBER]		<p>Enables correcting a folio with a revision number attached.</p>
<b>FOLIO STYLES</b> [FOLIO_STYLES]		<p>Uses folio style options to select a folio style when printing folios.</p>
<b>FOLIO TYPE UNIQUE ID</b> [FOLIO_TYPE_UNIQUE_CODE]		<p>Ability to configure a numeric or alphanumeric value in the field for Unique ID on each Folio Type in the property.</p>

Table 11-10 (Cont.) OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>FORCE CASHIER LOGIN</b> [FORCE_CASHIER_LOGI N]		Prompts users with the cashier login screen every time cashiering functions are accessed.
<b>GENERATE PROFORMA INVOICE</b> [PROFORMA_INVOICE]		Creates Pro Forma invoices for reservations.
<b>GENERATE TAX REGISTRATION NUMBER</b> [GENERATE_TAX_REGIS TRATION_NO]		A registration number will be assigned to each arrival reservation during the End of Day procedure and displayed in the Tax Registration Number field in Reservation Stay Details. A registration number will not be assigned to Pseudo Room reservations.
<b>GENERATE ZERO BILL</b> [GENERATE_ZERO_BILL]		Enables printing an invoice that has a zero balance.
<b>MANDATORY REFERENCE NEGATIVE PAYMENTS</b> [MANDATORY_REF_NEG ATIVE_PAYMENTS]		Makes the Reference field on the Cashiering, Deposit and Accounts Receivable Payment screens mandatory when posting a negative payment using a payment method of any type.
<b>NEGATIVE CASH SHIFT DROP</b> [NEGATIVE_CASH_SHIF T_DROP]		Enables cashiers to enter a negative cash shift drop when performing their shift cashier closure.

Table 11-10 (Cont.) OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>PACKAGE ALLOWANCE CONSUMPTION WHEN NOPOST OR POST STAY FLAG</b> [CONSUME ALLOWANCE WHEN NOPOST OR POST STAY FLAG]		Activates package allowance consumption for in-house reservations overriding No Post flag up to the allowance balance only when consumption posting via an interface, overage will not be generated. In case of manual postings against allowance, overage will be generated. Package Allowance consumption for Checked out Reservations on the day of departure until End of Day if Post Stay Privilege assigned. If No Post is checked then consumption posting only up to the Allowance balance will be accepted from an interface, Overage will not be generated however in case of manual postings against allowance overage will be generated. If No Post is not checked then after allowance consumption, Overage will be generated as applicable for interface as well as manual postings.
<b>PACKAGE ALLOWANCE LINKING</b> [PACKAGE_ALLOWANCE_LINKING]		Enables linking package allowances with other rooms.
<b>PACKAGE ARRANGEMENT CODES</b> [PACKAGE_ARRANGEMENT_CODES]		Ability to configure package arrangement folio grouping codes and select a package arrangement in packages; which will change folio styles 1,9,14,15,16,18 to print by package arrangement codes.
<b>PERIODIC FOLIOS</b> [PERIODIC_FOLIOS]		Enables generating folios on a periodic basis (weekly, monthly, etc.).
<b>PERMANENT FOLIO STORAGE</b> [PERMANENT_FOLIO_STORAGE]		Enables a property to store printed folios to be viewed/printed without re-generation.

Table 11-10 (Cont.) OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>PERMANENT FOLIO STORAGE FILE NAME FORMAT</b>	Specifies the file name for the permanent folio storage. The values can be concatenated to each other to form a format string. Possible values are: <BILL_NO> <BILL_GENERATION_DAY> <BILL_GENERATION_MONTH> <BILL_GENERATION_YEAR> <FOLIO_VIEW> <FOLIO_TYPE> - Use this only when FISCAL_FOLIO_PRINTING or CREDIT BILL parameter on. <REVISION_NO> - Use this only when FOLIO FOLIO_REVISION_NUMBER parameter on. <QUEUE_NAME> - Use this only when PRINT_QUEUE_HANDLING ,FISCAL_FOLIO_PRINTING and FISCAL_XML_PAYMENTS parameter on.
<b>PORTUGAL SAFT PAYMENT TYPES</b> [PORTUGAL_SAFT_PAYMENT_TYPES]		Once active, the Export Mapping Types would get populated with the Payment Codes, which can further be mapped to their respective payment transaction codes for the Portugal SAF-T export.
<b>POSITIVE CASHIER DROP</b> [POSITIVE_CASHIER_DROP]		Enables cashiers to be closed with a negative shift drop.
		<div data-bbox="1166 1291 1347 1564" style="border: 1px solid #0070C0; padding: 5px;">  <b>Note:</b> Do not allow cashier to be closed with a negative shift drop. </div>
	<b>POST IT</b> [POSTIT_09]	Activates the Post It functionality, which enables users to access Charge It and Fast Postings.
	<b>RESTRICT NEGATIVE SALE IN CHARGE IT</b> [PASSERBY_MARKET_CODE]	Disallows completing a sale with a negative balance in Charge It.

Complimentary

Table 11-10 (Cont.) OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>DEFAULT MARKET CODE FOR POST IT</b> [PASSERBY_SOURCE_CODE]	Specifies the default market code when using the Post It screen.
	<b>DEFAULT SOURCE CODE FOR POST IT</b>	Specifies the default source code when using the Post It screen.
<b>PROMPT FOR EXPENSE FOLIO UPON CHECK OUT</b> [EXPFOLIO_SHOW_CHECKOUT]		Prompts to print an expense folio during check out.
<b>RESTRICT FOLIOS WITH DEPOSIT FOR FULL CREDIT BILL</b> [RESTRICT_FOLIOS_WITH_DEPOSIT_FOR_FULL_CREDIT_BILL]		When activated the user can only credit individual transactions if the folio for which a credit bill is going to be generated includes a deposit folio.
<b>ROLLUP TRANSACTIONS</b> [ROLLUP_YN]		Shows transactions that were made on the same day with the same check number as rolled on the Manage Billing screen. Selecting the expand arrow shows postings as separate line items.
<b>ROUNDING FACTOR</b> [ROUNDING_FACTOR]		Activates the Currency Rounding functionality for properties in countries that require monetary amounts to be rounded by a legal standard factor because certain coin denominations are discontinued.
	<b>ROUNDING MULTIPLE</b> [ROUNDING_MULTIPLE]	Determines the rounding multiple used. Rounding options are provided for rounding to the nearest multiple of the selected rounding multiple.
	<b>ROUNDING MULTIPLE CODE</b> [ROUNDING_MULTIPLE_CODE]	Determines the rounding multiple transaction code used for posting a rounding difference.
<b>SERVICE RECOVERY ADJUSTMENT</b> [SERVICE_RECOVERY_ADJUSTMENT]		Enables posting a service recovery adjustment.
<b>SHIFT DROP LOCATION AND BAG NUMBERS</b> [SHIFT_DROP_LOCATION_AND_BAG_NUMBERS]		Ability to associate shift drop location and bag number for Cash and Others payment types during cashier shift closure.

Table 11-10 (Cont.) OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>TAX BRACKET CALCULATION</b> [TAX_BRACKET_CALCULATION]		Enables calculation of discretionary taxes based on tax brackets when the property is in US country mode.
<b>TAX TYPES</b> [TAX_TYPES]		Activates the tax type functionality to calculate and post tax generates based on tax type calculation rules. <a href="#">Configuring Generates</a>
	<b>DEFAULT TAX TYPE</b> [DFLT_NAME_TAX_TYPE]	Defines the default tax type for new reservations or new profiles; according to the Tax Type Calculation setting.
	<b>TAX TYPE CALCULATION</b> [TAX_TYPE_CALCULATION]	Calculate tax generates, per tax type, based on the tax type value selected in the: <ul style="list-style-type: none"> <li>• Profile</li> <li>• Reservation</li> </ul>
<b>TRANSACTION CODE OWNERSHIP</b> [CORPORATE_PROTECTION]		Enables flagging a transaction code as owned by Central or Property and controls the ability to edit based on this flag.
<b>TRANSACTION STATUS</b> [TRANSACTION_STATUS]		Enables adding an approval status to transactions in the posting journal and makes additional approval codes and status columns available in the posting journal.
<b>USE ACCOUNTS RECEIVABLES FOLIO FOR DIRECT BILL SETTLEMENTS</b> [AR_SETTLEMENT_PRINT_TASK]		Specifies direct bill folios to use the accounts receivables folio layout defined in the Account Receivable Folios Report group.
<b>VAT OFFSET</b> [VAT_OFFSET]		Post an offsetting payment transaction equivalent to the total VAT for the folio being settled
	<b>VAT OFFSET PAYMENT TYPE</b>	
	<b>VAT OFFSET TRANSFER AT C/I</b>	
<b>VOID FOLIO</b> [VOID_BILL]		VOIDS guest folios.
	<b>DO NOT NULLIFY THE VOID FOLIO'S INFORMATION</b> [DO_NOT_NULLIFY_VOID_BILL]	Retains the folio's information when voiding the folio.

Table 11-10 (Cont.) OPERA Controls — Cashiering Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>CREDIT BILL FOR VOID</b> [CREDIT_BILL_FOR_VO ID]	When active, a Credit Bill is sent via the fiscal service before voiding the folio.
	<b>SEND FISCAL FOLIO PRIOR TO VOIDING</b> [FISCAL_FOLIO_PRIOR _TO_VOIDING]	When active, a Void Folio is sent via the fiscal service before voiding the folio.
	<b>FOLIO NUMBER PREFIX VALUE</b>	A static numeric or alphanumeric prefix value of 4 characters that will be associated with each bill number. This value must be between 0001 to 9999 if it is entered as numeric.
	<b>FOLIO NUMBER PREFIX VALUE VALIDATION</b>	Select the type of value that can be entered in the Folio Number Prefix Value application setting.

Table 11-11 OPERA Controls — Cashiering Settings

SETTING	DESCRIPTION
<b>ADDRESS CHECK FOR FOLIO GENERATION</b> [ADDRESS_CHECK_FOR_ FOLIO_GENERATION]	List of mandatory payee address elements that will be validated at the time of folio generation.
<b>ADDRESS CHECK PAYMENT METHODS</b> [ADDRESS_CHECK_PAYM ENT_METHODS]	In conjunction with the Setting 'Address Check For Folio Generation', this setting allows the user to select the payment methods that would require the address check validation prior to folio generation.
<b>BANK CODE</b> [BANK_CODE]	The identification code of the financial institution associated with the property. For example: SWIFT Code
<b>BANK ID CODE</b> [BANK_ID_CODE]	The identification code/number of the account held by the property with the financial institution. For example: IBAN Number
<b>BANK ID TYPE</b> [BANK_ID_TYPE]	The type of designation used to identify an account with a financial institution. For example: IBAN
<b>BANK NAME</b> [BANK_NAME]	The name of the financial institution associated with the property.
<b>CASH SHIFT DROP</b> [CASH_SHIFT_DROP]	Specifies the transaction code used to record a shift cash drop.
<b>CASH TRANSACTION CODE</b> [CASH_TRXCODE]	Specifies the cash exchange transaction code.

Table 11-11 (Cont.) OPERA Controls — Cashiering Settings

SETTING	DESCRIPTION
<b>CHECK SHIFT DROP</b> [CHECK_SHIFT_DROP]	Specifies the transaction code used to record a shift check drop.
<b>CHECK TRANSACTION CODE</b> [CHECK_TRXCODE]	Specifies the check transaction code.
<b>DECIMAL CALCULATION</b> [DECIMAL_CALCULATION]	Specifies the number of decimals to maintain in the database for the calculated amount such as net amount, etc., pertaining to inclusive taxes/generates.
<b>DELIVERY METHODS</b> [DELIVER_METHODS]	Specify the Delivery Methods for which eFolio Export should be initiated. <ul style="list-style-type: none"> <li>• <b>Electronic:</b> Sent automatically to the recipients bank.</li> <li>• <b>Email:</b> Sent as an email to the recipient.</li> <li>• <b>Printing:</b> Printed and sent by regular postal mail to the recipient.</li> </ul>
<b>DEFAULT DEPOSIT TAX ROOM</b> DEFAULT_DEPOSIT_TAX_ROOM	Room Number to which Deposit Tax Postings will be sent.
<b>DIRECT BILL SETTLEMENT CODE</b> [AR_SETTLE_CODE]	Specifies the Transaction Code used for folios settled to Accounts Receivables
<b>EXCLUDE FOLIO STYLES</b> [CONCEALED_FOLIO_STYLES]	Specifies that a folio cannot be generated using the folio styles selected. The Folio Styles screen will exclude these folio style options. These will also not be available for selection as default Accounts Receivables or Cashiering Folio Styles.
<b>FISCAL COMMANDS</b> [FISCAL_COMMANDS]	Send fiscal commands via the generic fiscal payload
<b>FISCAL PARTNER</b> [FISCAL_PARTNER]	Generates Business Events and partner specific payloads based on the selected setting value.

Table 11-11 (Cont.) OPERA Controls — Cashiering Settings

SETTING	DESCRIPTION
<b>FOLIO COPY LEGEND</b> [FOLIO_COPY_LEGEND]	When generating multiple copies of folios during settlement or checkout in Billing, the associated legend (e.g., Original, First Copy of Invoice, etc.) will generate on the folio . When set to Watermark, the watermark folio copy legend is available only for <b>Folios, AR Folios, Post It / Passerby Folios</b> report groups.
	<div style="border: 1px solid #0070C0; padding: 10px; background-color: #E6F2FF;"> <p> <b>Note:</b></p> <p>Activating this setting will increase folio generation time per copy to the folio generation process.</p> </div>
	<p>Values are:</p> <ul style="list-style-type: none"> <li>• FOLIO_COPY_NO (No folio copy indicator)</li> <li>• FOLIO_COPY_YES (Original merge code folio indicator)</li> <li>• FOLIO_COPY_WATERMARK (Watermark folio copy indicator)</li> </ul>
<b>FONT SIZE OF FOLIO LEGEND TEXT</b> [FOLIO_COPY_LEGEND_FONT_SIZE]	Specifies the font size of the folio legend text on folios.
<b>HORIZONTAL POSITION OF FOLIO LEGEND TEXT</b> [FOLIO_COPY_LEGEND_XPOS]	Specifies the number of pixels from the left corner of the page to put the folio legend text on folios.
<b>VERTICAL POSITION OF FOLIO LEGEND TEXT</b> [FOLIO_COPY_LEGEND_YPOS]	Specifies the number of pixels from the bottom of the page to put the folio legend text on folios.
<b>FOLIO STYLE</b> [FOLIO_STYLE]	Specifies the folio style used when printing a folio.
<b>FOLIO TYPE METHOD</b> [FOLIO_TYPE_METHOD]	Method used for Folio Type Setup.
<b>PAYMENT METHODS</b> [PAYMENT_METHODS]	Specifies the Payment Types for which eFolio Export should be initiated.
<b>PAYMENT TRANSACTION CODE FOR AUTO GENERATE CREDIT BILL</b> PAYMENT_TRANSACTION_CODE_FOR_AUTO_GENERATE_CREDIT_BILL	Payment transaction code used for auto generate credit bill and deposit posting upon check-in.

**Table 11-11 (Cont.) OPERA Controls — Cashiering Settings**

SETTING	DESCRIPTION
<b>PREPAID CARD PURCHASE TRANSACTION CODE</b> [STORED_VALUE_PURCHASE_TRN]	Non-revenue sales charge transaction code used to post a charge for the purchase of prepaid card to reservation account. Enabled when a Stored Value System Interface (SVS) integration service is active
<b>PRINT CASHIER CLOSURE REPORTS</b> [O9_CASHIER_CLOSURE_REPORTS]	Activates the Automatically Print Cashier Closure Reports functionality, which stores the printer selected for closure reports and uses it without displaying the report configuration screen.
<b>PRINT DEPOSIT REQUEST RECEIPTS</b> [O9_PRINT_DEPOSIT_REQUEST_RECEIPT]	Activates the Automatically Print Deposit Request Receipts functionality.
<b>PRINT FOLIO</b> [O9_PRINT_FOLIO]	Activates the Automatically Print Folio functionality, which stores the printer selected for folios and uses it without displaying the report configuration screen.
<b>PRINT PAYMENT RECEIPTS</b> [O9_PRINT_PAYMENT_RECEIPT]	Activates the Automatically Print Payment Receipts functionality, which stores the printer selected for receipts and uses it without displaying the report configuration screen.
<b>REPORTS TAX BUCKETS</b> [REPORTS_TAX_BUCKETS]	Enables identification of 10 tax buckets, which will be included on all reports that display a breakdown of up to 10 net and tax amounts.
<b>REASON FOR AUTO GENERATE CREDIT BILL</b> REASON_FOR_AUTO_GENERATE_CREDIT_BILL	Update the reason for Auto Credit Bill Generation against the Deposit folio during the Check in process.

## OPERA Controls — Channel Management

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls Channel Management group.

**Table 11-12 OPERA Controls — Channel Management Functions**

FUNCTION	DESCRIPTION
<b>Complimentary</b> <b>CHANNEL RESTRICTIONS</b> [CHANNEL_RESTRICTIONS]	Chain level global function that enables setting rate and room restrictions on the channel level.

Table 11-12 (Cont.) OPERA Controls — Channel Management Functions

FUNCTION	DESCRIPTION
<div style="background-color: #4CAF50; color: white; padding: 2px; display: inline-block; border-radius: 3px;">Complimentary</div> <b>ENHANCED ROOM RATE DESCRIPTION</b> [ENHANCED_ROOM_RAT E_DESCRIPTION]	Activates enhanced room and rate descriptions in channel conversion screens.

Table 11-13 OPERA Controls — Channel Management Parameters

PARAMETER	DESCRIPTION
<b>ADVANCED OWS PRODUCTS</b> [ADVANCED_OWS_PRO DUCTS]	Chain Level global parameter that provides ability to control enables separately sold packages to be configured as web bookable. If the parameter is on, only packages that meet the requirement of being both separately sold and web bookable are available for web booking. If the parameter is off, all separately sold packages are available for web booking.
<b>ALLOW MODIFY INHOUSE RESERVATION</b> [ALLOW_MODIFY_INH OUSE_RESERVATION]	Enables modifying in-house reservation dates.
<b>ALWAYS USE MEMBERSHIP FROM REQUEST MESSAGE</b> [ALWAYS_USE_MEMBE RSHIP_FROM_REQUES T_MESSAGE]	Chain level global parameter that, when this parameter is on, only the memberships sent in create booking request messages are attached to the reservation. When this parameter is off, all memberships of the profile are attached to the reservation.
<b>APPEND BLOCK NAME BEFORE RATE DESCRIPTION</b> [APPEND_BLOCK_NAM E_BEFORE_RATE_DESC RIPTION]	Enables OWS to append a block name with a rate description.
<b>AUDIT DETAILS</b> [AUDIT_DETAILS]	Records logs of OEDS processes in audit details.
<b>CONVERT OWS AND GDS COMMENTS AS TRACES</b> [ADD_COMMENTS_GD S_SINREM_TRACE]	Converts OWS comments and GDS Service information (SIN) messages to traces in ORS. The trace date is created with the insert date of the booking instead of the arrival date. Traces are created using the trace department configured under the OEDS parameter setting OEDS Trace Department. When the parameter is set to N, the OWS comments and GDS Service information (SIN) and Remark (REM) texts will not be converted to traces but will be inserted as Reservation Comments in OPERA Cloud. The parameter setting OEDS Trace Department will not be displayed.

**Table 11-13 (Cont.) OPERA Controls — Channel Management Parameters**

PARAMETER	DESCRIPTION
<b>MODIFY CANCEL GDS BOOKING FROM WEB</b> [MODIFY_CANCEL_GD SBOOKING_FROMWEB ]	Chain level global parameter that enables guests to make changes that do not impact inventory or cancellations to their GDS/ADS/ODS bookings using OWS, regardless of the source of the reservation.
<b>SEND CONFIRMATION LETTER AT BOOKING</b> [SEND_CONFIRMATIO N_LETTER_AT_BOOKIN G]	Sends a confirmation letter at booking.

**Table 11-14 OPERA Controls — Channel Management Settings**

SETTING	DESCRIPTION
<b>CANCEL WINDOW</b> [CANCEL_WINDOW]	Chain level global setting that specifies the number of minutes after booking when the reservation can be canceled without penalty.
<b>CHANNEL CONSUMER NAME</b> [CHANNEL_CONSUMER_ NAME]	This setting appears when the Global parameter MULTI CONSUMER SETUP is enabled and allows the property to configure Channel Consumers for each resort. Based on this configuration, the GWIZ Business Event Service will utilize multiple threads to de-queue business events for each Channel Consumer. Also, Micros ADS Hurdle Processor service will utilize multiple threads to process hurdles for each Channel Consumer.
<b>FETCH RESERVATION</b> [FETCH_RESERVATION]	Enables the OPERA Cloud Web Suite Engine to retrieve reservations for either all reservations (regardless of entry point) or for only created through OWS.
<b>SEARCH FOR MEMBERSHIP NO.</b> [SEARCH_FOR_MEMBER SHIP_NO]	Chain level global setting that enables the match of a profile based on any one of the criteria selected in addition to the profile membership number.

## OPERA Controls — Commissions

The following tables outline the parameters and settings that can be configured in the OPERA Controls Commissions group.

Table 11-15 OPERA Controls — Commissions Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>AUTOMATIC CALCULATION OF VALUE ADDED TAX OVER THE COMMISSION PAID</b> [CALC_VAT_ON_COMMISSIONS]		Automatically calculates the value added tax over the commission paid automatically.
<b>EFT Export</b> [EFT_EXPORT]		Commissions EFT Data Export functionality.
	<b>EXPORT TYPE</b> [EFT_EXPORT_FORMAT]	The Export Type is based on the EFT Export OPERA Control being active for the Property.
	<b>CHAIN ID</b> [EFT_EXPORT_CHAINID]	Enter an alphanumeric chain identification code, six characters minimum.
	<b>LOCATION ID</b> [EFT_EXPORT_LOCATIONID]	Enter a location identification code, 6-10 characters.
	<b>CHAIN NAME</b> [EFT_EXPORT_CHAIN_NAME]	Select the name of the property/chain.
	<b>REPORTING CURRENCY</b> [EFT_EXPORT_REPORTING_CURRENCY]	Select a country code for reporting currency.
	<b>TRANSMISSION ID</b> [EFT_EXPORT_TRANSMISSIONID]	Select the transmission ID provided by WTP.
	<b>REPORTING METHOD</b> [EFT_EXPORT_REPORTING_METHOD]	This is an optional field currently not used by the export.
	<b>USE COUNTRY CODE FOR ISO CODE</b> [USE_COUNTRY_CODE_FOR_ISO_CODE]	Activate to use country code as the ISO code.
	<b>COUNTRY OF TAXING AUTHORITY</b> [EFT_EXPORT_COUNTRY]	Select the country code of the property.
	<b>TAX TYPE</b> [EFT_EXPORT_TAX_TYPE]	Select the required Tax Type.
	<b>COMPANY</b> [EFT_EXPORT_COMPANY]	Select the Clearinghouse company name.

Table 11-15 (Cont.) OPERA Controls — Commissions Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>ADDRESS</b> [EFT_EXPORT_ADDRES S]	Select the Address of the clearinghouse.
	<b>TELEPHONE</b> [EFT_EXPORT_TELEPH ONE]	Enter the telephone number of the clearinghouse.
	<b>FAX</b> [EFT_EXPORT_FAX]	Enter the FAX number of the clearinghouse.
	<b>DELIVERY METHOD</b> [EFT_EXPORT_SFTP_SE TUP]	Set the delivery method to be used for the EFT Export.
	<b>TARGET DIRECTORY</b> [EFT_EXPORT_FTP_PAT H]	Select the name of the directory (including path) on the File System where the export file will be stored.
	<b>FILE NAME FORMAT</b> [EFT_EXPORT_FILE_NA ME_FORMAT]	Select the file name format to be used for EFT Export file
<b>POSITIVE PAY CHECK EXPORT</b> [POSITIVE_PAY_CH ECK_EXPORT]		Enables positive pay checks to be exported.
<b>SEND ZERO COMMISSIONS RECORDS TO PAYMENT PROCESSING</b> [ZERO_COMMISSI ON_YN]		Sends zero commissions records to payment processing. Upon processing of commissions, the zero commissions records are sent to payment history with Paid = On. If set to Off, the zero commission records are sent directly to payment history with Paid = Off.
<b>STOP PROCESSING REASON CODES</b> [ENTER_HOLD_RE ASON_CODES]		Enables the use of commission processing reasons for holding and detaching commissions.
<b>TRANSFER NO SHOWS AND CANCELS</b> [TRANS_COMM_N OSHOW_CANC]		Transfers no show and cancelled reservations to the commission module.
<b>USE PRE- PRINTED CHECKS FOR COMMISSIONS</b> [FIXED_PRE_PRIN TED_CHECK_NUM BERS]		Enables the use of pre-printed checks for commissions. This internally voids a check/stub number if a check number was used due to another check exceeding one page.

Table 11-16 OPERA Controls — Commissions Settings

SETTING	DESCRIPTION
<b>COMMISSION CODES NOT TO PROCESS</b> [NO_PROCESS_COMMISSION_CODES]	Specify the commission codes to not process for commission calculation.
<b>DEFAULT COMMISSION</b> [DEFAULT_COMMISSION]	Specify the default commission code used if the travel agent / source has no commission code associated defined.
<b>DEFAULT REASON CODE</b> [DEFAULT_REASON_CODE]	Select the default hold reason code.
<b>DEFAULT TRANSACTION CODE FOR PREPAID CUSTOMERS</b> [DEFAULT_PREPAID_CODE]	Select the default transaction code for prepaid commissions.
<b>FILE NAME FORMAT</b> FILE_NAME_FORMAT	Select the file name format to be used for EFT Export file. If OPP_NPC license is activated, following are the values available for this settings. XF_PROPERTY (Default value) XF_PROPERTY_DDMMYYYY XF_PROPERTY_MMDDYYYY XF_PROPERTY_DDMMYYYYHH24MI XF_PROPERTY_MMDDYYYYHH24MI <i>* PROPERTY :- First 6 digits of the Property ID configured in EFT Exports settings of OPERA Controls</i>
<b>PROFILE UPDATE RESTRICTED COMMISSION PAYMENT TYPE</b> PROFILE_UPDATE_RESTRICTED_PAYMENT_TYPES	Select the Commission Payment type(s) to be considered for the Profile Update Restriction. When a Payment Type is selected here, users cannot modify the name of a profile or remove the profile from a reservation, if that profile is linked with a Commission Bank Account using the selected Payment Type.
<b>PROFILE UPDATE RESTRICTED RESERVATION STATUS</b> [PROFILE_UPDATE_RESTRICTED_RESV_STATUS]	Select the Reservation Status(es) to be considered for the Profile Update Restriction.

## OPERA Controls — Comp Accounting

Gaming

Table 11-17 Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>Complimentary</b> <b>AUTO SETTLE COMP FOLIO</b> [AUTO_SETTLE_COMP_FOLIO]		Allows for the Comp Folios to be auto settled during Check-Out. Comp Folios with an Authorizer that has an associated AR Account are settled to Direct Bill. Comp Folios with an Authorizer that does not have an associated AR Account are settled to the Transaction Code in the 'Default Comp Payment Method' setting. When the 'Default Comp Payment Method' setting is left blank, the Comp Folio will be presented for manual settlement.
<b>Complimentary</b> <b>COMP REQUEST</b> [COMP_REQUESTS]		Allows users who may not be comp authorizers, to create comp routing requests on reservations. The request can be declined or approved by an authorizer.
<b>Complimentary</b> <b>COMP TYPES</b> [COMP_TYPES]		Allows configuration and association of a comp type code with a guest profile and reservation that assists you to identify guests according to their gaming expertise.

Table 11-18 Parameters

PARAMETERS	RELATED PARAMETER/ SETTING	DESCRIPTION
<b>AUTHORIZER PIN REQUIRED</b> [AUTHORIZER_PIN_REQUIRED]		Ask for Authorizer PIN on manual comp transfer to comp windows and when setting up comp routing.
<b>COMP ACCOUNTING INTEGRATION SERVICE</b> COMP_ACCOUNTING_INTEGRATION_SERVICE		Enables integration with an external Patron Tracking System for purpose of manage Comp Accounting.

Table 11-18 (Cont.) Parameters

PARAMETERS	RELATED PARAMETER/ SETTING	DESCRIPTION
<b>COMP POSTING MULTI RECORD PROCESSING</b> COMP_POSTING_MULTI_RECORD_PROCESSING		When active, you are able to select multiple comp postings to be sent for approval to the Patron Track System (PTS) . When inactive, you can select one record at a time to be sent for approval to the PTS.  Activation is based on the capabilities of the integrated PTS.
<b>COMP REDEMPTION</b> [BUCKET_REDEMPTION]		Enables Comp Redemption functionality to allow redemption of local currency amounts to reservations where the guest profile has a PTS (Patron Tracking System) membership. Properties interfaced with an external gaming system receive redemption amounts from the external vendor.
<b>COMP TRANSACTION STATUS</b> [COMP_TRANSACTION_STATUS]		Enables the ability to manually add and update the status of transactions in the Comp Posting Journal.
<b>DEDUCT INCLUSIVE TAX FROM COMP WINDOW</b> [DEDUCT_INCLUSIVE_TAX_FROM_COMP_WINDOW ]		When parameter is active, the transaction(s) transferred to comp window do not include the associated inclusive tax(s). If the same transaction(s) is transferred back to guest billing window, the inclusive tax(s) is reposted. If the Comp transaction code has a generate associated, then this behavior will not take place.
<b>GENERIC COMP MEMBERSHIP NUMBER</b> [GENERIC_COMP_MEMBER_NO]	<b>DEFAULT MEMBERSHIP TYPE FOR PTS</b>	Allows the entry of a generic membership number for comp postings.

Table 11-18 (Cont.) Parameters

PARAMETERS	RELATED PARAMETER/ SETTING	DESCRIPTION
<b>PTS MEMBERSHIP TYPE BASED COMP ROUTING</b> [COMP_ROUTING_PTS_MEMBERSHIP_ TYPES_ONLY]		Allow setup of Comp Routings only on reservations that have a PTS (Patron Tracking System) membership type that matches the value in the 'Default PTS Membership Type' setting.
<b>PLAYER STATISTICS</b> [PLAYER_STATS]		Enables the Player statistics screen which provides an up-to-the-minute display of gaming information for a guest with a player ID.
<b>RESTRICT NEW PROFILE</b> [RESTRICT_NEW_PROFILE]		When enabled, you are restricted from amending the primary profile linked to the reservation when comp charges exist on any of the comp windows.

Table 11-19 Settings

SETTING	RELATED PARAMETER/ SETTING	DESCRIPTION
<b>AUTHORIZER AR TYPE</b> [AUTHORIZER_AR_TYPE]		AR Account Type for Authorizers.
<b>DEFAULT COMP PAYMENT METHOD</b> [AUTO_SETTLE_COMP_FOL IO_DEFAULT_PAYMENT_ME THOD]		Defines the Payment Method that will be used to settle Comp Folios that are not associated to an Authorizer's AR Account.
<b>DEFAULT PTS MEMBERSHIP TYPE</b> [PTS_MEMBERSHIP_TYPE]		The Default Membership Type for Gaming (Patron tracking system) used for Gaming Functionalities.
<b>PRINT COMP FOLIO</b> [PRINT_COMP_FOLIO ]		Controls the available print options when settling comp folios (101-108).
<b>STAGED TRANSACTIONS DURING FOLIO GENERATION</b> [STAGED_TRX_DURING_CH ECKOUT]		Determines the handling of staged transactions on comp windows during check out and interim folio process.

## OPERA Controls — Country Specific

The following tables outline the settings that can be configured in the OPERA Controls Country Specific group.

**Table 11-20 OPERA Controls — Country Specific Parameters**

PARAMETERS	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>AUTO POST STAMP DUTY</b> [AUTO_POST_STAMP_DUTY]		Upon entering billing Stamp Duty will be automatically posted if the threshold is exceeded.
<b>DEPOSIT REFUND</b>		Deposit Refund functionality activates the Deposit Refund option on the Billing screen to process the Refund for Deposit transactions.

**Table 11-21 OPERA Controls — Country Specific Settings**

SETTING	DESCRIPTION
<b>BLACKLIST REPORT THRESHOLD</b> [BLACK_LIST_THRESHOLD]	Only documents above this value will be included in the Blacklist Report Export [Italy]
<b>BLACKLIST REPORT THRESHOLD EVALUATION MODE</b> [BLACK_LIST_USENET]	If set to NET, the threshold will be applied to the net amount of the document, otherwise the gross amount will be used for the blacklist report export [Italy].
<b>BLACKLIST REPORT THRESHOLD TYPE</b> [BLACK_LIST_THRESHOLD_TYPE]	Specifies if the threshold value should be applied to all documents of the payee (C = Cumulative) or individual documents (D = Document) [Italy].
<b>CITY TAX 2ND INCREMENT AMOUNT</b> [CITY_TAX_2ND_INCREMENT_AMOUNT]	Value of the increment to apply if the rate amount is above parameter THRESHOLD AMOUNT FOR VARIANT CITY TAX 2 [Italy].
<b>CITY TAX 3RD INCREMENT AMOUNT</b> [CITY_TAX_3RD_INCREMENT_AMOUNT]	Value of the increment to apply if the rate amount is above parameter THRESHOLD AMOUNT FOR VARIANT CITY TAX 3 [Italy].
<b>CITY TAX 4TH INCREMENT AMOUNT</b> [CITY_TAX_4TH_INCREMENT_AMOUNT]	Value of the increment to apply if the rate amount is above parameter THRESHOLD AMOUNT FOR VARIANT CITY TAX 4 [Italy].
<b>CITY TAX 5TH INCREMENT AMOUNT</b> [CITY_TAX_5TH_INCREMENT_AMOUNT]	Value of the increment to apply if the rate amount is above parameter THRESHOLD AMOUNT FOR VARIANT CITY TAX 5 [Italy].

**Table 11-21 (Cont.) OPERA Controls — Country Specific Settings**

<b>SETTING</b>	<b>DESCRIPTION</b>
<b>CITY TAX APPLICABLE ROOM NIGHTS</b> [CITY_TAX_APPLICABLE_ROOM_NIGHTS]	Number of nights to be considered for City Tax calculation [Italy].
<b>CITY TAX BUCKET NUMBER</b> [CITY_TAX_BUCKET_NUMBER]	Number of the tax column holding City Tax postings [Italy].
<b>CITY TAX CALCULATION START DATE</b> [CITY_TAX_CALCULATION_START_DATE]	Date from which the City Tax will be calculated (DD-MON-YYYY) [Italy].
<b>CITY TAX CORRECTIONS TRANSACTION CODE</b> [CITY_TAX_CORRECTIONS_TRANSACTION_CODE]	Transaction code to be used by operators when doing Correction/Rebate/Adjustment Postings for the City Tax [Italy].
<b>CITY TAX EXEMPTION DESCRIPTION 1</b> [CITY_TAX_EXEMPTION_DESCRIPTION1]	Description of exemption nr. 1. Only used in Reports [Italy].
<b>CITY TAX EXEMPTION DESCRIPTION 10</b> [CITY_TAX_EXEMPTION_DESCRIPTION10]	Description of exemption nr. 10. Only used in Reports [Italy].
<b>CITY TAX EXEMPTION DESCRIPTION 2</b> [CITY_TAX_EXEMPTION_DESCRIPTION2]	Description of exemption nr. 2. Only used in Reports [Italy].
<b>CITY TAX EXEMPTION DESCRIPTION 3</b> [CITY_TAX_EXEMPTION_DESCRIPTION3]	Description of exemption nr. 3. Only used in Reports [Italy].
<b>CITY TAX EXEMPTION DESCRIPTION 4</b> [CITY_TAX_EXEMPTION_DESCRIPTION4]	Description of exemption nr. 4. Only used in Reports [Italy].
<b>CITY TAX EXEMPTION DESCRIPTION 5</b> [CITY_TAX_EXEMPTION_DESCRIPTION5]	Description of exemption nr. 5. Only used in Reports [Italy].
<b>CITY TAX EXEMPTION DESCRIPTION 6</b> [CITY_TAX_EXEMPTION_DESCRIPTION6]	Description of exemption nr. 6. Only used in Reports [Italy].

Table 11-21 (Cont.) OPERA Controls — Country Specific Settings

SETTING	DESCRIPTION
<b>CITY TAX EXEMPTION DESCRIPTION 7</b> [CITY_TAX_EXEMPTION_DESCRIPTION7]	Description of exemption nr. 7. Only used in Reports [Italy].
<b>CITY TAX EXEMPTION DESCRIPTION 8</b> [CITY_TAX_EXEMPTION_DESCRIPTION8]	Description of exemption nr. 8. Only used in Reports [Italy].
<b>CITY TAX EXEMPTION DESCRIPTION 9</b> [CITY_TAX_EXEMPTION_DESCRIPTION9]	Description of exemption nr. 9. Only used in Reports [Italy].
<b>CITY TAX EXEMPTION PERCENTAGE 1</b> [CITY_TAX_EXEMPTION_PERCENTAGE1]	Percentage of exemption for exemption nr. 1. Defines the percentage applicable to exemption 1: 100 means full exemption, 0 means no exemption, Negative values are interpreted as absolute, instead of percentages [Italy].
<b>CITY TAX EXEMPTION PERCENTAGE 10</b> [CITY_TAX_EXEMPTION_PERCENTAGE10]	Percentage of exemption for exemption nr. 10. Defines the percentage applicable to exemption 10: 100 means full exemption, 0 means no exemption, NEGATIVE values are interpreted as absolute, instead of percentages [Italy].
<b>CITY TAX EXEMPTION PERCENTAGE 2</b> [CITY_TAX_EXEMPTION_PERCENTAGE2]	Percentage of exemption for exemption nr. 2. Defines the percentage applicable to exemption 2: 100 means full exemption, 0 means no exemption, NEGATIVE values are interpreted as absolute, instead of percentages [Italy].
<b>CITY TAX EXEMPTION PERCENTAGE 3</b> [CITY_TAX_EXEMPTION_PERCENTAGE3]	Percentage of exemption for exemption nr. 3. Defines the percentage applicable to exemption 3: 100 means full exemption, 0 means no exemption, Negative values are interpreted as absolute, instead of percentages [Italy].
<b>CITY TAX EXEMPTION PERCENTAGE 4</b> [CITY_TAX_EXEMPTION_PERCENTAGE4]	Percentage of exemption for exemption nr. 4. Defines the percentage applicable to exemption 4: 100 means full exemption, 0 means no exemption, Negative values are interpreted as absolute, instead of percentages [Italy].
<b>CITY TAX EXEMPTION PERCENTAGE 5</b> [CITY_TAX_EXEMPTION_PERCENTAGE5]	Percentage of exemption for exemption nr. 5. Defines the percentage applicable to exemption 5: 100 means full exemption, 0 means no exemption, Negative values are interpreted as absolute, instead of percentages [Italy].
<b>CITY TAX EXEMPTION PERCENTAGE 6</b> [CITY_TAX_EXEMPTION_PERCENTAGE6]	Percentage of exemption for exemption nr. 6. Defines the percentage applicable to exemption 6: 100 means full exemption, 0 means no exemption, Negative values are interpreted as absolute, instead of percentages [Italy].
<b>CITY TAX EXEMPTION PERCENTAGE 7</b> [CITY_TAX_EXEMPTION_PERCENTAGE7]	Percentage of exemption for exemption nr. 7. Defines the percentage applicable to exemption 7: 100 means full exemption, 0 means no exemption, Negative values are interpreted as absolute, instead of percentages [Italy].

**Table 11-21 (Cont.) OPERA Controls — Country Specific Settings**

SETTING	DESCRIPTION
<b>CITY TAX EXEMPTION PERCENTAGE 8</b> [CITY_TAX_EXEMPTION_PERCENTAGE8]	Percentage of exemption for exemption nr. 8. Defines the percentage applicable to exemption 8: 100 means full exemption, 0 means no exemption, Negative values are interpreted as absolute, instead of percentages [Italy].
<b>CITY TAX EXEMPTION PERCENTAGE 9</b> [CITY_TAX_EXEMPTION_PERCENTAGE9]	Percentage of exemption for exemption nr. 9. Defines the percentage applicable to exemption 9: 100 means full exemption, 0 means no exemption, Negative values are interpreted as absolute, instead of percentages [Italy].
<b>CITY TAX EXEMPTION UDF 1</b> [CITY_TAX_EXEMPTION_UDF1]	Ordinal number of the UDFN field where the number of persons to be exempted due to reason 1 is stored [Italy].
<b>CITY TAX EXEMPTION UDF 10</b> [CITY_TAX_EXEMPTION_UDF10]	Ordinal number of the UDFN field where the number of persons to be exempted due to reason 10 is stored [Italy].
<b>CITY TAX EXEMPTION UDF 2</b> [CITY_TAX_EXEMPTION_UDF2]	Ordinal number of the UDFN field where the number of persons to be exempted due to reason 2 is stored [Italy].
<b>CITY TAX EXEMPTION UDF 3</b> [CITY_TAX_EXEMPTION_UDF3]	Ordinal number of the UDFN field where the number of persons to be exempted due to reason 3 is stored [Italy].
<b>CITY TAX EXEMPTION UDF 4</b> [CITY_TAX_EXEMPTION_UDF4]	Ordinal number of the UDFN field where the number of persons to be exempted due to reason 4 is stored [Italy].
<b>CITY TAX EXEMPTION UDF 5</b> [CITY_TAX_EXEMPTION_UDF5]	Ordinal number of the UDFN field where the number of persons to be exempted due to reason 5 is stored [Italy].
<b>CITY TAX EXEMPTION UDF 6</b> [CITY_TAX_EXEMPTION_UDF6]	Ordinal number of the UDFN field where the number of persons to be exempted due to reason 6 is stored [Italy].
<b>CITY TAX EXEMPTION UDF 7</b> [CITY_TAX_EXEMPTION_UDF7]	Ordinal number of the UDFN field where the number of persons to be exempted due to reason 7 is stored [Italy].
<b>CITY TAX EXEMPTION UDF 8</b> [CITY_TAX_EXEMPTION_UDF8]	Ordinal number of the UDFN field where the number of persons to be exempted due to reason 8 is stored [Italy].

**Table 11-21 (Cont.) OPERA Controls — Country Specific Settings**

SETTING	DESCRIPTION
<b>CITY TAX EXEMPTION UDF 9</b> [CITY_TAX_EXEMPTION_UDF9]	Ordinal number of the UDFN field where the number of persons to be exempted due to reason 9 is stored [Italy].
<b>CITY TAX INCREMENT AMOUNT 1</b> [CITY_TAX_1ST_INCREMENT_AMOUNT]	Value of the increment to apply if the rate amount is above parameter THRESHOLD AMOUNT FOR VARIANT CITY TAX 1 [Italy].
<b>CITY TAX POSTINGS TRANSACTION CODE</b> [CITY_TAX_POSTINGS_TRANSACTION_CODE]	Transaction code used to perform Postings for the City Tax [Italy].
<b>CITY TAX PRICE PER PERSON CALCULATION</b> [CITY_TAX_PRICE_PER_PERSON_CALCULATION]	Price to be applied to each person eligible for City Tax calculation [Italy].
<b>CITY TAX THRESHOLD AMOUNT FOR VARIANT 1</b> [FIRST_THRESHOLD_AMOUNT_FOR_VARIANT_CITY_TAX]	If the rate amount is below this threshold, the value specified by parameter CITY TAX INCREMENT AMOUNT 1 will be added to the city tax amount [Italy].
<b>CITY TAX THRESHOLD AMOUNT FOR VARIANT 2</b> [SECOND_THRESHOLD_AMOUNT_FOR_VARIANT_CITY_TAX]	If the rate amount is below this threshold, the value specified by parameter CITY TAX INCREMENT AMOUNT 2 will be added to the city tax amount [Italy].
<b>CITY TAX THRESHOLD AMOUNT FOR VARIANT 3</b> [THIRD_THRESHOLD_AMOUNT_FOR_VARIANT_CITY_TAX]	If the rate amount is below this threshold, the value specified by parameter CITY TAX INCREMENT AMOUNT 3 will be added to the city tax amount [Italy].
<b>CITY TAX THRESHOLD AMOUNT FOR VARIANT 4</b> [FOURTH_THRESHOLD_AMOUNT_FOR_VARIANT_CITY_TAX]	If the rate amount is below this threshold, the value specified by parameter CITY TAX INCREMENT AMOUNT 4 will be added to the city tax amount [Italy].
<b>CITY TAX THRESHOLD AMOUNT FOR VARIANT 5</b> [FIFTH_THRESHOLD_AMOUNT_FOR_VARIANT_CITY_TAX]	If the rate amount is below this threshold, the value specified by parameter CITY TAX INCREMENT AMOUNT 5 will be added to the city tax amount [Italy].

**Table 11-21 (Cont.) OPERA Controls — Country Specific Settings**

SETTING	DESCRIPTION
<b>CITY TAX VARIANCE AFTER NIGHTS</b> [CITY_TAX_VARIANCE_AFTER_NIGHTS]	Number of nights after which the City Tax amount will be varied based on the setting CITY TAX VARIANCE VALUE [Italy].
<b>CITY TAX VARIANCE AMOUNT</b> [CITY_TAX_VARIANCE_AMOUNT]	Amount used to change City Tax after the number of nights specified in setting CITY TAX TO VARY AFTER NIGHTS [Italy]
<b>COUNTRIES FOR BLACKLIST REPORT</b> [BLACK_LIST_COUNTRIES]	Comma separated list of countries to be included in the Blacklist report (it_fiscal_blist) [Italy]
<b>STAMP DUTY TRANSACTION CODE</b> STAMP_DUTY_TRANSACTION_CODE	The transaction code that will be used for posting Stamp Duty tax.
<b>STAMP DUTY THRESHOLD</b> STAMP_DUTY_THRESHOLD	When the gross amount of exempt transactions exceeds this threshold the stamp duty tax will be automatically posted.
<b>STAMP DUTY VALUE</b> STAMP_DUTY_VALUE	The amount of tax that will be posted once the Stamp Duty threshold is exceeded.

## OPERA Controls — Credit Card

The following tables outline the parameters and settings that can be configured in the OPERA Controls Credit Card group.

**Table 11-22 OPERA Controls — Credit Card Parameters**

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>AUTOMATIC AUTHORIZATION</b> [AUTO_AUTH_ACTIVE_YN]		Turns on the Automatic Credit Card Authorization Scheduling functionality. The <b>Automatic Authorization Interval Time</b> setting and the <b>Automatic Authorization Failure No Post Flag</b> and <b>Exclude No Post Reservations From Automatic Authorization</b> parameters are visible when the Automatic Authorization parameter is On and a credit card interface is configured in the property.

**Table 11-22 (Cont.) OPERA Controls — Credit Card Parameters**

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>AUTOMATIC AUTHORIZATION INTERVAL TIME</b> [AUTO_AUTH_INTERVAL]	<p>Specifies the interval in minutes after completion of an automatic credit card authorization and the start of the next instance.</p> <p>The minimum value is 30 minutes.</p> <p>When a time is set in the Automatic Authorization Interval Time setting, the automatic credit card authorization will start on the set interval of time after a previous instance of the automatic credit card authorization process has been completed.</p>
	<b>USE FOLIO BALANCE FOR AUTOMATIC CREDIT CARD AUTHORIZATION</b> USE_FOLIO_BALANCE_F OR AUTOMATIC_CREDIT_CARD AUTHORIZATION	<p>Automatic Credit Card Authorization will process the full folio balance authorization only if the balance of the folio exceeds already authorized amount.</p>
	<b>AUTOMATIC AUTHORIZATION FAILURE NO POST FLAG</b> [AUTOMATIC_AUTH_FAILURE_NO_POST_FLAG]	<p>When this parameter is On, the No Post checkbox on a reservation is automatically selected when the Credit Card Authorization fails during any automatic processes for Credit Card Authorizations.</p> <p>When the Automatic Authorization Failure No Post Flag parameter is On, a reservation where the credit card has been declined or a non-approved authorization message is received during the credit card authorization process, the No Post checkbox for that reservation will be selected, setting the reservation to No Post.</p>
	<b>EXCLUDE NO POST RESERVATIONS FROM AUTOMATIC AUTHORIZATION</b> [EXCLUDE_NO_POST_RESERVATIONS_FROM_AUTOMATIC_CC_AUTH]	<p>When this parameter is On, reservations flagged as No Post are not included in any automatic processes for Credit Card Authorizations.</p> <p>When the “Exclude No Post Reservations From Automatic Authorization” parameter is Off, reservations flagged as “No Post” will be included in the credit card authorization process.</p> <p>When the “Exclude No Post Reservations From Automatic Authorization” parameter is On, reservations flagged as “No Post” will be excluded from the credit card authorization process.</p>

Table 11-22 (Cont.) OPERA Controls — Credit Card Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>BATCH SETTLEMENT</b> [CC_BATCH_SETTLEMEN T]		Activates Batch Settlements functionality for supported systems, where payments/settlements posted in OPERA Cloud are kept for later processing in batch as part of the end-of-day routine or manually initiated . This parameter and Online Settlement parameter are mutually exclusive.
<b>CHIP AND PIN</b> [CHIP_AND_PIN]		Activates the Chip and PIN functionality. Note: Either the Online Settlement parameter must be On or the Authorization Settlement at Checkout setting must be configured. The Batch Settlement parameter cannot be On.
	<b>CHIP AND PIN PAYMENT METHOD</b> [CHIP_AND_PIN_PAY_LO V]	Specifies the credit card types that should exhibit Chip and PIN functionality when using a Chip and PIN enabled terminal.
<b>CREDIT CARD TYPE CHECK/USAGES</b> [CC_USAGE_CHOICES]		Enables a cross check between the credit card type and usages for that card type. This is used for any credit card types where a separate transaction code is applied to each specific usage of the card.
	BlackList Card Check Flag to specify if OPERA Cloud should perform Bonus Check Validations.	
<b>CREDIT LIMIT OVERAGE PAYMENTS</b> [CREDIT_LIMIT_OVERAG E_PAYMENTS]		Enables the processing of automatic payments for the total balance of a folio when the balance is equal or higher than the credit limit set for that credit card payment method. Automatic Credit Limit Overage payments are processed based on the Credit Limit Overage Payments Interval Time setting. Provides additional controls to automatically make credit card payments in folios when the credit limit is equal or exceeds, as well allows users to access the Credit Limit Overages screen and process payments on demand. Note: the Online Settlement parameter must be On for the property.
	<b>DEFAULT CREDIT LIMIT OVERAGE PAYMENTS AUTO PAY</b> [DEFAULT_OVERAGE_PA YMENTS_AUTO_PAY]	When this parameter is On, the Credit Limit Auto Pay check box on new reservations is selected by default.

Table 11-22 (Cont.) OPERA Controls — Credit Card Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>CREDIT LIMIT OVERAGE PAYMENT FAILURE NO POST FLAG</b>	When this parameter is On, the No Post check box is automatically selected when a Credit Limit Overage payment fails in a reservation.
	[OVERAGE_PAYMENT_FAILURE_NO_POST_FLAG]	When the Credit Limit Overage Payment Failure No Post Flag parameter is Off, a reservation that has failed to apply a payment to any folio window during the Credit Limit Overage process, the No Post check box for that reservation will remain unchanged from its current status.
		When the Credit Limit Overage Payment Failure No Post Flag parameter is On, a reservation that has failed to apply a payment to any folio window during the Credit Limit Overage process, the “No Post” check box for that reservation will be selected setting it to No Post.
	<b>EXCLUDE NO POST RESERVATIONS FOR CREDIT LIMIT OVERAGE PAYMENTS PARAMETER</b>	When this parameter is On, reservations flagged as No Post are not processed in Credit Limit Overages.
	[EXCLUDE_NO_POST_RESERVATIONS_FOR_OVERAGE_PAYMENTS]	When the Exclude No Post Reservations For Credit Limit Overage Payments parameter is Off, reservations that have been flagged as No Post are included in the Credit Limit Overage process.
		When the Exclude No Post Reservations For Credit Limit Overage Payments parameter is On, reservations that have been flagged as No Post are excluded from the Credit Limit Overage process.
	<b>CREDIT LIMIT OVERAGE PAYMENTS INTERVAL TIME</b>	Specifies the interval in minutes after completion of an automatic Credit Limit Overage processing of Payments and the start of the next instance. The minimum value is 30 minutes. When set to 0 minutes, the automatic Credit Limit Overage processing of payments will not be executed.
	[OVERAGE_PAYMENTS_INTERVAL_TIME]	When a time interval is set in the Credit Limit Overage Payments Interval Time setting, the Automatic Credit Limit Overage process will start on the set interval of time after a previous instance of the process has been completed.

Table 11-22 (Cont.) OPERA Controls — Credit Card Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>CREDIT LIMIT OVERAGE PAYMENT METHODS</b> [CREDIT_LIMIT_OVERAGE_PAYMENT_METHODS]	Set the Credit Card Payment Methods to qualify for automatic Credit Limit Overage processing of payments. The processing of automatic payments cannot begin unless at least one credit card payment method is selected for the Credit Limit Overage Payment Methods setting. Only cards of the selected payment method are processed.
<b>MANUAL AUTHORIZATION NOTIFICATION</b> [MANUAL_AUTH]		Delivers an authorization message to the credit card processing vendor when a manual credit card authorization code is obtained and entered in the reservation. This is available if the credit card interface uses web-enabled transaction processing via VPN or secure HTTP.
<b>ONLINE SETTLEMENT</b> [CC_ONLINE_SETTLEMENT]		Activates Online Settlements functionality for supported systems, to allow sending to the bank payments/settlements upon processing in OPERA Cloud. This parameter and Batch Settlement parameter are mutually exclusive.
	<b>TEMPORARILY STORE OFFLINE SETTLEMENTS</b> [CC_OFFLINE_SETTLEMENT]	Stores failed online settlements (due to the credit card interface not running) and processes them offline at the end of the day.
<b>SEND TOTAL TAX IN SETTLEMENTS</b> [SEND_TOTAL_TAX]		Sends total tax amounts in settlement requests to the interface.

Table 11-23 OPERA Controls — Credit Card Settings

SETTING	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>AUTHORIZATION REVERSAL ALLOWED</b> [AUTH_REVERSAL_ALLOWED_LOV]		Specifies the credit card types that have authorization reversal permitted by the credit card vendor. Existing authorizations for selected credit card types are reversed if a different credit card or method of payment is used at check out.
<b>AUTHORIZATION AT CHECK IN</b> [AUTH_AT_CHECKIN_LOV]		Specifies the credit card types that require an automatic authorization at check in.

Table 11-23 (Cont.) OPERA Controls — Credit Card Settings

SETTING	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>AUTHORIZATION DURING STAY/DEPOSIT</b> [AUTH_DURING_STAY_LOV]		Specifies the credit card types that permit manual and automatic authorization checks for deposits, and following check in and prior to check out and settlement. This setting must be enabled to permit authorizations by the End of Day routine.
<b>AUTHORIZATION SETTLEMENT AT CHECK OUT</b> [AUTH_STLMT_AT_CHECK_OUT_LOV]		Specifies the credit card types for authorization and settlement during check out.
<b>DAYS TO PURGE CREDIT CARD AUTHORIZATION LOG</b> [PURGE_CC_AUTH_LOG_DAYS]		Specifies the number of days when the credit card authorization log is removed. Valid values: <ul style="list-style-type: none"> <li>Any number of days can be entered. If left blank, then the purge occurs every 30 days.</li> </ul>
<b>DAYS TO PURGE CREDIT CARDS</b> [DAYS_TO_PURGE_CREDIT_CARDS]		Global setting that specifies the number of days when the credit card information is removed when no transactions or reservations are active.
<b>DEPOSIT ADDRESS VERIFICATION</b> [ADDRESS_VERIFICATION_LOV]		Specifies the credit card types that require the billing address during payment.
<b>DEPOSIT CVV2 CHECK</b> [CVV2_CHECK_LOV]		Specifies the credit card types for which the Credit Card Security Code (CVV2) is required when making a payment.
<b>HOTEL ID</b> [CC_HOTEL_ID]		Specifies the hotel ID.
<b>SETTLEMENT AUTHORIZATION CODE</b> [SETTLEMENT_AUTHORIZATION_CODE]		Specifies the authorization code used at settlement if multiple authorization codes exist.

## OPERA Controls — End of Day

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls End of Day group.

**Table 11-24 OPERA Controls — End of Day Functions**

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>INCOME AUDIT</b> [INCOME_AUDIT]		Enables the ability to advance the business date forward during end of day but not close the business date. Final reports and procedures are not run when business date is not closed. Properties can perform audit tasks during regular business hours and then close the date once final revenue adjustments are made. Income audit allows for 5 business dates to remain open. Final reports are generated once business date is closed.
	<b>INCOME AUDIT CASHIER SETTING</b> [INCOME_AUDIT_CASHIER_ID]	Specifies the cashier ID for the income audit postings. This setting is only available when the Income Audit function is active.

**Table 11-25 OPERA Controls — End of Day Parameters**

PARAMETER	DESCRIPTION
<b>ARRIVALS WITH DEPOSIT BALANCE</b> [ARRIVALS WITH DEPOSIT BALANCE CHECK]	When activated, an additional check for arrivals with a deposit balance is added to the Night Audit process. During this check, the Night Audit will stop if there are any such arrivals identified and cannot be continued unless all of these reservations are checked in or their deposit balance is zero.  This parameter is available when the Deposit Handling function in the Cashiering group is active
<b>AUDIT</b> [AUDIT]	Forces the validation of transaction code totals during the night audit.
<b>AUTO ASSIGN CHECK NUMBER</b> [AUTO_CHKNO]	Assigns an internal check number automatically to the room and tax postings, as well as fixed charges. This is useful if the Rollup Transactions parameter in the Cashiering group is active.
<b>AUTO CLOSE CASHIERS</b> [AUTO_CLOSE_CASHIERS]	Closes all cashiers automatically that have not been closed.
<b>AUTO CONTINUE</b> [AUTO_CONTINUE]	Continues the night audit automatically without asking the user to continue after every process.
<b>AUTO NO SHOW ARRIVALS</b> [AUTO_NOSHOW_ARRIVALS]	Sets reservations automatically that are due to arrive as no show.
<b>MULTIPLE END OF DAYS</b> [MULTIPLE_END_OF_DAYS]	Enables the user to automatically run the End of Day multiple times.
<b>STATE CHECK</b> [STATE_CHECK]	Warns users and provides a way to update the state of a reservation's profile while running the End of Day.

**Table 11-25 (Cont.) OPERA Controls — End of Day Parameters**

PARAMETER	DESCRIPTION
<b>WEATHER OR NOTES</b> [WEATHER_NOTES]	Warns users and provides a way to add weather or notes.

**Table 11-26 OPERA Controls — End of Day Settings**

SETTING	DESCRIPTION
<b>AUTO UPDATE BUSINESS DATE MINUTES</b> [AUTO_ROLL_DATE_MINUTES]	Minutes to wait before OPERA Cloud updates the Business Date.
<b>COUNTRY CHECK</b> [COUNTRY_CHECK]	Warns users and provides a way to update the country of a reservation's profile while running the End of Day. Valid values: <ul style="list-style-type: none"> <li>CHECK IN / END OF DAY</li> <li>END OF DAY</li> <li>NO COUNTRY CHECK</li> </ul>
<b>END OF DAY EMAIL ADDRESS</b> [EOD_EMAIL_ADDRESS]	Specifies the recipient email address for EOD reports configured to be delivered by emailed; as well for delivery the of the EOD completion email. Only a single email address can be entered.
<b>MAXIMUM NUMBER OF OPEN BUSINESS DATES</b> [MAXIMUM NUMBER OF OPEN BUSINESS DATES]	Specifies the number of business dates that can remain open without completing the Print Final Reports process of End of Day. Valid values: <ul style="list-style-type: none"> <li>1-365</li> </ul>
<b>NIGHT AUDIT CASHIER</b> [NIGHT_AUDIT_CASHIER_ID]	Specifies the cashier ID for End of Day postings.

## OPERA Controls — Events

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls Events group.

Table 11-27 OPERA Controls — Events Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>Complimentary</b> <b>ALTERNATE SPACE</b> [ALTERNATE_SPACE_E]	<b>ALTERNATE SPACE EVENT NAME SETTING</b> [ALTERNATE_SPACE_EVENT_NAME]	When enabled, a function space can be configured to require an alternate space as a back-up, whenever the function space is selected for an Event. A typical use case for this functionality is for outside function space that requires a back-up in the event of inclement weather. When the space requiring an alternate space is selected for an event, you are prompted and required to select an additional space(s). When an alternate space(s) is assigned, an additional event(s) is automatically created to reserve the alternate space(s) for the same date and times as the original event.  Default name for an event in an Alternate Space.
<b>CATERING PACKAGES</b> [EVENT_PACKAGES]	<b>EXCLUDE SPACE FROM EVENT PACKAGES</b> [EXCLUDE_SPACE_FROM_EVENT_PACKAGES]	When active, the checkbox for Include Space in Package will be unchecked by default allowing the space to be charged separately from the package price.
<b>Complimentary</b> <b>CATERING EVENTS</b> [CATERING_EVENTS]		Enables the ability to schedule an event and block a function space for a specific date and time. Events can be reserved in non-deduct or deduct status.
<b>Complimentary</b> <b>CATERING EVENTS VIEW ONLY</b> CATERING_EVENTS_VIEW_ONLY		Activates view-only access to OPERA v5 Sales and Catering events in OPERA Cloud PMS.
<b>EVENT PACKAGES</b> [EVENT_PACKAGES]		Enables the ability to create a collection of events and their associated menus, inventory items, and function space. These events are configured together to allow for quickly adding them to a block in one action. Once added to a block, they function as a package with inherited attendees and pricing (either per person or on a flat basis).

Table 11-27 (Cont.) OPERA Controls — Events Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>Complimentary</b> EVENT POSTING [EVENT_POSTING]		Enables the ability to post the actual charges for an event directly to the posting master account for the related block.
	<b>DEFAULT CATERING FOLIO STYLE</b> [DEFAULT_CATERING_FOLIO_STYLE]	The Folio Style automatically used when generating a Folio for Catering.
<b>Complimentary</b> EVENT RESOURCES [EVENT_RESOURCE S]		Enables the ability configure menus and inventory items and attach them to catering events. These event resources are used to build the details of the event and produce the Banquet Event Order.
	<b>EVENT REVENUE ACTUALIZATION</b> [EVENT_EDIT_ACTUALS]	Setting determines whether catering revenue is tracked at the event or resource level.
<b>Complimentary</b> EVENT TEMPLATES [EVENT_TEMPLATES]		Enables the ability to create a collection of events and their associated menus, inventory items, and function space. These events are configured together to allow for quickly adding them to a block in one action. Once added to a block, they function as independent events with their own individual pricing.
<b>Complimentary</b> EVENT WAITLIST [EVENT_WAITLIST]		Enables the ability to reserve function space already reserved for another block in a deduct from inventory status. These events are put on a waitlist in the order they have been created, but that order can be manually updated. If the function space becomes available, the waitlisted event with the first priority will automatically come off the waitlist and be moved to a deduct from inventory status.
	<b>WAITLIST ACTIVITY TYPE</b> [WAITLIST_ACTIVITY_TYPE]	This activity type is used to notify a user that an event, which was waitlisted, has been assigned to a function space.

Table 11-27 (Cont.) OPERA Controls — Events Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>Complimentary</b> <b>GUEST ROOM AS MEETING ROOM</b> [GUESTROOM_AS_MEETINGROOM]		When active, catering events can be booked in guest rooms that are configured for events. The Meeting checkbox will be available for room types configured as physical rooms, allowing a property to identify the room types that can be utilized for catering events. In Room configuration, when the room is associated to a Room Type marked for meetings, a new checkbox for Events will be available for selection. When this checkbox is selected, the user will be able to configure the room to be used for events by adding setup styles, rental codes, and additional information. When an event is booked in a guest room, a reservation will automatically be created to ensure that the room cannot be booked by another guest. The arrival and departure dates will be determined by the start and end time of the event and the values in the setting for Event Start Time Rooms and Event End Time Rooms.
	<b>EVENT START TIME ROOMS</b> [EVENT_START_TIME_ROOMS]	Rooms will be deducted from inventory the previous day for Events starting prior to this time
	<b>EVENT END TIME ROOMS</b> [EVENT_END_TIME_ROOMS]	Rooms will be deducted from inventory the following day for Events ending after this time.
<b>Complimentary</b> <b>QUICK EVENT</b> [QUICK_EVENT]		Enables the ability to create a new event and auto-create a block simultaneously
	<b>QUICK EVENT BOOKING TYPE</b> [QUICK_EVENT_BOOKING_TYPE]	Default Business Block Type for Quick Event Creation
	<b>QUICK EVENT MARKET CODE</b> [QUICK_EVENT_MARKET]	Default Business Block Market Code for Quick Event Creation
	<b>QUICK EVENT RATE CODE</b> [QUICK_EVENT_RATE_CODE]	Default Business Block Rate Code for Quick Event Creation
	<b>QUICK EVENT SOURCE CODE</b> [QUICK_EVENT_BOOKING_SOURCE]	Default Business Block Source Code for Quick Event Creation

Table 11-27 (Cont.) OPERA Controls — Events Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>QUICK EVENT            DEFAULT RESTYPE            DEDUCT</b> [DEFAULT_RESTYPE_DEDUCT]	Default Deduct Reservation Type for Quick Event Creation
	<b>QUICK EVENT            DEFAULT RESTYPE            NON DEDUCT</b> [DEFAULT_RESTYPE_NON_DEDUCT]	Default Non Deduct Reservation Type for Quick Event Creation
<b>SIMPLE EVENTS</b> [DIARY]	<div style="background-color: #4CAF50; color: white; padding: 2px; display: inline-block; border-radius: 3px;">Complimentary</div>	Activates Simple Catering Events and Function Diary functionality in OPERA Cloud PMS. With Simple Events, you can schedule events for a specific date and time, specify the number of attendees, event type , setup style and assign a function space. Event notes can be added to track the various resource requirements for the event. Simple Events then appear in the Function Diary. For more information, see <a href="#">Simple Events</a> .
		<div style="border: 1px solid #0070C0; padding: 10px; background-color: #E6F2FF;"> <p> <b>Note:</b></p> <p>The Simple Events function is not available when the Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition or Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition is active.</p> </div>
<b>SUB EVENTS</b> [SUB_EVENTS_ACTIVE]	<div style="background-color: #4CAF50; color: white; padding: 2px; display: inline-block; border-radius: 3px;">Complimentary</div>	Enables the ability to create events that are linked to other events, either in the same function space or a different space. These events can then be printed together on Banquet Event Orders to illustrate their connected nature.
	<b>DEFAULT SUB EVENT            RATE CODE</b> [DEFAULT_SUB_EVENT_RATE_CODE]	Default Sub Event Rate Code.

**Table 11-28 OPERA Controls — Events Parameters**

PARAMETER	DESCRIPTION
<b>BOOK SHAREABLE SPACE AS EXCLUSIVE</b> [BOOK_SHAREABLE_SPACE_AS_EXCLUSIVE]	When enabled, users are able to override the shareable functionality and reserve the space for a single event.
<b>CATERING MEAL PERIODS</b> [CATERING_MEAL_PERIODS]	Provides the ability to configure meal periods and link event types to a specific meal period for reporting purposes.
<b>CONSUMPTION MENU FORECASTING</b> [CONSUMPTION_MENU_FORECASTING]	Allows for a Menu Price to be added to a Consumption Menu in Menu Configuration and when editing a Menu that has been attached to an Event.
<b>COPY EVENT NOTES</b> [COPY_EVENT_NOTES]	Copy Event Notes when copying an Event.
<b>COPY FORECAST FIGURES</b> [COPY_FORECAST_FIGURES]	Copy Event Forecast Figures when copying an Event.
<b>COPY RESOURCE NOTES</b> [COPY_RESOURCE_NOTES]	Copy Resource Notes when copying a Resource.
<b>EXCLUDE SPACE FROM EVENT PACKAGES</b> EXCLUDE_SPACE_FROM_EVENT_PACKAGES	When active, the check box for Include Space in Package unchecked by default allowing the space to be charged separately from the package price.
<b>EXTERNAL URL</b> [EXTERNAL_URL]	Enable an updatable URL field in Event Overview. Once saved, a hyperlink displays to open the link in a browser tab.
<b>ITEM INVENTORY WARNING</b> [ITEM_INVENTORY_WARNING]	Show Inventory Warnings for Items.
<b>KEEP EVENT DETAILS ON TYPE CHANGE</b> [KEEP_EVENT_DETAILS_ON_TYPE_CHANGE]	Keep Event Details as they are when the event type is changed.
<b>MENU ITEM DEMAND</b> [MENU_ITEM_DEMAND_FACTOR]	Expose demand factor on menu items when configuring menus.
<b>RESOURCE COST</b> [RESOURCE_COST]	Expose cost fields for catering resources.

**Table 11-28 (Cont.) OPERA Controls — Events Parameters**

PARAMETER	DESCRIPTION
<b>UPDATE ALTERNATE MASTER EVENT STATUS</b> UPDATE_ALTERNATE_MASTER_EVENT_STATUS	When active, the status for the primary event will be changed to Actual when the process to update event status is activated via the Scheduled Time to Update Event Status to Actual setting. This will release the Alternate Space being held as a backup.
<b>USE FORECAST REVENUE</b> [USE_FORECAST_REVENUE]	The On the Books Revenue calculation will use the forecast-ed revenue until "Use Forecast Revenue" checkbox is unchecked.
<b>WARN WHEN SPACE BOOKED</b> [WARN_WHEN_SPACE_BOOKED]	User will receive a warning message indicating the space is booked by another event.

**Table 11-29 OPERA Controls — Events Settings**

SETTING	DESCRIPTION
<b>CATERING REVENUE PRICE TYPE</b> CATERING_REVENUE_PRICE_TYPE	Defines whether Catering Revenue Prices are entered as Gross or Net Values. The setting is referenced when generating the Daily Forecast Report.
<b>DEFAULT SPACE REVENUE TYPE</b> [DEFAULT_SPACE_REVENUE_TYPE]	Defines the default revenue type that will populate when configuring rental amounts for function space. Valid values: Select from the configured revenue types.
<b>MEASUREMENT</b> [MEASUREMENT]	Specifies the measurement system used for the function space. Valid values: <ul style="list-style-type: none"> <li>METRIC</li> <li>IMPERIAL</li> </ul>
<b>NO SPACE WARNING IN EVENT SEARCH</b> [NO_SPACE_WARNING_IN_EVENT_SEARCH]	Status for which users will be warned that one or more events exist that do not have space assigned. The message will only appear when the search criteria includes Block ID. Valid values: Multi-select from the configured status codes.
<b>SCHEDULED TIME TO UPDATE EVENT STATUS TO ACTUAL</b> SCHEDULED_TIME_TO_UPDATE_EVENT_STAT US_TO ACTUAL	Activates a background process to run within 30 minutes of the specified time to automatically change the event status to Actual for qualifying events. Events which are in a status that can be updated to Actual and are on the current date will be updated.

## OPERA Controls — Exports

The following tables outline the functions, parameters and settings that can be configured in the OPERA Controls Exports group.

Table 11-30 OPERA Controls — Exports Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>Complimentary</b> <b>GENERAL EXPORTS</b> [GENERAL_EXPORTS]		Activates the ability to configure and generate General, Membership, and Back Office export files.

Table 11-31 OPERA Controls — Exports Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>USE BACK OFFICE EXPORT MAPPING</b> [BACKOFFICE_EXPORT_MAPPING]		Activates export mapping for back office exports.
<b>USE COUNTRY SPECIFIC EXPORTS</b> [COUNTRY_EXPORTS]		Activates the Export functionality for country specific requirements.
	<b>GROUP MASTER UDF FIELD</b> [GROUP_MASTER_UDF]	Specifies the two digit numeric value of the reservation UDFC field for the group master flag (IT-Alloggiati).  Valid values: • 01–40
	<b>CMFLEX PROPERTY KEY</b> [CMFLEX_KEY]	Specifies the property key for CMFlex export [Brazil].
	<b>CMFLEX FISCAL QUEUE NAME</b> [CMFLEX_QUEUE_NAME]	Specifies the fiscal queue name for CMFlex export [Brazil].
	<b>CMFLEX PROFILE UDF FIELD CORRESPONDING TO CNPJ</b> [CMFLEX_UDF_CNPJ]	Specifies the profile UDF field corresponding to CNPJ for CMFlex export [Brazil].
	<b>CMFLEX PROFILE UDF FIELD CORRESPONDING TO INSC EST</b> [CMFLEX_UDF_INSC_EST]	Specifies the profile UDF field corresponding to Insc. Est. for CMFlex export [Brazil].
	<b>CMFLEX PROFILE UDF FIELD CORRESPONDING TO INSC MUN</b> [CMFLEX_UDF_INSC_MUN]	Specifies the profile UDF field corresponding to Insc. Mun. for CMFlex export [Brazil].

**Table 11-31 (Cont.) OPERA Controls — Exports Parameters**

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>CMFLEX PROFILE UDF FIELD CORRESPONDING TO CPF</b> [CMFLEX_UDF_CPF]	Specifies the profile UDF field corresponding to CPF for CMFlex export [Brazil].

**Table 11-32 OPERA Controls — Exports Settings**

SETTING	DESCRIPTION
<b>ISTAT HOTEL ID</b> [ISTAT_HOTEL_ID]	Hotel ID for Istat Reports/Exports [ITALY]
<b>ISTAT HOTEL KEY</b> [ISTAT_HOTEL_KEY]	Hotel KEY for Istat Export, Lazio Region only [ITALY]
<b>ISTAT NUMBER OF BEDS</b> [ISTAT_NUMBER_OF_BEDS]	Number of Beds for Istat Reports/Exports [ITALY]
<b>ISTAT NUMBER OF RESTROOMS</b> [ISTAT_NUMBER_OF_RESTROOMS]	Number of Restrooms for Istat Reports/Exports [ITALY]
<b>ISTAT NUMBER OF ROOMS</b> [ISTAT_NUMBER_OF_ROOMS]	Number of Rooms for Istat Reports/Exports [ITALY]

## OPERA Controls — Front Desk

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls Front Desk group.

**Table 11-33 OPERA Controls — Front Desk Functions**

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>SERVICE REQUESTS</b> [SERVICE_REQUESTS]		The ability to add a service request to guest and/or reservation for follow-up at a future date. Service Recovery is used to report incidents that occur and require actionable follow-up and subsequent closure by other staff members.
 <b>ESIGN REGISTRATION CARD</b> [ESIGN_REGISTRATION_CARD]		Enable eSign Registration Card functionality on reservations for getting electronic Signature and Initials.

Table 11-33 (Cont.) OPERA Controls — Front Desk Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>DAYS TO PURGE E-SIGNED REGISTRATION CARDS</b> [ESIGN_REGISTRATION_CARD]	Number of days for e-Signed Registration Cards to be purged after a reservation is checked out.

Table 11-34 OPERA Controls — Front Desk Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>REGISTRATION CARDS</b> [REGISTRATION_CARDS]		Activates registration card functionality.
	<b>DEFAULT REGISTRATION CARD</b> [DEFAULT_REGISTRATION_CARD]	Sets the registration card used by default for all check ins.
	<b>GENERATE REGISTRATION CARDS AT CHECK IN</b> [PRINT_REGCARD_AT_CI]	Generates registration cards at check in. Valid values: <ul style="list-style-type: none"> <li>• NEVER GENERATE</li> <li>• PROMPT TO GENERATE</li> <li>• SELECT DESTINATION</li> </ul>
	<b>PRINT REGISTRATION CARDS FOR ACCOMPANYING GUESTS</b> [PRINT_REGISTRATION_CARDS_FOR_ACCOMPANYING_GUESTS]	Enables the printing of individual registration cards for each accompanying guest from a reservation. The Registration Cards parameter and the Accompanying Guest function must be On for this parameter to be available.
	<b>AGE THRESHOLD TO PRINT REGISTRATION CARD</b> [AGE_THRESHOLD_TO_PRINT_REGISTRATION_CARD]	Guests for this age or older are eligible for an individual registration card when their profile is used as an accompanying guest. Select a numeric value to represent the minimum age required for a guest to have an individual registration card. The Print Registration Cards for Accompanying Guests parameter must be active for this setting to be available

Table 11-35 OPERA Controls — Front Desk Settings

SETTING	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CHECK IN PREPAY RULES</b> [CHECK_IN_PREPAY_RULES]		Enables posting anticipated accommodation charges and collecting payment.
	<b>ADVANCE FOLIO PAYMENT TYPE</b> [ADVANCE_FOLIO_PAYMENT_TYPE]	Ability to post in advance anticipated accommodation charges and collect payment of reservation
	<b>MINIMUM NUMBER OF NIGHTS</b> [ADVANCE_PAYMENT_MIN_NIGHTS]	Minimum Number of nights to enforce Reservation Prepay Rules
	<b>PREPAY FOLIO</b> [PREPAY_FOLIO]	Enables credit card auto-settlement for reservation updates resulting in additional total cost of stay charges payable by the guest. Auto payment processing executes hourly and is based on the credit card details in Window 1. Payment activity is recorded in the changes log with Advance Payments action type.
<b>CUSTOM CHECK IN STEPS</b> [EXPOSE_ADDITIONAL_CHECKIN_TRAIN_STEPS]		Allows adding steps to the Check In, and provides the option to set the order in which these steps show. The Room Selection and Review Payment steps are required and selected by default.
	<b>DEFAULT CHECK IN STEP</b> [DEFAULT_CHECK_IN_STEP]	When the parameter is on, the Check In defaults to the first step selected in the Custom Check In Steps setting. When the parameter is off, the Check In defaults to the first step that requires attention. When no step requires attention, the Check In defaults to the Verify Payment step.
<b>ROOM MOVE ROOM STATUS</b> ROOM_MOVE_ROOM_STATUS		During a Room Move, this is the default status of the departing room

## OPERA Controls — General

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls General group.

Table 11-36 OPERA Controls — General Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ACTIVATE REPORT SCHEDULER FUNCTIONALITY</b> [REPORT_SCHEDULER]		Activates the Report Scheduler functionality. You can schedule reports to auto generate periodically in a variety of file formats. You can also schedule reports to e-mail to a recipient.
<b>FILE ATTACHMENTS</b> [ATTACHMENTS]		Enables the ability to attach files (<10MB) to Profiles, Reservations, Blocks and Activities. <ul style="list-style-type: none"> <li>Reservation and Block attachments are retained for the life of the reservation or block and purged after departure.</li> <li>Activity attachments are purged along with the purge of an Activity.</li> <li>Profile attachments are purged along with the purge of a Profile.</li> </ul>
<b>LOG IT</b> [LOGBOOK]		Enables the ability to create log book entries for various departments.
<b>MULTI LANGUAGE</b> [GUEST_LANGUAGE]		Enables multi-language functionality for translation of values on guest stationery. This function also activates alternate name functionality which allows CRS integrated properties to record guest names in the national character set for searching and output on guest stationery.
<b>OPERA_CLOUD_DIGITAL_ASSISTANT</b> [ORACLE_DIGITAL_ASSISTANT]		Activates a chatbot for an alternate way to accomplish tasks through natural language conversations via a keyboard or microphone (speech to text).
<b>OWNER</b> [OWNER]		Provides the ability to define and associate a sales owner code for each account (company/agent) profile and business block. The owner code can be referenced for filter criteria within reporting and searching within the application.
<b>TEXT MESSAGE HANDLING</b> [SMS_CONFIRMATIONS]		Activates integration to SMS service providers for SMS text message delivery of confirmations, guest messages and queue room ready notifications to guests plus queue rush rooms alerts to housekeeping room attendants. Requires a subscription with local SMS service provider that supports email-to-sms or HTTP POST.

Table 11-36 (Cont.) OPERA Controls — General Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
TRACK IT [TRACK_IT]		Track-It enables the management of tasks for the delivery and collection of guest luggage, vehicles, parcels, and other items which need to be tracked.  Track-It also supports tracking of lost and found items.  Track-It functionality is also available on a smartphone via the OPERA Cloud / mobile web application.
	<b>DEFAULT PARCEL LOCATION</b> [DEFAULT_PARCEL_LOCATION]	Specifies the default location for Parcel type.
	<b>DEFAULT PARCEL ACTION</b> [DEFAULT_PARCEL_ACTION]	Specifies the default action for Parcel type.
	<b>DEFAULT PARCEL TYPE</b> [DEFAULT_PARCEL_TYPE]	Specifies the default type for Parcel type.
	<b>DEFAULT VALET LOCATION</b> [DEFAULT_VALET_LOCATION]	Specifies the default location for Valet type.
	<b>DEFAULT VALET ACTION</b> [DEFAULT_VALET_ACTION]	Specifies the default action for Valet type.
	<b>DEFAULT VALET TYPE</b> [DEFAULT_VALET_TYPE]	Specifies the default type for Valet type.
	<b>DEFAULT BAGGAGE LOCATION</b> [DEFAULT_BAGGAGE_LOCATION]	Specifies the default location for Baggage type.
	<b>DEFAULT BAGGAGE ACTION</b> [DEFAULT_BAGGAGE_ACTION]	Specifies the default action for Baggage type.
	<b>DEFAULT BAGGAGE TYPE</b> [DEFAULT_BAGGAGE_TYPE]	Specifies the default type for Baggage type.
	<b>DEFAULT LOST LOCATION</b> [DEFAULT_LOST_LOCATION]	Specifies the default location for Lost type.

Table 11-36 (Cont.) OPERA Controls — General Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>DEFAULT LOST ACTION</b> [DEFAULT_LOST_ACTION ]	Specifies the default action for Lost type.
	<b>DEFAULT LOST TYPE</b> [DEFAULT_LOST_TYPE]	Specifies the default type for Lost type.

Table 11-37 OPERA Controls — General Parameters

PARAMETER	SETTING	DESCRIPTION
<b>ACCESS EXCLUSION</b> [ACCESS_EXCLUSION]		Enables access exclusion for the block. When a block access exclusion is configured for a business block, specific central reservation offices (CROs) cannot edit the block (i.e., add a new reservation or modify an existing reservation in the block; cancel a reservation in the block, or both).
<b>1099 REPORTING</b> [1099]		Activates 1099 Reporting functionality.
<b>ACTIVATE TEMPLATE TASKS ON ALL DEPENDENT PROPERTY ROLES</b> [TEMPLATE_TASK_ACTIV ATION_ON_PROPERTY_R OLES]		Activates newly selected or deselected template tasks for all dependent property roles.
<b>ENABLE WATERMARK FOR REPORTS</b> [REPORT_WATERMARK]		Enables adding a watermark to all reports created in PDF format.
<b>GUIDED LEARNING</b> [GUIDED_LEARNING]		Enables in-application guided learning and usage statistics collection.
<b>INFORMATION COLLECTION</b> [INFORMATION_COLLEC TION]		Activate Information Collection functionality to allow for the collection of information at specific locations in OPERA Cloud. This includes the ability to configure which type of information collection functionality is active in the property.

**Table 11-37 (Cont.) OPERA Controls — General Parameters**

PARAMETER	SETTING	DESCRIPTION
	<b>INFORMATION COLLECTION METHODS</b> [INFORMATION_COLLECTION_METHODS]	Select the method(s) which will be used for Information Collection functionality. <ul style="list-style-type: none"> <li>• BR_PROFILE_INFO — Profile Information with Universal Payload tags (Brazil) (PROFILE_OPTIONS, Global Level)</li> <li>• BR_RESERVATION_INFO — Reservation Information with Universal Payload tags (Brazil) (RESERVATION_OPTIONS, Global Level)</li> <li>• EFOLIO_EXPORT — EfolioExport (BEFORE_SETTLEMENT, Global Level)</li> <li>• IT_FATTURA_E_INVOICE — Italy Fattura e-Invoice (RESERVATION_OPTIONS, Global Level)</li> <li>• IT_LOTTERY_NO — Lottery Number (BEFORE_SETTLEMENT, Global Level)</li> <li>• PROFILE_EINVOICE_ADDRESS — Profile eInvoice Address field with Universal Payload tag (PROFILE_OPTIONS, Global Level)</li> <li>• PURCHASE_ORDER_DETAILS — Reservation Purchase Order information.</li> <li>• SA_CUSTOMER_TYPE — Custom Type for Profile (PROFILE_OPTIONS, Global Level)</li> <li>• TW_E_INVOICE — Taiwan e-Invoice (BEFORE_SETTLEMENT, Global Level)</li> <li>• ONLINE_OFFLINE_RESERVATION: You can set each reservation as an Online or Offline as required for country specific exports                BH_DAILY_SUMMARY and                BH_DAILY_SUMMARY_DAY.</li> </ul>
	<b>NUMERIC KEYBOARD FOR ROOM NUMBER</b> [DEVICE_NUMERIC_KEYBOARD]	Activates the mobile device keyboard to default to the numeric keyboard on selection of the Room Number field.
	<b>PROPERTY ROLES WITHOUT TEMPLATE</b> [PROPERTY_ROLES_WITHOUT_TEMPLATE]	Enables you to create property roles and assign tasks to the roles without needing to copy roles from template.
	<b>REPORTS GLOBAL ONLY</b> [REPORTS_GLOBAL_ONLY]	Only display global reports for CRO access.

**Table 11-37 (Cont.) OPERA Controls — General Parameters**

PARAMETER	SETTING	DESCRIPTION
<b>RESTRICT CREDIT CARD MANUAL ENTRY</b> [RESTRICT_CC_MANUAL_ENTRY]		Prohibits manual inputting of credit card details in payment windows.
<b>STORE IP ADDRESS IN CHANGES LOG</b> [STORE_IP_ADDRESS_USER_ACTIVITY_LOG]		When active the IP Address will be displayed in the Changes Log.
<b>VIEW RECENTLY USED RECORDS</b> [RECENT_USED_RECORDS_MENU]		Enables the View Recently Viewed Records list within the I Want To menu for Profile, Reservation, Event, Sales Activities and Block search screens.

**Table 11-38 OPERA Controls — General Settings**

SETTING	DESCRIPTION
<b>BACKGROUND</b> [OPERA9_BACKGROUND]	The color of the strip displayed at the top of the application.
<b>CONFIGURE WATERMARK SETTINGS</b> [REPORT_WATERMARK_MODE]	Specifies the watermark settings to be applied to all reports in all properties where watermark functionality is active. This setting can be overridden by customizing watermarks on the report group or individual report level.
<b>CUSTOM TRANSLATION TYPE</b> [CUSTOM_TRANSLATION_TYPE]	Specifies the chain specific custom translation.
<b>DEFAULT SEARCH MODE</b> [DEFAULT_SEARCH_MODE]	Specifies the default search type used in Manage Profiles, Blocks, and Reservations.
<b>EXPORT CHARACTER SET</b> [EXPORT_CHARACTER_SET]	Specifies the character set used to write the export files.
<b>GOVERNMENT ID</b> [GOVERNMENT_ID]	The government identification associated with the property.
<b>PROPERTY TAX ID</b> [PROPERTY_TAX_ID]	Specifies the tax identification number for the property.
<b>PROXY CREDENTIALS</b> [PROXY_CREDENTIALS]	Specifies the proxy server's username and password (e.g., username:password).
<b>PROXY SERVER</b> [PROXY_SERVER]	Specifies the proxy server for HTTP calls from within the database server.

**Table 11-38 (Cont.) OPERA Controls — General Settings**

SETTING	DESCRIPTION
<b>PROXY SERVER BYPASS</b> [PROXY_SERVER_BYPASS ]	Specifies the bypass proxy server for the configured local addresses. Addresses are entered separated with , (comma). Whole domains can be entered in the format *:<DOMAIN.NAME>
<b>WEEKEND DAYS</b> [WEEKEND_DAYS]	Specifies the weekend days.

## OPERA Controls — IFC

The following tables outline the parameters and settings that can be configured in the OPERA Controls IFC group.

**Table 11-39 OPERA Controls — IFC Functions**

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<div style="background-color: #4CAF50; color: white; padding: 2px 5px; border-radius: 3px; display: inline-block;">Complimentary</div> <b>VIDEO CHECKOUT</b> [VIDEO_CHECKOUT]		Activate Video Check Out Functionality. Allows the guest to view their folio and check out from their room via the in-room television.
	<b>VIDEO CHECK OUT START TIME</b> [VIDEO_CO_START]	Time of Day the Video Check Out is to start.
	<b>VIDEO CHECK OUT STOP TIME</b> [VIDEO_CO_STOP]	Time of Day the Video Check Out is to stop.
	<b>VIDEO CHECK OUT EMAIL</b> [VIDEO_CO_EMAIL]	Address used to receive Video Check Out folios. When this setting is configured and when a Video Checkout of a reservation is done, copy of folios are emailed based on this configured email.

**Table 11-40 OPERA Controls — IFC Parameters**

PARAMETER	DESCRIPTION
<b>ADVANCED AUTHORIZATION RULES</b> [ADVANCED_AUTHORIZATION_RULES]	Enables you to define authorization rules based on the Room Type, Room Class, Rate Code, Rate Category, Reservation Type, and Source Code.

Table 11-40 (Cont.) OPERA Controls — IFC Parameters

PARAMETER	DESCRIPTION
<b>EXCLUSIVE TAXES WILL BE POSTED AS ITEMIZERS BY THE POS INTERFACE</b> [EXCL_TAX_BY_IFC]	Posts exclusive taxes as Itemizers by the POS interface.
<b>PAYMENT SERVICES DIRECTIVE</b> [PAYMENT_SERVICES_DIRECTIVE]	<p>Enables Payment Services Directive (PSD2) functionality for processing credit card settlements when integrated with an OPI payment partner. A 'Card Present' checkbox is displayed in the following screens:</p> <ul style="list-style-type: none"> <li>• Look to Book Sales</li> <li>• Deposit Payment</li> <li>• Check-In Verify Payment</li> <li>• Payment Instructions</li> <li>• Authorization and History</li> <li>• Billing Payment</li> <li>• House Posting Account</li> <li>• Post It Payment</li> <li>• Passer By Payment</li> <li>• Accounts Receivable Payment</li> </ul> <p>By default, the <b>Card Present</b> checkbox is unchecked. It remains unchecked if the credit card is manually entered and is automatically checked if the credit card is not manually input or received through an interface. The CIT (Customer Initiated Transaction) value is available in the <a href="#">changes log</a>.</p>
<b>PROMPT FOR TERMINAL</b> [PROMPT_FOR_TERMINAL]	Enables a terminal to be selected for credit card transactions.

Table 11-41 OPERA Controls — IFC Settings

SETTING	DESCRIPTION
<b>ADDRESS CLEANSING SYSTEM</b> [ADDRESS_CLEANSING_SYSTEM]	<p>Specifies the address cleansing system handler.</p> <p>Valid values:</p> <ul style="list-style-type: none"> <li>• ADDRESSDOCTORV4</li> <li>• ADDRESSDOCTORV5</li> <li>• GROUP1CODE1</li> <li>• SAP DATA SERVICES</li> </ul>

Table 11-41 (Cont.) OPERA Controls — IFC Settings

SETTING	DESCRIPTION
<b>DEFAULT KEYS EXPIRY TIME</b> [DEFAULT_KEYS_EXPIRY_TIME]	<p>For room key card use: The setting to use as the default value for the <b>Valid Until Time</b> field in the Create Key screen.</p> <p>Values are reservation Expected Time of Departure (ETD) or the OPERA Controls setting Key Expiry Time as the default on the Valid Until Time field in Create Key screen.</p> <p>The Valid Until Time value sets the time of the day after which the room key card expires.</p> <p>If creating a duplicate key, the previous key Valid Until Time is the default value.</p> <p>Rules: If left blank, the Valid Until Time field in the Create Key screen defaults to the reservation ETD (Expected Time of Departure).</p> <p>If there is no ETD set, then the OPERA Controls setting for Key Expiry Time is used. If the Key Expiry Time setting is not set, then the default is set at 12:00 PM.</p>
<b>IFC CLOUD LOG LEVEL</b> [IFC_CLOUD_LOG_LEVEL]	<p>Overrides the log level of the requests received by OPERA CLOUD from IFC interface. The default is WARNING. This can be set to FINE or FINEST only while troubleshooting an issue with Property Interfaces.</p>
<b>KEY EXPIRY DAYS</b> [KEYS_EXPIRY_DAYS]	<p>Specifies the number of days after the check out date for the key card to expire.</p>
<b>KEY EXPIRY TIME</b> [KEYS_EXPIRY_TIME]	<p>Specifies the time of the day when the key card expires.</p>
<b>KEY RESPONSE</b> [KEY_RESPONSE]	<p>Specifies the key response.</p> <p>Valid values:</p> <ul style="list-style-type: none"> <li>NONE</li> <li>WAIT (select to display the Door Locking System's response to the UI)</li> <li>BROADCAST (broadcast the key response when it is available)</li> </ul>
<b>KEY VALID START TIME</b> [KEY_VALID_START_TIME]	<p>For room key card use: The time of day default value for the Valid Start Time field in the Create Key screen.</p> <p>Value is in 24 hour time format.</p> <p>The Valid Start Time value sets the time that the room key card is enabled for use.</p> <p>When left blank the Valid Start Time (when available on the Create Key Screen) populates with the current property system time.</p> <p>If creating a duplicate key, the previous key Valid Start Time is the default value.</p> <p>Note: The Valid Start Time field is available on the Create Key screen when the Property Interface Control <b>Send Valid Start Date/Time</b> check box is checked.</p>
<b>ROOM NUMBER TO WHICH ANY LOST INTERFACE POSTINGS WILL BE SENT</b> [DEFAULT_POSTING_ROOM]	<p>Specifies the room number to which any lost posting (that is, when the reservation information is not valid) is sent.</p>

## OPERA Controls — Inventory Management

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls Inventory Management group.

**Table 11-42 OPERA Controls — Inventory Management Functions**

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>RESTRICTIONS</b> [ADVANCE_RATE_RESTRICTION]		Ability to set restrictions on rates and room types for specific dates. Rate strategies rules can be configured to automate restrictions being applied to rates.
	<b>RATE CATEGORY RESTRICTIONS</b> [RESTRICTION_RATECATEGORY]	Enables setting restrictions at the rate category level.
	<b>RESTRICTION TYPE</b> [RESTRICTION_TYPES]	Specifies the restriction types available at the property. Valid values: <ul style="list-style-type: none"> <li>• Arrival</li> <li>• Departure</li> <li>• Stay Through</li> <li>• Length of Stay</li> <li>• Advance Booking</li> <li>• Length of Stay Not Available</li> </ul>
<b>ROOM CLASS</b> [ROOMCLASS_YN]		Room class functionality enables the allocation of room types to a room class hierarchy. Within OPERA Cloud Services all search panels and reports can be filtered by room class. This is useful for properties with a club floor(s) or different styles of accommodation that operationally need to exclude other rooms types for daily processing.
<b>ROOM POOL</b> [ROOM_POOLS]		Enables the ability to group multiple room types together into a generic room type for the purpose of blocking generic room types in block room grids (summary room types).
<b>SELL LIMITS</b> [SELL LIMITS]		Enables overbooking functionality to control the number of rooms that can be booked per room type beyond the physical inventory. Sell limits could also be an under-booking value to prevent the full room inventory from being sold.

## OPERA Controls — Look To Book Sales Screen

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls Look To Book Sales Screen group.

**Table 11-43 OPERA Controls — Look To Book Sales Screen Functions**

FUNCTION	DESCRIPTION
<b>TURNAWAY FUNCTIONALITY</b> [TURNAWAYS]	Enables the tracking of denied or refused reservations and the associated reason for the turnaway of the reservation for statistical purposes.

**Table 11-44 OPERA Controls — Look To Book Sales Screen Parameters**

PARAMETER	DESCRIPTION
<b>AUTOMATIC CREATION OF PROFILE</b> [AUTO_CREATE_PROFILE]	Automatically creates a profile when no records match the name entered in the search area.
<b>DEFAULT BLANK ARRIVAL DATE</b> [DEFAULT_BLANK_ARRIVAL_DATE]	Sets the arrival date to blank for new reservations.
<b>DISPLAY RATE DESCRIPTION</b> [LTB_DISPLAY_RATE_DESC]	Shows the rate description on the Look To Book Sales screen.
<b>DISPLAY RATE LONG INFORMATION</b> [LTB_DISPLAY_RATE_LONG_INFO]	Shows the rate long information on the Look To Book Sales screen.
<b>DISPLAY RATE SHORT INFORMATION</b> [LTB_DISPLAY_RATE_SHORT_INFO]	Shows the rate short information on the Look To Book Sales screen.
<b>DISPLAY ROOM DESCRIPTION</b> [LTB_DISPLAY_ROOM_DESC]	Shows the room description on the Look To Book Sales screen.
<b>DISPLAY ROOM LONG DESCRIPTION</b> [LTB_DISPLAY_ROOM_LONG_DESC]	Shows the room long description on the Look To Book Sales screen.
<b>SHOW ALTERNATE PROPERTIES</b> [DEFAULT_ALTERNATE_PROPERTIES]	Shows alternate properties while checking availability.

Table 11-44 (Cont.) OPERA Controls — Look To Book Sales Screen Parameters

PARAMETER	DESCRIPTION
<b>SHOW PROFILE DISCOUNTED RATES</b> [SHOW_PROFILE_DISCOUNTS_IN_RATE_AVAILABILITY]	Apply profile discounts to the negotiated rates displayed in Look to Book Sales screen.

Table 11-45 OPERA Controls — Look To Book Sales Screen Settings

SETTING	DESCRIPTION
<b>AUTO EXPAND AVAILABILITY FOR PROPERTIES</b> [AUTO_FETCH_PROP_AVAIL_COUNT]	Shows the property availability for this number of properties when searching.
<b>BLOCK CREATION PROMPT THRESHOLD ROOMS</b> [BLOCK_CREATION_THRESHOLD_ROOMS]	Specifies the number of rooms threshold to prompt for block creation in the Look to Book Sales screen at the time of Book Now.
<b>DEFAULT AVAILABILITY OPTION</b> [DEFAULT_AVAILABILITY_OPTION]	Includes closed rates for rate availability according to this selection. Valid values: <ul style="list-style-type: none"> <li>• Only Available Rates — When the Closed check box is not selected, any closed rates are not shown.</li> <li>• Include Closed Occupancy — When the Closed check box is not selected, closed rates due to occupancy restrictions are still included in the result.</li> <li>• Include Closed Rates — When the Closed check box is not selected, any closed rates are not shown.</li> </ul>
<b>DEFAULT AVAILABILITY VIEW</b> [DEFAULT_AVAILABILITY_VIEW]	Specifies the display set view in the Look to Book screen. Valid values: <ul style="list-style-type: none"> <li>• Initial Display Set</li> <li>• All Display Sets</li> </ul>
<b>DEFAULT DISPLAY SET</b> [O9_DEFAULT_DISPLAY_SET]	Specifies the display set for the Availability grid. Valid values: <ul style="list-style-type: none"> <li>• All active display sets.</li> </ul>
<b>DEFAULT RESERVATION TYPE FOR A NEW RESERVATION</b> [RESERVATION_TYPE]	Specifies the reservation type for a new reservation. Valid values: <ul style="list-style-type: none"> <li>• All configured reservation types that are active for the property.</li> </ul>
<b>LTB ARRIVAL DATE HANDLING</b> [DEFAULT_BLANK_ARRIVAL_DATE]	

Table 11-45 (Cont.) OPERA Controls — Look To Book Sales Screen Settings

SETTING	DESCRIPTION
<b>LTB ARRIVAL DATE HANDLING FOR HUB</b> [DEFAULT_BLANK_ARRIVAL_DATE_HUB]	
<b>PROPERTY ORDER</b> [PROPERTY_ORDER]	Specifies the property order pattern on the Look to Book screen. <ul style="list-style-type: none"> <li>• MOSTAVAIL : Most available rooms in descending order</li> <li>• LEASTAVAIL : Least available rooms in ascending order</li> <li>• MOSTPERCAVAIL : Highest percentage of available rooms in descending order</li> <li>• LISTPERCAVAIL : Percentage of available rooms in ascending order</li> <li>• SHORTESTDISTANCE : Shortest distance</li> <li>• DEFAULT : property configuration and search criteria (e.g. distance from city.)</li> </ul>
<b>RESERVATION ORIGIN CODE</b> [DEFAULT_ORIGIN_CODE]	Specifies the origin code for new reservations.

## OPERA Controls — Membership

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls Membership group.

Table 11-46 OPERA Controls — Membership Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>AWARD POINTS REDEMPTION</b> [AWARD_REDEMPTION]	<b>Complimentary</b>	Activates the Award Points Redemption functionality.
<b>AWARDS PROGRAM</b> [AWARDS_MODULE]		Activates the Guest Awards Program functionality.
<b>ENROLLMENT</b>	<b>Complimentary</b>	Activates the ability to enroll guests and contacts in a membership program managed in an external loyalty solution.
	<b>ENROLLMENT SYSTEMS INTEGRATED WITH OPERA CLOUD</b>	Selected loyalty or gaming systems with enrollment capabilities.

Table 11-46 (Cont.) OPERA Controls — Membership Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>FLEXIBLE BENEFITS AWARDS</b> FLEXIBLE_BENEFITS_AWARDS]		Flexible Benefit Award functionality.
<b>INSTANT REDEMPTION</b> [INSTANT_REDEMPTION]		Activates Instant Redemption Functionality

Table 11-47 OPERA Controls — Membership Parameters

PARAMETER	DESCRIPTION
<b>EXPORT AWARDS</b> [MEM_AW_EXP]	Allows you to add data in UDF when creating an export file of awards.
<b>GLOBAL MEMBERSHIP HANDLING</b> [GLOBAL_MEMBERSHIP_HANDLING]	Provides global membership configurations.
<b>GUARANTEED AVAILABILITY FOR MEMBERS</b> [MEMBER_GUARANTEED_AVL]	Activates guaranteed availability functionality for members.
<b>LOYALTY MEMBERSHIP CONFIGURATION</b> [OCIS_MEM_CONF]	Allows configuration of certain aspects of the loyalty primary membership in an environment when loyalty cloud services are not active.
<b>MEMBER PROFILE UPDATE RESTRICTION</b> [MEMBER_PROFILE_UPDATE_RESTRICTION]	When enabled, profile with a membership associated to a reservation, the name on the reservation cannot be changed, nor can the profile be removed from the reservation. Also first name, last name and Merge attributes will not be available.
<b>MEMBERSHIP EXCEPTION</b> [MEMBERSHIP_EXCEPTION]	
<b>MEMBERSHIP LEVEL FOLIO TEXT</b> [MEMBERSHIP_LEVEL_FOLIO]	Enables folio texts for membership levels.
<b>MEMBERSHIP LINK</b> [MEMBERSHIP_LINK]	Enables linking a profile membership of the property default membership type to a reservation with a different profile.
<b>MEMBERSHIP RATES</b> [MEMBERSHIP_RATES]	Activates membership rates for linking a rate code to a membership type/membership level.
<b>PREFERRED CARD</b> [MEM_PREF_CARD]	Permits a member to choose one preferred card.

**Table 11-48 OPERA Controls — Membership Settings**

SETTING	DESCRIPTION
<b>DEFAULT MEMBERSHIP SOURCE</b> [DEFAULT_MEMBERSHIP_SOURCE]	This is the default source of enrollment that will be appended and added to the membership number when CROSS BRAND RECOGNITION parameter is activated. User should use this application setting to set the enrollment source code that will be added to membership enrolling in this chain.
<b>MEMBER INFO DOWNLOAD RANGE (YEARS)</b> [MEMBER_INFO_YRS_RANGE]	Specifies the number of years that membership information is summarized. Valid values: • 1–9

## OPERA Controls — Profile

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls Profile group.

**Table 11-49 OPERA Controls — Profile Functions**

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CONTACTS</b> [CONTACTS]	<b>ADDRESS TYPE TO COPY WHEN CREATING LINKED PROFILE</b> [COPY_ACC_CON_ADDRESSTYPE_COPY]	Enables the creation of contact profiles linked to company or agent profiles. A guest profile can be flagged as a contact profile also. Contacts can be linked to reservations as the reservation contact.  Specifies the address information copied automatically when creating a linked profile based on the address type. Valid values: • All configured address types
	<b>DEFAULT CONTACT ADDRESS TYPE</b> [DEFAULT_CONTACT_ADDRESS_TYPE]	Specifies the default contact address type. Valid values: • All configured address types
	<b>DEFAULT PHONE TYPE FOR A CONTACT</b> [DEFAULT_CONTACT_PHONE_TYPE]	Specifies the default phone type for a contact. Valid values: • All configured communication types

Table 11-49 (Cont.) OPERA Controls — Profile Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>PHONE TYPE TO COPY WHEN CREATING LINKED PROFILE</b> [COPY_ACC_CON_PHO NETYPE_COPY]	Specifies the phone information copied automatically when creating a linked profile based on the phone type.  Valid values: <ul style="list-style-type: none"> <li>Indicates the profile types for which the profile lookup can be conducted Valid values: <ul style="list-style-type: none"> <li>D - Guest</li> <li>C - Company</li> <li>T- Travel Agent</li> <li>S - Source</li> <li>G - Group</li> </ul> </li> </ul> All configured communication types
<b>FUTURE &amp; PAST STAYS</b> [FUTURE_AND_PAST_STAYS]	<b>Complimentary</b>	Enables viewing information from existing future and past reservations connected to a profile.
<b>IATA COMPANY TYPE</b> [IATA_COMP_TYPE_ACTIVE]	<b>Complimentary</b>	Shows the IATA/Company type in company and travel agent profiles.
<b>INCOGNITO</b> [INCOGNITO]	<b>Complimentary</b>	Enables the ability to identify specific guests as incognito and use a pseudonym while resident at the property (celebrities, for example).
<b>KEYWORD</b> [KEYWORD]	<b>Complimentary</b>	Keywords are defined on company and agents profiles and it's possible to search for profiles using keyword value. A keyword example would be AMEX.
<b>PROFILE LOOKUP</b> [LOOKUP]	<b>Complimentary</b>	Enables the ability to perform profile lookup in integrated systems and download profiles to OPERA Cloud.
	<b>FORCE AUTOMATIC CENTRAL LOOKUP</b> [FORCE_AUTO_CENTRAL_LOOKUP]	When active enforces a profile lookup to an external system.

Table 11-49 (Cont.) OPERA Controls — Profile Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>PROFILE TYPES FOR LOOKUP</b> [PROFILE_LOOKUP_TY PES]	Indicates the profile types for which the profile lookup can be conducted Valid values: <ul style="list-style-type: none"> <li>• D - Guest</li> <li>• C - Company</li> <li>• T- Travel Agent</li> <li>• S - Source</li> <li>• G - Group</li> </ul>
	<b>EXTERNAL LOOKUP BEHAVIOR SETTING</b> [EXTERNAL_LOOKUP_BEHAVIOR]	This setting controls how the Profile Look Up results will be displayed. There are three options available. <ul style="list-style-type: none"> <li>• When set to <b>Force</b>, External Lookup will be done when no matches are found in OPERA Cloud. Results tab for default external interface will be displayed if no local matches are found.</li> <li>• When set to <b>Simultaneous</b>, external profile lookup will be done regardless of matches found in OPERA Cloud. Tabs for the OPERA Cloud local results and external system results will be populated.</li> <li>• When set to <b>Manual</b>, external profile lookup will not be automatically performed. User will have the ability to select a tab for the external system they would like to see results from.</li> </ul>
	<b>DEFAULT EXTERNAL SYSTEM FOR LOOKUP</b> [DEFAULT_EXTERNAL_SYSTEM_FOR_LOOKUP ]	The Default External System for Lookup. Applicable when External Lookup Behavior setting = Simultaneous or Force. A value can only be selected when Outbound configuration is setup at Global (Chain ) level.
	<b>PROFILE MAILING PRIVACY</b> [PRIVACY]	Enables the privacy panel displaying fields related to guest to opt-in or opt-out of receiving promotional mailings.

Complimentary

Table 11-49 (Cont.) OPERA Controls — Profile Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>PRIVACY DEFAULT</b> [PRIVACY_DEFAULT_OPTED_IN]	Defaults the following options in the Correspondence panel for new Guest and Contact profiles: <ul style="list-style-type: none"> <li>• Include in Promotional Mailings / Email</li> <li>• Allow contact via phone</li> <li>• Allow contact via SMS / Text Message</li> <li>• Send information from Third Parties</li> <li>• Participate in Market Research</li> <li>• Allow Contact via Email.</li> </ul>
<b>PROFILE PROTECT</b> [PROFILE_PROTECT]		Enables the ability to lock a profile subscribed with an external system, to prevent updates in OPERA Cloud. Users with the Override Profile Protection tasks assigned to the role(s) may override the protection.
	<b>PROFILE PROTECTION</b> [PROFILE_PROTECTION]	Enables specifying the type of profile protection. Valid values: <ul style="list-style-type: none"> <li>• By Profile Type: Configure profile protection rules per profile type.</li> <li>• By Profile: Enables a protection flag in the profile overview panel of each profile; when active the profile protection rules are then applied. See <a href="#">Configuring Profile Protection</a>.</li> </ul>
<b>PROFILE REVENUE BUCKETS</b> [PROFILE_REVENUE_BUCKETS]		Shows revenue bucket summary information on the Reservation History screen within profile statistics.
<b>RELATIONSHIPS</b> [RELATIONSHIPS]		With this enabled, various relationship between the profiles can be established. Family relationship such as mother-daughter or corporate relationship such as parent-company and subsidiary are configurable. Rate entitlements (negotiated rates) can also be inherited to related profiles using relationships.
	<b>RELATIONSHIPS RATE INHERIT</b> [RELATIONSHIPS_RATE_INHERIT]	Enables reservations to inherit rates from associated relationships of profile types.

**Table 11-49 (Cont.) OPERA Controls — Profile Functions**

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>Complimentary</b> VIP [VIP_STATUS]		Track VIP level on guest profiles and filter reservation searches and reports based on VIP value..

**Table 11-50 OPERA Controls — Profile Parameters**

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
ACCOUNT FORECAST [ACCOUNT_FORECAST]		Enables the ability to setup room night and revenue forecast on sales account profiles. Forecast is setup per property and by calendar month or fiscal period according to the Reporting Period OPERA Control
ACCOUNT FORECAST [ACCOUNT_FORECAST]		
ADDRESS VALIDATION [ADDRESS_VALIDATION]		Enables lookup and validation of postal addresses via integration with an address verification partner solution.
	ADDRESS VALIDATION SYSTEM [ADDRESS_VALIDATION_SYSTEM]	Defines the integrated address validation solution.
	ADDRESS VALIDATION PROFILE TYPES [ADDRESS_VALIDATION_PROFILE_TYPES]	Defines the profile types for address validation.
	ADDRESS VALIDATION COUNTRY CODES [ADDRESS_VALIDATION_COUNTRY_CODES]	Defines the address countries for address validation.
<b>Complimentary</b> ADVANCED TITLE [ADVANCED_TITLE]		Enables advanced title configuration.
ALLOW DUPLICATE IDS [ALLOW_DUPLICATE_IATA]		Permits duplicate IDs for travel agent, source, and company profile types.

Table 11-50 (Cont.) OPERA Controls — Profile Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>AUTO GENERATE CLIENT ID</b> [AUTO_GENERATE_CLIENT_ID]		Generates an ID automatically for an OPERA Cloud profile if the ID is empty. This ID is Client ID for Guest/Group, Corporate ID for Company, and IATA for Travel Agent/Source.
	<b>GENERATE ID FOR PROFILE TYPES</b> [AUTO_GENERATE_ID_TYPES]	Indicates the profile types for which the client ID will be generated automatically.
<b>BYPASS CORP ID VALIDATION</b> [BYPASS_CORP_ID_VALIDATION]		When enabled, If a ZZ is placed in front of Corp ID by the user, OPERA Cloud does not initiate the number validation process.
<b>EXTENDED ACCOUNT NAME SEARCH</b> [EXTENDED_ACCOUNT_NAME_SEARCH]		Account Name Search to Include Name 2 and Name 3. Using this search may increase the search time.
<b>E-CERTIFICATE REDEMPTION</b> [ECERTIFICATE_REDEMPTION]		Activates the e-Certificate functionality.
<b>EXCLUDE RESTRICTED PROFILES FROM PURGE</b> [PURGE_EXCLUDE_CASHBL_IND]		Exclude Restricted Profiles from purge routine.
<b>IATA VALIDATION</b> [IATA_YN]		Validates the IATA number entered in the profile. All numbers are checked against the IATA validation routine.  A new option is available enabling subscribers to perform Travel Agency IATA validation using the IATA Rest API. Validation occurs when profiles are updated with information provided by IATA (based on subscription level).
<b>PERSONAL INFORMATION PROTECTION</b> [PERSONAL_INFORMATION_PROTECTION]		Activates additional security procedures which include anonymization of profile data.

Table 11-50 (Cont.) OPERA Controls — Profile Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>NUMBER OF DAYS UNTIL ANONYMIZATION</b> [NUMBER_OF_DAYS_FOR_ANONYMIZATION]	Defines the number of days after the last activity occurs in which the requested profile can be anonymized.
<b>PROFILE DISCOUNTS</b> [PROFILE_DISCOUNTS]		Enables configuring discounts for negotiated rates.
	<b>DEFAULT PROFILE DISCOUNT REASON SETTING</b> [DEFAULT_PROFILE_DISCOUNT_REASON]	Specifies the default discount reason in the Discount Reason field of the reservation when a profile with a discount is attached. Valid values: <ul style="list-style-type: none"> <li>All configured reservation discount reasons.</li> </ul>
	<b>PROFILE DISCOUNTS PRIORITY SETTING</b> [PROFILE_DISCOUNTS_PRIORITY]	Specifies the priority when applying profile discounts on a reservation when multiple eligible profiles exist. Valid values: <ul style="list-style-type: none"> <li>Profile Type (Company, Travel, Guest, Group, Contact)</li> <li>Lowest</li> </ul>
<b>PROFILE NAME VALIDATIONS</b> [PROFILE_NAME_STRING]		Performs a match and validation on a configured profile type and name string each time a new profile is manually created from Profile Search or from Account Search to see if the name string matches with the profile type.
<b>PROPERTY ACTION CODES</b> [PROPERTY_ACTIONCODES]		Specifies if profile action codes are property specific.
<b>RESTRICT PROFILE MERGE WITH CURRENT AND FUTURE RESERVATIONS</b> [DISALLOW_PROF_MERGE_CURR_FUT_RESV]		Enables merging source and travel agent profiles with current or future reservations.
<b>RESTRICTION / FLAGGED REASONS</b> [RESTRICTION_FLAGGED_REASONS]		Enables specifying a list of values for profile restriction and AR flagged reasons.

Table 11-50 (Cont.) OPERA Controls — Profile Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>SALES INFORMATION</b> [SALES_INFORMATION]		Enables the Sales Information panel in Company, Travel Agent, Source, and Contact profiles. For more information, see <a href="#">Managing Sales Information</a> .
	<b>PROPERTY COMPETITION CODES</b> [PROPERTY_COMPETITION_CODES]	Determines if property competition codes are property specific or centrally administered.
	<b>PROPERTY PRIORITY</b> [PROPERTY_PRIORITY]	Determines if property priorities are property specific or centrally administered.
	<b>PROPERTY ROOMS POTENTIAL CODES</b> [PROPERTY_ROOMS_POTENTIALS]	Determines if property rooms potential codes are property specific or centrally administered.
<b>STORE EXTERNAL EMAILS</b> [STORE_EXTERNAL_EMAILS]		Activates the ability to view and save emails received from partner systems through the Oracle Hospitality Integration Cloud Service. When the Contact OPERA Control is active for Contact profiles it is available with: <ul style="list-style-type: none"> <li>• Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition OR</li> <li>• Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition</li> </ul>
<b>SUBSCRIPTION MANAGEMENT</b> [SUBSCRIPTION_MGMT]		This parameter activates profile subscription management functionality. When OPERA Cloud is integrated to OPERA Control Customer Loyalty Tracking , profiles can be subscribed to one or more properties within the chain. When a profile is updated by a property, the changes will be automatically updated to all subscribed properties.
<b>TAX ID VALIDATION</b> [TAX_ID_VALIDATION]		Ability to validate the Tax ID number entered on the profile. <b>Code:</b> INDIA_TAX_ID_GSTIN_UIN <b>Description:</b> India Tax ID validation for GSTIN/UIN number.

Table 11-50 (Cont.) OPERA Controls — Profile Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>TAX1 NO FIELD</b> [TAX1_NO_FIELD]	Select the Tax ID validation function that will be associated with the TAX1_NO field
	<b>TAX2 NO FIELD</b> [TAX2_NO_FIELD]	Select the Tax ID validation function that will be associated with the TAX2_NO field

Table 11-51 OPERA Controls — Profile Settings

SETTING	DESCRIPTION
<b>COMPANY ADDRESS TYPE</b> [COMPANY_ADDRESS_TYPE]	Specifies the default address type for non-guest profiles. Valid values: <ul style="list-style-type: none"> <li>All active address types, except for the Protected address type.</li> </ul>
<b>COMPANY PHONE TYPE</b> [COMPANY_PHONE_TYPE]	Specifies the default phone type for non-guest profiles. Valid values: <ul style="list-style-type: none"> <li>All phone types.</li> </ul>
<b>DEFAULT MEMBERSHIP TYPE</b> [DEFAULT_MEMBERSHIP_TYPE]	Populates the selected membership type automatically when adding a new membership to a profile and the membership used for linking a profile membership to a reservation. Valid values: <ul style="list-style-type: none"> <li>All active membership types.</li> </ul>
<b>GUEST ADDRESS TYPE</b> [INDIVIDUAL_ADDRESS_TYPE]	Specifies the default address type for a guest profile. Valid values: <ul style="list-style-type: none"> <li>All configured address types, except for the Protected address type.</li> </ul>
<b>GUEST EMAIL TYPE</b> [GUEST_EMAIL_TYPE]	Specifies the default email type for a guest profile. Valid values: <ul style="list-style-type: none"> <li>All configured email types.</li> </ul>
<b>GUEST PHONE TYPE</b> [INDIVIDUAL_PHONE_TYPE]	Specifies the default phone type for a guest profile. Valid values: <ul style="list-style-type: none"> <li>All configured phone types.</li> </ul>
<b>PURGE ADDRESS COUNTRY</b> [PURGE_ADDRESS_COUNTRY]	Purges guest profiles only from the selected country codes. Valid values: <ul style="list-style-type: none"> <li>All country codes.</li> </ul>
<b>PURGE DAYS</b> [INACTIVE_DAYS_FOR_GUEST_PURGE]	Purges guest profiles after this number of days of no activity. Valid values: <ul style="list-style-type: none"> <li>90 — 3650</li> </ul>

**Table 11-51 (Cont.) OPERA Controls — Profile Settings**

SETTING	DESCRIPTION
<b>PURGE DAYS FOR INCOMPLETE PROFILES</b> [PURGE_INCOMPLETE_PROFILE_DAYS]	Purges guest profiles after this number of days of no activity and without Address1, Address2, and a defined Communication Method (for example, phone, fax, or email). Valid values: <ul style="list-style-type: none"> <li>Any number of days.</li> </ul>
<b>PURGE LAST STAY DAYS</b> [PURGE_LAST_STAY_DAYS]	Purges guest profiles after this number of days of no stay activity. Valid values: <ul style="list-style-type: none"> <li>Must be greater than the number of the Purge Days setting.</li> </ul>
<b>PURGE MINIMUM STAYS</b> [PURGE_MIN_STAYS]	Purges guest profiles whose number of stays is less than this number. Valid values: <ul style="list-style-type: none"> <li>1 — 20, or null.</li> </ul>
<b>RESTRICT PROFILE FIELDS CHANGES AFTER FOLIO CREATION</b> [O9_RESTRICT_FOLIO_PROFILE_CHANGES]	Restrict users from updating selected profile details once a folio is created for a Payee and/or Guest profile. Valid values: <ul style="list-style-type: none"> <li>Name: Changes are not allowed to Name, First Name or Title of the Guest Profile</li> <li>TAX ID: Changes are not allowed to TAX ID or TAX ID2 fields of the Payee profile</li> </ul>
<b>SCHEDULED ACTIVITIES</b> [PROFILE_ACTIVITIES]	Enables viewing reservation activities / scheduled activities. Valid values: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>
<b>STORED ID DOCUMENT IMAGE TYPE</b> [OPERA9_ID_DOCUMENT_STORED_IMAGE_TYPE]	Type of image to be stored from scanned ID documents: <ul style="list-style-type: none"> <li>NO IMAGE</li> <li>FULL IMAGE</li> <li>FACE IMAGE</li> </ul>

## OPERA Controls — Rate Management

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls Rate Management group.

**Table 11-52 OPERA Controls — Rate Management Functions**

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ADVANCED DYNAMIC BASE RATES</b> [ADVANCED_DYNAMIC_BASE_RATES]		Advanced Dynamic Base Rates Functionality. Dependent rates can be configured in which they are dynamically based off of other rate codes by rate set.

Table 11-52 (Cont.) OPERA Controls — Rate Management Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ADVANCED PACKAGES</b> [ADVANCED_PACKAGES]		Enables allowance based package items to be configured . Allowances defines a maximum spend only with the actual revenue for the package item posted via an external system such as point of sale or video system . OPERA Cloud accurately tracks allowances and revenue offset and handles any under-consumption or overage.
<b>BASE RATES</b> [BASE_RATES]		Enables a rate code pricing schedule to be derived from pricing schedule of another rate code, adjusted by a flat amount of percentage. When the pricing schedule is updated from the parent rate all derived rates are adjusted accordingly.
	<b>BASE RATE EXTRA PERSON CALCULATION</b> [BASE_CALC_EXTRA_PERSON]	Applies base rate calculations to extra adult and extra child amounts.
<b>BEST AVAILABLE RATES</b> [BEST_AVAILABLE_RATES]		Enables logic to determine and display the best available rate per room type in the Look to Book sales screen for new reservations.
	<b>BEST AVAILABLE RATE TYPE</b> [BEST_AVAILABLE_rate_type]	Valid values: <ul style="list-style-type: none"> <li>• <b>BAR BY DAY</b> — up to 25 rate codes per day may be scheduled for consideration of the Best Available Rate. Look to Book will return up to 4 rate amounts per room type for the Best Available Rate.</li> <li>• <b>BAR BY LOS</b> — the Best Available Rate will be determined based on the Length of Stay. Only one rate code per Length of Stay per day may be scheduled as the Best Available Rate. Look to Book will only display 1 rate amount per room type as the Best Available Rate.</li> <li>• <b>BEST BAR BY DAY</b> — out of all Best Available Rates only the best rate code (lowest price) will display in Look to Book. You can also setup BAR based rate codes to derive the rate amount from the Best BAR rate code's amount.</li> </ul>
	<b>DEFAULT TO HIGHEST BAR</b> DEFAULT_TO_HIGHEST_BAR	This parameter enables a flag on the rate code definition to force BAR dependent rates to calculate its rate amount based on the highest BAR rate instead of defaulting to its own rate detail when all BAR Rates are closed.

Table 11-52 (Cont.) OPERA Controls — Rate Management Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CHILD RATES BY DEFINED BUCKETS</b> [CHILD_RATES]	<b>RATE GROUPS</b> RATE_GROUPS	When enabled, out of all Best Available Rates, only the 'best' rate code for each rate group is displayed. Users can also setup BAR Based rate codes to calculate the rate amount based on the Best BAR rate code's amount of a particular rate group.
	<b>FREE CHILD RATES BY DEFINED BUCKETS</b> [FREE_CHILD_RATES]	Controls display of child rate fields in rate configuration and Look to Book Sales screen - the rate amount for stay is calculated based on child age range buckets.
	<b>MIN AGE RATE BUCKET 1 SETTING</b> [MIN_CHILD_AGE_BUCK ET1]	Controls whether child rate bucket fields (0 - 2, etc.) appear; Enables free stay for one child when x-number of children are booked per room.
	<b>MAX AGE RATE BUCKET 1</b> [MAX_CHILD_AGE_BUCK ET1]	Defines the lower number of bucket 1 (i.e., the 0 of 0 - 2).
	<b>MIN AGE RATE BUCKET 2</b> [MIN_CHILD_AGE_BUCK ET2]	Defines the upper number of bucket 1 (i.e., the 2 of 0 - 2).
	<b>MAX AGE RATE BUCKET 2</b> [MAX_CHILD_AGE_BUCK ET2]	Defines the lower number of bucket 2 (i.e., the 4 of 4 - 6).
	<b>MIN AGE RATE BUCKET 3</b> [MIN_CHILD_AGE_BUCK ET3]	Defines the upper number of bucket 2 (i.e., the 6 of 4 - 6).
	<b>MAX AGE RATE BUCKET 3</b> [MAX_CHILD_AGE_BUCK ET3]	Defines the lower number of bucket 3. That is 8 of 8 - 10).
	<b>RATE BUCKET 4</b> [CHILD4_LABEL]	Defines the upper number of bucket 3 That is 8 of 8 - 10).
		<b>RATE BUCKET 4</b> [CHILD4_LABEL]

Table 11-52 (Cont.) OPERA Controls — Rate Management Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>RATE BUCKET 5</b> [CHILD5_LABEL]	Specifies the label for the fifth rate bucket. Rate amounts cannot be defined for this bucket in rate code configuration. The field and label only show in reservations.
<b>DAILY RATES</b> [DAILY_RATES]		When active the price for a rate can be defined on a daily basis rather than date range. A maximum of 10 daily rate codes can be configured for per property.
	<b>ADVANCED DAILY RATES</b> ADVANCED_DAILY_RATES	An Advanced Daily Rate behaves like a regular Daily Rate with the exception that the pricing schedule is derived from a source "Advanced Daily Base Rate", instead of manually entering a pricing schedule.
	<b>DAILY RATES MAX DAYS SETTING</b> [DAILY_RATES_MAX_DAYS]	Specifies the maximum number of days that can be configured for the daily rates functionality.
<b>DAY TYPES</b> [DAY_TYPES]		Day type codes can be configured to either increased or decreased the rate for eligible rate codes on selected dates on a calendar.  Without having to create new pricing schedules rates can be adjusted on specific days throughout a year for event such as a public holiday or Easter.  Note - OTA's and other external systems do not support day type rate adjustments.
<b>DYNAMIC BASE RATES</b> [DYNAMIC_BASE_RATES]		Enables you to setup derived rate codes which dynamically calculates price based on daily or regular rate code, with option to compare with a static pricing schedule on derived rate to offer the lowest rate of the two.
<b>NEGOTIATED RATES</b> [NEGOTIATED_RATES]		Ability to save one or more rate codes on a profile. When creating new reservation for existing profile in Look to Book sales screen OPERA Cloud will display the negotiated rate for profile to ensure the correct rate is quoted to the caller.
<b>OCCUPANT THRESHOLD PRICING METHOD</b> [OCCUPANT_THRESHOLD_PRICING_METHOD]		Enables the pricing method that calculates an extra charge based on the occupants.

Table 11-52 (Cont.) OPERA Controls — Rate Management Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>Complimentary</b> <b>PROMOTIONS MODULE</b> [PROMOTIONS_MODULE ]		Promotions enables rates codes to linked to a promotion code and sold via query for promotion from Look to Book sales screen; limited used coupons can also be generated for promotions.
	<b>HIDE PROMOTION RATES</b> [HIDE_PROMOTION_RATES]	Hides rate codes attached to promotions in the Look to Book Sales screen unless selecting the specific promotion code.
<b>RATE CODE APPROVAL</b> [RATE_CODE_APPROVAL]		Allows to set a layer of approval for all Rates prior to them being activated for use across the Enterprise.
<b>RATE CODE UPLOAD TO ORACLE DISTRIBUTION</b> [MYFIDELIO_RATE_UPLOAD]		When active, a new component checkbox will be displayed in rate code configuration allowing users to select which rate codes should be uploaded to the Oracle Distribution. This should only be enabled if your OPERA Cloud ORS has an Oracle Distribution central connector.
<b>RATE SEASONS</b> [RATE_SEASONS]		Rate seasons enable season codes to be configured with start and end dates. When configuring pricing schedules the season code can be selected.
<b>RATE TIERS</b> [RATE_TIERS]		Activates rate tier functionality to configure length of stay tiers and rate schedules by defined lengths of stay.
	<b>RATE TIER DETAILS</b> [RATE_TIER_DETAILS]	Defines the length of stay tiers that rate schedules can be created under. Valid values: <ul style="list-style-type: none"> <li>• 1-2</li> <li>• 3-7</li> <li>• 8-20</li> <li>• 21+</li> </ul>
<b>REVENUE POSTING BY ROOM TYPE/ROOM CLASS</b> [RATE HEADER MULTIPLE ROOM TRN CODE LINKAGE]		Enables linking multiple transaction codes by Room Class / Room Type on the Financial Details. Note: If the Revenue Posting by Market Code control is active, this function is used as a secondary posting method.
<b>SUPPRESS RATE</b> [SUPPRESS_RATE]		This functionality supports confidential rates - an 'SR' is displayed instead of the rate amount in Look to Book sales screen and the reservation. Only users with the elevated privilege 'VIEW SUPPRESSED RATE DETAILS' are able to view the rate amount details.

Table 11-53 OPERA Controls — Rate Management Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ABILITY TO QUOTE RATES IN FOREIGN CURRENCIES</b> [MULTI_CURRENCY]		Enables the ability to configure rate and package pricing in a foreign currency and post the associated charges in your properties local currency, based on a daily exchange rate. The Foreign Currency Handling OPERA Control to be must be active. For more information, see <a href="#">OPERA Controls — Cashiering</a>
	<b>REFERENCE CURRENCY CALCULATION</b> [REFERENCE_CURRENCY_CALCULATION]	Determines how the reference currency appears on the folio. Valid values: <ul style="list-style-type: none"> <li>• <b>CURRENT</b> — The reference currency amounts are based on the exchange rate calculation for the date the folio is printed/previewed.</li> <li>• <b>ACTUAL</b> — The reference currency amounts are based on the exchange rate calculation for the date the transaction was posted.</li> </ul>
<b>ADVANCED RATE CODE POSTING RHYTHM</b> [ADVANCED_RATE_CODE_POSTING_RHYTHM]		When activated you can define posting rhythms for specific date ranges. You can indicate if the posting rhythm can be repeated within the Stay or Sell segment within the Stay.
<b>DEFAULT MEMBERSHIP FLAG</b> [DEFAULT_MEMBERSHIP_FLAG_ON_RATE_HEADER]		Selects the Membership check box automatically for all newly created rate codes.
<b>MAXIMUM RATE ALLOWED</b> [MAXIMUM_RATE_ALLOWED]		Enables entry of a maximum rate amount for single and double rate amounts on the Rate Schedules screen. This amount is evaluated at the time of booking and substituted for any night where the discount calculated for the rate exceeds the maximum rate amount.
<b>MINIMUM RATE ALLOWED</b> [MINIMUM_RATE_allowed]		Enables entry of a minimum rate amount for single and double rate amounts on the Rate Schedules screen. This amount is evaluated at the time of booking and substituted for any night where the discount calculated for the rate is lower than the minimum rate amount.

Table 11-53 (Cont.) OPERA Controls — Rate Management Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>PACKAGE PRICING AND AVAILABILITY ATTRIBUTES</b> [PACKAGE PRICING AND AVAILABILITY ATTRIBUTES]		Enables specifying begin and end sell dates on a package and specifying min/max nights and min/max persons for each date range on a package.
<b>PACKAGES SOLD SEPARATELY</b> [PACKAGES_SOLD_SEPARATELY]		Enables flagging packages as Sell Separate in configuration.
<b>PRIVILEGED RATES</b> [PRIVILEGED_RATES]		Activates privileged rates functionality.
<b>RATE CODE POSTING RHYTHM</b> [DISCOUNT_FREE_NTS]		When active you can define if the rate code amount posts every night or every X nights.
<b>RATE CODE RESTRICTIONS</b> [RESTRICTION_RATECODE]		Enables setting restrictions at the rate code level.
<b>RATE FLOOR</b> [RATE_FLOOR]		Activates rate floors functionality to set a minimum rate amount for rate schedules.
	<b>RATE FLOOR LEVEL OF CONTROL</b> [RATE_FLOOR_LEVEL_OF_CONTROL]	Determines the level that rate floors are set. Valid values: <ul style="list-style-type: none"> <li>• RATE LEVEL</li> <li>• ROOM TYPE LEVEL</li> </ul>
<b>RATE OWNERSHIP HANDLING</b> [RATE_OWNERSHIP]		Exposes additional columns on the rate code protection screen for property and central. Also enables flagging rate codes as property or centrally owned.
<b>REFRESH MANUALLY ADDED PACKAGES</b> [REFRESH MANUAL PACKAGES]		Refreshes the attributes of manually added packages on a reservation based on the existing package configuration.
<b>REVENUE POSTING BY MARKET CODE</b> [REVENUE_POSTING_BY_MARKET_CODE]		Determines if revenue posts based on Rate Code Configuration or Market Code Mappings.
<b>SHOW ADD SEPARATE LINE PACKAGES TO RATES IN THE LTB</b> [INCL_PRINT_SEPARATE_PACKAGES_IN_RATE_QUERY]		Includes packages that are 'Add Rate Separate Line' in the rate amount in the Look To Book Sales screen.

**Table 11-53 (Cont.) OPERA Controls — Rate Management Parameters**

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>TICKET PACKAGES</b> [TICKET_PACKAGES]		Enables packages to be flagged as a ticket and for tickets to be associated to a reservation and show in a ticket panel for action.

**Table 11-54 OPERA Controls — Rate Management Settings**

SETTING	DESCRIPTION
<b>DEFAULT PACKAGE TRANSACTION CODE</b> [DFLT_PKG_TRAN_CODE]	Defines the default transaction code for packages on rate codes.
<b>DEFAULT TRANSACTION CODE</b> [DFLT_TRAN_CODE]	Defines the default transaction code for rate codes. Valid values: <ul style="list-style-type: none"> <li>All transaction codes associated with a Revenue group and In House Sales = N, In House Payment = N, and In House Deposit = N. This excludes comp transaction codes.</li> </ul>
<b>PACKAGE ATTRIBUTES FOR EXTERNAL RATES</b> [PACKAGE_ATTRIBUTE_S_FOR_EXTERNAL_RATES]	Enables selecting attributes so that the packages with selected attributes can be attached to externally controlled rate codes. Valid values: <ul style="list-style-type: none"> <li>Included in Rate</li> <li>Add Rate Separate Line</li> <li>Add Rate Combined Line</li> </ul>
<b>PACKAGE LOSS</b> [PACKAGE_LOSS]	Defines the package loss transaction code. Valid values: <ul style="list-style-type: none"> <li>All transaction codes except those marked as internal only.</li> </ul>
<b>PACKAGE PROFIT</b> [PACKAGE_PROFIT]	Defines the package profit transaction code. Valid values: <ul style="list-style-type: none"> <li>All transaction codes except those marked as internal only.</li> </ul>
<b>RATE INFORMATION TEMPLATE</b> [RATE_INFO_TEMPLAT E]	Defines the rate information template to configure generic text that is common for most rate codes. When configuring rate plans, the rate information template for the property can be populated in the rate code's long information field and further modified to suit the individual rate code as needed.

## OPERA Controls — Reservations

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls Reservations group.

Table 11-55 OPERA Controls — Reservations Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<div style="background-color: #4CAF50; color: white; padding: 2px; border-radius: 5px; display: inline-block;">Complimentary</div> <b>AI ROOM ASSIGNMENT</b> [AI_ROOM_ASSIGNMENT ]		Enables Automated Intelligence Room Assignment feature. AI Room Assignment would understand wear & tear of each room, matches preferences of guests to room features, gap minimization of reservations for each room, understands Accessibility and smoking preferences of guests and then finally assign rooms to guests automatically by saving lot of time for front desk persons.
	<b>LOCK IN DAYS</b> [LOCK_IN_DAYS]	The number of upcoming days for which rooms are assigned.
	<b>ACCESSIBILITY PREFERENCE CODES</b> [ACCESSIBILITY_PREF_CODES]	Preference Codes used to categorize accessibility requests.
	<b>OPTIMIZATION OBJECTIVE</b> [OPTIMIZATION_OBJECTIVE]	Business objective (Guest Satisfaction or Operational Efficiency) to be favored during room assignment. Select "Balanced" to give equal weightage to both objectives.
	<b>ALLOW AUTOMATIC ROOM UPGRADES</b> [ALLOW_AUTOMATIC_ROOM_UPGRADES]	Determines if the room assignment process can automatically upgrade guests according to the settings in Room Types Hierarchy.
<div style="background-color: #4CAF50; color: white; padding: 2px; border-radius: 5px; display: inline-block;">Complimentary</div> <b>ACCOMPANYING GUEST</b> [ACCOMPANYING_GUEST ]		Allows for additional guest profiles to be associated with a reservation to identify multiple guests occupying one room. Eliminates needing to create share reservations.

 **Note:**

This function cannot be used in conjunction with ENHANCED ROOM ASSIGNMENT function or ROOM TYPE AUTO ROOM ASSIGN parameter.

Table 11-55 (Cont.) OPERA Controls — Reservations Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ADVANCE CHECK IN</b> [ADVANCE_CHECK_IN]		<p>Master control that activates the Advance Check In functionality, which provides the option of flagging one or multiple arrival reservations as Advance Checked In reservations with the option to also record the estimated time of return to the property. Housekeeping is alerted of the ETR when performing their tasks.</p> <p>Note: Pseudo room reservations cannot be flagged for Advance Check In.</p> <p>Note: To flag a reservation for Advance Check In the reservation must have a valid payment method.</p>
	<b>AUTO CHECK IN OF ADVANCED CHECKED IN RESERVATIONS</b> [AUTO_CHECK_IN_ADVA NCE_CHECK_IN_RES]	<p>Automatically checks in Advance Checked In reservations when the room housekeeping status of the reservation's room number matches the room housekeeping status set in the Room Status for Auto Check In of Advance Checked In Reservations.</p> <p>Available when Advance Check In function is Active.</p> <p>When turned On makes the following available:</p> <ul style="list-style-type: none"> <li>Room Status for Auto Check In of Advance Checked In Reservations setting</li> </ul> <p>Enables the Auto Check In Processor in the Toolbox Utilities - Processors</p>
	<b>EXPECTED TIME OF RETURN (ETR)</b> [EXPECTED_TIME_OF_RE TURN]	<p>Enables the option to provide an Expected Time of Return (ETR) and/or an Expected Time of Return Comment on reservations, and adds ETR search capabilities for arrival reservations when an ETR is provided.</p> <p>Available when the Advance Check In function is Active.</p> <p>Expected Time of Return value is in property time format.</p> <p>Expected Time of Return comment allows up to 200 characters.</p>

Table 11-55 (Cont.) OPERA Controls — Reservations Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>ROOM STATUS FOR AUTO CHECK IN OF ADVANCE CHECKED IN RESERVATIONS</b> [ROOM_STATUS_FOR_AUTO_CHECK_IN_ADVANCE_CHECK_IN_RES]	<p>Defines the room housekeeping status (or multiple statuses) that triggers the Auto Check in for Advance Checked In reservations.</p> <p>Available when Auto Check In of Advance Checked In Reservations parameter is turned On.</p> <p>Values for the room housekeeping status are multi-select from all room housekeeping statuses available at the property.</p> <p>Default list values are Clean and Dirty room status.</p> <p>This list can also show values for Inspected, Pickup and Out of Service when their respective OPERA Control functions for “Inspected Status”, “Pickup Status” and “Out of Service” in Room Management are active.</p> <p>Note: If a value is not set in the Room Status for Auto Check In of Advance Checked In Reservations setting, Advance Checked In reservations will not be automatically checked in even though the Auto Check In Advance Checked In Reservations parameter is On.</p>
	<b>ADVANCED DISCOUNT</b> [ADVANCED_DISCOUNT_REASONS]	<p>The Advanced Discount functionality will enable calculation rules on the discount reasons that can be attached to reservation with the auto attach functionality.</p>
	<b>ALERTS</b> [ALERTS]	<p>Alerts can be manually entered for a specific reservation and set to display on screen or print. Global alerts rules can also be configured with conditions as to when the alert should trigger. When the condition is met the alert appears on screen or is printed..</p>
	<b>POPUP ALERTS</b> [FULLSCREEN_ALERTS]	<p>Shows alerts in a pop-up.</p>
	<b>WELCOME OFFER</b> [WELCOME_OFFER_ALERT]	<p>Activates the welcome offer alert functionality to offer certain predefined choices for the guest to select upon check in.</p>

Complimentary

Table 11-55 (Cont.) OPERA Controls — Reservations Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>WELCOME OFFER PAYMENT TRANSACTION CODE</b> [WELCOME_OFFER_PAYMENT_TRANSACTION_CODE]	Defines the transaction code used to settle the Post It transaction selected during the welcome offer process so that it is posted to the PM room specified in the Reservations: Welcome Offer Posting Master application setting.
	<b>WELCOME OFFER OPTIONS</b> [WELCOME_OFFER_OPTIONS]	Specifies the options available for the guest to select as a welcome offer. Valid values: <ul style="list-style-type: none"> <li>eCoupons: Select eCoupon codes to attach to a reservation.</li> <li>Items: Select and associate a value from item inventory to the reservation.</li> <li>Post It: Select an article from the Post It screen, post and settle to a PM room.</li> </ul>
	<b>WELCOME OFFER POSTING MASTER</b> [WELCOME_OFFER_PM_ROOM]	Defines the Posting Master that the Post It transaction is settled to during the welcome offer process.
	<b>CALLER INFORMATION</b> [CALLER_INFORMATION]	Caller information can be entered and tracked for all new and updates to reservation. Caller history details is then available.
	<b>CENTRALIZED CONFIRMATIONS</b> [CENTRALIZED_CONFIRMATIONS]	Enables sending centralized confirmation letters via the CRS external system.
	<b>COPY RESERVATION</b> [ADD_ON]	Enables the ability to copy (clone) a reservation and make further modifications as needed.
	<b>CREDIT RATINGS</b> [ADVANCED_POLICIES]	Credit ratings are profile-based and can be referenced in deposit and cancellation rule configuration. When creating a new reservation or block the credit rating for the linked profile is considered in the calculation of the deposit and cancellation schedule.
	<b>DO NOT MOVE ROOM</b> [DO_NOT_MOVE_ROOM]	Enables a Do Not Move flag on the reservation once a room is assigned. Only users with elevated privilege can remove the do not move flag and modify the room number value.

Complimentary

Table 11-55 (Cont.) OPERA Controls — Reservations Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ENHANCED ROOM ASSIGNMENT</b> [ENHANCED_ROOM_ASSIGNMENT]		When active, users will have the ability to define the Rating/Points for specific Reservation attributes. OPERA Cloud will then use this logic when conducting a Room Assignment during Pre-Arrival planning or at the time of arrival.
		 <b>Note:</b> Cannot be used in conjunction with AI ROOM ASSIGNMENT function or ROOM TYPE AUTO ROOM ASSIGN parameter.
	<b>MEMBERSHIPS IN ROOM ASSIGNMENT WORKFLOW</b> [MEMBERSHIPS_IN_ROOM_ASSIGNMENT_WORKFLOW]	Specifies the membership types for the configured membership levels that are available on the Membership Levels tab of the Room Assignment Workflow used when calculating the hierarchy to assign the best room to the best guest.
<b>FIXED RATES</b> [USE_FIXED_RATE_FUNCTIONALITY]		Enables the ability to manually override the rate amount based on rate code pricing schedule and fix the amount for date(s).
	<b>ALWAYS USE FIXED RATES</b> [ALWAYS_FIXED_RATES]	Stores all reservations created or modified in the system as fixed rate reservations.
	<b>DISCOUNT FOR FIXED RATE</b> [USE_DISCOUNT_FOR_FIXED_RATE]	Calculates the discount for the fixed rate.
	<b>SHARE RATE SPLITTING FOR FIXED RESERVATIONS</b> [SHARE_RATE_SPLITTING_FOR_FIXED_RESERVATIONS]	Enables share rate splitting on reservations marked as fixed with the same rate code.

Complimentary

Table 11-55 (Cont.) OPERA Controls — Reservations Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>GUEST LOCATORS</b> [LOCATORS]		Enables the ability to set a temporary location for a particular guest in order to inform other users, such as telephone operators, of the guests' current whereabouts on or off premises.
<b>ITEM INVENTORY</b> [ITEM_INVENTORY]		Enables functionality to track items that can be added to a reservation or sold via a package code; the stock inventory levels are then tracked as items are sold. The availability of inventory items can then be viewed for each date.
	<b>ITEM INVENTORY POOL</b> [ITEM_INVENTORY_POOL]	Activates the item inventory pool functionality, which enables items to be sold with a maximum pool ceiling quantity.
	<b>ALLOW INVENTORY ITEMS OUTSIDE OF STAY DATES</b> [ALLOW_INV_ITMS_OUTSIDE_STAY]	When activated, Inventory Items can be configured as Outside of Stay Dates which enable you to attach the item beginning before and/or ending after the stay dates of the Reservation.
	<b>SELL CONTROL ITEMS</b> [SELL_CONTROL_ITEMS]	When active, the sale of the item will be restricted if there is no inventory available for the selected dates. Users with the task for Override Item Sell Control will be able to book items when there is no inventory available for the selected dates.
		Enables the option to merge one or more reservations to a main reservation if stay nights are sequential.
<b>MERGE RESERVATIONS</b> [MERGE_RESERVATIONS]		
	<b>ALLOW MERGE RESERVATIONS FOR FUTURE ARRIVALS</b> [ALLOW_MERGE_FUTURE_ARRIVALS]	When active, the merge reservation option is available for current and future arrivals. If inactive, the merge reservation option is available only for today's arrivals.
	<b>CANCEL REASON CODE FOR MERGE RESERVATIONS</b> [CANCEL_REASON_MERGE_RESERVATIONS]	Choose the Cancel Reason code to be used while reservations(s) are cancelled due to Reservation Merge.

Complimentary

Table 11-55 (Cont.) OPERA Controls — Reservations Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>MESSAGES</b> [MESSAGES]		Enables the ability to enter, notify, and print messages for a guest. Messages can be sent to all guests, individually, by group block and other filter criteria. Messages can be flagged received or not received and printed a user-configurable format. With the appropriate interfaces active the messages will trigger the message-waiting lamp on the telephone in guest room or will send the message directly to the video system.
<b>PRE-REGISTRATION CHECK IN</b> [INTERNET_CHECK_IN]		Activates the pre registration functionality, flagging the reservation as pre-registered for check-in via third-party mobile app or hotel website.
	<b>PRE-REGISTRATION EXTERNAL SYSTEM ALERT</b> [INTERNET_CHECK_IN_A LERT_CODE]	Stores the external system alert code used for alerts created for internet checked-in reservations.
	<b>PRE-REGISTRATION EXTERNAL SYSTEM TRACE</b> [INTERNET_CHECK_IN_T RACE_DEPT]	Stores the external system trace department code used for traces created for internet checked-in reservations.
<b>RESERVATION AUTO- ATTACH ELEMENTS</b> [RESV_AUTO_ATTACH]		When enabled it is possible to configure rules to auto-update new reservations created in OPERA Cloud or received from integration system and populate values to fields and details based on a defined condition. For example – a reservation for a VIP may be auto-updated with a package item for fruit platter or a trace to housekeeping for special amenities to be placed in the room.
<b>RESERVATION CONTACT</b> [RESERVATION Contac T]		Specifies whether contact profiles functionality is used/shown on the Reservation screen.
<b>RESERVATION DISCOUNTS</b> [RESERVATION_DISCOUN TS]		When enabled discount fields for flat amount, percentage and reason are enabled on reservation details. The rate amount for eligible rate code can then be adjusted for a reservation by the specified discount amount or percentage.
<b>RESERVATION PREFERENCE SOURCES</b> [CONSOLIDATED_PREFE RENCES]		Makes reservation preferences from different external sources functionality available.

Table 11-55 (Cont.) OPERA Controls — Reservations Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>EXCLUSIVE PREFERENCES</b> [EXCLUSIVE_PREFERENCES]	Enables OPERA Cloud to define the exclusive preferences.
	<b>PREFERENCE SOURCE HIERARCHY</b> [PREF_SOURCE_HIERARCHY]	Defines the precedence of the source system for preference.
<b>RESERVATION TRACES</b> [RESERVATION_TRACES]		Enables the ability to setup actionable date-driven reminders for specific department on a reservation.
<b>RESERVATION UPGRADE</b> [RESERVATION_UPSELL]		Activates the upgrade functionality to control the price of the upgrade and when it is offered. A reservation upgrade option, based on user tasks, is available while booking a new reservation, changing the stay details of an existing reservation, and to offer to arriving guests during the check in process, for reservations that match the upgrade rules and settings.
	<b>ALLOW FIXED RATE RESERVATIONS</b> [ALLOW_FIXED_RATE]	Enables upgrading reservations that have a fixed rate code attached.
	<b>ALLOW RESERVATION DISCOUNTS</b> [ALLOW_RESERVATION_DISCOUNTS]	Enables reservations that have discounts already attached to be available for upgrade.
	<b>ROOM STATUS</b> [ROOM_TYPE_ROOM_STATUS]	Determines the minimum housekeeping status of a room to be offered for upgrade during check-in.
	<b>MAXIMUM LENGTH OF STAY</b> [MAXIMUM_LENGTH_OF_STAY]	Determines the maximum length of stay for a reservation to be considered for an upgrade.
	<b>MAXIMUM NUMBER OF OFFERS DISPLAYED</b> [MAXIMUM_NUMBER_OF_OFFERS]	Specifies the maximum number of upgrade offers available.
	<b>TRANSACTION CODE SETTING</b> [TRANSACTION_CODE]	Specifies the transaction code where the upgrade revenue posts.
	<b>OCCUPANCY LEVEL DETAILS</b> [UPSELL_OCCUP_LEVELS]	Defines the number and ranges for the occupancy levels.

Table 11-55 (Cont.) OPERA Controls — Reservations Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>SHARES</b> [SHARES]		Enables the ability to create a share reservations; with more than one reservation allocated to a room for the same stay dates, with the option to split the rate between each reservation and posting charges to each reservation account.
	<b>AUTOMATICALLY CHECK IN SHARE RESERVATIONS</b> [AUTO_CHECKIN_SHARE_WITH_RESERVATION]	Share reservations will be presented for Check In one after the other.
	<b>CUSTOM SPLIT FOR SHARES</b> [CUSTOM_SPLIT_SHARE]	Activate the ability to create sharing reservations with custom split rate amounts.
	<b>ENFORCE SAME STAY DATES FOR SHARING GUESTS</b> [FORCE_SAME_STAY_AMONG_SHARES]	Activate the ability to maintain the same stay dates among sharing reservations.
	<b>ENFORCE SAME RATE CODE FOR SHARING GUESTS</b> [FORCE_SAME_RATE_CODE_AMONG_SHARES]	<ul style="list-style-type: none"> <li>When inactive, share reservations have different rate codes. A pop-up is presented for users to choose and apply changes to all shares when rate code is updated.</li> <li>When active, OPERA Cloud will force the same rate code for all sharing reservations.</li> </ul>
	<b>ENFORCE CREDIT CARD ENTRY FOR CREDIT CARD GUARANTEED DURING BREAK SHARE</b> [CC_REQUIRED_ON_BREAK_SHARE]	During separate share, a list of credit card guaranteed reservations which does not have credit card details will be presented in addition to the payment screen to enter new credit card details to be attached to those reservations.
<b>WAITLIST</b> [WAITLIST_RESERVATION]		Enables the ability to create reservation in waitlist status and confirm the reservation at a future date when the room type or rate availability is open.
	<b>SHOW WAITLIST FOR OPEN RATES</b> [SHOW_WAITLIST_FOR_OPEN_RATES]	Shows the waitlist for open rates on the Look To Book Sales screen. Enables the ability to create reservation in waitlist status and confirm the reservation at a future date when the room type or rate availability is open.
<b>WAKE UP CALLS</b> [WAKEUP]		Enables the ability to setup PBX wakeup calls for reservations.

**Table 11-56 OPERA Controls — Reservations Parameters**

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ALWAYS SHOW SELL MESSAGES</b> [ALWAYS_SHOW_SELL_MESSAGES]		When inactive, users will not see sell messages in the reservation presentation. Unless, it is a new reservation.
<b>ATTACH TRAVEL AGENT / SOURCE PROFILES TO RESERVATIONS</b> [ALLOW_TA_AND_SOURCE_ON_RESV]		Allow attachment of Travel Agent and Source profiles to reservations.
<b>AUTO CHECK IN ARRIVAL PSEUDO ROOMS</b> [AUTO_CHECKIN_ARRIVAL_PSEUDO_ROOM]		<p>Pseudo room arrival reservations are automatically checked in during End of Day via two additional steps.</p> <ul style="list-style-type: none"> <li>• “Pseudo Rooms Not Checked In” executes prior to update of the business date.</li> <li>• “Pseudo Room Arrivals Next Day” executes after update of the business date.</li> </ul>
<b>AUTO CHECK IN PSEUDO ROOMS AFTER CHECK OUT</b> [AUTO_CHECKIN_PSEUDO_ROOM]		Pseudo room type reservations flagged as "Always Checked In" in <a href="#">Reservation Payment Instructions</a> are automatically copied and checked in after they are checked out. Only applies to pseudo <a href="#">room types</a> setup for Always Checked In.
<b>AUTO CHECK OUT</b> [AUTO_CHECK_OUT]		Auto Check Out provides the ability to initiate a process that will automatically post payments and settle billing windows for departing reservations and then proceed with checking them out. Folios or receipts will not be printed or emailed during this process.

**Note:**

Pseudo [room types](#) are not flagged for Housekeeping to skip the check for Clean/Inspected status.

Table 11-56 (Cont.) OPERA Controls — Reservations Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>AUTO DEPOSIT COLLECTION</b> [AUTO DEPOSIT SCREEN]		The deposit screen on reservations with existing deposit schedules will automatically appear when the user saves the reservation and it may also take the user one step further and automatically open the deposit payment form with deposit amount pre-populated based on configuration.
<b>BLANK OUT METHOD OF PAYMENT FOR ARRIVAL RESERVATIONS</b> [BLANK_OUT_METHOD_OF_PAYMENT_FOR_ARRIVALS]		Blank out (remove) the method of payment during the check in process for arrival reservations without an existing credit card authorization.
<b>CANCEL ACTIVITY</b> [CANCEL_ACTIVITY]		Allow OPERA Cloud Users to send Cancel Activities Message to external system.
<b>CLOSING SCRIPT NEW AND UPDATE RESERVATION</b> [ENDSCRIPT]		Display the Closing Script while creating or updating a reservation on the Look To Book Sales Screen
<b>COMPONENT VERIFICATION</b> COMPONENT_VERIFICATION		Activating this parameter will cause differences in availability screens regarding component room availability. Suppose a reservation is assigned a room number that is part of a component suite. In that case, the availability will show the component suite as also not available for sale (Available when the Component Suites OPERA Control is active).
<b>CONFIRMATION LETTER TO PARTNER SOLUTION</b> CONFIRMATION_EMAIL_TO_PARTNER		When enabled, all confirmation letters will be emailed to a partner solution
	<b>PARTNER EMAIL ID FOR CONFIRMATION LETTER</b> [PARTNER_EMAIL_ADDRESS]	This setting stores the recipient email address of the partner, to override the Confirmation letter send operation. If this setting is left blank, the confirmation letter email is sent to the (guest/caller) recipient email address designated by the user

Table 11-56 (Cont.) OPERA Controls — Reservations Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CONFIRMATION LETTER FOR CANCEL RESERVATION</b> [CONFIRMATION_LETTER_CANCEL_RESERVATION]		Confirmation Letter to be generated when a Reservation is Cancelled.
<b>COPY PROFILE RESERVATION NOTES TO RESERVATION</b> [RESERVATION_COMMENTS]		Reservation Notes on profile will be automatically copied to new reservations
<b>CREATE INTERNAL CHARGE NUMBER</b> [CREATE_INTERNAL_CHARGE_NUMBER]		<p>Controls the automatic creation of an internal charge number for each reservation.</p> <p>When this parameter is set to Off, no internal charge number will be automatically created for any reservation.</p> <p>When this parameter is set to On, OPERA Cloud will automatically create an internal charge number for each new reservation. The charge number is created at the time that a reservation is created in the property management system. The system will also create an internal charge number when a new reservation is inserted from a third party system. In other words, when this parameter is set to On, the system will create an internal charge number when a confirmation number is generated. Note that when a reservation is moved from one property to another, a new charge card number will be created as the moved to property may support a different format.</p>
	<b>CHARGE NUMBER PATTERN PREFIX</b> [CHARGE_NUMBER_PATTERN_PREFIX]	<p>Enables you to define a specific alpha or numeric code with which the hotel charge card number should begin.</p> <p>Adds a prefix to all newly generated hotel charge card numbers. For example, enter DL in this field if you want all hotel charge card numbers to begin with the letters DL.</p>

Table 11-56 (Cont.) OPERA Controls — Reservations Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>CHARGE NUMBER PATTERN</b> [CHARGE_NUMBER_PATTERN]	Defines the pattern to be used when generating hotel charge card numbers. Multiple selections can be defined for the pattern.  For example, you can press Ctrl and click to select PROPERTY and NAME ID from the multi-selection pane. This will tell the system to use the property code and the guest's name ID when creating new hotel charge card numbers. Leave this field blank to use the default Oracle Sequence Number.
	<b>CHARGE NUMBER PATTERN SUFFIX</b> [CHARGE_NUMBER_PATTERN_SUFFIX]	Enables you to define a specific alpha or numeric code with which the hotel charge card number should end. For example, enter ORL in this field if you want all hotel charge card numbers to end with the letters ORL.
	<b>CHARGE NUMBER MAXIMUM SIZE</b> [CHARGE_NUMBER_MAXIMUM_SIZE]	Enables you to define any size limitations to the hotel charge card number.  The resulting charge number must contain between five and 60 characters. This is dependent on any restrictions for the 3rd party system.
<b>CROSS BRAND RECOGNITION</b> [CROSS_BRAND_RECOGNITION]		When this parameter is turned ON, Guest members (of a central loyalty membership program) will be recognized by a pop up message when accessing their reservation, this will help the user identify where this guest originally enrolled and treat accordingly.
<b>ENFORCE THE MINIMUM OCCUPANCY SET ON THE ROOM TYPE</b> [ENFORCE_ROOM_TYPE_MIN_OCCUPANCY]		When enabled, the Minimum Occupancy value set in room type configuration is considered for availability search at the time of booking. When disabled, the Default Occupancy value set in room type configuration is considered for availability search booking reservations.
<b>EXTERNAL NOTIFICATIONS</b> [RESERVATION_EXTERNAL_NOTIFICATIONS]		Ability to flag a reservation for guest opt-in to receive external notifications related to their stay.  Note: Business event configuration and subscription are required to receive notification when this flag is updated on a reservation.

Table 11-56 (Cont.) OPERA Controls — Reservations Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>GENERATE KEY PACKETS</b> [CUSTOMIZED_KEY_PACKET_LABELS]		Activates the key packets functionality which allows the Property to generate Key Packet labels for individual or block reservations.
<b>GUEST PAY ONLY FILTER WITHIN THE RATE INFO SCREEN</b> [GUEST_PAY_FILTER_IN_RATE_INFO]		Ability to see the Guest Pay Only Filter within the Rate Info screen.
<b>MANDATORY METHOD OF PAYMENT</b> [MANDATORY_MOP]		Method of Payment is Mandatory at the Time of Reservation.
<b>MANDATORY ROOM MOVE REASONS</b> [MANDATORY_ROOM_MOVE_REASONS]		Activating this Parameter will make the Reason field mandatory on the Room Move screen.
<b>POPULATE PRIMARY PROFILES FOR RESERVATIONS</b> [POPULATE_PRIMARY_PROFILES_FOR_NEW_RESV]		Populate Primary Company, Travel Agent, and Source profiles for the Guest for New Availability searches.
<b>PRE-AUTHORIZE CREDIT CARDS PRIOR TO CHECK IN</b> [CC_PRE_CHECK_IN_AUTHORIZATION]		Ability to pre-authorize credit cards on reservations up to 10 days prior to check in.
<b>PROPERTY CALENDAR</b> [PROPERTY_CALENDAR]		Activates the property calendar functionality.
<b>QUICK BOOK</b> QUICK_BOOK		When enabled, Quick Book commences with the reservation entry and provides optional access to an Available Rates screen for room type availability and rate pricing details. It also provides access to Analyze Rate screen for review and override of closed rates.
<b>RATE CODE MANDATORY FOR BLOCK PICKUP</b> [RATE_CODE_MANDATORY_BLOCK]		Rate Code Mandatory for Reservations picked up from block.

Table 11-56 (Cont.) OPERA Controls — Reservations Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>REFRESH RATES FOR EXTENSION DATES ONLY</b> [REFRESH_RATES_FOR _EXTENSION_DATES_O NLY]		Refresh rates for extension dates only when extending the stay period on an existing reservation.
<b>REINSTATE EARLY DEPARTURE TO LAST DEPARTURE DATE</b> [REINSTATE_TO_LAST_ DEPARTURE_DATE]		When reinstating an Early Departure, the departure date to default to the departure date prior to checkout.
<b>RESERVATION LOOKUP</b> [RESERVATION_LOOKU P]		Activates the reservation lookup functionality.
<b>RESERVATION ROOM FEATURES</b> [RESERVATION_ROOM_ FEATURES]		This parameter is used in conjunction with Room Feature and Floor preferences associated with reservations and profiles. When active, Room Feature and Floor preferences associated with the reservation are displayed in Room Assignment. When inactive, Room Feature and Floor preferences associated with the profile are displayed in Room Assignment.
<b>RESERVATIONS SMOKING PREFERENCE</b> [RESERVATION_SMOKI NG_PREFERENCE]		If active when Assigning a room number for a reservation, populates the Smoking Preference filter based on the Reservation Smoking Preference, not the Profile Smoking Preference.
<b>ROOM TYPE AUTO POPULATE</b> [ROOM_TYPE_AUTO_P OPULATE]		Enables Auto Populate check box at Property Level for Room Type Configuration. By selecting this Auto Populate check box, this room type will automatically default for all new Rate Codes in the Room Type field on the Rate Code Header screen.

Table 11-56 (Cont.) OPERA Controls — Reservations Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ROOM TYPE AUTO ROOM ASSIGN</b> [ROOM_TYPE_AUTO_ROOM_ASSIGN]		Enables Auto Room Assign check box at Property Level for Room Type Configuration. By selecting this Auto Room Assign check box, OPERA Cloud will auto-assign a room number to a new reservation when a reservation is made for the room type and a room has not been manually assigned for the reservation. This functionality will occur only for newly created reservations should this parameter be active.
		<div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 10px; background-color: #D9E1F2;"> <p> <b>Note:</b></p> <p>Cannot be used in conjunction with AI ROOM ASSIGNMENT or ENHANCED ROOM ASSIGNMENT function.</p> </div>
<b>ROOM TYPE TO CHARGE</b> [ROOM_TYPE_CHARGE]		Exposes the Room Type to Charge field for reservations. With this Room Type to Charge field, it is possible to have a reservation be inventoried on one room type and charged as if it was of another differing room type.
<b>SWAP/SHIFT ROOMS</b> [SWAP/SHIFT_ROOMS]		Allows the assigned room on two reservations, with matching room type and arrival date, to be swapped or shifted. A room can be shifted from one reservation to another, leaving one of the reservations unassigned.
<b>TA RECORD LOCATOR</b> [TA_RECORD_LOCATOR]		Allow Travel Agent Record Locator entry and search on Reservation Screen
<b>TRANSPORTATION</b> [TRANSPORTATION]		Enables the Transportation panel in reservation; for entry of arrival and departure transportation requirements. Reservation transport requirements can be listed on the Transport Requirements report.

Table 11-56 (Cont.) OPERA Controls — Reservations Parameters

PARAMETER	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>UNIQUE CONFIRMATION NUMBER FOR LINKED RESERVATION</b> [UNIQUE_LINKED_RES_CONF_NO]		Unique Confirmation Number for Linked Reservation.
<b>ECOUPONS</b> [ECOUPONS]		Activates the eCoupons functionality which allows a property to configure eCoupon code specific for items that can be redeemed in outlets via the Point of Sales system by a guest which will be posted automatically to the specific posting master room.
	<b>ATTACH ECOUPON PRIOR TO THE ARRIVAL DATE</b> [ATTACH_ECOUPONS_PRIOR_ARRIVAL]	When active, eCoupons can be attached to a reservation as soon as the reservation is created. When inactive, the eCoupon panel will be displayed under a reservation only from its arrival date and the user can attach eCoupons only when the reservation arrival date is reached.
<b>TAX FREE GUESTS</b>		Allows the User to make a distinction between Taxable and Tax Free Guests (by Adults & Children) that will be reported on the statistical report for stat_countrybyday as indicated on each reservation.

Table 11-57 OPERA Controls — Reservations Settings

SETTING	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>AUTOMATICALLY REFRESH RATES ON RESERVATION</b> [AUTO RATE REFRESH CRITERIA]		Automatically refresh rates on reservation based on the selected values.
<b>COMMISSION PAY</b> [COMMISSION_PAY]		Select to Pay Commission to the Travel Agent only, Source only or both the Travel Agent and Source attached to the Reservation.
<b>DEFAULT CHAIN COMPANY CONFIRMATION LETTER</b> [DEFAULT_CHAIN_COMPANY_CONF_LETTER]		Default Chain Confirmation Letter used for Company Profiles.

Table 11-57 (Cont.) OPERA Controls — Reservations Settings

SETTING	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>DEFAULT CHAIN CONTACT CONFIRMATION LETTER</b> [DEFAULT_CHAIN_CONT ACT_CONF_LETTER]		Default Chain Confirmation Letter to be used for Contact Profiles.
<b>DEFAULT CHAIN GROUP CONFIRMATION LETTER</b> [DEFAULT_CHAIN_GROU P_CONF_LETTER]		Default Chain Confirmation Letter to be used for Group Profiles.
<b>DEFAULT CHAIN GUEST CONFIRMATION LETTER</b> [DEFAULT_CHAIN_GUEST _CONF_LETTER]		Default Chain Confirmation Letter used for Guest Profiles.
<b>DEFAULT CHAIN SOURCE CONFIRMATION LETTER</b> [DEFAULT_CHAIN_SOUR CE_CONF_LETTER]		Default Chain Confirmation Letter to be used for Source Profiles.
<b>DEFAULT CHAIN TRAVEL AGENT CONFIRMATION LETTER</b> [DEFAULT_CHAIN_TR_AG ENT_CONF_LETTER]		Default Chain Confirmation Letter to be used for Travel Agent Profiles.
<b>DEFAULT PROPERTY COMPANY CONFIRMATION LETTER</b> [DEFAULT_PROPERTY_CO MPANY_CONF_LETTER]		Default Property Confirmation Letter to be used for Company Profiles.
<b>DEFAULT PROPERTY CONTACT CONFIRMATION LETTER</b> [DEFAULT_PROPERTY_CO NTACT_CONF_LETTER]		Default Property Confirmation Letter to be used for Contact Profiles.
<b>DEFAULT PROPERTY GROUP CONFIRMATION LETTER</b> [DEFAULT_PROPERTY_GR OUP_CONF_LETTER]		Default Property Confirmation Letter to be used for Group Profiles.

Table 11-57 (Cont.) OPERA Controls — Reservations Settings

SETTING	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>DEFAULT PROPERTY GUEST CONFIRMATION LETTER</b> [DEFAULT_PROPERTY_GUEST_CONF_LETTER]		Default Property Confirmation Letter used for Guest Profiles.
<b>DEFAULT PROPERTY SOURCE CONFIRMATION LETTER</b> [DEFAULT_PROPERTY_SOURCE_CONF_LETTER]		Default Property Confirmation Letter used for Source Profiles.
<b>DEFAULT PROPERTY TRAVEL AGENT CONFIRMATION LETTER</b> [DEFAULT_PROPERTY_TRAVEL_AGENT_CONF_LETTER]		Default Property Confirmation Letter used for Travel Agent Profiles.
<b>EXTERNAL REFERENCE TO DISPLAY</b> [EXTERNAL_REF_NUMBER_TO_DISPLAY]		External Reference to display in Reservations Additional Details.
<b>GUEST STAY INDICATION</b> [GUESTSTAY_INDICATION]		Controls how the Guest Stay Indicator will show in each Reservation.
<b>MANDATORY AR ACCOUNT FOR DIRECT BILL PAYMENT TYPE</b> [MANDATORY_AR_ACCOUNT_FOR_DIRECT_BILL_PAYMENT_TYPE]		Create Reservation or check-in is not possible with Direct Bill payment for a reservation with no AR Account.
<b>MAXIMUM NUMBER OF ROOMS PER RESERVATION</b> [RESV_MAX_NIGHTS]		The Maximum Number of Rooms a Reservation can be booked. If a user has the Max Rooms Upper Limit task granted, effective max rooms will be the higher setting between this and Hub level Room Limit Per Reservation setting otherwise lower setting will be effective.
<b>MAXIMUM NUMBER OF NIGHTS — HUB LEVEL</b> [MAX_NO_OF_NIGHTS]		The Maximum Number of Nights a Reservation can be Booked and the maximum length on a business block header. This value is also used to determine In House Bookings that display within the Business Block screen.

Table 11-57 (Cont.) OPERA Controls — Reservations Settings

SETTING	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>MAXIMUM NUMBER OF NIGHTS PER RESERVATION</b> [RESV_MAX_ROOMS]		The Maximum Number of Rooms a Reservation can be booked. If user have a Max Rooms Upper Limit task, effective max rooms will be the higher setting between this and Hub level Room Limit Per Reservation setting otherwise lower setting will be effective.
<b>MAXIMUM RESERVATION ADVANCED BOOKING DAYS</b> [MAX_RESV_ADV_BOOKING_DAYS]		Controls how far into the future from the current business date a reservation can be created.
<b>RESERVATION COLOR DEFINITION</b> [RESERVATION_COLOR_DEFINITION]		<p>A color indicator can be applied to either a reservation or to a guest as a quick reference to users when performing searches. The description for the colors can be anything that is required to uniquely identify specific reservations or guests</p> <ul style="list-style-type: none"> <li>• MARKET_CODE- Use color of the market code selected in the reservation</li> <li>• MEMBERSHIP_LEVEL-Use color of the Levels for Default Membership Type (only visible when a value is defined for Profiles &gt; Default Membership Type)</li> <li>• VIP_LEVEL- Use color of the VIP Level of the Guest (visible when the VIP function is active)</li> <li>• RESERVATION- Use a color selected in the Reservation (Stay Details - Display Color field )</li> <li>• NONE- No Colors</li> </ul>
<b>ROLLING NO SHOW</b> [OWNER_NOSHOW]		Reservations with reservation type selected in the parameter will not be automatically no showed during End of Day. Instead the arrival date will be extended to the next day.
	<b>ROLLING NO SHOW PREFERENCE SETTING</b> [ROLLING_NOSHOW_PREFERENCE]	Determines whether the arrival date will be automatically rolled until the departure day (default) or the last night of the reservation.
<b>ROOM DISPLAY ORDER</b> [ROOM_DISPLAY_ORDER]		In the room lookup screens, the order of the rooms displayed can be least used ascending, least used descending, back to back ascending, back to back descending, ascending, descending or by display sequence based on the parameter set here.

Table 11-57 (Cont.) OPERA Controls — Reservations Settings

SETTING	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ROOM LIMIT PER RESERVATION — HUB LEVEL</b> [PER_RESERVATION_ROOM_LIMIT]		Maximum Number of Rooms Sold per Reservation.

## OPERA Controls — Room Management

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Controls Room Management group.

Table 11-58 OPERA Controls — Room Management Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ADVANCE TASK SHEETS</b> [TASK_ASSIGNMENT]		<p><b>Complimentary</b></p> <p>Activates Task Sheet Assignment functionality. Allows creation of Task Sheets using the Generation of Task Sheets which provides customizable assignments based on the property needs. Task Sheets can be assigned using multiple codes to complete specific tasks for the rooms in the Task Sheet. Task Codes can be created in the Task Sheets jump within Accommodation Management.</p>
	<b>TASK COMPANION TIMER</b> [TASK_COMPANION_TIMER]	<p>Display Timer in the Task Companion.</p> <p>Valid values:</p> <ul style="list-style-type: none"> <li><b>DEC</b>— Displays time decreasing.</li> <li><b>INC</b>— Displays time increasing.</li> <li><b>OFF</b>— Does not display time.</li> </ul>
	<b>ADDITIONAL TASK SHEETS</b> [ADDITIONAL_TASK_ASSIGNMENTS]	<p>Additional task sheets to be created during the 'Generate Automatic Task Assignment' process. Leaving this setting blank keeps the original task assignment functionality.</p> <p>Valid values:</p> <ul style="list-style-type: none"> <li><b>DND</b> (Do Not Disturb task sheet) — All rooms that are set to do not disturb on the Guest Service Status screen are assigned to a separate task sheet. This setting is only available when Guest Service Status is active.</li> <li><b>NSR</b> (No Service task sheet) — An additional task sheet is created that contains all rooms that are not scheduled for service.</li> </ul>

Table 11-58 (Cont.) OPERA Controls — Room Management Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>BUILDING MANAGEMENT</b> [BUILDINGS]		Provides the ability to configure Buildings and Building Groups and associate Rooms to the Buildings. This configuration can be used with the Task Sheet Work flow functionality to breakout task sheets by buildings.
<b>COMPONENT SUITES</b> [COMPONENT_SUITES]		Enables the configuration of a virtual room type that is comprised of one or more physical room types. Virtual room numbers are then configured for the component rooms. A component room is typically two or more inter-connecting rooms sold as 1. It is possible to configure rate schedules for component room types as well as the physical rooms. Only 1 reservation for component room type is created, deducting multiple physical rooms from inventory.
<b>DISCREPANT ROOMS</b> [DISCREPANT_ROOMS]		Activate Discrepant Room functionality to identify variance between HK and FO stats of the room.
<b>GUEST SERVICE STATUS</b> [GUEST_SERVICE_STATUS]		Enables a Guest Service Status flag for Do Not Disturb (DND) or Make Up Room to be set for an occupied room (in-house reservation).
<b>HOLD ROOMS</b> [HOLD_ROOMS]		Enables the ability to reserve vacant rooms for a defined period of time. The reservation prevents other users from selecting the held room(s) for assignment to reservations. This function is dependent on Room Conditions function also being active.
<b>HOUSEKEEPING TASK SCHEDULING</b> [FACILITY_MANAGEMENT]		Task scheduling functionality allows for configuration of housekeeping tasks such as Full Service, Light touch, and so on, and facility codes for the items associated with the facility task (such as Hand towel, Bath Amenities, Pillowcase). Task schedules are then configured for each room type with OPERA Cloud determining which task to schedule per day per room. Users with rights can override the computed schedule to customize according to guests unique requirements. Task forecast reports are also available to assist with labor forecasting.
	<b>ADVANCED CREDIT RULES</b> [TASK_ASSIGNMENT_WORKFLOW]	When active a new option will be available in the setting for Housekeeping Credit for Room Task Rules which will allow a property to allocate credits based on configured rules.

Table 11-58 (Cont.) OPERA Controls — Room Management Functions

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>ADVANCED TASK SCHEDULING</b> [ADVANCED_FACILITY_TASKS]	Task Scheduling based on Rate Codes, Specials, Market Codes and VIP. This parameter is available when the VIP control in the Profile group is active
<b>INSPECTED STATUS</b> [USE_INSPECTED_STATUSES]		Activate the Room Status called Inspected.
<b>MAINTENANCE</b> [MAINTENANCE]		Enables functionality to create maintenance requests for guest rooms. Tasks be can assigned to specific maintenance staff or added to a “pool” of requests. Maintenance functionality is on smartphone as well as desktop/tablet.
 <b>OUT OF ORDER</b> [OUT_OF_ORDER]		Enables inventory rooms to be set of our order for a date range; removing the room from the inventory count. A reservation cannot be allocated to a room in out of order status.
	<b>OUT OF ORDER DEFAULT REASON CODE</b> [OUT_OF_ORDER_DEFAULT_REASON_CODE]	Default Reason Code to be used for new Out of Order records.
 <b>OUT OF SERVICE</b> [OUT_OF_SERVICE]		Enables inventory rooms to be set of our service for a date range; out of service rooms are still considered in room inventory count. A reservation can be allocated to a room in out of service status.
	<b>OUT OF SERVICE DEFAULT REASON CODE</b> [OUT_OF_SERVICE_DEFAULT_REASON_CODE]	Default Reason Code to be used for new Out of Service records.
<b>PICKUP STATUS</b> [PICKUP_STATUS]		Enables the Pickup (Touch-up) room status to track rooms that require a quick service to return to a clean status.

**Table 11-58 (Cont.) OPERA Controls — Room Management Functions**

FUNCTION	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>QUEUE ROOMS</b> [QUEUE_ROOMS]	<b>QUEUE RUSH TEXT            DEFAULT NUMBER</b> [QRUSH_TEXT_DEFAULT _NUMBER]	<p>Enables the ability to place arrival reservations for which the requested room type or room number room status is not ready (such as Inspected) for check-in on Queue.</p> <p>Housekeeping room attendants can view arrival reservations on queue via a mobile device in order to expedite the servicing of the assigned room or allocated room type.</p> <p>Once the room status is ready for check-in an SMS can be sent to the guest informing them their room is ready for check-in.</p> <p>Default mobile number to which queue rush messages will be sent to.</p>
<b>ROOM CONDITIONS</b> [HOUSE_ASSIGNMENT]		<p>Room conditions allow housekeeping to inform front office of the temporary condition of a room – such a king bed unzipped into twin. Rooms conditions can also be used to temporarily remove a vacant ready room from vacant room search; often used for show rooms used by sales staff.</p>
<div data-bbox="375 1146 542 1192" style="background-color: #4CAF50; color: white; padding: 2px; border-radius: 5px; display: inline-block;">Complimentary</div> <b>TASK SHEET</b> [SIMPLE_TASK_SHEET]		<p>When active, you will be able to create task sheets with fixed options. When Housekeeping Task Scheduling is active, you will be able to run task sheets for multiple tasks. When Housekeeping Task Scheduling OPERA Control is inactive, tasks are not considered and instead rooms with the selected room status(es) will be placed on the task sheets.</p>
<b>TURNDOWN</b> [TURNDOWN]		<p>Enables the ability to manage turndown task request for inhouse reservations. Eligibility for a reservation is derived from room number configuration with users having the ability to modify eligibility for specific reservations (such as blocks). Turndown management provides the statuses of Requested, Not Required, and Completed.</p>

**Table 11-59 OPERA Controls — Room Management Parameters**

PARAMETER	DESCRIPTION
<b>ATTENDANT CONSOLE</b> [ATTENDANT_CONSOLE]	Activates the attendant console functionality.
<b>ATTENDANT SCHEDULE</b> [ATTENDANT_SCHEDULE]	Activates housekeeping attendant scheduling functionality. This parameter can only be activated if Housekeeping Task Scheduling is active.
<b>CONNECTING ROOMS</b> [CONNECTING_ROOMS]	Activates Connecting Rooms functionality.
<b>HOUSEKEEPING SECTIONS</b> [HOUSEKEEPING_SECTIONS]	Housekeeping Sections.
<b>ROOM NUMBER PARITY</b> [HOUSEKEEPING_ROOM_PARITY]	Ability to Filter Search Results Based on Even or Odd Room Numbers in the Housekeeping Board.
<b>TASK COMPANION ASSISTANCE</b> [TASK_COMP_ASSIST_NOTIF]	Controls if the ability to send notifications from the task companion is allowed.
<b>TASK SHEET TEMPLATE</b> [TASK_SHEET_TEMPLATE]	Allows the creation of a task sheet template.

**Table 11-60 OPERA Controls — Room Management Settings**

SETTING	DESCRIPTION
<b>DEFAULT DAY USE ROOM STATUS</b> [DEFAULT_DAY_USE_ROOM_STATUS]	Default Room Status of a Day Use Reservation automatically assigned at check out. If no status is selected the room status will not be changed upon check out. Valid values: <ul style="list-style-type: none"> <li>CLEAN</li> <li>DIRTY</li> <li>INSPECTED (available when Inspected Status is active)</li> <li>PICKUP (available when Pickup Status is active)</li> </ul>
<b>DEFAULT ROOM STATUS FOR ROOM ASSIGNMENT SCREENS</b> [DEFAULT_ROOM_STATUSES]	Defaults the selected room status check boxes in the Room Search screen when conducting a room assignment.

 **Note:**

The status selection list is based on active Inspected, Pickup and Out of Service OPERA Controls.

Table 11-60 (Cont.) OPERA Controls — Room Management Settings

SETTING	DESCRIPTION
<b>DEFAULT LINEN CHANGE FREQUENCY</b> [DEFAULT_LINEN_CHANGE_FREQUENCY]	Sets the default change frequency for linens, which is indicated on task sheets. The number provided indicates the number of days in between linen changes. For example, if the value is 2, linens will be added to the task sheet to be changed every second day that the reservation is in-house.  Valid values: <ul style="list-style-type: none"> <li>• 1+</li> </ul>
<b>HOUSEKEEPING CREDITS</b> [HOUSEKEEPING_CREDITS]	Use Credit Assignments in Housekeeping.  Valid values: <ul style="list-style-type: none"> <li>• NONE</li> <li>• ROOM NUMBER</li> <li>• FACILITY TASK (available when Housekeeping Task Scheduling is active)</li> <li>• ROOM_TASK_RULE (calculated based on room number, task weight, and assignment credit rules; available when Housekeeping Task Scheduling is active)</li> </ul>
<b>HOUSEKEEPING PROFILE NOTE TYPE</b> [HOUSEKEEPING_PROFILE_NOTE_TYPE]	Select the Note Type within the Individual/Contact Note Group to auto populate to the reservation housekeeping Room Instructions; displayed in the Task Sheet Companion and output on several Task Sheet Report styles.
<b>MAX CREDITS PER ATTENDANT</b> [HK_MAX_CREDITS_PER_ATTENDANT]	Defines the maximum number of credits per attendant.
<b>TASK COMPANION TRACES</b> [HK_TRACE_DEPT]	Select department(s) associated to Housekeeping Traces for displaying current business date traces within the Task Companion.
<b>TRAVELING TASK CREDITS</b> [TRAVELING_TASK_CREDITS]	Defines the number of credits that are being added to a task sheet with rooms from multiple floors. The number of credits entered here will be added for each additional floor.
<b>UPDATE OCCUPIED ROOM STATUS</b> [UPDATE_OCCUPIED_ROOM_STATUS]	The night audit procedure <code>hkpkg.update_room_status_proc</code> will update all occupied rooms to the room status selected here. If no status is selected then the room status of the occupied rooms will not be changed.  Valid values: <ul style="list-style-type: none"> <li>• DI (dirty)</li> <li>• CL (clean)</li> <li>• PU (pickup; available when Pickup Status is active)</li> <li>• IP (inspected; available when Inspected Status is active)</li> </ul>

**Table 11-60 (Cont.) OPERA Controls — Room Management Settings**

SETTING	DESCRIPTION
<b>UPDATE VACANT ROOM STATUS</b> [UPDATE_VACANT_ROOM_STATUS]	The housekeeping module of the night audit procedure will update all vacant rooms with a higher room status in the hierarchy to the status selected here. If no status is selected then the room status of vacant rooms will not be changed. The room status hierarchy is either Dirty->Clean->Pickup->Inspected (when Inspected active) or Dirty->Pickup->Clean (when Inspected not active).  Valid values: <ul style="list-style-type: none"> <li>• DI (dirty)</li> <li>• CL (clean)</li> <li>• PU (pickup; available when Pickup Status is active)</li> <li>• IP (inspected; available when Inspected Status is active)</li> </ul>
<b>UPDATE THE ROOM STATUS FOR NO SHOW AND CANCELED RESERVATIONS</b> [UPDATE_NO_SHOW_AS_SIGNED_ROOM_STATUS]	The Updating Room Statuses end of day procedure will update all No Show rooms to the room status selected here. If no status is selected, then the room status of the no show assigned rooms will not be changed. If a reservation with an assigned room number cancels on the expected day of arrival, the reservation too shall adhere to this set room status at the time of cancellation.

## Configuring Track It

### Prerequisites for Track It

Track It is used to manage the storage and delivery of guest luggage and parcels; parking of vehicles (valet), and tracking of lost items.

Prior to using Track It, the Track It Types, Track It Locations, and Track It Actions must be configured.

You can then setup defaults for new Track It tickets in [General OPERA Controls](#).

You can also configure images (icons) for Track it Types. Refer to [Configuring Images](#).

### Track It Types

Track It types are typically items, vehicles, and other valuables belonging to guests. OPERA Cloud lets you organize Track It Types into four pre-defined Track It groups: Baggage, Parcel, Valet, and Lost. Properties configure the Track It types and the groups into which the types belong. The following is an example:

**Table 11-61 Track It Type Examples**

Group	Track It Type Examples
Baggage	Golf Bag, Laptop Bag, Suitcase, Suit-bag
Parcel	Package, Envelope, Flowers
Lost	Eyeglasses, Jewelry, Clothing, Shoes, Watch
Valet	Pickup Truck, Sedan, SUV, Minivan

You can assign Track It types to multiple Track It groups, for example, Suitcase, Laptop, and Golf Clubs might belong to both the Baggage group and the Lost group.

### Track It Locations

Track It locations identify the whereabouts of Parcel, Baggage, Lost, or Valet tickets. For example:

- Parcel, Baggage, or Lost locations might include Storage Room, Guest Room, Front Desk, Building A, Conference Services Desk, Purser, and so on.
- Valet locations might be Carpark L1/Zone1, Carpark L1/Zone2, Car Wash Bay, Driveway, or Porte Cochère.

A location can be defined for multiple Track It groups, and you can configure an unlimited number of locations for each Track It group (for example, Parcel, Baggage, Lost, and Valet).

### Track It Actions

Track It actions are the tasks for a Track It ticket in each Track It group for which you can take action. For example:

- For Parcel or Baggage tickets, actions might be Store in Hold, Deliver to Room, and so on.
- For Lost group, actions might be Hold for Guest or Deliver to Room.
- For Valet group, actions might include Park Vehicle, Retrieve Vehicle, Refuel, Wash, and so on.

Actions have a status which indicates whether the Track It ticket is unresolved/open or resolved/closed .

An Action type 'Deliver' would be marked as Open status, whereas an Action type 'Delivered,' 'Done,' or 'Completed' would be marked as closed (resolved).

For example, you could configure and make available in all Track It groups an Action type 'DONE' with a closed status.

You can configure an unlimited number of actions for each Track It group (that is, Parcel, Baggage, Lost, and Valet).

## Prerequisites for Track It

### OPERA Controls

**Group:** General

**Functions:** Track It

### OPERA Cloud Tasks

Chain and Property Management

- Track It
  - New/Edit Track It
  - Delete Track It

## Configuring Track It Types

### Adding Track It Type

1. From the **Administration** menu, select **Enterprise**, select **Track It**, and then select **Track It Types**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code that uniquely identifies the Track It type.
  - b. **Description**: Enter a description of the Track It type.
  - c. Enter an optional **Website URL** for this type. For example, for FedEx or UPS Parcel types, you might want to provide the URL of the tracking site. For immediate access to the tracking site, the web link appears on the Track It ticket details when this type is assigned to the ticket.
  - d. Select the check boxes for the **Track It Group** to which this **Track it type** applies.
  - e. **Sequence**: Enter an optional sequence number indicating the type and order of appearance in a list.
  - f. Select the **Send Message** check box to be prompted to add a message to the reservation when tickets of this type are attached to the guest's reservation (Available when the Guest Messages OPERA Control is active).
    - i. Select a **Message Code** template to be sent to the reservation, for example, **Please contact concierge to arrange delivery or collection of a parcel received**.
3. Click **Save**.

### Editing Track It Type

1. From the **Administration** menu, select **Enterprise**, select **Track It**, and then select **Track It Types**.
2. Enter search criteria and click **Search**.
3. From search results, select the row level vertical ellipsis **Actions** menu and select **Edit**.
4. **Inactive**: Select the check box to make the Type inactive. Inactive types are unavailable when creating or editing ticket records (you cannot delete Types if they have been associated with a ticket number, but you can make them inactive).
5. Update the details.
6. Click **Save**.

### Deleting Track It Type

1. From the **Administration** menu, select **Enterprise**, select **Track It**, and then select **Track It Types**.
2. Enter search criteria and click **Search**.
3. From search results, select the row level vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Track It Locations

### Adding Track it Location

1. From the **Administration** menu, select **Enterprise**, select **Track It**, and then select **Track It Locations**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a unique code that identifies the location.
  - b. **Description**: Enter a description of the location.
  - c. **Track It Group**: Select the Track It groups to which the location is available.
  - d. **Sequence**: Select the sequence number that determines the position of the location in lists.
3. Click **Save**.

### Editing Track It Location

1. From the **Administration** menu, select **Enterprise**, select **Track It**, and then select **Track It Locations**.
2. Enter search criteria and then click **Search**.
3. Select the code then click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Update the configuration.
  - b. **Inactive**: Select to make the location inactive. Inactive locations are unavailable when creating or editing ticket records.
4. Click **Save**.

### Deleting Track It Location

1. From the **Administration** menu, select **Enterprise**, select **Track It**, and then select **Track It Locations**.
2. Enter search criteria and then click **Search**.
3. Select the code then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Track It Actions

### Adding Track it Action

1. From the **Administration** menu, select **Enterprise**, select **Track It**, and then select **Track It Actions**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a unique code that identifies the Action.
  - b. **Description**: Enter a description of the action.
  - c. **Status**: Select Open or Closed for the action's status. Open actions are open / unresolved. Closed actions are completed / resolved.

- i. **Track It Group:** Select the Track It groups to which the action is available.
  - ii. **Sequence:** Select the sequence number that determines the position of the action in lists.
3. Click **Save**.

#### Editing Track It Action

1. From the **Administration** menu, select **Enterprise**, select **Track It**, and then select **Track It Actions**.
2. Enter search criteria and then click **Search**.
3. Select the code then click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Update the configuration.
  - b. **Inactive:** Select to make the Track it Action inactive. Inactive Track it Actions are unavailable when creating or editing ticket records.
4. Track it Action

#### Deleting Track It Action

1. From the **Administration** menu, select **Enterprise**, select **Track It**, and then select **Track It Actions**.
2. Enter search criteria and then click **Search**.
3. Select the code then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

# 12

## Inventory Administration

### Accommodation Management

Accommodation Management enables you to configure a variety of options related to room inventory and rooms management (housekeeping). The available options are dependant on the active controls at your property.

### Housekeeping Section Groups and Sections

Housekeeping Section Groups and Sections can be used to group rooms into sections or divisions meaningful to the housekeeping attendants with respect to floor numbers, various buildings, and group of rooms typically cleaned by one attendant during the day or turndowns during the evening. OPERA Cloud allows for both day and evening sections, where the day section is for regular room cleaning and the evening section is for turndown service. When you print the housekeeping report, the dirty rooms can be divided into the sections defined here. This simplifies the process of assigning rooms to attendants for daily cleaning.

### Configuring Housekeeping Section Codes

#### Adding Housekeeping Section Codes

To create housekeeping section codes, do the following:

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Housekeeping Section Codes**.
2. Click **New** and complete the following details:
  - a. **Code**: Enter the housekeeping section code. It can only contain numbers.
  - b. **Description**: Enter an appropriate description for housekeeping section code.
  - c. **Section Group**: Enter the section group to which the section code belongs. For more information, see [Configuring Housekeeping Section Groups](#)
  - d. **Target Credit**: Enter the target credit for this section when processing the breakout by section.
  - e. (view only) **Rooms**: The number of rooms that are associated with this section.
  - f. (view only) **Credits**: The credit value for all the rooms associated to that section. (This is the sum of the base credits).
  - g. **Sequence**: Enter a number to determine the order in which housekeeping section codes are displayed when listed.

- h. Click **Save** to save and exit or click **Save and Continue** to save the Housekeeping Section Code and add another.

### Editing Housekeeping Section Codes

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Housekeeping Section Codes**.
2. Enter search criteria then click **Search**.
3. Select the code in the search result then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. **Inactive**: Select the check box to make the section code inactive. Inactive housekeeping sections are not available for selection when assigning rooms to the day and evening sections on the Manage Rooms screen
6. Click **Save**.

### Deleting Housekeeping Section Codes

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Housekeeping Section Groups**.
2. Enter search criteria then click **Search**.
3. Select the code in the search result then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Housekeeping Section Groups

### Adding Housekeeping Section Groups

Housekeeping Section Groups can be used as hard stops when you Generate Task Sheets.

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Housekeeping Section Groups**.
2. Click **New** and complete the following details:
  - a. **Code**: Enter the housekeeping section group code. It can contain only numbers.
  - b. **Description**: Enter an appropriate description for housekeeping section group code.
  - c. **Target Credit**: Enter the target credit for this section group when processing the breakout by section.
  - d. **Sequence**: Enter a number to determine the order in which housekeeping section group codes are displayed when listed.
3. Click **Save** or click **Save and Continue** to save the Housekeeping Section Group and add another.

### Editing Housekeeping Section Groups

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Housekeeping Section Groups**.
2. Enter search criteria then click **Search**.
3. Select the code in the search result then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. **Inactive**: Select the check box to make the section code inactive.
6. Click **Save**.

### Deleting Housekeeping Section Groups

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Housekeeping Section Groups**.
2. Enter search criteria then click **Search**.
3. Select the code in the search result then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Housekeeping Attendants

OPERA Cloud enables you to store housekeeping attendant information, daily assignments, and tracks credits or number of rooms cleaned by each attendant. Housekeeping attendants can be assigned to a section or a floor number. Housekeeping attendants can be identified by name or by an attendant number and listed with an active or inactive status. Also, the Housekeeping Attendant functionality lets you create attendant schedules, which identify attendants, their assigned section or floor, working days, and other information. After creating schedules, you can assign the attendants to housekeeping task sheets.

## Configuring Housekeeping Attendant Information

### Adding a Housekeeping Attendant

To add information about a housekeeping attendant, do the following:

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management**, select **Housekeeping Attendants**.
2. Click **New** and enter the following information.
  - a. **Code**: Enter a unique code to identify the housekeeping attendant. The code can contain a maximum of 8 alpha-numeric characters.
  - b. **Description**: Enter the name or information of the housekeeping attendant.
  - c. **Application User**: Search and select the application user that you want to associate the attendant. This is required for a housekeeping room attendant to view their assigned task sheet(s) in [Using the Task Sheet Companion](#) or [mobile task companion](#) based on the attendant assigned to the task sheet. For more information, see [Managing Task Sheets](#).

- d. **Section:** Enter the section that you want to assign to the attendant.
  - e. **Floor:** Enter the floor number that you want to assign to the attendant.
  - f. **Mobile Number:** Attendant's mobile phone number. This number can be used to contact the attendant when the General > Text Message Handling application function is Active. For example, text messages can be sent to attendant's cell phones when the Queue Rush Rooms feature is used. See Queue Rush Rooms for details.
  - g. **Working Days:** Select to remove the day(s) of the week from the attendant's schedule. By default, all days of the week are assigned to the attendant. This information is used when assigning task sheets to Attendants. The attendants are shown as available for task sheet assignment on days that are selected here.
  - h. **Inactive:** Select this check box to mark the attendant inactive. If marked inactive, the housekeeping attendant is excluded from the display lists within Housekeeping. Any housekeeping attendant can be inactivated as long as they are not included in any current date task sheets.
3. Click **Save**.

### Editing an Housekeeping Attendant

To modify information about a housekeeping attendant, do the following:

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management**, select **Housekeeping Attendants**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu and select **Edit**.
4. Make the required change.
5. Click **Save**.

### Deleting Housekeeping Attendant

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management**, select **Housekeeping Attendants**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** and confirm.

## Out of Order and Out of Service Reason Codes

### Prerequisites Out of Order and Out of Service Reasons

Out of Order (OO) and Out of Service (OS) are two additional housekeeping statuses. These options are used when changing the status for rooms that should not be sold due to damage, maintenance, low occupancy wing, and so on. The difference between the two is:

- Out of Order rooms are removed from room inventory and are not available for assignments to reservations. OO status is typically used for rooms removed from

inventory for staff accommodation or for seasonal periods of low occupancy when rooms are dormant and not sold.

- Out of Service rooms remain in room inventory and can still be reserved for a reservation. OS status is typically used for rooms with a temporary maintenance issue not preventing sale of the room.

Out of order rooms are removed from the total room inventory counts, reducing the total number of rooms available in your hotel. Therefore, for the period a room remains out of order, 100% occupancy is calculated based on Inventory Rooms - Out of Order Rooms. For example, if you have a 100-room property and 5 rooms are set to out of order status, 100% occupancy is reached when 95 rooms are occupied. Rooms in Out of Service status therefore impact Average Room Rate and RevPAR calculations.

If a room is placed Out of Service, it is available for the front desk for assignment and it remains in the total room inventory count.

## Prerequisites Out of Order and Out of Service Reasons

### **OPERA Controls**

**Group:** Room Management

#### **Functions:**

- Out of Order
- Out of Service

### **OPERA Cloud Tasks**

**Group:** Inventory Admin

**Tasks:** Manage Accommodations

Out of Order/Service Reasons

- New/Edit Out of Order/Service Reasons
- Delete Out of Order/Service Reasons

## Configuring Out of Order and Out of Service Reasons

### **Adding an Out of Order / Service Reason**

1. From the **Administration** menu, select **Inventory**, select **Rooms Management**, and then select **Out of Order /Service Reasons**.
2. Click **New** and complete the following fields:

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Out of Order and Out Of Service codes are created by selecting the Template tab. Once created, you can copy Out of Order and Out Of Service codes to specific properties using the Copy action. For more information, see [Copying Configuration Codes to Multiple Properties](#).

- a. **Code:** Enter a code for the reason.
  - b. **Description:** Enter a Descriptive explanation for the reason code.
  - c. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

#### Editing an Out of Order / Service Reason

1. From the **Administration** menu, select **Inventory**, select **Rooms Management**, and then select **Out of Order /Service Reasons**.
2. Enter search criteria and click **Search**.
3. In the search results, select the **Code** and click the vertical ellipsis **Actions** menu and select **Edit**.
4. Make the required changes.
5. Click **Inactive** to make a code inactive; inactive codes are not available for selection.
6. Click **Save**.

#### Deleting an Out of Order / Service Reason

1. From the **Administration** menu, select **Inventory**, select **Rooms Management**, and then select **Out of Order /Service Reasons**.
2. Enter search criteria and click **Search**.
3. In the search results, select the **Code** and click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

 **Note:**

If the Reason code you are attempting to delete is used in either one of the Out of Order Default Reason Code or Out of Service Default Reason Code settings, the code cannot be deleted. In that case, update the setting(s) with a new value and then delete the original code.

## Room Conditions

Room Condition functionality allows you to assign room condition codes to rooms, for example, to designate rooms that are available for show, rooms that are set aside for special housekeeping attention, or rooms that are to be treated differently for any other reason. Rooms that have a room condition assigned may or may not be available by default within the Room Assignment screen depending on how you configure the room condition code.

Room condition codes can also be attached to rooms to identify them for special purposes or situations. For example, rooms might be set aside for an afternoon sales tour, or for the finishing touches on a room repair, or so housekeeping can perform a final inspection, and so on.

In a multi-property environment, room conditions are created on the template level and then copied to each property. To be consistent among all hotels in the environment, best practice is to reuse existing codes for new hotels in an existing setup or agree on universal codes for all properties. When the setting for hold rooms is on, the setting is on the template level, but times for the holds are set at the property level.

## Prerequisites for Rooms Conditions

### OPERA Controls

### Adding Room Conditions

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Room Conditions are created by selecting the **Template** tab. Once created, you can copy Room Condition to specific properties using the **Copy** action. For more information, see [Copying Configuration Codes to Multiple Properties](#)

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Room Conditions**.
2. Click **New** and complete the following.
  - a. **Code**: Enter a unique code that identifies the room condition. You can enter up to 8 letters and/or numbers. After the condition code has been saved, it may not be edited. Use the Inactive check box to make the code unavailable for further use.
  - b. **Sequence**: Enter a number by entering it in the field, or using the plus and minus buttons to determine the position of the room condition code in listings. Room condition codes that do not have a sequence number are listed in alphabetical order following those codes that have a sequence number assigned.
  - c. **Display in Available Room Search**: Select or deselect the check box to control whether a room having this room condition code assigned will appear by default on the Room Availability screen.
  - d. **Inactive**: Select the check box to inactivate the room condition code. The inactive room conditions do not appear as a selection option when assigning room conditions.
  - e. **Description**: Enter a description that explains the condition code. For example, Last sell, Missing amenity, Pet in room, Show room, and so on.
  - f. **Notes**: Enter any information you want to add that pertains to the room condition.
3. Click **Save**.

#### Editing Room Conditions

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Room Conditions**.
2. Enter search criteria and click **Search**.
3. In the search result, select the room condition, then click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Update the configuration.
  - b. **Inactive**: Select the check box to inactivate the room condition code. The inactive room conditions do not appear in the list when setting a room conditions on rooms.
4. Click **Save**.

#### Deleting Room Conditions

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Room Conditions**.
2. Enter search criteria and click **Search**.
3. In the search result, select the room condition, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Hold Room Conditions

When the Hold Room function is Active, room condition codes HOLD1 to HOLD4 are listed by default as OPERA Cloud SID data.

The hold condition codes may be used to place rooms on hold for a set period of time—from 1 to 1440 minutes (24 hours) or for an unlimited time, depending on the HOLD condition code configuration.

A hold room can be assigned to a reservation only by the user who has placed it on hold. A special permission is required to take a room off hold if it was placed on hold by another user. The room is automatically taken off the hold, when the hold period expires and when a guest is checked into the room before the hold period elapses.

When the Hold Room OPERA Control is active, room condition codes **HOLD1 to HOLD4** are available. These special room condition codes are used to place rooms on hold for a set period of time, from 1 to 1440 minutes (24 hours) or for an unlimited time, depending on the hold condition code configuration.

A hold room condition can be assigned to one or more rooms, and a separate user task is required to remove a hold condition set by another user. The room is automatically released from hold when the hold period expires or when a reservation is checked into the room before the hold period elapses.

This feature might be used in the following scenario. Assume you are assigning rooms to a group of four arriving guests/reservations who want adjoining rooms. If your property has several agents conducting room assignments simultaneously, it might be difficult or impossible to work fast enough to assign the desired four rooms to the reservations you are handling. You could, however, place the four adjoining rooms required into a **HOLD1** condition for, say, five minutes. Then you can assign those rooms to each of the reservations. After five minutes, if you have not assigned the rooms you placed on hold, they become available to other agents in available room search.

### Editing Hold (Duration) Room Conditions

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Room Conditions**.
2. Enter search criteria for the hold room condition and click **Search**.
3. Select the hold condition to update, then click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. **Minutes**: Enter the number of minutes (1 to 1440) that defines the duration of the on-hold period. Leave this field blank to set an unlimited hold period.
4. Click **Save**.

## Configuring Rooms

As it is likely that your property has a variety of rooms that range in size, bedding, exposure and amenities, OPERA Cloud enables you to classify these rooms into different room types. Pricing schedules are then defined for each room type and room type availability is maintained.

There are two varieties of room types in OPERA Cloud

- Physical - Inventory room types tracked in availability; rooms configured for these room types count towards the Oracle Hospitality OPERA Cloud Service, Property Management Foundation subscription.
- Pseudo - Non-inventory room types not tracked in availability; rooms configured for these room types do not count towards the OPERA Cloud subscription. The "PM" pseudo room type is preconfigured on provisioning of OPERA Cloud; other pseudo room types, such as "HOUSE", 'PERMNT' or 'INTERFACE' , can be configured to suit your needs.

When the Component Rooms OPERA Control is active you can also configure virtual room types which are also tracked in availability as an inventory room type. A component room consists of multiple inter-connecting rooms (one or more room types) that define the component room type. A pricing schedule can be set and a reservation can be made for a component room type. When a reservation is made for a component room type, OPERA Cloud deducts one room from the component room type, as well as one room from each of the physical room types that make up the component room type. When the Component Verification OPERA Control is active OPERA Cloud tracks availability of the component room type at a room "number" level; meaning once a room making up a component room type is assigned to a reservation the room type is deducted from inventory.

**Note:**

Component rooms do not count towards the Oracle Hospitality OPERA Cloud Service, Property Management Foundation subscription.

When the Room Class OPERA Control is active all room types (including pseudo) are linked to a room class. Operational , forecast and statistical reports can be filtered by room class. For more information, see [Configuring Room Classes](#)

Once all inventory and pseudo room types are configured, you can configure the individual rooms. The Room value is alphanumeric and not necessary a room "number"; for example you could have APT1 for Apartment 1 or SUI3 for Suite 3.

**Premium**

You can also setup inventory rooms to be available as function / meeting spaces for [catering events](#).

## Configuring Room Classes

### [Prerequisites for Room Classes](#)

A room class is a collection of room types having similar characteristics. For example, all room types on club floors or all apartment accommodation. You can create Room Classes to group similar room types for easier and more highly controlled room inventory management and statistical reporting. Dashboard tiles, application search panels and reports can be filtered by room class.

## Adding a Room Class

### Note:

When the OPERA Multi-property Cross Reservation Cloud Service is active, new room classes are created by selecting the Template tab. After creating the template, you can copy room classes to specific properties using the Copy action. For more information, see [Copying Configuration Codes to Multiple Properties](#)

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Room Class**.
2. Click **New** and complete the following:
  - a. **Code**: Enter a unique code to identify the Room Class.
  - b. **Description**: Enter an appropriate description for the Room Class.
  - c. **Manage Translations**: Click to enter the description in other languages. Available when the Multi-Language OPERA Control is active.
  - d. **Sequence**: Enter a number to determine the order in which room class codes are displayed when listed. If you do not enter a sequence number, the system defaults to alphabetical order by code.
3. Click **Save**.

## Editing a Room Class

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Room Class**.
2. Enter search criteria then click **Search**.
3. Select the **Room Class** in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the details.
5. Click **Save**.

## Deleting a Room Class

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Room Class**.
2. Enter search criteria then click **Search**.
3. Select the **Room Class** in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Room Classes

### OPERA Controls

**Group:** General

**Functions:** Room Class

### OPERA Cloud Tasks

**Group:** Manage Accommodations

Room Class

- New/Edit Room Classes
- Delete Room Classes

## Configuring Room Types

A room type code is used to identify each category of room available at your property. For example, you might configure room types that reflect the primary characteristic of the room -- Deluxe, Superior, Standard in combination with three bedding – Twin, King, Double/Double.

Rate code pricing schedules are setup for each room type and availability is calculated and displayed by room type. OPERA Cloud also tracks revenue statistics by room type.

There are two varieties of room types in OPERA Cloud

- Physical - Inventory room types tracked in availability; rooms configured for these room types count towards the OPERA Cloud subscription.
- Pseudo - Non-inventory room types not tracked in availability; rooms configured for these room types do not count towards the OPERA Cloud subscription. The "PM" pseudo room type is pre-configured on provisioning of OPERA Cloud; other pseudo room types can be configured as needed. You can configure other room types such as "HOUSE", "PERMNT" or "INTERFACE" to suit your needs

When the Room Class OPERA Control is active all room types (including pseudo) are linked to a room class. Operational, forecast and statistical reports can be filtered by room class. For more information, see [Configuring Room Classes](#).

When the Component Rooms OPERA Control is active you can also configure virtual room types which are also tracked in availability as an inventory room type. A component room consists of multiple inter-connecting rooms (one or more room types) that define the component room type. A pricing schedule can be set and a reservation can be made for a component room type. When a reservation is made for a component room type, OPERA Cloud deducts one room from the component room type, as well as one room from each of the physical room types that make up the component room type. When the Component Verification OPERA Control is active OPERA Cloud tracks availability of the component room type at a room "number" level; meaning once a room making up a component room type is assigned to a reservation the room type is deducted from inventory.

#### Note:

Component rooms do not count towards the Oracle Hospitality OPERA Cloud Service, Property Management Foundation subscription.

## Adding Room Types

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new room types are created by selecting the **Template** tab. Once created, you can copy room types to specific properties using the **Copy** action. Some room type attributes listed below are only available once the room type has been copied to the property, based on the active OPERA Controls at the property. For more information, see [Copying Configuration Codes to Multiple Properties](#) for more information.

To create a room type, do the following:

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Room Type**.
2. Click **New** and enter the following details:
  - a. **Types**
    - i. **Physical**: Select to configure an inventory/physical room type (including component room types).
    - ii. **Pseudo**: Select to configure a non-inventory/pseudo room type.
  - b. **Room Type**: Enter an alpha-numeric code for the room type; maximum of 8 characters.
  - c. **Component Suite**: Select to identify the room type as a component (virtual) room type. (Available when the Component Rooms OPERA Control is active).
  - d. **Accessible Room Type**: Select to identify the room type as accessible.
  - e. **Room Class**: Select the room class for the room type (Available when the Room Class OPERA Control is active).
  - f. **Bed Type**: Select the bed configuration for the room type.
  - g. **Yield Status**: Select a yield status from the list.
  - h. **Yield Category**: Select a yield category from the list.
  - i. **Smoking**: Select the default smoking preference for the room type (value is inherited by each room configured for this room type).
  - j. **Activate Date**: Enter an activation date if applicable.
  - k. **Description**: Enter an appropriate description for the Room Type - the description should ideally describe what the Room Class is about.
    - i. **Manage Translation**: Click to open the multi-language screen and configure a translated description for each language
  - l. **Long Description**: Enter furthermore description of the Room Type. This information appears on different screens in OPERA Cloud.
    - i. **Manage Translation**: Click to open the multi-language screen and configure a translated description for each language
  - m. **Room Info URL**: Enter a website address with external details about the room type.

- n. **Sequence:** Enter a display sequence in lists. When two or more room types have the same sequence number, they are displayed alphabetically.
- o. **Meeting:** Select to configure the room type as a meeting room (function space). (Enabled when Pseudo type is selected).
- p. **Housekeeping:** Select to enable the room for all the housekeeping functions. Rooms that are configured as pseudo and meeting can also be selected for housekeeping in order to set them for out of order and out of service.
- q. **Send to IFC:** Select to send a check-in message to the various property interfaces (examples: Video, Door Lock, PBX) for this room type.
- r. **Auto Room Assign:** Select to auto-assign a room to reservations made for this room type.
- s. **Auto Populate:** Select to default the room type to definition details of new [Rate Codes](#).
- t. **Always Checked In:** Select to auto-create and check in a copy of reservations for this pseudo room type after check out (Available when the Auto Check In Pseudo Rooms After Check Out OPERA Control is active) .
- u. **Maintenance:** Select to make the room type available for Maintenance requests (available when the Maintenance OPERA Control is active).
- v. **Default Occupancy:** Enter the number of people required for a room to be occupied. For Pseudo Room, enter 0.
- w. **Minimum Occupancy:** Enter the minimum number of people that can occupy the room for this room type.
- x. **Maximum Occupancy:** Enter the maximum number of people that can occupy the room for this room type.
- y. **Maximum Adults:** Enter the maximum number of adults that can occupy the room for this room type.
- z. **Maximum Children:** Enter the maximum number of children that can occupy the room for this room type.

 **Note:**

Maximum Occupancy can be used alone or in combination with Maximum Adults and/or Maximum Children. These values are referenced throughout OPERA Cloud, for example, when a room is assigned to a reservation, when rates are set up based on occupancy, and when a room move is performed. A message prompts you when the maximum number of persons exceed for a specific room. When used alone, Maximum Occupancy sets the limit on the number of persons (adults and children) that may occupy rooms of this room type. For example, if Maximum Occupancy is 3 and Maximum Adults and Maximum Children are not defined (null values), the room could be occupied by any mix of adults and children not to exceed 3 persons: by 3 adults, or by 2 adults and 1 child, or by 1 adult and 2 children, or by 3 children, etc. When Maximum Occupancy is used with Maximum Adults and/or Maximum Children, the number of persons occupying the room may not exceed Maximum Occupancy, nor may the individual limits on the number of adults (Maximum Adults) and/or the number of children (Maximum Children) be exceeded. This means that the Maximum Adults value and the Maximum Children values cannot be individually greater than the Maximum Occupancy value.

- aa. **Room Features:** Select the default room features for the room type. Selected features are copied to all rooms created of this room type. These default features may be changed on individual rooms when the room is configured. For more information, see [Configuring Room Features](#) .
  - i. Click **New**
    - Select one or more room features from the list.
    - Click **Select**.
  - ii. To delete a room feature, click the **vertical ellipsis** and select **Delete**.
- ab. **Room Components:** Select the room types and specify the quantity of each which make up the component room (Enabled when the Component check box is selected).
  - i. Click **New**.
    - **Component:** Select a room type from the list.
    - **Quantity.:** Enter the number of rooms of the room type.
  - ii. Repeat to add another room typè.
  - iii. To delete, select the room type, click the vertical ellipsis **Actions** menu and select **Delete**.
3. Click **Save**.

### Editing Room Types

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Room Type**.
2. Enter search criteria and click **Search**.
3. Select the room type in the search result, click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Update configuration.

- b. **Inactive:** Select the mark the room type inactive. Inactive room types will not display in room type lists throughout OPERA Cloud.

 **Note:**

Room types can only be set inactive at the property level and if there is no inventory available for that room type. For example, the room type cannot be associated with a rate code; it cannot be associated with a current and/or future reservation; it cannot be associated with an active business block; it cannot have rooms associated with it; and it cannot be part of a component room type configuration.

4. Click **Save**.

### Deleting Room Types

 **Note:**

A room type can only be deleted when it has no dependencies associated with it. This means that it cannot be selected in any reservations, blocks, rooms, etc. If the room type is associated to any configuration or transactional data you will receive a warning message and will not be able to delete the room type. Even when no dependencies are linked to the room type and it is being deleted, a "When deleting a room type, past reservations and statistics will not recognize this room type." message is displayed. Select **Yes** to continue with the deletion or **No** to stop the deletion.

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Room Type**.
2. Enter search criteria and click **Search**.
3. Select the room type in the search result, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Rooms

Room configuration is for the individual rooms assigned to reservations. Rooms must be configured for all inventory room types and pseudo room types needed for permanent house-use accounts (ie account numbers), interface accounts, block posting masters and other billing requirements. The room value is alphanumeric and not necessary a room "number"; for example you could have APT1 for Apartment 1 or SUI3 for Suite 3.

When the Component Suites OPERA Control is active you must also configure virtual room "number" entries for the component [room type](#) rooms.

**Premium** You can also setup inventory rooms to be available as function (meeting) spaces for [catering events](#).

Prior to configuring rooms ensure you've completed the configuration of:

- **Room Types:** For more information, see [Room Types](#).
- **Room Features:** For more information, see [Room Features](#).
- **Floors:** For more information, see [Configuring Floors](#).
- **Buildings:** For more information, see [Configuring Buildings](#).
- **Smoking Preferences:** For more information, see [Smoking Preferences](#).
- **Door Lock System (DLS) Room Key Options:** For more information, see [Creating Keys from the Property Interface Control Screen](#)
- **Housekeeping Sections:** For more information, see [Housekeeping Sections](#).
- **Rack Rate(Published Rate):** For more information, see [About Rate Codes](#).

### Adding Rooms

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Rooms**.
2. Click **New** and complete the following
  - a. **Property:** Enter or select the property.
  - b. **Room:** Enter an alpha-numeric code; a maximum of 6 characters.
  - c. **Room Type:** Select the room type from the list. For more information, see [Managing Room Types](#).
  - d. **(View Only) Room Class:** The room class appears based on the room type selected. (Available when the Room Class OPERA Control is active).
  - e. **Accessible Room:** Select to configure the room as an accessible room.
  - f. **Description:** Enter an appropriate description for the room.
    - i. **Manage Translation:** Click to open the multi-language screen and configure a translated description for each language.
  - g. **Maximum Occupancy:** Enter the maximum number of people that can occupy the room.
  - h. **Published Rate Code:** OPERA Cloud uses this rate code to calculate the typical rate for the room to print variance reports and has no bearing on the reservation.
  - i. **Published Rate Amount:** Enter the rate amount to calculate the rate variance. Generally, this amount is used when you do not have a standard rate code for this room or if you want to use an amount that is different from the standard rate to calculate the variance.
  - j. **Floors:** Select the floor(s) on which this room is located. This help users to search and assign a room according to the guest floor preference.
  - k. **Square Units:** Enter the area (square feet or square meter) of the room.
  - l. **Measurement:** Enter the dimensions (length and width) of the room.
  - m. **Phone Number:** Enter the phone number assigned to the room.
  - n. **Key Options:** Select the default key option when keys are encoded for reservations assigned to this room. Key Options depend on the capabilities of the key interface; and typically determine access to hotel areas such as club floor, gymnasium, library and so on.

- o. **Smoking:** Specify if the room is a smoking or non- smoking room. This help users to search and assign a room according to the guest smoking preference.
- p. **Turndown:** Select if the room is eligible for turndown by default (Available when the Turndown OPERA Control is active).
- q. **Building:**Select a building from the list (Available when the Building Management OPERA Control is active).
- r. **Sequence:** How rooms are displayed when listed on room lookup screens such as the [Room Assignment](#) and the [Room Diary](#) is determined by the Room Display Order OPERA Control. When the Room Display Order OPERA Control is set to Display Sequence, the display order is controlled by the sequence number assigned here in room configuration. Enter a number to determine the order in which room codes are displayed when listed.
- s. **Events:** Select this check box to enable the room that is to be sold as a function (event) space. 
- t. **Number of Beds:** Enter the number of beds that are located in the room. When copying a room, the Number of Beds value is copied to the new room.
- u. **Sections:**
  - i. **Day Section:** Enter the day section to which the room belongs. For more information, see [Configuring Housekeeping Section Codes](#).
  - ii. **Evening Section:** Enter the evening (turn-down) section to which the room belongs. For more information, see [Configuring Housekeeping Section Codes](#).
- v. **Housekeeping Credits:**
  - i. **Pickup:** Specify the number of credits (effort) needed to service a room in pickup status (Available when the Pickup OPERA Control is active).
  - ii. **Stayover:** Specify the number of credits (effort) needed to service a stayover room (typically dirty status).
  - iii. **Departure:** Specify the number of credits (effort) needed to service a departure room (typically dirty status).
  - iv. **Turndown:** Specify the number of credits (effort) needed to service a room for turndown task Available when the Turndown OPERA Control is active.
- w. **Room Features:** Features will default from the selected room type; you can update as required.
  - i. To add a feature, click **New** and search and select the room features, click **Select** .
  - ii. To delete a feature, select the feature, click the **Vertical Ellipsis** and select **Delete**; click **Delete** to confirm.
  - iii. For more information, see [Configuring Room Features](#).
- x. **Connecting Rooms:** (Available when the Connecting Rooms OPERA Control is active).
  - i. To add a connecting room, click **New** and search, and select the require connecting room, click **Select**.

- ii. To delete a connecting room, click the **Vertical Ellipsis** and select **Delete**; click **Delete** to confirm.

3. Click **Save**.

### Copying (Cloning) Rooms

Use the Copy action to save time when you have many similar rooms to add. For example, if rooms 202, 206, 302, 306, 402, 406, 502, 506 have exactly the same features in your property, configure room 202 with all necessary details and use the Copy action to create the similar rooms.

Copy can also be used to create many pseudo room accounts (POST1, POST2, POST3 etc).

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Rooms**.
2. Enter search criteria and click **Search**.
3. Select the room and click vertical ellipsis and select **Copy**.
4. Source room details are displayed at the top of the page and will be copied to room(s) entered below. Use the attribute entry to override the details as needed.
  - a. **Room**: Enter an alpha-numeric code; a maximum of 6 characters.
  - b. **Features**: Select feature(s) from the list.
  - c. **Floor**: Select floor(s) from the list.
  - d. **Day Section**: Select a housekeeping day section.
  - e. **Evening Section**: Select a housekeeping evening section.
  - f. **Stayover Credit**: Specify the number of credits (effort) needed to service a stayover room (typically dirty status).
  - g. **Departure Credit**: Specify the number of credits (effort) needed to service a departure room (typically dirty status).
  - h. **Pickup Credit**: Specify the number of credits (effort) needed to service a room in pickup status (Available when the Pickup OPERA Control is active).
  - i. **Turndown Credit**: Specify the number of credits (effort) needed to service a room for turndown task (Available when the Turndown OPERA Control is active).
5. Click **Save** or click **Save and Goto Function Space** to update [Configuring Function Spaces](#) details.

### Editing Rooms

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Rooms**.
2. Enter search criteria and click **Search**.
3. Select the room and click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Rooms

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management**, and then select **Rooms**.

2. Enter search criteria and click **Search**.
3. Select the room and click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Room Hierarchy (Room) Classes

### [Prerequisites for Configuring Room Hierarchy \(Room\) Classes](#)

Room Class hierarchies are available for selection in the [Upgrade Rules](#) configuration.

### Adding Room Hierarchy Class

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** then select **Room Hierarchy Classes**.
2. Click **New** and enter the following details:
  - a. **From Room Class:** Select a Room Class from the list.
  - b. **To Room Class:** Select one or room classes from the list.
  - c. **Sequence:** Enter a number for the display sequence or the order in which the upsell room hierarchy is listed.
3. Click **Save**.

### Editing Room Hierarchy Class

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** then select **Room Hierarchy Classes**.
2. Enter search criteria and click **Search**.
3. Select the room class hierarchy, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Room Hierarchy Class

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** then select **Room Hierarchy Classes**.
2. Enter search criteria and click **Search**.
3. Select the room class hierarchy, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm

## Configuring Room Hierarchy (Room) Types

### [Prerequisites for Configuring Room Hierarchy \(Room\) Types](#)

Room Type hierarchies are available for selection in the [Upgrade Rules](#) configuration.

### Auto Generate Room Hierarchy Types

Available when AI Room Assignment OPERA Control is active and upgrade rules are not configured.

1. Click **Auto-Generate**.
2. Select the property and results are displayed automatically.

### Adding Room Hierarchy Type

1. Select the **Administration** menu, select **Inventory**, select **Accommodation Management** then select **Room Hierarchy Types**.
2. Click **New** and enter the following details:
  - a. **From Room Type:** Select a Room type from the list.
  - b. **To Room Type:** Select one or room types from the list.
  - c. **Sequence:** Enter a number for the display sequence or the order in which the upsell room hierarchy is listed.
3. Click **Save**.

### Editing Room Hierarchy Type

1. Select the **Administration** menu, select **Inventory**, select **Accommodation Management** then select **Room Hierarchy Types**.
2. Enter search criteria and click **Search**.
3. Select the room Type hierarchy, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Room Hierarchy Type

1. Select the **Administration** menu, select **Inventory**, select **Accommodation Management** then select **Room Hierarchy Types**.
2. Enter search criteria and click **Search**.

3. Select the room Type hierarchy, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm

## Configuring Room Features

A feature is a characteristic or attribute of the room which does not significantly affect the rate or the demand on the room. Room feature functionality makes it easier for you to search and assign rooms according to guest preferences. Room features configured here are also displayed as profile preferences (of type: room feature). See [Preferences](#) for more information.

You can think of a feature as being any attribute of the room for which specific availability does not need to be tracked. For example, room features can be rooms near or away from an elevator, rooms with accessibility facilities or rooms with a specific view. There may however be some cases where features need to be considered as a specific room type. If your property has a limited amount of rooms with an ocean view, for which a higher price is charged, then ocean view rooms would have their own room type (and room feature).

Once configured room features are selected on each room type and/or room. See [Configuring Rooms](#) for more details.

During check in or when pre-allocating rooms, OPERA Cloud can search for available rooms by room feature as well as by room type; with room feature, smoking and floor preferences defaulted from the reservation and/or profile.

### Note:

Smoking and Floor are not configured as a room feature as there are separate, distinct preference types for these.

## Adding Room Features

### Note:

When the OPERA Multi-property Cross Reservation Cloud Service, new Room Features are created by selecting the Template tab. Once created, you can copy Room Feature codes to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management** then select **Room Features**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the room feature.
  - b. **Description**: Enter a description of the room feature.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - d. **Mapped Preferences**: Click to select one or more preferences from the list to map to the room feature (Available when the AI Room Assignment OPERA Control is active).
  - e. **Global**: Select the make the room feature available in all properties. (Available in the template tab when the OPERA Multi-property Cross Reservation Cloud Service is active).
3. Click **Save** or **Save and Continue** to add another.

## Editing Room Features

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management** then select **Room Features**.
2. Enter search criteria and click **Search**.
3. Select the Room Feature, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. Click **Save**.

## Deleting Room Features

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management** then select **Room Features**.
2. Enter search criteria and click **Search**.
3. Select the Room Feature, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Room Maintenance

### Prerequisites for Room Maintenance

Room Maintenance codes are the various reasons/categories of maintenance tasks created for rooms. Users select a maintenance reason/category and can then enter additional notes to describe the issue/request. Examples:

- Air Conditioning
- Plumbing
- Electrical
- Lighting
- Carpet
- Bedding
- Painting

## Prerequisites for Room Maintenance

### OPERA Controls

**Group:** Room Management

**Functions:** Maintenance

### OPERA Cloud Tasks

**Group:** Inventory Admin

**Tasks:** Manage Accommodations

- Room Maintenance
  - New/Edit Room Maintenance
  - Delete Room Maintenance

## Configuring Room Maintenance Codes

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Room Maintenance codes are created by selecting the Template tab. Once created, you can copy Room Maintenance codes to specific properties using the Copy action. For more information, see [Copying Configuration Codes to Multiple Properties](#) for more information.

### Adding Room Maintenance Codes

1. From the Administration menu, select **Inventory**, select **Accommodation Management**, and then select **Room Maintenance**.
2. On the Room Maintenance screen, click **New**.
  - Enter an unique **Code** to identify the room maintenance request code.
  - Enter an appropriate **Description** for the Room Maintenance request, the description should ideally describe what the repair or room maintenance is about.

- Enter a **Sequence** number to determine the order in which room maintenance codes are displayed when listed. When two or more room maintenance have the same sequence number, they are displayed alphabetically.
3. Click **Save**.

### Editing Room Maintenance Codes

To edit an existing room maintenance code in your property, do the following:

1. From the Administration menu, select **Inventory**, select **Accommodation Management**, and then select **Room Maintenance**.
2. Enter search criteria then click **Search**.
3. Select the room maintenance code in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. **Inactive**: Select check box to mark code as inactive.
6. Click **Save**.

### Deleting Room Maintenance Codes

1. From the Administration menu, select **Inventory**, select **Accommodation Management**, and then select **Room Maintenance**.
2. Enter search criteria then click **Search**.
3. Select the room maintenance code in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Room Pools

### Prerequisites for Configuring Room Pool Mapping

Room Pools allow you to group room types together into more generic categories. Often the physical room types are too specific than what is required by sales agents creating inquiry (leads) blocks; room pools provide a way to enable a way to simply this. For example, you might create a Room Pool for STD:Standard and then map all the physical rooms type that fit this description, say Kings and Doubles, to room pool of "STD". When a sales agent books 5 STD rooms in a block, they actually book 5 rooms that are either Kings or Doubles. When configured you then map the physical room types to room pools, see [Configuring Room Pool Mapping](#) for more information.

### Adding Room Pools

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management** then select **Room Pool Codes**.
2. Click **New** and enter the following details:
  - a. **Property**: Enter or confirm the property.
  - b. **Room Pool**: Enter a code for the room pool.
  - c. **Description**: Enter a description of the room pool.
    - i. **Manage Translation**: Click to enter translations for the description.

- d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** or **Save and Continue** to add another room pool.

### Editing Room Pools

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management** then select **Room Pool Codes**.
2. Confirm the property and click **Search**.
3. Select the Room Pool, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Room Pools

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management** then select **Room Pool Codes**.
2. Confirm the property and click **Search**.
3. Select the Room Pool, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Room Pool Mapping

### [Prerequisites for Configuring Room Pool Mapping](#)

Room Pools allow you group room types together into more generic categories. Often the physical room types are too specific than what is required by sales agents creating inquiry (leads) blocks; room pools provide a way to enable a way to simply this. For example, you might create a Room Pool for STD: Standard and then map all the physical rooms type that fit this description, say Kings and Doubles, to room pool of "STD". When a sales agent books five STD rooms in a block, they actually book five rooms that are either Kings or Doubles.

### Mapping Room Types to Room Pools

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management** then select **Room Pool Mapping**.
2. Confirm the property and click **Search**.
3. Click **Edit**.
4. For each room type listed enter the following details:
  - a. **Room Pool:** Select a Room Pool from the list.
  - b. **Sequence:** Defines the sequence of the Room Pools when displaying in the Room Grid.
5. Click **Save**.

## Configuring Buildings

### Prerequisites for Configuring Buildings

Buildings are available for the purpose of housekeeping task assignment; allowing task sheets to be generated per building. Using building as a 'hard-stop' prevents room attendants being assigned rooms in different buildings.

If you are planning to use [building group configuration](#), configure those before configuring buildings; however building groups are optional when using buildings

### Adding Buildings

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** and then select **Buildings**.
2. Click **New** and enter the following details:
  - a. **Property:** Enter or select the property.
  - b. **Code:** Enter a code.
  - c. **Description:** Enter a description for the building.
  - d. **Building Group:** Select a building group from the list.
  - e. **Target Credit:** Enter the target credit for this building when processing the housekeeping task breakout by building.
  - f. **Sequence:** Enter a display sequence.
3. Click **Save** or **Save and Continue** to add another.

### Editing Buildings

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** and then select **Buildings**.
2. Enter search criteria and click **Search**
3. Select the room, and click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update details.

5. Click **Save**.

### Deleting Buildings

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** and then select **Buildings**.
2. Enter search criteria and click **Search**
3. Select the room, and click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

  - Delete Buildings

## Configuring Buildings Groups

### Prerequisites for Configuring Buildings

Building groups are used to group multiple building together for the purpose of housekeeping task assignment; allowing task sheets to be generated per building group. Using building groups as a 'hard-stop' prevents room attendants being assigned rooms in different building groups.

### Adding Building Groups

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** and then select **Building Groups**.
2. Click **New** and enter the following details:
  - a. **Property:** Enter or select the property.
  - b. **Code:** Enter a code for the building group.
  - c. **Description:** Enter a description for the building group.
  - d. **Target Credit:** Enter the target credit for this building when processing the housekeeping task breakout by building group.
  - e. **Sequence:** Enter a display sequence.
3. Click **Save** or **Save and Continue** to add another.

### Editing Building Groups

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** and then select **Building Groups**.
2. Enter search criteria and click **Search**
3. Select the room and click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Buildings Groups

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** and then select **Building Groups**.
2. Enter search criteria and click **Search**
3. Select the room and click the vertical ellipsis **Actions** menu, and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Floor Mapping

### Configuring Floor Mapping

Floor mapping is used when generating housekeeping task sheets by floor; ensuring the housekeeping room attendant doesn't have to travel between buildings or floors.

Floor mapping is only need when you have multiple buildings and the same floors exist in each of those buildings.

See [Complete Floor](#) and [Building](#) configuration first.

### Editing Floor Mapping

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** and then select **Floor Mapping**.
2. Enter search criteria and click **Search**.
3. Click **Manage** and complete the following
  - a. **Floor**: Select a floor from the list.
  - b. **Description**: Enter a description (Example: Building 1 Floor 1).
  - c. **Building**: Select a building from the list.
  - d. **Target Credits**: Enter the target credit for when processing the housekeeping task breakout.
  - e. **Sequence**: Enter a display sequence.
4. Click **Save**.

**Note:**

Click **Add Row** to add additional rows as needed.

## Configuring Floors

### Prerequisites for Configuring Floors

### Adding Floors

**Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Floors are created by selecting the Template tab. Once created, you can copy Floors to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** and then select **Floors**.
2. Click **New** and enter the following details:
  - a. **Floor:** Enter an alpha-numeric code for the floor; maximum of 8 characters.
  - b. **Description:** Enter a description for the floor.
  - c. **Sequence:** Enter a display sequence.
  - d. **Global:** Select to indicate the floor is global in multi-property operations.
  - e. **Housekeeping:** Select to indicate this floor is available when creating task sheets; where floor is used as the hard stop between task sheets.
3. Click **Save**.

### Editing Floors

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** and then select **Floors**.
2. Enter search criteria and click **Search**
3. Select a delivery status, click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update configuration.

5. Click **Save**.

### Deleting Floors

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** and then select **Floors**.
2. Enter search criteria and click **Search**
3. Select the room and click the vertical ellipsis **Actions** menu, and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Bed Types

### Prerequisites for Configuring Bed Types

Bed Types are referenced in [room type configuration](#) to identify the bed configuration . If a room type has more than one physical bed then configure a bed type for the combination; for example QS for Queen + Single .

#### Note:

Bed types is global configuration in a multi-property operation.

### Adding Bed Types

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** and then select **Bed Types**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the bed type.
  - b. **Description**: Enter a description for the bed type.
    - i. **Manage Translation**: Click to open the multi-language screen and configure a translated description for each language.
  - c. **Sequence**: Enter a display sequence.
3. Click **Save** or **Save and Continue** to add another.

### Editing Bed Types

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** and then select **Bed Types**.
2. Enter search criteria and click **Search**.
3. Select the room, and click the vertical ellipsis **Actions** menu and select **Edit**
4. Update details.
5. Click **Save**.

### Deleting Bed Types

1. From the **OPERA Cloud Administration** menu, select **Inventory**, select **Accommodation Management** and then select **Bed Types**.
2. Enter search criteria and click **Search**.
3. Select the room, and click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Function Spaces

### Prerequisites for Function Space Management

Configure Function Space for the spaces used for events such as weddings, conferences, banquets, pool parties, and so on. Combination (Combo) function spaces can be configured when more than one function space can be combined and booked for an event. You can copy (clone) the setup of a function space to easily create other similar function spaces.

#### Note:

Before you configure function spaces, you must configure room classes and [room types](#), [function space types](#), [locations](#), [setup styles](#), [rental codes](#), and [revenue types](#).

### Adding Function Spaces

1. From the **Administration** menu, select **Inventory**, select **Function Space Management**, and select **Function Spaces**.
2. Click **New** and complete the following:
  - a. **Function Space Details**
    - i. **Primary Details:** [Configuring Function Space Primary Details](#)
    - ii. **Additional Details:** [Configuring Function Space Additional Details](#)
    - iii. **Dimensions and Details:** [Configuring Function Space Dimensions and Details](#)
  - b. **Setup Styles:** [Configuring Function Space Setup Styles](#)

- c. **Rental Codes:** [Configuring Function Space Rental Code Details](#)
  - d. **Combo Elements:** [Configuring Function Space Rental Combination Components](#)
3. Click **Save**.

### Editing Function Spaces

1. From the **Administration** menu, select **Inventory**, select **Function Space Management**, and select **Function Spaces**.
2. Enter search criteria, then click **Search**.
3. From your search results, select the **Function Space**, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration from the Function Space presentation page:

**Table 12-2 Function Space Detail Links**

Function Space
<a href="#">Primary Details</a>
<a href="#">Additional Details</a>
<a href="#">Dimensions and Details</a>
<a href="#">Setup Styles</a>
<a href="#">Rental Codes</a>
<a href="#">Combo Elements</a>

### Copying Function Spaces

You can quickly copy the setup of a function space to many other function spaces using the copy action.

1. From the **Administration** menu, select **Inventory**, select **Function Space Management**, and select **Function Spaces**.
2. Enter search criterion and then click **Search**.
3. From search results, select the **Function Space**, click the vertical ellipsis **Actions** menu and select **Copy**.
4. Enter the following fields:
  - a. **Room:** Enter the code for the function space.
  - b. **Space Name:** The full name of the function space.
  - c. **Short Name:** An abbreviated or alternate function space name.
  - d. **Custom Order (1–3):** A custom order represents a group of selected function spaces appearing in a specific sequence. Use the three Custom Order fields to identify the Function Diary custom order (or orders) to which the current function space should belong and the position of the function space in that custom order.
  - e. **Combo Element:** (Available only if the source function space is marked as a combo room). Select or more function space from the list to associated with the combo room.
5. Click **Save**.

## Deleting Function Spaces

You can delete a Function Space only if it is not assigned to a Function Space.

1. From the Administration menu, select **Inventory**, select **Function Space Management**, and select **Function Spaces**.
2. Enter search criteria, and click **Search**.
3. From search results, select the **Function Space**, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Function Space Primary Details

### Editing Function Space Primary Details

1. From the **Administration** menu, select **Inventory**, select **Function Space Management**, and select **Function Spaces**.
2. Click **New** and complete the following fields.
3. On the Function Space presentation page click the **Primary Details** details link.
  - a. Click **Edit** and complete the following:
  - b. **Property**: Enter or select the property .
  - c. **Room Type**: Select the pseudo room type for the function space from the list (example: MSPACE).
  - d. **Room**: Enter the code for the function space you are configuring. OPERA Cloud allows up to eight alphanumeric characters for the room. Rooms do not need to start with or include numbers and include letters. Spaces are not allowed inside the room.
  - e. **Space Type**: Select the space type from the list. The space type can serve as a filter in the Function Diary. See [Configuring Function Space Types](#).
  - f. **Minimum Capacity**: Enter the minimum number of people required to book this function space. When associating setup styles to a function space, this is the minimum value you can enter for minimum capacity.
  - g. **Maximum Capacity**: Enter the maximum number of people allowed in this function space (often the fire code maximum is used here). When associating setup styles to a function space, this is the maximum value you can enter for maximum capacity.
  - h. **Space Name**: Enter the full name of this function space. The name identifies the function space on the Function Diary (link: [Using the Function Diary](#) and in other screens and reports.
    - i. **Manage Translations**: Select the link to provide language translations. Available when the Multi-Language OPERA Control is active.
  - i. Click **Save**.

## Configuring Function Space Additional Details

### Editing Function Space Additional Details

1. From the **Administration** menu, select **Inventory**, select **Function Space Management**, and select **Function Spaces**.
2. Enter search criteria, then click **Search**.
3. From your search results, select the Function Space, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. On the Function Space presentation page click the **Additional Details** details link.
  - a. Click **Edit** and complete the following.
  - b. **Short Name**: An abbreviated or alternate function space name. If a Short Name is provided, it appears instead of the Space Name on the Function Diary screen. For example, you can use this field to identify the Grand Continental Ballroom A as the Ballroom A on the Function Diary, if Ballroom A is commonly recognized by staff.
  - c. **Location**: Select the [location](#) where the function space is situated. You can use Location filtering in the Function Diary.
  - d. **Floor**: Select the floor where the function space is located. For more information, see [Configuring Floors](#)
  - e. **Custom Order 1-3**: When you are working with the Function Diary, three custom orders are available for sorting the function space display. The custom orders are included as Sort By options in the Function Diary screen. Each custom order represents a group of selected function spaces appearing in a specific sequence. Use these three fields to identify the Function Diary custom order (or orders) to which the current function space should belong and the position of the function space in that custom order.
  - f. **Display in Diary**: Select the check box to show the function space in the Function Diary by default. If the check box is not selected, the function space appears in the Function Diary only if you select the filter criteria, Include Hidden Spaces check box.
  - g. **Web Viewable**: Select the check box to designate this function space as viewable through OWS.
  - h. **Web Bookable**: Select the check box to designate this function space as available for booking through OWS.
  - i. **Shareable** : Select the check box if the room is shareable (if two or more events from different blocks can simultaneously use the space). When the space is shareable, the property can set the maximum capacity and a limit for the maximum number of groups that can book the space for the same date and the same or overlapping time periods. When an event is booked in the space, the application validates that both the maximum capacity and maximum number of groups are exceeded. If the maximum capacity or maximum number of groups are exceeded, and you have the user task for Override Space Capacity, you can continue or cancel the process.

 **Note:**

When scheduling an event in a space, you can designate the space as exclusive (not shareable) at the time the function space is selected (OPERA Controls Book Shareable Space as Exclusive parameter required). When this is the case, you cannot schedule the function space for another event at the same time.

- i. **Maximum Groups:** If the room is shareable, enter the maximum number of groups allowed to share it. Maximum Groups controls the number of blocks that can book the space at the same time in deduct from inventory status.
- j. **Accessible:** Select this check box if the room has handicap facilities.
- k. **Force Alternate :** Select the check box if you want to force users to select an alternate (backup) space when this function space is booked for an event. Available when the Alternate Space OPERA Control is active. For more information, see [Managing Alternate Space Events](#).
  - i. **Excluded Event Types :** Available if the Force Alternate check box is selected. Use this option to select Event Types to exclude from the Force Alternate requirement. For example; if MTG (meeting) is selected as an Event Type for the Conference Room, then when booking the Conference Room for Event Type MTG, an Alternate space is not required, and you are not prompted to select one.
- l. **100% Occupancy:** Defaults to 1440 minutes (24 Hours) with the creation of a function space. This value represents the amount of time the function space is considered at 100% utilization. The value is used in the Function Space Utilization report (rep\_fs\_utilization)
- m. **Description:** Enter a description of the function space type, such as Grand Continental Ballroom.
  - i. **Manage Translations:** Select the link to enter language translations for the description. Available when the Multi-Language OPERA Control is active.
- n. Click **Save**.

## Configuring Function Space Dimensions and Details

### Editing Function Space Dimension and Details

The panel supports distance measurements in feet or meters and weight measurements in pounds or kilograms. As you add dimensions or weights in one unit, OPERA Cloud automatically computes the measurement in the other unit. Whether you have access to the Meter/Kg or Feet/Lb fields depends on the value selected in Measurement OPERA Control. (link: ).

1. From the **Administration** menu, select **Inventory**, select **Function Space Management**, and select **Function Spaces**.
2. Enter search criteria, then click **Search**.

3. From your search results, select the Function Space, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. On the Function Space presentation page click the **Dimension & Details** details link.
  - a. Click **Edit** and complete the following:
    - b. **Area**: Area of the room (length x width).
    - c. **Length**: The length dimension of the space.
    - d. **Width**: The width dimension of the space.
    - e. **Minimum Height**: The minimum height of the space. Minimum height might not be necessarily dictated by ceiling height. If chandeliers or similar structures are low-hanging, you might want to note them.
    - f. **Maximum Height**: The maximum height of the space.
    - g. **Weight**: The maximum load the floor can support in the function space.
    - h. **Notes**: Any additional information of importance about the space.
  - i. Click **Save**

## Configuring Function Space Setup Styles

### Adding Function Space Setup Styles Details

1. From the **Administration** menu, select **Inventory**, select **Function Space Management**, and select **Function Spaces**.
2. Enter search criteria, then click **Search**.
3. From your search results, select the Function Space, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. On the Function Space presentation page click the **Setup Styles** details link.
  - a. Click **New** in the Setup Styles panel and complete the following fields:
    - i. **Code**: Select the appropriate Setup Code. Refer to [Configuring Setup Styles](#).
    - ii. **Default**: Select the check box if this Setup Style should be selected automatically when the function space is added to an event. You can select only one Setup Style per function space as the default. Note: Selecting this check box deselects the check box on another Setup Style where it has already been selected.
    - iii. **Minimum Capacity**: Enter the lowest number of attendees needed to book the function space with this setup style. If the attendee number on the event is lower than this number, OPERA Cloud prompts you about the discrepancy. The value entered here cannot be lower than the value entered in the Minimum Capacity field in the Primary Details section.
    - iv. **Maximum Capacity**: Enter the highest number of attendees allowed to book this function space with this setup style. If the attendee number on the event is higher than this number, OPERA Cloud prompts you about the discrepancy. Note: the value entered here cannot be higher than the

value entered in the Maximum Capacity field in the Primary Details section.

- v. **Setup Time:** Enter the default number of minutes required to set this room up in the setup style. The number entered here defaults to the event when this function space and setup style are selected, but you can update the value at any time.
  - vi. **Setdown Time:** Enter the default number of minutes required to break down this room in this setup style. The number defaults to the event when you select this function space and setup style, but you can update the value at any time.
- b. Click **Save** to save and close or click **Save and Continue** to save and add another setup style.

### Editing Function Space Setup Styles Details

1. From the **Administration** menu, select **Inventory**, select **Function Space Management**, and select **Function Spaces**.
2. Enter search criteria, then click **Search**.
3. From your search results, select the Function Space, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. On the Function Space presentation page click the **Setup Styles** details link.
5. Select the **Setup Style**, then click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Update details.
  - b. Click **Save**.

### Deleting Function Space Setup Styles Details

1. From the **Administration** menu, select **Inventory**, select **Function Space Management**, and select **Function Spaces**.
2. Enter search criteria, then click **Search**.
3. From your search results, select the Function Space, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. On the Function Space presentation page click the **Setup Styles** details link.
5. Select the **Setup Style**, then click the vertical ellipsis **Actions** menu and select **Delete**.
6. Click **Delete** to confirm.

## Configuring Function Space Rental Code Details

### Adding Function Space Rental Code Details

1. From the **Administration** menu, select **Inventory**, select **Function Space Management**, and select **Function Spaces**.
2. Enter search criteria, then click **Search**.
3. From your search results, select the Function Space, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. On the Function Space presentation page click the **Rental Codes** details link.

 **Note:**

The Rental Code CUSTOM defaults when this panel is first selected.

- a. **Code:** Select the appropriate Rental Code from the list. See [Configuring Rental Codes](#)
- b. **Revenue Type:** Select the appropriate Revenue Type from the list. The value entered in the OPERA Control Default Space Revenue Type defaults to this field. See: [Configuring Catering Revenue Types](#).
- c. **Charge Type:** Select the appropriate value based on whether the rental Amount should be calculated Per Room (flat charge) or Per Person (Rental Amount \* Number of Attendees).
- d. **Amount:** Enter the Rental Amount for this Rental Code and Function Space.
- e. **Set as Default:** Select the check box if the Rental Code should be automatically selected when you add the function space to an event. You can select only one Rental Code per function space as the default. Selecting this check box deselects it on another Rental Code where the check box is already selected.
- f. **Hourly Rate:** Select the check box if the Amount you entered should be charged based on the number of hours the function space is booked, for example, if the Amount you enter is 100.00 and space is booked on an event from 09:00 - 11:00, the Rental Amount calculates as 100.00 \* 2 Hours).
- g. Click **Save** to save and close or click **Save and Continue** to save and add another rental.

#### Editing Function Space Rental Code Details

1. From the **Administration** menu, select **Inventory**, select **Function Space Management**, and select **Function Spaces**.
2. Enter search criteria, then click **Search**.
3. From your search results, select the Function Space, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. On the Function Space presentation page click the **Rental Codes** details link.
5. Select the **Rental Code**, then click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Update details.
  - b. Click **Save**.

#### Deleting Function Space Rental Code Details

1. From the **Administration** menu, select **Inventory**, select **Function Space Management**, and select **Function Spaces**.
2. Enter search criteria, then click **Search**.
3. From your search results, select the **Function Space**, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. On the Function Space presentation page click the **Rental Code** details link.

5. Select the **Rental Code**, then click the vertical ellipsis **Actions** menu and select **Delete**.
6. Click **Delete** to confirm.

## Configuring Function Space Rental Combination Components

Combination (Combo) function spaces can be configured when more than one function space can be combined and booked as one space for an event; configure the actual function space components prior to setting up the combination spaces.

Select the various component spaces that comprise the combination function space.

### Editing Combination Function Space Components

1. From the **Administration** menu, select **Inventory**, select **Function Space Management**, and select **Function Spaces**.
2. Enter search criteria, then click **Search**.
3. From your search results, select the Function Space, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. On the Function Space presentation page click the **Combo Elements** details link.
  - a. Click **Edit**.
  - b. From the list in the left panel, select the function spaces that make up this combination space (you can select more than one space using the space bar), then move the selected spaces to the right panel using the > arrow button.
  - c. Click **Save**.

## Configuring Function Space Types

Use the Function Space Types screen to configure the different types of function spaces available at your property, such as Ballroom, Boardroom, or Conference. This can be helpful in the Function Diary when filtering for a suitable function space.

Function Space Types are assigned to the function space using the Function Space Setup screen. For more information, see [Configuring Function Spaces](#).

### Adding a Function Space Type

1. Select the **Administration** menu, select **Inventory**, select **Function Space Management**, and then select **Function Space Types**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code for the function space type, such as BALL.
  - b. **Description**. Enter a description for the function space type, such as Ballroom.
  - c. **Manage Translations**. Select to open the multi-language descriptions screen and configure a translated descriptions for each language.

- d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned
3. Click **Save** to save and close or click **Save and Continue** to save and create another record.

#### Editing a Function Space Type

1. On the Function Space Types screen, enter search criteria and click **Search**.
2. In the search results, select the code and click the vertical ellipsis **Actions** menu.
3. Click **Edit**.
4. Make the required change to Description or Sequence.
5. Click **Save**.

#### Deleting a Function Space Type

You can delete a Function Space Type only if it has not been assigned to a Function Space.

1. On the Function Space Types screen, enter search criteria and click **Search**.
2. In the search results, select the code and click the vertical ellipsis **Actions** menu.
3. Click **Delete**.

## Configuring Function Space Locations

Use the Function Space Locations screen to configure where a function space is located on the property, for example, the main building or outside. This can be helpful in the Function Diary when filtering for a suitable function space.

The Locations are assigned to the function space using the Function Space Setup screen. For more information, see : [Configuring Function Spaces](#).

#### Adding a Function Space Location

1. From the **Administration** menu, select **Inventory**, select **Function Space Management**, and then select **Locations**.
2. Click **New** and complete the following fields:
  - a. **Property.** Enter or confirm the property name.
  - b. **Code.** Enter a code for the function space location, such as MAIN.
  - c. **Description.** Enter a description for the function location, such as Main Building.
  - d. **Manage Translations.** Select to open the multi-language descriptions screen and configure a translated descriptions for each language.
3. Click **Save** to save and close the record.

#### Editing a Function Space Location

1. On the Locations screen, enter search criteria and click **Search**.
2. In the search results, select the code and click the vertical ellipsis **Actions** menu.

3. Click **Edit**.
4. Make the required change to the Description field.
5. Click **Save**.

### Deleting a Function Space Location

You can delete a Location only if it is not assigned to a Function Space.

1. On the Locations screen, enter search criteria and click **Search**.
2. In the search results, select the code and click the vertical ellipsis **Actions** menu..
3. Click **Delete**.

## Configuring Event Types

Event Types describe the kind of activity taking place during a given meal period, such as meeting, lunch, exhibits, and so on. In addition, Event Types can streamline the booking process by defaulting start and end times. Event Types can also be linked to meal periods and used in forecasting, tracking, and posting event revenue.

Event types are also referenced in other areas of configuration, for example, when defining menus and menu items.

### Adding an Event Type

1. Select the **Administration** menu, select **Inventory**, select **Function Space Management**, and then select **Event Types**.
2. Click **New** and complete the following fields:
  - a. **Code** Enter a code for the event type, such as MTG.
  - b. **Description** Enter a Description for the event type, such as Meeting.
  - c. **Manage Translations** Select to open the multi-language descriptions screen and configure a translated descriptions for each language.
  - d. **Start Time** The time entered here is used as the default start time when an event is created with this Event Type. You can change the start time after it is defaulted on the event.
  - e. **End Time** The time entered here is used as the default end time when an event is created with this Event Type. You can change the end time after it is defaulted on the event.
  - f. **Meal Period** (Available when the Catering Meal Period OPERA Control is Active). Select the value to which this Event Type should be associated when reporting by Meal Period.
  - g. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - h. **Bookable through website**: Select this check box if this event type should be available for selection when an event is booked through OWS.
3. Click **Save** to save and close.

### Editing an Event Type

1. On the Event Types screen, enter search criteria and click **Search**.
2. In the search results, select the code and click the vertical ellipsis **Actions** menu and select **Edit**.
3. Make the required changes.
4. Click **Save**.

### Deleting an Event Type

You can delete an Event Type only if it is not configured with forecast figures or booked.

1. On the Event Types screen, enter search criteria and click **Search**.
2. In the search results, select the code and click the vertical ellipsis **Actions** menu and select **Delete**.
3. Click **Delete** to confirm.

## Configuring Rental Codes

The Function Space Rental Codes are used to specify the type of rate (Daily, Hourly, Per Person, or Custom) charged for a function space.

The Rental Codes are assigned to the function space using the Function Space Setup screen. For more information, see: [Configuring Function Spaces](#).

### Adding a Rental Code

1. Select the **Administration** menu, select **Inventory**, select **Function Space Management**, and then select **Rental Codes**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code for the Rental Code, such as FULL.
  - b. **Description**. Enter a Description for the rental code, such as Full Day.
  - c. **Manage Translations**. Select to open the multi-language descriptions screen and configure a translated descriptions for each language.
  - d. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and close the record.

### Editing a Rental Code

1. On the Rental Codes screen, enter search criteria and click **Search**.
2. In the search results, select the code and click the vertical ellipsis **Actions** menu and select **Edit**.
3. Make the required changes.
4. Click **Save**.

### Deleting a Rental Code

You can delete a Rental Code only if it is not assigned to a Function Space.

1. On the Rental Codes screen, enter search criteria and click **Search**.
2. In the search results, select the code and click the vertical ellipsis **Actions** menu and select **Delete**.
3. Click **Delete** to confirm.

## Configuring Setup Styles

Use the Setup Styles screen to configure the setup styles for function spaces at the property. Setup styles might include seating arrangements, furniture and equipment placements, and so on.

Setup Styles are assigned to the function space from the Function Space Setup screen. For more information, see: [Configuring Function Spaces](#).

### Adding a Setup Style

1. Select the **Administration** menu, select **Inventory**, select **Function Space Management**, and then select **Setup Styles**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code for the Setup Style Rental Code, such as CLS.
  - b. **Description**. Enter a description of the Setup Style, such as Classroom Style.
  - c. **Bookable through website**: Select this check box if this setup style should be available for selection when an event is booked through OWS:
    - **Setup Time in Minutes** Enter the number of minutes that should be booked for setup when this Setup Style is selected for an event booked through OWS.
    - **Tear Down Time in Minutes** Enter the number of minutes that should be booked for tear down when this Setup Style is selected for an event booked through OWS
  - d. **Sequence** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing a Setup Style

1. On the Setup Style screen, enter search criteria and click **Search**.
2. In the search results, select the row level click the vertical ellipsis **Actions** menu and then click **Edit**.
3. Make the required change.
4. Click **Inactive** to make a code inactive; inactive codes are not available for selection.
5. Click **Save**.

### Deleting a Setup Style

You can delete a Setup Style only if it is not assigned to a Function Space.

1. On the Setup Style screen, enter search criteria and click **Search**.
2. In the search results, select the code and click the vertical ellipsis **Actions** menu and then click **Delete**.
3. Click **Delete** to confirm.

## Task Sheets

You can create task sheets at your property for housekeeping staff. With the optional **Housekeeping Task Scheduling** function enabled in OPERA Controls, you can also schedule these housekeeping tasks and the various housekeeping supplies for each room type.

## Housekeeping Task Scheduling

### [Prerequisites for Housekeeping Task Scheduling](#)

Housekeeping task scheduling enables you to set up a schedule of tasks to occur on various days during a reservation stay. Task scheduling supports operations (for example, when a light service task is scheduled daily) with a full service task occurring once a week. To configure the task schedule, you must first configure each task code and then schedule the tasks for each room type. Additionally, you can also configure task supplies (that is, soap, towels, linens) which are supplied to the room as part of the scheduled task.

## Prerequisites for Housekeeping Task Scheduling

### **OPERA Controls**

**Group:** Room Management

**Functions:** Housekeeping Task Scheduling

### **OPERA Cloud Tasks**

**Group:** Inventory Admin

**Tasks:** Manage Accommodations

Tasks

- New/Edit Tasks
- Delete Tasks

## Configuring Housekeeping Tasks for Scheduling

You can create the task codes (for example, full service, light touch, no service, and so on) that are used for configuring a room type task schedule.

### Adding a Task Code

1. Select the **Administration** menu, select **Inventory**, select **Task Sheets**, and then select **Tasks**.
2. Click **New** and complete the following fields:
  - a. **Property**. Enter a property or search for and select a property.
  - b. **Code**. Enter a housekeeping task code (for example, LIGHT, FULL, NSR, and B&B).
  - c. **Description**. Enter a description for the task (for example, Light touchup, Full Service, No Service, Empty Bins, and Make Bed Only).
  - d. **Colors**. Select a color code for the task type. The task's defined color populates in the date box in the housekeeping task scheduler when viewed from the reservation details link and from within the Forecast screen in Housekeeping.
  - e. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - f. **Task Instructions**. Enter a short description of the steps required to perform this task.
  - g. **Departure Room Default Task**. Select to make this task code the default departure room task. OPERA Cloud requires that one task code must be marked as the Departure Room Default Task. This task code will be assigned and forecasted for all departure rooms within Housekeeping. This is typically a full service of the room.
  - h. **Guest Requested Task**. Select to indicate this task is only available when requested by the Guest. Guest requested tasks are not automatically scheduled.

 **Note:**

A task selected as a **Guest Requested Task** cannot also be selected as a **Departure Room Default Task**. When one option is selected, the check box for the other option becomes inactive.

- i. **Linen Change**. Select to signify the Task requires a linen change. This is reflected in the Total Linen Change statistic within the Expanded Task Sheet and noted for each corresponding task in the task sheet reports and task companion.
3. Click **Save**.

### Editing a Task Code

1. Select the **Administration** menu, select **Inventory**, select **Task Sheets**, and then select **Tasks**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Action** menu and select **Edit**.
4. **Inactive**: Select check box to make a code inactive; inactive codes are not available for selection.
5. Update the configuration.

6. Click **Save**.

### Deleting a Task Code

1. Select the **Administration** menu, select **Inventory**, select **Task Sheets**, and then select **Tasks**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Action** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring (Room Type) Task Schedules

Once Housekeeping Tasks and Task Supplies are configured, the next step is to schedule these tasks for each room type. Each room type task scheduled is given a priority and a frequency. If two tasks are scheduled to occur on the same day, the higher priority task is scheduled. For example, a task scheduled for every two days and a task scheduled for every five days will occur on the 10th day of the stay, and the task with the higher priority will be scheduled. Vacant dirty rooms are assigned the departure task.

### Note:

Regardless of priority the departure task will be prioritized for a room when there is both a departure and arrival reservation on the same date.

For each task scheduled, you can also select the various task supplies (such as linen, soap, or shampoo) to be provided as part of the task scheduled.

### Adding a Schedule

1. Select the **Administration** menu, select **Inventory**, select **Task Sheets**, and then select **Schedules**.
2. Click **New** and complete the following fields:
  - a. **Property**: Enter a property or search for and select a property.
  - b. **Room Type**: Select the room type for which this task is being scheduled.
  - c. **Task**: Select the down arrow to choose a task.

### Note:

Once a specific task has been attached to a room type, that task code is removed from the Task LOV. You can no longer change this information once it has been saved without deleting the task from the room type.

- d. **Market Codes**: Enter or select **Market Codes** to limit the scheduling of the task.

- e. **Special Requests:** Enter or select **Special Request** codes to limit the scheduling of the task.

 **Note:**

Once a special code has been selected for a task schedule, you can no longer associate it to another task schedule. This prevents you from duplicating the request.

- f. **Rate Codes:** Enter or select **Rate Codes** to limit the scheduling of the task.
- g. **Priority:** Enter a number for the priority. When more than one task is scheduled for a room type, you define a priority number for each task. A priority is assigned to determine which task takes precedence when two or more tasks converge on a given day of the reservation stay dates. For example, if Full Service was scheduled for every 7 days, and Light Touch was scheduled for every 3 days, these tasks would overlap for any reservation that is in-house for 21 days. For such reservations, OPERA Cloud would choose the Full Service task with priority 1, rather than Light Touch with priority 2.
- h. **VIP Levels:** (Available when the **VIP** application function in the **Profiles** group is active) Enter **VIP** codes to limit the scheduling of the task.

 **Note:**

Once a **VIP** is attached to a task code, you can no longer associate it to another task of the same code. This prevents you from duplicating the code.

- i. **Schedule:** Select from the following options:
  - i. **Every X Days:** Select to schedule the task to occur every X number of days of the reservation. This field can be used in conjunction with the **Starting On Day** and the **Every XX Day** field to skip days in between when this task will be performed.

 **Note:**

If the **Start on Day** field is left blank, then the Task will start with the value entered into the **Every XX Days** field. For example, if the Arrival Date of a reservation is 04/11/11, Departure Date of 04/15/11, and has a Task schedule of Every 1 Day, then the Task would be scheduled to start on 04/12/11.

- ii. **Everyday:** Select to complete the Task every day.
- iii. **Departure Day Only:** (Available when the task has been configured as **Departure Room Default Task**) Select to only complete this Task on the departure date of the reservation.
- iv. **Custom Schedule:** (Available when a Task has been configured as a **Guest Requested Task**) This task will not automatically be scheduled. You can

customize the Schedule from Housekeeping Task Scheduler via the Reservations Options.

- v. **Not Required:** Select to exclude certain filter options (that is, a reservation with a specific rate code) from being scheduled with a task. For example, a room type is set up with 4 different tasks for each day. A group has negotiated a lower rate and one of the tasks is excluded for this group (by rate code). Then the frequency **Not Required** can be chosen for that particular task for that Rate Code.
- vi. **Arrival Day Only:** Select to schedule on arrival day only.
- j. **Number of Days:** Specify how often in days, following the reservations arrival date, the task is to be completed. For example, if the task is repeated every day following the arrival date, enter 1. If the task is completed every three days, enter a 3, and so on. Optionally, you can also define days of the week when this task can take place. See the 'Days of Week' field description below for details.
- k. **Starting on Day:** Enter the number of the day of the reservation on which to start the Task schedule. For example, if 3 is entered, then the Task would not be scheduled until the 3rd day of the reservation.
- l. **Include on Arrival Day:** Select if you would like the task to begin schedule on the guest's arrival date.
- m. **Days of the Week:** This option works in conjunction with the **Number of Days** option to enable you to control the days of the week on which this task can take place. (If no days are selected, only the Number of Days frequency is considered regardless of the day of the week on which the task falls.) Use the check boxes to select the days of the week on which the task can be scheduled. If the day when the task should take place according to the specified frequency falls on a day of the week which is not selected, the task will take place on the next available day of the week.

 **Note:**

If a scheduled task is designated as the Departure Room Default Task, it will be scheduled for the checked-out room regardless of the frequency or the days of the week configured for that task.

For example, assume you want to specify the Full Service (FS) task should take place Every 7 Days, except when the task would fall on a weekend (Saturday and Sunday options deselected, all other days selected). When a Full Service task falls on a Saturday or Sunday, it should be pushed to the next available weekday. In addition, Light Touch (LT) cleaning should be scheduled daily (Every 1 Day), Monday through Friday.

The below table provides an example of how these tasks would be scheduled for a hypothetical stay. Only the priority (FS-Full Service) task is shown on dates when two tasks converge on the same day.

**Table 12-3 Task Schedule**

Date	Day of the Week	Task
23-Dec	Sunday	No Service (Arrival)
24-Dec	Monday	LT - Light Touchup
25-Dec	Tuesday	LT - Light Touchup
26-Dec	Wednesday	LT - Light Touchup
27-Dec	Thursday	LT - Light Touchup
28-Dec	Friday	LT - Light Touchup
29-Dec	Saturday	No Service
30-Dec	Sunday	No Service
31-Dec	Monday	FS- Full Service
1-Jan	Tuesday	LT - Light Touchup
2-Jan	Wednesday	LT - Light Touchup
3-Jan	Thursday	LT - Light Touchup
4-Jan	Friday	LT - Light Touchup
5-Jan	Saturday	No Service
6-Jan	Sunday	No Service
7-Jan	Monday	FS- Full Service
8-Jan	Tuesday	LT - Light Touchup
9-Jan	Wednesday	LT - Light Touchup
10-Jan	Thursday	FS- Full Service (Departure Task)

n. **Message Text:** Enter the task message. This message appears when you select the associated Task when creating Task schedules from the Customize button on the Reservation Task Scheduler.

3. Click **Save**.

### Adding (Selecting) Task Supplies

Once a task schedule has been setup for a room type, you can select the various [supplies](#).

1. Search for a task schedule, click the vertical ellipsis next to it, and select **Edit**.
2. Under Supplies, click **New** and complete the following fields:
  - a. **Code:** Select the down arrow and choose the supply code you want to add to the task. When you have selected a code, its description appears to the right of the field.
  - b. **Quantity:** Enter the number of the item to be provided for this task.

Repeat these steps to add more supplies to the task scheduled.

3. Click **Save** when you are finished adding supplies.

**Note:**

To edit or delete a supply, click the **vertical ellipsis** next to the supply item and click **Edit** or **Delete**.

**Editing a Schedule**

1. Select the **Administration** menu, select **Inventory**, select **Task Sheets**, and then select **Schedules**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Action** menu and select **Edit**.
4. **Inactive:** Select check box to make a code inactive; inactive codes are not available for selection.
5. Update the configuration.
6. Click **Save**.

**Deleting a Schedule**

1. Select the **Administration** menu, select **Inventory**, select **Task Sheets**, and then select **Schedules**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Action** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring (Task) Supplies

Configure the various housekeeping supplies, such as Pillow Cases, Hand Towels, Bath Towels, Shampoo, and so on used when scheduling housekeeping tasks. You can then associate these supplies with the [housekeeping task schedule](#) setup for each room type.

**Adding a Supply Code**

1. Select the **Administration** menu, select **Inventory**, select **Task Sheets**, and then select **Supplies**.
2. Click **New** and complete the following fields:
  - a. **Property:** Enter a property or search for and select a property.
  - b. **Code:** Enter a supply code (for example, PC, HT, BT, SH).
  - c. **Description:** Enter a description for the housekeeping supply item (for example, Pillow Cases, Hand Towels, Bath Towels, Shampoo).
  - d. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing a Supply Code

1. Select or confirm the **Property**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. **Inactive**: Select check box to make a code inactive; inactive codes are not available for selection.
  - b. Update the configuration.
4. Click **Save**.

### Deleting a Supply Code

1. Select or confirm the **Property**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Housekeeping Tasks

### [Prerequisites for Housekeeping Tasks](#)

Task codes enable you to create various housekeeping task sheets (for example, daily cleaning, mattress turning, inspections, turndown, and so on) for your property. Each task code can generate separate task sheets for room attendants to complete using either printed task sheet reports or the mobile task companion.

### Adding a Task Code

1. Select the **Administration** menu, select **Inventory**, select **Task Sheets**, and then select **Tasks**.
2. Click **New** and complete the following fields:
  - a. **Property**. Enter a property or search for and select a property.
  - b. **Code**. Enter a housekeeping task code (for example, VIP, TD, GC).
  - c. **Description**. Enter a description for the housekeeping task (for example, VIP room prep, turndown, general cleaning).
  - d. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - e. **Task Instructions**. Enter a short description of the steps required to perform this task.
3. Click **Save**.

### Editing a Task Code

1. Select the **Administration** menu, select **Inventory**, select **Task Sheets**, and then select **Tasks**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu and select **Edit**.
4. **Inactive**: Select check box to make a code inactive; inactive codes are not available for selection.
5. Update the configuration.
6. Click **Save**.

### Deleting a Task Code

1. Select the **Administration** menu, select **Inventory**, select **Task Sheets**, and then select **Tasks**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** and confirm.

## Prerequisites for Housekeeping Tasks

### OPERA Controls

**Group:** Room Management

**Functions:** Task Sheets

### OPERA Cloud Tasks

**Group:** Inventory Admin

**Tasks:** Manage Accommodations

Tasks:

- New/Edit Tasks
- Delete Tasks

## Configuring Task Sheet Room Details

Use this option to associate room attributes such as Floor, Building, Housekeeping sections and credits to each room in case they were not entered when the rooms were originally configured.

### Editing Task Sheet Room Details

1. From the **Administration** menu, select **Inventory**, select **Accommodation Management** then select **Task Sheet Rooms**.

2. Enter search criteria and click **Search**.
3. Click **Edit** and enter details per room.
  - a. **Building**: Select building code from list.
  - b. **Floor**: Select a floor from the list.
  - c. **Day Section**: Select a HK section from the list.
  - d. **Evening (Turndown) Section**: Select a HK section from the list.
  - e. **Stay over**: Enter credits for stay over (occupied dirty) status.
  - f. **Departure**: Enter credits for departure (vacant dirty) status.
  - g. **Pickup**: Enter credits for room in pickup status.
  - h. **Turndown**: Enter credits for a turndown.
  - i. **Sequence**: Enter a display sequence for the room.
4. Click **Save**.

# 13

## Financial Administration

### About Accounts Receivable Configuration

#### [Prerequisites for Accounts Receivable Configuration](#)

The Accounts Receivable module enables you to manage debtors' accounts, invoices, and remittance. AR also supports management of payment collection through the production of periodic statements and reminder letters.

You can also manage and track remittance from credit card merchants accounts receivables, with specific functionality available to compress individual credit card settlements into a single invoice. The single invoice is automatically transferred to the debtor ledger account for the payment type during the End of Day.

You can activate optional functionality for the Accounts Receivable module in OPERA Controls.

---

Financial Charges	Enables the ability to post a calculated percentage or fixed amount charge on a monthly cycle – typically used for charging overdue payment fees.
Fixed Charges	Enables the ability to auto-post a periodic charge to an AR Account based on defined cycle – daily, weekly, monthly.
Traces	Enables the ability to add an actionable date-driven reminder on AR accounts.

---

The following configuration is required in order to use the Accounts Receivable module:

- [OPERA Controls — Accounts Receivables](#)
- AR Statement templates.
- Reminder Letter templates.
- AR Account Types.
  - Financial Charges
  - Reminder Letter Cycles
- Restriction Reasons.

[Accounts Receivables](#)

## Prerequisites for Accounts Receivable Configuration

### OPERA Controls

**Group:** Accounts Receivables

**Functions:** Accounts Receivables

### OPERA Cloud Tasks

Account Receivables

- Restricted Reasons
  - New/Edit Restricted Reasons
  - Delete Restricted Reasons
- Account Types
  - New/Edit Account Types
  - Delete Account Types

## Configuring Accounts Receivable Account Types

Account Receivable account types enable you to categorize AR accounts. The account type selected in each AR Account is used for filtering in both the application and also on reports, such as when generating an AR aging report subtotaled by account type. Account types also determine the stationery templates to use when generating statements and reminder letters.

**Gaming** You can also set up Comp Accounting AR types to automatically receive comp transactions for AR handling. For more information, see [Comp AR Accounts](#).

When the Finance Charges OPERA Control is active a 'late payment' charge can be levied against overdue balances for accounts in each AR account type. An End of Day procedure calculates and posts the finance charges using the transaction code selected in the Default Finance Charge Transaction Code OPERA Control. The financial charge is posted as a separate invoice in each AR account. In the invoice, the financial charge supplement reads: "Finance Charges Posted Automatically".

Example:

The Post AR Finance Charges process is scheduled to run for an AR account type on the 18th of each month and apply a 10% charge for invoice balances older than 30 days . Today's business date is June 18:

The debtors account shows the following outstanding balances:

Invoice Date	Invoice Age	Invoice Open Balance	Account Balance	Financial Charge
Jan 13	156 days	\$100	\$100	

Invoice Date	Invoice Age	Invoice Open Balance	Account Balance	Financial Charge
Feb 12	123 days	\$200	\$300	
Mar 11	99 days	\$150	\$450	
May 10	39 days	\$100	\$550	
May 11	38 days	-\$100 (unallocated payment)	\$450	
May 20	29 days	\$175	\$625	
June 18	0 days	\$45 / \$55		\$45 / \$55

- If the \$100 unallocated payment is not included in the calculation, the total amount outstanding is \$550 and the financial charge applied is \$55.
- If the \$100 unallocated payment is included in the calculation the amount outstanding is \$450 and the finance charge applied is \$45.

The finance charge is posted to the AR account as a new invoice dated June 18th.

The outstanding invoice created on May 20th is not included in the calculation because it is less than 30 days old.

#### Adding AR Account Types

1. From the Administration menu, select **Financial**, select **Accounts Receivables Management**, and then select **Account Types**.
2. Click New and complete the following
  - a. **Property**. Enter or select the property
  - b. **Type**. Enter a code for the account type

- c. **Description.** Enter a description for the account type
- d. **Credit Limit.** Enter a default credit limit for AR Accounts of this account type
- e. **Statement Mode.** Select a mode from the list
  - i. **Balance Forward.** A balance as of MM/DD/YY field on the statement shows the total previous balance for the account. The last statement date and total amount from the last statement will be printed on the statement as the balance forward date and balance forward, respectively, by default, unless overridden by a date in the Balance Forward From field
  - ii. **Individual Open Items.** All open balance invoices are listed as individual line items on the statement
- f. **Reminder Cycle.** Select a reminder letter cycle
  - i. **Days.** Reminder letters are generated based on the number of days for which the account has had an outstanding balance. Use this option, for example, if you want to send a reminder letter for outstanding balances of 30 days, 60 days, and 90 days. These letters can be customized for each cycle.
  - ii. **End of Month.** Reminder letters are generated at the end of each month if the account has an outstanding balance. This option might be appropriate, for example, if you select the Balance Brought Forward Statement Mode.
    - i. **Letter Name.** Select a reminder template from the list
- g. **Report (Aging) Delays Days.** Select a value from the list to define the aging delay days for unpaid invoices (Available when the Delay Days Report OPERA Control is active).
- h. **Statement (Template).** Select a customized statement from the list
  - i. Select **Print Invoices without details** if you do not want to print invoice details on the statement.
  - ii. Select **Print Invoices with details** to print invoice details on the statement. Invoice details appear under each invoice number, along with a subtotal per invoice. Invoice details include date, individual charges, and a description.
  - iii. Select **Print Separate Folios** to print the statement followed by the separate folios included in the statement. When you select this option for the account type, the Print Folios check box is selected by default when selecting Statement Options for the AR Account

 **Note:**

Invoices created [AR Enter Old Balances](#) will not have a folio number assigned and will not be printed.

- i. **Finance Charges:** Available when the Finance Charges OPERA Control is active.
  - i. **Post on Day:** Enter the day in the month when the End of Day procedure should run the AR Post Finance Charge procedure for this account type.
  - ii. **Charges Older than (n) Days:** Enter the number of days after which an outstanding balance triggers finance charges. For determining the age of

the invoices and AR balance, the clock starts on the date when the invoice is created.

- iii. **Percentage:** Select to post a charge calculated as percentage of charges. Enter the percentage
  - iv. **Amount:** Select to post a flat amount. Enter the amount.
  - v. **Include Unallocated Payments:** Select to subtract any unallocated payments from the outstanding balance before the finance charge is calculated.
- j. **Daily Reminder Cycle:** When the Reminder Cycle field is set to Days, the Daily Reminder Cycles configuration lets you determine which reminder letters are generated for AR accounts with an outstanding balance for a given number of days. You can generate a different reminder letter for outstanding balances of 30 days, 60 days, 90 days etc. The date when the aging "clock" starts, and thus when the first reminder cycle begins, is determined by the Date For Aging OPERA Control.
- i. Click **New**
    - i. Number of Days. Enter the number of days in the reminder cycle
    - ii. Letter (Template) Name. Select a reminder template from the list
  - ii. Repeat to add additional letters.
  - iii. To edit a cycle, select the cycle and update the Days and Letter.
  - iv. To delete a cycle select the letter and days, click the vertical ellipsis and select **Delete**.

 **Note:**

When the Simple Reminder OPERA Control is active, the Reminder Details screen sorts reminder letters in the order in which they were set up, starting with the first letter that was configured. This is typically the order in which these letters are generated for reminder letter mailings. There may be more than one letter "queued up" to be generated for the account depending on the age of the account balance and which letters have already been generated.

 **Note:**

When Simple Reminder OPERA Control is inactive, reminder letters are sorted based on the number of days in the reminder cycle, lowest to highest. For this parameter setting, reminder letter mailings are generated depending on the age of the account balance, not on which letters have already been mailed. For example, assuming there are 30, 60, and 90-day cycles, if the account balance is 63 days old when letters are generated, the 60 day letter is sent, regardless of whether the 30 day letter was sent.

- 3. Click **Save**.

### Editing AR Account Types

- 1. From the Administration menu, select Financial, select Accounts Receivables Management, and then select Account Types.
- 2. Enter search criteria and click **Search**.

3. From search results, select an account type and click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the details
5. Click **Save**.

#### Deleting AR Account Types

1. From the Administration menu, select Financial, select Accounts Receivables Management, and then select Account Types.
2. Enter search criteria and click **Search**.
3. From search results, select an account type and click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring AR Restricted Reasons

#### Prerequisites for AR Restricted Reasons Configuration

Restricted Reasons enable you to set a restricted status on an Account Receivables account created for company, travel agent, source, contact, individual, and group type profiles.

#### Adding AR Restricted Reasons

1. From the **Administration** menu, select **Financial**, select **Accounts Receivables Management**, and then select **Restricted Reasons**.
2. Click **New** and enter the following details:
  - a. **Property**: Select or confirm the property.
  - b. **Code**: Enter a code to identify the restricted reason.
  - c. **Description**: Enter a description of the reason.
  - d. **Sequence**: Enter a sequence number to indicate the placement of the restricted reason code when it appears in the profile account setup list of restrictions. Restricted reasons without a sequence number appear in alphabetical order following restriction reasons with a sequence number.
3. Click **Save**.

#### Editing AR Restriction Reasons

1. From the **Administration** menu, select **Financial**, select **Accounts Receivables Management**, and then select **Restricted Reasons**.
2. Enter search criteria, click **Search**.
3. From search results, select a restricted reason , click the vertical ellipsis **Actions** menu, select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting AR Restriction Reasons

1. From the **Administration** menu, select **Financial**, select **Accounts Receivables Management**, and then select **Restricted Reasons**.
2. Enter search criteria, click **Search**.
3. From search results, select a restricted reason, click the vertical ellipsis **Actions** menu, select **Delete**.
4. Click **Save**.

## Prerequisites for AR Restricted Reasons Configuration

### OPERA Controls

**Group:** Profiles

**Parameters:** Restriction / Flagged Reasons

## Configuring Cashiering Components

Cashiering configurations affect the control and management of financial transactions at your property. You can configure cashiering components for articles for sale, cancellation handling, deposits, folios, settlements, adjustments, cashiers, and so on.

## Configuring Adjustment Reason Codes

Adjustment codes provide pre-defined reasons for adjustments and deletions made to transactions posted to a guest or AR ledger account. Examples of adjustment code reasons would be a duplicate charge, error, overcharge, manager's discretion, and so on.

### Adding Adjustment Reason Codes

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and select **Adjustment Codes**.
2. Click **New**.
3. Enter or confirm the **Property**.
4. Enter a **Code** to represent the adjustment reason, for example, MGR for manager's discretion.
5. Enter a **Description** of the adjustment, such as Manager's Discretion.
6. Select one of the following **Code Types**:
  - a. **Adjustment**. Indicates an adjustment made to the guest's bill.
  - b. **Deletion**. Indicates a deleted posting.
  - c. **Service Recovery**. Indicates resolution of an issue with a dissatisfied guest.
7. Click **Save**.

### Editing Adjustment Reason Codes

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and select **Adjustment Codes**.
2. Enter search criteria then click **Search**.
3. Select the adjustment code then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Adjustment Reason Codes

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and select **Adjustment Codes**.
2. Enter search criteria then click **Search**.
3. Select the adjustment code then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## About Credit Card Authorization Rules

An authorization rule is a formula that determines the anticipated total expenses that will be charged to a credit card. The authorization rule, authorization history, and additional authorization options are available if payment integration is active at your property.

The authorization rule calculates the anticipated expense amount for the reservation and obtains the required credit card pre-authorization. The reservation is automatically updated with the new authorized amount and the approval code during the End of Day Credit Card Authorization (night\_audit\_authorization) procedure.

On the day of check out, an authorization executes using the authorization rule attached to the reservation the first time the hotel performs either a manual or batch authorization. This procedure helps to eliminate an excessive number of individual authorizations on the day of check out, particularly when guests stay and use the hotel facilities on the day of departure.

Properties usually set a default authorization rule. The rule is automatically applied to each guest's reservation. You can set the default rule using the Authorization Rule setting on the Credit Cards menu screen.

You will not normally need to change the default authorization rule for a guest's credit card unless there are unusual circumstances (for example, for guests with multiple night stays and/or when multiple guests are charging to the same credit card).

The following Authorization Rules are configured in OPERA Cloud on the Administration menu > Financial > Cashiering Management > Authorization Rules screen.

Based on the Advanced Authorization Rules OPERA Control , there are two options are available for the setup of credit card authorization rules.

- Your property can rely on a single default authorization rule that applies to all reservations (Available when the Advanced Authorization Rules OPERA Control is inactive).
- Your property can apply different authorization rules based on Room Type, Room Class, Rate Code, Rate Category, Reservation Type and Source Code or a combination of the same. If none of the combinations match with the reservation, a default authorization rule will apply. (Available when the Advanced Authorization Rules OPERA Control is active).

**Table 13-1 Authorization Rules**

Rule Number	Rule Description
1	Nights x (Daily Rate)
2	Nights x (Daily Rate + Amount)
3	Nights x (Daily Rate + (Persons*Amount))
4	Nights x (Daily Rate + Percentage)
5	Amounts
6	Nights x (Percentage)
7	Nights x (Daily Rate + Amount - Daily Rate)
8	Nights x (Daily Rate + (Persons*Amount) - Daily Rate)
9	(Nights x Daily Rate) + Amount

The Daily Rate value in these authorization rules is a sum of the Room Rate + Add to Rate Packages + Fixed Charges, plus the associated taxes.

#### Available Rules and Examples

The Daily Rate element defined in the rules is based on rate code configuration. When a rate code is tax exclusive, the prices and generates would be taken into consideration.

If there is a reservation for Mr. and Mrs. Smith (2 adults) for 3 nights with a Rack rate code of \$100, and if the Rack rate code is configured as tax exclusive with 10% city tax configured in generates, then the authorization definitions and amounts would be as follows:

#### Rule 1 - Nights\*(Daily Rate)

Example 1: The authorization amount would be for \$330.

$$3 * (110) = 330$$

#### Rule 2 - Nights\*(Daily Rate+Amount)

Example: If \$20 is the default amount, the authorization amount would be for \$390.

$$3 * (110 + 20) = \$390$$

#### Rule 3 - Nights\*(Daily Rate + (Persons\*Amount))

Example: If \$20 dollars is the default amount, the authorization amount would be for \$450.

$$3 * (110 + (2 * 20)) = \$450$$

#### Rule 4 - Nights\*(Daily Rate + Percentage)

Example: If 10% was configured in the setup, then the authorization amount would be for \$363.

$$3 * (110) + 11 = \$363$$

**Rule 5 - Amount**

Example: If the flat amount was defined for \$50, then the authorization amount would be \$50.

 **Note:**

The first authorization (from either Batch, Scheduled, or Check-in authorization) would be the Amount specified for the rule + total balance (if reservation balance is > 0).

- The amount specified for the rule (if reservation balance is < 0)
- All Subsequent authorizations (from Batch, Scheduled, End of Day)
- Total Reservation Balance – Existing approved amount

There is no difference between the incidental approval and actual approval as in the other rules.

**Rule 6 - Nights\*(Daily Rate \* Percentage)**

Example: If the configured percentage amount is 10%, then the authorization amount would be \$33.

$$3 * (110 * 10 / 100) = \$33.$$

**Rule 7 - Nights\*(Daily Rate + Amount - Daily Rate)**

Example: If \$20 dollars is the default amount, the authorization amount would be for \$60.

$$3 * (110 + 20 - 110) = \$60$$

 **Note:**

When the Reservations > Exclude Rate From Auth Based On Routing application parameter is set to Y, Rule 7 and Rule 8 are not available for use with authorization rule schedules.

**Rule 8 - Nights\*(Daily Rate + (Persons\*Amount) - Daily Rate)**

Example: If \$20 is the flat amount, the authorization amount would be for \$120.

$$3 * (110 + (2 * 20) - 110) = \$120$$

 **Note:**

When the Reservations > Exclude Rate From Auth Based On Routing application parameter is set to Y, Rule 7 and Rule 8 are not available for use with authorization rule schedules.

**Rule 9 - (Nights \* Daily Rate) + Amount**

Example: If \$20 is the default amount, the authorization amount would be for \$350.

$$(3 * 110) + 20 = \$350$$

 **Note:**

A single flat amount is applied to the (nights \* daily rate) calculation, regardless of the length of stay. This flat amount applied also includes incidental charges for the entire stay and will not obtain more authorization during the End of Day process until the existing incidental approval amount is used up.

**Scenario 1**

- Create a Reservation for 2 nights, Rate amount \$100.00 , Tax = 15.00.
- Attached authorization rule 9 , estimated approval =  $(2 * 115) + 50 = \$280.00$ .
- Checked in the reservation and \$280.00 was authorized.
- Posted a charge for 20.00 on the folio.
- Verify that the Estimated Approval Amount = 0.
- Run EOD.
- No additional authorization obtained during EOD.

**Scenario 2**

- Create a Reservation for 2 nights, Rate amount \$100.00 , Tax = 15.00.
- Attached authorization rule 9 , estimated approval =  $(2 * 115) + 50 = \$280.00$ .
- Checked in the reservation and \$280.00 was authorized. Posted a charge for 200.00 on the folio.
- Verify that the Estimated Approval Amount = \$200.
- Run EOD.
- Additional authorization for \$200 obtained during EOD.
- (This is because \$200 charge will consume the original incidental \$50.00 authorization and rule 9 will again calculate estimated approval amount for remaining nights as  $(1 \text{ night} * 115.00) + 50 = 165.00 + 35.00$  (reservation balance over already approved amount  $(315.00 - 280.00) = 200.00$ ).

**Scenario 3**

- Create a Reservation for 2 nights, Rate amount \$150.00, Tax = 5.25.
- Attached authorization rule 9, estimated approval =  $(2 * 155.25) + 50 = \$360.50$ .
- Checked in the reservation and \$360.50 was authorized.
- Posted a charge for 200.00 on the folio.
- Verify that the Estimated Approval Amount = \$200.
- Run EOD.
- Additional authorization for \$200 obtained during EOD. (This is because \$200 charge will consume the original incidental \$50.00 authorization and rule 9 will again calculate estimated approval amount for remaining nights as  $(1 \text{ night} * 155.25) + 50 = 205.25 -$

5.25 (original approval 360.50 - reservation balance after EOD will be 355.25 (room /tax 155.25 + 200)) = 200.00.

#### Scenario 4

- Create a Reservation for 2 nights, Rate amount \$100.00, Tax = 15.00.
- Attached authorization rule 9, estimated approval =  $(2 * 115.00) + 50 = \$280.00$ .
- Checked in the reservation and \$280.00 was authorized.
- Posted a charge for 20.00 on the folio
- Make a payment for \$135 (= 1 Night + posted charge = 115 + 20).
- Verify that the Estimated Approval Amount = 165 (= Rate for the remainder of stay + amount =  $(1 \text{ night} * 115.00) + 50$ ).
- Run EOD.
- Additional authorization for \$165 obtained during EOD.

#### Scenario 5

- Create a Reservation for 1 night, Rate amount \$100.00 , Tax = 15.00.
- Attached authorization rule 9 , estimated approval =  $(1 * 115.00) + 50 = \$165.00$ .
- Checked in the reservation and \$165.00 was authorized.
- Extend the reservation stay to 2 nights.
- Verify that the Estimated Approval Amount = \$115.00 (=  $280.00 - 165.00$ ).
- From Credit Card > Authorization > Additional >.
- Obtain an authorization for 115.00.
- Posted a charge for 20.00 on the folio.
- From RSEDIT click on Ellipsis next to Payment method and verify that the Estimated Approval Amount = 0.
- Run EOD.
- No additional authorization obtained during EOD.

#### End of Day Authorization Amount/Percentage Calculation

For Amount or Percentage values defined in authorization rules, the End of Day authorization calculation will not consider the incidental amount/percentage for nights that have already passed.

For example, a reservation for 2 nights with a cash payment method has a rate amount of 200.00 per night and 10% tax. The reservation is checked in. After check in, the guest changes the payment method to a Visa credit card with authorization rule 2 — Nights  $*(\text{Daily Rate} + \text{Amount})$ . The amount for the authorization rule is \$50.00.

For this reservation, if the authorization had been obtained during check-in or before End Of Day, assuming the credit card was attached prior to check in, the authorization amount would have been \$540  $(2*(220+50))$ . If authorization is obtained during the End of Day processing, the authorization would be obtained for \$490; the End of Day authorization would not consider the incidental amount (\$50 in this case) in the calculation of the authorization amount, since the night of the stay has already passed.

#### Multiple Authorization Rules - Rule Schedules (Advanced Authorization Rules)

The Advanced Authorization Rules feature allows you to specify a schedule that defines which authorization rule will apply to a reservation based on either or both the reservation type and the source code. When an authorization rule cannot be determined by the reservation type and/or source code belonging to the reservation, a default authorization rule, specified at the property level, applies.

OPERA Cloud evaluates rule schedules based on the following order of precedence when determining which authorization rule applies to a reservation:

- Rule schedule and reservation have matching Room Type, Room Class, Rate Code, Rate Category, Reservation Type, and Source Code.
- Rule schedule and reservation having matching Room Type.
- Rule schedule and reservation having matching Room Class.
- Rule schedule and reservation having matching Rate Code.
- Rule schedule and reservation having matching Rate Category.
- Rule schedule and reservation have matching Reservation Type.
- Rule schedule and reservation have matching Source Code.
- If none of these elements results in a match, the default authorization rule is applied.

**Table 13-2 Multiple Authorization Rules**

Authorizati on Rule	Room Type	Room Class	Rate Code	Rate Category	Reservatio n Type	Source code
1	DLX	TOWER	AAA	NEG	6PM Hold	ORG
2	SNG					
3		TOWER				
4			AAA			
5				NEG		
6					6PM Hold	
7						ORG
8 (default)						

## Configuring Advanced Authorization Rules

### Adding Advanced Authorization Rules

1. From the **Administration** menu, select **Financials**, then **Cashiering Management**, then select **Authorization Rules**.
2. Click **New** and complete the following
  - a. **Property:** Enter or select the property
  - b. **Room Type:** Select a room type from the list. When you select a Room type, the associated Room Class automatically populates the Room Class field, and you cannot modify the Room Class field.
  - c. **Room Class:** Select a room class from the list (Available when the Room Class OPERA Control is active).

- d. **Rate Code:** Select a rate code from the list. If you select a Rate Code, then a Rate Category attached to the Room Type will automatically be populated, and you cannot modify the Rate Category field.
  - e. **Rate Category:** Select a rate category from the list
  - f. **Reservation Types:** Select a reservation type from the list. Not available for the default (Property) authorization rule.
  - g. **Source Code:** Select a source code from the list. Not available for the default (Property) authorization rule.
  - h. **Authorization Rule:** Select an authorization rule from the list
  - i. **Amount:** Enter an amount to be applied to authorization calculation rule.
3. Click **Save**.

#### Editing Advanced Authorization Rules

1. From the **Administration** menu, select **Financials**, then **Cashiering Management**, then select **Authorization Rules**.
2. Enter search criteria and click **Search**.
3. Select the **Authorization Rule**, then click the **vertical ellipsis** and select **Edit**.
4. Update configuration.
5. Click **Save**.

#### Deleting Advanced Authorization Rules

1. From the **Administration** menu, select **Financials**, then **Cashiering Management**, then select **Authorization Rules**.
2. Enter search criteria and click **Search**.
3. Select the **Authorization Rule**, then click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Auto Folio Settlement Types

### [Prerequisites for Configuring Auto Folio Settlement Rules](#)

The Auto Folio Settlement feature enables properties to set up rules for automatically settling specific guest folios during the End of Day procedure. Auto folio settlement rules are configured in the Cashiering group of OPERA Controls. They are implemented by creating auto folio settlement types and attaching the types to profiles.

#### Adding Auto Folio Settlement Types

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and then select **Auto Folio Settlement Types**.
2. Click **New** and enter the following details:
  - a. **Code:** Enter a Code to represent the auto folio settlement type.
  - b. **Description:** Enter a Description of the auto folio settlement type.

- c. **Manage Translation:** Click to add translated descriptions per language
  - d. **Sequence:** Enter a Sequence to determine the order in which the type appears in the **Auto Folio Settlement Types** list.
3. Click **Save**.

#### Editing Auto Folio Settlement Types

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and then select **Auto Folio Settlement Types**.
2. Enter search criteria and click **Search**.
3. Select a settlement type and click the vertical ellipsis **Actions** menu, click **Edit**.
4. Update details.
5. Click **Save**.

#### Deleting Auto Folio Settlement Types

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and then select **Auto Folio Settlement Types**.
2. Enter search criteria and click **Search**.
3. Select a settlement type and click the vertical ellipsis **Actions** menu, click **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Configuring Auto Folio Settlement Rules

### OPERA Controls

**Group:** Cashiering

**Functions:** Auto Settlement Rules

## Configuring Folio Types

Using Folio Types you can generate different types of folios depending on a given set of circumstances. A specific set of task conditions is then linked to a folio type which has an associated report file. The report file, in turn, controls what information is included on a folio and how the folio looks when printed.

### Note:

Depending on your country mode and OPERA Controls active your configuration options may be different from those explained here.

### Adding a Folio Type

1. From the **Administration** menu, select **Financials**, then **Cashier Management**, then **Folio Types**.
2. Click **New** and enter the following details:
  - a. **Property**: Enter or select the property.
  - b. **Folio Type**: Enter the name for the folio type.
  - c. **Service Type**: Select G- Goods or S- Services from list (enabled when the Service Type OPERA Control is active).
  - d. **Tax Types**: Select the tax type(s) for which the folio will be generated.
  - e. **Credit and Deposit**: Select a check box to define the purpose of folio being configured. Only one folio type can be configured for each category.
  - f. **Folio**: Select the folio template from the available list and click [**>**] to move the selected folio to the selected panel.
3. Click **Save**.

### Editing a Folio Type

1. From the **Administration** menu, select **Financials**, then **Cashier Management**, then **Folio Types**.
2. Enter search criteria and click **Search**.
3. Select the folio type and click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the details.
5. Click **Save**.

### Deleting a Folio Type

1. From the **Administration** menu, select **Financials**, then **Cashier Management**, then **Folio Types**.
2. Enter search criteria and click **Search**.
3. Select the folio type and click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Folio Copy Legend

### [Prerequisites for Configuring Folio Copy Legend](#)

When printing multiple copies of folios the configured folio copy legend. For example, Original, First Copy of Invoice, Second Copy of Invoice and so on. Prints on the folio when the Folio Copy Legend OPERA Control is set to Yes (Y) or Watermark (W).

You can select the folio type and enter the folio description to generate for the specific folio type.

When the multi-language OPERA Control you can also add translated descriptions for the legend descriptions.

The watermark folio copy legend is available only for report groups Folios, AR Folios, Post It Folios, and Passerby Folios.

Note: The folio copy legend appears on a folio only when actually printing the folio (and copies of the folio) at the time of settlement or check out from the Billing screen. The folio copy legend is not included when reprinting folios through Folio History.

### Editing Descriptions

1. From the **Administration** menu, select **Financial**, then **Cashier Management**, then **Folio Copy Legend**.
2. Enter search criteria and click **Search**.
3. Select a code, click **Vertical Ellipsis** and select **Edit**.
4. **Description:** Enter a description.
5. Click **Save**.

### Adding Folio Copy Legends

1. From the **Administration** menu, select **Financial**, then **Cashier Management**, then **Folio Copy Legend**.
2. Enter search criteria and click **Search**.
3. Select a code, click **Vertical Ellipsis** and select **Manage Folio Copy Legend**.
4. Click **New** and enter the following details:
  - a. **Folio Type:** Select a folio type from the list
  - b. **Folio Description:** Enter a folio copy description to generate
  - c. **Manage Translations:** Click to add translated descriptions for each language
5. Click **Save**.

### Editing Folio Copy Legends

1. From the **Administration** menu, select **Financial**, then **Cashier Management**, then **Folio Copy Legend**.
2. Enter search criteria and click **Search**.
3. Select a code, click **Vertical Ellipsis** and select **Manage Folio Copy Legend**.
4. Select a code, click the vertical ellipsis **Actions** menu and select **Edit**.
5. Update details
6. Click **Save**.

### Deleting Folio Copy Legends

1. From the **Administration** menu, select **Financial**, then **Cashier Management**, then **Folio Copy Legend**.
2. Enter search criteria and click **Search**.
3. Select a code, click the vertical ellipsis **Actions** menu and select **Manage Folio Copy Legend**.
4. Select a code, click the vertical ellipsis **Actions** menu and select **Delete**.

## Configuring Folio Arrangement Codes (Folio Grouping)

### [Prerequisites for Configuring Folio Arrangement Codes](#)

#### Adding Folio Arrangement Codes

1. From the Administration menu, select **Financials**, select **Cashiering Management**, and then select **Folio Arrangement Codes**.
2. Click **New** and complete the following:
  - a. **Property.** Confirm or select the property.
  - b. **Arrange Code.** Enter an alpha-number code.
  - c. **Description.** Enter a description to appear on the folio.
    - i. **Manage Translation.** Click to open the multi-language screen and configure a translated description for each language.
  - d. In the Available panel, search and select **transaction codes** and click the right-facing arrow  to move codes to the selected panel.

3. Click **Save**.

#### Editing Folio Arrangement Codes

1. From the Administration menu, select **Financials**, select **Cashiering Management**, and then select **Folio Arrangement Codes**.
2. Enter search criteria and click **Search**.
3. Select the arrangement code, click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Folio Arrangement Codes

1. From the Administration menu, select **Financials**, select **Cashiering Management**, and then select **Folio Arrangement Codes**.

2. Enter search criteria and click **Search**.
3. Select the arrangement code, click the vertical ellipsis **Actions** menu, and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Group Arrangement Codes (Folio Grouping)

### Prerequisites for Configuring Group Arrangement Codes

Group folio groupings enable you to generate a folio for group blocks with summarized transactions for up to 12 buckets. The folio is generated as a table with charges summarized per arrangement code per date.

[Folio style 18](#) generates as a table with charges summarized per arrangement code. Configure up to 12 buckets (groupings) and select the charge codes to summarize as a sub total in each grouping. The `sample_grp_folio.rtf` can be [customized](#) and setup in the [Group Folio report group](#).

### Adding Group Arrangement Codes

1. From the Administration menu, select **Financials**, select **Cashiering Management**, and then select **Group Arrangement Codes**.
2. Click **New** and complete the following:
  - a. **Arrange Code.** Select an arrangement code (bucket) from the list (1-12)
  - b. **Description.** Enter a description to appear on the folio
  - c. **Manage Translation.** Click to open the multi-language screen and configure a translated description for each language
  - d. In the Available panel, search and select **Transaction Codes** and click the right-facing arrow  to move codes to the selected panel.
3. Click **Save**.

### Editing Group Arrangement Codes

1. From the Administration menu, select **Financials**, select **Cashiering Management**, and then select **Group Arrangement Codes**.
2. Enter search criteria and click **Search**.
3. Select the **Arrangement Code**, click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Group Arrangement Codes

1. From the Administration menu, select **Financials**, select **Cashiering Management**, and then select **Group Arrangement Codes**.
2. Enter search criteria and click **Search**.
3. Select the **Arrangement Code**, click the vertical ellipsis **Actions** menu, and select **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Configuring Group Arrangement Codes

### OPERA Cloud Tasks

**Group:** Financial Admin

**Parameters:** Cashiering Management

Folio Grouping Codes

- New/Edit Folio Grouping Codes
- Delete Folio Grouping Codes

## Configuring Cashiers

Cashier setup enables you to define and manage cashier IDs for your property's cashiers. A cashier ID is used to track each posting made to a reservation or AR account. The details are available on [financial reports](#) and [cashier closure](#) reports.

You must configure cashier IDs for the **Night Audit Cashier Id** and **Income Audit Cashier Id** settings in OPERA Controls (see [OPERA Controls — End of Day](#) for more information). Cashiers must also be configured for each integrated system that posts charges to OPERA Cloud. For example, Point of Sale, Video, Minibar, PBX / Call Accounting, and Leisure: Spa / Golf .

### Adding a Cashier

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, then select **Cashiers**.
2. Click **New** and complete the fields and options on the Manage Cashier screen.
  - a. **Cashier ID:** Enter a number to identify the cashier ID.

 **Note:**

999999 is the highest number you can assign to a cashier.

- b. **Name:** Enter the cashier's name. This could be the name of a person, the name of a shift, or other descriptive term to associate with this cashier ID.
- c. **Starting Amount.** Enter the **local currency** starting balance assigned to the cash drawer for employees signing on with this cashier ID.

 **Note:**

If you choose to work with fixed starting balances, enter the opening amount of each cashier's float (or bank) in this field. This is the amount the employee retains in the cash drawer and carries forward to the next day. If your policy requires cashiers to completely empty their cash drawer each night and deposit all the money in their banks into the safe, then your property is working without fixed starting balances and no entry is required. The starting amount is reflected on the Cashier Closure Report.

- d. **Maximum Daily Uses:** Enter the number of times cashiers can close and re-open their cashier in one business day.

 **Note:**

At the end of each shift, the cashier is balanced and closed. After closing, you must re-open before you can post another transaction. You can set the maximum daily user from 0 to 9999 (unlimited). For security purposes, you might want to restrict users to one or two uses per business day. Enter the **number 1** here if you do not want a cashier reopened after it has been closed.

- e. **Float Over/Short:** Select if the cashier is able to drop above or below the required drop amount.

 **Note:**

OPERA Cloud maintains a running total of any differences that might occur between the cash amount posted by the cashier and the cash amount the cashier actually entered during cashier closing. OPERA Cloud adds or subtracts the difference (depending on whether the cash amount is over or short) and updates the total accordingly.

- f. **Cashier:** Select to configure this cashier ID for a standard user cashier. This is the default.
- g. **LDAP Template:** Select to use this cashier ID as a template. This template is then used for automatically creating and assigning cashier IDs, to users granted the <ORG>\_OPERACASHIER role, The cashier IDs created for users inherits the

attributes set on this template Cashier (e.g., `_Starting Amount`, `Maximum Daily Uses`, etc.). The Cashier Name is taken from the login User Name and a Cashier ID number is assigned by OPERA Cloud . Only one LDAP Template cashier ID can be created.

- h. Interface Cashier:** Select if the cashier ID is reserved for use by interfaces.
  - i. Kiosk Cashier:** Select the check box if this cashier ID is reserved for use by Kiosk applications. This cashier ID is not available for selection from the Cashier ID list of values on the Cashier Login screen. Only one Kiosk Cashier can be created and it cannot be selected as LDAP Template. This option is enabled when the `OPP_KSK` integration service is active.
3. Click **Save**.

### Editing a Cashier

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, then select **Cashiers**.
2. Enter search criteria and click **Search**.
3. Click the row level vertical ellipsis **Actions** menu for the cashier and select **Edit**.
4. Make the desired changes.
5. **Inactive**. Select to set the cashier inactive.

 **Note:**

If a Cashier ID is attached to a user or a control setting, you cannot make the cashier inactive. (A message alerts you that dependencies exist.)

6. Click **Save**.

## Configuring Custom Numbers

### Prerequisites for Custom Numbers.

Custom numbers enable you to configure formulas and conditions for generating custom reference numbers on any type of folio or receipt. Certain countries require a number to be generated in a specific way for tracking invoices and payments, and some of these countries require certain formulas.

To configure custom numbers, you should have a general knowledge of MOD and Weights and other calculations needed for creating Advanced Formula based reference numbers. You can create custom numbers by combining values or elements of a reservation to generate the unique number. The numbers can be as basic as the confirmation number, invoice number, nationality, and so on. Or it can be a more complex calculation using Luhns Algorithm, MOD with Weights, or Structured Reference numbers.

A **Custom Numbers** group is available in the XML of the `sample_folio` and `sample_payment` templates; refer to [About Stationery Editor \(Oracle Business Intelligence \(BI\) Publisher\)](#). You can insert the group into your customized template to generate the custom reference numbers on the folio or payment receipt.

Stored Custom Number(s) are also available in the Back Office Export views, EXP\_BOF\_CITYLED\_RECORDS, EXP\_FOLIOTAX, EXP\_ALL\_TRANSACTION\_VIEW, and EXP\_BOF\_ALL\_TRANSACTIONS with five separate columns for Custom\_number1, Custom\_number2, Custom\_number3, Custom\_number4, and Custom\_number5. An additional Custom\_numbers column with all stored custom numbers is available in a comma delimited string.

 **Note:**

To create or edit SQL expressions, use the Edit Formula box or the Edit Condition box available in the Generation Details section of the Custom Numbers screen. These panels provide selectable values to build an SQL expression using String, Number, Date, Boolean, and conversion functions. You can also select from a list of SQL functions, separators, operators, and table columns (fields) such as ADDRESS1, ADDRESS2, ARRIVAL, BILLING\_CONTACT\_NAME, BIRTH\_COUNTRY, and so on. These columns are a combination of data from Property details, Profile, Reservation, and Folio tax tables; they are specific to the reservation for which the custom number is being generated.

 **Note:**

To join multiple string elements together use the '||' concatenation operator in your expression.

Examples of Basic and Advanced Custom Number Formulas:

1. RESORT || '-' || DEPARTURE || '-' || CONFIRMATION\_NO. Basic expression which generates a custom number that combines the property code, the departure date, and confirmation of a reservation; the resulting custom number could look like this:  
PROP1-04052020-780005823
2. OPERA\_MISC.REFERENCE\_NUMBER\_WITH\_WEIGHTS(INVOICE\_NO,731,'BACK')A dvance expression which generates a custom number using the Reference Number with Weights function, based on the invoice number field, using 7-3-1 weights calculated from the back.

Examples of Custom Number Filter:

1. To generate a custom number only for Direct (AR) Bill invoices the filter condition would be the SQL expression: INVOICE\_NO is not null
2. To generate a custom number only when folio window payment type is Mastercard, the filter condition would be the SQL expression : PAYMENT\_METHOD='MC'

### Adding Custom Numbers

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **Custom Numbers**.
2. Select or confirm the **Property**.

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new custom numbers are created by selecting the Template tab. After creating the template, you can copy custom numbers to specific properties using the Copy action. For more information, see [Copying Configuration Codes to Multiple Properties](#).

3. Click **New**.
4. Enter the following information:
  - a. **Code**. Enter a unique code for the custom number. This identifier can be output along with the custom number on the folio or receipt – RESPONSE\_NAME in XML.
  - b. **Description**. Enter a description for the custom number.
  - c. **Custom Number Type**. Select a value from the list to determine custom number type; this relates to the stationery template on which the custom number will be referenced. Options are FOLIO or (Payment) RECEIPT
  - d. **Start Date**. Enables the custom number from this date forward.

- e. **End Date.** Disables the customer number on this date.
  - f. **Sequence.** Enables you to specify where the new custom number appears in a sequence if you generate multiple custom numbers. A number appears automatically based on the code you select. Folio History and Receipt History show the first five configured custom numbers based on the sequence.
5. The Generation Details section enables you to create or edit basic and SQL-based reference numbers.
- a. **Custom Number Formula.** Click the pencil icon to create or edit an SQL expression for generating a custom number. Work with the list fields to select and insert an SQL function, text, number, field, or operator into the editor at the current cursor position, highlighted in yellow.
    - i. Click **Add** to add (insert) selection after the cursor.
    - ii. Click **Add Before** to add (insert) the selection before the cursor.
    - iii. Click **Replace** to replace the current value selected in the editor with your new selection.
    - iv. Click **Delete** to delete the current value selected in the editor.
    - v. Click **<** to navigate to the left .
    - vi. Click **<<** to navigate to the beginning of the expression.
    - vii. Click **>** to navigate to the right.
    - viii. Click **>>** to navigate to the end of the expression.
    - ix. Click **Save**.
  - b. **Filter Condition.** Click the pencil icon to define or edit an SQL expression to specify the conditions under which the custom number is to be generated. Work with the list fields to select and insert an SQL function, text, number, field, or operator into the editor at the current cursor position, highlighted in yellow.
    - i. Click **Add** to add (insert) selection after the cursor.
    - ii. Click **Add Before** to add (insert) the selection before the cursor.
    - iii. Click **Replace** to replace the current value selected in the editor with your new selection.
    - iv. Click **Delete** to delete the current value selected in the editor.
    - v. Click **<** to navigate to the left .
    - vi. Click **<<** to navigate to beginning of the expression.
    - vii. Click **>**to navigate to the right.
    - viii. Click **>>** to navigate to the end of the expression.
    - ix. Click **Save**

 **Note:**

Refer to the [Oracle Database SQL Reference Guide](#) for details on string, datetime, number and conversion functions that can be used in the expression editor.

6. Click **Save**

### Editing Custom Numbers

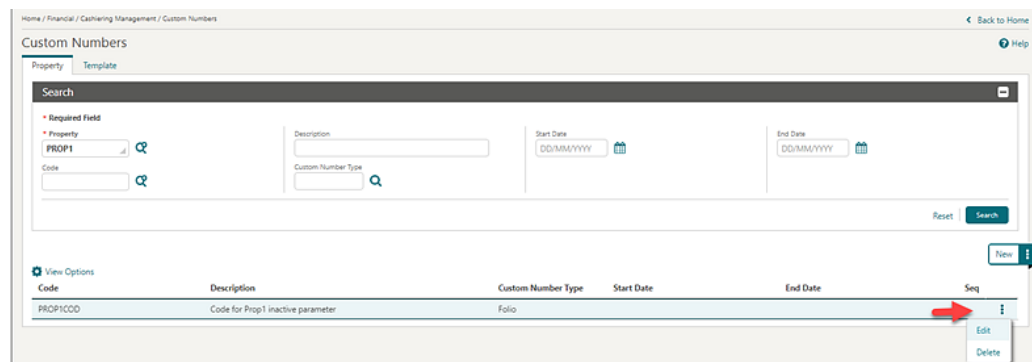

The Edit Formula dialog enables you to change the elements on a formula.

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **Custom Numbers**.
2. Select or confirm the **Property**, enter additional search criteria, and click **Search**.

#### Note:

You can show or hide inactive custom numbers from your search by clicking the page level vertical ellipsis.

3. From search results, click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update the available fields
5. **Inactive**. Select check box to mark this custom number inactive.
6. Click the pencil icons to update the Custom Number Formula or the Filter Condition.
7. Click **Save**.

### Deleting Custom Numbers

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **Custom Numbers**.
2. Select or confirm the **Property**, enter additional search criteria, and click **Search**.
3. From search results, select the Custom Number, click the vertical ellipsis **Actions** menu, and select **Delete**.
4. Click **Delete** to confirm.

### Function Examples

The following example uses the same variables for all APIs (except the pms.p.date function, which is standard). The variables are Invoice Number and 987654321 (to simulate a unique number for to the property). The Output column on the right shows

the number generated based on each calculation. Numbers will vary based on the variables determined by the user.

The parameters (inputs) for these functions are numeric only, for example, NUMBER: OPERA\_MISC.LUHN\_ALGORITHM(<NUMBER>, 'Y' or 'N'). You can combine multiple numbers in the calculation, and they can be concatenated using the String Function || as shown in the following examples

**Table 13-3 Functions**

Functions	Description	Example	Outputs
PMS_P.BUSINESS_DATE()	Returns the current business date of the property	PMS_P.BUSINESS_DATE -	01-JUN-20
Luhns Algorithm with Check digit OPERA_MISC.LUHN_ALGORITHM(<NUMBER>, 'Y' or 'N')	Luhns Algorithm with check digit	OPERA_MISC.LUHN_ALGORITHM ( INVOICE_NO    987654321 , 'Y')	86659876543216
Luhns Algorithm with no Check digit OPERA_MISC.LUHN_ALGORITHM (<NUMBER>, 'Y' or 'N')	Luhns Algorithm without check digit	OPERA_MISC.LUHN_ALGORITHM (INVOICE_NO    987654321 , 'N')	866598765432154
Reference Number with Weights from back OPERA_MISC.REFERENCE_NUMBER_WITH_WEIGHTS (<NUMBER><NUMBER2>, 'Back' or 'Front')	NUMBER2 is max 3 digits	OPERA_MISC.REFERENCE_NUMBER_WITH_WEIGHTS (INVOICE_NO    987654321, 731 , 'BACK')	86659876543218
Structured Reference Number without Padding OPERA_MISC.STRUCTURED_REFERENCE_NUMBER (<NUMBER>, <NUMBER2>)	Calculated reference number without padding	OPERA_MISC.STRUCTURED_REFERENCE_NUMBER (INVOICE_NO    987654321)	RF828665987654321
Structured Reference Number with Padding OPERA_MISC.STRUCTURED_REFERENCE_NUMBER (<NUMBER>, <NUMBER2>)	Calculated reference number with left padding. NUMBER2 is maximum of 21	OPERA_MISC.STRUCTURED_REFERENCE_NUMBER (INVOICE_NO    987654321 , 21)	RF82000000008665987654321

# Configuring Custom Charges Exemption

## Prerequisites for Configuring Custom Charges Exemption

Custom Charges allows you to configure a charge (for example, tax) to be posted during the End of Day Posting Room & Tax procedure and other scenarios where the room & tax charges are posted. Custom Charge posts per person, per night.

In addition, you can configure exemptions to the Custom Charge, which can be setup on reservations for the entire stay or for specific dates of the stay.

This feature is used in specific countries only.

## Adding Custom Charge Exemption

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and select **Custom Charge Exemption**.
2. Click **New** and complete the following
  - a. **Property:** Select or confirm the property
  - b. **Exemption:** Enter a code for the custom charge exemption
  - c. **Description:** Enter a description for the custom charge exemption
  - d. **Start Date:** Enter or select a start date
  - e. **End Date:** Enter or select an end date
3. Click **Save** or **Save and Continue** to add another.

## Editing Custom Charge Exemption

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and select **Custom Charge Exemption**.
2. Enter search criteria and click **Search**.
3. Select the custom charge, click the vertical ellipsis **Actions** menu and click **Edit**.
  - a. Update details.
  - b. **Inactive.** Select to inactive the custom charge.
4. Click **Save**.

## Deleting Custom Charge Exemption

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and select **Custom Charge Exemption**.

2. Enter search criteria and click **Search**.
3. Select the custom charge, click the vertical ellipsis **Actions** menu and click **Delete**.
4. Click **Delete** to confirm.

#### Copying Custom Charges Exemption

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and select **Custom Charge Exemption**.
2. Enter search criteria and click **Search**.
3. Select the custom charge, click the vertical ellipsis **Actions** menu and click **Copy**.
4. For more information, see [Copying Configuration Codes to Multiple Properties](#)

## Configuring Custom Charges

#### [Prerequisites for Configuring Custom Charges](#)

Custom Charges allows you to configure a charge (ie city tax) to be posted during the End of Day Post Room & Tax procedure and other scenarios where the room & tax charges are posted. Custom Charge is calculated per person (adults and children) and posted each night.

In addition, you can [configure exemptions to the Custom Charge](#), which can be setup on reservations for the entire stay or for specific dates of the stay.

This feature is used in specific countries only.

#### Adding Custom Charges

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and select **Custom Charges**.
2. Click **New** and complete the following:
  - a. **Property:** Select or confirm the property.
  - b. **Code:** Enter a code for the custom charge.
  - c. **Description:** Enter a description for the custom charge.
  - d. **Price:** Enter a price (per person) for the charge.

- e. **Rule Type:** Select a rule type from the list or leave unselected for no rule.
    - i. **Max Nights:** Enter the maximum number of the night the charge is to post.
  - f. **Priority:** Enter a priority. If multiple Custom Charges exist for the same date(s), then the custom charge definition with the highest priority (lowest number) is considered for calculation.
  - g. **Start Date:** Enter or select a start date.
  - h. **End Date:** Enter or select an end date.
3. Click **Save** or **Save and Continue** to add another.

#### Editing Custom Charges

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and select **Custom Charges**.
2. Enter search criteria and click **Search**.
3. Select the custom charge, click the vertical ellipsis **Actions** menu and click **Edit**.
  - a. Update details.
  - b. **Inactive:** Select to inactive the custom charge.
4. Click **Save**.

#### Deleting Custom Charges

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and select **Custom Charges**.
2. Enter search criteria and click **Search**.
3. Select the custom charge, click the vertical ellipsis **Actions** menu and click **Delete**.
4. Click **Delete** to confirm.

#### Copying Custom Charges

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and select **Custom Charges**.
2. Enter search criteria and click **Search**.

## Configuring Daily Plans (Folio Grouping)

### Prerequisites for Configuring Daily Plans

Use the Daily Plan folio groups to consolidate charges for selected transaction codes per day.

Two Daily Plan codes are available:

- **Lodging:** The Lodging code can only include transaction codes that are configured as type Lodging or Package (wrapper).
- **Others:** The Others code can include all other sales charge transaction codes except Lodging type transaction codes, which cannot be added to the Others code group.

The two folio groups are combined into a single line on the folio as Description (for Lodging) and Description (for Others).

When the Daily Plan (Date) folio style is selected, the transaction codes associated with the Daily Plan folio group codes are consolidated on the folio as follows:

Date	Daily Plan Folio	Price
01/07/21	<Lodging Description> and <Others Description>	\$220
01/08/21	<Lodging Description> and <Others Description>	\$220
01/09/21	<Lodging Description>	\$200

Note: The Others daily plan bucket can be set up without a description and/or without transaction codes. If a description for Others does not exist, then the “and <OTHER>” will not be appended after the Lodging daily plan; the folio will simply show the description of the Lodging daily plan.

### Editing Daily Plan Folio Group

1. From the **Administration** menu, select **Financials**, select **Cashiering Management**, and then select **Daily Plan Codes**.
2. Select the daily plan, click the **vertical ellipsis**, and select **Edit**.
3. Enter a **Description** to appear on the folio.
  - a. Click **Manage Translation** to open the multi-language screen and configure a translated description for each language.

4. In the Available panel, search and select **transaction codes** and click  to move your selected codes to the selected panel
5. Click **Save**.

## Configuring Expense Arrangement Codes (Folio Grouping)

### [Prerequisites for Configuring Expense Arrangement Codes](#)

Expense folio groupings enable you to generate an expense folio with summarized transactions for up to 12 expense buckets. The folio is generated as a table with charges summarized per arrangement code per date.

### Adding Expense Arrangement Codes

1. From the Administration menu, select **Financials**, select **Cashiering Management**, and then select **Expense Arrangement Codes**.
2. Click **New** and complete the following:
  - a. **Arrange Code.** Select an arrangement code (bucket) from the list (1-12)
  - b. **Description.** Enter a description to appear on the folio
    - i. **Manage Translation.** Click to open the multi-language screen and configure a translated description for each language
  - c. In the Available panel, search and select **transaction codes** and click the right-facing arrow  to move codes to the selected panel.
3. Click **Save**.

### Editing Expense Arrangement Codes

1. From the Administration menu, select **Financials**, select **Cashiering Management**, and then select **Expense Arrangement Codes**.
2. Enter search criteria and click **Search**.
3. Select the **arrangement code**, click the **vertical ellipsis**, and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Expense Arrangement Codes

1. From the Administration menu, select **Financials**, select **Cashiering Management**, and then select **Expense Arrangement Codes**.
2. Enter search criteria and click **Search**.
3. Select the **arrangement code**, click the **vertical ellipsis**, and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Package Arrangement Codes (Folio Groupings)

### Prerequisites for Configuring Package Arrangements

Package arrangement codes can link to one or more packages. See [Configuring Package Codes](#). If the package is configured with a package arrangement code, the package-related transactions are grouped together on the folio by the package arrangement code. Grouping by package arrangement code is implemented regardless of the package configuration, for example, Included in Rate, Add to Rate /Combined Line, or Add to Rate/Separate Line.

The following folio styles are affected by this functionality.

1 - Detailed Folio (Date)

9 - Detailed Folio (Room)

14 - Summary by Check No (Date)

If no check number applies, the arrangement code is observed. Otherwise, transactions with check numbers will be grouped by reservation, check number, and date.

15 - Group Folio Subtotal (Date)

16 - Group Folio Subtotal per Guest (Date)

18 - Group Folio Subtotal per Room (Date)

### Adding Package Arrangement Codes

1. From the **Administration** menu, select **Financials**, select **Cashiering Management**, and then select **Package Arrangements**.
2. Click **New** and enter the following details:
  - a. **Property**: Confirm or select the property.
  - b. **Arrange Code**: Enter an alpha-number code.
  - c. **Description**: Enter a description to appear on the folio.
    - i. **Manage Translation**: Click to open the multi-language screen and configure a translated description for each language.
3. Click **Save**.

### Editing Package Arrangement Codes

1. From the **Administration** menu, select **Financials**, select **Cashiering Management**, and then select **Package Arrangements**.
2. Enter search criteria and click **Search**.
3. Select the arrangement code, click the **vertical ellipsis**, and select **Edit**.
4. Update the configuration.
5. Select **Inactive** to make the arrange code inactive.
6. Click **Save**.

### Deleting Package Arrangement Codes

You cannot delete a package arrangement code that is attached to a package.

1. From the **Administration** menu, select **Financials**, select **Cashiering Management**, and then select **Package Arrangements**.
2. Enter search criteria and click **Search**.
3. Select the arrangement code, click the **vertical ellipsis**, and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Period Definition Years

### [Prerequisites for Configuring Fiscal Period Reporting](#)

You can set up fiscal years based on either the calendar year (January 1 through December 31) or on any 12-month period (such as September 1 through August 31).

### Adding Period Definition Years

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **Period Definition Years**.
2. Select **New** and complete the following:
  - a. **Property**. Confirm or select the property.
  - b. **Year**. Enter the year (YYYY).
  - c. **Type**.
    - i. **Calendar**. Select to setup a calendar year.
    - ii. **Fiscal**. Select to setup a fiscal year.
  - d. **Description**. Enter a description for the year (for example, FY21)
  - e. **Start Date**. Enter or select the start date for the year.
  - f. **End Date**. Enter or select the end date for the year.
3. Click **Save**.

### Editing Period Definition Years

You cannot edit the Start/End Date fields after the year is saved. When the Edit link is selected, the only editable field is the Description field.

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **Period Definition Years**.
2. Enter search criteria and click **Search**.
3. In the search results, select the **code**, click the **vertical ellipsis**, and select **Edit**.
4. Update the description.
5. Click **Save**.

### Deleting Period Definition Years

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **Period Definition Years**.
2. Enter search criteria and click **Search**.
3. In the search results, select the **code**, click the **vertical ellipsis**, and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Period Definition Periods

### Prerequisites for Configuring Fiscal Period Reporting

You can set up fiscal years based on either the calendar year (January 1 through December 31) or on any 12-month period (such as September 1 through August 31). When the Period Definition OPERA Control is active you can also define fiscal periods for generating revenue statistics reports per period.

#### Note:

The first fiscal period of the year might not start before the start date of the fiscal year, and the last fiscal period of the year might not end after the end date of the fiscal year. For example, if your fiscal year 2019 starts on July 1, 2019, then the first fiscal period in 2019 cannot begin on or before June 30, 2019.

### Adding Period Definition Periods

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **Period Definition Periods**.
2. Select **New** and complete the following.
3. Select **Single Period**.
4. If you select Single Period:
  - a. Enter or confirm the **Property** name.
  - b. Select the **Period Definition Years**. This is the calendar year in which the period will fall.
  - c. Also, enter a **Period** name, a **Description** of the period (such as 3rd Quarter), and the **Start and End dates** of the year.
5. If you select Cycle Period:
  - a. Enter or confirm the **Property** name.
  - b. Select the **Period Definition Years**. This will be a fiscal year that you must configure prior to adding fiscal periods.
  - c. Enter a **Period Prefix**. OPERA Cloud numbers the periods consecutively starting at 1 with the prefix defined in the Prefix field.
  - d. Select the **Cycle** from five options. Each option offers a different length of time. Select the option that best meets your property's reporting time frame. Cycle options:
    - 1 = 4 Week (28 Day) Period
    - 2 = 4,4,5 Week Period
    - 3 = 4,5,4 Week Period
    - 4 = 5,4,4 Week Period
    - 5 = Calendar Period

6. Click **Save**.

#### Editing Period Definition Periods

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **Period Definition Periods**.
2. Enter search criteria and click **Search**.
3. In the search results, select the **code** and click the **vertical ellipsis**.
4. Click **Edit**.
5. Update the configuration.
6. Click **Save**.

#### Deleting Period Definition Periods

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **Period Definition Periods**.
2. Enter search criteria and click **Search**.
3. In the search results, select the **code**, click the **vertical ellipsis**, and click **Delete**.
4. Click **Delete** to confirm.

## About Foreign Currency Codes

#### [Prerequisites for Foreign Currency Codes.](#)

This feature requires the Foreign Currency Codes function to be Active.

Foreign currency codes enable you to define and manage exchange rates for foreign currencies accepted and sold at your property. With the multi-currency rate parameter active, properties can configure rates and package prices in foreign currency amounts.

When setting up foreign currencies, follow these steps:

1. Create currency codes representing the various foreign currencies.

2. Set actual exchange rates for the codes created in step 1.

Each currency code can have up to seven different exchange rates based on various exchange types (purposes). The following exchange types are available:

- Exchange Cash
- Exchange Check
- Settlement
- Posting
- Commission
- Membership
- Certificate

Each currency code and exchange type combination can have its own exchange rate and start date. For example, for each currency, you could define one exchange rate for posting accommodation, another exchange rate for settlements, and another exchange rate for cash exchanges. Then, you could update the accommodations posting rate monthly and update the settlement and cash exchange rates daily.

OPERA Cloud accommodates both buying foreign currency (the usual transaction where the guest exchanges foreign currency for local currency) and selling foreign currency (exchanging local currency for foreign currency). When you configure currency codes, you can indicate whether selling that currency is supported.

## Prerequisites for Foreign Currency Codes

## Configuring Foreign Currency Codes

### Adding Foreign Currency Codes

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **Foreign Currency Codes**.
2. Click **New** and enter the following details:

- a. **Code** : Enter a code for the currency
  - b. **Description** : Enter the currency description
  - c. **Decimals** : Select the number of decimals points from the list. For example 0=\$1, 1=\$1.0, 2=\$1.00, 3=\$1.000
  - d. **Currency Symbol** : Paste **cntrl+v** the currency symbol. See <https://www.unicode.org/charts/PDF/U20A0.pdf>.
  - e. **Sell Currency** : Select to allow this currency to be sold in Currency Exchange (Available when the Sell Currency OPERA Control is active).
  - f. **Foreign Currency Limits** : (Available when the Foreign Currency Limits OPERA Control is active)
    - i. **Local Currency per Transaction Limit**: Enter the transaction limit for local currency transactions.
    - ii. **Foreign Currency per Transaction Limit**: Enter the transaction limit for foreign currency transactions.
    - iii. **Local Currency Daily Limit**: Enter the daily limit for local currency transactions.
    - iv. **Foreign Currency Daily Limit**: Enter the daily limit for foreign currency transactions.
    - v. **Local Currency Monthly Limit**: Enter the monthly limit for local currency transactions.
    - vi. **Foreign Currency Monthly Limit**: Enter the monthly limit for foreign currency transactions.
3. Click **Save**.

### Editing Foreign Currency Codes

#### Note:

To view inactive codes in the result, click the vertical ellipsis and select **Show Inactive**.

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **Foreign Currency Codes**.
2. Enter search criteria and click **Search**.
3. Select the currency code, click the **vertical ellipsis** and select **Edit**.
  - a. Update configuration.
  - b. **Inactive**: Select to mark the currency as inactive.
4. Click **Save**.

### Deleting Foreign Currency Codes

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **Foreign Currency Codes**.
2. Enter search criteria and click **Search**.
3. Select the currency code, click the **vertical ellipsis** and select **Delete**.

4. Click **Delete** to confirm.

## Configuring Foreign Currency Limits

### Prerequisites for Configuring Foreign Currency Limits

Foreign Currency Limits are used in specific countries only; to specify the transaction, daily and monthly limits of local and foreign currency exchange permitted.

### Editing a Foreign Currency Limit

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and then select **Foreign Currency Codes**.
2. Enter search criteria and click **Search**.
3. Select the currency code, click the **vertical ellipsis** and select **Edit**.
  - a. **Local Per Transaction Currency Limit:** Enter the per transaction amount limit.
  - b. **Foreign Per Transaction Currency Limit:** Enter the per transaction amount limit for foreign transactions.
  - c. **Local Daily Currency Limit:** Enter the daily transaction amount limit.
  - d. **Foreign Daily Currency Limit:** Enter the daily transaction amount limit for foreign transactions.
  - e. **Local Monthly Currency Limit:** Enter the monthly transaction amount limit.
  - f. **Foreign Monthly Currency Limit:** Enter the monthly transaction amount limit for foreign transactions.
4. Click **Save**.

## Configuring No Show Posting Rules

### Prerequisites for Setting Up No Show Posting Rules

No show posting rules facilitate a no show charge being auto-posted to no show reservations. You can configure no show posting rules for specific source codes and/or reservation types and then select a calculation rule for a no show amount to be auto-posted to the reservation.

During the end of day routine, all arrival reservations with a no show status and whose reservation type and/or source code makes them subject to a no show posting based on the rules defined will, transfer any deposit payments to the guest ledger. The appropriate no show charge posts to the reservation account.

Cashier billing functionality is available for no show reservations, and based on the no show posting rule applied, an outstanding balance (no show amount not fully offset by the deposit payment(s)) may result. Cashiers can make any adjustments to the charge or post additional settlement(s) to the reservation account to ensure a zero balance. Refer to: [Managing No Show and Cancellation Deposits and Charges](#).

### Adding No Show Posting Rules

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **No Show Posting Rules**.
2. Click **New** and complete the following:
  - a. **Property**. Enter or select the property.
  - b. **Reservation Type**. Select a reservation type from the list to add a rule for a specific reservation type.
  - c. **Source Code**. Select a source code from the list to add a rule for the specific source code.
  - d. **Posting Rule**. Select a posting rule from the list:
    - i. **All Nights**. This option posts the total rate amount for all nights of the reservation. If the reservation has multiple rate codes, OPERA Cloud determines the price for each night and posts it accordingly.
    - ii. **First Night**. This option posts the price of the first night of the reservation.
    - iii. **Deposit Only**. This option posts an amount equal to all deposit payments received.
3. Click **Save**.

### Editing No Show Posting Rules

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **No Show Posting Rules**.
2. Enter search criteria and click **Search**.
3. Select the **No Show Rule**, click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting No Show Posting Rules

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **No Show Posting Rules**.
2. Enter search criteria and click **Search**.
3. Select the **No Show Rule**, click the vertical ellipsis **Actions** menu, and select **Delete**.
4. Click **Delete** to confirm.

## Translating Numbers to Words

Money amounts often must be printed in word form and/or numeric form. The most familiar example of this might be when printing the amount on a check or a receipt. The words are usually considered to be the legal expression of the amount, making accuracy essential. For example, in German, a check for €125.67 would be printed as “Eins-Zwei-Fünf Euros und Sechs-Sieben Cents.” In English, \$125.67 would translate as One Hundred Twenty Five Dollars and Sixty Seven cents (or One Hundred Twenty Five Dollars and 67/100 Cents, depending on the format used for the printing of checks).

The Number To Words feature supports translation of numerals into words in multiple languages. By default, OPERA Cloud expresses numbers in English words.

If the Profile Language function is not being used, and the base language for the property is not English, you can use the Number To Words feature to translate the numbers into words. The translations also provided for words like “Dollars,” “Cents,” and “and,” which might be required in expressions of written amounts.

Reports that reference a profile language, such as folios and receipts, automatically select the appropriate translation for the particular instance of the report, if available. When printing checks in Commissions Processing, the language associated with the

bank account determines which language is used for the check amount written in words.

The Number to Words translation is literal (number for number) except for languages indicated by an X in the Grammatical column of the following table where grammatical idiosyncrasies are accommodated. For example, 1234.50 would be rendered as One Two Three Four Dollars and Five Zero Cents where the rendering is literal. Where a grammatical translation is provided, the amount is rendered as One Thousand Three Hundred and Four Dollars and Fifty Cents.

Language	Language Code	Grammatical

## Editing Number to Words Code Descriptions

The Number to Words feature controls whether numerals appear in printed format as numerals or as words in several languages. You can edit the Number to Words description.

1. From the Administration menu, select **Financial**, select **Cashiering Management**, and then select **Number to Words**.
2. Select the **Code** or enter the **Description** representing the translation word. The code can be a number or a word (or an abbreviated word).
3. Click **Search**.
4. From Search results, locate the Code, select the row-level **vertical ellipsis** associated with it, and click **Edit**.
5. Edit the **Description**.
6. Click the **Manage Translations** link.
  - a. Edit existing translations: enter revised translation text in the Translation field or click Remove to delete the translation.
  - b. Add translations: click Add translations, select a language, and enter translation text in the Translation field.
7. Click **OK**.
8. Update the Description field and click **Save**.

## Configuring Shift Drop Locations

[Prerequisites: Shift Drop Locations and Bag Numbers](#)

### Adding Shift Drop Locations

You can configure shift drop locations for cashier shift closures. On the Cashier Closure screen, the shift drop locations you configure are associated with the cashier shift closure numbers.

1. Select the **Administration** menu, select **Financial**, select **Cashiering Management**, and then select **Shift Drop Locations**.

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Shift Drop Locations codes are created by selecting the Template tab. Once created, you can copy Shift Drop Locations codes to specific properties using the Copy action. Refer to [Copying Configuration Codes to Multiple Properties](#) for more information.

Click **New** and complete the following fields:

- a. **Code.** Enter a code for the Shift Drop Location.
  - b. **Description.** Enter a description for the Shift Drop Location.
  - c. **Manage Translations.** Select to open the multi-language descriptions screen and configure translated descriptions for each language.
  - d. **Sequence.** Enter a number that controls the position of this code in lists. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
2. Click **Save** to save and close or click **Save and Continue** if you want to configure additional shift drop locations.

#### Editing Shift Drop Locations

1. Select the **Administration** menu, select **Financial**, select **Cashiering Management**, and then select **Shift Drop Locations**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. Make the required changes.
6. Click **Inactive** to make a code inactive; inactive codes are not available for selection.
7. Click **Save**.

#### Deleting Shift Drop Locations

1. Select the **Administration** menu, select **Financial**, select **Cashiering Management**, and then select **Shift Drop Locations**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Delete** and confirm the deletion.

## Prerequisites for Shift Drop Locations and Bag Numbers

### OPERA Controls

**Group:** Cashiering

**Parameters:** Shift Drop Location and Bag Numbers

## Configuring Tax Types

### Prerequisites for Configuring Tax Types

The Tax Types feature enables you to define categories to identify specific guests or reservations and reference these tax types in [tax generates configuration](#). In doing so you can setup varying tax calculations or tax exemption based on tax type. By creating Tax Type codes such as Regular Guest, Sales Tax Exempt, Diplomat and so on, you can control whether a tax generate is applied to sale charges, how the amount is calculated and also the effective dates for the posting of tax generates.

The [Tax Type Calculation OPERA Control](#) determines whether the tax type selected in profiles or reservations is to be used for tax generate calculations at your property. By using [Page Composer](#) you then customise the profile overview or the reservation stay details panel to add the tax type list field to the panel.

After configuring tax types, you can select a default tax type in the [Default Tax Type OPERA Control](#). The value selected is set for all new profiles or reservations created, depending on Tax Type Calculation OPERA Control.

As an option, you can enable the Tax Exempt report when configuring Tax Types. The report gives a detailed daily breakdown of room revenue and the tax exemptions held by each guest/reservation. For more information, see [Financials Reports](#)

### Adding Tax Types

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and then select **Tax Types**.
2. Click **New** and complete the following
  - a. **Property**: Enter or confirm the property.
  - b. **Tax Type**: Enter a tax type code.
  - c. **Description**: Enter a description of the tax type.
  - d. As an option, complete the Tax Exempt Report Configuration selections.
    - i. **Exempt Days**: specifies the number of days in the report date range after the guest becomes tax exempt.
    - ii. **Tax Percentage**: sets the tax types as a percentage, such as four percent or so on.
    - iii. **Print Auto Adjust**: enables printing Room Revenue for all days before the guest became tax exempt; Number of nights before the guest became tax exempt, and Tax paid on room revenue for all days before the guest became tax exempt.
3. Click **Save**.

### Editing Tax Types

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and then select **Tax Types**.
2. Enter search criteria, click **Search**.
3. Select the tax type, click the vertical ellipsis **Actions** menu, select **Edit**.

4. Update details.
5. Click **Save**.

#### Deleting Tax Types

1. From the **Administration** menu, select **Financial**, select **Cashiering Management**, and then select **Tax Types**.
2. Enter search criteria, click **Search**.
3. Select the tax type, click the vertical ellipsis **Actions** menu, select **Delete**.
4. Click **Delete** to confirm.

Commissions Management	Commissions	Tasks
	Bank Accounts	<ul style="list-style-type: none"> <li>• New/Edit Bank Accounts</li> <li>• Delete Bank Accounts</li> </ul>
	Stop Processing Reasons	<ul style="list-style-type: none"> <li>• New/Edit Stop Processing Reasons</li> <li>• Delete Stop Processing Reasons</li> </ul>
	Commission Codes	<ul style="list-style-type: none"> <li>• New/Edit Commission Codes</li> <li>• Delete Commission Codes</li> </ul>

## Configuring Commission Bank Accounts

The Commission Processing module allows the user to easily set up single or multiple bank accounts for the payment of travel agent commissions. Since properties are often dealing with a great number of different travel agents and sources, the most convenient way for them to pay commissions is to work with multiple bank accounts. International chains/properties may work with several different bank accounts: accounts for payment in the local currency and accounts for payment in foreign currencies.

Besides commission payment using checks (CHK payment method), some accounts may be designated for electronic funds transfer commission payments (EFT payment method); and yet others may be used for central payment (CENT payment method) of commissions generated at several properties. In the central payment case, a data transfer from each property provides the necessary information for the central bank to handle actual commission payment, in check or EFT form.

Travel agents and source profiles are each associated with bank accounts that handle commissions payment for that source/agent. (The bank account designated as the "default bank account" is used for paying commissions to agents and sources that do not have a bank account selected.)

Bank accounts can be set up in various ways, depending on how your organization processes commissions. Here are some of the most typical bank account configurations:

- A separate bank account to handle commission processing in each currency. For example, a bank account for American Trust to handle US dollar payments and a bank account for Bank of Montreal to handle payments in Canadian dollars.
- Multiple bank accounts to handle payments in a single currency. For example, American Trust and Bank of America each have a bank account configured in US dollars.

- One bank account to process payments in multiple currencies. Set up multiple bank accounts for the same bank, with one bank account to handle payment in each currency. For example, if American Trust handles commission payments in US dollars and in Canadian dollars, set up two identical bank accounts, except for the currency. Although OPERA Cloud uses an internal numbering system to differentiate these bank accounts, it would be advisable to give each bank account a unique Bank Name (e.g., American Trust - USD, American Trust - CAD) to make it easy to identify the accounts when working in the Commissions module.

Each bank account can have a language associated with it. This language can be used to determine the language for check printing. Thus, bank account language and bank account currency may both play a part in determining how you configure bank accounts as well as which account is associated with a particular travel agent or source profile.

#### Adding Bank Account:

1. From the **Administration** menu, select **Financial**, select **Commission Management**, and then select **Bank Accounts**.
2. Click **New** and enter the following details:
  - a. **Bank Code:** Unique code for this bank account.
  - b. **Branch Code:** Code for the branch of the bank. Must be unique for each Bank Code.
  - c. **Bank Name:** Name of the bank account.
  - d. **Branch Code:** Code for the branch of the bank. Must be unique for each Bank Code.
  - e. **Bank Name:** Name of the bank account.
  - f. **Routing Number:** Bank routing number.
  - g. **Account Number:** Account number held by your organization at the bank.
  - h. **Payment Method:** Select the down arrow to choose the type of payment that is associated with this bank account. Options are:
    - i. **CHK:** Commission payment by check.
      - **Format:** Select the down arrow to choose the check format to be used to print checks for this bank account. Check formats are configured in Reports configuration (**Application > Reports > Configure Reports**) Select the Commission Check report group. Refer [BI Publisher Stationery Editor](#).
      - **Next Check Number:** Next available check number in the series of checks. This number will be automatically updated each time commissions payments are processed and checks are printed.
      - **Min. Processing Amt:** Minimum amount of the commission for a travel agent/source before a commission payment is processed. This is useful if you want to make sure you do not produce a check every time a commission is due but only after a reasonable commission amount has been accumulated.
      - **Edit Check Number:** Select this check box to allow users to change the check numbers for this account. Deselect this check box to prevent users from editing check numbers once they are assigned (this is the default).

- **Check Stub Lines:** The number entered here is the number of printable lines (top to bottom) on the check stub. The check stub is always displayed above the check. The number entered here should match the number set by the Maximum Records Per Page value you set when you customized the sample\_checkusd.rep. The default maximum records per page for the sample\_checkusd report is 18. (See [Customizing Reports](#) for details).
  - ii. **CENT-Centrally paid commissions:** This selection is essentially the same as CHK, but is provided as a separate option that can be used with central reservation systems where commissions are paid from a central bank account.
  - iii. **EFT- Electronic funds transfer:** An export file is created by the commission payment process. EFT file formats can vary, depending on the clearinghouse used by the bank. EFT is available with one of the following add-on cloud services:
    - OPP WTP (Electronic Commission Data Transfer for WTP)
    - OPP HCC (Electronic Commission Data Transfer for HCC)
    - OPP\_EGS (Electronic Commission Data Transfer for EGS)
    - OPP\_NPC (Electronic Commission Data Transfer for NPC)
    - OPP\_INF (Electronic Commission Data Transfer for INF)
  - i. **Currency:** When the Foreign Currency Codes (Foreign Currency Handling) OPERA Control is active, select a currency from the list for this account. The same currency can be select in more than one bank account.
  - j. **Language:** Select a language for this bank account from the list. Your selection determines the language used to write amounts in words on checks when the Multi-language OPERA Control is active. If no language is selected here, OPERA Cloud defaults to the the base language for your property.
  - k. **Positive Pay Export:** Available when the Positive Pay Check Export OPERA Control is active. Select this check box so the bank will have the option to use the Positive Pay Export functionality. The Positive Pay Export identifies to the bank all of the Travel Agent Commission checks that have been processed by OPERA Cloud and can be paid out to the agent by the bank. For more information, see [Positive Pay Checks](#) for details.
  - l. **Default:** Select this check box if this bank account is to be the default in case no bank account is associated with the travel agent or source. A default bank account must be configured for a property and only one bank account can be selected as the default. An X appears in the X column for the default bank account.
  - m. **Default for Currency:**When an active OXI Interface is present, this option provides the ability to configure a default bank account per currency/property and to link that bank account with the profile for commission processing when OXI inserts a commission code in an OPERA Cloud profile.
3. Click **Save**.

### Editing Bank Account

1. From the **Administration** menu, select **Financial**, select **Commission Management**, and then select **Bank Accounts**.
2. Enter search criteria and click **Search**.
3. Select the account from search result, click **Vertical Ellipsis** and click **Edit**.

4. Update the details.
5. Click **Save**.

#### Deleting Bank Account

1. From the **Administration** menu, select **Financial**, select **Commission Management**, and then select **Bank Accounts**.
2. Enter search criteria and click **Search**.
3. Select the account from search result, click **Vertical Ellipsis** and click **Delete**.
4. Click **Delete** to confirm.

## Commission Codes

Travel Agent commission is calculated after a reservation is checked out and is based on either of the following:

- The eligible revenue posted during the stay, usually the accommodation or package (including package items) revenue.
- A flat amount per night or per stay.

The calculation of commission is driven by commission codes and the business rules defined in them. Commission codes identify the eligible sale charge transaction codes for which to calculate commission, the commission calculation method, and any taxing method to be applied to the commission.

Properties must configure a NON or ZERO commission code for non-eligible travel agents or rate codes. This commission code, with a zero flat amount commission, calculates a zero amount payable to the agent. You can configure OPERA Cloud to transfer all zero commission payments directly to commission payment history or to list these commission payments as part of the commission payables processing.

The following hierarchy determines how OPERA Cloud calculates a commission payable for a reservation:

- A global default commission code is selected within OPERA Controls – Commissions. For example, this could be set to 10%; paying 10% of eligible revenue to Agents.
- The contracted commission payable is also selectable within each Travel Agent or Source profile and is used if the commission payable is different from the global default, for example, a travel agent company contracted to receive 7% of eligible revenue.
- Rate code configuration also has an option to select the applicable commission code, which overrides the system default and the commission code selected on the Travel Agent or Source profile. For example, the rate code SPAPKG with a commission code of NON would pay zero commission to any agent booking the rate code.

## Configuring Commission Codes

### Adding Commission Codes

1. From the **Administration** menu, select **Financial**, select **Commission Management**, and then select **Commission Codes**.
2. Click **New** and complete the following:
  - a. **Property** : Enter or select the property.
  - b. **Code**: Enter an alphanumeric code to identify the commission code. For example 10%, \$10.
  - c. **Description**: Enter a description for the commission code. For example, 10% Commission, 20% Commission, \$75 Flat Commission per Night, or No Commission.
  - d. **Sequence**: Enter a sequence to determine the position of the commission code in lists. Commission codes without a sequence number appear in alphabetical order following codes that have a number assigned.
  - e. **Hold**: Select a Hold status if you want the commission payment held for review prior to payment:
    - i. **Always**: The commission detail record always has the Hold status (H) selected. Commission detail records with this status are not processed for payment until the hold is released.
    - ii. **Accounts Receivables**: The commission detail record has the Hold status (H) selected if the direct bill transaction code (defined by the Cashiering>AR Settlement Trn Code application setting) is associated with any of the folios generated by the reservation. The commission detail record also has the AR status (A) selected. AR status means the associated commission is used to offset the agent/source AR account. When records flagged for AR are processed, they are removed from the list of commission details without creating a check or an EFT payment record. The Payment Activity record shows the AR status.
    - iii. **Prepaid**: The commission detail record has the Hold status (H) selected if the pre-paid transaction code (defined by the Commission > Default Prepaid Commission Trn Code application setting) is associated with any of the folios generated by the reservation. The commission detail record also has the Prepaid status (P) selected. Prepaid status means that all or part of the commission is prepaid. The prepaid amount is automatically deducted from the commission payment when the commissions detail record is processed. The Payment Activity record shows the Prepaid status.

### Adding a Flat Amount Commission Code

1. In the Commission Calculation section, select the following **Based On** options:
  - a. **Reservation**: Select to calculate a flat amount per reservation.
  - b. **Amount**: Enter a dollar amount.
2. Select an option to determine the calculation rule.
  - a. **Per Night**: Commission amount is calculated per night of the reservation based on the Amount value multiplied by the number of nights.
  - b. **Per Stay**: Commission amount is calculated for the entire stay based on the Amount value.
1. **Tax**: Enter the Tax percentage if the commission payment is taxed. The tax on a commission is automatically calculated during commission processing if the Auto Calculate VAT OPERA Control is active.

2. Click **Save**.

### Adding a Revenue Percentage Commission Code

1. In the Commission Calculation section, select the following **Based On** option.
  - a. **Revenue**: Select to calculate commission based on revenue posted
  - b. **Tax**: Enter the Tax percentage if the commission payment is taxed. The tax on a commission is automatically calculated during commission processing if the Auto Calculate VAT OPERA Control is active.
2. To select the commissionable sales transaction codes, click New. Provide the following information. \* Commission %. (Required) Percentage commission to be paid on revenue generated by the selected transaction codes. The Commission % can vary per transaction code added.
  - a. **Weekend Commission %**: (Optional) If a different commission rate is earned on revenue generated on weekends, enter the percentage here. Otherwise, the Commission % applies regardless of the day of the week.
  - b. **Based on Net Amount**: Select the check box if the commission is based on before-tax revenue. Leave the check box unchecked to calculate commissions on the gross amount.
  - c. **Transaction Code(s)**: Select the sale charge transaction code(s) for which revenue is commissionable at the defined commission percentage.
1. On the Transaction Code screen, do the following:
  - a. From the Available list of transaction codes, search and select the transaction code(s) to associate with the new routing code (hold down the Ctrl key to select multiple transaction codes).
  - b. Click the directional arrow to move the codes to the Selected list. You can filter the Available list or the Selected list of transaction codes by entering a transaction code in the Filter field and clicking Go.
  - c. Click **Save**.
2. Repeat to add additional transaction codes with a different percentage of commission.
3. Click **Save**.
4. Select an option to determine the calculation rule.
  - a. **Per Night**: Commission amount is calculated per night of the reservation based on the Amount value multiplied by the number of nights.
  - b. **Per Stay**: Commission amount is calculated for the entire stay based on the Amount value.
5. Enter the **Tax**percentage if the commission payment is taxed. The tax on a commission is automatically calculated during commission processing if the Commission > Auto Calculate Value Added Tax (VAT) OPERA Control is active.
6. Click **Save**.

On the Transaction Code screen, do the following:
7. From the Available list of transaction codes, search and select the **Transaction Code(s)** to associate with the new routing code (hold down the Ctrl key to select multiple transaction codes).

8. Click the **Directional Arrow** to move the codes to the selected list. You can filter the Available list or the Selected list of transaction codes by entering a transaction code in the Filter field and clicking **Go**.
9. Click **Save**.
10. Repeat to add additional transaction codes with a different percentage of commission.
11. Click **Save**.

### Reservation History Records

Use the Reservation History Records section of the Commission Codes screen to configure a commission code to apply to reservation records that are entered manually into OPERA Cloud.

**Commission Paid:** Select the option that corresponds to the commission rhythm:

1. **Per Night:** Commission can be accrued each night of the guest's stay.
2. **Per Stay:** Commission can be accrued once per stay.
  - a. **Flat/Percentage:** Select the Flat option to enter a flat amount in the Commission Amount field. Select the Percentage option and enter a percentage in the Commission Amount field. You can specify both a flat amount and a percentage.
  - b. **Commission Amount :** This field shows a percentage when the commission Percentage option is selected, or the commission flat amount when the Flat option is selected. A percentage number entry must be between 0 and 100.

### Editing Commission Codes

1. On the Commission Code screen, select or confirm the **Property**.
2. Enter search criteria for commission codes and click **Search**.
3. In the search results, select the **Commission Code** and click the **Vertical Ellipsis**.
4. Select **Edit**.
5. Update the commission code configuration.

 **Note:**

If the commission is based on revenue, select the **Vertical Ellipsis** to edit the transaction code configuration

6. Click **Save**.

### Deleting Commission Codes

1. On the Commission Code screen, select or confirm the **Property**.
2. Enter search criteria for commission codes and click **Search**.
3. In the search results, select the **Commission Code** and click the **Vertical Ellipsis**.
4. Select **Delete**.

## Configuring Stop Processing (Hold Payment) Reasons

### Prerequisites for Stop Processing Reason Codes

When the Stop Processing Reasons Code OPERA Control is active and a user sets a payment hold on a commission payment, a stop processing reason must be selected. Configure the various reasons why a commission payment would be held. For more information, see [Managing Commission Payment Holds](#).

### Adding Stop Processing (Hold Payment) Reasons

1. From the **Administration** menu, select **Financial**, select **Commission Management**, and then select **Stop Processing Reasons**.
2. Click **New** and complete the following:
  - a. **Code**: Enter a code that identifies the stop payment processing reason.
  - b. **Description**: Enter a description of the code.
  - c. **Sequence**: Enter a number to indicate the position of this reason code in a list of displayed values.
3. Click **Save**.

### Editing Stop Processing (Hold Payment) Reasons

1. From the **Administration** menu, select **Financial**, select **Commission Management**, and then select **Stop Processing Reasons**.
2. Enter search criteria then click **Search**.
3. Select the reason code in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Stop Processing (Hold Payment) Reasons

1. From the **Administration** menu, select **Financial**, select **Commission Management**, and then select **Stop Processing Reasons**.
2. Enter search criteria then click **Search**.
3. Select the reason code in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Comp Accounting

**Gaming****Prerequisites for Comp Accounting**

The Oracle Hospitality OPERA Comp Accounting Cloud Service enables you to set up complimentary goods and services, referred to as "comps" or comp transactions, and offer them to guests during their stay. You set up comp accounting by adding routing instructions to the reservation to transfer selected transaction codes to one of eight special "Comp" billing windows (#101 to #108).

You can specify the sales charges to be comped (including how related taxes should be handled) and nominate staff members (called authorizers) to approve comp requests and the monetary value of the comps they authorize (per-day and per-stay). Authorizers review and evaluate requests for comps submitted by other staff members, who themselves may not be authorizers.

When integrated with a Player Tracking System (PTS), approved comps can be automatically transferred to the AR account associated with an authorizer. If no AR account is associated to an authorizer, the front desk agent / cashier selects an alternate payment method to settle the comp charges. If AR accounts are used, comp charges are managed through the Accounts Receivable module.

## Prerequisites for Comp Accounting

**Licenses / Subscriptions**

Oracle Hospitality OPERA Comp Accounting Cloud Service

OR

Oracle Hospitality OPERA Cloud Service Casino and Gaming Management

## Comp Authorizers and Authorizer Groups

**Gaming**

Authorizers are users who are allowed to route and transfer comp transactions to comp windows and set up comp routing for comp requests made by other staff members. When the **Comp Request** function is configured in OPERA Controls, authorizers can approve comp routing requests (that is, set up comp routing instructions for a comp routing request) or decline a comp routing request.

When you set up a user as an authorizer, you specify the transaction codes and routing codes that the authorizer can comp, specify the per-day ceiling value or credit limit for transaction codes and/or routing codes, and specify the per-instance ceiling value for comped transactions.

Authorizers can be grouped together into Authorizer Groups so that new authorizers inherit the rate code, transaction codes, and monetary limits assigned to the group.

When an authorizer is assigned to an authorizer group, any subsequent changes to the authorizer group rate code, transaction codes, and/or monetary limits are inherited by the authorizers assigned to that group. In addition, when authorizer group changes are saved, any rate code, transaction codes, and/or monetary limits set individually for the authorizer are replaced by the authorizer group values.

**Figure 13-1** Manage Comp Authorizer Group screen

### Daily Credit Limit and Transfer Limit

You can define a **Daily Credit Limit** and **Transfer Limit** for the comp routing and transaction codes associated with an Authorizer Group.

- The Daily Credit Limit is the credit limit which the authorizer group cannot exceed while settling the comp windows.
- The Transfer Limit is the limit which the authorizer group cannot exceed while routing or transferring charges from cash windows to comp windows.

The following guidelines apply:

- Any Authorizer assigned to the Authorizer Group inherits the same Transaction / Routing Codes, Daily Credit Limit, Transfer Limit, and Rate Code associated with the group. This takes precedence over the Transaction /Routing Codes, credit limit, limit values, and rate code defined on the specific authorizer itself.
- When you route a posting or move one to a comp window, the Daily Credit Limit / Transfer Limit values will validate the transaction. If the limit is exceeded, the transaction will not be comped.
- When creating a comp routing instruction, if the authorizer has a Transfer Limit value defined for the Transaction /Routing Codes, the lowest limit value among the selected codes is pre-populated in the Routing limits. This takes precedence over the limits defined in the Comp Routing Codes.

### Authorizer Sign In Screen

When transferring comp transactions or approving routing requests by staff members, the Authorizer Sign In screen appears and users who are authorizers must enter their **Authorizer ID** to proceed. When the **Authorizer PIN Required** parameter is active in OPERA Controls, authorizers must also enter their **PIN**.

The **Membership Number** and **Membership Name** from the reservation appears on the Authorizer Sign In screen when the **Default PTS Membership Type** setting is defined and is of the same membership type as the one attached to the reservation. If the membership information does not appear or if you want to change the attached membership, you can click the **Profile Search** link to open the Profile Search screen and search for a profile. When you select a profile, its **Membership Number** and **Membership Name** will populate to the Authorizer Sign In screen.

## Configuring Comp Authorizers

### Adding Comp Authorizers

1. From the **Administration** menu, select **Financial**, select **Comp Accounting**, and then select **Comp Authorizers**.
2. Click **New** and complete the following fields:
  - a. **Property**. Select or confirm the property.
  - b. **User ID**.  
Select a **User ID** from the list of values.
  - c. **AR Account Number**. This field automatically populates when a **User ID** is selected. This is the user's AR account number.
  - d. **Authorizer Group**. Select an **Authorizer Group** for the authorizer.
  - e. **Rate Code**. This field automatically populates once an **Authorizer Group** is selected. This is the rate code assigned to the authorizer group.
3. Click **Save**.

### Editing Comp Authorizers

1. From the **Administration** menu, select **Financial**, select **Comp Accounting**, and then select **Comp Authorizers**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the authorizer and click the row-level **vertical ellipsis**.
5. Click **Edit**.
6. Update the configuration and click **Save**.

### Deleting Comp Authorizers

1. From the **Administration** menu, select **Financial**, select **Comp Accounting**, and then select **Comp Authorizers**.
2. Select or confirm the **Property**.

3. Enter search criteria and click **Search**.
4. In the search results, select the authorizer and click the row-level **vertical ellipsis**.
5. Click **Delete**.

## Configuring Comp Authorizer Groups

### Adding Comp Authorizer Groups

1. From the **Administration** menu, select **Financial**, select **Comp Accounting**, and then select **Comp Authorizer Groups**.
2. Click **New** and complete the following fields:
  - a. **Property**. Select or confirm the property.
  - b. **Code**. Enter a code that identifies the authorizer group.
  - c. **Description**. Enter a description of the authorizer group.
  - d. **Rate Code**. Select a rate code to assign to this authorizer group. When a comp routing instruction is set up using a comp routing code (with **Inherit Rate Code** selected) and the authorizer has a rate code selected, this authorizer group rate code will be applied to the reservation and not the one selected.
3. Click **New** to associate comp routing codes and transaction codes to the authorizer group. The Manage Comp Routing Instructions screen appears.
  - a. Enter the comp routing or transaction code in **Search** filter and click **Search**. You can also select **Comp Routing Codes** and/or **Transaction Codes** to filter on one of these types of codes.
  - b. Highlight the comp routing or transaction codes in the **Available** pane that you want to include in this authorizer group (hold down the Ctrl key to select multiple codes).
  - c. Click the **directional arrow** button to move the selected codes to the **Selected** pane.
  - d. **Daily Credit Limit**. Enter the daily credit limit for the comp routing or transaction codes. This is the credit limit which the authorizer group cannot exceed while settling the comp windows.
  - e. **Transfer Limit**. Enter the per-instance transfer limit for the comp routing or transaction codes. This is the limit which the authorizer group cannot exceed while routing or transferring charges from cash windows to comp windows.
4. Click **Save** to save the comp routing instruction configuration and exit the screen.
5. Click **Save** to save the authorizer group.

### Editing Comp Authorizer Groups

1. From the **Administration** menu, select **Financial**, select **Comp Accounting**, and then select **Comp Authorizer Groups**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the comp authorizer group and click the row-level **vertical ellipsis**.

5. Click **Edit**.
6. Update the configuration and click **Save**.

### Deleting Comp Authorizer Groups

1. From the **Administration** menu, select **Financial**, select **Comp Accounting**, and then select **Comp Authorizer Groups**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the comp authorizer group and click the row-level **vertical ellipsis**.
5. Click **Delete**.

## Comp Redemption Codes

### Gaming

Comp Redemption enables you to configure comp redemption codes that are used to redeem comps earned by guests, who have a casino player membership, to pay for their billing charges.

1. Select or confirm the **Property**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Delete** and confirm the deletion.

## Comp Routing Codes

Gaming

Comp Accounting enables a property to provide complimentary goods and services called comps or comp transactions to guests by routing selected transaction codes to special billing screen windows called comp windows. There are 8 comp windows available on the Billing screen (101...108).

With Comp Routing Codes, you can group comp transaction codes into meaningful units to simplify the process of setting up comp routing instructions on reservations.

Designated staff members called authorizers can set up comps by transferring or routing the selected transactions to the comp windows on a guest's Billing screen. Upon guest check out, comp transactions posted to any of the comp windows and approved by the Patron Tracking system (PTS) can automatically be transferred to special AR accounts, which are attached to the profiles of the authorizers. Thereafter, the AR accounts are handled using OPERA Cloud AR features according to the procedures the property has established.

### Note:

The PTS has final approval of all comp transactions that have been routed or transferred to a comp window. If the PTS does not approve the comp transaction, it is considered to be staged.

## Configuring Comp Routing Codes

### Prerequisites for Comp Routing Codes

#### Adding Comp Routing Codes

1. From the **Administration** menu, select **Financial**, select **Comp Accounting**, and then select **Comp Routing Codes**.
2. On the Comp Routing Codes screen, click **New** and complete the following fields:
  - a. **Property.** Enter or confirm the property.
  - b. **Description.** Enter a description of what this code includes (for example, Room Charges, Banquet, Food & Beverage, Golf Charges).
  - c. **Code.** Enter a code for the routing instruction (for example, FBA, RMZ, GOLF).
  - d. **Apply To.** Select the days of the week to which this comp routing code applies.
  - e. **Routing Limits.** Select one of the following for the default routing limits:
    - **Amount:** Select to specify a maximum amount for this routing instruction. The limit accepts the total amount you can route for any one reservation using this routing instruction. No limit is set if you leave the Limit field blank.
    - **Percentage:** Select to specify this routing instruction to route a percentage of the transactions associated with it. For example, enter 10 in this field to route 10% of each transaction. Generates such as taxes and service charges are also split by the designated percentage.
    - **Covers:** Select to specify a default number of covers to auto-populate in the **Covers** field on the Routing Instructions screen when this routing code is selected. Covers indicate the number of charges or transaction codes the routing code covers.
  - f. **Apply Per Day.** Select to generate a separate comp routing instruction for each day of the stay. This may be useful, for example, when you want the routing limit to apply to each day of the stay rather than to the entire stay or to a range of dates.
  - g. **Inherit Rate Code** (optional). Select to inherit the rate code from the comp authorizer group and have this rate code applied to the reservation. When a comp routing instruction is set up using a comp routing code with **Inherit Rate Code** selected, the rate code defined in the authorizer group will be applied to the reservation.

3. Search for and select the transaction code(s) to associate with the new comp routing code (hold down the **Ctrl** key to select multiple transaction codes).
4. Click the **directional arrow** button to move the codes to the Selected list.
5. Click **Save**.

### Editing Comp Routing Codes

1. Select or confirm the **Property**.
2. Enter search criteria and click **Search**.
3. In the search results, select the comp routing code and click the row-level **vertical ellipsis**.
4. Select **Edit**.
5. Update the configuration and click **Save**.

### Deleting Comp Routing Codes

1. Select or confirm the **Property**.
2. Enter search criteria and click **Search**.
3. In the search results, select the comp routing code and click the row-level **vertical ellipsis**.
4. Select **Delete**.

## Comp Transaction Codes

### Gaming

Every comp transaction that appears on a folio or an AR invoice must have a comp transaction code.

1. From the **Administration** menu, select **Financial**, select **Comp Accounting**, and then select **Comp Transaction Codes**.

 **Note:**

When the OPERA Multi-Property Reservation Cloud Service is active, new comp transaction codes are created by selecting the **Template** tab. Once created, you can copy a comp transaction code to specific properties using the **Copy** action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

2. Click **New** and complete the following fields:
  - a. **Property.** Enter or confirm the property.
  - b. **Code.** Enter a numeric code to represent the new comp transaction code.
  - c. **Description.** Enter a description of the comp transaction code. The description appears in Billing and outputs on folios.
  - d. **Manage Translation.** (Available when the **Multi Language** function is active in the **General** group in OPERA Controls.) Select this link to add translated descriptions to print translated folios for foreign guests / companies.
  - e. **Subgroup .** Select a subgroup for the transaction code. Subgroup selection determines whether the transaction code is considered sales (revenue and non-revenue), payment, or wrapper based on the transaction group linked to the subgroup.

 **Note:**

Transaction codes that belong to the same subgroup are grouped together for the same date on the Billing screen. When printing folios, the styles are: 1, 9, 10, 11, 14, 16, 15, or 19.

- f. **Group.** The transaction group. This field automatically populates once the subgroup is selected.
- g. **Transaction Type.** Select a transaction type. Transaction types are used to cluster similar transaction codes. This field is optional, but certain reports (Financial Transactions with Generates and Financial Transactions by Folio No.) print financial information based on the transaction code type. Available options are Lodging, Food and Beverage, Telephone, Minibar, Tax, Non-Revenue, Others, or blank.
- h. **Tax Code.** When you select a Tax transaction type, this field is enabled (1-20) to define up to 20 tax bucket values for the tax type transaction code. Use these buckets to group various tax transactions into one total on the footer of

the folio and in reports. For example: all GST transaction codes would have tax code = 1.

- i. **Fiscal Transaction Code.** This tells the local fiscal application how to format charges for this transaction code when building the fiscal printer XML files.
  - j. **Minimum Amount.** The minimum amount allowed under the new comp transaction code. If the minimum is not met, a warning message appears.
  - k. **Maximum Amount.** The maximum amount allowed over the new comp transaction code. Enter amounts during a manual posting. If the maximum is exceeded, a warning message appears.
  - l. Accounting Code.
  - m. Quantity Code.
3. **Options.** In this section, complete any of the following optional fields or selections:
- a. **Revenue Group.** Select this check box if this transaction code is revenue. If deselected, the charges posted to the transaction code are treated as non-revenue.
  - b. **Include in Deposit/CXL Rule.** (Available if either the **Deposit Handling** application function or the **Cancellation Handling** application function is active in the **Cashiering** group in OPERA Controls.) When selected, the transaction code is included in the calculation of deposit and/or cancellation rule fees. You can use this feature to include or exclude costs such as packages, generates, and fixed charges associated with a reservation when calculating deposit requests and cancellation penalties.
  - c. **Generates Inclusive.** Select this check box if generated charges (such as taxes or service charges) are included in the base amount posted. For example, a minibar charge could be tax inclusive, so when posting a 40.00 charge (and generates are set up), the guest would see \$40.00 on the folio; however, internally the tax generate would be broken out (\$35.00 minibar, \$5.00 tax). If unchecked, tax generates are calculated from the base amount posted, and then posted separately as itemized, exclusive charges (taxes) on the folio.
  - d. **Check Number Mandatory.** Select this check box if a check number must be entered when making a posting against this transaction code.
  - e. **Comp Payments** (available with the OPERA Comp Accounting Cloud Service subscription). Select if this payment type is available for settlement of comp windows 101-108. A payment type without this option selected cannot be used to settle comp windows 101-108.
  - f. **Print Receipt.** Select this option to print a receipt of the transaction when this comp transaction code is used.
4. **Associated Transaction Codes.** In this section, select the transaction codes you want to associate with the comp transaction code by selecting one or more codes in the **Available** pane and clicking the arrow button to move them to the **Selected** pane. You can also filter the list of available codes by entering a code in the **Filter** field and clicking **Go**.
5. Click **Save** or click **Save and Add Generates** to configure add-on charges for the comp transaction code. Generates are automatically calculated charges, such as taxes and service charges, that are added to a guest's bill when transactions are posted using this comp transaction code.

### Editing Comp Transaction Codes

1. Select or confirm the **Property**.
2. Enter search criteria and click **Search**.
3. In the search results, select the comp transaction code and click the row-level **vertical ellipsis**.
4. Select **Edit**.
5. Update the configuration and click **Save**.

### Deleting Comp Transaction Codes

1. Select or confirm the **Property**.
2. Enter search criteria and click **Search**.
3. In the search results, select the comp transaction code and click the row-level **vertical ellipsis**.
4. Select **Delete**.

## Comp Types

### Gaming

#### Prerequisites for Comp Types

Comp Types enable you to configure codes for ranking guests based on your business requirements. For example, you might use this feature to identify guest loyalty members according to their gaming needs or expertise. You can also associate Comp Types to comp windows for specific reservations via the Reservation Routing Instructions screen.

**Figure 13-5** Comp Types screen

The screenshot shows the Oracle Comp Accounting interface for the 'Comp Types' screen. The breadcrumb trail at the top reads 'Home / Financial / Comp Accounting / Comp Types'. The main form area contains four input fields: 'Property' (with a search icon and a red asterisk indicating it's a required field), 'Code', 'Description', and 'Sequence' (with a minus sign and a plus sign for navigation). At the bottom right, there are 'Cancel' and 'Save' buttons. A 'Help' icon is visible in the top right corner of the form area.

## Prerequisites for Comp Types

### OPERA Controls

**Group:** Comp Accounting

**Parameters:** Comp Types

## OPERA Cloud Tasks

**Group** : Financial Admin

**Comp Accounting**: Comp Types

- New/Edit Comp Types
- Delete Comp Types

## Configuring Comp Types

### Prerequisites for Comp Types

#### Adding Comp Types

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Comp Accounting**, and select **Comp Types**.
2. Click **New** and complete the following fields:
  - a. **Property**. Enter or select a Property.
  - b. **Code**. Enter a code to identify the Comp Type.
  - c. **Description**. Enter a description for the Comp Type.
  - d. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

#### Editing Comp Types

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Comp Accounting**, and select **Comp Types**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. Update the configuration and click **Save**.

#### Deleting Comp Types

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Comp Accounting**, and select **Comp Types**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Delete** and confirm the deletion.

## Comp Revenue Buckets

Gaming

When the Oracle Hospitality OPERA Comp Accounting Cloud Service is active, you can configure comp revenue buckets that contain the comp revenue statistics for a guest's comp transactions. You can also associate one or more comp transaction codes to a comp revenue bucket and set up comp revenue buckets for each property as well as copy them to other properties.

To access the **Comp Revenue Buckets** feature, select the **Administration** menu, select **Financial**, select **Transaction Management**, and then select **Revenue Bucket Codes**.

## Configuring Comp Revenue Buckets

The Revenue Bucket Codes screen enables you to search for, create, edit, and delete revenue bucket codes of the Comp bucket type.

### Adding Comp Revenue Bucket Codes

1. Select the **Administration** menu, select **Financial**, select **Transaction Management**, and then select **Revenue Bucket Codes**.
2. Click **New** and complete the following fields:
  - a. **Property**. Select or confirm the property.
  - b. **Bucket Type**. Select the **COMP** bucket type for the comp revenue bucket code.

#### Note:

Comp transaction codes and standard transaction codes must be included in a Billing revenue bucket type for the charges to these transaction codes to appear on the Billing Summary screen.

- c. **Code**. Enter a code that identifies the comp revenue bucket.
  - d. **Description**. Enter the description of the comp revenue bucket code.
  - e. **Bucket Value**. Enter an optional value for the comp revenue bucket code.
3. In the **Transaction Codes** panel, select the comp transaction codes you want to include in this comp revenue bucket:
    - a. Enter the comp transaction code in **Available** filter or select codes from the list and click **Go**.
    - b. Highlight the comp transaction codes in the **Available** pane that you want to include in this comp revenue bucket.
    - c. Click the arrow button to move the selected transaction codes to the **Selected** pane.
  4. Click **Save** to save and exit or click **Save and Continue** to save this Comp Revenue Bucket code and add another one.

### Editing Comp Revenue Bucket Codes

1. Select or confirm the **Property**.
2. Enter search criteria and click **Search**.

3. In the search results, select the comp revenue bucket code and click the row-level **vertical ellipsis**.
4. Click **Edit**.
5. Update the configuration and click **Save**.

#### Deleting Comp Revenue Bucket Codes

1. Select or confirm the **Property**.
2. Enter search criteria and click **Search**.
3. In the search results, select the comp revenue bucket code and click the row-level **vertical ellipsis**.
4. Click **Delete**.

#### Editing Comp Revenue Bucket Types

Since it is an OPERA Cloud System Inserted Data (SID) value, you can only edit the description for the Comp Revenue Bucket Type. Therefore, you cannot delete it and you can only update the description.

1. Select the **Administration** menu, select **Financial**, select **Transaction Management**, and then select **Revenue Bucket Types**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the comp revenue bucket type and click the row-level **vertical ellipsis**.
5. Click **Edit**.
6. Update the **Description** field and click **Save**.

## Setting up Pre Stay Charging Rules

The Pre Stay Charging feature controls whether your property allows guests to charge expenses to their reservation account before check in. You can limit Pre Stay charging to reservations with specific payment types and reservation types.

1. From the Administration menu, select **Enterprise**, select **OPERA Controls**, and select the **Cashiering Group**.
2. In the Functions section, set **Pre Stay Charges** to Active.
3. Set **Default Pre Stay Charges on Reservation** to On to default the Pre Stay Charging option on the reservation's Privileges screen.
4. Set **Only Post if Reservation is on Queue** to On to enable pre-stay privileges only if the reservation is on queue and waiting to be checked in.
5. Enter the **Days Prior to Arrival** value to limit the number of days before the reservation arrival date that charges can be posted to the reservation account; leave NULL for unlimited.
6. Select the **Reservation Payment Types** to limit pre-stay posting privileges to reservations with payment method equal to these payment types; leave NULL to allow/permit all payment types.

7. Select **Reservation Types** to limit pre-stay posting privileges to reservations with these reservation types; leave NULL to allow/permit all reservation types.

## Setting up Post Stay Charging Rules

The Post Stay Charging feature controls whether your property allows guests to charge expenses to their reservation account after checkout. You can limit Post Stay charging to reservations with specific payment types and reservation types.

1. From the Administration menu, select **Enterprise**, select **OPERA Controls**, and select the **Cashiering Group**.
2. In the Functions section, set **Post Stay Charges** to Active.
3. Set **Default Post Stay Charges on Reservation** to On to default the Post Stay Charging check box on the reservation Payment Instructions window.
4. Set **Open Folio** to On.
5. Enter the **Open Folio Closing Preference**. This determines when an open folio needs to be closed. If set to Sameday, you cannot leave the billing screen with an open folio. If set to Unrestricted, you are allowed to leave the billing screen with a folio in an open status.
6. Select the **Reservation Payment Types** to limit post-stay posting privileges to reservations with payment method equal to these payment types; leave NULL to allow/permit all payment types.
7. Enter a **number of days** in the Zero Balance Open Folio Close Days field. This setting determines the number of days after checkout that an open folio with a zero balance will be closed automatically during End of Day.

## Rate Management

Rate Management provides all the tools you need to effectively define and manage the rate structures for your hotel. Some of the things you can set up in Rate Management include rate codes, rate classes, rate categories, display sets, rate strategies, and yield management integration.

## About City Tax Function

The City Tax function calculates the tax and charges guests based on different sets of rules for each city's requirement. For a reservation to qualify for the city tax posting, define the Purpose of Stay field on the reservation with a value that has the description field starting with an asterisk (\*) on its configuration.

The City Tax is posted to each reservation based on gross or net room revenue amounts, purpose of stay, percentage, and flat amount depending on the city's regulations. You can set up the City Tax package as Included in Rate, Add to Rate - Separate Line, or Add to Rate - Combined Line.

The following fields are available within the setup:

- Purpose of Stay Start (you must configure Purpose of Stay codes with a description matching the value entered if using this option).
- Purpose of Stay (you must configure Purpose of Stay codes matching codes entered if using this option).
- Predefined amount ranges (you must configure City Tax Ranges using this option).
- Net rate amount (rate amount to consider for calculation after taxes are deducted).
- Gross rate amount (rate amount to consider for calculation before taxes are deducted).
- Percentage of the applicable rate amount.
- Number of children (if child rate buckets are configured).
- Based on different package attributes such as Included in Rate, Add to Rate - Separate Line, or Add to Rate - Combined Line.
- City Tax qualified packages (any package that is configured with a lodging transaction code).
- Special Calculation Rule (where the city tax is calculated by the number of people in the room, and posted based on the number of adults in the room).

### Purpose of Stay

Configure the Purpose of Stay code in Administration > Reservation Management>Purpose of Stay to activate the City Tax functionality on reservations.

In the Description field, enter the value that will identify the purpose of stay code and activate the generic City Tax package code. Enter the value in the first position of the Purpose of Stay description and insert a single quote at the beginning and at end of the value/description.

For example, if the value is 1 and the description is City Tax Guest, enter '1City Tax Guest' to enable the City Tax calculation. If you enter 'City Tax Guest1', the city tax will not calculate.

If not using a specific value for Purpose of Stay to calculate the City Tax, leave this field blank. The default value of an asterisk (\*) will be used if this field is blank.

The Purpose of Stay Start can be characters, numbers, or alphabetical letters. If using alphabetical letters, use upper case letters in both the Purpose of Stay Start field and the first position of the Purpose of Stay Description field.

### City Tax Ranges

Tax ranges are defined at the property level by selecting Administration>Financial>Rate Management>City Tax Ranges. The City Tax Ranges screen enables you to configure the settings.

The applicable city tax is posted depending on the range in which the rate amount falls. The following is an example for the amount ranges configuration:

- 0.00-10.0 = 0.00
- 10.01-25.00=0.50
- 25.01-50.00=1.00
- 50.01-100.00=2.00
- 100.01-150.00=3.00
- Each additional 50.00 increased by 1.00

When creating City Tax Ranges, provide the following information:

- Property (mandatory): Enter or confirm the property name.
- Amount From (mandatory). The beginning value of the amount range.
- Amount To. The end value of the amount range.
- Tax Amount (mandatory). The applicable tax amount required by authorities.
- Interval Amount. This defines the intervening amounts, such as, for every 50.00 EUR tax, increase by 1 EUR.

The City Tax function (CITY\_TAX) is available within the Posting Attributes Formula field in Package Codes. The function calculates the city tax based on the Purpose of Stay defined on the Additional Details screen on the reservation.

### City Tax Package Code Setup

The City Tax is set up as a Package Code within Administration > Financial > Rate Management. In the formula field, select City \_Tax from the list of values for the following fields:

- Purpose of Stay Start
- Purpose of Stay
- Amount Ranges
- Room Net Gross
- Percentage
- Special Calculation Rule (Special Calculation Rule for Dresden)
- Child One (Available if Child Rates are active)
- Child Two (Available if Child Rates are active)
- Child Three (Available if Child Rates are active)
- Packages To Include

Enter field information in single quotes, except for the Percentage field.

## Package Codes

### Prerequisites for Package Codes

Package setup involves defining package elements, which are additional products or services included in the rate or sold in addition to the rate. You can link package elements to rate codes to create pre-defined package rates. Or, you can add package elements directly on blocks or reservations to create ad-hoc package entitlements for reservations.

Package elements have rules that define the calculation of their price as well as the frequency of their posting; the **item price** for the package item is auto-posted to guest ledger account during End Of Day, based on the frequency specified. When the **Item Inventory** function is active it is also possible to associate inventory items to a package item so that when selling the package rate or selling the package item separately via the reservation the associate inventory items are also applied to the reservation. This is useful for associating inventory items such as extra bed and cribs to reservations and at the same time posting a charge for their supply via the package element.

Optionally, with the **Advanced Package** function active, package elements can be configured with an **allowance amount** as well as **item price**. For package items with an allowance amount defined the actual sales charge is either posted manually in OPERA Cloud or posted by an integrated system such as a point of sale (POS) workstation or an in-room video when consumed. With package allowances, a credit is posted to package ledger either during check or during each night audit and the sales charges posted to the package ledger to offset the credit - as a result the charge for package element does not appear on the guest folio. For allowances based package items, OPERA Cloud deducts the **item price** from the rate code rate amount. When multiple allowance based items are linked to a rate code the nett accommodation revenue for the reservation is the rate amount - sum (item price) for all package items included in the rate.

**Table 13-5 Example - Package Rate Breakdown**

Honeymoon	Item Price	Allowance	Calculation Rule
Rate Amount	\$540		
Dinner	\$45	\$70	Per Adult
Breakfast	\$20	\$40	Per Adult
Champagne	\$40	\$60	Flat Amount
Nett Accommodation	\$370		Based on 2 Adults

Allowance based package items also support consumption in multiple revenue centers via the setup of alternate outlets - specifying the alternate sales transaction codes permitted for the package item.

For example, a breakfast package element could be consumed in the restaurant or as a room service breakfast.

- Posted amount equal to or less than the allowance amount are posted to package ledger.
- Posted amounts exceeding the allowance amount are posted to the guest ledger account as an overage.
- Allowances not consumed or under consumed are posted to a "package profit" revenue transaction code to the package ledger, based on the item price.
- Allowance amounts exceeding the item price are automatically adjusted by a posting to "package loss" revenue transaction code to the package ledger.

Examples of allowance based package elements would be dinner or breakfast, where the sales charges for each would be post via a POS solution when the guest consumes their dinner or breakfast.

If the guest does not consume their entitlement OPERA Cloud posts the revenue to 'package profit' to balance the package ledger.

The charge for the package rate is posted to Guest Ledger using a system (non-revenue) transaction code referred to as 'Package Wrapper' - this transaction code is defined by linking a transaction code [About Transaction Codes](#) to a transaction group of type Wrapper. For package rates both the accommodation transaction code and the package wrapper transaction code must be selected on the Financials panel of the rate code [About Rate Codes](#).

Table 13-6 Example - Ledger Transactions

Honeymoon	Guest Ledger	Package Ledger	Allowance	Sales Revenue	Notes
Dinner Allowance			-\$90	\$140	On Check-in
Champagne Allowance			-\$40	\$60	On check-in
Dinner			\$140		\$140 Posted from POS
Dinner Loss			-\$50		-\$50 End of Day
Champagne			\$60		\$60 Posted from POS
Champagne - Loss			-\$20		-\$20 End of Day
Honeymoon Package	\$540		-\$370		Package Wrapper
Accommodation			\$370		\$370 End of Day
Breakfast Allowance			-\$40	\$80	End of Day (Next Day =Y)
Breakfast - Profit			\$40		\$40 Breakfast not consumed
					On Check-out
Totals	\$540		\$0		\$540

## Configuring Package Codes

### [Prerequisites for Package Codes](#)

#### Adding Package Codes

1. From **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Package Code**.
2. Click **New** and complete the following:
  - a. **Package Code Definition**
    - i. See [Package Code Definition](#).
  - b. Click **Save**.
  - c. **Transaction Details**
    - i. See [Configuring Package Code Transaction Details](#)
  - d. Click **Save**.
  - e. **Posting Attributes**
    - i. See [Configuring Package Code Post Attributes](#)
  - f. Click **Save**.

- g. **Package Pricing**
    - i. See [Configuring Package Code Pricing Schedule](#)
  - h. Click **Save**.
3. Click **Save** or **Save and Add More Details** to go to Package Code presentation page and make further updates.

### Editing Package Codes

1. From the **OPERA Cloud Administration** menu, select **Rate Management**, and then select **Package Code**.
2. Enter search criteria, click **Search**.
3. Select a package code and click the **vertical ellipsis**, select **Edit**.
4. Select a details link to update the respective details.

**Table 13-7 Package Details Links**

Package Details	
<a href="#">Package Code Definition</a>	<a href="#">Package Code Post Attributes</a>
<a href="#">Package Code Pricing Schedule</a>	<a href="#">Package Code Transaction Details</a>

### Deleting Package Codes

#### Note:

Package codes cannot be deleted if the package is attached to a rate code; the package must first be un-associated from the rate code. Package codes cannot be deleted if the package is attached to a package group, the package must first be deselected from the package group. Package codes cannot be deleted if dependent transactional data exists; if a package code is referenced in blocks or reservations (past or future) the code cannot be deleted. Package codes attached to a canceled or no show reservation where the departure date is in the future cannot be deleted.

1. From the **OPERA Cloud Administration** menu, select **Rate Management**, and then select **Package Code**.
2. Enter search criteria, click **Search**.
3. From search results, select a package code and click the **vertical ellipsis**, select **Delete**.
4. Click **Delete** to confirm.

### Copying Package Codes

You can use the copy action to clone a package code within the same property, or copy package codes to other properties when the OPERA Multi-property Cross Reservation Cloud Service is active

**Note:**

Change to a Hub location to copy package codes to other properties. See [Changing Your Location in Multi-Property Operations](#).

1. From the **OPERA Cloud Administration** menu, select **Rate Management**, and then select **Package Code**.
2. Click the **vertical ellipsis** and select **Copy**.
  - a. **Source.:** Select the source property.
  - b. **Package Code(s):** Select one or more package codes from the list.
  - c. **Package Pricing:** Select to also copy the package pricing to the destination properties.
  - d. **Target Properties:** Select one or more properties from the list.
3. Click **Save**.
  - a. **Copy Package Code As:** Enter a code for new (cloned) package (same property).
  - b. **Copy Description As:** Enter a description for new (cloned) package (same property).
4. Click **Copy and Continue**.
5. On the Confirmation panel, Status shows **Complete** and Status message as **Copy Template Code(s)** was successful.
6. Click **Print** to generate a report.

## Prerequisites for Package Codes

### OPERA Controls

**Group:** Rate Management

#### Functions:

- Advanced Packages (Allowances) - Optional
- Item Inventory - Optional

### OPERA Cloud Tasks

Rate Management

- Package Codes
  - New/Edit Package Codes
  - Delete Package Codes

## Configuring Package Code Definition

### Editing Package Code Definition

1. From the **OPERA Cloud Administration** menu, select **Rate Management**, and then select **Package Code**.
2. Enter search criteria, click **Search**.
3. From search results, select a package code and click the **vertical ellipsis**, select **Edit**.
4. Click **Package Definition**.
5. Click **Edit**.
  - a. **Property**: Enter or select the property.
  - b. **Package Code**: Enter a code for the package item (maximum 20 alphanumeric characters)
  - c. **Begin Sell Date**: Enter or select a begin sell date if limited availability of package
  - d. **End Sell Date**: Enter or select an end sell date if limited availability of package
  - e. **Short Description**. Enter a short description (title)
  - f. **Description**: Enter a description.
  - g. **Forecast Code**: Select a package forecast from the list. For more information, see [Configuring Package Forecast Groups](#) .
  - h. **Arrangement Code**: Select a package arrangement (folio grouping) from the list.
6. Click **Save**.

## Configuring Package Code Post Attributes

### Editing Package Code Posting Attributes

1. From **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Package Codes**.
2. Enter search criteria and click **Search**.
3. Select the package code, click **vertical ellipsis** and select **Edit**.
4. Click **Posting Attributes**.
5. Click **Edit**.
  - a. **Posting Type**
    - i. **Included in Rate**: No separate charge appears on the guest folio or reservation. The item price is deducted from the room rate amount.
    - ii. **Add To Rate - Separate Line**: If selected, the item price is posted additional to the room rate amount and printed as a separate charge on the folio.
    - iii. **Add To Rate - Combined Line**: If selected, the item price is added to the rate amount and combined with the accommodation charge on the folio (increases the room rate by the item price).

- b. **Valid Start Time:** Enter the valid start time during which the allowance defined in the package element is valid. If you leave the fields blank, the allowance is valid all day
- c. **Valid End Time:** Enter the valid end time during which the allowance defined in the package element is valid. If you leave the fields blank, the allowance is valid all day
- d. **Calculation Rule:** Select a value from the list of values to indicate the calculation rule for this package. This field is used to determine how the package amount should be calculated. You have the following options:
  - i. **Flat Rate (item price posted as flat rate, regardless of number of guests).** Flat Rate is per sharer reservation; each share-with reservation will be charged the flat rate amount.
  - ii. **Per Person (item price times multiplies by (number of adults plus number of children)).**
  - iii. **Per Adult (item price times multiplied by the number of adults).**
  - iv. **Per Child (item price multiplied by the number of children):** With the selection of this calculation rule and when the Rates Defined by Buckets OPERA Controls is Active, packages can be setup with different amounts per child bucket on the Package Pricing.
  - v. **Per Room:** The Per Room calculation is applied to the room. If a reservation is shared, instead of applying the package per share reservation, it posts only once for the room.
- e. **Posting Rhythm:** Select a posting rhythm to determine the frequency of the package posting. . Most posting rhythms are based off of the actual arrival date of the reservation. For more information, see [Package Posting Rhythms](#).
- f. **Formula:** Select from list internal functions used to calculate item price (used for country-specific tax package items).
- g. **Sell Separate:** Select this check box to allow the package item to be selected directly in a reservation using [packages panel](#). When selling and adding a package directly to a reservation, the rate code rate amount is displayed in Stay Details along with the adjusted room rate including the packages. If this check box is not selected, the package is only available for selection as a [rate code inclusion](#) . (Available when the Packages Sold Separately OPERA Control is active).
- h. **Post Next Day:** Select to specify this package element allowance will be consumed the following day. For example, a breakfast allowance created during end of day, but carried forward to the following day for consumption. (Available when the Advanced Packages OPERA Control is active.)
- i. **Forecast Next Day:** Select to have these package elements forecasted on the next day, irrespective if the Post Next Day check box is selected or not. Packages configured as Post Next Day only without this check box checked will not be forecasted for the next day automatically on the Package Forecast Report.
- j. **Tickets:** Select to indicate that the package is a ticketing package item. (Available when Ticket Packages OPERA Control is active and integrated with a ticketing solution) NOTE: When a package is setup as a Tickets Package, the Posting Rhythm can only be Post Every Night, Post Arrival Night, or Ticket Posting. A Ticket Package can be setup to Sell Separate and Add Rate

Separate Line, even when the Posting Rhythm is not set to Ticket Posting. This enables the ticket package to be included in the Rate Information as part of the total cost of the stay.

- k. **Catering.**: Available when the Catering Events OPERA Control is active, this option should be checked for all PMS packages that typically are also represented by a catering event (or partially represented by a catering event). For example, a Group Breakfast that may be included in the room rate, but for which also a catering event gets created if the group takes the breakfast as a unit (e.g., in a catering function space).
  - l. **Item Inventory**: (Available when the Item Inventory OPERA Control is active). Choose item(s) to be included in the package. Selected items will be added to the reservation and deducted from inventory.
    - i. Click **New**.
      - **Item.**: Select an item from the list.
      - **Quantity**. Enter a quantity to assign and deduct from inventory
    - ii. Click **Save**.
    - iii. Click **vertical ellipsis** and select **Delete** to delete.
    - iv. Click **vertical ellipsis** and select **Edit** to edit.
6. Click **Save**.

## Configuring Package Code Pricing Schedule

### Adding Package Code Pricing Schedule

1. From **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Package Code**.
2. Enter search criteria and click **Search**.
3. Select the package code, click **vertical ellipsis** and select **Edit**.
4. Click **Pricing Schedule**.
5. Click **Add** and enter the following details:
  - a. **Start Date**: Enter the start date for the price schedule or use the calendar tool to select dates. Date ranges for pricing records cannot overlap. By default, the package code is valid for a ten-year period starting on the date it is configured.
  - b. **End Date**: Enter the end date for the price schedule or use the calendar tool to select dates. Date ranges for pricing records cannot overlap. By default, the package code is valid for a ten-year period starting on the date it is configured.
  - c. **Price**: Enter the item price. This amount will be posted to the transaction code selected in Transaction Details panel.
  - d. **Allowance**: If the package element is configured as an allowance, enter the amount of the allowance. This is the maximum amount which the guest can consume (eg in an outlet ) and post to their reservation account. The charge is posted to the package ledger against the allowance. Any over-consumption is split and posted to the guest ledger using the **Overage** transaction code if specified. . The allowance amount cannot be less than the item price.

- e. **Min Nights:** Enter a minimum number of nights for this price schedule. (See Package Pricing and Availability Attributes).
  - f. **Max Nights:** Enter a maximum number of nights for this price schedule. (See Package Pricing and Availability Attributes).
  - g. **Min Guests:** Enter a minimum number of guests for this price schedule. (See Package Pricing and Availability Attributes).
  - h. **Max Guests:** Enter a maximum number of guests for this price schedule. (See Package Pricing and Availability Attributes).
6. Click **Save**.

### Editing Package Code Pricing Schedule

1. From **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Package Code**.
2. Enter search criteria and click **Search**.
3. Select the package code, click **vertical ellipsis** and select **Edit**.
4. Click **Pricing Schedule**.
5. Click **Edit**.
6. Update details.
7. Click **Save**.

### Package Pricing and Availability Attributes

When the Package pricing and availability attributes OPERA Control is active and the Redemption check box is not selected on the Package definition, Minimum and Maximum value fields can be specified for the number of Nights and Persons for each package pricing schedule.

When configuring package pricing schedules using the Package Pricing and Availability Attributes, keep in mind the following rules:

- Both the Min. and Max fields for both the Nights and Guests must have values defined for them. Only the Min and Max values for either the Nights or Guests cannot be specified.
- The Min and Max values cannot be left blank if a value has been defined for one or more of the fields. A numeric value must be entered. All of the fields can remain blank.
- The Min/Max range for either Nights or Guests can be the same as long as the other has its range
- There must be 1 record for each date range that has no Min/Max Nights and Min/Max Persons defined and this record will serve as a default when a reservation does not qualify to receive pricing based on any of the other package details sets that are based on Min/Max Nights and Min/Max Persons for the reservation date range. OPERA Cloud will automatically create such record when configuring package pricing.
- Validation for a reservation will be completed on a combination of the additional attributes.
  - The Stay Date falls between the Start Date and End Date of the package.

- No of Nights fall between the Min/Max Nights value range.
- No of Persons fall between the Min/Max value range.

 **Note:**

When package pricing is configured, each record must have at least one of the aspects i.e.; Date Range, Min/Max Night range and Min/Max persons range, different so that every package pricing record can be uniquely identified and there is no complete overlap. While configuring package pricing records, if OPERA Cloud identifies that the record overlap occurs based on either Date Range, Min/Max Night range or Min/Max persons range, you will be prompted if automatic adjustment should take place and if you select Yes, then the current record being added will be saved and existing overlapping record will be removed.

## Configuring Package Code Transaction Details

### Editing Package Code Transaction Details

1. From the **OPERA Cloud Administration** menu, select **Rate Management**, and then select **Package Code**.
2. Enter search criteria, click **Search**.
3. From search results, select a package code and click the **vertical ellipsis**, select **Edit**.
4. Click **Transaction Details**.
5. Click **Edit**.
  - a. **Transaction Code:** Select a sales charge transaction code from the list; the item price will be posted to this charge code.
    - i. **Tax Inclusive:** Select to indicate the item price is inclusive of taxes.
  - b. **Package Allowance:** Select the indicate this package item is to generate an allowance rather than post the actual sales charge. (Available when the Advanced Packages OPERA Controls is active).
    - i. **Package Profit:** Select a transaction code to post any package profit (unconsumed allowances).
    - ii. **Package Loss:** Select a transaction code to post any package loss (fully consumed allowances).
    - iii. **Overage:** Select a sales charge transaction code from list that will be used to post the amount that is consumed over the allowance amount of the package element (set in the Package Pricing panel). If this field is left blank, any overage is posted to the main transaction code to which the allowance was posted.
      - i. **Tax Inclusive:** Select to indicate the item price is inclusive of taxes.
    - iv. **Alternates:** Select transaction codes that can be used as alternatives to the main package transaction code (in the Code field) for this package. For example, the package may be for restaurant breakfast food (transaction code 2000) and room service breakfast (transaction code 3000 ) listed as an Alternate transaction code, allowing the guest to consume the same amount for room service breakfast without penalty.

- c. **Currency:** Select the currency for this package. Allowance packages and non-allowance packages set up in one currency cannot be attached to rate codes, reservations, and blocks configured in another currency. (Available when the Ability to Quote Rates in Foreign Currencies OPERA Control is active).
6. Click **Save**.

## Package Posting Rhythms

The Package Posting Rhythms can be configured from Create a New Package Code - Posting Attributes.

In the Posting Rhythms drop down list, the default selection is Post Every Night. You may make another posting rhythm choice by selecting a different option button. Some of the selections may open up fields for you to define particular features for that posting rhythm.

**Table 13-8 Description of the Restrictions effecting the stay dates**

Posting Rhythm Choice	Description
Post Every Night	Post this package charge every night of the stay.
Post on Arrival Night	Post this package charge only on arrival night. When a package that has this posting rhythm configured is attached to a reservation and a begin date is specified to be different than the arrival date, the user will be prompted with a message that states, "The package does not have posting rhythm which falls in the date range selected" and the package will not be attached to the reservation.
Post on Every X Nights Starting Night Y	Post this package charge every X nights, beginning the Y night of stay. You are prompted to enter the start night (e.g., night 1, night 2, night 3, etc.) and how often the posting should be repeated.
Post on Certain Nights of the Week	You are prompted to check mark the days of the week to determine the days to post this package charge.
Post on Last Night	Post this package charge on the last night of the stay only.
Post Every Night Except Arrival Night	Post this package charge on all nights of the stay except the arrival night.
Post Every Night Except Last	Post this package charge on all nights of the stay except the last night.
Do not Post on First and Last Night	Post this package charge on all nights of the stay except the first and last nights of the stay.
Custom Posting Schedule (Based on Stay)	This user defined schedule lets you enter a posting rhythm over a 14-day period, starting with the arrival date, by assigning the day (number) within a guest stay for posting this package price. For example, if you check mark boxes 3, 5, and 7, OPERA Cloud will post on the third, fifth and seventh day of the stay and will repeat this posting schedule after the 14th day through the remainder of the stay.

**Table 13-8 (Cont.) Description of the Restrictions effecting the stay dates**

Posting Rhythm Choice	Description
Custom Posting Schedule (Based on Night)	<p>This user defined schedule lets you enter a posting rhythm over a 14 day period. The start and end of the posting period is determined as follows:</p> <ul style="list-style-type: none"> <li>• If the package is attached to a rate code: The period starts with the date when the rate code to which the package is attached becomes effective for the stay. The period ends with the date of the last night for that rate code (or the last night of the stay if the rate code remains in effect until the departure date).</li> <li>• If the package is attached separately to the reservation: The Begin Date specified on the reservation when the package was attached is the start date for the period. The End Date specified on the reservation when the package was attached is the end date for the period. If no Begin Date and/or End Date are specified when the package is attached to the reservation, the Begin Date is assumed to be the arrival date and the End Date is assumed to be the departure date of the reservation, irrespective of when the package is attached to the reservation.</li> </ul>
Floating Allowance per Stay	Allow the allowance to be consumed at anytime during the guest stay.

## Package Groups

A package group is a collection of package elements that you define as a single unit and link to a rate code or sell separately on a reservation. Package groups allow commonly associated elements to be defined as a single unit that can be attached to a rate code or to a reservation. An example might be a Bed and Breakfast package which encompasses a room and breakfast service for a set rate.

Each package code, or element, is set up separately and a package group would then be configured with all of the selected package elements. The package group can then be added to the specific rate code or to reservations, rather than having to select multiple package elements every time. This approach has been designed to provide you with a powerful system which can handle simple or complex package combinations. Packages have a wide range of configuration options that will drive the way OPERA Cloud posts packages and tracks allowances based on each property's needs.

Packages can be attached to either a rate code, to a reservation, or to a rate code and a reservation both. They are not sold directly. Changing the package group configuration would impact all linked rate codes, which simplifies the ongoing maintenance.

An example would be a package group for a breakfast allowance and parking charge that you link to multiple rate codes to create various rates offering breakfast and parking entitlements.

## Configuring Package Groups

1. To search for the Package Group:

- a. From **OPERA Cloud Administration** menu, select **Financial, Rate Management**, and then **Package Groups**.
  - b. Under Search criteria, the default property is displayed in Property field. If the default property is not displayed, click to search for the Property.
  - c. Click **Search**. The property details appear in the table below.
  - d. Click **Reset** to go back to the previous information.
2. To create a New Package Group:
    - a. From **OPERA Cloud Administration** menu, select **Financial, Rate Management**, and then **Package Groups**.
    - b. On the Package Groups screen, click the vertical ellipsis and then click **New**.
    - c. On the Manage Package Groups screen, enter details in the mandatory fields marked \* and click **New**. Attach Packages screen appears.
    - d. Select a **Package Code** from the table displayed and click **Attach**.  
The attached package appears in the Package Codes table .
3. To edit Package Groups:
    - a. From **OPERA Cloud Administration** menu, select **Financial, Rate Management**, and then **Package Groups**.
    - b. Click the vertical ellipsis to delete, view or edit an existing Package Group. On the Manage Package Group screen, all the details appear for the particular package that you select.
    - c. The fields for Property, Code, and Sell Separate are disabled. You have the option to edit the Description and Short Description fields.
4. On the Package Code panel, click **New** to create a new package group. A list of package codes appear on the Attach Package screen.
    - a. Select a Package Code and click **Attach**. The new attached Package Code appears in the Options table on the Manage Package Group screen.
    - b. Click the vertical ellipsis to delete an existing Package group.

## Configuring Package Forecast Groups

Package Forecast Groups are referenced by the Package Forecast Report which provides a forecast number of breakfasts, lunches, dinners, cocktails, tennis lessons, green fees, etc., per day. The report does not display each package element, but rather each package forecast group. This allows you to have multiple package elements combined to make one package forecast group.

Defining the package forecast groups separately gives you tremendous flexibility in the way they are used and combined.

- A rate code is based on a particular combination of forecast groups, such as a tennis package or a theater package.
- A package forecast group may be added to a number of rate codes to automatically post an associated transaction, such as tax. When the charge for the element changes, it needs to be changed only in the package element definition, and then all rate codes are automatically updated.

- Several package forecast groups may have the same name, so that related items can be posted as one. For example, the federal tax, state tax, and city/county tax can each be defined as a package forecast group all with the name TAX. It is then entered only once on each rate code.

Package Forecast Groups are referenced in [package configuration](#).

### Adding Package Forecast Groups

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Package Forecast Groups**.

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, package forecast groups are created by clicking the **Template** tab. Once created, you can copy the configuration to specific properties using the **Copy** action. For more information, see [Copying Configuration Codes to Multiple Properties](#).

2. Click **New** and complete the following:
  - a. **Code:** Enter a code for the package forecast group.
  - b. **Description:** Enter a description for the package forecast group.
  - c. **Sequence:** Enter or select a display sequence.
3. Click **Save**.

### Editing Package Forecast Groups

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Package Forecast Groups**.
2. Enter search criteria, then click **Search**.
3. From search results, click the row level **Vertical Ellipsis** for the Package Forecast Group and select **Edit**.
  - a. Update the configuration.
  - b. **Inactive:** Select checkbox to make the code inactive.
4. Click **Save**.

### Deleting Package Forecast Groups

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Package Forecast Groups**.
2. Enter search criteria, then click **Search**.
3. From search results, click the row level **Vertical Ellipsis** for the Package Forecast Group and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Rate Classes

OPERA Cloud rate structure is divided into **Rate Class, Rate Category, Rate Code**. You must define one or more rate classes, a rate class is then associated to each [Rate Category](#). Rate classes can be used to query rates from [Look to Book](#) sales screen. Examples of rate classes could be Negotiate, Wholesale, Discounted etc.

### Adding Rate Classes

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Classes**.

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Rate Classes are created by selecting the Template tab. Once created, you can copy Rate Classes to specific properties using the Copy action.- [Copying Configuration Codes to Multiple Properties](#).

Click **New** and enter the following details:

- a. **Property:** Enter or select the property.
  - b. **Code:** Enter a code for the rate class.
  - c. **Description:** Enter a description for the rate class.
  - d. **Begin Date:** Enter a begin date.
  - e. **End Date:** Enter an end date.
  - f. **Sequence:** Enter a display sequence.
2. Click **Save**.

### Editing Rate Classes

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Classes**.
2. Enter search criteria, click **Search**.
3. Click the **Vertical Ellipsis**, select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Rate Classes

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Classes**.
2. Enter search criteria, click **Search**.
3. Click the **Vertical Ellipsis**, select **Delete**.
4. Click **Delete** to confirm.

## Configuring Rate Categories

Rate Codes are associated with a rate category in order to group similar rate codes to a common rate category. For example, the rate codes LGOV1, LGOV2, FGOV1, FGOV2 could be grouped into a rate category GOVT for all Government Department rates. All package rates codes could be associated with a rate category for Packages. Rate categories can be used to query rates from [Look to Book](#) sales screen. [Rate restrictions](#) can also be set at the Rate Category level, affecting all rate associated with the rate category.

Rate category are then associated to a [rate class](#).

### Adding Rate Categories

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Categories**.

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Rate Categories are created by selecting the Template tab. Once created, you can copy Rate Categories to specific properties using the Copy action.- [Copying Configuration Codes to Multiple Properties](#).

2. Click **New** and enter the following details:
  - a. **Property**: Enter or select the property.
  - b. **Code**: Enter a code for the rate class.
  - c. **Description**: Enter a description for the rate class.
  - d. **Rate Class**: Select a rate class from the list.
  - e. **Begin Date**: Enter a begin date.
  - f. **End Date**: Enter an end date.
  - g. **Sequence**: Enter a display sequence.
3. Click **Save**.

### Editing Rate Categories

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Categories**.
2. Enter search criteria, click **Search**.
3. Click the **Vertical Ellipsis**, select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Rate Categories

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Categories**

2. Enter search criteria, click **Search**.
3. Click the **Vertical Ellipsis**, select **Delete**.
4. Click **Delete** to confirm.

## Configuring Rate Seasons

### Prerequisites for Rate Seasons

OPERA Cloud allows rate seasons to be defined for a range of dates. For example, Summer rate season from June 1st to September 1st is to identify the peak season where your property charges higher rates. When configuring rate codes you can select a rate season to automatically populate the start/end dates. Dates for rate seasons cannot overlap each other.

### Adding Rate Seasons

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Seasons**.
2. Click the vertical ellipsis and then click **New** and complete the following fields:
  - a. **Season Code**: Enter a code for the season. For example - SUM20
  - b. **Description**: Enter a description for the season. For example - Summer 2020
  - c. **Begin Date**: Enter or select the start date of the season
  - d. **End Date**: Enter or select the end date of the season
  - e. **Rate Code**: Select a rate code from the list to limit this rate season to a specific rate code. For more information, see [About Rate Codes](#)
3. Click **Save**.

#### Note:

With an active multi-property subscription, new Rate Seasons can only be created by clicking the **Template** tab. Once created, you can copy the configuration to specific properties using the Copy action. For more information, see [Copying Configuration Codes to Multiple Properties](#).

### Editing Rate Seasons

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Seasons**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis** and select **Edit**.
4. Make the desired changes.
5. Click **Save**.

### Deleting Rate Seasons

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Seasons**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis** and select **Delete**.
4. To confirm, click **Delete**.

## Prerequisites for Rate Seasons

**Group:** Rate Management

**Functions:** Rate Seasons

### OPERA Cloud Tasks

**Group:** Financial Admin

**Tasks:** Rate Management

- Rate Seasons

## Configuring Display Sets

### Prerequisites for Configuring Display Sets

You can create Display Set codes so that reservation agents can find rate codes based on this special grouping of rates. Example of Display Sets could be such groupings as Best Available, Corporate, Discount, Promotional, Package etc.

When creating rate codes you can select the applicable display set for the rate code. If no display set is selected for one or more rate codes, these rates will be grouped and displayed under a **No Display Set** grouping in Look To Book.

The [Default Display Set OPERA Control](#) determines which set of rates displays by default in Look to Book result.

#### Note:

In multi-property operations Display Sets configuration applies to all properties. Defaulted Display Sets are indicated with .

### Adding a Display Set

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Display Sets**.
2. Click **New** and enter the following details:
  - a. **Code:** Enter a code for the display set.
  - b. **Description:** Enter a description for the display set.

- i. **Manage Translation:** Click to open the multi-language descriptions screen and configure a translated description for each language.
    - c. **Sequence:** Enter a display sequence in lists.
3. Click **Save**.

#### Editing a Display Set

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Display Sets**.
2. Enter search criteria and click **Search**.
3. Select the display set in search result, click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Update details.
  - b. **Inactive:** Select the make the display set inactive. Inactive codes will not display in list for selection.
4. Click **Save**.

#### Deleting a Display Set

#### Note:

If the display set is selected in rate code(s) it cannot be deleted.

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Display Sets**.
2. Enter search criteria and click **Search**.
3. Select the display set in search result, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## About Rate Codes

Rate Codes form the core of OPERA Cloud reservation and rate process. Rate codes are used to define the various prices for each room type over a particular date range or rate season.

Rate codes can be configured in multiple currencies. For overseas agents, where contracts may be negotiated in US dollars, a separate rate code in US dollars can be added that will be converted to local currency using a predefined exchange rate. The conversion to local currency can be defined as fixed at check in, fixed at time of reservation, current date, or fixed at block.

Rate codes are also used to support property packages that include food, beverage, leisure or other elements. By associating package elements with a rate code, it is possible to build a package of entitlements for a guest staying on the rate.

## Base Rates

### Prerequisites for Base Rates

#### Overview

When the **Base Rates** function is active, the pricing schedule for a rate code can be derived from another (master) rate code, called the Base Rate. The rate code that derives its pricing schedule from the base rate is called the dependent or derived rate and is indicated as a dependent rate in the rate code configuration.

For example, you could consider the RACK rate as a Base Rate and configure derived rates based on the pricing schedule of RACK (such as 10% less than the rack rate).

When you select a Base Rate code from the Base Rate list of values, the pricing schedule auto-populates for the current rate code (making the current rate code a dependent rate code). Any changes to the pricing schedule in the base rate automatically affect the pricing schedule in all derived rate codes.

The Amount and Rounding fields enable you to vary the pricing schedule for the derived rate code by a flat or percentage amount increase or reduction on the base rate. When a rate code is based on another rate, its pricing schedule is restricted from update because the Base Rate automatically controls it. This feature is useful when you have negotiated rates with a certain percentage off the property's RACK rate code. If you have multiple negotiated rates, all with different percentages of RACK, it is easy to manage rate changes. When the RACK pricing schedule changes, the pricing schedule of rates based on it automatically update.

#### Note:

Dependent rate codes can have packages added to their rate header, but not to their pricing schedule. For example, if Rate Code B is a derived rate code based on Rate Code A, packages can be added to Rate Code B's rate header, but not to its pricing schedule.

#### Base Rate Extra Person Calculation

Base rate calculations are applied to extra adult and child rate amounts when the **Base Rate Extra Person Calculation** parameter is **On** in the Rate Management group in OPERA Controls. When the parameter is **Off**, the extra adult or child amount is not discounted by the amount set on the derived rate code. All amounts are calculated based on the status of the parameter at the time the rate is created or updated. Changes to the parameter affect all pricing schedules created from that point forward (previously created pricing schedules are

not dynamically updated when changing the parameter. When an existing rate is modified, the status of the parameter is checked and the rate amounts are calculated and updated accordingly.

**Example 13-1 Example 1: Base Rate Extra Person Calculation parameter is Off**

**Table 13-9 Initial Base Rate Pricing**

Number of Persons	Amount
1 Adult	100
2 Adults	200
Extra Adult	50

**Table 13-10 Derived Rate Pricing Results**

Number of Persons	Base Rate Amount	Base Rate Calculation	Derived Rate Amount	Derived Rate Calculation
1 Adult	100	100	75	100-25
2 Adults	200	200	150	200-50
3 Adults	250	200 + 1 Extra Adult @ 50	200	150 + 1 Extra Adult @ 50*
4 Adults	300	200 + 2 Extra Adults @ 50	250	150 + 2 Extra Adults @ 50*
5 Adults	350	200 + 3 Extra Adults @ 50	300	150 + 3 Extra Adults @ 50*

**Note:**

The Extra Adult amount is not discounted when the **Base Rate Extra Person Calculation** parameter is **Off**.

**Example 13-2 Example 2: Base Rate Extra Person Calculation parameter is On**

**Table 13-11 Derived Rate Pricing Results**

Number of Persons	Derived Rate Amount	Derived Rate Calculation
1 Adult	75	100 -25
2 Adults	150	200 -50
3 Adults	187.50	250 -62.50*
4 Adults	225	300 -75*
5 Adults	262.50	350 -87.50*

 **Note:**

When the **Base Rate Extra Person Calculation** parameter is **On**, the rate amount equals the calculated Rate Code A (Base Rate) amount minus the 25% Derived Rate discount.

## Prerequisites for Base Rates

### OPERA Controls

**Group:** Rate Management

**Functions:** Base Rates

- Base Rate Extra Person Calculation

## Dynamic Base Rates

### [Prerequisites for Dynamic Base Rates](#)

#### Overview

Dynamic Base Rates automatically calculate and display derived pricing during a rate availability search (as opposed to the pricing being stored and fetched when Base Rate functionality is used) in the same way the Base Rate calculates and shows them. However, the pricing schedule for Dynamic Base Rates appear the same as a standard rate's details.

For example, a rate code ABC could be dynamically derived from the rate code RACK with RACK defined as a Daily Rate. When viewing the Rate Code configuration for RACK, the Daily Rate screen is available. When viewing the rate details for ABC (the rate code dynamically derived from RACK), the standard static rate code's pricing schedule is available and not the Daily Rate Code's pricing schedule.

#### Dynamic Base Rate from a Derived Rate

A Dynamic Base Rate's rate code can be derived from a rate code that is itself a dependent rate code.

For example, assume a base rate code RACK (Amount = 100 for 1 adult), and a rate code CORP is a dependent rate code with pricing derived from RACK (Amount = -10%). Rate code ABC is then configured as a Dynamic Base Rate with pricing derived from CORP (with flat Amount = -5.00). Rate queries would show RACK = 100, CORP = 90, and ABC = 85.

#### Compare with Rate Details

For a more complex rate structure, Dynamic Base Rates can be simultaneously used with both regular static rates and the calculated dynamic based rate amounts by selecting **Compare with Rate Details** on the Rate Code Type panel. When this option is enabled, the system compares the static pricing in the Rate Code configuration and the pricing calculated by the Dynamic Base Rate's rate code calculations, conducts a comparison of the two rate amounts, and then shows the lowest rate per day in the Look to Book search results.

For example, the Dynamic Base Rate calculation returns the rate amount of 90.00 for room type DLX on 01/01. This rate code (because **Compare with Rate Detail** is selected) looks at

the rate amount defined for a DLX on 01/01. Assuming this is 125.00, OPERA Cloud compares the 125.00 to the calculated value of 90.00 and returns the lower of the two values, 90.00, in the Look to Book search results. However, if the rate amount defined for DLX was 85.00, OPERA Cloud would compare the Dynamic Base Rate calculation of 90.00 against the 85.00 and return the lower of the two rates, 85.00, in the Look to Book search.

By not selecting the **Compare with Rate Details** option, rate amounts defined in the Rate Code Configuration are not used when conducting the rate calculations based on the defined Dynamic Base Rate's rate code.

 **Note:**

With the Dynamic Base Rate functionality, you must enter at minimum a single rate detail. This defines the room types for which this dependent rate is available and also the 1 Adult rate amount used by external systems.

### Combing Base and Dynamic Base Rates

You can also use both Base Rates and Dynamic Base Rates for a single rate code.

The following example explores this option. Assume the following rate codes:

- RACK (Base Rate)
- ABC is a discounted rate code (Dynamic Base Rate)
- ABC-RACK (with Base Rate and Dynamic Base Rate defined)

When viewing the rate code configuration for ABC-RACK, the rate code RACK is selected as the Base Rate code and rate code ABC as its dependent Dynamic Base Rate code. The **Compare with Rate Details** option is selected so that derived pricing is considered.

When viewing ABC-RACK, a view only screen appears for the pricing schedule with its derived price taken from the Base Rate calculation.

When you search availability for ABC-RACK's pricing, OPERA Cloud dynamically fetches the rate amount from the Dynamic Base Rate's rate code (that is, ABC), returns its value, and performs the Dynamic Base Rate calculation (flat or percentage) with rounding. For this example, let's assume this returned dynamic calculation returns a rate amount of 129.99. Because the **Compare with Rate Details** option is selected, OPERA Cloud next looks at its stored values for the rate code and pulls the corresponding rate amount for the room type for the date. The pricing seen in the Rate Code configuration is determined from the rate calculation of the Base Rate. In this example, let's assume this amount is 125.25. The 129.99 is compared to the 125.25, and the lower of the two amounts, 125.25, appears within the Look to Book results.

### Tiered Rates and Dynamic Base Rates

When the Dynamic Base rate code is flagged as a tiered rate code in the Rate Code Type panel, the Base Rate LOV only shows other rate codes marked as tiered rate codes for selection as the Base Rate. Assuming **Compare with Rate Detail** is not selected when the Dynamic Base rate code is selected for a Look to Book rate query, the price that appears is the rate calculated from the base rate for the appropriate length of stay.

## Prerequisites for Dynamic Base Rates

### OPERA Controls

**Group:** Rate Management

**Functions:**

- Base Rates
- Dynamic Base Rates

## Configuring Advanced Daily Rates

### Prerequisites for Advanced Daily Rates.

An Advanced Daily Rate behaves like a regular [Daily Rate](#) except that the pricing schedule is derived from the Daily Base Rate. Reservations made for an Advanced Daily Rate have rate amounts that can vary for each night of the stay. Rate amounts are calculated based on the Daily Rate level available for each stay night.

The Advanced Daily Rate configuration process:

1. **Configure an Advanced Daily Base Rate:** These are the rate templates, and changes to the Advanced Daily Base rate are reflected in the Advanced Daily Rate codes. Each Advanced Daily Base rate configured is a separate rate level. Using the Advanced Daily Base rates, you can configure as many rate levels as needed. When the Advanced Daily Rate is configured, it references the Advanced Daily Base rate levels as its base rates.
2. **Configure an Advanced Daily Rate:** When you select the Advanced Daily Rate, Rate Detail tab, the Daily Rate entry screen appears. On the Daily Rate Entry screen, you can set up the rate details for the rate code by selecting a date range and applying an Advanced Daily Base rate code (level) for each date.

Up to 50 rate codes can be designated as 'Advanced Daily Rates'. The "Advanced Daily Rates" rate type checkbox gets disabled once 50 rate codes have been configured.

### Adding Advanced Daily Base Rate (Rate Level)

You must create multiple Advanced Daily Base rate codes to set the rate levels by using the [Configuring Rate Codes](#) presentation page.

1. From the OPERA Cloud Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Search and select a rate code or create a new rate code.
3. From the rate code Rate Code Details, click **Rate Code Type**.
4. To identify the rate code as Advanced Daily Base rate, select the **Advanced Daily Base** check box.
5. Click **Save**.
6. Configure the pricing schedule based on the [Configuring Daily Rates Pricing Schedule](#) .

### Adding Advanced (Derived) Daily Rate

Create Advanced Daily Base rate codes from the new [Configuring Rate Codes](#) presentation page.

1. From the OPERA Cloud Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Click **New**.
3. Enter a **Rate Code**, enter **Start Sell Dates** and **End Sell Dates**, and enter a description of the rate code.
4. Select **Room Types** from the list.
5. Select a **Rate Category** from the list.
6. Select a **Transaction Code**.
7. In the Rate Code Type panel, select **Daily Rates** and **Advanced Daily Rate**.
8. Click **Save and Go to Presentation**.

### Set Pricing Schedule

1. Select **Pricing Schedules** link to navigate to or open the Pricing Schedule panel
2. Enter search criteria to view pricing schedule for enter Start Date, End Date, Room Class and/or room type, click **Search**.

Set Daily Rates by Date Range. You can set rates for a range up to 365 days in one update process.

1. **Apply From.** Enter or select the start date for the pricing update.
2. **Apply To.** Enter or select the end date for the pricing update
3. **Room Types.** Select the room types to which the daily rate pricing are to apply.
4. **Rate Level.** Select an Advanced Daily Base Rate from the list for each date.

 **Note:**

Leaving the Rate Level field blank clears the rate for the selected room types and date range.

5. **Days of Week.** Select the days of the week (Sunday, Monday, Tuesday, etc.) to which the daily rate are to be applied (within the defined date range).
6. Click **Apply Rate Changes**.
7. Set Daily Rates by Inline Edit (Table). Thirty-one dates are listed vertically per page.
  - a. **Rate Level.** Select an Advanced Daily Base Rate from the list.
  - b. **Clear Rates.** Select the check box to clear the rates for the room types displayed in search result.
8. Click **Apply Rate Changes**.

## Configuring Rate Code Rate Information

Rate code information is displayed in [Look to Book sales screen](#) when details of a rate code is accessed.

When the multi-language OPERA Control is active, rate information can be added in multiple languages for rates distributed across multiple properties / countries.

### Editing Rate Code Rate Information

1. From the **Administration** menu, select **Financial**, then **Rate Management**, and then **Rate Codes**.
2. Enter or select the property and click **Search**.
3. From search results, select the rate code and click the vertical ellipsis, and then select **Edit**.
4. On the Rate Code presentation page click the **Rate Information** details link..
5. Click **Edit** and enter the following details:
  - a. **URL:** Enter a website address if rate information is available externally
  - b. **Short Information:** Enter the rate information that you want to make available in **Look to Book** when the Display Rate Short Information OPERA Control is active.
    - i. **Manage Translation:** Click to open the multi-language descriptions screen and configure short information for each language.
  - c. **Long Information:** Enter the rate information that you want to make available in **Look to Book** when the Display Rate Long Information OPERA Control is active. (maximum of 2000 characters).

- i. **Manage Translation:** Click to open the multi-language descriptions screen and configure long information for each language.
  - ii. Click **Insert Template Text** to insert the Long Information template.
6. Click **Save**.

## Advanced Dynamic Base Rates

### Prerequisites for Advanced Dynamic Base Rates

#### Overview

The Advanced Dynamic Base Rate enables you to create a rate derived from another rate (a Base Rate) or derived from both a Base Rate and a BAR Based rate. This rate structure provides flexibility by enabling you to configure the rate as either a flat amount or a percentage. In addition, you can choose to apply the BAR rate amount to the Advanced Dynamic Rate calculation and you can optionally select a rounding method. Advanced Dynamic Base Rate also offers the ability to compare the rate configuration details with other Base Rate amounts.

#### Example 13-3 Example 1

- ADBR (Advanced Dynamic Base rate) = to be determined
- BASE1 (BASE rate) = \$100.00
- BAR1 (BAR rate) = \$80.00

Rate configuration for ADBR with only **Apply Bar** selected:

**Table 13-12 Rate Code Setup**

Base Amount	BAR Base Amount	Apply BAR	Compare with Rate Details
\$10.00 (Flat)	10%	Yes	No

**Table 13-13 Look To Book Rate Availability Result**

Rate Code	Nights	Adults	Amount
ADBR	1	1	\$88.00

The BAR (BAR1) rate amount (with 10% added) was returned for the ADBR rate amount.

Rate configuration for ADBR with both **Apply BAR** and **Compare with Rate Details** options selected:

**Table 13-14 Rate Code Setup**

Base Amount	BAR Base Amount	Apply BAR	Compare with Rate Details
\$10.00 (Flat)	10%	Yes	Yes

**Table 13-15 Look To Book Rate Availability Result**

Rate Code	Nights	Adults	Amount
ADBR	1	1	\$88.00

The lower of the two rate amounts (between the BASE1 and BAR1) was returned for the ADBR rate code.

**Example 13-4 Example 2**

- ADBR (Advanced Dynamic Base rate) = to be determined
- BASE1 (BASE rate) = \$50.00
- BAR1 (BAR rate) = \$80.00

Rate configuration for ADBR with both **Apply BAR** and **Compare with Rate Details** options selected:

**Table 13-16 Rate Code Setup**

Base Amount	BAR Base Amount	Apply BAR	Compare with Rate Details
\$10.00 (Flat)	10%	Yes	Yes

**Table 13-17 Look To Book Rate Availability Result**

Rate Code	Nights	Adults	Amount
ADBR	1	1	\$60.00

The BASE (BASE1) rate amount (with \$10.00 added) was returned for the ADBR rate amount. This was the lower of the two rate amounts (between the BASE1 and BAR1).

Rate configuration for ADBR with only **Apply BAR** selected:

**Table 13-18 Rate Code Setup**

Base Amount	BAR Base Amount	Apply BAR	Compare with Rate Details
\$10.00 (Flat)	10%	Yes	No

**Table 13-19 Look To Book Rate Availability Result**

Rate Code	Nights	Adults	Amount
ADBR	1	1	\$88.00

The BAR (BAR1) rate amount with 10% added was returned for the ADBR rate amount.

## About Best Available Rates

### Prerequisites: Best Available Rates (BAR)

Best available rates is a pricing model, commonly used to provide the lowest possible rate for a room type on a given date. OPERA Cloud offers three types of Best Available Rate. [The Best Available Rate Type OPERA Control](#) determines the Best Available Rate handling for your property.

- **Best Available Rates by Day** — (Not supported by GDS or OWS.) You can schedule up to 25 rate codes per day and room type. For more information, see [Configuring Best Available Rate Schedules](#). Look to Book returns four best available rate codes for the stay date, by room type.

 **Note:**

If this setting is selected, you cannot activate the Dynamic Best Available Rates (DBAR) OPERA Control.

- **Best Available Rates by LOS** — This type of Best Available Rate allows you to schedule one rate code per length of stay per day. For more information, see [Configuring Best Available Rate Schedules](#). Look to Book returns one rate code for the stay date and length of stay.

 **Note:**

If this setting is selected, you cannot activate the Dynamic Best Available Rate (DBAR) OPERA Control.

- **Best BAR by Day ((BBAR)** — (Supported by GDS and OWS). You can set up multiple Best Best Available Rate by Day rate codes via selection of the **Best Available Rate** check box in the [rate code type](#) panel. Out of all Best Available Rates setup, only the best rate code (lowest price) is displayed in Look to Book Sales screen. You can also setup base rate codes with pricing derived from BBAR

 **Note:**

When booking reservations in OPERA Cloud using Best Best Available Rate (Best BAR) or a dependent rate (derived from BBAR), OPERA Cloud will record the BAR rate code and the amount of the first night for tracking purposes.

## Prerequisites for Best Available Rates (BAR)

### OPERA Controls

**Group:** Rate Management

**Functions:** Best Available Rates

### Parameters:

- Rate Groups
- Default to Highest BAR

**Settings:** Best Available Rate Type

## Dynamic BAR Based Rates

### Prerequisites for Dynamic BAR Based Rates

Dynamic BAR Based Rates are rate codes dependent on and derived from Dynamic Best Available Rates (DBAR). For example, you could configure a corporate, negotiated rate called ABC and base it on the DBAR rate code of DBAR2. When you perform a rate search for guests with the negotiated ABC rate attached to their profile, using the ABC rate code and Dynamic BAR as search filters, the ABC rate is automatically returned with the discounted amount for the DBAR2 rate code according to the negotiated rate agreement.

Rates for the Dynamic BAR Based rate are calculated dynamically and are not entered in the Rate Code Configuration. When the **Dynamic BAR Based** option is selected under the Rate Code Type in the Rate Code Configuration, OPERA Cloud compares against the Best Available BAR for the stay dates checked during the rate availability search. An internal condition is used to compare rate details between the Dynamic BAR Based rate set and the calculated rate value. The lower of the two values is returned in the rate search results.

### Example 13-5 Example

- If the Dynamic Best Available Rates (DBAR) rate set has a rate detail for 1 adult at \$100 and the calculated value from the DBAR rate is \$120, it returns \$100.
- If the DBAR based rate set has a rate detail for 1 adult at \$150, and the calculated value from the DBAR rate is \$120, it returns \$120.

### General Guidelines

The following guidelines apply when using Dynamic BAR Based rates:

- DBAR rate codes serve as the base rates for Dynamic BAR Based rates.
- Negotiated rates can be added to rate codes that are BAR or BAR Based.

### Process Overview

- DBAR rate codes must serve as the base rates and should already be configured for your property.
- Create a new rate code for your property derived from the DBAR rate code. Configure this new rate code from the **Administration** menu by selecting **Financial**, selecting **Rate Management**, and then selecting **Rate Codes**.
- Select the **Dynamic BAR Based** option under the Rate Code Type section on the Rate Code Configuration screen.

### Dynamic Best Available Rates (DBAR)

Dynamic Best Available Rates (DBAR) enable you to manage and provide the lowest rates per day to customers at your property. When DBAR is configured, the lowest prices appear based on the availability for stay dates, room type, and length of stay. Additionally, reduced rates derived from these DBAR rate codes can also be configured for different customer types, such as corporate guests or guests belonging to a membership program. These reduced rates are calculated dynamically and appear when guests with these rate codes attached to their profiles inquire about availability.

During the DBAR configuration process, you create rate codes and assign rate levels to them. Levels are assigned for various lengths of stay (LOS). For example, a rate code might be available for an arrival date (Dec. 31) for one night. This could be assigned Level 1. A different rate level, of Level 2, could be assigned to another rate code for the same arrival date (Dec. 31) for a length of stay of two nights. Another rate level, designated as Level 4, could be assigned to another rate code for the arrival date of Dec. 31, but for a length of stay of four nights. When you search for an arrival date, room type, and length of stay at your property, the lowest rates appear in the search results, according to the established Rate Level with the rate code.

Rate codes can also be classified together and configured into groups. For example, you can configure groups for rate codes associated with the government, a corporation, or for rates calculated dynamically with DBAR functionality. Each rate code can be attached to only one group regardless of the property. Also, a Rate Level and Rate Group combination is unique, whereas no two Rate Codes can have the same Rate Group and Level defined.

**Example 13-6 Example of DBAR Rate Codes and Dependent Rate Codes****Table 13-20 DBAR Rate Codes and Dependent Rate Codes (Dynamic BAR Based rate codes)**

Beginning Date	Length of Stay	Room Type	Level	Group	DBAR Rate Code	DBAR Rate Amount	Dependent Rate Code (-10% based on DBAR)	Dependent Rate Amount (-10% based on DBAR amount)
1/19	1	A1B	1	DBAR	DBAR1	700.00	CORP_RA TE	630.00
1/19	2	A1B	2	DBAR	DBAR2	800.00	CORP_RA TE	720.00
1/19	3	A1B	3	DBAR	DBAR3	500.00	CORP_RA TE	450.00
1/19	4	A1B	4	DBAR	DBAR4	300.00	CORP_RA TE	270.00

**Prerequisites for Dynamic BAR Based Rates****OPERA Controls****Group:** Rate Management**Functions:** Best Available Rates

- Best Available Rate Type

**BAR Based Rates**

Best Available Rates (BAR) are the best rates available per room type for a property. You can create a rate code that is a BAR type and use it as a base code on which to base other rate codes. These dependent rate codes derived from the BAR rate code are called BAR Based rates.

**Prerequisites for BAR Based Rates****General Guidelines**

The following guidelines apply when using BAR Based rates:

- A rate code marked as BAR Based must be of the same currency as the rate codes marked as BAR.
- Negotiated rates can be added to rate codes that are BAR or BAR Based.
- A rate code marked as BAR Based cannot also be marked as a BAR rate code.
- A rate code cannot be selected as a BAR Based rate and at the same time be selected as a Dynamic Base Rate's rate code.

- A rate code cannot be selected as a BAR Based rate and at the same time be selected as a Advanced Dynamic Base Rate's rate code.
- If the **Show Add Separate Line Pkgs to Rates on Rate Query** application parameter in the Rate Management group is **On**, OPERA Cloud ignores packages configured as Add Rate Separate Line when calculating BAR Based rate codes. For example, BAR3 is configured for 100. BAR3 has Add Rate Separate Line packages totaling 65. WEBDEAL is configured as -10% of BAR with its own Add Rate Separate Line packages totaling 50. When running an availability check through the Look to Book screen, WEBDEAL is 140 (calculated as 100 - 10% +50). The 65 Add Rate Separate Line package on BAR3 is ignored.
- When you book reservations using the Best BAR or a dependent rate (derived from the Best BAR), OPERA Cloud records the BAR rate code and the amount of the first night for tracking purposes.

### Process Overview

BAR rate codes serve as the base rates for your BAR Based rates and should already be configured with the **BAR** option selected under the Rate Code Type on the Rate Code Configuration screen.

Once you have BAR rate codes configured, create a new rate code for your property derived from the Best BAR rate code. Configure this new rate code from the **Administration** menu by selecting **Financial**, selecting **Rate Management**, and then selecting **Rate Codes**. When setting up the rate code, you must verify the **Best Available Rate** option is not selected under the Rate Code Type. Instead, select the **BAR Based** option, which is available when the **Best Available Rate Type** setting is **Best BAR By Day**. With this setting, OPERA Cloud determines the Best BAR rate code and amount based on the stay dates selected.

Under Rate Code Type, enter the amount you want added or deducted from any BAR Based rate in the **Amount** field.

For example, when a profile has a corporate rate associated with it and you want to deduct 25.00 off the lowest, Best BAR price, you would enter -25. Select if this is based on a **Flat** rate or a **Percentage**. To apply rounding, select the method in the **Rounding** field. During the rate availability search, the system checks for the Best BAR rate code for the room type and stay dates. It then calculates and shows the price of that rate code, based on the search criteria you entered. For example, assume the Best BAR price for the arrival date and the room type is 125.00. With the corporate rate now configured as BAR Based, the system automatically deducts 25.00 from the Best BAR price for that guest profile and calculates the price for the room at 100.00.

## Prerequisites for BAR Based Rates

### OPERA Controls

**Functions:** Best Available Rates

- Best Available Rate Type

## Configuring Rate Codes

Prior to creating rate codes ensure you have completed the configuration of

- [Market Codes](#)
- [Source Codes](#)
- [Rate Categories](#)
- [Transaction Codes](#)
- [Room Types](#)
- [Display Sets](#)

For package rate codes ensure you have also completed the configuration of

- [Package Codes](#)
- [Package Groups](#)

Various types of rates can be configured

Rate Codes	Description
Standard Rate	Enabled the entry of pricing schedules per seasons or date range for each room type.
Daily Rates	Enables entry of price per day for each room type. A maximum of 50 daily rate / advanced daily rate codes can be configured per property. See <a href="#">Configuring Daily Rates</a>
Advanced Daily Base	Advanced Daily Rate behaves like a regular Daily Rate except that the pricing schedule is derived from this Daily Base rate. Reservations made for an Advanced Daily rate have rate amounts that can vary for each night of the stay. Rate amounts are calculated based on the Daily Rate level available for each stay night. A maximum of 50 daily rates / advanced daily rate codes can be configured per property. See <a href="#">Configuring Advanced Daily Rates</a>
Tiered Rates	Tiered Rates enabled the configuration of pricing schedules per length of stay for each room type. See <a href="#">Working with Tiered Rates</a>
Base (Derived) Rate	Enables the pricing schedule to be derived from another (base) rate code. Any changes in the base rate's pricing schedule will automatically affect pricing on all derived rate codes. See <a href="#">Base Rates</a>
Dynamic Base (Derived) Rate	Dynamic Base Rates calculate and display derived pricing during a rate and availability search. Dynamic Base Rates can be used with both standard rate pricing and the calculated dynamic base rate pricing simultaneously. The <b>Compare with Rate Details</b> option can be selected to force OPERA Cloud to compare the static rate code pricing and the dynamically calculated pricing and display the lowest price per day during the availability search in Look to Book. See <a href="#">Dynamic Base Rates</a>

Rate Codes	Description
Best Available Rate (BAR)	Allows configuration of rate codes that are selected for Best Available Rate comparison. There are three types of BAR rates that can be set up in OPERA Cloud: <ul style="list-style-type: none"> <li>• Best Available Rates by Day</li> <li>• Best Available Rates by LOS -</li> <li>• Best BAR by Day</li> </ul> See <a href="#">Best Available Rates (BAR)</a>
Best Available Rate Based Rate	Allows for configuration of pricing schedules based on the Best Available Rate . See <a href="#">BAR Based Rates</a>
Advanced Dynamic Base Rate	An Advanced Dynamic Base Rate allows you to create a rate based on another rate (a base rate) or based on both a base rate and a BAR Based rate. This rate structure provides greater flexibility on the rate details level by allowing you to configure the rate as either a flat amount or a percentage. It offers the ability to compare Rate Details with other Base Rate amounts. See <a href="#">Advanced Dynamic Base Rates</a>

### Adding Rate Codes

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Click **New** and complete the following
  - a. **Rate Code Definition**. See [Configuring Rate Code Definition](#)
  - b. **Financial Details**. See [Configuring Rate Code Financial Details](#)
  - c. **Rate Code Type**. See [Configuring Rate Code Type](#)
  - d. **Rate Sell Controls and Distribution**. See [Configuring Rate Sell Controls and Distribution](#).
  - e. Packages
    - i. Click **New** to add package items to include in the rate code.
      - i. Select one or more package items or package groups.
      - ii. Click **Attach**.
      - iii. Click vertical ellipsis and select **Edit** to update a package item.
      - iv. Click vertical ellipsis and select **Delete** to delete a package item.
      - v. See [Configuring Rate Code Package Inclusions](#)
3. Click **Save** or **Save and Goto Presentation** to continue with the rate code configuration and add a pricing schedule.

### Editing Rate Codes

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.

 **Note:**

All rate code detail links are available to view and update related rate code details. See the Rate Code Detail Links table below.

**Table 13-21 Rate Code Detail Links**

Rate Code Details	Profile Details	Billing
<a href="#">Approval Notes</a>	<a href="#">Negotiated Profiles</a>	<a href="#">Financial Details</a>
<a href="#">Pricing Schedule</a>	<a href="#">Restrictions</a>	<a href="#">Routing Instructions</a>
<a href="#">Rate Code Definition</a>		
<a href="#">Rate Code Type</a>		
<a href="#">Rate Access Exclusion</a>		
<a href="#">Rate Code Packages</a>		
<a href="#">Rate Controls and Distribution</a>		
<a href="#">Rate Code Information</a>		

**Deleting Rate Codes**

A rate code cannot be deleted if any of the following apply

- The rate code is a base rate which has at least one derived rate code. Base rates are available when the Base Rates OPERA Control is active.
  - The rate code is selected in a reservation for a future date, a reservation that is Due In or In House, or a reservation that is checked out on the current business date.
  - The rate code is selected in a block with an end date greater than the current business date.
1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
  2. Enter search criteria and click **Search**.
  3. From search results, select the rate code and click vertical ellipsis **Actions** menu, select **Delete**.
  4. Click **Delete** to confirm.

## Configuring Rate Code Type

**Editing Rate Code Type**

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation page click the **Rate Code Type** details link.
5. Click **Edit**

- a. **Standard Rate.** Select to configure a standard rate code with pricing schedules by date range per room type.
  - b. **Best Available Rate.** Allows for configuration of rate codes that are selected for Best Available Rate comparison. (Available when the Best Available Rate OPERA Control is active)
  - c. **Daily Rates.** Select the configure a Daily Rate code. Allows for configuration of rate amounts per day. (Available when the Daily Rates OPERA Control is active)
  - d. **Advanced Daily Base.** Select this check box if the rate is an Advanced Daily Base rate. In the pricing schedule each Advanced Daily Base rate will be configured as a separate rate level. Using the Advanced Daily Base rate, you can configure as many rate levels as needed. When Advanced Daily Rates are configured, these will use these Advanced Daily Base rate levels as its base rates. (Available when the Advance Daily Rates OPERA Control is active)
  - e. **Advance Daily Rate.** An Advanced Daily Rate behaves like a regular Daily Rate with the exception that its pricing schedule is populated by indicating the Daily Base Rate for each date instead of manually entering the pricing schedule. (Available when the Advance Daily Rates OPERA Control is active)
  - f. **Tiered Rate.** Allows for configuration of rate amounts based on length of stay periods. (Available when the Rate Tiers OPERA Control is active).
  - g. **Base Rate.** Allows for configuration of rate amounts derived from another rate code (Available when the Base Rates OPERA Control is active)
  - h. **Best Available Rate Based Rate.** Allows for configuration of rate amounts derived from the Best Available Rate (Available when the Best Available Rates OPERA Control is active)
  - i. **Dynamic Base Rate.** Allows for configuration of rate amounts as base and standard rates. It provides the ability to compare between the two for the lowest rate to be displayed in the sales screen. (Available when the Dynamic Base Rate OPERA Control is active).
  - j. **Advanced Dynamic Base Rate.** Allows for configuration of rate amounts comprised of base rate or standard rates by date range. (Available when the Advanced Dynamic Base Rate OPERA Control is active).
6. Click **Save**.

## Configuring Rate Code Financial Details

### Editing Rate Code Financial Details

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. Click **Financial Details** and complete the following
  - a. **Transaction Code.** Select the accommodation revenue transaction code.

- i. When the Revenue Posting by Room Type/Room Class OPERA Control is active select an accommodation transaction code per room type. See [Configuring Multi Transaction Code Rate Codes](#).
  - ii. **Tax (Generate) Inclusive.** Click the indicate that the pricing schedule rate amounts are inclusive of taxes. If unchecked taxes are posted additional to the price.
- b. **Package Transaction Code.** Select the package wrapper transaction code ; if configuring a package rate code (inclusive of package items)
- c. **Commission Code.** Select a commission code from the list. This commission code overrides the commission code selected in a Travel Agent profile.
- d. **Commission %.** Enter a commission percentage (up to 99.99) which is used by GDS systems to determine the commission that is applicable when booking this rate code. (This value has no effect on the calculation of commissions in OPERA Cloud)
- e. **Currency Code.** Select a currency code from the list. Pricing schedules will be loaded in this currency. (Available when the Ability to Quote Rates in Foreign Currencies OPERA Control is active)
  - i. **Exchange Type.** Select an exchange type from the list (Available when alternate currency code is selected) to determine what exchange rate should be used for accommodation charges
    - i. **Fixed at Check In.** Exchange rate fixed at check in date
    - ii. **Fixed at Reservation.** Exchange rate fixed at reservation creation date
    - iii. **Current Date.** Exchange rate for current business date / posting date
    - iv. **Fixed at Block.** Exchange rate fixed at date when block is opened for pickup.
- f. **Folio Text.** Enter text to display on guest folio for rate code posting. Text entered here overrides the accommodation transaction code description.
  - i. **Manage Translations.** Click to add translation for folio text for when generating folio in the profile language.
- g. **Deposit Maturity.** Select a value from the list to indicate when any deposit payment should transfer to guest ledger. (Available when the Advance Deposit Maturity and Allocation OPERA Control is active)
- h. **Print Rate.** Select to default the Print Rate checkbox in reservations Stay Details. The reservation Print Rate flag controls the output of the rate amount on stationery such as confirmations and registration card.
- i. **Suppress Rate.** Select to have the rate amount displayed with strike-through formatting in OPERA Cloud, for example ~~US300.00~~. Used for confidential rates that must not be quoted to a caller. Available when the Suppress Rate OPERA Control is active.
- j. **Discount.** Select to allow the rate amount to be discounted on a reservation on ad-hoc basis. Discount Amount, Discount Percentage and Discount Reason fields are enabled in reservation stay details when this rate code is selected.
- k. **Day Use.** Select to indicate the rate code is for 0 night stays.
- l. **Complimentary.** Select to indicate the rate code is for complimentary stays. OPERA Cloud will track reservations booked with a complimentary rate for statistical purposes.

- m. **House Use.** Select to indicate the rate code is for internal/administration stays. OPERA Cloud will track reservations booked with a house use rate for statistical purposes.
  - n. **Negotiated.** Select checkbox to indicate that this rate code is only available as a negotiated rate that must be associated with a guest, company, source or travel agent profile. Available when the Negotiated Rates OPERA Control is active. For more information, see [Managing Profile Negotiated Rates](#)
  - o. **Tax Inclusive:** Select check box to indicate the rate amounts (pricing schedule) setup for this rate is inclusive of taxes.
  - p. **Membership:** Select check box to indicate this rate code can be selected in [Membership Rate Groups](#) for reference in membership point calculation rules
  - q. **Day Type.** Select to enable the day type pricing schedule adjustments. (Available when the Day Types OPERA Control is active). See [Configuring Day Types](#)
5. Click **Save**.

## Configuring Rate Code Negotiated Profiles

### Adding a Profile to a Negotiated Rate Code

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation page click the **Negotiated Profiles** details link.
5. Click **New**.
  - a. **Name.** Enter Guest or Sales Account name and click  to search
  - b. **Start Date.** Enter the start date of the negotiated rate
  - c. **End Date.** Enter the end date of the negotiated rate
  - d. **Sequence.** Enter a display sequence
  - e. **Profile Discounts.** (Available when the Profile Discounts OPERA Control is active)
    - i. Click vertical ellipsis and select **Add**
      - i. **Start Date:** The start date of the rate discount
      - ii. **End Date:** The end date of the rate discount
      - iii. **Amount:** Enter the discount amount or percentage
      - iv. **Amount/Discount:** Flat or Percentage
      - v. **Days of Week:** Select the days of the week where the discount is applicable within the date range
    - ii. Click **Save**.
6. Click **Save**.

### Editing a Profile on a Negotiated Rate Code

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation page click the **Negotiated Profiles** details link.
5. Enter search criteria and click **Search**
6. Select the profile and click vertical ellipsis and select **Edit**.
7. Update details
8. Click **Save**.

### Deleting a Profile on a Negotiated Rate Code

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation page click the **Negotiated Profiles** details link.
5. Enter search criteria and click **Search**.
6. Select the profile and click vertical ellipsis and select **Delete**.
7. Click **Delete** to confirm

## Managing Rate Code Approval

### Prerequisites for Managing Rate Code Approval

Rate Code Approval is a workflow for the review, approval and "publication" of rate codes.

Users are able to create and edit rate codes (with packages, pricing schedules, restrictions, channel, etc.) and another user, with rate code approval authority, must review the new / changed rate code configuration and either approve or reject the changes.

The result is that rate codes in UNAPPROVED, CHANGED UNAPPROVED or REJECTED status are not displayed or available for sale in OPERA Cloud (directly or via Availability requests to OPERA Cloud).

Business Events are only triggered for rate codes when changed to APPROVED status or updated once in APPROVED status.

A user with the Rate Code Approval task assigned to their roles is able to configure rate codes immediately in APPROVED status.

A user without the Rate Code Approval task assigned to their roles can:

- Create rate codes in **New Unapproved** status.
- Edit **Unapproved** or **Rejected** rate codes.
- Edit **Approved** rate codes - status will update to **Changed Unapproved**.

- Create, edit or delete approval notes; this can be a free form notes to act as a communication method between rate creators and users with authority to approve the rate.
- Submit changes on **Rejected** rate codes for approval.

### Approving Rate Codes

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. **Property:** Enter or select the Property.
3. **Approval Status.** Select a approval status from the list (New Unapproved, Changed Unapproved).
4. Enter other criteria.
5. Click **Search**.
6. Select the rate code, click **Vertical Ellipsis** and select **Edit**.
7. Click **I Want to...** and select **Approve Rate Code**.
8. To add Approval notes, see **Managing Approval Notes** below.

### Rejecting Rate Codes

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. **Property:** Enter or select the Property.
3. **Approval Status.** Select a approval status from the list (New Unapproved, Changed Unapproved).
4. Enter other criteria.
5. Click **Search**.
6. Select the rate code, click **Vertical Ellipsis** and select **Edit**.
7. Click **I Want to...** and select **Reject Rate Code**.
8. To add Approval notes, see **Managing Approval Notes** below.

### Updating Rejected Rate Codes

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. **Property:** Enter or select the Property.
3. **Approval Status.** Select a approval status from the list (New Unapproved, Changed Unapproved).
4. Enter other criteria.
5. Click **Search**.
6. Select the rate code, click **Vertical Ellipsis** and select **Edit**.
7. Update the configuration of the rate code
8. To add Approval notes, see **Managing Approval Notes** below.
9. Click **Save**.

## Managing Approval Notes

### Adding Approval Notes

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. **Property**: Enter or select the Property.
3. **Approval Status**. Select a approval status from the list (New Unapproved, Changed Unapproved).
4. Enter other criteria.
5. Click **Search**.
6. Select the rate code, click **Vertical Ellipsis** and select **Edit**.
7. Click **Approval Notes**.
8. Click **New** and enter approval notes.
9. Click **Save** or Click **Save and Continue** to add another note.

### Editing Approval Notes

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. **Property**: Enter or select the Property.
3. **Approval Status**. Select a approval status from the list (New Unapproved, Changed Unapproved).
4. Enter other criteria.
5. Click **Search**.
6. Select the rate code, click **Vertical Ellipsis** and select **Edit**.
7. Click **Approval Notes**.
8. Select the approval note, click **Vertical Ellipsis** and select **Edit**.
9. Update notes.
10. Click **Save**.

### Deleting Approval Notes

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. **Property**: Enter or select the Property.
3. **Approval Status**. Select a approval status from the list (New Unapproved, Changed Unapproved).
4. Enter other criteria.
5. Click **Search**.
6. Select the rate code, click **Vertical Ellipsis** and select **Delete**.
7. Click **Delete** to confirm.

## Prerequisites for Managing Rate Code Approval

### OPERA Controls

**Group:** Rate Management

**Functions:** Rate Code Approval

**Group:** Financial Admin

**Tasks:** Rate Management

Rate Codes

- Approve Rate Codes

## Configuring Rate Code Restrictions

### Prerequisites for Rate Code Restrictions

Rate Code restrictions allow you to setup restrictions for the availability of a rate code based on a date range, specific days of the week, restriction type, and inventory level. Rate code restrictions can also be managed through [Manage Rate Restrictions](#) or automatically [using rate strategy](#) rules.

### Adding Rate Code Restrictions

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code , click the vertical ellipsis and select **Edit**.
4. On the Rate Code presentation page click the **Restrictions** link.
5. Click **New** and complete the following:
  - a. **Start Date:** Enter or select restriction start date. This date cannot be greater than five years from the current business date.
  - b. **End Date:** Enter or select the restriction end date. This date cannot be greater than five years from the current business date.
  - c. **Days of the Week:** All check boxes are pre-selected by default. Click the check box to remove the check mark for the days you do not want the restriction to be applied. For example, if a date range is for the entire month, but you do not want it to apply on Saturdays and Sundays, remove the check marks from the Saturday and Sunday check boxes.
  - d. **Restriction Type:** Select a restriction type to apply to the rate code. The restriction types available depend on the Restriction Types OPERA Control..
    - i. For more information, see [Restrictions](#).
  - e. **Inventory:** Select the inventory level for the rate restriction.
    - i. **House:** Select to indicate that the restriction applies at the house (property) level.

- ii. **Room Class:** Select the room classes from list to which this restriction applies. (Available when the Room Class OPERA Control is active).
  - iii. **Room Types:** Select the room types from list to which this restriction applies.
6. Click **Save** or **Save and Continue** to save and create another rate restriction detail.

### Editing Rate Code Restrictions

#### Note:

Only dates and days of the week can be modified. Delete the restriction and add new restriction if other changes are needed.

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code record, click the row level vertical ellipsis **Actions** menu, and select **Edit**.
4. On the Rate Code Configuration screen in the Rate Code Overview section, click the **Restrictions** link.
5. Select the restriction in the calendar or list view.
6. Click vertical ellipsis and select **View**.
7. Update details.
8. Click **Save**.

### Deleting Rate Code Restrictions

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code record, click the row level vertical ellipsis **Actions** menu, and select **Delete**.
4. On the Rate Code Configuration screen in the Rate Code Overview section, click the **Restrictions** link.
5. Select the restriction in the calendar or list view.
6. Update details.
7. Click vertical ellipsis and select **Delete**.
8. Click **Delete** to confirm.

### Clearing All Rate Code Restrictions for Selected Date

To clear all restrictions for a specific date:

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.

3. From search results, select the rate code, click the vertical ellipsis and select **Edit**.
4. On the Rate Code presentation page click the **Restrictions** link.
5. Select the date in the calendar or list view.
6. Click **Vertical Ellipsis** click **Clear All**.
7. Confirm by clicking Clear All again in the confirmation dialog.

#### View Rate Code Restrictions Changes

View a log of all changes to rate restrictions:

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code, click the vertical ellipsis and select **Edit**.
4. On the Rate Code presentation page click the **Restrictions** link.
5. Click the vertical ellipsis and select **Changes Log**.
6. Enter search criteria and click **Search**.

## Prerequisites for Rate Code Restrictions

### OPERA Controls

**Group:** Inventory Management

**Parameters:** Restrictions

- Setting: Rate Category Restrictions
- Setting: Rate Code Restrictions
- Setting: Restriction Types

## Configuring Rate Code Pricing Schedules

Pricing Schedules define the price for one or more room types for a specified season or date range. You can also select one or more package items for a pricing schedule when a special package entitlement for specific room types / date ranges apply. For example - you may wish to include Champagne for reservations in the Executive Suite only - the package item is therefore added at the pricing schedule level for the executive suite and not as a [rate code inclusion](#) for all room types.

You can also view the pricing schedules for [externally protected rate code](#) these are rate codes created and managed in an external solution integrated with OPERA Cloud.

When the Package Pricing and Availability Attributes OPERA Control is active the **Minimum Nights**, **Maximum Nights**, **Minimum Guests** and **Max Guests** configured in the package are displayed.

### Adding Rate Code Pricing Schedule

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select a rate code and click the vertical ellipsis **Actions** menu and select **Edit**.
4. On the **Rate Code** presentation screen, click **Pricing Schedules**.
5. On the **Pricing Schedules** panel, click **Search** to view the existing **Pricing Schedules**.
6. Click **New** to enter new pricing schedule enter the following details as mentioned in the **Table - Manage Pricing Schedule Fields and Description**.
7. If applicable, in the **Packages** panel click **Add** to search for an existing **Package Code** to add to this specific pricing schedule. Select one or more package code from the list and click **Attach** to add the package items to the price schedule.

 **Note:**

If a package element has already been added as a [rate code inclusion](#) and the same package element is added to a rate code pricing schedule, the nett room rate would then adjust for the price of two package elements (same package item sold twice on the rate). The packages visible in the list are those packages with a start and end date that encompass the dates for the pricing schedule being created.

### Editing Rate Code Pricing Schedule

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select a rate code and click the vertical ellipsis **Actions** menu and select **Edit**.
4. On the **Rate Code** presentation screen, click **Pricing Schedules**.
5. On the **Pricing Schedules** panel, click **Search** to view the existing **Pricing Schedules**.
6. Select the schedule to update and click the vertical ellipsis **Actions** menu, then click **Edit**.
7. Update pricing schedule per the **Table** below.
8. Click **Save**.

### Viewing Rate Code Pricing Schedules

To view the pricing of externally protected rate codes

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.

3. In the search results, select a rate code and click the vertical ellipsis **Actions** menu and select **Edit**.
4. On the Rate Code presentation page, click **Pricing Schedules**.
5. Enter search criteria then click **Search**.
6. Select the schedule to view then click the vertical ellipsis **Actions** menu and select **View**.

#### Deleting Rate Code Pricing Schedule

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select a rate code and click the vertical ellipsis **Actions** menu and select **Edit**.
4. On the **Rate Code** presentation screen, click **Pricing Schedules**.
5. On the **Pricing Schedules** panel, click **Search** to view the existing **Pricing Schedules**.
6. Select the schedule to update and click the vertical ellipsis **Actions** menu, then click **Delete**.

#### Copying a Rate Code Pricing Schedule

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select a rate code and click the **Vertical Ellipsis**, click **Edit**.
4. On the **Rate Code** presentation screen, click **Pricing Schedules**.
5. On the **Pricing Schedules** panel, click **Search** to view the existing **Pricing Schedules**.
6. Select the schedule to update and click the vertical ellipsis **Actions** menu, then click **Copy**.
7. Update new schedule per the **Table** below.
8. Click **Save**.

#### Splitting Rate Code Pricing Schedule

Use this option to split a date range from the highlighted pricing schedule date range and then specify separate pricing schedule for the new date range. The **Start Date** of the new pricing schedule must be on or after the start date of the selected pricing schedule and the **End Date** of the new pricing schedule must be on or before the end date of the selected pricing schedule.

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select a rate code and click the vertical ellipsis **Actions** menu and select **Edit**.

4. On the **Rate Code** presentation screen, click **Pricing Schedules**.
5. On the **Pricing Schedules** panel, click **Search** to view the existing **Pricing Schedules**.
6. Select the schedule to update and click the vertical ellipsis **Actions** menu, then click **Split**.
7. Enter **Start Date**, **End Date** and pricing as required per the **Table** below.
8. Click **Save**.

**Table 13-22 Manage Pricing Schedule Fields and Description**

Field	Description
Dates	<p><b>Season Code</b> Season codes are used to define a starting date and ending date for the highlighted pricing schedule. The pricing schedule can only be sold if the arrival and departure dates of a guest's reservation fall within that time frame. If a season is entered, the Start and End Date fields automatically fill with the defined season's begin and end date. If the Season field is not used in a new pricing schedule, you have the ability to change both the start and end dates.</p> <p><b>Start Date</b> Required field. The begin date that the pricing schedule is available. You can change dates for the pricing schedules, provided they do not overlap with another pricing schedule set with any of the same room types. If previously selecting a season code, the Start Date is already populated for you.</p> <p><b>End Date</b> Required field. The ending date that the highlighted pricing schedule is no longer available. If a season code has been entered, the End Date field is already populated for you.</p> <p><b>Days of the Week check boxes</b> Days of the week for which the specified pricing schedule may be sold. Mark the applicable days for each pricing schedule for the dates defined. The check boxes automatically default with each day marked for convenience.</p>
Amounts	The Amounts section is for defining the rate amounts for room types based on the number of adults and/or children occupying the room.
Adults	1 Adult - 5 Adults. Flat or added rate amounts for 1- 5 adults for the highlighted pricing schedule. You can add to the pricing schedule amounts, change, or delete the pricing schedule amounts at any time.
Children in Own Room in cases	<p>OPERA Cloud supports rates for children who are staying in a room with an adult or who are staying in a room alone without an adult. In cases where children are staying in a room with an adult, the Extra Child rate is used to determine the amount added to the adult rate.</p> <ul style="list-style-type: none"> <li>• <b>Children on Own:</b> These rates are for children occupying the room without an adult.</li> <li>• <b>Extra Child:</b> When there are children staying in the room with an adult, the rate for each child is determined by the child's age. The Extra Child rate is also used for children staying in their own room if no applicable "unaccompanied child" rates have been specified. For example, if 4 children are staying in their own room and rates for 1 Child, 2 Children, and 3 Children have been specified, but not a rate for 4 Children, the rate would be the rate for 3 Children plus the rate for 1 Extra Child.</li> </ul>
Attributes	The Attributes section assists the user in noting additional information for the pricing schedule.

**Table 13-22 (Cont.) Manage Pricing Schedule Fields and Description**

Field	Description
Market Code.	Although a market code may have been defined in the Rate Code Definition, the user may have a situation where a different market code is required for a specified period of time. Enter the market code associated with the pricing schedule for the rate code. If a market code is defined on the rate code definition and on the rate schedule, the market code specified on the rate schedule overrides the rate code definition market code when auto-populating a reservation.
Source Code	Source code associated with the pricing schedule for the rate code. If a source code is defined on the rate code definition, the source code on the pricing schedule overrides it.
Room Types	Select the room types that are to be available for the pricing schedule set. The attached room types available for each pricing schedule displayed are automatically populated in this field once selected. You can add a new room type, provided that this room type does not yet have pricing schedules within the specified date range. You can also delete a room type from an existing pricing schedules. The room types available for a pricing schedules are the room types specified on the rate code definition.
Packages	<p>The Packages field is where package elements can be added or deleted to the active pricing schedules. If package elements have already been assigned to the rate code and then another package element has been added to the rate code's pricing schedules set, the room rate would then include the two package elements, provided the reservation stay dates fell into the date range for that pricing schedule set.</p> <p>The packages visible are those packages for which a package start and end date that encompass the currently highlighted pricing schedule for the rate code.</p> <p>For same day or next day packages, you cannot delete a package that is currently being used by an inhouse reservation from the Pricing Schedule panel.</p>

## Configuring Rate Code Sell Controls and Distribution

The available sell controls are based on the [Inventory Management OPERA Controls](#) .

### Editing Rate Code Sell Controls and Distribution

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click the **vertical ellipsis**, select **Edit**.
4. On the Rate Code, presentation page click the **Rate Controls** details link.

5. Click **Edit**.
  - a. **Min Occupancy**: Enter the minimum number of persons required on the reservation for this rate code to be available
  - b. **Max Occupancy**: Enter the maximum number of persons allowed on the reservation for this rate code to be available.

 **Note:**

Minimum and Maximum Occupancy are verified only during the initial booking process; once the reservation has been made, changes to occupancy are not verified against the minimum and maximum occupancy set on the rate code.

- c. **Min Stay Through**: Enter a value to define a minimum length of stay for the rate code.
  - d. **Max Stay Through**: Enter a value to define the maximum length of stay for the rate code.
  - e. **Min Advanced Booking (Days)**: Enter a value to define the minimum number of days in advance of the arrival date a reservation must be booked.
  - f. **Max Advanced Booking (Days)**: Enter a value to define the maximum number of days in advance of the arrival date a reservation must be booked.
  - g. **Rate Floor**: Enter a minimum rate amount for pricing schedules setup for this rate code. (Available when the Rate Floor OPERA Control is active).
  - h. **Yieldable**: Select **Yes** or **No** from the list to determine if the rate code is Yieldable (Available when a Yield Management Integration Cloud Service is active).
    - i. **Yield As**: Select a yieldable rate code. Rate Codes flagged as **Yieldable** and **Yield As**, reference the yieldable status of the rate code selected in this field.
    - ii. **Yield Market**: Some yield systems don't base the hurdle on rate codes but rather on markets, Select the yield market would have that hurdle applied.
    - iii. Refer to [Yield Management](#).
  - i. **Channel Allowed**: Select to make this rate code available through your booking channels. Select **Distribute** to open the Channel Distribution screen and publish the rate.
    - i. **Restriction Update**: Used when integrated with an external channel management System. Select this to send restriction updates to the channel management system in real-time.
    - ii. **Market**: Select the market code to be used for reservations received from the channel management system for this rate code.
    - iii. **Rate Update**: Used when integrated with an external channel management system. Select this to send rate code/pricing schedule updates to the channel management system in real-time.
  - j. **Upload to Oracle Distribution**: Select to indicate this rate code is to upload to Oracle Distribution platform (Available when the Rate Upload To Oracle Distribution OPERA Control is active).
6. Click **Save**.

## Configuring Rate Code Package Inclusions

### Adding Packages to a Rate Code

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation page click the **Rate Code Packages** details link.
5. Click **New** and complete the following
  - a. Enter search criteria and click **Search**.
  - b. Select one or more package items.
  - c. Click **Attach**.

### Editing Packages on a Rate Code

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation page click the **Rate Code Packages** details link.
5. Select the package item, click the vertical ellipsis and select **Edit**.
  - a. **Begin Sell Date**. Enter or select the start date for the rate code package item
  - b. **End Sell Date**. Enter or select the end date for the rate code package item
  - c. **Description**. Enter a description of the package item
  - d. **Posting Attributes**
    - i. See [Configuring Package Code Posting Attributes](#).
  - e. **Package Pricing Exceptions**
    - i. Click **New** and complete the following
      - i. **Start Date**. Enter or select a start date for the pricing.
      - ii. **End Date**. Enter or select an end date for the pricing.
      - iii. **Price**. Enter an item price (add to rate or included in rate).
    - ii. Click **Save**.
  - f. Click **Save**.

### Deleting Packages on a Rate Code

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.

4. On the Rate Code presentation page click the **Rate Code Packages** details link.
5. Select the package item, click the vertical ellipsis and select **Delete**.
6. Click **Delete** to confirm

## Configuring Rate Code Access Exclusion

Use Rate Code Access Exclusion to excluded users at selected Hub(s) from managing reservations with this rate code.

### Adding Rate Code Access Exclusion

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation page click the **Rate Access Exclusion** details link.
5. Click **New**.
  - a. **Hub**. Select a hub(s) from the list
  - b. **Begin Date**. Enter or select the start date for this exclusion .
  - c. **End Date**. Enter or select the end date for this exclusion .
  - d. **Hide from Availability Screen**. Select this check box to prevent the rate code from being displayed in Look to Book to users at the select Hub(s). .
  - e. **Allow Modify Reservation**. Select this check box to allow a reservation to be modified by users at the selected Hub location
  - f. **Allow Create Reservation**. Select this check box to allow a reservation to be created by users at the selected Hub location.
  - g. **Allow Cancel Reservation**. Select this check box to allow a reservation to be canceled by users at the selected Hub location.
6. Click **Save**.

### Editing Rate Code Access Exclusion

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation page click the **Rate Access Exclusion** details link.
5. Select the rate code exclusion, click the vertical ellipsis and select **Edit**.
  - a. Update details
  - b. **Inactive**. Select to inactivate this exclusion rule.
6. Click **Save**.

### Deleting Rate Code Access Exclusion

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation page click the **Rate Access Exclusion** details link.
5. Select the rate code exclusion, click the vertical ellipsis and select **Delete**.
6. Click **Delete** to confirm

## Configuring Rate Code Definition

### Editing Rate Code Definition

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation page click the **Rate Definition** details link.
5. Click **Edit** and complete the following:
  - a. **Property**. Enter or select the property
  - b. **Rate Code**. Enter an alpha-numeric code (maximum **12** characters). Rate code is displayed in various areas such as [Look to Book](#), reservation [stay details](#) and daily details and [negotiated rates](#).
  - c. **Start / End Sell Dates**. Enter the date range during which you can make a booking for this rate code; this defines the date range the rate is displayed in [Look to Book](#) (not to be confused with the stay dates / pricing schedule dates)
  - d. **Privileged (Protected) Rate Code**. Select to lock the rate code and prevent users from editing or deleting it. When this check box is selected, various fields in the rate setup will be read-only to users without the Privilege Rates update task granted (Available when the Rate Ownership OPERA Control is active). See [Configuring Rate Code Protection](#)
  - e. **Privileged Rate Restriction**. Select to lock down rate restrictions for this rate code and prevent other users from setting restrictions. Users without the PRIVILEGED RESTRICTIONS UPDATE task granted will not be able to edit or delete rate restrictions for this rate code. Rate codes with this check box selected will not be available for selection from the [Rate Availability](#) and will not be available for selection from the [Rate Code Restrictions](#).
  - f. **Protection Type**. Select a value from the list. See [Rate Code Protection](#)
  - g. **Description**. Enter a name/description of the rate code. The description is displayed in [Look to Book](#) based on the Display Rate Description OPERA Control
  - i. **Manage Translations**. Click to add translation for rate description for when generating confirmation in the profile language

- h. Room Types.** Select one or more room types from the list. This field may already be populated if the **Auto populate** check box is selected in room type configuration. See [Configuring Rooms](#)
  - i. Rate Category.** Select a rate category from the list. See [Configuring Rate Categories](#)
  - j. Market.** Select a default market code for new reservations from the list. See [Configuring Market Codes](#)
  - k. Source.** Select a default source code for new reservations from the list. See [Configuring Source Codes](#)
  - l. Display Set.** Select a display set from the list. See [Configuring Display Sets](#)
  - m. Rate Group:** Select a rate group from the list (Available when the Rate Groups OPERA Control is active).
  - n. Sequence.** Enter a display sequence for the rate code
6. Click **Save**.

## Configuring Rate Code Default Routing Instructions

### [Prerequisites for Rate Code Default Routing Instructions](#)

When a rate code is selected (sold) for a reservation and a profile of the specified profile type (Agent, Company, Contact) is also linked to the reservation, OPERA Cloud can prompt you to attach the rate code default routing instructions to the reservation. If you reply Yes, sales charges for the specified transactions codes are automatically routed to a separate folio window in the reservation Billing screen with the linked profiles selected as the payee.

### Managing Rate Code Default Routing

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation page click the **Routing Instructions** details link.
5. Click **Edit** and complete the following:
  - a. Profile Type:** Select the profile type from list that is eligible to accept charges for the chosen transaction codes
  - b. Instructions:** Select the routing codes or sales charge transaction codes that you want to route to a separate Billing folio window.
    - i.** In the Search panel search for routing codes and/or transaction codes, click **Search**.
    - ii.** Select one or more **Routing Codes** or **Transaction Codes** from the **Available** list and then click **>** to move to the selected panel.
    - iii.** Repeat as needed.
6. Click **Save**.

### Hierarchy of Routing Instructions

It is possible that a reservation could be associated with a source, a contact, an agent, a company, and a rate code, each of which has its own associated routing instructions. In this case, the user will be prompted to select default routing instructions in the following order:

1. The **SOURCE** profile linked to the reservation.
2. The **AGENT** profile linked to the reservation.
3. The **COMPANY** profile linked to the reservation.
4. The **CONTACT** profile linked to the reservation.
5. The **RATE CODE** selected for the reservation.

#### **Hierarchy of Routing Instructions for Profiles with Auto-Populate Routing Selected**

When the Auto Populate check box is selected for the [Profile Default Routing Instructions](#), then the following hierarchy is used:

1. Check the **RATE CODE** has a profile type to be automatically attached to the reservation. If there is then, use this as the routing instruction on the reservation.
2. If not **RATE CODE**, else check if there is an automatic routing instruction attached to the **SOURCE** profile. If there is then, use this as the routing instruction on the reservation.
3. If not **SOURCE**, else check if there is an automatic routing instruction attached to the **AGENT** profile. If there is then, use this as the routing instruction on the reservation.
4. If not **AGENT**, else check if there is an automatic routing instruction attached to the **COMPANY** profile. If there is then, use this as the routing instruction on the reservation.
5. If not **COMPANY**, else check if there is an automatic routing instruction attached to the **CONTACT** profile.
6. If not **CONTACT**, else check if there is a routing instruction on the promotion codes.

## Configuring Multi Transaction Code Rate Codes

### [Prerequisites for Configuring Multi Transaction Code Rate Codes.](#)

The multi-transaction code rate code feature supports the selection of different room revenue transaction codes for individual room types or room classes. The functionality might be useful, for example, in situations where your property is divided into business units, and the lodging revenue for each unit needs to be tracked separately.

 **Note:**

You can use either room classes or room types to associate transaction codes to a specific rate code, but not both simultaneously. Lodging revenue generated on one reservation and routed to another room is posted to the transaction code linked to the room type or room class of the originating reservation and not that of the receiving reservation.

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. If planning to edit an existing rate code, use the search function and select a rate code for editing. From search results, locate a rate code, click the row level vertical ellipsis, and select **Edit**.
3. In the Financials panel, click **Edit** and then select either **Room Type** or **Room Class**.
4. In the Transaction Codes By Room Type / Room Class dialogue:
  - a. Select either **Room Type** or **Room Class**.
  - b. Search and select an accommodation charge transaction code and click **Select**.
  - c. Click **OK**.
  - d. Repeat the transaction code selection for each room type.
5. Click **OK**.
6. You can click Edit Details to change your Room Types or Room Class transaction code selections.
7. Click **Save** if done or click **Save and Go To Presentation**.

## Configuring Daily Rates

### [Prerequisites for Configuring Daily Rates.](#)

Daily rates allow you to change the price schedule for each room type on a daily basis. This allows you to work with rates at a more detailed level by raising or lowering the pricing schedules for future dates "on the fly". Whether or not a yield management system is integrated with OPERA Cloud rates can be managed according to your daily needs. Daily rates can coexist with other traditional date range based rate codes.

Daily Rates can also be used with another feature called Daily Rates with Dynamic Base Rates. Daily Rates with Dynamic Base Rates provide dynamic calculations of daily rates. Through a different set up and configuration, OPERA Cloud makes the pricing schedule calculation and applies the lowest daily rate for the guest's stay, based on availability. For more information, see [Dynamic Base Rates](#).

Up to 50 rate codes can be designated as 'Daily Rates'; the **Daily Rate** rate type checkbox is disabled once 50 rate codes are configured.

### Adding Daily Rate

1. Create daily rate codes by using the [Configuring Rate Codes](#) presentation page.
2. Setup the rate code as a Daily Rate on the Rate Code Type. For more information, see [Configuring Rate Code Type](#)
3. Setup the [Daily Pricing Schedule](#) for each room type.

## Prerequisites for Configuring Daily Rates

- Delete Pricing Schedules
- Edit Rate Code Type

## Configuring Daily Rates Pricing Schedule

Daily Rates pricing can be setup from the current business date for the period defined in the Daily Rates Max Days OPERA Control.

Click **View Options** to select optional fields to display.

### Adding or Updating (Replacing) Daily Rate Pricing by Date Range

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation screen, click **Pricing Schedules**.
5. Click **Set Rate Range**.
  - a. Click **Create / Replace Existing Pricing Schedule**.
  - b. Enter the following details to set the pricing schedule for the room class / room type and date range required.

- c. **Room Class:** Select the room class(es) to which the daily rate pricing is to apply. (Available when the Room Class function is enabled)
  - d. **Room Type(s):** Select the room types to which the daily rate pricing are to apply. All room types selected in the [Rate Code Definition](#) panel, including pseudo room types, are available. NOTE: Included a 0.00 price for the PM pseudo room type in the event the Daily Rate code is sold in business blocks.
  - e. **Start Date:** Enter or select the start date for the pricing update.
  - f. **End Date:** Enter or select the end date for the pricing update.
  - g. **Days of the Week:** Select the days of the week to include within the date range you set. Deselect check boxes to exclude days within the date range.
  - h. **1 Adult:** Enter the 1-person occupancy price you want to apply for the date range.
  - i. **2 Adults:** Enter the 2- person occupancy price you want to apply for the date range.
  - j. **Extra Adult:** Specify an extra adult charge to add to the price for reservations with more than two adults. This extra charge is applied to the booking.
  - k. **Extra Child:** Specify an extra child charge to add to the price for reservations that have a child accompanied by an adult. This extra charge is applied to the booking.
6. Click **Save**.

### Adjusting Daily Rate Pricing by Date Range

To incrementally adjust existing pricing.

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation screen, click **Pricing Schedules**.
5. Click **Set Rate Range**.
  - a. Click **Add / Subtract Existing Pricing Schedule**.
  - b. Enter the following details to set the pricing schedule for the room class / room type and date range required.
    - c. **Room Class:** Select the room class(es) to which the daily rate pricing is to apply. (Available when the Room Class function is enabled)
    - d. **Room Type(s):** Select the room types to which the daily rate pricing are to apply. All room types selected in the Rate Code Definition panel (link: [Configuring Rate Code Definition](#)), including pseudo room types, are available. NOTE: Included a 0.00 price for the PM pseudo room type in the event the Daily Rate code is sold in business blocks.
    - e. **Start Date:** Enter or select the start date for the pricing update.
    - f. **End Date:** Enter or select the end date for the pricing update.
    - g. **Days of the Week:** Select the days of the week to include within the date range you set. Deselect check boxes to exclude days within the date range.
    - h. **1 Adult:** Enter the 1-person occupancy price adjustment you want to apply for the date range.

- i. **2 Adults:** Enter the 2- person occupancy price adjustment you want to apply for the date range.
  - j. **Extra Adult:** Specify an extra adult charge adjustment for reservations with more than two adults. This extra charge is applied to the booking.
  - k. **Extra Child:** Specify an extra child charge adjustment for reservations that have a child accompanied by an adult. This extra charge is applied to the booking.
6. Click **Save**.

### Deleting Daily Rate Pricing Schedules

The Delete Daily Rate Pricing Schedules for a Date Range enables you to apply mass updates to rate amounts based on the room type, room class, days of the week, and date range entered.

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation screen, click **Pricing Schedules**.
5. Click **Set Rate Range**.
  - a. Click **Delete Existing Pricing Schedule**.
  - b. Enter the following details to set the pricing schedule for the room class / room type and date range required.
  - c. **Room Class:** Select the room class(es) to which the daily rate pricing is to apply. (Available when the Room Class function is enabled).
  - d. **Room Type(s):** Select the room types to which the daily rate pricing are to apply. All room types selected in the Rate Code Definition panel (link: [Configuring Rate Code Definition](#)), including pseudo room types, are available. NOTE: Included a 0.00 price for the PM pseudo room type in the event the Daily Rate code is sold in business blocks.
  - e. **Start Date:** Enter or select the start date for the pricing deletion.
  - f. **End Date:** Enter or select the end date for the pricing deletion.
  - g. **Days of the Week:** Select the days of the week to include within the date range you set. Deselect check boxes to exclude days within the date range.
  - h. Click **Save**.

### Adding or Editing Daily Rates Pricing Schedules Inline

The Daily Rate calendar displays all room types and their rate amounts from the Start date you searched. You can update individual rate amounts for a specific date, room type, adult and extra adult, or child directly in the calendar.

Click the navigation arrows < > on the calendar header to advance or revert the dates by seven days.

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.

3. From search results, select the rate code and click vertical ellipsis, select **Edit**.
4. On the Rate Code presentation screen, click **Pricing Schedules**.
5. Enter search criteria then click Search.
6. Click **Edit**.
7. The rate amount fields for **1 Adult**, **2 Adult**, **Extra Adult**, and **Extra Child** are enabled for editing.
8. Enter or update pricing for each date and room type as required.
9. Click **Save**.

## Configuring Best Available Rate Schedules

### Prerequisites for Configuring Best Available Rate Schedules

The Best Available Rates Scheduler allows you to schedule the availability of your Best Available Rates by Day and/or Length of Stay, depending on the setting selected for the Best Available Rate Type OPERA Control.

When you initiate an availability search from [Look To Book](#), the Best Available Rates display set returns the best available rates scheduled for that day and/or length of stay.

#### Note:

Only rate codes configured as Best Available [Rate Code Type](#) are available for scheduling.

### Adding Best Available Rate Schedules

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Best Available Rate Schedule**.
2. Click **New** and complete the following fields:
  - a. **Property**: Enter or select the property.
  - b. **Rate Code**: Enter or select one or more rate codes from the list. Note: You can create multiple rate codes in the same action when the Best Available Rate Type OPERA Control is set to BAR by Day.
  - c. **From Date**: Enter or select the from date of the schedule.
  - d. **To Date**: Enter or select the end date of the schedule (no greater than five years after the From Date).
  - e. **Days of Week**: Select the days of the week for the schedule.
  - f. **Length of Stay**: Select the length of stays for the schedule (enabled when the Best Available Rate Type OPERA Control is set to BAR by Length of Stay).
3. Click **Save** or click **Save and Continue** to add another.

### Deleting a Best Available Rate Schedule

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Best Available Rate Schedule**.
2. Enter search criteria and click **Search**.

3. From the search result, select the **Rate Schedule**, click the **vertical ellipsis**, and select **Delete**.

#### Deleting Multiple Best Available Rate Schedules

1. From the Administration menu, select **Financial**, select **Rate Management**, and then select **Best Available Rate Schedule**.
2. Click **Mass Delete** and complete the following fields:
  - a. **Property**: Enter or select the Property.
  - b. **Rate Code**: Enter or select one or more rate codes from the list.
  - c. **From Date**: Enter or select the from date of the schedule.
  - d. **To Date**: Enter or select the end date of the schedule (no greater than five years after the From Date).
  - e. **Days of Week**: Select the days of the week to be deleted.
  - f. **Length of Stay**: Select the length of stays to be deleted (enabled when the Best Available Rate Type OPERA Control is set to BAR by Length of Stay).
3. Click **Delete**.

### Prerequisites for Configuring Best Available Rate Schedules

### About Occupant Threshold Pricing

#### Prerequisites for Occupant Threshold Pricing

With Occupant Threshold Pricing, fixed values can be setup based on the number of Adults, Children, and/or Occupants for one or more room types. Once any of these variables is exceeded for a reservation, the fixed amount specified is added to the price , per Occupant, Adult, Children or any combination as defined.

The following fields can be used independently of each other or used in combination to define the occupant threshold.

- **Adults**: Enter the maximum threshold number of adults per room and the amount to charge if the adult threshold number is exceeded.

- **Children:** Enter the maximum threshold for the number of children per room and the amount to charge if the child threshold number is exceeded.
- **Occupants:** Enter the maximum threshold number for the number of occupants per room and the amount to charge if the occupancy threshold number is exceeded.

 **Note:**

When the Base Rate Extra Person Calculation OPERA Control is active, Base Rate rules will then apply to the threshold amounts for Base Rates only. From a Dynamic Base Rate and Advance Dynamic Based Rates point of view, threshold amounts will not be included in the calculation when calculating pricing for these two rate types.

### Occupant Threshold Pricing Example

Rate Code : SPECIAL

#### Pricing Schedule

Room Types : APT2, APT3

Adult - \$100.00

Child - \$100.00

#### Occupancy Thresholds

Adults : Threshold = 3 / Amount = \$20.00

Children : Threshold = 3 / Amount = \$10.00

Occupants : Threshold = 4 / Amount = \$50.00

#### Reservation

Nights = 1

Rate Code = SPECIAL

Room Type = APT3

The following lists the prices calculated based on the number of occupants for the reservation :

Adults	Children	Price	Calculation
1	1	\$100.00	Below all thresholds
2	2	\$100.00	Below all thresholds
3	3	\$200.00	Exceeds Occupancy threshold - an additional \$50.00 added for each occupant over the threshold of 4 \$100.00+\$50.00+\$50.00

Adults	Children	Price	Calculation
4	4	\$330.00	<p>Exceeds Adult threshold of 3 - an additional \$20.00 added for every adult over the threshold</p> <p>Exceed Child threshold of 3 - an additional \$10.00 added for every child over the threshold</p> <p>Exceeds Occupancy threshold of 4 - an additional \$50.00 for every occupant over the threshold</p> <p><math>\\$100.00 + \\$20.00 + \\$10.00 + \\$50.00 + \\$50.00 + \\$50.00 + \\$50.00</math></p>
5	5	\$460.00	<p>Exceeds Adult threshold of 3 - an additional \$20.00 added for every adult over the threshold</p> <p>Exceed Child threshold of 3 - an additional \$10.00 added for every child over the threshold</p> <p>Exceeds Occupancy threshold of 4 - an additional \$50.00 for every occupant over the threshold</p> <p><math>\\$100.00 + \\$20.00 + \\$20.00 + \\$10.00 + \\$10.00 + \\$50.00 + \\$50.00 + \\$50.00 + \\$50.00 + \\$50.00</math></p>

**Note:**

When the Child Rates By Defined Buckets OPERA Control is active and prices have been specified for these child age buckets, then these prices will also be included in the calculation of the occupant threshold pricing.

## Prerequisites for Occupant Threshold Pricing

**OPERA Controls**

**Group:** Rates

**Functions:** Occupant Threshold Pricing Method

## Age Buckets

Child Rates By Defined Buckets function lets you set separate rates based on the number of children when the children are staying in the room without an adult. Rates can be set for one child, two children, three children, and four children. When the number of children staying in a room with or without an adult is greater than the number for which separate rates have been specified, an Extra Child rate is applied.

The handling of children rates depends on whether the Rate Management - Child Rates By Defined Buckets OPERA controls is set to Active or Inactive. If the Rate Management - Child Rates By Defined Buckets OPERA controls is set to inactive, the extra child rate is used.

When there are children staying in the room with an adult, the rate for each child is determined by the child's age.

The child age buckets are also used when there are children staying in the room without an adult and the number of children is greater than the number for which "Children on Own" rates are specified. In this case that the rate for any extra children is determined by the age bucket to which the youngest child in the entire group belongs. For example, if four children, ages 3, 4, 7, and 11 years are staying in their own room, and rates for 1 Child, 2 Children, and 3 Children have been specified, but not a rate for 4 Children, the rate would be the rate for 3 Children plus the rate for one child 0-5 years, because the youngest child is 3.

### Excluding Child Age Buckets from Threshold Calculations

When the Rate Management > Occupant Threshold Pricing Method - Child Rates By Defined Buckets OPERA controls are set to Active, child age buckets can be excluded from the occupant threshold calculations. Selecting the Exclude check box next to a child age bucket excludes the bucket from being used to determine if a threshold has been excluded.

Following are some examples on how this functionality works:

#### Example 1

- Reservation Guests: 2 Adults, 3 Children - 1 in each bucket
- Pricing Schedule Value: 1 child free per every 3 children booked per room
- Charges Result: 2 Adults and 2 Children will be charged for the stay, but the child in Rate Bucket 1 will not be charged

#### Example 2

- Reservation Guests: 2 Adults, 8 Children - 1 in Rate Bucket 1, 1 in Rate Bucket 2, 6 in Rate Bucket 3
- Pricing Schedule Value: 1 child free per every 4 children booked per room
- Charges Result: 2 Adults and 6 Children will be charged for the stay, but 1 child in Rate Bucket 1 and 1 child in Rate Bucket 2 will not be charged.

## Rate Code Posting Rhythm

The Posting Rhythm block appears when the Rate Management - Rate Code Posting Rhythm in OPERA controls is Active.

When configuring Package Code, in the Posting Attributes panel, the posting rhythm is used to determine the frequency of the package posting. OPERA Cloud provides a variety of posting rhythms. Most posting rhythms are based off of the actual arrival date of the reservation.

When configuring the Advanced Posting Rhythms, you can configure dates when a guest is eligible for free nights based on the length of stay of the reservation. For example, a promotion may be offered for the month of June where guests who stay 7 nights will receive 2 free nights. Multiple posting rhythms can be defined per rate code, however there cannot be overlapping dates.

## Configuring Posting Rhythms

The posting rhythm feature is not intended for use with daily rates.

## Posting Rhythm and Dependent Rates

The Posting Rhythm field defaults to the Base Rate configuration, when you configure a Dynamic Base Rate or an Advanced Dynamic Base Rate on the Rate Code Configuration screen. You can configure the Posting Rhythm functionality from **Rate Code Configuration > Financial > Posting Rhythms**.

1. On the Rate Code Configuration screen, in the Financial panel, click vertical ellipsis and then click **Edit**.
2. Select the **Posting Rhythm** type from the Posting Rhythm drop down list.
  - a. If you select **Post Every X Nights from the Posting Rhythm** drop down list, entering a number for this specific posting rhythm will define the nights in which to post the discounted rate, giving the guest a promotional discount rate. For example, if you enter a 3 into this field, and the guest is staying for 3 nights, the room charge for the third night will post with the discounted rate on the guest folio.
  - b. If you select **Do Not Post Every X Night**, you can enter a number for the specific posting rhythm which will define how many days a guest must stay before the rate amount will post as 0.00, giving the guest a promotional free night. For example, if you enter a 3 into this field, and the guest is staying for 3 nights, the room charge for the third night will post as 0.00 on the guest folio.
3. Click **Post Packages** check box.

This check box appears when you have defined a value for the Do Not Post Every XX Nights field. Select this check box if, on the "free" night, you want to post charges for packages that are included in the rate code and packages attached to the reservation.

### Note:

When the check box is unchecked, the system will not post any associated packages with this posting rhythm. When this check box is checked, the system will post any associated packages with this posting rhythm. Any associated packages will post as they currently do today it can be inclusively or exclusively.

## Configuring Advanced Rate Code Posting Rhythms

### [Prerequisites for Configuring Advanced Rate Code Posting Rhythms](#)

With the Advanced Rate Code Posting Rhythm OPERA Control enabled you can configure **Buy X Nights, Get Y Nights Free** promotional rate codes.

For each rate you define a required length of stay in order to receive free night(s). Multiple posting rhythm rules can be defined for a rate code, however there cannot be overlapping dates. For example, a promotion may be offered for the month of June where guests who stay 7 nights will receive 2 free nights. Additionally, you can choose to repeat the posting rhythm within a stay for multi-segment reservations and/or repeat within the sell segment.

OPERA Cloud will recognize when the free night(s) occur during the reservation and ensures no accommodation revenue is posted.

Package items selected on the rate code or sold separately in the reservation will continue to post; for zero rate **free nights** this will result in negative room revenue for package items included in the rate.

### Adding a Rate Code Advanced Posting Rhythm Rule

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click **Vertical Ellipsis**, select **Edit**.
4. Select the **Financials** link.
5. Select the **Posting Rhythms** tab.
6. Click **New** and enter the following details:
  - a. **Code**: Enter a code to identify the posting rhythm rule. This field is read-only once the posting rhythm rule has been saved.
  - b. **Description**: Enter a description of the posting rhythm.
  - c. **Begin Sell Date**: Enter or select the start date.
  - d. **End Sell Date**: Enter or select an end date.
  - e. **Required Paid Nights**: Enter the number of nights required to receive free nights. The value must be between 1 and 99.
  - f. **Eligible Free Nights**: Enter the number of free nights after achieving the required number of paid nights. The value must be between 1 and 99.
  - g. **Repeat Within Stay for Multi-Segment**: Select to allow more than a single redemption of an advanced rate code posting rhythm offer during the entire stay.
  - h. **Repeat Within Sell Segment**: Select to allow more than a single redemption of an advanced rate code posting rhythm offer within a specific sell segment within the entire reservation
7. Click **Save**.

### Editing a Rate Code Advanced Posting Rhythm Rule

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.
2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click **Vertical Ellipsis**, select **Edit**.
4. On the Rate Code presentation page, click the **Financials** link.
5. Select the **Posting Rhythms** tab.
6. Select the Posting Rhythm rule to update, click the vertical ellipsis and select **Edit**.
7. Update details.
8. Click **Save**.

### Deleting a Rate Code Advanced Posting Rhythm Rule

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Codes**.

2. Enter search criteria and click **Search**.
3. From search results, select the rate code and click **Vertical Ellipsis**, select **Edit**.
4. On the Rate Code presentation page, click the **Financials** link.
5. Select the **Posting Rhythms** tab.
6. Select the Posting Rhythm rule to update, click the vertical ellipsis and select **Delete**.
7. Click **Delete** to confirm.

## Prerequisites for Configuring Advanced Rate Code Posting Rhythms

### OPERA Controls

**Group:** Rate Management

**Parameters:** Advanced Rate Code Posting Rhythm

#### Note:

Cannot be used in conjunction with Rate Code Posting Rhythm OPERA Control

## Rate Ownership

Rate Ownership Handling is most useful if an organization wants to identify rates that are managed by the property versus rates managed centrally.

The Rate Ownership Handling parameter is intended for environments where the property management and central reservations system reside in the same database. When activated, the Rate Ownership Handling parameter displays the Central and Property ownerships on the Rate Code Protection screen. Protection levels for these two rate sources can be applied using the Edit function.

### Prerequisites for Rate Ownership

Property and Central ownerships are available only when the parameter for Rate Ownership is active. A rate has only one type of ownership, such as Custom or Property.

**Table 13-23 Four Levels of Rate Ownership**

Types	Description
Property	Property Protection applies to all rate codes that are flagged as owned by Property. The Property Protection is available for editing when the parameter for Rate Ownership Handling is active. By default, all fields are editable for users with the applicable tasks granted to their user role. When a field or jump in Property Protection is marked for Protection, users with the task of Override Property Rate Protection are able to update the selected jump or field.

**Table 13-23 (Cont.) Four Levels of Rate Ownership**

Types	Description
Custom	Custom Protection applies to all rate codes that are generated in OPERA Cloud and whose ownership is not set to Central or Property. The Custom Protection is available for editing and by default allows for all fields to be editable by users with the applicable tasks granted to their user role. When a field or jump in Custom Protection is marked for protection, only users with the task for Override Custom Rate Protection are able to update the configuration for the selected field or jump.
Central	Central Protection applies to all rate codes flagged as owned by Central. The Central Protection is available for editing when the parameter for Rate Ownership Handling is active. By default, all fields are editable for users with the applicable tasks granted to their user role. When a field or jump in Central Protection is marked for Protection, users with the task for Override Central Rate Protection are able to update the selected jump or field.
External	External Protection applies to any rate codes generated outside of OPERA Cloud. These rates codes can be created in an external Central Reservations System or Revenue Management system and then inserted in OPERA Cloud. For External Protection, all fields and jumps are flagged as protected since these rates are typically managed outside of the OPERA Cloud system. External Protection is not available for editing.

## About Tiered Rate Codes

### Prerequisites for Rate Tiers

Tiered Rates allows you to setup pricing schedules by length of stay. The extended-stay concept of rate tiers is usually "the longer the guest stays, the lower the rate the guest pays". For example: a reservation with a stay within Tier 1 (1 -5 nights) would pay a rate of \$180 per night; whereas a reservation that extends into the second stay tier (6-15 nights) would pay a rate of \$160 per night, commencing from the first night of the stay.

Between 2 and 5 rate tiers can be configured for your property in [Rate Management OPERA Controls](#). As the tiers are configured, the next tier set automatically defaults to the start day of +1 from the end day of the last tier. For example, if tier 1 is configured from 1 -5 days. Tier 2 automatically starts from day 6 by default and you cannot edit it unless the first tier end date is altered.

You can manage [rate restrictions](#) of tiered rates by placing a Min. Stay Through restriction or a Max Stay Through restriction at the rate code level. Any restriction placed at the rate code level is applicable to all pricing schedules, and thus tiers within that rate code. For example: If Tier 1 equals 1-5 nights, and a 3-night Min. Stay Through restriction is set at the rate code level, OPERA Cloud does not allow you to sell one-night stays and two-night stays for that rate code but will allow you to sell three-night stays and greater for that rate code.

When a tiered rate is sold in a Block allocation, OPERA Cloud uses the lowest tier for revenue forecasting.

### Configuring Tiered Rates

To configure a tiered rate code, select the **Tiered Rates** check box on the [Rate Code Type](#) panel.

 **Note:**

OPERA Cloud prevents you from changing an existing standard rate to a tiered rate. Therefore, all rates that have at least one standard pricing schedule configured will cause the Tiered Rates check box to be disabled for update.

Base Rate fields (available when Base Rate OPERA Control is active) are removed when a rate code is flagged as a Tiered Rate.

The configured tiers are displayed in the [Pricing Schedules](#) panel. For example, if 2 stay tiers are configured, only 2 tiers are visible in the Pricing Schedules panel. You can add the tier pricing schedules either by date ranges or seasons.

 **Note:**

The Market, Source and Package fields do not appear on the [Pricing Schedules](#) panel; this is to ensure that the compiling of statistics and posting of package allowances is correct and does not cause imbalances.

For more information, see [Configuring Rate Codes](#).

## Prerequisites for Rate Tiers

## Configuring Rate Code Protection

### [Prerequisites for Configuring Rate Code Protection](#)

Rate Code Protection prohibits users from updating certain attributes of a rate code. You can flag attributes as protected and limit who can make changes. User assigned to roles granted Override Custom Rate Protection, Override Property Rate Protection, Override Central Rate Protection tasks have the ability to update the protected attribute. The rate ownership is selected in [rate code definition](#).

### Editing Rate Code Protection

1. From the **Administration** menu, select **Financial**, then **Rate Management**, and then **Rate Code Protection**.
2. Enter or select the property and click **Search**.
3. Click **Edit**.
4. Expand the screen/field name sections.
5. **Rate Ownership**: Select check boxes to nominate who has the ability to make rate code changes.
  - a. **Custom**: Nominate these attributes as editable for rate codes that are created within OPERA Cloud and not flagged as owned by Property or Central.
  - b. **External**: Nominate these attributes as editable for rate codes that are managed by an external system.
  - c. **Property**: Nominate these attributes as editable for rate codes that are flagged as Property ownership (Available when the Rate Ownership Handling OPERA Control is active).
  - d. **Central**: Nominate these attributes as editable for rate codes that are flagged as Central ownership (Available when the Rate Ownership Handling OPERA Control is active).
6. Click **Save**.

## Configuring Promotion Groups

Promotion groups provide a way to group multiple promotion programs around a common theme. For example, you might create a promotion group called Summer Program and then create separate promotion codes for special rates or amenities to offer to guests during the summer months. You must create promotion groups prior to creating promotion codes.

### Creating Promotion Groups

1. From **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Promotion Groups**.

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Promotion Groups are created by selecting the Template tab. Once created, you can copy Promotion Groups to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

2. Click **New** and enter the following details:
  - a. **Promotion Group (Code)**: Enter a code for the Promotion group.
  - b. **Promotion Group Name**: Enter a name for the Promotion group.
  - c. **Program Type**: Enter the type of promotion group (e.g., radio, TV, Internet/ Web, email, etc.).
  - d. **Description**: Enter a description of the promotion group.
3. Click **Save** or **Save and Continue** to add another Promotion Group.

#### Editing Promotion Groups

1. From **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Promotion Groups**.
2. Enter search criteria and click **Search**.
3. From search results, select a **Promotion Group** and click on the **Vertical Ellipsis**.
4. Click **Edit**.
5. Update configuration.
6. Click **Inactive** to mark inactive.
7. Click **Save**.

#### Deleting Promotion Groups

1. From **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Promotion Groups**.
2. Enter search criteria and click **Search**.
3. From search results, select a **Promotion Group** and click on the **Vertical Ellipsis**.
4. Click **Delete**.
5. Click **Delete** to confirm.

## Configuring Promotion Codes

### [Prerequisites for Promotion Codes](#)

Promotion Codes are used to configure, track promotional campaigns. Various rate codes can be linked to a promotion code which are displayed to reservation agents in [Look To Book](#) when filtering room and rate availability based on a promotion search. When the **Hide Promotion Rates** OPERA Control is active, rate codes linked to a promotion code are not displayed in Look to Book sales screen when the promotion is not selected for the availability search.

Prior to configuring promotion codes ensure you have configured [Promotion Groups](#) and [Rate Codes](#).

### Adding Promotion

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then **Promotion Codes**.

 **Note:**

With an active OPERA Multi-property Cross Reservation Cloud Service, promotion codes can only be created by clicking the **Template** tab. Once created, you can copy the configuration to specific properties using the Copy action. Refer to [Copying Configuration Codes to Multiple Properties](#).

2. Click **New** and enter the following details:
  - a. **Property:** Confirm or select the property.
  - b. **Promotion Code:** Enter an alphanumeric code for the promotion; this code cannot be changed once the promotion code is saved.
  - c. **Description:** Enter the description of the promotion.
    - i. **Manage Translation:** Allows you to add translations
  - d. **Promotion Group:** Select the [Promotion Group](#) from list that the promotion belongs to, refer to .
  - e. **Category:** Enter a category for the highlighted promotion code. You may enter any information, such as the membership program or level.
  - f. **Booking Start Date:** Define the selling start date to determine the time frame this promotion code is active (Available only for reservation promotion codes).
  - g. **Booking End Date:** Define the selling end date to determine the time frame this promotion code is active (Available only for reservation promotion codes).
  - h. **Check in Time:** Enter the allowed check in time.
  - i. **Check out Time:** Enter the allowed checkout time.
  - j. **Stay Start Date:** Define the Start stay dates for which this promotion code may be used.
  - k. **Stay End Date:** Define the End stay dates for which this promotion code may be used.
  - l. **Upgrade Allowed:** Select this checkbox if the promotion signifies a room upgrade.
  - m. **Update Outside Booking Dates:** Select this check box to allow edit of a reservation after the booking end date has passed.
  - n. **Long Description** Enter a long description of the promotion.
  - o. **Instructions:** Enter instructions for reservation agent. This information is available from the Promotion Details screen.
  - p. **Information:** Enter details that further describe the promotion code. This information is available from the Promotion Details screen.
  - q. **Rate Codes**

- i. Select Rate Codes for the promotion.
  - ii. Click **New**.
  - iii. Make your choice from the rate codes list that appears.
  - iv. Click **Select**.
  - v. Repeat to add another rate code.
  - vi. To delete a rate code, click **Vertical Ellipsis**, click **Delete**.
  - vii. Click **Delete** to confirm.
3. Click **Save**.

### Adding Promotion Codes with Comp Routing Instructions

#### Gaming

#### Prerequisites for Promotion Codes with Comp Routing Instructions

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Promotion Codes**.
2. Click **New** and select the **Property** tab. Enter the following details:

 **Note:**

Comp Routing Instructions can only be added to a promotion code at the property level, not at the template level.

- a. **Property**. Confirm or select the property.
- b. **Promotion Code**. Enter an alphanumeric code for the promotion. You cannot change this code once the promotion code is saved.
- c. **Description**. Enter a description of the promotion.
  - i. **Manage Translations**. Select to translate the description into another language.
- d. **Promotion Group**. Select the **Promotion Group** to which this promotion code belongs. For more information, see [Configuring Promotion Groups](#).
- e. **Category**. Enter a category for the highlighted promotion code. You may enter any information, such as the membership program or level.
- f. **Booking Start Date**. Define the selling start date to determine the time frame this promotion code is active (Available only for reservation promotion codes).
- g. **Booking End Date**. Define the selling end date to determine the time frame this promotion code is active (Available only for reservation promotion codes).
- h. **Check in Time**. Enter the allowed check in time.
- i. **Check out Time**. Enter the allowed checkout time.
- j. **Stay Start Date**. Define the Start stay dates for which this promotion code may be used.

- k. **Stay End Date.** Define the End stay dates for which this promotion code may be used.
  - l. **Upgrade Allowed.** Select this option if the promotion signifies a room upgrade.
  - m. **Update Outside Booking Dates.** Select this check box to allow edit of a reservation after the booking end date has passed.
  - n. **Long Description .** Enter a long description of the promotion.
  - o. **Instructions.** Enter instructions for the reservation agent. This information is available from the Promotion Details screen.
  - p. **Information.** Enter details that further describe the promotion code. This information is available from the Promotion Details screen.
  - q. **Attached Rate Codes.** Use this section to search for rate codes and attach them to this promotion code.
    - i. Click **New**.
    - ii. Make your choice from the rate codes list that appears.
    - iii. Click **Select**.
    - iv. Repeat to add another rate code.
    - v. To delete a rate code, click the **vertical ellipsis** and select **Delete**.
    - vi. Click **Delete** to confirm.
  - r. **Promotion Routing Instruction.** Use this section to attach comp routing instructions to the promotion code.
    - i. Click **New** to add a comp routing instruction. See [Managing Comp Routing Instructions](#) for details.
    - ii. **Authorizer Name.** Click the **vertical ellipsis** and select **New** to add an authorizer for the comp routing instruction. See [Comp Authorizers and Authorizer Groups](#) for more information.
4. Click **Save** or click **Save and Continue** to save and add another code.

### Editing Promotion

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then **Promotion Codes**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level **Vertical Ellipsis** for the Promotion Code and select **Edit**.
4. Make the desired changes.
5. Click **Save**.

### Deleting Promotion

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then **Promotion Codes**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level **Vertical Ellipsis** for the Cancel Penalty and select **Delete**.

4. Click **Delete** to confirm.

## Hurdle Rates

Revenue Management (yield) solutions calculate the actual hurdle rates which OPERA Cloud compares against. The revenue management software receives data from OPERA Cloud and evaluates the changes that have occurred in OPERA Cloud. Based on these changes as well as historical data, the revenue management solution determines hurdle rates, which are updated in OPERA Cloud; these hurdle rates are used to determine the rate code/room type availability at the time of making a reservation.

Hurdle Rates represent the monetary hurdle value calculated by the revenue management solution after considering the information received from OPERA Cloud. This is the value that must be reached for OPERA Cloud to display a rate code/room

type on the rate grid. Hurdle rates are sometimes referred to as bid prices or opportunity costs. All values will be in your property's base currency.

## Prerequisites for Hurdle Rates

### Subscriptions

Oracle Hospitality OPERA Yield Interface Enhanced Cloud Service

or

Oracle Hospitality OPERA Yield Interface Basic Cloud Service

### OPERA Cloud Tasks

**Group:** Financial Admin

**Tasks:** Rate Management

Hurdle Rates

- New/Edit Hurdle Rates
- Delete Hurdle Rates

## Configuring Hurdle Rates

Before any consideration is made concerning hurdle rates OPERA Cloud first checks its own rate availability controls to determine whether the rate code is open or closed and visible in rate availability . OPERA Cloud completes the following checks to determine whether or not a rate code is available:

- The Rate Code Start Sell and End Sell dates are valid.
- Pricing schedule for at least one room type is available for this rate code.
- During a Look To Book query, OPERA Cloud checks if the proposed reservation falls within the boundaries of these two fields, Max Rooms Sold and Actual Rooms Sold.
- OPERA Cloud's normal rate availability status still applies and therefore the dates must at least be open.

### Adding Hurdle Rates

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Hurdle Rates**.
2. Click **New**.
3. Enter the required information.

Fields	Description
Property	Property for which hurdle rate needs to be added.
Hurdle Date	Date when this hurdle rate is effective.
Room Type	Select and choose the room type for this hurdle rate.

Fields	Description
Delta	Represents a monetary value, which is added to the hurdle rate for each additional room sold up to the ceiling. If the hurdle rate is set at \$80.00 and the delta is \$1.00, for the first room sold the rate value needs to be \$80.00 or more. For the second room the rate value needs to be \$81.00, for the third \$82.00 and more up to the Ceiling at which time no additional delta values are added.
Ceiling	Enter the number of rooms to be sold to which the delta value should be added. For example: <ul style="list-style-type: none"> <li>• Hurdle is \$90.00</li> <li>• Delta is \$5.00</li> <li>• Ceiling is 3 <ul style="list-style-type: none"> <li>– The first reservation must achieve the hurdle value of \$90.00.</li> <li>– The second reservation must achieve the hurdle value of \$95.00.</li> <li>– The third reservation must achieve the hurdle value of \$100.00.</li> <li>– The fourth reservation must achieve the hurdle value of \$105.00.</li> </ul> </li> </ul> <p>All subsequent reservations must achieve the hurdle value of \$105.00 until maxsold is reached, at which point the date is restricted.</p>
Max Rooms Sold	Enter the maximum number of rooms to be sold in the room types linked to the yield category.
Actual Rooms Sold	Enter the actual number of rooms to be sold in the room types linked to the yield category.

4. Click **Save**.

#### Editing Hurdle Rates

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Hurdle Rates**.
2. Select the hurdle rate, click the **vertical ellipsis** and select **Edit**.
3. Update configuration.
4. Click **Save**.

## Yield Management

OPERA Cloud supports integration with partner revenue management (yield) solutions for the update of Hurdle, Overbooking and Restriction details.

## Prerequisites for Yield Management

### Subscriptions

Oracle Hospitality OPERA Yield Interface Enhanced Cloud Service

OR

Oracle Hospitality OPERA Yield Interface Basic Cloud Service

## OPERA Cloud Tasks

**Group:** Financial Admin

**Tasks:** Rate Management

- Yield
  - New/Edit Yield
  - Delete Yield

## Yield Adjustment Codes

Yield Adjustment Codes enable you to configure the yield adjustments that can be applied to a rate before it is compared to a hurdle rate when determining rate availability.

### Adding Yield Adjustment Codes

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Yield Adjustment Codes are created by selecting the **Template** tab. Once created, you can copy Yield Adjustment Codes to specific properties using the **Copy** action. For more information, see [Copying Configuration Codes to Multiple Properties](#) for more information.

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Yield Adjustment Codes**.
2. Click **New** and complete the following:
  - a. **Property:** Search and select the property.
  - b. **Code:** Enter code up to 10 characters.
  - c. **Description:** Enter the description up to 25 characters.
  - d. **Type:** Select valid types are Per Stay, Per Night, Per Person Per Night, and Per Person Per Stay.
  - e. **Amount:** The amount field displays currency in the search table that is being used for the Yield Adjustment.
  - f. **Currency:** Search and select the currency.
3. Click **Save** or **Save and Continue**.

### Editing Yield Adjustment Codes

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Yield Adjustment Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, click the vertical ellipsis **Actions** menu, and then select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Yield Adjustment Codes

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Yield Adjustment Codes**.
2. Enter search criteria and click **Search**.

3. In the search results, click the vertical ellipsis **Actions** menu, and then select **Delete**.
4. Click **Delete** to confirm the deletion.

## Yield Categories

Yield categories are groupings of like or similar rooms that are presented to customers in OPERA Cloud based on either the target market or pricing structure at the property. All room types for the property are automatically assigned to the default yield category Standard. These room types can be left in the default Standard yield category, or you can create new categories to better manage your property's demand and pricing. Along with yield categories, hurdle steps will have to be configured to define the exact hurdle amounts (price slices) that will be forecasted for all yieldable room types in a property.

### Adding Yield Categories

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Yield Categories are created by selecting the **Template** tab. Once created, you can copy Yield Categories to specific properties using the **Copy** action. Refer to [Copying Configuration Codes to Multiple Properties](#) for more information.

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Yield Categories**.
2. Click **New** and complete the following
  - a. **Property**: Search and select the property.
  - b. **Yield Category**: Enter the yield category.
  - c. **Description**: Enter the description.
3. Click **Save** or **Save and Continue**.

### Editing Yield Categories

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Yield Categories**.
2. Enter search criteria and click **Search**.
3. In the search results, click the vertical ellipsis **Actions** menu, and then select **Edit**.
4. Update the configuration
5. Click **Save**.

### Deleting Yield Market Type

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Yield Categories**.
2. Enter search criteria and click **Search**.
3. In the search results, click the vertical ellipsis **Actions** menu, and then select **Delete**.
4. Click **Delete** to confirm the deletion.

## Yield Market Type

Yield Market Types can be used to implement a system of multiple hurdles. When a hurdle rate is sent to OPERA Cloud, the yield market types feature allows a different yield market type to be associated with each hurdle rate set for the given date. One yield market type might, for example, be called Entitlement, and it might be assigned to a hurdle rate that is lower (say 195) than a second hurdle rate (200) configured with a yield market type called Non-entitlement.

### Adding Yield Market Type

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Yield Market Types are created by selecting the **Template** tab. Once created, you can copy Yield Market Type to specific properties using the **Copy** action. Refer to [Copying Configuration Codes to Multiple Properties](#) for more information.

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Yield Market Type**.
2. Click **New** and complete the following
  - a. **Property**: Search and select the property.
  - b. **Code**: Enter Yield Market Type code .
  - c. **Alternative Market Code**: Search and select the Alternative Market Code.
  - d. **Description**: Enter the description.
3. Click **Save** or **Save and Continue**.

### Editing Yield Market Type

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Yield Market Type**.
2. Enter search criteria and click **Search**.
3. In the search results, click the **vertical ellipsis** and then select **Edit**.
4. Update the configuration
5. Click **Save**.

### Deleting Yield Market Type

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Yield Market Type**.
2. Enter search criteria and click **Search**.
3. In the search results, click the **vertical ellipsis** then select **Delete**
4. Click **Delete** to confirm the deletion.

## Configuring Rate Strategies

Rate strategies enables you to configure rules that automatically set rate restrictions according to occupancy levels or the number of times a specific rate category or rate code is sold.

Typically when configuring a rate strategy rule to close or set **Length of Stay Restrictions** on a rate when X% occupancy is reached, you would also configure a corresponding rate strategy rule to open or remove the LOS restriction on the rate when Y% (lower) occupancy is reached.

The restriction types available are determined by the Restriction Types OPERA Control.

Rate strategies run continually as a background process and overrides any manually set rate restrictions for overlapping restriction date periods. For more information on Rate Restrictions, see [Restrictions](#).

#### Examples:

- Configure a rule so when occupancy reaches 65%, all rate codes in the Discount rate category are closed. You would set **When Occupancy Reaches** = 65 then **Status** = Close. Conversely configure a rule with condition **When Occupancy** = 65 then **Status** = Open.
- Configure a rule for the sale of the Employee discount rate code "STAFF". You can configure a rate strategy rule to ensure that only 3 reservations (rooms) are sold per day for the STAFF rate code. You would set **When Times Sold Reaches** = 3 and **Status** = Close. Conversely configure a rule with condition **When Times Sold is Less** than 3 then **Status** = Open.

#### Adding Rate Strategy Rules

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Strategies**.
2. Click **New** and enter the following details:
  - a. **Property:** Enter or select the property.
  - b. **Sequence:** Use the sequence number to control the order in which strategies will be executed by OPERA Cloud. When multiple strategies apply in a given scenario (e.g., for a specific rate category, rate code and date combination) the strategy with the highest sequence number will be executed first.
  - c. **Condition**
    - i. **Condition:** Select a condition from the list.
      - **If Occupancy Reaches/If Occupancy Is Less:** These two conditions use the % occupancy level of the property to execute the rate strategy rule.
      - **If Times Sold Reaches/If Times Sold Is Less:** These two conditions execute a strategy based on an integer for number of times a rate is sold (booked).
    - ii. **Value:** Enter the value for the condition
    - iii. **Dates to Restrict From:** Enter or select the start date to set the restriction.
    - iv. **Dates to Restrict To:** Enter or select the end date to set the restriction.
    - v. **Days of Week:** Select specific days of the week within the restriction date range.

- vi. **Consider Sell Limits:** Select to ensure OPERA Cloud will consider the sell limits set to determine occupancy %. (Enabled when the Sell Limits OPERA Control is active).
  - vii. **Consider Out of Order Rooms:** Select to ensure OPERA Cloud will take into consideration the out of order rooms in determining occupancy %.
- d. Restriction
- i. **Restriction Type:** Select the restriction type from list. For more information, see [Restrictions](#).
  - ii. **Rate Category/Code:** Select the rate category or rate code(s) this rule applies to (Rate Code selection is enabled when the Rate Code Restrictions OPERA Control is active; Rate Category selection is enabled when the Rate Category Restrictions OPERA Control is active)
    - **None:** Rule is for all rate code/categories.
  - iii. **Room Type/Class:** Select the room type(s) or room class. This rule applies to Room Class selection is enabled when then Room Class OPERA Control is active.
    - **None:** Rule is for entire property.
- e. Evaluation Dates (Execution Dates)
- i. **By Date:** Enter start and end dates when the rule should execute and evaluate the rule.
  - ii. **By Advanced Days:** Use these fields to define the number of days in advance of the Restriction To/From Dates that OPERA Cloud must start to monitor .
3. Click **Save**.

### Editing Rate Strategy Rules

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Strategies**.
2. Enter search criteria and click **Search**.
3. From search results, select the rule, click **Vertical Ellipsis** and click **Edit**.
4. Update the rule.
5. Click **Save**.

### Deleting Rate Strategy Rules

#### Note:

Deleting a rate strategy rule does not "undo" any restrictions already set by the rate strategy processor when the rule was active.

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Rate Strategies**.
2. Enter search criteria and click **Search**.
3. From search results, select the rule, click **Vertical Ellipsis** and click **Delete**.

4. Click **Delete** to confirm.

## Configuring Rate Groups

### Configuring Rate Groups

When Rate Groups are enabled, out of all Best Available Rates only the "Best" rate code for each rate group is displayed. You can also setup BAR Based rate codes to calculate the rate amount based on Best BAR rate code's amount of a particular rate group.

For more information, see [Dynamic BAR Based Rates](#) and Best Available Rates. For more information, see [Best BAR by Day Configuration](#)

### Adding Rate Groups

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then **Rate Groups**.
2. Click **New** and complete the following:
  - a. **Code**: Enter a code for the rate group.
  - b. **Description**: Enter a description for the rate group.
3. Click **Save** or click **Save and Continue** to add another.

### Editing Rate Groups

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then **Rate Groups**.
2. Enter search criteria then click **Search**.
3. Select the rate group, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update configuration.
5. Click **Save**.

### Deleting Rate Groups

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then **Rate Groups**.
2. Enter search criteria then click **Search**.
3. Select the rate group, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Update configuration.
5. Click **Delete** to confirm.

## Prerequisites for Configuring Rate Groups

### OPERA CONTROLS

**Group**: Rate Management

**Functions:** Best Available Rates

**Parameters:** Rate Groups

**OPERA Cloud Tasks**

- Financial Admin
- Rate Groups
  - New/ Edit Rate Groups
  - Delete Rate Groups

## Property Calendar

### [Prerequisites for Property Calendar](#)

Use the Property Calendar to manage the calendar events and setup day type rate adjustments for selected dates.

- Day types are used to increase or decrease the pricing of rate codes by either a flat amount or a multiplying factor. You must set the rate code financial details to be adjustable by Day Types. For more information, see [Configuring Rate Code Financial Details](#)

 **Note:**

Day type pricing adjustments are not supported by GDS, ADS, OTA or OPERA Exchange Interface (OXI) integrated solutions. Solutions integrated using the Oracle Hospitality Integration Platform will have rate pricing adjusted by Day Types.

- Calendar events identify local area events which may have an impact on your property operations and occupancy levels.

For more information, see [Using the Property Calendar](#).

## Prerequisites for Property Calendar

**OPERA Controls**

**Group:** Reservations

**Parameters:** Property Calendar

**Group:** Rate Management

**OPERA Cloud Tasks**

- Property Calendar
- New/Edit Property Calendar
- Delete Property Calendar

## Searching the Property Calendar

To search a property calendar:

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Property Calendar**. Property Calendar can be accessed from **OPERA Cloud > Bookings > Reservation Workspace** also.
2. In Search criteria, click to search for the Property, if you are logged in at a HUB level. If you are logged in at a Property level, the property gets displayed by default.
3. Select a **Date and Day**.
4. Click the icon to search for Room Class and Room Type, and then click **Search**.  
Room Class is available only when Room Class OPERA controls is active.
5. Click **Reset** to go back to the previous settings.
6. In the calendar table:
  - a. Click the calendar icons to select **Day, Week, Month, List**. They are the calendar components that represent general application setting for Weekdays, Weekends, Events, and Day types. Directional buttons display the view that you select. For example, if you select the year view, the buttons show the previous calendar year or the next calendar year. If the view is Day then the forward button show the user to next day calendar. If the view is Week, the forward button show the next week calendar and so on.
  - b. Numbers within the dates: By default, the number shown inside each date block indicates House availability for that date and matches the Maximum Availability on the Property Availability screen. House availability is calculated as: Total Physical Rooms - Out of Order Rooms + Overbooked Rooms - Total Deduct Rooms.  
  
For the current or future dates, click this number to display the Property Availability screen. The number of available rooms is also shown for the last 30 days. For earlier dates, however, this number might not fully reflect the actual maximum availability because it does not consider fluctuations caused by conditions such as guests extending their stays, walk-ins, or early departures. Statistical reports should be run for a more reliable picture of availability for past dates. House availability covers all room types.
7. On the Property Availability screen, to display availability for a specific room type or room class:
  - a. From the **Display By** drop-down list, select a **Room Type** or **Room Class**.
  - b. Click the icon to select the Room Type or Room Class and then click **Search**.
  - c. You have the option of selecting the number of days from the drop-down list to view the Availability. For example, if you select 1, you can view the availability status for 1 day. If you select 5, you can view the availability status for 5 days.
  - d. Click **View Options**. In the View Options window, you can Select or Deselect multiple options at House or Room Type Levels.
  - e. Click **OK** to save the selection.
  - f. Click **I Want To...** to create a Block, New Reservation or Walk in Reservation.
8. To edit the room availability:

- a. In the House or Room Types panel, click the number that represents available number of rooms.
- b. In the Set Available Rooms window, select a **Level**.
- c. Enter the **Begin Date** and **End Date** and then select the number of days in a week.
- d. Set available rooms in **Available Rooms** field and click **Save**.

## Configuring (Calendar) Event Codes

Calendar events are used to identify activities and events such as local festivals, sporting events, concerts and so on occurring in the local area.

Events are setup for dates using the [Property Calendar](#) and are then indicated on the [Room Diary](#) and through the Calendar icon displayed in the [Look to Book Sales Screen](#).

### Adding (Calendar) Event Codes

#### Note:

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Event Codes are created by selecting the Template tab. Once created, you can copy Event Codes to specific properties using the Copy action. For more information, see [Copying Configuration Codes to Multiple Properties](#)

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Event Codes**.
2. Click **New** and complete the following fields:
  - a. **Property**: Select or confirm the Property code.
  - b. **Code**: Enter an abbreviate Code for the event.
  - c. **Description**: Enter a Description for the event.
  - d. **Sequence**: Enter a number that determines the position of the code in lists.
  - e. **Blackout**: Select to identify this event code as Blackout dates.
3. Click **Save**.

### Editing Event Codes

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Event Codes**.
2. Enter the search criteria and click **Search**.
3. Select the code in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. **Inactive**: Select check box to mark the event code inactive. Inactive Event Codes do not appear in the list of codes.
6. Click **Save**.

### Deleting Event Codes

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Event Codes**.
2. Enter the search criteria and click **Search**.
3. Select the code in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Day Types

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Day Types are created by selecting the **Template** tab. Once created, you can copy Day Types to specific properties using the **Copy** action. For more information, see [Copying Configuration Codes to Multiple Properties](#).

### Adding Day Types

1. From the **Administration** menu, select **Financial**, select **Rate Management**, and then select **Day Types**.
2. Click **New** and complete the following:
  - a. **Property**: Enter or select the property.
  - b. **Code**: Enter a code the Day Type.
  - c. **Description**: Enter a description for the Day Type.
  - d. **Multiplier**: Enter a multiplier for the rate amount. For example, a multiplier of two would double the price. A multiple of 0.90 would reduce the price by 10%.
  - e. **Adder**: Enter a flat amount to add or subtract from the rate amount
  - f. **Display Color**: Select a color for the Day Type; displayed on the [property calendar](#).
  - g. **Sequence**: Enter a number to determine the display order for the day type in lists.
3. Click **Save** .

### Editing Day Types

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Day Types**.
2. Enter search criteria then click **Search**.
3. Select the Day Type in the search result, and click the vertical ellipsis **Actions** menu, then click **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Day Types

1. From the **OPERA Cloud Administration** menu, select **Financial**, select **Rate Management**, and then select **Day Types**.

2. Enter search criteria then click **Search**.
3. Select the Day Type in the search result, and click the vertical ellipsis **Actions** menu, then click **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Day Types

### **OPERA Controls**

**Group:** Rate Management

**Functions:** Day Types

### **OPERA Cloud Tasks**

**Group:** Financial Admin

**Tasks:** Rate Management

Configure Day Types

## End of Day (Night Audit) Procedures

[Prerequisites for Interim / Final Procedures and Reports.](#)

You can add or edit optional procedures to execute during the End of Day process and setup the reports you need to generate.

With the Income Audit OPERA Control active you are required to setup the optional procedures and reports for both the interim End of Day , where the business date remains open, and the final End of Day. For more information, see [Managing Income Audit](#)

Each optional procedure and report can be configured to execute as frequently as you need: daily, weekly, monthly or just once per year.

## Prerequisites for Interim / Final Procedures and Reports

### **OPERA Controls**

**Group:** End of Day

**Functions:** Income Audit (optional)

**Settings:** Income Audit Cashier Setting

### **OPERA Cloud Tasks**

**Tasks:** Routine Management

- End of Day Procedures
  - New/Edit Procedures

- Delete Procedures
- End of Day Reports
  - New/Edit Reports
  - Delete Reports

## Configuring Interim / Final Procedures and Reports

When the Income Audit OPERA Control is active you have the option to configure Interim Procedures and Reports as well as Final Procedures and Reports; this is available to exclude procedures from the interim End Of Day and ensure the procedure only executes once the business date is closed and the final End of Day is run.

### Note:

Click **Vertical Ellipsis**, click **Show Inactive** to list inactive optional procedures; to reactivate click **Vertical Ellipsis**, and select **Activate**.

### Note:

Mandatory procedures are displayed with  and cannot be edited.

### Adding End of Day Procedures

1. From the Administration menu, select **Financial** select **Routine Management** and then select **End Of Day Interim Procedures and Reports** or **End of Day Final Procedures and Reports**.
2. Select property and click **Search**.
3. Select the **Interim/Final Procedure** tab.
4. Click **New** and complete the following:
  - a. **Name:** Enter a name for the procedure.
  - b. **Procedure Name:** Enter the procedure name. For more information, see [Mandatory and Optional End of Day Sequence Procedures](#).
  - c. **Sequence:** Enter a sequence for the procedure.
  - d. **Frequency:** Select the frequency for the procedure.
    - i. **Daily:** Run this procedure daily.
    - ii. **Weekly:** Run this procedure once per week; select the Day of the Week to run.
    - iii. **Monthly:** Run this procedure once per month; select the day during the month or End Of Month to run on the final calendar date in the month.
    - iv. **Yearly:** Run this procedure one per year, select the DD/MM.
  - e. Click **Save**.

## Editing End of Day Procedures

Only optional procedures can be updated.

1. From the Administration menu, select **Financial** select **Routine Management** and then select **End Of Day Interim Procedures and Reports** or **End of Day Final Procedures and Reports**.
2. Select property and click **Search**.
3. Select the **Interim/Final Procedure** tab.
4. Select the procedure in the result, click **Vertical Ellipsis** and click **Edit**.
  - a. **Inactive**: Click to mark this procedure as inactive; this procedure will not execute in the future.
  - b. Update details.
5. Click **Save**.

## Adding End of Day Reports

1. From the Administration menu, select **Financial** select **Routine Management** and then select **End Of Day Interim Procedures and Reports** or **End of Day Final Procedures and Reports**.
2. Select property and click **Search**.
3. Select the **Interim/Final Procedure** tab.
4. Click **New** and complete the following:
  - a. **Report Details**
    - i. **Report Type**: Select Oracle Report.
    - ii. **Internal Name** (Report Name): Select the report from the list. For more information, see [Report Descriptions](#).
    - iii. **Sequence**: Enter a sequence for the report
    - iv. **Display Name**: Enter the procedure name
    - v. **Parameter Form**: Select **Existing** and select the parameter form for the selected Report Name. For example, **res1** parameter form for the **RES\_DETAIL** report. Ensure you select the correct parameter form for the report selected.

 **Note:**

Enter the internal name into the search, click **Search** to find the matching parameter form.

- b. **Reports Parameters**
  - i. Setup the report parameters: filters, display options, sort order etc for the report
- c. **Destination**
  - i. **Spool Name**: Enter a filename for the report.
  - ii. **File Format**: Select a output format for the report.
  - iii. **Destination**: Select one of the following destination:

- i. **None:** Select to generate the report to file only; the report can be viewed and downloaded at a later time. For more information, see [Managing End of Day Reports](#).
  - ii. **Email:** Select to generate the report and transmit via email.
  - iii. **Email / Print:** Select to generate the report and transmit via email and print the report.
  - iv. **Copies:** Select the number of copies to generate.
- iv. **Frequency**
- i. **Daily:** Generate this report daily.
  - ii. **Weekly:** Generate this report once per week; select the Day of the Week to run.
  - iii. **Monthly:** Generate this report once per month; select the day during the month or **End Of Month** to run on the final calendar date in the month.
  - iv. **Yearly:** Generate this report once per year, select the DD/MM.
- v. **Watermark**
- i. Select a watermark option for the report. For more information, see [Working with Watermarks](#).
- d. Click **Save** or **Save and Continue** to add another report.

#### Editing End of Day Reports

1. From the Administration menu, select **Financial** select **Routine Management** and then select **End Of Day Interim Procedures and Reports** or **End of Day Final Procedures and Reports**.
2. Select property and click **Search**.
3. Select the **Interim/Final Procedure** tab.
4. Select the report in the list and click **Vertical Ellipsis** and select **Edit**.
  - a. **Inactive:** Select to inactive this report.
  - b. Update details as required.
5. Click **Save**.

## Mandatory and Optional End of Day Sequence Procedures

The End of Day Routine consists of a series of steps. Of the steps there is the sequence that processes procedures and reports during the End of Day Routine. You can print an unlimited number of reports. Furthermore, you can determine which procedures or reports are to be executed on which days. After you have selected the End of Day Sequence option, OPERA Cloud displays the current End of Day Mandatory Procedures that run at the property during the End of Day Routine. All procedures are displayed, but only the Optional Procedures are editable. End of Day Interim Procedures and Reports is enabled when Income Audit controls is Active.

The following Mandatory or Optional procedures are run during the End of Day sequence based on the configuration of your property. ( End of Day - Income Audit)

**Table 13-24 Mandatory or Optional Procedures**

List Name	Procedure Name	Mandatory/Optional	Description
Reservation No Shows	reservation.no_show	Mandatory	Processes no-shows. Reclassifies all reservations from Due Ins to No Shows when the reservation's expected day of arrival has passed. For example, if the business date has rolled from April 4 to April 5, 2018, all April 4 Due Ins will be reclassified as No Shows.
Synchronizing Front Office Statuses	Synchronizing Front Office Statuses	Mandatory	Synchronizes (matches) the number of persons and room status (occupied/vacant) in the room table with the number of persons and room status from the reservations table. The reservations table is the controlling table.
Updating Room Statuses	hkpkg.update_room_status_proc	Mandatory	The night audit procedure hkpkg.update_room_status_proc will update all No Show rooms to the room status selected here. If no status is selected, then the room status of the no show assigned rooms will not be changed. If a reservation with an assigned room number cancels on the expected day of arrival, the reservation too shall adhere to this set room status.
Creating Guest ledger	refresh_fin_summary.refresh_re sv_summary	Mandatory	Updates each guest's reservation balance.

**Table 13-24 (Cont.) Mandatory or Optional Procedures**

List Name	Procedure Name	Mandatory/Optional	Description
Generate Reservation Statistics	update_statistics.update_statistic_s_main	Mandatory	Updates each guest's stay statistics, such as, number of rooms, number of guests, room revenue, and promotion code.
Populating Trial Balance	refresh_fin_summary.populate_trial_balance	Mandatory	Populates a summary table of the day's transactions for each transaction code for the Trial Balance report.
Populate Folio Tax Summary	refresh_fin_summary.populate_folio_tax	Mandatory	TBD
Generating Reservation Statistics	update_statistics.update_statistic_s_main	Mandatory	Updates each guest's stay statistics, such as, number of rooms, number of guests, room revenue, and promotion code.
Calculating Historical Information	pms_prform00.update_profile_resv_statistics	Mandatory	Update profile statistics.
Purge	Purge	Mandatory	This procedure searches and automatically deletes resolved maintenance requests which are greater than 60 day.
Membership Trans & Points	Membership_P.Create_daily_membership_tran	Mandatory	Creates daily membership transactions and calculate points (only when the General Export OPERA Control is Active).

Table 13-24 (Cont.) Mandatory or Optional Procedures

List Name	Procedure Name	Mandatory/Optional	Description
Generate Data-Export	Generate_Export_NA_Data	Optional	Export data. The procedure is not visible if the General Export OPERA Control is Inactive. When an Export File has a status of EXPORT PENDING, it means that the file generation process was not completed or not even started. COMPLETED is displayed if the data export was created without any errors. If EXPORT PENDING is displayed, then the user typically goes back into the night audit, and the process to generate the export files is restarted before going to the next step.
Populate Audit Box	Refresh_Fin_Summary.Populate_audit_box	Optional	Populates Audit box
Back Office Export	bof_package.export_bof_data	Optional	Back Office export when using Back Office.
Cancel Waitlist Reservations	delete_waitlist	Optional	Cancels all waitlist reservations for the previous business date.
Purge Resolved Room Maintenance Requests	hk_maint.purge_room_maintenance	Optional	This procedure searches and automatically deletes resolved maintenance requests that are greater than 60 days.
Populate the temporary store table for Processing Commissions	insert_resv_commissions	Optional	Searches for reservations with travel agent commissions attached, and places all commissionable reservations into a temporary table, and calculates commissions.

**Table 13-24 (Cont.) Mandatory or Optional Procedures**

List Name	Procedure Name	Mandatory/Optional	Description
Process Awards Timeout Messages	pms2crs_interactive_events.proc ess_awds_timeout_messages	Optional	Processes awards timeout messages.
Allotment Cutoff	pms_grgrid.night_allotment_cut off	Optional	Searches for all allotments whose cutoff date matches the previous business date. If an allotment's cutoff date matches the previous business date all unreserved rooms will be released back to general inventory.
Delete Messages	pr_b_del_msg_on_chkout	Optional	Deletes traces and messages for checked out guests.
Execute Rate Strategies	rate_strategy_pkg.set_rate_strate gy	Optional	If rates strategies have been established, then this procedure will execute those rate strategies.
A/R Aging	update_invpurgedtl_bucket	Optional	If the property is running the OPERA Cloud AR function, then run this procedure to update the property's accounts receivable (A/R) amounts and related A/R aging information.

**Table 13-24 (Cont.) Mandatory or Optional Procedures**

List Name	Procedure Name	Mandatory/Optional	Description
Authorization Credit Card	Night_Audit_Authorization	Optional	At check in, a property usually seeks credit card authorization for a certain dollar amount (estimate of the amount of charges to be settled upon check out) for each reservation. If stay charges approach the property's initial estimate, this procedure will attempt to authorize a higher credit limit. If the authorization is not given (for whatever reason) an exception report can be produced allowing the property to contact the guest the next day to rectify the situation.
Past Arrival Waitlisted Reservations become turnaways	Turnaway_waitlist	Optional	Cancels all waitlist reservations for the previous business date.
Credit Card Offline Settlements Processed	cc_offline_settlements	Optional	Similar to the night audit credit card authorization procedure, 3 attempts will be made and if these attempts are not successful, the procedure will show as FAILED and the night audit will continue as normal. But if less than 3 failures are received, then the procedure will show as COMPLETED and will continue as normal.

**Table 13-24 (Cont.) Mandatory or Optional Procedures**

List Name	Procedure Name	Mandatory/Optional	Description
Assign Tax Registration No to In House Reservations	eod_misc.assign_tax_reg_no	Mandatory	Enabled when the Generate Tax Registration Number OPERA Control is active. A registration number is assigned to each Arrival reservation and appears in the Registration Number field in Reservation Stay Details panel. The registration number is sequentially assigned to arrivals.

## About Transaction Codes

Transaction codes are used to post sales charges and payments to the Deposit, Guest, Package and AR (City) ledgers.

- Sales charge transaction codes are required to post revenue , non-revenue and tax charges to guest, package, and city ledgers.
- Payment transaction codes are required to post payment to deposit, guest, or city ledgers and would include cash, check, all credit card types, and other payment types such as bank EFT bank transfers and Travel Agent Commission (withheld).

For Sales Charges there are various options enabled to further define the charge:

- You can include the charge in the calculation of reservation [deposit and cancellation rules](#) .
- You can enable manual posting of the charge or limit to interfaces only.
- You can set a default, minimum and maximum amounts to be posted.
- You can nominate the charge requires a Check Number when posted
- You can nominate the charge as eligible for [member point calculation groups](#).
- You can nominate the charge as a Paid Out, affecting the cashiers balance at shift drop.
- You can nominate the ledgers where the charge can be posted - Guest (Cashier) and AR.

For Payments there are various options enabled to further define the payment.

- You can nominate the ledgers where the payment can be posted - Deposit, Guest (Cashier) and AR
- You can nominate rounding of (cash) payment. Available when the Rounding Factor OPERA Control is active. For more information, see [About Rounding Factors](#).

- You can nominate the merchant commission for credit card payments
- You can nominate the AR Account to use for tracking debtors collection from credit card merchants

There are several other transaction codes required for internal posting requirements.

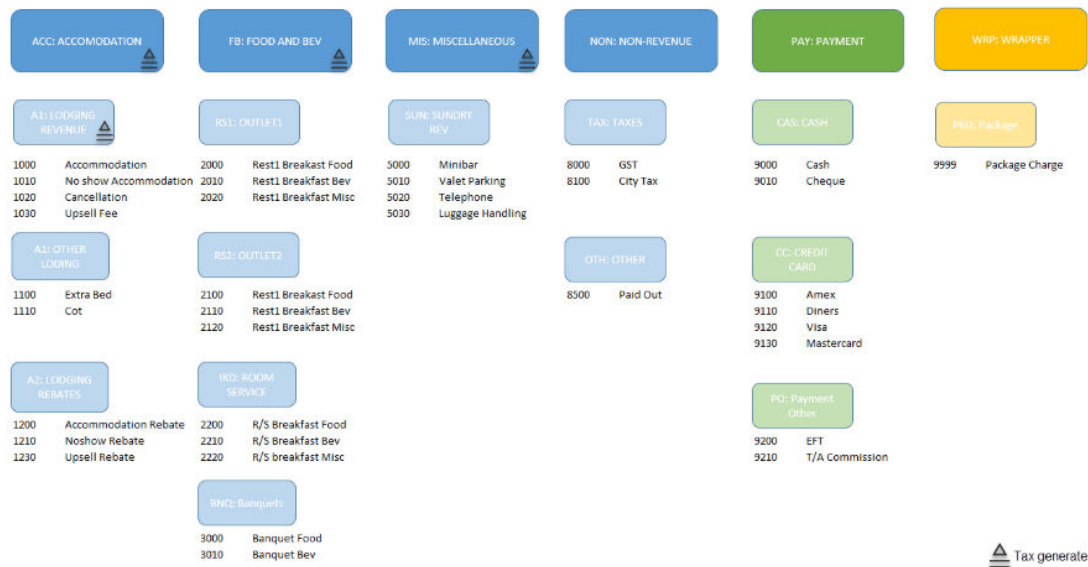

- A Package Wrapper transaction code is a single transaction code used to post the package (rate) charge to guest ledger; this amount is credited in the package ledger where the itemized package revenue charges are then posted. Applicable when the Advanced Packages OPERA Control is active.
- Cash Shift Drop (Charge)
- Check Shift Drop (Charge)
- AR Old Balance (Charge)
- Deposit Ledger Transfer (Payment)

Each transaction codes is linked to a transaction [subgroup](#), and each sub-group is linked to a [transaction main group](#). The main-group hierarchy defines the transaction code as either.

- Sales Charge (Revenue/Non-Revenue/Taxes)
- Payment
- Wrapper

For each Sales Charge transaction code, you can define other transactions to post automatically each time the charge is posted. These additional charges are called generates and are used to handle the calculation and posting of service charges and taxes. Generates are setup on a specific transaction code, on a sub-group or a main-group. For more information, see [Generates Configuration](#). When configuring transaction codes for posting tax you must select the Transaction Type=Tax, this will enable the Tax Code field for the selection of a tax bucket; use these buckets to group various tax transactions into one total on the folio and in reports.

**Figure 13-6 Transaction Codes**

Tax generate

Transaction code numbers can be a 1-8 digit value. Consider numbering your transaction codes in a logical order to keep the auditing simple. For example, all room related charges could be in the 1000 group; food and beverage related charges in the 2000 group, and so on. You should always allow for future growth as your requirements change by leaving openings in the transaction code sequence.

Transaction codes are not fixed until they are posted to a ledger, so you are able to change them until you are satisfied. After posting transaction codes to a ledger, you are unable to change or delete the transaction code.

Various [Cashier OPERA Controls](#) reference a transactions code. Consequently, you cannot delete transaction codes if they are referenced in an OPERA Control, even if the transaction code has not been posted to a ledger. For example, a payment transaction code selected for the Deposit Ledger (Transfer) Transaction Code OPERA Control.

## Configuring Transaction Codes

### Adding Sales Charge Transaction Codes

#### Note:

When the OPERA Multi-property Cross Reservation Cloud Service is active, new transaction codes are created by selecting the Template tab. Once created, you can copy transaction to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

Sales charges are all revenue, non-revenue and tax charges.

1. From the **Administration** menu, select **Financial**, select **Transaction Management**, and then select **Transaction Codes**.
2. Click **New** and complete the following:
  - a. **Code**: Enter a numeric code; maximum of six digits.
  - b. **Description**: Enter a description for the transaction code (appears in Billing and on the folio).
    - i. **Manage Translation**: Click to open the multi-language screen and configure a translated description for each language (appears on folio when the Multi-language OPERA Control is active; based on profile language).
  - c. **Subgroup**: Select a transaction sub-group from the list. This selection determined whether the transaction code is **sales** , **payment** or **wrapper** based on the associated group configuration.
  - d. **Transaction Type**: Select a transaction type from the list. Transaction types are used to group similar transaction codes in reports. This field is optional; however, certain reports (**Financial Transactions with Generates** and **Financial Transactions by Folio No.**) print financial information based on the transaction code type. Available options are **Lodging, Food and Beverage, Telephone, Minibar, Other Revenue, Tax, Non-Revenue** or blank.

- i. **Tax Code:** Enter a tax bucket for tax type transaction codes; use these buckets to group various tax transactions into one total on the folio footer and in reports. (Enabled when Transaction Type = Tax).
  - e. **Adjustment Code:** Select a (separate) transaction code to use when posting an adjustment to charges posted on this transaction code.
  - f. **Default Price:** Enter a default price for sale charge transaction codes. The price will populate to the amount field when posting a charge in Billing or Accounts Receivable.
  - g. **Minimum Amount:** Enter a minimum charge amount. If the minimum is not met, a warning message appears when posting a charge.
  - h. **Maximum Amount:** Enter a maximum charge amount. If the maximum is not met, a warning message appears when posting a charge.
  - i. **Accounting Code:** Enter a GL accounting code for the transaction code.
  - j. **Quantity Code:** Enter a default quantity to post.
  - k. **Options**
    - i. **Revenue Group:** Select this check box if this sales transaction code is revenue. If unchecked the charges posted are treated as non-revenue.
    - ii. **Paid Out:** Select this check box if the transaction code is used for posting cash payout. Payout transaction codes must be linked to a sales charge transaction group via the subgroup.
    - iii. **Include in Dep/Cxl:** Select this checkbox to include the transaction code in the calculation of deposit and/or cancellation rule fees. You can use this feature to include / exclude costs such as packages, tax generates, and fixed charges associated with a reservation when calculating deposit requests and cancellation penalties.
    - iv. **Membership:** Select this check box if the transaction code can be used towards membership points. The check box enables selection of this transaction code in the [Membership Transaction Groups](#) configuration.
    - v. **Generates Inclusive:** Select this checkbox if the amount posted is inclusive of all tax generates. In not selected tax generates will posted additional to the amount posted.
    - vi. **Check Number Mandatory:** Select this check box if a check number must be entered when posting charges using this transaction code
    - vii. **Manual Posting:** Select this checkbox to enable manual posting in Billing and Accounts Receivable; if not selected charges can only be posted from an integrated systems such as POS, PBX or Video or automatically during End of Day. For example, Accommodation.
    - viii. **Service Type:** Select G- Goods or S- Services from list (enabled when the Service Type OPERA Control is active for Wrapper and Sales charge transaction codes)..
3. Click **Save**.

## Adding Payment Transaction Codes

 **Note:**

When the OPERA Multi-Property Reservation Cloud Service is active, new transaction codes are created by selecting the Template tab. Once created, you can copy transaction to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

Payments include Cash, Check, Credit Card, AR (City Ledger) Transfer and other payments such as EFT, Bank Transfer.

1. From the **Administration** menu, select **Financial**, select **Transaction Management**, and then select **Transaction Codes**.
2. Click **New** and complete the following:
  - a. **Code:** Enter a numeric code; maximum of eight digits.
  - b. **Description:** Enter a description for the transaction code (appears in Billing and on the folio)
    - i. **Manage Translation:** Click to open the multi-language screen and configure a translated description for each language. Appears on folio when the Multi-language OPERA Control is active; based on profile language.
  - c. **Subgroup:** Select a payment-associated sub-group from the list.
  - d. **Transaction Type:** Leave selection blank.
  - e. **Payment Details:** Enabled for payment transaction codes; based on the sub-group selected
    - i. **Payment Type**
      - i. **Credit Card:** Select this option if the payment transaction code is a credit card transaction code.
      - ii. **Cash:** Select this option if the payment transaction code is a cash transaction code
      - iii. **Check (Cheque):** Select this option if the payment transaction code is a check transaction code
      - iv. **Other:** Select this option if the payment transaction is none of the above (Examples: Bank Deposit, T/Agent Commission, Direct Bill Transfer, Merchant Commission)
    - ii. **Processing Type** (for credit card transaction codes).
      - i. **EFT (OPI):** Select this option if the credit card payment transaction code is processed by an integrated payment partner.
      - ii. **Manual:** Select this option if the credit card payment transaction code is manual managed in Accounts Receivable.
        - i. **AR Account:** Select the accounts receivable account to use for the current payment transaction code. This determines the AR

account to which all credit card postings are transferred. For example, you might specify an AR account if you want to transfer a specific type of credit card payments (for example, American Express) to an AR account to enable tracking the remittance by the credit card merchant.

- iii. **CC Commission:** Commission percentage to be paid to the credit card merchant for transaction handling.

**f. Options**

- i. **Cashier Payments:** Select this checkbox to enable the payment transaction code in Billing 'cash' windows 1-8 (Guest Ledger).
- ii. **Round Factor:** For more information, see [About Rounding Factors](#)(Available when the Rounding Factor OPERA Control is active).
- iii. **AR Payments:** Select this checkbox to enable the payment transaction code in Accounts Receivable (City Ledger).
- iv. **Deposit Payments:** Select this checkbox to enable the payment transaction code in deposits (Deposit Ledger). (Available when the Deposit Handling OPERA Control is active). .
- v. **Comp Payment:** Select this checkbox if this payment transaction code is available for settlement of comp windows 101-108 in Billing. **GAMING** badge

- 3. Click **Save**.

### Adding Package Wrapper Transaction Code

When the OPERA Multi-Property Reservation Cloud Service is active, new transaction codes are created by selecting the Template tab. Once created, you can copy transaction to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

This internal transaction code is referenced in the [Default Package Transaction Code OPERA Control](#) and selected in [rate code financial details](#) and used to post the package charge to the reservation account.

- 1. From the **Administration** menu, select **Financial**, select **Transaction Management**, and then select **Transaction Codes**.
- 2. Click **New** and complete the following:
  - a. **Code:** Enter a numeric code; maximum of eight digits.
  - b. **Description:** Enter a description for the transaction code (appears in Billing and on the folio)
    - i. **Manage Translation:** Click to open the multi-language screen and configure a translated description for each language. Appears on folio when the Multi-language OPERA Control is active; based on profile language.
  - c. **Subgroup:** Select the wrapper-associated sub-group from the list.
  - d. **Transaction Type:** Leave selection blank.
  - e. **Service Type:** Select G- Goods or S- Services from list (Available when the Service Type OPERA Control is active )
- 3. Click **Save**.

### Editing Transaction Codes

1. From the **Administration** menu, select **Financial**, select **Transaction Management**, and then select **Transaction Codes**.
2. Enter search criteria and click **Search**.
3. Select the transaction code, click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Update configuration.
  - b. **Inactive**: Click to inactivate the transaction code. Inactive codes are not available for future use but retained for historical purposes.
4. Click **Save**.

### Deleting Transaction Codes

1. From the **Administration** menu, select **Financial**, select **Transaction Management**, and then select **Transaction Codes**.
2. Enter search criteria and click **Search**.
3. Select the transaction code, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## About Transaction Diversion

### Prerequisites for Transaction Diversion

Transaction diversion is a process whereby postings against selected transaction codes can be automatically diverted to a pseudo room based on the membership type and level, or the VIP level associated with the reservation. Transaction diversion rules determine the conditions under which the posting will be diverted. For example, a transaction diversion rule could state that charges for Internet access are to be diverted to pseudo room 9020 for reservations that have a Platinum level Priority Club membership attached. Transaction diversion rules apply at the property level and are not applied to individual reservations.

You should be aware:

- The transaction diversion rule is validated only on the initial posting of the transaction, not upon transfer / adjust / split / refresh / routing, etc.
- When transaction diversion applies to a reservation, transaction diversion rules will be applied to postings before routing.
- When generates (such as taxes) apply to a charge made to a reservation, and that charge is covered by transaction diversion, the generates will be diverted to the applicable pseudo room along with the charge to the main transaction code.
- Transaction codes will display only revenue transaction codes excluding tax, package wrapper, package profit/loss and internal transaction codes. Routing codes will not be displayed here for selection.
- It is not recommended that transaction codes that are defined for package elements be selected for transaction diversion rules. Nevertheless, if these transaction codes are included in a transaction diversion rule, and the package

charge is posted to a reservation, the complete package charge is posted directly to the guest room. If you post a charge directly against the same transaction code, the posting will be diverted. However, where a package allowance applies to the package that includes the element having the diverted transaction code, no consumption against the allowance is recorded.

- If for some reason the target pseudo room defined for a transaction diversion rule is not checked in at the time a qualifying posting is made, the posting will follow the normal process and be charged to the guest room. The Reference field on the Transaction Details screen will include a notation similar to the following: "Attempted trans. diversion (room number) not checked in." This notation will also appear on the guest's folio next to the charge that has been posted to the guest's room. If you prefer that the notation not appear on the folio, place the Reference notation inside square brackets. For example: [Attempted trans. diversion #9002 not checked in.]
- A charge that has already been automatically diverted to a pseudo room can be transferred back to the guest room or any other room using normal charge transfer functionality.
- Transaction diversion does not apply to passer-by postings because there is no reservation to which a membership or VIP level can be attached.
- In the event there are routing instructions for a transaction code on the target room, the charge will be routed per normal routing functionality.
- If at any point a transaction diversion rule is changed, existing postings per that rule are not modified, but all future postings will be affected.
- All the transaction diversion rules must be a unique combination of VIP level or membership type/level, transaction code, and pseudo room.

When viewing the diverted posting on the target room's Billing screen, the Billing screen Reference field will contain details pertaining to the room number and guest name from which the charge was diverted.

If a transaction is eligible for diversion but is not diverted due to the target room not being checked in, the Reference field will contain details as such.

 **Note:**

The sequence number of the rules determines the priority of which pseudo room the charge will be diverted to in the event there is a situation where the same transaction code is attached to a membership type or level and VIP code, and the reservation has this same membership type or level and VIP code. When the posting is made, OPERA Cloud will always validate against the diversion rules starting with the rule having sequence number 1 and continue to subsequent rules; whichever rule is satisfied first, and the posting will be diverted to the defined pseudo room for that rule, provided the pseudo room is checked in. If the pseudo room is not checked in, the charge remains on the original guest folio.

In case of a POS check that could possibly contain multiple transaction codes, each of the transaction codes needs to be validated separately for transaction diversion.

If there are multiple memberships attached to the reservation (for example, a loyalty and FF membership), and there are transaction diversion rules for both membership types for the same transaction code, then when posting, OPERA Cloud looks at the rule with the lowest

sequence number (that is, the highest priority) and posts to the associated Posting Master (PM) room.

## Prerequisites for Transaction Diversion

### OPERA Controls

**Group:** Cashiering

**Functions:** Transaction Diversions.

### OPERA Cloud Tasks

#### Financial Admin

- Transaction Diversions
  - New/Edit Transaction Diversions
  - Delete Transaction Diversions

## Configuring Transaction Diversion

### Adding Transaction Diversions Rules

1. From the Administration menu, select **Financial**, select **Transaction Management**, and then select **Transaction Diversion Rules**.
2. Click **New** and complete the following.
  - a. **Property.** Confirm or select the property
  - b. **Level:** Select a level from the list
    - i. **Property:** Rule applies to all reservations at the property.
    - ii. **Reservation:** Rule applies to selected reservation(s)
  - c. **Code:** Enter the code that identifies the transaction diversion rule. Up to 20 alphanumeric characters can be entered.
  - d. **Description:** Enter the description for the transaction diversion rule.
  - e. **Rule Type:** Select the rule type
    - i. **VIP:** (Available when the VIP OPERA Control is active)
      - i. **VIP Level:** Select a value from the list
      - ii. Membership.
        - i. **Membership Type:** Select the membership type from the list.
        - ii. **Membership Level:** Select a membership level from the list (optional).
  - f. **Transaction Codes:** Click to search for and select the transaction codes. The list of transaction codes does not include package wrapper, generate transaction codes, package profit and package loss transaction codes, and OPERA Cloud system transaction codes.
  - g. **Room:** Search for and select the pseudo room reservation to which postings for this transaction diversion rule will be diverted.

- h. Sequence:** Enter a unique sequence number that determines the priority this transaction diversion rule has when OPERA Cloud must decide which pseudo room charges will be diverted to in the event that the same transaction code is attached to a membership rule and a VIP rule, both of which apply to the same reservation.
  - i. Thresholds (optional)**
    - i. Based on:** Select a value from the list
      - i. Count:** Diversion occurs after a number of postings. Each posting may be more Qty > 1.
      - ii. Minutes:** Diversion occurs based on the minutes attribute of the posting time.
      - iii. Quantity:** Diversion occurs after a quantity is posted. Each posting may be more Qty > 1.
    - ii. Minimum Required:** Enter the Counts, Quantities, or Minutes value that must be posted before diversion takes effect
    - iii. Calculation:** Select a value from the list
      - i. Per Day:** The Minimum Required and Complimentary values apply to each day of the stay
      - ii. Per Stay:** The Minimum Required and Complimentary values apply to the entire stay
    - iv. Complimentary.** The Diversion Rule will be executed based on the complimentary value, after the Minimum Required number satisfied. For example: if Count is set to Minimum Required = 3 and Complimentary = 5, the following result will occur: OPERA Cloud will post 3 counts of charge for any of the selected transaction codes to the reservation folio; the diversion will begin when the 4th count of the charge is posted; OPERA Cloud will divert 5 counts of the charges to the designated PM reservation.
3. Click **Save**.

### Editing Transaction Diversions Rules

1. From the Administration menu, select **Financial**, select **Transaction Management**, and then select **Transaction Diversion Rules**.
2. On the Transaction Diversion Rules screen, search for and select the required transaction diversion rule that you want to edit and then click on the vertical ellipsis.
3. Enter search criteria and click **Search**.
4. Select the diversion rule, click the vertical ellipsis and then click **Edit**.
  - a. Update the configuration as needed.
  - b. **Inactive:** Select checkbox to inactive the rule.
5. Click **Save**.

### Deleting Transaction Diversions Rules

1. From the Administration menu, select **Financial**, select **Transaction Management**, and then select **Transaction Diversion Rules**.
2. Enter search criteria and click **Search**.
3. Select the diversion rule, click the vertical ellipsis and then click **Delete**.
4. Click **Delete** to confirm.

## Revenue Buckets Overview

### Prerequisites for Revenue Buckets

Revenue buckets allow you to group the various revenue, non-revenue and payment transaction codes configured at your property into buckets. Rather than displaying or outputting totals per transaction code, revenue buckets display or output the summarized total per bucket. The following buckets types are seeded on provisioning for the following uses:

- BILLING: Revenue summary in Billing
- PROFILE: Revenue and payment buckets in a profile's stay revenue details
- DEFAULT: Revenue and payment buckets for exports files generated
- COMP: Revenue buckets for Comp Accounting transaction codes; used to consolidate charges in reports and exports **Gaming**

See [Guest Stay Statistics](#) for more information.

### Comp Revenue Buckets

#### **Gaming**

When the Oracle Hospitality OPERA Comp Accounting Cloud Service is active, you can configure comp revenue buckets that contain the comp revenue statistics for a guest's comp transactions. You can also associate one or more comp transaction codes to a comp revenue bucket and set up comp revenue buckets for each property as well as copy them to other properties.

To access the **Comp Revenue Buckets** feature, select the **Administration** menu, select **Financial**, select **Transaction Management**, and then select **Revenue Bucket Codes**.

## Prerequisites for Revenue Buckets

### OPERA Controls

**Group:** Profile

**Functions:** Profile Revenue Buckets.

## Configuring Revenue Buckets

When the Oracle Hospitality OPERA Comp Accounting Cloud Service is active comp transaction codes (see Comp Transaction Codes [Comp Transaction Codes](#) can be assigned to revenue buckets of the bucket type 'COMP'.

**Gaming** When the Oracle Hospitality OPERA Comp Accounting Cloud Service is active, [comp transaction codes](#) can be assigned to revenue buckets of the bucket type 'COMP.'

### Adding Revenue Buckets

1. From the **Administration** menu, select **Financial**, select **Transaction Management** and then select **Revenue Bucket Codes**.

2. Click **New** and complete the following:
  - a. **Property**: Select or confirm the property.
  - b. **Bucket Type**: Select the bucket type from the list. See [Configuring Revenue Bucket Types](#).
  - c. **Code**: Enter a code for the bucket.
  - d. **Description**: Enter a description for the bucket .
  - e. **Bucket Value**: Enter an optional bucket value.
  - f. In the **Transaction Codes** panel, select the transaction codes you want to include in this revenue bucket:
    - i. Enter the transaction code in Available filter or select codes from the list and click **Go**.
    - ii. Highlight the transaction codes in the **Available** panel that you want to include in this revenue bucket.
    - iii. Click **>** to move the selected transaction codes to the **Selected** panel.
  - g. Click **Save** or **Save and Continue** to add another revenue bucket.
3. Click **Save**.

#### Editing Revenue Buckets

1. From the **Administration** menu, select **Financial**, select **Transaction Management** and then select **Revenue Bucket Codes**.
2. Enter search criteria and click **Search**.
3. Select the bucket code, click the vertical ellipsis and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Revenue Buckets

1. From the **Administration** menu, select **Financial**, select **Transaction Management** and then select **Revenue Bucket Codes**.
2. Enter search criteria and click **Search**.
3. Select the bucket code, click the vertical ellipsis and select **Delete**.
4. Click **Delete** to confirm

#### Copying Revenue Buckets

[Copying Configuration Codes to Multiple Properties](#)

## Configuring Revenue Bucket Types

In addition to the seeded revenue bucket types, additional bucket types can be configured for generic fiscal payload/FLIP functionality.

#### Adding Revenue Bucket Types

1. From the **Administration** menu select **Financial**, select **Transaction Management** and then select **Revenue Bucket Types**.

2. Click **New** and complete the following:
  - a. **Property**: Enter or select the property.
  - b. **Code**: Enter the code for the revenue bucket type.
  - c. **Description**: Enter a description for the revenue bucket type.
  - d. Click **Save** or **Save and Continue** to add another.

#### Editing Revenue Bucket Types

1. From the **Administration** menu select **Financial**, select **Transaction Management** and then select **Revenue Bucket Types**.
2. Enter search criteria and click **Search**.
3. Select the revenue bucket type, click the vertical ellipsis and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Revenue Bucket Types

1. From the **Administration** menu select **Financial**, select **Transaction Management** and then select **Revenue Bucket Types**.
2. Enter search criteria and click **Search**.
3. Select the revenue bucket type, click the vertical ellipsis and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Routing Codes

### Prerequisites for Routing Codes

For each reservation, OPERA Cloud has up to 8 separate "cash" billing windows (1-8) to which charges can be posted. When the OPERA Comp Accounting Cloud Service is active an additional 8 billing windows are available (101-108) for comp charges. Charges can be automatically transferred to one of these billing windows using routing instructions.

Routing Codes allows you to group transaction codes into meaningful units in order to simplify the process of setting up charge [Managing Profile Routing Instructions](#).

**Table 13-25 Routing Codes Example**

Routing Code	Description	Transaction Codes
PH	Phone	3000, 3010, 3020
RT	Room & Tax	1000, 1010, 1020, 1030, 1040
FD	Food	2000, 2010, 2020, 2030, 2040, 2050
BV	Beverage	2005, 2015, 2025, 2035, 2045, 2055
FB	Food and Bev	2000, 2010, 2020, 2030, 2040, 2050, 2005, 2015, 2025, 2035, 2045, 2055

### Adding Routing Codes

1. From the Administration menu, select **Financial**, select **Transaction Management**, and select **Routing Codes**.
2. Click New and complete the following.
  - a. **Code**. Enter a code for the routing code.
  - b. **Description**. Enter a Description of the code.
  - c. **Apply To**. Select the default days of the week.
  - d. **Routing Limits**. Select the default Routing Limits. Routing Limits impose a limit on the total value of transactions that can be routed. (Available when the Routing Limits OPERA Control is active).
    - i. **Amount**: specify a maximum amount for this routing instruction. The limit accepts the total amount you can route for any one reservation using this routing instruction. No limit is set if you leave the Limit field blank.
    - ii. **Percentage**: select this to route a percentage of the transactions associated with the routing instruction. For example, enter 10 in this field to route 10% of each transaction. Generates such as taxes and service charges are also split by the designated percentage.
    - iii. **Covers**: specify a default number of covers to auto-populate in the Covers field on the Routing Instructions screen when this routing code is selected. Covers indicate the number of charges or transaction codes the routing code covers. When charges via an interface are made against any of the transaction codes included in the routing code, OPERA Cloud divides each charge by the number of covers specified by the interface. If the number of POS covers is greater than or equal to the number of covers on the routing instruction, the per-cover charge is multiplied by the number of covers on the routing instruction and that amount is routed. If the number of POS covers is less than the number of covers on the routing instruction, the charge is not routed.
    - iv. **Apply (Limit) Per Day**. Select the check box to generate a separate routing instruction for each day of the stay. This may be useful, for example, when you want the routing limit to apply to each day of the stay rather than to the entire stay or to a range of dates.
  - e. **Transaction Codes**. Select the transaction codes to include in the routing code.
    - i. From the **Available** panel search and select the transaction code(s) to associate with the new routing code (hold down the Ctrl key to select multiple transaction codes).
    - ii. Click > to move the selected codes to the **Selected** panel.
    - iii. You can filter the Available list or the Selected list of transaction codes by entering a transaction code in the Filter field and clicking Go.
3. Click **Save**.

### Editing Routing Codes

1. From the Administration menu, select **Financial**, select **Transaction Management**, and select **Routing Codes**.
2. Enter search criteria for routing codes and click **Search**.
3. In the search results, select the routing code and click the vertical ellipsis and select **Edit**.

4. Update the routing code configuration
5. Click **Save**.

#### Deleting Routing Codes

1. From the Administration menu, select **Financial**, select **Transaction Management**, and select **Routing Codes**.
2. Enter search criteria for routing codes and click **Search**.
3. In the search results, select the routing code and click the vertical ellipsis and select **Delete**.
4. Click **Delete** to confirm.

#### Copying Routing Codes

When the OPERA Multi-property Cross Reservation Cloud Service is active you can copy routing codes to other properties from a [hub location](#).

To copy routing codes to another property, the transaction codes included in the routing code must exist at the "target" property.

See [Copying Configuration Codes to Multiple Properties](#)

## Prerequisites for Routing Codes

#### OPERA Controls

**Group:** Cashiering

**Functions:**

- Routing
- Routing Limits

#### OPERA Cloud Tasks

Financial Transactions

Routing Codes

- New/Edit Routing Codes
- Delete Routing Codes

## Configuring Transaction Code Groups

Transaction groups are required for defining the transaction code type for transaction codes linked to the group via a subgroup. You can define tax generates at the group level per property; all transaction codes linked to the group will inherit the generates in the group.

#### Adding Transaction Code Groups

1. From the Administration menu, select **Financial**, select **Transaction Management**, and then select **Transaction Groups**.

 **Note:**

With an active multi-property subscription, new Transaction Groups can only be created by clicking the **Template** tab. Once created, you can copy the configuration to specific properties using the Copy action. For more information, see [Copying Configuration Codes to Multiple Properties](#).

2. Click the vertical ellipsis and then click **New** and complete the following fields:
  - a. **Revenue**. Defines the group as Sales (revenue and non-revenue) Charges.
  - b. **Payment**. Defines the group as Payment.
  - c. **Wrapper**. Defines the group as Wrapper (package). Only 1 group is required.
  - d. **Code** : Enter an alpha-numeric code.
  - e. **Description** : Enter a description of the transaction code group.
  - f. Optionally enter a display sequence for the code when displayed as a list.Click **Save**.

#### Editing Transaction Code Groups

1. From the Administration menu, select **Financial**, select **Transaction Management**, and then select **Transaction Groups**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis** and select **Edit**.
4. Make the desired changes.
5. Click **Save**.

#### Deleting Transaction Code Groups

1. From the Administration menu, select **Financial**, select **Transaction Management**, and then select **Transaction Groups**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis** and select **Delete**.
4. To confirm, click **Delete**.

## Configuring Transaction Code Subgroups

Transaction codes are linked to a subgroup, a transaction subgroup is then linked to a transaction-group. For each transaction group, you must have at least one transaction subgroup. Tax generates can be defined at the subgroup level per property and will be inherited by all transaction codes linked to the subgroup.

#### Adding Transaction Code Subgroups

1. From the Administration menu, select **Financial**, select **Transaction Management**, and then select **Transaction Subgroups**.
2. Click the vertical ellipsis and then click **New** and complete the following fields:

- a. **Code** : Enter an alpha-numeric code.
  - b. **Description** : Enter a description of the transaction code group.
  - c. **Transaction Group** : Select a transaction group from the list.  

You must link the subgroup to a transaction group. After you link to a group, the Type field value will display the group's transaction code type: Revenue (Sales), Payment, or Wrapper.
  - d. Optionally, enter a display sequence to determine or order of this subgroup when it appears in a list.
3. Click **Save**.

### Editing Transaction Code Subgroups

1. From the Administration menu, select **Financial**, select **Transaction Management**, and then select **Transaction Subgroups**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis** and select **Edit**.
4. Make the desired changes.
5. Click **Save**.

### Deleting Transaction Code Subgroups

1. From the Administration menu, select **Financial**, select **Transaction Management**, and then select **Transaction Subgroups**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis** and select **Delete**.
4. To confirm, click **Delete**.

## Tax Generates

Generates are rules used to calculate and post additional charges, such as service charges and taxes, when a particular sales charge transaction code is posted to guest, package or AR ledgers.

Generates can be configured in various ways

- Calculate as a percentage of the charge.
- Post a flat amount each time the charge (any amount) is posted.
- Calculate using a predefined function (Country specific).
- Calculated per tax type, which refer to the specific reservation or profile to determine the generate rule(s) to process.

The **Generates Inclusive** checkbox on each sales charge [transaction code](#) determines if the generated charges are posted additionally and separately to the base charge amount (referred to as Exclusive Tax) , or included in the base charge amount (referred to as Inclusive tax). If a negative charge is posted (for example a rebate), then negative generated charges also post according to the generate rules.

You can setup Generates on a [transaction code group](#), [transaction code subgroup](#) or individual sales charge transaction codes. If all charges are subject to the same type of tax at the same tax rate, then the generate can be configured on the transaction group and inherited by all transaction codes linked back to the transaction group via subgroups. If tax only applies to some charges, then the tax generate can be configured on sub-groups or individual transaction codes. When a generate is configured at the group level and a different generate is configured on a subgroup, the transaction codes linked to subgroup inherit both the generates. You can add as many generates to a transaction code, transaction group, or transaction subgroup as necessary.

Furthermore, you can use the result of one generate calculation as the basis for calculating subsequent generates. For example, assume you want to calculate a tax based on the total that results from the posted charge amount plus a service charge amount. In this scenario, the total posted amount resulting from the addition of the service charge can be stored in a subtotal "bucket" for calculation of the tax. If you plan to use subtotals in this way, the order in which you create generate rules is important to ensure subtotals from one generate calculation are available for the next calculation. Three subtotal "buckets" are available: Subtotal 1, Subtotal 2, and Subtotal 3. To store the result of a generate calculation in one of these buckets for use in a later generate calculation, select the appropriate Subtotal options. The value of a specific Subtotal bucket is cumulative if the following generate calculations also store their results in the same Subtotal bucket. The base amount of the posting is held in each bucket that has been flagged to include the transaction amount. If the bucket has not been flagged to include the transaction amount, the starting amount for that bucket is zero.

When the Advanced Generates OPERA Control is active you can setup additional options for Generates; such as Days to Stop Posting and Adjustment options.

When the Tax Types OPERA Control is active you setup Generate rules for each [tax type](#) specified on profiles or reservations; tax type Generate rules support tax exemption and tax concession.

**Note:**

You cannot configure Generates for transaction codes linked back to a Transaction Group configured as Payment or the transaction code linked back to a transaction group configured as Wrapper.

## Configuring Generates

### Adding Non-Tax Type Generates

You can configure [generates](#) for individual transaction codes, a transaction subgroup, or a transaction group.

**Note:**

The Generates panel is not enabled for transaction codes linked to a Wrapper Group or a Payment Group.

The percentage field on the Generates screen only allows values from -100.00 to 100.00.

 **Note:**

In the event that -100.00 percent is configured as an Exclusive Generate for a transaction code and is then edited to set Generates Inclusive = Y, the change is saved. However, the tax would be calculated as 0.00 amount.

1. From the **Administration** menu, select **Financial**, select **Transaction Management**, and then select one of the following: **Transaction Codes**, **Transaction Groups**, or **Transaction Subgroups**.
2. Enter search criteria and click **Search**.
3. Select the **Transaction Code**, **Transaction Group**, or **Transaction Subgroup** for which to create generates, click the vertical ellipsis **Actions** menu, and select **View**.
4. Navigate to the **Generates** panel and click **New**.
  - a. **Generate Code:** Select the charge transaction code to be generated and posted.
  - b. Select the **Generate Type**.
    - i. **Non-Tax Type:** Select to set up a regular Generate.
  - c. Select **Posting Rule Details**:
    - i. **Percentage:** Select if the generate is a percentage of the transaction charge amount. In the Calculation On field, select the down arrow and select the value against which the percentage should be applied. Usually the percentage is applied to the base amount of the posting. However, you can also select the value stored in Subtotal 1 (S1), Subtotal 2 (S2), or Subtotal 3 (S3) if you are calculating a Generate on result of another Generate.
      - i. **Percentage:** Enter a percentage.
      - ii. **Calculation On:** Select a bucket holding the amount on which to calculate the Generate (Base, S1, S2, S3). This is used to calculate tax on tax.
      - iii. **Use Tax Bracket:** Select to use a tax bracket.
    - ii. **Amount:** Select if the generate is a flat amount.
      - i. **Amount:** Enter a flat amount.
    - iii. **UDF Function (Predefined Function):** Select if the generate is calculated based on a predefined function.
      - i. **UDF Function:** Select a predefined function from the list.
  - d. **Add Calculated Amount to:** Select to store the results of a calculation in a bucket for use by a subsequent generate calculations. The value of a specific Subtotal bucket will be cumulative if later generate calculations also store their results in the same Subtotal bucket. The base amount of the posting is held in each bucket flagged to include the transaction amount.
  - e. **Advance Generate Handling** (available when the Advanced Generates OPERA Control is active):

- i. **Do not post after (n) days:** Enter a value after which the generate stops posting.
- ii. Adjustment Options.
  - **During End of Day:** Automatically adjust any posting with this transaction code used as the generate on the nth day during the End of Day Process. When an adjustment is made for this adjustment type, OPERA Cloud automatically inserts a Checkout alert for you. The message indicates an adjustment has been completed for this guest. If the Do Not Post After Days field is set to 30 and the adjustment type is set to During End of Day, the adjustment will be made for any posting of that generate within those 30 days. Stopping of generates will take place during the End of Day Sequence on the day after the stop days when the adjustment level type is During End of Day. If the generate indicates Do Not Post After Days of 30, the generate will not post during the End of Day Sequence on the 31st day.
  - **Prompt at Checkout:** If you select the Checkout button in the Billing screen or perform an Early Departure, you are prompted accordingly. OPERA Cloud also tracks the adjustments that are already made. That way you do not receive the message to adjust twice if there is nothing to adjust. During the checkout process when you select the Checkout button, if the generate is marked as Prompt at Checkout, the Adjust Generates screen appears with this prompt: "The following generates have been evaluated for adjustment. Please select/unselect and press OK to continue." Mark the generates you want to adjust in the X column and select the OK button. The adjustment prompt appears before the Payment screen appears or the checkout process is completed. If the guest bill is 0.00, and there are adjustments, the prompt appears before the guest checkout process starts.
  - **No Adjustment:** The adjustment is not made automatically, and you will not be prompted with a message during checkout. This is the default type.

5. Click **Save**.

### Adding Tax Type Generates

Tax types are available when the Tax Type OPERA Control is active. Tax types enable you to set up unique Generate calculation rules for each [tax type](#).

To set up tax exemption, select 'Do Not Post' as the posting rule for the specific tax type.

#### **Note:**

The Generates panel is not enabled for transaction codes linked to a Wrapper Group or a Payment Group.

1. From the **Administration** menu, select **Financial**, select **Transaction Management**, and then select one of the following: **Transaction Codes**, **Transaction Groups**, or **Transaction Subgroups**.
2. Enter search criteria and click **Search**.
3. Select the **Transaction Code**, **Transaction Group**, or **Transaction Subgroup** for which to create generates, click the vertical ellipsis **Actions** menu, and select **View**.
4. Navigate to the **Generates** panel and click **New**.

- a. **Generate Code:** Select the charge transaction code to be generated and posted.
- b. Select the **Generate Type**.
  - i. **Tax Type:** Select to set up Generates per tax type.
- c. Select a **Tax Type Rule**, click the vertical ellipsis **Actions** menu, and select **New**.
- d. Posting Rule Details:
  - i. **Percentage:** Select if the generate is a percentage of the transaction charge amount.
    - i. **Start Date:** Enter a start date for the generate to commence.
    - ii. **Percentage:** Enter a percentage.
    - iii. **Calculation On:** Select a bucket holding the amount on which to calculate the Generate (Base, S1, S2, S3). This is used to calculate tax on tax.
    - iv. **Use Tax Bracket:** Select to use a tax bracket.
  - ii. **Amount:** Select if the generate is a flat amount.
    - i. **Amount:** Enter a flat amount.
  - iii. **UDF Function** (Predefined function): Select if the generate is calculated based on a predefined function.
    - i. **UDF Function:** Select a predefined function from the list.
  - iv. **Do Not Post:** Do not calculate or post a generated charge (exempt from the tax/charge).
- e. **Add Calculated Amount to:** Select to store the results of a calculation in a bucket for use by a subsequent generate calculations. The value of a specific Subtotal bucket is cumulative if later generate calculations also store their results in the same Subtotal bucket. The base amount of the posting is held in each bucket flagged to include the transaction amount.
- f. **Advance Generate Handling** (available when the Advanced Generates OPERA Control is active):
  - i. **Do not post after (n) days:** Enter a value after which the generate stops posting.
  - ii. Adjustment Options.
    - **During End of Day:** Automatically adjust any posting with this transaction code used as the generate on the nth day during the End of Day Process. When an adjustment is made for this adjustment type, OPERA Cloud automatically inserts a Checkout alert for you. The message indicates an adjustment is completed for this guest. If the Do Not Post After Days field is set to 30, and the adjustment type is set to During End of Day, the adjustment is made for any posting of that generate within those 30 days. Stopping of generates takes place during the End of Day Sequence on the day after the stop days when the adjustment level type is During End of Day. If the generate indicates Do Not Post After Days of 30, the generate will not post during the End of Day Sequence on the 31st day.

- **Prompt at Checkout:** If the Checkout button is selected in the Billing screen, or if an Early Departure is performed, you are prompted accordingly. OPERA Cloud also tracks the adjustments that are already made. That way you do not receive the message to adjust twice if there is nothing to adjust. During the checkout process when you select the Checkout button, if the generate is marked as Prompt at Checkout, the Adjust Generates screen appears with this prompt: "The following generates have been evaluated for adjustment. Please select/unselect and press OK to continue." Mark the generates you want to adjust in the X column and select the OK button. The adjustment prompt appears before the Payment screen appears or the checkout process is completed. If the guest bill is 0.00 and there are adjustments, the prompt appears before the guest checkout process starts.
  - **No Adjustment:** The adjustment is not made automatically, and you will not be prompted with a message during checkout. This is the default type.
5. Click **Save**.
  6. Repeat for each Tax Type Rule.

### Editing Generates

#### Note:

If only the View action is available, the generate is inherited from another level and cannot be edited.

1. From the **Administration** menu, select **Financial**, select **Transaction Management**, and then select one of the following: **Transaction Codes**, **Transaction Groups**, or **Transaction Subgroups**.
2. Enter search criteria and click **Search**.
3. Select the **Transaction Code**, **Transaction Group**, or **Transaction Subgroup** for which to create generates, click the vertical ellipsis **Actions** menu, and select **View**.
4. Navigate to the **Generates** panel.
5. Select the Generate, click the vertical ellipsis **Actions** menu, and select **Edit**.
6. Update details.
7. Click **Save**.

### Deleting Generates

#### Note:

If only the View action is available, the generate is inherited from another level and cannot be edited.

1. From the **Administration** menu, select **Financial**, select **Transaction Management**, and then select one of the following: **Transaction Codes**, **Transaction Groups**, or **Transaction Subgroups**.
2. Enter search criteria and click **Search**.

3. Select the **Transaction Code**, **Transaction Group**, or **Transaction Subgroup**, click the vertical ellipsis **Actions** menu, and select **View**.
4. Navigate to the **Generates** panel.
5. Select the **Generate**, click the vertical ellipsis **Actions** menu, and select **Delete**.
6. Click **Delete** to confirm.

#### Testing Generate Calculations

1. From the Administration menu, select **Financial**, select **Transaction Management**, and then select one of the following: **Transaction Codes**, **Transaction Groups**, or **Transaction Subgroups**.
2. Enter search criteria and click **Search**.
3. Select the **Transaction Code**, **Transaction Group**, or **Transaction Subgroup**, click the vertical ellipsis **Actions** menu, and select **View**.
4. Navigate to the Generates panel.
5. Click the vertical ellipsis **Actions** menu and select **Calculate Posting**.
  - a. Enter **Posted Amount**.
  - b. Select a **Tax Type** from the list (available when the Tax Type OPERA Control is active).
  - c. Select a **Room Type** from the list.
  - d. Click **Search**.
  - e. The Generate calculations appear for the values entered; check the result.

#### Tax Inclusive Example:

- Total Base / Transaction amount -> 50.00
- Inclusive Tax 1 (6.0%) -> 2.67
- Inclusive Tax 2 (6.5%) -> 2.89
- Net Amount -> 44.44

For the example above, OPERA Cloud calculates the amounts like this:

1. 50.00 (Tax1 6.0%, Tax2 6.5%)
2.  $50.00/1.125$  (add 6.0% + 6.5% =>12.5%; to get the inclusive amount, divide by 1.125) = 44.44444444 (base amount)
3.  $(44.44444444 * 1.06) - 44.44444444$  => 2.666666666667
4.  $(44.44444444 * 1.065) - 44.44444444$  => 2.888888888889
5.  $44.44444444 + 2.666666666667 + 2.888888888889$  => 50.00

## About Rounding Factors

### [Prerequisites for About Rounding Factors](#)

Due to the discontinuation of smaller denominated coins in some currencies, it may be necessary to setup currency rounding for cash payments.

Activating the Rounding Factor OPERA Control , enables two additional OPERA Control settings to setup payment rounding:

- **Rounding Multiple (Factor)** - sets the rounding factor to be used. Available factors are 5, 10, 50, 100, 1000, and 10000.
- **Rounding Multiple (Transaction) Code** - defines the sales charge or (other) payment transaction code used to post the rounding difference.

 **Note:**

When Rounding Difference is setup to post as payment, these payments are included in the Miscellaneous Payments Cashier Report.

Rounding is only applied to the payment transaction codes that you designate for rounding; typically Cash. For more information, see [Configuring Transaction Codes](#)

### Feature Behavior

At settlement (Check Out, Early Departure, Quick Check Out) or when posting payment, OPERA Cloud applies the rounding factor (as appropriate for the payment method selected) before displaying the **Amount** field in the Payment screen.

The rounding difference is posted only if the balance due is an amount that needs to be rounded and is being fully paid off, for example, 25.22 is rounded to 25.20 for a bill being paid in full.

Note: If the payment method is (or is changed to) a payment method that does not use the rounding factor, OPERA Cloud displays the regular payment amount. When rounding is applied, the Billing screen displays the rounding difference posted as well as the rounded payment.

Payments posted in foreign currency are not subject to rounding.

The rounding difference posting cannot be edited, deleted, transferred independently, adjusted or split. If the payment that posted a rounding difference is transferred, the rounding difference posting is also transferred.

The folio generated will show the rounding adjustment posted along with the payment. A TOTAL\_ROUNDING merge code may be added to the footer section of your customized folio template to show the net rounding applied to the payments posted.

Other areas where the rounding factor is applied include:

- Passerby payments
- Post It payments
- Currency exchange
- AR payments

 **Note:**

When performing folio settlement and posting partial payments using various payment methods, if the final amount is .02 or .01, OPERA Cloud automatically posts a rounding difference irrespective of the earlier payment methods. This is because amounts such as .02 or .01 are not considered when using credit cards or cash, besides the fact that OPERA Cloud will always round down to 0.00 and cannot post 0.00 amounts. For example, Suppose a billing window has a balance of .01 or .02 when selecting Payment or Settlement. In that case, it will not display the Payment screen, and a rounding difference gets posted automatically. This payment or settlement is applicable for Passerby, AR, POST IT, and so on.

### Rounding Examples

 **Note:**

This feature uses a computational function similar to MROUND used in Microsoft Excel.

`MROUND (number, multiple)`

where number is the number to round and multiple is the multiple to round the number to MROUND(10,3) rounds 10 to the nearest multiple of 3, or 9.

MROUND rounds up, away from zero, if the remainder after dividing the number by multiple is greater than or equal to half the value of multiple.

**Table 13-26 Rounding factor = 5; two decimal currency**

Value Before Rounding	Value After Rounding	Notes
80.01	80.00	
80.03	80.05	Rounds up or down to the nearest multiple of 5.
80.07	80.05	
80.08	80.10	

**Table 13-27 Rounding factor = 5; zero decimal currency**

Value Before Rounding	Value After Rounding	Notes
120.57	121	The rounding functionality executes prior to rounding due to the decimal setting.
120.47	120	

**Table 13-28 Rounding factor = 10; zero decimal currency**

Value Before Rounding	Value After Rounding	Notes
14	10	Rounds up or down to the nearest multiple of 10.
26	30	

**Table 13-29 Rounding factor = 50; zero decimal currency**

## Prerequisites for About Rounding Factors

### OPERA Controls

**Group:** Cashiering

**Function:** Rounding Factor

**Setting:**

- Rounding Multiple (Factor)
- Rounding Multiple (Transaction) Code

## Configuring Payment Methods

Use Payment Methods to define the payment methods accepted at your property. Payment methods are referenced in [reservations payment instructions](#). You can define a credit limit to each payment method and other features related to payment methods. The setup of the referenced payment [transaction code](#) determines the availability of the payment method for Deposits, Billing and Accounts Receivable payments.

### Adding Payment Methods

1. Select the **Administration** menu, select **Financial**, select **Transaction Management** and then select **Payment Methods**.
2. Click **New** and complete the following:
  - a. **Property:** Enter or select the property.
  - b. **Code:** Enter an alpha-numeric code. The code entered here is displayed for selection when an agent is prompted for a payment method while booking a reservation and when checking in the reservation.
  - c. **Description:** Enter a description for the payment method.
  - d. **Transaction Code:** Select a payment transaction code from the list. For more information, see [Configuring Transaction Codes](#).
  - e. **Credit Card Type:** Select a credit card type from the list when the payment method is a credit card.
  - f. **Credit Limit:** Enter a default credit limit.
  - g. **Merchant Number:** Enter the merchant number when the payment method is a credit card.
  - h. Surcharge (Available when the Credit Card Surcharge OPERA Control is active).
    - i. **Surcharge Percentage:** Enter the percentage to charge for using this credit card payment method. This percentage will be added to the total amount that the guest is using the credit card to pay for.
    - ii. **Surcharge Minimum:** Enter the minimum payment amount before the credit card surcharge percentage is to be added.
  - i. **Sequence:** The number you enter here determines the position of the payment method code in the list of payment methods.
  - j. **No Post:** Select this check box to default the reservation payment instructions No Post checkbox when this payment method is selected as the payment type. No Post status restricts charges being posted to the reservation account.. For more information, see [Managing Reservation Payment Instructions](#).
  - k. **Reservation:** Select this check box to allow the payment type to appear as a payment option from the [Reservation Payment Instructions](#) and [block rooming list](#).

- I. **Card Information:** Enter the following details for credit card payment methods. Values will default based on the **Credit Card Type** selected.
  - i. **Card Length:** Enter the total number of characters used in the credit card number for this card type
  - ii. **Card Prefix:** If applicable, enter the common numbers that always precede the user's unique credit card number for this credit card brand. If the brand includes multiple prefixes, separate the prefix entries with a comma.
  - iii. **Validation Rule:** Select a validation rule from the list. Select the method to use for initial verification - Mod 7, Mod 10, User Defined, or No Validation.
  - iv. In the BIN range grid, enter the **Card Range From** and **Card Range To** numbers that define the BIN number ranges of valid credit card numbers that begin with each card prefix you specified in Card Prefix.
  - v. To Add a row, click **New**.
  - vi. To Delete a row, click the vertical ellipsis **Actions** menu and select **Delete**.
3. Click **Save**.

### Editing Payment Methods

1. Select the **Administration** menu, select **Financial**, select **Transaction Management** and then select **Payment Methods**.
2. Enter search criteria and click **Search**.
3. In the search results, click the vertical ellipsis **Actions** menu and select **Edit**.
4. In the **Manage Payment Method** panel, edit the required information. Property, Code and Transaction Code fields are not editable in this panel.
5. In the **Card Information** panel, edit the required information and click **Save**.

### Deleting Payment Methods

1. Select the **Administration** menu, select **Financial**, select **Transaction Management** and then select **Payment Methods**.
2. Enter search criteria and click **Search**.
3. In the search results, click the vertical ellipsis **Actions** menu and select **Delete**.
4. In the **Manage Payment Method** panel, delete the required information. Property, Code and Transaction Code fields are not editable in this panel.
5. In the **Card Information** panel, delete the required information and click **Save**.

### Copying Payment Methods

When the OPERA Multi-property Cross Reservation Cloud Service is active, you can copy Payment Methods to other properties from a Hub location using the **Copy** action. For more information, see [Copying Configuration Codes to Multiple Properties](#).

## Configuring Transaction Code Protection (Ownership)

[Prerequisites for Transaction Code Protection](#).

Transaction Code Protection enables you to configure a Transaction Code for Property Ownership or Central Ownership. This feature is useful for a property that would like to limit what values can be changed on Transaction Codes as well as which users are allowed to make those changes.

The Transaction Code Protection screen shows the fields and checkboxes configured for Property and/or Central Ownership in the property.

### Adding Transaction Code Protection

1. From the **Administration** menu, select **Financial**, select **Transaction Management**, and then select **Transaction Code Protection**.
2. Enter or select a **Property** to search for Transaction Code Protection configuration and click **Search**.
3. Click **Edit** to modify the ownership of a Transaction Code field or checkbox.
4. Under Transaction Code Ownership, select the checkboxes under the **Property** column if you want property ownership of the transaction code or select the checkboxes under **Central** if you want ownership to be central. You can also select the checkboxes for both **Property** and **Central** for each transaction code.
5. Click **Save**.

## Configuring Articles

[Prerequisites for Managing Articles](#)

One transaction code can sometimes serve as an umbrella for multiple items or articles, which can be posted using that transaction code. For example, a single mini bar food transaction code might cover potato chips, crackers, peanuts, pretzels, and so on.

By using articles, you can specify an individual article number for each of the food items and specify a default price, just as you can for transaction codes. Instead of posting a lump sum to the mini bar food transaction code, you have an option to post each individual article, its quantity and price. In the example above, rather than posting 7.75 to mini bar food, you can post 5.00 for two bags of peanuts and 2.75 for potato chips. Two separate charges to the mini bar food transaction code appear on the guest's bill (one for 5.00 and one for 2.75).

Articles can also be configured to display in Post-It, which provides you with a point-of-sale interface on desktops, tablets and mobile phones for posting charges to a cart and processing the settlement. Display colors can be used to differentiate and group articles appearing in Post-It; for example, food items displayed in green and beverage items displayed in blue. For more information on Charge-It, see [Charging Purchases Using Post It](#).

### Adding Articles

1. Select the **Administration** menu, select **Financial**, select **Transaction Management** and then select **Articles**.
2. Click **New** and enter the following details:
  - a. **Property**: Select or confirm the property.
  - b. **Code**: Enter a numeric code for an article. Codes must be at least 2 characters in length. A maximum of 8 digits.
  - c. **Transaction Code**: Select a transaction code from the list to link article to sales charge transaction code to post article charge.
  - d. **Description**: Enter a description .
  - e. **Price**: Enter a default price. When a posting is made using this article, the amount specified in this field automatically appears in the Posting screen Amount column. It is also the price displayed in Charge-It.
  - f. **Available in Post It**:. Select this check box to display this article in Charge-It. The Display Color and UPC fields become editable when you select this option.
    - i. **Display Color**: Select the display color from the list of colors.
    - ii. **UPC**: Enter a Universal Product Code barcode value . Manually enter a numeric value or scan item with barcode scanner to populate the field. This value must be unique for each article and is typically 12 digits. Within Charge-It the barcode on items can be scanned in order to post the article to the cart.
  - g. **Sequence**: Enter a sequence. If no sequence number is assigned to an article, it is displayed in alphabetical order by Description following those article codes that have a sequence number.
3. Click **Save**.

### Editing Articles

1. Select the **Administration** menu, select **Financial**, select **Transaction Management** and then select **Articles**.
2. Enter search criteria and click **Search**.
3. Select the article, then click the **vertical ellipsis** and select **Edit**.

- a. Update article configuration
  - b. **Inactive:** Select this check box to inactive the article; inactive articles are no longer displayed in list or Post It.
4. Click **Save**.

#### Deleting Articles

1. Select the **Administration** menu, select **Financial**, select **Transaction Management** and then select **Articles**.
2. Enter search criteria and click **Search**.
3. Select the article, then click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## About Revenue Type Mapping

#### [Prerequisites for Configuring Revenue Type Mapping](#)

Revenue Type Mapping configuration is used when generating the proforma invoice and in [Event Posting](#). When the proforma invoice is generated, the revenue type mapping provides the ability to calculate the postings (including tax generates) configured in the mapping as well as on the actual transaction code, which provides a more accurate estimate of charges. In Event Posting, the revenue type mapping determines which transaction codes are used based on the event type, space, catering only value, and revenue type.

## Prerequisites for Configuring Revenue Type Mapping

#### OPERA Controls

**Group:** Events

**Functions:** Catering Events

#### OPERA Cloud Tasks

**Group:** Financial Admin

**Tasks:** Financial Transactions

## Revenue Type Mapping

- New/Edit Revenue Type Mapping
- Delete Revenue Type Mapping

## Configuring Revenue Type Mapping

Revenue Type Mapping configuration is used when generating the proforma invoice and in Event Posting.

When generating the proforma invoice, the revenue type mapping enables the calculation of postings (including tax generates) configured in the mapping and on the actual transaction code, which provides a more accurate estimate of charges.

In Event Posting, the revenue type mapping determines which transaction codes are used based on the event type, space, catering only value, and revenue type.

### Adding Revenue Type Mapping

1. From the Administration menu, select **Financial**, select **Transaction Management**, and select **Revenue Type Mapping**.
2. Click **New** and complete the following:
  - a. **Property**. Enter or select the property.
  - b. **Revenue Type**. Select a revenue type from a list of types such as food, beverage, audio/visual equipment, and so on.
  - c. **Transaction Code**. Select a transaction code from a list of configured event transaction codes. Only transaction codes configured for Manual Posting are available.
  - d. **Event Type**. Select an event type from the list. Taking the revenue type mapping down to the event type level enables the hotel to break out the revenue on a transaction code level by event type. For example, you can have a transaction code for Banquet Breakfast and a separate code for Banquet Lunch.
  - e. **Space**. Select a space from a list of configured function spaces at the property. While not mandatory, this mapping might be valuable. For example, if the event takes place in a restaurant space, the hotel might want to charge the revenue to a different transaction code or revenue center.
  - f. **Catering Only**. Select a suitable option:
    - i. **Yes**. Indicates a catering-only revenue type cross reference (cross reference applies when Catering Only is selected on the business block).
    - ii. **No**. Indicates a revenue type cross reference that is not catering-only (cross reference applies when Catering Only is not selected on the business block).
    - iii. **Both**. Indicates the revenue cross reference is applicable to both types of business blocks.
  - g. **Service Charge Details**. If the transaction code already has a service charge configured as a generate, service charge details are not required here. Adding it in both places causes a duplicate service charge on the posting.
    - i. **Percentage**. Enter a percentage to apply a service charge as a percentage of the charges.

- ii. **Transaction Code.** Select a service charge transaction code from the list.
- iii. **Calculation Method.** Select **Net** to calculate the service charge on the net charge. Select **Gross** to calculate the service charge on the gross charge.
- h. Click **Save** or click **Save and Continue** to add another Revenue Type Mapping.

#### Editing Revenue Type Mapping

1. From the Administration menu, select **Financial**, select **Transaction Management**, and select **Revenue Type Mapping**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **revenue type mapping**, click the **vertical ellipsis**, and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Revenue Type Mapping

1. From the Administration menu, select **Financial**, select **Transaction Management**, and select **Revenue Type Mapping**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **revenue type mapping**, click the **vertical ellipsis**, and select **Delete**.
4. Click **Delete** to confirm.

#### Viewing Transaction Codes

1. From the Administration menu, select **Financial**, select **Transaction Management**, and select **Revenue Type Mapping**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **revenue type mapping**, click the **vertical ellipsis**, and select **View Transaction Code**.
4. See [Adding Transaction Codes](#).

#### Viewing Service Charge Transaction Codes

1. From the Administration menu, select **Financial**, select **Transaction Management**, and select **Revenue Type Mapping**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **revenue type mapping**, click the **vertical ellipsis**, and select **View Service Charge Transaction Code**.
4. See [Adding Transaction Codes](#)

Related Topics:

[Copying Revenue Type Mapping](#)

## Copying a Revenue Type Mapping

The copy function lets you copy a Revenue Type Mapping record to other Event Types and/or Spaces. If any of the selected Event Types or Spaces would create a duplicate record, the copy is not allowed.

1. From the Administration menu, select **Financial**, select **Transaction Management**, and select **Revenue Type Mapping**.
2. Select a **Property**, enter any additional search criteria, and click **Search**.
3. From your search results, select a **Revenue Type Mapping** record, click the **vertical ellipsis**, and select **Copy**.
4. In the Copy Revenue Type Mapping dialog, select **Event Type**, or **Space**, or **Catering Only**.
  - a. If you select Event Type, select the **Event Type** from the search list.
  - b. If you select Space, select the **Functional Space** from the search list.
  - c. If you select Catering Only, select the **catering Transaction Code** from the search list.
5. Click **Save**.

## Configuring Credit Card Types

### Prerequisites for Credit Card Types

Credit Card Types are two-character values that represent a specific type of credit card, such as a Master Card or Visa. Credit Card Types are available for selection when you configure a credit card [payment method](#).

Standard credit card types are automatically configured when your property is provisioned; you cannot delete these seeded Credit Card Types and can only edit the sequence value. However, you can create additional Credit Card Types. You can also delete the Credit Card Types you create as well as edit the description and sequence values.

### Adding a Credit Card Type

1. From the **Administration** menu, select **Financial**, select **Transaction Management**, and then select **Credit Card Types**.
2. Click **New** and complete the following:
  - a. **Property**: Enter or select a property for the Credit Card Type.
  - b. **Code**: Enter a code to identify the Credit Card Type, such as MC for Master Card.
  - c. **Description**: Enter a description of the Credit Card Type.
  - d. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing a Credit Card Type

1. From the **Administration** menu, select **Financial**, select **Transaction Management**, and then select **Credit Card Types**.
2. Enter search criteria, and click **Search**.

3. From search results, select the credit card type, click the vertical ellipsis **Actions** menu, and then select **Edit**.
4. Make the desired changes.
5. Click **Save**.

#### Deleting a Credit Card Type

1. From the **Administration** menu, select **Financial**, select **Transaction Management**, and then select **Credit Card Types**.
2. Enter search criteria, and click **Search**.
3. From search results, select the credit card type, click the vertical ellipsis **Actions** menu, and then select **Delete**.
4. Click **Delete** to confirm.

## Booking Administration

### Reservation Alerts

#### Prerequisites for Alerts

OPERA Cloud offers three kinds of alert messages.

- **Reservation Alert Messages** that you can manually set up on individual reservations.
- **Global Alerts** that generate automatically for all reservations that meet the alert condition.
- **Welcome Offer Alerts** that generate automatically for all reservations that meet the alert condition.

You can configure alerts to appear in the application or print directly to an email addressable printer. Also, configured alerts can trigger in any of the following areas (events): at check in, at check out, at edit of in house reservations, and when you open the reservation to make updates.

### Configuring Reservation Alert Messages

Reservation alerts provide information that appears on reservations during check in, check out, or any time you open the reservation of an in-house guest.

Alert messages are referenced in Global Alert rule-based alert configuration or used in the manual setup of Alerts on a reservation.

#### Adding Alert Messages

##### Note:

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Alert Messages are created by selecting the **Template** tab. Once created, you can copy Alert Messages to specific properties using the **Copy** action. Refer to [Copying Configuration Codes to Multiple Properties](#) for more information.

1. From the **Administration** menu, select **Booking**, select **Alerts**, and then select **Alert Messages**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the alert message
  - b. **Description**: Enter the alert message.
3. Click **Save**.

### Editing Alert Messages

1. From the **Administration** menu, select **Booking**, select **Alerts**, and then select **Alert Messages**.
2. Enter search criteria and click **Search**.
3. Locate the code in the search results and click the **Vertical Ellipsis** for that code, and then select **Edit**.
4. Edit the description or sequence.
5. Click **Save**.

### Deleting Alert Messages

1. From the **Administration** menu, select **Booking**, select **Alerts**, and then select **Alert Messages**.
2. Enter search criteria and click **Search**.
3. Locate the code in the search results and click the **Vertical Ellipsis** for that code, and then select **Delete**.
4. Click **Delete** to confirm.

## Global Alert (Rule) Definitions

When the Track It OPERA Control is active, you can setup global alerts to print an alert chit to a designated printer in Housekeeping or at Bell Desk or Valet based on the Track It Groups, when a Track It ticket is linked to a reservation. For more information, see [Configuring Track It](#)

Global alerts are rule-based alerts for reservations. Global alerts can be configured to appear in the application (in a pop-up or more subtly in a notification area) or generate directly to a printer somewhere in the property. You configure global alert definitions in the Administration Booking menu.

Unlike standard alerts manually added to reservations, global alerts are dynamic in nature, based on rules. The global alert generates only when a reservation meets the conditions set up for the alert rule; these conditions are based on attributes from either the reservation or the linked profile. You can set up global alerts to trigger in any of the following areas (events): at check in, at check out, at edit of in house reservations, and/or whenever the reservation is opened for update.

You also set up alert notifications to appear either on-screen or to print directly to an email-addressable printer. When configuring a printed alert, a customizable alert template is selected that defines the layout of the alert to be printed.

Global alert rules eliminate the need for users to manually add alerts to individual reservations for commonly required use-cases. Each Global Alert rule therefore consists of the following:

- WHO: Reservation & Profile Filter Condition
- WHAT: Alert Message
- WHEN: Trigger event – Reservation Edit, Check in, In house or Check out
- WHERE: Notification type – Screen or Printer

For example, you could configure a rule to display a message regarding long-term parking on-screen at check in when the Nights field is greater than or equal to 7. Or, you might configure a rule to print an alert to the printer in room service instructing staff to deliver a fruit basket at check-in when the reservation specials field contains codes for a fruit basket.

You must set up at least one Condition under which the global alert appears. The condition consists of an Attribute and an Operator that you select. You can edit, delete, or add multiple conditions.

## Configuring Global Alert Rules

### Adding Global Alert Rules

1. From the **Administration** menu, select **Booking**, select **Alerts**, and then select **Global Alert Definitions**.
2. In the Global Alert Definitions screen, click **New**.
3. In the Manage Global Alert Definition screen, enter the following details:
  - a. **Step 1 : Set Alert Definition**
    - i. **Property:** Select or confirm the property.
    - ii. **Code:** Select an alert message from the list see [Configuring Reservation Alert Messages](#). The message text define for the alert code appears in the **Description** field below where it can be updated.
    - iii. **Area:** Select when to generate the alert message.
      - Check-In
      - Check-Out
      - In-House
      - Reservation

#### Note:

When you select Check-In or Check-Out areas a **Stop Check-In** or **Stop Check-Out** check box appears. Select this check box to validate the condition defined in this Alert rule and stop the check-in or check-out process if the condition is true. This can be used to check for mandatory fields that are NULL in the reservation or linked profile and halt the check-in or check-out.

- iv. **Notification Options** : Select where to generate the alert message.
  - **Screen Notification:** Select this check box to generate alert notification to the user on-screen when the alert criteria are satisfied. This check box is selected by default.
  - **Printer Notification:** Select this check box to generate alert notification by printing a selected alert report at the designated email-addressable printer.
    - **Printer:** When the Print Notification option is selected, you must also select the printer. This printer must already be configured with Use Alert Printing selected on Printer setup. See [Configuring Printers](#).

- **Report:** You must also select a customized alert template. If no alert template is selected, the alphabetically first alert template auto-populates the report field. See [Stationery Report Groups](#).
- **Description:** Populates with the alert message text for the selected alert code. This message text can be edited.

#### b. Step 2 : Set Filter Conditions

Here, you can define the filter condition to specify to which reservations and linked profile the alert applies. When you complete all the steps and select the **Add** button; the condition statement you composed appears in the text box in the lower part of the screen. If necessary you can construct complex conditions that contain multiple (and possibly nested) statements.

Following is a description of the basic steps for building a set of conditions.

- i. Click **Add**: Select a field from the list that will be used as a filter for the condition. The field list contains fields from the reservation record and the primary linked profile record typically the guest's profile.
- ii. Select an **Operator**:
  - **Dates:** After, Before, Business Date, Is Between, Is Equal To, Is Equal to Business Date, Is Equal to Business Date +1.
  - **Time or Number Amounts:** Greater Than or Equal To, Is Between, Is Empty, Is Equal To, Is Not Empty, Is Not Equal To, Less Than or Equal To.
  - **Text Items:** Contains Multiple Values (exact match), Greater Than or Equal To, Is Between, Is Empty, Is Equal To, Is Not Empty, Is Not Equal To, Less Than or Equal To, Not Contains Multiple Values (exact match), Not Partially Contains Within (multiple values), Not Partially Contains at Beginning, Partially Contains Within (multiple values), Partially Contains at Beginning.
- iii. Specify a **Value(s)**: depending on the operator chosen select one or matching values.

Repeat these steps to add additional criteria if they are required, selecting either the **AND** or **OR** operator from the list:

- with the AND logical operator the Global Alert rule is only executed if ALL filter criteria specified are met.
- With the OR logical operator the Global Alert rule is executed if either or the entire filter criteria is met.

To nest statements click **ADD()** to place the condition in parentheses - these are evaluated first.

4. Click **Save**.

#### Editing Global Alert Rules

1. From the **Administration** menu, select **Booking**, select **Alerts**, and then select **Global Alert Definitions**.
2. Enter search criteria and click **Search**.
3. In the search results, select the **Alert code** then click the vertical ellipsis, and select **Edit**.

4. Update the configuration
5. Click **Save**.

#### Deleting Global Alert Rules

1. From the **Administration** menu, select **Booking**, select **Alerts**, and then select **Global Alert Definitions**.
2. Enter search criteria and click **Search**.
3. In the search results, select the **Alert code** then click the vertical ellipsis, and select **Delete**.
4. Click **Delete** to confirm

#### Alert Printing

Alerts can be displayed on screen and/ or printed to an [email-addressable printer](#). When you select the Printer Notification check box, you are required to specify the destination printer and select the customized alert template to be printed.

Merge codes available on the Alert template include:

- Alert Area
- Last Name
- First Name
- Room Number
- Alert Description
- Date/Time (Current at time of printing)
- Arrival Date
- Departure Date

## Configuring Welcome Offer Alerts Rules

#### Prerequisites for Alerts

Welcome offers provide guests with certain options to select on check in, based on the Welcome Offer Options OPERA Control.

#### Valid options:

- **eCoupons**: Select eCoupons to add to a reservation. See [Managing Reservation eCoupons](#).
- **Items**: Select item inventory to add to the reservation. See [Reservation Item Inventory](#).
- **Post It**: Select an article from the Post It screen, post and settle to a PM room. See [Charging Purchases Using Post It](#).

Welcome Offer Alert rules determine under which conditions the Welcome Offer is presented during check in. See [Arrivals - Managing Welcome Offers](#)

#### Adding Welcome Offer Alerts

1. From the **Administration** menu, select **Booking**, select **Alerts**, and then select **Global Alert Definitions**.

2. Click **New** and enter the following details:
  - a. In the **Set Alert Definition** section, complete the necessary alert definition fields:
    - i. **Property**: Enter or select the property.
    - ii. **Code**: Select the alert code for the welcome offer.
    - iii. **Description**: The description of the message to be displayed, by default upon check in.
    - iv. **Welcome Offer**: Select check box to indicate a Welcome Offer alert.
    - v. **Area**: Value defaults to Check in and the field is disabled.
    - vi. **Notification**: The Screen check box is automatically selected (Welcome Offer alerts can't be printed; print option is disabled).
  - b. In the **Set Filter Conditions** section:
    - i. Click **Add**
      - Set up the conditions that need to be satisfied for the Welcome Offer Alert to display.
      - See [Configuring Global Alert Rules](#).
    - ii. Click **OK**.
3. Click **Save**.

#### Editing Welcome Offer Alerts

1. From the **Administration** menu, select **Booking**, select **Alerts**, and then select **Global Alert Definitions**.
2. Enter search criteria and click **Search**.
3. Select the welcome offer alert, then click the **vertical ellipsis** and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Welcome Offer Alerts

1. From the **Administration** menu, select **Booking**, select **Alerts**, and then select **Global Alert Definitions**.
2. Enter search criteria and click **Search**.
3. Select the welcome offer, then click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Block Management Overview

Following are the configuration types and their description:

Configuration Types	Description
Booking Types	You can associate a booking type with a business block to categorize business blocks for reporting purposes. For example, business blocks might be associated with a wedding, a commercial exhibition, a tour, a conference, or so on, and it may be useful to view block revenues and other information segregated by these types.
Cancellation Reasons	A business block cancellation reason is required when you change a block's status to Cancelled.
Lost Reasons	A business block lost reason is required when you change a block's status to Lost.
Conversions	A block conversion gives sales managers a way to assign a likelihood of conversion to blocks.
Destination Codes	Destination codes are used to identify competitors or alternate properties where a client has decided to book when a block status turns to Cancelled or Lost.
Rankings	A block ranking gives sales managers a way to assign a priority to blocks.
Rate Override Reasons	Rate Override Reasons are required when a rate code is applied to a block, but a user manually overrides the rate amount on the room grid. When this option is used, you must also select an override reason.
Refused Reasons	This configuration allows you to create codes that specify why a block was refused. A block refused reason is required when you change a block's status to Refused.
Reservation Methods	This configuration allows you to indicate how reservations are expected to be picked up for the block. In many cases it will be done via rooming lists, but reservation pick-up could also be handled via individual guest calls, a convention bureau, or others.

Configuration Types	Description
Wash Schedules	<p>Properties often set aside rooms for block reservations. As the block date approaches, you can reduce the number rooms in the block by transferring a number or percentage of them to general house availability. Block wash schedules enable this transfer. The End of Day final procedure activates the scheduled transfers. You can schedule the room transfers by date and by a percentage or a set number of rooms. When creating or editing wash schedules:</p> <ul style="list-style-type: none"> <li>• Attach schedules to a block prior to the block's cutoff date.</li> <li>• Configure only one details record per wash schedule for each day prior to arrival.</li> <li>• Set the Block Wash Schedule in Routine Management to Active.</li> </ul>

## Configuring Booking Types

### Prerequisites for Configuring Booking Types

#### Adding Booking Types

You can set up booking types for business blocks to categorize them for custom reporting purposes. For example, you might categorize a block as a wedding, a commercial exhibition, a tour group, a conference, or so on. Booking Type is selected on the Block Overview panel.

1. Select the Administration menu, select **Booking**, select **Block Management**, and then select **Booking Types**.
2. Click **New** and complete the following:
  - a. Enter a **Code** to identify the business block booking type.
  - b. Enter a **Description** of the business block booking type.
    - i. **Manage Translation:** Click to open the multi-language descriptions panel and configure a translated descriptions for each language (Available when the Multi-language OPERA Control is active).
  - c. **Sequence** : Enter a Sequence number to indicate the position of this booking type in lists.
3. Click **Save** or **Save and Continue** to add another..

#### Editing Booking Types

1. Select the Administration menu, select **Booking**, select **Block Management**, and then select **Booking Types**.
2. Enter search criteria then click **Search**.
3. In the search results, select the Booking Type code, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Booking Types

1. Select the Administration menu, select **Booking**, select **Block Management**, and then select **Booking Types**.
2. Enter search criteria then click **Search**.
3. In the search results, select the Booking Type code, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Block Cancellation Reasons

### [Prerequisites for Configuring Block Cancellation Reasons](#)

A cancellation reason is required when you change the status of a block or events to Canceled. Cancellation reasons configuration is shared by all properties when the OPERA Multi-Property Reservation Cloud Service is active.

### Adding a Block Cancellation Reason

1. From the **Administration** menu, select **Booking**, select **Block Management**, and then select **Cancellation Reasons**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code for reservations that are canceled (for example, WEATHER or FLIGHT).
  - b. **Description.** Enter a description that clarifies a canceled reservation code (for example, weather conditions, flight cancellation, and so on).
  - c. **Display Seq.** Enter a number that controls the position of the code in listings. Codes not assigned a sequence number are listed in alphabetical order following codes with an assigned sequence.
3. Click **Save** or click **Save and Continue** to add another cancellation reason.

### Editing a Block Cancellation Reason

1. From the **Administration** menu, select **Booking**, select **Block Management**, and then select **Cancellation Reasons**.

2. Enter search criteria and click **Search**.
3. In the search results, select the **code**, click the **vertical ellipsis**, and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting a Block Cancellation Reason

1. From the **Administration** menu, select **Booking**, select **Block Management**, and then select **Cancellation Reasons**.
2. Enter search criteria and click **Search**.
3. In the search results, select the **code**, click the **vertical ellipsis**, and select **Delete**.
4. Select **Delete** to confirm.

## Prerequisites for Configuring Block Cancellation Reasons

### OPERA Cloud Tasks

**Group:** Booking Admin

**Tasks:** Block Management

## Configuring Block Conversions

### Prerequisites for Configuring Conversions

Block conversion enables sales managers to assign a likelihood of conversion to blocks. The conversion rating is selected on the Block Overview panel and appears on the [Group Rooms Control](#) screen and on the [Function Diary](#). The conversion rating also appears in reports including the Group Rooms Reservation Sheet and the Business Block Short List reports.

### Adding Block Conversion

1. Select the **Administration** menu, select **Booking**, select **Block Management**, and then select **Conversions**.
2. Click **New** and complete the following fields:
  - a. **Code:** Enter a code (up to 10 characters) for the conversion rating.
  - b. **Description:** Enter a text description of the conversion rating.
  - c. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing Block Conversion

1. Select the **Administration** menu, select **Booking**, select **Block Management**, and then select **Conversions**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Update the configuration
  - b. **Inactive**: Select to mark this code inactive. Inactive codes are not available for selection from lists. The code remains for historical and statistical purposes only.
4. Click **Save**.

### Deleting a Block Conversion

1. Select the **Administration** menu, select **Booking**, select **Block Management**, and then select **Conversions**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Destination Codes

Destination codes are used to identify competitors or alternate properties where a client has decided to book when a business block status turns to Cancelled or Lost.

### Creating Destination Codes

1. Select the Administration menu, select **Booking**, select **Block Management**, and then select **Destination Codes**.
2. Click **New**.
3. Enter a **Code** that will identify the reason for the cancellation.
4. Enter a **Description** of the code, such as price too high or date changed.
5. Enter a **Sequence** number to indicate the position of this destination code in a list of displayed values.
6. Click **Save**.

### Editing Destination Codes

When editing an existing block cancellation reason, you cannot modify the code.

1. In the Destination Codes screen, click **Search**. You can enter a **Code** or a **Description** to narrow your search.
2. In the search results, select the **code**, click the **vertical ellipsis**, and select **Edit**.
3. Update the configuration and click **Save**.

### Deleting Destination Codes

1. In the Destination Codes screen, click **Search**. You can enter a **Code** or a **Description** to narrow your search.
2. In the search results, select the **code**, click the **vertical ellipsis**, and select **Delete**.
3. Confirm your decision and click **Delete**.

## Configuring Lost Reason Codes

Lost Reason codes specify why a business block was lost. A lost reason is required when you change the status of a business block to Lost.

### Adding Lost Reason Codes

1. Select the Administration menu, select **Booking**, select **Block Management**, and then select **Lost Reasons**.
2. Click **New**.
3. Enter a **Code** that will identify the reason for the cancellation.
4. Enter a **Description** of the code, such as price too high or date changed.
5. Enter a **Sequence** number to indicate the position of this lost reason code in a list of displayed values.
6. Click **Save**.

### Editing Lost Reason Codes

When editing an existing block cancellation reason, you cannot modify the code.

1. In the Lost Reasons screen, click **Search**. You can enter a **Code** or a **Description** to narrow your search.
2. In the search results, select the **code**, click the **vertical ellipsis**, and select **Edit**.
3. Update the configuration and click **Save**.

#### Deleting Lost Reason Codes

1. In the Lost Reasons screen, click **Search**. You can enter a **Code** or a **Description** to narrow your search.
2. In the search results, select the **code**, click the **vertical ellipsis**, and select **Delete**.
3. Confirm your decision and click **Delete**.

## Configuring Block Rankings

### Prerequisites for Block Ranking

Block ranking enables sales managers to assign a priority to blocks. The ranking value is selected on the Block Overview panel and appears on the [Using Group Rooms Control](#) screen and on the [Function Diary](#). Ranking also appears in reports including the Group Rooms Reservation Sheet and the Business Block Short List reports.

### Adding a Block Ranking

1. Select the **Administration** menu, select **Booking**, select **Block Management**, and then select **Rankings**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code (up to 10 characters) for the ranking.
  - b. **Description**. Enter a text description of the ranking.
  - c. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing a Block Ranking

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Edit**.

 **Note:**

Only the **Description** or **Sequence** can be edited.

4. Update the configuration and click **Save**.

### Deleting a Block Ranking

1. Enter search criteria and click **Search**.

2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Delete** and confirm the deletion.

## Configuring Rate Override Reasons

Rate override reasons are used to justify overriding rates on the business Block Room Grids when the application parameter Blocks>Allow Rate Editing with Rate Code is set to Y.

Selecting the Rate Override flag on the Room Grids screen allows you to manually update rates by occupancy on the grid even if a rate code is referenced in the business block.

When using this option, you must select a rate override reason.

### Adding Rate Override Reasons

1. Select the Administration menu, select **Booking**, select **Block Management**, and then select **Rate Override Reasons**.
2. Click **New**.
3. Enter a **Code** that will identify the rate override reason.
4. Enter a **Description** of the code.
5. Enter a **Sequence** number to indicate the position of this rate override reason code in a list of displayed values.
6. Click **Save**.

### Editing Rate Override Reasons

When editing an existing block cancellation reason, you cannot modify the code.

1. In the Rate Override Reasons screen, click **Search**. You can enter a **Code** or a **Description** to narrow your search.
2. In the search results, select the **code**, click the **vertical ellipsis**, and select **Edit**.
3. Update the configuration and click **Save**.

#### Deleting Rate Override Reasons

1. In the Rate Override Reasons screen, click **Search**. You can enter a **Code** or a **Description** to narrow your search.
2. In the search results, select the **code**, click the **vertical ellipsis**, and select **Delete**.
3. Confirm your decision and click **Delete**.

## Configuring Refused Reasons Codes

Refused reasons specify why a business block was refused. A block refused reason is required when you change the status of a business block to Refused.

#### Adding Refused Reasons Codes

1. Select the Administration menu, select **Booking**, select **Block Management**, and then select **Refused Reasons**.
2. Click **New** and complete the following:
  - a. **Code**: Enter a Code that will identify the reason the block was refused.
  - b. **Description**: Enter a description of the code, such as insufficient budget or conflicting booking.
  - c. **Sequence**: Enter a sequence number to indicate the position of this refused reason in a list of displayed values.
3. Click **Save**.

#### Editing Refused Reasons

1. Select the Administration menu, select **Booking**, select **Block Management**, and then select **Refused Reasons**.
2. Enter search criteria then click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Refused Reasons

1. Select the Administration menu, select **Booking**, select **Block Management**, and then select **Refused Reasons**.
2. Enter search criteria then click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and select **Delete**.

4. Click **Delete** to confirm.

## Configuring Reservation Methods

### Prerequisites for Reservation Methods

Reservation methods are selected on the [Block Details](#) panel and appear in the Block search; and indicate how reservations are expected to be picked up for the block.

In many cases, reservation pickup is done through entry of a rooming list, but reservation pickup could also be handled through individual guest calls, a convention bureau, or external system.

### Adding a Reservation Method

1. From the **Administration** menu, select **Booking**, select **Block Management**, and then select **Reservation Methods**.
2. Click **New** and complete the following:
  - a. **Code**: Enter a code for the Reservation Method.
  - b. **Description**: Enter the text that describes the Reservation method.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing a Reservation Method

1. From the **Administration** menu, select **Booking**, select **Block Management**, and then select **Reservation Methods**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then click **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting a Reservation Method

1. Select or confirm the **Property**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then click **Delete**.
4. Click **Save**.

### OPERA Controls

**Group**: Blocks

**Settings:** Room List Reservation Methods

## Configuring Sales Allowances

### Prerequisites for Configuring Sales Allowances

The Sales Allowance sets the max amount of rooms that the hotel sales office can sell, aside from what the hotel in general is selling. The allowance given will be evaluated whenever group bookings are made and a warning issued whenever the amount of deduct-inventory group rooms exceeds the Sales Allowance. The allocated sales allowance per day is evaluated whenever group bookings are updated (change of status, shift dates, copy to new) and a warning issued whenever the number of deduct-inventory rooms exceeds the Sales Allowance for the applicable dates of the business block. Only certain blocks will be affected by the Sales Allowance, based on the user designation in the **Act As** field in user configuration, for more information see [Managing Users](#), and the **Block Origin for Sales Allowance** block setting in OPERA Controls.

The Overbook Sales Allowance user task can be granted to roles to permit sales staff to override the sales allowance limit and continue with the group block creation.

Sales Allowance lets you:

- Define a number of rooms to allow for a configured date range.
- Select the days of the week affected by the sales allowance within the date range.
- Define cutoff days for the date range.
- Enable an increase or a decrease in the entered number of rooms and date range.
- Access Sales Allowance if your user role has the Sales Allowance configuration task.
- Exceed the Sale Allowance if your role has the Override Sales Allowance user task.

### Loading Sales Allowances

Use the Load option to create or update sales allowances. If you are creating a new sales allowance, you can skip the Search function and click Load.

1. From the Administration menu, select **Booking**, select **Block Management**, and then select **Sales Allowance**.
2. Enter or confirm the **Property**, enter a **Start Date** and **End Date**, and click **Search**. Search results show configured sales allowances start dates and cutoff dates, plus the following columns of information:
  - a. **Allowance:** The number of rooms allowed for group reservations during the date range.
  - b. **Available:** The current number of rooms available out of the sales allowance.
  - c. **Booked:** The number of rooms currently booked out of the sales allowance.
  - d. **Overbooked:** The number of rooms overbooked above the sale allowance.
3. From search results, click **Load** and enter or select the following:
  - a. **Property:** Select or confirm the property.
  - b. **Start Date:** Beginning date that the sales allowance is valid.
  - c. **End Date:** The last day that the sales allowance is valid.
  - d. **Increase/Decrease:** Select the check box to enable increasing or decreasing the existing sales allowance quantity. Enter a minus sign (such as -10) before the

number to decrease the quantity. Otherwise, the number is added to the pre-existing quantity.

- e. **Sales Allowance:** Number of room nights to allocate as the sales allowance for the specified dates (note: the value cannot be greater than the total number of inventory rooms).
  - f. **Cutoff Days:** The number of days the allowance is in effect before it is cut off. The cutoff date must be within the specified date range.
  - g. **Days of the Week:** Select the days of the week in which the sales allowance is valid.
4. Click **Save**.

#### Deleting Sale Allowances

You can delete sales allowance records unless the rooms are allocated to blocks. A message appears if the rooms are allocated.

1. From the Administration menu, select **Booking**, select **Block Management**, and then select **Sales Allowance**.
2. To search for sales allowances, enter or confirm the **Property**, enter a **Start Date** and **End Date**, and click **Search**.
3. From search results, select a **Sales Allowance** and click **Delete**. If rooms are allocated during the date range, you are prevented from deleting the record. A warning message appears.
4. Click **Delete**.

### Adding a Block Wash Schedule

1. From the **Administration** menu, select **Block Management**, and then select **Wash Schedule**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code to identify the Block Wash Schedule.
  - b. **Description.** Enter the text that describes the Block Wash Schedule.
3. In the Schedule Details panel, click **New** and complete the following fields:
  - a. **Days prior to arrival.** Enter the number of days prior to arrival to determine when the system performs the wash.
  - b. **Wash by number of rooms.** Select to determine the number of rooms to return to house inventory based on occupancy levels and enter the occupancy levels.
  - c. **Wash by %.** Select to determine the percentage of rooms to return to house inventory and enter the percentage.
4. Click **Save**.

### Editing a Block Wash Schedule

1. Select or confirm the **Property**.

2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. Update the configuration and click **Save**.

#### Deleting a Block Wash Schedule

1. Select or confirm the **Property**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Delete**.

## Block and Catering Event Statuses

### Block and Catering Event Statuses

Group blocks and catering events maintain a status that determines whether blocks and events are inquiry, non-deduct, deduct, cancelled, waitlist, or actual. Up to 12 status codes can be configured and once defined you must setup the block status flow to establish the one-way progression through these statuses. You must also nominate which status codes are available as an initial/starting status for block and events and sequence the status codes in such a way that status flow can be configured.

#### Note:

Ensure the OPP block status code is updated with a default reservation type and display color.

Additionally, status codes identify when a block is open for pickup - allowing the entry of reservations to pickup a room from the block allocation. When the Block Owner Locking OPERA Control is active you can also specify the status that locks update of the block owner. For more information, see [OPERA Controls — Blocks](#). When the Use Single Block Status for Rooms and Catering OPERA Control is active the status of block and associated events is controlled by the block status. When the Use Single Block Status for Rooms and Catering OPERA Control is inactive, a catering status field is enabled in the Block, Catering Details. For more information, see [Managing Blocks](#)

#### Premium

When the Opportunities OPERA Control is active, an 'OPP' Inquiry status code is automatically added. Ensure this status code is updated with a default reservation type and display color. For more information, see: [Managing Opportunities](#).

Each status code will have a predefined defined status type. Available status types are:

- INQUIRY (Doesn't deduct allocated rooms and function space from inventory)
- NON DED INV (Doesn't deduct allocated rooms and function space from inventory)
- DED INV (deduct allocated rooms and function space from inventory)

- CANCEL (releases allocated rooms and function space to house availability)
- ACTUAL

The Turn Booking into Action Upon OPERA Control determine when blocks are automatically updated to Actual status.

- ARRIVAL (Bookings auto-update to ACTUAL on the booking arrival date)
- DEPARTURE (bookings auto-update to ACTUAL on the booking departure date)
- NOT USED (Bookings do not auto-update to ACTUAL)

## Configuring Block and Catering Event Status Codes

Status codes are used in Blocks and Events to determine their status. Both Blocks and Events progress through a series of statuses and as such a block (and event) status flow must also be configured. See [Configuring Status Code Flow](#).

### Note:

Block Status and Block Status Flow are global configuration in multi-property operations. A maximum of 20 status codes can be configured.

### Adding Status Codes

1. From the **Administration** menu, select **Booking**, select **Block Status**, and then **Status Codes**.
2. Click **New** and enter the following details:
  - a. **Code:** Enter a code that is used to define the status.
  - b. **Description:** Enter a description for the status.
  - c. **Sequence:** Enter a sequence that indicates the order the status code. The sequence order is important for when you setup the Block Status Flow. Only status codes with a higher sequence value can be selected as a 'next status'.
  - d. **Room Status Type:** Select a room status type from the list:
    - i. **Inquiry:** Indicates the initial status of a group. This block status does not deduct rooms from the inventory. The Include Inquiry in Non Deduct Inventory Calculations OPERA Control determines whether status codes configured as Inquiry should be included in the Non-Deduct Inventory calculation on the [Rooms Control](#) and on the [Function Diary](#).
    - ii. **Non Deduct Inventory:** Does not deduct from the inventory of guest rooms or function spaces.
    - iii. **Deduct Inventory:** Deducts inventory from the guest rooms or function spaces.
    - iv. **Actual:** Actual is deducted from inventory if the **OPERA Controls > Blocks > Turn Booking** into Actual Upon is set to **Arrival**. Actual is non deduct if the **OPERA Controls > Blocks > Turn Booking** into Actual Upon is set to **Departure**.
    - v. **Waitlist:** This status type is only used to Waitlist catering events when **OPERA Controls > Events > Events Waitlist** is active (available with Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition or

Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition). When creating the Waitlist status code both the Room and Catering Status Type should be set to Waitlist. There can be only one status code having Waitlist and this status code is not used in Status Flow.

- vi. **Cancel:** This status returns the block inventory to the hotel for both guest rooms and function spaces.
- e. **Catering Status Type:** Select a catering status type to use with the status code (Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition or Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition):
  - i. **Inquiry:** Indicates the initial status of a group. This is status does not deduct from the inventory.
  - ii. **Non Deduct Inventory:** Does not deduct from the inventory of guest rooms or function spaces.
  - iii. **Deduct Inventory:** Deducts inventory from the guest rooms or function spaces.
  - iv. **Actual:** Actual is deducted from inventory if the **OPERA Controls > Blocks > Turn Booking** into Actual Upon is set to **Arrival**, Actual is non deduct if the OPERA Controls > **Blocks > Turn Booking** into Actual Upon is set to **Departure**.
  - v. **Waitlist:** This status type is only used to Waitlist catering events when OPERA Controls > **Events > Events Waitlist** is active (available with Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition or Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition). When creating the Waitlist status code both the Room and Catering Status Type should be set to Waitlist. There can be only one status code having Waitlist and this status code is not used in Status Flow.
  - vi. **Cancel:** This status returns the block inventory to the hotel for both guest rooms and function spaces.
- f. **Default Reservation Type:** Select a reservation type to be used for this status code. The reservation type and status code must have the same deduct/no deduct status. For more information, see [Reservation Types](#)
- g. **Reason Type:** Select a return inventory reason type from the list. This option is enabled when the Return Inventory check box is selected.
  - i. **Cancellation**
  - ii. **Lost**
  - iii. **Refused**
- h. **Color:** Select a display color to associate with the status code. The status code's defined color will identify the event status on the [Function Diary](#) and the [Group Rooms Control](#).
- i. **Starting:** Select check box to indicate this status code is a starting status. Blocks and events can commence in this status
- j. **Return Inventory:** Select check box to indicate the block in this status code will have their room allocation returned to house availability.
- k. **Allow Pickup:** Select check box to indicate the block will be open for pickup (reservation rooming list entry) when in this status.

- l. **Diary:** Select check box to show events in this status within the [Function Diary](#).
  - m. **Log Catering Changes:** Select check box to track event changes to event log once events are in this status.
3. Click **Save**.

### Editing Status Codes

1. From the **Administration** menu, select **Booking**, select **Block Status**, and then **Status Codes**.
2. Enter search criteria and click **Search**.
3. Select the Status Code, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Status Codes

You cannot delete status codes used in Blocks, Events or configured as part of the Block Status Flow.

1. From the **Administration** menu, select **Booking**, select **Block Status**, and then **Status Codes**.
2. Enter search criteria and click **Search**.
3. Select the Status Code, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Block and Event Status Flow

The status flow defines the one-way progression for block and event statuses. Multiple **Next Available Status Codes** can be selected. For example - from TENT (Tentative) status blocks/events may progress to DEF (Definite), CXL (Cancelled) or LST (Lost).

### Editing Block and Event Status Flow

1. From the **Administration** menu, select **Booking**, select **Block Status** and then select **Status Code Flow**.
2. Enter search criteria then click **Search**.
3. Select a status code, then click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Select one or more statuses from the **Next Available Status Codes** panel and click **>** to move selected values to the **Selected Status Codes** panel.

 **Note:**

Only status codes with a higher sequence value than the current status code can be selected as a next status.

4. Click **Save**.

# Booking Rules and Schedules

Booking Rules and Schedules enables you to configure a variety of options related to reservation booking rules, such as deposit and cancellation policies and reservation types. The available options are dependent on the active controls at your property.

## Cancel Penalties (Cancellation Penalty Rules)

### Prerequisites for Cancel Penalties

Cancel Penalties (Cancel Penalty Rules) define the penalty amount to be charged if a reservation is canceled. The amount can be a flat amount, a percentage of the rate, a percentage of the first night's rate, or it can be based on the number of nights.

Cancel Penalties also define the number of days or date prior to the arrival date that the reservation can be canceled without penalty. The date can be associated with a time (for example, 5:00 PM) before which the reservation must be canceled to avoid penalty.

Cancellation rules can be associated to a reservation type, to a rate code, or to a combination of reservation type and rate code through the setup of Cancel Penalty Schedules. Rules scheduled for the reservation type and/or rate code automatically populate to the reservation at the time the reservation is created.

In addition, you can select a cancellation rule (as well as non-rule-based cancellation requirements) for a reservation by selecting the Deposit / Cancellation details link on the reservation. The Reservation Deposits and Cancellations topic has more information on reservation deposits and cancellations.

Only one cancellation rule can apply to a reservation at a time, even if the reservation type, rate code, and reservation itself each has its own rule attached. The rate code rule takes precedence over any other type of rule, followed by the reservation type rule, and finally, the rule attached to the reservation itself.

### Note:

When the Cancellation Penalty Rule is configured as a percentage of revenue ensure the applicable sales charge [transaction codes](#) have the **Include in Dep/Cxl.** check box selected.

## Prerequisites for Cancel Penalties

### OPERA Controls

**Group:** Cashiering

**Functions:** Cancellation Handling

### OPERA Cloud Tasks

**Group:** Booking Admin

**Tasks:** Booking Rules and Schedules

## Cancellation Penalties

- New/Edit Cancellation Penalties
- Delete Cancellation Penalties

## Configuring Cancel Penalties

**Adding a Cancel Penalty**

1. From the **Administration** menu, select **Booking**, select **Booking Rules and Schedules**, and then select **Cancel Penalties**.
2. Click **New** to create a new cancel penalty. Complete the following fields:

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new cancel penalties can only be created by clicking the **Template** tab. Once created, you can copy the configuration to specific properties using the Copy action. For more information, see [Copying Configuration Codes to Multiple Properties](#).

- a. **Code.** Enter the cancellation rule code that appears on the reservation.
- b. **Description.** Enter the description of the cancellation code.
- c. **Type.** Select the method used to compute the penalty. Select from the following types:
  - **Flat** - The penalty amount is the exact amount of the cancellation charge in the property currency.
  - **Percent** - The penalty amount is a percentage of the entire stay's room rate plus any fixed charges, packages, and generates associated with the rate. For example, if the Penalty Amount is 50, the guest will pay a charge of 50% of the total stay room rate. If the room rate is \$300 a night for 3 nights, the guest pays \$450 (0.50 x \$900). Notice that "of Stay" appears following the field when **Percent** is selected.
  - **Percentage of Nightly Rate** - The penalty amount is based on the percentage of the first night's room rate. Schedule the time period when this rule is effective. When a cancellation is made, the cancellation schedule generates the correct values in the appropriate currency.
  - **Nights** - The penalty amount is determined by the guest's room rate plus any fixed charges, packages, and generates associated with the rate for this number of nights. For example, assume the guest is planning to stay 3 nights. If the Penalty Amount is 1, and the nightly room rate is \$150, the cancellation charge would be \$150 (\$150 x 1 nights).
  - **Non-Cancelable** - The reservation cannot be canceled.
- d. **Amount.** Enter the Cancel Penalty Amount. The meaning of this field varies depending on the Type (computation method) used for this rule.

- e. **Days Before Arrival.** Enter the number of days before the arrival date up to which the reservation can be canceled without penalty.
  - f. **Before Time.** Enter the time before which the guest must cancel to avoid penalty (used in conjunction with the days Before Arrival value). For example, if the Before Arrival is 5, and the Before Time is 6:00 PM, the guest must cancel before 6:00 PM five days prior to the arrival date to avoid the cancellation penalty. The configured time appears on the cancellation message when canceling a reservation.
  - g. **Seq.** Enter the sequence number that determines the position of this rule in the Cancellation Penalty Rules LOV.
3. Click **Save** or **Save and Continue** to add more rules.

#### Editing a Cancel Penalty

1. From the **Administration** menu, select **Booking**, select **Booking Rules and Schedules**, and then select **Cancel Penalties**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level **vertical ellipsis** for the Cancel Penalty and select **Edit**.
4. Make the desired changes.
5. **Inactive.** Select to make the Cancel Penalty Rule inactive. Inactive cancellation penalty rules are no longer available for selection in Cancellation Penalty Schedules.
6. Click **Save**

#### Deleting a Cancel Penalty

1. From the **Administration** menu, select **Booking**, select **Booking Rules and Schedules**, and then select **Cancel Penalties**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level **vertical ellipsis** for the Cancel Penalty and select **Delete**.
4. Click **Delete** to confirm.

## Cancel Penalty Schedules

### [Prerequisites for Cancel Penalty Schedules.](#)

Cancellation penalty schedules enable you to impose cancellation charges or penalties when a reservation is cancelled within a specified period before the arrival date.

You can specify the cancellation rule along with the begin date and end date that define the period during which the schedule is in effect. Duplicate schedules for the same effective period are not permitted.

You can also configure credit ratings for use with cancellation schedules. Guests and callers who make reservations with your property will have a cancellation rule applied to their reservation based on the credit rating indicated on their profile. For more information, see [Configuring Credit Ratings](#).

## Configuring Cancel Penalty Schedules

### Adding a Cancel Penalty Schedule

1. From the **Administration** menu, select **Booking**, select **Booking Rules and Schedules**, and then select **Cancel Penalty Schedules**.
2. Click **New** and complete the following fields:
  - a. **Property:** Confirm or enter the property for the cancel penalty schedule.
  - b. **Begin / End Date:** Define the effective period for the cancel penalty schedule by selecting its start date and end date. Duplicate rule schedules cannot have overlapping effective periods. For example, assuming you have two cancellation penalty schedules for the FLAT cancellation rule, and both are applied to the AARP rate code and the 6 PM reservation type. One rule schedule cannot have effective dates of 06-01 through 07-31 if the other already has effective dates of 07-15 through 08-15.
  - c. **Rule:** Choose a [cancel penalty](#) rule from the list to apply to this schedule.
  - d. **Rate Code:** Choose the rate codes to which this schedule applies. When creating a new rule schedule, this is a multi-select list of values. If a rate code is selected, block code or credit rating cannot be selected for the rule schedule.
  - e. **Block Code:** Choose the block codes to which this schedule applies. When creating a new rule schedule, this is a multi-select list of values. If a block code is selected, rate code or reservation type or credit Rating cannot be selected for the rule schedule.
  - f. **Reservation Type:** Choose the reservation types to which this schedule applies. When creating a new rule schedule, this is a multi-select list of values. If a reservation type is selected, block code or credit Rating cannot be selected for the rule schedule.
  - g. **Credit Rating:** Select a **Credit Rating** to limit this cancellation schedule to reservations with a credit rating as indicated on their profile. When creating a new rule schedule, this is a multi-select list of values. If a credit rating is selected, block

code or rate code or reservation type cannot be selected for the rule schedule. (Available when the Credit Rating OPERA Control is active).

- h. **Season Code:** Choose a **Season Code** to limit this schedule to a specific **rate season**.
  - i. **Seq:** Enter the sequence number that determines the position of this rule schedule in a list of values.
  - j. **Override:** Select if you want this rule to override all others that might apply to a date or range of dates.
3. **Save** or click **Save and Continue** to add more cancel penalty schedules.

**Note:**

When multiple criteria are selected separate schedules are created for each combination.

- Rate Code
- Reservation Type
- Credit Rating
- Block Code

#### Editing a Cancel Penalty Schedule

1. From the **Administration** menu, select **Booking**, select **Booking Rules and Schedules**, and then select **Cancel Penalty Schedules**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level **vertical ellipsis** for the schedule and select **Edit**.
4. Make the desired changes.
5. **Inactive.** Select to make this rule schedule inactive.
6. Click **Save**.

#### Deleting a Cancel Penalty Schedule

1. From the **Administration** menu, select **Booking**, select **Booking Rules and Schedules**, and then select **Cancel Penalty Schedules**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level **vertical ellipsis** for the schedule and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Deposit Rules

Deposit Rules provide a way to manage the deposit requirements for reservations, blocks, and related events. They specify deposit amounts or percentages and when deposits must be paid.

Deposit rules can be associated to a reservation type, to a rate code, or to a combination of reservation type and rate code through the setup of [Deposit Schedules](#). Rules scheduled for the reservation type or rate code will automatically populate to the reservation at the time the reservation is created.

In addition, you can select a deposit rule (as well as non-rule-based deposit requirements) for a reservation or a block by selecting the [Deposit / Cancellation](#) details link on the reservation.

Only one deposit rule may apply to a reservation at a time, even if the reservation type, rate code, and reservation itself each has its own rule attached. The rate code rule takes precedence over any other type of rule, followed by the reservation type rule, and finally, the rule attached to the reservation itself.

**Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Deposit Rules are created by selecting the **Template** tab. Once created, you can copy Deposit Rules to specific properties using the **Copy** action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

### Adding a Deposit Rule

1. From the **Administration** menu, select **Booking**, select **Booking Rules and Schedules**, and then select **Deposit Rules**.
2. Click **New** and enter the following details:
  - a. **Property**: Enter or select the property.
  - b. **Deposit Rule**: Enter characters or numbers to identify the new deposit rule.
  - c. **Description**. Enter a text description of the rule.
  - d. **Type**. Select a deposit type.
  - e. **Amount**. Enter a deposit amount based on the deposit type.
  - f. **Type of Charges**. (Available if either **Simple Events** or **Catering Events** is active in OPERA Control.) Select the type of charge. For example, when selecting **Catering** or **ALL**, the Projected Catering Revenue from the block is used for the deposit calculation. When **None** is selected, the deposit rule can be applied to any type of revenue: Rooms, Catering, or All.
  - g. **Before Arrival**. Enter a number of days to indicate when the deposit is due before the arrival.
  - h. **After Booking**. Enter a number of days to indicate when the deposit is due after the booking.
  - i. **Sequence**. Enter the sequence number that determines the position of this rule in a list of values.
3. Click **Save** to save and exit, or **Save and Continue** to save and add a new deposit rule.

### Editing a Deposit Rule

1. From the **Administration** menu, select **Booking**, select **Booking Rules and Schedules**, and then select **Deposit Rules**.
2. Select or confirm the Property.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and then click the **vertical ellipsis** and select **Edit**.
5. Select **Inactive** if you want to make the rule code inactive.
6. Update the configuration.
7. Click **Save**.

### Deleting a Deposit Rule

1. From the **Administration** menu, select **Booking**, select **Booking Rules and Schedules**, and then select **Deposit Rules**.
2. Select or confirm the Property.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and then click the **vertical ellipsis** and select **Delete**.
5. Click **Delete** to confirm.

## Configuring Reservation Types

 **Note:**

When the OPERA Multiproperty Cross Reservation Cloud Service is active, reservation type configuration can be copied to other properties. For more information, see [Copying Configuration Codes to Multiple Properties](#).

### Adding a Reservation Type

1. From the **Administration** menu, select **Booking**, select **Booking Rules and Schedules**, and then select **Reservation Types**.
2. Click **New** and complete the following fields:
  - a. **Reservation Type.** Enter a code for the reservation type. Make this code informative for the user. For example, if the reservation type is to be "Guaranteed until 6:00 pm," you might enter '6PM.' When editing an existing reservation type, you cannot change this code.
  - b. **Description.** Enter a description for the reservation type (for example, "Guaranteed until 6:00 pm").
  - c. **Manage Translation.** Select this link to enter translations of the message text into other languages.
  - d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - e. **Address.** (Required) Select to indicate an address is required for reservations made using this reservation type.
  - f. **Deposit.** (Required) Select if a deposit is required when making a reservation for this reservation type. This check box is provided for informational purposes only. Deposit requirements must be set by deposit rule schedules.
  - g. **Arrival Time.** (Required) Select to indicate a mandatory arrival time is required for reservations made using this reservation type.
  - h. **Deduct Inventory.** Select to indicate the reservation type will deduct a room from the inventory count when a reservation is made using this reservation type. If deselected, the reservation type is non-deduct, meaning a room will not be deducted from the inventory count.
  - i. **Phone Number.** (Required) Select to specify a phone number is required for reservations made using this reservation type.
  - j. **Credit Card.** (Required) Select to specify a credit card is required for reservations made using this reservation type.
3. Click **Save**.

### Editing a Reservation Type

1. From the **Administration** menu, select **Booking**, select **Booking Rules and Schedules**, and then select **Reservation Types**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level **vertical ellipsis** for the reservation type and select **Edit**.

4. Make the desired changes.

 **Note:**

Select **Inactive** to mark the code as inactive. Inactive reservation types are excluded from reservation type lists of values.

5. Click **Save**.

### Deleting a Reservation Type

1. From the **Administration** menu, select **Booking**, select **Booking Rules and Schedules**, and then select **Reservation Types**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level **vertical ellipsis** for the reservation type and select **Delete**.
4. Click **Delete** to confirm.

## Reservation Type Schedules

### [Prerequisites for Reservation Type Schedules.](#)

Reservation Type Schedules enable you to schedule reservation types by associating a rate code, date range, or season code with the reservation type. When a reservation type is linked with a rate code, you can only select the linked reservation type while shopping with that rate code. Guest and booker credit ratings can also be associated with a reservation type.

## Prerequisites for Reservation Type Schedules

### OPERA Cloud Tasks

**Group:** Booking Admin

**Tasks:** Booking Rules and Schedules

Reservation Type Schedules

- New/Edit Reservation Type Schedules
- Delete Reservation Type Schedules

## Configuring Reservation Type Schedules

### Adding a Reservation Type Schedule

1. From the **Administration** menu, select **Booking**, select **Booking Rules and Schedules**, and then select **Reservation Type Schedules**.
2. Click **New** and complete the following fields:

- a. **Begin Date / End Date.** Define the effective period for this reservation type schedule by selecting its start date and end date. Begin date defaults to the business date. Duplicate reservation type schedules cannot have overlapping effective periods. For example, assuming you have two reservation type schedules for the reservation type 6PM, and both are applied to the RACK rate code. One rule schedule cannot have effective dates of 06-01 through 07-31 if the other already has effective dates of 07-15 through 08-15. When multiple reservation types are selected while adding a rule, a separate rule record is created for each selected reservation type.
  - b. **Rate Code.** Choose the rate code to which this reservation type schedule applies. When creating a new rule schedule, this is a multi-select list of values. If a rate code is selected, credit rating cannot be selected for the schedule.
  - c. **Reservation Type.** Choose the reservation type to which this rule schedule applies. When creating a new rule schedule, this is a multi-select list of values. Once the schedule is saved, this field becomes a single-select list of values when editing the rule schedule.
  - d. **Credit Rating.** (Available when **Credit Ratings** is active in OPERA Controls). Choose a **Credit Rating** to associate this rule to the credit rating according to the start and end dates and other parameters. Guests and bookers who make reservations with this property will have these reservation type schedules applied, based on their credit rating as indicated on their profile. When creating a new rule schedule, this is a multi-select list of values. If a credit rating is selected, rate code cannot be selected for the schedule.
  - e. **Season.** (Available when **Rate Seasons** is active in OPERA Controls). Select the **Season Code** to be assigned to this rule. Rate seasons are defined for a range of dates. The date range automatically completes the Begin Date and End Date fields.
  - f. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - g. **Override.** Select if you want this rule to override all others that might apply to a date or range of dates. Select this option to take advantage of special events or holidays where one rule might supersede all others.
3. Click **Save**.

**Note:**

When multiple criteria are selected separate schedules are created for each combination.

- Rate Code

## Configuring Menu Item Containers

Menu Item Containers describe how individual menu items are sold (for example, per piece, per dozen, or each) when they are not included in the price of the menu. The description prints on reports such as the Banquet Event Order (BEO) and Proforma Invoice. The Menu Item Containers are assigned to menu items using the Menu Item Configuration screen. For more information, see [Resource Management](#)

### Adding Menu Item Containers

1. From the Administration menu, select **Booking**, select **Catering Codes**, and then select **Menu Item Container**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter a code for the Menu Item Container.
  - b. **Description**: Enter a description of the menu item container.
  - c. **Manage Translation**: Select to open the multi-language descriptions screen and configure a translated descriptions for each language.
  - d. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing Menu Item Containers

1. From the Administration menu, select **Booking**, select **Catering Codes**, and then select **Menu Item Container**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **Menu Item Container**, click the **vertical ellipsis**, and select **Edit**.
4. Make changes to the **Description**, **Manage Translation**, or **Sequence**.
5. Click **Save**.

### Deleting Menu Item Containers

You can delete a Menu Item Container only if it is not assigned to a Menu Item.

1. From the Administration menu, select **Booking**, select **Catering Codes**, and then select **Menu Item Container**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **Menu Item Container**, click the **vertical ellipsis**, and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Servings

The Serving screen enables you to modify the descriptions for how menus are sold. Menus are sold per person or per table. Use the Menu configuration screen to assign Servings menu items. For more information, see [Resource Management](#)

### Editing Servings

1. From the Administration menu, select **Booking**, select **Catering Codes**, and then select **Serving**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **Serving**, click the **vertical ellipsis**, and select **Edit**.
4. Update the following:
  - a. **Description:** Enter a Description for the serving.
  - b. **Manage Translation:** Select to open the multi-language descriptions screen and configure a translated description for each language.
  - c. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with an assigned sequence.
5. Click **Save**.

## Marketing Management

Marketing Management enables you to create codes that identify markets, market groups, cities and regions, sell messages, and similar information. You can attach these codes to reservations and other screens to track the origins of your reservation business.

## Configuring Marketing Cities

Use Marketing City codes to define where marketing cities are located in relation to your property.

### Note:

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Marketing Cities are created by selecting the Template tab. Once created, you can copy Marketing Cities to specific properties using the Copy action. Refer to [Copying Configuration Codes to Multiple Properties](#) for more information.

### Adding a Marketing City Code

1. Select the **Administration** menu, select **Booking**, select **Marketing Management**, and then select **Marketing Cities**.
2. Click **New** and complete the following fields:
  - a. **Property.** Search for and select a property or confirm the property.
  - b. **Marketing City.** Enter the name of the city in the surrounding area near the property.

- c. **Description.** Enter a description for the city.
  - d. **Region Code.** Enter a marketing region. For more information, see [Configuring a Marketing Region](#).
  - e. **Distance.** Enter the distance to the center of the marketing city from the property (for example, 1 mile, 5 miles, 10 miles, and so on).
  - f. **Driving Time.** Enter the approximate length of time to travel to the marketing city by car or bus (for example, 10 minutes, 1 hour, 1/2 day).
  - g. **Distance Type.** Enter the measurement type for the distance to the marketing city (for example, miles, kilometers, and so on).
  - h. **Direction.** Enter the general direction of the marketing city in relation to the property (for example, North, South, East, or West).
3. Click **Save**.

#### Editing a Marketing City Code

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Edit**.
4. **Inactive.** Select to mark this code inactive. Inactive codes are not available for selection from lists in OPERA Cloud. The code remains for historical and statistical purposes only.
5. Update the configuration and click **Save**.

#### Deleting a Marketing City Code

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Delete** and confirm the deletion.

## Configuring Market Codes

A market code is required in each reservation and group block and is used track the room nights and revenue generated by each reservation for statistical purposes.

When defining these codes, you must assign the appropriate market group to each market code. When booking a reservation, you must select the appropriate market code by either entering the market code or selecting a rate code with the market code linked to it (the market code is automatically populated for you). Based on the market segmentation codes, OPERA Cloud can produce daily, month-to-date, and year-to-date statistics of revenue, number of guests, number of rooms occupied, and average room rate. Again, these market codes must be linked to a market group. In addition, monthly revenue budgets can be entered for each of the market codes.

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Marketing Codes are created by selecting the Template tab. Once created, you can copy Marketing Codes to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

### Adding a Market Code

1. Select the **Administration** menu, select **Booking**, select **Marketing Management**, and then select **Market Codes**.
2. Click **New** and complete the following fields:
  - a. **Property**. Search for and select a property or confirm the property.
  - b. **Market Code**. Enter an alpha-numeric code to be used for the market code (for example, FGOV, SGOV, GA, GC, CO, HS, CORP, LCORP, and so on).
  - c. **Description**. Enter a description of the market code (for example, Federal Government, State Government, Group Association, Corporate Group, Complimentary, House Use, Corporate, Local Corporate, and so on).
  - d. **Manage Translations**. (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - e. **Market Group**. Select the Market Group to which the market code belongs.  
For more information, see [Configuring Market Groups](#).
  - f. **Color**. Assign a display color code to any or all market codes to differentiate between reservations for each market segment on the Room Diary or Telephone Operator screens. In OPERA Controls, the **Reservation Color Definition** setting under the Reservations group must be set to **MARKET CODE**.
  - g. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a Market Code

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Edit**.
4. **Inactive**. Select to mark this code inactive. Inactive codes are not available for selection from lists in OPERA Cloud. The code remains for historical and statistical purposes only.
5. Update the configuration and click **Save**.

### Deleting a Market Code

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.

3. Click **Delete** and confirm the deletion.

## Configuring Market Groups

You can group market codes into categories or market groups that correspond to your property's marketing strategy. This segmentation provides both statistics and financial reporting at the group level as well as at the code level.

OPERA Cloud produces statistical reports showing room revenue, number of nights, average room rate, food and beverage revenue, and other revenue based on the market code referenced in each reservation record. Market Groups are used to group and summarize statistical data from various linked market codes.

Typical market groups are Corporate, Government, Wholesale, Package, and Discount. Using this example, you would create specific market codes (for example, Local Company, National Company, and International Company) under the Corporate main group. Revenue and room nights are attributed to each market code and can be totaled at the market group level.

### Note:

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Marketing Groups are created by selecting the Template tab. Once created, you can copy Marketing Groups to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

### Adding a Market Group

1. Select the **Administration** menu, select **Booking**, select **Marketing Management**, and then select **Market Groups**.
2. Click **New** and complete the following fields:
  - a. **Property.** Search for and select a property or confirm the property.
  - b. **Market Group.** Enter an alpha-numeric code to be used for the market group (for example, CORP, GOVT, WHLS, and so on).
  - c. **Description.** Enter a description of the market code (for example, Corporate, Government, Wholesale, and so on).
  - d. **Manage Translations.** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - e. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - f. **Rank:** Enter a number that would prioritize the Market Group reservation when competing with other reservations. Rank in Market group is incorporated for guest importance. The Rank is not mandatory, can have duplicates and non-sequential. 1 is considered the highest rank (Available when the AI Room Assignment OPERA Control is active).

- g. **AI Upgrade:** Select to enable reservations with a market code linked to this market group as eligible for complimentary room type upgrade in case of room type overbooking (Available when the AI Room Assignment OPERA Control is active).
3. Click **Save**.

### Editing a Market Group

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Edit**.
4. **Inactive.** Select to mark this code inactive. Inactive codes are not available for selection from lists in OPERA Cloud. The code remains for historical and statistical purposes only.
5. Update the configuration and click **Save**.

### Deleting a Market Group

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Delete** and confirm the deletion.

## Configuring Marketing Region

You can configure Marketing Region codes and then associate them with Marketing Cities. This provides the ability to designate smaller areas within your property's area as "marketing regions," as opposed to the larger geographical regions. You can search for properties within the smaller marketing region when making reservations.

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Marketing Regions are created by selecting the Template tab. Once created, you can copy Marketing Regions to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

### Adding a Marketing Region

1. Select the **Administration** menu, select **Booking**, select **Marketing Management**, and then select **Marketing Regions**.
2. Click **New** and complete the following fields:

 **Note:**

In a multi-property operation, Marketing Region codes are configured in the template and then copied to properties. This ensures consistent configuration across all properties.

- a. **Code.** Enter an alpha-numeric code to represent the marketing region.
  - b. **Description.** Enter a description for the marketing region.
  - c. **Manage Translations.** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a Marketing Region

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Edit**.
4. Update the configuration and click **Save**.

### Deleting a Marketing Region

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Delete** and confirm the deletion.

### Copying Marketing Region Codes

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Marketing Region codes are created by selecting the Template tab. Once created, you can copy Marketing Region codes to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

## Configuring Origin Codes

OPERA Cloud maintains origin of business statistics, which enables you to track reservations by setting up origin codes (the originating media source for the reservation). Just as market codes can be grouped into market groups for reporting purposes, origin codes are attached to reservation records to track how reservations come into the property. Each property or property chain determines the breakdown of the origin information it requires (for example, mail, telephone, fax, central reservations, travel agency, GDS, and so on).

### Note:

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Origin Codes are created by selecting the Template tab. Once created, you can copy Origin Codes to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

### Adding an Origin Code

1. Select the **Administration** menu, select **Booking**, select **Marketing Management**, and then select **Origin Codes**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter the origin code used to assign to an origin (for example, PH, FX, WI, INT, and so on).
  - b. **Description**. Enter text that describes the origin code (for example, telephone, fax, walk-in, Internet, and so on).
  - c. **Manage Translations**. (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing an Origin Code

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Edit**.
4. Update the configuration and click **Save**.

### Deleting an Origin Code

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Delete** and confirm the deletion.

### Copying Origin Codes

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Origin codes are created by selecting the Template tab. Once created, you can copy Origin codes to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

## Configuring Sell Messages

### Prerequisites for Configuring Sell Messages

### Watch Video

You can setup sell messages to help your reservation and sales agents secure a booking during a customer query. Sell messages contain important date-driven information or can be motivation messages for sales or reservation agents.

For reservation agents appropriate sell messages appear depending on your point in the reservation flow and depending on the selections you make. For example, when on the reservations screen, general sell messages appear. Once a property is selected for the reservation, property-level sell messages appear. In addition, when searching availability, availability-level sell messages appear depending on room-type and rate code selections. When creating block reservations, block-level sell messages appear. When the Always Show Sell Messages OPERA Control is active users will always see sell messages in [reservation presentation](#).

For properties with the Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition active, sell messages can be setup to display in the [Group Rooms Control](#), the [Function Diary](#), and within [Blocks](#).

Sell messages can also be setup in multiple languages and, by default, appear in the language selected in your [user profile](#).

### Adding a Sell Message

1. Select the **Administration** menu, select **Booking**, select **Marketing Management**, and then select **Sell Messages**.
2. Click **New** and complete the following fields:
  - a. **Global / Hub / Property**: Select the level for the Sell Message. (Available when the OPERA Multiproperty Cross Reservation Cloud Service is active).
  - b. **Property**: Search for and select a property or confirm the property.
  - c. **Begin Date / End Date**: Enter the **Start** and **End** dates during which this sell message appears to reservation agents.
  - d. **Language**: Enter or select the language code for the sell message. If a language code is specified, this sell message only appears when the language code matches the language code of the user in their user account.
  - e. **Display Sell Message**: Select the area(s) from the list for the sell message to display.
    - i. Blocks (visible when the Business Block OPERA Control is active).
    - ii. Function Diary (visible when the Catering Events OPERA Control is active).
    - iii. GRC (visible when the Business Block OPERA Control is active).
    - iv. LTB.
    - v. Reservations.
  - f. **Rate Code**: Enter or select the rate code for which this sell message should appear.
  - g. **Block Code**: Enter or select the block code for which this sell message should appear.
  - h. **Room Type**: Enter or select the room type for which this sell message should appear.
  - i. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - j. **Sell Message**: Enter the sell message to display to users; in the language selected.

3. Click **Save**.

#### Editing a Sell Message

1. Select the **Administration** menu, select **Booking**, select **Marketing Management**, and then select **Sell Messages**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **Vertical Ellipsis** and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting a Sell Message

1. Select the **Administration** menu, select **Booking**, select **Marketing Management**, and then select **Sell Messages**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **Vertical Ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Configuring Sell Messages

- Delete Sell Messages

## Configuring Source Codes

Use source codes to manage and track the source of business at your hotel, such as mail, telephone, fax, central reservations, travel agency, and so on. OPERA Cloud maintains the source of business statistics. Just like market codes, source codes are attached to reservation records to track how the reservations come to the property. Source codes are also grouped into source groups for reporting. Every property or property chain determines the breakdown of the source information it requires.

#### **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Source Codes are created by selecting the Template tab. Once created, you can copy Source Codes to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

### Adding a Source Code

1. Select the **Administration** menu, select **Booking**, select **Marketing Management**, and then select **Source Codes**.
2. Click **New** and complete the following fields:
  - a. **Property**. Search for and select a property or confirm the property.
  - b. **Source Code**. Enter an alpha-numeric code to be used for the source code (for example, TEL, FAX, WK, and so on).
  - c. **Description**. Enter a description of the source code (for example, Telephone, Facsimile, Walk in, and so on).
  - d. **Manage Translations**. (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - e. **Source Group**. Select the associated source group to which this source code belongs.  
  
For more information, see [Configuring Source Groups](#).
  - f. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - g. **Inactive**. Select to mark this code inactive. Inactive codes are not available for selection from lists in OPERA Cloud. The code remains for historical and statistical purposes only.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a Source Code

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Edit**.
4. **Inactive**. Select to mark this code inactive. Inactive codes are not available for selection from lists in OPERA Cloud. The code remains for historical and statistical purposes only.
5. Update the configuration and click **Save**.

### Deleting a Source Code

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Delete** and confirm the deletion.

### Copying Source Codes

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Source codes are created by selecting the Template tab. Once created, you can copy Source codes to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

## Configuring Source Groups

Source Groups enable you to group several different types of source codes for reporting and tracking purposes.

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Source Groups are created by selecting the Template tab. Once created, you can copy Source Groups to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

### Adding a Source Group

1. Select the **Administration** menu, select **Booking**, select **Marketing Management**, and then select **Source Groups**.
2. Click **New** and complete the following fields:
  - a. **Property**. Search for and select a property or confirm the property.
  - b. **Source Group**. Enter an alpha-numeric code to be used for the source group.
  - c. **Description**. Enter a description of the source group.
  - d. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - e. **Inactive**. Select to mark this code inactive. Inactive codes are not available for selection from lists in OPERA Cloud. The code remains for historical and statistical purposes only.
3. Click **Save**.

### Editing a Source Group

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Edit**.
4. **Inactive**. Select to mark this code inactive. Inactive codes are not available for selection from lists in OPERA Cloud. The code remains for historical and statistical purposes only.
5. Update the configuration and click **Save**.

### Deleting a Source Group

1. Enter search criteria and click **Search**.
2. In the search results, select the code and click the **vertical ellipsis**.
3. Click **Delete** and confirm the deletion.

## Copying Source Groups

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Source groups are created by selecting the Template tab. Once created, you can copy Source groups to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

# Reservation Management

The reservation components you can configure include things such as guest messages, reservation alerts, and deposit rules.

## Configuring Reservation eCoupons

eCoupons are complimentary items such as drinks / meals etc offered and redeemed by a guest in POS outlets (bar, cafe or restaurant), the charge for which is posted to a specified posting master room reservation. eCoupons are added to a reservations and are visible in the outlet Point Of Sale (POS). In POS , the user is able to settle the charge to the guest's room by selecting the appropriate eCoupons displayed. Therefore, the eCoupons will be counted as used and the charge will be automatically transferred to the designated PM room reservation instead of posting to the guest reservation account. If specific rate codes entitles guests to an eCoupon you can select the rate code(s) so that a reservation is automatically updated with the eCoupon.

### Adding an eCoupon

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **eCoupons**.
2. Click **New** and enter the following details:
  - a. **Property**: Enter or select the property.
  - b. **eCoupon Code**: Enter a maximum of 8 alphanumeric characters.
  - c. **Description**: Enter a description of the eCoupon. This field allows a maximum of 100 characters.
  - d. **Rate Code**: Select one or more [About Rate Codes](#) , this eCoupon will be automatically added to any reservation with this rate code.
  - e. **Posting Room**: Select the PM rooms applicable for the selected property. The list of values shows all PM rooms regardless of whether they are checked in or not. This Pseudo room must be checked in for the eCoupons related charges to be successfully diverted to it.
  - f. **Default Quantity**: Enter a value from 1 to 99. This field defaults to 1.
  - g. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - h. **Welcome Offer**: Select to make this eCoupon available as a welcome offer to the guest during check in. (Available when the Welcome Offer OPERA Control is active).

3. Click **Save** to save and exit or click **Save and Continue** to save and add additional eCoupons.

#### Editing an eCoupon

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **eCoupons**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level **vertical ellipsis** for the code and select **Edit**.
4. Make the desired changes.
5. **Inactive**: Select to make the eCoupon inactivate.
6. Click **Save**.

#### Deleting an eCoupon

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **eCoupons**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level **vertical ellipsis** for the code and select **Delete**.
4. Click **Delete** to confirm.

#### Copying eCoupons

When the OPERA Multi-property Cross Reservation Cloud Service is active you can copy eCoupons to other properties from the [Hub location](#). See [Copying Configuration Codes to Multiple Properties](#).

- Delete eCoupons

## Configuring Pre-Registration Rules

#### [Prerequisites for Pre-Registration Rules](#)

You can define pre-registration rules to identify which reservations qualify for a pre-registered check-in.

### Adding a Pre-Registration Rule

1. From the Administration menu, select **Booking**, select **Reservation Management**, and then select **Pre-Registration Rules**.
2. Click **New**.
3. Choose a **Rule Type** from the list of values. Allowed rule types are Special, Market Code, Time, Origin, Rate Code, Reservation Type, VIP, and Membership.
  - a. **Special**. When selected, the screen lists all available Special Request Codes applicable for the property. You can select one or more **Specials** for which the pre-registered check-in applies.
  - b. **Market Code**. When selected, the screen lists all available Market codes applicable for the property. You can select one or more **Market Codes** for which the pre-registered check-in applies.
  - c. **Origin**. When selected, the screen lists all available Origin codes applicable for the property. You can select one or more **Origin Codes** for which the pre-registered check-in applies.
  - d. **Rate Code**. When selected, the screen lists all available rate codes applicable for the property. You can select one or more **Rate Codes** for which the pre-registered check-in applies.
  - e. **Reservation Type**. When selected, the screen lists all available Reservation Types applicable for the property. You can select one or more **Reservation Types** for which the pre-registered check-in applies.
  - f. **VIP**. When selected, the screen lists all available VIP codes applicable for the property. You can select one or more **VIP Codes** for which the pre-registered check-in applies.
  - g. **Membership**. When selected, you can select one or more **Membership Types**.
  - h. **Time**. When selected, the below fields become available. By default, the rule is based on the Check-In Time. **Allow (n) hours before property check in time**: The hours prior to check-in. Enter the number of hours before the property's official check-in time that the reservation is eligible for pre-registered check-in. The official check-in time for the property is based on the value entered in the **Check-In Time** field on the General Information screen. **Allow (n) hours after property check in time**: The hours after check-in. Enter the number of hours after the property's official check-in time that the reservation is eligible for pre-registered check-in.
4. Select the **Property** for which the rule is applicable.
5. Select the applicable **Start Date / End Date** for the rule. If an end date is not selected, the rule is applicable for any future date from the Start Date.
6. Click **Save** to close or click **Save and Continue** to add additional rules.

### Editing a Pre-Registration Rule

1. From the Administration menu, select **Booking**, select **Reservation Management**, and then select **Pre-Registration Rules**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.

3. From search results, click the row level **vertical ellipsis** for the code and select **Edit**. Make the desired changes.
4. Click **Save**.

#### Deleting a Pre-Registration Rule

1. From the Administration menu, select **Booking**, select **Reservation Management**, and then select **Pre-Registration Rules**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level **vertical ellipsis** for the code and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Immigration Status

### Prerequisites for Immigration Status

You can specify the immigration status for guests staying at your property. For example : Permanent Resident, US Citizen, Tourist. Once you configure these Immigration Statuses you can add the Immigration Status field to the Reservation Presentation page using [Page composer](#).

### Adding an Immigration Status

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Immigration Status**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code for the Immigration Status value.
  - b. **Description**. Enter a description for the Immigration Status.
  - c. **Manage Translation**. Select this link to enter translations of the description into other languages.

- d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to close or click **Save and Continue** to add additional statuses.

#### Editing an Immigration Status

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Immigration Status**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level **vertical ellipsis** for the code and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting an Immigration Status

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Immigration Status**.
2. Select or confirm the **Property**, enter optional search criteria, and click **Search**.
3. From search results, click the row level **vertical ellipsis** for the code and select **Delete**.
4. Click **Delete** to confirm.

**Tasks:** Reservation Management

Immigration Status

- New/Edit Immigration Status
- Delete Immigration Status

## Auto Attach Elements

#### [Prerequisites for Auto Attach Elements](#)

Auto attach elements are rules defined to auto-update various fields (elements) on a new reservation entered via the Look to Book Sales screen.

When Reservations > Advanced Discount is active in OPERA Controls, an Advanced Discount element type is enabled for the following base conditions:

- Membership
- Preferences
- Rate Code (rate code must be flagged discountable in rate definition)
- Room Type

- Specials

Select an advanced discount reason code to attach to the reservation based on the condition specified. For example: based on membership = OR, attach the advanced discount code, OR10, to the reservation.

When the Auto Attach rule applies, the Element Type field updates automatically on the reservation.

**Note:**

The Auto-attach Elements function does not apply to reservations made from the rooming list entry.

The fields that are updated on a reservation are determined by the condition defined in the rule, for example:

- Specials updated on a reservation based on membership type.
- Specials updated on a reservation based on rate code.
- Specials updated on a reservation based on room type.
- Traces added to the reservation based on rate code.
- Traces added to the reservation based on room type.
- Packages updated on a reservation based on membership type.

For example, a rule could be configured as follows:

```
IF RATE CODE = 'CORP01'
```

```
then UPDATE SPECIALS with 'FB' (Fruit Basket)
```

## Prerequisites for Auto Attach Elements

**Group:** Reservations

**Functions:**

- Advanced Discount
- Reservation Auto Attach Elements

## Configuring Auto Attachment Rules

### [Prerequisites for Auto Attach Elements](#)

Auto-attach Elements enable properties to automatically update new reservations with selected benefits. For example, a reservation for a VIP reservation might auto-update with a package item for a fruit platter or a trace to housekeeping for special amenities to be placed in the room.

### Adding Auto Attachment Rules

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Auto Attachment Elements**.
2. Select **New**.
3. Complete the following fields:
  - a. **Property**. Select or enter a property code.
  - b. **Code**. Enter a unique code (identifier) for the rule.

 **Note:**

Different field prompts appear on the screen depending on the **Based On** and **Element Type** values you select.

4. Select the **Based On Conditions** on which to base the auto attach rule.
  - a. Options are: Membership, Rate Code, Preference, Room Type, Adults, Children, Specials, VIP, or Keyword Type.
  - b. Based on the conditions you select, other fields or options appear enabling you to add details to the conditions. For example, if selecting Membership, the Membership Type field and Membership Level selector appear.
5. Select an **Element Type**. Select the field to update on the reservation. The available Element Types will vary depending on the Based On Condition you selected.
6. **Details** (field prompt will vary according to the element type you selected). Select code(s) from the list to update on the selected field (element type) on the reservation – these are the values being attached to the reservation.

 **Note:**

When the Reservations > Advanced Discount is active in OPERA Controls, an Advanced Discount element type and an Advanced Disc Code field are enabled for certain conditions. Select an Advanced Discount code to update on reservations, resulting in a dynamically calculated discount.

7. Click **Save**.

### Editing Auto Attachment Rules

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Auto Attachment Elements**
2. Select or confirm the Property.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and then click on the vertical ellipsis.
5. Select **Edit**.

6. Select **Inactive** if you want to make the rule code inactive.
7. Update the configuration and then click **Save**.

#### Deleting Auto Attachment Rules

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Auto Attachment Elements**
2. Select or confirm the Property.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and then click on the vertical ellipsis.
5. Select **Delete**.

## Configuring Reservation Cancellation Reasons

OPERA Cloud requires a reason to be selected for every reservation cancellation. These cancellation reasons are used for individual reservations and are not displayed for block cancellations. See [Configuring Block Cancellation Reasons](#).

Cancellation reasons is a global configuration shared by all properties when the OPERA Multi-property Cross Reservation Cloud Service is active.

#### Adding a Reservation Cancellation Reason

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Cancellation Reasons**.
2. Click **New** and enter the following details:
  - a. **Code**. Enter a code for the cancel reason
  - b. **Description**. Enter a description for the cancel reason
    - i. **Manage Translation**. Click to open the multi-language screen and configure a translated description for each language
  - c. **Display Seq**. Enter a number that controls the position of this code in listings. Codes not assigned a sequence number are listed in alphabetical order following codes with an assigned sequence.
3. Click **Save**.

#### Editing a Reservation Cancellation Reason

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Cancellation Reasons**.
2. Enter search criteria and click **Search**.
3. In the search results, select the **code**, click the **vertical ellipsis**, and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting a Reservation Cancellation Reason

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Cancellation Reasons**.

2. Enter search criteria and click **Search**.
3. In the search results, select the **code**, click the **vertical ellipsis**, and select **Delete**.
4. Select **Delete** to confirm.

## Configuring Country Entry Points

Country End Points specify where a guest has entered the country (for example, cities or airports). Once codes are configured, you can select the Country Entry Point code from the customized Reservation Stay Details panel in [Reservation Presentation](#).

### Adding Country Entry Points

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Country Entry Points**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter the code to identify an entry point.
  - b. **Description**: Enter a description of the entry point.
  - c. **Display Seq**: Enter a number that controls the position of this code in listings.
3. Click **Save**.

### Editing Country Entry Points

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Country Entry Points**.
2. Enter search criteria and click **Search**.
3. Select the Country Entry Point, then click the **vertical ellipsis** and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Country Entry Points

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Country Entry Points**.
2. Enter search criteria and click **Search**.
3. Select the Country Entry Point, then click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Room Assignment Ratings

### [Prerequisites for Configuring Room Assignment Ratings](#)

Room Assignment Ratings are required for the Enhanced Room Assignment feature in OPERA Cloud; you can apply a rating to attributes in order for OPERA Cloud to assign the available rooms in order of importance (by the rated attributes).

You must also assign a desirability rating to each room so that when conducting [Batch \(Auto\) Room Assignment](#), attributes ranked **Most Important** will result in these

reservations being ordered first in the process, and those attributes ranked **Least Important** result in reservations being ordered last. Ensuring the most important reservations are allocated the most desirable rooms.

### Editing Room Assignment Ratings

1. From the **Administration** menu, select **Booking**, then select **Reservation Management**, then **Room Assignment Ratings**.
2. Select the required tab.
3. Enter search criteria and click **Search**.
4. Select **Edit**.
  - a. For each entry listed in the result select a **Rating** from the list.
  - b. Repeat the rating selection for all entries listed.
5. Click **Save**.

## Configuring Discount Reasons

### Prerequisites for Discount Reasons

Discount reasons are used to identify why a flat amount or percentage discount rate discount is applied to a reservation. When the Advanced Discount OPERA Control is active, an **Advanced** check box is enabled when configuring discount reasons.

These discount reasons are referenced in [Auto Attach Element rule configuration](#) to dynamically setup a reservation discount amount based on the rules you configure. The following business logic applies for advanced discount rules:

- **Occupancy %:**

Advance Discount Occupancy = Total Rooms Sold / Total Inventory Rooms.

  - **Total Rooms Sold:** Includes Day Use, Complimentary, No Show, and Advance Discount reservations.
  - Total Inventory Rooms = Total number of physical rooms configured at your property. Does not subtract Out Of Order (OOO) or Out Of Service (OOS).
- **Average Daily Rate (ADR):**

Advance Discount ADR = Total Gross Room Revenue - Advance Discount Revenue / Total Rooms Sold.

- Total Gross Room Revenue = Includes all lodging (type) charges, including No Shows, Day Use, Cancellation fees, Late Checkout fees, Upgrade fees. Does not subtract revenue adjustments (credits). Does not include Advance Discount rate postings, but includes manually posted lodging transactions. Lodging transactions posted on the OPERA business date will be considered for Total Gross Room Revenue regardless of the reservation stay dates.
- Total Rooms Sold = Total room sold per business day. Includes Day Use & Points and Cash and No Show reservations. Does not include Complimentary or Advance Discount reservations.

### Adding a Discount Reason

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Discount Reasons**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter the code you want to assign to a discount reason. For example, ERR, WALK, RG, or MGMT.
  - b. **Description**: Enter a discount reason explanation, such as agent error, walked guest, repeat guest, management decision, and so on.
  - c. **Display Seq**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - d. **Adding Advance Discount Calculation Rules**: Advanced Discount Reasons allow you to configure rule based discounting based on an occupancy range, discount amount, and a calculation rule (% of ADR).

#### Note:

Advanced Discount Reasons do not appear in the discount field list in Reservation Stay Details.

- i. Click the **Advanced check box** to identify the discount reason as an Advanced discount.
  - ii. Click **Add Row** to add new rules.
  - iii. Enter the **Max Occupancy** and the **Discount** (% of ADR) per rule:
    - i. The Min Occupancy % auto-populates for the new rule added.
    - ii. Click **X** to delete a rule.
  - e. Click **Save and Continue** to add another rule.
3. Click **Save**.

### Editing a Discount Reason

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Discount Reasons**.
2. Enter search criteria and click **Search**.

3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then click **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting a Discount Reason

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Discount Reasons**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then click **Delete**.
4. Click **Delete** to confirm.

## Configuring Guest Locators

Locator texts define the standard texts available for selection when a user must add a guest locator to an inhouse reservation. You can add a locator to a reservation via the telephone operator or from the reservation details link.

To facilitate the faster entry of locators, you can define standard locator texts so that the GSA/ phone operator only has to select a locator from a list instead of typing the full location each time.

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new locators are created by selecting the Template tab. Once created, you can copy locators to specific properties using the Copy action. See [Copying Configuration Codes to Multiple Properties](#) for more information.

### Adding a Locator Text

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Guest Locators**.
2. Click **New** to add a new Guest Locator and complete the following fields.
  - a. **Property**. Enter or search for and select a property.
  - b. **Code**. Enter a number to assign to the locator code.
  - c. **Description**. Enter the text that describes the locator.
  - d. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing a Locator Text

1. Select or confirm the **Property**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. Select **Inactive** if you want to mark the locator code inactive.
6. Update the configuration and click **Save**.

### Deleting a Locator Text

1. Select or confirm the **Property**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Delete**.

For more information, see [Telephone Operator](#).

## Configuring Guest Messages

Message templates enable you to define standard message texts within OPERA Cloud to ensure consistency in the format of guest messages.

You can configure messages in multiple languages. Messages are added to a reservation by the [telephone operator](#) or directly on a reservation from the Messages details link.

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new guest message texts are created by selecting the Template tab. Once created, you can copy guest message texts to specific properties using the Copy action. Refer to [Copying Configuration Codes to Multiple Properties](#) for more information.

### Adding Guest Message Formats

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Guest Messages**.
2. Click **New** and complete the following fields:
  - a. **Property**. Enter or search for and select a property.
  - b. **Code**. Enter the code for the message format (for example, FAX, VISIT, or CALLBACK).
  - c. **Description**. Enter the text of the message. (For example, you could enter the following text: We received a fax for you at the reception. <Visitor Name> came to visit you. <Caller Name> has called. Please call back!)
  - d. **Manage Translations**. Select this link to enter translations of the message text into other languages.
  - e. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing Guest Message Formats

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Guest Messages**.
2. Enter search criteria and click **Search**.
3. In the search results, select the message format then click the **vertical ellipsis** then click **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Guest Message Formats

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Guest Messages**.
2. Enter search criteria and click **Search**.
3. In the search results, select the message format then click the **vertical ellipsis** then click **Delete**.
4. Click **Delete** to confirm.

## Configuring Guest Status

The Guest Status Screen is used to create Guest Status Codes based on your Property's local requirements.

The Guest Status list field can be added to the Reservation Overview Reservation and Stay Details panel of Reservation Presentation using [Customizing or Personalizing a Screen with Page Composer](#).

The Guest Status Codes, such as tourist-cl1 (class1), tourist-cl2, government-cl1, government-cl2 and so on are used to track the registration status of guests in countries such as Croatia and can be included in exports required by local authorities.

### Adding Guest Statuses

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Guest Status**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter a code for the Guest Status code.
  - b. **Description**: Enter the text that describes the Guest Status.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing Guest Statuses

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Guest Status**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Guest Statuses

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Guest Status**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then select **Delete**.
4. Click **Delete** to confirm.

## Configuring Guest Types

The Guest Types Screen is used to create Guest Type Codes, such as Tourist, Delegates, Business Traveler and so on.

The Guest Type list field can be added to the Reservation Overview Reservation and Stay Details panel on the Reservation Presentation page using [Customizing or Personalizing a Screen with Page Composer](#).

### Adding Guest Types

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Guest Types**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter a code for the Guest Type.
  - b. **Description**: Enter the text that describes the Guest Type.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing Guest Types

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Guest Types**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Guest Types

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Guest Types**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then select **Delete**.
4. Click **Delete** to confirm.

## Configuring Property Move Reasons

When the Oracle Hospitality OPERA Multi-property Cross Reservation Cloud Service is active, reservation agents need to select a Property Move Reason when moving a reservation to another property in the Look to Book sales screen. For more information, see [Booking a Reservation](#).

### Adding a Property Move Reason

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Property Move Reasons**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter a code for the Property Move Reason.

- b. Description:** Enter the text that describes the Property Move Reason, for example, sold out, weather, management, or group extended.
    - c. Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - 3.** Click **Save**.

#### Editing a Property Move Reason

- 1.** From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Property Move Reasons**.
- 2.** Enter search criteria and click **Search**.
- 3.** In the search results, select the code and click the vertical ellipsis **Actions** menu, then click **Edit**.
- 4.** Update the configuration.
- 5.** Click **Save**.

#### Deleting a Property Move Reason

- 1.** From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Property Move Reasons**.
- 2.** Enter search criteria and click **Search**.
- 3.** In the search results, select the code and click the vertical ellipsis **Actions** menu, then click **Delete**.
- 4.** Click **Delete** to confirm.

## Configuring Purpose of Stay

Purpose of Stay is a list field on the reservation [stay details](#). Value selected in reservation can be used for statistical reporting and may also be reported to local authorities via reports, exports or integration with external systems.

#### Adding Purpose of Stay

- 1.** From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Purpose of Stay**.
- 2.** Click **New** and complete the following fields.
  - a. Code:** Enter a code for the Purpose of Stay (for example, BUS, TRAV, LEIS, CONF, or SEM).
  - b. Description:** Enter the text that describes the Purpose of Stay (for example, Business, Travel, Leisure, Conference, or Seminar).
  - c. Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
- 3.** Click **Save**.

### Editing Purpose of Stay

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Purpose of Stay**.
2. Enter search criteria and click **Search**.
3. In the search results, select the purpose of stay, click the vertical ellipsis **Actions** menu, and then click **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Purpose of Stay

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Purpose of Stay**.
2. Enter search criteria and click **Search**.
3. In the search results, select the purpose of stay, click the vertical ellipsis **Actions** menu, and then click **Delete**.
4. Click **Delete** to confirm.

## Configuring Room Move Reasons

Room move reasons are used when moving a guest from one room in a property to another room in the same property after the reservation has been checked in.

### Adding a Room Move Reason

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Room Move Reasons**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter a code for the Room Move Reason.
  - b. **Description**: Enter the text that describes the reason for the room move.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing a Room Move Reason

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Room Move Reasons**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then click **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting a Room Move Reason

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Room Move Reasons**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then click **Delete**.
4. Click **Save**.

## Configuring Trace Texts

### Prerequisites for Trace Texts

You can setup default trace texts for commonly used messages and instruction for reservation, blocks, or AR account traces. These default trace texts can be selected and used as-is, or they can be modified as necessary by a user. Each default trace texts is associated with a [department](#) .

### Adding a Trace Text

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Trace Texts**.
2. Click **New** and complete the following fields.
  - a. **Location**: Select either **Global** (available for all properties) or **Property** (available for only the selected property) for the trace text location. If you select **Property**, you must enter or search for and select a property.
  - b. **Department Code**: Enter or search and select the department associated with this trace text.
  - c. **Trace Text**: Enter the text of the trace message. Up to 256 characters can be entered.
  - d. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing a Trace Text

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Trace Texts**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu, and then click **Edit** .
4. Update the configuration.
5. Click **Save**.

### Deleting a Trace Text

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Trace Texts**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu, and then click **Delete**.
4. Click **Delete** to confirm.

## Turnaway Codes

### Prerequisites for Turnaway Codes

Turnaway Codes enable you to record the number of potential reservations that were "turned away" and could not be confirmed.

For every new reservation aborted in the Look to Book sales screen, OPERA Cloud prompts you for a turnaway reason.

You can classify turnaways as denials or regrets:

- Denials are reasons for turning away customer business on the property-side (for example, sold out, room/rate not available, and so on).
- Regrets are reasons why a guest does not book the reservation (for example, price sensitivity, location, shopping, and so on).

## Prerequisites for Turnaway Codes

## Configuring Turnaway Codes

### [Prerequisites for Turnaway Codes](#)

#### Adding Turnaway Codes

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Turnaway Codes**.
2. Click **New** and complete the following fields:
  - a. **Property**: Enter or search for and select a property.
  - b. **Code**: Enter a code that defines the reason for the turnaway (for example, SO, PR, RT, WL, or BQ).
  - c. **Description**: Enter a description for the turnaway code, such as Sold out, Price resistance, Room type requested not available, Wrong location, Banquet facilities not available, and so on.
  - d. **Turnaway Type**: Classify the turnaway as either a **Denial** (the property denies business from the guest) or a **Regret** (a guest denies business from the property).
  - e. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

#### Editing Turnaway Codes

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Turnaway Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then click **Edit**.

4. **Inactive:** Select checkbox to mark a code as inactive. If inactive, it is excluded from the display .list.
5. Update the configuration.
6. Click **Save**.

#### Deleting Turnaway Codes

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Turnaway Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then click **Delete**.
4. Click **Delete** to confirm.

## Upgrade Rules

### Prerequisites for Upgrade Rules

Upgrade Rules enable you to configure the rules for calculating the reservation upgrade amounts. Rules define the date period, lead time, to/from room types and reservation filters, the upgrade pricing calculation and the sales charge transaction code to be used to post the upgrade revenue.

Prior to configuring upgrade rules, ensure you have configured the upgrade room class and [room type hierarchies](#).

You can then upgrade a reservation during the reservation creation, during update or during check-in.

#### Note:

Reservations associated with a block are eligible for upgrade whether or not they have a rate code associated with them.

You cannot upgrade reservations under the following conditions:

- The reservation status is Checked In, Cancelled, No Show, or Waitlist.
- The reservation has a fixed rate. This is only available if the Allow Fixed Rate Reservations parameter is active under the Reservations group in OPERA Controls.
- The reservation is a shared reservation.
- The reservation already has rate discounts applied. This is only available if the Allow Reservation Discounts parameter is active under the Reservations group in OPERA Controls.
- The reservation has multiple rate codes.

## Prerequisites for Upgrade Rules

### OPERA Controls

**Group:** Reservations

**Functions:**

- Fixed Rates
- Reservation Upgrade

### OPERA Cloud Tasks

**Group:** Booking Admin

**Tasks:** Reservation Management

Upgrade Rules

- New/Edit Upgrade Rules
- Delete Upgrade Rules

## Configuring Reservation Upgrade Rules

Upgrade Rules enable you to configure the rules for calculating the reservation upsell amounts for specific room types and date ranges.

### Adding an Upgrade Rule

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Upgrade Rules**.
2. Click **New**.
3. Select either **Room Type** or **Room Class**.
  - a. **Room Type**. Select this tab to create an upsell rule from room type to room type.
  - b. **Room Class**. Select this tab to create an upsell rule from room class to room class (Available when the Room Class OPERA Control is active).
4. Complete the following fields:
  - a. **Property**. Enter or search for and select a property for the upgrade rule configuration.
  - b. **Code**. Enter a code that represents the upgrade rule.
  - c. **Description**. Enter a description for the upgrade rule (for example, "Upgrade from Standard to Deluxe King").
  - d. **Start Date / End Date**. Select a start date and an end date for the date range during which the upgrade rule is valid
  - e. **From Room Type / To Room Type**. Select a "from" room type (that is, the original room type requested by the guest) and a "to" room type (that is, the upsell room type).

- f. **From Room Class / To Room Class.** Select the down arrow and choose a "from" room class (that is, the original room class requested by the customer) and a "to" room class (that is, the upsell room class).
- g. **Filters:** Select from the following filters:
- **Rate Codes.** Select the rate codes for which the upsell rule is being created.
  - **Rate Categories.** Select the rate categories for which the upsell rule is being created.

 **Note:**

When considering which rate codes/rate categories to select for the upsell rule, you should base your decision on the rate already being paid by the guest. In other words, if your property is already achieving a higher profit margin on the original rate, your property might allow a discount on the rate for an upsell room type. However, if the guest is already receiving a substantially discounted rate, you might not want to apply the same upsell consideration.

- **Membership Types.** Select the membership types for which the rule is applicable.
  - **Membership Levels.** Select the membership levels for which the rule is applicable.
  - **Reservation Types.** Select the reservation types for which the rule is applicable.
  - **Market Codes.** Select the market codes for which the rule is applicable.
  - **Source Codes.** Select the sources for which the rule is applicable.
  - **Channels.** Select the channels for which the rule is applicable.
- h. **Formula.** Select from the following options:
- **Flat Amount:** Adds the value in the Amount field to the original rate.
  - **% of Difference:** Calculates the difference between the original rate and the upgrade charge, and then the difference percentage is added to the original rate.
  - **% of Original :** Calculates a percentage of the original rate and adds it to the original rate.
- i. **Upgrade By:** Select from the following options:
- **Amount.** Select to upgrade by amount and then enter the value used to calculate the upgrade amount/percentage. This value is dependent on the selected **Formula**.
  - **Occupancy Levels.** Select to upgrade by occupancy levels and then enter an upgrade amount for each occupancy range percentage (for example, 0 to 50% occupancy or 51 to 100 % occupancy). These levels are defined in OPERA Controls.
- j. **Currency Code.** Enter or select a currency code for the upgrade rule.
- k. **Rounding Rule.** Select a rounding operation for the rule depending on how you want to round the calculated rates. The following options are available:

- **Up.** Rounds up to the next highest whole number (12% x 110 = 13.20; Rounded up = 14).
  - **Down.** Rounds down to the next lowest whole number (12% x 110 = 13.20; Rounded Down = 13).
  - **None.** Does not round.
  - **Up-Keep Decimal.** Keeps the decimal increments while rounding up to the next highest whole unit (12% x 110 = 13.20; Rounded Up Keep Decimal = 14.20).
  - **Down-Keep Decimal.** Keeps the decimal increments while rounding down to the next lowest whole unit. (12% x 110 = 13.20; Rounded Down Keep Decimal = 13.20)
- l. Maximum Days in Advance.** Enter the maximum number of days in advance of the reservation arrival date that a reservation can be upgraded using this rule. For example, if this field is set to 10, then the reservation must be booked at least 10 days before the arrival date for the upsell offer to be presented.
    - m. Transaction Code.** Enter or select a transaction code for the upgrade rule.
  5. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing an Upgrade Rule

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Upgrade Rules**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then click **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting an Upgrade Rule

1. Select the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Upgrade Rules**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then click **Delete**.
4. Click **Delete** to confirm.

## Waitlist

#### Prerequisites for Waitlist Codes

You can place bookings on a waitlist if the requested room type or rate is not available. When a reservation is created and then moved to the waitlist, the system requires a reason and a priority

Use waitlist reason codes to designate why a reservation is being placed on a waitlist (rate not available, room not available, dates not available, and so on) and use waitlist priorities to determine the priority on waitlist.

## Prerequisites for Waitlist Codes

### OPERA Controls

**Group:** Reservations

**Functions:** Waitlist

### OPERA Cloud Tasks

**Group:** Booking Admin

**Tasks:** Reservation Management

- **Waitlist**
  - New/Edit Waitlist
  - Delete Waitlist

## Configuring Waitlist (Reason) Codes

Waitlist reasons are used when moving a reservation to waitlist.

### Adding Waitlist Codes

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Waitlist Codes**.
2. Click **New** and complete the following:
  - a. **Code:** Enter a code that defines the reason for the waitlist.
  - b. **Description:** Enter a description for the waitlist reason code.
  - c. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing Waitlist Codes

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Waitlist Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then click **Edit**.
4. Update the configuration.
5. Click **Save**

### Deleting Waitlist Codes

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Waitlist Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then click **Delete**.
4. Click **Save**.

## Configuring Waitlist Priorities

You can move a reservation to waitlist status if the requested rate or room type are not available for the dates required. When a reservation is created and then moved to waitlist, you can set different priorities for confirming these waitlisted reservations.

### Adding a Waitlist Priority Code

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Waitlist Priorities**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter a code that represents the waitlist priority (for example, HI, LO, 1, or 2).
  - b. **Description**: Enter a description for the waitlist priority, such as high priority, low priority, level one, level two, and so on.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing a Waitlist Priority Code

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Waitlist Priorities**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then click **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting a Waitlist Priority Code

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Waitlist Priorities**.
2. In the search results, select the code, click the vertical ellipsis **Actions** menu, and then click **Delete**.
3. Click **Delete** to confirm.

## Configuring Reservation Colors

### Prerequisites for Reservation Colors

Reservation colors are used to uniquely identify a subset of reservations at your property; for example, guests with disability or other special needs.

Configure the descriptions for the Display Color list field displayed in [reservation stay details](#).

The available colors are:

- Black
- Blue
- Cyan
- Green
- None
- Red
- White
- Yellow

### Editing Reservation Colors

1. From the **Administration** menu, select **Booking**, select **Reservation Management**, and then select **Colors**.
2. Enter search criteria, then click **Search**.
3. Select the color in the search result, then click the vertical ellipsis and select **Edit**.
  - a. **Description**: Enter a description for the color
  - b. **Sequence**: Enter a number that controls the display position of this code in list.
  - c. **Inactive**: Select checkbox to make the color inactive.
4. Click **Save**.

## Prerequisites for Reservation Colors

# Resource Management

## [Prerequisites for Resource Management](#)

Use Resource Management to configure and manage event related resources such as items, menus, catering revenue types, catering packages/templates, and so on.

## Prerequisites for Resource Management

### Licenses / Subscriptions

Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition

Or

Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition

## Configuring Catering Packages / Templates

### [Prerequisites for Catering Packages / Event Templates](#)

Catering packages and templates are designed to make it easier for you to set up Events. They provide pre-configured resources typically used for Events. Templates and packages are similar except that templates do not include prices.

### Adding a Catering Package / Template

1. From the **Administration** menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Click **New** and complete the following fields:
  - a. **Type**. Select an option based on whether you are creating a catering package or a template:
    - i. **Package** - a group of events with defined resources priced at a flat rate or per person price that remain linked together after you add the package to a block.
    - ii. **Template** - a group of events with defined resources that do not continue linked together and are not priced as a group after you add the template to a block.
  - b. **Code**. Enter a code representing the catering package, such as Daily.
  - c. **Description**. Enter a description of the catering package, such as Daily Meeting Planner Package.
  - d. **Manage Translations**. Select to configure translated description for each language.
  - e. **Duration**. The number of days covered by the package or template. For example, a package might include two days with lunch and dinner on each day.

3. Click **Save and Go To Presentation** to save and open the presentation so that you can complete the catering package configuration.

#### Editing a Catering Package / Template

1. From the **Administration** menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **package**, click the **vertical ellipsis**, and select **Edit**.
4. In the Catering Package Details panel, click **Edit**.
5. Make the required changes and click **Save**.

#### Deleting a Catering Package / Template

1. From the **Administration** menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **package**, click the **vertical ellipsis**, and select **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Catering Packages / Event Templates

### OPERA Controls

**Group:** Events

**Functions:**

- Event Packages
- Event Templates

## Configuring Catering Template Events and Notes

### Adding Events to Catering Templates

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **package**, click the **vertical ellipsis**, and select **Edit**.
4. In the Events panel, click **New** to add events that should be included in this catering panel. Complete the following fields:
  - a. **Day.** Enter the Day 1 of the catering package indicating when the event will take place within the duration of the package, for example, Day 1, Day 2, and so on.
  - b. **Event Type.** Select the type of event, such as Breakfast, Exhibition, and so on.
  - c. **Event Name.** The name appears automatically based on the Event Type you select.
  - d. **From and To.** Enter the start time and end time of the event.

- e. **Space.** Enables you to select a function space for the event.
  - f. **Setup Style.** If you select a function space, select a setup style.
5. Click **Save** to continue to the Resources panel.

#### Editing Events on Catering Templates

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **package**, click the **vertical ellipsis**, and select **Edit**.
4. In the Events panel, click the event's row level **vertical ellipsis** and select **Edit**.
5. Make the required changes in the Events panel and click **Save**.
6. To edit resources attached to events, click the panel level **Edit** button, click the **Item drawer** or the **Menus drawer**, select **resources**, and click **Save**.

#### Deleting Events from Catering Templates

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **package**, click the **vertical ellipsis**, and select **Edit**.
4. In the Events panel of Manage Catering Packages and Templates, select the event's row level **vertical ellipsis** and click **Delete**.
5. Click **Delete** to confirm.

#### Adding Event Notes

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **package**, click the **vertical ellipsis**, and select **Edit**.
4. In the Events panel, select the event's row level **vertical ellipsis** and click **Add Note**.
5. Complete the following fields:
  - a. **Type.** Select the appropriate note type.
  - b. **Internal.** Select this check box if the note you are adding is considered Internal. On certain customer facing reports, such as BEO Contract, you have the option to display Internal notes.
  - c. **Title.** This value defaults based on the event type you select. You can modify it here if required.
  - d. **Comments.** Enter the text for this note in the box.
6. Click **Save**.

### Editing Event Notes

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **package**, click the **vertical ellipsis**, and select **Edit**.
4. In the Events panel, click the **Note** icon on the event.
5. In the Package Event Notes dialog, click the note's **vertical ellipsis** and select **Edit**.
6. Make your changes and click **Save**.

### Deleting Event Notes

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **package**, click the **vertical ellipsis**, and select **Edit**.
4. In the Events panel, click the **Note** icon on the event.
5. In the Package Event Notes dialog, click the note's **vertical ellipsis** and select **Delete**.
6. Click **Delete** to confirm.

### Converting a Regular Event to a Sub Event

You can convert a regular event to a sub event in a catering package/template. When doing so, you must select a master event for the sub event.

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Select or confirm the **Property**, enter additional search criteria, and click **Search**.
3. From your search results, select the **package/template**, click the **vertical ellipsis**, and select **Edit**.
4. In the Events panel, click the regular event's **vertical ellipsis** and select **Convert to Sub Event**.
5. From the Select a Master Event dialog, select a **Master Event** and click **Save**.

### Creating a Sub Event on a Catering Package/Event Template Event

You can create a sub event attached to an event. The event you select cannot be a sub event.

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, click the row level **vertical ellipsis** and select **Edit**.
4. In the Events panel, select the event's row level **vertical ellipsis** click **Create Sub Event**.
5. Complete the following fields:
  - a. **Event Type**. Select the appropriate event type.

- b. **Event Name.** This value defaults based on the event type you selected. You can modify the event name, if required.
  - c. **From and To.** Enter the start time and end time of the event.
  - d. **Space.** If required, select a function space for this event.
  - e. **Setup Style.** If a function space selected, select a setup style.
6. Click **Save**.

## Configuring Catering Template Resources and Notes

### Adding Resources

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **package**, click the **vertical ellipsis**, and select **Edit**.
4. To add a menu, click the **Menus** tab to open the Menu Selection drawer. Menus configured for the selected Event Type appear. To change the filter criteria, click the **(+)** symbol in the Search bar and make the necessary changes.
5. To view the Menu Item details of a menu, select the **Menu Name** link.
6. To select a menu, click the **menu row** (not the Menu Name link).
7. Click **Save** to add the menu and close the drawer.
8. Click **Save and Add More** to add the menu and remain in the drawer with the option of adding additional menus.
9. To add an Item, click the **Items** tab to open the Item Selection drawer.
10. Items configured for the selected Event Type appear. If you want to change the filter criteria, click the **+ sign** in the Search bar and make the necessary changes.
11. Click the **(+)** symbol in the results list to expand an Item Class and see the Items listed within.
12. To select one or several items, click the **item name** check box.
13. Click **Save** to add the item(s) and close the drawer.
14. Click **Save and Add More** to add the item(s) and remain in the drawer with the option of adding additional items.

### Editing Resources

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **package**, click the **vertical ellipsis**, and select **Edit**.
4. From the Resources panel, select the **resource** check box and click the **Edit** button.
5. Make your changes to the Sequence or Setup and click **Save**.

### Deleting Resources

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **package**, click the **vertical ellipsis**, and select **Edit**.
4. From the Resources panel, select the **resource**, click the **vertical ellipsis** next to the Edit button, and select **Delete**.
5. Click **Delete** to confirm.

### Adding Resource Notes

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **package**, click the **vertical ellipsis**, and select **Edit**.
4. In the Resources panel, select the resource **vertical ellipsis** and select **Add Note**.
5. Complete the following fields:
  - a. **Type**. Select the appropriate note type.
  - b. **Internal**. Select this check box if the note you are adding is considered Internal. On certain customer facing reports, such as BEO Contract, you have the option to display Internal notes.
  - c. **Title**. This value defaults based on the event type you select. You can modify it here if required.
  - d. **Comments**. Enter the text for this note in the box.
6. Click **Save**.

### Editing Resource Notes

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the package, click the **vertical ellipsis**, and select **Edit**.
4. From the Resources panel, click the **Note** icon on the event.
5. In the Package Resource Notes dialog, click the note **vertical ellipsis** and select **Edit**.
6. Make your changes and click **Save**.

### Deleting Resource Notes

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the package, click the **vertical ellipsis**, and select **Edit**.
4. From the Resources panel, click the **Note** icon on the event.

5. In the Package Resource Notes dialog, click the note **vertical ellipsis** and select **Delete**.
6. Click **Delete** to confirm.

## Configuring Catering Package Pricing

Catering packages can include a package price code covering the various event components the package offers. You can configure a flat price catering package or a per person package. When booking a flat price package, the revenue associated with the events is applied and does not change based on the number of attendees on the package. Use the following steps to configure a package price code.

### Adding Pricing to Packages

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package/Template Setup**.
2. Enter or confirm the **Property**, click **Packages** type, and click **Search**.

 **Note:**

If you select **Templates** type or **Both** types, the option for pricing will not be available, as pricing is specific to packages.

3. From your search results, select the package, click the vertical ellipsis **Actions**, and select **Edit**.
4. In the Pricing panel, click **New** and enter the following details:
  - a. **Price Code**. Enter a code that represents the price details, such as 2021MPKG.
  - b. **Description**. Enter a description for the price code, such as 2020-2021 Meeting Package.
  - c. **Market Code**. Select a market code, if applicable. Selecting a Market Code limits the availability of the price code based on the Market Code of the block. When the market code selected matches the market code of the block, the price code becomes available.
  - d. **Sell Date From and To**. Enter the date range the package price is available for sale.
  - e. **Booking Type**. Visible when the OPERA Control is Business Block Type is On, select a booking type, if applicable. Selecting a Booking Type limits the availability of the price code based on the booking type of the block. When the booking type selected matches the booking type of the block, the price code becomes available.
  - f. **Block Date From and To**. Enter the data range the block must be within for this price code to be available.
  - g. **Attendees Minimum**. Enter the minimum number of attendees for this price code to be available.
  - h. **Attendees Maximum**. Enter the maximum number of attendees for this price code to be available Flat Price.

- i. **Flat Price.** Select the check box if you are selling the package at a set amount that is not calculated based on the number of attendees.
5. In the Revenue Details section of the Pricing panel, enter a price for each event and revenue type. The package price will increase.
  - a. In the **Forecast** field, you can also enter the estimated value of the Price Code. The amount entered in this field is used for revenue forecasting.
  - b. In the **Price** field, the amount entered is how much revenue should be allocated for the event and revenue type combination.
  - c. The **Cost Split** field represents the hotel's internal cost and is visible when the OPERA Control for Resource Cost is On. For example, if the package includes a dinner with a menu that includes wine and stuffed chicken, the hotel package pricing could look like the following:  
  
Dinner + Bev: Forecast: \$8 /Price: \$8 /Cost Split: \$3.50  
Dinner + Food: Forecast: \$30 /Price: \$30 /Cost Split: \$14
6. If additional Revenue Type records are needed, click **New**. Add a new revenue type record using the following:
  - a. Select the **Event Type**.
  - b. Select a **Revenue Type**.
  - c. Select **Ok** to save and add the record to the pricing screen.
  - d. In the price code configuration screen, the newly created is available. Enter the **applicable values** for Forecast, Price, and Cost Split.
7. Click the vertical ellipsis **Actions** next the New button and select **Refresh** to update the screen after entering pricing. The revenue detail totals for Forecast, Price and Cost Split update to reflect changes made.
8. Click **Save**.

#### Editing Pricing on Packages

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **package**, click the vertical ellipsis **Actions**, and select **Edit**.
4. In the Pricing panel, select the **Price Code**, select the vertical ellipsis **Actions**, and select **Edit**.
5. Make the required changes.
6. Click **Save**.

#### Deleting Pricing from Packages

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Package / Template Setup**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **package**, click the vertical ellipsis **Actions**, and select **Edit**.

4. In the Pricing panel, select the **Price Code**, select the vertical ellipsis **Actions**, and select **Delete**.
5. Click **Delete** to confirm.

## Configuring Catering Revenue Groups

Revenue Groups are high-level categories for Revenue Types, which track revenue, costs, and margins. You can report revenues from the Revenue Group level, if desired.

### Adding a Catering Revenue Group

1. Select the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Revenue Groups**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code for the revenue group, such as FB for Food and Beverage.
  - b. **Description**. Describes the event type, such as Food and Beverage.
  - c. **Manage Translations**. Select to configure translated description for each language.
  - d. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - e. **Inactive**. Select this check box when a Revenue Group should no longer be available for selection.

 **Note:**

To see Inactive codes in search results, click the page level **vertical ellipsis** on the search screen and select **Show Inactive**.

3. Click **Save** to save and return to the Search panel.

### Editing a Catering Revenue Group

1. Select the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Revenue Groups**.
2. Enter search criteria and click **Search**.
3. From search results, select the **Revenue Group**, click the **vertical ellipsis**, and select **Edit**.
4. Make the required changes.
5. Click **Save** to save and return to the Search panel.

### Deleting a Catering Revenue Group

You can delete a Catering Revenue Group only if it has not been assigned to a Catering Revenue Type.

1. Select the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Revenue Groups**.
2. Enter search criteria and click **Search**.
3. From search results, select the **Revenue Group**, click the **vertical ellipsis**, and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Catering Revenue Types

All Catering Resources (Function Space, Menus, and Item Inventory) are associated with a Catering Revenue Type to facilitate quick, easy, and accurate reporting on catering revenue. You can link Catering Revenue Types to a Transaction Code to enable efficient posting of actualized revenue from an event to the block posting master.

### Adding a Catering Revenue Type

1. Select the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Revenue Types**.
2. Click **New** and complete the following fields:
  - a. **Revenue Group**. Select the appropriate group. [Configuring Catering Revenue Groups](#).
  - b. **Code**. Enter a code for the revenue type, such as AV, BEV, and so on.
  - c. **Description**. Enter a description of the revenue type, such as Audio Visual, Beverage, and so on.
  - d. **Manage Translations**. Select to configure translated description for each language.
  - e. **Sequence**. Enter a number that controls the position of this code in listings. Codes without an assigned sequence number appear in alphabetical order following codes with an assigned sequence.
  - f. **Food and Beverage**. When selected, this check box identifies the revenue type that should be bucketed together as Food and Beverage revenue.
  - g. **Inactive**. Select this check box when a Revenue Group should no longer be available for selection.
3. Click **New** to add property specific tax considerations by completing the following fields:
  - a. **Property**. Select the appropriate property.
  - b. **Tax Percentage**. Enter the percentage to charge for this revenue type.
4. Click **Save** to save and close or click **Save and Continue** to save and create another record.

### Editing a Catering Revenue Type

1. Select the Administration menu, select **Booking**, select **Resource Management**, and then select **Catering Revenue Types**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **code**, click the **vertical ellipsis**, and select **Edit**.
4. Make the required changes.

5. Click **Inactive** to make a code inactive. Inactive codes are not available for selection.
6. Click **Save**.

### Deleting a Catering Revenue Type

You cannot delete Catering Revenue Types. You can only mark them as inactive.

## Configuring Event Forecasts

### Premium

You can establish Event Type/Revenue Type forecasts by date range. You can define Event Forecasts to manage different revenue forecasts for different types of bookings, such as corporate versus social. You can also copy Event Forecasts. The capabilities are designed to reduce manual updates, provide accurate forecasts, and improve reporting.

### Adding Event Forecasts

1. From the Administration Menu, select **Booking**, select **Resource Management**, and select **Event Forecast Maintenance**.
2. Select or confirm the **Property**.
3. Click **New** and complete the following:
  - a. **Event Type**. Select an Event Type from the list; OPERA Cloud autofills a description and currency type.
  - b. **Start Date**. Enter a start date for the forecast.
  - c. **End Date**. Enter an end date for the forecast.
  - d. **Market Code**. Select a [market code](#).
  - e. **Block Type**. Select a [block type](#).
4. Click **New** to open the Revenue Details dialog and complete the following:
  - a. **Revenue Type**. Select a revenue type from the list.
  - b. **Amount**. Enter a forecast amount.
  - c. **Forecast Type**. Select to apply the amount as either a flat amount or per person.
5. Click **Save**.
6. Click **Save** again.

### Editing Event Forecasts

1. From the Administration Menu, select **Booking**, select **Resource Management**, and select **Event Forecast Maintenance**.
2. Enter search criteria and click **Search**.

3. From your search results, select the **Event Forecast** to update, click the **vertical ellipsis**, and select **Edit**.
4. Make your changes.
5. Click **Save**.

#### Deleting Event Forecasts

1. From the Administration Menu, select **Booking**, select **Resource Management**, and select **Event Forecast Maintenance**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **Event Forecast** to update, click the **vertical ellipsis**, and select **Delete**.
4. Click **Delete** again to confirm.

#### Copying Event Types

1. From the Administration Menu, select **Booking**, select **Resource Management**, and select **Event Forecast Maintenance**.
2. Enter search criteria and click **Search**.
3. From your search results, select an **Event Type**, click the page level **vertical ellipsis**, and select **Copy**.
4. Enter search criteria and click **Search**.
5. From the search results, select the **Event Types** you want to copy, and click the down arrow to move them to the bottom of the screen.

 **Note:**

You can return moved Event Types from the bottom of the screen to the list of all Event Types by selecting them and then clicking the up arrow.

6. Click **Save**. On the Review and Copy panel, complete the following fields:
  - a. **Copy Event Type As**. From the list of values, select the Event Type for the copied event.
  - b. **Copy Start Date As**. Select the start date.
  - c. **Copy End Date As**. Select the end date.
  - d. **Copy Market Codes As**. From the list of values, select the Market Code for the copied event.
  - e. **Copy Block Type As**. From the list of values, select a Block Type for the copied event.
7. Click **Copy and Continue**. Verify the Copy Results and click **Print**.

## Configuring Item Class

### [Prerequisites for Item Class](#)

[Inventory items](#) are categorized into logical entities called Item Classes. Item Classes assist you in filtering when selecting items for a block, event or for a reservation. For example, you might have an item class for different kinds of audiovisual equipment, for floral decorations, for recreational equipment, and so on.

### Adding an Item Class

1. From the **Administration** menu, select **Booking**, select **Resource Management**, and then select **Item Class**.
2. Click **New** and complete the following:
  - a. **Code**. Enter a code for the item class, such as AV.
  - b. **Description**. Enter a description of the item class, such as Audio Visual.
    - i. **Manage Translations**. Select to configure translated description for each language.
  - c. **Event Types**: Select the event types most likely to use the items associated with this Item Class. The items associated to this item class inherit the event types you select.
  - d. **Responsible Department**: Select the departments that will most likely be responsible for servicing the items associated to this item class. The values selected here are inherited by the items associated to this item class. For more information, see [Configuring Departments](#).
  - e. **Sequence**: Enter a number that controls the position of this code in listings. Codes without an assigned sequence number appear in alphabetical order following codes with an assigned sequence.
  - f. **Reservation**: Select the check box if the items in this Item Class should be available for selection in [blocks](#) and [reservations](#) (Available when Item Inventory OPERA Control is active).
  - g. **Events**. Select the check box if the items in this Item Class should be available for selection in events. For more information, see [About Event Resources](#) (Available when Event Resources OPERA Control is active).
    - i. **Discountable**. Select the check box if the items in this Item Class are eligible for discounting after you attach them to an event. The field is visible only when the Events check box is selected. The value entered in the item class is inherited by the items attached to it.
    - ii. **Bookable through website**: Select the check box if this item class should be available for selection when an event is booked through OWS.
3. Click **Save**.

### Editing an Item Class

1. Select the Administration menu, select **Booking**, select **Resource Management**, and then select **Item Class**.
2. Enter search criteria and click **Search**.
3. From your search results, click the **Item Class**, click the **Vertical Ellipsis**, and select **Edit**.
4. Make the required changes.
5. Click **Save**.

### Deleting an Item Class

You can delete an Item Class only if it does not have any items associated with it.

1. Select the Administration menu, select **Booking**, select **Resource Management**, and then select **Item Class**.
2. Enter search criteria and click **Search**.
3. From your search results, click the **Item Class**, click the **Vertical Ellipsis**, and select **Delete**.

## Prerequisites for Item Class

### OPERA Controls

  - Delete Item Class

## Configuring Item Inventory

### Prerequisites for Configuring Item Inventory

Inventory items or simply “items” include any equipment, products, supplies, or services that can be rented or sold to a catering customer or guest as part of a catering function or reservation add-on. For example, you can configure audio visual equipment, bartenders, extra beds, golf carts, and so on as inventory items to facilitate their management. When the Reservation Item Inventory OPERA Controls is active, items can also be configured and attached to reservations for equipment such as, rollaway beds and cribs.

### Adding an Item

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Item Inventory**.
2. Click **New** and complete the following:
  - a. **Item Class.** Select the appropriate value from the list. Associating an item to an [item class](#) allows for easier searching when adding an item to an event for grouping items when printing them on the Banquet Event Order (BEO).

- b. Revenue Types.** Select the appropriate value from the list. The revenue generated for this item will be attributed to the [revenue type](#).
- c. Name.** Enter a Description of the item, such as a flip chart with easel. This is what will print for this item in external reporting, for example, in the BEO or contract.
- d. Manage Translations.** Select to open the multi-language descriptions screen and configure a translated descriptions for each language.
- e. Description.** If the item requires more details than what the Name provides, enter it here.
- f. Quick Insert.** Enter a shortcut for the item to make regularly used items easier to recall. If none is entered, one will be automatically assigned when the record is saved. (Available when the Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition or the Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition is active).
- g. Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
- h. Event Types.** Select the appropriate value(s) for the item you are configuring. The values available for selection are limited by those selected on the item class that are associated with this item. Associating [event types](#) with an item streamlines the filtering when attaching them to an event.
- i. Available From / Available To.** If the item is available for a certain period of time each day, enter the start time and end time in these fields.
- j. Departments.** Select the departments that will most likely be responsible for providing servicing of the item. The departments listed are limited to those selected on the [item class](#) selected for this item.
- k. Setup Time.** Enter the number of minutes required to set up this item, if applicable.
- l. Tear Down Time.** Enter the number of minutes required to tear down this item, if applicable.
- m. Default Quantity.** Enter the quantity that should default when this item is selected to be added to an event, if applicable.
- n. Quantity in Stock.** If you have a specific physical inventory quantity of this item in stock, enter the quantity here.
- o. Cost.** Enter the monetary amount it takes to provide the item. This option is available when the parameter Resource Cost is set to on.
- p. Print.** Select this check box if the item should be printed on internal and external reports. If the check box is not selected, the item will not print on external reports (BEO, Contracts).
- q. Critical.** Select this check box if the application should track the availability of this item. If the quantity requested exceeds the availability, a message warns that there is insufficient inventory available and the additional items will be marked for external order.
- r. Discountable.** Select this check box if the item is eligible for discounting when attached to an event. This field is only available when the items are attached to an item class with the Events check box selected.

- s. **Sell Separate.** Select this check box if this item can be attached to a reservation. Typically, items that are not Sell Separate would be included as part of a package attached to a rate code. When adding a new item, the Sell Separate check box is selected by default. Items not marked as Sell Separate are still visible in the Inventory Item Availability screen, however, because they are not marked as Sell Separate, you cannot select them for association with a reservation.
  - t. **Sell Control.** Available when the Sell Control Items OPERA Control is on. Select this check box to enable a check of item inventory availability. If the item is not available for any or all of the dates chosen, an "Insufficient inventory" message appears. Users with the Override Item Sell Control task assigned to their role(s) can book items when there is no inventory available for the selected dates.
  - u. **Outside of Stay Dates.** Available when the Allow Inventory Items Outside of Stay Dates OPERA Control is active. Select this check box when the Item can be selected for a reservation outside of the stay dates.
  - v. **Trace Text:** Enter a trace text for the **Department(s)** selected. When a trace text is added for an item and the item is selected for a reservation a trace with the trace text will be added to the reservation for the selected department(s). For more information, see [Managing Reservation Traces](#).
    - i. Click **Insert Quick Text** to select from pre-configured trace texts for the selected department. For more information, see [Configuring Trace Texts](#).
  - w. **Welcome Offer.** Select this check box if the item is eligible for selection in the Welcome Offer alert configuration.
3. Click **Save and Go To Presentation** to save and open the presentation so that you can complete the configuration of the item.

### Editing an Item

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Item Inventory**.
2. Enter search criteria and click **Search**.
3. In the search results, select the **code**, click the **vertical ellipsis**, and select **Edit**.
4. Scroll to the panel you want to edit and click **Edit**.
5. Make the required changes.
6. Click **Save**.

### Deleting an Item

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Item Inventory**.
2. Enter search criteria and click **Search**.
3. Select the appropriate **item**, click the **vertical ellipsis**, and select **Delete**.
4. Click **Delete** to confirm.

### Copying an Item

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Item Inventory**.
2. Click the **vertical ellipsis** at the top of the page and select **Copy**.

3. On the Copy Item(s) screen, complete the fields in each panel:
  - a. **Source Property.** This is the property where the item currently exists.
  - b. **Item Codes.** Select the item code to copy and then click the appropriate check box for copying the Attributes, Rates, or Vendors from the source items to the new items.
  - c. **Target Properties.** Select one or several properties. The item codes you selected will copy to the target properties.
4. Click **Save**.
5. In the Review and Copy Codes panel, complete the following fields:
  - a. **Copy Name As.** Enter a name for the new item.
  - b. **Copy Quick Insert As.** Enter a quick insert for the new item.
6. Click **Copy and Continue**.

### Adding Item Attributes

Item Attributes provide additional details that further describe the item, for example, the linen color, additional markers for an easel, the location of a registration table, and so on. This functionality is only available for items marked for events or for events and reservations.

1. Click **New** in the Attributes panel and complete the following fields:
  - a. **Name.** Enter the additional detail for this attribute, for example, if the Item is Table Linen, the Attributes might be White Tablecloth and Red Napkins, or Gold Tablecloth and Gold Napkins.
  - b. **Manage Translations.** Select to open the multi-language descriptions screen and configure a translated descriptions for each language.
  - c. **From.** Enter the start time for this event.
  - d. **Setup Time.** Enter the number of minutes required to set up this item, if applicable.
  - e. **Tear Down Time.** Enter the number of minutes required to tear down this item, if applicable.
  - f. **Default.** Select this check box if this Attribute should be automatically selected when this item is added to an event. You can select only one attribute per item as the default.
2. Click **Save** to save and close, or click **Save and Continue** to save and create another record.

### Editing Item Attributes

1. In the Events panel, select the appropriate **attribute**, click the **vertical ellipsis**, and select **Edit**.
2. Make the required changes.
3. Click **Save**.

### Deleting Item Attributes

1. In the Events panel, search and select the appropriate **attribute**, click the **vertical ellipsis**, and click **Delete**.

2. Click **Delete** to confirm.

### Adding Item Pricing

You can set item rates in various increments, for example by the day or hour. You can determine the rates individually for each customer at the time the item is booked (custom rates); or possibly, you might provide an item without charge (complimentary). This functionality is only available for items marked for events or for events and reservations.

1. In the Pricing panel, click **New** and complete the following fields:
  - a. **Item Rate.** Select the appropriate value from the list. For more information, see [Configuring Item Rate Rules](#).
  - b. **Price.** Enter the amount that should be charged for this item and rate.
  - c. **Hourly.** Select this check box if the price you entered should be charged for each hour the item is booked.
  - d. **Default.** Select this check box if this rate should be automatically selected when this item is added to an event. You can select only one rate per item as the default.
2. Click **Save** to save and close or click **Save and Continue** to save and create another record.

### Editing Item Pricing

1. In the Pricing panel, select the appropriate **rate**, click the **vertical ellipsis**, and select **Edit**.
2. Make the required changes.
3. Click **Save**.

### Deleting Item Pricing

An Item Rate can only be deleted if it has not been associated with an event.

1. In the Pricing panel, select the appropriate **attribute**, click the **vertical ellipsis**, and select **Delete**.
2. Click **Delete** to confirm.

### Adding an Item Vendor

You can link vendors to items so that you can easily identify where to order them if you have none in house. This functionality is only available for items marked for events or for events and reservations.

1. In the Vendors panel, click **New** and complete the following fields:
  - a. **Select a Profile.** Select the magnifying glass to open to Manage Profile where you can search and select the Company profile. If the profile does not yet exist in the system, use the Create Company Profile link to create the profile.
  - b. **Priority.** Enter a number in this field to identify the order in which to display the vendor attached to the item.
  - c. **Lead Time.** Enter text indicating the length of time needed for ordering this item from this vendor.
  - d. **Purchase Price.** Enter the value that this vendor charges for the item.

2. Click **Save** to save and close or click **Save and Continue** to save and create another record.

#### Editing an Item Vendor

1. In the Vendors panel, select the **vendor**, click the **vertical ellipsis**, and select **Edit**.
2. Make the required changes.
3. Click **Save** .

#### Deleting an Item Vendor

1. In the Vendors panel, select the **vendor**, click the **vertical ellipsis**, and select **Delete**.
2. Click **Delete** to confirm.

## Configuring Item Pools

#### [Prerequisites for Configuring Item Inventory Pools](#)

Configuring Item Pools enables properties to sell items with a maximum pool ceiling quantity. The available pool number is determined by the maximum quantity of any item associated with the pool.

#### Note:

You can associate only the items from the same Item Class with an Inventory Item Pool.

### Adding an Item Pool

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Item Pools**.
2. Click **New** and complete the following:
  - a. **Item Class**. Select an Item Class from the list. Refer to: [Configuring Item Class](#).
  - b. **Code**. Enter the item inventory pool code. You cannot change the code after the Item Inventory Pool is saved.
  - c. **Description**. Enter a detailed description of the item inventory pool.
  - d. **Display Sequence**. Number that determines the position of the inventory item pool in lists of value.
  - e. **Sequence**. Enter a display sequence to indicate sequence in list.
  - f. **Item Codes**. Select items from the Available panel and then click [>] to move the selected items to the Selected panel.
3. Click **Save** or **Save and Continue** to add another.

### Editing an Item Pool

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Item Pools**.
2. Enter search criteria and click **Search**.
3. Select the **item pool**, click the **vertical ellipsis**, and click **Edit**.
4. Update the item pool details.
5. Click **Save**.

### Deleting an Item Pool

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Item Pools**.
2. Enter search criteria and click **Search**.
3. Select the **item pool**, click the **vertical ellipsis**, and click **Delete**.
4. Click **Delete** to confirm.

## Configuring Item Rate Rules

### Prerequisites for Configuring Item Rate Rules

Item Rate Rules describe how individual items are priced (for example, per hour, per day, or each) for non-food and non-beverage resources such as flip charts, projectors, and so on.

Item Rate Rule configuration is shared by all properties in multi-property operations.

### Adding Item Rates

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Item Rate Rules**.
2. Click **New** and complete the following:
  - a. **Code**. Enter a code for the Item Rate.
  - b. **Description**. Enter a description for the item rate.
  - c. **Manage Translation**. Click to open the multi-language descriptions screen and configure a translated descriptions for each language.
  - d. **Sequence**. Enter a display sequence to indicate sequence in list.
3. Click **Save**.

### Editing Item Rates

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Item Rate Rules**.
2. Enter search criteria and click **Search**.
3. Select the **item rate**, click the vertical ellipsis, and click **Edit**.
4. Update the item Rate Rule's details.
5. Click **Save**.

### Deleting Item Rates

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Item Rate Rules**.
2. Enter search criteria and click **Search**.
3. Select the **item rate**, click the vertical ellipsis, and click **Delete**.
4. Click **Delete** to confirm.

# Configuring Item Templates

## Prerequisites for Configuring Item Templates

Item Templates are groupings of catering resources that alleviate the time consuming task of adding several items to an event. You can use templates to create groupings of any items that would normally be used together. For instance, if most meeting and conference events require an LCD projector, a wireless lapel microphone, and a viewing screen, you can group these items together using an item template. With item templates, items can be grouped together regardless of item class. This simplifies the task of adding item resources to events by eliminating the need to add items one at a time.

## Adding Item Templates

1. From the Administration menu, select **Booking**, select **Resource Management**, and select **Item Templates**.
2. Click **New** and complete the following:
  - a. **Property.** Select or confirm the Property.
  - b. **Name.** Enter Item Template Name
3. Click **New**.
4. Search and select items on the Select Inventory Items screen and click [>] to move items from the Available panel to the Selected panel. The Items will be grouped by Item Class and you can expand and collapse the categories as needed.
5. Click **Select**.
6. Select **Attribute**.
7. Enter a **Quantity**.
8. Enter a **Sequence Item** to control the order in which these items appear on the Banquet Event Order.
9. Click **Save**.

## Editing Item Templates

1. From the Administration menu, select **Booking**, select **Resource Management**, and select **Item Templates**.

2. Select or confirm the **Property** and click **Search**.
3. From search results, select the **Item Template**, click the **vertical ellipsis**, and select **Edit**.
4. Update details.
5. Click **Save**.

#### Deleting Item Templates

1. From the Administration menu, select **Booking**, select **Resource Management**, and select **Item Templates**.
2. Select or confirm the **Property** and click **Search**.
3. Select the **Item Template**, click the **vertical ellipsis**, and click **Delete**.
4. Click **Delete** to confirm.

## Configuring Meal Periods

#### [Prerequisites for Configuring Meal Periods](#)

A catering meal period is an event classification that allows you to group catering event types, for example Breakfast, Lunch, Coffee Break, and so on.

You can associate an event type with a single catering meal type for reporting in the [Meal Type Forecast](#) report.

#### **Related Topic:**

[Configuring Event Types](#).

#### **Note:**

You can configure a maximum of seven meal periods.

### Adding Meal Periods

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Meal Periods**.
2. Click **New** and complete the following:
  - a. **Code**. Enter an Item Template Name.
  - b. **Description**. Enter a description for the meal period. Use the Manage Translation link to translate description to other languages.
  - c. **Sequence**. Enter a display sequence to indicate the Meal Period code sequence in a list.
3. Click **Save**.

### Editing Meal Periods

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Meal Periods**.
2. Enter search criteria and click **Search**.
3. Select the **meal period**, click the **vertical ellipsis**, and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Meal Periods

1. From the Administration menu, select **Booking**, select **Resource Management**, and then select **Meal Periods**.
2. Enter search criteria and click **Search**.
3. Select the **meal period**, click the **vertical ellipsis**, and select **Delete**.

# Configuring Menu Classes

## Prerequisites for Configuring Menus

Menus are grouped into logical categories called Menu Classes, which can make it easier to find a menu and assist in filtering menus by event type. Refer to [Configuring Event Types](#).

### Note:

In multi-property operations you can copy the Menu Class configuration from one property to other properties. Refer to [Copying Configurations to Multiple Properties](#).

## Adding a Menu Class

1. From the **Administration** menu, select **Booking**, select **Resource Management**, and select **Menu**.
2. Select the **Menu Class** tab.
3. Select **New** and complete the following fields:
  - a. **Property**. Select or confirm the property.
  - b. **Menu Class Name**. Enter a menu class name.
  - c. **Event Type**. Select the event types for which this Composed Menu Class should be available by default.
  - d. **Bookable through website**: Select the check box if this item class should be available for selection when an event is booked via OWS.
4. Click **Save**.

## Editing a Menu Class

1. From the **Administration** menu, select **Booking**, select **Resource Management**, and select **Menu**.
2. Select the **Menu Class** tab.
3. Enter search criteria and click **Search**.
4. From your search results, select the menu class, click the vertical ellipsis **Actions** menu, and select **Edit**.
  - a. Update the configuration.
  - b. **Click Inactive**: When selected, the menu item becomes inactive and by default does not appear in the results area.
5. Click **Save**.

## Deleting a Menu Class

1. From the **Administration** menu, select **Booking**, select **Resource Management**, and select **Menu**.

2. Select the **Menu Class** tab.
3. Enter search criteria and click **Search**
4. From your search results, select the menu class, click the vertical ellipsis **Actions** menu, and select **Delete**.

## Configuring Menu

### Prerequisites for Configuring Menu

#### Creating a Composed Menu

Refer [Creating a Menu](#).

#### Editing a Composed Menu

1. From the **Administration** menu, select **Booking**, select **Resource Management**, and select **Menu**.
2. Select the **Composed Menu** tab.
3. Enter search criteria and click **Search**.
4. In the search results, select the **Menu**, click the **vertical ellipsis**, and select **Edit**.

 **Note:**

The Menu Detail panels you select in the default Presentation Style appear. Use **Customize** to select other Detail panels to appear on the presentation page.

5. In the Menu Details panel, click **Edit** and update the following:
  - **Property**. Select or confirm the **Property**.
  - **Menu Class**. Select the appropriate value from the list. Associating a menu to a menu class allows for easier searching when adding a menu to an event.
  - **Menu Name**. Enter a Name for the menu, such as Continental Breakfast, Italian Lunch Buffet. Select Manage Translation to configure a translated menu name for each language.
  - **Restrictions**. Enter any restrictions placed on this menu, including attendees, lead time, or seasonal restrictions. Select Manage Translation configure a translated restriction name for each language.
  - **Description**. Enter an additional description of the menu. Select Manage Translation configure a translated description for each language.
  - **Dietary**. Select the appropriate values from the list, such as Vegetarian, Vegan, Dairy Free, and so on. This can be used for easier searching when adding a menu to an event.
  - **Event Type**. Select the event types most likely to use the menus associated with this Menu Class. The menus associated to this menu class inherit the event types you select.
  - **Quick Insert**. Enter a code which can be used when searching for Menus to be added to an event.

- **Menu Type.** Select Food or Beverage. This selection will determine whether the menu will print on the BEO under the food or beverage section.
  - **Serving.** Select Per Person or Per Table to indicate how this menu is priced. If Per Table is selected the field for Table Capacity will be enabled and will need to be populated with the number of guests at each table.
  - **Multi-choice.** Premium Select to configure a multi-choice menu. Multi-choice menus are visually distinguished from regular menus on the Resources screen and the Menu Items drawer by (M).
  - **Consumption.** Select this check box if all of the menu items associated to this menu are sold on a consumption basis, which means that the menu items are sold separately and the group is charged based on the number of menu items used.
    - If the Consumption Menu Forecasting OPERA Control is set to Yes, you can edit the Price column in the Pricing section of a Consumption Menu, and its label changes to Forecast.
    - If the Consumption Menu Forecasting OPERA Control is set to No, you cannot edit the Price column.
  - **Sell Date Range.** Enter the start and end dates of the period when this menu may be sold.
  - **Event Date Range.** Enter the start and end dates of the period when this event must take place in order to use this menu.
  - **Inactive.** When selected the menu will become inactive and will not be displayed in the results by default.
  - Click **Save**.
6. In the **Multi Choice Menu** panel (this section is enabled if you selected the multi-choice option in the Menu Details section), click **Edit** and update the following:
- **Course.** Enter a number to represent the course.
  - **Choice Count.** Enter the number of items that can be selected within the course.
  - **Course Description.** Enter text describing how many items can be selected within this course, such as Select One Appetizer.
  - **Course Name.** Enter the description for the course, such as Starters, Appetizers, and Entrée.
  - If an additional course is needed, select the **vertical ellipsis** and select **Add**.
  - Click **Save**.
7. In the **Menu Items** panel, you can click the Menu Items tab to open the Menu Items drawer and select menu items to add to the menu. The Menu Items drawer allows you to search for specific menu items by menu item name, dietary, or other criteria. The menu items are grouped by menu item class, and you can expand each category. When selecting menu items for the menu, you can determine whether to include the menu items in the price of the menu or priced individually. To include all selected menu items in the menu, select the **Include in Menu** check box.
- Click **Edit** and update the following:

- **Course.** Enter the number to represent the course. For multi-choice menu you will need to select the appropriate course from the available list.
  - **Order.** Enter the number to represent the sequence the menu item should be served within the course. To be considered as part of a multi-choice course, more than one menu item must belong to the same Course and have the same Order value.
  - **Demand Factor.** Enter a value representing the percentage of guests who will consume this menu item. For example, a cash bar may have a menu item for beer that is ordered 40% of the time. In this case, the item would have a demand factor of .4. By default, the demand factor populates with 1. And you can manually change the value (available when the Menu Item Demand Factor in OPERA Controls is active).
  - **Serving.** Enter the number of servings. By default, the Serving field defaults to 1.
  - **Included.** Select the check box to indicate that the menu item is included in the menu price. If the menu item should be charged in addition to the menu price, you should not select the check box.
  - **Consumption.** Select to indicate that the menu items is charged based on consumption. Menu items marked as Consumption do not print a quantity on the Banquet Event Order. The quantity is used only for revenue forecasting purposes.
  - **Print.** Select the check box if the menu item should print on the Banquet Event Order and other menu reports.
  - **Mandatory.** Select this check box for menu items that come with the menu automatically, and the user does not have a choice between multiple items (available for multi-choice menus only).
  - Click **Save**.
8. In the Pricing panel:
- Click the **vertical ellipsis** and select **Edit**.
  - In the Price field, enter the amount to charge for the selected Revenue Type.
  - Click **Save**.
9. In the Menu Notes panel, to Add Notes:
- Click **New** and complete the following:
    - **Title.** Enter a note title
    - **Internal.** Select to make the menu note internal.
    - **Comment.** Enter note details.
    - **Sequence.** Enter a display sequence.
    - Click **Save** or **Save and Continue** to add another note.
10. In the Menu Notes panel, to Edit Notes:
- Select the **Note**, click the **vertical ellipsis**, and select **Edit**.
    - Update note details.
    - Click **Save**.
11. In the Menu Notes panel, to Delete Notes:
- Select the **Note**, click **vertical ellipsis** and select **Delete**.
  - Click **Delete** to confirm.

### Deleting a Composed Menu

1. From the **Administration** menu, select **Booking**, select **Resource Management**, and select **Menu**.
2. Select the **Composed Menu** tab.
3. Enter search criteria and click **Search**.
4. From your search results, select the **Menu**, click the **vertical ellipsis**, and select **Delete**.
5. Click **Delete** to confirm.

### Copying a Composed Menu

1. From the **Administration** menu, select **Booking**, select **Resource Management**, and select **Menu**.
2. Select the **Composed Menu** tab.
3. Enter search criteria and click **Search**.
4. From your search results, select the **Menu**, click the **vertical ellipsis**, and select **Copy**.
5. Select one or more **Menu classes**.
6. Click **Select**.

## Prerequisites for Configuring Menus

## Configuring Menu Items

### [Prerequisites for Configuring Menu Items](#)

Prior to configuring menu items, ensure you have configured menu item classes.

### Adding Menu items

1. From the Administration menu, select **Booking**, select **Resource Management**, and select **Menu Item**.

2. Select the **Menu Item** tab.
3. Select **New** and complete the following:
  - a. **Property**: Select or confirm the property.
  - b. **Menu Item Class**: Select the appropriate value from the list. Associating an item to a menu item class allows for easier searching when adding a menu to an event.
  - c. **Menu Item Name 1/Menu Item Name 2/Menu Item Name 3**: Enter the name of the menu item. You can create up to three long names or include a description for display on the Banquet Event Order.
  - d. **Manage Translations**: Select to open the multi-language descriptions screen and configure a translated menu item name for each language.
  - e. **Restriction**: Enter any restrictions placed on this menu, including attendees, lead time, or seasonal restrictions.
  - f. **Manage Translations**: Select to open the multi-language descriptions screen and configure a translated menu item for each language. (Available when the Multi-language OPERA Control is active).
  - g. **Origin 1/Origin 2**: This field is generally used to indicate the origin of wine.
  - h. **Manage Translations**: Select to open the multi-language descriptions screen and configure a translated origin for each language.
  - i. **Year**: This field is generally used to indicate the year a wine was produced.
  - j. **Dietary**: Select the appropriate values from the list. This can enable easier searching when adding a menu item to a menu.
  - k. **Responsible Department**: The values are inherited from the Menu Item Class.
  - l. **Event Type**: The values are inherited from the Menu Item Class.
  - m. **Quick Insert**: Enter a code to use when searching for Menu Items to be added to a menu.
  - n. **Consumption**: Select this check box if all of the menu items are sold on a consumption basis. This is useful for menu items such as sodas or bottled water where the group is charged only for the amount of the beverage consumed.
  - o. **Beverage**: Select Food or Beverage. This selection determines whether the menu will print on the Banquet Event Order under the food or beverage section.
  - p. **Print**: Select the check box for the menu item to print on the Banquet Event Order and other event reports.
  - q. **Sales Price**: Enter the price of the menu item.
  - r. **Revenue Type**: Select the appropriate value from the list to determine the category in which this revenue should be allocated.
  - s. **Cost**: Enter the internal cost it takes to provide the menu item.
  - t. **Container**: Select the appropriate value to reflect how the menu item is sold, such as per person, per dozen, or each.
  - u. **Portion**: Enter the size or number of portions for the menu item.
  - v. **Manage Translations**: Select to open the multi-language descriptions screen and configure a translated menu item for each language. Available when the Multi-language OPERA Control is active.

- w. **Bookable through website:** Select the check box if this item class should be available for selection when an event is booked through OWS.
  - x. **Servings:** This field indicates the number of servings the menu item contains when sold. For a typical menu item included as part of a standard menu, the serving would usually be one. For Beverage Menu Items, enter the number of servings that are obtainable from the container specified above. For example, if wine is included in a menu and the menu is booked for 40 people, the system will automatically calculate that 10 bottles of wine are needed and attach them to the event with that amount rather than 40. Other revenue profit and loss calculations are also based on this entry. For Food Menu Items, if this single item is a family or a large dish meant to serve a specific number of people, specify the number of people the item serves.
4. Click **Save** or **Save and Continue** to add another menu item.

#### Editing a Menu Item

1. From the Administration menu, select **Booking**, select **Resource Management**, and select **Menu Item**.
2. Select the **Menu Item** tab.
3. Enter search criteria and click **Search**.
4. Select the menu item, click the **Vertical Ellipsis** and select **Edit**.
  - a. Update the configuration.
  - b. Click **Inactive**. When selected, the menu item becomes inactive and by default does not appear in the results area.
5. Click **Save**.

#### Deleting a Menu Item

1. From the Administration menu, select **Booking**, select **Resource Management**, and select **Menu Item**.
2. Select the **Menu Item** tab.
3. Enter search criteria and click **Search**.
4. Select the menu item, click the **Vertical Ellipsis** and select **Delete**.
5. Click **Delete** to confirm.

#### Copying a Menu Item (to other menu item classes)

1. From the Administration menu, select **Booking**, select **Resource Management**, and select **Menu Item**.
2. Select the **Menu Item** tab.
3. Enter search criteria and click **Search**.
4. Select the menu item(s) and click **Vertical Ellipsis** and select **Copy**.
5. Select the menu item class(es) from the list and click **Select**.

#### Moving a Menu Item (to other menu item classes)

1. From the Administration menu, select **Booking**, select **Resource Management**, and select **Menu Item**.

2. Select the **Menu Item** tab.
3. Enter search criteria and click **Search**.
4. Select the **menu item(s)** click the vertical ellipsis, and select **Move**.
5. Select the **menu item class(es)** from the list and click **Select**.

## Prerequisites for Configuring Menu Items

### **OPERA Controls**

**Group:** Events

**Functions:** Event Resources

### **OPERA Cloud Tasks**

**Group:** Booking Admin

**Tasks:** Resource Management

Menu Management

- New/Edit Menu Management
- Delete Menu Management

## Configuring Menu Item Class

Menu Item Classes are used to group menu items. After configuring Menu Item Classes, you can link them to the appropriate menu items.

Define Menu Item Classes based on the types of services your property can offer to clients, for instance, Menu, Buffet, Cocktail, Breakfast, Coffee Break, and so on.

Based on these examples, you can define the following Menu Item Classes:

### **For Menus:**

- Menu Starters
- Menu Entrees
- Menu Desserts

### **For Buffet:**

- Buffet Starters
- Buffet Cold entrees
- Buffet Hot entrees
- Buffet Desserts

### **For Beverages:**

- Soft Drinks
- White Wines
- Red Wines

- Beers
- Champagne
- Spirits

**Note:**

In multi-property operations you can copy the configuration from one property to other properties. Refer to: [Copying Configurations to Multiple Properties](#).

### Adding a Menu item Class

1. From the Administration menu, select **Booking**, select **Resource Management**, and select **Menu Items**.
2. Select the **Menu Item Classes** tab.
3. Select **New** and complete the following:
  - a. **Property:** Select or confirm the property.
  - b. **Menu Item Class Name:** Enter a description for the menu class, such as Breakfast, Bar Menus, Buffet Lunch, and so on.
  - c. **Event Type:** Select the event types most likely to use the menus associated with this Menu Class. The menus associated to this menu class inherit the event types you select.
  - d. **Responsible Department:** Select a Department responsible for the menu items in this class. Responsible Departments are inherited by the Menu Items linked to the Class. If the Responsible Departments should change on the Menu Item Class, you are prompted to update any existing Menu Items linked to the Menu Item Class.
  - e. **Sequence:** Enter a number that controls the position of this code in listings.
  - f. **Bookable through website:** Select the check box if this item class should be available for selection when an event is booked through OWS.
  - g. Menu Type.
    - i. **Food:** Select if this class only contains food item.
    - ii. **Beverage:** Select if this class only contains beverage items.
4. Click **Save**.

### Editing a Menu Item Class

1. From the Administration menu, select **Booking** select **Resource Management**, and select **Menu Items**.
2. Select the **Menu Item Classes** tab.
3. Enter search criteria and click **Search**.
4. In the search results, select the **menu item class**, click the **Vertical Ellipsis**, and select **Edit**.
  - a. Update the configuration.

- b. **Inactive.** When selected, the menu class becomes inactive and by default will not appear in the results area.
5. Click **Save**.

#### Deleting a Menu Item Class

1. From the Administration menu, select **Booking** select **Resource Management**, and select **Menu Items**.
2. Select the **Menu Item Classes** tab.
3. Enter search criteria and click **Search**.
4. In the search results, select the **Menu Item Class**, click the **Vertical Ellipsis**, and select **Delete**.
5. Click **Delete** to confirm.

## Creating a Menu

### Prerequisites for Configuring Menus

Menus are grouped into logical categories called Menu Classes that can make it easier to find a menu and assist in filtering menus by [event type](#).

Composed Menus are a collection of preselected menu items. The following are the three main types of composed menus:

- **Standard menus.** These menus can include menu items sold for an all-inclusive price, sold as a group of individually priced menu items, or sold as a combination of the two.
- **Consumption menus.** These menus enable you to charge for menus based on what was actually consumed regardless of the number of attendees at the event. The quantity requested for each item does not print on the Banquet Event Order. Instead, it is used only to calculate the expected and guaranteed revenue for the event.
- **Multi-choice menus.** These menus are available with Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition and enable you to create a composed menu with choices of starters, main courses, desserts, and so on. When the menu is added to an event, you can customize the menu based on the client's selections.

### Creating a Menu

1. From the **Administration** menu, select **Booking**, select **Resource Management**, and select **Menu**.
2. Select the **Composed Menu** tab, click **New**.
3. In Menu Details, complete the following:
  - a. **Property.** Select or confirm the property name.
  - b. **Menu Class.** Select a menu class from the list.
  - c. **Menu Name.** Enter a Name for the menu, such as Continental Breakfast, Italian Lunch Buffet. Select Manage Translation to configure a translated menu name for each language.
  - d. **Restriction.** Enter any restriction placed on the menu, including attendees, lead time, or seasonal. Select Manage Translation configure a translated restriction name for each language.

- e. **Description.** Enter an additional description of the menu. Select Manage Translation configure a translated description for each language.
  - f. **Dietary.** Select any dietary attributes of the menu from the list.
  - g. **Event Type.** Event Types get populated based on the selected menu Class. Select the event types applicable for the menu from the list.
  - h. **Quick Insert.** Enter a unique code that you can use when searching for menus to be added to an event.
  - i. **Menu Type.** Select a Menu Type. Your selection determines whether the menu prints on the Banquet Event Order under the Food section or the Beverage section
  - j. **Servings.** Select Per Person or Per Table to indicate how this menu is priced. If you select Per Table, the Table Capacity field becomes enabled and you must enter the **number of guests** at each table.
  - k. **Multi Choice.** Select to configure a multi-choice menu . Multi-choice menus are visually distinguished from regular menus on the Resources screen and the Menus drawer by (M).
  - l. **Course Count.** Appears when you select Multi-Choice. Enter the number of courses in the multi-choice menu.
  - m. **Consumption.** Select if all of the menu items associated to this menu are sold on a consumption basis, which means that the menu items are sold separately and the group is charged based on the number of menu items used.
  - n. **Sell Date Range.** Enter the start and end dates of the period when this menu may be sold.
  - o. **Event Date Range.** Enter the start and end dates of the period when this event must take place in order to use this menu.
4. Click **Next.** Complete the Menu Multi Choice section if you selected Multi Choice in the Menu Details panel.
    - a. **Course.** Enter the course number.
    - b. **Choice Count.** Enter the number of menu item choices for the course.
    - c. **Course Description.** Enter the course description. Select Manage Translations configure a course description for each language.
    - d. **Course Name.** Enter the course name. Select Manage Translations configure a course name for each language.
    - e. Repeat entries for each course listed.
    - f. Click the page level **vertical ellipsis** and select **Add** to add a course.
    - g. Click a course's **vertical ellipsis** and select **Delete** to delete a course.
  5. Click **Next.** Complete the Menu Items selection. When selecting menu items for the menu you can determine whether the menu items should be included in the price of the menu or priced individually. To include all selected menu items in the menu price, select the Include in Menu checkbox.
    - a. Click the **Menu Items** drawer.
    - b. Click **[+]** to expand the menu item classes and then select one or more **Items** (grouped by menu item class).

- c. **Include in Menu.** Click to include the selected items in the price of the menu.
  - d. Click **Add Menu Item**.
  - e. **Course.** Enter the number to represent the course. For multi-choice menus, select the appropriate course from the available list.
  - f. **Order.** Enter the number to represent the sequence the menu item should be served within the course. To be considered as part of a multi-choice course, more than one menu item must belong to the same Course and have the same Order value.
  - g. **Demand Factor.** Enter a value representing the percentage of guests who will consume this menu item. For example, a cash bar may have a menu item for beer that is ordered 40% of the time. In this case, the item would have a demand factor of .4. By default, the demand factor populates with 1. And you can manually change the value (available when the Menu Item Demand Factor in OPERA Controls is active).
  - h. **Menu Item Name.** Name of the menu item attached to the highlighted menu.
  - i. **Sales Price.** The price of the Menu Item if it were separately (if not included in a menu).
  - j. **Price per Serving.** The price per individual serving.
  - k. **Container.** The container defined for the menu item.
  - l. **Revenue Type.** The revenue type attached to the menu item.
  - m. **Serving.** Enter the number of servings. By default, the Serving field defaults to 1.
  - n. **Included.** Select the check box to indicate that the menu item is included in the menu price. If the menu item should be charged in addition to the menu price, you should not select the check box.
  - o. **Consumption.** Select to indicate that the menu items is charged based on consumption. Menu items marked as Consumption do not print a quantity on the Banquet Event Order. The quantity is used only for revenue forecasting purposes.
  - p. **Print.** Select the check box if the menu item should print on the Banquet Event Order and other menu reports.
  - q. **Mandatory.** Select this check box for menu items that come with the menu automatically and the user does not have to choose between multiple items (available for multi-choice menus only).
  - r. Repeat the updates for each menu item selected.
  - s. To delete a menu item, select the item, click vertical ellipsis, and click **Delete**.
  - t. Click **Delete** to confirm.
6. Click **Next**. Complete the **Pricing Details** section.
- a. **Price.** Enter the amount to charge for the selected Revenue Type.
7. Click **Save** or **Save and Go to Presentation** to [edit the menu details](#).

## Configuring Sales Manager Goals

### [Prerequisites for Configuring Sales Goals](#)

Sales Manager Goals allow you to set and monitor Rooms, Catering, and Activities goals for Sales Managers.

You can setup the following Sales Manager Goals:

1. **Group Rooms with Catering:** Goals related to Rooms and Catering business.
2. **Transient Goals:** Non Group Goals related to Rooms business.
3. **Activities:** Goals related to Activities

Sales Manager Goals are available on the [Sales Manager Progress \(rep\\_mgr\\_progress\\_BI\)](#) report. The Stay Periods configured as Arrival Periods in Production Goals are printed listed on the report.

### Adding Group Rooms with Catering Goals

1. From the **Administration** menu, select **Bookings**, then select **Sales Manager Goals**.
2. Select the Sales Owner, then click the **Vertical Ellipsis** and select **Edit**.
  - a. Select the **Group Rooms with Catering** Goal Type in the search, then click **Search**.
  - b. Click **New** and complete the following:
    - i. **Future Dates:** Select this check box to display future dates when selecting the Production From / Production To and Arrival From / Arrival To dates. This check box is selected by default.
    - ii. **Arrival Goal:** Select this check box if this is an arrival goal. This goal is considered to be an arrival goal and 'Arrival' will display in the **Type** column on the Goal screen.
    - iii. **Production From/Production To (Mandatory):** If the Arrival Goal check box is not selected, this is a production goal. Production goals are booking goals, regardless of the arrival date. For example, if the Production From / Production To dates are January 1, 2020 and March 31, 2020, any booking made between January 1 and March 31 on a certain "credit" status, or changed during this time frame to the defined "credit" status, would be counted toward meeting the goal. Click to view a list of the production periods set up for your property. Selecting the production period automatically sets both the Production From and Production To dates. For more information, see [Configuring Period Definition Periods](#).
    - iv. **Arrival From/Arrival To:** If this is an arrival goal, use these fields to define the period during which the bookings will arrive. For example, if the Arrival From / Arrival To dates are January 1, 2020 and January 31, 2020, any booking that will arrive between January 1 and January 31 would be counted toward meeting the goal. Selecting the arrival period automatically sets both the Arrival From and Arrival To dates.
    - v. **Market Code:** Select a market code from the list to be associated with the goal.
    - vi. **Room Nights:** Enter the number of room nights being set as a goal.
    - vii. **Room Revenue:** Enter the room revenue amount being set as a goal.
    - viii. **Average Rate:** Enter the average room rate being set as a goal.
    - ix. **Catering Covers:** Enter the number of catering covers or meals being set as a goal.
    - x. **F&B Revenue:** Enter the food and beverage revenue being set as a goal.

- xi. **Avg F&B Check:** Enter the average amount for food and beverage checks being set as a goal.
  - xii. **Other Revenue:** Enter the amount of other revenue being set as a goal, such as function space rental, equipment rental and so on.
- c. Click **Save** or click **Save and Add More** to add another.

#### Adding Transient Room Goals

1. From the **Administration** menu, select **Bookings**, then select **Sales Manager Goals**.
2. Select the Sales Owner, then click the **Vertical Ellipsis** and select **Edit**.
  - a. Select the **Transient Room** Goal Type in the search, then click **Search**.
  - b. Click **New** and complete the following:
    - i. **Future Dates** : Select this check box to display future dates when selecting the Production From / Production To and Arrival From / Arrival To dates. This check box is selected by default.
    - ii. **Arrival From/Arrival To:** Use these fields to define the period during which the bookings will arrive. For example, if the Arrival From / Arrival To dates are January 1, 2020 and January 31, 2020, any booking that will arrive between January 1 and January 31 would be counted toward meeting the goal. Selecting the arrival period automatically sets both the Arrival From and Arrival To dates.
    - iii. **Market Code:** Select a market code from the list to be associated with the goal.
    - iv. **Room Nights:** Enter the number of room nights being set as a goal.
    - v. **Room Revenue:** Enter the room revenue amount being set as a goal.
    - vi. **Average Rate:** Enter the average room rate being set as a goal.
  - c. Click **Save** or click **Save and Add More** to add another.

#### Adding Activities Goals

1. From the **Administration** menu, select **Bookings**, then select **Sales Manager Goals**.
2. Select the Sales Owner, then click the **Vertical Ellipsis** and select **Edit**.
  - a. Select the **Activities Goal Type** in the search, then click **Search**.
  - b. Click **New** and complete the following:
    - i. **Future Date:** Select this check box to display future dates when selecting the Production From / Production To dates. This check box is selected by default.
    - ii. **Production From/Production To:** Use the Production From and Production To fields to set the date range when the activities are to be completed. The dates can span multiple production periods. For example, if the Production From / Production To dates are January 1, 2020 and February 28, 2020, any activity completed between these dates would be counted toward meeting the goal. Click to view a list of the production periods set up for your property. For more information, see [Configuring Period Definition Periods](#).
    - iii. **Activity Type:** Select an Activity Type from the list for which goal is being set. For example, Follow Up Calls, Conduct Surveys, or Send Thank You Letters.
    - iv. **Number of Activities:** Number of activities of Activity Type being set as a goal (for example, 100 Follow Up Calls).
  - c. Click **Save** or click **Save and Add More** to add another.

### Editing Goals

1. From the **Administration** menu, select **Bookings**, then select **Sales Manager Goals**.
2. Select the Sales Owner, then click the **Vertical Ellipsis** and select **Edit**.
  - a. Select the **Goal Type** in the search, then click **Search**.
  - b. Select the Goal in the search result, then click the **Vertical Ellipsis** and select **Edit**.
  - c. Update the configuration.
  - d. Click **Save**.

### Deleting Goals

1. From the **Administration** menu, select **Bookings**, then select **Sales Manager Goals**.
2. Select the Sales Owner, then click the **Vertical Ellipsis** and select **Edit**.
  - a. Select the **Goal Type** in the search, then click **Search**.
  - b. Select the Goal(s) in the search result, then click **Delete**.

## Client Relations Administration

### Activities

#### [Prerequisites for Activities Configuration](#)

The Activities feature in OPERA Cloud Sales and Event Management helps you keep track of upcoming appointments, sales calls, follow-up with contacts, things to do, and so on. Use Activities to manually or automatically create reminders and to-do's for Accounts, Contacts, and Business Blocks. Activities may be assigned to multiple sales owners; with each owner receiving a separate copy of the Activity.

Activities can be auto-created through the setup of Activity Trace Codes and auto trace rules, which use rules and conditions to determine when an Activity should be created - this can be when a data is created or when existing data is updated or deleted.

With the Activity Result OPERA Control enabled you can configure Activity Result codes; one of which must be selected when completing the Activity.

The Activity tile can be added to your dashboard to indicate the number of open Activities assigned to you or other owners.

## Configuring Activity Results

### Prerequisites for Activity Results

Activity Results are pre-configured descriptions of Activity results. They appear on the Activities screen in the Results field after the Activity is completed. When the OPERA Control parameter Activity, Activity Results is On, and the Complete check box is selected, a Result list appears on the Activities screen. You can select the appropriate result value from the list and complete the Activity.

### Adding an Activity Result

1. From the **Administration** menu, select **Client Relations**, select **Activity Management**, and select **Activity Results**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter a code.
  - b. **Description**: Enter a description, for example, Success.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing an Activity Result

1. From the **Administration** menu, select **Client Relations**, select **Activity Management**, and select **Activity Results**.
2. Enter search criteria and click **Search**.
3. From your search results, select the code, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. **Inactive**: Select the check box to make the Activity Result inactive.
5. Update the configuration.
6. Click **Save**.

### Deleting an Activity Result

1. From the **Administration** menu, select **Client Relations**, select **Activity Management**, and select **Activity Results**.
2. Enter search criteria and click **Search**.
3. From your search results, select the code, then click the vertical ellipsis **Actions** menu and select **Delete**.

4. Click **Delete** to confirm.

## Configuring Activity Types

Activities Types define the various actions you might take when creating Activities and ToDos. Activity Types are also referenced in [Configuring Trace Definitions](#) configured to automate the creation of Activities.

### Adding Activity Types

When the multi-property Cloud Service is active, you can create new Activity Types by selecting the Template tab. After creating them, you can copy an Activity Type to specific properties using the Copy action. For more information, see [Copying Configuration Codes to Multiple Properties](#).

1. From the Administration menu, select **Client Relations**, select **Activity Management**, and select **Activity Types**.
2. Click **New**.
3. Select a **Property**.
4. Enter an **Activity Type** and enter a description such as Follow up, Internal Meeting, and so on.
5. Select an **Activity Class** (Appointment or ToDo) and click **Select**.
6. Enter a **Sequence** number to indicate the ranking of this Activity Type in a list.
7. Select the **Internal** check box to exclude the default Activities created for this activity type from communication with integrated systems.

8. Click **Save** if finished or click **Save and Continue** to edit the new Activity Type immediately. At any time, you can search for an Activity Type, select the Actions ellipsis associated with it, and edit or delete it.

### Editing Activity Types

1. From the Administration menu, select **Client Relations**, select **Activity Management**, and select **Activity Types**.
2. Enter search criteria and click **Search**.
3. From your search results, click the Activity Type's **vertical ellipsis** and select **Edit**.
4. Make your changes.
5. Select the **Inactive** check box to make the Activity Type inactive.

 **Note:**

Inactive Activity Types do not appear in search results unless you click the Action's vertical ellipsis and select Show Inactive.

6. Click **Save**.

### Deleting Activity Types

1. From the Administration menu, select **Client Relations**, select **Activity Management**, and select **Activity Types**.
2. Enter search criteria and click **Search**.
3. From your search results, click the Activity Type's **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

 **Note:**

When the multi-property service is active, new Activity Type are created by selecting the Template tab. Once created, you can copy Activity Type to specific properties using the Copy action. For more information, see [Copying Configuration Codes to Multiple Properties](#)

## Configuring Trace Codes

### Prerequisites for Activities

You can create Auto Trace Codes and configure auto traces so that activities are created automatically under certain configured conditions. The process of creating and applying Auto Trace Codes involves creating a Trace Code, tying the Trace Code to a Trace Group (account, contact, activity, or block), and defining the conditions under which the Trace Code functions.

### Adding a Trace Code

Trace codes are pre-defined filters that trigger activities depending on the behavior of the record.

1. From the **Administration** menu, select **Client Relations**, select **Activity Management**, and select **Trace Codes**.
2. Click **New**.
3. Select a **Trace Group** from the list of configured groups: Accounts, Activities, Blocks, or Contacts.
4. Enter a **Trace Code** to represent the new trace code.
5. Enter a **Description** of the new Trace Code.
6. Click **Save**.

### Editing a Trace Code

1. From the **Administration** menu, select **Client Relations**, select **Activity Management**, and select **Trace Codes**.
2. Enter search criteria and click **Search**.
3. From your search results, select the trace code mapping, click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update the configuration.
5. Click **Inactive** to make the trace definition inactive. Inactive trace definitions do not appear in search results unless you click the **vertical ellipsis** and select **Show Inactive**.
6. Click **Save**.

### Deleting a Trace Code

1. From the **Administration** menu, select **Client Relations**, select **Activity Management**, and select **Trace Codes**.
2. Enter search criteria and click **Search**.
3. From your search results, select the trace code mapping, click the vertical ellipsis **Actions**, and select **Delete**.
4. Click **Save**.

## Configuring Trace Definitions

Trace definitions determine the conditions that trigger a trace. When creating or editing the configuration of an Activity Trace Definition, the Activity Type list of values is sorted by the sequence configured for the Activity Types.

### Adding Trace Definitions

1. From the Administration menu, select **Client Relations**, select **Activity Management**, and select **Trace Definitions**.
2. Click **New**.
3. Select or confirm the **Property**.

4. Select the **Trace Group** to which the auto trace is linked, such as Accounts, Activities, Blocks, and Contacts. Additional options appear depending on the Trace Group you select. The options enable you to select additional conditions for triggering a trace. Examples of options include the following:
  - a. **On Update of Field** – creates the activity when a specified field is updated. When you select the On Update of Field option, the Attribute field appears enabling you to select the specified field.
  - b. **On Creation** – creates the activity when you create a new record. The record is the Trace Group you selected in the Trace Group field.
  - c. **On Activity Deletion** – creates the activity when a record gets deleted.
  - d. **Trace Code** – defines the trace code for the Trace Group you selected.
5. Select the **Trace Code** from all of the configured Trace Codes for the selected Trace Group.
6. Select an **Activity Class**. Options are Appointment or To Do.
7. Select the **Activity Type** from the list, such as follow up or send brochure, to trigger by either the Appointment or the To Do you selected.
  - a. **Purpose**. Enter the purpose that will appear on the Activity (Field will default with the Activity Type description).
8. Enter or select the following:
  - a. **For Time**. Available for Appointment or To Do Activity Classes. Select the time for the activity to start.
  - b. **Date Calculation**. Select a date field from the list.
  - c. **+/- Days**. Select whether you would like to go forward (plus) or backward (minus) from this date and the number of days. Leaving this field blank will generate the Activity with a start date equal to the date in the field selected in Date Calculation.
9. Select an **Owner** from one of the following:
  - a. **Current** – assigns the activity to the logged in user when the activity is generated.
  - b. **Block Owner**– assigns the activity to the block owner and displays the Owner Assignment check box. Selecting the check box opens the Trace Owner Mapping field for mapping the trace to one or more owners.
  - c. **Room Owner**– assigns the activity to the room owner and displays the Owner Assignment check box. Selecting the check box opens the Trace Owner Mapping field for mapping the trace to one or more owners.
  - d. **Catering Owner** – assigns the activity to the catering owner and displays the Owner Assignment check box. Selecting the check box opens the Trace Owner Mapping field for mapping the trace to one or more owners.
  - e. **Custom** – lets you search and select an owner.
10. Click **Manage Expressions** to set up additional conditions or conditional and/or statements required to trigger the activity. On the Manage Expressions dialog, you can set up single or multiple conditions:
  - a. Click **Add** or click **Add()**.
  - b. Select an **Attribute** and an **Operator**.

- c. Click **OK**.
11. Click **Save**.

### Copying Trace Definitions

#### Note:

For more information see [Copying Configuration Codes to Multiple Properties](#).

### Editing Trace Definitions

1. From the Administration menu, select **Client Relations**, select **Activity Management**, and select **Trace Definitions**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **trace definition**, click the **vertical ellipsis**, and select **Edit**.
4. Update the configuration.
5. Click **Inactive** to make the trace definition inactive. Inactive trace definitions do not appear in search results unless you click the Actions ellipsis and select Show Inactive.
6. Click **Save**.

### Deleting Trace Definitions

1. From the Administration menu, select **Client Relations**, select **Activity Management**, and select **Trace Definitions**.
2. Enter search criteria and click **Search**.
3. From your search results, select the **trace definition**, click the **vertical ellipsis**, and select **Delete**.
4. Click **Delete** to confirm.
5. Click **Save**.

## Configuring Trace Owner Mapping

### Configuring Trace Owner Mapping

1. From the Administration menu, select **Client Relations**, select **Activity Management**, and select **Trace Owner Mapping**.
2. Click **New**.
3. Select an **Owner Code**. This is the owner responsible for the trace trigger (a logged-in user).
4. Select the **Trace Owner Code**. This is the owner code on whose name the new trace activity should be created.
5. Click **Save**.

### Editing Trace Owner Mapping

1. From the Administration menu, select **Client Relations**, select **Activity Management**, and select **Trace Owner Mapping**.
2. Enter search criteria and click **Search**.
3. From your search results, select the required **trace owner mapping**, click the **vertical ellipsis**, and select **Edit**.
4. Update the configuration.
5. Click **Inactive** to make the trace definition inactive. Inactive trace definitions do not appear in search results unless you click the Actions ellipsis and select Show Inactive.
6. Click **Save**.

### Deleting Trace Owner Mapping

1. From the Administration menu, select **Client Relations**, select **Activity Management**, and select **Trace Owner Mapping**.
2. Enter search criteria and click **Search**.
3. From your search results, select the required **trace owner mapping**, click the **vertical ellipsis**, and select **Delete**.
4. Confirm the deletion.
5. Click **Save**.

## Configuring Geographic Components

Use the options from the Geographic Management menu to create codes for defining the location, languages, postal codes, and taxes associated with your guests, companies, vendors, and so on.

### Configuring Birth Country Codes

#### Note:

ID document scanning integration requires two-character country codes and it is recommended to maintain configuration based on ISO 3166-1. For more information, see <https://www.iso.org/iso-3166-country-codes.html>.

### Adding Birth Country Codes

1. From the **Administration** menu, select **Client Relations**, select **Cashiering Geographic Management**, and then select **Birth Country**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code.
  - b. **Description**: Enter a description for the Birth Country code.

- i. **Manage Translations:** Click to enter the description in additional languages (available when the Multi-language OPERA Control is active).
  - c. **Sequence:** Enter a number to position the Birth Country code in a list.
3. Click **Save**. Or, click **Save and Continue** to create another code.

#### Editing Birth Country Codes

1. From the **Administration** menu, select **Client Relations**, select **Cashiering Geographic Management**, and then select **Birth Country**.
2. Enter search criteria and click **Search**.
3. Select the Birth Country code, click the **vertical ellipsis** and select **Edit**.
4. Update configuration.
5. Click **Save**.

#### Deleting Birth Country Codes

1. From the **Administration** menu, select **Client Relations**, select **Cashiering Geographic Management**, and then select **Birth Country**.
2. Enter search criteria and click **Search**.
3. Select the Birth Country code, click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## About City and Postal Codes

You can associate countries (and states or provinces if configured for the country) with cities and with postal codes using Cities and Postal Codes configuration.

When you enter a country and postal code in a profile, OPERA Cloud automatically determines if there is a state, city, and territory associated with the country-postal code combination. If there is, the state, city, and territory portion of the address auto-populate on the profile. Territories update only for account and contact profiles.

In addition, Cities and Postal Codes configuration allows you to associate a district with country/state/territory/city/postal code combinations. You can use districts as geographical filters for statistical reporting and marketing purposes. How you set up using cities and postal codes depends on whether the country is configured with states (or provinces). If states are for the country, you can set up districts that consist of the following combinations:

Country/state/city

Country/state/postal code

Country/state/territory/city/postal code

For example, for the US, one district might include the cities of Chicago IL, North Chicago IL, and Racine WI. Another district might include the entire state of Delaware, the city of Philadelphia PA, and postal codes 08101 through 08104 in Camden NJ.

If the country is not configured using states, you can set up districts that consist of any cities within a country. For example, you could set up a district in the Netherlands consisting of the cities of Rotterdam and Delft.

## Configuring Cities and Postal Code

### Adding City and Postal Codes

1. From the Administration menu, select **Client Relations**, select **Geographic Management**, and then select **City and Postal Codes**.
2. Click **New** to open the Manage City and Postal Codes screen.
3. Select the **Country** associated with the country/state/territory/city/postal code combination. For more information, see [Configuring Countries](#).
4. Select the **State**. This field appears if states or provinces are configured for the country selected in the Country field. For more information, see [Configuring State Codes](#).
5. Select a **Territory** associated with the country/state/city/postal code combination. When a country and postal code are configured together with a territory linked to them, the territory code is default in the Territory field on account and contact screens when the country and postal codes are selected on those screens.
6. Select a **District** to be associated with this country/state/territory/city/postal code combination. For more information, see [Configuring District Codes](#).
7. Select the **Fiscal Region**.
8. Select the **From Postal Code / To Postal Code** to define the start and end range of the postal codes valid for the particular country/state/territory/city.

 **Note:**

Alphanumeric characters are accepted. If a single postal code is to be associated with the/country/state/territory/city combination, enter the same postal code in both the From Postal Code and To Postal Code fields. If a postal code is not entered, a city must be entered. When a country and postal code are configured together with a territory linked to them, the territory code defaults in the Territory field on account and contacts screens when the country and postal codes are selected on those screens.

9. Enter a **City** associated with the country/state/territory/city/postal code combination. If a city is not entered, you must enter a postal code.
10. Click **Save**.

### Editing City and Postal Codes

1. From the Administration menu, select **Client Relations**, select **Geographic Management**, and then select **City and Postal Codes**.
2. From the search, enter search criteria and click **Search**.
3. From your search results, locate the city and click the **vertical ellipsis** and select **Edit**.

4. Update the available fields
5. If editing the code, make your changes to the Description field and/or Sequence number.
6. Click **Save**.

#### Deleting City and Postal Codes

1. From the Administration menu, select **Client Relations**, select **Geographic Management**, and then select **City and Postal Codes**.
2. From the search, enter search criteria and click **Search**.
3. From your search results, locate the city and click the **vertical ellipsis** and Select **Delete**.

## Configuring Countries

Country codes provide information you can use for filling out profile address information and for statistical reporting. Many countries are pre-configured on provisioning of your property, but will require update to assign to regions. see [Configuring Region Codes](#).

#### Note:

ID document scanning integration requires two-character country codes and it is recommended to maintain configuration based on ISO 3166-1. For more information, see <https://www.iso.org/iso-3166-country-codes.html>.

#### Adding Countries

#### Note:

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Countries are created by selecting the Template tab. Once created, you can copy Countries to specific properties using the Copy action. See Copying Configuration Codes to [Multiple Properties](#) for more information.

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Countries**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code to represent the country as it appears on reports and within OPERA Cloud.
  - b. **Country Name**: Enter the full Country Name.
  - c. **Statistics Code**: Enter a code with which the country is associated for statistics-gathering and reporting purposes
  - d. **Address Format**: Select an address format for output of the address on stationery. For more information see [Address Formats](#).

- e. **Country Main Group:** Select a main group from the list. For more information, see [Configuring Country Main Group Codes](#).
  - f. **Region:** Select a region to assign to this country code from the list. For more information, see [Configuring Region Codes](#).
  - g. **ISO Code:** Enter the ISO code for the country.
  - h. **ISO Name:** Enter the ISO country name.
  - i. **Sequence:** Enter a display sequence for display in listings.
  - j. **Report Sequence:** Enter a Report Sequence for establishing the position of the country in reports.
  - k. **Display Country Flag:** Select the check box to include a small image of the national flag associated with the ISO code appear next to the country field..
3. Click **Save**. Click **Save and Continue** to create another Country code.

### Editing Countries

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Countries**.
2. Enter search criteria and click **Search**.
3. Select the country in the search result, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Countries

#### Note:

Countries can't be deleted if used within profiles address details. For more information, see [Managing Profile Communication](#).

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Countries**.
2. Enter search criteria and click **Search**.
3. Select the country in the search result, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Country Main Group Codes

The Country Main Group provides a code representing a logical grouping of various countries. The functionality links to statistics information for Profiles. You can add, edit, and delete Country Main Group Codes.

1. From the Administration menu, select **Client Relations**, select **Cashiering Geographic Management**, and then select **Country Main Group**.

2. Click **New** to add a Country Main Group using the Manage Country Main Group screen.
3. Create a **Code** for the country, for example, GB. 4.
4. Create a **Description** that describes the country, for example, Great Britain.
5. Click the **Manage Translations** link if you want to enter the description in additional languages.
6. Enter a **Sequence** number to position the Country Main Group in a list.
7. Click **Save**. Or, click **Save and Continue** to create another code.

#### Editing and Deleting Codes:

1. From the Country Main Group screen, select the district **Code**, enter the code **Description**, and then click **Search**.
2. From your search results, locate the Country Main code, click the **vertical ellipsis**, and select either **Edit** or **Delete**.
3. If editing the code, make your changes to the Description field and/or Sequence number and click **Save**.
4. If deleting the code, click **Delete** when the confirmation screen appears.

## Configuring Distance Type Codes

Use Distance Types to define multiple units for distances (kilometers, miles, inches).

#### Adding Distance Type Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Distance Types**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a Code for the Distance Type.
  - b. **Description**: Enter a Description of the Distance Type.
    - i. **Manage Translations**: Click to enter the description in additional languages (Available when the Multi-language OPERA Control is active).
  - c. **Sequence**: Enter a Sequence number to position the Distance Type in a list.
3. Click **Save** or click **Save and Continue** to create another code.

#### Editing Distance Type Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Distance Types**.
2. Enter search criteria and click **Search**.
3. Select the Distance Type code, then click the **vertical ellipsis** and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Distance Type Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Distance Types**.
2. Enter search criteria and click **Search**.
3. Select the Distance Type code, then click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## About District Codes

Districts are user-definable groupings of geographical areas within a country. Districts can provide flexibility in reporting, data collection, and marketing campaigns.

If states are configured for the country, you can set up districts consisting of the following combinations:

- Country/state/city
- Country/state/postal code
- Country/state/city/postal code.

For example, one district in the United States might include the cities of Chicago IL, North Chicago IL, and Racine WI. Another district might include the entire state of Delaware, the city of Philadelphia PA, and postal codes 08101 through 08104 in Camden NJ.

If the country has not been configured using states, you can set up districts that consist of any cities within a country. For example, you could set up a district such as the Netherlands consisting of the cities of Rotterdam and Delft.

## Configuring District Codes

### Adding District Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Districts**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a Code for the district.
  - b. **Description**: Enter a Description of the district.
    - i. **Manage Translations**: Click to enter the description in additional languages (Available when the Multi-language OPERA Control is active).
  - c. **Sequence**: Enter a Sequence number to position the district in a list.
3. Click **Save** or click **Save and Continue** to create another code.

### Editing District Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Districts**.

2. Enter search criteria and click **Search**.
3. Select the district code, then click the **vertical ellipsis** and select **Edit**.
4. Update details.
5. Click **Save**.

#### Deleting District Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Districts**.
2. Enter search criteria and click **Search**.
3. Select the district code, then click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Fiscal Guest Types

Fiscal Guest type codes are only allowed to be numeric. Currently only codes 1,2, 3 and 4 are allowed and are provided as SID data and cannot be deleted. The description of the code can be edited. Following are the default descriptions:

- 1 = Individual
- 2 = Professional
- 3 = Government
- 4 = POS account

Guest types explanation:

1. Any guest that does not have a professional tax code, including individual guests, foreign companies/agents/sources/groups. A guest with this guest type would receive a normal folio upon check out.
2. Any guest with a professional tax code (doctors, lawyers, etc.) and all local companies/agents/sources/groups. A guest with this guest type would potentially receive two types of folios upon check out, one for all goods posted and another one for all services posted.
3. Any guest working for the government. The behavior for this guest type is equal to guest type 1.
4. Any profile that is used for POS accounts (i.e., POS Cash, POS Credit Card, etc.).

#### Note:

The **GUEST\_TYPE** field can be added to the **Profile Presentation Overview** panel via page composer.

## Configuring Identification Country Codes

Identification Country codes are used to list countries that issue identification documents. The list of Identification Countries is displayed in the Identification panel of the guest profile and as a step in the reservation check-in. Staff can make a selection from this list when manually adding identification details or scanning identification documents .

**Note:**

ID document scanning integration requires two-character country codes and it is recommended to maintain configuration based on ISO 3166-1. For more information, see <https://www.iso.org/iso-3166-country-codes.html>.

### Adding Identification Country Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Identification Country**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code to represent the country.
  - b. **Description**: Enter a description of the country.
  - c. **Sequence**: Enter a sequence number position of the county in a list of values.
3. Click **Save**. Click **Save and Continue** to create another Identification Country.

### Editing Identification Country Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Identification Country**.
2. Enter the search criteria and **Search**.
3. Select the identification Country Code, click the **vertical ellipsis** and select **Edit**.
4. Update the configuration.
5. Make your updates and click **Save**.

### Deleting Identification Country Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Identification Country**.
2. Enter the search criteria and **Search**.
3. Select the identification Country Code, click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Identification Types

Identification types provide a list of accepted identification types. Examples include passport, driver license, military ID, and so on. Users can select from this list of values when updating guest and contact profile [identification details](#).

### Adding Identification Types

1. From the **Administration** menu, select **Client Relations**, select **Cashiering Geographic Management**, and then select **Identification Types**.
2. Click **New** and enter the following details:
  - a. **Code** : Enter a code for the identification type.
  - b. **Description** : Enter a description for the new identification type.
    - i. **Manage Translations** : Click to enter the description in additional languages (Available when the Multi-language OPERA Control is active).
  - c. **Sequence** : Enter a Sequence number to position the Identification Types code in lists.
3. Click **Save** or, click **Save and Continue** to create another.

### Editing Identification Types

1. From the **Administration** menu, select **Client Relations**, select **Cashiering Geographic Management**, and then select **Identification Types**.
2. Enter search criteria and click **Search**.
3. Select the identity type, click the **vertical ellipsis**, and select **Edit** .
4. Update details.
5. Click **Save**.

### Deleting Identification Types

1. From the **Administration** menu, select **Client Relations**, select **Cashiering Geographic Management**, and then select **Identification Types**.
2. Enter search criteria and click **Search**.
3. Select the identity type, click the **vertical ellipsis**, and select **Delete**.
4. Click **Delete** to confirm.

## About Language Codes

Language codes help you to identify the native language spoken by guests and contacts. The language value in profiles can be sent to integrated systems such as in-room video and voice mail systems. For Sales Accounts the language value can be used to define the language for stationery such as folios and statements.

When the Multi-language OPERA Control is active:

- You can setup translation for code descriptions, per language, using the **Manage Translations** link throughout the Administration menu.
- The language value in a profile determines the stationery template and language translation used for generating confirmations, registration cards, receipts, and folios. For company and agents, the language code determines the template and the language translation used for generating folios, statements, reminder letters, contracts, and banquet event orders. For more information, see [About Stationery Editor \(Oracle Business Intelligence \(BI\) Publisher\)](#).

Language codes are also used for translation of the OPERA Cloud user interface; menus, messages, actions, links and field labels are displayed in the language setup in your user profile; you can change the language for your session in [Settings](#).

The following language translations are available:

- Arabic
- Chinese Simplified
- Chinese Traditional
- French
- German
- Italian
- Japanese
- Korean
- Portuguese (Brazil)
- Portuguese (Portugal)
- Spanish
- Thai

## Configuring Language Codes

### Adding Language Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Languages**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a Code for the Language.
  - b. **Description**: Enter a Description of the Language.
    - i. **Manage Translations**: Click to enter the description in additional languages (Available when the Multi-language OPERA Control is active).
  - c. **Translation Language**: Select a language from the list to specify the user-interface translation.
  - d. **Report Date Language**: Select a language from the list to specify the format for dates output in stationery.
  - e. **Sequence**: Enter a Sequence number to position the Language in a list.
3. Click **Save** or click **Save and Continue** to create another code.

### Editing Language Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Languages**.
2. Enter search criteria and click **Search**.
3. Select the Language code, then click the **vertical ellipsis** and select **Edit**.

4. Update details.
5. Click **Save**.

#### Deleting Language Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Languages**.
2. Enter search criteria and click **Search**.
3. Select the Language code, then click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Nationalities

### Note:

ID document scanning integration requires two-character country codes and it is recommended to maintain configuration based on ISO 3166-1. For more information, see <https://www.iso.org/iso-3166-country-codes.html>.

#### Adding Nationalities

1. From the **Administration** menu, select **Client Relations**, select **Cashiering Geographic Management**, and then select **Nationalities**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code.
  - b. **Description**: Enter a description for the Nationality.
    - i. **Manage Translations**: Click to enter the description in additional languages (available when the Multi-language OPERA Control is active).
  - c. **Sequence**: Enter a number to position the Nationality code in a list.
3. Click **Save**. Or, click **Save and Continue** to create another Nationality code.

#### Editing Nationalities

1. From the **Administration** menu, select **Client Relations**, select **Cashiering Geographic Management**, and then select **Nationalities**.  
Enter search criteria and click **Search**.
2. Select the nationality code, click the **vertical ellipsis** and select **Edit**.
3. Update configuration.
4. Click **Save**.

#### Deleting Nationalities

1. From the **Administration** menu, select **Client Relations**, select **Cashiering Geographic Management**, and then select **Nationalities**.

2. Enter search criteria and click **Search**.
3. Select the nationality code, click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Region Codes

Regions enable you to consolidate statistical information for a selection of countries. When you prepare reports based on regions, data for all countries associated with the region is included in the report.

### Adding Region Codes

1. From the **Administration** menu, select **Client Relations**, select **Cashiering Geographic Management**, and then select **Regions**.
2. Click **New** to open the Manage Region screen.
3. Create a **Code** for the region, for example, EAM.
4. Create a **Description** that describes the region, for example, Europe, Asia, Middle East.
5. Click the **Manage Translations** link if you want to enter the description in additional languages.
6. Enter a **Sequence** number to position the region code in a list.
7. Click **Save** or, click **Save and Continue** to create another region code.

### Editing Region Codes

1. From the Country Main Group screen, select the district **Code**.
2. Enter the code **Description**, and then click **Search**.
3. From your search results, locate the region code, click the **vertical ellipsis**, and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Region Codes

1. From the Country Main Group screen, select the district **Code**.
2. Enter the code **Description**, and then click **Search**.
3. From your search results, locate the region code, click the **vertical ellipsis**, and select **Delete**.
4. Click **Delete** to confirm.

## Configuring State Codes

Properties can use state (or province) information when specifying mailing addresses as part of OPERA Cloud profiles. You can also use states when creating districts,

which are geographical designations that provide flexibility in reporting, data collection, and marketing campaigns. You must configure the country before configuring the state.

### Adding State Codes

1. From the **Administration** menu, select **Client Relations**, select **Cashiering Geographic Management**, and then select **States**.
2. Click **New** and enter the following details:
  - a. **Country**: Select the country. For more information, see [Managing Countries](#).
  - b. **Code**: Enter a code.
  - c. **Description**: Enter a description for the state.
    - i. **Manage Translations**: Click to enter the description in additional languages (available when the Multi-language OPERA Control is active).
  - d. **Sequence**: Enter a number to position the state in a list of states.
3. Click **Save**. Or, click **Save and Continue** to create another code.

### Editing State Codes

1. From the **Administration** menu, select **Client Relations**, select **Cashiering Geographic Management**, and then select **States**.
2. Enter search criteria and click **Search**.
3. Select the state code, click the **vertical ellipsis** and select **Edit**.
4. Update configuration.
5. Click **Save**.

### Deleting State Codes

1. From the **Administration** menu, select **Client Relations**, select **Cashiering Geographic Management**, and then select **States**.
2. Enter search criteria and click **Search**.
3. Select the state code, click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Tax Category Codes

### Adding Tax Category Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Tax Category**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code to represent the new tax category.
  - b. **Description**: Enter a description, such as Low, Medium, High, or so on to describe the tax category.

- i. **Manage Translations:** Click to enter the description in additional languages (available when the Multi-language OPERA Control is active).
      - c. **Sequence:** Enter a number to position the tax category code when it appears in a list of tax categories.
  3. Click **Save**. Or, click **Save and Continue** to create another code.

#### Editing Tax Category Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Tax Category**.
2. Enter search criteria and click **Search**.
3. Select the Tax Category code, click the **vertical ellipsis** and select **Edit**.
4. Update configuration.
5. Click **Save**.

#### Delete Tax Category Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Tax Category**.
2. Enter search criteria and click **Search**.
3. Select the Tax Category code, click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Tax Office Codes

You can create tax offices and add them to profiles to appear in a list of acceptable tax office locations. Staff can then select a tax office from the standard list when verifying guest tax offices.

#### Adding Tax Office Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Tax Office**.
2. Click **New** and enter the following details:
  - a. **Code:** Enter a code to represent the new tax office.
  - b. **Description:** Enter a description, such as the tax office location, to describe the new office.
    - i. **Manage Translations:** Click to enter the description in additional languages (available when the Multi-language OPERA Control is active).
    - c. **Sequence:** Enter a number to position the tax office code when it appears in a list of tax offices. Tax offices without a sequence number appear in alphabetical order following codes that have a sequence number.
3. Click **Save**. Or, click **Save and Continue** to create another code.

### Editing Tax Office Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Tax Office**.
2. Enter search criteria and click **Search**.
3. Select the Tax Office code, click the **vertical ellipsis** and select **Edit**.
4. Update configuration.
5. Click **Save**.

### Deleting Tax Office Codes

1. From the **Administration** menu, select **Client Relations**, select **Geographic Management**, and then select **Tax Office**.
2. Enter search criteria and click **Search**.
3. Select the Tax Office code, click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Guest Loyalty Programs

### [Prerequisites for Guest Loyalty Programs](#)

Guest loyalty programs are membership programs offered by hotels, auto clubs, and airlines to reward guest loyalty. These programs offer rate discounts, room upgrades, free nights, and other benefits to guests. Guests must belong to a membership program recognized by your hotel chain before membership benefits and awards can be applied to their stay. For example, your hotel has a guest loyalty program that awards guests based on the amount of revenue generated or the number of stays per year.

### Membership Types

Guests often belong to membership programs offered by hotels, auto clubs, airlines, and so on. These memberships might offer discounts and other benefits to guests staying at your property. To apply membership privileges and awards to a guest stay, the guest must belong to a membership program recognized by your property.

Membership types enable you to identify, organize, and manage the membership programs on a profile. For example, your hotel might have a guest loyalty program that awards guests based on the amount of revenue generated or the number of stays per year. You would create a specific membership type for this program.

You can add membership types to a guest profile or to a reservation at booking or check-in. You can add more than one membership type to a profile, but you must designate one of the membership types as primary.

Each membership type has a membership type rule setup associated with it. Membership type rules determine the actions that result in membership award points and tier point accrual. One of two types of points, award points or tier points, can be defined for the membership program. Members redeem award points towards specific awards, and tier points are evaluated to determine membership tier / level upgrades and downgrades.

When creating a membership type, you can set an expiration date, and you can set up the membership to auto-generate membership numbers or require them to be manually entered for each new member.

### Membership Tiers

Membership tiers are levels that classify memberships according to the amount and quality of business they generate. You can upgrade a member from a lower to a higher tier, or downgrade from a higher to a lower tier. The membership tier determines guest eligibility for specific awards. The higher the tier, the greater the awards. Members are upgraded or downgraded based on specific actions:

- Number of stays booked by the member during a given period.
- Number of nights the member was in residence during a given period.
- Revenue generated by the member during a given period.

### Membership Awards

You can define awards for your hotel's guest loyalty program. This enables you to recognize and reward guest loyalty and encourage frequent stays throughout your chain. Each membership program can have its own special awards setup. For example, a loyalty membership program might upgrade a member to a higher tier or level once a required number of stays is reached.

Awards take the form of different award types, such as products (champagne, chocolates, flowers, or a spa treatment), special room rates, room upgrades, or other perks such as a choice of gifts from a third-party catalog. Membership awards must be based on the following award types:

- **Products:** The award is a product, or package, such as champagne, chocolates, flowers, spa session, or golf privileges.
- **Rates:** The award is a special room rate available to members.
- **Upgrades:** The award takes the form of a room upgrade.
- **FT Payment:** This award enables a guest to apply available membership points towards the balance of his or her bill.
- **Other:** The award consists of a product or service offered by a third party, such as a selection from a gift catalogue.

Awards can be offered based on specific valid dates, the member's tier / level, and other factors. You can either manually issue awards to guests or automatically issue them. Typically, you automatically issue awards through an award batch job that is set up to periodically run.

## Workflow

**Figure 15-1 Guest Loyalty Program Setup Workflow**

In the workflow, setups occur in the following order:

- 1. Primary Membership Type Setup:** You must first create a membership type and set it as primary. You can then add additional features and details to the membership, such as the points calculation.
- 2. Membership Card Details Setup:** After you set up your primary membership type, you can configure the membership card details. You can set up the membership card so that a unique card number is generated and assigned to each new member who enrolls into the program.
- 3. Membership Type Rules Setup:** Membership type rules determine how the membership program accrues points for awards and membership level upgrades.
- 4. Membership Tiers Setup:** Tiers define the hierarchy for the membership program. You can define tier management rules to require a minimum number of stays, nights, and revenue for each tier. For example, the member must stay a certain number of nights per year to remain at the current tier or exceed that number to upgrade to the next tier. A member's failure to meet the current tier's requirements can result in a downgrade to a lower tier.
- 5. Membership Awards Setup:** Finally, you can create the specific awards for the guest loyalty program and define the point requirements for each award.

## Prerequisites for Guest Loyalty Programs

### OPERA Controls

**Group:** Membership

**Functions:** Enrollment

### OPERA Cloud Tasks

**Group:** Client Relations Admin

**Tasks:** Membership Management

## Configuring Membership Enrollment Codes

Enrollment codes are a convenient way to categorize participants in membership programs based on their method of enrollment (or other criteria). For example, you might set up enrollment codes for persons who enroll on the Web, through their place of business, as a member of a social group, etc. The enrollment codes you set up are available to be associated with guest profiles via the Profile screen Membership options.

Enrollment codes are then combined into [enrollment groups](#).

You can then use enrollment codes and/or enrollment groups to configure points calculation rules that apply to members who enrolled in certain ways.

### Adding Membership Enrollment Codes

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Enrollment Codes**.
2. Click **New** and enter the following details:
  - a. **Code:** Enter a code for the enrollment code.
  - b. **Description:** Enter a description for the enrollment code.
    - i. **Manage Translation:** Click to add translations for description.
  - c. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned
3. Click **Save**.

### Editing Membership Property Groups

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Enrollment Codes**.
2. Enter search criteria and click **Search**.
3. Select the Enrollment Codes, click **Vertical Ellipsis** and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Membership Property Groups

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Enrollment Codes**.
2. Enter search criteria and click **Search**.
3. Select the Enrollment Codes, click **Vertical Ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

**Note:**

You cannot delete codes linked to an Enrollment Group.

## Configuring Membership Enrollment Groups

**Enrollment codes** are a convenient way to categorize participants in membership programs based on their method of enrollment (or other criteria). For example, you might set up enrollment codes for persons who enroll on the Web, through their place of business, as a member of a social group, etc. The enrollment codes you set up are available to be associated with guest profiles via the Profile screen Membership options.

Enrollment codes are then combined into enrollment groups.

You can then use enrollment codes and/or enrollment groups to configure points calculation rules that apply to members who enrolled in certain ways

### Adding Membership Enrollment Groups

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Enrollment Groups**.
2. Click **New** and enter the following details:
  - a. **Code:** Enter a code for the enrollment group.
  - b. **Description:** Enter a description for the enrollment group.
  - c. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - d. **Enrollment Codes:** Select one or more Enrollment codes from the Available panel and click > to move to the Selected pane.
3. Click **Save**.

### Editing Membership Enrollment Groups

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Enrollment Groups**.
2. Enter search criteria and click **Search**.
3. Select the Enrollment Group, click **Vertical Ellipsis** and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Membership Enrollment Groups

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Enrollment Groups**.
2. Enter search criteria and click **Search**.
3. Select the Enrollment Group, click **Vertical Ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Guest Enrollments for External Loyalty Programs

### Prerequisites for Enrolling Guests in External Loyalty Programs

Generic Enrollment allows you to enroll a guest in an external loyalty and/or gaming system integrated with OPERA Cloud. Enrollment uses REST APIs to exchange data.

- If the Enrollment Type selected = Loyalty, OPERA Cloud looks at the Default Membership Type parameter to retrieve the Membership Type. Next, it retrieves the External database configured on that membership and retrieves the associated Outbound Code. Lastly, the Service Path configured on the Outbound System configuration is retrieved and OPERA Cloud performs the outbound call.
- If the Enrollment Type selected = Gaming, OPERA looks at the Default PTS Membership Type parameter to retrieve the Membership Type. Next, it retrieves the External database configured on that membership and retrieves the associated Outbound Code. Lastly, the Service Path configured on the Outbound System configuration is retrieved and OPERA Cloud performs the outbound call.

### Outbound Configuration

- The CRM and/or Gaming Outbound System, External System, and External Database configuration must connect to the third party for Enrollment.
- The external system must follow OPERA Cloud REST API specifications and standards, and any data mapping must be completed on the external system side.
- For more information, see [Configuring Outbound System Configurations](#), specifically the sections on CRM Generic and Gaming.

### Controls

- Activate the Enrollment control.
- Select the types you wish to use in the Enrollment Types setting, for example, Loyalty and/or Gaming.
- If using Loyalty Enrollment, set the Default Membership Type setting. The Default Membership Type selected is the membership that automatically populates when adding a new membership to a profile, enrollment, and the membership used for linking a profile membership to a reservation.
- If using Gaming Enrollment, set the Default PTS Membership Type setting. The Default Membership Type for Gaming (Patron tracking system) is used for Gaming Functionality.

### Tasks

- Assign the New Enrollment task to the appropriate roles.

### Administration

- Add the External Database to the Membership Type. This links the Membership Type to the correct External Database where the enrollment takes place.
- From the Administration menu, make the following selection: Client Relations>Membership Management> Membership Types> Edit Membership Type> Membership Handling > Edit. Select the External Database List of Values and select the External Database to use for Enrollment.

## Configuring Membership Market Groups

Market Groups are used within the setup of point calculation rules for Membership Types. Within a rule, you may specify if points are calculated by a market group. You can identify which market codes belong within the market group so that OPERA Cloud calculates points based on the codes entered here. For example, you may create a market group called Corporate and within this group, you can select the corporate market codes. When this market group is applied to a calculation rule, points are calculated if the reservation market code is included in this market group.

### Adding a Membership Market Group

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Market Groups**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter the membership market group code.
  - b. **Description**: Enter the description for the market group.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - d. Select one or market codes from the Available panel then use the greater than symbol (>) to move your selection to the **Selected** panel.

 **Note:**

Use the filter to refine the search; enter value and click **Go**.

3. Click **Save**.

### Editing a Membership Market Group

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Market Groups**.
2. Enter search criteria, click **Search**.
3. Select the market group and click **Vertical Ellipsis** and select **Edit**.
4. Update the details.
5. Click **Save**.

### Deleting a Membership Market Group

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Market Groups**.
2. Enter search criteria, click **Search**.
3. Select the market group and click **Vertical Ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Membership Classes

Membership classes are used to classify the various membership programs (types). They can be identified as Airline Programs (Frequent Flyer Programs) or Loyalty Programs (Frequent Guest Program) or other.

Before you configure membership types you must first define the membership classes that the membership types will belongs to.

### Adding Membership Class

1. From the **OPERA Cloud Administration** menu, select **Client Relations**, select **Membership Management**, and then select **Membership Class**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the membership class.
  - b. **Description**: Enter a description for the membership class.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - d. **Loyalty Program**: Select this check box if the membership class is a Frequent Guest loyalty program. Only one class may be selected as a loyalty program.
  - e. **Frequent Flyer**: Check this box if the membership class is a frequent flyer program. Only one class may be selected as a frequent flyer program.
3. Click **Save**.

### Editing Membership Class

1. From the **OPERA Cloud Administration** menu, select **Client Relations**, select **Membership Management**, and then select **Membership Class**.
2. Enter search criteria and click **Search**.
3. Select the membership class, click **Vertical Ellipsis** and click **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Membership Class

1. From the **OPERA Cloud Administration** menu, select **Client Relations**, select **Membership Management**, and then select **Membership Class**.
2. Enter search criteria and click **Search**.
3. Select the membership class, click **Vertical Ellipsis** and click **Delete**.
4. Click **Delete** to confirm.

 **Note:**

You cannot delete a membership class which is linked to membership types.

## Configuring Membership Type Point Calculation Rules

For each membership type configure the rules to define how both base and bonus points will be calculated. You can specify whether points are awarded based on nights, stay or spend. If based on spend you then nominate a [transaction code group](#) to identify the sales charge codes (revenue / non-revenue) eligible for points. For each rule you can further refine eligible reservations and guests through the selection of a rate code group, market code group or membership level. For example, you could configure a rule for bonus points specific to Platinum level members that book specific rate code(s) for stays through October.

### Adding Membership Type Point Calculation Rules

1. From the **Administration** menu, select **Client Relations**, select **Membership Management**, and select **Membership Type Rules**.
2. Click **New** and complete the following:
  - a. **Membership Type:** Select the membership type for which you are creating the point calculation rule.
  - b. **Rule Based On:** Select from the following options:
    - i. **Revenue (Spend):** Calculate based on sales charges posted to the guest reservation.
    - ii. **Stay:** Calculate points based on the stay (regardless of length of stay).
    - iii. **Nights:** Calculate points based on number of nights (length of stay).
  - c. **Type of Points:** Select from the following options:
    - i. **Base:** Regular points awarded.
    - ii. **Bonus:** Bonus or extra point awarded : used for such purposes as a promotion (possibly based on a specific market code, and possibly for a short period of time).
  - a. **Start / End Date:** This defines reservation stay dates for which this calculation rule will apply.
  - b. **Description:** Enter a description of the rule.
  - c. **Points:** Enter the number of points to award to the member according to the **Rule Based On** value selected. For example, 1 point per \$ spend, 100 points per night or 1000 points per stay.
    - i. **%.** Select to specify that the value in **Points** is a percentage of the revenue
    - ii. **Rounding:** Select a value from the list:
      - i. **Ceiling:** Always round up
      - ii. **Floor:** Always round down
      - iii. **Round:** Regular rounding (2.1-2.4 will round down, 2.5-2.9 will round up)
  - d. **Cost per Point:** The actual or estimated cost to the property when points are assigned to a member based on this rule. This information can be used to track the expenses associated with the membership program.
  - e. Rule Conditions

- i. General
  - i. **Property:** Select the property from the list.
  - ii. **Property Group:** or select a property group from the list (multi-property). See [Configuring Membership Property Groups](#)
  - iii. **Membership Level:** Select a membership level if this rule is specific to a level.
- ii. Rate
  - i. **Rate Group:** Select a rate group from the list to limit rule to specific rate codes. [Configuring Membership Rate Groups](#)
    - i. **Rate Group Include:** Select to include the selected rate group.
    - ii. **Rate Group Exclude:** Select to exclude the selected rate group
  - ii. **Transaction Group:** Select a transaction group from the list. See [Configuring Membership Transaction Groups](#)
    - i. **Transaction Group Include:** Select to include the selected transaction group
    - ii. **Transaction Group Exclude:** Select to exclude the selected transaction group
  - iii. **All Membership Rates:** Select the define rule for all rate codes (Rate Group selection is disabled).
  - iv. **All Membership Transactions:** Select to define rules for all sales charge transaction codes (transaction group selection is disabled).
- iii. Segmentation
  - i. **Market Group:** Select a market group from the list. See [Configuring Membership Market Groups](#)
    - i. **Market Group Include:** Select to include the selected market group.
    - ii. **Market Group Exclude:** Select to exclude the selected market group.

3. Click **Save**.

#### Editing Membership Type Point Calculation Rules

1. From the **Administration** menu, select **Client Relations**, select **Membership Management**, and select **Membership Type Rules**.
2. Enter search criteria and click **Search**.
3. Select the Member Type Rule and click the vertical ellipsis and select **Edit**.
  - a. Update the details
  - b. **Inactive:** Select to inactive the rule and exclude from processing.
4. Click **Save**.

#### Deleting Membership Type Point Calculation Rules

1. From the **Administration** menu, select **Client Relations**, select **Membership Management**, and select **Membership Type Rules**.

2. Enter search criteria and click **Search**.
3. Select the **Member Type Rule** and click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Creating Membership Types

1. From the **Administration** menu, select **Client Relations**, select **Membership Management**, and select **Membership Types**
2. Click **New** and enter the following details:
  - a. **Rank**: Enter a rank prioritizes the Membership Type reservation when competing with other reservations. Ranks in both Membership Level and Membership Types are incorporated for guest importance. The rank is not mandatory and can have duplicates and non-sequential numbering. One is considered the highest rank (available when the AI Room Assignment OPERA Control is active).
3. Enter a **Type** for the membership type, enter a **Description**, and click **Save**. When you edit your new membership type, you can select one of the following options:
  - a. **Centrally Managed**: Select this if membership points are calculated and managed centrally rather than at the property level.
  - b. **Primary**: Select this if this is your primary membership. Only one membership can be primary.

### Validating Membership Numbers in External Systems

Membership Numbers can now be validated in external systems using the Outbound System in OPERA Cloud. This document illustrates the standards accepted by OPERA Cloud in the event of an external validation call.

#### Requirements:

1. Validation is set to External under Administration-> Membership Types-> Card Details-> Validation-> External.
2. The external system should be set up using Outbound patterns.
3. Add External Database to the Membership Type:
  - a. This links the Membership Type to the correct external database where the enrollment takes place.
  - b. The above action is found on the Membership Handling panel.

## Configuring Membership Property Groups

Membership property groups are groupings of properties that are treated as a cohesive unit. This makes it convenient when points calculations are based on the property which originated the business or when back to back stays are flagged for membership transaction exceptions. Configure property groups from a [Hub location](#).

### Adding Membership Property Groups

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Property Groups**.
2. Click **New** and enter the following details:

- a. **Code:** Enter a code for the property group.
  - b. **Description:** Enter a description for the property group.
  - c. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - d. **Properties:** Select one or more properties from the Available panel and click > to move to the Selected panel.
3. Click **Save**.

#### Editing Membership Property Groups

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Property Groups**.
2. Enter search criteria and click **Search**.
3. Select the property group, click **Vertical Ellipsis** and select **Edit**.
4. Update details.
5. Click **Save**.

#### Deleting Membership Property Groups

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Property Groups**.
2. Enter search criteria and click **Search**.
3. Select the property group, click **Vertical Ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Setting up Membership Points Calculation

1. From the **Administration** menu, select **Client Relations**, select **Membership Management**, and select **Membership Types**.
2. Select the membership type for which you want to set up the point calculations, click **Edit**, and click **Points Calculation**. Click **Save** after completing the sections as described below.
3. Complete the Calculation Period section:

The **Calculation Period** determines the member upgrades, downgrades, and expirations based on the tier points accumulated during a given time period. Calculation can be based on a 12-month calendar year (from January to December of a year) or a rolling 12-month period (based on a time period from the month the points are calculated). The following example shows how the Rolling calculation method differs from the Calendar calculation method and how the differences affect your clients:

A member receives 500 tier points in November 2016, which is not enough at that time to be upgraded to the next tier. However, assume the guest accumulates another 300 tier points in January 2017. When the upgrade process is run in March 2017 and the calculation period is set to Rolling, the period covered would be from March 2016 to March 2017. The member would have sufficient points to be upgraded. If the calculation period is set to Calendar, the member would not be

upgraded. The member would only have 300 tier points because with Calendar, the calculation only considers points received from January to December of a calendar year.

- **Calendar:** The calculation considers points received from January to December of a calendar year, no matter when the calculation is run. For tier management purposes, tier points accumulation is calculated annually for the 12-month period prior to the date of the upgrade/downgrade batch run. For example, if the batch process is run on September 12, 2017, the tier points from September 11, 2016, to September 12, 2017, are considered in the upgrade/downgrade/expiration calculations.
- **Rolling:** The time period calculated is from the month the points are calculated to the same month for the time period selected. For example, from March 2017 to March 2018.

**Expire Inactive Card in:** The time limit (from 1 to 5 years) for membership card expiration. When the Tier Management batch process is run and the calculation period is set to Rolling, the new expiration year is based upon this value. For example, if the value is set to 2 Years, and the member is upgraded from Bronze to Silver in 10/17 with the current expiration set to 12/17, the upgrade batch process updates to the new expiration date of 10/19 (2 Years from 10/17). If the same member was upgraded in 11/17 from Silver to Gold, the expiration date would again update with the new expiration of 11/19 (2 Years from 11/17).

**Expire Award Points (Months):** The number of months (0 to 60) for which award points are eligible for redemption. Zero means that award points are eligible for redemption only for the month in which they were calculated. If 12 months is selected, points are eligible for redemption for 1 year from the points calculation date. If you want to set award points to never expire over the life of the membership, leave this field blank.

**Award Point Expiry Date (Years):** The length of time award points remain eligible for redemption. Choose from the following options:

- **Do Not Expire:** Award points never expire over the life of the membership.
- **Same Year:** Award points are eligible for redemption during the same calendar year they were calculated. For example, points calculated in October 2017 are eligible for redemption until December 2017.
- **1-5 Years:** Award points are eligible for redemption for the number of calendar years specified (1, 2, 3, 4, or 5) starting from the date they are calculated. For example, if you select 3 years as the Award Points Expiry Date, points awarded on June 1, 2017, are not eligible for redemption until December 31, 2020. Starting on January 1, 2021, they are no longer eligible for redemption.

**Grace Period (Years / Months):** The number of years for the grace period.

**Activity Period (Months):** The number of months for the member's activity period. Only membership award points that fall within this activity period are extended. For example, if 24 is the value entered for the activity period in months, the member's activity must fall within the past two years for his or her award points to be extended.

**Award Redeem Threshold:** This number represents the minimum amount of points required before points can be redeemed for awards by this member. The member can only redeem points when this threshold amount is met.

4. Complete the Awards Management section:

**Award Generation Method:** The points calculation method you want to use. Choose from the following options:

- **Batch:** An automatic batch process is used to calculate points.

- **Manual:** You must manually calculate points and modify them on the member account.
- **External System:** Points information is calculated externally by third-party software.

**Non Member Points:** The potential membership points that could be earned for a stay by a non-member. The points appear for guests who are not members of a loyalty program and who are staying at the hotel.

**Externally Controlled:** The membership points calculation is controlled by a third-party system.

**Required on Stay Period:** Stay points are calculated for a loyalty program guest even if the loyalty membership card is not attached to the reservation.

5. Complete the Tier Management section:

**Based On:** The tier upgrade/downgrade processes based on either an Arrival Date, Departure Date, Posting Date, or Transaction Date.

**Upgrade / Downgrade Period:** The time period from which to calculate the upgrade/downgrade points.

**Tier Expiration Month:** The month in which the current membership tier expires.

**Downgrade/Renewal:** This option schedules the Auto Process Membership Tier Management job to run in the OPERA Cloud Scheduler. Based on the membership settings, this job automatically upgrades, downgrades, or renews all members with the primary membership type.

**Requalify on Upgrade:** This option checks if members have enough points to requalify for their current membership level on upgrade. If members have enough points, they receive an upgrade and a new expiration date. When members lack enough points for an upgrade, this option checks the following conditions: (a) if they have sufficient points to requalify for their current membership levels and (b) if their membership expiration dates are in the current year. If these conditions are met, members stay at their current levels and are assigned new expiration dates.

**Non Member Points:** The potential membership points that could be earned for a stay by a non-member. The points appear for guests who are not members of a loyalty program and who are staying at the hotel.

**Tier Management Reset:** This option activates the tier management reset functionality for the membership level. If a member is upgraded, downgraded, or renewed, the membership tier points reset.

## Configuring Membership Rate Groups

Rate Groups are used within the setup of point calculation rules for Membership Types. Within a rule, you may specify if points are calculated by a rate group. You can identify which rate codes belong within the rate group so that OPERA Cloud calculates points based on the codes selected here. For example, you may create a rate group called Package and within this group, you can select the package rate codes. When this rate group is applied to a calculation rule, points are calculated if the reservation rate code is included in this rate group.

### Adding a Membership Rate Group

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Rate Groups**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter the membership rate group code.
  - b. **Description**: Enter the description for the rate group.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - d. Select one or rate codes from the Available panel then use the greater than symbol (>) to move your selection to the **Selected** panel.

 **Note:**

Use the filter to refine the search; enter value and click **Go**.

3. Click **Save**.

### Editing a Membership Rate Group

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Rate Groups**.
2. Enter search criteria, click **Search**.
3. Select the rate group and click **Vertical Ellipsis** and select **Edit**.
4. Update the details.
5. Click **Save**.

### Deleting a Membership Rate Group

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Rate Groups**.
2. Enter search criteria, click **Search**.
3. Select the rate group and click **Vertical Ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Membership Status Codes

Membership status codes may be assigned to individual memberships to define the current standing of the membership. For example, a membership might be characterized as **PERM** (permanent card mailed), **REJ** (does not want to join), **PREF** (preferences need to be selected), and so on, for whatever purposes your organization might have.

### Adding Membership Status Codes

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Status Codes**.

2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the status code.
  - b. **Description**: Enter a description for the status code.
    - i. **Manage Translation**: Click to add translations for the description.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned
3. Click **Save**.

#### Editing Membership Status Codes

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Status Codes**.
2. Enter search criteria and click **Search**.
3. Select the property group, click **Vertical Ellipsis** and select **Edit**.
4. Update details.
5. Click **Save**.

#### Deleting Membership Status Codes

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Status Codes**.
2. Enter search criteria and click **Search**.
3. Select the property group, click **Vertical Ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Membership Transaction Groups

Transaction Groups are used within the setup of point calculation rules for Membership Types. Within a rule, you may specify if points are calculated by a transaction group. You can identify which transaction (charge) codes belong within the transaction group so that OPERA Cloud calculates points based on the charge codes selected here that are posted in the reservation account. For example, you may create a transaction group called All Revenue and within this group, you can select all sales charge transaction codes excluding non-revenue, paid out etc. When this transaction group is applied to a calculation rule, points are calculated if the selected charge codes are posted to the reservation account.

#### Adding a Membership Transaction Group

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Transaction Groups**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter the membership Transaction group code.
  - b. **Description**: Enter the description for the Transaction group.

- c. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
- d. Select one or Transaction codes from the Available panel then use the greater than symbol (>) to move your selection to the **Selected** panel.

 **Note:**

Use the filter to refine the search; enter value and click **Go**.

3. Click **Save**.

### Editing a Membership Transaction Group

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Transaction Groups**.
2. Enter search criteria, click **Search**.
3. Select the Transaction group and click **Vertical Ellipsis** and select **Edit**.
4. Update the details.
5. Click **Save**.

### Deleting a Membership Transaction Group

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Transaction Groups**.
2. Enter search criteria, click **Search**.
3. Select the Transaction group and click **Vertical Ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Profile Management

Use the options from the Profile Management menu to create codes for defining the account types, address formats, address types, titles, alternate language titles, communication types, company types, keywords, and preferences associated with your profiles.

## Configuring Sales Account Types

OPERA Cloud provides the ability to draw statistics about revenue, room nights, and so on. For example, you could learn if the business is from a local business or an international business from reports such as Account History and Forecast, Account Hierarchy, Profile Production Statistics, and Profile Productivity LOS Reports. To use this feature, the sales account profile types (Company, Agent, Source) must have an account type selected in the [Sales Information](#) panel.

### Adding Account Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Account Types**.

2. Click **New** and enter the following details:
  - a. **Code**: Enter an alpha-numeric code.
  - b. **Description**: Enter a Description.
  - c. **Manage Translation**: Manage Translations (available when the Multi Language OPERA Control is active). Click to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence**: Set an optional sequence.
3. Click **Save** to save and exit or click **Save and Continue** to save the account type and add another.

#### Editing Account Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Account Types**.
2. Enter search criteria and click **Search**.
3. Select the account type, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. **Inactive**: Select the make the Account Type inactive.
6. Click **Save**.

#### Deleting Account Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Account Types**.
2. Enter search criteria and click **Search**.
3. Select the account type, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Configuring (Sales) Account Types

#### OPERA Controls

**Group**: Profiles

**Parameter**: Sales Information

#### OPERA Cloud Tasks

**Group**: Client Relations Admin

#### Profile Management:

- Account Types
  - New/Edit Account Types
  - Delete Account Types

## Configuring Profile Lookup from External Systems

## Prerequisites for Profile Lookup from External Systems

### ORS Profile Lookup & Download

The OPERA Reservation System (ORS) Webservices Profile Lookup is used to perform a synchronous Profile Lookup from OPERA Cloud to the OPERA 5 ORS. The Profile download uses OPERA Xchange Interface (OXI). When you select the ORS External Database configured for Profile Lookup on the Profile Search screen, OPERA Cloud retrieves the outbound code configured on the ORS External Database. Next, OPERA Cloud retrieves the lookup and download service paths configured on the Outbound System Configuration and performs the outbound call.

#### OXI

- Provision the Oracle Hospitality OPERA Exchange Interface Two-Way Cloud Service and configure the ORS interface. For more information, see: [Interface Setup](#).

#### Outbound Configuration

- The CRM\_LEGACY Outbound System, External System and External Database configuration is required to connect to ORS for Profile Lookup.
  - The External System must be flagged for lookup.
  - The External System code must be ORS.
- For more information, see: [Configuring Outbound Systems](#), specifically the CRM for Legacy ORS section.

#### Controls

1. Activate Profile Lookup in OPERA Cloud Controls.
2. Select the Profile Types you wish to allow Lookup for using the Profile Types settings for Lookup.
3. Set the External Lookup Behavior setting as Force, Manual, or Simultaneous.
4. Optionally, you can select the Default External System for Lookup.

#### Tasks

- Assign the [Profile Lookup task](#) to the appropriate roles.

### Generic Profile Lookup & Download

Generic Profile Lookup is used to perform a Profile Lookup from OPERA Cloud to any external system. Both Lookup and Download utilize REST APIs. When you select the External Database configured for Profile Lookup on the Profile Search screen, OPERA Cloud retrieves the outbound code configured on the external database. Next, OPERA Cloud retrieves the Service Path configured on the Outbound System Configuration performs the outbound call.

#### Outbound Configuration

- The CRM Outbound System, External System, and External Database configuration is required to connect to the third party for Profile Lookup.
  - The External System must be flagged for lookup.
  - The External System must follow OPERA Cloud REST API specifications and standards, and any data mapping must be completed on the external system side.

- For more information, see: [Configuring Outbound System Configurations](#), specifically the section on CRM Generic.

### Controls

1. Activate the Profile Lookup OPERA Cloud control.
2. Select the Profile Types you wish to allow Lookup for using the setting Profile Types for Lookup.
3. Set the External Lookup Behavior setting as Force, Manual, or Simultaneous.
4. Optionally, you can select the Default External System for Lookup.

### Tasks

- Assign the Profile Lookup task to the appropriate roles.

## Address Formats

Address formats vary by country, according to the requirements of the local postal service. Address format configuration enables you to define the layout of name and address elements for when the <ADDRESSEE\_FULL ADDRESS> merge code is used in a stationery template.

An address format is associated with each [country code](#), resulting in the <ADDRESSEE\_FULL ADDRESS> merge code generating according to the format of the country value within the profile. For example:

- Singapore does not have states; their address format would not need to include this element.
- In Japan, addresses are reversed so that POSTCODE, STATE, and CITY appear on the first line and the guest name appears on the last line.

When the Multi Language OPERA Control is active, you can use the Alternate Name elements (XLAST\_NAME, XFIRST\_NAME, XMIDDLE\_NAME, and XTITLE.) to set up address formats to output the Alternate name (national character set) values (for example, Chinese or Japanese characters). If the alternate name fields are empty on a profile, OPERA Cloud reverts to outputting the primary First name, Last name, Middle name and Title values. Therefore, it is not necessary to use both LAST and XLAST\_NAME within the same address format configuration; if an alternate name is available, the "X-fields" values are output, else the primary name values are output.

## Configuring Address Formats

### Adding an Address Format

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Address Formats**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter a code that briefly describes the address format.
  - b. **Description**: Enter a detailed description of the address format.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.

- d. **Sales Address Format:** Select checkbox to enable this address format to be selected when generating BEO's, ProForma, Contracts and other Sales and Event Management stationery. (Available when the Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition Or Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition is active).

 **Note:**

The default address format (named SALES ADDR DEFAULT and provided in the SID data) is used for all OPERA Cloud Sales and Event Management Standard Cloud Service catering contracts and documents unless a specific address format has been configured for a given country.

- e. **Available Elements.** Click to choose the elements to include in the address format; hold the CTRL key to select multiple elements. Click the (>) button to move selected elements to the selected elements panel.
- f. **Selected Elements.** Modify the positions of the elements in the text editing area or delete elements as needed. You can use cut (ctrl + x), copy (ctrl + c), and paste (ctrl + v) keyboard shortcuts to relocate elements in the edit area.

 **Note:**

Ensure you select the `country_description` element to output the full country name rather than the country code.

 **Note:**

When the Multi Language OPERA Control is active, you can use the Alternate Name elements (XLAST\_NAME, XFIRST\_NAME, XMIDDLE\_NAME, and XTITLE.) to set up address formats to output the Alternate name (national character set ) values (for example, Chinese or Japanese characters). If the alternate name fields are empty on a profile, OPERA Cloud reverts to outputting the primary First name, Last name, Middle name and Title values. Therefore, it is not necessary to use both LAST and XLAST\_NAME within the same address format configuration; if an alternate name is available, the "X-fields" values are output, else the primary name values are output.

- 3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing an Address Format

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Address Formats**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu, then click **Edit**.

4. Update the configuration.
5. Click **Save**.

#### Deleting an Address Format

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Address Formats**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu, then click **Delete**.
4. Click **Delete** to confirm.

## Configuring Address Types

You can save multiple addresses on a profile. For example, you might add the home address to an individual guest profile. For a company profile, you might add the physical street address for shipping and add the P.O. box address for billing.

#### Note:

Certain address types are pre-configured in OPERA Cloud and cannot be deleted.

#### Adding an Address Type

1. Select the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Address Types**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter the code used to represent an address type (for example, HOME, BUSINESS, BILLING, or SHIPPING). The address type cannot exceed 20 characters in length.
  - b. **Description**: Enter a descriptive phrase that classifies the address type (for example, Home Address, Business Address, Billing Address, or Shipping Address).
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing an Address Type

1. Select the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Address Types**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis** and select **Edit**.

4. Update the configuration.
5. Click **Save**.

#### Deleting an Address Type

1. Select the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Address Types**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Delete**.

## Alternate (Name) Language Titles

### Prerequisites for Alternate (Name) Language Titles

In addition to configuring title codes for western languages, you can configure alternate language title codes using national character sets for Chinese, Japanese, Arabic, Thai, Korean, or Hebrew. The alternate name title is selected as part of the Guest profile's alternate name entry. When selected for the Guest profile, the alternate name is used to output the guest's name on stationery generated in the national character set.

## Prerequisites for Alternate (Name) Language Titles

### OPERA Controls

**Group:** General

**Functions:** Multi Language

## Configuring Alternate Name Titles

### Adding an Alternate Language Title

1. Select the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Alternate Language Titles**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter (or paste) the title code in the national character set (using Chinese as an example, 先生 for Xiānshēng / Mr., 公 for Gōng; 小姐 for Xiǎojiě for young woman; or 太太 for Tàitai).
  - b. **Language.** Select the code to be associated with this title. All titles associated with a specified language code are available for selection when that language is chosen in the Language field on the guest Profile screen. The selected language is the language you use to exchange correspondence with the guest or contact rather than the guest's native language.
  - c. **Title Number** (Advanced Title only). Enter a unique number that identifies the unique combination of Title Code, Description, and Language.
  - d. **Salutation.** Enter the default salutation to be populated for the title. The salutation may include merge codes for variable information such as the alternate first name <XFIRSTNAME> and last name <XLASTNAME> on the profile.

- e. **Envelope Greeting.** (When the Advanced Title application parameter is active, Envelope Greeting appears as the label. When Advanced Title is not active, Business Title appears as the label.) This field identifies the name of the envelope greeting or business title to be used along with the social title, such as Doctor. When this field is populated, the envelope greeting or business title appears in the Titles screen at the Profile Screen. This ensures the correct envelope or business title and code are entered when creating or selecting a profile.
  - f. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit, or click **Save and Continue** to save this Alternate Language Title and add another.

#### Editing an Alternate Language Title

1. Select the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Alternate Language Titles**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the **vertical ellipsis**.
5. Click **Edit**.
6. Update the configuration and click **Save**.

#### Deleting an Alternate Language Title

1. Select the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Alternate Language Titles**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the **vertical ellipsis**.
5. Click **Delete**.

## Configuring Business Segments

Business segments are used as a method of categorizing sales accounts (company and travel agent profiles).

#### Adding a Business Segment

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Business Segments**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code for the business segment (for example, AC for Air Crew or DOD for Department of Defense, and so on.).
  - b. **Description.** Enter a description for the business segment code.

- c. **Manage Translations.** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing a Business Segment

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Business Segments**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. Update the configuration.
6. Click **Save**.

#### Deleting a Business Segment

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Business Segments**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis** and click **Delete**.
4. Click **Delete** to confirm.

## Communication Types

A communication type identifies the electronic means for communicating with a profile. Communication types include phone numbers, email addresses, fax numbers, and web pages.

You can create multiple communication type entries for a profile. For example, a company profile could have a fax phone number and a business phone number. You might also configure communication types for a home telephone number and mobile telephone number.

Each communication type you create is associated with a predefined role: Phone, Fax, Email, Pager, and Web Page.

Once configured, you can select the default communication types for Guest and Company/Travel Agent profiles in OPERA Controls.

## Configuring Communication Types

#### Adding a Communication Type

1. Select the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Communication Types**.

2. Click **New** and complete the following fields:
  - a. **Role.** Select from the list the role of this communication type: Phone, Fax, Email, or Web Page.
  - b. **Type.** Enter a name that identifies the specific communication function (for example, Business Phone, Fax Phone, Email, Pager Phone, Mobile Phone, Cell Phone, or Website).
  - c. **Description.** Enter a descriptive phrase that defines the communication type (for example, Manager's Home Number, Personal Fax Number, or Company Website).
  - d. **Text Enabled.** (Available when the **Text Message Handling** application function under the **General** group is active and the selected Role is **Phone**.) Select to indicate this communication type supports delivery of text messages (for example, cell or mobile).
  - e. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing a Communication Type

1. Select the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Communication Types**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. Update the configuration and click **Save**.

#### Deleting a Communication Type

1. Select the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Communication Types**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Delete**.

## Configuring Company Types

### [Prerequisites for Company Types](#)

Company Types typically define a company as local, national, or international, but can be configured and used as any specific site requires.

### Adding Company Types

1. From the Administration menu, select **Client Relations**, select **Profile Management**, and then select **Company Types**.
2. Click **New** and complete the following.

- a. **Code:** Enter an alpha-numeric code for the company type
  - b. **Description:** Enter a description for the company type.
  - c. Click **Manage Translations** to add or update the travel agent type code and description translations.
  - d. **Sequence:** Enter an optional Sequence.
3. Click **Save** to save and exit, or click **Save and Continue** to save this travel agent type and add another.

### Editing Company Types

1. From the Administration menu, select **Client Relations**, select **Profile Management**, and then select **Company Types**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis.
4. Click **Edit**.
5. Update the configuration
6. Click **Save**.

### Deleting Company Types

1. From the Administration menu, select **Client Relations**, select **Profile Management**, and then select **Company Types**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis and click **Delete**.
4. Click **Delete** to confirm

## Prerequisites for Company Types

### OPERA Controls

**Group:** Profile

**Functions:** IATA Company type

## Configuring Forecast Types

A potential forecast type is a tag that can be attached to a prediction of the business activity and/or revenue expected from a client in specific revenue categories in a given period. For example, suppose you set up a TARGET forecast type. When you load the potential estimates for Company A using the Potential screen, you can specify that the TARGET forecast consists of an expected \$3500 in food and beverage revenue and \$9500 in room revenue generated by the client in a 3 month period. The Potential screen then enables you to compare the forecasted numbers with actual numbers for the period of interest.

### Adding a Forecast Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Forecast Types**.

2. Click **New** and complete the following fields:
  - a. **Code**: Enter a code for the forecast type (for example TARGET, F&B, ROOMS, and so on).
  - b. **Description**: Enter a description for the forecast type code.
  - c. **Manage Translations**: (Appears when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a Forecast Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Forecast Types**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis** and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting a Forecast Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Forecast Types**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Delete** to confirm.

## Configuring Frequency

The Frequency (that is, Potential Sales Frequency) feature enables Sales Managers to define the potential revenue and room nights expected of a client during specific periods of time, and, if applicable, for specific destinations. To monitor sales, use potentials as targets for comparison with the actual room nights and revenue generated from the client.

### Adding a Frequency Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Frequency**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code that represents the frequency (for example, D for daily, WKLY for weekly, MON monthly, and so on).

- b. **Description.** Enter a description for the frequency code (for example, Daily, Weekly, or Monthly).
  - c. **Manage Translations.** (Appears when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing a Frequency Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Frequency**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. Update the configuration and click **Save**.

#### Deleting a Frequency Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Frequency**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Delete**.

## Configuring Genders

### [Prerequisites for Configuring Genders](#)

Gender is selected in guest or contact profiles. Three genders are seeded on provisioning. You can configure additional genders as needed:

- M-Male
- F-Female
- U-Unknown

Gender can be selected in the following areas:

- [Guest and Contact Profile Identification](#)
- [Loyalty Enrollment](#)
- [Configuring Outbound Systems](#)
- [Configuring Interface Mapping](#)

### Adding Genders

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Genders**.
2. Click **New** and complete the following:
  - a. **Code**: Enter a code for the Gender Description.
  - b. **Description**: Enter a description for the Gender:
    - i. **Manage Translation**: Select to open the multi-language descriptions screen and configure a language translation for the description. (Available when the Multi-language OPERA Control is active.)
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing Genders

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Genders**.
2. Enter search criteria and click **Search**.
3. Select the code in the search result, click the vertical ellipsis **Actions** menu then select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Genders

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Genders**.
2. Enter search criteria and click **Search**.
3. Select the code in the search result, click the vertical ellipsis **Actions** menu, and select **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Configuring Genders

### OPERA Cloud Tasks

**Group**: Client Relations Admin

**Tasks**: Profile Management

- Genders
  - New/Edit Genders
  - Delete Gender

## Configuring Inactive Reasons

When a sales account (companies and agents) or a contact is set to an inactive status, a reason should also be selected to clearly state to users why the profile was set to inactive.

### Adding an Inactive Reason

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Inactive Reasons**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code that briefly describes the inactive reason.
  - b. **Description**. Enter a detailed description of the inactive reason.
  - c. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing an Inactive Reason

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Inactive Reasons**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. Update the configuration and click **Save**.

### Deleting an Inactive Reason

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Inactive Reasons**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Delete**.

## Configuring Keyword Types

### [Prerequisites for Keyword Types](#)

You can configure various keyword types and add multiple keywords to a profile (individual, company, agent, or source). You can enter these keywords when searching to make it easier to find a profile.

### Adding a Keyword Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Keyword Types**.

2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code that identifies the keyword type. This code appears within the Keyword Type list of values on the Profile screen.
  - b. **Description**. Enter the description of the keyword code.
  - c. **Manage Translations**. Select to translate the description into another language.
  - d. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - e. **Copy to Subsidiary Profile**. When this option is selected and a profile has an established Company Master to Company Subsidiary or Company Subsidiary to Company Master relationship, you are prompted to copy this keyword type to the profiles established within this relationship type. Deselecting this option does not prompt you to copy the keyword type/ keyword to the subsidiary profiles when this keyword type is added to a profile that has the Company Master relationship defined.
3. Click **Save** to save and exit or click **Save and Continue** to save this Keyword type and add another.

#### Editing a Keyword Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Keyword Types**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the **vertical ellipsis**.
5. Click **Edit**.
6. Update the configuration and click **Save**.

#### Deleting a Keyword Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Keyword Types**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the **vertical ellipsis**.

## Configuring Location Types

### Prerequisites for Configuring Location Types

A Location type is selected when redeeming an eCertificate. Use this option to configure the applicable locations.

### Adding Location Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Location Types**.
2. Click **New** and complete the following :
  - a. **Code**: Enter a code for the location type
  - b. **Description**: Enter a description for the location type
    - i. **Manage Translation**: Select to open the multi-language descriptions screen and configure a language translation for the description. (Available when the Multi-language OPERA Control is active.)
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing Location Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Location Types**.
2. Enter search criteria and click **Search**.
3. Select the code in the search result, then click the vertical ellipsis **Actions** menu then select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Location Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Location Types**.
2. Enter search criteria and click **Search**.
3. Select the code in the search result, then click the vertical ellipsis **Actions** menu then select **Delete**.
4. Click **Delete** to confirm.

## Configuring Mailing Action Codes

You can select mailing action codes in profiles and use this selection to identify the profiles you want to include in custom reports or exports.

### Adding Mailing Action Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Mailing Action Codes**.
2. Click **New** and enter the following details:
  - a. **Code:** Enter a code for the mailing action (for example, NY, XMAS, GIFT, EASTER, and so on).
  - b. **Description:** Enter a description for the mailing action code.
    - i. **Manage Translations:** (Appears when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - c. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to add another.

### Editing Mailing Action Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Mailing Action Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis** then click **Edit**.
4. Update the configuration..
5. Click **Save**.

### Deleting Mailing Action Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Mailing Action Codes**.

2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis** then click **Delete**.
4. Click **Delete** to confirm.

## Configuring Global (Mailing) Action Codes

You can assign [Mailing Action Codes](#) to identify profiles you want to include in custom reports or exports

Global Mailing Action Codes are applicable when the Property Action Codes OPERA Control is inactive.

When the Property Action Codes OPERA Control is active you need to configure property specific mailing codes . Refer to [Configuring Mailing Action Codes](#) .

### Adding Global (Mailing) Action Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management** and select **Global Action Codes**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the Global Mailing Action.
  - b. **Description**: Enter the name of the Global Mailing Action.
    - i. **Manage Translation**: Click to open the multi-language descriptions screen and configure a translated menu name for each language.
  - c. **Sequence**: Enter a sequence number that determines the position of this code in listings.
3. Click **Save**.

### Editing Global (Mailing) Action Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management** and select **Global Action Codes**.
2. Enter search criteria and click **Search**.
3. Select the Global Mailing Action Code, then click the **vertical ellipsis** and select **Edit**.
  - a. Update the configuration.
  - b. **Inactive**: Select check box to inactive the code.
4. Click **Save**.

### Deleting Global (Mailing) Action Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management** and select **Global Action Codes**.
2. Enter search criteria and click **Search**.
3. Select the Global Mailing Action Code, then click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** and confirm.

## Configuring Pay Days

### Prerequisites for Configuring Pay Days

Activation of the Payment Due Days OPERA Control gives you the ability to specify the number, 0-999, of payment due days for AR Accounts; a Pay Days list of values can be configured below to limit users to specific list of values. If payment due days are not configured then users can directly enter any numeric value (0-999) into the Payment Due Days field in [AR Account setup](#).

#### Note:

When the **Month End Calc.** check box is selected in AR Account setup , then the Payment Due Days value will be taken from the last day of the month for the bill generation date.

### Adding AR Payment Due Days

1. From the **Administration** menu, select **Client Relations**, select **Profile Management** and select **Pay Days**.
2. Click **New** and enter the following details:
  - a. **Code:** Enter a number for the Pay Day (between 1 and 999).
  - b. **Description:** Enter the name of the Pay Day.
    - i. **Manage Translation:** Click to open the multi-language descriptions screen and configure a translated description for each language.
  - c. **Sequence:** Enter a sequence number that determines the position of this code in listings.
3. Click **Save** or **Save and Continue** to add another.

### Editing AR Payment Due Days

1. From the **Administration** menu, select **Client Relations**, select **Profile Management** and select **Pay Days**.
2. Enter search criteria and click **Search**.
3. Select the Pay Days code, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting AR Payment Due Days

1. From the **Administration** menu, select **Client Relations**, select **Profile Management** and select **Pay Days**.
2. Enter search criteria and click **Search**.
3. Select the Pay Days code, then click the vertical ellipsis **Actions** menu and select **Delete**.

4. Click **Delete** and confirm.

## Prerequisites for Configuring Pay Days

## Preference Groups

Preference groups (or types) are used to categorize the various preferences saved to a profile. OPERA Cloud is pre-configured with preferences for room features, smoking, floor, specials, and (room) Key Options.

You can create additional preference groups (for example, pillow, music, newspaper) as well as the preferences associated with these preference groups.

It is also possible to define the number (quantity) of preferences that can be selected for a particular preference group. For example, only one smoking preference (either smoking or non-smoking) is logical but several newspaper preferences could be selected.

## Configuring Preference Groups

### Adding a Preference Group

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Preference Groups**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code to identify the preference group (for example, newspaper, flowers, pillows, and so on).
  - b. **Description.** Enter a description for the preference group.
  - c. **Quantity.** Enter the maximum number of items that may be selected when choosing preferences from the preference group.
  - d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - e. **Reservation.** Select to have this Preference Group and its preferences available when selecting the **Preferences** field on the Reservation screen. If any preferences with this selection are attached to a reservation, the user is prompted with the option to attach the preference to the profile.

3. Click **Save** to save and exit or click **Save and Continue** to save this Preference Group and add another.

#### Editing a Preference Group

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Preference Groups**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the **vertical ellipsis**.
5. Click **Edit**.
6. Update the configuration and click **Save**.

#### Deleting a Preference Group

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Preference Groups**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the **vertical ellipsis**.
5. Click **Delete**.

## Preferences

Preferences are saved on Guest profiles to inform staff of a guest's preferences for a variety of preference groups.

A guest's smoking, floor, and room feature preferences are populated to respective search fields during an available room search and room assignment for a reservation. This ensures guests are assigned rooms that match their preferences.

You can use Key Options to designate special access to hotel areas, such as Pool, Executive Level, and Gym. These Key Options appear on the Guest profile and you can include them in the room key encoding for the guest.

The following are examples of other property-defined preference groups and preferences that you might configure:

- A preference group for PILLOW could have preference codes for Feather, Hypoallergenic, Snoring, Memory Foam pillows, and so on.
- A preference group for NEWSPAPER could have preference codes for Financial Times, Local News, Wall Street Journal, and other newspapers available for delivery.
- A preference group for DIET could have preference codes for Vegan, Vegetarian, Paleo, Low Fat, Low Sodium, No Dairy, and so on.

## Configuring Preference Codes

### Note:

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Preferences are created by selecting the **Template** tab. You can setup preferences to be available in all properties by selecting the **Global** check box. Or once created, you can copy Preferences to specific properties using the **Copy** action. For more information, see [Copying Configuration Codes to Multiple Properties](#).

### Adding a Preference Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Preferences**.
2. Click **New** and complete the following fields:
  - a. **Property**: Enter or search for and select a property.
  - b. **Preference Groups**: Select the preference groups from the list of values. For more information, see [Preference Groups](#)
  - c. **Code**: Enter a code that identifies the preference item in the preference group (for example, a preference group for Room Features could have preference codes for Corner room, Jacuzzi tub, Pool view, Ocean view, and Balcony).
  - d. **Description**: Enter a description of the preference.
  - e. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - f. **Global**: Select the check box to make the preference available in all properties. Available in the template tab from a Hub location.
3. Click **Save** to save and exit or click **Save and Continue** to save this Preference code and add another.

### Editing a Preference Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Preferences**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the vertical ellipsis **Actions** menu, and click **Edit**.
5. Update the configuration.
6. Click **Save**.

### Deleting a Preference Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Preferences**.

2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the vertical ellipsis **Actions** menu, and click **Delete**.
5. Click **Delete** to confirm.

## Profile Name Validations

### Prerequisites for Profile Name Validations

Using Profile Name Validations you can specify a profile type and enter a name string which OPERA Cloud will validate each time a new profile is created. The validation rules configured ensure the name string matches the profile type and prevents the incorrect assignment of Companies as Agents, Companies as Guests, Travel Agents as Companies and so on.

For example,

- Profile Type = Company
- Name String = <Company Profile Name>

When the **New** action is selected on the Profile Search screen, entering the <Company Profile Name> and selecting the Guest profile type results in OPERA Cloud prompting the following warning: "Profile Type for this profile should be Company. Do you want to continue?" If you select Yes, the Guest Profile screen appears and if you select No, you remain on the Profile Search screen.

## Prerequisites for Profile Name Validations

### OPERA Controls

**Group:** Profile

**Parameters:** Profile Name Validations

### OPERA Cloud Tasks

- Profile Management
- Profile Name Validations
  - New/Edit Profile Name Validations
  - Delete Profile Name Validations

## Configuring Profile Name Validations

### Adding a Profile Name Validation Rule

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Profile Name Validations**.
2. Click **New** and enter the following details:
  - a. **Type:** Select a profile type: **Company**, **Source**, or **Travel Agent**.

- b. **Name:**Type the name string to use. You can configure partial name string matches by using the % symbol along with the partial name. For example:
  - i. %Oracle — Based on the Profile type selected, compares the profile names that end with “Oracle” for the selected profile type. If the Profile Type does not match, then the message prompt about mismatched profile types appears.
  - ii. Oracle% — Based on the Profile Type selected, compares the profile name string that starts with “Oracle” for the selected profile type. If the Profile Type does not match, then the message prompt about mismatched profile types appears.
  - iii. %Oracle% — Based on the Profile Type selected, compares the profile name string that includes the word “Oracle” for the selected profile type. If the Profile Type does not match, then the message prompt about mismatched profile types appears.
3. Click **Save** to save and exit or click **Save and Continue** to save and add another.

#### Editing a Profile Name Validation Rule

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Profile Name Validations**.
2. Enter search criteria and click **Search**.
3. In the search results, select the rule and click the **vertical ellipsis** and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting a Profile Name Validation Rule

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Profile Name Validations**.
2. Enter search criteria and click **Search**.
3. In the search results, select the rule and click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Profile Protection

### Prerequisites for Profile Protection

Profile protection is used to protect certain profile fields from being changed by users when the profile is subscribed with an external system. When the Profile Protection (Method) OPERA Control is set to **By Profile** a Protected check box is enabled in the Profile Overview panel in Profile Presentation, which must be selected to enable protection of the subscribed profile. When the Profile Protection (Method) OPERA Control is set to **By Profile Type** the protection rules apply to all subscribed profiles of the profile type.

The Override Profile Protection user tasks then allows users to override the protection rules when updating profiles.

### Editing Profile Protection

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Profile Protection**.

This screen shows the Screen / Field Name and the Profile Type (**Company, Contact, Group, Guest, Source, and Travel Agent**). The icons show whether the screen/field is protected, partially protected, or not applicable.

2. Click **Edit**.
3. Select/deselect the check boxes for the appropriate screens/fields to protect them from being changed for each profile type.
4. Click **Save**.

## Prerequisites for Profile Protection

### OPERA Controls

**Group:** Profile

**Functions:** Profile Protect

**Setting:** Profile Protection (Method)

### OPERA Cloud Tasks

- Profile Protection

## Relationships

### Prerequisites for Relationships

You can set up standard affiliations between profile types that can then be selected, much like templates, when setting up relationships for profiles. When setting up relationships for a specific profile, only the relationship types you configure which involve that profile type are available for selection. A common relationship would be one that exists between a parent company (profile type company) and a subsidiary company (profile type company). Another common relationship is employer (profile type company) and an employee (profile type guest or contact).

#### Note:

OPERA Cloud is pre-configured with master-sub relationship types for Company, Travel Agent, and Source profile types.

Relationships can be used to facilitate rate sharing and for more meaningful financial and statistical reporting. For example, you might want to share negotiated rates created for a parent company with all the subsidiaries of the company. Or you might want to report on total revenues associated with all subsidiaries of a company rather than on each subsidiary separately. Relationships enable you to do these things.

When setting up relationship types, you must define both sides of the relationship — the "from" side and the "to" side. It is sometimes helpful to think in terms of statements such as "Company X (a company profile) is the employer of Guest Y (an individual profile)." The left component of this relationship (company) is the From side. The right

component (individual) is the To side. Once this relationship type has been configured, when you open the profile for "GUEST" (an individual type profile) and select the **Relationships details** link, you are able to set up an employee/employer relationship for GUEST with a company you choose from the Company profiles.

It is important to keep in mind that relationship configuration is designed to not accept duplicate values between From Relationship Type and To Relationship Type and the From Description and To Description. For example, when COMPANY has been used once in either From Relationship Type or To Relationship Type, it cannot be used again for either of these two fields for any new relationship. The same applies to the From Description and To Description.

## Prerequisites for Relationships

### OPERA Controls

**Group:** Profile

**Parameters:** Relationships

**Parameter:** Relationships Rate Inherit

### OPERA Cloud Tasks

**Group:** Client Relations Admin

**Tasks:**

- Relationships
  - New/Edit Relationships
  - Delete Relationships

## Configuring Relationships

### Adding a Relationship

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Relationships**.
2. Click **New** and complete the following fields:
  - a. **From Relationship Type.** Select the profile type of the "from" component of the relationship.
  - b. **Code.** Enter a code that briefly describes the "from" component of the relationship.
  - c. **Description.** Enter a detailed description of the "from" component of the relationship (for example, employer, parent company, and so on).
  - d. **To Relationship Type.** Select the profile type of the "to" component of the relationship.
  - e. **Code.** Enter a code that briefly describes the "to" component of the relationship.
  - f. **Description.** Enter a detailed description of the "to" component of the relationship (for example, employer, parent company, and so on).
  - g. **Link Type.** Choose from the following options for the relationship link type:

- i. **Default.** Select to indicate the relationship is the default relationship, or primary relationship, when these two profile types are part of a relationship. Only one primary relationship type is allowed for any relationship types that involve the same two profile types.
- ii. **Global.** Select to indicate the relationship type is global or available to all properties in the cluster. Global relationships are exchanged and synchronized among remote properties via OXI and must be centrally defined and managed. Global relationships can be viewed but not changed on the property level.
- iii. **Has Hierarchy.** Select to indicate the relationship type is hierarchical. Hierarchical relationships apply (and are the default) when company, travel agent, and source profile types are involved in the relationship. When you create a relationship and assign a hierarchical relationship type to it, the **Hierarchy** button is available on the Profile Relationships screen. The Hierarchy shows the current profile's hierarchical position in a "tree view" style diagram. If another account is selected from the diagram, Hierarchical relationships enable you to build multi-level relationships such as master, sub1, sub2, and so on.

Non-hierarchical relationships support only one level (for example, Partner or Spouse). Non-hierarchical relationships are mainly used on individual profiles.

- h. **Rate.** Select an option if negotiated rates are shared between the profiles linked with this relationship type. (Available when the Negotiated Rates and Relationships Rate Inherit OPERA Controls are active).

3. Click **Save**.

#### Editing a Relationship

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Relationships**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Click **Edit**.
5. Update the configuration.
6. Click **Save**.

#### Deleting a Relationship

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Relationships**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Restriction Reasons

### Prerequisites for Restriction Reasons

When a profile is set to a restricted status, you should also select a reason to make it clear to all users why the profile was set to restricted.

### Adding a Restriction Reason

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Restriction Reasons**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter the code for the restriction reason.
  - b. **Description**. Enter a description for the restriction reason.
  - c. **Manage Translations**. (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the restriction reason.
  - d. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a Restriction Reason

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Restriction Reasons**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. Update the configuration and click **Save**.

### Deleting a Restriction Reason

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Restriction Reasons**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Delete**.

## Sales Information

### Prerequisites for Sales Information

Sales information can be provided on the Sales Information panel in Company, Travel Agent, Source, and Contact profiles. This information can assist Sales Managers in decision making and can be used in filters when generating sales reports.

The following types of sales information are available:

- **Priorities** — Business importance of the account or contact.
- **Business Potential** — Importance of the account in drawing accommodations business.
- **Competition Codes** — Your business competition for this account.
- **Influence Codes** — For contacts only. The influence the contact has in the decision-making process.
- **Scopes** — Broad geographical areas where the account or contact generates business.
- **Scope & Cities** — Cities where the account or contact generates business.
- **Sources** — Origin of the account (for example, media ad, website, and so on).
- **Territories** — Sales territory to which the account or contact is assigned.

## Configuring Account Priorities

Account Priorities enable you to specify the priority of the sales account. For more information, see [Managing Sales Information](#)

### Adding a Priority Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Account Priorities**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter a code for the priority (for example, H for High, L for Low, and so on).
  - b. **Description**: Enter a description for the priority code.
    - i. **Manage Translations**: (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** or click **Save and Continue** to save this code and add another.

### Editing a Priority Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Account Priorities**.

2. Enter search criteria and click **Search**.
3. In the search results, select the code then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
  - a. **Inactive**. Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
5. Click **Save**.

#### Deleting a Priority Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Account Priorities**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code then click the vertical ellipsis **Actions** menu and select **Delete**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete** to confirm.

## Configuring Business Potential

Use the business potential to categorize an account's ability to produce revenue at your property. The business potential of an account is an estimate and can be changed throughout the life of the account profile.

#### Adding a Business Potential Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Business Potential**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code for the potential (for example, 10K for \$10,000-\$10,999).
  - b. **Description**. Enter a description for the business potential code.
  - c. **Manage Translations**. (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a Business Potential Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Business Potential**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. **Inactive**. Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
6. Update the configuration and click **Save**.

### Deleting a Business Potential Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Business Potential**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Configuring Competition Codes

Competition codes enables you to identify other hospitality businesses that are competing with you for an account's business opportunities.

### Adding a Competition Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Competition Codes**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code for the competitor.
  - b. **Description**. Enter a detailed description (name) of the competitor.
  - c. **Manage Translations**. (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a Competition Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Competition Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. **Inactive**. Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
6. Update the configuration and click **Save**.

### Deleting a Competition Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Competition Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Configuring Influence Codes

Influence codes can be associated with contact profiles to indicate the impact a contact has on purchase decisions involving your property's offerings.

### Adding an Influence Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Influence Codes**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code for the level of influence (for example, DEC for the decision maker, NEG for negotiator, and so on).
  - b. **Description**. Enter a detailed description of the influence code.
  - c. **Manage Translations**. (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing an Influence Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Influence Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. **Inactive**. Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
6. Update the configuration and click **Save**.

### Deleting an Influence Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Influence Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Configuring a Scope

A scope indicates the region where a contact or account's business originates. Many accounts and contacts do not draw their business locally, but rather from another city, region, or even another country. Define scopes as regions or areas that are as specific or general as necessary.

### Adding a Scope

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Scope**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code that briefly describes the scope (for example, UK for the United Kingdom, EUR for Europe, and so on).
  - b. **Description**. Enter a detailed description of the scope.
  - c. **Manage Translations**. (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.

3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a Scope

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Scope**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. **Inactive**. Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
6. Update the configuration and click **Save**.

### Deleting a Scope

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Scope**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Configuring a Scope City

The scope city is the city where the contact or account's headquarters is located or the city where one of your properties is located that the contact or account frequently uses.

### Adding a Scope City

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Scope City**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code that briefly describes the scope city (for example, NYC for New York, MADRID for Madrid, and so on).
  - b. **Description**. Enter a detailed description of the scope city.
  - c. **Manage Translations**. (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.

- d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a Scope City

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Scope City**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. **Inactive.** Select to mark the code inactive. Inactive market codes are not available for selection from market lists in OPERA Cloud. The code remains for historical, statistical purposes only.
6. Update the configuration and click **Save**.

### Deleting a Scope City

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Scope City**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Configuring Sources

A source indicates how you came to acquire an account. For example, through an advertisement, a website, a referral, and so on.

### Adding a Source

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Sources**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code that briefly describes the source (for example, WEB for web site, TS for trade show, CC for cold call, REF for referral, and so on).
  - b. **Description.** Enter a detailed description of the source.
  - c. **Manage Translations.** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.

- d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a Source

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Sources**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. **Inactive.** Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
6. Update the configuration and click **Save**.

### Deleting a Source

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Sources**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Configuring Territories

Territories are the geographical sales areas where accounts and contacts are located and you can use them as filters in preparing sales reports.

### Adding a Territory

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Territories**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code that briefly describes the territory (for example, NA for North America, AU for Australia, and so on).
  - b. **Description.** Enter a detailed description of the territory.
  - c. **Manage Translations.** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.

- d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a Territory

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Territories**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. **Inactive.** Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
6. Update the configuration and click **Save**.

### Deleting a Territory

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Territories**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Configuring Industry Codes

### Prerequisites for Configuring Industry Codes

Use industry codes to identify the core business of a sales account. Industry codes are referenced on the [Profile Productivity Statistics](#) report in PMS.

### Adding an Industry Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Industry Codes**.
2. Click **New** and complete the following fields:
  - a. **Code:** Enter a code that briefly describes the industry code (for example, HC for health care, FIN for finance, ENT for entertainment, TECH for technology, and so on).
  - b. **Description:** Enter a detailed description of the industry code.
  - c. **Manage Translations:** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.

- d. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing an Industry Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Industry Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. **Inactive:** Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
4. Update the configuration and click **Save**.

#### Deleting an Industry Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Industry Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu and select **Delete**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Prerequisites for Configuring Industry Codes

### OPERA Cloud Tasks

**Group:** Client Relations Admin

**Tasks:** Industry Codes

- New/Edit Industry Codes
- Delete Industry Codes

## Titles

Guest and Contact profiles have a field for the person's Title (for example, Mr, Mrs, Herr, Dr, and so on) The titles available for selection when you open the list of values depends on the language selected in the Language field. For example, if you select E for the English language, the available titles might be Mr, Mrs, or Ms. If you select F for

French language, the available titles might be Mlle, Mm, or M. Additionally, when you select the title, a default salutation for guests having that title populates the Salutation field. For example, if you select the title "Mr" for Michael Summers, the default salutation might be "Dear Mr Summers." The default salutation text can be edited directly in the Salutation field.

## Advanced Titles

### Prerequisites for Advanced Titles

You can define and configure several different title suffixes for the same title and language by using the Advanced Title feature.

The advanced title feature meets the needs of certain countries, such as Germany, where a social title, such as Herr, might be combined with a professional title, such as Doctor.

The following are examples of how the Advanced Title arrangement might be used:

- The salutation of a confirmation letter, such as "Herr Dr. Bernd Barysch"
- An address where the Title (Herr) appears on a separate line

On the Manage Profile screen in the Title Number field, enter a number that identifies the unique combination of Title Code, Description, and Language. You cannot insert the same Title Code more than once without a Title Suffix. However, you can create as many descriptions and envelope greetings as necessary for the same Title Code and Language Code. Using German as an example, you can create several Title Codes = Herr and Language Codes = DE and each Title Code/ Language Code can have an envelope greeting. Each combination of Title Code and Description must have a unique Title Suffix number that identifies it. For example:

- A Title code of Herr with a Title Suffix of 1 could have the Description containing the title of Herr with an envelope greeting, such as Herr Doctor with merge codes <FIRSTNAME> <LASTNAME>.
- The same Title code of Herr could have a Title Suffix of 2 with the Description of Herr with merge codes <FIRSTNAME><LASTNAME> (without a professional title).
- Additionally, the same Title Code of Herr could have a Title Suffix of 3 with the Description of Herr Professor and merge codes <FIRSTNAME><LASTNAME>.

When Advanced Title = N, you can configure the following titles:

**Table 15-1 Advanced Title = N**

Title Code	Description (Salutation)	Language Code
MR	Mr.<LAST NAME>	E
MR	Mr.<LAST NAME>	E

When Advanced Title = Y, you must assign a Title Suffix to duplicate titles:

Table 15-2 Advanced Title = Y

Title Code	Description (Salutation)	Language Code	Title Suffix
MR	Mr.<LAST NAME>	E	21
MR	Mr.<LAST NAME>	E	22
MR	Mr.<LAST NAME>	E	23

## Prerequisites for Advanced Titles

### OPERA Controls

**Group:** Profile

**Parameters:** Advanced Title

## Configuring Titles

### Adding a Title

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Titles**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter the code that identifies the title (for example, Mr, Ms, Mrs, Capt, Rev, Hon, and so on).
  - b. **Language.** Select the code to be associated with this title. All titles associated with a specified language code are available for selection when that language is chosen in the Language field on the guest Profile screen. The selected language is the language you use to exchange correspondence with the guest or contact rather than the guest's native language.
  - c. **Title Number** (Advanced Title only). Enter a unique number that identifies the unique combination of Title Code, Description, and Language.
  - d. **Salutation.** Enter the default salutation to be populated for the title. The salutation may include merge codes for variable information such as the guest's first name <FIRSTNAME> and last name <LASTNAME> (for example, Dear Mr <LASTNAME>, Monsieur <FIRSTNAME> <LASTNAME>, or Estimada Señora <LASTNAME>).
  - e. **Envelope Greeting / Business Title.** (When the Advanced Title application parameter is active, Envelope Greeting appears as the label. When Advanced Title is not active, Business Title appears as the label.) This field identifies the name of the envelope greeting or business title to be used along with the social title, such as Doctor. When this field is populated, the envelope greeting or business title appears in the Titles screen at the Profile Screen. This

ensures the correct envelope or business title and code are entered when creating or selecting a profile.

- f. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this Title and add another.

### Editing a Title

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Titles**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the **vertical ellipsis**.
5. Click **Edit**.
6. Update the configuration and click **Save**.

### Deleting a Title

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Titles**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the **vertical ellipsis**.
5. Click **Delete**.

## Configuring Travel Agent Types

### Prerequisites for Travel Agent Types

Travel Agent Types indicate whether a travel agent requires a commission, is a local, national, or international travel agent, or has any other classifications.

### Adding a Travel Agent Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Travel Agent Types**.
2. Click **New** and enter the following details:
  - a. **Code:** Enter an alpha-numeric
  - b. **Description:** Enter a description.
  - c. **Sequence :** Select an optional sequence number indicating the code's order of appearance in a list.
3. Click **Manage Translations** to add or update travel agent type code and description translations.
4. Click **Save** to save, or click **Save and Continue** to save this travel agent type and add another.

### Editing a Travel Agent Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Travel Agent Types**.
2. Enter search criteria, click **Search**.
3. Click the **Vertical Ellipsis**, select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting a Travel Agent Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Travel Agent Types**.
2. Enter search criteria, click **Search**.
3. Click the **Vertical Ellipsis**, select **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Travel Agent Types

### OPERA Controls

**Group:** Profile

**Function:** IATA Company Type

## VIP Levels

### Prerequisites for VIP Levels

OPERA Cloud provides the ability to define different VIP levels for your guests. Throughout the application, guests and their associated reservation may be filtered using the VIP code assigned. Many reports also offer the ability to filter guests and their reservation data based on VIP levels.

Some common uses of VIP levels are to easily view VIP arrivals and departures or VIP guests in house. VIP codes can also be referenced when configuring global alerts to display alerts to the staff of guests who require or deserve special attention.

VIP status is usually used to identify regular guests, celebrities, royalty, hotel owners, loyalty club members, and important corporate guests. Regular (non-VIP) guests would not have a value in the VIP field.

When the **Reservation Color Definition** OPERA Controls is set to **VIP Levels**, the color assigned to the VIP level of the linked guest profile appears on Reservation Search, Reservation Presentation (Business Card and Stay Details) and Room Assignment.

In multi-property operations, the VIP code configuration is global for all properties.

## Prerequisites for VIP Levels

### OPERA Controls

**Group:** Profiles

**Functions:** VIP

## Configuring VIP Levels

### Adding a VIP Level

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **VIP Levels**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code that briefly describes the VIP level.
  - b. **Description.** Enter a detailed description of the VIP level.
  - c. **Manage Translations.** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - e. **Display Color.** Assign a color to the VIP level.
  - f. **Rank:** Enter a number that would prioritize the VIP tier assignment of a reservation when competing with other tier reservations. Rank in VIP Levels is incorporated for guest importance. The Rank is not mandatory, can have duplicates and non-sequential. 1 is considered the highest rank. (Available when the AI Room Assignment OPERA Control is active)
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a VIP Level

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **VIP Levels**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. Update the configuration and click **Save**.

### Deleting a VIP Level

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **VIP Levels**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

4. Click **Delete**.

## Configuring Credit Ratings

### Prerequisites for Configuring Credit Ratings

You can set different levels of credit ratings for Company, Source, and Travel Agent profiles. You can use the credit ratings as criteria when configuring deposit/cancellation rule schedules for reservations and business blocks attached to the profile. This enables both guests and travel agents or bookers who make reservations with the property to have these cancellation and deposit rules applied based on the credit rating indicated on their profile. For more information, see [Booking Rules and Schedules](#).

### Adding Credit Ratings

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Credit Ratings**.
2. Click **New** and complete the following :
  - a. **Code**: Enter a code for the credit rating
  - b. **Description**: Enter a description for the credit rating
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing Credit Ratings

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Credit Ratings**.
2. Enter search criteria and click **Search**.
3. Select the code in the search result, then click the vertical ellipsis **Actions** menu then select **Edit**.
4. Update the configuration.
5. **Inactive**: Select check box to update the code as inactive.
6. Click **Save**.

### Deleting Credit Ratings

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Credit Ratings**.
2. Enter search criteria and click **Search**.
3. Select the code in the search result, then click the vertical ellipsis **Actions** menu then select **Delete**.
4. Click **Delete** to confirm.

## Configuring Business Events

Business Events are required in OPERA Cloud to trigger and send messages to the external systems configured at your property. Business Events are configured according to the types of data the external system supports and requires. Unique business events and data elements are defined for each external system, external database and module combination. When a user performs an action in OPERA Cloud that involves that selected data elements and conditions (optional), a business event is triggered which then becomes a message to the external system.

For example, if an external system requires reservations and profiles data you need to configure reservation and profile business events. If an external system requires rates and inventory data you need to configure business events for rates and inventory, and so forth.

There are three levels to Business Event setup.

1. The Business Event Modules (Activity, Availability, Block, Block Offsets, Cashiering, Catering Notes, Configuration, Enrollment, Housekeeping, Night Audit, Owner Contract, Profile, Rate, Reservation, and Stay Records.)
2. Within each module there are the actual Business Events (Action Types) that can be subscribed to- New Reservation, Update Reservation, New Profile, etc.
3. Finally, there are Data Elements corresponding to each Action Type- Room Type, Rate Code, name , etc.

The Business Events generated are based on a customizable configuration that the business event user determines. The result is a user-configurable flow of data that is available to third parties to extract (dequeue) from OPERA Cloud on a regular basis.

### Note:

Business Events subscribed to with no Data Elements attached will generate an XML message with header information only for the Business Event. It is imperative that third party systems carefully consider this before programming their dequeue process from OPERA Cloud. It is highly suggested that the third party dequeue application is programmed to ignore Modules/Business Events (Action Types)/ Data Elements that the hotel may subscribe to but that the data recipient does not recognize. In this way, you can insure an uninterrupted process of data flow.

### Adding Business Events

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **Business Event Configuration**.

2. Click **New** and enter the following details:
  - a. **Property**. Enter or select the property
  - b. **External System**. Select the external system from the list. See [Configuring External Systems](#)
  - c. **Module**. Select the module from the list
  - d. **Business Event**. Select the business event from the list
  - e. Data Elements to generate a Business Event when any of the data element values are changed in OPERA Cloud.
    - i. Search and select data elements in the **Available** panel, click > or >> to move selection to the **Selected** panel.
  - f. Conditions (where clause)
    - i. Click **Add** to add a conditional expression.
      - **And/Or**. Displays for compound expressions; select AND / OR operator.
      - **Attribute**. Select an attribute from the list.
      - **Operator**. Select an operator from the list.
      - **Value**. Enter the comparison value for the expression.
    - ii. Click **OK**.
    - iii. Repeat to add another condition.
  - g. To Edit, select a condition and click **Edit**.
  - h. To Delete, select a condition and click **Delete**.
3. Click **Save**.

#### Editing Business Events

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **External Systems**.
2. Enter search criteria and click **Search**.
3. Select the business event, click **vertical ellipsis** and select **Edit**.
4. Update details.
5. Click **Save**.

#### Deleting Business Events

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **Business Event Configuration**.
2. Enter search criteria and click **Search**.
3. Select the business event, click **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Business Events - Activity

The following table outlines the action types, data elements, data types and XML tag names within this OPERA Cloud Business Events module.

Action Type	Data Element	Data Type	XML Tag

	HOTEL ROOMS SOLD	N	HotelRoomsSold	
	OUT OF ORDER	N	OutOfOrder	This does not include Out of Service Rooms.
	OVERBOOKING	N	Overbooking	
PHYSICAL ROOMS	N	PhysicalRooms	In the case of Suites: An availability business event for each of the room types making up the component suite will be generated. As there is no physical inventory attached to the component suite - physical rooms could never be determined.	

Action Type	Data Element	Data Type	XML Tag	Description
	ROOM TYPE	C	RoomType	Pseudo Room Types: Not generated for Pseudo=Y, Generic Flag = Y or Inactive = Y Component Suites: An availability business event for each of the room types that make up the component suite will be created. For example: If a suite is made up of three room types - three room type availability messages would be generated. Discontinued Room Types: Inactive Room Types are not included in the business event synchronization. Enhancement request added for a future version to consider inactive date for business event synchronization.
	SOLD ROOMS	N	SoldRooms	Number of rooms that have been reserved.

	WHOLESALER_NAME_ID	N	Wholesaler_Name_Id	

## Configuring External Systems

### Prerequisites for Configuring External Systems

External Systems configuration defines the external systems integrated with OPERA Cloud. All validated partner solutions exist as External Systems to activate, configure and establish 2-way communication with OPERA Cloud

Additionally, you can define a new External Systems for any ad-hoc requirements to generate Business Events and share with an external system. Change your [location](#) to setup external systems for each property.

Once configured, user activity in OPERA Cloud triggers creation of business event XML messages for dequeue by external systems via OPERA Exchange integrations.

A Publisher is available to external systems to receive messages originating from another external system. To receive messages for events that originate outside OPERA Cloud, this relationship must be established. For example: If your property has two external systems: Yield System (YS) and Central Reservations (CRS), you can set up a relationship between these two external systems:

- If the yield system would like to receive Reservation Business Events that are generated from both OPERA Cloud and the CRS system. The Publisher would then be set on the YS External System to receive the generated business events from the CRS external system.
- If the CRS would like to receive Business Event messages when the Yield System sets restrictions or hurdle rates, the Publisher would be setup on the CRS External System to receive the generated Business Events from YS external system.

### Adding an External System

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **External Systems**.
2. Click **New** and enter the following details:
  - a. **Property**: Enter or select the property
  - b. **Code**: Enter a code for the external system.
  - c. **Description**: Enter a name of the external system.
  - d. **External URI**: This HTNG features is equivalent to the URN that will be sent to OPERA Cloud from an external HTNG vendor .
  - e. **Sequence**: Specify sequence in which the external system will display in the External Systems list.
  - f. **Lookup**: Click to enable if the external system supports profile lookup.
  - g. Additional Details:
    - i. **Property**: Enter or select the property.
    - ii. **Active**: Click to activate.
    - iii. To delete details, click vertical ellipsis and select **Delete**, click **Delete** to confirm.
3. Click **Save**.

### Editing an External System

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **External Systems**.
2. Enter search criteria and click **Search**.
3. Select the external system, click the vertical ellipsis **Actions** and select **Edit**.
4. Update details.

5. To delete Additional Details, click the vertical ellipsis **Actions** menu and select **Delete**, click **Delete** to confirm.
6. Click **Save**.

### Deleting an External System

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **External Systems**.
2. Enter search criteria and click **Search**.
3. Select the external system, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

### Managing External System Publishers

Defines a list of subscribers (external system and property) who want to receive ongoing messages from the OPERA Cloud Business Events module.

#### Adding Publisher

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **External Systems**.
2. Enter search criteria and click **Search**.
3. Select the external system, click **vertical ellipsis** and select **Publisher**.
4. Click **New**.
  - a. **Publisher**: Select an external system from the list.
  - b. **Property**: Enter or select a property.
5. Click **Save**.

#### Deleting Publisher

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **External Systems**.
2. Enter search criteria and click **Search**.
3. Select the external system, click **vertical ellipsis** and select **Publisher**.
4. Select the publisher, click the **vertical ellipsis** and select **Delete**.
5. Click **Delete** to confirm.

## Prerequisites for Configuring External Systems

### OPERA Cloud Tasks

**Group:** Interface Admin

**Tasks:** Property Interfaces

- External Systems
  - New/Edit External Systems
  - Delete External Systems

# Channel Configuration

Third parties are used to sell inventory and include travel agents on a global distribution system (GDS) and internet hotel booking portals on an alternate distribution system (ADS). You must configure these channels and create distribution templates, template types, and total pricing elements.

- **Channel Setup:** This enables the hotel and channel to process transactions. Setup includes creating a code and description of the channel. You can identify the channel type, rates, room types, rate categories, rate levels, sub-channels, and error codes associated with the channel.
- **Distribution Templates:** These publish a rate to all channels configured in the rate code template. You can create templates at the chain or property level.
- **Template Type:** Use this to create a template type code and template description, then use the template type code when configuring Distribution Templates.
- **Total Pricing Elements:** These associate taxes or service fees with transaction codes. Total Pricing Elements provide channels and other reservation sources with a more detailed breakdown of charges.

## Configuring Channel Setup

The Channels Setup lets you configure the various channels used to sell a property's inventory through third parties.

### Adding Channel Setup

1. From the **Administration** menu, select **Interfaces**, select **Channel Configuration**, and select **Channel Setup**.
2. Click **New** and complete the following:
  - a. **Code.** Enter an external system code for the channel.
  - b. **Description.** Enter a description for the channel.
  - c. **Type.** Select a channel type from the list. Channel types include: ADS, GDS, ODS, ON BEHALF, SWITCH, OWS, or WEB.
  - d. **Sell Method.** Select a sell method from the list that the channel type supports.
  - e. **Add-on License (subscription).** Select the subscription in place at your property. This is available to only channel type = ADS.
3. Click **Save**.

### Editing Channel Setup

1. From the **Administration** menu, select **Interfaces**, select **Channel Configuration**, and select **Channel Setup**.
2. Enter search criteria and click **Search**.
3. In the search results, select the **Channel**, click the vertical ellipsis **Actions** menu, and select **Edit**.
4. **Channel Details:**

- a. Select **Edit** and complete the following:
    - i. **Description**. Enter a description for the channel.
    - ii. **Sell Method**. Select a sell method from the list. Only rate types that the channel type supports are displayed.
    - iii. **Web site URL**. Enter the website URL.
    - iv. **Inactive**. Select the check box to inactivate the channel.
  - b. Click **Save**.
5. **Error Codes**.
  - a. Click **New** and complete the following:
    - i. **Code**. Create a code.
    - ii. **Description**. Briefly describe the new code.
    - iii. **Type**. Select a channel Type from the drop-down menu.
    - iv. **Sell Method**. Select a Sell Method from the drop-down menu.
  - b. Click **Save**.
6. **Room Types**. Add all of the room types to sell through the channel to this list. The room type base table also prevents accidental creation and duplication of room types that are to be sold.
  - a. Click **New** and complete the following:
    - i. **Ch. Room Type**. The channel room type.
    - ii. **Description**. A description of the channel room type.
    - iii. **Inactive Date**. The inactive date of the room type.
  - b. Click **Save**.
7. **Sub-Channels**.
  - a. Click **New** and complete the following:
    - i. **Sub-Channel**. Enter a sub-channel.
    - ii. **Use Sub-Channel Mapping**. Select the check box to use sub-channel mapping.
    - iii. **Inactive**. Select to make the sub-channel inactive.
  - b. Click **Save**.
8. **Rate Categories**.
  - a. Click **New** and complete the following:
    - i. **Rate Category**. Enter a rate category.
    - ii. **Description**. Enter a description.
    - iii. **Negotiated**. Select if it is configured to use for negotiated rates.
    - iv. **Inactive**. Select to make the rate category inactive.
  - b. Click **Save**.
9. **Rate Levels**.
  - a. Click **New** and complete the following:
    - i. **Rate Level**. Enter a rate level.

- ii. **Description.** Enter a description.
- b. Click **Save**.

## Configuring Channel Distribution Templates

Use the Channel Distribution screen to publish a rate that is highlighted on the Rate Header screen to all channels configured in the rate code template.

### Adding Channel Distribution Templates

1. From the **Administration** menu, select **Interfaces**, select **Channel Configuration**, and select **Distribution Template**.
2. Click **New** and complete the following:
  - a. **Location Type.** Select **Chain** to configure for a chain; select **Property** to configure for the property.
  - b. **Code.** Enter a code.
  - c. **Description.** Enter a description.
  - d. **Type.** Select a type from the list.
  - e. **Sequence.** Enter a display sequence number.
  - f. **Negotiated Rate.** Select check box.
  - g. **Attached Channel Distributions.**
    - i. Click **New** and complete the following:
      - i. **Channel.** Select a channel from the list.
      - ii. **Channel Rate Code.** Enter a rate code.
      - iii. **Rate Category.** Select a rate category from the list.
      - iv. **Regional Availability.** Select the check box if the rate will participate in Regional Availability processing.
    - ii. Click **Save**.
3. Click **Save**.

### Editing Channel Distribution Templates

1. From the **Administration** menu, select **Interfaces**, select **Channel Configuration**, and select **Distribution Template**.
2. Enter search criteria and click **Search**.
3. Select a **template** in the search results, click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update details.
5. Select the **Inactive** check box to inactivate the template.
6. Click **Save**.

### Deleting Channel Distribution Templates

1. From the **Administration** menu, select **Interfaces**, select **Channel Configuration**, and select **Distribution Template**.

2. Enter search criteria and click **Search**.
3. Select a **template** in the search results, click the vertical ellipsis **Actions** menu, and select **Delete**.
4. Click **Delete** to confirm.

## Mapping Total Pricing Elements to Channels

Mapping total pricing elements classifies channel pricing elements as either a tax or a service fee when associated with a transaction code.

1. From the **Administration** Navigation Bar, select **Interfaces, Channel Configuration**, and then select **Total Pricing Elements**.
2. Click **New**.
3. Select either **Tax** or **Service Fee**. This classifies the element as either a tax or a service fee when associated with a transaction code. Your selection determines the available choices in the Element Code field.
4. Select a **Property** name.
5. Select the **Transaction Code** you wish to map.
6. Select the **Element Code** that best describes the pricing element.
7. Click **Save**.

## Channel Controls

Channel Controls provide the ability to customize Channel functionality to your specific needs. You can do this by activating or deactivating Functions, turning Parameters on or off, and selecting values for Settings.

### Channel Controls — ARI Upload

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Interfaces for Channel Controls.

**Table 16-1 Channel Controls — ARI Upload Parameters**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>BLOCK CODE USED BY EXTERNAL CHANNEL BLOCK</b> [BLOCKCODEUSED BYEXTERNALCHANNEL]		Code Used By External Channel.
<b>INVENTORY RESTRICTION UPDATE</b> INVENTORYRESTRICTIONUPDATE]		Inventory and restrictions update messages supported for the channel.

Table 16-1 (Cont.) Channel Controls — ARI Upload Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>AVAILABILITY UPDATE DAYS</b> [AVAILABILITYUPDATEDAYS]	Maximum number of days in the future for AVH (Inventory and Restriction) messages.
	<b>ROLL OVER DATE</b> ROLLOVERDATE	Used to hold the date of the last restatus.
	<b>DO NOT SEND SEPARATE INVENTORY MESSAGE WHEN AVAILABILITY OPEN/CLOSE</b> [RATE_ROOM_INVENTORY_RESTRICTION_RESTAUS]	With the parameter inactive, when inventory changes, OPERA will send to the ADS channel an Inventory message (OPEN/CLOSE with Rate Code = ALL) for each Room Type, and a Restriction message with any applicable restrictions. With the parameter active, when inventory changes, OPERA will evaluate existing restrictions and send to the ADS channel a Restriction message with OPEN/CLOSE for each Room Type and Rate Code based on the inventory and applicable restrictions.
	<b>ADS MAX RATEROOM COMBINATIONS LIMIT</b> [ADS_MAX_RATEROOM_LIMIT]	This parameter setting will control the total number of rate and room combinations allowed during channel rate room distribution when PUSH DYNAMIC RATES PARAMETER is enabled. The Channel user will not be able to distribute rate room more than the value of this parameter set here.
	<b>SEND OPENCLOSE FOR ADS CHANNELS WHEN RATESET IS UPDATED OR RATEROOM DISTRIBUTED</b> [SEND_OPENCLOSE_RATESETDATE_CHANGES]	When parameter value is set yes, when rate set is extended or shortened or new rate rooms are distributed in channel, it would calculate and process open close for that rate room combination and send Availability Update Messages for ADS channels.
<b>PROPERTY UPDATE</b> [PROPERTYUPDATE]		Property update messages supported for the channel.
<b>RATE UPDATE</b> RATEUPDATE		Rate Update messages supported for the channel.
	<b>RATE PERIOD</b> RATEPERIOD	Total number of Start and End date combinations for each individual rate for rate upload message.
	<b>RATE ROLL OVER DATE</b> RATEROLLOVERDATE	Rate Update Roll Over Date.
	<b>RATE TYPE</b> RATETYPE	Rate Type Daily, Weekly etc.
	<b>RATE UPDATE DAYS</b> RATEUPDATEDAYS	Maximum number of days in advance to update Rate.

**Table 16-1 (Cont.) Channel Controls — ARI Upload Parameters**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>PUSH DYNAMIC RATES TO ADS</b> PUSH_DYNAMIC_RATES	When this parameter is enabled, the property will be able to send Dynamic Base and Advanced Dynamic Base Rate update messages to the ADS Channel as part of the ARI Rate update message.

**Table 16-2 Channel Controls — ARI Upload Settings**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>RATE CHANGE TYPE</b> RATECHANGETYPE		When there is rate change during availability or reservation, this setting determines how booked amount will be calculated. Options are FIRSTNIGHT, HIGHEST, LOWEST, AVERAGE, MOSTCOMMON.

## Channel Controls — Availability

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Interfaces for Channel Controls.

**Table 16-3 Channel Controls — Availability Parameters**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ALTERNATE RATES RETURNED</b> [ALTERNATERATESRETURNED]		Alternate Rates needs to be returned when requested rate range is not available.
<b>ALTERNATE RESORT</b> [ALTERNATERESORT]		When set to YES and requested resort is not available, return alternate available resorts in the response of general availability.
<b>AMENITY CODE FILTER</b> [AMENITYCODEFILTER]		Indicates if availability response has to be filtered by amenity codes.
<b>BUILD RPE MESSAGE</b> [BUILDRPEMESSAGE]		Send RPE List segment to individual GDS channel as part of PALSRP segment.
<b>COMMISSIONABLE RATE CODE FILTER</b> [COMMISSIONABLERATE CODEFILTER]		Indicates if availability response has to be filtered by commission rates.

Table 16-3 (Cont.) Channel Controls — Availability Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>INCLUDE MULTICURRENCY RATE CODES</b> [INCLUDEMULTICURREN CYRATECODES]		Indicates whether to include multi-currency rate code in rate range for general and regional availability.
<b>Ability to Quote Rates in Foreign Currencies OPERA Control</b> [MULTICURRENCY]		When set to YES, include multi-currency rate code in rate range of area or regional availability response.
<b>RETURN NEGOTIATED ONLY</b> [RETURNNEGOTITEDON LY]		Return only requested negotiated rates in the response, by default public rates are always returned in general availability when negotiated rates requested.
<b>RETURN RATE PLAN CODE</b> [RETURNRATEPLANCO DE]		Indicates if channel making the booking is using access rate code or channel rate code.
<b>SEARCH BY RATE LEVEL</b> [SEARCHBYRATELEVEL]		Allow search for channel Availability response based on requested rate level.
<b>TOTAL PRICING WITH PACKAGES TAXES</b> [TOTALPRICINGWITHPA CKAGETAXES]		Indicates if channel supports detail price including taxes, packages in the availability response.
<b>SEARCH ALTERNATE RESORT PROMO AVAILABILITY</b> [SEARCH_ALTERNATE_R ESORT_PROMO_AVILAB ILITY]		When this parameter is set to Y, it will search alternate resort availability for same promotion code requested for all alternate resorts.
<b>CASHING</b> [CACHEENABLED]		Select to allow the caching of General Availability and Fetch Calendar requests.
<b>IGNORE REGION SEQUENCE</b> [IGNORE_REGION_SEQ]		Select for the channel to return regional availability results by city as configured under Setup>System Configuration>Property>Marketing Cities. If this setting is not selected, OWS regional availability will return results first by region and then by city.

Table 16-3 (Cont.) Channel Controls — Availability Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>IGNORE REQUESTED CURRENCY IN RATE RANGE</b> [IGNORE_REQUESTED_CURRENCY_IN_RATE_RANGE_DISPLAY]		This parameter applies to regional availability requests. When the request contains only one RPC code, the response will return the requested code in the currency setup in rate-header/rate-details. If the request contains more than one RPC code, the response will return the rate-range in the resort currency of the hotel and exclude any rate that is loaded in a currency that is not the resort currency. If another rate range currency is setup in property level application settings "RATE RANGE CURRENCY CODE", then response would be returned in this currency.
<b>REQUESTED LANGUAGE CODE FOR GDS</b> [REQUESTED_LANGUAGE_CODE_FOR_GDS]		Return the translated descriptions of channel rates, rooms, guarantee information, policies, marketing and error texts in the language code that is sent in the RLC element (Requested Language Code) of availability and booking requests from the GDS. If there is no translation configured for the language code sent, the response will default to the English description.
<b>RESERVATION RULES AND POLICIES IN GENERAL AVAILABILITY</b> [RESV_RULES_POLICIES_FOR_AVAILABILITY]		When set to Yes, the General Availability response will include deposit, cancellation, guarantee and marketing policies. When set to No, these policies will be excluded from the General Availability response. When using General Availability to display an Availability Calendar for a website, there is no need to fetch this extra detail, and setting this to No will help process requests faster and reduce message size.
<b>RETURN EXPECTED CHARGES IN REGIONAL AVAILABILITY EXTENDED</b> [RETURN_EXPECTED_CHARGES_IN_REGIONAL_AVAILABILITY_EXTENDED_RESPONSE]		Enabling this parameter will return the expected charges for the minimum and maximum rates in the Regional Availability Extended response.
<b>RETURN BARRATES FIRST GENERAL AVAIL</b> [RETURN_BARRATES_FIRST_GENERAL_AVAIL]		When the parameter set to Yes, the rate room combinations will be returned in general availability the way they currently are (with BAR shown separate from the rest of the order). When the parameter set to No, the rate-room combinations will be returned in general availability with BAR included in the mix based on the configured Order By values.

Table 16-3 (Cont.) Channel Controls — Availability Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>GENERAL AVAILABILITY CACHE</b> [GENERAL_AVAILABILIT Y_CACHE]		When set to Y, If cache is valid for requested criteria, availability will be read from general cache table.

Table 16-4 Channel Controls — Availability Settings

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>DISPLAY AVAILABILITY ORDER</b> [DISPLAYAVAILABILIT YORDER]		RateRoom order in the response would be by rate order or room order.
<b>MATCH AMENITIES</b> [MATCHAMENITIES]		When list of amenity codes are given in general availability request search criteria, return the response of room with amenity order.
<b>MAXIMUM AVAILABLE RATE ROOM</b> [MAXIMUMAVAILABLE RATEROOM]		Maximum availability rate room returned in general availability response.
<b>MAX PROPERTY RETURNED</b> [MAXPROPERTYRETUR NED]		Maximum Property Returned for Regional Availability Request.
<b>SEARCH BY ACCESS CODE</b> [SEARCHBYACCESSCOD E]		When Use Access Code is set as A then search for negotiated rates will happen against neg channel rate code instead of channel rate code.
<b>MAX AVAILABLE LIST ITEMS</b> [MAX_AVAIL_LIST_ITE MS]		Maximum number of rate and room records to search in order to provide available rate and room combinations in the general availability response.
<b>NIGHTS ALLOWED FOR AVAILABILITY</b> [NIGHTSALLOWEDFOR AVAILABILITY]		Maximum Number of Nights allowed for availability.

Table 16-4 (Cont.) Channel Controls — Availability Settings

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>OWS CALENDAR MODE</b> [OWS_CALENDAR_MO DE]		This parameter offers a selection of three different modes for the fetch calendar functionality. The following modes are offered on one multiple selection screen. Please ensure that multiple modes are not selected. NONE- This is the original calendar functionality. There are no specific rules applied and all rates will be returned in the response. The availability will be shown for all days and not each day. This mode does not evaluate BAR or channel inventory. This mode must not be combined with any single/multiple rate mode of the LOWEST mode. Rate code - Select a single rate code to use for the calendar functionality or make a multiple selection to have all rate codes returned in the response. When making multiple selection of rate codes, only a maximum of 25 rate codes will be processed for the calendar availability function. This mode must not be combined with NONE mode. LOWEST- The rates will be returned from the lowest to the highest in the response for rates setup in this parameter. This mode must be combined with any single or multiple rate codes.
<b>OWS GOOGLE CALENDAR MAX NIGHTS STAY</b> [OWS_GOOGLE_CALEN DAR_MAX_NIGHTS_ST AY]		This parameter setting allows google to request availability for their calendar for maximum number of nights per stay date.
<b>REQUESTED BAR PUBLIC RATES</b> [REQUESTED_BAR_PUB LIC_RATES]		When this parameter have value of a->REQUESTED,b->REQUESTED,BAR,c->REQUESTED,BAR,PUBLIC. When parameter value is set to requested, only requested rate codes will be returned as part of general availability, when value is set to REQUESTED,BAR, requested and bar rates will be returned as part of general availability, when set to REQUESTED,BAR,PUBLIC it would return requested, bar and all available public rates.

## Channel Controls — Blocks

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Interfaces for Channel Controls.

**Table 16-5 Channel Controls — Block Settings**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>MAXIMUM NO OF ROOMS ALLOWED TO BOOK</b> [MAXIMUMNOOFROOMSALLOWEDTOBOOK]		Maximum No Of Rooms Allowed To Book by external channel.
<b>MASTER ALLOCATION BLOCK ID</b> [MASTER_ALLOCATION_BLOCK_ID]		Master Allocation Block ID to be used when creating a block through OWS.
<b>MAXIMUM NUMBER OF ROOMS PER BLOCK</b> [MAXIMUM_NUMBER_OF_ROOMS_PER_BLOCK]		Maximum number of rooms per day that can be allocated when creating a Block/Allotment thorough web.
<b>MINIMUM NUMBER OF ROOMS PER BLOCK</b> [MINIMUM_NUMBER_OF_ROOMS_PER_BLOCK]		Minimum number of rooms per day that can be allocated when creating a Block/Allotment thorough web.

## Channel Controls — General

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Interfaces for Channel Controls.

Table 16-6 Channel Controls — General Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>DELETE PROFILE ATTRIBUTES</b> [DELETE_PROFILES_ATTRIBUTES_NO_VALUE_IN_REQUEST]		This parameter applies to the following name webservice functions: "UPDATEADDRESS", "UPDATENAME", "INSERTUPDATEUDFs", "UPDATEPHONE". If the parameter is ON and when the request comes with no value specified in the element, the respective attribute of the profile will be removed.
<b>EXTERNAL CONTROLLED</b> EXTERNALCONTROLLED ]		Channel is controlled by an external system.
<b>OVERRIDE CHAIN OWNERSHIP</b> [OVERRIDE_CHAIN_OWNERSHIP]		This parameter can be set to yes, When in Opera Chain Membership parameter is on, Generic CRO functionality is on, ORS_CM parameter is on, if parameter value is set to Yes, Profile, Security, Membership WS requires in the input request Domain element with value of CRO Code to manage profile and membership even when WS points to dummy CRO. If valid CRO Code is sent in the message request for the profile, user can manage profile and membership from website.
<b>VIEW COMMISSION PERCENT</b> [VIEW_COMMISSION_PERCENT]		Enables the user to see the commission percent if the rate is commissionable.
<b>RETURN CP2 FIELDS</b> [RETURN_CP2_FIELDS]		If parameter value is set to Y, Complete Pricing fields will be returned in the Availability and Reservation response for GDS channels.
<b>OWS FULL PROTECTION</b> [OWS_FULL_PROTECTION]		When this parameter is set to Y, Full Lock is applied for protected profiles i.e certain Profile fields cannot be inserted/updated/deleted and when set to N Custom Protection template is available for the user.
<b>BILLING EMAIL REQUIRED</b> [BILLING_EMAIL_REQUIRED]		This parameter will set the email_yn value for a profile which is used during PrintPreCheckoutBill.
<b>IGNORE PROFILE HISTORY</b> [IGNORE_PROFILE_HISTORY]		This parameter when set to true will not save profile history in Opera.

Table 16-6 (Cont.) Channel Controls — General Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>MASK CC FOR WSRESPONSE</b> [MASK_CC_FOR_WSRESPONSE]		When this parameter is set to Y, the following data will be masked in OWS responses: Passport Number, License number, etc. Date of Birth will be not returned in the OWS response. When this parameter is set to N, the following returned data will be unmasked in OWS responses: Passport Number, License number, etc.
<b>MAST PII FOR WSRESPONSE</b> [MASK_PII_FOR_WSRESPONSE]		When this parameter is set to Y, the following data will be masked in OWS responses: Passport Number, License number, etc. Date of Birth will be not returned in the OWS response. When this parameter is set to N, the following returned data will be unmasked in OWS responses: Passport Number, License number, etc.
<b>OWS CALENDAR CACHE</b> [OWS_CALENDAR_CACHE]		When set to Y, If cache is valid price and restrictions will be read from calendar cache table.
<b>OWS REGIONAL CACHE</b> [OWS_REGIONAL_CACHE]		When set to Y, If cache is valid for price details and restrictions will be read from regional cache table.
<b>GDS TOTAL PRICING</b> [GDS_TOTAL_PRICING]		Enables total pricing for GDS Application.
<b>LDAP AUTHORIZATION</b> [LDAP_AUTHORIZATION]		When this parameter is active every OWS Web Service operation must pass valid LDAP user.

Table 16-7 Channel Controls — General Settings

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>DEFAULT LANGUAGE</b> [DEFAULT_LANGUAGE]		This parameter value indicates default language used in opera to store data in main tables for rate description, room description and others.
<b>INVENTORY THRESHOLD COUNT TO INVALIDATE CACHE TIMESTAMP</b> [INVENTORY_THRESHOLD_CACHE]		This parameter value indicates when no of rooms available for any property equal or less than this value update cache time stamp in OWS cached tracking table. When no of rooms available more than this value then time stamp on OWS cached tracking table is not updated.

## Channel Controls — Payment

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Interfaces for Channel Controls.

**Table 16-8 Channel Controls — Payment Parameters**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ALLOW PAYMENT WITHOUT CREDIT CARD NUMBER</b> [ALLOW_MAKEPAYMENT_WITHOUT_CC]		When the parameter value is set to YES, only the credit card type is required in the request. When the parameter value is set to NO, credit card number, expiration date and credit card type are required in the request.
<b>CREDIT CARD AUTHORIZATION REQUIRED</b> [CCAUTHORIZATIONREQUIRED]		Channel performs authorization of credit card before processing booking.
<b>CREDIT CARD SURCHARGE</b> [CREDITCARDSURCHARGE]		Enables credit card surcharges for the channel.
<b>ALLOW BOOK PRIOR CC EXPIRY DATE</b> [ALLOW_BOOK_PRIOR_CC_EXPIRY_DATE]		This parameter determines whether or not to allow bookings to make via OWS if the CC EXPIRY DATE is prior to the booking arrival date. If active, then bookings can be made. If not active, then bookings will not be made.

## Channel Controls — Rates

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Interfaces for Channel Controls.

**Table 16-9 Channel Controls — Rate Parameters**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CHANNEL RATE CATEGORY</b> [CHANNELRATECATEGORY]		Channel Rate Category setup is required.
<b>HTML TEXT EDITOR</b> [HTMLTEXTEDITOR]		Enables html text editor functionality for the channel.

**Table 16-9 (Cont.) Channel Controls — Rate Parameters**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CHANNEL OVERRIDE HIDE PROMOTIONS</b> [CHANNEL_HIDE_PROMOTIONS]		When Enabled, return promotion rate codes for this channel and property only if the promotion code is sent in the request message regardless of the HIDE PROMOTION RATES global parameter setting. If not enabled, promotion rate codes will be displayed based on the HIDE PROMOTION RATES global parameter setting.

**Table 16-10 Channel Controls — Rate Settings**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CHANNEL RATE CODE LENGTH</b> [CHANNELRATECODELENGTH]		Channel Rate Code Length.
<b>ICON IMAGE URL</b> [ICONIMAGEURL]		Website Logo/Icon Image URL.

## Channel Controls — Reservations

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Interfaces for Channel Controls.

**Table 16-11 Channel Controls — Reservation Parameters**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ACCEPT LOWER RATE AMOUNT</b> [ACCEPTLOWERRATEAMOUNT]		Accept lower rate amount from the booking message for the channel.
<b>ADVANCED PACKAGE HANDLE</b> [ADVANCEDPACKAGEHANDLE]		When set to Yes, returns additional package details during fetch available packages.
<b>CANCEL PENALTY OVERRIDE</b> [CANCELPENALTYOVERRIDE]		Channel is allowed cancel the booking with penalty exists.

Table 16-11 (Cont.) Channel Controls — Reservation Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CORPORATE NUMBER REQUIRED</b> [CORPORATENUMBER REQUIRED]		Corporate Number required for the channel to book negotiated rates.
<b>LOG RESERVATION REGRETS</b> [LOG_RESERVATION_REGRETS]		When the parameter value is set to YES, for availability requests which are made through external channels, regrets will be logged in reservation_regrets table if the requested availability criteria is not met.
<b>OVERRIDE DEPOSIT RULE</b> [OVERRIDEDEPOSITRULE]		Override Deposit Rule and allow cancellation refund.
<b>OVERRIDE INVENTORY RESTRICTION</b> [OVERRIDEINVENTORY RESTRICTION]		Override Restriction or availability for the property and continue with booking.
<b>OWNERS CONTRACT REFERRAL YN</b> [OWNERS_CONTRACT_REFERRAL_YN]		When Referral Reservation Parameter under ownership group is set to Y and this parameter is set to Y, reservation can be indicated as a Referral Reservation using create/update booking WS.
<b>RETURN ERROR ON LOWER RATES</b> [RETURNERRORONLOWER RATES]		Return an error when rate received in the booking request by external vendor is lower than Reservation System.
<b>RETURN PACKAGE DETAILS</b> [RETURNPACKAGEDETAILS]		Returns package details during fetch available packages, allows user to book packages while making booking without making call to additional web service.
<b>SESSION CONTROL</b> [SESSIONCONTROL]		When set to YES, reservations for this channel are created for the session using Guarantee code GDS-SESSION.
<b>SESSION MODIFICATION ALLOWED</b> [SESSIONMODIFICATION ALLOWED]		Modification of reservation is allowed when it is in session.

Table 16-11 (Cont.) Channel Controls — Reservation Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ATTACH PROFILE ROOM FEATURES TO RESERVATION</b> [ATTACH_PROFILE_ROOM_FEATURES_TO_RESERVATION]		If this parameter is enabled, the room features attached to the profile will be auto attached to the reservation.
<b>CHANNEL GENERIC ROOM TYPE</b> [CHANNEL_GENERIC_ROOM_TYPE]		Enable mapping of one channel room type to multiple opera room types.
<b>CHANNEL INVENTORY</b> [CHANNEL_INVENTORY]		Activate the Channel Level Inventory Sell Limits Functionality.
<b>OVERRIDE AR SETTLEMENT VISIBLE ON FOLIO</b> [OVERRIDE_SHOW_AR_SETTLEMENT]		This is a Channel Parameter for overriding the OPERA parameter "AR SETTLEMENT VISIBLE ON FOLIO" which is used to Print AR Settlement Payment on the Folio.
<b>OVERRIDE RATES CLOSED DUE TO RANKING</b> [OVERRIDE_RATES_CLOSED_DUE_TO_RANKING]		Activating this parameter enables booking rate codes closed due to rank restriction.
<b>OWS UPDATE PROFILE FOR RESERVATION</b> [OWS_UPD_PROFILE_FOR_RESV]		When parameter value is set to Y, it will update profile attached with reservation during modify booking from OWS Webservices if request has existing profile id with new profile address, phone, email. When Value is set to N profile attached with reservation will not be updated when profile id is in the request.
<b>PREFERENCE COMMENTS OVERLAY</b> [PREFERENCE_COMMENTS_OVERLAY]		When this parameter is enabled, the external channel must provide a full overlay of the comments, specials, preferences, features, and memberships associated with the reservation.
<b>TEXT MESSAGE HANDLING</b> [SMS_CONFIRMATIONS]		Activate Text Message Handling Functionality when reservation is modified.

Table 16-11 (Cont.) Channel Controls — Reservation Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>VAULT TIMEOUT ERROR</b> [VAULT_TIMEOUT_ERROR]		When parameter value is set to YES, an error message will be returned and the reservation not booked if the credit card verification message times out to CC Vault. When the value is set to NO, the reservation will be created with a Cash payment method, and a warning will be logged as reservation comments to the reservation
<b>AUTO INVENTORY ITEM TRACE</b> [AUTO_INVENTORYITEM_TRACE]		Automatically create or delete Reservation Traces when Inventory Items are attached or deleted for a Reservation via the Channel.
<b>DEFAULT PAYMENT METHOD PER CHANNEL</b> [DEFAULT_PAYMENT_METHOD_PER_CHANNEL]		When active, a default payment method will be assigned to the reservation, and the payment method on the incoming booking will be assigned to a designated window.

Table 16-12 Channel Controls — Reservation Settings

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>RESERVATION STATUS WINDOW</b> [RESERVATION_STATUS_WINDOW]		This parameter specifies the time in minutes to consider for updating a reservation status from "Reserved" to "Changed."
<b>CONFIRMATION EMAIL FROM</b> [CONFIRMATION_EMAIL_FROM]		This parameter can be used to set the sender email address for the confirmation letter.

## Configuring Channel Mapping

Channel mapping establishes connections between OPERA Cloud codes and the codes used by external channels. The mapping helps ensure smooth and accurate processing of information and transactions between OPERA Cloud and external channels.

You can map channels to the following:

- Amenities
- Channel Letters

- Credit Cards
- Currencies
- Properties
- Reservation Types

## Channel Mapping Amenities

Amenities are the saleable offerings available to external channels. Properties must map their amenity codes to equivalent external channel codes in order for transaction processing to take place between OPERA Cloud and the external channels.

### Adding Channel Mapping Amenities

Use the following steps to add Amenities to channels:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Amenities**.
2. Click **New**.
3. On the Amenity Management screen, complete the following fields:
  - a. **Property**. Select the property if logged into a chain location.
  - b. **Channel**. Select the channel where the amenity code will be available.
  - c. **Feature Type**. Select the feature type such as Room, Property, and so on.
  - d. **Feature**. Select the feature that belongs to the amenity code.
  - e. **Amenity Code**. Select the Global Distribution System (GDS) amenity code from the list.
  - f. **Description**. As an option, enter a text description of the amenity or feature.
4. Click **Save**.

### Editing Channel Mapping Amenities

Use the following steps to edit the Description field:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Amenities**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to edit and select **Edit**.
4. Make changes to the description.
5. Click **Save**.

### Deleting Channel Mapping Amenities

Use the following steps to delete the Channel:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Amenities**.
2. Select search criteria and click **Search**.

3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to delete and select **Delete**.

## Channel Mapping Letters

Use the Channel Letters screen to map confirmation and cancellation letter codes to channel properties.

### Adding Channel Mapping Letters

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Channel Letters**.
2. Click **New**.
3. On the Channel Letters screen, complete the following fields:
  - a. **Property**. Select the property if logged into a chain location.
  - b. **Channel**. Select the channel in which the letter code will be used.
  - c. **Letter Type**. Select a letter type such as Confirmation, Cancellation, and so on.
  - d. **Letter Name**. Select the letter name.
  - e. **Language**. Select a language for the channel letter from the list.
4. Click **Save**.

### Editing Channel Mapping Letters

Use the following steps to edit the Channel Letter Name field:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Channel Letters**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to edit and select **Edit**.
4. Make changes to the Letter Name.
5. Click **Save**.

### Deleting Channel Mapping Letters

Use the following steps to delete the Channel.

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Channel Letters**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to delete and select **Delete**.

## Channel Mapping Credit Cards

Use the Channel, Credit Cards screen to map credit card types to channels.

### Adding Channel Mapping Credit Cards

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Credit Cards**.
2. Click **New**.
3. On the Credit Cards screen, complete the following fields:
  - a. **Channel**. Select the channel in which the credit card will be used.
  - b. **Card Type**. Select a card type code used in OPERA Cloud such as VI for Visa, MC for Master Card, or AX for American Express from the list.
  - c. **Channel Card Type**. Enter the code used by the channel. It is recommended to use codes provided by the channel.
  - d. **Start Date**. Enter the date when the card is available to the channel.
  - e. **End Date**. Enter a date when the property becomes unavailable in the channel (optional).
4. Click **Save**.

### Editing Channel Mapping Credit Cards

Use the following steps to edit the Credit Card mapping Start Date/End Date:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Credit Cards**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to edit, and select **Edit**.
4. Make changes to the Start Dates/End Date.
5. Click **Save**.

### Deleting Channel Mapping Credit Cards

Use the following steps to delete a Channel:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Credit Cards**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to delete, and select **Delete**.

## Channel Mapping Currencies

Use the Channel Mapping Currencies screen to map currencies to OPERA Cloud currency codes.

### Adding Channel Mapping Currencies

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Currencies**.

2. Click **New**.
3. On the Credit Card Management screen, complete the following fields:
  - a. **Channel**. The channel where the currency code will be used.
  - b. **Currency Code**. Select the currency code used in OPERA Cloud.
  - c. **Channel Currency Code**. Select the currency code used for the channel. It is recommended that you use ISO standards, such as USD for the US Dollar.
  - d. **Channel Decimal Position**. Enter the number of decimals supported by the channel, which is usually two.
  - e. **External Decimal Position**. Enter decimal the position as provided by the channel.
  - f. **Start Date**. Enter the date when the currency code is available to the channel.
  - g. **End Date**. Enter a date when the property becomes unavailable in the channel (optional).
4. Click **Save**.

### Editing Channel Mapping Currencies

Use the following steps to edit the Channel Decimal Position, External Decimal Position, or Start Date/End Date on the Currencies screen:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Currencies**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to edit and select **Edit**.
4. Make changes to the Channel Decimal Position, External Decimal Position, or Start Date/End Date.
5. Click **Save**.

### Deleting Channel Mapping Currencies

Use the following steps to delete a Channel:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Currencies**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to delete and select **Delete**.

## Channel Mapping Properties

Use the Channel Mapping, Properties screen to map properties to OPERA Cloud property codes.

### Adding Channel Mapping Properties

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Property Management**.

2. Click **New**.
3. On the Credit Card Management screen, complete the following fields:
  - a. **Channel**. Select the channel where the property code will be used.
  - b. **Property**. Select the property code used in OPERA Cloud.
  - c. **Channel Property**. Enter the property name.
  - d. **Start Date**. Enter the date when the property becomes available to the channel.
  - e. **End Date**. Enter a date when the property becomes unavailable in the channel (optional).
  - f. **City**. Enter the city location of the property.
  - g. **Room Limit**. Enter the property's room limit per single booking.
  - h. **Prevailing Rates**. Select the check box to indicate the prevailing rates to be used by the channel.
4. Click **Save**.

### Editing Channel Mapping Properties

Use the following steps to edit Properties:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Property Management**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu of the channel you want to edit and select **Edit**.
4. Make changes to Channel Property, Start Date/End Date, City, Room Limit, or Prevailing Rates in the Property Management screen.
5. Click **Save**.

### Deleting Channel Mapping Properties

Use the following steps to delete a Channel:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Property Management**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu of the channel you want to delete and select **Delete**.

## Channel Mapping Reservation Types

Reservations are categorized by types such as Guaranteed, Checked-in, and so on. Use the Channel Mapping, Reservation Types screen to map OPERA Cloud reservation types to channels.

### Adding Channel Mapping Reservation Types

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Reservation Types**.
2. Click **New**.
3. On the Reservation Types screen, complete the following fields:
  - a. **Channel**. Select the channel where the reservation code will be used.
  - b. **Reservation Type**. Select the reservation type used in OPERA Cloud.
  - c. **Channel Reservation Type**. Enter the channel reservation type code used by the channel.
  - d. **Requirement Code**. Select a requirement codes such as Credit Card, Hold, and so on used in OPERA Cloud.
  - e. **Start Date**. Enter the date when the reservation type becomes available to the channel.
  - f. **End Date**. Enter a date when the reservation type becomes unavailable in the channel (optional).
4. Click **Save**.

### Editing Mapping Channel Reservation Types

Use the following steps to edit reservation types:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Reservation Types**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to edit and select **Edit**.
4. Make changes to the Channel Reservation Type, Requirement Code, or Start Date/End Date.
5. Click **Save**.

### Deleting Mapping Channel Reservation Types

Use the following steps to delete a Channel:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Reservation Types**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to delete and select **Delete**.

## Channel Property Mapping

You must create and map property values with channel values for various codes such as reservation types, room types, card types, and so on to facilitate property queries and transactions through channels.

## Creating Channel Mapping Card Types

Card Type configuration enables you to map the credit card types associated with your property to channels.

### Adding Card Types

1. From the Administration menu, select **Interfaces**, select **Channel Property Mapping**, and select **Card Type**.
2. Click **New** and complete the following fields:
  - a. **Property**. Select the property from the list.
  - b. **Channel**. Select the channel from the list.
  - c. **Card Type**. Select the property's card type that you want mapped to the channel's card type.
  - d. **Channel Card Type**. Select the channel converted card type. This is the card type that will be configured for the channel.
3. Click **Save**.

### Editing Card Types

1. From the Administration menu, select **Interfaces**, select **Channel Property Mapping**, and select **Card Type**.
2. Enter search criteria and click **Search**.
3. From your search results, select the vertical ellipsis **Actions** menu and select **Edit**.
4. Select a **Channel Card Type** from the list.
5. Select an **Inactive Date** to stop using the selected card, if desired.
6. Click **Save**.

### Deleting Card Types

1. From the Administration menu, select **Interfaces**, select **Channel Property Mapping**, and select **Card Type**.
2. Enter search criteria and click **Search**.
3. From your search results, select the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Channel Rate Mapping

Channel Rate Mappings enables you to map property rate codes with the channel's rate codes. Begin by searching for existing rate code conversions.

### Adding New Channel Rate Mappings

1. From the Administration menu, select **Interfaces**, select **Channel Property Mapping**, and select **Channel Rate Mapping**.
2. Enter the **property** and other search criteria and click **Search**.
3. From your search results, click the vertical ellipsis **Actions** menu and select **New**. Complete the following fields:
  - a. **Channel Rate Code**. Enter a free text for channel rate code.
  - b. **Start Date**. The first date the rate code is available in the channel.
  - c. **End Date**. The last date the rate code is available in the channel.
  - d. **Rate Level**. Search for and select a channel rate level.
  - e. **Property radio button**. Select to keep the property rate description.
  - f. **Custom radio button**. Select to add a customized channel rate description.
  - g. **Rate Category**. Enter the rate category used by the channel host.
  - h. **Order**. This determines the order this Channel Rate Mapping appears when searched.
  - i. **SGA**. Enter the signature airline code. Use the SGA to filter rate codes for specific sources of business. This field can also be used to exclude specific sources of availability and bookings from the selection of rates.
  - j. **BlockRateIndicator**. This field cannot be edited once the channel conversion rate code is saved. To create a conversion using an OPERA Cloud rate code, select the Rate Code option from the list of values. To use inventory from a block, create a conversion for a channel rate using a rate code attached to the block or the block code. The Block Rate Indicator is used primarily for GDS channels as they cannot send the block code in the switch messages.
  - k. **Rate Update**. Select the check box if this rate should be sent to an ADS, GDS, or an ODS partner such as Expedia.
  - l. **Restriction Update**. Select the check box to send restrictions to an ADS, GDS, or ODS partner such as Expedia.
  - m. **Return to SGA**. Select the check box only when you want to return the signature airline code in the channel property availability response.
  - n. **Regional Availability**. Select the check box if this rate is to participate in Regional Availability processing.
  - o. **Room Types**. Select the room types available at the selected rate.
4. Click **Save**.

## Creating Channel Mapping Marketing Text

Property marketing text is used to distribute marketing information to travel agents and other channels. You can create marketing text designed for properties or create a template designed for transaction types.

### Adding Marketing Text

1. From the Administration menu, select **Interfaces**, select **Channel Property Mapping**, and select **Marketing Text**.
2. Click **New**.
3. Complete the following fields:
  - a. **Property**. Select a property for this (mandatory field).
  - b. **Channel**. Select the channel name (mandatory field).
  - c. **Transaction Type**. The transaction type that will display the marketing text (mandatory field).
  - d. **Policy Type**. Select the policy type to use for this property. For example, Commission, Cancel Policy, or other.
  - e. **Policy Detail**. The policy type to specify the method for returning the text.
  - f. **Start Date**. The first date the rate code is available in the channel (mandatory field).
  - g. **End Date**. The last date the marketing text is available in the channel.
  - h. **Marketing Text**. Enter the marketing message to appear throughout the channel.
4. Click **Save**.

### Editing Marketing Text

1. From the Administration menu, select **Interfaces**, select **Channel Property Mapping**, and select **Marketing Text**.
2. Enter search criteria and click **Search**.
3. From your search results, select the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the marketing text.
5. Click **Save**.

### Deleting Marketing Text

1. From the Administration menu, select **Interfaces**, select **Channel Property Mapping**, and select **Marketing Text**.
2. Enter search criteria and click **Search**.
3. From your search results, select the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

### Adding Marketing Text Templates

1. From the Administration menu, select **Interfaces**, select **Channel Property Mapping**, and select **Marketing Text**.
2. Click the **Template tab** and click **New**.
3. Complete the following:

- a. **Transaction Type.** The transaction type that displays the marketing text (mandatory field).
  - b. **Policy Type.** Select the policy type to use for this property. For example, Commission, Cancel Policy, or other.
  - c. **Policy Detail.** The policy type for specifying the method of returning the text.
  - d. **Start Date.** The first date the rate code is available in the channel (mandatory field).
  - e. **End Date.** The last date the marketing text is available in the channel.
  - f. **Marketing Text.** Enter the marketing message to appear throughout the channel.
4. Click **Save**.

## Channel Publications

The Channel Publication menu enables you to initiate the distribution of availability, rates, and restrictions information to Alternate Distribution System (ADS) channels. It is advised that you use channel publications as a fail over mechanism during network outages or if both systems data are out of sync.

## Reprocessing Availability

Use Reprocessing Availability to send an inventory data snapshot for channel room types to Alternate Distribution System (ADS) partner channels.

1. From the Administration menu, select **Interfaces**, select **Channel Publications**, and select **Reprocess Availability**.
2. Select a **Property**.
3. Select a **Channel**.
4. Select either the **Channel radio button** or the **Property radio button**:
  - a. If you select Channel, select the **Channel Room Type**.
  - b. If you select Property, select the **Property Room Type**.
5. Enter the **Begin Date** to start reprocessing.
6. Enter the **End Date** to end reprocessing.
7. Click **Reprocess Availability**.

## Reprocessing Rate

Use Reprocessing Rate to send rate information to Alternate Distribution System (ADS) partner channels.

1. From the Administration menu, select **Interfaces**, select **Channel Publications**, and select **Reprocess Rate**.
2. Select a **Property**.
3. Select a **Channel**.
4. Select either the **Channel radio button** or the **Property radio button**:

- a. If you select **Channel**, select the **Channel Rate Code** and **Channel Room Type**.
  - b. If you select **Property**, select the property **Rate Code** and **Room Type**.
5. Enter the **Begin Date** when reprocessing starts.
6. Enter the **End Date** when reprocessing ends.
7. Click **Reprocess Rate**.

## Reprocessing Restrictions

Use Reprocessing Restrictions to send channel or property restrictions data snapshots to Alternate Distribution System (ADS) partner channels.

1. From the Administration menu, select **Interfaces**, select **Channel Publications**, and select **Reprocess Restrictions**.
2. Select a **Property**.
3. Select a **Channel**.
4. Select either the **Channel radio button** or the **Property radio button**:
  - a. If you select **Channel**, select the **Channel Rate Code** and **Channel Room Type**.
  - b. If you select **Property**, select the property **Rate Code** and **Room Type**.
5. Enter the **Begin Date** when reprocessing starts.
6. Enter the **End Date** when reprocessing ends.
7. Click **Reprocess Restrictions**.

## Enhanced Room Key Generation

Room key generation enables you to create guest room keys before guests arrive and to configure default settings to streamline the key creation process and reduce manual input errors.

Use the room key validation, expiry, and additional rooms controls in conjunction with a third-party Door Lock System (DLS) to:

- Define the room key activation start date/time.
- Check if previous keys were made and for which additional rooms.
- Limit the number of additional rooms allowed for key creation.
- Override key options and suppress success notifications when creating keys for multiple reservations.

## Customizing the Additional Rooms Field

1. Go to **Miscellaneous - Property Interface Control**.
2. Choose a reservation and click **Create Key**.
3. Select the **Customize** link.
4. Click the pencil icon next to the **Additional Rooms** field.

5. In the **Basic** tab, select the **</> Custom Validator icon** next to the **Default Value** field.
6. In the Expression Builder screen from the Available Fields search, select the **PreviousKeyAdditionalRooms** binding:  
(Name) **PreviousKeyAdditionalRooms**  
(Description) **#{bindings.PreviousKeyAdditionalRooms.inputValue}**
7. Click **Evaluate**, and then click **Apply**.
8. Click **Save**, and then **Close Customize**.

With this customization, the **Additional Rooms** field populates with all additional rooms associated with the reservation room when the previous key was created (Previous Keys Made > 0).

After the Additional Rooms functionality is customized, when a new key is created with additional rooms selected, the additional rooms are logged and saved with the main room key information. This is per reservation and room.

## Customizing the Create Key Screen Additional Rooms Field

You can customize the Additional Rooms field on the Create Key to populate the Additional Rooms field with the room numbers that were selected when a new key is created for that reservation and room number. This applies to duplicate keys (when Previous Keys Made > 0).

### Prerequisites/Conditions

- **Allow Multiple Room Selection for Keys** check box is selected in the Property Interfaces Configuration for DLS (Door Lock System).
- OPERA Cloud Task **Customize Chain** or **Customize Property** in the **General - Access Options**.
- **Customization must be on for Property / Hub level** — Main Menu – Settings – Customization, select Property/Hub Level.

## DLS (Door Lock System) Property Interface Setup Options

### Administration – Interfaces – Property Interfaces – Property Interfaces

The following are additional setup options for the DLS type property interface for enhanced room key generation on the General Information panel.

- **Send Valid Start Date / Time** — When this check box is selected, the **Valid Start Date** and **Valid Start Time** fields appear on the Create Key screen and the Room Keys screen. These enable you to set the key activation date and time.
- **Limit Additional Number of Rooms To** — When the **Allow Multiple Room Selection for Keys** check box is selected, the **Limit Additional Number of Room To** field is available. This field limits the number of additional rooms you can select or manually enter in the **Additional Rooms** field.

## Enhanced Room Key Generation Validation Rules by Process

**Table 16-13** Enhanced Room Key Generation Validation Rules by Process

Reservation State/Status	Valid Start Date	Valid Start Time	Valid Until Date	Valid Until Time
Reserved, Pre-Arrival (before advance check in or before check in)	Reservation arrival date	Default time set in the <b>Key Valid Start Time</b> OPERA Controls Setting	<b>Valid Until Date</b> field defaults to the reservation departure date or the departure date plus the number of days in the OPERA Cloud Control <b>Key Expiry Days</b> setting.	The <b>Valid Until Time</b> field defaults with the time setting that is chosen in the OPERA Cloud Control <b>Default Keys Expiry Time</b> setting.
During advance check in or when the reservation is flagged as Advance Checked In	Current system date	Default time set in the <b>Key Valid Start Time</b> OPERA Controls Setting	<b>Valid Until Date</b> field defaults to the reservation departure date or the departure date plus the number of days in the OPERA Cloud Control <b>Key Expiry Days</b> setting.	The <b>Valid Until Time</b> field defaults with the time setting that is chosen in the OPERA Cloud Control <b>Default Keys Expiry Time</b> setting.
During check in process	Current system date	Current system time	<b>Valid Until Date</b> field defaults to the reservation departure date or the departure date plus the number of days in the OPERA Cloud Control <b>Key Expiry Days</b> setting.	The <b>Valid Until Time</b> field defaults with the time setting that is chosen in the OPERA Cloud Control <b>Default Keys Expiry Time</b> setting.
When reservation is in house	Current system date	Current system time	<b>Valid Until Date</b> field defaults to the reservation departure date or the departure date plus the number of days in the OPERA Cloud Control <b>Key Expiry Days</b> setting.	The <b>Valid Until Time</b> field defaults with the time setting that is chosen in the OPERA Cloud Control <b>Default Keys Expiry Time</b> setting.

## Enhanced Room Key Generation Impact

The Enhanced Room Key Generation functionality with its related controls and tasks (refer to *Enhanced Room Key Generation Prerequisites*) impacts the following areas.

### Property Interfaces Configuration for DLS

DLS property interface additional configuration setup to support sending room key valid start date and time validation (requires DLS vendor support). Refer to *DLS (Door Lock System) Property Interface Setup Options*.

- **Send Valid Start Date/Time** check box to send the start date and start time for the room key request to the third party DLS vendor.
- **Limit Additional Number of Rooms To** field to limit the maximum number (1-999) of additional rooms the key can access. When the **Allow Multiple Room Selection for Keys** check box is checked, the **Limit Additional Number of**

**Room To** field is available. This limits the number of additional rooms you can select or manually enter in the **Additional Rooms** field..

#### Property Interface Control Screen

- Additional Search Criteria:
  - Arrival From
  - Arrival To
  - ETA From
  - ETA To
  - Reservation Status
  - Specials
  - Floors
  - Room Features
  - Room Class
  - Confirmation Number/CRS Number
  - Room Status
  - Include Linked Reservations
  - Include Blocks
- Additional Sort Options:
  - Arrival Date and ETR ascending
  - Arrival Date and ETR descending

#### Create Key Screen

- **Valid Start Date** field (default values):
  - In house: current business date
  - Future reservations: arrival date
- **Valid Start Time** field (default values):
  - In house: property system time
  - Future reservations: Key Valid Start Time setting, property system time
- **Previous Keys Made** number field:
  - Tracks the number of keys created since the last new key previously made for this specific reservation and room.
  - When there are previous keys made for this reservation and room, the Key Type in the Create Key screen defaults to Duplicate Key.
- **Additional Rooms** field with customization to show the room numbers of additional rooms with previous keys made for that reservation. Refer to *Customizing the Additional Rooms Field*.
- **Number of Keys** field defaults to the number of adults on the reservation.

#### Room Keys Screen

- New screen when creating keys for multiple reservations.

- **Suppress Key Success Message** check box to hide the notification that keys have been successfully created to avoid interruption while in the create key process for multiple reservations.
- **Overriding Associated Key Options** check box to override or append the key options (access to specific areas of the property) in the Room Keys screen. Refer to *Overriding Associated Key Options*.
- **Additional Rooms** field with customization to show the room numbers of additional rooms with previous keys made for that reservation. Refer to *Customizing the Additional Rooms Field*.

### Changes Log Screen

Activity Group = Reservation, Activity Type = Keys

- Details the number of keys created or modified for the primary room number, confirmation number, and the logged in user.
- Records the additional room numbers selected. These are only logged on the reservation that the primary key was created for, not on the reservations for those additional rooms.

## Enhanced Room Key Generation Conditions/Assumptions

- Multiple rooms on one room key and Valid Start Date / Valid Start Time functionality is dependent on the DLS supporting it.
- When more than one DLS interface is active at the property, each must be configured with unique room numbers and must support the same functionality. The correct encoder/terminal for the DLS must be chosen during the Create Key process.
- Room key creation functionality shows the room key creation success or failure according to the DLS response.
- If the DLS doesn't respond within the timeout value set in the DLS property interface configuration, OPERA Cloud shows a message that the room key creation timed-out. If this occurs, you can retry creating the room key.

## Prerequisites for Enhanced Room Key Generation

### OPERA Controls

**Group:** IFC

**Settings:** Key Valid Start Time

**Settings:** Default Keys Expiry Time

### OPERA Cloud Tasks

**Group:** Bookings

Property Interface Controls from Reservation:

- Edit Key Valid Start Date
- Edit Key Valid Start Time
- Edit Key Valid Until Date

- Edit Key Valid Until Time

**Group:** Miscellaneous

- Edit Key Valid Start Date
- Edit Key Valid Start Time
- Edit Key Valid Until Date
- Edit Key Valid Until Time

**Property Interface:** DLS (Door Lock System) Interface

- Send Valid Start Date / Time
- Allow Multiple Room Selection For Keys
  - Limit Additional Number of Rooms To

## Configuring Credit Card Readers (Magnetic Stripe)

### [Prerequisites for Configuring Credit Card Readers](#)

Configure the Magnetic Stripe Credit Card Reader device types available at your property.

A credit card reader is a device that decodes the credit card information contained on the magnetic strip of a credit or debit card.

### Adding Magnetic Credit Card Reader Devices

1. From the **Administration** menu, select **Interfaces**, click **Interface Devices**, and then select **Credit Card Reader Devices**.
2. Click **New** and enter the following details:
  - a. **Reader Number.** Enter a unique reader number for the type of reader.
  - b. **Description.** Enter a description/name of the reader
  - c. **Separator**
    - i. **Expiry:** Enter the character used as the expiration start date character. Typically, this will be "=".
    - ii. **End of Track:** Enter the character used as the end-of-track separator. Typically, this will be "?".
    - iii. **Name:** Enter the character used as the name separator. Typically, this will be "^".
    - iv. **Track 2:** Enter the character used as the track two separator. Typically, this will be ";".
  - d. **Encrypted Device**
    - i. **Secure. Reader:** Available when the CC Vault OPERA Control is active; select the check box if communication with the credit card reader device is encrypted. Enter the appropriate details in the fields below to enable parsing the needed data from the encrypted string provided from the device. (The credit card merchant or device vendor will need to provide the details to be entered).
    - ii. **Software ID:** Enter the version number of the reader device software, as assigned by the device manufacturer (not mandatory except for HID Format Type). This is used as the default value to all workstations that have this Reader No. attached to it.

- iii. **Encryption Format Codes:** Enter the code assigned by the Credit Card Provider for the encrypted data format for the swiped information.
  - iv. **Format Type:** Choose the type of format used for the encrypted device. IDTECH is specific to the IDTech M130 device; POSITION indicates the needed encrypted data can be found in a specific position in the entire string; FIELDID indicates the needed encrypted data can be found in a specific field in the entire string; HID is specific to the Magtek DynaPro device.
  - v. Separator
    - **Start Data:** Enter the start delimiter defining the fields of encrypted data.
    - **End Data:** Enter the end delimiter defining the fields of encrypted data.
  - vi. Position
    - **KSN Field:** Enter the ordinal number of the Field ID or the Position that holds the KSN, Encryption Key Serial Number, and Transaction Counter data.
    - **ET1 Field:** Enter the ordinal number of the Field ID or the Position that holds the ET1 and Encrypted Track 1 data.
    - **ETS2 Field:** Enter the ordinal number of the Field ID or the Position that holds the ET2 and Encrypted Track 2 data.
3. Click **Save**.

#### Editing Magnetic Credit Card Reader Devices

1. From the **Administration** menu, select **Interfaces**, click **Interface Devices**, and then select **Credit Card Reader Devices**.
2. Enter search criteria and click **Search**.
3. Select the device, then click the **vertical ellipsis** and select **Edit**.
4. Update configuration.
5. Click **Save**.

#### Deleting Magnetic Credit Card Reader Devices

1. From the **Administration** menu, select **Interfaces**, click **Interface Devices**, and then select **Credit Card Reader Devices**.
2. Enter search criteria and click **Search**.
3. Select the device, then click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Prerequisites for Configuring Credit Card Readers

### OPERA Cloud Tasks

# Configuring Credit Card Terminals (PIN Entry Payment Devices)

## Prerequisites for Configuring Credit Card Terminals

OPERA Cloud supports Chip and PIN for credit card authorizations and payments. Chip and PIN payment utilizes the EMV standard and requires a microchip on the credit card that holds the cardholder authentication information. To process Chip and PIN payments, you must set up the Chip and PIN payment devices available at your property. Chip & PIN devices can be grouped by [device areas](#) to assist mobile users with finding the required, nearby device.

## Adding Credit Card Terminals

1. From the **Administration** menu, select **Interfaces**, select **Interface Devices**, and then select **Credit Card Terminals**.
2. Click **New** and enter the following details:
  - a. **Property**: Enter or select the property
  - b. **Terminal ID**: Enter the terminal ID number provided by the vendor.
  - c. **Terminal Label**: Enter a label or name for the device that identifies its physical location.
  - d. **Device Area**: Link the device to an area. Refer to [Configuring Device Areas](#).
3. Click **Save**.

## Editing Credit Card Terminals

1. From the **Administration** menu, select **Interfaces**, select **Interface Devices**, and then select **Credit Card Terminals**.
2. Enter search criteria and click **Search**.
3. Select the device, then click the **vertical ellipsis** and select **Edit**.
4. Update configuration.
5. Click **Save**.

## Deleting Credit Card Terminals

1. From the **Administration** menu, select **Interfaces**, select **Interface Devices**, and then select **Credit Card Terminals**.
2. Enter search criteria and click **Search**.
3. Select the device, then click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Delivery Management

**Prerequisites for Configuring Delivery Management**

Use Delivery Management to configure the email and SFTP gateway details for the delivery of OPERA Cloud reports and stationery. When the Text Message Handling OPERA Control is active you can also setup a gateway for an SMS service provider for Queue rush room and room ready notifications to mobiles, as well as reservation confirmations and guest messages. Message transmission to SMS provider can be either email or HTTP POST.

The following configuration options are available.

**Table 16-14 Configuration methods and purpose**

Method	Purpose
General	Reports via email and Scheduled Reports via SFTP
Confirmation Letters	Reservation confirmations via email and SMS
Guest Message	Guest messages via SMS
Billing Folios	Folios via email
Text to Guest	Queue Room ready notification to Guest via SMS
Text to Housekeeping	Queue Rush Room via SMS

**Configuring Report Delivery****Editing Report Email Delivery**

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **General** and click **Search**.
3. Click **Edit** and enter the following details:
  - a. **Property:** Enter or select the property.
  - b. **Activate Email Delivery:** Select to activate email delivery functionality.
  - c. **From Email Address:** Enter the sender email address. You can set a "display name" along with the email address, If you do so, enclose the email address in < and >.
  - d. **(SMTP) Server Name:** Enter the FQDN of SMTP Server (Oracle SMTP server).

- e. **User ID:** Enter the user ID for SMTP server.
  - f. **Password:** Enter the password for SMTP server.
  - g. **Email Subject:** Enter the subject that is to appear in the email message.
4. Click **Save**.

#### Deleting Report Email Delivery

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **General** and click **Search**.
3. Click **Vertical Ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

#### Configuring SFTP Report Delivery

##### Adding SFTP Report Delivery

1. From the **Administration** menu, select **Interfaces**, then select **Delivery Management**.
2. Select **General** and click **Search**.
3. In the General section > SFTP Delivery Settings, click **New** and enter the following:
  - a. **Property:** Enter or select the property.
  - b. **Destination:** Enter the SFTP endpoint.
  - c. **Description:** Enter a description.
4. Click **Save**.

##### Editing SFTP Report Delivery:

1. From the **Administration** menu, select **Interfaces**, then select **Delivery Management**.
2. Select **General** and click **Search**.
3. In the General section > SFTP Delivery Settings, select the SFTP entry, click the **Vertical ellipsis** and then select **Edit**.
4. Update details.
5. Click **Save**.

##### Deleting SFTP Report Delivery

1. From the **Administration** menu, select **Interfaces**, then select **Delivery Management**.
2. Select **General** and click **Search**.
3. In the General section > SFTP Delivery Settings, select the SFTP entry, click the **Vertical ellipsis** and then select **Delete**.
4. Click **Delete** to confirm.

#### Configuring Reservation Confirmation Delivery

##### Editing Reservation Confirmation Email Delivery

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **Confirmations** and click **Search**.

3. Click **Edit** and enter the following details:
  - a. **Property:** Enter or select the property.
  - b. **Activate Email Delivery:** Select to activate email delivery functionality.
  - c. **HTML Format Delivery:** Select to generate email as embedded HTML.

 **Note:**

All images included in the stationery (such as logos) must be available on a publicly accessible web-server.

- d. **From Email Address:** Enter the sender email address. You can set a "display name" along with the email address, . If you do so, enclose the email address in < and >.
- e. **(SMTP) Server Name:** Enter the FQDN of SMTP Server (Oracle SMTP server).
- f. **User ID:** Enter the user ID for SMTP server.
- g. **Password:** Enter the password for SMTP server.
- h. **Email Subject:** Enter the subject that is to appear in the email message. You can use conditional blocks to dynamically generate a subject line

```
<?><Status>[='RESERVED']Reservation confirmation
#<ConfirmationNumber> for <ResortFullName></?> <?
><Status>[='CANCELLED']Reservation cancellation
#<CancellationNo> for <ResortFullName></?>
```

- i. **Email Body:** When HTML delivery is not selected, the confirmation is attached to email as PDF file; add email body text to display along with the attachment. Use the rich text editor to enter text and select merge codes to display reservation-specific values in the email body. Select the Merge Codes button to view and select from the list to insert merge code into the message body. For example, name and confirmation number merge code can be inserted. Select the Conditions button to insert condition blocks of text in the message. All merge codes will be inserted in the position where your cursor is placed. For more information, see [Using the Rich Text Editor](#).

 **Note:**

Email body is limited to 2000 characters.

4. Click **Save**.

#### Deleting Reservation Confirmation Email Delivery

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **Confirmations** and click **Search**
3. Click vertical ellipsis **Actions** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Confirmation SMS (Text Message) Delivery

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **Confirmations** and click **Search**.
3. In the **Text Message Delivery Settings** panel, click **Edit** and enter the following details:
  - a. **Delivery Method:**
    - i. **URL (HTTP POST):** Post to URL.
    - ii. **Email:** Send as email (email to sms). See [Using the Rich Text Editor](#).
  - b. **Partner/User ID:** Enter the Partner ID or User ID for the delivery provider. This is the Text Messaging Provider name.
  - c. **Service Type/Server:** Enter the service type or SMTP email server address.
  - d. **Service ID/Account:** Enter the service ID or SMTP email server account.
  - e. **Password:** Enter the SMTP email password.
  - f. **URL:** Enter the URL address for the Text Messaging Provider.
  - g. **URL Parameter Format:** Select Text or XML.
  - h. **Timeout in seconds:** Enter the delivery timeout in seconds for the message. Any message exceeding this limit will be timed out.
  - i. **Message Format:** . For email to SMS enter or select the following from the list of values: <TO\_MOBILE>@<URL\_NAME>. The <URL\_NAME> tag is the value from the URL field..
  - j. **Text Message:** Use the rich text editor to enter text and select merge codes to display reservation-specific values in the message. Select the **Merge Codes** button to view and select from the list to insert merge code into the message body. For example, name and confirmation number merge code can be inserted. Select the **Conditions** button to insert condition blocks of text in the message. All merge codes will be inserted in the position where your cursor is placed.
4. Click **Save**.

## Configuring Guest Message Delivery

### Editing Guest Message Email Delivery

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **Guest Messages** and click **Search**.
3. Click **Edit** and enter the following details:
  - a. **Property:** Enter or select the property.
  - b. **Activate Email Delivery:** Select to activate email delivery functionality.
  - c. **From Email Address:** Enter the sender email address. You can set a "display name" along with the email address, . If you do so, enclose the email address in < and >.
  - d. **(SMTP) Server Name:** Enter the FQDN of SMTP Server (Oracle SMTP server).
  - e. **User ID:** Enter the user ID for SMTP server.
  - f. **Password:** Enter the password for SMTP server.

2. Select **Billing Folios** and click **Search**.
3. Click **Edit** and enter the following details:
  - a. **Property**: Enter or select the property.
  - b. **Activate Email Delivery**: Select to activate email delivery functionality.
  - c. **From Email Address**: Enter the sender email address. You can set a "display name" along with the email address, . If you do so, enclose the email address in < and > .
  - d. **(SMTP) Server Name**: Enter the FQDN of SMTP Server (Oracle SMTP server).
  - e. **User ID**: Enter the user ID for SMTP server.
  - f. **Password**: Enter the password for SMTP server.
  - g. **Email Subject**: Enter the subject that is to appear in the email message.
  - h. **Email Body**: The folio is attached to email as PDF file; add email body text to display along with the attachment. Use the rich text editor to enter text and select merge codes to display reservation-specific values in the email body. Select the Merge Codes button to view and select from the list to insert merge code into the message body. For example, name and confirmation number merge code can be inserted. Select the Conditions button to insert condition blocks of text in the message. All merge codes will be inserted in the position where your cursor is placed. For more information, see [Using the Rich Text Editor](#).

 **Note:**

E-mail body is limited to 2000 characters.

4. Click **Save**.

#### Deleting Billing Folios Email Delivery

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **Billing Folios** and click **Search**.
3. Click vertical ellipsis **Actions** and select **Delete**.
4. Click **Delete** to confirm.

#### Configuring SMS (Text Message) to Guest

Used to send Queue room ready notifications to guests via SMS

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **Text to Guest** and click **Search**.
3. In the **Text Message Delivery Settings** panel, click **Edit** and enter the following details:
  - a. **Delivery Method**:
    - i. **URL (HTTP POST)**: Post to URL.
    - ii. **Email**: Send as email (email to sms). See [Using the Rich Text Editor](#).

- b. **Partner/User ID:** Enter the Partner ID or User ID for the delivery provider. This is the Text Messaging Provider name.
  - c. **Service Type/Server:** Enter the service type or SMTP email server address.
  - d. **Service ID/Account:** Enter the service ID or SMTP email server account.
  - e. **Password:** Enter the SMTP email password.
  - f. **URL:** Enter the URL address for the Text Messaging Provider.
  - g. **URL Parameter Format:** Select Text or XML.
  - h. **Timeout in seconds:** Enter the delivery timeout in seconds for the message. Any message exceeding this limit will be timed out.
  - i. **Message Format:** . For email to SMS enter or select the following from the list of values: <TO\_MOBILE>@<URL\_NAME>. The <URL\_NAME> tag is the value from the URL field..
  - j. **Text Message:** Use the rich text editor to enter text and select merge codes to display reservation-specific values in the message. Select the **Merge Codes** button to view and select from the list to insert merge code into the message body. For example, name and confirmation number merge code can be inserted. Select the Conditions button to insert condition blocks of text in the message. All merge codes will be inserted in the position where your cursor is placed.
4. Click **Save**.

#### Configuring SMS (Text Message) to Housekeeping

Used to send Queue room rush room notifications to Housekeeping via SMS

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **Text to Housekeeping** and click **Search**.
3. In the **Text Message Delivery Settings** panel, click **Edit** and enter the following details:
  - a. Delivery Method
    - i. **URL (HTTP POST):** Post to URL.
    - ii. **Email:** Send as email (email to sms). See [Using the Rich Text Editor](#).
  - b. **Partner/User ID:** Enter the Partner ID or User ID for the delivery provider. This is the Text Messaging Provider name.
  - c. **Service Type/Server:** Enter the service type or SMTP email server address.
  - d. **Service ID/Account:** Enter the service ID or SMTP email server account.
  - e. **Password:** Enter the SMTP email password.
  - f. **URL:** Enter the URL address for the Text Messaging Provider.
  - g. **URL Parameter Format:** Select Text or XML.
  - h. **Timeout in seconds:** Enter the delivery timeout in seconds for the message. Any message exceeding this limit will be timed out.
  - i. **Message Format:** . For email to SMS enter or select the following from the list of values: <TO\_MOBILE>@<URL\_NAME>. The <URL\_NAME> tag is the value from the URL field..

- j. **Text Message:** Use the rich text editor to enter text and select merge codes to display reservation-specific values in the message. Select the **Merge Codes** button to view and select from the list to insert merge code into the message body. For example, name and confirmation number merge code can be inserted. Select the **Conditions** button to insert condition blocks of text in the message. All merge codes will be inserted in the position where your cursor is placed.
4. Click **Save**.

## Prerequisites for Configuring Delivery Management

### OPERA Cloud Tasks

**Group:** Interfaces Admin

**Tasks:** Property Interfaces

Delivery Management

- New/Edit Delivery Management
- Delete Delivery Management

## Configuring Device Areas

Device Areas are specific areas or locations on your property where assigned RFID key encoders and EMV PIN Entry devices are located. You can create Device Areas, copy them to respective properties, and then assign each RFID key encoder or EMV PED to a respective device area. When processing payment or encoding a room key, you can use Device Area as a filter, so it is much easier to find the devices assigned to that area.

### Adding Device Areas

1. From the **Administration** menu, select **Interfaces**, and then select **Device Areas**.

 **Note:**

When the OPERA Multi-property Cross Reservation Cloud Service is active, new Device Areas are created by selecting the **Template** tab. Once created, you can copy locators to specific properties using the **Copy** action. Refer to [Copying Configuration Codes to Multiple Properties](#) for more information.

2. Click **New** and complete the following fields:
  - a. **Property.** Enter or search for and select a property for the device area.
  - b. **Code.** Enter a code that briefly describes the device area (for example, FD for front desk, HL for hall, LBBY for lobby, PL for pool, CF for club floor, VIP for VIP lounge, and so on).

- c. **Description.** Enter a description of the device area (for example, front desk, hall area, lobby area, pool, club floor, VIP lounge, and so on).
  - d. **Manage Translations.** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - e. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing Device Areas

1. From the **Administration** menu, select **Interfaces**, and then select **Device Areas**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code then click the **vertical ellipsis** and select **Edit**.
4. Update the configuration..
5. click **Save**.

### Deleting Device Areas

1. From the **Administration** menu, select **Interfaces**, and then select **Device Areas**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code then click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

#### Note:

Device Area codes cannot be deleted if associated to an EMV or RFID Encoder device.

## Desktop ID Document Scanning

### Prerequisites for Desktop ID Scanning

When the Oracle Hospitality OPERA ID Document Scanning Cloud Service is active you can configure and enable the scanning of identification documents using a partner scanning solution and hardware.

ID document scanning is available in the [Identification panel](#) of a guest or contact profile and is also as available as part of the reservation [check-in](#). On completion of an ID document scan, you are presented with the profile information comparison screen, enabling you to retain or overwrite existing values obtained from the scan. In addition to the document data, an image of the ID document may be captured and stored securely as an attachment on the profile. For more information see, [OPERA Controls — Profile](#). Stored ID Document Image Type setting.

### Supported ID Documents Types

- Passport
- Visa
- Drivers License
- ID Card

### Supported ID Scan Vendors

See the Validated Interfaces list available on [Oracle Hospitality Documentation](#).

## Configuring a Desktop ID Document Scanner

### Adding a Desktop ID Document Scanner

1. From the Administration menu, select **Interfaces**, and select **ID Document Scanners**.
2. Click **New** and complete the following:

- a. **Property:** Enter or select the property.
- b. **Scanner Type:** Select the Desktop radio button. If ID Document scanning configuration already exists for the selected property, you are presented with the following warning message: Desktop scanner configuration for [Property Code] already exists. If you continue and save this new configuration it will overwrite the existing record. DELETE IMAGE
- c. **ID Document Scanner:** Enter the partner name or other identifier. This is a free text field.
- d. **URL:** Enter the URL for the ID scanning solution; including domain, port, and resource location . Example: <https://domain.com:443/scan>.
- e. **ID Type Mapping:** Select the applicable [Identification Types](#) for the supportable ID Document Types displayed
  - Drivers License. Select the ID Type for drivers license from the list
  - ID Card. Select the ID Type for ID Card from the list
  - Passport. Select the ID Type for Passport from the list
  - Visa. Select the ID Type for Visa from the list
- Click **Save**.

#### Editing a Desktop ID Document Scanner

1. From the Administration menu, select **Interfaces**, and select **ID Document Scanners**.
2. Select the **ID Document Scanner** configuration entry that has the Desktop column checked.
3. Click the **vertical ellipsis** and select **Edit**.
4. Update the configuration:
  - a. **Inactive:** Select checkbox to mark this integration as inactive.

 **Note:**

Property and Scanner Type are read only.

5. Click **Save**.

#### Deleting a Desktop ID Document Scanner

1. From the Administration menu, select **Interfaces**, and select **ID Document Scanners**.
2. Select the **ID Document Scanner** configuration entry that has the Desktop column checked.
3. Click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Mobile ID Document Scanning

## Prerequisites for Mobile ID Scanning

ID Document Scanning is functionality built to support hotel employees embracing the freedom to greet guests anywhere. Architected to fit into the Cloud-first approach of OPERA Cloud, the integration offer's REST APIs for partners to integrate with and take advantage of the hardware built into the tablet. By initiating the scan process from either the guest profile or during the reservation check-in, the tablet camera is used to take an image of the ID Document. Once you are satisfied with the quality of the image, OPERA Cloud will send it to the partner to analyze the information and return them back to OPERA Cloud. You will be presented with a profile information comparison screen that allows you to select which existing information to overwrite with the data read from the ID Document, which to keep and which to remove. This functionality requires the OPERA Cloud Add-on "Oracle Hospitality OPERA ID Document Scanning Cloud Service" to be active and for the property to contract an integrated vendor.

### Supported ID Documents Types

Passport, Visa, Driver License, and ID Card.

### Supported Vendors

See the Certified Third-Party Interfaces list available on [docs.oracle.com](https://docs.oracle.com)

## Configuring a Mobile ID Document Scanner

### Adding a Mobile ID Document Scanner

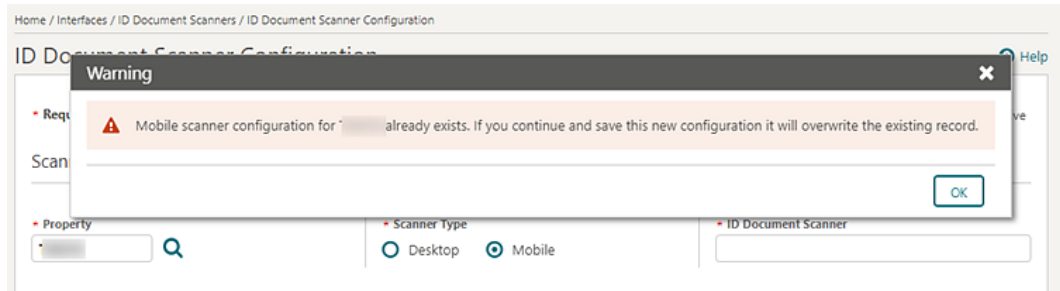

1. From the Administration menu, select **Interfaces**, and select **ID Document Scanner**.
2. Click **New**.

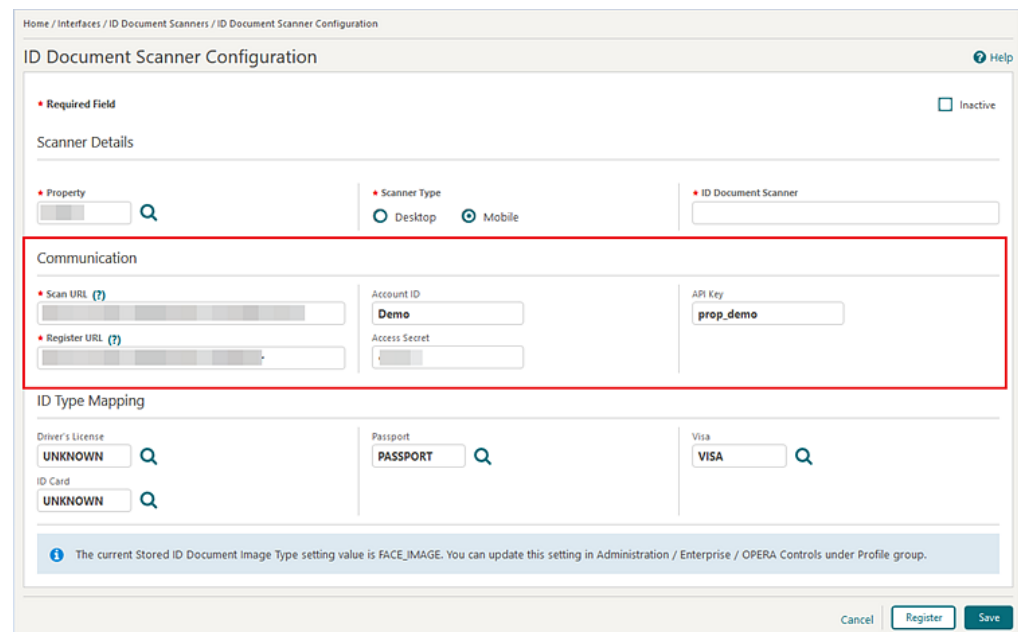

3. Select the **Property** if signed in at Hub level. If signed in at property level, the Property field is populated by default.

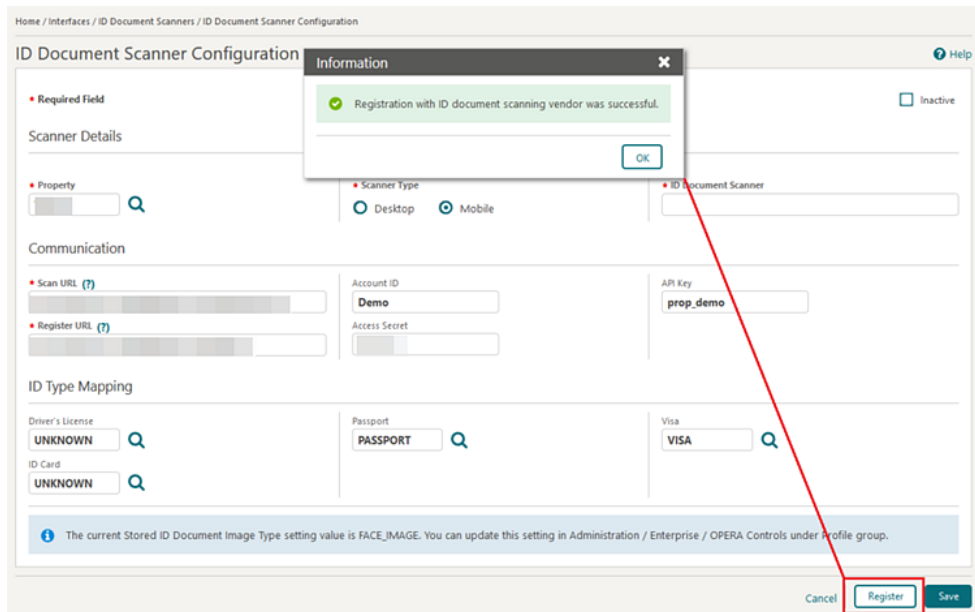

4. Select the **Scanner Type – Mobile** radio button. If ID Document scanning for Desktop configuration already exists for the selected property, you are presented with the following warning message: Mobile scanner configuration for [Property Code] already exists. If you continue and save this new configuration it will overwrite the existing record.

5. Enter the name of the partner into the ID Document Scanner field. This is a free text field.
6. In the Communication section enter details provided by vendor:
  - a. **Scan URL** – enter the full Scan API URL, including domain, port, and resource location. Example: https://domain.com:443/scan.
  - b. **Register URL** – enter the full Register API URL, including domain, port, and resource location. Example: https://domain.com:443/client-register.
  - c. **Account ID**– value provided by vendor if required for their service.
  - d. **Access Secret** – value provided by vendor if required for their service.
  - e. **API Key** – value provided by vendor if required for their service.

7. After entering all values provided by vendor in the Communication section. click **Register** to identify the property to the vendor and generate a security token if entered details are valid.

8. In the ID Type Mapping section, select the **Identification Types** configured in Administration > Client Relations > Geographic Management > Identification Types for the supportable ID Document Types displayed.
9. Click **Save**.

### Editing a Mobile ID Document Scanner

1. From the Administration menu, select **Interfaces**, and select **ID Document Scanner**.
2. Select the ID Document Scanner configuration entry that has the Mobile column checked.
3. Click the **vertical ellipsis** and select **Edit**.
4. The following fields are read only:
  - a. Property
  - b. Scanner Type
5. You can modify the following fields:
  - a. Inactive check box
  - b. ID Document Scanner
  - c. Scan URL
  - d. ID Type Mappings
  - e. Register URL
  - f. Account ID
  - g. Access Secret
  - h. API Key
6. If any of the Communication fields related to scan registration (including Register URL, Account ID, Access Secret, and API Key) have been updated, click **Register** to update the vendor registration and token.

7. Click **Save**.

#### Deleting a Mobile ID Document Scanner

1. From the Administration menu, select **Interfaces**, and select **ID Document Scanner**.
2. Select the **ID Document Scanner** configuration entry that has the Mobile column checked.
3. Click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

#### Inactivating a Mobile ID Document Scanner

1. From the Administration menu, select **Interfaces**, and select **ID Document Scanner**.
2. Select the **ID Document Scanner** configuration entry that has the Mobile column checked.
3. Click the **vertical ellipsis** and select **Edit**.
4. Select the **Inactive** check box in the upper right corner.
5. Click **Save**.

## Configuring Printers

Configure email-addressable printers so these printers can be selected as a destination when generating reports and stationery. Reports generated are emailed directly to the printer and printed.

The printers configured here can be selected for Scheduled Reports. For more information, see [Managing Scheduled Reports](#) .

When the Alerts OPERA Control is active you can nominate printers as **Use (in) Alert Printing** and select a nominated printer in [Global Alert Rules](#) and [Reservation Alerts](#).

#### Note:

Printers that are not email addressable do not need to be configured. Reports can be previewed as PDF and then printed to a local or network printer using the locally installed printer on the workstation or tablet.

#### Adding Printers

1. From the **Administration** menu, select **Interfaces**, and then select **Printer Configuration**.
2. Click **New** and complete the following:
  - a. **Location:**
    - i. **Global:** Printer is shared across multiple properties when a users location is set to a Hub.
    - ii. **Property:** Printer is property-specific, select the property from the list.
  - b. **Output Type:**

- i. **Print:** Not used.
    - ii. **Email:** The print job will be delivered via email directly to the printer (the printer has email-to-print capabilities).
  - c. **Printer (Name):** The name of the printer that will display to users. Use a naming convention that indicates the physical location of the printer to help users correctly identify the printer.
  - d. **Printer Location:** Not used (displayed based on output type = printer).
  - e. **Printer Email Address:** Enter the email address for the printer.
  - f. **Description:** Enter additional information for the printer - for example the manufacturer, model, install date.
  - g. **Folio Printer:** Enabled when the Credit Bill OPERA Control is active or when the Fiscal Folio Printing OPERA Control is active, or for selected country modes.
  - h. **Use Alert Printing:** Enabled when the Alerts OPERA Control is active. Select this check box if this email addressable printer is to be available for printing alerts. For more information, see [Reservation Alerts](#).
  - i. **Print Tasks:** Select various print tasks that the printer will support. Highlight the required print tasks in the left pane; I and click > to move print tasks to the selected panel; use >> to select all.
3. Click **Save**.

### Editing Printers

1. From the **Administration** menu, select **Interfaces**, and then select **Printer Configuration**.
2. Enter search criteria and click **Search**.
3. In the search results, select the printer and click the vertical ellipsis **Actions** menu, and then click **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Printers

1. From the **Administration** menu, select **Interfaces**, and then select **Printer Configuration**.
2. Enter search criteria and click **Search**.
3. In the search results, select the printer and click the vertical ellipsis **Actions** menu, and then click **Delete**.
4. Click **Delete** to confirm.

### Copying Printers

You can copy or clone a printer. This is a new printer in edit state. You can make changes to these printers on the Printer Configuration screen with defaults from the printer copied.

For example, if you have 1, 2, and 3 front desk printers, setup printer 1, then select this printer and copy. On the Printer Configuration screen, update the information for

printer 2, such as Printer Name, Printer Location, Description as so on and save it. Repeat the process for printer 3.

1. From the **Administration** menu, select **Interfaces**, and then select **Printer Configuration**.
2. In the search results, select the printer and click the vertical ellipsis **Actions** menu, and then click **Copy**. New printer configuration is displayed, with the details populated from source / original printer.
3. Update the information, such as Printer Name, Printer Location, Description.
4. Click **Save**.

## Configuring Stationery Custom Message Texts

### [Prerequisites for Custom Message Texts for Stationery](#)

This feature enables you to configure messages strings to output on stationery and can be used to add promotional text or other message texts that you want to include on the document generated. The message text can be updated in OPERA Cloud anytime in the future without having to make further modifications to the customized stationery template.

Two message codes are available for each stationery template; these message codes are suffixed with the property\_code to support different messages per property.

When the Multi-language OPERA Control is active you can also add translation for each message string so that the correct text is fetched and output based on the profile language.

### Editing Custom Message Texts

1. From the **Administration** menu, select **Interfaces**, and select **Report Text Configuration**.
2. Enter search criteria then click Search.
3. Select the message text in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Add your custom text in the Reports Text box.
  - a. Click **Manage Translation** to added translated text for each language. (Available when the Multi-language OPERA Control is active).

5. Click **Save**.

## Configuring Property Interface

### Prerequisites for Configuring Property Interfaces

Property Interfaces are integrations with systems such as door locks, on-demand video, call accounting, PBX, voicemail, point of sale, minibar, payment, building management and WIFI/Internet; that require reservation check in and check out details. Events such as an arrival, room move or departure trigger room and reservation details to be sent to various property interfaces. Systems such as call accounting, minibar and point of sale can also post charges to reservation and AR accounts. Integration with payment solutions, for pre-auth, settlement and refunds is also processed via property interfaces.

### Adding a Property Interface

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Click **New** and enter the following details:
  - a. **Property:** Enter or select the property from the list.
  - b. **Interface Type:** Select the interface type from the list.
  - c. **Product Code:** Enter the product ID of the validated system.
  - d. **IFC8 Product Code:** Will auto-populate based on the Product Code.
  - e. **Name:** Enter the display name of the system for identification.
  - f. **All Charges:** Choose the default transaction code for any incoming posting messages.
  - g. **Cashier ID:** Select a cashier ID for the interface from the list. See [Configuring Cashiers](#).
  - h. **Path ID:** Enter the Path ID of the interface. In most cases this is a **1**. Only if the vendor is supporting multi-property with one interface, is there a need for more. If setting up a multi-property, the first property must be defined as **1**, and all subsequent properties must follow sequentially and with no gaps.
  - i. **Machine:** Select a server name from the list (where Machines have been configured) where the IFC Controller is installed.
  - j. **Timeout:** Enter a timeout value in seconds on how long the UI will wait for response on outbound messages (Room key and credit card transaction requests).
  - k. **Version:** Will auto-populate once an IFC Controller connects with the specific interface.

3. Click **Save**.
4. Refer to the Table 16-24 Property Interface Detail Links in the section below for complete interface configuration.

### Editing a Property Interface

**Note:**

Interface configuration uses a [presentation page](#), select or customise the presentation style to suit your needs.

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface, then click **vertical ellipsis** and click **Edit**.
  - a. Update configuration. See the table 16.3 below.
  - b. **Inactive:** Select checkbox to inactivate the interface (not yet in use for outbound/inbound messages).
4. Click **Save**.

**Table 16-15 Property Interface Detail Links**

Links to Property Interface Configuration		
<a href="#">Property Interface Primary Information</a>	<a href="#">Property Interface Class of Service</a>	<a href="#">Property Interface Room Status</a>

#### Property Interfaces

- New/Edit Property Interfaces
- Delete Property Interfaces

## Configuring Property Interface Rights

### Adding Property Interface Rights

1. From the Administration menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface, then click the vertical ellipsis and select **Edit**.
4. In the Interface Rights panel, click **New** and complete the following
  - a. **Category**: Select the category to configure the right for. Selecting a category is optional, however if left blank, all available interface rights will appear in the Right field list of values.
  - b. **Right**: Select the interface right from the list
  - c. **Code**: Enter a unique code for the interface right. This field is limited to five characters. This value will appear on the Room Status or Group Bar/Unbar screens when working with the Interface Menu screen.
  - d. **Description**: Enter a short description of the interface right. This value will appear on the Room Status or Group Bar/Unbar screens when working with the Interface Menu screen.
5. Click **Save**.

### Editing Property Interface Rights

1. From the Administration menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface, then click the vertical ellipsis and select **Edit**.
4. In the Interface Rights panel,
  - a. Select the right, then click the vertical ellipsis and select **Edit**.
  - b. Update configuration.
5. Click **Save**.

### Deleting Property Interface Rights

1. From the Administration menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface, then click the vertical ellipsis and select **Edit**.
4. In the Interface Rights panel,
  - a. Select the right, then click the vertical ellipsis and select **Delete**.
  - b. Click **Delete** to confirm.

## Configuring Property Interface Primary Information

### Editing Interface Primary Information

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface, then click the **vertical ellipsis** and select **Edit**.
4. Select the Primary Information link.
5. Select **Edit**.
  - a. **IFC8 Product Code**: Will auto-populate based on the Product Code.
  - b. **Name**: Enter the display name of the system for identification.
  - c. **Cashier ID**: Select a cashier ID for the interface from the list. See [Configuring Cashiers](#).
  - d. **Path ID**: Enter the Path ID of the interface. In most cases this is **1**. Only if the vendor is supporting multi-property with one interface, is there a need for more. If setting up a multi-property, the first property must be defined as **1**, and all subsequent properties must follow sequentially and with no gaps.
  - e. **Machine**: Select a server name from the list (where Interfaces>Machines have been configured) where the IFC Controller is installed.
  - f. **Timeout**: Enter a timeout value in seconds on how long the UI will wait for response on outbound messages (Room key and credit card transaction requests).
  - g. **Version**: Will auto-populate once an IFC Controller connects with the specific interface.
  - h. **Message Expires After (minutes)**: Enter the number for minutes that will remove a stale outbound record from the table at startup of the interface.
  - i. **Menu Type**: Select the system type menu that can be used.
  - j. **Menu Name**: Enter a descriptive name for the menu item (Miscellaneous>Property Interface Control).
  - k. **Inactive**: Select checkbox to inactivate the interface (not yet in use for outbound/inbound messages).
6. Click **Save**.

## Configuring Property Interface General Information

The General panel allows you to configure several general interface settings, including night audit commands, EFT setup, wake-up call options, video checkout options, and bill display options. Depending on the interface type you are setting up, the available configurations vary. Refer to the Property Interfaces General Information table below.

### Editing Interface General Information

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.

3. Select the interface, then click the **vertical ellipsis** and select **Edit**.
4. Select the General Information link.
5. Select **Edit**.
  - See Table Property Interfaces General Information for the applicable interface type.
  - To configure the interface rights. See [Configuring Interface Rights](#).
6. Click **Save**.

**Table 16-16 Property Interfaces General Information****EFT Interfaces**

- **Handle night audit commands.** Select the check box to notify the vendor, mostly EFT and FIAS interfaces, that the PMS night audit was started and stopped and that the PMS business date had been rolled. If this check box is not selected, the vendor will not be notified of this information.
- **CC Vault Function.** Select the check box to indicate that the EFT interface supports the credit card vault functionality. Selection of this check box will activate the credit card vault interface functionality for this property. See **Credit Card Vault** for details.
- **Regular Transaction.** Selected by default when creating a new EFT Interface, indicates whether or not this interface handles regular transactions.
- **Courtesy Card Handling.** An indication of whether or not the interface handles courtesy cards.
- **Port.** The port that the interface is configured on.
- **IP Address.** The IP address used for the interface.
- **Prepaid Card.** Select this check box to configure the stored value system. An interface should be selected as a Stored Value System when the vendor supports the ability to activate, issue reload, and redeem stored value cards (gift cards).
- **Create Prepaid during Checkin.** Displayed when the Stored Value System check box is selected, select to create a stored value account when the guest is checking in.
- **Show Prepaid Pin.** Displayed when the Stored Value System check box is selected, select the check box to display the stored value pin that is provided by the vendor. The vendor can define whether a PIN is in use or not. This should not be checked unless the Vendor has indicated they will use PINs.
- **Device.** Displayed when the Stored Value System check box is selected, select the device from the list of values if a device is used to read the stored value card (gift card). An example would be an RFID device. This field is rarely populated.
- **Show Prepaid Trxn.** Displayed when the Stored Value System check box is selected, select to choose OPERA Cloud Transactions, Vendor Transactions, or both OPERA Cloud and Vendor Transactions. The option that is selected controls what is displayed in the Stored Value Account Maintenance screen for the interface and the specific stored value account.
- **Prepaid Redeem Trx.** Displayed when the Stored Value System check box is selected, select the stored value redeem transaction method from the drop down list. The transaction code that is selected here will be used any time a stored value account is redeemed.

**CCW Interfaces**

Table 16-16 (Cont.) Property Interfaces General Information

**EFT Interfaces**

- **Send AR Auth Type.** Select to send the AR authorization type to the vendor. This check box should be selected if credit card authorizations will be used for AR Accounts. See [AR Credit Cards](#) for details.
-  **Note:**

The Send AR Auth Type check box cannot be selected at the same time as the Enable DB Verification check box.
- **Allow CC Cancel Transactions.** Select to allow credit card transaction cancelations with the CCW interface. This check box should be selected in order to send a notice to the vendor that the credit card settlement transaction was canceled for any reason (e.g., communication error). This notice will only be sent one time to the vendor when the credit card transaction is canceled.
- **CC Vault Function.** Select the check box to indicate that the CCW interface supports the credit card vault functionality. Selection of this check box will activate the credit card vault interface functionality for this property. See [Credit Card Vault for details](#). The credit card vendor must support the vault functionality. Verify with the vendor that it is supported before activating this function.
- **Enable Resend.** Select to enable the functionality to resend any credit card settlement payments for a reservation, deposit, or AR account that may have failed due to a disruptive event, such as a session disconnect or an error occurred before the posting could be made, and the settlement was sent to the interface. OPERA Cloud would then check on the settlement posting the next time the reservation is accessed and for any payments that were sent to the interface but not posted to OPERA Cloud another settlement would be initiated with an extra field in the IFC request indicating to the vendor that the record is a resend. This includes any postings from [Billing, Deposits](#), or [AR](#) and will not include postings from [Passer By, Post It](#), and Fiscal Payments.
-  **Note:**

During the resend of the failed posting, if the interface returns an error/ failed status, no reprocessing of the failed resend will occur and no posting will be completed.
- **Enable DB Verification.** Select to allow direct bill authorizations and settlements with the interface. See [Direct Bill Authorizations and Settlements](#) for details.
-  **Note:**

Selection of the Enable DB Verification check box displays the CASHIERING > DIRECT BILL AUTHORIZATIONS AND SETTLEMENTS application parameter.
-  **Note:**

The Enable DB Verification check box cannot be selected at the same time as the Send AR Auth Type check box.
- **Enable Failover.** This check box can be selected to use the Failover URL for all credit card transactions. When it is not selected, then the URL address defined in the URL field will be used for all credit card transactions.

**Table 16-16 (Cont.) Property Interfaces General Information****EFT Interfaces**

- **Card Present Flag.** Only displayed when MICROS Payment Gateway is the active Credit Card IFC. Select this check box to display a Card Present check box on the Payment, Deposit, and Post It screens. The will allow the user to check this check box if a credit card is present at the time of the payment. This is useful to provide an indicator to the Credit Card Vendor to follow a different process depending on the card present or not.
- **URL.** The URL of the CCW Interface.
- **Send End of Day.** An indication of whether or not information is sent as part of the end of day routine.
- **Send Enhanced Fields.** Select to send additional fields for a credit card transaction request that include Workstation, RoomNum, OriginalAuthSequence, Version, and CardType. With most CCW vendors, these fields will be required.
- **Prepaid Card.** Select this check box to configure the stored value system. An interface should be selected as a Stored Value System when the vendor supports the ability to activate, issue reload, and redeem stored value cards (gift cards).
- **Create Prepaid during Checkin.** Displayed when the Stored Value System check box is selected, select to create a stored value account when the guest is checking in.
- **Show Prepaid Pin.** Displayed when the Stored Value System check box is selected, select the check box to display the stored value pin that is provided by the vendor. The vendor can define whether a PIN is in use or not. This should not be checked unless the Vendor has indicated they will use PINs.
- **Device.** Displayed when the Stored Value System check box is selected, select the device from the list of values if a device is used to read the stored value card (gift card). An example would be an RFID device. This field is rarely populated.
- **Show Prepaid Trxn.** Displayed when the Stored Value System check box is selected, select to choose OPERA Cloud Transactions, Vendor Transactions, or both OPERA Cloud and Vendor Transactions. The option that is selected controls what is displayed in the Stored Value Account Maintenance screen for the interface and the specific stored value account.
- **Prepaid Redeem Trx.** Displayed when the Stored Value System check box is selected, select the stored value redeem transaction method from the drop down list. The transaction code that is selected here will be used any time a stored value account is redeemed.
- **Failover URL.** The Failover URL as specified by the Credit Card Interface vendor is displayed here. This URL will be used for all credit card transactions when the Enable Failover check box is selected, in case the vendor's main system goes down for an extended period. When the Enable Failover check box is not selected, then the URL address defined in the URL field will be used for all credit card transactions.

**SVS Interfaces**

Table 16-16 (Cont.) Property Interfaces General Information

**EFT Interfaces**

- **URL.** The interface URL.
-  **Note:**  
When using the URL field for the interface, the IP Address and Port fields do not need to be populated.
- **IP Address.** The IP address. The IP Address that is entered needs to match with the interface machine that the .exe is running on.
- **Port.** The port that the interface is configured on. The Port number that is entered needs to match with the Port number configured for the SVS Interface Type configuration file.
-  **Note:**  
The IP Address and Port fields need to be populated when using a Socket type approach.
- **Stored Value System.** Select this check box to configure the stored value system. An interface should be selected as a Stored Value System when the vendor supports the ability to activate, issue reload, and redeem stored value cards (gift cards).
- **Create SV during Checkin.** Displayed when the Stored Value System check box is selected, select to create a stored value account when the guest is checking in.
- **Show Stored Value Pin.** Displayed when the Stored Value System check box is selected, select the check box to display the stored value pin that is provided by the vendor. The vendor can define whether a PIN is in use or not. This should not be checked unless the Vendor has indicated they will use PINs.
- **Device.** Displayed when the Stored Value System check box is selected, select the device from the list of values if a device is used to read the stored value card (gift card). An example would be an RFID device. This field is rarely populated.
- **Show SV Trxn.** Displayed when the Stored Value System check box is selected, select to choose OPERA Cloud Transactions, Vendor Transactions, or both OPERA Cloud and Vendor Transactions. The option that is selected controls what is displayed in the Stored Value Account Maintenance screen for the interface and the specific stored value account.
- **SV Redeem Trx.** Displayed when the Stored Value System check box is selected, select the stored value redeem transaction method from the drop down list. The transaction code that is selected here will be used any time a stored value account is redeemed.

**DLS (Key Encoding) Interfaces**

**Table 16-16 (Cont.) Property Interfaces General Information****EFT Interfaces**

- **Handle night audit commands.** Select the check box to notify the vendor, mostly EFT and FIAS interfaces, that the PMS night audit was started and stopped and that the PMS business date had been rolled. If this check box is not selected, the vendor will not be notified of this information.
- **On Line Key System.** An indication of whether or not this is an ONLINE key system and this relates to if whether the vendor supports KeyDataChange Requests or not. What determines if a Key Interface is an ONLINE key system or not is that for an ONLINE key system, the vendor requires the KeyRequest, KeyAnswer, KeyRead (Optional), KeyDelete (Optional), and KeyDataChange. If the key system is an OFFLINE system, then the vendor requires only the KeyRequest and KeyAnswer (KeyRead and KeyDelete are optional).
- **Allow Multiple Room Selection for Keys.** An indication of whether or not multiple rooms can be accessed from the same key through this interface, for example one key can be used for connecting rooms that are part of a reservation.
- **Send Track2 Data.** An indication of whether or not Track2 data is sent to the vendor. This is a sequence number that connects the key card to the room. This sequence number can be manipulated if a membership is attached or if the key card is also being used as a gaming card.
- **Send Track1 Data.** An indication of whether or not Track1 data is sent to the vendor. Track 1 is used by the key vendors to get specific data from the PMS and use as needed or for printing on the keycard. It is configurable as a User Defined Format where fields can be chosen from the reservation tables or a literal expression can be entered. One of the uses for Track1 would be to send the Membership ID when the keycard is also used as a gaming card.
- **Display Key Pin Code.** Available only for DLS Interface Types with a KSS Menu Type, select to display the PIN code used to access the guest room. This PIN code is passed in Track3 generated by the key vendor and sent to OPERA Cloud or a Kiosk terminal to provide to the guest instead of a key card.
- **Delete IFC Keys on KeyDelete.** Select to delete the IFC\_KEYS record at the time of Check Out or when a Checked In Reservation is Canceled.
- **Default All Print Details On.** Checked (default) to automatically select all the Print Detail fields when requesting a Room Key, Universal Card, or Gaming Card. Unchecked does not select all the Print Detail fields automatically. When requesting a key, select/deselect any of the Print Details on the Card Details To Be Printed screen. Print Details are available when configured on the Class of Service tab with the PRINT menu Right (in the grid).

**PBX Interfaces**

Table 16-16 (Cont.) Property Interfaces General Information

**EFT Interfaces**

- **Handle night audit commands.** Select the check box to notify the vendor, mostly EFT and FIAS interfaces, that the PMS night audit was started and stopped and that the PMS business date had been rolled. If this check box is not selected, the vendor will not be notified of this information.
- **Enable Rollup Transactions.** Select to enable a rollup transaction functionality for outgoing transactions requested by the interface to display on the vendor's side in a view of the folio as one bill item. Rollup transactions are multiple transactions that were made on the same day that have the same Reference (e.g., Check Number), and can be rolled into one line item. These are identified by having a + sign next to the line item on the Billing screen for example.
- **Phone Display Name.** When the guest calls the Front Desk, selecting this check box displays the primary sharer's name on the Front Desk phone display. A room with sharers will send the guest name from the first reservation checked in for that room to the IFC Vendor; this name will continue to be sent in the messages for all of the following sharer Check-Ins and any reservation changes. A room with no sharers will send the guest name that is on the reservation.

 **Note:**

The name that is displayed can manually be changed to one of the other sharer names from Miscellaneous > Interfaces > Interfaces > Display Name after all sharers are checked in. The Display field can only be selected for one guest name per room.

- **Bill display options.** The following bill display options are available.
  - **User defined folio.** Select this option to select a user-defined folio window where the bill is displayed. When you select this option, the Folio field appears. Select the drop-down arrow and select this folios where the bill will be displayed.
  - **Guest folio.** Select this option to display windows that have the guest profile linked to the folio window.
  - **Off.** Select this option to turn the bill display options off through the video system.
- **Video checkout options.** The following video checkout options are available for VID interfaces only.
  - **Allow video check out.** Select this option to allow videos to be checked out from this room. Once this option is selected, you can alter the Check credit limit, Check balance, and Check routing settings.
  - **Check credit limit.** Not currently used.
  - **Check balance.** Select this option to check the video balance against the total balance in OPERA Cloud.
  - **Check routing.** Select this option to allow the charges to go to another room.
- **Wakeup call options.** The following wake up call options are available.
  - **Handle wakeup calls.** Select this option to allow wake up calls through the video or phone system.
  - **OPERA.** If the OPERA button is selected, then a WakeupSet is sent to IFC8 at the time of the wake up call. The Number of Retries field needs to be completed to define the number of times OPERA Cloud attempts to resend the message to the vendor before the call is finally set to unsuccessful (if there is no response or there is an unsuccessful response). The Retry Interval field also needs to be completed to define the amount of time between the retries.
  - **Vendor.** If this option is selected, the WakeupSet message is instantly communicated with the vendor phone system, and the vendor handles the

**Table 16-16 (Cont.) Property Interfaces General Information**

---

**EFT Interfaces**

---

wake up call. This option is only visible if the Handle wake up calls option is selected. If this option button is selected, the Number of Retries field should be set to 0 and the value entered in the Retry Interval field is the amount of time that OPERA Cloud waits for a response from vendor before the call is set to unsuccessful.

- **Number of retries.** Indicates the number of times to retry a wake up call if the original wake up call fails. This option is mandatory if the Handle wake up calls option is selected, and should be set to "0" if the Vendor option button is selected.
- **Retry interval.** If the OPERA button is selected, this is the retry interval of the wake up calls, in seconds. For example, if 60 is entered, then the wakeup call will be retried every minute until the number entered in the Number of Retries is reached. If the Vendor option button is selected, the value entered is the amount of time that OPERA Cloud waits for a response from vendor before the call is set to unsuccessful. This option is mandatory if the Handle wakeup calls option is selected.
- **Wake Set.** Available when the OPERA button is selected, enter the number of seconds the call should be sent to the vendor before the actual set time of the call in OPERA Cloud. For example, if the wakeup call is set for 08:00 but it needs to go to the vendor at 07:58, then the Wake Set would be set to 120. If the field is blank, then the wakeup call will go out at the set wake time.

**VID Interfaces**

**Table 16-16 (Cont.) Property Interfaces General Information****EFT Interfaces**

- **Handle night audit commands.** Select the check box to notify the vendor, mostly EFT and FIAS interfaces, that the PMS night audit was started and stopped and that the PMS business date had been rolled. If this check box is not selected, the vendor will not be notified of this information.
- **Enable Rollup Transactions.** Select to enable a rollup transaction functionality for outgoing transactions requested by the interface to display on the vendor's side in a view of the folio as one bill item. Rollup transactions are multiple transactions that were made on the same day that have the same Reference (e.g., Check Number), and can be rolled into one line item. These are identified by having a + sign next to the line item on the Billing screen for example.
- **Bill display options.** The following bill display options are available.
  - **User defined folio.** Select this option to select a user-defined folio window where the bill is displayed. When you select this option, the Folio field appears. Select the drop-down arrow and select this folios where the bill will be displayed.
  - **Guest folio.** Select this option to display windows that have the guest profile linked to the folio window
  - **Off.** Select this option to turn the bill display options off through the video system.

**Video checkout options.** The following video checkout options are available for VID interfaces only.

- **Allow video check out.** Select this option to allow videos to be checked out from this room. Once this option is selected, you can alter the Check credit limit, Check balance, and Check routing settings.
- **Check credit limit.** Not currently used.
- **Check balance.** Select this option to check the video balance against the total balance in OPERA Cloud.
- **Check routing.** Select this option to allow the charges to go to another room.

Wakeup call options. The following wake up call options are available.

- **Handle wakeup calls.** Select this option to allow wake up calls through the video or phone system.
- **OPERA.** If the OPERA button is selected, then a WakeupSet is sent to IFC8 at the time of the wake up call. The Number of Retries field needs to be completed to define the number of times OPERA Cloud attempts to resend the message to the vendor before the call is finally set to unsuccessful (if there is no response or there is an unsuccessful response). The Retry Interval field also needs to be completed to define the amount of time between the retries.
- **Vendor.** If this option is selected, the WakeupSet message is instantly communicated with the vendor phone system, and the vendor handles the wake up call. This option is only visible if the Handle wake up calls option is selected. If this option button is selected, the Number of Retries field should be set to "0" and the value entered in the Retry Interval field is the amount of time that OPERA Cloud waits for a response from vendor before the call is set to unsuccessful.
- **Number of retries.** Indicates the number of times to retry a wake up call if the original wake up call fails. This option is mandatory if the Handle wake up calls option is selected, and should be set to "0" if the Vendor option button is selected.
- **Retry interval.** If the OPERA button is selected, this is the retry interval of the wake up calls, in seconds. For example, if 60 is entered, then the wakeup call will be retried every minute until the number entered in the Number of Retries is reached. If the Vendor option button is selected, the value entered is the amount of time that OPERA Cloud waits for a response from vendor before the call is set to unsuccessful. This option is mandatory if the Handle wake up calls option is selected.
- **Wake Set.** Available when the OPERA button is selected, enter the number of seconds the call should be sent to the vendor before the actual set time of the call in

**Table 16-16 (Cont.) Property Interfaces General Information**

**EFT Interfaces**

OPERA Cloud. For example, if the wakeup call is set for 08:00 but it needs to go to the vendor at 07:58, then the Wake Set would be set to 120. If the field is blank, then the wakeup call will go out at the set wake time.

**TIK Interfaces**

- **URL.** The interface URL.
- **Default Trx.** Select a default transaction code as an alternate transaction code if a Ticket Package cannot post to the packages transaction code.

**MSC Interfaces**

**Table 16-16 (Cont.) Property Interfaces General Information****EFT Interfaces**

- **Handle night audit commands.** Select the check box to notify the vendor, mostly EFT and FIAS interfaces, that the PMS night audit was started and stopped and that the PMS business date had been rolled. If this check box is not selected, the vendor will not be notified of this information.
- **Enable Rollup Transactions.** Select to enable a rollup transaction functionality for outgoing transactions requested by the interface to display on the vendor's side in a view of the folio as one bill item. Rollup transactions are multiple transactions that were made on the same day that have the same Reference (e.g., Check Number), and can be rolled into one line item. These are identified by having a + sign next to the line item on the Billing screen for example.
- **Video checkout options.** The following video checkout options are available for VID interfaces only.
- **Allow video check out.** Select this option to allow videos to be checked out from this room. Once this option is selected, you can alter the Check credit limit, Check balance, and Check routing settings.
- **Check credit limit.** Not currently used.
- **Check balance.** Select this option to check the video balance against the total balance in OPERA Cloud.
- **Check routing.** Select this option to allow the charges to go to another room.

**Bill display options.** The following bill display options are available.

- **User defined folio.** Select this option to select a user-defined folio window where the bill is displayed. When you select this option, the Folio field appears. Select the drop-down arrow and select this folios where the bill will be displayed.
- **Guest folio.** Select this option to display windows that have the guest profile linked to the folio window.
- **Off.** Select this option to turn the bill display options off through the video system.

**Wakeup call options.** The following wake up call options are available.

- **Handle wakeup calls.** Select this option to allow wake up calls through the video or phone system.
- **OPERA.** If the OPERA button is selected, then a WakeupSet is sent to IFC8 at the time of the wake up call. The Number of Retries field needs to be completed to define the number of times OPERA Cloud attempts to resend the message to the vendor before the call is finally set to unsuccessful (if there is no response or there is an unsuccessful response). The Retry Interval field also needs to be completed to define the amount of time between the retries.
- **Vendor.** If this option is selected, the WakeupSet message is instantly communicated with the vendor phone system, and the vendor handles the wake up call. This option is only visible if the Handle wake up calls option is selected. If this option button is selected, the Number of Retries field should be set to 0 and the value entered in the Retry Interval field is the amount of time that OPERA Cloud waits for a response from vendor before the call is set to unsuccessful.
- **Number of retries.** Indicates the number of times to retry a wake up call if the original wake up call fails. This option is mandatory if the Handle wake up calls option is selected, and should be set to "0" if the Vendor option button is selected.
- **Retry interval.** If the OPERA button is selected, this is the retry interval of the wake up calls, in seconds. For example, if 60 is entered, then the wakeup call will be retried every minute until the number entered in the Number of Retries is reached. If the Vendor option button is selected, the value entered is the amount of time that OPERA Cloud waits for a response from vendor before the call is set to unsuccessful. This option is mandatory if the Handle wake up calls option is selected.
- **Wake Set.** Available when the OPERA button is selected, enter the number of seconds the call should be sent to the vendor before the actual set time of the call in OPERA Cloud. For example, if the wakeup call is set for 08:00 but it needs to go to

**Table 16-16 (Cont.) Property Interfaces General Information****EFT Interfaces**

the vendor at 07:58, then the Wake Set would be set to 120. If the field is blank, then the wakeup call will go out at the set wake time.

**MBS Interfaces**

**Handle night audit commands.** Select the check box to notify the vendor, mostly EFT and FIAS interfaces, that the PMS night audit was started and stopped and that the PMS business date had been rolled. If this check box is not selected, the vendor will not be notified of this information.

**Enable Rollup Transactions.** Select to enable a rollup transaction functionality for outgoing transactions requested by the interface to display on the vendor's side in a view of the folio as one bill item. Rollup transactions are multiple transactions that were made on the same day that have the same Reference (e.g., Check Number), and can be rolled into one line item. These are identified by having a + sign next to the line item on the Billing screen for example.

**Bill display options.** The following bill display options are available.

- **User defined folio.** Select this option to select a user-defined folio window where the bill is displayed. When you select this option, the Folio field appears. Select the drop-down arrow and select this folios where the bill will be displayed.
- **Guest folio.** Select this option to display windows that have the guest profile linked to the folio window.
- **Off.** Select this option to turn the bill display options off through the video system.

**Wakeup call options.** The following wake up call options are available.

- **Handle wakeup calls.** Select this option to allow wake up calls through the video or phone system.
- **OPERA.** If the OPERA button is selected, then a WakeupSet is sent to IFC8 at the time of the wake up call. The Number of Retries field needs to be completed to define the number of times OPERA Cloud attempts to resend the message to the vendor before the call is finally set to unsuccessful (if there is no response or there is an unsuccessful response). The Retry Interval field also needs to be completed to define the amount of time between the retries.
- **Vendor.** If this option is selected, the WakeupSet message is instantly communicated with the vendor phone system, and the vendor handles the wake up call. This option is only visible if the Handle wake up calls option is selected. If this option button is selected, the Number of Retries field should be set to 0 and the value entered in the Retry Interval field is the amount of time that OPERA Cloud waits for a response from vendor before the call is set to unsuccessful.
- **Number of retries.** Indicates the number of times to retry a wake up call if the original wake up call fails. This option is mandatory if the Handle wake up calls option is selected, and should be set to "0" if the Vendor option button is selected.
- **Retry interval.** If the OPERA button is selected, this is the retry interval of the wake up calls, in seconds. For example, if 60 is entered, then the wakeup call will be retried every minute until the number entered in the Number of Retries is reached. If the Vendor option button is selected, the value entered is the amount of time that OPERA Cloud waits for a response from vendor before the call is set to unsuccessful. This option is mandatory if the Handle wakeup calls option is selected.
- **Wake Set.** Available when the OPERA button is selected, enter the number of seconds the call should be sent to the vendor before the actual set time of the call in OPERA Cloud. For example, if the wakeup call is set for 08:00 but it needs to go to the vendor at 07:58, then the Wake Set would be set to 120. If the field is blank, then the wakeup call will go out at the set wake time.

**All Other Interfaces**

**Table 16-16 (Cont.) Property Interfaces General Information****EFT Interfaces**

If configuring an interface other than an EFT, CCW, PBX, VID, SVS, MAK, TIK, MSC, MBS, or key card (DLS) interface, the General panel contains of the following options, depending on the interface you select in the Interface Status screen

**Handle night audit commands.** Select the check box to notify the vendor, mostly EFT and FIAS interfaces, that the PMS night audit was started and stopped and that the PMS business date had been rolled. If this check box is not selected, the vendor will not be notified of this information.

**Enable Rollup Transactions.** Select to enable a rollup transaction functionality for outgoing transactions requested by the interface to display on the vendor's side in a view of the folio as one bill item. Rollup transactions are multiple transactions that were made on the same day that have the same Reference (e.g., Check Number), and can be rolled into one line item. These are identified by having a + sign next to the line item on the Billing screen for example.

**Video checkout options.** The following video checkout options are available.

- **Allow video check out.** Select this option to allow videos to be checked out from this room. Once this option is selected, you can alter the Check credit limit, Check balance, and Check routing settings.
- **Check credit limit.** Not currently used.
- **Check balance.** Select this option to check the video balance against the total balance in OPERA Cloud.
- **Check routing.** Select this option to allow the charges to go to another room.

 **Note:**

Video checkout options are only available for VID Interfaces.

**Bill display options.** The following bill display options are available.

- **User defined folio.** Select this option to select a user-defined folio window where the bill is displayed. When you select this option, the Folio field appears. Select the drop-down arrow and choose the folios where the bill will be displayed.
- **Guest folio.** Select this option to display windows that have the guest profile linked to the folio window.
- **Off.** Select this option to turn the bill display options off through the video system.

**Wakeup call options.** The following wake up call options are available.

- **Handle wakeup calls.** Select this option to allow wake up calls.
- **OPERA.** If this option is selected, OPERA communicates with the phone system two minutes before a wake up call is scheduled to notify it of the wake up call. This option is only visible if the Handle wake up calls option is selected.
- **Vendor.** If this option is selected, the wake up call information is instantly communicated with the phone system, then they handle the wake up call. This option is only visible if the Handle wake up calls option is selected.
- **Number of retries.** Indicates the number of times to retry a wake up call if the original wake up call fails. This option is only visible if the Handle wake up calls option is selected.
- **Retry interval.** The interval of the wake up calls, in seconds. This option is only visible if the Handle Wakeup calls option is selected.

## Configuring Property Interface Transaction Codes

The Transaction Codes panel allows you to configure how the interface handles posting accounts, sales itemizers, and transaction codes. This would be used by any external system posting charges to OPERA Cloud . For example: minibar, POS or PBX.

### Editing Interface Transaction Codes

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface, then click the **vertical ellipsis** and select **Edit**
4. Select the Transaction Codes link.
5. Select **Edit**.
  - a. **Cash/Credit Card Postings:** Setting this value will allow you to configure the posting of cash and credit card payments from the Point of Sales (POS) system. Your selection options are:
    - i. **Do not post:** Selecting this option does not post to a customer account.
    - ii. **Post to A/C, no autobalance:** Selecting this option posts a charge to the customer's account, but does not auto-balance the account. Selecting this option also activates the Posting Accounts and Transaction codes option buttons, allowing you to configure the posting account and transaction code settings.
    - iii. **Post to A/C autobalance:** Selecting this options posts a charge to the customer's account and auto-balances the account. Selecting this option also activates the Posting Accounts and Transaction Codes option buttons, allowing you to configure the posting account and transaction code settings.
  - b. **Subtotal Postings:** Setting this value allows you to configure splitting of the incoming charge from the point of sales system. Your selection options are:
    - i. **Do not post:** Selecting this option does not post to the customer account.
    - ii. **Split TIP only:** Selecting this option splits out the tip only. Selecting this option also activates the Posting Accounts, Sales Itemizers, and Transaction Codes option buttons, allowing you to configure the posting account and transaction code settings.
    - iii. **Full split:** Selecting this option allows you to split incoming charges from the point of sales system to the various folios associated with the account. Selecting this option also activates the Posting Accounts, Sales Itemizers, and Transaction Codes option buttons, allowing you to configure the posting account, sales itemizers, and transaction code settings.
  - c. **Difference Posting:** Select a value from the list for when the IFC8 program detects a difference between the total amount and the sum of the individual itemizers, such as Sales-, Tax, Discount itemizers and so on sent by the vendor.

- **Post:** The interface posts the sales items amounts plus the Difference amount to guest folio using the selected transaction code.
  - **Ignore:** The interface ignores the difference amount and would post the Sales items amount in guest folio to the appropriate transaction codes and the default if needed.
  - **Reject:** The interface rejects the posting of a check when there is a difference in total amount and sales items amount.
6. **Posting Accounts:** It determine how payments are posted from the point of sales system
- a. Click **New**:
    - i. **Posting Type:** Select a value from the list.
    - ii. **Account:** Available for the PM Account and PM Account (No Autobalancing) posting types, select the account number (room) from the list.
    - iii. **Transaction Code:** Available for the PM Account posting type, select the transaction code.
    - iv. **Payment Method:** Enter the payment method code from the POS.
    - v. **Sales Outlet:** Enter the sales outlet code that corresponds to where the posting was originated, for example bar, restaurant, store, etc.
  - b. Click **Save**.
  - c. To Edit, click the **Vertical Ellipsis** and select **Edit**.
  - d. To delete, click the **Vertical Ellipsis** and select **Delete**.
7. **Sales Itemizers:** Determines how payments are posted from the point of sales system.
- a. Click **New**:
    - i. **Code:** Select a value from the list. ST1 – ST16 (Sales Itemizer1 – Sales Itemizer16), DC1 – DC16 (Discount Itemizer 1 – Discount Itemizer16), SC1 – SC16 (Service Charge 1 – Service Charge 16), TX1 - TX63 (Tax1 - Tax63).
    - ii. **Post Number:** Enter number identifying each record uniquely. There must be no gaps in the numbering. For example, a valid entry is "1, 2, 3, 4, 5, 6, 7". An invalid entry is "1, 2, 4, 5, 7", where the numbers 3 and 6 are missing.
    - iii. **Factor:** Enter a multiplying factor that the itemizer is multiplied with. The standard is 1.
    - iv. **Posting Description:** Enter a posting description reference (Food, Beverage, Tobacco, misc. etc.).
  - b. Click **Save**.
    - i. **Transaction Codes:** This allows you to configure the different methods for routing a charge to the different transaction codes configured in OPERA Cloud. If you select a different value, OPERA Cloud displays a message informing you that current transaction code settings will be deleted.
    - ii. **Dialed Digits:** Select the number of dialed digits that the call accounting system should look at for the unit charge, and/or the number of dialed digits that OPERA Cloud should look at for transactions. For example, if 4 is selected in this field and the number dialed is "1-239-555-1212", the call accounting system will only look at "1239" (the first four digits) as the unique identifier of the unit charge. OPERA Cloud will look at these same four digits as the unique identifier for transactions.

- iii. **All Charges:** This is where you select your default transaction code for this interface. Note: When configuring transaction codes that will be applied to charges posted by interfaces (e.g., telephone and minibar interface postings), the Post Exclusive Tax as Itemizer OPERA Control will only apply if the Generates Inclusive option is not selected. If the Generates Inclusive option is selected, OPERA Cloud will still generate taxes and service charges according to the generates configuration and lump the generates with the base charge. For example, if the Post Exclusive Tax as Itemizer OPERA Control is active and the transaction code assigned to the phone interface postings in Interface Configuration has the Generates Inclusive option selected, OPERA Cloud will not itemize taxes on phone postings received through the interface. See [Transaction Code Configuration](#) for details.
      - iv. **Minibar Charges:** This is your default minibar transaction code.
    - c. To Edit, click the **Vertical Ellipsis** and select **Edit**.
    - d. To delete, click the **Vertical Ellipsis** and select **Delete**.
  - 8. Transaction Code Mapping
    - a. Click **New**:
      - i. **Default:** Select a transaction code from the list.
      - ii. **Description:** Enter a description.
      - iii. **Revenue Center:** Enter the revenue center.
      - iv. **Code:** Select a transaction code from the list ; repeat for each itemizer listed.
    - b. Click **Save**.
  - 9. Click **Save**.

## Configuring Property Interface Rooms

The rooms panel allows you to filter, add, and edit room entries for interfaces

### Adding Interface Rooms

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface, then click **vertical ellipsis** and click **Edit**.
4. Select the Rooms link.
5. Click **New** and enter the following details:
  - a. **Room:** Select a room from the list.
  - b. **Line Number:** Enter a telephone line number.
  - c. **Type:** Select a type from the list
    - i. **R** - Room type
    - ii. **#** - Extension number
    - iii. **H** - House extension

- iv. **B - Booth** (telephone booth)
  - d. **Wake Up Call**: Select an option from the list.
  - e. **Do Not Disturb**: Select an option from the list.
  - f. **Class of Service**: Select an option from the list.
  - g. **Direct Inward Dial**: Select an option from the list.
  - h. **Message Waiting**: Select an option from the list.
  - i. **Mask Dial Number**: Select an option from the list.
- 6. **Requires line number setup**: Select check box when configuring a Door Lock Interface.
- 7. Click **Save**.

### Importing Interface Rooms

The Import Rooms option allows you to configure line number to room number translation for an interface. For example, the phone lines associated with a hotel room.

Select room type(s) from the lower panel and configure the applicable line types. Complete the following desired fields and select the **Import**.

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface, then click **vertical ellipsis** and click **Edit**.
4. Select the Rooms link.
5. Click the **vertical ellipsis** and select **Import**.
  - a. **Number of Lines**: Select the number of lines that you would like to import for your IFC room configuration. For example, if a room has three lines - extension 1, extension 2, and a fax line, you would select 3.
  - b. **Remove leading Zeros**: Select this check box to remove the leading zeroes on a room number prior to adding a prefix
  - c. **Line Number Prefix**: Enter the number that you would like to precede the room number when creating your external line number. You need to do this for each line that exists in the room (the number of lines are defined in the Number of Lines field).
  - d. **Add to Line Numbers**: Enter the numerical value that you would like to add to the line number during an import. For example, if the room number is 100 and you enter 50 in this field, when the import is done, the line number would become 150.
  - e. **Setup Mask**: Depending on the number of lines defined in the Number of Lines field, one or more Setup Mask - Line xx where "xx" is the line number. Select the link to access the Setup Mask screen and enter the mask field information for the selected line type. .
    - i. **Wake Up Call**: Select an option from the list.
    - ii. **Do Not Disturb**: Select an option from the list.
    - iii. **Class of Service**: Select an option from the list.
    - iv. **Direct Inward Dial**: Select an option from the list.
    - v. **Message Waiting**: Select an option from the list.
    - vi. **Mask Dial Number**: Select an option from the list.

- f. **Room Types:** Select one or more room types.
- g. Click **Import**.

#### Editing Interface Rooms

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface, then click **vertical ellipsis** and click **Edit**.
4. Select the Rooms link.
5. Select the Room, then click **vertical ellipsis** and click **Edit**.
6. Update configuration.
7. Click **Save**.

#### Deleting Interface Workstation Setup

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface, then click **vertical ellipsis** and click **Edit**.
4. Select the Rooms link.
5. Select the Room, then click **vertical ellipsis** and click **Delete**.
6. Click **Delete** to confirm.

## Configuring Property Interface Class of Service

#### Editing Interface Class of Service

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface, then click the **vertical ellipsis** and select **Edit**.
4. Select the Class of Service link and click **Edit**.
  - a. Voice Mail Notification
    - i. **Disabled.:** Select to disable voice mail notifications in OPERA Cloud.
    - ii. **Enabled:** Select to enable voice mail notifications in OPERA Cloud.
  - b. Message light
    - i. **On/Off:** Select to turn on the message light when a new voice mail arrives.
    - ii. **Not changeable:** Select to indicate that the message light is not supported.
  - c. Automatic Check-in/out
    - i. **Disabled:** Select to disable automatic check-in/out.

- ii. **Enabled:** Select to allow automatic check-in/out.
  - iii. **Enable with room move:** Select this checkbox to allow automatic check-in/out when a room switch occurs only. Note: On a checked-in reservation, changes to any of the following fields will trigger a guest update record message to the IFC Vendor (upon saving the reservation) - Last Name, First Name, Language, Title, Vip Code, Departure Date, Specials, Member Number, Member Level, and Member Type.
  - d. **Enable with Queue Room:** Select this checkbox to send a check-in message to the interface system when the reservation room is placed on queue. Expectation is that the vendor system handles the logic when guest's are currently in the room. (Available when the Queue Room OPERA Control is active).
  - e. Name Display Format
    - i. **Standard format:** Select a value from the list to determine how the guest's name is displayed in the external system.
    - ii. **User defined format:** Select this check box to configure an expression for different data to be provided to the external system.
      - **Defined Format:** Select from the list of values to configure the specific tag for the data.
      - **Format Expression Table:** Select a value from the list for the table to be used to retrieve the data. Table Columns will display in the Available panel for selection.
      - **Format Expression:** Select values from the Available panel and click > to move to the Selected panel. The Format Expression field will be updated based on your selection and can have free text added.
-  **Note:**

Upon creating a new MICROS POS of M87 or SPH, the User Defined Format is automatically activated and populated with the required data fields supported by this Vendor.
- f. **Disable Room Equipment @ Check-in:** Select this check box to disable sending a RoomEquipment message to the vendor immediately after the GuestIn message when the RoomEquipment does not change any guest rights. This is to eliminate processing unnecessary records when vendors support all messages but the needed data (Class of Service, No Post, etc.) is included in or understood with the GuestIn message.
  - g. **Disable Room Equipment @ Check-out.:** Select this check box to disable sending a RoomEquipment message to the vendor immediately before the GuestOut message when the RoomEquipment does not change any guest rights. This is to eliminate processing unnecessary records when vendors support all messages but the needed data (Class of Service, No Post, etc.) is included in or understood with the GuestOut message.
  - h. **Disable Guest Data Change @ Check-out.:** Select this check box to disable sending a GuestdataChange message to the interface at the time of a Checkout. This is to eliminate processing unnecessary records when vendors support all messages but the needed data is included in or understood with the GuestOut message.

5. Click **Save**.

## Configuring Property Interface Postings

### Editing Interface Postings

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface, then click the **vertical ellipsis** and select **Edit**.
4. Select the Postings link and click **Edit**.
  - a. **Reference Field.** Select the value you would like to see entered in the Reference field for postings. This field allows you to provide additional information about the charge. When the IFC>Swap Reference and Supplement application parameter is set to Y and a value exists in the Reference field, any interface posting's will have the information selected in this field displayed under the Supplement column. Depending on the how the default folio is setup it will either display supplement or reference field information on it. Switching this parameter will make the posted charge have different data in the different fields and will display differently on the billing screen as well as the folio.

#### **Note:**

If attributes are selected for the Reference or Supplement fields, those will take precedence over the attribute selected for this field. But if both of Reference or Supplement fields are blank, then this attribute selected will be used.

- i. **Do not post:** Does not record and zero charge postings.
  - ii. **Post:** Posts zero charge postings.
  - iii. **Only to IFC\_HIST:** Only sends zero charge postings to the history file.
  - iv. **Post and to IFC\_HIST:** Records zero charge posting and records them to the history file.
  - v. **Post to IFC\_HIST:** Select this check box to have the interface record a copy of all postings to the IFC\_HIST table.
- a. **Zero Charge Postings.:** Set this option to configure how the interface will deal with zero charge postings.
  - b. **Postings.** Set this option to configure the different checks the interface should make before allowing a posting. Your selection options are:
    - i. **Do not check NOPOST flag :** When selected, sends 990000000000 as the credit limit to the interface.
    - ii. **Check NOPOST flag only:** When selected, sends 990000000000 as the credit limit to the interface when the No Post flag is not selected on the

reservation. If the No Post flag is selected on the reservation, then the credit limit will be 0.

- iii. **Check credit limit:** The following displays how the credit limit will be calculated when this is selected for Postings: Actual Credit Limit(greatest of the approval amount or the credit limit set for the guest payment method) - Guest folio balance - Charges due for remaining stay.
  - iv. **Check credit limit per Guest:** Controls on an interface-by-interface basis which interfaces should check the individual spending limit. When selected, the interface will check to see if there is available spending for that particular guest's key, and will then further check that there is enough credit on the room.
  - v. **Number Masking:** This setting allows you to indicate whether or not to mask any details displayed in the supplement field. Select a value from the list.
- d. **Default Charge:** This default charge will be used when the incoming minibar posting has none or invalid OPERA Cloud articles in the PostSimple message.
- e. **Override Credit Limit:** This check box controls whether to allow an override of the credit limit on postings. When this check box is selected, a PostRequest that is over the credit limit will fail with No Credit response unless the payment method included in the PostRequest is configured to a Room posting type that is associated with the Manager Override (see [Configuring Property Interface Transaction Codes](#) for details).
- f. **Check "NoPost" during guest information change:** Select this checkbox to check the NoPost field on the reservation when updating the guest information.
- g. **IFC Generates Tax.:** The functionality for this check box is also based on how the IFC Post Exclusive Tax As Itemizer OPERA Control is set. Selecting the check box will have the IFC include the tax and leaving the check box un-selected will have PMS generate the tax. But when the IFC Post Exclusive Tax As Itemizer OPERA Control is active and this check box is selected, then exclusive taxes will be posted as itemizers by the POS Interface.
- h. **Charge Scaling:** This option allows you to set the various charge scaling options. Use this to divide or multiply a charge.
- Post Type:** Select the posting type. The available options are:
- i. **Direct:** Uses the actual dollar amount from the message.
  - ii. **Minibar:** Uses the dollar amount from the Article Configuration, not from the message.
  - iii. **Phone:** Uses the dollar amount, based on the transaction configuration, from the Trans Codes IFC Configuration Tab, not from the message.
- i. **Reference:** Click to select the attributes to include in the Reference field for postings. Select values from the Available panel and click > to move to the Selected panel. When attributes are selected here, they will take precedence over the item selected in the Reference Field drop down list field.
- j. **Supplement:** Click to select the attributes to include in the Supplement field for postings. Select values from the Available panel and click > to move to the Selected panel. When attributes are selected here, they will take precedence over the item selected in the Reference Field drop down list field.
5. Click **Save**.

## Configuring Property Interface Room Status

The Interface Room Status panel enables changing the configuration of the room status.

### Editing Interface Room Status

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface, then click the **vertical ellipsis** and select **Edit**
4. Select the Room Status link.
5. Select **Edit**.
  - a. **Send Room Status**. Selecting this check box will send **Checked In, Check Out, Out of Order, Out of Service, Clean, Dirty, Inspected, and Pickup** (Entry-Code set up in the grid) to the Interface any time the room status is changed in OPERA Cloud. The Interface sends the message to the external system with the updated status of the room. This room status could then be reflected, for example, on a display floor panel for each floor as a reference for housekeeping attendants.

 **Note:**

This requires a standalone interface with a partner that supports outgoing Room Status schema only (not through the same Interface that supports guest information and incoming Room Status messages).

6. Click **Save**.
7. **Custom Room Status Translations**
  - a. Click **New**
    - i. **Custom Room Status**: Select a value from the list.
    - ii. **Entry-Code**: Enter the code provided by the vendor to indicate the specific room status that is sent and received by the interface.
    - iii. **Description**: A free-form text description of the room status.
  - b. Click **Save**.
  - c. To Edit, select the translation entry, click the **vertical ellipsis** and select **Edit**
  - d. To Delete, select the translation entry, click the **vertical ellipsis** and select **Delete**

## Configuring Property Interface Translation

The Translation panel is used to configure additional instructions and information for the Interface.

### Editing Interface Translation

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface, then click the **vertical ellipsis** and select **Edit**
4. Select the Translation link.
5. Select **Edit**.
  - a. **Guest Number Length**: This determines how long the `resv_name_id` is that is sent to the vendor. Some vendor systems only support a certain number of digits in the message.
  - b. **Guest Message ID Length**: Select the length of the `messageid` sent to the vendor. Message IDs are assigned to text messages sent to vendor, and some vendors only support up to a certain number of digits in the message.
  - c. **Group Number Length**: This determines the length of the Block ID sent to the vendor. Some vendor systems only support a certain number of digits in the message.
  - d. **Select Transaction (Type)**: Select the appropriate option to indicate the type of translation and then select the **New** or **Edit** actions to work with that translation type.
    - i. **Merchant ID**. This is used by some EFT Interfaces. When this is selected, the Origin Code and Merchant ID columns appear in the grid to the right.
    - ii. **Article Number**. Select to translate the article number between OPERA Cloud and the vendor. Refer to [Articles](#) for additional information on article numbers.
    - iii. **Language Code**. Select to translate the language used between OPERA Cloud and the Vendor system.
    - iv. **Key Options**. Select to set up interface key option translations and define how the key options interact with IFC8. When this option button is selected, the OPERA Key Option, IFC8 Key Option, Priority, and Position columns appear in the grid. Select the **New** or **Edit** buttons to create new or edit existing key options. The Key Options Translation - New or Edit screens appear. Complete the fields below and select the **OK** button.
      - i. **OPERA Key Option**. Select the OPERA key option from the list of values. The key options list of values are defined in the property [preferences](#) setup.
      - ii. **IFC8 Key Option**: Enter a 1 or 0 (on or off).
      - iii. **Priority**: Enter the priority of the key option. This allows for greater flexibility when setting up multiple key option configurations.
      - iv. **Position**: Enter the position of the key option within the IFC8 interface configuration.
  - e. **Translation**:
    - i. Click **New** to add Translation.:
      - i. Add details.
      - ii. Click **Save**.
    - ii. To Edit, click the **vertical ellipsis** and select **Edit**.

- iii. To delete, click the **vertical ellipsis** and select **Delete**.
6. Click **Save**.

## Configuring Property Interface Workstation (Encoder) Setup

The Workstation Setup panel allows you to setup the room key encoders for your door lock system.

Prior to adding Workstations/Encoders, [configure Device Areas](#) in order to group key encoders into physical areas at your property.

### Adding Interface Workstation Setup

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface, then click **vertical ellipsis** and click **Edit**.
4. Select the Workstation Setup link.
5. Click **New** and enter the following details:
  - a. **Terminal**: Enter the terminal ID for the workstation.
  - b. **Device IP / Encoder Number**: Enter the ID or encoder number for the RFID encoder device.
  - c. **Device Area**: Enter or select the area where the workstation device physically resides at your property.
  - d. **Location**: Enter a location of the encoder at your property.
  - e. **Type**: Enter or select the type of encoder.
6. Click **Save**.

### Editing Interface Workstation Setup

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface, then click **vertical ellipsis** and click **Edit**.
4. Select the Workstation Setup link.
5. Select the Workstation to update, then click **vertical ellipsis** and click **Edit**.
6. Update configuration.
7. Click **Save**.

### Deleting Interface Workstation Setup

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface, then click **vertical ellipsis** and click **Edit**.
4. Select the Workstation Setup link.

5. Select the Workstation to update, then click **vertical ellipsis** and click **Delete**.
6. Click **Delete** to confirm.

## Configuring Property Interfaces Unit Charges

The Unit Charge panel allows you to configure the unit prices for a PBX phone system. When a call is made, OPERA Cloud looks at all defined variables/parameters to try and identify the call and assign a unit charge. If OPERA Cloud is unable to identify the call based on the variables/parameters defined in the system, OPERA Cloud identifies the call as a House call and the default charge is used.

### Editing Post Unit Charges

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface, then click the vertical ellipsis and select **Edit**.
4. Select the **Unit Charges** link and then click **Edit**.
5. **Post unit charge based on**. Select a value from the list:
  - a. Meter pulse
  - b. Total Amount
  - c. Auto choose
6. Click **Save**.

### Adding Property Interface Unit Charges

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface, then click the vertical ellipsis and select **Edit**.
4. Select the **Unit Charges** link and then click **New**.
  - a. **Trunk ID**. Enter the trunk ID. A trunk can be defined as a set of phone line going out of or coming into the hotel. A single property can have several trunks. For example, one trunk could be strictly used for local calls and another trunk could be strictly used for international calls.
  - b. **Line Type**. Select the line type. The options are:
    - R1 (Line 1)
    - R2 (Line 2)
    - B (Booth)
    - H (House)
  - c. **VIP code**. Select the VIP code.
  - d. **Default Charge**. Enter the default charge. When a call is made, OPERA Cloud looks at all defined variables/parameters to try and identify the call and assign a unit charge. If OPERA Cloud is unable to identify the call based on the variables/parameters defined in the system, OPERA Cloud identifies the call as a House call and the value entered in this field is used as the default charge.

- e. **Tariff.** Enter the tariff number. The tariff number allows you to charge a different monetary value for each line type. For example, tariff 1 may be for line 1 and tariff 2 may be for a house line.
5. Click **Save**.

### Editing Property Interface Unit Charges

#### Note:

When editing existing unit charges, charges with an identical trunk ID/line type/VIP code/tariff combinations are grouped together.

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface, then click the vertical ellipsis and select **Edit**.
4. Select the **Unit Charges** link.
5. Select the charge unit then click the vertical ellipsis and select **Edit**.
6. Update details.
7. Click **Save**.

### Deleting Property Interface Unit Charges

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface, then click **vertical ellipsis** and click **Edit**.
4. Select the **Unit Charges** link.
5. Select the charge unit then click the vertical ellipsis and select **Delete**.
6. Click **Delete** to confirm.

## Configuring Property Interface Machines

Configure OPERA Cloud with the machine name(s) where the OPERA IFC Controller is deployed to communicate with IFC8.exe's and OPERA Web-service.

### Adding Property Interface Machines

1. From the **Administration** menu, select **Interfaces**, and select **Machines**.
2. Click **New** and complete the following:
  - a. **Machine:** Enter the computer name
  - b. **Program:** Select a program path from the list
  - c. **Controller Port:** Enter or select a port number.

3. Click **Save**.

#### Editing Property Interface Machines

1. From the **Administration** menu, select **Interfaces**, and select **Machines**.
2. Select the machine, then click the vertical ellipsis **Actions** menu and select **Edit**.
3. Update details.
4. Click **Save**.

#### Deleting Property Interface Machines

1. From the **Administration** menu, select **Interfaces**, and select **Machines**.
2. Select the machine, then click the vertical ellipsis **Actions** menu and select **Delete**.
3. Click **Delete** to confirm.

## Configuring Scheduled (Leisure) Activities

### [Prerequisites for Scheduled Activities](#)

The follow topics relate to the setup required for integrating with a leisure activity scheduling solution.

## Prerequisites for Scheduled Activities

### Integrations

- Oracle Hospitality OPERA HTNG Interface Cloud Service

### OPERA Cloud Tasks

**Group:** Interfaces Admin

**Tasks:** Property Interfaces

- Access to Scheduled Activities Configuration
- New/Edit Scheduled Activity Status
- Delete Scheduled Activity Status
- New/Edit Scheduled Activity Location
- Delete Scheduled Activity Location
- New/Edit Scheduled Activity Types
- Delete Scheduled Activity Types

## Configuring Scheduling Activities Location

The OPERA Cloud integration with an External Activities Scheduler system requires you to identify the locations where scheduled activities take place so that OPERA Cloud can distinguish these, internally, from locations set up for other purposes .

### Adding Scheduled Activities Locations

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Locations**.
2. Click **New** and enter the following details:
  - a. **Property**: Enter or select the property.
  - b. **Locations**: Enter a code for the location.
  - c. **Description**: Enter a status description.
3. Click **Save**.

### Editing Scheduled Activities Locations

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Locations**.
2. Enter search criteria and click **Search**.
3. Select the status code, click the **vertical ellipsis** and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Scheduled Activities Locations

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Locations**.
2. Enter search criteria and click **Search**.
3. Select the status code, click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Scheduling Activities Status Codes

The OPERA Cloud integration with an External Activities Scheduler system requires you to identify the status codes for scheduled activities so that OPERA Cloud can distinguish these, internally, from status codes set up for other purposes.

### Adding Scheduled Activities Status Codes

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Status Codes**.
2. Click **New** and enter the following details:
  - a. **Property**: Enter or select the property.
  - b. **Status Code**: Enter a code for the status.
  - c. **Description**: Enter a status description.
  - d. **Application**: Select an application for this status code from the list.
  - e. **Language**: Select a language from the list.
  - f. **Priority**: Select a priority to assign to the status from the list.

3. Click **Save**.

#### Editing Scheduled Activities Status Codes

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Status Codes**.
2. Enter search criteria and click **Search**.
3. Select the status code, click the **vertical ellipsis** and select **Edit**.
4. Update details.
5. Click **Save**.

#### Deleting Scheduled Activities Status Codes

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Status Codes**.
2. Enter search criteria and click **Search**.
3. Select the status code, click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Scheduling Activities Types

The OPERA Cloud integration with an External Activities Scheduler system requires you to identify the activity types for scheduled activities so that OPERA Cloud can distinguish these, internally, from activities set up for other purposes.

#### Adding Scheduled Activities Types

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Types**.
2. Click **New** and enter the following details:
  - a. **Property**: Enter or select the property.
  - b. **Locations**: Enter a code for type.
  - c. **Description**: Enter a status description.
3. Click **Save**.

#### Editing Scheduled Activities Types

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Types**.
2. Enter search criteria and click **Search**.
3. Select the status code, click the **vertical ellipsis** and select **Edit**.
4. Update details.
5. Click **Save**.

#### Deleting Scheduled Activities Types

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Types**.

2. Enter search criteria and click **Search**.
3. Select the status code, click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring UDF Mapping

UDF Mapping is used to configured customer tags for an outgoing XML message used with external systems (such as OWS, HTNG). For example, if your property uses UDF10 on a profile to store EmergencyContact; in UDF Mapping you would configure the label (tag) in the profile XML message to be **EmergencyContact** instead of the XML containing the tag **UDF10**.

### Editing UDF Flex Field Mapping

1. From the **Administration** menu, select **Interfaces**, then select **UDF Mapping**.
2. Select **Reservation** or **Profile** and enter UDF flex field and click **Search**.
3. In the search result, select the field and click the vertical ellipsis and select **Edit**.
  - a. **Label**: Enter an XML label for the flex field.
  - b. **Active**: Select to activate UDF mapping for the field.
  - c. **Update Allowed**: Select to allow update of the the UDF field by external systems (such as OWS). If it is not selected, this UDF is read only by external systems.
4. Click **Save**.

# Part IV

## Role Manager

This part of the OPERA Cloud User Guide contains information on managing OPERA Cloud users and configuring OPERA Cloud roles and tasks.

**Note:**

OPERA Cloud users and their role assignments are setup in Shared Security Domain.

# Managing Roles

## Prerequisites for Managing Roles

When you create roles in Oracle Identity Manager (OIM), you must import and assign tasks (privileges) to these roles in OPERA Cloud. Additionally, the users you create in OIM must be assigned roles (Chain and/or Property). However, role assignment alone does not grant users access to properties. To have access to properties, users must also be assigned to one or more [hubs](#).

In Role Manager, there are two levels of roles:

- **Chain Roles:** Enable the same privileges across all properties in the chain (tenancy).
- **Property Roles:** Typically created from a template (template roles), these roles assign privileges for a single property. When the Property Role without Template OPERA Control is active an independent property role can be created which is not based on a template role.

A user can have one or multiple roles assigned to them, which can be Chain or Property roles or a combination of both. This provides you with flexibility in designing the access privileges that best suit your business requirements.

## Property Role Examples

An example of a user with a property role would be a Front Desk user working at a single property. This user would have access to the default hub plus a property role.

An example of a user with multiple property roles would be a Reservation Manager responsible for a single hotel but requiring different levels of access. This user would have the default hub assigned to them plus a Reservation Agent property role and the Reservation Manager property role for elevated privileges.

## Chain Role Examples

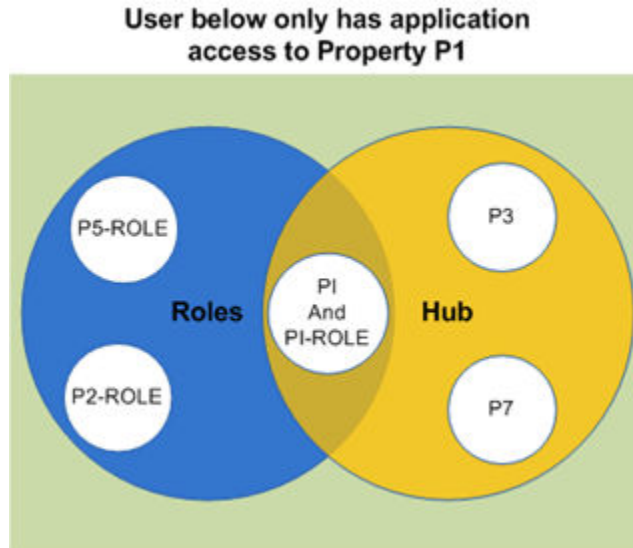

An example of a user with a chain role would be a Regional General Manager responsible for multiple hotels and the same privileges across all of them. If this user requires access to all properties in the chain with the same privileges, this user would have the default hub and a chain role assigned to them. However, if this user only needs access to a subset of properties in the chain, the administrator could create a new hub with only that subset of properties assigned to them. That user would be granted access to this new hub as well as a chain role assigned.

An example of a user with a combination of chain and property roles would be a Revenue Manager requiring access to multiple properties within a chain but only elevated access to select properties. Limited access to some or all properties in the chain is provided through a chain role and either the default hub or a new hub with a subset of properties. Elevated access to select properties is provided through property roles.

The following figure illustrates the configuration of a user's assigned property roles and assigned hub. In this figure, P1 (Property 1) and P1-Role (Property 1 Role) are the only intersecting access credentials when looking at the roles and properties attached to this

user's assigned hub. As a result, a user with this configuration can only access the P1 Property.

**Figure 17-1 Assigned Property Roles and Hub**

## Prerequisites for Managing Roles

### OPERA Cloud Tasks

**Group:** Role Manager

**Tasks:** Manage Roles

- Manage Property Role Templates
- Manage Chain Roles and Tasks
- Manage Property Roles and Tasks
- Apply Templates to Property Role
- Assign Tasks to Property Roles without Template

## Configuring Chain Roles

Chain Roles are created in Oracle Identity Manager (OIM) initially, then added in OPERA Cloud.

### Adding a Chain Role

Roles created in Oracle Identity Manager (OIM) appear with a red triangle and exclamation mark to indicate the role does not exist in OPERA Cloud.

1. From **OPERA Cloud Role Manager**, select **Manage Chain Roles**.

2. Enter search criteria, then click **Search**.
3. Select the role created in OIM (red triangle), then click the vertical ellipsis Actions menu and select **Create Role from LDAP**.
4. The Manage Role page appears from which you can grant various tasks to the Chain Role. For more information, see [Assigning Tasks to a Role](#).
5. From the top panel of the Manage Role screen, complete the following fields:
  - a. **Role**: This field is read-only and displays the name of the role as it was configured in OIM.
  - b. **Display Name**: Enter the display name for the role in OPERA Cloud.
  - c. **Description**: Enter a description of the role in OPERA Cloud.
6. Click **Save**.

#### Editing a Chain Role

1. From **OPERA Cloud Role Manager**, select **Manage Chain Roles**.
2. Enter search criteria, then click **Search**.
3. Select the role, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Under **Available Tasks**, select or deselect the assigned tasks from the role. For more information, see [Assigning Tasks to a Role](#) for more information.
5. Click **Save**.

#### Viewing Users Assigned to a Chain Role

1. From **OPERA Cloud Role Manager**, select **Manage Chain Roles**.
2. Enter search criteria, then click **Search**.
3. Select the role, then click the vertical ellipsis **Actions** menu and select **View Users**.
4. The Users screen appears with the User ID and Display Name for each user.

#### Deleting a Chain Role

1. From **OPERA Cloud Role Manager**, select **Manage Chain Roles**.
2. Enter search criteria, then click **Search**.
3. Select the role, then click the vertical ellipsis **Actions** menu and select **Delete Role from Database**.
4. Click **Yes** to confirm the deletion.

## Configuring Template and Property Roles

### [Prerequisites for Configuring Template and Property Roles](#)

Template roles are available as a way to maintain the same privileges (tasks) across multiple properties.

Property roles are then created from template roles. You can remove tasks from a property role based on a template role; however, tasks cannot be assigned to a property role if the template role does not already have those tasks assigned.

When the Property Role without Template OPERA Control is active you can also configure property roles without the need for a template role.

An administrator can remove tasks from a property role; however, tasks cannot be added to a property role if the template role does not already them. The benefit of a template role is to maintain the same privileges across multiple properties.

### Configuring Property Roles based on a Template Role

A property role can be based on a template role and these roles can be applied to one, multiple, or all properties.

When creating a new property role in Oracle Identity Manager (OIM) and a template of the same name exists, you can apply it to the role in OPERA Cloud. Otherwise, you can create a new template and apply it to the role when there is no template existing of the same name.

### Creating a Template Role

1. From the Side Menu, select **Role Manager**, select **Manage Property Roles**.
2. Click **New** in the Template Roles section.

 **Note:**

A template role cannot be created with the same name as a property role.

3. From the **Available Tasks** panel, select the tasks to assign to the role. See [Assigning Tasks to a Role](#).
4. Click **Save**.

### Applying Template to a Property Role

1. From the Side Menu, select **Role Manager**, select **Manage Property Roles**.
2. Enter or select an Organization (Property) and click **Search** to view all configured template roles and property roles for the property.

 **Note:**

When a property role is created in Oracle Identity Manager (OIM) with the same name as a template role, it appears at the bottom panel with a red triangle and warning link to indicate that the template found and with action link **Apply Template to Role**.

3. Click the vertical ellipsis button for the property role and then select **Apply Template to Role** or click the link provided in the warning message.
4. From the **Available Tasks** panel, select the tasks to assign to the role. See [Assigning Tasks to a Role](#).
5. An **Inconsistent** indicator is displayed when there is an inconsistency with the number of tasks assigned to the property role and the number of tasks assigned to the template role. Click **Edit the Role** to update the property role and add missing tasks.

6. Click **Save**.

### Creating a Template and Applying to a Property Role

1. From the Side Menu, select **Role Manager**, select **Manage Property Roles**.
2. Enter or select an Organization (Property) and click **Search** to view all configured template roles and property roles for the property.

 **Note:**

When a property role is created in Oracle Identity Manager (OIM) without a template role existing in OPERA Cloud, the role appears in the bottom panel with a red triangle and a "No corresponding template found" warning with **Create Template and Apply to Role** action link.

3. Click the vertical ellipsis button for the property role and then select **Create Template and Apply to Role** or click the link provided in the warning message.
4. From the **Available Tasks** panel, select the tasks to assign to the role. See [Assigning Tasks to a Role](#).
5. Click **Save**.

### Editing a Template Role

 **Note:**

When the Activate Template Tasks on all Dependant Roles OPERA Control is active, amending the tasks on a template role will result in the tasks assigned to property roles (based on this template role) being updated accordingly. Deleted tasks on template results in deletion of tasks from property role. Addition of tasks on template results in addition of tasks to property role. When the OPERA Control is inactive, each property role must be manually updated to take advantage of the additional tasks added to the template.

1. From the Side Menu, select **Role Manager**, select **Manage Property Roles**.
2. Enter search criteria and click **Search**.
3. Select the template role then click the **vertical ellipsis** and select **Edit**.
4. From the **Available Tasks** panel, select the tasks to assign to the role. See [Assigning Tasks to a Role](#).
5. Click **Save**.

### Configuring Independent Property Roles without Template

When the **Property Role without Template** OPERA Control is active an independent property role can be created which is not based on a template role.

The same property role can be configured in multiple properties and tasks assigned directly to the property role; each independent property role can therefore have different tasks granted in different properties.

When creating a new property role in Oracle Identity Manager (OIM), the name of the role must not be the same as a template role in OPERA Cloud.

You can then assign tasks to the role without inheriting tasks from any template.

### Assigning Tasks to Property Role without Template

1. From the Side Menu, select **Role Manager**, select **Manage Property Roles**.
2. Enter or select an Organization (Property) and click **Search** to view all configured template roles and property roles for the property.

#### **Note:**

When a Property Role is created in Oracle Identity Manager (OIM) and the role name doesn't match with any of the existing template roles, it appears at the bottom panel with a red triangle and Warning link to indicate that "No corresponding template found" and with action link **Assign Tasks to Role Without Template**.

3. Click the vertical ellipsis button for the property role and then select **Assign Tasks to Role Without Template** or click the link provided in the warning message.
4. From the **Available Tasks** panel, select the tasks to assign to the role. See [Assigning Tasks to a Role](#).
5. Click **Save**.

## Prerequisites for Configuring Template and Property Roles

### OPERA Controls

**Group:** General

**Parameters:** Property Role without Template

### OPERA Cloud Tasks

**Group:** Role Manager

**Tasks:** Manage Roles

Manage Property Roles and Tasks

- Apply Templates to Property Role
- Assign Tasks to Property Roles without Template

## Assigning Tasks to a Role

Once you add a chain or property role, you must add tasks to the role to provide users with access to menus, pages and actions. Regardless of the OPERA Controls active at each property all available tasks are listed for assignment to roles.

The lower part of the Manage Role screen is divided into a Main Tasks panel and an Available Tasks panel. The Main Tasks align with the functional areas in OPERA Cloud

and you can select the required tasks for the role you are creating. The All green dot for a Main Task category indicates all tasks in the category are already assigned to the role.

Under the Main Tasks panel, task categories have a “New” indicator next to them when new tasks exist after an upgrade.

**Note:**

Assign report group tasks to grant access to specific report groups. Refer to [Report Groups](#) for more information.

### Adding Tasks to a Role

1. From **OPERA Cloud Role Manager**, select either **Manage Property Roles** or **Manage Chain Roles**.
2. Enter or select an **Organization (Property)** or enter a **Role** and click **Search**.

**Note:**

The **Role** search filter is only for Manage Chain Roles and is optional.

3. Click the **vertical ellipsis** button for the property or chain role to which you want to assign tasks and select **Edit**.
4. From the **Available Tasks** panel, select the **Tasks** you want to assign to the role.

**Note:**

You can select a category from the **Main Tasks** panel to load its tasks under the **Available Tasks** panel for selection.

**Note:**

To grant access to specific report groups, select the respective report group tasks.

5. **Select Tasks** column; displays the number of selected tasks/number of all available tasks.
6. To filter the list of available tasks, enter the name of a specific task or a partial description into the filter field and click **Filter**.
7. Select **View By** check boxes to filter tasks to show tasks **Granted** and/or **Not Granted** to the role.
8. Choose **Select All** to select all tasks in a task category.
9. Click **Save** when you are finished selecting tasks.

# Associating Transaction (Charge) Codes to a Chain Role

## Prerequisites for Associating Transaction (Charge) Codes to a Chain Role

With the Transaction Code by User Role OPERA Control active you can restrict the charges a user can post by associating transaction codes to their role(s).

### Associate Transaction Codes with a Chain Role

1. From the Side menu, select **Role Manager**, then select **Manage Chain Roles**.
2. Enter a Role and click **Search**.
3. Select the chain role , then click the **vertical ellipsis** and select **Associate Transaction Codes**.
4. Enter or select a Property.
5. In the Available panel, click the transaction codes you want to assign to the role.

 **Note:**

Use the filter to search by entering a specific transaction code or a partial description and clicking **Go**.

6. Click the arrow > to move the selected transaction codes to selected panel.
7. Click the arrow < to remove selected transaction codes in selected panel.
8. Click the double greater than arrow >> to move all transactions codes matching the search filter to the selected panel.
9. Repeat for next property.
10. Click **Save** when finished.

## Prerequisites for Associating Transaction (Charge) Codes to a Chain Role

### OPERA Controls

**Group:** Cashiering

**Functions:** Transaction Code by User Role

# Managing Users

## Prerequisites for Managing Users

After users are registered in Oracle Identity Manager (OIM), you must update them with application-specific attributes in OPERA Cloud. This includes assigning the user to one or more hubs for property access. See the Assigning Hubs to a User section.

## Editing a User

1. From **OPERA Cloud** menu, select **Role Manage**, select **User Management**, and then select **Manage Users**.
2. Select the **Organization** (Property) from the list and click **Search**. The list of value displays all the organizations that includes Enterprise, Chain and Support based on user assigned roles that are associated with the Manage User task.

 **Note:**

The search retrieves users associated with the selected organization.

3. Click the **Vertical Ellipsis** and select **Edit**.

 **Note:**

The read-only attributes for a user are defined in Oracle Identity Manager (OIM).

4. Complete the following fields for the user:
  - a. **Act as:** This field enables you to select **Conference Sales Person**, **Reservation Sales Person**, or **External System**.
    - i. **Conference Sales Person:** Select this option for OPERA Cloud Sales and Event Management users. Once selected, the **At** field becomes active and displays **Property**.
    - ii. **Reservation Sales Person:** Select this option for OPERA Cloud PMS users. Once selected, the **At** field becomes active and displays **Property**.
    - iii. **External System:** Select this option only for users created specifically for integration with third-party solutions. External System determines which interfaces are booking group rooms against the Sales Allowance when the **Block Origin for Sales Allowance** setting is available in the Blocks group in OPERA Controls. The **At** field is not available.
  - b. **At:** After you select either **Conference Sales Person** or **Reservation Sales Person**, the **At** field becomes active and you can select **Property**.
  - c. **Clear Location:** Select to clear the At location.

- d. **Language:** Indicates the user's language (locale) code selected in Identity Manager (SSD). By default, OPERA Cloud is displayed in this language.
- e. **Cashier ID:** Enter or select a cashier ID for the user. Financial transactions posted by a user are tracked by this cashier ID. See [Configuring Cashiers](#) for more information.
- f. **Owner Code:** (Enabled when the OWNER OPERA Control is active). This field allows you to define the user as a sales owner. When the Owner OPERA Control is active a sales owner is select in each sales account (company/ agent) profile and in every business block. When the Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition Or Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition is active, [Activities](#) can also be managed for each sales owner. Enter a unique value for the Owner Code; typically the users initials can be used.
- g. **Department:** Enter or select a specific department to associate with the user. For more information, see [Configuring Departments](#).

 **Note:**

Only Departments configured as Global are listed.

- h. **Job Title:** Enter or select a job title for the user. See [Configuring Job Titles](#) for more information.
  - i. **Employee ID:** Indicates the employee ID defined in Identity Manager (SSD) and may contain a combination of up to 20 alpha/numeric characters.
5. Click **Save** when finished.

### Assigning Hubs to a User

Assign one or more [hubs](#) to a user to determines their property location access in multi-property operations. When the OPERA Multi-property Reservation Cloud service is inactive, a default hub is assigned to all users.

1. From **OPERA Cloud** menu, select **Role Manage**, select **User Management**, and then select **Manage Users**.
2. Enter search criteria, then click **Search**.
3. Select the user in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Click **Manage** .
5. Select one or more Hubs in the **Available** panel and use the Down Arrow button to move selected hub(s) to the **Selected Hubs** section. Use the Up Arrow to move Hubs back to the Available panel.
6. Click **Select**.
7. Click **Save**.

### Viewing Assigned Roles

1. From **OPERA Cloud** menu, select **Role Manage**, select **User Management**, and then select **Manage Users**.

2. Enter search criteria, then click **Search**.
3. Select the user in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Expand the **Roles** pane to view all roles currently assigned to the user.

**Note:**

This area is read-only and shows you which roles are assigned to the user in OIM. This area displays the **Organization** the user belongs to, the **Role Code**, **Role Level** (property or chain), and a **Description** of the role.

### Refreshing User Roles

To immediately update a users roles following changes in Oracle Identify Manager (SSD).

1. From **OPERA Cloud** menu, select **Role Manage**, select **User Management**, and then select **Manage Users**.
2. Enter search criteria, then click **Search**.
3. Select the user in the search result, then click the vertical ellipsis **Actions** menu and select **Refresh Roles**.

### Resetting User PIN

1. From **OPERA Cloud** menu, select **Role Manage**, select **User Management**, and then select **Manage Users**.
2. Enter search criteria, then click **Search**.
3. Select the user in the search result, then click the vertical ellipsis **Actions** menu and select **Reset PIN**.

**Note:**

User can then set a new PIN through [Settings](#).

### Validating Service Accounts (Interface Users)

1. From **OPERA Cloud** menu, select **Role Manage**, select **User Management**, and then select **Validate Interface Users**.
  - a. **Username:** Enter the service account name.
  - b. **Password:** Enter the password.
  - c. Click **Validate**.

## Prerequisites for Managing Users

**OPERA Cloud Tasks**

**Group:** Role Manager

**Tasks:** Manage Users

- New/Edit Users
- Reset PIN

# 19

## Generating the Configured Roles and Tasks Report

Once roles have been configured and tasks assigned to the roles, you can generate a report listing roles and their assigned tasks per task group.

1. From **Role Manager**, select **Configured Roles and Tasks Report**.
  - a. **Level**: Select either Chain or Property role level
  - b. **Task Group(s)**: Select a Module. For example, Booking Management or Financials from the list.
  - c. **Role(s)**: Select one or more Roles (for example, Admin or Front Desk).
  - d. Click **Search**.
2. Once the report is generated, click **I Want To...** and select **Printable Page** to view a printable version of the online report.

## OPERA Cloud Tasks

OPERA Cloud Tasks are actions that a user can perform. Tasks are predefined. OPERA Cloud Tasks provide the ability to manage role specific privileges based on the functional requirements and on security considerations. You can do this by enabling and disabling the parent task, tasks, and sub tasks for each role.

OPERA Cloud Tasks comprise the entire set of tasks that are available in role-based security. Some examples of tasks include View Cash Transactions in Reports, Manage Reports, and View Internal Reports / Report Groups.

Each parent task consists of a set of tasks and sub tasks, which are also predefined. For example, the Reservation Management parent task contains the Routing Instruction task and contains New/Edit Routing Instructions and Delete Routing Instructions sub tasks.

The following sections provides a breakdown of Parent Tasks, Tasks, and Sub Tasks for each task group. Based on your property's configuration and your user credentials, you may not have access to all of the tasks listed here.

### OPERA Cloud Tasks — Bookings

Find the Task permissions by navigating to **Role Manager, Role Management**, and selecting **Manage Chain Roles** or selecting **Manage Property Roles**.

Granting or revoking tasks in OPERA Tasks for chain or property roles are logged in the changes log.

**Table 20-1 Task Permissions**

# Part V

## Toolbox

This part of the OPERA Cloud Help system contains information on working within the Toolbox menu for those responsible for managing OPERA Cloud utilities, systems, and data synchronization.

# 21

## Utilities

The Utilities feature provides links for synchronizing data, scheduling background processes, data management, room utilities, and transaction management.

### Data Synchronization

#### [Prerequisites for Data Synchronization](#)

OPERA Cloud works with large amounts of data gathered and exchanged across multiple database tables. This data can change by the minute, and sometimes data discrepancies are created. The Synchronization utilities let you recalculate key data, such as inventory, block rates, stay records, financial statistics, and more to ensure the latest information is correct in all application areas.

### Prerequisites for Data Synchronization

#### **OPERA Cloud Tasks**

**Group:** Toolbox

**Tasks:** Synchronization

- Inventory
- Stay Records
- Room Pool
- Financial Statistics
- Room Status
- Business Events
- Block Occupancies
- Physical Rooms
- Catering Forecast Revenue
- Summary Profile Statistics
- Past Profile / Reservation Statistics
- Sales Allowances
- Package Prices
- Block Rates
- Event Item Class Sequence

## Synchronizing Business Events

Business Event Synchronization enables you to capture past business event data and upload it to [external systems](#). The following OPERA Cloud modules offer data synchronization: Reservations, Blocks, Profiles, Availability, End of Day Routine, Rates, Profiles History, and Configuration. With the exception of Profiles History, all these are standard modules in Business Event setup. Data synchronization is dependent on the subscription of business events and data elements within each module. For more information, see [Configuring Business Events](#). To initiate Business Event synchronization:

1. From the **OPERA Toolbox** menu, select **Utilities**, select Synchronization , then select **Business Events**.
2. **Property**: Select a property from the list.
3. **External System**: Select the external system to receive the business events.
4. **Reservations**: Select the check box to synchronize reservation events.
  - a. **Arrival**: All reservations whose arrival date is within the date range will be synchronized.
    - i. **From Date**: Enter or select a date.
    - ii. **To Date** : Enter or select a date.
  - b. **Stay**: All reservations whose stay dates are within the date range will be synchronized.
    - i. **From Date**: Enter or select a date.
    - ii. **To Date** : Enter or select a date.
5. **Blocks**: Select the check box to synchronize blocks events.
  - a. **Begin (Arrival)**: All blocks whose begin date is within the date range will be synchronized.
    - i. **From Date**: Enter or select a date.
    - ii. **To Date** : Enter or select a date.
  - b. **Stay**: All blocks whose stay dates are within the date range will be synchronized.
    - i. **From Date**: Enter or select a date.
    - ii. **To Date** : Enter or select a date.
6. **Availability**: Select the check box to synchronize Availability
7. **Rate**: Select the check box to synchronize rate codes. All rates created within the date range will be synchronized
  - a. **From Date**: Enter or select a date.
  - b. **To Date** : Enter or select a date.
8. **Profile**: All profiles created within the date range will be synchronized.
  - a. **From Date**: Enter or select a date.
  - b. **To Date** : Enter or select a date.

9. **Profile History:** All profiles with stored reservation history and arrivals dates within the date range will be synchronized.
  - a. **From Date:** Enter or select a date.
  - b. **To Date :** Enter or select a date.
10. **Night Audit:** Night audit statistical information within the date range will be synchronized
  - a. **From Date:** Enter or select a date.
  - b. **To Date :** Enter or select a date.
  - c. **Hotel Statistics:** Synchronization will include hotel statistics that are within the date range.
  - d. **Market Statistics:** Synchronization will include market statistics that are within the date range.
  - e. **Revenue Sum:** Synchronization will include revenue sums within the date range.
11. **Configuration**
  - a. **Commission Code:** All configured commission codes will be synchronized.
  - b. **Commission Transaction:** All configured commission-able transaction codes will be synchronized.
  - c. **Currency Codes:** All configured currency codes will be synchronized.
  - d. **Currency Exchange Rate:** All configured currency exchange rates will be synchronized.
  - e. **Department:** All configured departments will be synchronized.
  - f. **Inventory Control:** All configured restrictions will be synchronized.
  - g. **Market Code:** All configured market codes will be synchronized.
  - h. **Note Type:** All configured note types will be synchronized.
  - i. **Origin Code:** All configured origin codes will be synchronized.
  - j. **Package Codes:** All configured package codes and package groups will be synchronized.
  - k. **Preference:** All configured preferences will be synchronized.
  - l. **Preference Group:** All configured preference groups will be synchronized.
  - m. **Reservation Type:** All configured reservation types will be synchronized.
  - n. **Room Class:** All configured room classes will be synchronized.
  - o. **Room Type:** All configured room types will be synchronized.
  - p. **Source Code:** All configured source codes will be synchronized.
  - q. **Transaction Code:** All configured transaction codes will be synchronized.
  - r. **Users:** All configured users will be synchronized.
  - s. **VIP Level:** All configured VIP levels will be synchronized.
12. Click **Synchronize Business Events**.

## Synchronizing Room Inventory

Synchronize Inventory is used to synchronize the future room availability for a property.

1. From the **Toolbox** menu, select **Utilities**, select **Synchronization** then select **Inventory**.
  - a. **Property**: Select or confirm property
  - b. **From Date**: Enter or select a start date; date must be equal or greater than the current date.
  - c. **To Date**: Enter or select an end date
2. Click **Start**.
  - a. Synchronizing progress is indicated; click **OK** to close
  - b. Click **Status** to display progress.

## Synchronizing Room Status

Synchronize Room Status is used to synchronize the room statuses for a property.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Room Status**.
  - a. **Property**. Select or confirm property
  - b. **Date**. Enter or select a start date
2. Click **Synchronize Room Status**.

## Synchronizing Physical Rooms

Use this utility to recalculate and correct any issues with the inventory room count.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Physical Rooms**.
  - a. **Property**. Select or confirm property
2. Click **Synchronize Physical Rooms**.

## Synchronizing Block Occupancies

Use this utility as directed by Oracle support to ensure that the sum of room nights booked in different occupancy levels on a block corresponds to the total number of room nights that has been booked for the same block.

The utility will also correct any discrepancies in the allotment change logs and update these change logs so that the sum of changes again corresponds to the total number of rooms held on the block at that moment in time.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Block Occupancies**.

- a. **Property.** Select or confirm property
  - b. **From Date.** Enter or select a start date
  - c. **To Date.** Enter or select an end date
  - d. Record Changes on
    - i. **Date of Last Block Change** - Use the date when the business block was most recently changed (the default).
    - ii. **Current Business Date** - Use today's business date.
2. Click **Synchronize Block Occupancies.**

## Synchronizing Room Pools

### Synchronizing Room Pools

Use this utility to synchronize group blocks with the mapped room pool room types. If the Room Pool OPERA Control is activated when blocks already exist, this utility will update the existing blocks with the configured room pools

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Room Pools**.
  - a. **Property.** Select or confirm property
2. Click **Synchronize Room Pools.**

## Prerequisites for Synchronizing Room Pools

### OPERA Controls

**Group:** Room Management

**Functions:** Room Pool

### OPERA Cloud Tasks

**Group:** Toolbox

### Tasks:

- Synchronization
- Room Pool

## Synchronizing Summary Profile Statistics

The Synchronize Summary Profile Statistics Utility is used to populate tables required for various OPERA Cloud reports.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Summary Profile Statistics**.
  - a. **Property.** Select or confirm property
  - b. **Profile Type.** Select a profile type from the list
  - c. **Name.** Search and select a profile

- d. **From Year / Month.** Enter or select a year and month from the list
  - e. **To Year / Month.** Enter or select a year and month from the list
2. Click **Synchronize Summary Profile Statistics.**

## Synchronizing Financial Statistics

Use this utility to recalculate and update the financial adjustments for a specified period; this ensures that all adjustments and transactions are included in the financial statistics.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Financial Statistics**.
  - a. **Property.** Select or confirm property
  - b. **From Date.** Enter or select a start date
  - c. **End Date.** Enter or select an end date
2. Click **Synchronize Financial Statistics.**

## Synchronizing Catering Forecast Revenue

### [Prerequisites for Synchronizing Catering Forecast Revenue](#)

Use this utility to update forecast revenues on existing events with the updated forecast numbers that have already been configured for event types. The following are specific rules to be aware of when running this utility:

- The utility will not update Catering Package Events.
  - The utility will not update revenue types with expected revenue unless the **Use Forecast Revenue Only** option is selected on the event details tab.
  - If the new forecast revenue for an event type does not contain forecast figures for a specific revenue type, the forecast figures will be blanked out in any updated event with that revenue type.
  - If the new forecast revenue for an event type contains forecast figures for revenue types that do not exist on the existing events, these forecast elements will be added to the updated event.
  - For existing forecast records, the figures will be updated with the new figures that have been set for the appropriate date range per event type and revenue type.
1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Catering Forecast Revenue**.
    - a. **Property.** Select or confirm property
    - b. **From Date.** Enter or select a start date
    - c. **End Date.** Enter or select an end date
    - d. **Event Type.** Select one or more event types from the list
    - e. **Update Adjusted Forecast Records.** Select to also update forecast records that have been manually adjusted. When not selected, revenue types that have been manually updated will not be updated with this utility.

2. Click **Synchronize Catering Forecast Revenue**.

## Prerequisites for Synchronizing Catering Forecast Revenue

### Licenses / Subscriptions

- Catering Forecast Revenue

## Synchronizing Past Profile / Reservation Statistics

Recalculate Past Daily Statistics includes the following

### Running Recalculate Detailed Statistics

This utility is used when a discrepancy in reported statistics is identified by your property. The utility recalculates daily reservation and profile statistics for a specified date range that are then repopulated in the statistics table

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Past Profile / Reservation Statistics**.
2. Select **Detailed Statistics** tab
  - a. **Property.** Select or confirm property
  - b. **From Date.** Enter or select a start date
  - c. **To Date.** Enter or select an end date

 **Note:**

Date ranges that are entered must not exceed three month period

3. Click **Recalculate Detailed Statistics**.

### Running Recalculate Summary Statistics

Recalculates yearly statistics for the specified year. This utility should be run only if it is requested by Oracle support.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Past Profile / Reservation Statistics**.
2. Select **Detailed Statistics** tab
  - a. **Property**. Select or confirm property
  - b. **Year**. Enter or select a year
3. Click **Recalculate Summary Statistics**

### Running Recalculate Revenue Buckets

The Recalculate Revenue Buckets Utility recalculates revenue bucket amounts based on the transaction codes selected for each revenue bucket within a bucket type.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Past Profile / Reservation Statistics**.
2. Select **Detailed Statistics** tab
  - a. **Property**. Select or confirm property
  - b. **From Date**. Enter or select a start date
  - c. **To Date**. Enter or select an end date

 **Note:**

Date ranges that are entered must not exceed three month period

3. Click **Recalculate Revenue Buckets**.

## Synchronizing Block Rates

If the rate pricing schedules have been updated since the block was created and the Rate Guaranteed check box is not selected for the block, then the rate amounts on the block are updated to the new rate amounts.

The Rate Guaranteed check box on the Business Block exempts the block from refreshes implemented by this utility.

1. From the **Toolbox** menu, select **Utilities**, select **Synchronization** then select **Block Rates**.
  - a. **Property**: Select or confirm property
  - b. **From Date**: Enter or select a start date
  - c. **To Date**: Enter or select an end date
  - d. **Rate Code**: Select one or more rate codes from the list
2. Click **Synchronize Block Rates**.

## Synchronizing Item Class Sequence

### Prerequisites for Synchronizing Item Class Sequence

The Event Item Class Sequence utility allows you to synchronize the event item sequence shown on the Event Resources screen when an item group sequence has been changed for a category of items on the Item Inventory Setup screen.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Event Item Class Sequence**.
  - a. **Property**. Select or confirm property.
  - b. **Minutes**. Enter number of minutes to disconnect users.
2. Click **Event Item Class Sequence**.

## Prerequisites for Synchronizing Event Item Class Sequence

**Group:** Toolbox

#### Tasks:

- Synchronization
- Event Item Class Sequence

## Synchronizing Package Pricing

The Synchronize Package Prices Utility is used to update the package prices , for the select package code(s), in blocks and reservations based on the arrival date and reservation status selected.

1. From the **Toolbox** menu, select **Utilities**, select **Synchronization** then select **Package Prices**.
  - a. **Property**: Select or confirm property
  - b. **From Arrival Date**: Enter or select an arrival date

- c. **Reservations:** Select checkbox to update reservations
    - i. **Reservation Status:** Select the reservation status(es) from the list
  - d. **Business Blocks:** Select checkbox to update blocks
  - e. **Package Code:** Select package code(s) from the list
2. Click **Synchronize Package Prices**.

## Synchronizing Sales Allowance

### Prerequisites for Synchronizing Sales Allowance

Run the Synchronize Sales Allowance utility when the sales allowance availability is incorrect. The available sales allowances may fall out of sync when the number of rooms allocated to the sales allowance is changed after deduct inventory bookings already exist for the dates.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Sales Allowance**.
  - a. **Property:** Enter or select the property
  - b. **From Date:** Enter or select a start date
  - c. **To Date:** Enter or select a start date
  - d. Click **Search**.
  - e. The following details are displayed:
    - i. **Property:** Displays the property where the sales allowance is incorrect.
    - ii. **Allotment D Qty.:** Number of room nights booked at a deduct status for the date from the allotment detail table. A discrepancy will occur if the total for this column is not calculated by adding the sum of the Booked Rooms with the Overbooked Rooms.
    - iii. **Ceiling Date:** Date for the Sales Allowance.
    - iv. **Sales Allowance:** Number of rooms allotted to the Sales Allowance for the selected date.
    - v. **Booked:** Number of rooms booked against the Sales Allowance at a deduct status. This figure can never be higher than the Sales Allowance number.
    - vi. **Over Booked:** Number of rooms booked that is more than the allotted Sales Allowance.
    - vii. **Available:** Number of rooms still available on the Sales Allowance.
  - f. Click **Correct**.

## Prerequisites for Synchronizing Sales Allowance

### Licenses / Subscriptions

Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition

Or

Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition

**Group:** Toolbox

### Tasks

- Synchronization
- Sales Allowance

## Synchronizing Stay Records

Running this utility will synchronize the stay history data elements of OPERA Customer Loyalty Tracking Cloud Service and the stay history data elements of OPERA Cloud Property Management System.

- From the **Toolbox** menu, select **Utilities**, select **Synchronization** then select **Stay Records**.
  1. **Property:** Enter or select the property.
  2. **From Date:** Enter or select a start date.
  3. **To Date:** Enter or select a start date.
  4. Click **Synchronize Stay Records**.

### Note:

If a stay record's departure date is greater than 90 days from the property's business date, the Rate Code, Market Code, Channel Code, and Source Code fields on the stay record will not be validated during synchronization (thus preventing it from being suspended). The stay record revenue amounts will still be inserted, based on the Membership Revenue configuration.

# Data Management

## [Prerequisites for Data Management](#)

Data Management provides options for managing and updating OPERA Cloud configuration and related transactional data. Access to each option is controlled by a user task. For more information, see [OPERA Cloud Tasks — Toolbox](#).

## Prerequisites for Data Management

### **OPERA Cloud Tasks**

**Group:** Toolbox

**Tasks:** Data Management

- Manage Business Date

- Imbalance Analysis
  - Create Signature Hash Folio
- Catering Event Function Space Monitor
- Business Block Compare
- Update Owners
- Update Contact
- AR Enter Old Balances
- Preference Utility
- Manual Profile Purge Routine
- Transaction Management

**Tasks:** Refresh Property

## Managing Business Date

[Prerequisites for Managing Business Date](#) .

At times you might want to run end of day (night audits) multiple, consecutive times to roll the business date forward several days. In such cases, you can use the Change Business Date utility to run the multiple, consecutive night audits.

To use this feature, change the proposed date to the future date you want for the property's business date. When the OPERA Multi-Property Could Service is active, you can set a different business date for each property. To run the Change Business Date utility, there cannot be financial transactions posted to the property and no night audits executed.

 **Note:**

The **Multiple End of Days** OPERA Control must be active and your user role must have **Manage Business Date** task granted in order to use this feature. The **EOD Email Address** OPERA Control setting should be configured with the email address of an individual to receive the final status report upon completion of the multiple end of day processes.

When reaching the Roll Business Date step, OPERA Cloud requires that all other users be logged out before the End of Day sequence rolls the business date. The utility displays a notification message to all logged in users indicating the amount of time remaining to log out.

Observe the following conditions when using the utility to consecutively run multiple end of day processes:

- All inhouse reservations must be checked out before starting the procedure.
- There cannot be any reservations scheduled to check in between now and the target date.
- There cannot be any blocks with a start date between now and the target date.
- There cannot be any reservations with open folios.
- All prior business days must have a closed status.
- The **End of Day > Auto Continue** OPERA Control should be active.

 **Note:**

When running end of day in multiple mode, the **End of Day > Income Audit** OPERA Control is ignored.

### Changing the Business Date

1. From the Toolbox menu, select **Utilities**, select **Data Management**, and then select **Manage Business Date**.
2. Enter the following details:
  - a. Enter or confirm the **Property** name.
  - b. Select the **Proposed Date**.
3. Click **Process**.
4. When prompted, click **Deactivate** to disable all non-mandatory procedures and reports from running during this process.

## Prerequisites for Managing Business Date

### OPERA Controls

**Group:** End Of Day

**Parameters:** Multiple End of Days

### OPERA Cloud Tasks

**Group:** Toolbox

**Tasks:** Data Management

Manage Business Date

## Imbalance Analysis

The Imbalance Analysis utility is available to provide the information required to investigate an out of balance financial report and can be very useful for verification purposes. If an imbalance is found in a report, please contact your local Oracle support office. If the report indicates no imbalances but believe your reports are incorrect, consider regenerating the report. If no imbalance is found, OPERA Cloud displays the message: **<Report Name> is in balance..**

### Running Imbalance Analysis

1. Enter the following details:
  - a. **Property:** Select a property from the list.
  - b. **Start Date:** Enter the start date to run the imbalance analysis. Date defaults to the business date, but it cannot be equal to or greater than the current business date.
  - c. **End Date:** Enter the end date to run the imbalance (maximum date range to be entered can be 180 days). Date defaults to business date, but it cannot be equal to or greater than the current business date.

 **Note:**

You cannot select dates still open when the Income Audit OPERA Control is active

- d. **Verification Type:** Select from the following:
  - i. **Guest Ledger with Trial Balance:** Run to verify and view the imbalance between the Guest Ledger columns in the Financial\_Transactions table and the Trial\_Balance table. A grid is displayed informing the user of the transaction, where the difference in figures is originating from, and the dollar amount it is for.
  - ii. **Package Ledger with Trial Balance:** Run to verify and view the imbalance between the Package Ledger columns in the

Financial\_Transactions table and the Trial\_Balance table. A grid is displayed informing the user of the transaction, where the difference in figures is originating from, and the dollar amount it is for.

- iii. **Deposit Ledger with Trial Balance:** Run to verify and view the imbalance between the Deposit Ledger column in the Financial\_Transactions table and the Trial\_Balance table. A grid is displayed informing the user of the transaction, where the difference in figures is originating from, and the dollar amount it is for.
  - iv. **A/R Ledger with Trial Balance:** Run to verify and view the imbalance between the A/R Ledger columns in the Financial\_Transactions table and the Trial\_Balance table. A grid is displayed informing the user of the transaction, where the difference in figures is originating from, and the dollar amount it is for.
  - v. **Passer By:** Run to verify that all the Passer By totals in the Guest\_Ledger table are equal. If there is an imbalance, the transaction is displayed along with amount difference.
  - vi. **Cashiers:** Run to verify that all of the cashiers transactions are equal. If an imbalance should occur, the transaction is listed along with the difference in the amount.
  - vii. **C/O with Balance:** Run to view all the guests that have a "Checked Out" status and folio closed, but still have a balance with the property. Grid displays the name of the guest, Arrival and Departure dates, Reservation Status, and the remaining balance that is still owed.
  - viii. **Invalid Transactions:** Run to view all the invalid transactions, if any should develop. A list of the transactions that are invalid is displayed, along with the amount that it is wrong.
  - ix. **Effective Package Ledger:** Run to verify the accuracy of packages consumed by guests. A grid displays informing the Reservation and Guest ID, Arrival and Departure dates, Reservation Status, and the dollar amount difference. An **Autofix** button is available to attempt to fix the imbalance automatically.
  - x. **Package Ledger with Guest Ledger:** Checks that the Guest Ledger's wrapper transaction is equal to the amount posted in the Package Ledger for the room portion amount of the package.
  - xi. **Summary of All:** Checks all of the options available in the list, except the AR Health Check, and provides a **Send to File** button. A file called **<property>balance.txt** will be created. The file is located in the **\runtimes** directory in a Thick Client environment and in the **\export** directory in a Thin Client environment, to ensure that in a Thin Client environment the user will have the ability to download this file to the local PC to send to support.
2. Click **Start**.
  3. If an imbalance exists, write down the ledger that is shown as out of balance from running the verification. Next run the imbalance analysis for the verification type for the specific ledger only. This will display the list of dates for which that particular ledger is out of balance and other information regarding the transactions causing the imbalance.
  4. Run the **Repopulate Trial Balance** action to repopulate the **Trial Balance** table for a specific date.
    - a. Enter the date.
    - b. Click Repopulate Trial Balance link and click **Start**.
    - c. Wait for the procedure to complete, click **OK** to close.

5. Re-Run the imbalance analysis for the verification type for that particular ledger to see if the trial balance table has resolved the imbalance.
  - a. **Fix naguestleddetail and deposit\_ledger:** Fixes the Guest Ledger and Guest Ledger Detail reports for the property, by finding where the data was missing in the Reservation Details table and repopulating the information.
  - b. **Repopulate missing Bills into Folio Tax:** Select this option to find the missing bill information and repopulate it into the Folio\_Tax table for a specific date.
  - c. **Fix Invalid AR Posting:** Selecting this option fixes invalid A/R postings/bills in Financial\_Transactions table and repopulates the invoice into the AR\_Invoice\_Header for the property.
  - d. **Fix DBs For Adjusted Invoices:** Selecting this option fixes adjusted invoices in the database.

## Entering Old Balances for AR Accounts

This utility is available to enter AR Account balances from an incumbent accounts receivable solution into OPERA Cloud Accounts Receivable.

Once [AR Accounts](#) have been created you can use this utility to create individual back-dated invoices or enter totals per aging period creating one back-dated invoice per period.

Prior to using this utility please ensure:

1. [AR configuration](#) is complete.
2. An AR Old Balances (sales, non-revenue) [transaction code](#) is configured.
3. All the [AR OPERA Controls](#) have been set; especially the Default Market, Source and Room Class settings and Old Balance Transaction Code setting.

Your assigned role(s) must be granted the AR Enter Old Balances task to access this utility.

### Entering AR Accounts Old Balances

1. From the side menu, select **Toolbox**, select **Data Management** then select **AR Enter Old Balances**.
2. Select the property and enter other search criteria and click **Search**.
3. In the search result, click the Account Name of the AR Account you wish to enter balances for.
4. In the Enter Old Balance panel select either tab:
  - a. **Single Folio Balances** to enter details of individual invoices; complete the following:
    - i. **Guest Name:** Select a profile from list to create an invoice in a specific profile name. Default with the profile for the AR Account.
    - ii. **Date:** Select the original invoice date; this will ensure the correct aging is calculated in OPERA Cloud.
    - iii. **Supplement:** Enter any supplemental information for this invoice.

- iv. **Reference:** Enter any reference number for this invoice
  - v. Click **Save**.
  - vi. On the Invoice Details panel complete the following:
    - **Folio No:** Enter the invoice number for which you are entering an old balance.
    - **Original Amount:** Enter the total amount on the old invoice. This amount is tax inclusive. You may specify the individual tax amounts in the Tax 1-20 set of fields.
    - **Tax 1-20:** Enter the tax bucket number.
    - **Trx Code:** Select a tax transaction codes for the selected tax bucket number.
      - Click **Add** to post additional taxes for the invoice.
    - **Paid Amount:** Enter the amount paid against the original amount of this invoice (partial payment).
    - **Currency:** Click to select a currency from the list for the invoice amount. The default is your property local currency.
    - **Foreign Amount:** View-only field showing the amount displayed in foreign currency.
    - **Total:** View-only field showing the outstanding total balance on this folio, if any.
  - vii. Click **Post**.
- b. **Sums Per Aging Period** to enter balances per aging period; complete the following:
    - i. **Guest Name:** Select a profile from list to create an invoice in a specific profile name. Default with the profile for the AR Account.
    - ii. **Aging Periods:** Enter a total in each of the aging levels. OPERA Cloud will create back-dated invoices for the balances entered with an invoice date that falls in the middle of the period covered by the aging bucket. For example, if the business date is 06/29/04 and 150 is entered into the first aging bucket, which is 0 to 10 Days, an invoice dated 06/25/04 is generated for the 150 amount. 06/25/04 is the date for day 5, the mid-point, in the 11-day period between 06/29/04 (day 0) and 06/19/04 (day 10).
    - iii. **Date of Oldest Item:** Required if an amount is entered in the oldest aging bucket. Enter a date that will serve as the end point for the period covered by the oldest bucket; this will allow OPERA Cloud to compute a mid-point when assigning a date to the invoice for this balance. The default date is the minimum date if the balance is to fall within this aging bucket.
  - c. Click **Save**.
5. Repeat process for the next AR Account.

**Note:**

Once complete you can generate the [OPERA Cloud AR Aging report\(s\)](#) to reconcile the AR Account balances with those in the incumbent AR system. See [Generating Reports](#).

## Business Block Compare

The Business Block Compare utility compares the number of rooms allotted and room allotment revenue figures shown on the business block room grid with the same information computed from the total activity recorded in the change log. Business blocks for which a mismatch exists are displayed in the Business Block Compare Utility grid. In the event of a discrepancy, you can use this utility to correct the change log so that the values on the business block room grid and change log match.

### Note:

This utility will correct all the discrepancies for the specified property.

1. From the Toolbox menu, select **Utilities**, select **Data Management** then select **Business Block Compare**.
  - a. **Property**: Enter or select a property.
  - b. **Block Name**: Search and select a block.
  - c. **Block Status**: Select one or more block statuses.
  - d. **From Date**: Enter a Start date of business block.
  - e. **To Date**: Enter an End date of business block.
2. Click **Search**.
3. Review list of blocks.
4. Click **Correct**.

## Changing Function Space

### Prerequisites for Change Function Space

Use this utility to change the code associated with a function space and update all relevant events.

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Change Function Space Code**.
  - a. **Property**: Enter or select a property.
  - b. **Code**: Select a function space from the list.
  - c. **New Code**: Enter a new code for the function space
2. Click **Change Function Space Code**.

## Prerequisites for Change Function Space Code

**OPERA Controls**

**Group**: Events

**Functions:**

- Catering Events
- Simple Events

**OPERA Cloud Tasks****Group:** Toolbox**Tasks:** Data Management

Change Function Space Code

## Purging Guest Profiles

Use the Manual Profile Purge utility to select and purge unwanted guest profiles from OPERA Cloud.

When executing the utility the PURGE PROFILE business event is triggered to notify integrated systems of the profile deletion.

The business event will result in one of the following outcomes:

- Profile is also deleted in the integrated system if the business logic in that system allow it (e.g., no reservations, etc.).
- If a deletion is not allowed by the integrated system, remove the subscription in the integrated system as the profile pointed to by that subscription will no longer exist.

OPERA Cloud automatically performs the following validation checks:

- Cannot purge profiles other than Guest.
- Cannot purge profiles that have been updated within 1 day of when the Manual Profile Purge is going to be run.
- Cannot purge if AR Account is attached to profile.
- Cannot purge if profile is linked to an AR Account with open balance invoice. AR invoices with a zero balance are regarded as open. Profiles linked to such invoices can only be purged after the zero balance invoices have been purged based on the Zero Invoice Purge Days OPERA Control.
- Cannot purge if profile has relationships to other profiles.
- Cannot purge if profile has current reservations with an outstanding balance.
- Cannot purge if profile has future reservations.
- Cannot purge if profile has outstanding commissions payable.
- Cannot purge if profile has an Inactive Date (marked inactive).

Profile purge activity is recorded in the [Changes Log](#) under Profile activity group and Purge Profile activity type.

 **Note:**

The Manual Profile Purge Routine will purge a profile that meets all other purge criteria even if the **Keep History** check box is selected on the Profile.

### Running Guest Profile Purge

1. From the Toolbox menu, select **Utilities**, select **Data Management** then select **Manual Profile Purge Routine**.
2. Enter profile search criteria
  - a. **Name:** Enter the full or part of the last name of the profile.
  - b. **First:** Enter the full or partial first name for the profile.
  - c. **Country:** Enter or select a country code to limit purge to profiles with primary address matching the country code.
  - d. **State:** Enter or select a state code to limit purge to profiles with primary address matching the state code.
  - e. **Birth Date:** Enter a date to limit purge to profiles with the specific date.
  - f. **Stays Fewer or Equal to:** Enter the minimum number of stays a profile must have to be retained; profiles with this or a fewer number of stays will be considered as candidates for purging.
  - g. **Last Stay Earlier than:** Select a cutoff date in order to search for profiles based on the recentness of their stay activity. Profiles that do not have any stay dates more recent than this date are considered as candidates for purging. By default, the date displayed is the current business date minus one day.
  - h. **VIP Code:** Select VIP Codes from the list to purge profiles with the specified VIP Code.
  - i. **Exclude Restricted:** Select to exclude all profiles marked a restricted.
3. Click **Search**.
4. In the search result, select profiles to purge
5. Click **Purge**.

## Prerequisites for Refresh Property

### OPERA Cloud Tasks

**Group:** Toolbox

**Tasks:** Import Shell

**Group:** Data Management

**Tasks:** Refresh Property

## Re-provisioning (Refresh) Property

The Refresh Property utility is enabled in non-production environments and provides options to re-provision a property using an imported configuration shell (from a production environment on the same version) or a default seeded configuration. Once re-provisioned, the original Property Details/Property Controls and active subscriptions are restored. For more information, see [Configuring Properties](#).

**Note:**

No transactional data is retained when refreshing a property.

**Re-provision Property**

1. From the **Toolbox** menu, select **Utilities**, select **Data Management**, and then select **Refresh Property**.
2. Enter or select a property configuration:
3. Configuration:
  - a. **Use the configured shell:** Select an imported property shell from the list. See [Importing Property Configuration Shells](#).
  - b. **Use the Standard OPERA Cloud Configuration.** Select to use default seeded configuration.
4. Click **Refresh Property**.

**View Property Refresh History**

Log data is purged after 30 days.

1. From the **Toolbox** menu, select **Utilities**, select **Data Management**, and then select **Refresh Property**.
2. Click **View Refresh History**.
  - a. Enter search criteria , then click **Search**.
  - b. To view log files, select an **entry** , click the vertical ellipsis **Actions** menu, and select **Download Error File**.

## Updating External Reference

The External Reference Update utility is used to maintain the external reference number of the reservation when changing external systems interfaced through OXI.

This utility might be used, for example, when the integrated central reservation system is switching to another solution provided by the same company/partner.

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **External Reference Update**.
  - a. **Property:** Enter or select a property.
  - b. **From External System.:** Select an external system from the list.
  - c. **To External System:** Select an external system from the list.
2. Click **Update External References**.

## Updating Membership Types

## Running Update Membership Type

Update Memberships utility can be used whenever it is necessary to replace one membership type with another membership type. When changing membership types you may also select the specific membership level you wish to change, as well as specifying the membership level to be assigned to members of the new membership type.

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Update Membership Type**.
2. Select **Update** tab.
  - a. **From Membership**: Select a membership type from the list.
  - b. **From Membership Level**: Select a membership level from the list.
  - c. **To Membership**: Select a membership type from the list.
  - d. **To Membership Level**: Select a membership level from the list.
3. Click **Update Membership Type**.

## Running Delete Membership Type

Delete Membership Type utility enables you to delete selected membership type from OPERA Cloud. The process completely deletes the membership type and all its dependent records

This process requires a lock on many records and it is required that all users are logged off during the process.

1. From the Toolbox menu, select **Utilities**, select **Data Management** then select **Delete Membership Type**.
2. Select **Delete** tab.
  - a. **Membership Type**: Select a membership type from the list.
3. Click **Delete Membership Type**.

# Updating Owner

## Prerequisites for Update Owner

The Change Owners utility enables you to change the owner code from one or more selected owners to a new owner on Sales accounts, Contacts, Activities and Blocks

This utility is useful when sales staff leave your organization and new personnel commence, or when Sales responsibilities for a territory etc needs to be reallocated.

### Note:

As this process requires a lock on many records ensure that users are logged off during the update process

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Update Owners**.

2. Enter the following details:
  - a. **Property.** Select one or more properties from the list
  - b. **Change From Owner(s):** Select the sales manager / owner(s) from whom you wish to unassign ownership of accounts, contacts, activities, and blocks.
  - c. **Change to Owner:** Select the sales manager /owner to whom the accounts, contacts, activities, blocks are to be reassigned
  - d. **Make Primary For All:** Select to make the Owner primary on all entity types (make Primary checkbox selected and disabled in each section).
  - e. Apply Changes To:
    - i. **Sales Accounts:** Select to update Company, Agent, Source profiles.
      - **Make Primary:** Select to make the Owner primary.
      - Selection Criteria (Filter)
      - **Territory:** Select territories from the list.
      - **Business Segment:** Select business segments from the list.
      - **Country:** Select countries from the list.
      - **State:** Select states from the list.
      - **Industry Code:** Select industry codes from the list.
      - **Type:** Select account types from the list.
      - Postal Code:
        - **Use Free Format:** Manually enter postal codes in To/From.
        - **Use Configured Codes:** Select values from lists. The available postal codes depends on your choice of countries and states.
        - **From/To:** Enter the range of postal codes you want to use to filter accounts. Enter only a From code to filter on an individual postal code. Down arrows allow you to select codes if the Use Configured Codes check box is selected.
    - ii. **Contacts:** Select to update contacts.
      - **Make Primary:** Select to make the Owner primary.
      - Selection Criteria (Filter)
      - **Territory:** Select territories from the list.
      - **Business Segment:** Select business segments from the list.
      - **Country:** Select countries from the list.
      - **State:** Select states from the list.
      - Postal Code:
        - **Use Free Format:** Manually enter postal codes in To/From.
        - **Use Configured Codes:** Select values from lists. The available postal codes depends on your choice of countries and states.
        - **From/To:** Enter the range of postal codes you want to use to filter accounts. Enter only a From code to filter on an individual postal code. Down arrows allow you to select codes if the Use Configured Codes check box is selected.

- iii. **Activities:** Select to update **Activities**.
    - **Make Primary:** Select to make the Owner primary.
    - **From Date:** Enter a start date.
    - **To Date:** Enter an end date.
  - iv. **Blocks:** Select to update Blocks.
    - Selection Criteria (Filter)
    - **From Date:** Enter a block start date.
    - **To Date:** Enter a block end date.
    - **Type:** Select block types from the list.
    - **Market Segment:** Select market segments from the list.
    - **Exempt Status:** Select the block statuses that will be exempt from owner updates on business blocks.
    - **Overall Owner:** Select to update overall owner.
      - **Make Primary:** Select to make the Owner primary.
    - **Rooms Owner:** Select to update rooms owner.
      - **Make Primary:** Select to make the Owner primary.
    - **Catering Owner:** Select to update Catering owner.
      - **Make Primary:** Select to make the Owner primary.
3. Click **Review**.
  4. Click **Update Owners**.

Update Owners

## Catering Event Function Space Monitor

The Catering Event Function Space Monitor utility allows you to ensure that all booked events have function space inventory records. This is especially useful in making sure that a function space has been properly booked for the event, thereby avoiding an overbooked situation.

The events shown in the grid are those for which there is a potential problem - inventory is not being held for the event, even though the function space listed in the Room column was attached to the event. (If the function space is properly booked for the event and inventory is being held, the event will not appear on this screen.)

For the events listed in the grid, you should access the event and attach or reattach the function space, then return to this utility to ensure that the inventory is recorded (that is, that the event no longer is listed).

If there is still a problem, delete and re-create the event.

### Running the Catering Event Function Space Monitor Utility

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Catering Event Function Space Monitor**.
2. Enter search criteria and click **Search**.

## Updating Block and Catering Event Status Codes

### Prerequisites for Block/Catering Status Code Updates

For block and catering statuses, you can rename a status code (for example, rename PEN to INQ).

For catering status, you can also change a status code from Deduct to Non-Deduct, or from Non-Deduct to Deduct.

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Status Code Update**.
  - a. **Status**: Select a status from the list.
  - b. **New Status Code**: Enter a new status code.
    - i. **Change Catering Type to Non Deduct Inventory**: Select the update the catering type for the status code.
  - c. **Disconnect Minutes**: Enter the number of minutes to disconnect users.
2. Click **Update Status Code**.

## Changing Revenue Type

### Prerequisites for Changing Revenue Types

The Change Revenue Types Utility can be used to update an event revenue type to another event revenue type. For example, if you create a new revenue type, **BEV** this utility will convert the existing **WINE** revenue type (which may be associated with events, menus, menu items, resource items, revenue type cross references, etc.), to the BEV revenue type.

#### Note:

The Change Revenue Types Utility can be run while users are accessing OPERA Cloud. However, if you are actively working on a record that would be impacted by the change utility, a message warns that a lock has occurred, which prevents the utility from continuing.

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Change Revenue Type**.
  - a. **Property**: Select or confirm the property.
  - b. **From Revenue Type**: Select a revenue type from the list; inactive revenue types are included in this list.
  - c. **To Revenue Type**: Select a revenue type from the list.
2. Click **Review** to review the implied changes.
3. Click **Change Revenue Type**.

## Updating Contacts

### Prerequisites for Updating Contact

The Update Contact Utility can be used to replace the contact associated with future activities, business blocks, and/or reservations

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Update Contact**.
  - a. **Property**: Select or confirm the property.
  - b. **Change From Contact**: Click to open the Contact search, select a contact to update.
  - c. **Change To Contact**: Click to open Contact search, select the contact you want to replace with.
  - d. **Update Options**: Select the check boxes that correspond to the entities to update the contact.
    - **Activities**: All future activities.
    - **Blocks**:All future business blocks.
    - **Reservations**: All future reservations (Available when the Reservation Contacts OPERA Control is active).
  - e. **Make Primary for All**: Select this check box to make the new contact the primary contact for updated business blocks and activities.
2. Click **Update Contacts**.

## Room Utilities

The Room Utilities enables you to change room numbers, room types, and room class. The utility will update your changes in other functional areas impacted by your changes.

## Changing Rooms

The Change Room **Number** utility enables you to change system-generated rooms (required for Oracle Hospitality OPERA Room Reservations Cloud Service) to valid PMS rooms.

1. From the Toolbox menu, select **Utilities** select **Room Utilities**, and then select **Change Room Number**.
2. Search for your property and click **Change Room Number**.

## Changing Room Type of a Room

1. From the Toolbox menu, select **Utilities** and then select **Change Room Type**.
2. **Property:** Enter or select the property.
3. **Room:** Enter the room to update.
4. **Room Type:** Enter or select the new room type.
5. Click **Change Room Type**.

## Changing Room Type to Another Room Type

The Change Room Type to Another Room Type utility allows specified room type(s) for a property to be changed to another room type on rooms, blocks and reservations. Running this utility updates the room type on in-house and future reservations and blocks with an arrival date equal or greater than the current business date. In addition, this routine updates the associated room configuration to the newly defined room type and will also update the new room types with the appropriate room class. Rate code pricing schedule must be manually updated to add pricing for the new room type and to delete the pricing for the original room type.

### Note:

The original room types will remain available until you manually delete them.

For example, assume you change room type APT to A1 using the Change Room Type to Another Room Type utility. The following situations would occur:

- Rooms previously configured with room type APT are now configured with room type A1.
  - The physical room count for room type APT updated to zero.
- Reservations for room type APT will be assigned to room type A1 on the reservation stay details panel (provided the reservation is in-house or the reservation arrival date is the current business date or a future date).
- Block allocations that held the room type APT will now display the room type A1 (provided the block is in-house or the arrival date is the current business date or a future date).
- Block grid allocations will still display the room type APT however, the target room type A1 will be visible in the block grid and display the inventory that was previously associated with room type APT1.
- Look to Book sales screen will display both room type APT and room type A1 assuming the active dates for both room types are prior to the current business date. The Physical Inventory associated with the room type APT will shift and be accounted for in the room type A1 column.
- Rate Code Pricing schedules retain the pricing for the original APT room type.

## Changing Room Type to Another Room Type

Use the following steps to update rooms configuration, blocks, and reservations with a new room type.

1. From the **Toolbox** menu, select **Utilities**, select **Room Utilities** and then select **Change Room Type to Another Room Type**.
2. **Property**: Select a property from the list.
3. Click **New** and complete the following details in the Instructions panel.
  - a. **Source Room Types**: Select the Source Room Type(s) from the list
  - b. **Target Room Type**: Select the new room type code from the list
4. Click **Review** to see the expected results of your room type changes.
5. Click **Change Room Type**.

## Changing Room Class

Room classes typically define groups of room types having some characteristic in common. The Change Room Class utility enables you to associate one or more room types to a room class for a property. You can also use the utility to associate all room types to the internal "ALL" room class, allowing you to deactivate the Room Class OPERA Control is not required. To associate Room Types to a different Room Class:

1. From the **Toolbox** menu, select **Utilities**.
2. Select the Change Room Class radio button.
  - a. **Property**: Select a Property from the list.
  - b. **Room Class**: Select a Room Class from the list.
  - c. **Room Types**: Select one or more Room Types from the list.
  - d. Click **Change Room Class**.

To associate Room Types to the Default (ALL) Room Class.

1. From the **Toolbox** menu, select **Utilities**.
2. Select the Default Room Class radio button.
  - a. **Property**: Select a Property from the list
  - b. Click **Change Room Class**.
  - c. Deactivate the Room Class OPERA Control. For more information, see [OPERA Controls — Inventory Management](#).

## Transaction Management

Transaction Management utilities provides control over transaction codes. You can assign new transaction codes to existing transaction codes, move transaction codes to new

subgroups, and update transaction code ownership from property ownership to central ownership and vice versa. In a multi-property environment, you can generate template records based on property transaction code records.

## Changing Transaction Codes

The Change Code Utility enables you to assign a new transaction code number to an existing transaction code.

This process may require significant time to run depending on the volume of financial data to be updated.

1. From the **Toolbox** menu, select **Utilities**, select **Transaction Management** and then select **Change Code**.
2. **Property**: Enter or select the property.
3. Click **New**.
  - a. **Transaction Code**: Select a transaction code the from list
  - b. **New Transaction Code**: Enter a new (non-existing) transaction code.
4. Click **New** to add another row.
5. Click **Delete** to remove a row.
  - a. Click **Delete** to confirm
6. When ready to process, click **Change Code**.
7. Update progress is indicated; click **OK** to close.
8. Click **Status** to display progress.

## Changing Subgroup

The Change Subgroup utility allows you to modify the Subgroup selected on one or more transaction code(s).

1. From the **Toolbox** menu, select **Utilities**, select **Transaction Management** and then select **Change Subgroup**.
2. **Property**: Enter or select the property.
3. Click **New**.
  - a. **Transaction Code**: Select a transaction code the from list
  - b. **New Subgroup**: Select a subgroup for the transaction code.
4. Click **New** to add another row.
5. Click **Delete** to remove a row.
  - a. Click **Delete** to confirm
6. When ready to process, click **Change Subgroup**.
7. Update progress is indicated; click **OK** to close.
8. Click **Status** to display progress.

## Copying Transaction Groups to Template

The Group to Template utility allows you to copy Transaction Groups from a property to the template in multi-property operations.

1. From the **Toolbox** menu, select **Utilities**, select **Transaction Management** and then select **Group Template**.
2. From the **Vertical Ellipsis**, click **Copy to Template**.
3. **Source Property**: Enter or select the source property.
4. **Transaction Groups**: Select one or more transaction groups from the list.
5. Click **Save**.
6. Review and click **Copy and Continue**.
7. Confirmation panel will display result of the copy; click **Print** to generate a report in new window.

## Copying Transaction Subgroups to Template

The Subgroup (to) Template utility allows you to copy Transaction Subgroups from a property to the template in multi-property operations.

1. From the **Toolbox** menu, select **Utilities**, select **Transaction Management** and then select **Subgroup Template**.
2. From the **Vertical Ellipsis**, click **Copy to Template**.
3. **Source Property**: Enter or select the source property.
4. **Transaction Subgroups**: Select one or more transaction groups from the list.
5. Click **Save**.
6. Review and click **Copy and Continue**.
7. Confirmation panel will display result of the copy; click **Print** to generate a report in new window.

## Copying Transaction Codes to Template

The Transaction Code (to) Template utility allows you to copy Transaction Codes from a property to the template in multi-property operations.

1. From the **Toolbox** menu, select **Utilities**, select **Transaction Management** and then select **Transaction Code Template**.
2. From the **Vertical Ellipsis**, click **Copy to Template**.
3. **Source Property**: Enter or select the source property.
4. **Transaction Subgroups**: Select one or more transaction codes from the list.
5. Click **Save**.
6. Review and click **Copy and Continue**.

7. Confirmation panel will display result of the copy; click **Print** to generate a report in new window.

## Document Number Update

### Prerequisites for Document Number Update

Document Number update provides options to update the sequences used for Folio Numbers and AR Invoice Numbers.

## Prerequisites for Document Number Update

### OPERA Cloud Tasks

**Group:** Toolbox

**Tasks:** Document Number Update

- AR Invoice Numbers
- Folio Numbers

## Updating AR Invoice Number Sequence

Use this option to update the start/next value for each **folio type** in use at your property. If no folio types are configured you will see 'Default' folio type listed.

### Note:

This activity is not tracked in the Changes Log.

### Updating a Folio Sequence

1. From the **Toolbox** menu, select **Utilities**, select **Document Number Update** then select **Folio Numbers**.
2. Enter search criteria, then click **Search**.
3. In this results panel, each folio type is listed displaying the current start/next value
  - a. Enter a start/next value for a folio type in **New Folio Start Sequence** field.

### Note:

The number entered will increment by 1 when generating the first folio. For example, entering 100 as start value will result in folio number 101 as the initial value. No update will occur if you leave the field blank for a folio type listed.

4. Click **Save**.

## Updating Folio Number Sequences

You can set the start number for a folio sequence for any Folio Type or general default folio when Folio Types are not used. The following conditions apply when creating a new Folio Start Sequence:

- The number you enter in the New Folio Start Sequence field increments by one when the folio is generated.
- The Folio Sequence is property specific.
- An error message appears when a duplicate number is attempted.

### Creating a New Start Sequence

1. From the **Toolbox** menu, select **Utilities**, select **Document Number Update**, and select **Folio Numbers**.
2. Enter the **Property** name and click **Search**.
  - a. If no Folio Types exist, an option for the property's default folio appears allowing you enter a new Folio Start Sequence value.
  - b. If Folio Types are configured for the property, all Folio Types appear. Each Folio Type displays the current Folio Start Sequence and provides the New Folio Start Sequence field for manually updating the sequence.
3. Locate the **Folio Type** you want to update and enter a new **start** value in the **New Folio Start Sequence** field.
4. Click **Save**.

 **Note:**

The number you enter increments by one when the folio is generated. For example, entering 100 as the start value results in a folio number of 101 as the initial value. No update occurs if you leave the New Folio Start Sequence field blank for a folio type listed.

## Exporting Property Configuration Shells

You can export the property configuration from a production environment and import it to a non-production environment to refresh (re-provision) the property. Exporting property configuration activity is tracked in the [Changes Log](#).

### Exporting Property Configuration

1. From the **Toolbox** menu, select **System Setup** and then select **Export Shell**.
2. Select **Action**:
  - a. Select **Export Shell for Immediate Download**.
3. **Shell (File) Name**: Enter a filename.
4. **Property**: Enter or select a property.
5. Select **Shell Type**:
  - a. **Property Shell (Legacy)**: Includes only the essential configuration for the selected property.
  - b. **Property Configuration**: Includes a majority of configurations for the selected property. See **Table 22-1** below.
6. Click **Export Shell**: A progress bar displays the export progress.

### Downloading Property Configuration Export

1. From the **Toolbox** menu, select **System Setup** and then select **Export Shell**.
2. Select **Action**:
  - a. **Download Exported Shell**: Select to download an existing export file.
3. **Shell (File) Name**: Select a shell file from the list.
4. Click **Download Shell**.
  - a. Select **Save File** when prompted and click **OK**.
  - b. Select a destination folder and click **Save**.

# Importing Property Configuration Shells

The Import (Property) Shell option is enabled in non-production environments and used to import a configuration shell from a production environment of the same version. Once the configuration shell is imported, use the [Refresh Property](#) utility to re-provision the property.

**Note:**

The import process runs for several hours, depending on the size of the export.

## Importing Property Configuration

1. From the **Toolbox** menu, select **System Setup** then select **Import Shell**.
  - a. **Source Shell.** Enter a value to name the import. This identifier will appear in [Refresh Property](#).
  - b. **Choose File.** Click to browse your local file system and select \*.osh file to upload and import.
2. Click **Import Shell**.

# Configuring External Databases

The External Database Setup feature in the Toolbox menu is essential for external systems configuration in OPERA Cloud and for integration with the correct chain/property. Its purpose is to link each property in the multi-tenant cloud to its respective external system and external database ID.

The feature enables you to create new external database configurations based on existing Interface Types. You create a unique External Database Code with a description to identify each new configuration. The description should include the External Database Code and a full external database name to explain its system type and use. OPERA Cloud will provide a list of properties that use the Interface Type you specify in your search. From the list, you can highlight and select one or more properties to move into your new configuration. You can save and continue the process of creating the external database.

You can also edit external database setups to update database descriptions and to add or remove linked properties. The search function provides a list of databases, each identified by a code, a description, and an interface type. You can expand each database listed in your search results to reveal the properties attached to the database. You can also elect to show inactive database/interface types or to hide inactive database/interface types using. Database/interface types remain configured even if shown as inactive.

Use the following search criteria to locate an interface type for your property.

- **Interface Type:** Select an interface type from the list of values (LOV). The LOV filters the search results by an interface types already configured. You can then

edit the interface type. The same interface type might be associated with multiple databases, so the LOV shows all of the available databases when referencing the interface type.

- **Property:** Enter the external database name to filter search results based on a specific property database. The property database can include multiple properties, depending on its current configuration and name.
- **Code:** Search by entering a known External Database full or partial code.

### Adding External Database

1. From the side menu select **Toolbox**, select **System Setup** then **External Databases**.
2. Click **New** and enter the following details:
  - a. **Code:** Enter a code for the external database. The code is displayed in profile subscriptions. This code is also seen when configuring Business Events for special External Databases.
  - b. **Description:** Enter full name to explain the location and use.
  - c. **Interface Type:** Select an interface type from the list.
  - d. **Outbound Code:** Select outbound code to link with external database code
  - e. **Copy Subscription:** Select checkbox to copy default business events configuration for the database code created for an external system.
  - f. **Available > Selected:** Select applicable properties in the **Available** panel and click > to move selection to the **Selected** panel.
3. Click **Save and Continue**.

### Editing an External Database

1. From the side menu select **Toolbox**, select **System Setup** then **External Databases**.
2. Enter search criteria and click **Search**.

 **Note:**

Click **Vertical Ellipsis** and select **Show Inactive** to include inactive records

3. Select an external database in the result, click **Vertical Ellipsis** and select **Edit**.
4. Update details.
5. **Inactive:** Click to mark the external database inactive.
6. Click **Save**.

### Deleting an External Database

1. From the side menu select **Toolbox**, select **System Setup** then **External Databases**.
2. Enter search criteria and click **Search**.
3. Select an external database in the result, click **Vertical Ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

# Configuring Outbound Systems

## Overview

Outbound System Configuration provides a way to enable integrations initiated from within OPERA Cloud.

For example, for an integrated CRM solution that follows the OPERA Cloud REST specification, you can define an Outbound Code with Outbound Type = CRM and configure the CRM system end point URL and authentication credentials. Then, from the respective area(s) of OPERA Cloud, you can make synchronous calls (GET/POST) from OPERA Cloud to/from the CRM system using the REST web services.

### Note:

The screen is accessible for Role/Task Permission: **Toolbox > Outbound System Configuration** privileged users.

### Note:

The Configured OAuth Token URL and Service Path URLs must be added to the proxy allow-list using a CX/MOS request.

### Note:

**Prerequisite:** Proxy Server, Proxy server by pass controls needs to be configured under the OPERA Controls General group to work with any outbound calls that occur from the proxy server.

### Note:

Enable **Bypass Proxy** when you configure the endpoint URL provided by Oracle Cloud within the same region. Do not enable if the URL is from a cross region or non-Oracle Cloud.

You can create the Outbound Code at the Global (Chain) or Property level for the available Outbound Types.

## Adding Outbound Systems Configuration

1. From the **Toolbox** menu, select **System Setup**, and then select **Outbound System Configuration**.
2. Click **New** and complete the following:
  - a. **Context:** Select a value from the list.

- i. Select **Global** when you want to define chain-level outbound system configurations that can be used by all properties in the chain.
- ii. Select **Property** when you want to define property-level outbound system configurations that can be used by the property
- b. **Outbound Type:** Select an Outbound Type for which you want to create a configuration.
- c. **Outbound Code:** Enter the unique Outbound Code you want to create, such as SGAP1, CRMC1, CRMP1, and so on.

 **Note:**

The Outbound Code is unique in the given OPERA Cloud multi-tenant instance.

- d. **Outbound Description:** Enter Summary Description of the Outbound System being configured.
- e. **Protocol:** Gets defaulted with the supported protocol REST or XML for the selected Outbound Type for user information.
- f. **Enable External System:** Select this option to create an External System Code and External Database Code in OPERA Cloud, the same as the Outbound Code.
- g. **Enable Conversions:** This option is enabled when you select the above option. Select this option to define [Data Value Mappings](#) for the specific conversion groups.
  - i. When you try to create a Global Level Outbound Code, Enable Conversion is disabled as no versions are allowed at the Global level.
  - ii. Data Value Mapping conversions can be defined only for Property Level Outbound codes when this option is selected.
- h. **External Property:** This field is visible when the above option is selected for defining a Property conversion code.
- i. **Authorization Type:** Select a value from the list.
  - i. **BASIC:** when an external system provides only basic authentication details, such as user account user name and service account password key details.
  - ii. **OAuth :** when an external system provides open authorization details, such as OAuth Token URL, service account and key, and clientid and secret credential details.
  - iii. **TOKEN:** when the vendor system provides only token based authorization. A token key up to 256 characters is allowed.
  - iv. **NONE:** when there is no authorization required. This is applicable only for CRM\_LEGACY outbound type configurations.
- j. **Grant Type:** Select a value from the list:
  - i. **Password:** when an external system provides you with Service Account and Key and Client ID and Key details.
  - ii. **Client Credentials:** when an external system provides you only the Client ID and Key details.
- k. **Scope:** Enter the Scope URL provided by the external system.

- l. Application Key:** Enter the Application Key provided by the external system.
  - m. Bypass Proxy:** Select the check box when the outbound system endpoint URL is provided by Oracle Cloud Service.
  - n. Service Details:** Enter details.
    - i. Service Name:** Defaulted value RESTAPIBaseURL.
    - ii. Service Path:** Enter the external system's REST APIs base URL. The path should not include any relative paths, query parameters, or path parameters.
      - i.** For example, you need to set the Base URL only, which is `https://mycrmsystem.com`.
      - ii.** In this case, for Profile Lookup, the target URL generates as: `https://mycrmsystem.com/crm/v1/externalSystems/{systemCode}/chains/{chainCode}/externalProfiles`.
3. Click **Save**.

### Editing Outbound System Configuration

1. From the **Toolbox** menu, select **System Setup**, and then select **Outbound System Configuration**.
2. Enter search criteria and click **Search**.
3. Select the **Outbound System** in search results, click the vertical ellipsis **Actions** menu, and select **Edit**.
  - a.** Update the configuration.
  - b. Inactive:** Select to make the outbound connection inactive. Deselect to activate.
  - c.** Make any necessary changes as required.
4. Click **Save**.

### Deleting Outbound System Configuration

1. From the **Toolbox** menu, select **System Setup**, and then select **Outbound System Configuration**.
2. Enter search criteria and click **Search**.
3. Select the **Outbound System** in search results, click the vertical ellipsis **Actions** menu, and select **Delete**.
4. Click **Delete** to confirm.

### Testing Outbound System Connectivity

1. From the **Toolbox** menu, select **System Setup**, and then select **Outbound System Configuration**.
2. Enter search criteria and click **Search**.
3. Select the **Outbound System** in search results, click the vertical ellipsis **Actions**, and select **Test**.
4. Click **OK**.
  - a.** Test Connection Result Messages.

- b. When the configured Base URL service path is valid, it shows an information message, "Test Connection Successful."
- c. When the configured Base URL Service path is not secured, it shows an error, "Test Connection Failed - Processing Exception occurred."
- d. When the configured Base URL Service path is not available, it shows an error, "Test Connection Failed with response status: 502-Bad Gateway."
- e. When the configured Base URL service path is invalid, it shows an error, "Test Connection Failed - SSLHandshake Error. Please contact Oracle Support."
- f. When Test connection is performed for GAMING\_SGACSC, GAMING\_SGCMP, it shows an error, "Test connection cannot be done for this configuration."
- g. When Test connection is performed without adding the Service Path to the proxy allow-list, it shows an error, "Test connection not allowed through proxy. Please contact administrator."

 **Note:**

The test connection validates the Service Path URL only, which is configured and added to the proxy allow-list.

## DATA VALUE MAPPINGS

Data Value Mapping (DVM) configuration is provided for defining conversions between OPERA Values and Outbound System values for the Outbound Codes created.

Data Value Mapping is visible only for the Outbound Codes created with Enable Conversions while creating the Outbound Code.

It is available under the I Want To . . . options.

1. Search for the Outbound Code created at the Global (Chain) or Property Level.
2. Click the **I Want To . . .** icon from the search results row where you want to define Data Value Mappings.
3. The Data Value Mapping screen launches in a pop-up window with Outbound Code as an Interface.
4. Select the required group from the left pane, and the right pane loads with the predefined codes if available.
5. You can create a new conversion, edit a conversion, or delete an existing conversion.

## CUSTOM HEADERS

Custom Headers configuration is provided for defining the additional custom header names and values for the Outbound Codes created.

Custom Headers allow you to define a maximum of five custom header names and values that can be communicated with external systems during API calls.

Custom Headers configuration is available under the I Want To . . . options.

1. Search for the Outbound Code created at the Global (Chain) or Property Level.
2. Click the **I Want To . . .** icon from the search results row where you want to define Custom Headers.
3. The Custom Headers screen launches in a pop-up window.

4. Click **Edit** to define the Header Name and Header Value and then click **Save**.
5. You can edit and modify values for any changes, or you can delete a row by removing the field values (make the field blank) and save to update the configuration.

### Configuring Custom Headers

A maximum of five header can be configured; standard headers cannot be configured as custom headers. To delete a header clear the Header Name and Header Value entry.

1. From the **Toolbox** menu, select **System Setup**, and then select **Outbound System Configuration**.
2. Enter search criteria and click **Search**.
3. Select the **Outbound System** in search results, click the vertical ellipsis **Actions**, and select **Test**.
  - a. **Header Name:** Enter a name for the header.
  - b. **Header Value:** Enter a value for the header
  - c. Click **Save**.

### Outbound System Types and Respective Configurations

#### SCIENTIFIC GAMES ACSC

Outbound Type GAMING\_SGACSC is used to integrate OPERA Cloud functionality and its respective REST APIs with [Scientific Games ACSC](#) functionality and its respective [REST APIs](#). The Gaming Integration user must configure the Outbound Code with the following configurations:

1. The Outbound Code should be created for the property that requires Scientific Gaming (SC) integration.
2. Select the Outbound Type **GAMING\_SGACSC**.
3. Enter a unique **Outbound Code**, for example: SGACSCP1.
4. Enter a **Description** for the gaming system.
5. Enable the **External System**, enable **Conversions**, and enable the external **Property Code**.
6. Protocol is defaulted with REST for Scientific Games ACSC integration.
7. Select Authorization Type **OAUTH** and provide the OAuth Token URL, for example: <https://api.sgenvoy.com/oauth>.
8. Select **Grant Type Client Credentials** and enter the **Client ID**, **Client Key**, and **Application Key** provided by SG.
9. Enter the **RESP API Base URL Service Path** provided by SG, for example: <https://api.sgenvoy.com>.
10. Save the **Outbound Code** configuration.
  - a. Search for the Outbound Code created and navigate to the **I Want To . . .** option, Data Value Mappings.

- b. Define the Conversion Codes for Address Type, Gender, Phone Type, State Code, Country Code, Language Code, Profile Type, Title, Membership Level, and Membership Type.

### SCIENTIFIC GAMES CMP

The Outbound Type `GAMING_SGCMP` is used to integrate OPERA Cloud functionality and its respective REST APIs with Scientific Games CMP functionality and its respective REST APIs. The Gaming Integration user must configure the Outbound Code with the following configurations:

1. The Outbound Code should be created for the property that requires Scientific Gaming (SC) integration.
2. Select the Outbound Type **GAMING\_SGCMP**.
3. Enter a unique **Outbound Code**, for example: `SGCMPPROP2`.
4. Enter a **Description** for the gaming system.
5. Enable the **External System**, enable **Conversions**, and enter the external **Property Code**.
6. Protocol is defaulted with REST for Scientific Games integration.
7. Select Authorization Type **OAuth** and provide the OAuth Token URL, for example: `https://api.sgenvoy.com/V1.6/oauth`.
8. Select **Grant Type Client Credentials** and enter the **Client ID**, **Client Key**, and **Application Key** provided by SG.
9. Enter the **RESP API Base URL Service Path** provided by SG, for example: `https://api.sgenvoy.com/V1.6/`.
10. Save the Outbound Code configuration.
  - a. Search for the Outbound Code created and navigate to the **I Want To . . .** option, Data Value Mappings.
  - b. Define the Conversion Codes for Address Type, Gender, Phone Type, State Code, Country Code, Language Code, Profile Type, Title, Membership Level, and Membership Type.

### GAMING GENERIC

The Outbound Type `GAMING_GENERIC` is used to integrate OPERA Cloud functionality, such as Profile Lookup and Download, and Create Enrollment with any Gaming Vendor System that follows OPERA Cloud REST APIs specifications and standards.

1. An Outbound Code should be created for the property that requires Scientific Gaming integration.
2. Select Outbound Type **GAMING\_GENERIC**.
3. Enter a unique **Outbound Code**, for example: `GAMGENPPROP3`.
4. Enter a **Description** for the gaming system.
5. Enable the **External System**, enable **Conversions**, and enter the external **Property Code**.
6. Protocol is defaulted with REST for Scientific Games integration.

7. Select Authorization Type **OAUTH** and provide the OAuth Token URL, for example: `https://gaminghost.com/v1/oauth`.
8. Select **Grant Type Client Credentials** and enter the **Client ID**, **Client Key**, and **Application Key** provided by the gaming vendor.
9. Enter the **RESP API Base URL Service Path** provided by SG, for example: `https://gaminghost.com/v1`.
10. Save the Outbound Code configuration.
  - a. Search for the Outbound Code created and navigate to the **I Want To . . .** options, Data Value Mappings.
  - b. Define the Conversion Codes for Address Type, Gender, Phone Type, State Code, Country Code, Language Code, Profile Type, Title, Membership Level, and Membership Type.

### EXPERIAN QAS ADDRESS VALIDATION

The Outbound Type ADDRESS\_QAS is used to integrate OPERA Cloud functionality and its respective REST APIs with the [Experian QAS](#) address validation functionality and its respective [REST APIs](#). The OPERA Cloud Outbound Pattern framework transforms the OPERA REST specifications into Experian REST specifications during outbound communications. The Address Validation Integration user must configure the Outbound Code with the following configurations:

1. Outbound Code can be created at the Global (Chain) or Property level context based on the Address Validation integration requirement.
2. Select Outbound Type **ADDRESS\_QAS**.
3. Enter a unique **Outbound Code**, for example: `ADDQASCHAIN1`.
4. Enter a **Description** for the Address Validation System summary.
5. Protocol is defaulted with REST for ADDRESS\_QAS integration.
6. Select Authorization Type **Token**.
7. Enter the **Token Details** provided by Experian.
8. Enter the **RESP API Base URL Service Path** provided by Experian. For example, `https://api.experianaperture.io`.
9. Save the **Outbound Code** configuration.
10. Search for the Outbound Code created and navigate to I Want To . . . options: **Custom Headers**.
  - a. Select **New**.
  - b. Add header name as **Add-Components**.
  - c. Add header value as **True**.
  - d. Click **Save**.
11. Search for the Outbound Code created and navigate to I Want To . . . options: **Data Value Mappings**.
  - Define the **Conversion Codes** for State Code (be sure to include the Country Code field in State Code Mapping), Country Code (Experian uses ISO3 codes).

### GBG LOQATE ADDRESS VALIDATION

Outbound Type ADDRESS\_GBG is used to integrate OPERA Cloud functionality and its respective REST APIs with GBG loqate address validation functionality and its respective REST APIs. OPERA Cloud Outbound Pattern framework transforms the OPERA REST specifications into GBG REST specifications during outbound communication. The Address Validation Integration user must configure the Outbound Code with the following configurations:

1. The Outbound Code can be created at the global (Chain) or property level context based on the Address Validation integration requirement.
2. Select Outbound Type **ADDRESS\_GBG**.
3. Enter a unique **outbound code**, for example: GBGCHAIN1.
4. Enter a **description** for the Address Validation System summary.
5. Protocol is defaulted with REST for ADDRESS\_GBG integration.
6. Select Authorization Type **TOKEN**.
7. Enter the **Token details** provided by GBG.
8. Enter the **RESP API Base URL Service Path** provided by GBG.
  - For example, <https://api.addressy.com/Capture/Interactive/>.
9. Save the **Outbound Code** configuration.

#### CRM GENERIC

Outbound Type CRM is used to integrate OPERA Cloud CRM functionality, such as Profile Lookup and Download, and create enrollment in any CRM Vendor System that follows OPERA Cloud REST APIs specifications and standards.

1. An Outbound Code can be created at the Global (Chain) or Property level context based on the CRM system integration requirement.
2. Select the Outbound Type **CRM**.
3. Enter a unique **Outbound Code**, for example: CRMCHAIN1
4. Enter a **Description** for the CRM System summary
5. Enable **External System**, enable **Conversions**, and enable **External Property Code**.  
When Enable External System is selected:
  - a. An External System code gets created automatically, the same as Outbound Code with the Lookup flag enabled.
  - b. An External Database code gets created automatically, the same as Outbound Code and the same code is available for Profile Lookup.
6. Protocol is defaulted with REST for CRM integration.
7. Select Authorization Type **Basic**, or **Oauth**, or **Token** with the respective authorization details based on the CRM vendor details provided.
8. Enter the **REST API Base URL Service Path** provided by the CRM vendor. For example, <https://api.mycrmsystem.com/apis/>.
9. Save the **Outbound Code** configuration.

 **Note:**

For more information, see: [Prerequisites for Enrolling Guests in External Loyalty Programs](#).

### CRM FOR LEGACY ORS

Outbound Type CRM\_LEGACY is used to integrate OPERA Cloud CRM functionality like Profile Lookup and Download with legacy OPERA Reservation System (ORS) interfaces.

1. The Outbound Code can be created at the Global (Chain) or Property level context based on the CRM system integration requirement.

 **Note:**

It is recommended that you create at Global level if all the properties of the Chain use the same OPERA Reservation System (ORS) system.

2. Select Outbound Type **CRM\_LEGACY**.
3. Enter a unique **Outbound Code**, for example: CRMORSCHAIN1.
4. Enter a **Description** for the CRM Legacy System summary.
5. Protocol is defaulted with XML for CRM\_LEGACY integration.
6. Select an **Authorization Type** for the CRM Legacy integration.
  - a. Select **NONE** for Non-SSD OPERA V5 ORS.
  - b. Select **BASIC** for SSD OPERA V5 ORS.
7. Enter the **Application Key** if provided by the legacy system.
8. Add a new **Row**, select **GetExternalProfiles**, and enter the **Service Path** to fetch profiles, for example: http://host/Operajserv/OperaWebSvcs/Lookup.
9. Add a new **Row**, select **DownloadExternalProfile**, and enter the **Service Path** to download profiles, for example: http://host/Operajserv/OXIServlets/ORSLookup.
10. Add New row, select **GetMembershipDetails**, enter service path for get membership details of the profile, for example: http://host/Operajserv/OperaWebSvcs/MemberInfo.
11. Add New row, select **PostMembershipNumber**, enter service path for download profiles, for example: http://host/Operajserv/OperaWebSvcs/NewMemberCard.
12. Add New row, select **RedeemAward**, enter service path for download profiles, for example: http://host/Operajserv/OXIServlets/ORSLookup.
13. Save the **Outbound Code** configuration
14. If you are using an existing ORS system for Lookup and Download:
  - a. Ensure the Lookup flag is enabled for the External System ORS under **OPERA Cloud Administration > Interfaces > Business Events > External System**.
  - b. Associate the Outbound Code with the External Database Code of the ORS Interface under **Toolbox > External Database**.

15. If you are trying to configure the ORS interface for the first time, refer to [Interface Setup](#).

### CRM for IATA

Outbound Type **CRM\_IATA** is used to integrate the OPERA Cloud Travel Agent Profile's IATA number validation functionality with the IATA organization.

1. The outbound code should be created at the Property level.
2. Select Outbound Type **CRM\_IATA**.
3. Enter a unique **Outbound Code**, for example: IATAP1.
4. Enter a **Description** such as IATA Validation System.
5. Protocol is defaulted with REST for CRM\_IATA integration.
6. Select Authorization Type **TOKEN**.
7. Enter the **Token** value provided by IATA.
8. Enter the **Application Key** provided by IATA.
9. Enter the REST API Base URL **Service Path** provided by IATA organization:
  - a. For example, <https://globaldata.developer.iata.org/v1/checkacode>.
10. Save the Outbound Code configuration.

## Data Import

### Watch Video

Use Data Import to import data to a fully configured OPERA Cloud property. Data transformation is not available using this method and requires that the data in the import data files matches the current OPERA Cloud property configuration.

### Note:

Profile match and merge are not supported.

The following data types (entities) can be imported based on the Cloud Service(s) and OPERA Controls that are active in your property.

**Table 22-2 Data Types**

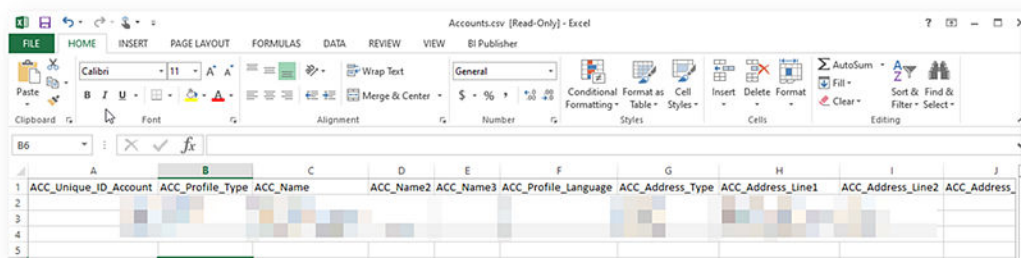

Data Type	Notes	Template Filename
Guest /Contact Profiles	Profile match and merge is not supported.	Guest_Contact_Profiles.csv
Sales Accounts (Travel Agent, Company, Source) Profiles	Profile match and merge is not supported.	Accounts.csv

**Table 22-2 (Cont.) Data Types**

Data Type	Notes	Template Filename
Relationships (Account/Contact relationship only)	Available when the Relationships OPERA Control is active.	Relationships.csv
Reservations (Future)	Block pickup is not possible; rooms are deducted from House. Use Rooming List import instead.	Reservations.csv
Blocks and Room/Rate Grid (Current and future only)	Only the primary Block, Account, and Contact will be imported. 3 Block Notes can be imported.	Blocks.csv Room_And_Rate_Grid.csv
Catering Events	Available when the Simple Events or Catering Events OPERA Control is active.  Current/Future Events Only. Event Forecast information will be imported for each Event. Only four Forecast Revenue Types and their corresponding Forecast Revenue will be imported.  If any notes are populated in the CSV file, the Note Type defaults to "Event" and the Note Title is derived from the Note Type. Only three event notes will be imported.  The Rental Code corresponding to the Rental Amount will always be "Custom.". Take this into account during the import process.	Events.csv
Sales Activities	Available with an Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition or Sales and Event Management Premium Edition subscription.  Available with an Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition or Sales and Event Management Premium Edition subscription.  Only the primary Account and Contact will be imported.	Activities.csv

 **Note:**  
Each data file can have a maximum file size of 10MB. You can upload and import multiple files per data type.

Only one import cycle per property is permitted at any given time.

The data import utility is intended for all entities to be uploaded, validated, and imported in one cycle to ensure data consistency.

You have 14 days from the first successful file upload to complete the data import cycle. If the data import cycle has not been completed in 14 days, you will need to restart the data import process again.

Data import user activity is tracked in the [+changes log](#) under the Miscellaneous group and Import Data action type.

### Data File Requirements and Considerations

The upload data files must meet the following requirements:

- All the mandatory columns should be present in the template along with values.
- Column data must meet (not exceed) the OPERA Cloud field length requirements.
- Column data only contains western characters.
- String values are imported 'as-is' in term of letter case.
- Unique Id's (primary key) in each data type must not be used in another file for same data type in the same import cycle. For example, if you are uploading two files **Account01.csv** and **Accounts02.csv** for Accounts data type, a ACC\_Unique\_ID\_Account value specified in file Account01.csv cannot be used in Account02.csv or any other files for the same data type within the same import cycle.
- The order/sequence of the columns can be different.
- All column names must match with respective template provided.
- The columns names are case-insensitive.
- Date column values must be in **YYYYMMDD** format.
- There must not be any new line characters in the CSV files.
- The uploaded file for a data type must not contain any additional header columns which are not part of template.
- Non-mandatory columns can be excluded from upload file.

### Data Types (Entities) and Data Elements

#### Guest / Contact Profiles

- Mandatory columns are marked in bold.
- The Keep History YN and ActiveYN fields for Guest/Contact profiles default to Y for all imported profiles.

**Table 22-3 Guest / Contact Profiles**

Column Name	Description	Max Data Length	Sample Data	Mandatory
IC_Unique_ID_Ind_Contact (PK)	Unique ID value for Guest/Contact Profiles in the uploaded csv files for data type <b>Guest/Contact Profiles</b> within an import cycle. <ul style="list-style-type: none"> <li>• Primary Key</li> </ul>	200	Ex: (30001, INC20001)	Y
IC_Contact_YN	<ul style="list-style-type: none"> <li>• Y or N</li> <li>• Y for contact; else N</li> </ul>	N/A	Ex: (Y, N)	Y

Table 22-3 (Cont.) Guest / Contact Profiles

Column Name	Description	Max Data Length	Sample Data	Mandatory
IC_Last_Name	The Last name of an Guest/Contact Profile name.	40	Ex: (Smith, Brown)	Y
IC_Middle_Name	The Middle name of an Guest/Contact Profile name.	40	Ex: (David, James)	
IC_First_Name	The First name of an Guest/Contact Profile name.	40	Ex: (Robert, John)	
IC_Profile_Language	Primary language used for the profile. The language code needs to be pre-configured in OPERA Cloud.	20	Ex: (DE, E, RU)	
IC_Title	The title of the Individual. The Title code needs to be pre-configured in OPERA Cloud.	20	Ex: (Mr., Mrs., Dr.)	
IC_Nationality	Nationality of the Individual. The Title code needs to be pre-configured in OPERA Cloud.	20	Ex: (IND, US)	
IC_Position	The business title for the Guest/Contact Profile.	60	Ex: (Director)	
IC_Owner_Code	Owner Code associated with the Guest/Contact Profile. If blank value is provided, it will be defaulted to <b>ALL</b> .	10	Ex: (ALL)	
IC_VIP_Code	VIP Code associated with the Guest/Contact Profile. The VIP code needs to be pre-configured in OPERA Cloud.	20	Ex: (VIP, VVIP)	
IC_Address_Type	The address type code. The address code needs to be pre-configured in OPERA Cloud.	20	Ex: (HOME, BUSINESS)	
IC_Address_Line1	The first line of street address.	80		
IC_Address_Line2	The second line of street address.	80		
IC_Address_Line3	The third line of street address.	80		
IC_Address_Line4	The fourth line of street address.	80		
IC_City	The City of this address.	40		
IC_Postal_Code	The Postal Code of the address.	15		
IC_Postal_Code_Ext	The Postal Code Extension of the address.	20		

Table 22-3 (Cont.) Guest / Contact Profiles

Column Name	Description	Max Data Length	Sample Data	Mandatory
IC_Country	The Country code of the address; pre-configured in OPERA Cloud.	40		
IC_State	The State code of the address; pre-configured in OPERA Cloud.	40		
IC_Address_Language	The Language code used for the address; pre-configured in OPERA Cloud.	20		
IC_Ref_Currency	Currency code to be used for the commission payment; pre-configured in OPERA Cloud.	20		
IC_Communication_Type1	The Communication type code; pre-configured in OPERA Cloud.	4000		
IC_Communication1	The value for the communication for IC_Communication_Type1.	4000		
IC_Communication_Type2	The Communication type code; pre-configured in OPERA Cloud.	4000		
IC_Communication2	The value for the communication for IC_Communication_Type2.	4000		
IC_Communication_Type3	The Communication type code; pre-configured in OPERA Cloud.	4000		
IC_Communication3	The value for the communication for IC_Communication_Type3.	4000	Ex: (xxx@ xxxxx. xxx) Code: EMAIL	

## Sales Account Profiles (Company/Agent/Source)

- Mandatory columns are marked in bold.
- The ActiveYN field for Accounts defaults to Y for all imported profiles.

Table 22-4 Sales Account Profiles (Company/Agent/Source)

Column Name	Description	Max Data Length	Sample Data	Mandatory
ACC_Unique_ID_Account (PK)	Unique ID value for Sales Account in the uploaded csv files for data type <b>Accounts</b> within an import cycle.		Ex: (40001, AC40001)	Y
ACC_Profile_Type	The type of sales account. The account type can be <b>TA</b> , <b>Source</b> , and <b>Company</b> .		Ex: ( TA, Source, Company )	Y

**Table 22-4 (Cont.) Sales Account Profiles (Company/Agent/Source)**

Column Name	Description	Max Data Length	Sample Data	Mandatory
ACC_Name	Name of the account profile.	80	Ex: ( Company Name, Source Name)	Y
ACC_Name2	Second name of the account profile.	80		
ACC_Name3	Third name of the account profile.	80		
ACC_Profile_Language	Primary language of the profile; pre-configured in OPERA Cloud.	20	Ex: (DE, E, RU)	
ACC_Address_Type	The address type code; pre-configured in OPERA Cloud.	80	Ex: (HOME, BUSINESS)	
ACC_Address_Type1	The first line of street address.	80	Ex: 100 West Monroe	
ACC_Address_Type2	The second line of street address.		Ex: Suite 100	
ACC_Address_Type3	The third line of street address.			
ACC_Address_Type4	The fourth line of street address.			
ACC_City	The City of this address.		Ex: (Chicago)	
ACC_Postal_Code	The Postal Code of the address.		Ex: (60601)	
ACC_Postal_Code_Ext	The Postal Code Extension of the address.		Ex: (0401)	
ACC_Country	The Country code of the address; pre-configured in OPERA Cloud.		Ex: (US)	
ACC_State	The State code of the address; pre-configured in OPERA Cloud.		Ex: (IL)	
ACC_Address_Language	The Language code used for the address; pre-configured in OPERA Cloud.		Ex: (E, JPN, CHN)	
ACC_Ref_Currency	Currency code to be used for the commission payment; pre-configured in OPERA Cloud.		Ex: (INR, USD)	
ACC_Communication_Type1	The Communication type code; pre-configured in OPERA Cloud.	4000	Ex: (MOBILE)	
ACC_Communication1	The value for the communication for ACC_Communication_Type1.	4000	Ex: 9999999111	
ACC_Communication_Type2	The Communication type code; pre-configured in OPERA Cloud.	4000	Ex: (WEB)	

**Table 22-4 (Cont.) Sales Account Profiles (Company/Agent/Source)**

Column Name	Description	Max Data Length	Sample Data	Mandatory
ACC_Communication2	The value for the communication for ACC_Communication_Type2.	4000		
ACC_Communication_Type3	The Communication type code; pre-configured in OPERA Cloud.	4000	Ex: (EMAIL)	
ACC_Communication3	The value for the communication for ACC_Communication_Type3.	4000	Ex: (xxxx@xxx.xxxC ode: EMAIL	
ACC_Owner_Code	Owner Code associated with the Guest/Contact Profile. If NULL, it will default to <b>ALL</b> .		Ex: (ALL , BB)	
ACC_CORP_IATA_ID	Corp ID / IATA	20	76542389	No
ACC_TAX1_NO	Tax Number 1	30	28745623	No
ACC_TAX2_NO	Tax Number 2	30	9875437	No

 **Note:**

The values for **ACC\_CORP\_IATA\_ID / ACC\_TAX1\_NO/ ACC\_TAX2\_NO** columns in **Account.csv** should be as per your standards and conform to the following OPERA Controls.

- Pad Corporate Number Digits-> Pad Corporate Number Digits/ Pad IATA Number Digits
- Allow Duplicate IDs
- IATA Validation
- Bypass Corp Id Validation
- Tax ID Validation

 **Note:**

The Import process does not perform any validations on these fields.

**Relationships (Account/Contact)**

- Mandatory columns are marked in bold.
- Records reference the **ACC\_Unique\_ID\_Account** and **IC\_Unique\_ID\_Ind\_Contact** values from Sales Account and Guest/Contact data files respectively.
- The default relationship between the account and Guest/Contact profile will be Employer (Type: ACCOUNT) and Employee (Type: CONTACT) relationship.

Table 22-5 Relationships (Account/Contact)

Column Name	Description	Max Data Length	Sample Data	Mandatory
REL_Unique_ID_Relationship (PK)	Unique ID value for Relationship in the uploaded csv files for Data type <b>Relationships</b> within an Import cycle.	200	Ex: (50001, RL50001)	Y
ACC_Unique_ID_Account (FK)	Foreign Key: Linked Unique ID value of Sales Account Profile. Reference PK value from Sales Account data file within an import cycle.	200	Ex: (40004, AC40004)	Y
IC_Unique_ID_Ind_Contact (FK)	Foreign Key: Linked Unique ID value of Guest/Contact Profile. Reference the PK value from Guest/Contact data file within an import cycle.	200	Ex: (30003, INC20003)	Y

### Sales Activities

- Mandatory columns are marked in bold.
- The **ACT\_Unique\_ID\_Activity** value is stored in "ORIG\_WO\_NUMBER" field.
- Child Activities will not be imported.

Table 22-6 Sales Activities

Name	Description	Max Data Length	Sample Data	Mandatory
ACT_Unique_ID_Activity (PK)	Unique ID value for Activity in the uploaded csv files for Data type "Activity" within an Import cycle.	200	Ex: (10001, 10002)	Y
ACT_Start_Date	The Start Date of the Activity. The format must be 'YYYYMMDD.'	Date	Ex: (20210121)	Y
ACT_End_Date	The End Date of the Activity. The format must be 'YYYYMMDD.'	Date	Ex: (20210122))	Y
ACT_Start_Time	The Start Time of the Activity. This field is available for an Appointment Activity. The format must be 'HH24MI.'	Time	Ex: (1400)	Y
ACT_End_Time	The End Time of the Activity. This field is available for an Appointment Activity. The format must be 'HH24MI.'	Time	Ex: (1500)	
ACT_Type	The Activity Type of the Activity. The Activity Type must be pre-configured in OPERA Cloud.	20	Ex: (FOL, SAL)	Y
ACT_Owner	The Owner of the Activity.	10	Ex: (ALL)	

Table 22-6 (Cont.) Sales Activities

Name	Description	Max Data Length	Sample Data	Mandatory
ACT_Class	Activity Class like TODO, APPOINTMENT.	20	Ex: (TODO, APPOINTMENT)	Y
ACT_Purpose	The description of this Activity.	2000	Ex: (Sales Call)	Y
ACT_Account_ID (FK)	The Primary Account ID linked to the Activity. Unique ID value for Account profile in the Uploaded csv files for Data type "Account" for an Import cycle.	200	Ex: (200010)	
ACT_Block_ID (FK)	The Primary Block ID linked to the Activity. Unique ID value for Block in the Uploaded csv files for Data type "Block" for an Import cycle.	200	Ex: (400010)	
ACT_Contact_ID (FK)	The Primary Contact ID linked to the Activity. Unique ID value for Guest/Contact profile in the Uploaded csv files for Data type "Guest/Contact Profiles" for an Import cycle.	200	Ex: (300010)	
ACT_Priority	Priority of the current Activity.	1	Ex: (Y, N)	
ACT_Completed_Date	Date on which the Activity was completed. The format must be 'YYYYMMDD.'	DATE	Ex: (20210122)	
ACT_Completed_Time	Time on which the Activity was completed. The format must be 'HH24MI.'	Time	Ex: (1500)	
ACT_Notes	Notes about the problem, which can be used by different employees working on this problem.	4000	Ex: (Follow Up call with Customer)	
ACT_RESULT	Activity result. This field is available when activity is completed and Activity Results parameter is Active. The Activity Result must be pre-configured in OPERA Cloud.	2000	Ex: (Success)	

### Reservations

- Mandatory columns are marked in bold.

- Records reference the **IC\_Unique\_ID\_Ind\_Contact** from the Guest/Contact data file.
- Reservation Status will be auto-populated with values: **Reserved** (if arrival date is greater than business date), **Arrival** (if arrival date is equal to business date).
- Payment method is defaulted to "CASH."
- Any reservation exceeding the inventory checks in place in OPERA Cloud will not be imported. These records will be generated in the error file after the import process is completed. For files uploaded with the data type "Reservations," ensure the cumulative number of rooms for a room type in all the files does not exceed the inventory checks in place.

**Table 22-7 Reservations**

Column Name	Description	Max Data Length	Sample Data	Mandatory
RES_Unique_ID_Reservation (PK)	Unique ID value for reservation in the uploaded csv files for Data type <b>Reservations</b> within an Import cycle.	200	Ex: (30001, INC20001)	Y
IC_Unique_ID_Ind_Contact (FK)	Foreign Key: Unique ID for Linked Guest Profile. Reference PK value from Guest / Contact Profiles data file for an Import cycle.		Ex: (30001, INC20001)	Y
RES_Confirmation_Number	This is the confirmation number from OPERA5 or third-party PMS. If provided, res_confirmation_number will be migrated as an external reference number of type 'IMPORTCNF' A new/unique OPERA Cloud confirmation number is generated for each reservation.	50	Ex: ( 3451267345)	
RES_CRS_Number	This is the CRS confirmation number from OPERA5 or third-party PMS. res_crs_number will be migrated as an external reference number of type res_external_ref_type_crs (if provided) else 'IMPORTCRS' as default.	50	Ex: (56712345245)	
RES_External_Ref_Type_CRS	The External Reference Type code.	50	Ex: (CRS)	
RES_Reservation_Type	The Reservation Type code; pre-configured in OPERA Cloud.	20	Ex: (6PM)	Y
RES_Arrival_Date	The Arrival Date of the reservation. The format must be YYYYMMDD.		Ex: (20201121)	Y
RES_Departure_Date	The Departure Date of the reservation. The format must be YYYYMMDD.		Ex: (20201125)	Y
RES_Room_Type	The Room type code; pre-configured in OPERA Cloud.	50	Ex: (KNGN)	Y

Table 22-7 (Cont.) Reservations

Column Name	Description	Max Data Length	Sample Data	Man datory
RES_Room_Type_Charge	The room type to charge code; pre-configured in OPERA Cloud.	50	Ex: (KNGN)	
RES_Number_Rooms	The number of rooms for this reservation.	The value must be between 1 to 150	Ex: (1)	
RES_Number_Adults	The <b>Number of Adults</b> : Defaulted to 1 in case of Null value.	The value must be between 1 to 99	Ex: (2)	
RES_Number_Children	The number of Children.	The Value must be between 0- 99	Ex: (1)	
RES_Rate_Code	The Rate Code for the reservation; pre-configured in OPERA Cloud.	20	Ex: (RACK)	Y
RES_Rate_Amount	The Rate Amount for the reservation.		Ex: (100.00)	Y
RES_Currency_Code	The Currency code for the reservation; pre-configured in OPERA Cloud.	20	Ex: (USD)	
RES_Fixed_RateYN	The Fixed Rate Flag. • Y or N	1	Ex: ( Y, N)	Y
Room_Number	The Room Number allocated (pre-assigned) to the reservation.	200	Ex: (101)	
RES_Market_Code	The Market code; pre-configured in OPERA Cloud.	20	Ex: (CORPC)	Y
RES_Source_Code	The Source code; pre-configured in OPERA Cloud.	20	Ex: (REF)	Y
RES_Origin_Code	The Origin code; pre-configured in OPERA Cloud.	40	Ex: (PMS)	
RES_Source_Profile_ID (FK)	Unique ID value of the Source profile in the uploaded csv files for Data type <b>Accounts</b> within an Import cycle. Foreign Key: Unique ID for Linked Accounts Profile. Reference PK value from Accounts Profiles data file for an Import cycle.	200	Ex: (40002, AC40002)	
RES_Company_Profile_ID (FK)	Unique ID value for Company profile in the uploaded csv files for Data type <b>Accounts</b> within an Import cycle. Foreign Key: Unique ID for Linked Accounts Profile. Reference PK value from Accounts Profiles data file for an Import cycle.	200	Ex: (400013, AC40003)	

Table 22-7 (Cont.) Reservations

Column Name	Description	Max Data Length	Sample Data	Mandatory
RES_Travel_Agent_Profile_ID (FK)	Unique ID value for Travel agent profile in the uploaded csv files for Data type <b>Accounts</b> within an Import cycle. Foreign Key: Unique ID for Linked Accounts Profile. Reference PK value from Accounts Profiles data file for an Import cycle.	200	Ex: (40004, AC40004)	
RES_Contact_Profile (FK)	Unique ID value of the Guest/contact profile of uploaded csv files for Data type <b>Reservations</b> within an Import cycle. Foreign Key: Unique ID for Linked Guest Profile. Reference PK value from Guest / Contact Profiles data file for an Import cycle.	200	Ex: (30003, INC20003)	

### Blocks

- Mandatory columns are marked in bold.
- "BLK\_Unique\_ID\_Block" CSV column value is stored in "ORIG\_ALLOTMENT\_HEADER\_ID" column (Table: Allotment\$Header).
- "BLK\_Start\_Date" CSV column value is stored in the "original\_begin\_date" column (Table: Allotment\$Header).
- Past dated Blocks will not be imported.
- Multiple Rate Codes and Owners are not allowed in import CSV.
- If the Ability to Quote Rates in Foreign Currencies OPERA Control is active, it is expected that the import file has property configured currency.
- Sell Limits cannot be imported.
- Blocks having a Start date less than the property date will be imported with an adjusted (Business Date) Start date.
- Master/Sub Blocks, Packages, and Attachments will not be imported.
- Production Data and Change Log Data will not be imported.
- Non-primary Blocks/Account/Contacts will not be imported.
- Block Begin Date must fall between Rate Code Date Range.
- A group profile is automatically created and linked to Blocks.

Table 22-8 Blocks

Name	Description	Max Data Length	Sample Data	Man dat ory
BLK_Unique_ID_Block	Unique ID value for Block in the uploaded csv files for Data type "Block" within an Import cycle.	200	Ex: (40001, 40002)	Y
BLK_Start_Date	The Start Date of the Block. The format must be 'YYYYMMDD.'	Date	Ex: (202101 21)	Y
BLK_End_Date	This field should not be less than the Block Start Date/Business Date.	Date	Ex: (202101 22)	Y
BLK_Name	The Block Name.	40	Ex: (Weddi ng Block)	Y
BLK_Code	Group Code. If OPERA Control "Block Code Template" is active, then the block code must be as per the template defined. For better consistency, follow the setting "Block Code Generation Pattern."	20	Ex: (201110 WEDD)	
BLK_Room_Status	Business Block Status. The Business Block Status must be pre-configured in OPERA Cloud.	4	Ex: (INQ)	Y
BLK_Account_ID	The Primary Account ID linked to the Block. Unique ID value for Account profile in the Uploaded csv files for Data type "Account" for an Import cycle.	200	Ex: (200010 )	
BLK_Contact_ID	The Primary Contact ID linked to the Block. Unique ID value for Guest/Contact profile in the Uploaded csv files for Data type "Guest/Contact Profiles" for an Import cycle.	200	Ex: (300010 )	
BLK_Owner	The Business Block Owner Code.	10	Ex: (All)	Y
BLK_Market_Code	The Main Market Code. The Market Code must be pre-configured in OPERA Cloud.	10	Ex: (CORP)	Y
BLK_Source	Origin of booking that is attached to this business block. The Source must be pre-configured in OPERA Cloud.	20	Ex: (CALL)	Y
BLK_Reservation_Type	The Reservation Type attached to the Block. The Reservation type must be pre-configured in OPERA Cloud.	8	Ex: (GNON)	Y

Table 22-8 (Cont.) Blocks

Name	Description	Max Data Length	Sample Data	Mandatory
BLK_Inventory_Control	The number of days can be extended from the End Date even after expiration. The OPERA Control parameter "Elastic" should be active to import Elastic Inventory.	1	Ex: (Elastic, Non Elastic)	
BLK_Decision_Date	Decision Date for Rooms. The format must be 'YYYYMMDD.'	DATE	Ex: (202101 22)	
BLK_Followup_Date	Rooms Follow-up Date. The format must be 'YYYYMMDD.'	DATE	Ex: (202101 22)	
BLK_Catering_Only	Flag which specifies if this is a Catering Only Booking.	1	Ex: (Y, N)	
BLK_Origin	Channel code attached to the business block.	20	Ex: (Default )	
BLK_Allotment_Origin	Determines which application created the Business block: PMS or SC.	3	Ex: SC	Y
BLK_Type	The Block Type. The OPERA Control Parameter "Business Block Type" should be active. The Block Type must be pre-configured in OPERA Cloud.	8	Ex: (G, W)	
BLK_Room_Owner	Rooms Sales Manager ID. In case the value is not populated in CSV, the value is defaulted to ALL.	10	Ex: (ALL)	
BLK_Rate_Code	The rate code for which this record applies. The Rate Code must be pre-configured in OPERA Cloud.	8	Ex: (RACK)	
BLK_Currency	Currency Code attached to the Business Block. The Currency Code must be pre-configured in OPERA Cloud. The sequence for the Currency import is as follows: <ul style="list-style-type: none"> <li>If the Rate Code is populated in the Block Import csv, then Rate Code Currency.</li> <li>If point.1 is not populated, then Block Import csv Currency column value.</li> <li>If point.2 is not populated, then Property Currency.</li> </ul>	3	Ex: (USD)	
BLK_Print_Rate_YN	Default value used against Block reservations.	1	Ex: (Y, N)	

Table 22-8 (Cont.) Blocks

Name	Description	Max Data Length	Sample Data	Mandatory
BLK_Cutoff_Date	Date on which the available inventory for the block will be cut-off by the system. The format must be 'YYYYMMDD.'  In case both the Cut Off date and Cut Off days is populated in Csv, then consider Cut Off date for Import.  The OPERA Control parameter "CutOff" should be active.	DATE	Ex: (20210122)	
BLK_Cutoff_Days	The number of days prior to Arrival that the whole block will be cut off.	2 (The Number must be between 0 to 99)	Ex: (5, 6)	
BLK_Catering_Owner	Catering Sales Manager ID.  In case value is not populated in CSV, the value is defaulted to ALL.	10	Ex: (ALL)	
BLK_Catering_Status	The Catering Status.  The Currency Status must be pre-configured in OPERA Cloud.  If left Blank, the value from Property catering Currency will be populated.  This column should be populated when the OPERA control parameter "Use single Block status for Rooms and Catering" is not active.	4	Ex: (INQ)	
BLK_Event_Attendees	The number of Attendees for the Catering Events.  This field should be populated when the catering Status is populated.	4 (The Number must be between 0 to 9999)	Ex: (10)	
BLK_Resource_Discount	The default discount percentage applied to the catering items.	3 (The Number must be between 0 to 100)	Ex: (20)	
BLK_Onsite_Name	The Group Representative.	40	Ex: (Adam)	
BLK_Function_Type	The Type of Catering Function.	60	Ex: (Wedding)	
BLK_PostAs	The Catering Info board name.	50	Ex: (Adam and Jill's Wedding)	

Table 22-8 (Cont.) Blocks

Name	Description	Max Data Length	Sample Data	Mandatory
BLK_Note1	Block Notes 1	2000	Ex: (Outside Ceremony at 10:00A M)	
BLK_Note2	Block Notes 2	2000	Ex: (Father of the Bride pays everything)	
BLK_Note3	Block Notes 3	2000	Ex: (The block's room charges will be charged to the company's visa.)	

**(Block) Room and Rate Grid**

- Mandatory columns are marked in bold.
- If the "BLK\_Rate\_Code" column value is populated in the Blocks Import csv, then consider the BLK\_Rate\_Amount (1, 2, 3, 4, AP) for import from the Block Rate Code configuration. Otherwise, consider the values for import from the Room and Rate Grid import CSV file.
- "BLK\_Room\_Type" column value within Room and Rate Grid CSV and Block's "Rate Code (Configured Room Types)" value should match. Otherwise, the record will not be imported.
- "BLK\_Block\_Date" column value within Room and Rate Grid CSV and Block's "Rate Code (Dates within pricing Schedule)" values should match. Otherwise, the record will not be imported.
- Room and Rate Grid details will not be imported for a Catering-Only Block.
- When the OPERA Control "Occupancy Split per Room" is not active, only "BLK\_Occupancy\_1" Occupancy column should be populated.
- Inventory check is not performed during Room and Rate Grid import process.

**Table 22-9 (Block) Room and Rate Grid**

Name	Description	Max Data Length	Sample Data	Mandatory
BLK_Unique_ID_Block	Unique ID value for Block in the uploaded csv files for Data type "Room and Rate Grid" within an Import cycle.	200	Ex: (40001, 40002)	Y
BLK_Room_Type	This is the Room Type booked for this allotment. The Room Type must be pre-configured in OPERA Cloud.	20	Ex: (STDK, STDQ)	Y
BLK_Block_Date	Date of Allotment for which the specified room category is booked. The format must be 'YYYYMMDD.' This date should span within the Block dates for which the Grid is uploaded.	Date	Ex: (20210122)	Y
BLK_Rate_Amount_1	1 person rate		Ex: (100)	
BLK_Rate_Amount_2	2 person rate		Ex: (150)	
BLK_Rate_Amount_3	3 person rate		Ex: (200)	
BLK_Rate_Amount_4	4 person rate		Ex: (225)	
BLK_Rate_Amount_AP	Additional person rate.		Ex: (250)	
BLK_Occupancy_1	Projected number of rooms with Single occupancy for the particular room type & date to which this record corresponds.	4 (The Number must be between 0 to 9999)	Ex: (1)	
BLK_Occupancy_2	Projected number of rooms with Double occupancy for the particular room type & date to which this record corresponds.	4 (The Number must be between 0 to 9999)	Ex: (2)	
BLK_Occupancy_3	Projected number of rooms with Triple occupancy for the particular room type & date to which this record corresponds.	4 (The Number must be between 0 to 9999)	Ex: (3)	
BLK_Occupancy_4	Projected number of rooms with Quadruple occupancy for the particular room type & date to which this record corresponds.	4 (The Number must be between 0 to 9999)	Ex: (1)	

**Events**

- "EVT\_Unique\_ID\_Event" CSV column value is stored in "ORIG\_EVENT\_ID" column (Table: GEM\$EVENT).
- The Rental Code corresponding to the Rental Amount will be "CUSTOM" always.
- More than three Event Notes will not be imported.

- Past dated Events will not be imported.
- No Resources will be imported.
- Packaged Events will not be imported.
- Non Forecast Revenue will not be imported.
- Production Data, Change Log data will not be migrated.
- For Master/Sub/Alternate Event imports, consider the following:
  - Master Event should be placed in CSV before the Sub/Alternate Event.
  - The above should be imported in sequence.
- Events won't be imported for Out Of Order Function Space.
- Events will be imported for Blocks which have "BLK\_Event\_Attendees" populated in Blocks.csv.
- Return to Inventory status Events should not be imported for active Blocks.
- You cannot import Events for a PMS Property if "Simple Events" is Not active.
- You can import Events in an OPERA Cloud Service, Sales and Event Management property where "Catering Events" is active.

**Table 22-10 Events**

Name	Description	Max Data Length	Sample Data	Mandatory
EVT_Unique_ID_Event	Unique ID value for Event in the uploaded csv files for Data type "Events" within an Import cycle.	200	Ex: (5010, 5011)	Y
EVT_Block_ID	The Business Block ID.	200	Ex: (400010)	Y
EVT_Type	The Event type of the Event.	8	Ex: (MTG)	Y
EVT_Name	The Event Name of the Event.	60	Ex: (Meeting)	Y
EVT_Status	The Event Status of the Event.	8	Ex: (INQ)	Y
EVT_Start_Date	The Event Start Date. The format must be 'YYYYMMDD.'	DATE	Ex: (20210121)	Y
EVT_End_Date	The Event End Date. The format must be 'YYYYMMDD.'	DATE	Ex: (1500)	Y
EVT_Start_Time	The Event Start Time. The format must be 'HH24MI.'	TIME	Ex: (1500)	Y
EVT_End_Time	The Event End Time. The format must be 'HH24MI.'	TIME	Ex: (1500)	Y
EVT_Expected_Attendees	The Expected number of people attending the Event.		Ex: (20)	Y

Table 22-10 (Cont.) Events

Name	Description	Max Data Length	Sample Data	Mandatory
EVT_Guaranteed_Attendees	The Guaranteed number of people attending the Event.		Ex: (15)	
EVT_Actual_Attendees	The Actual number of people attending the Event.		Ex: (10)	
EVT_Space	Reserved Function Space for the Event	8	Ex: (CORA)	
EVT_Shareable_YN	This flag indicates whether the Shareable Function Space would be booked as Exclusive or Shareable. This flag should be populated for a Shareable Function Space only.	1	Ex: (Y)	
EVT_Master_YN	This flag indicates whether the Event is a Master Event. This flag should be populated if Master/Sub/Alternate Events are to be Imported.	1	Ex: (N)	
EVT_Master_Event_Link_ID	Linked Master Event ID. This column should be populated if Master/Sub/Alternate Events are to be Imported.	200	Ex: (5012)	
EVT_Link_Type	Event link type like ALTERNATE/SUB EVENT will be stored. This column should be populated if Master/Sub/Alternate Events are to be Imported.	20	Ex: (ALTERNATE)	
EVT_Setup_Style	Function Space Setup. This column should be populated when "EVT_Space" is provided.	8	Ex: (CONF)	
EVT_Setup_Time	Setup Time in Minutes.		Ex: (15)	
EVT_Tear_Down_Time	Teardown Time in Minutes.		Ex: (15)	
EVT_Rental_Amount	Rental Amount for the Event.		Ex: (105)	
EVT_Display_Doorcard_YN	Display Doorcard Y/N.	1	Ex: (Y)	
EVT_Doorcard	Doorcard Signage	50	Ex: (Adam's and Jill's Reception)	
EVT_Loud_Event	This flag indicated whether it's a Noisy Event.	1	Ex: (N)	
EVT_Do_Not_Move	Don't move Flag.	1	Ex: (N)	

Table 22-10 (Cont.) Events

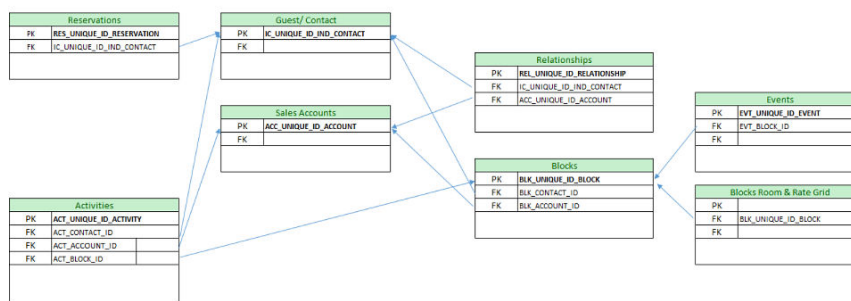

Name	Description	Max Data Length	Sample Data	Mandatory
EVT_NOTE1	Event Note 1.	2000	Ex: (Guest book at Entrance)	
EVT_NOTE2	Event Note 2.	2000	Ex: (Guest book at Entrance)	
EVT_NOTE3	Event Note 3.	2000	Ex: (Guest book at Entrance)	
EVT_Forecast_Revenue_YN	This flag indicates, even though resources may be booked, only the forecasted values will drive reporting revenue.	1	Ex: (N)	
EVT_Forecast_Revenue_Type_1	The Forecast Revenue Type 1 of the Event.	8	Ex: (BEV)	
EVT_Forecast_Total_Revenue_1	The Forecasted Revenue 1 of the Event.		Ex: (20)	
EVT_Forecast_Revenue_Type_2	The Forecasted Revenue 2 of the Event.	8	Ex: (FOOD)	
EVT_Forecast_Total_Revenue_2	The Forecasted Revenue 2 of the Event.		Ex: (30)	
EVT_Forecast_Revenue_Type_3	The Forecast Revenue Type 3 of the Event.	8	Ex: (RENTAL)	
EVT_Forecast_Total_Revenue_3	The Forecasted Revenue 3 of the Event.		Ex: (100)	
EVT_Forecast_Revenue_Type_4	The Forecast Revenue Type 4 of the Event.	8	Ex: (MISC)	
EVT_Forecast_Total_Revenue_4	The Forecasted Revenue 4 of the Event.		Ex: (25)	

## Data Type / Entity Relationships

Import Combinations

	X	X			X	X	X	X	X	X	X	X	X	X	X	X	X	X	Primary & Foreign Keys
Guest/Contact																			IC_UNIQUE_ID_IND_CONTACT (PK)

Reservations *		X							X	X	X	X	X	X	X	X	X	X	RES_UNIQUE_ID_RESERVATION (PK), IC_UNIQUE_ID_IND_CONTACT (FK)
Catering Events										X	X	X	X	X	X	X	X	X	EVT_UNIQUE_ID_EVENT (PK), EVT_BLOCK_ID (FK)
Activities				X		X												X	ACT_UNIQUE_ID_ACTIVITY (PK), ACT_ACCOUNT_ID (FK), ACT_BLOCK_ID (FK), ACT_CONTACT_ID (FK)

\* Denotes deduct from house; no relationship to Block.

To establish the relationship between records in each data type, the Unique ID primary key (PK) values are referenced as the foreign key (FK) IDs in other entities.

## Importing Data

### Preparing Template Data Files

1. From the side menu select **Toolbox**, select **System Setup** then **Import Data**.
2. Click **Download Templates** to download a **templates.zip** file to your workstation.
3. Open the ZIP file and extract the CSV files to a folder.
4. Navigate to the folder, open and prepare the CSV file data based on the templates requirements.

#### Note:

Each data file created must have a maximum file size of 10MB; you can upload and import multiple files per data type. Uniquely name each file. For example: Account01.csv and Accounts02.csv.

### Uploading and Validating Data Files

1. From the **Toolbox** menu, select **System Setup** and then **Import Data**.
2. Enter or select the property to which you want to import data and click **Import Data**.
3. Click **Add Data Types (Objects) to Import** and specify the number of files you have to upload for each data type.
4. For each data type, click **Select/Upload File**.
  - a. Click **Choose File** and select the **CSV** file from the file system. Click **Open** to select.

- b. Click **OK**.
5. Repeat for each data type and file to upload.

 **Note:**

Once the first file is uploaded successfully you have 14 days to complete the import cycle. You can always **Save and Close** the existing import cycle during the 14 day time frame and come back later and make changes. If you don't initiate the **Import Validated Data** into OPERA Cloud within the 14 days' time frame, all the existing files and any references to the files will be removed.

6. Once all the files are uploaded successfully, click **Validate Data** to validate the data against the property configuration, column widths, and Primary-Foreign key relationships.

 **Note:**

Any unused rows must be removed for the validate action to be enabled. All the upload files status must indicate success state for the validate action to be enabled.

### Validation Errors

1. Any validation failures will generate an error file for each uploaded file. You can download the error file by clicking the error file name link or clicking the vertical ellipsis **Actions** menu and selecting **Download Error File** once the validation is completed for all the uploaded files.
2. Review the **[template]\_errors.csv** file.
  - Each error record in the file will have **Unique\_Id\_Column** and a column called **ERROR\_MESSAGE** with the Error description (includes the column name, value and error message. For example, `res_rate_code--proforma-reservation Rate Code is not configured in OPERA Cloud`), `res_source_code--ref--source_code` is not configured in OPERA Cloud), `res_room_type--stdx--reservation Room Type is not configured in OPERA Cloud`, `res_room_type_charge--stdx--reservation Room Type Charge is not configured in OPERA Cloud`).
3. Correct the errors in the data CSV file uploaded and save changes to file.
4. From the vertical ellipsis, click **Remove Uploaded File**, click **OK** to confirm.
5. Re-upload the corrected data CSV file, click **Select/Upload File**.
6. Re-validate the data, click **Validate Data**.

### Canceling Upload and Validation Process

You can cancel the import process anytime during the 14 day time frame prior to initiating the import of validated data by clicking **Cancel Import Process** to remove all uploaded files and references to the current import cycle.

### Importing Validated Data

Once all files are validated successfully you can import the data. Inventory and rate availability checks are performed as required.

1. Click **Import Validated Data**.
2. Click **Import Validated Data** to confirm.
3. A Data Import Overview page provides details about the import progress.
4. Once import is complete, click **Close** to return to the import data screen.
5. Click **OK** to confirm and remove all uploaded files and references to the current import cycle.

## Configuring SFTP Connections

The SFTP Configuration enables you to configure and manage your own SFTP connections used for exports and report delivery. SFTP connections can be configured as global (all properties) or property-specific.

### Note:

The SFTP URL must be added to the allow-list prior to being configured. Contact Oracle Customer Support at the following URL <https://support.oracle.com>.

### Adding SFTP Configuration

1. From the side menu select **Toolbox** , select **System Setup** , and then **SFTP Configuration**.
2. Click **New** and complete the following:
  - a. **Context:** Select a value from the list.
    - i. Select **Global** to define a chain-level SFTP configuration available to all properties.
    - ii. Select **Property** to define a property-specific SFTP configuration.
  - b. **SFTP Code:** Enter Unique SFTP Code you want to create, preferably with the following recommended format:
    - i. When creating at Chain Level use **CHAIN CODE+SFTP CODE**.
    - ii. When creating at Property Level use **PROP CODE+SFTP CODE**.
  - c. **Description:** Enter a description.
  - d. **Hostname:** Enter the SFTP Server Hostname.
  - e. **Port Number:** Enter the Port Number.
  - f. **Auth Type:** Select a value from the list.
  - g. **Password:** Enter password to authenticate using basic authentication method such as user account and password details.

- h. **Key:** Enter key to authenticate using open authorization method such as OAuth Token URL and credential details.
  - i. **Key with Passphrase:** Enter key phrase to authenticate using open authorization details like, OAuth Token URL and credential details.
  - j. **Username:** Enter the username.
  - k. **Private Key:** Enter the private key.
  - l. **Public Key:** Enter the public key.
  - m. **Passphrase:** Enter the passphrase.
3. Click **Add Rows** to add folder and folder path.
    - a. **Folder Name:** Enter the logical name for the specified folder path.
    - b. **Folder Path:** Enter the folder path.
  4. Click **Save**.

#### Editing SFTP Configuration

1. From the side menu select **Toolbox** , select **System Setup** , and then **SFTP Configuration**.
2. Enter search criteria and click **Search**.
3. Select the SFTP in search result, click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Update configuration.
  - b. **Inactive:** Select the checkbox to set the SFTP connection inactive. Deselect the checkbox to activate.
4. Click **Save**.

#### Deleting SFTP Configuration

1. From the side menu select **Toolbox** , select **System Setup** , and then **SFTP Configuration**.
2. Enter search criteria and click **Search**.
3. Select the SFTP in search result, click vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

#### Validating SFTP Connectivity

1. From the side menu select **Toolbox** , select **System Setup** , and then **SFTP Configuration**.
2. Enter search criteria and click **Search**.
3. Select the SFTP Code in search results, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Select the Folder Name row, click the vertical ellipsis **Actions** menu and select **Validate**.
5. Select **Refresh** to view the validation status of each folder.
6. Click **Save**.

# Part VI

## Exchange

This part of the OPERA Cloud Help system contains information on working with OPERA Exchange for two-way real-time data communication between OPERA and external interfaces.

# OPERA Cloud Exchange Overview

## [Prerequisites for OPERA Exchange Interfaces](#)

OPERA Cloud Exchange is an electronic data exchange technology used by OPERA Cloud to transmit information between systems such as ORS and SYNXIS. The topics provided are guidelines for configuring a new interface in OPERA Cloud. Custom interfaces and formats are not supported by OPERA Cloud as the XML message is the supported format .

Before you configure a new interface, ensure that you have the necessary privileges. Then document is set up to lead you through the following prerequisites, such as identifying the external systems, defining the database codes, then configuring the interfaces, setting up communication methods, and defining the interface controls. Address the needed mapping for OPERA Cloud Codes with the external system codes and configuring the required business events. Lastly, activate the External Systems for the Property and Interface.

Ensure that the external system is activated only when you are ready to start processing the messages with external systems.

Best Practices: Do not activate the external system until the configuration is complete; this creates unnecessary business events being generated and failures.

### **Example**

When you update a reservation in OPERA Cloud, a business event is triggered and processed by the exchange module and sent to the outbound queue, and finally sent to external system as an XML message.

## Prerequisites for OPERA Exchange Interfaces

### **Subscription/License**

OXI Integration partner subscription (various)

### **OPERA Cloud Tasks**

Refer to [OPERA Cloud Tasks — Exchange Interfaces](#)

# 24

## Switching the Interface

Switch Interface is used to toggle between the configured interfaces from a central or Property specific setup. On the Switch Interface screen, view all of your configured central and property interfaces.

When a user is logged in at Hub level, both Central and Property configured interfaces are shown.

When a user is logged in at a Property level, only the Property configured interfaces are shown.

1. From the **OPERA Cloud Exchange** menu, select **Switch Interface** from the drop down menu. If an interface is not configured, go to Interface Setup to configure a new interface, which then appears in the switch interface drop-down. The interface that you select here appears as a default interface in other exchange screens.
2. The Type and Property fields show the records by default. Click to search and select an Interface from the list of existing interfaces and click **Select**.
3. Click **Save**.

# Interface Setup

Interface setup search allows you to search by Property or by External systems code. The recommendation is to search interfaces by Property to get all configured interfaces, or search by interfaces to get a specified interface. Selecting multiple properties and interfaces provides search results for all selected interfaces in the search results.

## Searching an Interface

1. From the **OPERA Cloud Exchange** menu, select **Interface Setup** and then select **Interface Setup** from the drop down menu.
2. From the Search panel, select **Property** and click **Search**.
3. In the search results table, click the vertical ellipsis **Actions** menu to **Edit** or **Delete** the setup. Search results table shows the External System Property Code and External System Active/Inactive status.
4. Click **I Want To . . .** to update exchange capabilities. It allows you to configure the Business Events. It also allows you to activate External System if the external system is in an inactive state.

## Adding a New Interface

1. From the **OPERA Cloud Exchange** menu, select **Interface Setup** , then select **Interface Setup** from the drop down list.
2. On the Interface Setup screen, click **New**
3. Select the **Property**.
4. Select an **Interface** that you need to configure.
5. In the **Description** field, the description of the interface automatically populates when you select a defined interface.
6. Enter the **External Property**. This is the external system's property code that is configured for the selected interface. You must enter the correct external system resort code here.
7. The External Database automatically gets populated in the **External Database** field when you select an Interface. If the database code is not automatically populated, you can click the search icon to select a database.
  - a. On the External databases screen, search for databases by Interface. If there are no codes available, you can create a new database code in the recommended format, for example, CHAIN-INTERFACE.
  - b. Click **New** and in the External Databases dialog, enter the **Code**.
  - c. Enter a **Description** and select or deselect the **Copy Subscription** check box.
  - d. Select **Properties** from the available list and click **Save**.
  - e. Close the External Databases dialog. The database code gets defaulted to interface setup database field.

8. Select the **Delta Mode**.
  - a. Set it to **Yes** if the external system does not send the full message for changes. For example, a room type change is sent for a reservation. The external system sending these delta changes sends only the mandatory message items together with the changed room type. In this case, only the data sent would be updated in OPERA Cloud, and all other data is retained as inserted earlier. This also depends on OXI parameters.
  - b. Set it to **No** if the external system sends the entire message for changes as well. This is called a 'full overlay' of data. For example, the external system sends a full message with the updated room type for the room type change. In this case, all data for this record is deleted and re-entered in OPERA Cloud. Based on the interface ID, this is already pre-configured for custom interfaces.
9. Select the **Data Flow**. Data Flow defines the data flow for the interface and selects all boxes that apply.
  - **External System -> OPERA** : Select for all interfaces that receive data from an external system.
  - **OPERA -> External System**: Select for all interfaces that send data from OPERA Cloud to an external system.
10. In the Deletion Indicator panel you can set indicators for deleting data in the OPERA Cloud system from an incoming message. This section is accessible only if the Delta Changes flag is set to **Y**, which indicates that the external system does not always send full data for a change. In this case OXI leaves data that is not sent in the message untouched in OPERA Cloud. It is therefore important that the incoming message signals clearly when data gets deleted. This is the purpose of setting the deletion indicators.
  - a. Select the values from the **Character** drop-down list. Character allowed values ~, \*, ^
  - b. Select a numeric value from the **Numeric** drop-down list. Numeric allowed value -99999
  - c. Select a date from the **Date** drop-down list.
  - d. The **Message Format** defaults to XML format, which is the only format supported in cloud..
  - e. Select a version in the **Set All the Version As** drop-down list. When this drop-down is selected, the version in the XML Version grid also changes to the selected version when you click **Save**. If you wish to change the version only for a particular XML Type, select the row and change the version individually and save.
11. Click the vertical ellipsis and then click **Negotiate**. This is applicable for OPERA Cloud to OPERA Cloud Interfaces such as ORS, MYFIDELIO, and so on, This option negotiates with the OPERA Cloud external system for the supported XML versions and updates in source interface XML versions for the XML types accordingly.
12. Click **Save**.

## Configuring Interface Communication Methods

Communication methods defines how the OXI interface receives and transmits messages.

In multi-property operations Communication Methods setup is either Global or Property specific; when Property specific communication is setup this configuration overrides the Global configuration for the specific property.

The communication methods must be set up for each interface before the interface can be activated.

### Editing Interface Communication Methods

 **Note:**

Each data flow direction requires its own setup. When no result are listed at a Property level, the Comm Method has been defined at Global (Chain) level.

1. From the **Exchange** menu, select **Interface Setup** and then select **Communication Methods**.
2. In the search panel select:
  - a. **Location**
    - i. **Global**: Select to configure for all properties
    - ii. **Property**: Select to configure for a specific property
      - i. **Property**: Select a property from the list
  - b. **Interfaces**: Click to select one or more OXI interfaces from the list
  - c. Click **Search**.
3. Select an interface and data flow direction from the search result, then click the vertical ellipsis and select **Edit**.
  - a. **Location**
    - i. **Global**: Select to configure for all properties.
    - ii. **Property**: Select to configure for a specific property.
      - i. **Property**: Select a property from the list.
  - b. **Communication Mode**:
    - i. **HTTP(S)/Client**: Select if the data is sent from OPERA Cloud to the External System
    - ii. **Details**
      - i. **URL**: Based on the data flow selected, this will be the GET URL or POST URL and defines the web server location where OXI will either get the messages that are waiting for transfer to OPERA Cloud, or where it will post the messages to the external system.
      - ii. **Username**: Enter the username provided for the client URL when basic authentication is enabled.
      - iii. **Password**: Enter the password provided for the client URL when basic authentication is enabled
      - iv. **Compress Data**: Select checkbox to enable compression of the OXI messages prior to transmission to external systems

- v. **Use Client Certificate:** This option is enabled only when the URL is configured as HTTPS protocol. Select this check box to have the OXI processor use the client certificate to authenticate against the external system server and encrypt the messages exchanged with the external system server NOTE: This requires an additional support process to implement
- vi. **Sleep Timeout:** Enter number of minute where the interface rests between waking up and doing POST and GET functions. If the interface continues to receive messages, then it will not sleep. This field accepts decimals for times smaller than the (1) minute time. Time entered with a dot (.1) will be read as seconds (10 seconds).
- vii. **Timeout:** Enter in seconds the duration the interface tries to establish a connection before treating it as "timed-out" and creating a log entry. At this time it will go into the "Sleep Time" before attempting again.
- iii. **Server:** Select if the data is posted from the External System to OPERA Cloud
  - i. **Sleep Timeout:** Enter number of minute where the interface rests between waking up and doing POST and GET functions. If the interface continues to receive messages, then it will not sleep. This field accepts decimals for times smaller than the (1) minute time. Time entered with a dot (.1) will be read as seconds (10 seconds).

 **Note:**

When Communication Mode is Server, OXI/PMSInterface endpoint URL will be provided to External Systems to call for get/post messages with OPERA Cloud using Interface Service Account created in Shared Security Domain.

For more information, see [Document 2329730.1 -SSD SYSTEM ADMINISTRATOR - Creating Interface Service Accounts](#) for more details.

4. Click **Save**.

## Configuring Automatic Transmission Schedule (ATS)

This utility allows the external system to receive data in pre-definable, regular intervals. The AR EXPORT, BLOCK, INVENTORY and PROFILE DAILY STATS data modules are currently supported. At the time the next transmission kicks in, all data for the selected data module between the last transmission and this transmission is sent with this utility. This does not require OPERA Cloud business events, but it does require an OXI two-way Cloud Service subscription. When a message is sent it is identified as RTAV. You can set up multiple schedules that meet the business requirements of your property.

### Adding Automatic Transmission Schedule

1. From the **Exchange** menu, select **Interface Setup** and then select **Automatic Transmission Schedule**.
2. Click **New** and complete the following

- a. **Property.** Enter or select the property
  - b. **Interface.** Select the interface from the list
  - c. **Module.** Select a Module from the list
  - d. **Send Changes Only.** Select to only send changes (delta changes)
  - e. In the Recurrence Pattern panel,
    - i. Frequency
      - If you select Daily, select the hour in the day.
      - If it you select weekly, select the Days in the week and the Hour.
      - If you select Monthly, select the day in the month and hour in the day .
      - If you select Yearly, select the month and the day and hour in the month.
      - If you select Interval, enter the number of minutes to repeat
    - f. **\*Range Day \*** Select the Range Days in advance for which automatic transmission shall occur. If the range is set to 30 days, OXI sends the data with start dates from current business date until 30 days in advance. Automatic Transmission has a message limitation. If the range of days exceeds 30 days, for example 60 days, then the transmission is 2 RTAV messages of 30 days each. If the range of days is 90, then the transmission is 3 RTAV messages of 30 days each, and so on.
    - g. **\*Future Days.** \*Select the Future Days. It allows for a range in the future to be returned. For example: If the business date is 06/29/19 and the Range is set for 2 days, then the Range is set from 06/29/19 to 06/30/19. If the Future field is updated to 30, then the begin date of the Range that was sent is 30 days from 06/29/19. The Start Date and End Date calculates the dates based on the Range Days and Future Dates. The start date is calculated based on property's current business date and future days. End date is calculated based on start date and range days.
3. Click **Save**.

### Editing Automatic Transmission Schedule

1. From the **Exchange** menu, select **Interface Setup** and then select **Automatic Transmission Schedule**.
2. Enter search criteria and click **Search**.
3. Select the transmission schedule then click **Edit**.
  - a. Update the configuration
  - b. **Inactive.** Click to make the schedule inactive.
4. Click **Save**.

### Deleting Automatic Transmission Schedule

1. From the **Exchange** menu, select **Interface Setup** and then select **Automatic Transmission Schedule**.
2. Enter search criteria and click **Search**.
3. Select the transmission schedule then click **Delete**.
4. Click **Delete** to confirm.

## Data Request

The purpose for Data Request Utility is to have data synched from OPERA Cloud PMS to the ORS, initiated from ORS side. Data Request differs from the Resync Utility. In the Resync Utility it requests data from the external system, not sending data to the external systems from ORS. Offered requests are Reservations, Blocks, Rates, Packages, Profiles, key Configuration Items, Datamart and Inventory Items. Multiple modules can be flagged for requests together just by selecting the check box by each and populating the request criteria columns. Configuration responses populate the global template when required and the Property level.

Permissions are required to access this utility; at login provide the interface id and property. For the Reservations and Block requests there are three options available. They can be selected by the option button to the left of the date fields. The other modules offer one date range criteria to use.

To initiate any Data Request select the module or modules, Start and End Criteria and select Synchronize button.

1. From the **OPERA Cloud Exchange** menu, select **Interface Setup**, and then select **Data Request**, from the drop down list.
2. The **Property** field already has property by default. Search and select an **Interface**.
3. In the Data Request Module to Synchronize, select **Reservations** check box and then select an option from **Arrival**, **Stay**, and **Created**. Enter the **From Date** (first arrival date for the reservation resync) and **To Date** (last arrival date for the reservation resync) and then click Synchronize. You can select only one option at a time.
4. Select the **Blocks** check box and then select an option **Begin**, **Stay**, and **Created**. You can select only one option at a time. Enter the **From Date** (first restriction start date for the resync) and **To Date** (last restriction start date for the resync).
5. Select the **Rates** check box and then select the **From Date**. This is the first rate code start date for the resync. Only rate codes valid for this date are shown. Select the **To Date**. This is the last rate code start date for the resync. Only rate codes valid for this date are shown.
6. Select the **Profiles** check box and then select the **From Date** and **To Date**.
7. Select the **Configuration** check box and search and select an **Item**, **Level**, and **Items**.
8. Select the **Inventory** check box and then select **From Date** and **To Date**. You can resync for Inventory Out of Order and Overbooking.
9. Click **Synchronize** for whatever module you need to synchronize the data.

Example: Select Item Type = MARKET CODE and Level is = SPECIFIC. A Market Code of XYZ has been noted in messages but is not existing in the ORS configuration. Defaults have been substituted in place of this value. By free typing text XYZ and selecting the OK button, a message is sent to the external system requesting that specific data. A message is returned from the external system containing the Market Group and Market Code information. Which is populated to the Market Code Template and the Property level Market Codes grid.

When selecting a request where Level is = SPECIFIC:

Following are some recommendations if you are selecting the Rate option.

- Do not recommend resyncs for large periods of time during peak work hours
- A resync be done in the late to early morning hours where Night Management or Night Audit can run resync without system performance slow down
- If a resync is needed during peak hours we recommend only choosing a few rate codes to be synced to resolve updates to Rate Header and Rate Details

It is not recommended to select all displayed items in the list, instead use Level = ALL for that purpose. To request a large number of specific items, it is better to break up the selection into multiple smaller groupings.

## Copying Conversion Codes

Copying is an efficient way to populate the interface conversion codes, instead of manually inserting the codes one by one. Copy Conversion Codes helps you to copy the conversion codes from OPERA Cloud to the selected interface. Copy option also validates new and active/inactive OPERA Cloud codes. It copies these codes to the Interface Mapping conversions along with their respective groups. An example of an extensive list of conversion codes can be the Countries or Rate Codes. This form copies the conversion codes from OPERA Cloud based on the activated conversion codes for this interface. When copying, OPERA Cloud and external system values are populated with the same value in the conversion details.

To select conversion codes:

1. From the **OPERA Cloud Exchange** menu, select **Interface Setup** and then select **Copy Conversion Codes** from the drop down list.
2. On the Copy Conversion Codes screen, Property is selected by default. Select an **Interface** and click **Search**.
3. In the search results table, select a Conversion code row that is to be copied and then click **Copy**. You can select multiple rows.
4. You get an Information pop-up validating that it is copied successfully. Click **OK**.

## Profile Match and Merge

Profile matching is used with integrated systems sending profile data to OPERA Cloud ; ensuring existing OPERA Cloud profiles are matched to prevent the creation of duplicate profiles.

In order to match profiles you configure profile matching rules.

### Note:

If OPERA Cloud and the external system share their internal profile numbers and always have an ideal match, you can select not to enable profile matching for the interface.

### Internal Entry Match Criteria

The OXI Profile Matching module has an internal entry criteria matching system that checks for a primary match based on hard-coded, predefined columns in the name table and its child

tables. These entry criteria are not configurable and not visible. For example in OPERA Cloud there is a guest profile with client id 1234. and the external system is sending a company profile type with client id 1234. This will not find the match due to internal merge criteria client id and name type, which is similar to configuring merge rule on "name code". This is the base rule for every following weighing point matching activity. If the entry criteria match fails, no further weighing point match is attempted and the profile is either created newly or rejected based on Interface Controls settings for this interface ID in OXI. Note: This process also applies to an accompanying profile (as well as the primary guest profile). When a reservation change occurs, when only the first and last names of a profile for either a primary or accompanying profile associated with the reservation are sent with the reservation, duplicate profiles are not created. The Profile Match process is not included. Instead, OXI will update the profiles according to the internal name\_ID of the profile in OPERA Cloud that is linked to the reservation, without applying any further matches (based on the profile's same first and last name).

**Table 25-1 Guest / Contact Profile Types**

Message Displayed to the User	Internal Matching Criteria
Matched on Name Code	Matches on Client ID and Name Type
Matched on Membership Number	Matches on the Membership Number
Matched on Credit Card and Name	Matches on the Credit Card Number and the Last Name Note: When the Credit Card Vault functionality is active, credit card numbers are replaced with a Unique ID which will be communicated between OPERA Cloud and OXI.
Matched on Passport Number	Matches on the Passport Number Note: Id type role should be PASSPORT
Matched on Email	Matches on Communication Type Email. Note: This match will be made even when an email type other than EMAIL is used.
Matched on Last and Phone	Matches on the Last Name, Phone Number (stripped of all non-numeric characters), Phone Type
*Matched On Last, Address1, City	Matches on Last Name, Address line 1, and City
*Matched On Last and Address1	Matches on Last Name and Address line 1
*Matched On Last and Postal Code	Matches on Last Name and Postal Code
*Matched On Last and City	Matches on Last Name and City

**Table 25-2 Travel Agent / Company / Source / Group Profile Types**

Message Displayed to the User	Internal Matching Criteria
Matched on Name Code	Matches on Client ID (Name Code) and Name Type
Matched on Credit Card and Name	Matches on the Credit Card Number and the Last Name

**Table 25-2 (Cont.) Travel Agent / Company / Source / Group Profile Types**

Message Displayed to the User	Internal Matching Criteria
Matched on Company and Phone	Matches on the Company Name and the Phone Number (stripped of all non-numeric characters), Phone Type
*Matched on Company, AR number	Matches on Company Name and AR number
*Matched on Company and Address1	Matches on Company Name and Address line 1
*Matched on Company, Postal Code	Matches on Company Name and Postal Code.
*Matched on Company, City	Matches on Company Name and City

 **Note:**

The internal Interface Controls (hidden in normal Interface Controls table) DATABASE\_SIZE has a default value of Large. For a large property, only match criteria without the asterisk will be used for internal entry match. If the Interface Controls DATABASE\_SIZE is set to Small, for smaller properties that can afford a more accurate match without adding performance overhead, all match criteria including the ones with asterisk \* will be evaluated. Contact profiles will also go through Match and Merge rules. No additional setup is required in OXI for Profile Merge rules.

**Examples of Entry Match Criteria**

When a profile is sent to OPERA Cloud through OXI it will search the internal entry match criteria based on the above-mentioned hard coded requirements. When a profile does not meet any of these entry match criteria, it will automatically be created newly if the Interface Controls PROF\_CREATION is turned ON. If that Interface Controls is turned off, the profile match will fail and the profile will not be created.

Entry Match Criteria NOT successful:

Example: If a profile is sent with only a first name and last name, it will not even proceed to the weighing points match criteria, as the first name and last name are not sufficient for the entry match criteria. A new profile will be created if the Interface Controls PROF\_CREATION is turned ON. If that Interface Controls is turned OFF, the profile match will fail and the profile will not be created. An exception to the rule: We are preventing the duplication of profiles in case only last/first name are sent for a reservation change. OXI skips the profile match entirely in this case. It searches for the name\_ID (internal ID number) of the profile in OPERA Cloud that is linked to the reservation sent, and if that profile has the same last and first name as the profile sent as part of the reservation change, OXI will update the same profile without applying any further matches.

Entry Match Criteria successful:

Example: If a profile comes with a last name and a membership number, it will pass the entry match criteria and proceed on to the weighing points match criteria. From here, the weighing points configured in the OXI profile matching module decide whether the profile will be merged with an existing OPERA Cloud profile or not.

### Definable Weighing Points Match Criteria

Once the internal entry match was successful, the system will continue matching on the defined weighing points. The configuration of merge rules and weighing points can be done individually for each interface ID/OPERA Cloud property combination in OXI. Each profile type can be configured separately within an interface ID/OPERA Cloud property combination. You have to consider the best possible approach for distributing weighing points to the merge rules, as these may differ by profile type, geographical location of the property, data accuracy sent by external system, etc. All merge rules selected must add up to, or be above the threshold set. This means if the threshold is set to 1000 points, weighing points must be distributed to merge rules of columns or column combinations to add up to at least 1000 points in total. Otherwise no successful profile match will be made.

**Table 25-3 Available fields for setting up Merge Rules**

Merge Attribute	OPERA Cloud Field
ADDRESS1	Address1 within Address
TELEPHONE	Telephone number
CITY	City within address
COMPANY	Company Name related to account profile type
COUNTRY	Country field within address
EMAIL	Email address
FIRST	First Name of Guest or Contact Profile
LAST	Last Name of Guest or Contact Profile
MEMBERSHIPS	Membership Number on a profile
NAME_CODE	Client ID of a profile (IATA Code / CORP id for Account Profile)
PASSPORT_NO	Passport Number
POSTAL_CODE	Postal Code within address
STATE	State within address
AR_NUMBER	Accounts Receivable Number on profile

### Fields

**Profile Type.** The profile type for which merge rules and weighing points are configured. Options are guest, company, travel agent, source, and group.

**Merge Rule.** The 'Threshold' is the initial merge rule that is set automatically when a new interface is being configured. The 'Match' merge rules need to be set manually by you, and can consist of either one data field or a combination of data fields that need to be met to obtain your defined weighing points.

**Type.** OXI will automatically prompt 'Threshold' first in case no entries have been made into the profile matching setup yet. Once the threshold is set, all other types will become 'Match' as they apply to the merge rules.

**Points.** Weighing points for the threshold will be the minimum points a profile has to achieve in order to be matched. Weighing points for the matches are defined by you, and would be set according to the data field/combination of data fields that you select.

- Example: Assume the threshold for minimum points is set to 1000. When you define a merge rule with a single data field entry of Last Name, this will never be eligible to make the full match of 1000 points, so you would probably only give a part of the points to it (e.g., 300). Then you will want to add the next merge rule for another data field that makes the 1000 points complete – like Memberships - where you would give the remaining 700 points to. You can also opt to add another several merge rules consisting of Address 1 and City, for example, and give respective weighing points to these in order to make the 1000 points complete.
- One of the easiest options will be to define a combination of data fields that would meet the necessary 1000 points within the same merge rule, as shown in the sample screen above.

**Apply.** The activation flag for the merge rule. This must be checked for the merge rule to be applied. A merge rule can also be created and then temporarily be deactivated by blanking out this flag.

### Setting up Merge Rules

The merge rules can be configured either as merge rules for individual data fields or for data field combinations, where the weighing points will only apply if all components in that combination match. When setting the merge rules, note the following:

- For Direct Guest merge rules use LAST for the Last name.
- For Travel Agent merge rule uses COMPANY for the TA name and NAME\_CODE for the IATA number.
- For Group merge rule use LAST for the group name.
- For Company merge rule uses COMPANY for the company name and NAME\_CODE for the Corporate ID.
- For Source merge rule use LAST for the source name.

### OXI Interface Controls and Profile Matching

The following OXI Controls determine the profile matching results:

- PROF\_MATCHING. Profile matching only occurs when set to Y. When PROFILE\_MATCHING is active, OXI will validate the incoming profile message before executing the match and merge process to verify that the data contained in the message is sufficient to exceed the threshold points. If the data is not sufficient an optional warning will be generated indicating there is not sufficient data to meet the threshold and the match and merge process will not be executed.

#### Note:

Profile matching can be set to N if , prior to system cut-over, the two systems are synchronizing data with the profiles sent from OPERA Cloud to the external system and the external system returning a unique ID. OPERA Cloud then stores this ID for primary match and merge. This process renders the use of match and merge a duplicate effort and therefore inefficient and not required.

- PROF\_CREATION. This Interface control determines whether a new profile should be created if the profile match was not successful. This must be set to Y for all interfaces that transmit reservations. If set to N, any non-matching profiles will be rejected and not created newly.

**OXI Interface Controls and Profile Update in OPERA Cloud****Table 25-4 Several OXI Interface Controls determine how the profiles are updated in OPERA Cloud:**

IND EXT SYS OVER	Profile overwrite priority for guest profiles. <ul style="list-style-type: none"><li>• When active the external system can update the OPERA Cloud profile details.</li><li>• When inactive the OPERA Cloud profile details will remain untouched when a profile is merged with the one sent by external system. This applies to all columns in the NAME table</li></ul>
TA EXT SYS OVER.	Profile overwrite priority for travel agent profiles. <ul style="list-style-type: none"><li>• When active the external system can update the OPERA Cloud profile details.</li><li>• When inactive the OPERA Cloud profile details will remain untouched when a profile is merged with the one sent by external system. This applies to all columns in the NAME table</li></ul>
CORP EXT SYS OVER	Profile overwrite priority for Company / Agent profiles <ul style="list-style-type: none"><li>• When active the external system can update the OPERA Cloud profile details.</li><li>• When inactive the OPERA Cloud profile details will remain untouched when a profile is merged with the one sent by external system. This applies to all columns in the NAME table</li></ul>
SOURCE EXT SYS OVER	Profile overwrite priority for source profiles <ul style="list-style-type: none"><li>• When active the external system can update the OPERA Cloud profile details.</li><li>• When inactive the OPERA Cloud profile details will remain untouched when a profile is merged with the one sent by external system. This applies to all columns in the NAME table</li></ul>
GROUP EXT SYS OVER.	Profile overwrite priority for group profiles <ul style="list-style-type: none"><li>• When active the external system can update the OPERA Cloud profile details.</li><li>• When inactive the OPERA Cloud profile details will remain untouched when a profile is merged with the one sent by external system. This applies to all columns in the NAME table</li></ul>

**Table 25-4 (Cont.) Several OXI Interface Controls determine how the profiles are updated in OPERA Cloud:**

PHONE/ADDR EXT SYS OVER	<p>Profile overwrite priority for phone and address collections.</p> <p>This parameter determines how the phones/addresses received from the external system update the phones/addresses in OPERA Cloud and which OPERA Cloud records are included in the outbound messages.</p> <p>This parameter will supersede the Delta setting of the interface.</p> <p>A = If received, replace OPERA Cloud values with the received values. If not received, remove the values from OPERA Cloud.</p> <p>B = If received, replace OPERA Cloud values with the received values. If not received, do not remove the values from OPERA Cloud.</p> <p>C = If received, merge the received values with OPERA Cloud values. If not received, remove the values from OPERA Cloud.</p> <p>D = If received, merge the received values with OPERA Cloud values. If not received, do not remove the values from OPERA Cloud .</p> <p>E = If received, replace only those OPERA Cloud values configured in conversion with the received values. If not received, remove only those OPERA Cloud values configured in conversion. In outbound messages, send only those records with converted types. N = Ignore the phone/addresses received. Do not touch the values in OPERA.INTEREST EXT SYS OVER. If set to Y, interests in the OPERA Cloud profile will always be overwritten by external system interests. If set to N, external system interests will be appended to existing OPERA Cloud ones.</p>
PREF EXT SYS OVER.	<p>This parameter is applicable only if the profiles are allowed to be updated in general. This means at least one of the parameters IND EXT SYS OVER, CORP EXT SYS OVER, TA EXT SYS OVER, SOURCE EXT SYS OVER, or GROUP EXT SYS OVER should be turned ON. If this parameter is set to Y or N and the interface is configured as 'Delta Changes = Y' and no preferences are received in the profile message, existing preferences in the OPERA Cloud profile will remain untouched. Otherwise, if this parameter is set to 'Y', existing preferences in OPERA Cloud profile will be replaced with the preferences received in the message, if set to 'N', preferences received in the message will be added to the existing preferences in OPERA Cloud profile, if set to 'C', OPERA Cloud profile preferences configured in 'Guest Preference' conversion will be replaced with the preferences received in the message.</p>

**Table 25-4 (Cont.) Several OXI Interface Controls determine how the profiles are updated in OPERA Cloud:**

PROFCOMMENTS EXT SYS OVER	This parameter is applicable only if the profiles are allowed to be updated in general. This means at least one of the parameters IND EXT SYS OVER, CORP EXT SYS OVER, TA EXT SYS OVER, SOURCE EXT SYS OVER, or GROUP EXT SYS OVER should be turned ON'. If this parameter is set to Y or N and the interface is configured as 'Delta Changes = Y' and no comments are received in the profile message, existing comments in the OPERA Cloud profile will remain untouched. Otherwise, if this parameter is set to 'Y', existing comments in OPERA Cloud profile will be replaced with the comments received in the message, if set to 'N', only those comments in OPERA Cloud profile last updated by this interface will be replaced with the comments received in the message, all other comments will remain unchanged, if set to 'C', OPERA Cloud profile comments configured in 'Comment Type' conversion will be replaced with the comments received in the message.
NEGRATES EXT SYS OVER	If you allow profiles to be overwritten in general. This means at least one of your parameters IND EXT SYS OVER, CORP EXT SYS OVER, TA EXT SYS OVER, SOURCE EXT SYS OVER, or GROUP EXT SYS OVER have to be turned ON. The functionality of this parameter is further determined by the 'mode' of your interface. If it works with delta changes set to 'yes' (interface configuration->edit interface), the external system can send profile changes only and does not need to send the full profile every time a small change to a profile occurs. OXI will then only update the changed data and not touch the additional data that was found in the OPERA Cloud profile. This also means that the external system needs to indicate intended deletions clearly with deletion indicators in the message. Sending simply blanks will not lead to data deletion if OXI works in 'delta mode'. The deletion indicators can be configured in interface configuration->edit interface. If your interface is set to delta changes 'no', OXI expects a full overlay of all profile data in every profile message, even if the external system only changes very little of the entire profile. Here is how the parameter works: If your interface is setup as 'Delta Changes = Y' and no negotiated rates are sent by the external system in the profile message, this parameter is ignored and the existing OPERA Cloud profile negotiated rates remain untouched. Otherwise the following parameter rules apply: If 'Y', negotiated rates sent by external system will overwrite existing OPERA Cloud profile negotiated rates. If 'N', negotiated rates sent by the external system will be appended to existing OPERA Cloud profile negotiated rates.

## Configuring Profile Match Rules

The merge rules can consist of either one data field or a combination of data fields that need to be met to obtain your defined weighing points.

When the total points meet or exceed the threshold specified for the profile type, the profile is considered a match.

### Adding Profile Match Rules

1. From the side menu, select **Exchange**, then select **Interface Setup** and select **Profile Match Rules**.
2. Click **New** and complete the following
  - a. **Property**. Enter or select the property from the list
  - b. **Interface**. Enter or select the interface from the list
  - c. **Profile Type**. Select a profile type from the list; options are Guest, Company, Travel Agent, Source, and Group
  - d. **Threshold**. Enter a threshold value
  - e. **Active**. Select checkbox to activate
  - f. **Match Criteria**. Click **New** and complete the following
    - i. **Match Rule**. Select one or more data fields from the list
    - ii. **Points**. Enter weighting points amount for the match rule
    - iii. **Active**. Select checkbox to activate the match rule.
    - iv. Repeat to add more match criteria
  - g. Click **Save**.

### Editing Profile Match Criteria

1. From the side menu, select **Exchange**, then select **Interface Setup** and select **Profile Match Rules**.
2. Enter search criteria and click **Search**.
3. Select the match rule and click **Edit**.
4. Update match rules.
5. Click **New** to add a match rule.
6. Select a match rule and click **Delete** to remove a match rule.

### Deleting Profile Match Criteria

1. From the side menu, select **Exchange**, then select **Interface Setup** and select **Profile Match Rules**.
2. Enter search criteria and click **Search**.
3. Select the match rule and click **Delete**.
4. Click **Delete** to confirm.

# Configuring Interface Mapping

Interface Mapping is used to configure conversion values for the OPERA Cloud codes and the External System codes.

Mapping UDFs allows the definition of all reservations, profile and stay UDFs to be exchanged with an external system.

## System Default Conversions

You can define the conversion values for the available conversion codes. A few conversion codes are activated and populated through the OXI installation wizard, as they contain the same values for all interfaces and are never changing. These conversion codes are Reservation Status, Reservation Action Types, Profile Types, and Guest Preference Types.

Standard Conversion Code Settings. These conversion code settings apply to all interfaces. (table)

## Adding Interface Mapping

1. From the **Exchange** menu, select **Interface Mapping** and then select **Interface Mapping**.
2. Enter search criteria and click **Search**.
3. From the search results, select a mapping group on the left side of the page.
  - a. Select the **Show Inactive** check box for first time activation of the conversion table. Highlight the conversions group that are required and select the **Activate** button.
  - b. To deactivate a conversion group, uncheck the **Show Inactive** check box, then highlight a conversion code group, and select **Inactivate**
4. Click **New** and complete the following
  - a. **Property**. Enter or select the property.
  - b. **Interface**. Enter or select the interface. .
  - c. **OPERA Code**. Select an OPERA Cloud code from the list
  - d. **External Code**. Enter the external system code/value.
  - e. **External-OPERA Default**: Select check box to select as default in the case of multiple same entries in the external system value column. It is possible that more OPERA Cloud values than the external system values exist for a conversion code. In this case the external system values would need to be duplicated and will occur more than once in the external system value columns. Only one of the duplicate external system values can be set as External->OPERA Default Y, and this is the record that OXI uses when processing data from the external system to OPERA Cloud. All other duplicate codes are set to N. OXI automatically warns you if a record has already been set to Y as a default, and you are trying to flag another record with the same external system value the same way.
  - f. **OPERA-External Default**: Select checkbox to select as default in the case of multiple same entries in the OPERA Cloud value column. It is possible that more

external system values than OPERA Cloud values exist for a conversion code. In this case the OPERA Cloud values need to be duplicated and occur more than once in the OPERA Cloud value columns. Only one of the duplicate OPERA Cloud value can be set as OPERA > External Default Y, and this is the record that OXI uses when processing data from OPERA Cloud to the external system. All other duplicate codes are set to N. OXI automatically warns you if a record has already been set to Y as a default, and you are trying to flag another record with the same external system value the same way.

- i. For example: The external system has more market codes than OPERA Cloud, and the OPERA Cloud market codes have to be entered multiple times in the conversion code. If a reservation with such a market code is sent by OPERA Cloud, OXI has to know which conversion record to use. The OPERA-> External Default is the identifier for the correct conversion record. Table 26-1 OPERA Cloud and External System Default Values (table info)

5. Click **Save**.

#### Editing Interface Mapping

1. From the **Exchange** menu, select **Interface Mapping** and then select **Interface Mapping**.
2. Enter search criteria and click **Search**.
3. From your search results, select a row, then click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Interface Mapping

1. From the **Exchange** menu, select **Interface Mapping** and then select **Interface Mapping**.
2. Enter search criteria and click **Search**.
3. From your search results, select a row, then click the vertical ellipsis **Actions** menu, and select **Delete**.
4. Click **Delete** to confirm.

## Interface Controls

Interface Controls allows you to control the business use cases to turn-On/Off and allows ability to set the default values. Most of the parameters are defaulted with a system default value, you can change the values to instruct OPERA Cloud for the preferred behavior. Default values used in the handling of inbound and outbound message when no mappings/ conversion codes are found for the respective messages. The values configured here are used as defaults for incoming and outgoing messages if no matching conversion value from the conversion tables can be applied during data transmission, or if conversions are not activated.

1. From the **OPERA Cloud Exchange** menu, select **Interface Controls** , and then select **Interface Controls** from the drop down list.
2. The Type **Property** and **Interface** fields display the default interfaces based on the Switch Interface context.
3. Click **Search**.
4. Select a Group and drill down to the Settings areas for the Default fields available for Inbound and Outbound data flows. Defaults are applicable only for Blocks, Others, Profiles, Rates and Reservation groups.

### OPERA Cloud Global Parameters for Exchange

- OXI Message Purge Retain Days: Default is 10. Allows System Administrator to set the value between 3 to 28 days. Based on the configured value, messages are purged automatically when they are lapsed beyond retention time.
- OXI Outbound Delivery Retry Count: This functionality allows you to define the retry value for HTTP messages that fail to post because the server is unavailable. This value defined here is as a global configuration applicable for all interfaces and properties.

**Note:**

Retry Interval is taken from the sleep-time configured for the respective property and interface communication definition.

### Block Parameters and Settings

Block parameters apply if your interface transmits blocks. All parameters are set at the global level.

**Table 27-1 Block Group parameters and settings.**

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
EXTERNAL LOCKED YN	Y/N	From the external external system to OPERA Cloud. The system creating the block can remain the owner of it, which means the block can only be modified by the originating system. Set this parameter to Y if the block created by the external system should be locked in ORS and cannot be modified by ORS users. Set to N if the block created by the external system should be fully changeable in ORS.	Set to Y in case blocks are sent two ways and both systems wants to retain ownership of their blocks. The default setting is Y for OXI-OPERA
EXT SYS BLOCK GENERATES INVENTORY	Y/N	Direction: Data from the external system to OPERA Cloud When a block message from CRS is received, OXI will generate inventory snapshots for the affected dates and room types.	Setting depends on the situations described.

**Table 27-1 (Cont.) Block Group parameters and settings.**

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
HANDLE BLOCK SOLD	1) EXT_SYS- >OPERA 2)NONE 3)OPERA- > EXT_SYS 4)TRANSMIT_BOTH_WAYS	<p>Direction: Data from the external system to OPERA Cloud (EXT_SYS- &gt;OPERA)</p> <p>Update block sold count from external system when sent to OPERA Cloud. This assumes that the external system has all block reservations but not OPERA Cloud. In this case we need a sold count update as part of the block messages.</p> <p>Direction: Data both ways between the external system and OPERA Cloud (NONE)</p> <p>Block sold counts will not be transmitted between the systems. Use this if both systems transmit full reservations both ways, including block reservations. In this case an additional sold count update in the block message is not necessary.</p> <p>Direction: Data from OPERA Cloud to the external system (OPERA- &gt;EXT_SYS)</p> <p>Send block sold counts from OPERA Cloud to external system. This assumes that OPERA Cloud has all block reservations but external system has not. In this case we need to send a sold count update as part</p>	<p>Setting depends on the situations described.</p> <p>The default setting is NONE for OXI-OPERA</p>

**Table 27-1 (Cont.) Block Group parameters and settings.**

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>of the block messages.</p> <p>Direction: Data both ways between the external system and OPERA Cloud (TRANSMIT_BOTH_WAYS)</p> <p>Update block sold counts from external system when sent to OPERA Cloud, and also return sold counts to external system. Use this if block reservations are not transmitted between the systems at all. In this case the block messages must mutually update the sold counts.</p>	

Table 27-1 (Cont.) Block Group parameters and settings.

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
HANDLE MASTER BLOCKS	Y/N	Direction: Data both ways between the external system and OPERA Cloud. OPERA Cloud can convert a single block into a master block, which is used when multiple sub blocks are linked to one block as master. A common scenario for this is a tour series, in which a former single block becomes a master block from which all tour series copies are made. The master block is visibly flagged as such in OPERA Cloud and has no inventory. A sub block is linked to a master block through the master block ID. If this parameter is set to Y, OXI will send master blocks in OPERA Cloud with the respective flags so that the external system can apply the same logic. Sub blocks are sent with the master block ID and need to be linked properly to the master block in the receiving system again, where the master could have a separate ID. If the external system is not capable of handling master and sub blocks, this parameter should be set to N. In this case	Setting depends on the situations described. The default is Y for OXI-OPERA Cloud.

**Table 27-1 (Cont.) Block Group parameters and settings.**

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>OXI sends a block cancel in case a block converts into a master, to make sure that the external system releases the inventory from that block accordingly. All sub blocks in OPERA Cloud will be sent as normal single blocks without a master block ID to such as an external system.</p>	

**Table 27-1 (Cont.) Block Group parameters and settings.**

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
KEEP BLOCK PACKAGES	Y/N	<p>-&gt; Direction: Data from the external system to OPERA Cloud.</p> <p>KEEP_BLOCK_PACKAGES parameter determines how to handle the existing OPERA Cloud block packages.</p> <p>This parameter setting will be significant only when the packages are not received as part of the blocks.</p> <p>If this parameter is set to Y, then do not full overlay, keep the block packages as-is.</p> <p>If this parameter is set to N, then full overlay the OPERA Cloud block packages with received block packages.</p> <p>If this parameter is set to Null, then the received allotment entity packages value will gain significance in determining whether to full overlay block packages or to keep them.</p>	

**Table 27-1 (Cont.) Block Group parameters and settings.**

<b>Parameter Name</b>	<b>Parameter Values</b>	<b>Direction of transmission where parameter applies. Parameter Description</b>	<b>Recommended Setting</b>
SPLIT INV DETAILS	Y/N	-> Direction: Data from OPERA Cloud to external system. If Y, OXI will split the block inventory detail message into multiple chunks of size less than 32K. If N, OXI will send the entire inventory detail message to the external system.	Set to Y if typical Block inventory is created with long date ranges and all room types. The default setting is N for OXI-OPERA.
UPL CATERING BLOCKS	Y/N	-> Direction: Data from OPERA Cloud to external system Blocks can be flagged as Catering in ORS or SFA. Set this parameter to Y to send catering only blocks to the external system. If set to N, catering only blocks will be suppressed from sending to the external system.	The default setting is N for OXI-OPERA

Table 27-1 (Cont.) Block Group parameters and settings.

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPL DED ONLY	Y/N	-> Direction: Data from OPERA Cloud to external system If the external system does not distinguish between deductible and non-deductible blocks, you may want to suppress non-deductible blocks from sending, as these would affect the other system's inventory directly and cause inventory imbalances. In such a case you would set this parameter to Y and OXI_HUB will only send deductible blocks. If the external system has a similar concept of handling deductible and non-deductible blocks, you can set this parameter to N and OXI_HUB will send all blocks regardless of their status. In OPERA Cloud, the block status code determines whether a block is considered deductible. Check the OPERA Cloud block status configuration for further information.	Set to N if external system handles deductible and non-deductible blocks. Otherwise set to Y. The default setting is N for OXI-OPERA.

**Table 27-1 (Cont.) Block Group parameters and settings.**

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPL OPEN ONLY	Y/N	-> Direction: Data from OPERA Cloud to external system. If the external system does not have a concept of 'open for pickup' blocks, you may want to suppress non-open blocks from sending, as these would still allow pickup in the other system and cause inventory imbalances when a reservation is sent to non-open block in OPERA Cloud. In such a case you would set this parameter to Y and OXI_HUB will only send open for pickup blocks. If the external system has a similar concept of open for pickup blocks, you can set this parameter to N and OXI_HUB will send all blocks regardless of their status. An open for pickup block is defined by its status. Check the OPERA Cloud block status configuration for further information.	Setting depends on whether external system has a concept of open/non-open blocks. The default setting is N for OXI-OPERA

Table 27-1 (Cont.) Block Group parameters and settings.

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
WAIT FOR BLOCK EXT REF	Y/N	-> Direction: Data from OPERA Cloud to external system. If a block is created in OPERA Cloud, OXI can send the block header first and expect a result message with the external system's confirmation number. Only once this confirmation is received would OXI send the block details, as it is now safe to assume that the block details would be accepted by the external system as well. This external confirmation can even be displayed on the block header as of OPERA Cloud 33.02, ensuring OPERA Cloud users that they can pickup reservations from a block without problems, as the external system knows the block as well. Set the parameter to Y if block transmissions shall be handled like this. Set the parameter to N if the external system does not return a response, or if it can safely handle block header and details at the same time.	Set to N unless there is an explicit need that OXI should wait for the returned block confirmation number.

## Block Defaults for OXI

The following are recommended block default settings.

**Table 27-2 Block Defaults for OXI**

Block Defaults	Description
Block Rate Code	<p>Select a rate code that has all of the configured room types for the property. Since rates can be subject to restrictions that either close the rate and or room types depending on hotel occupancy, we strongly suggest making a 'OXI Default' group rate code and insert this value.</p> <ul style="list-style-type: none"> <li>• This rate code is to be setup with all viable room types and a single rate detail, at \$0.00, that has all room types linked to it. If proper revenue/ADR is a factor set a rate amount instead. Remember to include the PM room type as groups require this before booking reservations.</li> <li>• This rate code should not be subject to restrictions as other rates are.</li> <li>• If CRS allotted groups are setup for rates that are flagged restricted or out of inventory on the hotel side, this default is used to get the group inserted.</li> <li>• Warnings in OXI alerts hotel users that the allotment was inserted, the rate was not available and the default was taken instead. Thus allowing the hotel to update the group accordingly.</li> <li>• To see any warnings where a default was substituted then OXI offers a warnings report.</li> </ul>
Block Status	<p>OXI shows only the deductible block status types in this list of values as all received blocks from external systems are automatically considered deductible. This is a crucial element for the creation of a block and has to be set.</p>
Block Owner	<p>This is no longer mandatory but depending on the OPERA Cloud function Generic &gt; Owner. If this is flagged, a block owner must be set in order to update the block in OPERA Cloud.</p>
Destination Code	<p>When processing a Canceled, Lost or Turndown message the destination code can be matched to the code used as the default in the OXI Block Defaults tab. If no match is found then the OXI default, if defined, can be applied.</p> <ul style="list-style-type: none"> <li>• If a Block Destination Code conversion is active, then OXI tries to convert to the received value: <ul style="list-style-type: none"> <li>– If a conversion record found, the converted value is used to match against OPERA Cloud values.</li> <li>– If a conversion record not found, the value as received from the message to match against OPERA Cloud values.</li> </ul> </li> <li>• If the Destination Code sent in the message matches with an OPERA Cloud Destination Code, the matched value is applied.</li> <li>• If the Destination Code sent in the message does NOT match with an OPERA Cloud Destination Code, then OXI checks for a default: <ul style="list-style-type: none"> <li>– If a default Destination Code is defined, the default value is applied.</li> <li>– If a default Destination Code is not defined, the field is left blank.</li> </ul> </li> </ul>

# Generic Parameters and Settings

All parameters are set at the global level.

**Table 27-3 Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
AUTO RESYNC ON ROLL BUSINESS DATE	B/R	<p>-&gt; Direction: Data both ways between external system and OPERA Cloud.</p> <p>Whether to resync OPERA Cloud transactions without external system confirmation number from OPERA Cloud to external system when the business date is rolled in OPERA Cloud.</p> <p>Note: This is implemented only for those interfaces using XML message format, also for this to work, ROLL BUSINESS DATE business event must be subscribed in OPERA Cloud configuration.</p> <p>This parameter allows the user to pick the modules they would like to auto resync when the OPERA Cloud business date is rolled.</p> <p>Available values are B and R:</p> <ul style="list-style-type: none"> <li>• When B is selected in the parameter, active blocks without subscription records will be resynced.</li> <li>• When R is selected in the parameter, active reservations without external</li> </ul>	Set accordingly.

**Table 27-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SUPPRESS RESULT SUCCESS MESSAGES		<p>confirmation number will be resynced.</p> <p>Direction: Data from OPERA Cloud To External System OXI by default suppresses the Result Success messages for the Inbound messages. This parameter is provided to optimize the message traffic by sending only the useful fail and warning messages to notify the respective external systems. Success messages for selected modules will be suppressed. This parameter is not applicable for New Profile, New Reservation and New Block Business events because the unique IDs exchanged in the result success messages are needed to keep data in sync between OPERA Cloud and the external system.</p>	

**Table 27-3 (Cont.) Generic Group parameters and settings.**

<b>Parameter Name</b>	<b>Parameter Value</b>	<b>Direction of transmission where parameter applies. Parameter Description</b>	<b>Recommended Setting</b>
CREDIT CARD SUPPRESS	Profile Reservation Both N	-> Direction both ways: Credit Card(s) information suppressed. Due to privacy laws, credit card(s) information will be suppressed based on following settings - PROFILE: OXI will not include Profile Credit Card information in the outgoing profile messages and will not store Profile Credit Card information when received through messages of any type from non-opera cloud systems. RESERVATION: OXI will not include any reservation Credit Card information in RESERVATION messages, however Profile Credit Cards for Profiles attached to a reservation may be sent. OXI will however process reservation credit card information into OPERA Cloud. BOTH: OXI will not include ANY Credit card information in the outgoing Reservation and profile messages and will not process any profile credit card information when received through messages of any type from non-opera cloud systems. OXI will however process reservation credit	Set accordingly.

**Table 27-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		card information into OPERA Cloud. N: OXI will send and process all and any credit card information present.	

Table 27-3 (Cont.) Generic Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
DATABASE SIZE	Small/Medium/ Large	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines what internal profile match criteria shall be used based on the size of the database.</p> <p>On Individual profiles, Name Code, Membership, Credit Card, Passport, AR Number and Last + Phone will always be considered in the profile matching processes.</p> <p>When database size is set to SMALL the following will also be considered. Last + Phone, Last + Address1 + City, Last + Zip, Last + Address1, Last + City.</p> <p>For Non-Individual profiles Name Code, Membership and Credit Card will always be considered in matching. When database size is set to SMALL, Company + Address1 + City, Company + Zip, Company + Address1, Company + City are also considered.</p> <p>When set to MEDIUM only Company + Address1 + City are considered in addition to the criteria always applied.</p>	Set accordingly.

Table 27-3 (Cont.) Generic Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
DEFAULT PRINTER	Network Path	-> Direction: no direction The name of the physical printer device configured in OPERA Cloud. Used for OXI back-end printouts.	Used for reports that are not manually selected for printing. Network path is to be set to local machine easily accessed by users.
GENERATE XML	Y/N	-> Direction: Data both ways between external system and OPERA Cloud. The generation of an XML message is required for all generic interfaces where no OXA adapter translates the OPERA Cloud data format into the external system specific format. Even custom interfaces with an OXA adapter (Trust, FTCRS, Pegasus, Marsha, TLX) may benefit from XML generation as it allows users and support personnel to recognize message contents easier. Set to Y to generate an XML message from/to the external system message. Set to N to avoid the XML message creation.	Set to Y for all interfaces using the XML message format. All other interfaces can be set either way.

**Table 27-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
HANDLE PSEUDO ROOMTYPES	Y/N	<p>-&gt; Direction: Data both ways between external system and OPERA Cloud.</p> <p>If this parameter is set to Y, the interface will accept and send room types flags as pseudo in the data transmission for reservations, blocks, and rates. The OXI room type conversion table will allow the selection of pseudo room types. Set this parameter to N if pseudo room types shall be suppressed from data transmission. This would be the case if the external system has no pseudo room types configured and message would lead to failures, or conversion could be setup falsely.</p>	Set to Y for all interfaces that support pseudo room types.

Table 27-3 (Cont.) Generic Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
LANGUAGE HANDLING	ALL ENGLISH ONLY SINGLE BYTE ONLY	->Direction: Data both ways between external system and OPERA Cloud. This parameter controls the way OXI handles the data in multi- language systems. See the list of values for available options and details. ALL: Transfer all data irrespective of the Language. ENGLISH ONLY: Transfer data having language code E (English) or unspecified language code. SINGLE BYTE ONLY: Transfer data consists of single byte characters	Generic: ALL

Table 27-3 (Cont.) Generic Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
MULTI ROOMTYPE CONV	Y/N	<p>-&gt; Direction: Data both ways between external system and OPERA Cloud.</p> <p>This parameter should always be set to N in a 2- way interface bases on reasons described below. It can be used for a 1-way interface. If set to N, OXI will mandate a one-to-one room type conversion between external system and OPERA Cloud to keep the inventory in balance. This is very important if the interface uses block or rate messages, as it is not possible to convert one-to-many room types for blocks and rates, and this would result in severe imbalances. You should only set this to Y for interfaces that transmit only reservations, as one-to-many room type conversion could then be allowed to give flexibility. A one-to-many room type conversion must be very carefully considered as it can lead to differences in room type usage between the systems.</p> <p>Sample: OPERA Cloud has only room type KING and the external system converts both KNG</p>	Set to N for all 2-way interfaces. Set accordingly.

Table 27-3 (Cont.) Generic Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>and QUE into KING in the OXI room type conversion table. This is possible with the conversion defaults and in this case the OPERA Cloud-&gt;external default is set to N for the record KNG&lt;-&gt;KING and set to Y for the record QUE&lt;-&gt;KING. If the external system sends a reservation with KNG, this will map to KING when entering OPERA Cloud. If the OPERA Cloud user now changes the reservation, the room type will be converted into QUE when sending to external system, as QUE is flagged as OPERA Cloud-&gt;external default in this multi-to-one room type conversion table. The result is that the same reservation exists as QUE in one system and as KING in the other, which may lead to confusion and questions.</p>	

**Table 27-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RATE DETAILS DISTINCT	Y/N	<p>- &gt; Direction: Data from external system to OPERA Cloud.</p> <p>When receiving messages of type 'DETAIL', OXI will identify the exact rate details to be updated by searching for a match with the begin date, end date, DOW flags and room types.</p> <p>If an exact match is found, OXI will then update the matched rate detail with the values received in the message.</p> <p>If no exact match exists, OXI fails the message.</p>	
RETRY COUNT	Numeric Value	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>OXI will retry this number of times to process an incoming message if the first attempt was not successful due to, for example, a locked record. A locked record can occur when OXI tries to process a message while another user is updating this record at the same time in OPERA Cloud. OXI will retry the update x number of times as defined in this parameter. This parameter is directly linked to RETRY_INTERVAL.</p>	<p>Set this value to a number of retries that is appropriate for your operation.</p> <p>We recommend at least 3 times.</p>

Table 27-3 (Cont.) Generic Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RETRY INTERVAL	Numeric Value	- >Direction: Data from OPERA Cloud to external system. Interval in seconds between each retry that OXI will perform to process an incoming message after the first attempt failed. This parameter is directly linked to RETRY_COUNT.	Set this value to an interval you feel is appropriate. We recommend 60 seconds.
SEND COMMENT WITH CONVERSION	Y/N	- >Direction: Data from OPERA Cloud to external system. When set to Y, non-internal comments with conversion code exist only send to external system. If set to N, all the non-internal comments will be sent to the external system. Internal comments will not be sent out always.	Default is N. Set accordingly.

**Table 27-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SEND IFC CREATED ONLY	Y/N	<p>-&gt; Direction: Data from OPERA Cloud to external system. If set to 'Y': Reservations: If set to 'Y', changes and updates made to a record will be sent to this external system only if the record originated in this external system. Rates (Ext Sys must handle rates): When this Parameter is set to 'Y' AND Rate Code Conversion is active: Only Rates for which a conversion has been defined will be sent to this external system. Rates that do not have a defined conversion will not be sent to this external system. If Rate Code Conversion is inactive: All Rates will be sent to this external system. Products/Packages (Ext Sys must handle products): When this Parameter is set to 'Y' AND Product Conversion is active: Only Products for which a conversion has been defined will be sent to this external system. Products that do not have a defined conversion will not be sent to this external system. If Product Conversion is</p>	<p>Set to N if external system is handling External and OPERA Cloud based data regardless of origin. Set to Y if external system will only handle specific data originated in external system. (See conditions for this to work below.) We recommend N value.</p>

**Table 27-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>inactive: All Products will be sent to this external system.</p> <p>Rate Code/Rate Category Restrictions:</p> <p>When this Parameter is set to 'Y', only those Rate Code/Rate Category Restrictions that have an associated Rate Code/Rate Category conversion record will be sent to the external system.</p> <p>Rate Code/Rate Category Restrictions that do not have an associated Rate Code/Rate Category conversion record will not be sent to the external system.</p> <p>If Rate Code conversion is inactive, all Rate Code Restrictions will be sent to the external system.</p> <p>If Rate Category conversion is inactive, all Rate Category Restrictions will be sent to the external system.</p> <p>If set to 'N':</p> <p>External System will receive all Reservations, Rates and Products, irrespective of Conversions configuration.</p>	

**Table 27-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SEND VAULTED CREDIT CARD	Y/N	<p>-&gt; Direction: OPERA Cloud to External system.</p> <p>When CC vault is on, this parameter determines whether to include actual plain text credit card information or the unique id received from CC vault system in the outgoing messages.</p> <p>- Set this to Y if the receiving system is vaulted and is using the same vault and understands vaulted information in the message.</p> <p>- Set this to N if the receiving system is not vaulted or is using a different vault or does not understand vaulted information in the message.</p>	<p>Default for this parameter is N.</p> <p>This parameter should be set to Y only if both sides of the interface is using same vault installation for storing and retrieving credit cards.</p>

Table 27-3 (Cont.) Generic Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SPECIFIC BLOCK EXCHANGE	Y/N	<p>-&gt; Direction: Data between External System to OPERA Cloud and OPERA Cloud to External System.</p> <p>This parameter determines if conditions can be applied to determine which allotments and related reservations are exchanged with the external system. This parameter is an additional condition and does not enable the exchange of reservations and allotments. It function is conditional to all other configuration items and parameters related to allotments and reservations.</p> <p>If this parameter is set to Y, it will enable a button OXI on OPERA Cloud Block form. This button will allow selection of any external systems where the parameter is set to Y. When an external system has been selected on the allotment form, this block and all reservations related to that block will be sent to the external system.</p> <p>If this parameter is set to N, all allotments and related reservations will be exchanged</p>	Default for this parameter is N.

**Table 27-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
WARNINGS AS TRACES	Y/N	<p>with the external system.</p> <p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>Warnings that occur when reservations are sent to OPERA Cloud can be added to these reservations as traces. Users are then prompted with the trace in due time before the guest arrives, and could update the record accordingly. A sample for a reservation warning would be if OXI uses a default instead of converted the incoming value. This warning would indicate to users that the conversion table is incomplete. Set this parameter to Y and OXI will create traces for each mandatory warning that occurred on the reservation. These traces are created for the trace department selected in the OXI Other Defaults for Trace warning. If set to N, no traces will be generated for warnings. This applies only to reservations.</p>	Set to Y if you would like to keep track of your warnings within the reservations where they have occurred.

Table 27-3 (Cont.) Generic Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
DELETE ENROLLMENT CODES NOT RECEIVED		Determines whether to keep or delete existing OPERA Cloud membership enrollment codes when they are not received in the message payload.	

Table 27-3 (Cont.) Generic Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
OXI_GENERIC: DELETE ENROLLMENT CODES NOT RECEIVED	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud. This parameter determines whether to keep or delete existing OPERA Cloud membership enrollment codes when they are not received in the message payload. If the value is set to 'Y' and the membership enrollment code is not received in the message payload:</p> <ul style="list-style-type: none"> <li>• If no dependency exists, the existing OPERA Cloud membership enrollment code will be inactivated.</li> <li>• If a dependency exists, the existing OPERA Cloud membership enrollment code will remain untouched. If the value is set to 'N' and the membership enrollment code is not received in the message payload:</li> <li>• The existing OPERA Cloud membership enrollment code will remain untouched.</li> </ul>	

## Other Defaults for OXI

**Table 27-4 Other Defaults for OXI and its Description**

Other Defaults	Description
Maximum Availability in advance	<p>This section defines for how long in advance you can receive or send messages for data modules that affect the inventory. If you want to restrict your reservations to the external system to, for example, 720 days in advance and not send any reservations beyond that inventory time span, you would select availability type 'Day' and availability in advance for '720' (days).</p> <ul style="list-style-type: none"><li data-bbox="922 684 1425 779">• <b>Maximum Availability Type:</b> Setting of the availability types either in Days or by Week</li><li data-bbox="922 785 1382 879">• <b>Maximum Availability in Advance:</b> Setting of the number of days/weeks availability in advance is allowed</li><li data-bbox="922 886 1455 1003">• <b>Start Day of the Week:</b> Day of the week from which the time format is calculated. Only shows when the Max Availability Type is flagged as DAY.</li></ul>

**Table 27-4 (Cont.) Other Defaults for OXI and its Description**

Other Defaults	Description
External System Currency Details	<ul style="list-style-type: none"> <li data-bbox="922 338 1451 632">• <b>Currency Code:</b> The currency code the external system is sending and expecting. The revenue amounts sent in STAY messages to the external system are converted to the external system currency code configured in OXI here. The actual currency code (once code conversion, if configured, has occurred) of the revenue amount is also sent along with the revenue amounts.</li> <li data-bbox="922 638 1451 730">• <b>Currency Format:</b> Select the format mask matching the external system currency code</li> <li data-bbox="922 737 1451 913">• <b>Currency Multiplier:</b> Currencies that have denominations without decimals need to be set to convert correctly for messages from the external system. Amounts sent by external systems are multiplied by this value when set.</li> <li data-bbox="922 919 1451 1039">• <b>Decimal Indicator:</b> Auto populated once the Currency Format is selected. Based on the currency format set in OPERA Cloud.</li> </ul>

**Note:**

If any value for the External System Currency Details is changed, the OXI Services have to be restarted in order to activate the new settings.

Table 27-4 (Cont.) Other Defaults for OXI and its Description

Other Defaults	Description
Trace Department	<p>A maximum of two default trace departments can be selected and configured.</p> <ul style="list-style-type: none"> <li>Trace Department 1 or 2: Select by clicking on the down arrow button. A list of valid OPERA Cloud trace departments appears.</li> <li>Trace on Arrival Date: Set the trace start date in OPERA Cloud by inserting the number of days prior to the arrival of the guest.</li> <li>Always Overwrite: If this box is checked, new traces sent by the external system always overwrite existing traces for the same trace department in the reservation. If this box is blank, new traces sent are appended to existing traces in the reservation and is not overwritten.</li> </ul>
Trace Warning	<p>You can decide to capture all mandatory interface warnings as traces in the respective reservation they belong to. To do so, the OXI_GENERIC parameter WARNINGS_AS_TRACES must be set to Active. All warnings that have occurred during the download of a reservation are registered as traces with a start date equal to the current system date.</p> <ul style="list-style-type: none"> <li>Trace Warning: A list of valid OPERA Cloud trace departments appears.</li> <li>Always Overwrite: If this box is checked, new warnings always overwrite existing warnings in the reservation. If this box is blank, new warnings are appended to existing warnings in the reservation and are not supposed to be overwritten.</li> </ul>

## Inventory Parameters and Settings

In case your interface does not transmit full reservations and blocks both ways, inventory may be out of sync in either system and adjusted with the help of an inventory snapshot.

This is usually sent from a OPERA Cloud PMS to OPERA Cloud ORS to update ORS with inventory changes at the property that have not been transmitted through the interface. This inventory snapshot contains the total sold count, overbooking level, and out of order rooms per day per room type. It further splits the sold counts into transient and block bookings, as well as definite and tentative bookings.

For example, CLS PMS receives reservations from ORS only and does not send its own reservations back. This means ORS does not know what the exact availability in the PMS is.

To make sure ORS has exact sold counts and does not mistakenly overbook the hotel, CLS PMS sends an inventory snapshot to ORS, containing full reservation and block counts. When OXI-HUB receives this inventory snapshot it directly updates the availability tables for transient reservations and blocks for this property, and thus has an accurate picture of the number of rooms that are still available.

All parameters are set at the global level.

**Table 27-5 Inventory Parameters and Settings**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
CHANGE TO INVENTORY GENERATES	INVENTORY RTAV	-> Direction: OPERA Cloud to External System only.  When a Change in Inventory (Overbooking or External Allowance) occurs in OPERA Cloud and Inventory business event "AVAILABILITY/% ALLOWANCE" or "CONFIGURATION/% INVENTORY CONTROL" is generated, OXI can use these event in different ways.  - Set to INVENTORY, As is continue to generate the Inventory messages for the above Business Events.  - Set to RTAV, Generate the RTAV XML messages instead of Inventory messages for the above Business Events.	Set accordingly.
ENABLE ALLOWANCE	Y/N	-Direction: Data from OPERA Cloud To External System.  Inventory allowance for external systems.	Set accordingly.

Table 27-5 (Cont.) Inventory Parameters and Settings

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
EXTERNAL PHYSICAL ROOMS	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>Applies mainly to OPERA Cloud S&amp;C in this case. The hotel might not allow OPERA Cloud S&amp;C to sell its full physical room capacity. Although the hotel has 100 rooms it may allow only 50 rooms to be sold by the S&amp;C. In this case the physical rooms should be calculated from the inventory snapshot the external system sends to S&amp;C to make sure only 50 rooms are considered. In this case the parameter would be set to Y. Set it to N if OPERA Cloud S&amp;C has the entire physical room inventory from which the sold counts shall be calculated.</p>	If your OPERA Cloud is an S&C standalone install, physical room inventory might not be configured and should be updated by the external system.

Table 27-5 (Cont.) Inventory Parameters and Settings

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
INV_ROOMCLASS	N - No OO - Overbook Only YP - Physical Rooms for Suite YS - Suite as a Single Unit	<p>-&gt; Direction: Data from OPERA Cloud to external system</p> <p>The external system may accept the Room Class totals in the RTAV message.</p> <p>Set the parameter to 'YP' to include Room Class totals in the RTAV message. For Suites (Virtual Rooms), actual physical rooms comprising the Suite will be used for the Room Class totals.</p> <p>Set the parameter to 'YS' to include Room Class totals in the RTAV message. Each Suite (Virtual Room) will be treated as a single unit for the Room Class totals.</p> <p>Set the parameter to 'OO' to only send overbook counts in the RTAV message.</p> <p>Set it to 'N', if Room Class totals are not to be included in RTAV messages.</p>	<p>When the General &gt; Room Class and General &gt; Component Rooms application functions are set to Y and the Inventory &gt; INV_ROOMCLASS OXI Parameter is set to YS, Physical Room Types and Component Room Types cannot be attached to the same Room Class. Also, only 1 Component Room Type can be attached to a Room Class.</p>

Table 27-5 (Cont.) Inventory Parameters and Settings

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
INV SNAPSHOT BLOCKS	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>Applies mainly to OPERA Cloud S&amp;C in this case. If blocks are not transmitted both ways in this interface but the external system creates blocks that affect its inventory, this parameter should be set to Y. In this case block inventory will be updated in the OPERA Cloud S&amp;C inventory tables from the inventory snapshot sent by external system. Set this parameter to N if it is not necessary to update the OPERA Cloud S&amp;C block inventory from the snapshot. This would be the case if blocks are transmitted fully both ways, or if the external system does not create any blocks at all.</p>	If your OPERA Cloud is an S&C standalone install, set accordingly.

**Table 27-5 (Cont.) Inventory Parameters and Settings**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
INV SNAPSHOT RES	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>Applies mainly to OPERA Cloud S&amp;C in this case. If reservations are not transmitted both ways in this interface but the external system creates reservations that affect its inventory, this parameter should be set to Y. In this case transient reservation inventory will be updated in the OPERA Cloud S&amp;C inventory tables from the inventory snapshot sent by external system. Set this parameter to N if it is not necessary to update the OPERA Cloud S&amp;C reservation inventory from the snapshot. This would be the case if reservations are transmitted fully both ways, or if the external system does not create any reservations on its own.</p>	If your OPERA Cloud is an S&C standalone install, set accordingly.

**Table 27-5 (Cont.) Inventory Parameters and Settings**

<b>Parameter Name</b>	<b>Parameter Value</b>	<b>Direction of transmission where parameter applies. Parameter Description</b>	<b>Recommended Setting</b>
UPL BLOCK INFO	Y/N	-> Direction: Data from OPERA Cloud to External System. Set it to Y if OXI needs to send the block information (block code, ded type, blocked/sold count) to the external system. Set it to N if OXI does not need to send the block information to the external system.	Set as Y/N according to system needs.

## Profiles Parameters and Settings

**Table 27-6 Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
ACCEPT ANONYMIZATION UPDATE	Y/N/YR	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether to anonymize the OPERA Cloud profile when the update profile message is received with anonymize flag and the Profile Information Protection functionality is active.</p> <p>- If set to YR (Yes and Return), the OPERA Cloud profile will be anonymized and a snapshot of the profile will be sent back to the calling system after it has been anonymized in OPERA Cloud. The calling system must be subscribed to the UPDATE PROFILE business event to receive the profile update.</p> <p>- If set to Y the OPERA Cloud profile will be anonymized. A profile update will NOT be sent back to the calling system after the profile is anonymized.</p> <p>- If set to N the OPERA Cloud profile will NOT be anonymized.</p>	Set accordingly.

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
ACCEPT CENTRAL MERGE	ALL Select one or more profile types	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether to merge corresponding OPERA Cloud profiles when the received PROFILE message contains MergedIDs.</p> <p>- If this parameter is set to 'ALL' or one or more profile types, OXI will attempt to merge while processing messages of the specified profile types and will update the merged profile with the information received in the message.</p> <p>- If this parameter is not set to any value, OXI will ignore MergedIDs in the message and will update one matching profile with the information received in the message.</p>	Set accordingly.

**Table 27-6 (Cont.) Profiles Group parameters and settings.**

<b>Parameter Name</b>	<b>Parameter Value</b>	<b>Direction of transmission where parameter applies. Parameter Description</b>	<b>Recommended Setting</b>
ACCEPT PRIVACY UPDATE	Y/N	<p>-&gt; Direction: External system to OPERA Cloud.</p> <p>This parameter determines whether to update the privacy options in OPERA Cloud profile when the profile message is received.</p> <p>- If this parameter is set to 'Y' then privacy fields in OPERA Cloud profile will be updated.</p> <p>- If this parameter is set to 'N' then privacy fields in OPERA Cloud profile will NOT be updated.</p>	Set accordingly.

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
CHANGE TO PROFILE GENERATES	PROFILE RESERVATIONS	<p>- &gt; Direction: Data from OPERA Cloud to external system.</p> <p>This parameter specifies how OXI will use the following event: a change to a profile occurs in OPERA Cloud and a Profile business event is generated.</p> <p>When this parameter is set to 'Profile': if the external system has a profile concept and can apply the changes to only the profile record.</p> <p>When this parameter is set to 'Reservations': if the external system has a concept of Guest Name Record (GMR), where the guest information is stored with the reservation record. In this case, OXI will search all active reservations linked to that profile and send reservation updates for these records.</p>	The default for this parameter is Profile.

**Table 27-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
CORP EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether a company profile shall be overwritten from the external system or not. This may be desirable if the external system has more accurate company data than the OPERA Cloud database. Set to Y and the external system profile details for company profiles will overwrite the existing OPERA Cloud profile. Set to N and the OPERA Cloud details will remain unchanged.</p> <p>Even if this parameter is set to Y you can manipulate how data is being overwritten with the use of profile parameters INTEREST EXT CRS OVER, NEGRATES EXT CRS OVER, PHONE/ADDR EXT CRS OVER, PREF EXT CRS OVER, PROFCOMMENTS EXT CRS OVER.</p>	Set to Y if external system shall be allowed to update.

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
DISCARD DUPLICATE MEMBERSHIPS	Y/N	-> Direction: Data from external system to OPERA Cloud.  If set to Y, discard received memberships if they already exist in another OPERA Cloud profile and issue warning.  If set to N, profile will be created without checking if the received memberships already exist in another OPERA Cloud profile.	Set accordingly.
PROCESS INBOUND DOCUMENTS		Global, determines if documents are processed.	

**Table 27-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
DOCUMENT TYPES TO EXCHANGE	ALL NONE Configured Document Types	<p>-&gt; Direction: Data from OPERA Cloud to External System only.</p> <p>Only Global, and not resort specific, documents will be exchanged based on the parameter setting.</p> <p>Select 'ALL' to exchange all Document Types.</p> <p>Select 'NONE' to exchange no Document Types.</p> <p>Select Document Types in any combination, to restrict the Document Type exchange to the selected values.</p> <p>If the parameter value is not set, as is (backward compatible), with OPERA Cloud interfaces ALL Document Types will get exchanged; but with External Interfaces only 'PASSPORT' Document type will get exchanged.</p>	Select the Document Types to Exchange

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
GLOBAL PROFILE	Y/N	<p>-&gt; Direction: OPERA Cloud to External System only.</p> <p>This parameter defines if all new profiles will be sent to the External System, or if new Profiles will adhere to the property they were created in:</p> <p>If this parameter is set to Y, when a new profile is created in a property that does not have this External System active, a message will be sent as originating from the first listed property having this External System active.</p> <p>If this parameter is set to N, when a new profile is created in a property that does not have this External System active, no message will be generated for the creation of the profile in the external system, until such time that the profile is used by one property with the specified External System active. Once the profile is subscribed, all changes to the profile will be sent to the external system, no matter which property initiates the change.</p>	Set accordingly.

**Table 27-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
GROUP EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether a group profile shall be overwritten from the external system or not. This may be desirable if the external system sends many details in the group profile while the OPERA Cloud database only has the name. Set to Y and the external system profile details for group profiles will overwrite the existing OPERA Cloud profile. Set to N and the OPERA Cloud details will remain unchanged.</p> <p>Even if this parameter is set to Y you can manipulate how data is being overwritten with the use of profile parameters INTEREST EXT CRS OVER, NEGRATES EXT CRS OVER, PHONE/ADDR EXT CRS OVER, PREF EXT CRS OVER, PROFCOMMENTS EXT CRS OVER.</p>	Set to Y if external system shall be allowed to update.

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
HANDLE RESORT AR NUMBERS	FULLOVERLAY	-> Direction: Data from external system to OPERA Cloud	
	IGNORE	This parameter determines how to handle the incoming resort AR numbers in the ResortArs collection.	
	MERGE	When set to FULLOVERLAY, all received AR Numbers for the resort will get inserted or updated, for new AR numbers OXI will copy the primary address of the profile as AR address. Existing AR numbers will only get deleted if OPERA Cloud parameter 'ACCOUNTS_RECEIVABLES' is set to 'N' When set to MERGE, incoming AR numbers will Only get merged with existing Resort AR Numbers. When set to IGNORE, incoming AR numbers will be ignored.	

**Table 27-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
HANDLE RESORT PAYMENT METHOD	FULLOVERLAY IGNORE MERGE	-> Direction: Data from external system to OPERA Cloud  This parameter determines how to handle the incoming Profile Resort Payment Method.  When set to FULLOVERLAY, existing Profile Resort Payment Method will get overwritten with the incoming value.  When set to UPDATE, update only if existing Profile Resort Payment Method is null.  When set to IGNORE, incoming Profile Resort Payment Method will be ignored.	

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
IND EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether an individual profile shall be overwritten from the external system or not. This may be desirable if the external system has more accurate guest data than the OPERA Cloud database. Set to Y and the external system profile details for individual profiles will overwrite the existing OPERA Cloud profile. Set to N and the OPERA Cloud details will remain unchanged.</p> <p>Even if this parameter is set to Y you can manipulate how data is being overwritten with the use of profile parameters INTEREST EXT CRS OVER, NEGRATES EXT CRS OVER, PHONE/ADDR EXT CRS OVER, PREF EXT CRS OVER, PROFCOMMENTS EXT CRS OVER.</p>	Set to Y if external system shall be allowed to update.

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
INTEREST EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter will come into effect if you allow profiles to be overwritten in general. This means at least one of your parameters IND EXT CRS OVER, CORP EXT CRS OVER, TA EXT CRS OVER, SOURCE EXT CRS OVER, or GROUP EXT CRS OVER have to be set to Y. The functionality of this parameter is further determined by the mode of your interface. If it works with Delta Changes set to Yes (Interface Configuration &gt; Edit Interface), the external system can send profile changes only and does not need to send the full profile every time a small change to a profile occurs. OXI will then only update the changed data and not touch the additional data that was found in the OPERA Cloud profile. This also means that the external system needs to indicate intended deletions clearly with deletion indicators in the message. Sending simply blanks will not lead to data deletion if OXI works</p>	Determine whether values shall overwrite or append and select your setting accordingly.

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>in Delta mode. The deletion indicators can be configured in interface configuration &gt; edit interface. If your interface is set to Delta changes No, OXI expects a full overlay of all profile data in every profile message, even if the external system only changes very little of the entire profile.</p> <p>Here is how the parameter works: If your interface is setup as Delta Changes = Y and no interests are sent by external system in the profile message, this parameter is ignored and the existing OPERA Cloud profile interests remain untouched. Otherwise the following parameter rules apply: If Y, interests sent by external system will overwrite existing OPERA Cloud profile interests. If N, interests sent by the external system will be appended to existing OPERA Cloud profile interests.</p>	

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
MAX PROFILE MATCHES	Y/N	<p>-&gt; Direction: External System to OPERA Cloud only.</p> <p>This setting impacts the search depth for profiles meeting matching criteria, prior to establishing weighted points:</p> <ul style="list-style-type: none"> <li>- A lower setting (i.e. 10) will favor execution speed, while correctly matching the vast majority of profiles.</li> <li>- A higher setting (i.e. 100) will favor even very distinct differentiation, while providing very good execution speed.</li> <li>- A setting of 1000 can have a negative impact on performance, when reservations are received with limited profile information.</li> <li>- Leave blank, if you want OXI to always find and weigh all possible matches.</li> </ul> <p>If the value is left blank and you have limited information in the message (i.e. John Smith in New York) and several thousand potential duplicates can be found in the database, processing these reservations may take several minutes. During this time, the OXI Download processor will go into WAITING</p>	Set accordingly.

**Table 27-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		status and users will be prompted with a warning about the state of the interface.	

**Table 27-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
NEGRATES EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter will come into effect if you allow profiles to be overwritten in general. This means at least one of your parameters IND EXT CRS OVER, CORP EXT CRS OVER, TA EXT CRS OVER, SOURCE EXT CRS OVER, or GROUP EXT CRS OVER have to be set to Y. The functionality of this parameter is further determined by the mode of your interface. If it works with Delta changes set to Yes, (Interface Configuration &gt; Edit Interface), the external system can send profile changes only and does not need to send the full profile every time a small change to a profile occurs. OXI will then only update the changed data and not touch the additional data that was found in the OPERA Cloud profile. This also means that the external system needs to indicate intended deletions clearly with deletion indicators in the message. Sending simply blanks will not lead to data deletion if OXI works</p>	Determine whether values shall overwrite or append and select your setting accordingly.

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PHONE EXTENSION SYS OVER		<p>in Delta mode. The deletion indicators can be configured in interface configuration &gt; edit interface. If your interface is set to Delta changes = No, OXI expects a full overlay of all profile data in every profile message, even if the external system only changes very little of the entire profile.</p> <p>Here is how the parameter works: If your interface is setup as Delta Changes = Y and no negotiated rates are sent by the external system in the profile message, this parameter is ignored and the existing OPERA Cloud profile negotiated rates remain untouched. Otherwise the following parameter rules apply: If Y, negotiated rates sent by external system will overwrite existing OPERA Cloud profile negotiated rates. If N, negotiated rates sent by the external system will be appended to existing OPERA Cloud profile negotiated rates.</p> <p>Determines whether to send the phone extension.</p>	

**Table 27-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PHONE/ADDR EXT CRS OVER	(see description)	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines how the phone/addresses received from the external system update the phone/addresses in OPERA Cloud. This parameter will supersede the Delta setting of the interface.</p> <p>A = If received, replace OPERA Cloud values with the received values. If not received, remove the values from OPERA Cloud.</p> <p>B = If received, replace OPERA Cloud values with the received values. If not received, do not remove the values from OPERA Cloud.</p> <p>C = If received, merge the received values with OPERA Cloud values. If not received, remove the values from OPERA Cloud.</p> <p>D = If received, merge the received values with OPERA Cloud values. If not received, do not remove the values from OPERA Cloud.</p> <p>N = Ignore the phone/addresses received. Do not touch the values in OPERA Cloud.</p>	Determine whether values shall overwrite or append and select your setting accordingly.

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PREF EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter will come into effect if you allow profiles to be overwritten in general. This means at least one of your parameters IND EXT CRS OVER, CORP EXT CRS OVER, TA EXT CRS OVER, SOURCE EXT CRS OVER, or GROUP EXT CRS OVER have to be set to Y.</p> <p>The functionality of this parameter is further determined by the mode of your interface. If it works with Delta changes set to Yes, (Interface Configuration &gt; Edit Interface), the external system can send profile changes only and does not need to send the full profile every time a small change to a profile occurs. OXI will then only update the changed data and not touch the additional data that was found in the OPERA Cloud profile. This also means that the external system needs to indicate intended deletions clearly with deletion indicators in the message. Sending simply blanks will not lead to data deletion if OXI works</p>	Determine whether values shall overwrite or append and select your setting accordingly.

**Table 27-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>in Delta mode. The deletion indicators can be configured in (Interface Configuration &gt; Edit Interface.)</p> <p>If your interface is set to Delta changes no, OXI expects a full overlay of all profile data in every profile message, even if the external system only changes very little of the entire profile.</p> <p>Here is how the parameter works: If your interface is setup as Delta Changes = Y and no preferences are sent by the external system in the profile message, this parameter is ignored and the existing OPERA Cloud profile preferences remain untouched.</p> <p>Otherwise the following parameter rules apply: If Y, preferences sent by external system will overwrite existing OPERA Cloud profile preferences. If N, preferences sent by the external system will be appended to existing OPERA Cloud profile preferences.</p>	

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PROFILE CREATION	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>If you do not have any reason for not creating a new profile in case a match could not be found, this parameter should always be set to either Y or a comma separated combination of the alphabets A, B, C, D, E AND F.</p> <p>Each alphabet stands for specific profile selection:</p> <ul style="list-style-type: none"> <li>A- Guest</li> <li>B- Corporate</li> <li>C- Group</li> <li>D- Travel Agent</li> <li>E- Source</li> <li>F- Contact</li> </ul> <p>For all interfaces that transmit reservations and blocks, this parameter has to be set to either Y or the above alphabet combination and a new profile will be created in case no profile match and merge with an existing OPERA Cloud profile is possible. The reason that a profile fails the match can be that the profile does not make the entry match criteria or that it fails in the weighing point match criteria. Set this parameter to N</p>	Set Accordingly.

**Table 27-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PROFILE MATCHING	Y/N	<p>if you do not transmit blocks and reservations in your interface, and no new profile will be created in case profile match fails.</p> <p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>Set to Y in order to use the OXI Profile Matching routine with entry match criteria and weighing point match criteria. In case you do not require profile matching, for example, if OPERA Cloud and the external system share their internal profile numbers both ways and always have an ideal match, you can select to set this parameter to N. The OXI Profile Matching routine will then be ignored.</p>	Set Accordingly.

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PROFCOMMENTS EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter will come into effect if you allow profiles to be overwritten in general. This means at least one of your parameters IND EXT CRS OVER, CORP EXT CRS OVER, TA EXT CRS OVER, SOURCE EXT CRS OVER, or GROUP EXT CRS OVER have to be set to Y. The functionality of this parameter is further determined by the mode of your interface. If it works with delta changes set to Yes (interface configuration &gt; edit interface), the external system can send profile changes only and does not need to send the full profile every time a small change to a profile occurs. OXI will then only update the changed data and not touch the additional data that was found in the OPERA Cloud profile. This also means that the external system needs to indicate intended deletions clearly with deletion indicators in the message. Sending simply blanks will not lead to data deletion if OXI works</p>	Determine whether values shall overwrite or append and select your setting accordingly.

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>in delta mode. The deletion indicators can be configured in (Interface Configuration &gt; Edit Interface.)</p> <p>If your interface is set to delta changes No, OXI expects a full overlay of all profile data in every profile message, even if the external system only changes very little of the entire profile.</p> <p>Here is how the parameter works: If your interface is setup as Delta Changes = Y and no comments are sent by the external system in the profile message, this parameter is ignored and the existing OPERA Cloud profile comments remain untouched. Otherwise the following parameter rules apply: If Y, comments sent by external system will overwrite existing OPERA Cloud profile comments. If N, comments sent by the external system will only overwrite OPERA Cloud profile comments where the update_user=interface ID, and the ones that were last changed by the OPERA Cloud user remain untouched.</p>	

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RELATIONSHIP	None All Global Send Conversion Only	<p>-&gt; Direction: Data from external system to OPERA Cloud and from OPERA Cloud to external system.</p> <p>This parameter manages the transfer of relationship associations between OPERA Cloud and External Systems. This parameter consists of 4 distinct settings (All, None, Global, Send with Conversion only). This parameter is valid only for Profile Schema v3 and above.</p> <p>None - When active, no relationship data will be sent to or received from External system.</p> <p>All - Any update to the relationship will be updated in the receiving system regardless of local or global designation.</p> <p>Global - Only relationship flagged as global will be exchanged. Any local relationships will not be exchanged or updated.</p> <p>Send with Conversion Only - Only relationships with active conversions will be exchanged between systems.</p>	Setting is based on the use of profile relationships; select accordingly.

**Table 27-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RELATIONSHIPS INCOMING	ALL GLOBAL NONE	<p>-&gt; Direction: External System to OPERA Cloud only.</p> <p>This parameter manages the transfer of relationship associations between OPERA Cloud and External.</p> <p>None - When active, no relationship data will be sent or received from External system.</p> <p>All - Any update to the relationship will be updated in the receiving system regardless of local or global designation.</p> <p>Global - Only relationship flagged as global will be exchanged. Any local relationships will not be exchanged or updated.</p>	Set Accordingly.

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RELATIONSHIPS OUTGOING	ALL GLOBAL NONE	<p>-&gt; Direction: OPERA Cloud to External System only.</p> <p>This parameter manages the transfer of relationship associations between OPERA Cloud and External.</p> <p>None - When active, no relationship data will be sent or received from External system.</p> <p>All - Any update to the relationship will be updated in the receiving system regardless of local or global designation.</p> <p>Global - Only relationship flagged as global will be exchanged. Any local relationships will not be exchanged or updated.</p>	Set Accordingly.
REPLACE MEMBERSHIP CARD NUMBER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>If set to 'Y', update the card number of the existing membership with same type.</p> <p>If set to 'N', inactivate current membership of same type and create a new membership with the received membership number.</p>	Set to Y if external system shall be allowed to update.

**Table 27-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SOURCE EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether a source profile shall be overwritten from the external system or not. This may be desirable if the external system has more accurate data on the source or wholesaler than the OPERA Cloud database. Set to Y and the external system profile details for source profiles will overwrite the existing OPERA Cloud profile. Set to N and the OPERA Cloud details will remain unchanged.</p> <p>Even if this parameter is set to Y you can manipulate how data is being overwritten with the use of profile parameters INTEREST EXT CRS OVER, NEGRATES EXT CRS OVER, PHONE/ADDR EXT CRS OVER, PREF EXT CRS OVER, PROFCOMMENTS EXT CRS OVER.</p>	Set to Y if external system shall be allowed to update.

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
TA EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether a travel agent profile shall be overwritten from the external system or not. This may be desirable if the external system has more accurate agent data than the OPERA Cloud database. Set to Y and the external system profile details for agent profiles will overwrite the existing OPERA Cloud profile. Set to N and the OPERA Cloud details will remain unchanged.</p> <p>Even if this parameter is set to Y you can manipulate how data is being overwritten with the use of profile parameters INTEREST EXT CRS OVER, NEGRATES EXT CRS OVER, PHONE/ADDR EXT CRS OVER, PREF EXT CRS OVER, PROFCOMMENTS EXT CRS OVER.</p>	Set to Y if external system shall be allowed to update.

**Table 27-6 (Cont.) Profiles Group parameters and settings.**

<b>Parameter Name</b>	<b>Parameter Value</b>	<b>Direction of transmission where parameter applies. Parameter Description</b>	<b>Recommended Setting</b>
UPDATE SALUTATION	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>When this parameter is set to Y, OXI will update the salutation of a profile based on the profile's title handling, each time a PROFILE message is received.</p> <p>When this parameter set to N, OXI will insert salutation when inserting a new profile, but will then not update this salutation, to allow users to maintain custom salutations in OPERA Cloud.</p>	Default is N. Set accordingly.
OXI_PROFILES: PROCESS INBOUND DOCUMENTS	Y/N	<p>-&gt; Direction: Data from External System to OPERA Cloud only.</p> <p>Only Global, and not resort specific, documents will be processed based on the parameter setting. Select 'Y' to process all received Document Types. Select 'N' to ignore all received Document Types.</p>	

Table 27-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
OXI_PROFILE: PHONE EXTENSION SYS OVER	Y/N	<p>-&gt; Direction: Data from External system to OPERA Cloud This parameter determines whether to send phone extension .</p> <ul style="list-style-type: none"> <li>• If this parameter is set to 'Y', phone extensions will be exchanged from external system.</li> <li>• If this parameter is set to 'N', phone extensions will not be exchanged from external system.</li> </ul>	

## Default Profiles for OXI

The following are recommended default settings for Profiles.

Table 27-7 Default Profiles for OXI and it's Description

Default Profiles	Description
TA Commission Code	Select a default for commission codes when Travel Agent profiles are transmitted and you would like to apply a default commission code to new TA profiles.
TA/Company Owner	This is no longer mandatory, instead it is dependent on whether the OPERA Cloud function OWNER parameter is active. If this function is active, a profile owner must be set in order to update an account profile in OPERA Cloud. Select the sales associate or owner for a profile from the external system. Ownership by sales associates, as pertains to groups and conferences, is then defaulted when a new Company or Travel Agent profile is sent.

**Table 27-7 (Cont.) Default Profiles for OXI and it's Description**

Default Profiles	Description
Member Number that shows in Profile and Reservation.	<p>You can select a High Priority Member Type or determine that the member number that made the profile match is shown on top of the guest profile memberships and the reservation memberships screen. These columns are mutually exclusive but you can also leave both columns blank if you don't have a preference for the member number to show.</p> <ul style="list-style-type: none"> <li data-bbox="878 569 1458 863"> <p>• <b>High Priority Member Type:</b> Select a member type from a list of OPERA Cloud values. If a membership record with this member type exists for the profile, or is created during profile download, the member number linked to this member type is inserted as the first record in the OPERA Cloud memberships table. It is then visible on top of the reservation screen and as first record in the profile memberships.</p> </li> <li data-bbox="878 867 1458 1247"> <p>• <b>Match Member Number</b> : Check this option if you want to give priority to the profile matching member number rather than a specific member type. During download the profile-matching module attempts to find an existing OPERA Cloud profile to merge the incoming data with. If the match can be made based on a member number that is linked to an existing profile, this member number is then visible on top of the reservation screen and as first record in the profile memberships.</p> </li> </ul>

## Rates Interface Parameters and Settings

Rate parameters apply if your interface transmits rates. All parameters are set at the global level.

**Table 27-8 Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
CONFIDENTIAL RATES	A B C	-> Direction: Data from external system to OPERA Cloud Select a letter for a rate marked as "Confidential" in the external system can be marked in OPERA Cloud as "Suppress Rate", (do not display the rate to users during the reservation process), "Do Not Print Rate" (do not print the rate on registration cards and confirmation letters), or both. Values: A - Suppress Rate B - Do Not Print Rate C - Suppress and Do Not Print Rate	Set Accordingly.
EXT SYS DEPENDENT RATES	Y/N	-> Direction: The external system is capable of handling dependent rates. If set to Y, only the modified rate will be sent to the external system, if set to N, the resulting recalculated dependent rates will be sent to the external system.	Set Accordingly.

**Table 27-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
HANDLE RATES POSTING RHYTHM	FULL OVERLAY IGNORE KEEP UPDATE	-> Direction: Data from external system to OPERA Cloud  This parameter determines how to handle the incoming Rate Posting Rhythm (applies to non-V3 interfaces only).  When set to FULLOVERLAY, existing Rate Posting Rhythm will get overwritten with the incoming value.  When set to UPDATE, update Rate Posting Rhythm only if existing value is null.  When set to KEEP, keep existing Rate Posting Rhythm if the received value is null.  When set to IGNORE, incoming Rate Posting Rhythm will be ignored.	Set Accordingly.

**Table 27-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
KEEP RATE DETAILS	M S P Y	-> Direction: Data from external system to OPERA Cloud This parameter determines whether the Market code, Source Code, Package Elements and Yield Adjustment information of rate code details will be overwritten by an external system update or not. This parameter can be set to a single value or a comma separated combination of following : M: Market Code S: Source Code P: Package Elements Y: Yield Adjustments For example if we don't want any modifications to any of these we will set this parameter as 'M,S,P,Y'. To allow updating of this column information just don't set any value in the parameter list.	Set Accordingly.

**Table 27-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
KEEP RATE HEADER PKG	Y/N	-> Direction: Data from external system to OPERA Cloud. This parameter determines whether package elements attached to the OPERA Cloud rate code will be overwritten by an external system update or not. Set to Y and only package elements attached to the rate header where the update_user = external system ID will be updated. This means that package elements created by an OPERA Cloud user will not be overwritten. If this parameter is set to N, all package elements will be overwritten by changes from the external system, regardless where they have been created.	Set to Y if OPERA Cloud package elements should be kept.

**Table 27-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
NO RATE HEADER UPDATE	(see description)	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>Select the letters for the rate header columns that shall not be updated by rate change messages from external systems.</p> <p>Values:</p> <ul style="list-style-type: none"> <li>A - Rate Description</li> <li>B - Rate Category</li> <li>C - Folio Text</li> <li>D - Market Code</li> <li>E - Source Code</li> <li>F - Commission</li> <li>G - Minimum Stay Through</li> <li>H - Maximum Stay Through</li> <li>I - Min Advance Booking</li> <li>J - Suppress Rate</li> <li>K - Print Rate</li> <li>L - Long Info</li> <li>M - Short Info</li> <li>N - Transaction Code</li> <li>O - Yieldable YN</li> <li>P - Commission %</li> <li>Q - Max Advance Booking</li> <li>R - Yield As</li> <li>S - Sell Sequence</li> <li>T - Discount</li> <li>U - Membership</li> <li>V - Daily Rates</li> <li>W - Day use</li> <li>X - Complimentary</li> <li>Y - House use</li> </ul>	Select all letters that apply. This highly depends whether a GDS interface is installed at the OPERA Cloud level, in which case the update of most rate header columns sent by external system should be prevented.

**Table 27-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RATE DELTA HANDLING	Y N	-> Direction: OPERA Cloud to external system This parameter determines if the OPERA Cloud Rates will be sent as Delta or FullOverlay messages. This parameter only applies to Non-OPERA Cloud interfaces. When set to Y, OPERA Cloud Rates will be sent as Delta messages. When set to N, OPERA Cloud Rates will be sent as FullOverlay messages.	Set Accordingly.

Table 27-8 (Cont.) Rates Interface Parameters, Settings and Description

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RATE DETAIL MESSAGE HANDLING	FAIL REMOVE REQUEST	<p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>This parameter applies only when receiving rate messages of type DETAIL, whereby OXI will not receive all rate details belonging to that rate, but is requested to update individual rate details as present in the message. This parameter determines processing principles when receiving details that offend existing rate details (i.e. existing rate DETAIL for one of the room types with dates overlapping).</p> <p>FAIL: When receiving an offending rate detail, OXI will FAIL the message and report RESULT FAIL in the result message returned to the sender.</p> <p>REMOVE: When receiving an offending rate detail, OXI will remove all existing offending rate details and rely on the external system to provide all other replacing details in subsequent messages.</p> <p>REQUEST: When receiving an offending rate detail, OXI will FAIL the message and request the FULL RATE from the sending system.</p>	Set accordingly.

**Table 27-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>For this setting, the external system must support MESSAGEREQUEST V3 or higher.</p> <p>MAKE ROOM: Make room for the incoming rate details, during this process conflicting rate details will be appropriately adjusted to make room for incoming rate detail using split/insert/update and delete operations.</p>	
RATE EXTERNAL LOCKED YN	Y/N	<p>-&gt;Direction: Data from external system to OPERA Cloud.</p> <p>If this parameter is set to Y the rate code created by the external system will be locked in OPERA Cloud and cannot be modified by OPERA Cloud users. If set to N the rate code created by the external system will fully changeable in OPERA Cloud.</p>	Set to Y, if external system will have control.

**Table 27-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RESTRICTION CODES	Open Closed Open for Arrival Closed for Arrival Open for Departure Closed for Departure Min. Stay Through Max. Stay Through Min. Length of Stay Max. Length of Stay Min. Advanced Booking Max. Advanced Booking Length of Stay Not Available Clear All Restrictions Restrictions per Day	-> Direction: Data from OPERA Cloud to External and External System to OPERA Cloud.  Restriction Codes in the Rate Availability and Rate Strategy screens that are supported for the Interface. Select one or multiple restriction codes from a multi-select list of values.  Note: When no value(s) are selected, all restriction types will be sent.	Set Accordingly.
SUPPORTED CHANNELS	(see description)	-> Direction: Definition of channels.  Allowed definition of channels for which restrictions are to be sent through specified interface.	Set Accordingly.

## Rate Defaults for OXI

The following are recommended default settings for Rates.

**Table 27-9 Rate Defaults for OXI and Description**

Rate Defaults	Description
Rate Class	This can be left blank if a rate category default is selected, as the rate category automatically determines the rate class linked.
Rate Category	This default can be used for all rates codes from the external system if no conversion of the rate category is possible, or if no rate category is sent.

# Reservations Interface Parameters and Settings

All parameters are set at the global level.

**Table 27-10 Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
ADDITIONAL REFERENCE EXCHANGE	(see description)	-> Direction: Data from OPERA Cloud to external systems and external systems to OPERA Cloud. Comma separated list of unique additional external reference types that are allowed to be included in the reservation and reservation result messages to the external systems, and accepted from the external systems. This may include actual external system types (such as ORS, OXI-OPERA, MYFIDELIO, etc.), but references belong to those systems will be exchanged from OPERA Cloud to external systems only, those will be ignored while processing inbound messages from external systems to OPERA Cloud to prevent tampering legitimate external system references present in OPERA Cloud.	Set Accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
AUTOPOPULATE MEMBERSHIP YN	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>If this parameter is set to Y, OXI will populate the selected memberships from the reservation message based on the membership type configuration in OPERA Cloud. This means if the membership type is setup to auto populate reservation, OXI will do the same when inserting the reservation. If that membership type is setup to not auto populate reservation or to prompt user, OXI will not copy the membership either.</p> <p>If the parameter is set to N, OXI will copy the selected memberships from the message into the reservation, regardless of the membership type configuration in OPERA Cloud.</p>	Set to Y to allow the same functionality as if OPERA Cloud user enters a membership directly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
COPY COMMENTS FROM PROFILE	Select a profile type accordingly.	<p data-bbox="881 485 1105 600">-&gt; Direction: Data from external system to OPERA Cloud.</p> <p data-bbox="881 611 1105 863">For profiles which have notes (Type: Reservation) associated with it, this parameter will determine whether to copy them on to reservation as comments.</p> <p data-bbox="881 873 1105 1014">The value(s) of the parameter will also determine the type of profiles the copy is intended.</p> <p data-bbox="881 1062 1105 1287">Leave the value blank (null, which is default value) to avoid copying the reservation notes from profile to reservation as comments.</p> <p data-bbox="881 1297 1105 1438">If single value is selected then notes from that particular profile type are copied.</p> <p data-bbox="881 1449 1105 1619">If multiple values are selected then notes from those selected list of profile types are copied.</p>	Default value is null.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
EXT SYS HANDLES DAY USE	Y/N	-> Direction: Data from OPERA Cloud To External System. When parameter value = Y, handling day use rooms has no difference. When parameter value = N, OXI will send a cancellation message to the external system when OPERA Cloud reservation has an external reference number and the number of nights equals 0.	Default is Y. Set accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
EXT SYS MARKET/ SOURCE CONTROL	R/B/E/D/Y or N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter defines the sequence in which OXI identifies the market and source codes to apply in the reservation.</p> <ul style="list-style-type: none"> <li>• R = Use the codes defined in rate definition (rate details first and then rate header),</li> <li>• B = Use the codes defined in block definition,</li> <li>• E = Use the codes received from the external system (after conversion, if applicable),</li> <li>• D = Use the codes defined in OXI defaults,</li> <li>• Y = When used alone, same as ED and</li> <li>• N = When used alone, same as BRD.</li> </ul>	Set accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
EXT SYS PRICE CONTROL	N/Y/YC	<p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>Y -&gt; External rate will be applied with discounts present in the message. The reservation rate will be fixed if OPERA Cloud Fixed Rates is enabled and the inbound message includes an indicator (identified by a structured tag in the message) that the rate should be fixed or if the indicator is not present in the message. If the inbound message includes an indicator that the rate should not be fixed, the reservation rate will not be fixed.</p> <p>In this case, there will be no rate comparison between the rate sent in the message against the rate detail in OPERA Cloud. The rate amount sent in the message will always be used and the decision to fix the rate in OPERA Cloud will be made by the contents of the inbound message.</p> <p>YC -&gt; External rate will be applied with discounts present in the message. The reservation rate will be fixed if OPERA Cloud Fixed Rates is enabled and the</p>	Set to Y as external system has already sold the rate amount, and therefore it should be confirmed in OPERA Cloud as well.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>inbound message includes an indicator (identified by a structured tag in the message) that the rate should be fixed.</p> <p>If the inbound message includes an indicator that the rate should not be fixed or if the inbound message does not include the fixed rate indicator, then a rate comparison between the rate sent in the message against the rate detail in OPERA Cloud will be executed to determine whether or not to fix the rate. The rate amount sent in the message will always be used, but the decision to fix the rate in OPERA Cloud will be made by the results of the rate comparison. If the rate in the inbound message matches the rate in OPERA Cloud, the rate will not be fixed. If the rate in the inbound message does not match the rate in OPERA Cloud, the rate will be fixed.</p> <p>N -&gt; OPERA Cloud rate will be applied. Any discounts present in the message will be ignored and will not be applied.</p>	

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
EXT SYS GENERATED INV	Y/N	-> Direction: Data from external system to OPERA Cloud  When a reservation message from an external system is received, OXI will generate inventory snapshots for the affected dates and room types.	Set Accordingly.
FORCE BLOCK CODE	Block Code / Blank	-> Direction: External System to OPERA Cloud only. When selected, all reservations received will be booked against the selected block, regardless of the presence or value of a block code in the message. When blank, no particular function is associated. Note: This interface parameter is available for the TUI interface only.	Default is blank. Set Accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
FULL OPERA SHARES	Y NS NU	<p>-&gt;Direction: Data both ways between external system and OPERA Cloud.</p> <p>The following rules apply to both incoming and outgoing messages:</p> <p>When this parameter is set to Y, any update on one individual reservation will be reflected in one reservation XML message. Any share related action (combine/break) will be reflected in appropriate share reservation message with only the key information about the reservations involved.</p> <p>When this parameter is set to NS any update, including share related on any of the reservations will be reflected in a reservation XML message containing information about all the relevant shares. External reference of all the share reservations in OPERA Cloud will be updated from the incoming result message.</p> <p>When this parameter is set to NU, it acts similarly to NS, but external reference of only those reservations in OPERA Cloud</p>	Set to N as this is only used for OPERA Cloud.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		mentioned in the result message will be updated from the incoming result message. Note: This parameter can be active for any interface that requires it (ORS / OXI-OPERA / OXI-V7 / OXI-V6).	

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
IGNORE RES FOR UPDATE OLDER THAN	Numeric value for number of days	<p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>Enter a numeric value that will be translated into number of days.</p> <p>The value entered here will determine how many days in the past OXI will consider existing reservations for update when matching on external reference number.</p> <p>If the external reference number sent in the message matches the external reference of an existing reservation, then that reservation will be considered for update if the departure date of the existing reservation is same or later than the number of days in the past entered in this parameter. If the departure date of the existing reservation is earlier than the number of days in the past entered in this parameter, then the existing reservation will be ignored and a new reservation will be created.</p> <p>If this parameter is left blank, then ALL existing reservations will be considered for update.</p>	Set Accordingly. The Default setting is blank and this parameter should be left blank if the external system will always send a unique confirmation number.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

<b>Parameter Name</b>	<b>Parameter Value</b>	<b>Direction of transmission where parameter applies. Parameter Description</b>	<b>Recommended Setting</b>
-----------------------	------------------------	---	----------------------------

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
INHERIT CONFIRMATION NUMBER	Y/N	<p>-&gt; Direction: External System to OPERA Cloud only.</p> <p>When set to Y, OPERA Cloud will inherit the external system's confirmation number as its own, which will allow passing of the originating (Guest) confirmation number to PMS systems that do not have the capability of processing and storing multiple external references.</p> <p>When set to N, OPERA Cloud will store the external system's confirmation number, assign the OPERA Cloud confirmation number and pass it along to the receiving system.</p> <p>This parameter is subjected to the following restrictions:</p> <ul style="list-style-type: none"> <li>- The parameter can be set to Y for only one external system across the entire OPERA Cloud system</li> <li>- For this one system, it can be selected for any number of resorts</li> <li>- For resorts, where the parameter is set to Y, the parameter SEND IFC CREATED ONLY must be set to Y as well.</li> </ul>	Set Accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>The restrictions serve to limit the possibility of colliding confirmation numbers between multiple external systems and OPERA Cloud. It is however the OPERATOR's responsibility to set the confirmation number sequences such that this never occurs.</p>	

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
ITEM INVENTORY EXT SYS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>Enter a numeric value that will be translated into number of days.</p> <p>The value entered here will determine how many days in the past OXI will consider existing reservations for update when matching on external reference number.</p> <p>If the external reference number sent in the message matches the external reference of an existing reservation, then that reservation will be considered for update if the departure date of the existing reservation is same or later than the number of days in the past entered in this parameter. If the departure date of the existing reservation is earlier than the number of days in the past entered in this parameter, then the existing reservation will be ignored and a new reservation will be created.</p> <p>If this parameter is left blank, then ALL existing reservations will be considered for update.</p>	Set Accordingly.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PACKAGE EXT SYS OVER	(see description)	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines how the package elements received from the external system updates the packages in OPERA Cloud.</p> <p>A = If received, replace OPERA Cloud values with the received values. If not received, remove the values from OPERA Cloud.</p> <p>B = If received, replace OPERA Cloud values with the received values. If not received, do not remove the values from OPERA Cloud.</p> <p>C = If received, merge the received values with OPERA Cloud values. If not received, remove the values from OPERA Cloud.</p> <p>D = If received, merge the received values with OPERA Cloud values. If not received, do not remove the values from OPERA Cloud.</p> <p>N = Ignore the package elements received. Do not touch the values in OPERA Cloud.</p>	Set Accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PEGASUS CHANNEL UPDATE	ALN/LCL or ORD/RID	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>For Pegasus only: this parameter determines whether the combination ALN/LCL or ORD/RID are used to map into the OPERA Cloud channel code.</p> <p>For ALN/LCL: If Pegasus sends ALN, this will be used for channel mapping, otherwise the LCL will be used.</p> <p>For ORD/RID: If Pegasus sends ORD, this will be used for channel mapping, otherwise the RID will be used.</p>	<p>Pegasus for Fairmont: ALN/LCL</p> <p>Pegasus for Meridien: ORD/RID</p>

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PROMOTION EXT SYS OVER	Y/N	-> Direction: Data from external system to OPERA Cloud  This parameter determines whether Promotion elements sent by external system shall overwrite OPERA Cloud Promotion elements or not. Overwriting may be desired, as the property should decide what Promotions the guest has in this reservation. Set to Y and reservation Promotions will always be overwritten by external system Promotions. Set to N and Promotion elements sent by external system will be appended to existing ones in OPERA Cloud.	Set Accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

<b>Parameter Name</b>	<b>Parameter Value</b>	<b>Direction of transmission where parameter applies. Parameter Description</b>	<b>Recommended Setting</b>
RATE CODE CONVERSION MODE	RATE CODE FLOATING RATE	-> Direction: Data both ways between external system and OPERA Cloud  This parameter determines whether to use only one of external SRP and rate level or the combination of both to convert to/from OPERA Cloud rate codes.  When set to RATE CODE, when SRP is received from external system, it will be converted to OPERA Cloud rate code, else rate level will be converted to OPERA Cloud rate code and back.  When set to FLOATING RATE, combination of the external SRP and rate level will be converted to an OPERA Cloud rate code and back.	Set Accordingly.  This parameter is only available for the Pegasus Interface.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
REINSTATE CANCELLED RESERVATION	ALWAYS - ON ANY UPDATE ACTION REINSTATE - ONLY ON REINSTATE ACTION	<p>Direction: Data from External System to OPERA Cloud.</p> <p>This parameter determines how canceled reservations will be reinstated when processing inbound reservation messages.</p> <p>ALWAYS: Cancelled reservations will be reinstated when the action type in the reservation message indicates UPDATE or REINSTATE or RESYNC.</p> <p>REINSTATE: Cancelled reservations will be reinstated only when the action type in the reservation message explicitly indicates REINSTATE or RESYNC. If the action type in the reservation message is different, reservation will not be reinstated and an appropriate error will be logged.</p>	Set Accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
REMOVE EXT SYS NO	Y/N	<p>-&gt; Direction: Data from OPERA Cloud to external system.</p> <p>This parameter only applies to full 2-way interfaces that send reservations both ways. If a party reservation is split into multiple single reservations in OPERA Cloud, the split-offs need to be sent as new reservations to the external system. In this case the original external confirmation number should be removed before the message is sent to ensure that a new confirmation number is triggered. The same would apply in case a share is broken in OPERA Cloud. Here we would send a new reservation for the broken share and that should result in a new confirmation number as well. Therefore the parameter would be set to Y.</p> <p>If set to N, the external system confirmation number will be kept after a split of a party reservation or a break share. This is required for a 1-way interface where the external system does not return a new confirmation</p>	Set to Y for all full 2-ways that sent CRS numbers upon receipt of new reservations. Otherwise set to N.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
REMOVE EXT REF ON REINSTATE	NO SHOW CANCEL NULL	<p>number since it does not know about the change in OPERA Cloud.</p> <p>-&gt;Direction: Data from OPERA Cloud to External System</p> <p>Select NO SHOW if the reinstate no show message sent to the External System should not contain the External Reference Number of the current interface. Select this option when the External System cannot reinstate a no show reservation using the same reference number.</p> <p>Select CANCEL if the reinstate cancel message sent to External System should not contain the External Reference Number of the current interface. Select this option when the External System cannot reinstate a canceled reservation using the same reference number.</p> <p>If this parameter is NULL, then the External Reference Number of the current interface will always be sent to the External System for reinstate messages.</p>	Set Accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RESCOMMENTS EXT SYS OVER	Y/N	-> Direction: Data from external system to OPERA Cloud.  This parameter determines whether reservation comments sent by external system shall overwrite OPERA Cloud comments or if they shall be appended to existing ones. If set to Y the OPERA Cloud reservation comments will always be overwritten by the external system comments. If set to N, only comments where the update user = external system ID in the OPERA Cloud database will be updated.	Set to N if you would like to keep OPERA Cloud changes intact.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SHARE RATE CALC METHOD	ENTIRE FULL INACTIVE SPLIT	- >Direction:Data from external system to OPERA Cloud  'INACTIVE' = When OXI Parameter OPERA Cloud FULL SHARES is set to Y, behavior is INACTIVE, regardless of parameter value.  When 'FULL OPERA Cloud SHARES' is set to N, OPERA Cloud determines the share amount as follows:  SPLIT: Each sharer will carry an equal portion of the total rate amount.  FULL: Each sharer will have the full rate amount.  ENTIRE: First sharer will be determined as the primary and carry the entire rate amount, all other sharers will have a zero rate amount.	Defaults to INACTIVE  Works with FULL OPERA Cloud SHARES parameter, see explanation before setting.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SHARER REMOVAL MODE	CANCEL DELETE NEITHER	<p>-&gt; Direction: External system to OPERA Cloud only. Applicable only when FULL OPERA Cloud SHARES=N. This parameter determines how should OXI handle share reservations those found in OPERA Cloud but not coming in the message.</p> <p>When this parameter = CANCEL it cancels any sharer present in OPERA Cloud which does not appear in the incoming message.</p> <p>When this parameter = DELETE it deletes any sharer present in OPERA Cloud which does not appear in the incoming message.</p> <p>When this parameter = NEITHER it leaves sharer(s) those present in OPERA Cloud untouched, even if they don't appear in the message.</p>	This parameter is only available when the parameter FULL OPERA Cloud SHARES is set to N. Set accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SPECIALS EXT SYS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether special requests sent by the external system will overwrite the ones in OPERA Cloud, or if they will be appended to existing ones.</p> <p>The functionality of this parameter is further determined by the mode of your interface. If it works with Delta changes set to Yes (Interface Configuration&gt;Edit Interface), the external system can send reservation changes only and does not need to send the full reservation every time a small change to a reservation occurs. OXI will then only update the changed data and not touch the additional data that was found in the OPERA Cloud reservation. This also means that the external system needs to indicate intended deletions clearly with deletion indicators in the message. Sending simply blanks will not lead to data deletion if OXI works in Delta mode. The</p>	Determine whether values shall overwrite or append and select your setting accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>deletion indicators can be configured in interface configuration-&gt;edit interface.</p> <p>If your interface is set to Delta changes No, OXI expects a full overlay of all profile data in every profile message, even if the external system only changes very little of the entire profile.</p> <p>Here is how the parameter works: If set to Y and the interface is setup as Delta Changes = Y, ONLY the specials originally inserted by the external system will be overwritten. If set to Y and the interface-&gt; Direction: Data from OPERA Cloud to external system</p> <p>When the reservation message can't be delivered (possibly due to communication errors) to the external system, a trace will be logged against this trace department.</p> <p>Applicable only if OXI processor is configured to deliver the messages.</p> <p>is setup as Delta Changes = N, all reservation specials in OPERA Cloud will be overwritten by the external system specials. If set to N,</p>	

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SPLIT CANCELLATIONS	CANCEL/ DELETE	<p>new specials will be appended to existing ones in OPERA Cloud, regardless whether the interface works in delta mode or not.</p> <p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines how OXI handles split off reservations, for a 1-way interface, when a cancel message is received for the original multi room reservation from the external system.</p> <p>CANCEL: Split reservations will be canceled.</p> <p>DELETE: Split reservations will be deleted.</p>	Set Accordingly. (For 1-Way Interface)

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
STAY UPLOAD PROFILE TYPES	(see description)	-> Direction: Data from OPERA Cloud to external systems. If null all the stay records will be sent to external system. If value(s) are selected; then the stay records will be sent where only those profiles exist on Stay records. (i.e. If selection is only TRAVEL_AGENT, then only Stay Records that have an attached Travel Agent profile will be sent. All other Stay records without this profile will not be sent).	Set Accordingly.
TRACE DEPT FOR DELIVERY FAILURE	(see description)	-> Direction: Data from OPERA Cloud to external system When the reservation message can't be delivered (possibly due to communication errors) to the external system, a trace will be logged against this trace department. Applicable only if OXI processor is configured to deliver the messages.	Set Accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
TRACE DEPT FOR FAILURE IN EXT SYS	(see description)	-> Direction: Data from external system to OPERA Cloud  When the external system can't process a reservation message received from OPERA Cloud, if it sends a result message back to OPERA Cloud indicating the error, a trace with the error message will be logged against this trace department.	Set Accordingly.
TRACE DEPT FOR NON REVIEWED	(see description)	-> Direction: Data from external system to OPERA Cloud  When a non-reviewed reservation message received from the external system is processed, a trace will be logged against this trace department. If a canceled reservation message is sent from an external system OXI also adds an additional trace reading "Please review this reservation cancelled by XXX external system.", where XXX is replaced with the name of the actual interface.	Set Accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
TRACE ROOM ASSIGNMENT	NO ROOM ALWAYS NEVER	-> Direction: External System to OPERA Cloud only. NO ROOM - OPERA Cloud will trace if Room could not be assigned. ALWAYS - OPERA Cloud will trace Room assignment process. NEVER - OPERA Cloud will not trace Room assignment.	Set Accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPDATE ACCOMPANY GUEST	A B C D N	-> Direction: Data from external system to OPERA Cloud  This parameter determines how the accompany guest received from the external system updates the accompany guest in OPERA Cloud.  A = If received, replace OPERA Cloud values with the received values. If not received, remove the values from OPERA Cloud.  B = If received, replace OPERA Cloud values with the received values. If not received, do not remove the values from OPERA Cloud.  C = If received, merge the received values with OPERA Cloud values. If not received, remove the values from OPERA Cloud.  D = If received, merge the received values with OPERA Cloud values. If not received, do not remove the values from OPERA Cloud.  N = Ignore the accompany guest received. Do not touch the values in OPERA Cloud.	Set Accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPDATE FEATURES	A B C D N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines how the features received from the external system updates the features in OPERA Cloud.</p> <p>A = If received, replace OPERA Cloud values with the received values. If not received, remove the values from OPERA Cloud.</p> <p>B = If received, replace OPERA Cloud values with the received values. If not received, do not remove the values from OPERA Cloud.</p> <p>C = If received, merge the received values with OPERA Cloud values. If not received, remove the values from OPERA Cloud.</p> <p>D = If received, merge the received values with OPERA Cloud values. If not received, do not remove the values from OPERA Cloud.</p> <p>N = Ignore the features received. Do not touch the values in OPERA Cloud.</p>	Set Accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPDATE FIXED CHARGES	A B C D N	-> Direction: Data from external system to OPERA Cloud  This parameter determines how the fixed charges received from the external system update the fixed charges in OPERA Cloud reservation. A = If received, replace OPERA Cloud values with the received values. If not received, remove the values from OPERA Cloud. B = If received, replace OPERA Cloud values with the received values. If not received, do not remove the values from OPERA Cloud. C = If received, merge the received values with OPERA Cloud values. If not received, remove the values from OPERA Cloud. D = If received, merge the received values with OPERA Cloud values. If not received, do not remove the values from OPERA Cloud. N = Ignore the fixed charges received. Do not touch the values in OPERA Cloud.	Set Accordingly.

		<p>identified by the lowest OPERA Cloud confirmation number.</p> <p><b>b.</b> If changes to the membership details are sent by the external system, this will only be applied to the primary sharer reservation and profile. For data from OPERA Cloud to an external system, OXI will only send changes to non-inventory fields if these changes have occurred on the Primary Sharer, the reservation with the lowest OPERA Cloud confirmation number.</p>	
		<p>If this parameter is set to N, OXI will reject any changes to shared reservations in OPERA Cloud.</p>	

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

<b>Parameter Name</b>	<b>Parameter Value</b>	<b>Direction of transmission where parameter applies. Parameter Description</b>	<b>Recommended Setting</b>
UPDATE TRANSPORTATION COMMENTS	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter setting will determine if the transportation comments in OPERA Cloud reservation should be modified or not.</p> <p>If the value is set to 'Y' the transportation comments in OPERA Cloud reservation will be updated or deleted based on the existence of transportation comments in the received message.</p> <p>If the value is set to 'N' the transportation comments in OPERA Cloud reservation will not be modified in anyway irrespective of the transportation comments existence in the received message.</p>	Set Accordingly.

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPL DED RES ONLY	Y/N	-> Direction: Data from external system to OPERA Cloud. If set to Y, only deductible reservations will be sent to the external system. In a reservation this is determined by the reservation type and means that only reservations with deductible reservation types would be sent. This is desirable if the external system does not have a concept of tentative and definite reservations and would regard all bookings equally deductible regardless of their status. Set to N if all reservations should be sent to the external system irrespective of the reservation type.	Set to 'N' if external system handles deductible and non-deductible reservations. Otherwise set to Y.
USE GUEST STATUS NOTIFICATION EXTENSION YN	Y/N	-> Direction: Data from OPERA Cloud to External Systems. When set to Y, the HTNG function "GuestStatusNotificationExt" will be used to upload reservation data to the external system. When set to N, the HTNG function "GuestStatusNotification" will be used to upload reservation data.	

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPDATE ALERTS		<p data-bbox="881 485 1105 594">-&gt; Direction: Data from external system to OPERA Cloud</p> <p data-bbox="881 611 1105 804">This parameter determines how the Reservation Alerts received from the external system will get processed in OPERA Cloud.</p> <ul data-bbox="881 810 1105 1906" style="list-style-type: none"> <li data-bbox="881 810 1105 1062">• A = If received, replace OPERA Cloud values with the received values. If not received, remove the values from OPERA Cloud.</li> <li data-bbox="881 1598 1105 1850">• D = If received, merge the received values with OPERA Cloud values. If not received, do not remove the values from OPERA Cloud</li> <li data-bbox="881 1860 1105 1906">• N = Ignore the Reservation</li> </ul>	

**Table 27-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
AUTO ATTACH ELEMENTS	Y/N	Alerts received. Do not touch the values in OPERA Cloud.  Direction: Data from external systems to OPERA Cloud. If this parameter is set to 'Y', OXI auto attaches the reservation elements based on the auto attach element configuration rules. If the parameter is set to 'N', OXI does not auto attach the reservation elements.	Default value is Y. Set accordingly.

## Reservation Defaults for OXI

The following are recommended Default Settings for Reservations.

**Table 27-11 Reservation Defaults for OXI and it's Description**

Reservation Defaults	Description
Room Type	Select a room type that is readily available with high inventory
Rate Code	Select a rate code that has all of the configured room types for the property. Since rates can be subject to restrictions, either close the rate or room types depending on hotel occupancy, recommendation is to make a OXI Default rate code and insert this value.

**Table 27-11 (Cont.) Reservation Defaults for OXI and it's Description**

Reservation Defaults	Description
Setup of the Default Rate	<ul style="list-style-type: none"> <li>• This rate code is to be setup with all viable room types and a single rate detail, at \$0.00, that has all room types linked to it. If proper revenue/ADR is a factor set a rate amount instead.</li> <li>• This rate code should not be subject to restrictions as other rates are. This can decrease the amount of reservations that are rejected by OPERA Cloud.</li> </ul> <p>Points to be considered:</p> <ul style="list-style-type: none"> <li>• If certain CRS booked reservations are allowed into rates that are flagged restricted or out of inventory on the hotel side, this default is used to allow that booking in. Warnings in OXI alerts hotel users that the reservation was inserted, the rate was not available and the default was taken instead. Thus allowing the hotel to adjust the booking accordingly.</li> <li>• This default maximizes the hotel's efficiency regarding having all bookings in the hotel system. Limiting the scenario of missing reservations, due to closeouts that OXI cannot bypass.</li> <li>• This default lessens the hotel's need to monitor OXI interface on a rigorous schedule.</li> <li>• To make it easier to see these types of defaults being used within the OPERA Cloud PMS, recommendation is the use OXI parameter WARNING AS TRACES = Y.               <ul style="list-style-type: none"> <li>– This setting is highly recommended. Although OXI offers a warnings report, if system users do not have permission to be in the OXI to run the report then this is an alternate solution. Excellent choice for the smaller hotels with fewer resources in the evenings when Reservations Department has left for the day.</li> <li>– OXI enters only mandatory warnings generated into Traces. A Trace lamp is lit on the reservation when viewed.</li> <li>– This parameter also requires that the Others default field <b>Trace Warning</b> is set to a monitoring department; that can be either Front Office or Reservations.</li> </ul> </li> <li>• OPERA Cloud also offers a Trace Report. Which allows a full overview of all reservations where Traces are created.</li> </ul>
Currency	<p>OPERA Cloud property currency code that should be used as default for a reservation in case no currency code is sent or the code cannot be converted.</p>
Market Code	<p>Select the standard market code that should be used in case conversion is not possible, or if the associated block code/rate code for the reservation do not contain a market code. This is in direct relation to the OXI_RESERVATIONS parameter EXT SYS MARKET/SOURCE CONTROL.</p>

**Table 27-11 (Cont.) Reservation Defaults for OXI and it's Description**

<b>Reservation Defaults</b>	<b>Description</b>
Source Code	Select the standard source code that should be used in case conversion is not possible, or if the associated block code/rate code for the reservation do not contain a source code. This is in direct relation to the OXI_RESERVATIONS parameter EXT SYS MARKET/SOURCE CONTROL.
Reservation Type	The reservation type in OPERA Cloud determines whether the booking is deductible from inventory or not. Select your default according to your needs and we highly recommend maintaining proper conversion for this data element as well.
Payment Method	This is the default payment method used by OXI for a reservation in case no payment method is sent or conversion fails. We highly recommend to select this default carefully and to maintain proper conversion for this data element as well.
Discount Reason	Select a default discount reason that OXI can apply in case the external system rate overwrites the OPERA Cloud rate code amount and a discount amount is entered into the reservation in OPERA Cloud. This is only needed if the OPERA Cloud function FIXED RATES is NOT used. <ul style="list-style-type: none"> <li>• Select other defaults according to your needs.</li> <li>• The external system defaults can be set in case no conversion occurs on external system level.</li> </ul>
Conf. Letter Name	The default letter name to be used in the Confirmation field on the PMS reservation screen. For hotels that do not want to use this functionality the field would be left blank.

# Message Status

Use Message Status to view the status of received and transmitted OXI messages. All errors and warnings that occur during message processing are visible and traceable here. You can then reprocess any failed messages after configuration issues are corrected.

**Note:**

25 messages are displayed per page in the search result , use page navigation to review all messages in search result.

The status of a sent message from OXI are:

- **FAILED:** The message has failed in the external system during upload. The exact reasons depend on the specific system and can be reviewed in Errors and Warnings
- **NEW:** Used for a membership points lookup request to OPERA Cloud Loyalty to retrieve a profile's membership points. This status indicates that a STAY XML message has been built, but the membership points lookup operation has not yet been completed. The Module for this message is "STAY" and the Action Type is "POINTS REQUEST."
- **PROCESSED:** Simply notifies that the message was processed by OXI. It has still not been delivered by the service, at which time it would turn into SUCCESS.
- **REJECT:** Shown in case OXI rejects the message from upload since vital data is missing or the upload file cannot be built.
- **RESULT FAILED:** The external system has sent a result for this message and has informed that the message was unsuccessful on external system side. The exact reasons depend on the specific system and can be reviewed in Errors and Warnings.
- **RESULT SUCCESS :** The external system has sent a result for this message and has informed that the message was successfully updated on external system side.
- **SUCCESS:** Message has been delivered to the external system by the OXI service
- **WARNING:** The message has been processed successfully but still created a mandatory warning that needs to be reviewed in Errors and Warnings

## Messages From the External System

**Note:**

Click **Refresh** to refresh the results and see updated status of message(s). Click **Show/Hide Timestamps** to display additional columns indicating the processing times.

### Reprocess Messages

1. From the Side menu, select **Exchange**, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Select one or more messages in the search result.
4. Click **Reprocess**.
  - a. Click **Yes** to confirm.

### Reprocess All Messages

Users with the Reprocess All user task granted to their role(s) can perform this action.

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Click **Reprocess All**.

### Marking Messages as Reviewed

Mark a message as reviewed after you have verified an error or warning. Messages will be marked as reviewed and disappear from the search result.

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Select one or more messages in the search result.
4. Click **Mark As Reviewed**.
5. Messages are removed from the search result.

### Hide Reviewed Messages

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Click **Hide Reviewed**.

### Show Reviewed Messages

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Click **Show Reviewed**.
4. Reviewed messages are displayed in the result with a background shading

### Marking Messages as Un-reviewed

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.

2. Enter search criteria then click **Search**.
3. Select one or more messages in the search result.
4. Click **Mark As Un-reviewed**.

#### Deleting Messages

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Select one or more messages in the search result
4. Click **Delete**.
5. Click **Delete** to confirm.

#### Viewing Errors & Warnings

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Select a message in the search result, then click the vertical ellipsis **Actions** menu and select **Errors & Warnings**.
4. The Error Code, Error Description and Error Type captured for the message is displayed.
5. Click **OK**.

#### View Message

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Select a message in the search result.
4. Click the vertical ellipsis and select **View**.

#### Download Message

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**
3. Select a message in the search result.
4. Click the vertical ellipsis and select **Download**.

## Messages To External System

**Note:**

Click **Refresh** to refresh the results and see updated status of message(s).  
Click **Show/Hide Timestamps** to display additional columns indicating the processing times.

### Reprocess Messages

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Select one or more messages in the search result.
4. Click **Reprocess**.
  - a. Click **Yes** to confirm.

### Reprocess All Messages

Users with the Reprocess All user task granted to their role(s) can perform this action.

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Click **Reprocess All**.

### Marking Messages as Reviewed

Mark a message as reviewed after you have verified an error or warning. Messages will be marked as reviewed and disappear from the search result.

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Select one or more messages in the search result.
4. Click **Mark As Reviewed**.
5. Messages are removed from the search result.

### Hide Reviewed Messages

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Click **Hide Reviewed**.

### Show Reviewed Messages

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Click **Show Reviewed**.

4. Reviewed messages are displayed in the result with a background shading

#### Marking Messages as Un-reviewed

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Select one or more messages in the search result.
4. Click **Mark As Un-reviewed**.

#### Deleting Messages

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Select one or more messages in the search result.
4. Click **Delete**.
5. Click **Delete** to confirm.

#### Viewing Errors & Warnings

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Select a message in the search result, then click the vertical ellipsis **Actions** menu and select **Errors & Warnings**.
4. The Error Code, Error Description and Error Type captured for the message is displayed.
5. Click **OK**.

#### View Message

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Select a message in the search result.
4. Click the vertical ellipsis and select **View**.

#### Download Message

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**
3. Select a message in the search result.
4. Click the vertical ellipsis and select **Download**.

# Interface Resync

The Interface Resync option can be run individually and in no particular sequence at any time to resync specific data to the external system. One reason for this could be to send all reservations that have not received an external system number during the original transmission. It is recommended that reservations only be resynced once it is certain that the respective rate codes, blocks, and profiles have been built in the external system.

The following are some recommendations:

- Resynchronization for large periods of time during peak work hours is not recommended.
- Resynchronization should be done in the late to early morning hours where Night Management or Night Audit can run them without compromising system performance.
- Resynchronization can be done during the day, however keep in mind that:
  - Smaller time frames are preferable to larger ones.
  - Choose the necessary records to resync over hundreds of records at a time.

## Resynchronization History

For any resync that is executed a record is created in the Resync History screen. This history record assists you in keeping track of all resyncs done and what their status is/was. The Remarks column shows the text for records found and processed. When the remarks are populated with (-1) then 1 or more messages failed to be sent to the External System successfully.

How to utilize history and find unsuccessful records:

- Finding resync messages that did not make it, check and note the Start Date and Start Time.
  - Go to Message Status. Messages to External System.
  - Use the Search Filters to narrow down the messages you are looking for; Populate Module type (i.e. Reservation, Profile, etc.), Created From and Created To for the day of business and Message Type value.
1. From the **OPERA Cloud Exchange** menu, select **Interface Resync** and then select **Resynchronization History** from the drop down list.
  2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
  3. Click **Resync History** on any of the resync modules. In the Resync History pop-up window, you can see the Resync Module that was used.

The following details appear in the pop-up:

- **Status** is the resync status. The status options that you can see are:
  - **New**: Resync has just started.
  - **RUNNING**: Resync is currently being processed.

- **COMPLETED:** Resync is complete and reservations are sent to external system if resync filters have found any records.
- **Start Time** and **End Time:** The time stamps showing full span of time to for the resync to process.
- **PURGE:** Manual deletion of all resync history. Only resyncs that have not been completed yet will be excluded from the deletion. A warning occurs that has to be confirmed before the purge is performed.
- **REFRESH:** To see the latest status of all resync activities.

## Interface Resync - Blocks

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Blocks**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. Search and select Block Codes. You can select multiple codes.
4. Enter a Period. **From Start Date**, select the first restriction start date for the resync. **To Date**, select the last restriction start date for the resync.
5. Select **All Active Records** check box. Select if no other conditions are to be met except resyncing active records.
6. Select the **Unconverted Blocks** check box.
7. Select the **Include Pickup Counts** check box. Select only if the external system requires the pickup counts within the block message. This would be the case if you were resyncing a block without resyncing all its reservations afterwards. For initial cutover resync we do not recommend including the pickup counts, as reservations may be subsequently resynced and this automatically updates the pickup count in the blocks.
8. Select the **Include Cancelled Blocks** check box. This could be needed for initial cutover resyncs where both systems should have all blocks including the cancelled ones, in case these may be reinstated.
9. Click **Resync History**. Click this button to view when the resync option had last been executed and its status. This shows all resync options that have been executed.
10. Click **Resync**. Click this button to start the resync process. This executes the resync according to the filters you have set.

## Interface Resync - Turnaways

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Turnaways**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. From the Turnaways to Resynchronize, select the **Turnaways**. Select all or part of a turnaway code to be resynced.

4. For Turnaways Filter Conditions, enter the **Rate Code Like**, enter all or part of a rate code to be resynced. Search and select the **Room Type**.
5. Click **Resync** or **Resync History**.

## Interface Resync - Datamart

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Datamart**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Datamart to Resynchronize panel, select **From Start Date** and **To Start Date**.
4. From the **Type** drop down list, select the type of Datamart option.
5. Click **Resync** or **Resync History**.

## Interface Resync - Events

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Datamart**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Events to Resynchronize panel, for Booking Arrival Date, select a **From Date** and **To Date**.
4. Enter the **Block Codes Like** field and select or unselect **Include Cancelled Events** check box.
5. Click **Resync** or **Resync History**.

## Interface Resync - Function Space

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Function Space**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Function Space to Resynchronize panel, search and select the **Function Space**. You can select multiple spaces.
4. Click **Resync** or **Resync History**.

## Interface Resync - Inventory

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Inventory**, from the drop down list.

2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Inventories to Resynchronize panel, select the **Room Type** and **Room Class**. A multi-select list of configured room types and room classes opens when you select this option.
4. Select a Period, **From Start Date** and **To Start Date**.
5. You can select between an **Overbooking** or **Out Of Order** resync by checking one of the radio buttons. When you select Out Of Order, the Room Class option is removed from the screen.
6. Click **Resync** or **Resync History**.

## Interface Resync - Products

This synch is only available from ORS to OPERA Cloud PMS.

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Products**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Products to Resynchronize panel, select **From Start Date** and **To Start Date** for the resync.
4. Select **Products**. This option is to find only Packages that are not linked to groups. This option is usually the most desired for Resync choice and is the default upon entering this screen.
5. Select **Groups**. This option is to find only Packages that are linked to groups.
6. Search and select the **Product Codes**.
7. Click **Resync** or **Resync History**.

## Interface Resync - Profiles

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Profiles**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Profiles to Resynchronize panel, search and select the **Profile Types**.
4. Enter the **Date Type**. Use this menu to select a date type for the resync process. The options contained within this field are Updated Date that is used to resync profiles that have been modified within the selected From/To dates entered. Created Date is used to resync profiles that were created within the parameters of the From/To dates entered.
5. Enter the **From Name**, the specific name of the profile to be resynced. Enter **To Name**, type the specific name of the profile to be resynced. The query takes all names BETWEEN the letters in From Name and To Name. Sample:

Example: If you have typed 'A' into "From Name" and 'G' into "To Name". That means GA would not be taken into account anymore and the resync would only include the latest name with F such as, FZ.

6. Select to resync **Profiles for Active Reservations** . Selecting this option sends only profiles that are attached to active reservations.
7. Select to resync **Profiles For Active Blocks**. Selecting this option sends only profiles that are attached to active blocks.
8. Select to resync **Profiles For Active Reservation and Block**. Selecting this option sends profiles that are attached to active reservations and blocks.
9. Select to resync **Profiles with Membership**.
10. Select to resync **Profiles with Primary Membership**.
11. Select to resync **Profiles with Negotiated Rate**.
12. Select to resync **All**. Selecting this option resyncs all profiles, regardless whether they are linked to active reservations and blocks or not.

 **Note:**

Select the proper Profile Code for your resync to minimize the data flow, as the hotel could have a huge profile database that can lead to a very long resync process.

13. Click **Resync** or **Resync History**.

## Interface Resync - Promotions

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Promotions**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Promotions to Resynchronize panel, select **Limited Use Promotion** check box.
4. Search and select **Promotions**.
5. Click **Resync** or **Resync History**.

## Interface Resync - Rates

You have to select either a date range or check the rate codes in order to resync rates. A 'Total Count' of all active Rate Codes during the time frame entered will be displayed. User has the option to choose each rate code or all if necessary for resync to an external system.

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Rates**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.

3. In the Rates to Resynchronize panel, enter the **From Start Date**. You must select the first rate code start date for the resync. Only rate codes valid for this date are to be shown.
4. Enter **To Start Date**. You must select the last rate code start date for the resync. Only rate codes valid for this date are to be shown.
5. Search and select **Rates**. Shows how many active rate codes you have in the OPERA Cloud database. Once you have selected a date range the count is adjusted to match the number of rate codes that fall into your selected date range.
6. Click **Resync** or **Resync History**.

## Interface Resync - Reservation

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Reservation**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. Enter a Period **Date Type**. Choose from the option **Arrival Date**, **Created Date**, and **Updated Date**. Enter a **From Date**, this date specifies the first arrival date for the reservation resync. Enter **To Date**, this date specifies the last arrival date for the reservation resync.
4. Enter the External System Reference **From**. This specifies an external system confirmation number to resync. You can enter a single number or multiple numbers separated by comma.
5. Enter the External System Number **To**. This specifies the external system confirmation in case you want to specify a range from number/to number.
6. Enter OPERA Cloud Reference Number **From**. This specifies an OPERA Cloud confirmation number to resync. You can enter a single number or multiple numbers separated by comma. Enter OPERA Cloud Reference Number **To** that specify the OPERA Cloud confirmation in case you want to specify a range from number/to number.
7. Select the **All** check box. Select this option if no other conditions are to be met except resynching active records.
8. Select **Include Cancels** check box. Select this option to include the cancels in your resync.
9. Select **Include Checked In** check box. Select this option to include the checked-in guests in your resync.
10. Select **Include No Shows** check box. Select this option to include no shows in your resync.
11. Select the **No External Confirmation** check box. Select this option to resync only reservations without external system confirmation number. If this is unchecked, all reservations will be resynced.
12. Click **Resync** or **Resync History**.

## Interface Resync - Restrictions

You have to select a date range in order to resync rate restrictions. An example of Block Restrictions from OPERA Cloud PMS to ORS.OXI can now send restrictions created from OPERA Cloud Blocks application. These restrictions set on the blocks can also be resynced through the Restrictions resync, by selecting the option for Date Ranges and setting Blocks. The resync offers a multi-pick list of blocks that may have restrictions set on them for selection. For Block Restrictions to work Business Events in OPERA Cloud have to be set.

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Restrictions**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Restrictions to Resynchronize panel, search and select the **Block Codes**. Select a specific block code or a starting letter following by a % in order to filter your search.
4. Enter a **From Date**. Select the first restriction start date for the resync.
5. Enter a **To Date**. Select the last restriction start date for the resync.
6. Select the **All Restrictions** option. Select this restriction for all existing restriction types to be sent to external system.
7. Select **Rate Restriction** option. Select this restriction for rate restrictions to be sent to external system. The search and select Block Code is disabled if this option is selected.
8. Select the **Block Code** option.
9. Click **Resync** or **Resync History**.

## Interface Resync - Stay

Stay files can be created for some interfaces after the guest has checked out and the OPERA Cloud night audit has run.

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Stay**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In Stay to Resynchronize panel, enter a **From Departure Date**. Select the first restriction start date for the resync. Enter **To Departure Date**. Select the last restriction start date for the resync.
4. Enter the **First Name**, type the specific first name of guest whose stay data shall be resynced. Enter the **Last Name**, type the specific last name of guest whose stay data will be resynced.
5. Click **Resync** or **Resync History**.

## Interface Resync - Hurdles

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Hurdles**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.

3. In the Hurdles to Resynchronize panel, select a date for **Hurdles From** and **Hurdles To**. These dates range helps to resync hurdles.

## Interface Resync - Inventory Items

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Inventory Items**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Inventory Items to Resynchronize panel, select the **Inventory Items From** and **Inventory Items To**.

# Part VII

## OPERA Cloud Terminology

# OPERA Cloud Terminology A-Z

Table 30-1 Terminology

Term	Description
<b>Accompanying Guest</b>	Secondary guests who are added to the reservation. Eligible accompanying guests can have a separate registration card printed. Eligibility is determined by the value set in the <b>Age Threshold to Print Registration Card</b> application setting.
<b>Advance Check In</b>	The ability to flag one or more arrival reservations as Advance Checked In reservations. Note: Pseudo room reservations cannot be flagged for Advance Check In.
<b>Advance Checked In</b>	One or more reservations that have been flagged as Advance Checked In reservations but not checked in to the property.
<b>Additional Rooms</b>	This is a multi-select field to choose rooms to include in the key creation with the reservation room. This field is available when the property interface configuration for the active DLS (Door Lock System) has the check box active for <b>Allow Multiple Room Selection for Keys</b> . You can customize the <b>Additional Rooms</b> field on the Create Key screen to populate the field with the room numbers that were selected when the new key was created for that reservation and room number. This applies to duplicate keys (when Previous Keys Made > 0). Without this customization, the field does not populate with the additional room numbers for which the key was created.
<b>Auto Advance Check In</b>	Automatically checks in Advance Checked In reservations when the housekeeping room status of the reservation matches the housekeeping room status defined in the Room Status for <b>Auto Check In of Advance Checked In Reservations</b> OPERA Control setting.
<b>Billing Window</b>	Billing windows are used to assign more than one payee to one reservation or to separate posted transactions using configured routing instructions. A reservation can have up to eight billing windows and each window can be assigned to a different payment method and a different payee.
<b>Business Date</b>	The OPERA property business date.
<b>Credit</b>	If the payment or deposit amount is greater than the posted charges on a billing window, a Credit balance remains. This balance is settled with the Automatic Folio Settlement functionality if the <b>Include Credit Balances</b> check box is selected.
<b>Duplicate Key</b>	A duplicate key is the exact copy of the original, including for Valid Start Date / Valid Start Time and Valid Until Date / Valid Until Time. If this information is modified, then the Key defaults to New. When <b>Previous Keys Made</b> is one or more, then the default is Duplicate Key instead of New Key type. This is editable in the Create Keys screen. When <b>Duplicate Key</b> is the Key Type and changes are made to Additional Rooms, Key Options, Valid Until Date and Valid Until Time, or Valid Start Date and Valid Start Time, the key type switches to a New Key type since a duplicate key is no longer an exact copy of a previous key made when these options are altered.

Table 30-1 (Cont.) Terminology

Term	Description
<b>ETA</b>	The guest's Expected Time of Arrival (Arrival Time) for their reservation. After the reservation is Advance Checked In, the Expected Time of Arrival (ETA) for the reservation is updated with the time the reservation was flagged as Advance Checked In. After the reservation is Advance Checked In, the Arrival Date is changed to read-only and cannot be modified.
<b>ETR</b>	The Expected Time of Return (ETR) and/or an Expected Time of Return Comment on reservations. In the Advance Checked In screen reservations can be sorted by ETR options when an ETR is provided. For ETR options, the Expected Time of Return (ETR) parameter must be On.
<b>Folio</b>	Master bill containing all posted transactions including charges, payments and deposits (if any).
<b>Key Machine Locations</b>	The Key Encoders available for use. By default, OPERA remembers the last location used. You can select a different key encoder.
<b>Key Options</b>	Defines key access to specific areas of the property. The default is key options associated at the room level configuration, such as access to the Parking Garage, the elevator, the pool area.
<b>Key Type</b>	When <b>Previous Keys Made</b> is one or more, then the default is Duplicate Key instead of New Key type. This is editable in the Create Keys screen. When <b>Duplicate Key</b> is the Key Type and changes are made to Additional Rooms, Key Options, Valid Until Date and Valid Until Time, or Valid Start Date and Valid Start Time, the key type switches to a New Key type since a Duplicate Key is no longer an exact copy of a previous key made when these options are altered. When the Key screen is accessed with the Mass Check In, the key type New or Duplicate is not available. Only when the individual Create Key screen is displayed is the key type available and defaults according to whether previous keys were made.
<b>Mass Advance Check In</b>	The option to Advance Check In multiple reservations when the arrival date of the reservations is the current business date of the property.
<b>Mass Check In</b>	Mass Check In functionality provides one easy process to check in multiple reservations for arrivals due in on the property's current business date, and to (optionally) generate their room keys and registration cards. Mass Check In can be used for individuals or blocks within the property. If logged in to a hub, you can Mass Check In individual and/or block reservations one property at a time for each property you have access to, without having to log in and out of each one.
<b>Number of Keys</b>	Default is <b>Per Adult On Reservation</b> to create the same number of keys as the number of adults on the reservation. Use the <b>Per Reservation</b> option to set any number of keys for the reservation.

Table 30-1 (Cont.) Terminology

Term	Description
<b>Override Associated Key Options</b>	<p>Overrides the key options in the Room Keys panel (when multiple reservations are selected for key creation). Key options can be modified or added on the individual reservations Create Key screen as you proceed through the key creation process.</p> <ul style="list-style-type: none"> <li>When deselected (default), the selections added in the <b>Key Options</b> field are appended to existing key options at the room level for the room keys for each of the selected reservations for key creation. For example, you are creating keys for several reservations and the room configuration of the assigned rooms have Garage in the associated <b>Key Option</b> field. In the Room Keys screen, you also select the Lounge key option, and then process the key creation. In the Create Keys screen, both Garage and Lounge key options appear for each reservation.</li> <li>When selected, the selections added or removed in the <b>Key Options</b> field override all existing key options at the room level for the room keys for each of the selected reservations for key creation. For example, you are creating keys for several reservations and the room configuration of the assigned rooms have Garage in the associated <b>Key Option</b> field. In the Room Keys screen, you select the Lounge key option, and then process the key creation. In the Create Keys screen, the Garage key option is overridden and only the Lounge key option appears for each reservation.</li> </ul>
<b>Pre-Arrival Reservation</b>	A reservation with an Arrival date >1 day prior to the OPERA property business date.
<b>Previous Keys Made</b>	In the Create Keys screen, this is the number of keys since the last new key previously created for this specific reservation and room. If the <b>Additional Rooms</b> field on the Create Keys screen is customized with PreviousKeyAdditionalRooms, the <b>Additional Rooms</b> field populates with the additional room numbers if the previous key made had additional rooms selected when created. When <b>Previous Keys Made</b> is equal to or greater than 1, then this defaults to Duplicate Key instead of New Key (this is editable.) When Duplicate Key is the default key type and changes are made to Additional Rooms, Key Options, Valid Until Date and Valid Until Time, and/or Valid Start Date and Valid Start Time, the key type switches to New Key because it is not considered a duplicate key of a previous key made when these options are altered. A duplicate key is the exact copy of the original, including the options set in the original key creation. When the reservation is checked out, the Previous Keys Made count resets to zero.
<b>Primary Guest</b>	The guest name under which the reservation is booked. The primary guest's name appears at the top of the list in the Select Guests panel on the Registration Card screen.
<b>Settlement</b>	The process of obtaining payment for a guest's bill.
<b>Suppress Key Success Message</b>	When this option is selected, the key success message does not display. Instead, the process continues to the Create Key screen for next reservation. If the request to the DLS (Door Lock System) fails, then the failure notification appears with the option to retry the key creation.
<b>System Date/Time</b>	Operating System date/time.
<b>Valid Start Date</b>	Displays when the <b>Send Valid Start Date/Time</b> check box is active in the DLS property interface configuration. Refer to the <i>Enhanced Room Key Generation Validation Rules by Process</i> topic for more information.

**Table 30-1 (Cont.) Terminology**

<b>Term</b>	<b>Description</b>
<b>Valid Start Time</b>	Displays when the <b>Send Valid Start Date/Time</b> check box is active in the DLS property interface configuration. Refer to the <i>Enhanced Room Key Generation Validation Rules by Process</i> topic for more information.
<b>Valid Until Date</b>	Defaults to the reservation departure date or to the added days if the OPERA Controls setting <b>Key Expiry Days</b> is set. Refer to the <i>Enhanced Room Key Generation Validation Rules by Process</i> topic for more information.
<b>Valid Until Time</b>	Defaults with the time that is chosen in the <b>Default Keys Expiry Time</b> setting. This can be the reservation ETD (Expected Time of Departure) or the time in the <b>Key Expiry Time</b> setting. Refer to the <i>Enhanced Room Key Generation Validation Rules by Process</i> topic for more information.

# Using Keyboard Shortcuts

00:06

In Opera Cloud you can open menus and actions using

00:10

keyboard shortcuts. You can access keyboard shortcuts from

00:14

many screens including the profile presentation,

00:17

the look to book sales screen, and the 'I want to' menus.

00:21

Let's get started. In this example, first I will go to the Look to Book sales

00:26

screen. Go to bookings, select reservations, and then select the

00:31

Look to Book sales screen. Select new reservation.

00:38

To view the keyboard shortcuts press the ctrl key on your keyboard.

00:43

Then the shortcut key combinations appear on the screen

00:46

next to the field or action. You can press the respective keys to open the

00:50

menu or action. In this example, I go back to the Opera

00:55

Cloud dashboard and click the arrivals tile to go to the

00:58

list of arrival reservations. Next, I click the confirmation number to

01:04

go to the reservation. Now on the reservation I click the

01:08

control key and the keyboard shortcuts appear next to the actions.

---

01:12

In this example, I press dc on the keyboard to jump to the deposit

01:16

cancellation section. Next I can press the ctrl key to display

01:21

the shortcuts, and then I select the I key to open the

01:24

'I want to' menu. Press the ctrl key again to display the

01:28

keyboard shortcuts for the actions on the I want to menu. Now, I can see the

01:33

keyboard shortcuts for the actions.

# View Property Brochure From Quick Launch

00:05

You can add the property brochure to the quick launch menu for easy access. Click

00:10

the quick launch icon, then click manage Quick Links. Now you can add bookmarks to

00:16

the quick launch menu. In this example I enter property brochure and then click

00:21

go to search for the available Quick Links. Select property brochure and then

00:26

click the right arrow to add it to the selected column. Click Save. To confirm

00:31

the property brochure is added to the quick launch menu click manage Quick

00:35

Links. Click the plus sign to expand and you can see the property brochure is

00:39

listed. Click Save. Now you can click to go to the property brochures screen. Here

00:45

you can see I am logged into a chain. I must enter or select a property name

00:50

from the list. Then click select.

00:57

Then click search.

01:01

Now you can scroll down to find all the information for the property brochure.

01:10

You can view the additional property information by clicking the plus icon to

01:14

expand each selection. You could view airport information, alternate properties,

01:19

amenities, additional details, dining and retail information.

---

01:32

You can search for directions using Google Maps and view event space details.

01:37

You can view general notes, browse local attractions, view a property map, and see

01:43

the events calendar.

01:56

You can click an event to view more details.

02:03

You can see property images, a site plan and transportation companies, complete

# Using Quick Launch

00:06

In this video you will learn how to create quick links

00:08

to OPERA cloud menus and add links to external websites on

00:12

the quick launch menu. To open the quick launch menu click the

00:16

rocket icon on the top navigation. Or click F2 on your keyboard.

00:22

Next, click manage quick links. Now I can find the available OPERA cloud

00:28

menus by entering keywords. In this example, I enter run reports and

00:34

click go. Next select the menu,

00:38

then click the right arrow to add the link to the quick links menu.

00:42

If you have multiple quick links to add, click the double arrows.

00:47

Next, click save. Now the quick link appears in my bookmarks list

00:52

including the shortcut keys to open the run reports menu.

00:56

I can click that link to go directly to the run reports screen.

01:00

Or to open the run reports menu anytime select the shift and the r and p keys.

01:07

To add links to external websites that you access frequently

01:10

click manage custom links. Here, I can add a name for the link.

---

01:15

Enter the website address and click add. To delete a URL click the vertical

01:20

ellipsis menu and select delete. Now, to launch the website

01:25

press F2 from anywhere in the OPERA cloud application,

01:28

and then click the keyboard shortcut displayed shift plus one.

# Add Dashboard Tiles

00:06

In this video, you will learn how to add a page and tiles to the OPERA Cloud dashboard.

00:11

Let's get started.

00:12

On the OPERA Cloud dashboard, you can click to add page.

00:17

In this example, I am logged in to a property and I selected the Housekeeping page.

00:22

Next, I click Add New Tiles.

00:25

Next to each tile, I enter the number of tiles to add.

00:30

In this example, I add 1 tile for departures, queue reservations, room status, and 1

00:37

task sheet tile.

00:39

And then I click add to dashboard.

00:41

Now, I can drag and drop to re-arrange the tiles.

00:45

I can hover over a tile, and select the gear icon to configure the options.

00:50

Or I can select the X to remove the tile.

00:53

Each tile contains a snapshot of data for the property, you can click to view the results.

00:58

In this example, I click the task sheet dashboard tile to view and manage the task sheets for

01:03

the property.

---

# Customize the User Interface Using Page Composer

00:06

You can customize the OPERA Cloud user interface using Page Composer.

00:10

If you have the Customize Chain or Customize Property task assigned to your role then you

00:14

can re-arrange fields and add or delete fields on any panel with a gear icon.

00:19

Let's get started.

00:20

First, to turn on customization, in OPERA Cloud click the side menu and then click Settings.

00:27

Now I can choose the option to customize, at the chain or the property level.

00:32

In this example, I select to turn on property customization.

00:35

Then click Save.

00:37

Now, I see the customizing mode notification appears next to the OPERA Cloud user name

00:42

on the menu bar.

00:44

Now I can customize any panel with the gear icon.

00:47

In this example, I will customize the overview panel on the reservation, by adding a custom

00:52

field that saves a voucher number to the reservation.

00:54

---

I will make this field required for reservations with the VFREE rate code.

00:59

I will also add a link to open an external voucher tracking website.

01:02

To find the reservation, I go to Bookings, click Reservations and then click Manage Reservation.

01:10

Now, click the I want to menu and then click the confirmation number or guest name to open

01:15

a recently viewed reservation.

01:17

On the reservation overview, click the gear icon, and then click Add Field.

01:22

Go to the bottom of the list to select Flex Field, and then select Add Text.

01:27

Now, to define the properties of the custom field, I select Yes to display the field on

01:33

the screen.

01:34

Then, I select No from the read-only drop-down list, to make this field updateable.

01:39

Next, I select Custom from the required drop down list and then click the code bracket.

01:45

I enter the expression language code, to return "TRUE" only when the reservation rate code

01:50

equals "VFREE" and then click Evaluate.

01:53

Next, I'll click Apply.

01:55

Now, this Flex field is mandatory for reservations with the VFREE rate code.

02:00

Next, I change the field label to "voucher number" and then click save.

02:06

I can click the pencil icon to edit or verify the customization saved.

---

02:10

Next, to add a link, I click Add Field, go to the bottom of the list and select Flex Field, and then

02:17

click Add Link.

02:18

Now, I can change the text description for the field to voucher tracking.

02:23

Then, in the destination field, I enter the URL for the external website.

02:28

I select the checkbox to launch the URL in a New browser tab.

02:33

And then click Save.

02:36

Next, click Close customize.

02:37

Now, I see the voucher number and the voucher tracking link I just created.

02:42

To turn off the ability to customize, I click the side menu and then click settings.

02:48

Then I select off, and then click save.

02:51

Now, on the OPERA Cloud menu I see the customization notification is turned off.

02:57

Let's check the result of the customization.

02:59

To find the reservation, go to Bookings, select Reservations and then select manage reservation.

03:06

Click the I want to menu and then click the reservation confirmation number or name from

03:10

the list of recently viewed reservations.

03:13

---

Now, I see the Reservation Overview displays the new Voucher Number field and the Voucher

---

# Using the Performance Meter to Troubleshoot in OPERA Cloud

00:06

The performance meter tests the network, the workstation browser, and the OPERA cloud server

00:12

performance. Now let's run the performance test. Go to OPERA cloud and select the hamburger menu

00:18

and then click performance meter. To begin the performance test click start performance test.

00:25

When the performance test is complete the progress meter displays the results. If the results are not

00:30

optimal the recommended actions display. When a performance issue is caused by the network

00:36

or the browser performance contact your IT specialist. If there is an issue on any

00:41

of the OPERA cloud servers contact your system administrator and provide the generated result ID.

00:48

In this example, the performance test reported the system is optimized and no actions are needed.

# Create a Guest Profile

00:05

In OPERA cloud, a profile contains address and contact details, preferences,

00:10

and membership information for guests, companies, travel agents, sources, and groups. In this video,

00:17

you will learn how to create guest profiles. Let's get started. First, go to client relations,

00:23

select profiles, and then select manage profile. On the manage profiles screen, I can click the

00:28

link to create a guest profile or I can click the I want to menu and select the type of profile

00:34

I want to create. From the list, I can click the link to create a guest profile, company,

00:40

travel agent, source, group, or contact profile, or I can click and go to recently viewed profiles.

00:48

In this example, I click the option to create a guest profile.

00:54

I complete the mandatory fields and any optional fields on the create profile

00:58

screen. In this example, the name field is intended to be a last name or

01:02

family name. Now I enter a primary phone number.

01:10

I can click the vertical ellipsis to delete each communication method

01:13

or click add rows to add more communication methods to the profile.

01:18

On the address tab, I can click the new option to add more addresses to the profile,

---

01:22

or I can click to delete the address. Next I enter the primary address details.

01:38

Then I can click save or save profile and add more details.

01:42

In this example, I click to save the profile and add more details.

01:48

On the profile presentation,

01:50

I can see a list of links to quickly jump to each section of the profile.

01:54

I can also view the related profile notifications, billing information, and reservations.

02:02

I can edit the profile or I can add an image to the profile. In this example, I click edit

02:10

to add the required information to the profile details. I can click the gear icon to customize

02:15

or personalize the screen using page composer. The options displayed in the gear icon depend on your

02:21

user's permissions in role manager. Next, I'll click save. I can click new to add any additional

02:28

information to the profile including communication preferences, contact information, notes,

02:34

attachments, membership enrollments, or negotiated rates. The past and future stays section will

02:40

automatically display any reservations associated to this profile. Next, I click

02:45

the profile details link to jump to that section. I can select the I want to menu to merge profiles,

02:52

---

anonymize the profile, or to create a reservation, or an activity and attach it to the profile,

02:58

or I can view stay statistics or the changes log for this profile.

---

# View and Edit Sales Profiles

00:05

In this video, you will learn how to search for and edit profiles in OPERA cloud. Let's get

00:11

started. In OPERA cloud I go to client relations, profiles, and then I select manage profile.

00:19

On the manage profile screen, I can select the profile type from the view by

00:23

drop-down list to narrow the results. In this example, I select company from the list.

00:31

Next, I enter the company name Oracle.

00:34

I then click search. In the list of results, I can click the plus sign to view additional details.

00:43

Or I can click the arrow to access I want to menu for each profile. The I want to menu

00:48

contains a variety of tasks. For example, I can merge profiles, create a reservation,

00:55

block, or view activities, billing information, or view future and past reservations for the profile.

01:02

In this example, I will click the profile name to go to the profile. In the profile

01:08

overview section, I can click the vertical ellipsis to change or delete the profile image.

01:15

Or I can click edit to make changes to the profile details, communication methods,

01:20

or address information for the profile. Next, I'll click Save. In the left navigation,

01:26

---

I can click any of the links to jump to the profile section. In this example,

01:30

I click future and pass stays to jump to the reservations associated with this profile.

01:35

Here I can see the list of past reservations for this profile.

---

# Add an Alternate or an Incognito Name to a Profile

00:05

In this video you will learn how to add an alternate or an incognito name to a

00:10

guest profile. An incognito name adds a fictitious name to a profile and can be

00:15

used if a celebrity wants to be anonymous during their hotel stay. An

00:19

alternate name allows you to define an alternate name, title, language, or

00:25

salutation for the profile. In the OPERA Cloud application navigate to client

00:30

relations, profiles, and select manage profile. In this example, I will search

00:36

for a profile with the name test,

00:40

and then click search.

00:44

Select the profile from the list. On the profile presentation I can go

00:51

directly to the profile details section by clicking the link on the Left

00:54

navigation. Next I'll click Edit to make the changes. Below the name I can now see

01:02

the alternate name link and an icon with sunglasses and a hat representing the

01:07

incognito name. An alternate name provides the option to enter the guests

01:11

name in their national character set. In this example I add an alternate Japanese

01:16

---

name and click Save. Now the Japanese name will print on stationery including

01:21

the reservation confirmation or the registration card. Next I click the

01:25

incognito icon to add an incognito name and then click Save.

01:34

You must also click Save at the bottom of the profile details section.

01:42

Now I can click the alternate and incognito links to view the additional

01:46

names for this profile.

---

# Add Notes to a Profile

00:05

in this video you will learn how to add

00:08

notes to a profile and opera cloud let's

00:11

get started navigate to opera cloud

00:14

select client relations profile and then

00:18

select manage profile in this example I

00:21

select company from the view by

00:23

drop-down list I enter Oracle in the

00:26

name field and then click search from

00:29

the list of results I click the profile

00:31

name to open the profile presentation

00:33

page next to the notes details link I

00:36

see the number 1 indicating there is

00:38

already one note saved to this profile

00:40

then I click notes click new to enter a

00:44

new note I then select the type

---

00:47  
magnifying glass from the list of note

00:49  
types

00:50  
I select the reservation note type and

00:52  
click select I can edit any of the

00:55  
details I enter the note in the comment

00:57  
field and click Save on the note I can

01:00  
click the vertical ellipsis to edit or

01:02  
delete this note in this example I

01:05  
select edit I can change any of the note

01:09  
details and then select save

01:11  
I click the X to close notes and go back

01:14  
to the reservation now I can see the

01:17  
notes details link with the number 2

01:19  
indicating there are two notes saved to

01:21  
this profile

---

# Create a Sales Activity

00:06

In this video, you will learn how to create a meeting activity, invite others, and add

00:10

attachments for a company profile.

00:13

Let's get started.

00:14

You can find the create an activity option in the I want to menu on several screens in

00:18

the application.

00:19

In this example, I go to client relations, and select Activities.

00:23

Next, click the I want to menu, and then click Activity.

00:27

Now, confirm the property, the dates, and enter the start and end times for the meeting.

00:33

Click the type magnifying glass and select meeting from the list then click Select.

00:38

Now, you can edit the purpose.

00:41

Next, click the account magnifying glass and then from the view by drop down list select

00:46

Company.

00:47

Next, enter the company name and click search to look up the company account.

00:52

Now, I can select the account on the left and the contacts for the select account appear

---

00:56

on the right column.

00:58

Scroll down and select the option for the Account only or choose the option to select

01:03

the Account and Contact.

01:05

In this example, I select the Account and the Contact.

01:09

Enter any notes for the meeting.

01:10

And then click, Save activity and add more details.

01:13

Now, I can see the activity overview.

01:16

Scroll down to the activity notifications.

01:19

Click Invite Owners, then click Add.

01:23

Select the checkbox next to the name of the person to invite to the meeting, and then

01:26

click Select.

01:27

Now, I can see the additional meeting attendee.

01:31

Next to the invite owners link, I see the number one for the additional sales owner

01:34

I just added.

01:36

To upload I click the Attachments link, then click New.

01:40

Now, click Choose File and then select the file to upload, and click Open.

01:47

---

Enter a file name and a description then click Save.

01:50

Now, I can see the table layout file I just uploaded is saved as an attachment to this

01:56

meeting.

01:57

I can click the vertical ellipsis to delete, preview, or download the file.

02:00

Now, I can see the number 1 next to the attachments link indicating the file that's now attached.

02:05

Next, I click OPERA Cloud to go to the dashboard.

02:10

Scroll down and now I see the meeting I just created on the appointments dashboard tile.

02:15

I can click the appointment to view the meeting details. Next, I'll click Edit.

02:20

When the meeting is finished, I can click the checkbox to mark the appointment as complete.

02:25

I can enter a follow-up date and time, including any notes to create a follow-up activity.

# Create a Reservation using Quick Book

00:06

In this video, you will learn how to create a reservation using Quick Book.

00:11

Quick Book is the quickest way to create a reservation in OPERA Cloud and is an alternative

00:15

to using Look to book.

00:17

Let's get started.

00:19

Go to Bookings, Reservations, and then select Quick Book.

00:24

Now, I can create a new profile or search for an existing profile.

00:29

In this example, I enter the name, and then click the magnifying glass, to find

00:33

an existing profile.

00:35

Click the profile, and scroll down to click select.

00:38

Next, select the room type magnifying glass to search for the available rates

00:43

and room types.

00:44

Now, I see a summary at the top of the page to confirm the selected property,

00:49

arrival and departure date, number of nights, rooms, and number of adults.

00:55

I can select a different rate code from the display set drop-down list to view the rates for a specific rate code display set.

01:03

Or I can search by a specific rate code.

---

01:05

By selecting the checkbox, I also have the option to include rates that are closed, due

01:10

to rate or room type availability, in the available rate display.

01:14

Now, I can see the available room types and rates.

01:18

In this example, I click the \$115 rate for the Breakfast package in a Standard King room type.

01:25

01:26

Now, I see the room type and rate code details including the deposit and cancel policies

01:31

for this rate code.

01:32

After reviewing the details, I click select to book the rate.

01:38

I can click the View Rate Information link to review the details.

01:42

Quick book includes the packages with each rate code.

01:45

I can click the Packages link to add or remove packages from the reservation.

01:50

Or I can click the Add notes link to change or review the notes.

01:54

Next, I select the payment method from the drop-down list, enter the card number, and

02:01

the expiration date.

02:03

And then click save.

02:04

Now, I see the confirmation number of the reservation I just created using Quick Book.

02:09

---

Finally, if needed I can make any changes to this new reservation.

---

# Create a Walk-in Reservation

00:07

In this video, you will learn how to create a walk-in reservation.

00:11

Let's get started. Go to Front Desk, and then select Arrivals.

00:17

Click the I want to menu and then click walk-in reservation.

00:22

In this example, I review the sell messages and then click the X to close.

00:28

Next, I can enter any additional criteria to search for the room availability.

00:33

In this example, I click the plus sign to add 3 nights, and then, I click in the departure date

00:39

field, and confirm the update. Click search.

00:44

Now, scroll down to view the availability.

00:47

In this example, I select the \$220 rate for the gold room type,

00:55

Next, scroll down to review the room type and the rate code details.

01:01

And then click select.

01:05

Now, I see a stay information summary for this new walk-in reservation.

01:09

To continue creating the reservation, I must enter the guest details.

01:14

For the profile name, I can click the link to create a new profile or, as in this example, I

01:21

---

enter a profile name and then click the magnifying glass to search for an existing profile.

01:26

Next, I can enter any additional details to narrow the profile search and then click search.

01:34

Now, I scroll down to select the profile from the list.

01:41

I can click the profile name to go directly to the profile to review

01:45

or change any of the profile details. And then click back to manage profile.

01:52

After searching if I don't find the profile, I am looking for,

01:55

then I can click the link to create a new profile.

02:01

In this example, I scroll down and click select to select the profile.

02:08

Next, I will complete the reservation or booking details.

02:12

Enter any required information, in this example I enter the arrival time.

02:17

Finally, scroll down to select a payment method from the drop-down list.

02:22

In this example, I select cash, enter the required deposit amount and then click book now.

02:31

Now, I can search for and add packages and items to the new reservation.

02:37

In this example, I click add to add the All Year package.

02:41

I review the package details. If needed, I can click the

02:45

red X to remove the package. Next, I click the room selection option.

02:51

I can click the magnifying glass to search for another room or as In this example,

---

02:55

I click accept room selection. Now, I can click the magnifying glass

03:03

to find a different room. Or as in this example,

03:03

I click accept room selection. Now, I have several options I can

03:04

create a registration card, or I can advance check in this reservation or

03:09

as in this example, I click complete check in And the I click complete check in.

03:15

I click No to creating a registration card.

03:19

Now, I can see the new reservation I just created with the Gold room type.

03:24

And I can see the reservation is currently checked in.

03:27

Now, I have the option to go to the reservation or directly to billing.

03:32

In this example, I click go to reservation.

03:36

Now, I can review or change any details for this new walk-in reservation.

# Create A Reservation Using Room Diary

00:05

The room diary displays a list of rooms and dates to visualize the reservations.

00:10

Using the room diary you can create a new reservation or add an out of order

00:15

or out of service schedule to a room. In this video you will learn how to create

00:20

a reservation using the room diary. In Opera Cloud go to bookings, reservations

00:26

and then select room diary. On the room diary I can enter details to search for

00:32

the available dates and room options. For example I can select the magnifying

00:37

glass to search for a specific room to use for this reservation or I can scroll

00:42

down to use the room diary to create the reservation. From the view drop-down list

00:47

I can select the number of days to view on the room diary. In this example, I can

00:51

see seven days. On the date cell next to the room number I want to book I double

00:57

click and drag the cursor to select multiple days. Next, I double click to

01:03

open the 'I want to' menu. Now, I see the new reservation dates and room number I

01:08

selected. I click the action to create a reservation. On the look to book sales

01:15

screen I can enter any additional criteria to search for a profile, rate or

01:20

room options. In this example I scroll down and click search to find the

---

01:26

available rates for the selected dates and room I selected previously on the

01:30

room diary. I scroll down and double click the standard King room STDK at

01:35

four hundred and fifty dollars for the picnic rate. Now I can see the room type

01:40

information. I click select. Next, I can see the stay information details and I

01:46

can enter the guest information. In this example, I enter a surname and click the

01:52

magnifying glass to search for an existing profile. I select the first

01:57

profile from the list and click select. Now, this profile is selected for this

02:03

reservation. Next, I scroll down to select cash as the payment method.

02:11

Then, I click book now. If configured the closing script appears and displays the

02:18

reservation confirmation number. I click confirm to create the reservation.

02:25

Now, on the new reservation I can see the confirmation number and I can add any

02:31

updates including notes, guest preferences, or payment instructions to

02:36

the new reservation.

# View Room Availability for Blocks Using Group Rooms Control

00:06

In this video, you will learn how to view room availability for blocks on the Group

00:10

Rooms Control screen. Let's get started.

00:13

In OPERA Cloud, go to Bookings, select blocks, and then select Group Rooms control.

00:20

Enter a property, a start date, and any additional information,

00:25

then click search to view the room availability for blocks.

00:28

Now, I can see a daily summary of rooms set aside for blocks.

00:33

I click the arrow to scroll through dates. Next, I click the calendar icon to

00:38

select a different date range. In this example, I click June 8th.

00:48

Now, I see the date range change and the colors display on the 7th and 8th of June.

00:55

Click the Day Details tab to view the legend and the color descriptions.

00:59

In this example, I see the green on June 7 indicates a special event,

01:03

and on both June 7th and 8th there is a rate protect and a non compete indicated.

01:09

The Rate protect option is only available when the Lowest Rate Guaranteed OPERA Control

01:14

is active. The rate protect means no other groups should be booked using rates lower

---

01:19

than the rates assigned to the block. The black color indicates a non-compete

01:23

rate meaning no competing accounts, which are accounts designated with the NC industry code

01:29

should be booked for the same dates as the block marked as non-compete.

01:35

This option is only available when the Non Compete OPERA Control is active.

01:41

The color descriptions typically include special events, holidays, day types, and Rate Protect

01:47

(RP) and Non-Compete (NC) indicators. Depending on your OPERA Cloud configuration

01:54

you may see a different legend and different color descriptions based

01:57

on the services active for the property. Click view options, to turn on or off display

02:02

options by selecting or unselecting the checkbox and then scrolling down to click apply.

02:11

I can click the vertical ellipsis to create a block, create a master block,

02:16

or to create a master allocation.

02:18

Or I can click the plus or the minus sign to show or hide the block summary details.

02:28

I can also click the block code or the account name to go directly to the block or the account.

# Cancel a Reservation

00:04

In this video you will learn how to cancel a reservation in Opera Cloud.

00:09

Let's get started. First find the reservation you want to cancel. To find

00:14

the reservation you can go to bookings, reservations, and select manage

00:18

reservation to search for the reservation. Alternatively in this

00:23

example, I go to the Opera Cloud dashboard and click the arrivals tile to

00:27

go to the list of arrival reservations. Next to the reservation I want to cancel

00:33

I click the I want to arrow. On the I want to menu I click show more. Now, I

00:40

click cancel reservation.

00:44

I click the magnifying glass to select the cancel reason from the list and then

00:48

click select. If needed I can edit the cancellation description. Next, I click the

00:54

plus symbol on the deposit cancellation header. Then I scroll down to view the

00:59

cancellation policy for this reservation. In this example, I select cancel

01:04

reservation. A message displays with the cancellation

01:09

policy. Click cancel reservation to confirm. Now

01:12

I can see the cancellation number for this reservation. I can click the

---

01:16

vertical ellipsis to open the Actions menu to text or fax the cancellation

01:20

confirmation letter. In this example I select to preview and print the

01:24

cancellation confirmation letter. I can select a different confirmation letter

01:28

template from the drop-down list or I can click the customize option to

01:32

customize the letter. Then click send.

01:37

Now I can view print or download the cancellation confirmation letter.

# Cancel Mass Reservations

00:06

In this video, you will learn how to cancel multiple reservations in OPERA Cloud.

00:10

It's common to use mass cancellation to cancel multiple reservations that are non-guaranteed reservations.

00:17

For example, if the guests did not pay a deposit to confirm the reservations, you can easily

00:22

cancel the reservations using mass cancellation.

00:26

You also have the option to cancel reservations with deposits.

00:29

Let's get started.

00:31

In OPERA Cloud, go to Bookings, Reservations, and select Manage Reservation.

00:37

On the manage reservation screen, I will select mass cancellation from the predefined search

00:41

filters at the bottom of the page.

00:44

Alternatively, I could go to the search type menu and select mass cancellation from the list.

00:51

And finally, click search.

00:55

On the list of results, I select the checkboxes next to the reservations, I want to cancel.

01:01

In this example, I select the first 3 reservations and then click the Mass cancellation option.

01:09

Next, I select the cancel reason from the list.

01:13

The cancel description automatically populates with the reason.

---

01:16

I can edit the description if needed.

01:18

If needed, I can select any of the checkboxes including to delete all reservation traces,

01:21

to ignore the Cancellation Penalty, to Cancel Sharing reservations or to cancel reservations with deposits.

01:31

Then, click Cancel Now.

01:33

When the cancellations process, I can see the cancellation confirmation numbers and

01:38

the successfully cancelled messages.

# Post a Credit Card Deposit on a Reservation

00:06

In this video, you will learn how to post and pay for a deposit on an arrival reservation.

00:12

Let's get started. Go to bookings, reservations and then select manage reservations. Enter any

00:21

criteria to find the reservation. In this example, I enter the reservation confirmation number,

00:28

and then click search. Next, click the I want to menu, and then click deposit cancellation.

00:35

Click the vertical ellipsis and then select post unallocated deposit. An unallocated deposit posts

00:41

to the reservation but is not applied to a specific deposit request. Now I can enter the

00:46

payment details. In this example, I select chip and pin from the payment method drop-down list.

00:53

Next, I enter the credit card number. Click ok to verify the credit card was manually entered.

01:00

Then enter the expiration date. I unchecked the option to change the payment method on the

01:05

reservation. Now the payment method only applies to this deposit. Enter the deposit amount. I can

01:12

click the type magnifying glass to select a different reservation type that applies after

01:17

the deposit payment posts to the reservation. In this example, I do not change the deposit

01:22

guarantee deduct reservation type that's already selected, and then click post payment. Now I see

01:28

---

the deposit payment is posted to the reservation. Next, I click the x to close the window.

# Merge Reservations

00:06

In this video you will learn how to merge matching reservations. Reservations are considered matching

00:11

when the reservations have sequential reservation dates and have identical first, middle and last

00:16

names. You can merge matching arrival reservations for the current day or for the future dates if the

00:22

OPERA control allow merge reservations for future arrivals is active and turned on. Reservations are

00:29

merged from the matched reservations to the main reservation resulting in one combined

00:33

reservation for the entire length of stay. If the merged reservations have any deposit payments,

00:39

the deposit payments are transferred to the main reservation after the merge. Let's get started.

00:45

Go to bookings, reservations, and then select manage reservation.

00:52

Now enter any criteria to search for a reservation. In this example I enter the

00:58

confirmation number. Then click search. Now click the confirmation number to go to the reservation.

01:05

Click the matching reservations link to see a list of all possible matching reservations.

01:10

Select the check box next to the reservations to merge

01:14

---

and then click merge reservations. Click OK to confirm. Then click the x to close the window.

01:22

The reservation merge activity is recorded in the change log under the cancel action type

01:27

for merged reservations and under the update reservation action type for the main reservation.

# Add An Event to a Block

00:04

In this video you will learn how to find a block and create an event for the

00:09

existing block. In OPERA Cloud go to bookings, blocks and select manage block.

00:15

To find the block I must select a property because I'm currently logged

00:19

into a hub. I click the property magnifying glass to select a property

00:23

from the list and then click select. Next I'll delete the date to find all the

00:28

blocks for this property. Now I will enter the block name. In this example I

00:34

enter Oracle as the block name. Next I click search.

00:40

I can click the view icons to change the display for the list of blocks. Next I'll

00:46

find the block and click the block code to go to the block. When I am on the

00:51

block I'll click the I want to menu. Now I click event to create an event for

00:59

the new block. Next I must enter the event type.

01:05

In this example I click the magnifying glass and select meeting with out times

01:10

from the list and then click select. Next I finish entering the required event

01:18

details including the events start and end times. For now the expected attendees

01:24

is set to 50. To create the event the additional fields are optional. As the

---

01:29

event details are confirmed with the guests you can change the event

01:33

information. Next I'll scroll down to select an option to save. I can do the

01:38

following options. Save and create another event. I can save this event, or

01:44

save and manage event. In this example I select save and manage event.

01:52

Now on the event overview I can click Edit to add or change the event details.

01:57

In this example I click the loud event checkbox and then click Save.

# Add Menus and Items to Events

00:04

In this video you will learn how to add menus and items to events. First find an

00:12

event and then go to event resources. Let's get started. In OPERA Cloud go to

00:17

bookings, events, and then select manage events. On the manage events screen, if

00:23

you are logged into a hub, you must select a property. Next, I click the

00:27

property magnifying glass and select a property from the list. And then click

00:32

select. In this example, I deleted the dates to find all the events for the

00:36

property. Then I'll click search. Here I can see the block ID, the date range for

00:41

the events and other search options. I can click modify the search criteria to

00:46

change the search results. Click the I want to menu and go to event resources.

00:53

Now I can see an event list in the column on the left. I can see the first

00:57

event is highlighted and the resources for this event appear on the right.

01:02

Next I'll scroll down to select the menu tab. You can click the menu tab to open

01:07

the menu drawer.

01:11

On the menu tab I'll click the event type magnifying glass to select multiple

01:15

event types and then click select. Then I'll click search.

---

01:20

Each event type selected displays different menus related to the event

01:25

type. To find the menu items I must click the plus sign and then I can select a

01:30

menu. In this example I select plated lunch from the list. You can click the

01:35

menu name to see the menu items. Check the box include or remove a menu item.

01:40

Next, I click back to menus. You can see the number of menus added

01:46

reflects the number of event attendees. In this example I selected lunch and

01:53

breakfast and now I can add lunch or breakfast menus to the selected event.

01:57

And then scroll down to click Save.

02:02

Now I can see the plated lunch menu is added to the highlighted event.

02:08

Next I select the event type magnifying glass and check dinner. Then click select

02:13

to find dinner related menus. Then I'll click search. I'll click the plus sign to

02:19

expand the option. And click to select the cash bar.

02:22

I can click the option to save and add more to stay on the menu screen and

02:26

continue saving menus to the event. Next I click the plus sign to expand the

02:31

reception menus and select the Hibiscus menu option from the list. In this

02:36

example, I'll scroll down and click Save to add these menus to the event.

02:42

---

Here I can see all the menus I've just added to the event.

02:48

I can click the items tab to add other resources to the event.

02:58

In this example I select the chocolate fountain.

03:05

And click Save to add the item to the event.

---

# Create a Catering Block and Event

00:04

In this video you will learn how to create a new block and create a new

00:08

event for the block. To create a new block in OPERA Cloud, go to bookings,

00:13

blocks, and then select manage block. Click the I want to menu. Now click block

00:21

to create a new block. On the create block screen you can define the block

00:25

details and add the room and catering details. In this example, because I'm

00:30

logged in to a hub, I must select a property. I select the property from the

00:34

list and then click select. Next I select the account magnifying glass to find an

00:39

existing account. On the manage profile screen I can find an account and contact

00:44

name for a company, travel agent, or source profile and connect it to the

00:48

block. I can click the I want to menu to create a new contact profile for a

00:53

company, travel agent, or source. In this example I enter the name Oracle and

00:58

click search to find the account.

01:02

Now I can see a list of accounts and related contacts. When I select an

01:07

account on the left and click search the related contacts appear to the right. I

01:11

can select a contact from the list, choose to create a new contact or

---

01:16

account from the I want to menu or select the vertical ellipsis to create a

01:20

new linked contact. In this example I select the account Oracle Corporation -

01:25

IDC and click search. Now I can select the related contact from the list of

01:31

related contacts. Now I can scroll down to select the

01:35

option to select only the account or to select both the highlighted account and

01:40

contact from the columns. In this example, I scroll down to select both the account

01:45

and contact. Now I see the account, contact, block name, and the block ID are

01:51

filled in. The account name automatically fills in the block name. I can edit any

01:57

of this information as needed. Next I check the catering only option.

02:02

The rooms details section is hidden when this option is selected because rooms

02:06

are not part of the block if this is a catering only event. I continue by

02:11

entering the required information that's noted in red to create the block. Next

02:16

I'll click the magnifying glass to select the room status. In this example, I

02:21

select inquiry from the list and click select. Next I'll click the market

02:27

magnifying glass and select the group corporate market code from the list. And

02:31

then click select. Next I select the source magnifying glass to select catering as

02:38

---

the source for this block and then click select. In the catering details section I

02:43

must enter the number of event attendees to activate the options related to

02:47

events. In this example, I'll enter 50 attendees. You must click outside the

02:54

attendees field to activate the next options.

02:58

I can see the room grid option is not active because previously I selected

03:03

catering only for this block. I can enter any additional information for this

03:07

block and then I can select an option. Save, save and manage block, save and

03:13

create an event, save and add template, or save and add a catering package. For this

03:20

example I'll select the option to save and create an event. Now I can enter the

03:24

required event details. I'll select the event type magnifying glass and select

03:29

breakfast from the list. Then click select. When I select the event type the

03:34

event name is automatically populated with the name breakfast. If needed I can

03:39

edit the name. For this event type the events start and end times begin with

03:44

8:00 a.m. and end with 9:00 a.m. I will change the start time to 9:00 a.m. and

03:49

the end time to 11 a.m. for this event. Next I'll scroll down to select an

03:54

option. I can choose to select the option to save and create another event, save

03:59

and manage event, or save. In this example, I'll click Save. Now I can see the new

---

04:05

event created for this block ID. I can click the plus sign to view the block

04:09

overview. Or I can click the I want to menu for

04:14

more options related to this block and this event.

04:21

I can also click the event details link to edit or add details to this event. Or

04:27

I can click the I want to menu for options related to this event.

---

# View Events on the Function Diary

00:05

In this video, you can learn how to view and edit events on the function diary.

00:08

Let's get started. In OPERA Cloud, go to Bookings, Events, and select the Function Diary.

00:17

To display events on the function diary, the property and start date for the event must be selected. In this example, I click the

00:24

magnifying glass and select the hotel from a list. Then I click select.

00:29

Next I'll select a date from the calendar.

00:33

You can define any additional fields and then click search.

00:36

Now I can see the function diary view, with a list of function spaces and a day and time for the event.

00:43

I can hover over each event to view an event snapshot including the event status duration and event label.

00:49

Then to access the event information, you can hover and double click to see the event overview,

00:52

with the related block details.

00:56

Now, I can click the I want to menu to create sub events,

01:01

view event changes, or click to go to the event resources to add menus or items.

01:08

I can click edit to change the event details.

01:11

---

For example, I may need to add details as the event approaches.

01:15

If I make any changes I'll click save. Then I'll click the option to go back to the function diary.

01:21

I can change the range of days that display on the function diary by selecting the number of days from the drop-down list.

01:28

In this example, I selected seven days. Now, I can see 7 days of events displayed.

01:31

I can click the legend to view the event status color descriptions and to view the icon descriptions.

01:41

I can see the selected search options for the events that display on the function diary.

01:46

To change the search options, I can click Modify Search Criteria.

01:51

Now, I can search by a variety of options related to the property event dates or the function space.

01:58

In this example, I will search for events only in the bistro function space.

02:02

I'll start by clicking the space magnifying glass to go to the function space search.

02:09

Now, again I will click on the space magnifying glass

02:12

and then select the bistro space. Then click select. Now, I can click search.

02:19

Next, I'll click the check box for the bistro space. And then click select.

02:25

Then I'll click Search.

02:27

Now, I can see the function diary only displays the events for the bistro function space.

---

# Find Reservations with Opt In Notifications

00:04

In this video you will learn how to

00:06

search for reservations where the guest

00:08

"Opted in" to receive notifications.

00:11

An external system must be configured

00:13

and subscribed to the OPERA Cloud

00:15

business events. To get started, navigate

00:18

to the OPERA Cloud application. Go to

00:21

Bookings, Reservations, and select Manage

00:25

Reservation. Select the Advanced Search

00:29

option. To search for the reservation you

00:32

can select a reservation type from the

00:34

drop down list. In this example, I select

00:37

the room assignment reservation type. If

00:39

you do not select a reservation type all

00:41

reservations with "Receive External

---

00:44  
Notifications" checked will appear. You

00:47  
must select the property and check the

00:49  
Receive External Notifications" checkbox.

00:51  
You can enter additional information to

00:53  
refine your search. When finished click

00:57  
search. Now you can see the reservation

01:00  
in the room assignment status with the

01:02  
received external notifications checkbox

01:04  
selected. For these reservations the

01:07  
guests Opted-In to receive notifications

01:10  
about the reservation. To confirm, click

01:12  
the confirmation number. To confirm the

01:16  
box is checked scroll down to the

01:19  
additional details section on the

01:20  
reservation and see the Receive External

01:23  
Notifications checkbox. When the room is

01:25

---

ready, now the guests can receive a text,

01:27

phone call or email.

# Opt-in Guest Notifications

00:06

In this video you'll learn how to opt in

00:09

a guest to receive notifications about

00:11

their stay. For example if a guest

00:13

arrives and their room is not ready, by

00:15

"opting in" the guest they can receive

00:17

notifications by phone or email when the

00:20

room is ready. This option is called

00:22

receive external notifications. You can

00:25

find this option in various places

00:26

throughout the application including

00:28

when you assign a room and on the

00:30

reservation. To send the notifications an

00:33

external system must be configured and

00:35

subscribed to the OPERA Cloud Business

00:37

Events. To find a reservation you can go

---

00:39

to Bookings, Reservations, Manage

00:42

Reservation, and search for a reservation.

00:44

In the example I found this reservation.

00:47

We'll start by scrolling to the bottom of

00:50

the reservation.

00:52

Here we can find the additional detail

00:55

section and then you will see the

00:56

received external notifications check

00:58

box. Where you can opt-in the guests to

01:01

receive external notifications. Select

01:03

edit and select the receive external

01:05

notifications checkbox. You can select

01:08

the magnifying glass to select any

01:10

communication options attached to the

01:12

profile. Or you can add an additional

01:15

phone number or email as the

01:17

---

communication method for this

01:19

reservation. You can also select to add a

01:21

new phone number to the profile by

01:23

selecting the add two profile checkbox.

01:26

If you do not select the checkbox add to

01:29

profile, this communication method is

01:31

attached only to this reservation. To

01:33

save the changes select save.

---

# Check In Arrival Reservation

00:04

In this video you will learn how to check in a reservation. Let's get started.

00:09

First, you must find the reservation. In this example, I click the arrivals tile

00:14

to go to the list of arrival reservations. Next, I'll find the

00:19

reservation I want to check in and click the arrow to open the 'I want to' menu.

00:24

Click check-in. Next, I'll click OK to confirm the profile privacy selection.

00:31

Depending on your system configuration you may have different options for the

00:36

check-in flow. Now, on the verify payment step I can verify or add a payment

00:41

method. In this example, I select cash from the drop-down list and click Save.

00:50

Next, I click complete check-in. I click yes to print a registration card. If it's

00:58

configured for your property, you may have the option to print, email, or fax

01:03

the registration card for the reservation. In this example, I select

01:08

preview and then click process. Now, I can print the guest's registration card and

01:14

the reservation is checked in.

# Reverse Check in a Reservation

00:05

In this video you will learn how to reverse check in a reservation. You can

00:11

reverse check in a reservation if no financial transactions are posted to the

00:14

reservation folio. You can reverse reservations with deposits. To reverse

00:19

check-in reservations you must go to each individual reservation. Navigate to

00:24

bookings, reservations and select manage reservations. To find the reservations

00:31

select in house from the drop down list. Enter or click the magnifying glass to

00:36

select the property from the list. Then click search.

00:45

From the list of reservations you can click the confirmation number to go to

00:49

the reservation. Click the I want to menu.

00:56

And then click reverse check-in.

01:01

On the reverse check-in screen you can select maintain room to keep the

01:07

assigned room number or you can select to remove the room

01:10

From the drop-down list. You can also update the housekeeping status. In this

01:15

example, I select to remove the room and then click reverse check-in.

01:21

Now the reservation is not checked in. You can see it's now in the four pm hold

---

01:26

arrival status.

English

All Cloud computing Computer program Sales Related Recently uploaded Watched

enter Oracle as the block name. Next I click search.

00:40

I can click the view icons to change the display for the list of blocks. Next I'll

00:46

find the block and click the block code to go to the block. When I am on the

00:51

block I'll click the I want to menu. Now I click event to create an event for

00:59

the new block. Next I must enter the event type.

01:05

In this example I click the magnifying glass and select meeting with out times

01:10

from the list and then click select. Next I finish entering the required event

01:18

details including the events start and end times. For now the expected attendees

01:24

is set to 50. To create the event the additional fields are optional. As the

01:29

event details are confirmed with the guests you can change the event

01:33

information. Next I'll scroll down to select an option to save. I can do the

01:38

following options. Save and create another event. I can save this event, or

01:44

save and manage event. In this example I select save and manage event.

01:52

Now on the event overview I can click Edit to add or change the event details.

01:57

In this example I click the loud event checkbox and then click Save.

# Advance Check in Reservation with ETR

00:04

In this video you will learn how to move a reservation in the arrival status to the advanced check-in state.

00:10

Advanced check-in allows the guests to post charges to their reservation folio their master bill for the hotel.

00:17

Let's get started. Navigate to the OPERA Cloud application and find the list of expected arrival

00:23

reservations for the current business date.

00:27

Then click the confirmation number.

00:31

The reservation must have a valid payment method selected. Then click on "I want to" and

00:39

select check-in.

00:46

Next click the advanced check-in option.

00:50

The expected time of return screen you can enter the time the guest expects to be back to the hotel.

00:57

You can also add a related comment.

01:00

Select the receive external notifications checkbox to opt in the guest to receive notifications about their reservation.

01:07

To add a new phone number to the profile select the add to profile checkbox.

01:12

If you do not check the box this email or phone number is connected only to the reservation and not to the profile.

01:20

---

Then select save.

01:24

Click OK to confirm moving the reservation to the advanced check-in state.

01:30

Now you can select a room, change

01:32

the payment method attached to the reservation, and you can create room keys for the guests if this option is configured for your hotel.

01:47

When it's time to check in the reservation you can click the complete check-in option at the top of the reservation to check in the guest.

# Reverse Advance Check In Reservations

00:00

[Music]

00:04

in this video you will learn how to

00:06

print registration cards for tomorrow's

00:08

arrival reservations let's get started

00:11

in our cloud go to front desk select

00:14

front desk workspace and then select

00:16

registration cards in this example I

00:19

changed the arrival date to tomorrow's

00:21

date then I can enter any additional

00:23

criteria if needed click search now

00:28

scroll down to view the search results

00:30

with the list of reservations next I

00:33

select the checkbox at the top of the

00:35

list to select all the reservations then

00:37

scroll down to select the option to

---

00:39  
process the registration card if I want

00:42  
to select a different template I can

00:44  
click the magnifying glass to select a

00:46  
different registration card template

00:48  
from the list in this example I select

00:51  
the new registration card template and

00:53  
click select next I can choose to print

00:56  
a registration card for the primary

00:58  
guests and any accompanying guests or

01:00  
only the primary guests from the list of

01:03  
report destinations I can choose the

01:05  
option to preview email to print email

01:08  
or fax in this example I select the

01:11  
preview option and then click process

01:14  
now it can print the PDF that contains

01:16  
all the registration cards to the

01:18

---

reservations arriving tomorrow

01:23

you

---

# Add a Reservation to the Queue

00:00

[Music]

00:03

in this video you will learn how to add

00:06

a reservation to the queue you can add a

00:09

reservation to the queue if the assigned

00:11

room or required room type is not ready

00:13

then you can send a text message to

00:15

notify housekeeping let's get started

00:17

first I will search for the reservation

00:20

in Opera Cloud you can search for an

00:22

arrival reservation by clicking the

00:24

arrival reservation style to go to the

00:26

list of arrival reservations

00:28

alternatively to find the reservation

00:31

you can go to front desk and select

00:33

arrivals next enter the guests name and

---

00:37

any other search criteria then click

00:39

search select the I want to option next

00:42

to the reservation and then select place

00:45

reservation on queue to confirm click OK

00:50

to go to the reservation click the

00:52

confirmation number now on the

00:55

reservation I see the priority

00:57

notification with the number indicating

00:59

the priority on the queue for this

01:00

reservation click the priority

01:03

notification to see the total winked um

01:05

on Q and the Q priority here I can

01:09

select to prioritize this reservation or

01:11

to send a text to the guest when the

01:13

room is ready for check-in I can also

01:15

click the vertical ellipsis menu to

01:17

---

remove the reservation from the queue

01:19

check-in the reservation change the

01:22

assigned room or to send a text message

01:24

to housekeeping to rush the room in this

01:27

example I click prioritize to set the

01:29

reservation to first priority and then

# Print Arrival Registration Cards

00:00

[Music]

00:04

in this video you will learn how to

00:06

print registration cards for tomorrow's

00:08

arrival reservations let's get started

00:11

in our cloud go to front desk select

00:14

front desk workspace and then select

00:16

registration cards in this example I

00:19

changed the arrival date to tomorrow's

00:21

date then I can enter any additional

00:23

criteria if needed click search now

00:28

scroll down to view the search results

00:30

with the list of reservations next I

00:33

select the checkbox at the top of the

00:35

list to select all the reservations then

00:37

scroll down to select the option to

---

00:39  
process the registration card if I want

00:42  
to select a different template I can

00:44  
click the magnifying glass to select a

00:46  
different registration card template

00:48  
from the list in this example I select

00:51  
the new registration card template and

00:53  
click select next I can choose to print

00:56  
a registration card for the primary

00:58  
guests and any accompanying guests or

01:00  
only the primary guests from the list of

01:03  
report destinations I can choose the

01:05  
option to preview email to print email

01:08  
or fax in this example I select the

01:11  
preview option and then click process

01:14  
now it can print the PDF that contains

01:16  
all the registration cards to the

01:18

---

reservations arriving tomorrow

01:23

you

---

# Electronic Signature Registration Card

00:06

In this video, you will learn how to create

00:08

a digital registration card for the guest to sign on a tablet.

00:12

First, I must find the reservation. In this example,

00:16

I go to the OPERA cloud dashboard and tap the arrivals tile to go to the list

00:20

of arrival reservations. Next tap the arrow to open the 'I want to'

00:25

menu. Tap the e-sign registration card and the

00:29

customized electronic signature template displays.

00:32

If required by the guest I could select another language for the registration

00:36

card. Now I can present the tablet to the

00:38

guest with the option to initial and sign the digital registration card. The

00:44

guest can tap the initial and signature buttons to sign

00:50

and then click save. To make changes to the signature or the initials

00:54

the guest can tap the pencil icon. Now, I can go to the reservation

00:59

to see the electronic signature registration card signed by the guest.

01:04

On the OPERA cloud dashboard, I click the arrivals tile.

---

01:07

To go to the reservation tap the confirmation number.

01:11

Scroll down to see the reservation notifications. Tap

01:14

e-signed registration cards. In this example, I see the number one.

01:19

This indicates there is one registration card attached to this reservation.

01:23

I can tap the vertical ellipsis to preview or print the electronically

01:26

signed registration card. In this example, I select preview to view

01:31

the digital registration card that was signed by the guest.

---

# Mass Advance Check In

00:04

In this video you will learn how to move multiple reservations to the advanced

00:09

check-in state. This is called mass advance check-in. Advanced Check-in

00:15

allows guests to post charges to their reservation folio prior to check-in and

00:19

helps the rooms management team prioritize room cleaning and room

00:23

assignment. Let's get started. Navigate to the Opera Cloud dashboard and click the

00:29

arrivals tile to go to the list of arrivals. Select the check box next to

00:35

each reservation you want to move to the advanced check-in state. Then, click the

00:42

mass advance check-in option. Click process to update the reservations. Now, I

00:50

can review the advanced check-in status. In this example, one reservation did not

00:55

process and the error message explains the multi-room reservation cannot be

01:00

processed as an advanced check-in, and two of the reservations processed the

01:05

advanced check-in successfully. If you want to print the status you can

01:10

click the print option. Click ok. The next step depends on your configuration and

01:17

you may have different options here. In this example, after the advance check-in

01:25

is successful I have the option to create registration cards for the

---

01:28

advanced check-in reservations. I can select the option to preview to print,

01:33

email, or a fax. In this example, I select the option to preview to print, and click

01:39

process. Now I can print the registration cards for the guests to sign. Next I

01:45

close the window. Now when I go back to the list of

01:50

arrivals I can see the reservations I selected are now in the advanced

01:53

check-in state.

01:59

you

---

# Create a Room Key

00:05

In this video you will learn how to make a key and how to change the key's access.

00:11

To create a key the reservation must have an assigned room. Let's get started

00:17

in Opera Cloud go to miscellaneous and select property interface control. The

00:23

property I'm logged into is selected. I can click the magnifying glass to select

00:28

a different property. Next, I scroll down and select the reservation status

00:33

magnifying glass. I select the checkbox to add in house reservation statuses and

00:39

then click select. I deselect the include blocks checkbox because I don't want to

00:45

include blocks in the results, and then I click search. Now, I'll scroll down to see

00:51

the list of search results. On the list of results I see the reservations with

00:56

assigned rooms and I can see the number of duplicate keys previously created for

01:02

each reservation. Next, I select the checkbox next to the reservations I want

01:06

to create a key for and then click the option to create key.

01:11

I'll scroll down to change the key options. In this example, I select the

01:17

option to create two keys for each reservation. Then, I select the start and

01:22

end date range for the keys. Next, I'll scroll down and turn on the option to

---

01:28

display all key encoder locations. Now, I can select the tabs to find the key

01:33

encoders in various locations around the property. In this example, I select a

01:38

default key encoder at the main entrance. Next, I'll click process. This key encoder

01:45

did not create a key and I see a message to select an alternate location. Next, I

01:50

turn on the option to display all the encoders and then select the key encoder

01:54

in the left hallway and then click create key.

02:01

Now I can see the keys created successfully.

---

# Check Out a Reservation

00:04

In this video you will learn how to check out a reservation in Opera Cloud.

00:08

Let's get started. From the Opera Cloud dashboard click the expected departure

00:13

tile to find the due out reservations. If I select a checked in reservation I

00:19

would be presented with the action to check out early. Instead,

00:23

in this example I will select the arrow to open the 'I want to' menu next to the departure

00:27

reservation. And then I'll select checkout. Now, on the billing screen I

00:35

click the split view icon to change the view and see multiple folio windows side

00:39

by side. I can drag and drop charges from one billing window to another billing

00:45

window. I can also select the vertical ellipsis menu to edit or transfer a

00:50

posting, post a payment or adjustment, make a quick split, or view the interim

00:56

folio, or I could click post charge to post last-minute charges or rebates to

01:01

the folio. Next, I click checkout. Now, I can see the folio statement with the

01:07

amount due and selected payment method. Next, I'll click settle folio to post the

01:12

cash payment and settle the folio balance. I can print the payment receipt

01:17

or checkout now. I click checkout now. Now, I can update the room status. I select

---

01:24

dirty and click Save. I can see the reservation status is now checked out.

---

# Quick Check Out

00:05

In this video, you will learn how to check out a reservation using Quick

00:09

Check out.

00:10

Let's get started.

00:11

In OPERA Cloud go to front desk, select Front Desk Workspace, and then select quick check

00:17

out.

00:19

If needed, I can click modify search criteria to define the options to find the reservations.

00:25

Now, I select the checkbox next to each reservation I want to check out.

00:30

Next, I can select any of the following check out options; if I want to check out multiple

00:36

reservations, I select Mass Check Out and then step through the manual folio settlement

00:41

process and checkout each selected reservation.

00:45

Or to automatically process the credit card or direct bill settlements, I can select Auto

00:50

Check Out.

00:52

Alternatively, I can select the Check Out Zero Balance Departures option to check out

00:57

reservations with a zero balance.

---

01:01

In this example, I click auto check out.

01:04

Auto checkout verifies the credit card assigned to each reservation has a sufficient authorization

01:08

to cover the folio balance, and the direct billing accounts are not restricted, and also

01:14

have not exceeded the limits.

01:16

Any cash guest folios must have a zero balance for auto check out to process successfully.

01:21

Now, I can see one reservation successfully processed the auto checkout.

01:26

The other two reservations did not process the auto check out, because the payment method

01:30

of the direct bill or the credit card is not set up on these reservations.

01:35

Click close.

01:36

Next, I select Mass Checkout to manually process the remaining reservations that were previously

01:43

selected.

01:44

I can update the payment details, if needed, and then click Settle and Send Folio.

01:50

Now, I can click the link to select a Folio Style or as in this example I continue with

01:56

the default folio style, and then I select a Report Destination.

02:00

I can select to preview, email, or download the folio.

02:05

In this example.

---

02:06

I select email, and click the link to enter an email address, and then click save.

02:28

Next, click Process.

02:31

Now, I see the payment processed and if needed I can click to print the receipt.

02:37

Scroll down, and click check out now.

02:42

Now, I see the reservation is checked out and the room number.

02:48

Next, the 3rd and final previously selected reservation automatically displays to continue

02:53

the check out process.

02:55

Click settle and send folio.

02:59

Select a folio destination, and then click save.

03:02

And then click process.

03:05

Now, I see the payment is applied to the folio and the balance is 0.

03:10

Next.

03:12

I click Schedule Check Out, enter a check out time, and then click ok.

03:17

Now, I see the 3 reservations I previously selected are not displaying as available to

03:24

check out any more because these reservations checked out successfully.

# Apply Credit Card Rebate to a Reservation

00:04

In this video you will learn how to apply a credit card rebate to a

00:09

reservation. Let's get started. In OPERA Cloud go to front desk and then

00:16

select in-house. To search for the reservation I must select a property. I

00:22

select the property from the list and then click select.

00:34

Next click search. I'll click the confirmation number to go to the

00:39

reservation. First I'll click the payment instructions to confirm a credit card

00:45

as a payment method is set up for this reservation. Here I can see the credit

00:51

card payment method for each window.

00:58

Next I'll scroll up to the top of the reservation and click the I want to menu.

01:06

And then click billing. At the top of the billing screen click post payment.

01:13

Now select the window to apply the rebate. In this example, I select window 3.

01:22

You can see the credit card payment method applies to this window. In the

01:27

amount field I enter the rebate amount as a negative number. For example, I enter

01:32

negative \$20. Next I must enter a value in the reference field that's a minimum

01:39

of 6 alpha or numeric characters. In this example, I enter rebate.

---

01:47

I can check the override debit activity to process rebate checkbox. If you do not

01:55

check this option, and it's configured, OPERA validates if the debit or credit

01:59

card was previously charged for this guest and it validates if the sum of the

02:05

previous amounts charge was greater than or equal to the amount of the rebate. To

02:10

override this validation, check this box. Next click apply payment. If a

02:19

chip-and-pin terminal is configured then you can select the terminal to process

02:23

the transaction. In this example, I click to select the terminal labeled

02:28

front-desk left. Then click select terminal.

# Change Rooms for an In House Reservation

00:05

In this video you will learn how to change rooms for an in-house reservation.

00:09

Let's get started. Click the in-house reservation style to go to the list of

00:14

in-house reservations. First, define the reservation. Click the 'I want to' arrow

00:20

next to the reservation. Select move room. Next, I select the clean

00:27

check box to include rooms which are in either the clean or inspected room

00:31

status. In this example, I delete the room type to search for all the rooms in

00:36

either the inspected or clean status. Click search. Scroll down and click

00:43

select room to assign a new room to the reservation. I select the check box to

00:48

update the room type to charge on the reservation. Then I click the magnifying

00:53

glass to select a move reason from the list. Click select. The description Auto

00:59

fills with the selected reason. I can edit the description if needed. Now, I can

01:04

select the room status for the previously departed room. In this example,

01:08

I keep the default selection of dirty and click assign room. Click accept

01:14

room selection. Now, the new room is assigned to the reservation.

---

# Using Batch Room Assignment

00:06

In this video you will learn how to manually and automatically assign rooms to multiple

00:10

reservations. Let's get started. In OPERA cloud select front desk, front desk workspace, and then

00:17

select room assignment. To find the reservations I click modify search criteria. Now, I can enter the

00:24

arrival date and click search. Now I can see a list of reservations for the arrival date I specified.

00:31

In this example i select the first reservation and then click the manual assign option.

00:38

Selecting the manual assign option allows me to select the exact room to assign to this

00:42

reservation. Now I can select any additional room options. In this example, I scroll down

00:48

to find a clean room and click select room. I click ok to confirm the room assignment.

00:54

Now on the list of reservations I click the check box at the top of the list to select

00:59

all the remaining reservations. Next, I select auto-assign. Now I can select any relevant room criteria.

01:07

In this example, I select the checkbox include departure rooms to include rooms in the due

01:12

out status and then I select the checkbox to include the rooms in the clean and pickup status.

01:19

---

Next, I click assign. Now I can see the rooms were automatically assigned to these reservations.

---

# Manage Rate Restrictions

00:04

In this video you will learn how to manage rate and room restrictions. You

00:10

can use restrictions to control availability based on demand, experience

00:14

or forecasting. For example, during a weekend when demand is high you can

00:20

apply a two-night minimum stay restriction on all or specific rates and

00:24

rooms. Let's get started. Go to inventory and then select manage restrictions. I

00:31

can search for existing rate restrictions or I can create a new

00:35

restriction. In this example I click new to apply a new restriction. Select the

00:42

date range for the restriction. In this example, I select Friday as the start

00:47

date and Sunday as the end date. From the restriction drop-down list

00:56

I select minimum stay through. Then, I click the plus icon to increase the days

01:04

to 2. I can select a specific room class room type or I can select a specific

01:10

rate category or rate code for the restriction. In this example, I select

01:16

house to apply the restriction to all the rooms. I can select the category or

01:21

code magnifying glass to select a specific rate to apply the restriction

01:25

to or if I do not select a specific rate category or rate code the restriction

---

01:31

applies to all rates. Next click Save. Now, I can see the restriction I just

01:36

created and it applies from Thursday through Sunday.

01:39

I can click the list icon to display the restrictions in a list view

01:45

or I can click the week view icon to see the calendar view of the restrictions

01:51

setup for the week. Next, I click the vertical ellipsis and select change log. I

01:56

can adjust the property and the date and then click search. Now, I see the list of

02:02

changes to restrictions for this property and this specific date.

---

# View Property Availability and Configure Sell Limits

0:06

In this video you will learn how to view property availability and change the sell limits.

0:12

Property availability provides a comprehensive view by day of

0:15

the available and sold rooms for the property to manage room inventory.

0:21

Let's get started. Go to inventory

0:25

and select property availability. Now I can change the property or the date.

0:33

Or I could select to display the search results by room type or room class.

0:38

I also have the option to click either the room class or room type magnifying glass to select a

0:43

specific room type or room class. Next, I click search.

0:49

I can view the property availability for 28 days.

0:53

The list of room types displays on the

0:55

left with each day displaying the maximum number of available rooms.

0:59

I click view options to select which values display on the property availability view.

1:04

For example, I can select these various options to display availability for the entire property.

1:09

---

Or I can select options to display availability for each room type, such as the number of arrivals

1:15

departures or the number of persons. The rooms available to sell considers

1:20

the out of order rooms and the sell limit. I click expand all to expand the room type rows

1:26

to display all the selected availability view options.

1:30

I click the available rooms number below the date for the deluxe kingroom type

1:34

to set the sell limits for the specific day. I can also select a date range or

1:39

a day of the week to set the sell limits for a specific period of time.

1:42

I can set sell limits using positive numbers to allow overbooking or by using negative

1:47

numbers to set an underbooking ceiling. Next, I click on the minus sign to decrease

1:52

the number of available rooms to 35. Or by using 0 I can reset the sell limits

1:59

and then click save. Now, I can see the negative 2

2:03

sell control value for the room type after I reduce the sell limit from 37 to 35.

---

# Assigning Room Conditions

00:04

In this video you will learn how to assign conditions to a room. For example,

00:10

if you need to schedule a sales tour or maintenance repairs, you can use room

00:15

conditions to set aside the room for a special purpose. You can add a condition

00:19

to prevent a room from being assigned to a guest. To add a condition to a room,

00:24

navigate to OPERA Cloud and go to Inventory. Select Room Management, and then Room

00:33

Conditions. You must click the magnifying glass to select a property from the list.

00:37

And then click Select. Now click the vertical ellipsis and

00:42

select New. Next click the magnifying glass to select the room. Here you can

00:49

see the room type, the room number, and a description. Click Select. Then click the

00:55

magnifying glass and select the desired condition from the list. If the room

01:00

condition type is available then you can assign the room to a reservation and

01:04

click select. You can edit the remarks and then click Set Condition.

01:14

Now the room is labeled with the condition, and appears in a list below

01:18

the search options. To edit or delete the room condition, you can select the

01:23

vertical ellipsis next to the room.

# Update Room Status

00:05

In this video you will learn how to update a room status. Let's get started.

00:10

In Opera Cloud, go to inventory, select rooms management and then select

00:17

housekeeping board. In this example, to find the list of clean rooms I deselect

00:22

every room status but clean. Then I'll click search.

00:29

I select the checkbox next to the room number

00:34

and then click update room status. Next, I select the dirty room status. On the

00:41

set room status screen I can update the room status, housekeeping status, the

00:47

guest service requests, and the turn down status.

00:50

I can select prioritize to place the room at the top of the cleaning list on

00:54

the task sheet. Click close. Now I can search for rooms in the dirty status to

01:00

find the room with the updated status.

---

# Auto Generate Task Sheets

00:06

In this video, you will learn to auto generate housekeeping task sheets in

00:11

OPERA cloud. Using auto-generate OPERA cloud

00:14

intelligently assigns rooms to task sheets

00:17

based on a number of housekeeping attendants available and the

00:20

housekeeping credits per room. Any rooms remaining not assigned are

00:25

automatically added to a floating overflow task sheet for manual

00:29

assignment. In OPERA administration when the

00:32

housekeeping task scheduling OPERA control is active

00:35

each room will have a different task assigned according to the task schedule

00:39

setup for the room type. Let's get started. On the OPERA cloud

00:43

menu go to inventory, select task sheets and then

00:46

select auto-generate task sheets. I select the

00:50

task magnifying glass and select full-service, light service

00:54

and the complete room service task from the list and then click

00:58

select. Next I add task instructions that will display on task sheet reports

---

01:03

and in the mobile task sheet companion for the housekeeping attendance.

01:07

Then I add room instructions that appear for each room.

01:11

Next, I click the magnifying glass and select the checkbox on the top

01:15

to select all the attendance from the list and then click

01:18

select. Next, I enter 60 as the maximum number of credits to be assigned to any

01:23

one task sheet. Credits are divided evenly by the number

01:27

of housekeeping attendants. And then click next. Next I select the

01:31

pickup checkbox to include both the dirty or pickup rooms in the room

01:35

criteria. If required, I can change the breakout

01:39

options and then click generate task sheets. Now I see the task

01:43

sheets generated for the day. If needed I can make manual adjustments

01:48

to each task sheet. For example, in this single task sheet

01:51

view I can click edit to assign a different room attendant

01:55

or to update the task sheet instructions. I can also select a different task sheet

02:00

from the drop-down list. To view multiple task sheets I can click

02:03

the view card icon to see the task sheets side by side.

02:07

---

Now click OPERA cloud to go back to the dashboard.

02:10

On the task sheet dashboard tile, I can see the details and progress of the

02:15

housekeeping tasks. I can click the tile to go to the task

02:20

sheets.

# Manually Create Task Sheet

00:06

In this video, you will learn how to manually create a task sheet in OPERA Cloud.

00:11

Let's get started.

00:12

On the OPERA Cloud menu, go to Inventory, select Task Sheets, and then select Create

00:18

Manual Task Sheets.

00:19

I click New.

00:20

Next, I select the task magnifying glass, and check the full service checkbox.

00:25

And click select.

00:26

Next, I select the Room magnifying glass, and select the rooms in the pickup and dirty

00:31

status from the list and then click select.

00:34

Next, I enter 15 for the number of credits to allocate per room.

00:39

Then I enter the room instructions.

00:41

And then click create.

00:43

Now I can see the task sheet I just created.

00:46

I can click the detail tab to view the rooms per task sheet.

00:49

Or I can select the vertical ellipsis to create a task sheet report.

---

00:54

Or I can click new to create another new task sheet.

00:57

I can click to manage task sheets to view the actions for each task sheet, including

01:02

updating the status, or make changes to the task sheets including assigning a housekeeping

01:08

attendant or adding instructions.

01:09

I can click the view icons to display one or multiple task sheets.

# Use the Task Sheet Companion on a Tablet

00:06

In this video, you will learn how to use the task sheet companion on a tablet device, to

00:11

manage the rooms assigned to a housekeeping room attendant.

00:15

Let's get started.

00:17

Click the task sheets dashboard tile to go to task sheets.

00:21

Alternatively, you can navigate to Inventory, task sheets, and then select manage task sheets.

00:28

Now, you can see the housekeeping task sheets for the day.

00:32

Click Manage.

00:34

To find and select the assigned task sheet I can double-click any of the task sheets

00:38

on the right or I can select the task sheet number from the drop-down menu.

00:43

Next, click the actions menu.

00:46

Then click "go to task sheet companion".

00:49

The assigned rooms are prioritized according to a cleaning priority.

00:52

The details for the first room are displayed; including the task to be completed, plus any

00:57

notes and the arrival, or the inhouse, or departure reservation details.

01:02

I click the Traces link to find any housekeeping tasks setup as traces for this room.

---

01:07

Now, I can see this room needs more pillows and towels.

01:11

After I stock the room with pillows and towels I can click the vertical ellipsis to mark each

01:15

task as complete.

01:17

Then close the window.

01:18

Next, I click Start to begin the tasks for the room and activate the timer.

01:23

The time allocated for the task, displays just below the timer.

01:27

If assistance is needed to complete the task, I can click need assistance to send an emergency

01:32

message or to request assistance.

01:34

Then if configured, the other users will receive a notification in OPERA Cloud.

01:39

Once the task is complete, I can update the room status to Clean and then click finish.

01:47

I can turn on the "Go on break" option to indicate an on-break status on the Attendant

01:52

Console in OPERA Cloud.

01:56

I can turn off the 'Go on Break' option to resume my work.

01:58

I click next room to move on to the next room in the list, or to skip a room.

02:02

Or I can double click the next room in the task list to move to the next room.

# Create and Resolve a Room Maintenance Task

00:05

In this video, you will learn how to create and resolve a room maintenance request

00:09

in OPERA cloud. You can create a room maintenance request for any guest room

00:13

with an issue that requires action. In this example, I will create a maintenance request

00:18

for broken air conditioning in a guest room. Let's get started. On the OPERA cloud dashboard,

00:23

you can view the number of resolved and unresolved maintenance requests.

00:28

To create a new maintenance request I go to inventory, room management, and then select

00:34

room maintenance. Then click new. Enter the room number. Next, I click the reason drop-down list

00:41

and select A/C from the list. To assign this request to a specific staff member to action

00:47

I can select a person from the user drop-down list. I add comments to the remarks section

00:55

and then click Save. I can click the view icons to change how the requests display.

01:01

Now, when I click on the plus sign next to today I can see the maintenance request I just created

01:06

for today. Now, let's learn how to resolve a maintenance request in OPERA cloud mobile.

01:13

From the OPERA cloud mobile menu tap room maintenance. I can tap the plus icon to create

01:19

---

a new maintenance request or as in this example, I will search for the maintenance request I just

01:24

created. To find the request I tap search. Now, I select all requests from the drop-down list.

01:33

If I selected a person when I created the request in the previous step then I would select assign

01:38

requests. Now, I can see the request I just created. When the request is complete I can

01:44

double-tap the request and select resolve. Now, the maintenance request is marked as resolved.

# Post Charges to a Reservation using Post it

00:05

In this video, you will learn how to use Post it.

00:07

You can use this feature when restocking minibar items in a guest's room or as a Point-of-Sale in the gift shop.

00:13

Let's get started.

00:15

In OPERA Cloud, I click the quick launch menu and then select post it.

00:19

Alternatively, I could go to the financials menu, select cashiering, and then select post it.

00:26

I enter my PIN and then select login.

00:30

Now, I click the drinks and snack items the guest consumed from the minibar to add the items to the cart.

00:36

I click the red x to remove an item.

00:39

Next, I click pay.

00:41

Now, I can enter the payment information to settle the cart to cash or credit card.

00:46

Or I can select the checkbox to "charge to a room".

00:50

In this example, I select the check box charge to a room.

00:53

Then I enter a room number and click search.

00:56

I select the inhouse reservation from the list, and click Complete sales.

01:01

---

Now, a charge for the minibar items is posted to the reservation.

# Managing Reservation Billing

00:06

In this video you will learn how to post charges, make payments, view the guest's folio,

00:11

and manage the billing options for a reservation. Let's get started. First to find the reservation

00:17

click front desk and then in-house. Enter the room number and click search. Next click the

00:24

arrow to open the I want to menu. On the I want to menu I can access actions related

00:30

to this reservation including the action to check out early, edit payment instructions,

00:35

set up routing instructions, or to go to the profile, or the reservation. In this example,

00:41

I click billing to go to the billing details for this reservation. I can click the split view

00:46

option to view window number one and window number two side by side, or I can click the arrow to open

00:52

a list and select a different billing window to view in the panel. Next to add a charge to the

00:57

reservation I click post charge. Each reservation has up to eight separate billing windows.

01:04

Now click the code magnifying glass to select a code from the list and then click select. In this

01:10

example, the billing window number two is selected and I enter one thousand dollars as the price.

01:16

I could change the quantity but in the example I leave the quantity as

01:20

---

one and then click apply charge. Now I can see on billing window number two the one thousand

01:27

dollar banquet beverage charge is applied. I click the information folio to preview,

01:33

print, download, or email an information folio for this reservation. In this example I select email

01:43

add an email address,

01:47

and then click save. Then I click process to send the folio by email. I can click the vertical

01:54

ellipsis to view more options for each billing window including edit posting, transfer posting,

02:00

or to generate an interim folio. To add another reservation in billing I click other reservation

02:06

and then click add a reservation. Now I can click search. Select the check box next to the

02:13

reservation you want to add and then click select. Now I see the reservation is added and I can

02:19

switch between the two reservations. To transfer charges between billing windows or reservations

02:24

select the check box of the charges you want to transfer and then drag and drop the posting

02:29

from one window to another window or to another reservation listed. To post a payment to a window

02:36

click post payment. Now window 1 is selected. If needed I can click any window to post another

02:41

---

payment. Next I enter the amount 1058.80. I can select any payment method from the list and then

02:49

click apply payment. Now I can select preview, email to print for a pdf version or to email

02:56

and then click process. Now I see the billing window number one is paid with a zero balance.

---

# Create an Accounts Receivable Account

00:06

In this video, you will learn how to create an accounts receivable account for a company.

00:11

Let's get started. In OPERA cloud go to financials, select accounts receivable, and

00:17

then select manage accounts receivables. You can search for an existing account or to create a new

00:22

A/R account I click the I want to menu. And then click account. Now, I can search for the company

00:29

profile or create a new company profile. In this example, I will search for a profile. I select

00:35

company from the drop-down list. Next, I'll enter the company name and any optional information,

00:41

then click search. Now, to select the profile click the row and then click select. Select

00:48

the primary account checkbox to designate this account as the primary account for the company.

00:53

Select the permanent account checkbox if this account is a permanent accounts receivables

00:58

account. Permanent A/R accounts will not be purged when the account has a zero balance.

01:03

Click the account type magnifying glass and select the account type from the list,

01:08

then click select. Enter a unique A/R account number. If you want to include

01:14

---

this account in batch statements, then select the check box include in batch statements.

01:20

Next, click the address magnifying glass. I can edit delete or create a new address for this ar

01:26

account. In this example, I click edit to add the name of the city and click save. Next, click the

01:32

address and then click Select, and then click Save. Now, I see the A/R account setup for this

01:40

profile. I can click the arrow to open the I want to menu, or I can click the account number to view

01:46

the details for this A/R account. Now, to confirm this A/R account saved to the profile I must find

01:52

the profile. Let's go to client relations, profiles, and then select manage profile.

01:58

Next, click the I want to menu to see the list of recently viewed profiles. Then click the profile

02:04

name. Now, on the profile, I see the number one next to the account receivables link indicating

02:10

there is one A/R account for this profile. Click the account receivables link. Now,

02:15

I can click manage and then the arrow to open the I want to menu. Click account to go to

02:20

the A/R account and view an account overview and a list of actions for this A/R account.

---

# Manage AR Accounts, Invoices, and Payments

00:06

In this video you will learn how to view and manage accounts receivable invoices

00:10

in OPERA cloud. Let's get started. First let's transfer any front office guest ledger invoices

00:18

settled with the AR direct bill payment method through to their respective AR accounts.

00:25

AR direct bill settlement is often used when a company is accepting chargebacks for specific

00:29

charges such as, meals and accommodation for an employee. Go to financials, account receivables

00:37

then select direct bill transfer. To view a list of direct bill invoices ready for transfer into

00:43

AR, Click search. Next select an invoice to view the folio, manage invoice details, or go to the

00:51

AR account. I can use this area to confirm the correct AR account is linked to the invoice and

00:56

to verify the invoice charges against any purchase order received. In this example I select the check

01:02

box next to the invoices I want to transfer into AR, and then select transfer selected invoices.

01:08

If the direct billing invoices are not manually transferred, as in this example, then you can

01:14

---

set up OPERA cloud to auto transfer direct bill invoices during the end of day process. Next  
01:20

let's learn how to manage invoices in accounts receivable. First to find the AR account, go  
01:26

to financials, select accounts receivables, then select manage accounts receivables. Click  
search.  
01:36

Now click the balance to open manage account invoices for the AR account.  
01:41

Select the check box next to the invoice. Now I have the option to manage the invoice  
details,  
01:47

view the folio, edit the invoice, transfer, finalize or apply a payment to the invoice.  
01:54

In this example I select apply payment to settle the invoice.  
02:00

Next I select the method magnifying glass and select the payment method from the list  
02:06

and then click select. You can select to apply the payment as an unallocated payment to the  
the  
02:13

AR account or to the oldest invoice. In this example, I select the option to apply the  
payment  
02:20

to the selected invoices. Now enter the credit card number, expiration date, and the amount.  
02:31

Click save payment, and then click post payments. You can select the option to  
02:38

email or print a payment receipt, then select the report destination, and then click process.  
02:44

Now you can see the invoice payment and the batch report successfully processed. Click  
close. Now  
02:52

let's learn how to create an invoice. Click new. Create the invoice with the default information  
or  
02:59

---

I can change the invoice name, source, or market code, in room class if needed. In this example,

03:05

I leave the default values. Enter the price, then select the transaction code magnifying glass

03:14

and select the code from the list, then click select. You can click add row to add more

03:20

amounts to the invoice. Then click the green check mark to post the charge. Any additional

03:25

taxes or charges are calculated and displayed. Then click create invoice. A new invoice for

03:31

100 dollars is displayed in the AR account. Next let's learn how to transfer this invoice.

03:37

Select the check box next to the invoice and click transfer. To find the AR account to

03:43

transfer the invoice to I can enter any search criteria, and then click search.

03:49

Select the destination AR account from the list of results and then scroll down and click select.

03:56

Then click transfer. Now let's go to the manage account invoices to confirm the invoice transfer

04:02

to the destination AR account. Go to financials, account receivables and then select manage account

04:10

receivables. Click search. Click the AR account balance. Now I see the invoice 9110 has been

04:19

transferred to the Acme Corporate AR account and the transferred column displays a check mark. Next

04:26

let's learn how to finalize an invoice. Once an invoice is finalized you can no

---

04:31

longer make adjustments to the invoice. Select the checkbox next to the invoices you want to finalize

04:38

and then click finalize invoice. Now I see finalized just below the invoice number.

04:45

Finally, let's learn how to combine and compress multiple invoices into a single invoice.

04:51

First I select multiple invoices and then click compress invoices. Now enter any information.

04:59

In this example I enter Thursday's invoices in the supplement field then click compress

05:06

invoices. Now the parent invoice folder icon displays next to the new parent invoice.

05:12

I can click the plus sign to expand the parent invoice and view the compressed invoice details.

---

# Using Track It

00:06

In this video, you will learn how to use Track It. In this example, I will set up a task request for

00:11

the delivery of luggage to an arriving guest's room and then action the request on the OPERA

00:16

cloud mobile application. Let's get started. To set up a Track It request in OPERA cloud

00:22

go to miscellaneous and then select Track It. Track It manages the storage and delivery of

00:28

guest baggage, parcels, vehicles, and valet parking, and lost items. Click new. Next I select baggage.

00:38

Now I can enter a ticket number. In this example, the ticket number will be the luggage tag number

00:42

on the bags that are delivered to the guest. I click the type magnifying glass and select luggage

00:48

from the list. I can now click select. I click the action magnifying glass and select deliver to room.

00:55

Then click select. To change the number of bags. I click the plus sign to increase the quantity to 2.

01:02

I click the location magnifying glass and select bell desk storeroom to specify the

01:07

current location of the luggage, then click select. Next, I enter the description, black suitcase.

01:14

To link this Track It request to the guests reservation I click the name magnifying glass.

---

01:21

Now I can search for the arrival reservation by entering a variety of options. In this example,

01:27

I enter the room number and click search. Next I click the reservation and click select. Now

01:32

I can see the reservation linked to this new Track It request just created, then click save.

01:38

To find the Track It request I just created, with the open checkbox selected, I click search.

01:44

Now I can see the Track It request I just created. I can click the vertical ellipsis to edit, delete,

01:50

or view the history of this Track It request. Now on a mobile device, I will demonstrate how to view,

01:55

assign, and close this Track It request, once the bags are delivered to the guest. Go to the OPERA

02:01

cloud mobile application and tap Track It requests. In this example, I tap baggage. From the drop-down

02:10

list. I select unassigned requests. Next I tap the Track It request from the list and then tap claim.

02:18

Now I select my requests from the drop-down list. Then, after the suitcases are delivered

02:23

to the guest I can select delivered item completed from the action drop-down list.

---

# Using OPERA Cloud Reports

00:06

In this video, you will learn how to generate reports in OPERA Cloud.

00:10

Let's get started.

00:11

Go to reports, and then select manage reports.

00:14

I can search for a report by report name or I can select a report group from the drop-down

00:19

list to view a list of reports for the report group.

00:23

The report groups available depend on the report group tasks assigned to your user's

00:27

role.

00:28

In this example, to see a list of all reports, I select all report groups and then click

00:33

search.

00:34

I can generate a report with the default parameters or I can choose to edit the report parameters

00:39

before generating the report.

00:42

In this example, I select the option to edit the report parameters to change the default

00:47

report parameters for the reservation forecast report.

00:50

Now, I can select a date range and change any of the other report parameters.

00:54

---

I can choose to select a specific rate code for this report from the drop-down list, or

00:59

as in this example, I select all rate codes.

01:02

Next, I can select the option to generate the report, I can download, email, or preview

01:08

the report.

01:09

I can download the report in any of the following formats: HTML, RTF, PDF, XML, Delimited, Delimited

01:18

Data, and Excel which can be used for BI Publisher-based reports.

01:22

Or I can email to one or more recipients by using a comma between email addresses.

01:27

In this example, I select to preview the report as a PDF, and then I can print the report

01:32

to a local or network printer.

01:34

Now, I see the reservation forecast PDF report.

01:37

I can download or print the report directly from the browser.

01:40

Let's take a look at another report.

01:42

Now, I select the AR Activity report from the reports list.

01:46

And then click the edit report parameters option.

01:48

I can change any of the AR activity report parameters.

01:52

And then I click to preview the AR Activity report.

01:54

Now, I can view the AR Activity report.

---

# Create and Manage Scheduled Reports

00:06

In this video you will learn how to create and manage a scheduled report. Using the

00:10

report scheduler you can schedule reports to automatically generate at a specific time interval

00:15

and frequency to selected destinations. Let's get started. In OPERA cloud go to reports and then

00:21

select manage reports. In this example, I select arrival from the report group drop down list

00:27

and then click search. Now I select the arrivals detailed report from the list and then click the

00:33

vertical ellipsis and select schedule report. Next I step through the process to configure the report

00:39

parameters, the time intervals, and the report destination. I can configure the schedule to

00:45

dynamically calculate the arrival date for the report. In this example, to schedule the report

00:50

to generate with tomorrow's arrivals I select the business date from the activity date range

00:55

options and then click plus one. Now I can see the validate date option displays the date range

01:00

configured for this report. In this example, the report runs today and generates for tomorrow's

01:05

date. Next, select any search criteria or options to configure what outputs on the

---

01:10

report. In this example, room number is selected. Next I can use the arrows to select the sort order

01:17

and then click next. Now I can define the report intervals including the start date and time

01:23

and how often the report repeats. To set the report schedule to run indefinitely do not select

01:28

an end date. In this example I select repeat and one day intervals and then I set the time to 12 pm.

01:36

Then click next. Now the report is scheduled to run every day at 12 pm. To define the

01:43

report destination I change the file name to arrivals report and I select a file type

01:49

from the drop-down list. In this example I select pdf, then click new. From the mode drop-down list

01:57

I can select to email, print or post the pdf to an ftp server by selecting sftp.

02:04

In this example, I select to email the report in pdf format. Then I enter the recipient's email

02:11

address and click save. Now I click manage scheduled reports to see a list of all the

02:17

scheduled reports including the scheduled report I just created. I can pause the report schedule

02:23

by turning the reported scheduled toggle off. Now I can click the vertical ellipsis to edit, delete,

02:29

or view the report destinations, or I can choose to run the report right now. Then click ok to confirm.

---

# Importing Data to OPERA Cloud

00:06

In this video, I will demonstrate importing data to a fully configured OPERA Cloud property.

00:14

The files imported must match the current OPERA Cloud property configuration and you

00:18

can not change the data using the import process.

00:22

You can use the import data option to import the following data types: Guest and Contact

00:27

Profiles, Sales Accounts, Sales Activities, Account and Contact relationships, future

00:35

reservations, catering events, Blocks including the Room/Rate Grid for current and future blocks.

00:40

Now, let's take a look at how to import data into OPERA Cloud.

00:44

Click the hamburger menu, and then select Toolbox.

00:50

Select System Setup, and then click Import Data.

00:54

Click Download Templates, and then click ok to download and save the templates.zip file.

01:00

The zip file contains CSV templates for each data type and a readme file with prerequisites,

01:01

requirements, and instructions on how to import the files.

01:02

Open the ZIP file and extract the files.

01:04

---

Now, I can see CSV template files for each data type and the readme.txt file.

01:10

Next, I can click on and open the readme.txt to review the file names, requirements, prerequisites,

01:18

the mandatory columns for each CSV file, and the instructions for importing the files.

01:25

For example, each data file created must not exceed the maximum file size of 10MB and you

01:31

can upload and import multiple files per data type.

01:35

Now, let's go back to OPERA Cloud to continue the data import process.

01:41

The property I am logged into displays or I can click the magnifying glass to select

01:46

another property.

01:48

And then click import data.

01:51

Now, click add data types to import.

01:54

Next, enter the number of files to upload for each data type.

01:59

In this example, I enter 1 account, 1 profile, 1 relationship, and 3 reservation data type

02:06

files.

02:07

And then click add.

02:09

This process adds 6 rows, one for each file.

02:12

Next, I click select/upload file to upload the accounts file.

02:17

Now, I navigate to the file and then click open to select the file.

---

02:21

And then click ok.

02:24

Now, I can see the file uploaded successfully,

02:29

After the first file uploads, I can click the save and close option, and then anyone

02:34

assigned with the import data task can continue and complete the import process within the

02:39

next 14 days.

02:42

I can remove unused rows by clicking the vertical ellipsis and then selecting remove unused row.

02:48

Next, I click select/upload file and browse for the rest of the CSV files for each data

02:54

type and then click ok.

02:58

Once all the files are uploaded successfully, click validate data.

03:03

If any errors are generated I can click on the link to view the details or I can click

03:08

the vertical ellipsis to download the error log file.

03:11

Next, I save the file and click ok.

03:15

The CSV error file contains a unique identifier and the error message description.

03:22

Now, I can fix the error and re-upload the corrected file.

03:29

First, remove the existing file with the error by clicking the vertical ellipsis and then

03:34

select remove uploaded file.

---

03:39

Click ok.

03:41

Once the file is removed, I can re-upload the file with the corrections.

03:53

Click on validate data again.

03:55

Now, I can see all the files are successfully validated.

03:59

And then click on import validated data.

04:05

And then click on import data into opera.

04:08

This imports the data to opera cloud.

04:12

I can see the import is successful.

04:15

You can view the import log for 14 days.

04:18

including the file name, import status, the date and the user name.

04:23

Now, I click on close import.

04:32

Click ok to continue.

04:34

Now, let's take a look at the import logs in the changes log for opera cloud.

04:41

Click on the main hamburger menu, and then click Opera cloud to go back to the application.

04:47

Go to Miscellaneous, and then click changes log.

04:50

Next, from the group drop-down list select Miscellaneous.

04:55

---

And then from the action type drop-down menu select import data.

05:00

I can change the dates if needed, and then click search.

05:04

Now, I can see the list of actions for my user including the date, time, action type,

05:10

and description.

# Configure and View Sell Messages

00:06

In this video, you will learn how to configure and view sell messages.

00:10

An Administrator can configure sell messages to display on specific screens, and for specific

00:16

dates, ensuring the sell messages are relevant to the agent's workflow for a specific time

00:21

frame.

00:22

Let's get started.

00:23

First, to configure the sell messages click the hamburger menu and go to Administration.

00:30

Click Bookings, Marketing management, and then select sell messages.

00:40

Now, I see the list of sell messages for the property and the date range.

00:45

Let's click new to add a new sell message.

00:48

Enter the new sell message text, now.

00:51

I can specify to setup the sell message globally for all properties, for a hub, or for a specific

00:58

property by selecting the respective option.

01:02

I can specify a begin and end date for the message to display for a specific date range.

01:07

Next, I can select a language for this sell message, ensuring the appropriate sell message

01:11

displays based on a user's native language.

---

01:15

And then I click the display sell messages magnifying glass to select one or more areas

01:20

of the application to display this new sell message.

01:25

The options available in this list depends on the Cloud Services active at the property.

01:30

In the example, I select the checkbox for the Group Rooms Control screen and then click

01:37

select.

01:38

Click save.

01:40

Now, I can see the Sell Message I just created for the Group Rooms Control screen.

01:51

I can click the vertical ellipsis to edit or delete each sell message.

01:56

Now, let's take a look at how the sell message displays in OPERA Cloud.

02:01

Go to bookings, blocks, and then select group rooms control.

02:06

I enter date and then click Search.

02:10

Now, I can see the sell message I recently added displaying here.

02:15

I can click the sell messages link to display or hide all the sell messages on this screen.

# Using the OPERA Cloud Digital Assistant

00:05

In this video, you will learn how to use the OPERA Cloud Digital Assistant.

00:09

The OPERA Cloud Digital Assistant is a chatbot that helps you accomplish a variety of tasks

00:15

using natural language conversations. You can interact with the Digital Assistant

00:20

by using the keyboard or by speaking through the microphone of the device.

00:25

The digital assistant is available for the OPERA Cloud desktop and mobile applications.

00:30

Updates made using the digital assistant are tracked in the

00:34

Changes Log with your user name. At this time, the digital assistant

00:38

is only available in English and only for one specific property at a time.

00:42

Let's get started. In the lower right,

00:45

click or tap the conversation icon to open the OPERA Cloud Digital Assistant.

00:50

To clear the content of the previous chat, click the conversation icon with an X on the

00:55

top navigation bar of the Digital Assistant. To interact with the digital assistant I can click

01:01

the microphone icon and speak through the device microphone to initiate the conversation.

01:07

Or I can type to initiate the conversation. To turn on the digital assistant's audio reply,

01:13

I can click the speaker icon and the chatbot responses will be read out loud.

---

01:18

I can click the speaker icon again to mute the audio responses.

01:22

In this example, I will use the keyboard to type the conversation.

01:27

I enter "Hi" and then click the arrow. Now, I see a list of options.

01:33

I click the arrows to scroll through the available options.

01:37

Now, I can check the following options: tonight's Maximum occupancy, the expected arrivals for

01:44

today, or the expected departures for today. Next, I can check a room status or update the

01:50

status for a room from clean to dirty. Or I can check in or check out a reservation.

01:57

Now, let's take a look at the house status statistics.

02:01

In this example, I type arrivals. Now, I see the options to view

02:06

tonight's maximum occupancy, today's expected arrivals or departures.

02:13

In this example, I tap expected arrivals today.

02:18

Now, I see the expected arrivals for today including the property name,

02:22

date, expected number of people and the number of expected rooms for today's

02:27

arrival reservations. I enter arrivals again,

02:31

and then click tomorrow. Now, I see the expected arrivals for tomorrow.

02:37

Let's check in a reservation. Type check in.

---

02:41

Next, I select the confirmation number option.

02:44

I enter the confirmation number and then click the arrow.

02:49

The reservation details display, and then I click check in.

02:54

Next, a successful reservation check in message displays for

02:57

room 13. Next,

03:00

I enter "Hi" for a list of available options. I click the arrows to scroll through the options,

03:07

and then click Check Room Status. And then I enter a room.

03:12

Now, I can see the room is dirty and I have the option to update the housekeeping room status

03:17

or to check another room status. I click update room status

03:22

and then click clean.

03:24

Now, I see Room 13 is updated and is now clean.

---

# View Room Availability for Blocks Using Group Rooms Control

00:06

In this video, you will learn how to create a block and allocate rooms on

00:10

the room and rate grid. Let's get started.

00:14

First, I will create a new block. In Opera Cloud go to Bookings, select Blocks,

00:20

and then select Manage Block. I click create block.

00:25

I click the property magnifying glass and select a property from the list.

00:27

Next, I click the account magnifying glass. To link a company, I enter the company name,

00:34

and then click search. Now, I see a list of company accounts on the left,

00:39

once I select an account any linked contacts display on the right.

00:43

Or I can click the I want to menu to create a new company profile.

00:48

In this example, I select an company account and then scroll down to select the account only.

00:58

I update the default block name to company conference.

01:03

Next, I complete the required fields. I click the market magnifying glass,

01:08

to select the market from the list and then click select.

01:12

Next, click the source magnifying glass and select the source from the list

---

01:19

and then click select.

01:22

Now, click the reservation type magnifying glass, select the reservation type from the list

01:27

and then click select. I can scroll down to complete any additional

01:32

room details or catering details for the block. In this example, the rate code is mandatory.

01:39

I click the rate code magnifying glass to select a rate code from the list and then click select.

01:47

Next, I click Yes, to automatically update the

01:51

market and source code for the selected rate code.

01:55

This property has the OPERA Cloud Sales and Event Management Premium Cloud Service active,

02:00

so now I have the option to quickly setup the block room allocation by selecting a room pool,

02:05

entering the number of rooms to allocate, and I can also enter a rate amount or define the

02:10

cut off date or days. For the catering details,

02:13

I must enter the number of event attendees. Next, I click save and go to room grid to

02:18

manage the room allocation for this block. Now, I see the house availability per room type

02:23

for the block dates and I also see there are zero rooms allocated to the block right now.

02:28

If I click to expand the rates, I can see the pricing for 1-4 adults room occupancy display

02:33

---

because I previously selected the rate code when creating this block.

02:38

Now, to allocate rooms to this block, I click the actions menu,

02:42

and then click Load Room Grid. I can specify the date range,

02:44

or the days of the week, and the number of rooms per room type for the block.

02:46

On the room grid options, I can specify the days of the week,

02:49

the cut off date or the number of cut off days to release the rooms back to the inventory.

02:54

Entering a cut off date means rooms not picked up with reservations by this date

02:58

are returned to the house availability. Or I can enter a number of cutoff days,

03:03

and instead of assigning one cut off date to release all available rooms for the block,

03:07

defining the number of days for the Cutoff Days releases the rooms one night at a time.

03:12

The cutoff days field is only available if the Cutoff Date field is empty.

03:17

To add 5 standard rooms to the block, I select the checkbox for the standard room type

03:21

and then add 5 to the number of rooms. And then click save and continue.

03:26

Next, I select the deluxe room type and add 5 to the number of rooms,

03:30

and click save and continue. And finally, I select the checkbox

03:34

for the translation6 room type and then add 10 to the number of rooms.

---

03:38

And click save. Now, I can see these

03:41

rooms are allocated to the block. Let's take a look at how to add more

03:44

rooms to the block. Go to the action menu,

03:47

and click the load room grid option. Now, I can select the checkbox next to

03:51

room type, I want to update. Next, I must select the checkbox to

03:55

increase / decrease the number of rooms, and then add the number of rooms.

03:58

If I want to decrease the number of rooms I would enter a negative number.

04:02

In this example, I add 2 standard rooms and then click save.

04:06

Now, I can see the standard room type increased by 2 rooms, from 5 to 7 rooms.

04:12

I can also find the room and rate grid directly from the block.

04:15

Next, I click the block name to go to the block.

04:19

On the block, I can edit the details or I can go to the

04:23

I want to menu to find actions related to this block.

04:27

In this example, I click the option to go to the room and rate grid.

04:33

To view or update the room allocation click manage.

04:38

Now, click actions and then load room grid to make

04:41

---

any more changes to the room allocation for this block.

# Create a Sales Account Profile

00:06

In this video, you will learn how to create a sales account profile.

00:10

A sales account refers to a company, travel agent, or any booking source and is used to

00:16

track statistics for the business. Let's get started.

00:20

In OPERA Cloud go to Client Relations, Profiles, and then select Manage Profile.

00:26

Next, I click the I want to menu, and then click to create a travel agent profile.

00:33

Enter the travel agent name, and any other optional information.

00:39

Click the magnifying glass to select a communication type from the list.

00:43

In this example, I select business phone number and then click select.

00:48

Now, I enter the phone number and the email address.

00:54

Then, I enter the address details. Now, I can select one of the following options;

01:00

to save the profile and add more details, to save and create linked profile, or save.

01:06

In this example, I click save profile and add more details.

01:11

Now, on the travel agent profile I can access any of the detail links to add or edit the details.

01:22

With an OPERA Cloud Sales and Event Management subscription,

01:26

Sales information can be added to Company, Travel Agent, Source, or Contact profiles.

---

01:32

Click the Sales Information link and then click edit to enter the details.

01:37

Now, select the magnifying glass next to each option to select the relevant

01:41

details for this sales account profile. You can select any of the following options:

01:47

territory, priority, business potential, account type, business segments, industry,

01:54

account source, mail action, competition, scope, or the scope city.

02:01

You can use these fields as filters and view the data in

02:04

sales reports to analyze and assist in the sales decision-making.

02:08

And click Save. Click close.

02:12

Let's take a look at negotiated rates. Any profile type can have negotiated rates,

02:18

however negotiated rates are typically associated with companies,

02:22

travel agents, or booking sources with an ongoing relationship or agreement with the property.

02:30

When an agent creates a reservation using the Look to Book Sales screen,

02:34

any negotiated rates associated with the linked profiles display to ensure

02:38

the contracted rate is quoted to the customer. If OPERA Cloud is configured for multiple

02:44

properties, then you can select negotiated rates at one property and distribute

02:49

the rates to the other properties. I can search for rate codes associated

---

02:52

with a property or as in this example, I can assign a negotiated rate code to the profile.

02:59

Click New, and then click the rate code magnifying glass to select a rate code from the list

03:10

and then click select. I can change the start or end dates,

03:14

or change the sequence order for the rate code to display and then click Save.

03:19

Now, let's take a look at Financials for this sales account.

03:23

Click the Financials link.

03:28

Click the vertical ellipse and then click edit.

03:31

Now, I can setup default charge routing instructions for this sales account.

03:35

Routing instructions automatically transfer charges to a billing window

03:38

for the associated profile. A typical scenario for this option

03:42

is to select the routing codes that will automatically transfer the accommodation

03:46

charge to a separate billing window. I search for the available routing

03:50

or charge codes on the left and then select by clicking the right arrow.

03:55

Next, select a payment method from the drop-down list, and update any additional information.

04:02

Select the Auto Populate Routing check box if you want to automatically apply

04:06

these routing instructions to all new reservations linked to

04:09

---

this this profile . And then click Save.

04:13

Now the default routing instructions are saved to this sales account profile.

04:21

Click close.

04:22

Now, let's take a look at how to add notes to the sales account profile.

04:28

Click the Notes link. Click New.

04:30

Change any of the information and then add the note text in the comment field and click save.

04:37

The note displays, select the vertical ellipse to edit or delete the note.

04:43

To see more actions related to this profile, click the I want to menu.

04:47

Now, I can create a new activity, reservation, or block for this profile.

# Setup a Sales Account Forecast

00:04

In this video, you will learn how to set up a sales account forecast details.

00:08

This tracks the expected room nights, room revenue,

00:12

food and beverage revenue, and any other revenue.

00:16

Let's get started.

00:17

First, you must find the sales account.

00:20

In OPERA Cloud, go to client relations, profiles, and then select Manage profile.

00:28

Enter the search criteria to find the account profile.

00:31

Sales accounts are typically company or travel agent profiles.

00:35

In this example, to search for a profile I select travel agent from the drop-down list,

00:40

enter a name, and then click search.

00:43

Next to the Sales Account Profile name I want to create a sales forecast for,

00:47

I click the arrow to open the I want to menu and then click Forecast.

00:53

In this example, click New to enter new sales forecast for this travel agent account profile.

01:01

Click the magnifying glass to select the from and to

01:03

dates to define the time period for the forecast.

---

01:07

The forecast time period can represent calendar months or fiscal time periods,

01:11

and is based on the Forecast Reporting Period Control setting in OPERA Cloud Administration.

01:17

Enter the potential number of room nights to include in this sales forecast time period.

01:23

Enter the potential average rate.

01:26

Now, based on the time period and the average rate,

01:29

the room revenue is automatically calculated.

01:32

I can make adjustments to the room revenue amount.

01:36

And then I have the option to enter the potential Food and Beverage revenue

01:40

and any other expected revenue for this forecast time period.

01:44

Now, I can select save or I can click to save add more, meaning I can save this sales forecast

01:52

and then create another sales forecast for another time period.

02:21

In this example, I create another sale forecast and then click save.

02:26

Now, I see the sales forecast details I just created.

02:30

The first sales forecast detail I just created was for the time period August 2022 until April 2022.

02:38

Next, the second sales forecast detail I created was for February through March 2022.

02:45

---

If you want to delete all the forecast details, select the checkbox at the

02:49

top of the list to select all entries, then click the vertical ellipse and click delete.

02:55

To edit or delete any of the forecast details individually,

02:58

click the checkbox and then click the vertical ellipse next to each forecast detail.

03:03

In this example, I click edit and now I can update any of the details, and then click save.

03:12

Now, I see the forecast link appear for this profile,

03:15

indicating there are forecast details available.

---

# Enrolling Guests in Loyalty Programs

0:05

In this video, you will learn how to enroll a guest in a membership program in OPERA Cloud.

0:11

A membership program is typically a gaming or loyalty program that's configured using

0:16

an API to integrate OPERA Cloud with an external membership system.

0:21

In this example, I will follow the steps to create a new profile and then enroll that profile.

0:27

Let's get started.

0:28

In OPERA Cloud go to client relations, select manage profiles, and then select profile.

0:37

Click the I want to menu... and then click enroll guest.

0:41

This option creates a new profile and then enrolls the guest.

0:45

Alternatively, if you want to enroll an existing profile.

0:49

You can find the existing profile and then click the I want to menu.

0:54

Now, I select the enrollment type from the drop-down list.

0:58

In this example, I select Loyalty from the list.

1:02

I enter the guest's name, and then scroll down and select the type magnifying glass.

1:10

Select a communication type from the list,

---

1:13

and then click select. Enter the communication value,

1:17

in this example I enter business phone number and then an email address.

1:24

Next, I enter the guest's address. Click the Address Type magnifying glass, select

1:30

business address, and then click select. Enter the address details,

1:37

and then click enroll to add more details. Now, I see the profile was successfully

1:42

created. And I see the

1:44

next to the membership link displays a number 1, indicating the enrollment was successful.

1:49

Now, I can click the membership link to edit, delete or view more details.

---

# Using Profile Lookup from an External System

0:06

In this video, you will learn how to lookup a profile in an external system

0:10

and then download the profile to OPERA Cloud. You can use this option when another system

0:15

manages the profile data and integrates with OPERA Cloud.

0:19

Let's get started. To lookup a profile go to Client Relations,

0:24

Profiles, and then select Manage Profile. Next enter the guest's name, select the

0:32

external system from the Lookup Profile drop-down list, and then click search.

0:39

Now, I see the tabs at the top of the search results, each tab represents an integrated

0:44

external system. Click the tab to view

0:47

the profiles from the external system. The number of profiles returned from the external

0:52

system displays as a number on the tab. In this example, on the last tab I see the

0:58

number one next to the external system name. Scroll to the right to view more details.

1:04

In this example, I click the vertical ellipse and then select the option to download the profile.

1:16

Downloading the profile adds the profile to OPERA Cloud.

1:21

---

Now, I see the profile in OPERA Cloud.

---

# Using AI Room Assignment

0:06

In this video, you will learn how to run the AI Room Assignment, which uses artificial

0:11

intelligence and data science to auto-assign rooms and upgrade rooms for today's arrivals.

0:17

Rooms are assigned and upgraded based on a cost analysis calculated by AI which considers

0:22

the guest preferences.

0:24

When the AI room assignment OPERA control is turned on and your user is assigned the

0:31

AI room assignment task, then you can run the AI room

0:41

assignment.

0:42

Let's get started.

0:44

To run the AI Room assignment process for today's arrivals, go to Front Desk, and then

0:49

select Arrivals.

0:54

Click the I want to menu, and then click AI Room Assignment.

1:02

Confirm or select a property, and then click Run Now.

1:07

This process may take several minutes to apply.

1:11

Next, click search to display the list of arrival reservations.

---

1:16

If AI or AI upgrade appears is next to the room, then the room was assigned or upgraded

1:21

based on the AI calculations.

1:24

To choose a different room for the reservation, I can click the room.

1:28

And then click select another room.

1:32

Now, I can search for another room based on room status, room type, or other features.

1:38

If the AI display order check box is selected then the rooms automatically display, according

1:44

to the lowest cost and the guest preferences.

1:47

For example, the rooms at the top of the list have a lower cost and satisfy the guest's

1:53

preferences.

1:54

Now, I can select the room options and then click search.

1:58

Next, select the room and then click accept room selection.

2:05

Now, I see the new room is assigned to the reservation.

2:11

Let's take a look at the OPERA Cloud dashboard.

2:15

I see an AI Room Assignment dashboard tile that displays various AI Room Assignment statistics.

2:22

I can scroll through the dates to view the number of rooms assigned by AI for the different

2:26

days.

2:27

---

In this example, I see the AI room assignment is not applied to the rooms for Monday, July

2:32

13th.

2:33

And I see July 12th now shows the % of rooms assigned by AI is 90.91% because we just ran

2:41

the AI room assignment process.

# Create a Reservation

0:05

In this video, you will learn how to create a reservation in OPERA Cloud.

0:11

Let's get started.

0:13

Go to Bookings, Reservations, and then select the Look to Book Sales Screen.

0:20

If configured, you may be prompted to enter any information about the person who called

0:24

to make the reservation.

0:27

In this example, I enter the caller's name and phone number.

0:31

And then click New Reservation.

0:34

You can review and close any sell messages.

0:38

Sell messages typically mention special promotions to offer the guest or events near the property.

0:44

Now, I select the arrival date, the number of nights, number of rooms, adults, and children

0:51

for this reservation.

0:53

I can search for or create a guest profile now, or later in this process.

0:59

In this example, I click search to view the room type and rate availability.

1:05

Now, I see the best available rates, including the number of available rooms for each room

1:10

type.

---

1:12

I click the property name to view the Property Brochure and find out more about the amenities,

1:18

transportation, and local attractions for this property.

1:24

If the reservation is for more than one night, then I can toggle between viewing the nightly

1:28

rate, the average rate, or the total cost of the stay for each room type and rate.

1:36

Click the price tabs to view the details about each room type and rate.

1:40

I can click the room image to view more photos for this room type.

1:45

I click view policies to see the rate's deposit and cancellation policy for each reservation

1:50

type.

1:52

I click Show Estimated Amount to view the estimated amounts for each reservation type.

1:58

Next, I click the X to close the details for this room type and rate.

2:03

Now, I click "initial display set" to view more available rooms and rates.

2:11

Or click next rates to view the next best available rate, and continue to browse rates.

2:21

Click the plus sign to expand and view the room details for the rate.

2:26

To book the reservation for this room type, click select.

2:33

On the left, I see the reservation Stay Information displays including a summary of the deposit

---

2:38

or cancellation policy.

2:40

Next, I click the magnifying glass to search for an existing guest profile.

2:46

Alternatively, I could click the link to create a new profile.

2:51

Now, I enter the guest's last name and then click search.

2:58

If there are external solutions integrated with OPERA Cloud, then I see the solution

3:02

appear as a tab, that I can click to view and download the profiles available from that

3:06

external solution.

3:08

In this example, I select the profile from the list and then scroll down to click select.

3:15

The room type and rate amount are pre-populated based on the what I selected on the Look to

3:19

Book screen.

3:21

Next, I enter the a market code and source code for statistical tracking.

3:27

In some cases, the market and source code fields are automatically populated based on

3:32

the rate code.

3:33

Now, I click the packages magnifying glass to add a packages or items.

3:40

In this example, I add an 18 hole golf package.

3:45

I can add more packages by changing the number or I can change the date for the package.

3:51

---

In this example, I enter 4.

3:55

And then click continue booking.

3:59

Next, I click the items magnifying glass.

4:05

If an item is available to add to the reservation, then the number of items is highlighted in

4:09

the date column.

4:11

I click the green check mark to confirm, and then click continue booking.

4:16

In this example, I click to add an extra bed to the reservation, on Monday June 20th.

4:22

Now, I see the packages and items I added included in the Reservation Stay information.

4:29

If needed, I click more to go to the membership details or to go to the charge routing instructions

4:34

for this reservation.

4:36

To set up a share reservation, I can click add a sharing guest.

4:41

I can click show more to add special requests, or to add the guest's smoking preference.

4:47

Next, I scroll down to enter the payment information.

4:51

Select the payment method from the drop-down list, and then click book now.

4:57

if configured, you may see a closing script to read to the caller confirming the reservation

5:01

---

details.

5:04

Click confirm.

5:05

Now, I see the confirmation number for the new reservation I just created.

5:11

I can scroll down to view any information or actions for this reservation.

---

# Posting Charges to an Event

0:06

In this video, you will learn how to post charges to an event for a block.

0:10

In OPERA Cloud go to Bookings, Events, and then select Event Posting.

0:16

Now, I can click modify the search criteria, to enter the block id, the block name, or

0:23

the event id to search for events.

0:25

To view the events for this morning, I could enter a time, for example, if I enter 8am

0:30

I would see all the events after 8am.

0:34

In this example, I enter the block id to view all the events for the block, and then click

0:39

search.

0:41

The event search criteria displays at the top of the page.

0:46

To post event charges, the events must have a posting master checked in, and the events

0:51

must be in the actual status.

0:54

I can select the transaction code magnifying glass to change the transaction code for the

0:59

revenue charge.

1:01

The available transaction codes depend on the property's configuration.

1:05

---

The system administrator configures for revenue type mapping to determine which transaction

1:10

codes are available based on the event type, space, catering value, or the revenue type.

1:16

Next, I select the checkbox at the top of the list to select all of the revenue charges.

1:23

And then click post, to post the charges to the event.

1:28

Now, enter your cashiering id and pin, which is required to post charges to an event.

1:35

And then click login.

1:38

Now, I see the charges display in a green color, this indicates the charges are now

1:44

posted to the event.

1:46

Now, let's take a look at how to create a banquet check for the event.

1:50

I select the check box next to the revenue amount and then, click the I Want to menu.

1:57

Click banquet check, to create the Banquet check for this block.

2:00

Now, if multiple accounts or contacts linked to the block, I can click either the bank

2:05

account or the point of contact magnifying glass to select the relevant accounts that

2:10

will print on the banquet check.

2:18

I can select the checkbox, to break the page per day, include the PMS posting, or I can

2:25

select to display the discount on the banquet check.

2:30

I can also select the printing method, to display the revenue summary, or I can specify

---

2:35

the currency that prints on the banquet check.

2:38

Next, I can select to preview, email or to download the banquet check.

2:44

In this example, I select preview.

2:48

And then click process.

2:50

Now, I see the banquet check I just created for this block.

2:56

Click close to go back to the application.

3:09

If the guest has a question about what's posted to their posting master account for the event,

3:14

I can go to billing to see exactly what's posted to the guest folio.

3:17

Let's take a look at how to review the guest's billing charges.

3:18

In this example, I will go to the next event by clicking the event id.

3:19

Then click the I want to menu, and click billing.

3:22

Now, enter your cashiering id and PIN, and click Login.

3:28

In billing, I can view the guest's charges on the folio.

# Change the Priority of Queue Reservation

00:00

[Music]

00:04

In this video, you will learn how to prioritize reservations in the queue.

0:09

In this example, I click the queue reservations dashboard tile.

0:14

Now, I see the list of reservations in the queue.

0:18

Click the queue priority number to see the queue details.

0:22

Click the plus or minus to change the priority number for this reservation in the queue.

0:28

Click the vertical ellipse to remove the reservation from the queue, check in the

0:32

reservation, assign a room, or send a text to notify housekeeping to get this room ready.

0:40

If configured, I can send a text to a guest to let them know their room is ready.

0:45

Or I can click prioritize to move this reservation to the top of the queue.

0:50

Now, I see the reservation is prioritized at the top of the list, click OK.

0:56

Click the confirmation number to go to the reservation.

0:59

Now, I can see this reservation is queue priority #1 on the wait-list.

1:05

To change the sort order of the reservations in the queue

1:08

select different options from the drop-down list.

---

1:11

Let's take a look at how to prioritize the guest who waited the longest time to be next

1:16

in the queue and receive the next available room.

1:20

In this example, I can select queue wait time descending,

1:24

Click the queue priority number at the top of the list and with the longest queue wait time.

1:32

And then click prioritize to move this reservation to the top of the list.

1:50

To update the queue wait times for each reservation,

1:53

I can click search to refresh the list.

# Managing Opportunities

00:00

[Music]

Transcript

0:06

In this video, you will learn how to Manage Opportunities to track and manage all prospective

0:10

business inquiries.

0:12

Opportunities provide the ability to quickly capture and manage perspective business inquiries

0:16

from existing and new customers.

0:19

Let's get started.

0:20

In OPERA Cloud, go to Bookings, blocks, and then select Manage Block.

0:27

Click the I Want To ... menu then select Create Opportunity.

0:33

In the Block Definition panel, enter a property, start date, end date, Block Name, Block Code,

0:41

Reservation Type and any additional information.

0:45

In the Room Details panel, I can select a Rate Code from the Rate code magnifying glass

0:49

and then click select.

0:51

I can select a Room type from the Room type magnifying glass and then click select.

0:56

Next, click save to save the details for the Opportunity.

1:00

---

Or I can click Save and Manage Block to open Block Presentation.

1:04

In the Block Overview panel, I can click Edit to add more details to the Opportunity.

1:10

Then click Save.

1:11

I can also click Save and Go To Room Grid to open the Room & Rate Grid.

1:16

In the Room and Rate Grid screen, I can click Edit to allocate rooms and rates for the opportunity.

1:22

And then click Save.

1:24

To Update Opportunities, go to Bookings, blocks, and then select Manage Block.

1:30

In the Manage Block screen, I select the Manage Opportunities check box and then enter any

1:35

additional search criteria

1:37

Then click Search.

1:39

I select the opportunity block in the search result.

1:42

To update the Opportunity I click the I Want to.. menu and then select Block.

1:47

I can update the details by clicking the Edit option and then click Save.

1:53

To convert an opportunity to a confirmed block, select Bookings, Blocks, and then select Manage

1:59

Block.

2:00

I select the Manage Opportunities check box and then enter additional search criteria

---

2:05

Then click Search

2:07

I select the opportunity block in the search result, then click the I Want to.. menu and

2:12

select Convert Opportunity To Block.

2:15

Now, I can see the Block status updated.

2:19

To update the status of an opportunity to lost, in the Manage Block screen, I click

2:23

the I Want to.. menu and select Release Opportunity.

2:28

In the Cancellation Details panel, I can select a cancellation reason from the Block Cancel

2:33

Reasons magnifying glass.

2:35

I can enter a destination and a property name if the opportunity is booked elsewhere.

2:40

To cancel any pseudo room reservations created for the block, I can select the Cancel PM

2:44

Reservations checkbox and select a PM Cancel reason and then click Select.

2:50

The cancellation number is recorded in the Viewing Changes Log Details.

2:54

then click Save.

2:55

Now, I can see the Opportunity status updated to a Lost status.
