Membership Revenue Groups are "sets" of membership revenue types that are treated as a unit when points calculations are based on the revenue generated by the guest. Membership revenue types correspond to the revenue buckets set up on external systems. All revenue buckets must be configured as revenue types for stay transactions, including payment transactions, to be recognized as valid. Membership revenue types must be configured before setting up membership revenue groups.

 **Note:**

Membership Revenue Groups are also associated with Profile Stay Records. The first four membership revenue groups are displayed in the Profile Stay Records and should be configured in the following order in order to display the correct revenue in Profile Stay Records.

- Total Revenue
- Room Revenue
- Food and Beverage Revenue
- Other Revenue

**Adding Membership Revenue Groups**

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Revenue Groups**.
2. Click **New** and enter the following details:
  - a. **Code:** Enter the membership revenue group code.
  - b. **Description:** Enter the description for the revenue group.
  - c. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - d. **Revenue Types:** Select one or more revenue types from the **Available** panel then use the greater than symbol > to move your selection to the **Selected** panel.

 **Note:**

Use the filter to refine the search; enter value and click**Go**.

3. Click **Save**.

**Editing Membership Revenue Groups**

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Revenue Groups**.
2. Enter search criteria, click **Search**.
3. Select the revenue group in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the details.
5. Click **Save**.

### Deleting Membership Revenue Groups

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Revenue Groups**.
2. Enter search criteria, click **Search**.
3. Select the revenue group in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Membership Qualifying Rates

### Loyalty

Qualifying Rates allows you to check or uncheck the **Membership** (eligibility) check box for multiple rate codes in a batch process. Alternatively, the **Membership** check box must be checked or unchecked in the [rate code financial details](#) of each rate code.

### Adding Qualifying Rates

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Qualifying Rates**.
2. Enter search criteria, then click **Search**.
3. Select **Edit**.
  - a. Select the **Qualifying** check box for the rate codes you want to be considered a qualifying rate for a [Membership Point Rule](#).
  - b. As a result, the **Membership** check box is checked in the [rate code financial details](#) .
4. Click **Save**.

### Deleting Qualifying Rates

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Qualifying Rates**.
2. Enter search criteria, then click **Search**.
3. Select **Edit**.
  - a. Uncheck the **Qualifying** check box for the rate codes you no longer want to be considered a qualifying rate for a [Membership Point Rule](#).
  - b. As a result, the **Membership** check box is unchecked in the [rate code financial details](#) .
4. Click **Save**.

## Configuring Membership Revenue Types

[Prerequisites for Membership Revenue Types](#)

Membership revenue types are groupings of revenue types and must be set up prior to [Configuring Membership Revenue Groups](#). Membership revenue types map to property-level profile type [revenue buckets](#).

### Adding Membership Revenue Types

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Revenue Types**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter the membership revenue type code.
  - b. **Description**: Enter the description for the revenue type.
  - c. **Label**: Enter the label for the revenue type.
  - d. **Revenue Bucket Code**: Select the profile revenue bucket code to associate with the above revenue type.
  - e. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing Membership Revenue Types

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Revenue Types**.
2. Enter search criteria, click **Search**.
3. Select the revenue type in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the details.
5. Click **Save**.

### Deleting Membership Revenue Types

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then select **Revenue Types**.
2. Enter search criteria, click **Search**.
3. Select the revenue type in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Membership Status Codes

**Loyalty** Membership status codes may be assigned to individual memberships to define the current standing of the membership. For example, a membership might be characterized as **PERM** (permanent card mailed), **REJ** (does not want to join), **PREF** (preferences need to be selected), and so on, for whatever purposes your organization might have.

### Adding Membership Status Codes

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Status Codes**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the status code.
  - b. **Description**: Enter a description for the status code.
    - i. **Manage Translation**: Click link to configure localized descriptions. For more information, see [Configuring Localized Code Descriptions](#). (Available when the Multi-language OPERA Control is active.)
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing Membership Status Codes

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Status Codes**.
2. Enter search criteria and click **Search**.
3. Select the status code in the search result, then click vertical ellipse **Actions** menu and select **Edit**.
4. Update the details.
5. Click **Save**.

### Deleting Membership Status Codes

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, then **Status Codes**.
2. Enter search criteria and click **Search**.
3. Select the status code in the search result, then click vertical ellipse **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Membership Rate Rules

### [Prerequisites for Configuring Membership Rate Rules](#)

You can offer special rate codes to members booking reservations based on their membership type and level by configuring Membership Rate Rules. When the **Guaranteed Availability for Members** OPERA Control is active, these rate codes can be further guaranteed on days with [rate restrictions](#) to members based on their membership type and level excluding dates with black-out events setup on the property calendar. For more information, see [Configuring \(Calendar\) Event Codes](#).

### Adding Membership Rate Rules

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, and then select **Membership Rate Rules**.

2. Click **New** and enter the following details:
  - a. **Property:** Enter or select the property
  - b. **Rule Code:** Enter a code for the membership rate rule.
  - c. **Description:** Enter a description for the membership rate rule.
  - d. **Rate Codes:** Select rate codes from the list to associate to this membership rate rule.
  - e. **Begin /End Date:** Enter or select dates to define the reservation stay dates for which this membership rate rule will apply.
  - f. **Guaranteed:** Select checkbox if the membership rate rule is to be guaranteed on days with rate restrictions, excluding black out dates. (Available when **Guaranteed Availability for Members** OPERA Control is active).
    - i. **Latest Time of Booking:** Enter the latest time for which the guaranteed rates will be offered.
    - ii. **No. of Days Before Arrival:** Enter the number of days prior to the date of arrival for which the guaranteed rates will be offered.
  - g. Membership Types and Levels:
    - i. **Membership Type:** Select a Membership Type from the list to offer this rule to a specific membership type.
    - ii. **Membership Levels:** Select one or more Membership Levels from the list to offer this rule to specific membership levels.
3. Click **Save**.

#### Editing Membership Rate Rules

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, and then select **Membership Rate Rules**.
2. Enter search criteria and click **Search**.
3. Select the membership rate rule, then click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Update the details.
  - b. **Inactive:** Select to inactive the rule code. Inactive rule codes are not available for future use but are retained for historical purposes.
4. Click **Save**.

#### Deleting Membership Rate Rules

1. From the **Administration** menu, select **Client Relations**, then **Membership Management**, and then select **Membership Rate Rules**.
2. Enter search criteria and click **Search**.
3. Select the membership rate rule, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Profile Management

Use the options from the Profile Management menu to create codes for defining the account types, address formats, address types, titles, alternate language titles, communication types, company types, keywords, and preferences associated with your profiles.

## Configuring Profile Lookup and Download from External Systems

Generic profile lookup and download is used to lookup and fetch profiles from an external system using the OPERA Cloud REST API specifications. Profile lookup is initiated from profile search , and invokes the Profile Lookup service to fetch and display the result received from the external system. The Download action then fetches and saves the selected profile in OPERA Cloud. For more information, see [Using Profile Lookup and Download with Integrated Solutions](#)

### External System Implementation

The external system used for profile lookup must adopt to the OPERA Cloud REST APIs and develop a service based on the **Customer Relationship Management Outbound** specifications published on Oracle Hospitality Integration Platform Developer Portal.

- Implement **getExternalProfiles** to lookup profiles in the external system.
- Implement **downloadExternalProfile** to download a profile from the external system.

 **Note:**

The endpoint URL and authentication details of the external system are needed to configure the Outbound System below.

### OPERA Cloud Implementation

Complete the following configuration in OPERA Cloud to enable profile lookup and download:

#### Outbound System Configuration

Configure an [Configuring Outbound Systems](#) according to the instructions for [CRM Generic for REST API Profile Lookup/Download](#).

When profile sharing is active in chain configuration, configure for Global Context. For more information, see [Configuring Chain](#), configure for Global **Context**..

 **Note:**

An [external system](#) and [external database](#) are auto-configured.

### Outbound Domain Allowlist Configuration

Outbound domain allowlist configuration automates the cloud infrastructure changes required to allow outbound HTTPS communication from OPERA Cloud to the external system.

Configure Outbound Allowlist for the destination **Hostname**, **HTTPS Protocol** and **Port Number**. For more information, see [Configuring Outbound Domain Allow Listings](#).

 **Note:**

When Ready status, perform a test connection; if successful the outbound lookup and download integration is ready.

### OPERA Controls Configuration

For more information, see [OPERA Controls — Profile](#)

1. Activate **Profile Lookup** OPERA Control.
2. Update the **Profile Types for Lookup** OPERA Control to select the profile types for external lookup.
3. Update **External Lookup Behavior** OPERA Control.
  - a. **Force:** Profile Lookup is automatically triggered when no matches are found in OPERA Cloud.
  - b. **Simultaneous:** Profile Lookup is triggered regardless of matches found in OPERA Cloud.
  - c. **Manual:** Profile Lookup is not automatically triggered, until the external system tab is selected in the profile search panel.
4. Update **Default External System for Lookup** OPERA Control to select a default external system. (Applicable when the **External Lookup Behavior** OPERA Control is set to Simultaneous or Force).

### OPERA Cloud Role Configuration

Assign the **Profile Lookup** task to [roles](#).

## Address Formats

Address formats vary by country, according to the requirements of the local postal service. Address format configuration enables you to define the layout of name and address elements for when the <ADDRESSEE\_FULL ADDRESS> merge code is used in a stationery template.

An address format is associated with each [country code](#), resulting in the <ADDRESSEE\_FULL ADDRESS> merge code generating according to the format of the country value within the profile. For example:

- Singapore does not have states; their address format would not need to include this element.
- In Japan, addresses are reversed so that POSTCODE, STATE, and CITY appear on the first line and the guest name appears on the last line.

When the Multi Language OPERA Control is active, you can use the Alternate Name elements (XLAST\_NAME, XFIRST\_NAME, XMIDDLE\_NAME, and XTITLE.) to set up address formats to output the Alternate name (national character set) values (for example, Chinese or Japanese characters). If the alternate name fields are empty on a profile, OPERA Cloud reverts to outputting the primary First name, Last name, Middle name and Title values. Therefore, it is not necessary to use both LAST and XLAST\_NAME within the same address format configuration; if an alternate name is available, the "X-fields" values are output, else the primary name values are output.

## Configuring Address Formats

### Adding an Address Format

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Address Formats**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter a code that briefly describes the address format.
  - b. **Description**: Enter a detailed description of the address format.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - d. **Sales Address Format**: Select checkbox to enable this address format to be selected when generating BEO's, ProForma, Contracts and other Sales and Event Management stationery. (Available when the Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition Or Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition is active).

 **Note:**

The default address format (named SALES ADDR DEFAULT and provided in the SID data) is used for all OPERA Cloud Sales and Event Management Standard Cloud Service catering contracts and documents unless a specific address format has been configured for a given country.

- e. **Available Elements**. Click to choose the elements to include in the address format; hold the CTRL key to select multiple elements. Click the (>) button to move selected elements to the selected elements panel.
- f. **Selected Elements**. Modify the positions of the elements in the text editing area or delete elements as needed. You can use cut (ctrl + x), copy (ctrl + c), and paste (ctrl + v) keyboard shortcuts to relocate elements in the edit area.

 **Note:**

Ensure you select the `country_description` element to output the full country name rather than the country code.

 **Note:**

When the Multi Language OPERA Control is active, you can use the Alternate Name elements (XLAST\_NAME, XFIRST\_NAME, XMIDDLE\_NAME, and XTITLE.) to set up address formats to output the Alternate name (national character set ) values (for example, Chinese or Japanese characters). If the alternate name fields are empty on a profile, OPERA Cloud reverts to outputting the primary First name, Last name, Middle name and Title values. Therefore, it is not necessary to use both LAST and XLAST\_NAME within the same address format configuration; if an alternate name is available, the "X-fields" values are output, else the primary name values are output.

3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

**Editing an Address Format**

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Address Formats**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu, then click **Edit**.
4. Update the configuration.
5. Click **Save**.

**Deleting an Address Format**

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Address Formats**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu, then click **Delete**.
4. Click **Delete** to confirm.

## Configuring Address Types

You can save multiple addresses on a profile. For example, you might add the home address to an individual guest profile. For a company profile, you might add the physical street address for shipping and add the P.O. box address for billing.

 **Note:**

Certain address types are pre-configured in OPERA Cloud and cannot be deleted.

### Adding an Address Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Address Types**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter the code used to represent an address type (for example, HOME, BUSINESS, BILLING, or SHIPPING). The address type cannot exceed 20 characters in length.
  - b. **Description**: Enter a descriptive phrase that classifies the address type (for example, Home Address, Business Address, Billing Address, or Shipping Address).
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** or click **Save and Continue** to save and add another.

### Editing Address Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Address Types**.
2. Enter search criteria and click **Search**.
3. Select the address type in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Address Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Address Types**.
2. Enter search criteria and click **Search**.
3. Select the address type in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Alternate (Name) Language Titles

### Prerequisites for Alternate (Name) Language Titles

In addition to configuring title codes for western languages, you can configure alternate name language title codes using national character sets for Chinese, Japanese, Arabic, Thai, Korean, or Hebrew. An alternate name title is selected for a profile's alternate name details.

### Adding Alternate (Name) Language Titles

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Alternate Language Titles**.
2. Click **New** and complete the following fields:

- a. **Code.** Enter (or paste) the title code in the national character set (using Chinese as an example, 先生 for Xiānshēng / Mr., 公 for Gōng; 小姐 for Xiǎojiě for young woman; or 太太 for Tàitai).
  - b. **Language.** Select the code to be associated with this title. All titles associated with a specified language code are available for selection when that language is chosen in the Language field on the guest Profile screen. The selected language is the language you use to exchange correspondence with the guest or contact rather than the guest's native language.
  - c. **Title Number** (Advanced Title only). Enter a unique number that identifies the unique combination of Title Code, Description, and Language.
  - d. **Salutation.** Enter the default salutation to be populated for the title. The salutation may include merge codes for variable information such as the alternate first name <XFIRSTNAME> and last name <XLASTNAME> on the profile.
  - e. **Envelope Greeting.** (When the Advanced Title application parameter is active, Envelope Greeting appears as the label. When Advanced Title is not active, Business Title appears as the label.) This field identifies the name of the envelope greeting or business title to be used along with the social title, such as Doctor. When this field is populated, the envelope greeting or business title appears in the Titles screen at the Profile Screen. This ensures the correct envelope or business title and code are entered when creating or selecting a profile.
  - f. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit, or click **Save and Continue** to save this Alternate Language Title and add another.

#### Editing Alternate (Name) Language Titles

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Alternate Language Titles**.
2. Enter search criteria and click **Search**.
3. Select the alternate language title in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting an Alternate Language Title

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Alternate Language Titles**.
2. Enter search criteria and click **Search**.
3. Select the alternate language title in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Business Segments

Business segments are used as a method of categorizing sales accounts (company, travel agent and source profiles) for reporting purposes.

### Adding a Business Segment

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Business Segments**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter a code for the business segment.
  - b. **Description**: Enter a description for the business segment.
  - c. **Manage Translation**: Click link to configure localized descriptions. For more information, see [Configuring Localized Code Descriptions](#). (Available when the Multi-language OPERA Control is active.)
  - d. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a Business Segment

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Business Segments**.
2. Enter search criteria and click **Search**.
3. Select the business segment in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting a Business Segment

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Business Segments**.
2. Enter search criteria and click **Search**.
3. Select the business segment in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Communication Types

Communication types identify the methods for communicating with a profile. Each communication type you create is associated with a predefined role: Phone, Fax, Email, Pager, and Web Page. You can configure multiple communication types per role. For example, for the "Phone" role you could configure "Mobile", "Business", "Personal" and "Home".

Once configured, select the mandatory communication types for Guest profiles and Sales Accounts in [OPERA Controls](#).

- **Guest Email Type** - Select the Email Type that is mandatory when creating Guest Profiles.
- **Guest Phone Type** - Select the Phone Type that is mandatory when creating Guest Profiles.

- **Non-Guest Phone Type** - Select the Phone Type that is mandatory when creating Sales Accounts and and Group profiles.

### Adding Communication Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Communication Types**.
2. Click **New** and complete the following:
  - a. **Role**: Select a role from the list: Phone, Fax, Email, or Web Page.
  - b. **Type**: Enter a code for the communication type (for example, Bphone, Mobile, Email, Web).
  - c. **Description**: Enter a description for the communication type.
  - d. **Text Enabled**: Select check box to indicate this communication type supports delivery of text messages (for example, cell or mobile). (Available when the **Text Message Handling** OPERA Control is active and **Role** is Phone).
  - e. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - f. Click **Save** or click **Save and Continue** to add another.

### Editing Communication Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Communication Types**.
2. Enter search criteria and click **Search**.
3. Select the communication type in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Communication Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Communication Types**.
2. Enter search criteria and click **Search**.
3. Select the communication type in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Company Types

### Prerequisites for Company Types

Company Types categorize the types of sales accounts (companies and travel agents) for reporting purposes.

### Adding Company Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Company Types**.

2. Click **New** and complete the following.
  - a. **Code:** Enter an alpha-numeric code for the company type
  - b. **Description:** Enter a description for the company type.
    - i. **Manage Translation:** Click link to configure localized descriptions. For more information, see [Configuring Localized Code Descriptions](#). (Available when the Multi-language OPERA Control is active.)
  - c. **Sequence:** Enter an optional Sequence.
3. Click **Save** to save and exit, or click **Save and Continue** to save this company type and add another.

#### Editing Company Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Company Types**.
2. Enter search criteria and click **Search**.
3. Select a company type in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration
5. Click **Save**.

#### Deleting Company Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Company Types**.
2. Enter search criteria and click **Search**.
3. Select a company type in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm

## Configuring Forecast Types

A potential forecast type is a tag that can be attached to a prediction of the business activity and/or revenue expected from a client in specific revenue categories in a given period. For example, suppose you set up a TARGET forecast type. When you load the potential estimates for Company A using the Potential screen, you can specify that the TARGET forecast consists of an expected \$3500 in food and beverage revenue and \$9500 in room revenue generated by the client in a 3 month period. The Potential screen then enables you to compare the forecasted numbers with actual numbers for the period of interest.

#### Adding a Forecast Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Forecast Types**.
2. Click **New** and complete the following fields:
  - a. **Code:** Enter a code for the forecast type (for example TARGET, F&B, ROOMS, and so on).
  - b. **Description:** Enter a description for the forecast type code.

- c. **Manage Translations:** (Appears when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing a Forecast Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Forecast Types**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis** and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting a Forecast Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Forecast Types**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Delete** to confirm.

## Configuring Frequency

The Frequency (that is, Potential Sales Frequency) feature enables Sales Managers to define the potential revenue and room nights expected of a client during specific periods of time, and, if applicable, for specific destinations. To monitor sales, use potentials as targets for comparison with the actual room nights and revenue generated from the client.

#### Adding a Frequency Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Frequency**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code that represents the frequency (for example, D for daily, WKLY for weekly, MON monthly, and so on).
  - b. **Description.** Enter a description for the frequency code (for example, Daily, Weekly, or Monthly).
  - c. **Manage Translations.** (Appears when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.

3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing a Frequency Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Frequency**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. Update the configuration and click **Save**.

#### Deleting a Frequency Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Frequency**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Delete**.

## Configuring Genders

### Prerequisites for Configuring Genders

Gender is selected in guest or contact profiles. Three genders are seeded on provisioning. You can configure additional genders as needed:

- M-Male
- F-Female
- U-Unknown

Gender can be selected in the following areas:

- [Guest and Contact Profile Identification](#)
- [Loyalty Enrollment](#)
- [Configuring Outbound System](#)
- [Configuring Interface Mapping](#)

### Adding Genders

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Genders**.
2. Click **New** and complete the following:
  - a. **Code:** Enter a code for the Gender Description.
  - b. **Description:** Enter a description for the Gender:
    - i. **Manage Translation:** Click link to configure localized descriptions. For more information, see [Configuring Localized Code Descriptions](#). (Available when the Multi-language OPERA Control is active.)

- c. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing Genders

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Genders**.
2. Enter search criteria and click **Search**.
3. Select the code in the search result, click the vertical ellipsis **Actions** menu then select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Genders

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Genders**.
2. Enter search criteria and click **Search**.
3. Select the code in the search result, click the vertical ellipsis **Actions** menu, and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Inactive Reasons

When a guest, contact or sales account (companies and agents) set to an inactive status (Active unchecked), a reason must be selected to indicate why the profile is inactive.

#### Adding Inactive Reasons

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Inactive Reasons**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code that briefly describes the inactive reason.
  - b. **Description.** Enter a detailed description of the inactive reason.
  - c. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing Inactive Reasons

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Inactive Reasons**.
2. Enter search criteria and click **Search**.

3. Select the inactive reason in the search result, then click vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Inactive Reasons

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Inactive Reasons**.
2. Enter search criteria and click **Search**.
3. Select the inactive reason in the search result, then click vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Keyword Types

### Prerequisites for Keyword Types

You can configure various keyword types and add multiple keywords to a profile (individual, company, agent, or source). You can enter these keywords when searching to make it easier to find a profile.

### Adding a Keyword Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Keyword Types**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter a code that identifies the keyword type. This code appears within the Keyword Type list of values on the Profile screen. (Maximum 10 characters).
  - b. **Description**: Enter the description of the keyword code.
  - c. **Manage Translation**: Click link to configure localized descriptions. For more information, see [Configuring Localized Code Descriptions](#). (Available when the **Multi-language** OPERA Control is active.)
  - d. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - e. **Copy to Subsidiary Profile**: When this option is selected and a profile has an established Company Master to Company Subsidiary or Company Subsidiary to Company Master relationship, you are prompted to copy this keyword type to the profiles established within this relationship type. Deselecting this option does not prompt you to copy the keyword type/ keyword to the subsidiary profiles when this keyword type is added to a profile that has the Company Master relationship defined. This is available for Sales Accounts (Company, Travel Agent, Source profiles) with a relationship defined based on pre-configured master-subsidiary relationship types.
3. Click **Save** to save and exit or click **Save and Continue** to save this Keyword type and add another.

### Editing a Keyword Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Keyword Types**.
2. Enter search criteria and click **Search**.
3. Select the keyword type in the search result, and then click vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting a Keyword Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Keyword Types**.
2. Enter search criteria and click **Search**.
3. Select the keyword type in the search result, and then click vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Location Types

### Prerequisites for Configuring Location Types

A Location type is selected when redeeming an eCertificate. Use this option to configure the applicable locations.

### Adding Location Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Location Types**.
2. Click **New** and complete the following :
  - a. **Code**: Enter a code for the location type
  - b. **Description**: Enter a description for the location type
    - i. **Manage Translation**: Click link to configure localized descriptions. For more information, see [Configuring Localized Code Descriptions](#). (Available when the Multi-language OPERA Control is active.).
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing Location Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Location Types**.
2. Enter search criteria and click **Search**.

3. Select the code in the search result, then click the vertical ellipsis **Actions** menu then select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Location Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Location Types**.
2. Enter search criteria and click **Search**.
3. Select the code in the search result, then click the vertical ellipsis **Actions** menu then select **Delete**.
4. Click **Delete** to confirm.

## Configuring Mailing Action Codes

You can select mailing action codes in profiles and use this selection to identify the profiles you want to include in custom reports or exports.

#### Adding Mailing Action Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Mailing Action Codes**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the mailing action (for example, NY, XMAS, GIFT, EASTER, and so on).
  - b. **Description**: Enter a description for the mailing action code.
    - i. **Manage Translations**: (Appears when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to add another.

#### Editing Mailing Action Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Mailing Action Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis** then click **Edit**.
4. Update the configuration..
5. Click **Save**.

### Deleting Mailing Action Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Mailing Action Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis** then click **Delete**.
4. Click **Delete** to confirm.

## Configuring Global (Mailing) Action Codes

You can assign [Mailing Action Codes](#) to identify profiles you want to include in custom reports or exports

Global Mailing Action Codes are applicable when the Property Action Codes OPERA Control is inactive.

When the Property Action Codes OPERA Control is active you need to configure property specific mailing codes . Refer to [Configuring Mailing Action Codes](#) .

### Adding Global (Mailing) Action Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management** and select **Global Action Codes**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter a code for the Global Mailing Action.
  - b. **Description**: Enter the name of the Global Mailing Action.
    - i. **Manage Translation**: Click link to configure localized descriptions. For more information, see [Configuring Localized Code Descriptions](#). (Available when the Multi-language OPERA Control is active.)
  - c. **Sequence**: Enter a sequence number that determines the position of this code in listings.
3. Click **Save**.

### Editing Global (Mailing) Action Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management** and select **Global Action Codes**.
2. Enter search criteria and click **Search**.
3. Select the Global Mailing Action Code, then click the **vertical ellipsis** and select **Edit**.
  - a. Update the configuration.
  - b. **Inactive**: Select check box to inactive the code.
4. Click **Save**.

### Deleting Global (Mailing) Action Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management** and select **Global Action Codes**.
2. Enter search criteria and click **Search**.

3. Select the Global Mailing Action Code, then click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** and confirm.

## Configuring Pay Days

### Prerequisites for Configuring Pay Days

Activation of the Payment Due Days OPERA Control gives you the ability to specify the number, 0-999, of payment due days for AR Accounts; a Pay Days list of values can be configured below to limit users to specific list of values. If payment due days are not configured then users can directly enter any numeric value (0-999) into the Payment Due Days field in [AR Account setup](#).

 **Note:**

When the **Month End Calc.** check box is selected in AR Account setup , then the Payment Due Days value will be taken from the last day of the month for the bill generation date.

### Adding AR Payment Due Days

1. From the **Administration** menu, select **Client Relations**, select **Profile Management** and select **Pay Days**.
2. Click **New** and enter the following details:
  - a. **Code:** Enter a number for the Pay Day (between 1 and 999).
  - b. **Description:** Enter the name of the Pay Day.
    - i. **Manage Translation:** Click link to configure localized descriptions. For more information, see [Configuring Localized Code Descriptions](#). (Available when the Multi-language OPERA Control is active.).
  - c. **Sequence:** Enter a sequence number that determines the position of this code in listings.
3. Click **Save** or **Save and Continue** to add another.

### Editing AR Payment Due Days

1. From the **Administration** menu, select **Client Relations**, select **Profile Management** and select **Pay Days**.
2. Enter search criteria and click **Search**.
3. Select the Pay Days code, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting AR Payment Due Days

1. From the **Administration** menu, select **Client Relations**, select **Profile Management** and select **Pay Days**.
2. Enter search criteria and click **Search**.
3. Select the Pay Days code, then click the vertical ellipsis **Actions** menu and select **Delete**.

4. Click **Delete** and confirm.

## Preference Groups

Preference groups are used to categorized the various preferences selected in a profile or reservation. OPERA Cloud is pre-configured with preference groups for Room features, Smoking, Floor, Specials, Dietary and (room) Key Options. You can create additional preference groups (for example, pillow, music, newspaper), as well as the preferences associated with these preference groups.

For each preference group it is possible to define the number (quantity) of preferences that can be selected in a profile or reservation. For example, you can restrict the Smoking preference group to only one preference (either smoking or non-smoking) , but allow several floors to be selected for the Floors preference group.

## Configuring Preference Groups

### Adding a Preference Group

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Preference Groups**.
2. Click **New** and complete the following fields:
  - a. **Code**. Enter a code to identify the preference group (for example, newspaper, flowers, pillows, and so on).
  - b. **Description**. Enter a description for the preference group.
  - c. **Quantity**. Enter the maximum number of items that may be selected when choosing preferences from the preference group.
  - d. **Sequence**. Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - e. **Reservation**. Select to have this Preference Group and its preferences available when selecting the **Preferences** field on the Reservation screen. If any preferences with this selection are attached to a reservation, the user is prompted with the option to attach the preference to the profile.
3. Click **Save** to save and exit or click **Save and Continue** to save this Preference Group and add another.

### Editing a Preference Group

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Preference Groups**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the **vertical ellipsis**.
5. Click **Edit**.
6. Update the configuration and click **Save**.

### Deleting a Preference Group

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Preference Groups**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the **vertical ellipsis**.
5. Click **Delete**.

## Preferences

Preferences are saved on Guest profiles and in reservations to inform staff of a guest's preferences for a variety of preference groups.

A guest's **Smoking**, **Floor** and **Room feature** preferences are populated to respective search fields during an available [room search](#) and room assignment for a reservation. This ensures guests are assigned rooms that match their preferences.

You can use **Key Options** preferences to designate special access to hotel areas, such as Pool, Executive Level, and Gym. These Key Options appear on the Guest profile and are included in the room key encoding for the reservation, See, [Managing a Room Key / Door Lock Property Interface](#)

**Dietary** preferences are used to identify a guests special dietary requirements and are also referenced in Sales and Event Management, [menu item configuration](#)

The following are examples of other user-defined preference groups and preferences that you might configure:

- A preference group for PILLOW could have preference codes for Feather, Hypoallergenic, Snoring, Memory Foam pillows, and so on.
- A preference group for NEWSPAPER could have preference codes for Financial Times, Local News, Wall Street Journal, and other newspapers available for delivery.
- A preference group for MUSIC could have preference codes for Classical, Blues, Pop, Jazz, Electronic, and so on.

## Configuring Preference Codes

### Note:

When the **Multi Property** OPERA Control is active, new Preferences are created by selecting the **Template** tab. You can setup preferences to be available in all properties by selecting the **Global** check box. Or once created, you can copy Preferences to specific properties using the **Copy** action. For more information, see [Copying Configuration Codes to Multiple Properties](#).

### Adding Preference Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Preferences**.

2. Click **New** and complete the following fields:
  - a. **Property:** Enter or search for and select a property.
  - b. **Preference Groups:** Select the preference groups from the list of values. For more information, see [Preference Groups](#)
  - c. **Code:** Enter a code that identifies the preference item in the preference group (for example, a preference group for Room Features could have preference codes for Corner room, Jacuzzi tub, Pool view, Ocean view, and Balcony).
  - d. **Description:** Enter a description of the preference.
  - e. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - f. **Global:** Select the check box to make the preference available in all properties. Available in the **Template** tab from a [Hub location](#).
3. Click **Save** to save and exit or click **Save and Continue** to save this Preference code and add another.

#### Editing Preference Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Preferences**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the vertical ellipsis **Actions** menu, and click **Edit**.
5. Update the configuration.
6. Click **Save**.

#### Deleting Preference Codes

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Preferences**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the vertical ellipsis **Actions** menu, and click **Delete**.
5. Click **Delete** to confirm.

## Profile Name Validations

### [Prerequisites for Profile Name Validations](#)

Using Profile Name Validations you can specify a profile type and enter a name string which OPERA Cloud will validate each time a new profile is created. The validation rules configured ensure the name string matches the profile type and prevents the incorrect assignment of Companies as Agents, Companies as Guests, Travel Agents as Companies and so on.

For example,

- Profile Type = Company

- Name String = <Company Profile Name>

When the **New** action is selected on the Profile Search screen, entering the <Company Profile Name> and selecting the Guest profile type results in OPERA Cloud prompting the following warning: "Profile Type for this profile should be Company. Do you want to continue? " If you select Yes, the Guest Profile screen appears and if you select No, you remain on the Profile Search screen.

## Configuring Profile Name Validations

### Adding a Profile Name Validation Rule

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Profile Name Validations**.
2. Click **New** and enter the following details:
  - a. **Type**: Select a profile type: **Company**, **Source**, or **Travel Agent**.
  - b. **Name**: Type the name string to use. You can configure partial name string matches by using the % symbol along with the partial name. For example:
    - i. %Oracle — Based on the Profile type selected, compares the profile names that end with "Oracle" for the selected profile type. If the Profile Type does not match, then the message prompt about mismatched profile types appears.
    - ii. Oracle% — Based on the Profile Type selected, compares the profile name string that starts with "Oracle" for the selected profile type. If the Profile Type does not match, then the message prompt about mismatched profile types appears.
    - iii. %Oracle% — Based on the Profile Type selected, compares the profile name string that includes the word "Oracle" for the selected profile type. If the Profile Type does not match, then the message prompt about mismatched profile types appears.
3. Click **Save** to save and exit or click **Save and Continue** to save and add another.

### Editing a Profile Name Validation Rule

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Profile Name Validations**.
2. Enter search criteria and click **Search**.
3. In the search results, select the rule and click the **vertical ellipsis** and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting a Profile Name Validation Rule

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Profile Name Validations**.
2. Enter search criteria and click **Search**.
3. In the search results, select the rule and click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Profile Protection

### Prerequisites for Profile Protection

Profile protection is used to protect certain profile fields from being changed by users when the profile is subscribed with an external system. When the Profile Protection (Method) OPERA Control is set to **By Profile** a Protected check box is enabled in the Profile Overview panel in Profile Presentation, which must be selected to enable protection of the subscribed profile. When the Profile Protection (Method) OPERA Control is set to **By Profile Type** the protection rules apply to all subscribed profiles of the profile type.

The Override Profile Protection user tasks then allows users to override the protection rules when updating profiles.

### Editing Profile Protection

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Profile Protection**.

This screen shows the Screen / Field Name and the Profile Type (**Company**, **Contact**, **Group**, **Guest**, **Source**, and **Travel Agent**). The icons show whether the screen/field is protected, partially protected, or not applicable.

2. Click **Edit**.
3. Select/deselect the check boxes for the appropriate screens/fields to protect them from being changed for each profile type.
4. Click **Save**.

## Relationships

### Prerequisites for Relationships

You can set up standard affiliations between profile types that can then be selected, much like templates, when setting up relationships for profiles. When setting up relationships for a specific profile, only the relationship types you configure which involve that profile type are available for selection. A common relationship would be one that exists between a parent company (profile type company) and a subsidiary company (profile type company). Another common relationship is employer (profile type company) and an employee (profile type guest or contact).

#### Note:

OPERA Cloud is pre-configured with master-sub relationship types for Company, Travel Agent, and Source profile types.

- C-Master and C-Sub for Company Profile Type
- T-Master and T-Sub for Travel Agent Profile Type
- S-Master and S-Sub for Source Profile Type

Relationships can be used to facilitate rate sharing and for more meaningful financial and statistical reporting. For example, you might want to share negotiated rates created for a

parent company with all the subsidiaries of the company. Or you might want to report on total revenues associated with all subsidiaries of a company rather than on each subsidiary separately. Relationships enable you to do these things.

When setting up relationship types, you must define both sides of the relationship — the "from" side and the "to" side. It is sometimes helpful to think in terms of statements such as "Company X (a company profile) is the employer of Guest Y (an individual profile)." The left component of this relationship (company) is the From side. The right component (individual) is the To side. Once this relationship type has been configured, when you open the profile for "GUEST" (an individual type profile) and select the **Relationships details** link, you are able to set up an employee/employer relationship for GUEST with a company you choose from the Company profiles.

It is important to keep in mind that relationship configuration is designed to not accept duplicate values between From Relationship Type and To Relationship Type and the From Description and To Description. For example, when COMPANY has been used once in either From Relationship Type or To Relationship Type, it cannot be used again for either of these two fields for any new relationship. The same applies to the From Description and To Description.

## Configuring Relationships

### Adding Relationships

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Relationships**.
2. Click **New** and complete the following fields:
  - a. **From Relationship Type**: Select the profile type of the "from" component of the relationship.
  - b. **Code**: Enter a code that briefly describes the "from" component of the relationship.
  - c. **Description**: Enter a detailed description of the "from" component of the relationship (for example, employer, parent company, and so on).
  - d. **To Relationship Type**: Select the profile type of the "to" component of the relationship.
  - e. **Code**: Enter a code that briefly describes the "to" component of the relationship.
  - f. **Description**: Enter a detailed description of the "to" component of the relationship (for example, employer, parent company, and so on).
  - g. **Link Type**: Choose from the following options for the relationship link type:
    - i. **Default**: Select to indicate the relationship is the default relationship, or primary relationship, when these two profile types are part of a relationship. Only one primary relationship type is allowed for any relationship types that involve the same two profile types.
    - ii. **Global**: Select to indicate the relationship type is global or available to all properties in the cluster. Global relationships are exchanged and synchronized among remote properties through OXI and must be centrally defined and managed. Global relationships can be viewed but not changed on the property level.
    - iii. **Has Hierarchy**: Select check box to indicate the relationship type is hierarchical. Hierarchical relationships apply (and are the default) when company, travel agent, and source profile types are involved in the relationship. When you create a relationship and assign a hierarchical relationship type to it, the **Hierarchy** button is available on the [Profile Relationships panel](#). The hierarchy shows the current

profile's hierarchical position in a *tree view* style diagram. If another sales account is selected from the diagram, Hierarchical relationships enable you to build multi-level relationships such as master, sub1, sub2, and so on. Non-hierarchical relationships support only one level (for example, Partner or Spouse) and are mainly used on individual profiles.

Non-hierarchical relationships support only one level (for example, Partner or Spouse). Non-hierarchical relationships are mainly used on individual profiles.

- h. **Rate:** Select an option if negotiated rates are shared between the profiles linked with this relationship type. Available when the **Negotiated Rates** and **Relationships Rate Inherit** OPERA Controls are active.

3. Click **Save**.

### Editing Relationships

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Relationships**.
2. Enter search criteria and click **Search**.
3. Select the relationship in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Relationships

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Relationships**.
2. Enter search criteria and click **Search**.
3. Select the relationship in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Restriction Reasons

### Prerequisites for Restriction Reasons

Users with the **Mark/Unmark Profile as Restricted** task granted can update the **Restricted** check box in profiles. Additionally, a restriction reason as to why the profile is restricted must be selected when the **Restriction/Flagged Reasons** OPERA Control is active

### Adding Restriction Reasons

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Restriction Reasons**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter the code for the restriction reason.
  - b. **Description.** Enter a description for the restriction reason.
  - c. **Manage Translations.** Click link to configure localized descriptions. For more information, see [Configuring Localized Code Descriptions](#). (Available when the **Multi Language** function under the **General** group is active).

- d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** or click **Save and Continue** to save and add another.

#### Editing Restriction Reasons

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Restriction Reasons**.
2. Enter search criteria and click **Search**.
3. Select the restriction reason in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Restriction Reasons

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Restriction Reasons**.
2. Enter search criteria and click **Search**.
3. Select the restriction reason in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Sales Information

### Prerequisites for Sales Information

Sales information can be entered in the [Sales Information panel](#) of Sales Accounts and Contacts, and can be used in report filters.

The following types of sales information are available:

- **Account Type** — The type of sales account.
- **Priorities** — Business importance of the account or contact.
- **Business Potential** — Importance of the account in drawing accommodations business.
- **Competition Codes** — Your business competition for this account.
- **Influence Codes** — For contacts only. The influence the contact has in the decision-making process.
- **Scopes** — Broad geographical areas where the account or contact generates business.
- **Scope & Cities** — Cities where the account or contact generates business.
- **Sources** — Origin of the account (for example, media ad, website, and so on).
- **Territories** — Sales territory to which the account or contact is assigned.

## Configuring Sales Account Types

OPERA Cloud provides the ability to draw statistics about revenue, room nights, and so on. For example, you could learn if the business is from a local business or an international business from reports such as Account History and Forecast, Account Hierarchy, Profile Production Statistics, and Profile Productivity LOS Reports. To use this feature, the sales account profile types (Company, Agent, Source) must have an account type selected in the [Sales Information](#) panel.

### Adding Account Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Account Types**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter an alpha-numeric code.
  - b. **Description**: Enter a Description.
  - c. **Manage Translation**: Click link to configure localized descriptions. For more information, see [Configuring Localized Code Descriptions](#). (Available when the Multi-language OPERA Control is active.)
  - d. **Sequence**: Set an optional sequence.
3. Click **Save** to save and exit or click **Save and Continue** to save the account type and add another.

### Editing Account Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Account Types**.
2. Enter search criteria and click **Search**.
3. Select the account type, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. **Inactive**: Select the make the Account Type inactive.
6. Click **Save**.

### Deleting Account Types

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Account Types**.
2. Enter search criteria and click **Search**.
3. Select the account type, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Account Priorities

Account Priorities enable you to specify the priority of the sales account. For more information, see [Managing Sales Information](#)

### Adding a Priority Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Account Priorities**.
2. Click **New** and complete the following fields:

- a. **Code:** Enter a code for the priority (for example, H for High, L for Low, and so on).
  - b. **Description:** Enter a description for the priority code.
    - i. **Manage Translations:** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - c. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** or click **Save and Continue** to save this code and add another.

#### Editing a Priority Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Account Priorities**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
  - a. **Inactive.** Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
5. Click **Save**.

#### Deleting a Priority Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Account Priorities**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code then click the vertical ellipsis **Actions** menu and select **Delete**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete** to confirm.

## Configuring Business Potential

Use the business potential to categorize an account's ability to produce revenue at your property. The business potential of an account is an estimate and can be changed throughout the life of the account profile.

#### Adding a Business Potential Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Business Potential**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code for the potential (for example, 10K for \$10,000-\$10,999).

- b. **Description.** Enter a description for the business potential code.
  - c. **Manage Translations.** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing a Business Potential Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Business Potential**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. **Inactive.** Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
6. Update the configuration and click **Save**.

#### Deleting a Business Potential Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Business Potential**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Configuring Competition Codes

Competition codes enables you to identify other hospitality businesses that are competing with you for an account's business opportunities.

#### Adding a Competition Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Competition Codes**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code for the competitor.
  - b. **Description.** Enter a detailed description (name) of the competitor.

- c. **Manage Translations.** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing a Competition Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Competition Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. **Inactive.** Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
6. Update the configuration and click **Save**.

#### Deleting a Competition Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Competition Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Configuring Influence Codes

Influence codes can be associated with contact profiles to indicate the impact a contact has on purchase decisions involving your property's offerings.

#### Adding an Influence Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Influence Codes**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code for the level of influence (for example, DEC for the decision maker, NEG for negotiator, and so on).
  - b. **Description.** Enter a detailed description of the influence code.

- c. **Manage Translations.** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing an Influence Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Influence Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. **Inactive.** Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
6. Update the configuration and click **Save**.

#### Deleting an Influence Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Influence Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Configuring a Scope

A scope indicates the region where a contact or account's business originates. Many accounts and contacts do not draw their business locally, but rather from another city, region, or even another country. Define scopes as regions or areas that are as specific or general as necessary.

#### Adding a Scope

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Scope**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code that briefly describes the scope (for example, UK for the United Kingdom, EUR for Europe, and so on).
  - b. **Description.** Enter a detailed description of the scope.

- c. **Manage Translations.** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a Scope

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Scope**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. **Inactive.** Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
6. Update the configuration and click **Save**.

### Deleting a Scope

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Scope**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Configuring a Scope City

The scope city is the city where the contact or account's headquarters is located or the city where one of your properties is located that the contact or account frequently uses.

### Adding a Scope City

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Scope City**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code that briefly describes the scope city (for example, NYC for New York, MADRID for Madrid, and so on).
  - b. **Description.** Enter a detailed description of the scope city.

- c. **Manage Translations.** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing a Scope City

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Scope City**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. **Inactive.** Select to mark the code inactive. Inactive market codes are not available for selection from market lists in OPERA Cloud. The code remains for historical, statistical purposes only.
6. Update the configuration and click **Save**.

#### Deleting a Scope City

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Scope City**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Configuring Sources

A source indicates how you came to acquire an account. For example, through an advertisement, a website, a referral, and so on.

#### Adding a Source

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Sources**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code that briefly describes the source (for example, WEB for web site, TS for trade show, CC for cold call, REF for referral, and so on).
  - b. **Description.** Enter a detailed description of the source.

- c. **Manage Translations.** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing a Source

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Sources**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. **Inactive.** Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
6. Update the configuration and click **Save**.

#### Deleting a Source

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Sources**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Configuring Territories

Territories are the geographical sales areas where accounts and contacts are located and you can use them as filters in preparing sales reports.

#### Adding a Territory

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Territories**.
2. Click **New** and complete the following fields:
  - a. **Code.** Enter a code that briefly describes the territory (for example, NA for North America, AU for Australia, and so on).
  - b. **Description.** Enter a detailed description of the territory.

- c. **Manage Translations.** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing a Territory

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Territories**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.
4. Click **Edit**.
5. **Inactive.** Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
6. Update the configuration and click **Save**.

### Deleting a Territory

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Territories**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the **vertical ellipsis**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Configuring Industry Codes

### Prerequisites for Configuring Industry Codes

Use industry codes to identify the core business of a sales account. Industry codes are referenced on the [Profile Productivity Statistics](#) report in PMS.

### Adding an Industry Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Industry Codes**.
2. Click **New** and complete the following fields:
  - a. **Code:** Enter a code that briefly describes the industry code (for example, HC for health care, FIN for finance, ENT for entertainment, TECH for technology, and so on).
  - b. **Description:** Enter a detailed description of the industry code.

- c. **Manage Translations:** (Available when the **Multi Language** function under the **General** group is active.) Select to open the multi-language descriptions screen and configure a language translation for the description.
  - d. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

#### Editing an Industry Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Industry Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. **Inactive:** Select to inactivate the current code. Inactive codes are not available for selection on a profile, but are available for selection in report filters.
4. Update the configuration and click **Save**.

#### Deleting an Industry Code

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Industry Codes**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code, click the vertical ellipsis **Actions** menu and select **Delete**.

 **Note:**

Only inactive codes that are not currently used in a profile can be deleted.

4. Click **Delete**.

## Titles

Guest and Contact profiles have a field for the person's Title (for example, Mr, Mrs, Herr, Dr, and so on) The titles available for selection when you open the list of values depends on the language selected in the Language field. For example, if you select E for the English language, the available titles might be Mr, Mrs, or Ms. If you select F for French language, the available titles might be Mlle, Mm, or M. Additionally, when you select the title, a default salutation for guests having that title populates to the Salutation field. For example, if you select the title "Mr" for Michael Summers, the default salutation might be "Dear Mr Summers." The default salutation text can be edited directly in the Salutation field.

#### Advanced Titles

##### [Prerequisites for Advanced Titles](#)

You can define and configure several different title suffixes for the same title and language by using the Advanced Title feature.

The advanced title feature meets the needs of certain countries, such as Germany, where a social title, such as Herr, might be combined with a professional title, such as Doctor.

The following are examples of how the Advanced Title arrangement might be used:

- The salutation of a confirmation letter, such as “Herr Dr. Bernd Barysch”
- An address where the Title (Herr) appears on a separate line

On the Manage Profile screen in the Title Number field, enter a number that identifies the unique combination of Title Code, Description, and Language. You cannot insert the same Title Code more than once without a Title Suffix. However, you can create as many descriptions and envelope greetings as necessary for the same Title Code and Language Code. Using German as an example, you can create several Title Codes = Herr and Language Codes = DE and each Title Code/ Language Code can have an envelope greeting. Each combination of Title Code and Description must have a unique Title Suffix number that identifies it. For example:

- A Title code of Herr with a Title Suffix of 1 could have the Description containing the title of Herr with an envelope greeting, such as Herr Doctor with merge codes <FIRSTNAME> <LASTNAME>.
- The same Title code of Herr could have a Title Suffix of 2 with the Description of Herr with merge codes <FIRSTNAME><LASTNAME> (without a professional title).
- Additionally, the same Title Code of Herr could have a Title Suffix of 3 with the Description of Herr Professor and merge codes <FIRSTNAME><LASTNAME>.

When Advanced Title = N, you can configure the following titles:

**Table 15-5 Advanced Title = N**

Title Code	Description (Salutation)	Language Code
MR	Mr.<LAST NAME>	E
MR	Mr.<LAST NAME>	E

When Advanced Title = Y, you must assign a Title Suffix to duplicate titles:

**Table 15-6 Advanced Title = Y**

Title Code	Description (Salutation)	Language Code	Title Suffix
MR	Mr.<LAST NAME>	E	21
MR	Mr.<LAST NAME>	E	22
MR	Mr.<LAST NAME>	E	23

## Configuring Titles

### Adding a Title

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Titles**.

2. Click **New** and complete the following fields:
  - a. **Code.** Enter the code that identifies the title (for example, Mr, Ms, Mrs, Capt, Rev, Hon, and so on).
  - b. **Language.** Select the code to be associated with this title. All titles associated with a specified language code are available for selection when that language is chosen in the Language field on the guest Profile screen. The selected language is the language you use to exchange correspondence with the guest or contact rather than the guest's native language.
  - c. **Title Number** (Advanced Title only). Enter a unique number that identifies the unique combination of Title Code, Description, and Language.
  - d. **Salutation.** Enter the default salutation to be populated for the title. The salutation may include merge codes for variable information such as the guest's first name <FIRSTNAME> and last name <LASTNAME> (for example, Dear Mr <LASTNAME>, Monsieur <FIRSTNAME> <LASTNAME>, or Estimada Señora <LASTNAME>).
  - e. **Envelope Greeting / Business Title.** (When the Advanced Title application parameter is active, Envelope Greeting appears as the label. When Advanced Title is not active, Business Title appears as the label.) This field identifies the name of the envelope greeting or business title to be used along with the social title, such as Doctor. When this field is populated, the envelope greeting or business title appears in the Titles screen at the Profile Screen. This ensures the correct envelope or business title and code are entered when creating or selecting a profile.
  - f. **Sequence.** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this Title and add another.

#### Editing a Title

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Titles**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the **vertical ellipsis**.
5. Click **Edit**.
6. Update the configuration and click **Save**.

#### Deleting a Title

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Titles**.
2. Select or confirm the **Property**.
3. Enter search criteria and click **Search**.
4. In the search results, select the code and click the **vertical ellipsis**.
5. Click **Delete**.

## Configuring Travel Agent Types

[Prerequisites for Travel Agent Types](#)

Travel Agent Types indicate whether a travel agent requires a commission, is a local, national, or international travel agent, or has any other classifications.

### Adding a Travel Agent Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Travel Agent Types**.
2. Click **New** and enter the following details:
  - a. **Code**: Enter an alpha-numeric
  - b. **Description**: Enter a description.
  - c. **Sequence** : Select an optional sequence number indicating the code's order of appearance in a list.
3. Click **Manage Translations** to add or update travel agent type code and description translations.
4. Click **Save** to save, or click **Save and Continue** to save this travel agent type and add another.

### Editing a Travel Agent Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Travel Agent Types**.
2. Enter search criteria, click **Search**.
3. Click the vertical ellipsis **Actions** menu and then select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting a Travel Agent Type

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Travel Agent Types**.
2. Enter search criteria, click **Search**.
3. Click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## VIP Levels

### Prerequisites for VIP Levels

OPERA Cloud provides the ability to define different VIP levels for your guests. Throughout the application, guests and their associated reservation may be filtered using the VIP code assigned. Many reports also offer the ability to filter guests and their reservation data based on VIP levels.

Some common uses of VIP levels are to easily view VIP arrivals and departures or VIP guests in house. VIP codes can also be referenced when configuring global alerts to display alerts to the staff of guests who require or deserve special attention.

VIP status is usually used to identify regular guests, celebrities, royalty, hotel owners, loyalty club members, and important corporate guests. Regular (non-VIP) guests would not have a value in the VIP field.

When the **Reservation Color Definition** OPERA Controls is set to **VIP Levels**, the color assigned to the VIP level selected in the guest profile appears on reservations in Reservation Search results, [Reservation Presentation](#), [Room Assignment](#) and [Check In](#).

In multi-property operations, the VIP code configuration is global for all properties.

## Configuring VIP Levels

### Adding VIP Levels

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **VIP Levels**.
2. Click **New** and complete the following fields:
  - a. **Code**: Enter a code that briefly describes the VIP level.
  - b. **Description**: Enter a detailed description of the VIP level.
  - c. **Manage Translation**: Click link to configure localized descriptions. For more information, see [Configuring Localized Code Descriptions](#). (Available when the Multi-language OPERA Control is active.).
  - d. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
  - e. **Display Color**: Assign a color to the VIP level. The Display Color reservation attribute references this color when the Reservation Color Definition OPERA Controls is set to VIP Levels.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing VIP Levels

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **VIP Levels**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu..
4. Click **Edit**.
5. Update the configuration and click **Save**.

### Deleting VIP Levels

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **VIP Levels**.
2. Enter search criteria and click **Search**.
3. In the search results, select the code and click the vertical ellipsis **Actions** menu and click **Delete**.
4. Click **Delete** to confirm.

## Configuring Credit Ratings

[Prerequisites for Configuring Credit Ratings](#)

You can set different levels of credit ratings for Company, Source, and Travel Agent profiles. You can use the credit ratings as criteria when configuring deposit/cancellation rule schedules for reservations and business blocks attached to the profile. This enables both guests and travel agents or bookers who make reservations with the property to have these cancellation and deposit rules applied based on the credit rating indicated on their profile. For more information, see [Booking Rules and Schedules](#).

### Adding Credit Ratings

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Credit Ratings**.
2. Click **New** and complete the following :
  - a. **Code**: Enter a code for the credit rating
  - b. **Description**: Enter a description for the credit rating
  - c. **Sequence**: Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save** to save and exit or click **Save and Continue** to save this code and add another.

### Editing Credit Ratings

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Credit Ratings**.
2. Enter search criteria and click **Search**.
3. Select the code in the search result, then click the vertical ellipsis **Actions** menu then select **Edit**.
4. Update the configuration.
5. **Inactive**: Select check box to update the code as inactive.
6. Click **Save**.

### Deleting Credit Ratings

1. From the **Administration** menu, select **Client Relations**, select **Profile Management**, and then select **Credit Ratings**.
2. Enter search criteria and click **Search**.
3. Select the code in the search result, then click the vertical ellipsis **Actions** menu then select **Delete**.
4. Click **Delete** to confirm.

## Configuring Profile Lookup and Download for OPERA Room Reservations

### [Prerequisites for Profile Lookup from External Systems](#)

Profile lookup and download is used to lookup and fetch profiles from OPERA Room Reservations. The OPERA Room Reservations Profile Lookup web service is used to perform a synchronous profile lookup from OPERA Cloud. The profile download uses OPERA Xchange Interface (OXI). Profile lookup is initiated from profile search, and invokes the Profile Lookup service to fetch and display the result received. The Download action then initiates a download

of the profile and saves in OPERA Cloud. For more information, see [Using Profile Lookup and Download with Integrated Solutions](#).

### OXI Configuration

- Provision the Oracle Hospitality OPERA Exchange Interface Two-Way Cloud Service and configure the ORS interface. For more information, see [Interface Setup](#).

### Outbound System Configuration

Configure an [Configuring Outbound Systems](#) according to the instructions for [CRM\\_LEGACY](#).

When profile sharing is active in chain configuration, configure for Global Context. For more information, see [Configuring Chain](#).

### Outbound Hostname Allowlist Configuration

Configure Outbound Allowlist for the destination **Hostname**, **HTTPS Protocol** and **Port Number**. For more information, see [Configuring Outbound Domain Allow Listings](#).

### OPERA Controls Configuration

For more information, see [OPERA Controls — Profile](#)

1. Activate **Profile Lookup** OPERA Control.
2. Update the **Profile Types for Lookup** OPERA Control to select the profile types for external lookup.
3. Update **External Lookup Behavior** OPERA Control.
  - a. **Force**: Profile Lookup is automatically triggered when no matches are found in OPERA Cloud.
  - b. **Simultaneous**: Profile Lookup is triggered regardless of matches found in OPERA Cloud.
  - c. **Manual**: Profile Lookup is not automatically triggered, until the external system tab is selected in the profile search panel.
4. Update **Default External System for Lookup** OPERA Control to select a default external system. (Applicable when the **External Lookup Behavior** OPERA Control is set to Simultaneous or Force).

### OPERA Cloud Role Configuration

Assign the **Profile Lookup** task to [roles](#).

# 16

## Interfaces Administration

### Prerequisites for Interfaces Administration

This chapter of the OPERA Cloud User Guide lists the prerequisites for Interfaces Administration menu.

### Prerequisites for Configuring External Systems

#### **OPERA Cloud Tasks**

**Group:** Interface Admin

**Tasks:** Property Interfaces

- External Systems
  - New/Edit External Systems
  - Delete External Systems

### Prerequisites for Enhanced Room Key Generation

#### **OPERA Controls**

**Group:** IFC

**Settings:** Key Valid Start Time

**Settings:** Default Keys Expiry Time

- Oracle Hospitality Integration Platform

**OPERA Controls**

**Group:** Profile Group

**Functions:** Scheduled Activities

### **OPERA Cloud Tasks**

**Group:** Interfaces Admin

**Tasks:** Property Interfaces

- Access to Scheduled Activities Configuration
- New/Edit Scheduled Activity Status
- Delete Scheduled Activity Status
- New/Edit Scheduled Activity Location
- Delete Scheduled Activity Location
- New/Edit Scheduled Activity Types
- Delete Scheduled Activity Types

## Prerequisites for Configuring Client Devices

### **Property Controls**

**Country Mode:** South Korea

### **OPERA Controls**

**Group:** General

**Parameter:** Device Selection for Changes Log Tracking

### **OPERA Cloud Tasks**

**Group:** Interface Admin

**Tasks:** Device Configuration

- New/Edit Devices
- Delete Devices

## Configuring Business Events

Business Events are required in OPERA Cloud to trigger and send messages to the external systems configured at your property. Business Events are configured according to the types of data the external system supports and requires. Unique business events and data elements are defined for each external system, external database and module combination. When a user performs an action in OPERA Cloud that involves that selected data elements and conditions (optional), a business event is triggered which then becomes a message to the external system.

For example, if an external system requires reservations and profiles data you need to configure reservation and profile business events. If an external system requires rates and inventory data you need to configure business events for rates and inventory, and so forth.

There are three levels to Business Event setup.

1. The Business Event Modules (Activity, Availability, Block, Block Offsets, Cashiering, Catering Notes, Configuration, Enrollment, Housekeeping, Night Audit, Owner Contract, Profile, Rate, Reservation, and Stay Records.)
2. Within each module there are the actual Business Events (Action Types) that can be subscribed to- New Reservation, Update Reservation, New Profile, etc.
3. Finally, there are Data Elements corresponding to each Action Type- Room Type, Rate Code, name , etc.

The Business Events generated are based on a customizable configuration that the business event user determines. The result is a user-configurable flow of data that is available to third parties to extract (dequeue) from OPERA Cloud on a regular basis.

 **Note:**

Business Events subscribed to with no Data Elements attached will generate an XML message with header information only for the Business Event. It is imperative that third party systems carefully consider this before programming their dequeue process from OPERA Cloud. It is highly suggested that the third party dequeue application is programmed to ignore Modules/Business Events (Action Types)/ Data Elements that the hotel may subscribe to but that the data recipient does not recognize. In this way, you can insure an uninterrupted process of data flow.

### Adding Business Events

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **Business Event Configuration**.
2. Click **New** and enter the following details:
  - a. **Property:** Enter or select the property.
  - b. **External System:** Select the external system from the list. See [Configuring External Systems](#).
  - c. **Module:** Select the module from the list.
  - d. **Business Event:** Select the business event from the list.
  - e. Data Elements to generate a Business Event when any of the data element values are changed in OPERA Cloud.
    - i. Search and select data elements in the **Available** panel, click > or >> to move selection to the **Selected** panel.
  - f. Conditions (where clause)
    - i. Click **Add** to add a conditional expression.
      - i. **And/Or:** Displays for compound expressions; select AND / OR operator.
      - ii. **Attribute:** Select an attribute from the list.
      - iii. **Operator:** Select an operator from the list.
      - iv. **Value:** Enter the comparison value for the expression.
    - ii. Click **OK**.
    - iii. Repeat to add another condition.
  - g. To Edit, select a condition and click **Edit**.

- h. To Delete, select a condition and click **Delete**.
3. Click **Save**.

#### Editing Business Events

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **External Systems**.
2. Enter search criteria and click **Search**.
3. Select the business event, click vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. Click **Save**.

#### Deleting Business Events

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **Business Event Configuration**.
2. Enter search criteria and click **Search**.
3. Select the business event, click vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Business Events - Activity

The following table outlines the action types, data elements, data types and XML tag names within this OPERA Cloud Business Events module.

Action Type	Data Element	Data Type	XML Tag
CREATE ACTIVITY	ACT_ID	N	ActId
	RESORT	C	Resort
CREATE OSA ACTIVITY	ACTIVITY ID	N	Activityid
	ATTENDEES	N	Attendees
	END DATE	D	Enddate
	END TIME	T	Endtime
	GUEST NAME ID	N	Guestnameid
	LOCATION CODE	C	Locationcode
	RESORT	C	Resort
	RESV NAME ID	N	Resvnameid
	START DATE	D	Startdate
START TIME	T	Starttime	
DELETE ACTIVITY	ACT_ID	N	ActId
	RESORT	C	Resort
DELETE OSA ACTIVITY	ACTIVITY ID	N	Activityid
	ATTENDEES	N	Attendees
	END DATE	D	Enddate
	END TIME	T	Endtime

Action Type	Data Element	Data Type	XML Tag
	GUEST NAME ID	N	Guestnameid
	LOCATION CODE	C	Locationcode
	RESORT	C	Resort
	RESV NAME ID	N	Resvnameid
	START DATE	D	Startdate
	START TIME	T	Starttime
UPDATE ACTIVITY	ACT_ID	N	ActId
	RESORT	C	Resort
UPDATE OSA ACTIVITY	ACTIVITY ID	N	Activityid
	ATTENDEES	N	Attendees
	END DATE	D	Enddate
	END TIME	T	Endtime
	GUEST NAME ID	N	Guestnameid
	LOCATION CODE	C	Locationcode
	RESORT	C	Resort
	RESV NAME ID	N	Resvnameid
	START DATE	D	Startdate
	START TIME	T	Starttime

## Business Events - Availability

The following table outlines the action types, data elements, data types and XML tag names within this OPERA Cloud Business Events module.

Action Type	Data Element	Data Type	XML Tag	Description
DELETE ALLOWANCE	ALLOWANCE	N	Allowance	
	BEGIN DATE	D	BeginDate	
	END DATE	D	EndDate	
	INCLUDE OOO	C	includeOOO	
	INCLUDE SELL LIMIT	C	includeSellLimit	
	LOWER THRESHOLD	N	lowerThreshold	
	RATE CATEGORY	C	rateCategory	
	RATE CODE	C	RateCode	

Action Type	Data Element	Data Type	XML Tag	Description
	ROOM TYPE	C	RoomType	<p>Pseudo_Room_Types: Not generated for Pseudo=Y, Generic Flag = Y or Inactive = Y</p> <p>Component_Suites: An availability business event for each of the room types that make up the component suite will be created. For example: If a suite is made up of three room types - three room type avail messaged would be generated</p> <p>Discontinued_Room_Types: Inactive Room Types are not included in the business event synchronization. Enhancement request added for a future version to consider inactive date for business event synchronization.</p>
	UPPER THRESHOLD	N	upperThreshold	
ITEM INVENTORY DETAILS	CONFIRMATION LEG NO	N	ConfirmationLeg No	Confirmation leg number of the reservation that is consuming the inventory items in OPERA PMS/ORS that are sent to the external system through OXI and OXIHUB.
	CONFIRMATION NO	C	ConfirmationNo	Confirmation number of the reservation that is consuming the inventory items in OPERA PMS/ORS that are sent to the external system through OXI and OXIHUB.
	RESERVED BY	C	ReservedBy	Reservation reserved by of the reservation that is consuming the inventory items in OPERA Cloud that are sent to MYFIDELIO through OXI and OXIHUB.
	RESERVED BY ID	N	ReservedByID	Reservation reserved by ID number of the reservation that is consuming the inventory items in OPERA Cloud that are sent to the external system through OXI and OXIHUB.
ITEM INVENTORY DETAILS TRANSMIT	EXTERNAL REFERENCE LEG NO	N	ExtReferenceLeg No	
	EXTERNAL REFERENCE NO	C	ExtReferenceNo	
	RESERVED BY	C	ReservedBy	
	RESERVED BY ID	N	ReservedByID	

Action Type	Data Element	Data Type	XML Tag	Description
ITEM INVENTORY TOTALS	ITEM CODE	C	ItemCode	
	ITEMS AVAILABLE	N	ItemsAvailable	
	ITEMS IN STOCK	N	ItemsInStock	
	ITEMS SOLD	N	ItemsSold	
NEW ALLOWANCE	ALLOWANCE	N	Allowance	
	BEGIN DATE	D	BeginDate	
	END DATE	D	EndDate	
	INCLUDE OOO	C	includeOOO	
	INCLUDE SELL LIMIT	C	includeSellLimit	
	LOWER THRESHOLD	N	lowerThreshold	
	RATE CATEGORY	C	rateCategory	
	RATE CODE	C	RateCode	
	ROOM TYPE	C	RoomType	Pseudo_Room_Types: Not generated for Pseudo=Y, Generic Flag = Y or Inactive = Y Component_Suites: An availability business event for each of the room types that make up the component suite will be created. For example: If a suite is made up of three room types - three room type avail messaged would be generated  Discontinued_Room_Types: Inactive Room Types are not included in the business event synchronization. Enhancement request added for a future version to consider inactive date for business event synchronization.
		UPPER THRESHOLD	N	upperThreshold
SUMMARY TOTALS	DATE	D	Date	The current business date.
	HOTEL ROOMS SOLD	N	HotelRoomsSold	
	OUT OF ORDER	N	OutOfOrder	This does not include Out of Service Rooms.
	OVERBOOKING	N	Overbooking	

Action Type	Data Element	Data Type	XML Tag	Description
	PHYSICAL ROOMS	N	PhysicalRooms	In the case of Suites: An availability business event for each of the room types making up the component suite will be generated. As there is no physical inventory attached to the component suite - physical rooms could never be determined.
	ROOM TYPE	C	RoomType	<p>Pseudo Room Types: Not generated for Pseudo=Y, Generic Flag = Y or Inactive = Y</p> <p>Component Suites: An availability business event for each of the room types that make up the component suite will be created. For example: If a suite is made up of three room types - three room type availability messages would be generated.</p> <p>Discontinued Room Types: Inactive Room Types are not included in the business event synchronization. Enhancement request added for a future version to consider inactive date for business event synchronization.</p>
	SOLD ROOMS	N	SoldRooms	Number of rooms that have been reserved.
UPDATE ALLOWANCE	ALLOWANCE	N	Allowance	
	BEGIN DATE	D	BeginDate	
	END DATE	D	EndDate	
	INCLUDE OOO	C	includeOOO	
	INCLUDE SELL LIMIT	C	includeSellLimit	
	LOWER THRESHOLD	N	lowerThreshold	
	RATE CATEGORY	C	rateCategory	
	RATE CODE	C	RateCode	

Action Type	Data Element	Data Type	XML Tag	Description
	ROOM TYPE	C	RoomType	<p>Pseudo Room Types: Not generated for Pseudo=Y, Generic Flag = Y or Inactive = Y</p> <p>Component Suites: An availability business event for each of the room types that make up the component suite will be created. For example: If a suite is made up of three room types - three room type availability messages would be generated.</p> <p>Discontinued Room Types: Inactive Room Types are not included in the business event synchronization. Enhancement request added for a future version to consider inactive date for business event synchronization.</p>
	UPPER THRESHOLD	N	upperThreshold	

## Business Events - Block

The following table outlines the action types, data elements, data types and XML tag names within this OPERA Cloud Business Events module.

Action Type	Data Element	Data Type	XML Tag	Description
BLOCK RESTRICTIONS	ARRIVAL	C	Arrival	
	BLOCK ID	N	BlockId	
	BOOK MAX ADV	N	BookMaxAdv	
	BOOK MIN ADV	N	BookMinAdv	
	DAY OF WEEK	C	DayOfWeek	
	DEPARTURE	C	Departure	
	LENGTH OF STAY NA	C	LengthOfStayNA	
	MAX LOS	N	MaxLos	
	MAX STAY THROUGH	N	MaxStayThrough	
	MIN LOS	N	MinLos	
	MIN STAY THROUGH	N	MinStayThrough	
	ROOM TYPE	C	RoomType	
	SET ON	C	SetOn	
STAY	C	Stay		

Action Type	Data Element	Data Type	XML Tag	Description
DELETE BLOCK HEADER	ALIAS	C	Alias	
	ARRIVAL TIME	T	ArrivalTime	
	BLOCK CODE	C	BlockCode	The Block Code of the Block. This does not need to be unique based on application parameter UNIQUE BLOCK CODE.
	BLOCK NAME	C	BlockName	
	BLOCK TYPE	C	BlockType	
	BOOKING STATUS	C	BookingStatus	Status will be shown as CAN for cancelled blocks.
	BOOKING TYPE	C	BookingType	
	CAT STATUS	C	CatStatus	
	CATERING ONLY YN	C	CateringOnlyYn	
	CHANNEL	C	Channel	
	COMMISSION	C	Commission	
	COMPANY NAME	C	CompanyName	
	COMPANY NAME ID	N	CompanyNameId	
	CONTROL BLOCK LOCALLY	C	ControlBlockLocally	
	CREDIT CARD NUMBER	C	CreditCardNumber	
	CURRENCY CODE	C	CurrencyCode	The currency code that the block was created in.
	CUTOFF DATE	D	CutoffDate	The date when the system will release any non-picked up rooms and put back into inventory.
	CUTOFF DAYS	N	CutoffDays	The number of days before the arrival date when the system will release any non-picked up rooms and put back into inventory.
	DATES FLEXIBLE	C	DatesFlexible	
	DECISION DATE	D	DecisionDate	
DEPARTURE TIME	T	DepartureTime		
ELASTIC BLOCK	N	ElasticBlock	Is this Block allowed to have reservations made outside the block date?	
END DATE	D	EndDate	The UPDATE BLOCK HEADER business event will not be triggered for business blocks that are updated and have an End Date prior to the current business date.	

Action Type	Data Element	Data Type	XML Tag	Description
	EXTERNAL LOCKED	C	ExternalLocked	
	FOLLOW UP DATE	D	FollowUpDate	
	GROUP NAME	C	GroupName	Refers to the Group Profile Name attached to the Block. Block name is the name of the Business Block.
	GROUP NAME ID	N	GroupNameId	
	GSO ASSOCIATE	C	GsoAssociate	
	GSO SENDING LOCATION	C	GsoSendingLocation	
	GUARANTEE REQUIRED	C	GuaranteeRequired	
	INSERT DATE	D	InsertDate	This doesn't apply to Block Grids as Insert Data is not available for inserting availability in the grid. Update Block Header would give you the Update Date.
	INSERT USER	N	InsertUser	
	ISAC OPPTY ID	C	IsacOpptyId	
	LINK DATE	D	LinkDate	
	MARKET CODE	C	MarketCode	
	OPPTY CREATED DATE	D	OpptyCreatedDate	
	ORIGINAL BEGIN DATE HOLIDEX	D	OriginalBeginDateHolidex	
	PAYMENT METHOD	C	PaymentMethod	
	PRINT RATE FLAG	C	PrintRateFlag	
	PRODUCTS	C	Products	The add-on packages that have been attached to the block or are attached by default because a Package is attached to the Rate Code on the Block Header.
	RATE CODE	C	RateCode	The rate code that has been attached to the block. There is no relationship between a group and a rate code. A rate code can be used for both transient and block reservation. A business practice could be to only use specific rate codes for blocks, but OPERA would not force this functionality.
	RESERVATION METHOD	C	ReservationMethod	

Action Type	Data Element	Data Type	XML Tag	Description
	RESERVATION TYPE	C	ReservationType	The default reservation type for all reservations made against this block. If a Block has a Block Status of 'O' Open for Pickup, the Reservation Type should be used to determine if the Rooms Held are Deduct or Non-Deduct from Inventory.
	RESERVE INVENTORY	C	ReserveInventory	Value will be populated with Y or N. When Y, the Block rooms are deduct from inventory. This is relevant when Block Status is 'O' - Open for Pickup. This Block Status alone does not represent whether the inventory is deduct or non deduct. This element is released in Version 2.6.
	RESPONSE DUE DATE	D	ResponseDueDate	
	ROOMING LIST DUE	D	RoomingListDue	
	SELL THRU	C	SellThru	
	SHOULDER END DATE	D	ShoulderEndDate	
	SHOULDER END RATE	C	ShoulderEndRate	
	SHOULDER START RATE	C	ShoulderStartRate	
	SHOULDER STARTING DATE	D	ShoulderStartingDate	
	SOURCE CODE	C	SourceCode	
	SOURCE NAME	C	SourceName	
	SOURCE NAME ID	N	SourceNameId	
	STARTING DATE	D	BLKStartDate	

Action Type	Data Element	Data Type	XML Tag	Description
	STATUS	C	BLKStatus	The current block status. 'C'=Returns all held rooms to inventory; 'F'= Not open for Pickup, do not deduct rooms from inventory; 'I'= Not open for pickup, deduct from inventory; 'O'= Open for pickup. This alone does not determine whether or not to deduct rooms from inventory. When 'O' is received as the block status (status element) then the reservation type also needs to be considered. The reservation type determines if the rooms are deduct or non-deduct. 'P'=Not open for pickup. Do not deduct from inventory. This status is no longer used in OPERA, instead 'F' is assigned, however, blocks created in the past may indeed have this status.
	SUPER BLOCK CODE	C	SuperBlockCode	If this block is a sub-block of another, what is the code of the main block?
	SUPER BLOCK ID	C	SuperBlockId	If this block is a sub-block of another, what is the Block ID of the Main Block Header. In the case of Tour Series, the Super Block ID will be '-2'.
	SUPPRESS RATE FLAG	C	SuppressRateFlag	
	SYNC CONTRACT	C	SyncContract	
	TRACE CODE	C	TraceCode	
	TRAVEL AGENT NAME	C	TravelAgentName	
	TRAVEL AGENT NAME ID	N	TravelAgentNameId	
	UPDATE USER	N	UpdateUser	
	WEB BOOKABLE	C	WebBookable	
DELETE CONTRACT HEADER	BLOCK NAME	C	BlockName	
	CONTRACT NO	C	ContractNo	
	LEADSTATUS	C	LeadStatus	
	REPLY_STATUS	C	ReplyStatus	
DELETE LEAD HEADER	ALIAS	C	Alias	
	BLOCK CODE	C	BlockCode	The Block Code of the Block. This does not need to be unique based on application parameter UNIQUE BLOCK CODE.

Action Type	Data Element	Data Type	XML Tag	Description
	BLOCK NAME	C	BlockName	
	CATERING ONLY YN	C	CateringOnlyYn	
	CHANNEL	C	Channel	
	COMPANY NAME	C	CompanyName	
	COMPANY NAME ID	N	CompanyNameId	
	CONTROL BLOCK LOCALLY	C	ControlBlockLocally	
	CREDIT CARD NUMBER	C	CreditCardNumber	
	CURRENCY CODE	C	CurrencyCode	The currency code that the block was created in.
	CUTOFF DATE	D	CutoffDate	The date when the system will release any non-picked up rooms and put back into inventory.
	CUTOFF DAYS	N	CutoffDays	The number of days before the arrival date when the system will release any non-picked up rooms and put back into inventory.
	DATES FLEXIBLE	C	DatesFlexible	
	ELASTIC BLOCK	N	ElasticBlock	Is this Block allowed to have reservations made outside the block date?
	END DATE	D	EndDate	The UPDATE BLOCK HEADER business event will not be triggered for business blocks that are updated and have an End Date prior to the current business date.
	EXTERNAL LOCKED	C	ExternalLocked	
	GROUP NAME	C	GroupName	Refers to the Group Profile Name attached to the Block. Block name is the name of the Business Block.
	GROUP NAME ID	N	GroupNameId	
	GUARANTEE REQUIRED	C	GuaranteeRequired	
	INSERT DATE	D	InsertDate	This doesn't apply to Block Grids as Insert Data is not available for inserting availability in the grid. Update Block Header would give you the Update Date.

	PRODUCTS	C	Products	The add-on packages that have been attached to the block or are attached by default because a Package is attached to the Rate Code on the Block Header.

Action Type	Data Element	Data Type	XML Tag	Description
	RANKING CODE	C	RankingCode	The rate code that has been attached to the block. There is no relationship between a group and a rate code. A rate code can be used for both transient and block reservation. A business practice could be to only use specific rate codes for blocks, but OPERA would not force this functionality.
	RATE CODE	C	RateCode	
	RATE GUARANTEED YN	C	RateGuaranteedYn	
	RATE OVERRIDE REASON	C	RateOverrideReason	
	RATE OVERRIDE YN	C	RateOverrideYn	
	RATE PROTECT	C	RateProtect	
	RESERVATION METHOD	C	ReservationMethod	
	RESERVATION TYPE	C	ReservationType	The default reservation type for all reservations made against this block. If a Block has a Block Status of 'O' Open for Pickup, the Reservation Type should be used to determine if the Rooms Held are Deduct or Non-Deduct from Inventory.
	RESERVE INVENTORY	C	ReserveInventory	Value will be populated with Y or N. When Y, the Block rooms are deduct from inventory. This is relevant when Block Status is 'O' - Open for Pickup. This Block Status alone does not represent whether the inventory is deduct or non deduct. This element is released in Version 2.6.
	RESPONSE DUE DATE	D	ResponseDueDate	
	ROOMING LIST DUE DATE	D	RoomingListDueDate

	GROUP NAME ID	N	GroupNameId	
	GUEST NAME ID	N	GuestNameId	
	INACTIVE DATE	D	InactiveDate	
	INSERT DATE	D	InsertDate	
	INSERT USER	N	InsertUser	
	LENGTH OF STAY	N	LengthOfStay	The Length of Stay of the reservation.
	MARKET CODE	C	MarketCode	The Market Code on the reservation.
	MEMBERSHIP NUMBER	C	MembershipNumber	
	MEMBERSHIP TYPE	C	MembershipType	
	MOVE ACROSS RESORT	C	MoveAcrossResort	Was this reservation moved from another resort
	NAME	C	Name	

Action Type	Data Element	Data Type	XML Tag	Description
	NO OF UNITS	N	NoOfUnits	
	NO POST	C	NoPost	
	NUMBER OF ROOMS	N	NumberOfRooms	Suites: The value is only one room of the suite room type. OPERA will then deduct from availability for the room types that make up that suite.
	OPTED FOR COMM YN	C	OptedForCommYn	
	ORIGIN	C	Origin	
	PAYMENT METHOD	C	PaymentMethod	
	PRINT RATE YN	C	Printrateyn	
	PRODUCTS	C	Products	The packages that are attached as add-on to the reservation. This can either be via the Rate Code or manually added to the Reservation.
	RATE AMOUNT	N	RateAmount	This is the rate amount the guest will be charged. The amount can be based on the configuration of the rate code but not always. A reservation can be made without a rate code or a discount could be applied. The amount is always in the currency configured or selected in the LOV for currency on the reservation. External system should subscribe to element 'Currency Code' if in a multi-currency property.
	RATE CODE	C	RateCode	
	RATEABLE VALUE	N	RateableValue	Amount used to compare to the hurdle rate If the rate code is non-yieldable or there is not a rate code, this value will be empty.
	REALTIME EXCHANGE	C	RealtimeExchange	
	REF TYPE CODE	C	RefTypeCode	
	RESERVATION STATUS	C	ReservationStatus	

Action Type	Data Element	Data Type	XML Tag	Description
	RESERVATION TYPE	C	ReservationType	Determines if a Reservation is Deduct or Non Deduct. Additionally, the Reservation Type can be configured to mandate an Arrival Type, if a credit card is required and if a deposit is required. These are user definable.
	RESORT	C	Resort	
	RESV NAME ID	N	ResvNameId	
	RESV VOUCHER ID	N	ResvVoucherId	
	RETRO BENEFIT YN	C	RetroBenefitYn	
	ROOM	C	RoomNumber	What room number the reservation is assigned.
	ROOM TYPE	C	RoomType	Suites: One room for the suite room type. OPERA would then deduct from availability for the suite room type (not affecting inventory as there is not physical inventory of that room) and then the room types that make up that suite.
	SHARE YN	C	ShareYN	Is this reservation a share with? This field is reliable in both SYNC and STANDARD data.
	SOURCE CODE	C	SourceCode	
	SOURCE NAME	C	SourceName	
	SOURCE NAME ID	N	SourceNameId

## Configuring External Systems

### Prerequisites for Configuring External Systems

External Systems configuration defines the external systems integrated with OPERA Cloud. All validated partner solutions exist as External Systems to activate, configure and establish two-way communication with OPERA Cloud.

Additionally, you can define a new External Systems for any ad-hoc requirements to generate Business Events and share with an external system. Change your [location](#) to setup external systems for each property.

Once configured, user activity in OPERA Cloud triggers creation of business event XML messages for dequeue by external systems via OPERA Exchange integrations.

A Publisher is available to external systems to receive messages originating from another external system. To receive messages for events that originate outside OPERA Cloud, this relationship must be established. For example: If your property has two external systems: Yield System (YS) and Central Reservations (CRS), you can set up a relationship between these two external systems:

- If the yield system would like to receive Reservation Business Events generated from both OPERA Cloud and the **CRS** system, the Publisher is setup on the **YS** external system to receive the business events generated by the "CRS" external system.
- If the CRS would like to receive Business Events when the Yield System sets restrictions or hurdle rates, the Publisher is setup on the **CRS** external system to receive the Business Events generated by the **YS** external system.

## Adding External Systems

### Note:

Do not create External System Codes with reserved names such as OPERA, OHIP or general such as Hospitality, External system, Interface, Integration.

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **External Systems**.
2. Click **New** and enter the following details:
  - a. **Property:** Enter or select the property
  - b. **Code:** Enter a code for the external system.
  - c. **Description:** Enter a name of the external system.
  - d. **External URI:** This HTNG features is equivalent to the URN that will be sent to OPERA Cloud from an external HTNG vendor .
  - e. **Sequence:** Specify sequence in which the external system will display in the External Systems list.
  - f. **Lookup:** Click to enable if the external system supports profile lookup. For more information, see [Using Profile Lookup and Download with Integrated Solutions](#)
  - g. **Auto Configure External Databases:** Select check box to auto configure an [external database](#) for the selected properties. The External Database Code will be ExternalSystemCode + ChainCode.
  - h. **Properties:** Details section
    - i. **Property:** Select the required properties from the list. For more information, see [hub location](#).
    - ii. **Consumer:** Consumer code, this is auto generated or external database code is defaulted when saved.
    - iii. Click **Activate** then click **Save**.
    - iv. To delete details, click vertical ellipsis **Actions** menu and select **Delete**, then click **Delete** to confirm.
3. Click **Save**.

## Editing External Systems

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **External Systems**.
2. Enter search criteria and click **Search**.
3. Select the external system, click the vertical ellipsis **Actions** and select **Edit**.
4. Update details.
5. To delete Additional Details, click the vertical ellipsis **Actions** menu and select **Delete**, click **Delete** to confirm.
6. Click **Save**.

### Deleting External Systems

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **External Systems**.
2. Enter search criteria and click **Search**.
3. Select the external system in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

### Managing External System Publishers

Publisher functionality is available to subscribe (receive) the business event messages originating from another external system.

For example: Property 'PROP1' is integrated with two distinct external systems - a Central Reservations (CRS) system and a Customer Relationship Management (CRM) system and want to set up a relationship between the CRS and CRM external systems, so that the CRM receives profile business events generated from both OPERA Cloud and the CRS system. The Publisher is setup on the subscriber (receiving) CRM External System.

### Adding a Publisher

1. From the **Administration** menu, select **Interfaces**, select **Business Events**, and then select **External Systems**.
2. Enter search criteria and click **Search**.
3. Select the external system to receive business events, then click the vertical ellipsis **Actions** menu and select **Publisher**.
4. Click **New**.
  - a. **Publisher**: Select the originating external system from the list.
  - b. **Property**: Enter or select a property.
5. Click **Save**.

### Deleting Publisher

1. From the **Administration** menu, select **Interfaces**, select **Business Events** and then select **External Systems**.
2. Enter search criteria and click **Search**.
3. Select the external system, click **vertical ellipsis** and select **Publisher**.
4. Select the publisher, click the **vertical ellipsis** and select **Delete**.
5. Click **Delete** to confirm.

## Channel Configuration

Third parties are used to sell inventory and include travel agents on a global distribution system (GDS) and internet hotel booking portals on an alternate distribution system (ADS). You must configure these channels and create distribution templates, template types, and total pricing elements.

- **Channel Setup**: This enables the hotel and channel to process transactions. Setup includes creating a code and description of the channel. You can identify the channel type,

rates, room types, rate categories, rate levels, sub-channels, and error codes associated with the channel.

- **Distribution Templates:** These publish a rate to all channels configured in the rate code template. You can create templates at the chain or property level.
- **Template Type:** Use this to create a template type code and template description, then use the template type code when configuring Distribution Templates.
- **Total Pricing Elements:** These associate taxes or service fees with transaction codes. Total Pricing Elements provide channels and other reservation sources with a more detailed breakdown of charges.

## Configuring Channel Setup

The Channels Setup lets you configure the various channels used to sell a property's inventory through third parties.

### Adding Channel Setup

1. From the **Administration** menu, select **Interfaces**, select **Channel Configuration**, and select **Channel Setup**.
2. Click **New** and complete the following:
  - a. **Code.** Enter an external system code for the channel.
  - b. **Description.** Enter a description for the channel.
  - c. **Type.** Select a channel type from the list. Channel types include: ADS, GDS, ODS, ON BEHALF, SWITCH, OWS, or WEB.
  - d. **Sell Method.** Select a sell method from the list that the channel type supports.
  - e. **Add-on cloud service (subscription).** Select the subscription in place at your property. This is available to only channel type = ADS.
3. Click **Save**.

### Editing Channel Setup

1. From the **Administration** menu, select **Interfaces**, select **Channel Configuration**, and select **Channel Setup**.
2. Enter search criteria and click **Search**.
3. In the search results, select the **Channel**, click the vertical ellipsis **Actions** menu, and select **Edit**.
4. **Channel Details:**
  - a. Select **Edit** and complete the following:
    - i. **Description.** Enter a description for the channel.
    - ii. **Sell Method.** Select a sell method from the list. Only rate types that the channel type supports are displayed.
    - iii. **Web site URL.** Enter the website URL.
    - iv. **Inactive.** Select the check box to inactivate the channel.
  - b. Click **Save**.
5. **Error Codes.**
  - a. Click **New** and complete the following:

- i. **Code.** Create a code.
      - ii. **Description.** Briefly describe the new code.
      - iii. **Type.** Select a channel Type from the drop-down menu.
      - iv. **Sell Method.** Select a Sell Method from the drop-down menu.
    - b. Click **Save**.
  6. **Room Types.** Add all of the room types to sell through the channel to this list. The room type base table also prevents accidental creation and duplication of room types that are to be sold.
    - a. Click **New** and complete the following:
      - i. **Ch. Room Type.** The channel room type.
      - ii. **Description.** A description of the channel room type.
      - iii. **Inactive Date.** The inactive date of the room type.
    - b. Click **Save**.
  7. **Sub-Channels.**
    - a. Click **New** and complete the following:
      - i. **Sub-Channel.** Enter a sub-channel.
      - ii. **Use Sub-Channel Mapping.** Select the check box to use sub-channel mapping.
      - iii. **Inactive.** Select to make the sub-channel inactive.
    - b. Click **Save**.
  8. **Rate Categories.**
    - a. Click **New** and complete the following:
      - i. **Rate Category.** Enter a rate category.
      - ii. **Description.** Enter a description.
      - iii. **Negotiated.** Select if it is configured to use for negotiated rates.
      - iv. **Inactive.** Select to make the rate category inactive.
    - b. Click **Save**.
  9. **Rate Levels.**
    - a. Click **New** and complete the following:
      - i. **Rate Level.** Enter a rate level.
      - ii. **Description.** Enter a description.
    - b. Click **Save**.

## Configuring Channel Distribution Templates

Use the Channel Distribution screen to publish a rate that is highlighted on the Rate Header screen to all channels configured in the rate code template.

### Adding Channel Distribution Templates

1. From the **Administration** menu, select **Interfaces**, select **Channel Configuration**, and select **Distribution Template**.

2. Click **New** and complete the following:
  - a. **Location Type**. Select **Chain** to configure for a chain; select **Property** to configure for the property.
  - b. **Code**. Enter a code.
  - c. **Description**. Enter a description.
  - d. **Type**. Select a type from the list.
  - e. **Sequence**. Enter a display sequence number.
  - f. **Negotiated Rate**. Select check box.
  - g. **Attached Channel Distributions**.
    - i. Click **New** and complete the following:
      - i. **Channel**. Select a channel from the list.
      - ii. **Channel Rate Code**. Enter a rate code.
      - iii. **Rate Category**. Select a rate category from the list.
      - iv. **Regional Availability**. Select the check box if the rate will participate in Regional Availability processing.
    - ii. Click **Save**.
3. Click **Save**.

#### Editing Channel Distribution Templates

1. From the **Administration** menu, select **Interfaces**, select **Channel Configuration**, and select **Distribution Template**.
2. Enter search criteria and click **Search**.
3. Select a **template** in the search results, click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update details.
5. Select the **Inactive** check box to inactivate the template.
6. Click **Save**.

#### Deleting Channel Distribution Templates

1. From the **Administration** menu, select **Interfaces**, select **Channel Configuration**, and select **Distribution Template**.
2. Enter search criteria and click **Search**.
3. Select a **template** in the search results, click the vertical ellipsis **Actions** menu, and select **Delete**.
4. Click **Delete** to confirm.

## Mapping Total Pricing Elements to Channels

Mapping total pricing elements classifies channel pricing elements as either a tax or a service fee when associated with a transaction code.

1. From the **Administration** Navigation Bar, select **Interfaces**, **Channel Configuration**, and then select **Total Pricing Elements**.

2. Click **New**.
3. Select either **Tax** or **Service Fee**. This classifies the element as either a tax or a service fee when associated with a transaction code. Your selection determines the available choices in the Element Code field.
4. Select a **Property** name.
5. Select the **Transaction Code** you wish to map.
6. Select the **Element Code** that best describes the pricing element.
7. Click **Save**.

## Channel Controls

Channel Controls provide the ability to customize Channel functionality to your specific needs. You can do this by activating or deactivating Functions, turning Parameters on or off, and selecting values for Settings.

### Channel Controls — ARI Upload

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Interfaces for Channel Controls.

**Table 16-1 Channel Controls — ARI Upload Parameters**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>BLOCK CODE USED BY EXTERNAL CHANNEL BLOCK</b> [BLOCKCODEUSED BYEXTERNALCHANNEL]		Code Used By External Channel.
<b>INVENTORY RESTRICTION UPDATE</b> INVENTORYRESTRICTION UPDATE]		Inventory and restrictions update messages supported for the channel.
	<b>AVAILABILITY UPDATE DAYS</b> [AVAILABILITYUPDATEDAYS]	Maximum number of days in the future for AVH (Inventory and Restriction) messages.
	<b>ROLL OVER DATE</b> ROLLOVERDATE	Used to hold the date of the last restatus.

Table 16-1 (Cont.) Channel Controls — ARI Upload Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
	<b>DO NOT SEND SEPARATE INVENTORY MESSAGE WHEN AVAILABILITY OPEN/CLOSE</b> [RATE_ROOM_INVENTORY_RESTRICTION_RESTAUS]	With the parameter inactive, when inventory changes, OPERA will send to the ADS channel an Inventory message (OPEN/CLOSE with Rate Code = ALL) for each Room Type, and a Restriction message with any applicable restrictions. With the parameter active, when inventory changes, OPERA will evaluate existing restrictions and send to the ADS channel a Restriction message with OPEN/CLOSE for each Room Type and Rate Code based on the inventory and applicable restrictions.
	<b>ADS MAX RATEROOM COMBINATIONS LIMIT</b> [ADS_MAX_RATEROOM_LIMIT]	This parameter setting will control the total number of rate and room combinations allowed during channel rate room distribution when PUSH DYNAMIC RATES PARAMETER is enabled. The Channel user will not be able to distribute rate room more than the value of this parameter set here.
	<b>SEND OPENCLOSE FOR ADS CHANNELS WHEN RATESET IS UPDATED OR RATEROOM DISTRIBUTED</b> [SEND_OPENCLOSE_RATESETDATE_CHANGES]	When parameter value is set yes, when rate set is extended or shortened or new rate rooms are distributed in channel, it would calculate and process open close for that rate room combination and send Availability Update Messages for ADS channels.
<b>PROPERTY UPDATE</b> [PROPERTYUPDATE]		Property update messages supported for the channel.
<b>RATE UPDATE</b> RATEUPDATE		Rate Update messages supported for the channel.
	<b>RATE PERIOD</b> RATEPERIOD	Total number of Start and End date combinations for each individual rate for rate upload message.
	<b>RATE ROLL OVER DATE</b> RATEROLLOVERDATE	Rate Update Roll Over Date.
	<b>RATE TYPE</b> RATETYPE	Rate Type Daily, Weekly etc.
	<b>RATE UPDATE DAYS</b> RATEUPDATEDAYS	Maximum number of days in advance to update Rate.
	<b>PUSH DYNAMIC RATES TO ADS</b> PUSH_DYNAMIC_RATES	When this parameter is enabled, the property will be able to send Dynamic Base and Advanced Dynamic Base Rate update messages to the ADS Channel as part of the ARI Rate update message.

**Table 16-2 Channel Controls — ARI Upload Settings**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>RATE CHANGE TYPE</b> RATECHANGETYPE		When there is rate change during availability or reservation, this setting determines how booked amount will be calculated. Options are FIRSTNIGHT, HIGHEST, LOWEST, AVERAGE, MOSTCOMMON.

## Channel Controls — Availability

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Interfaces for Channel Controls.

**Table 16-3 Channel Controls — Availability Parameters**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ALTERNATE RATES RETURNED</b> [ALTERNATERATESRETURNED]		Alternate Rates needs to be returned when requested rate range is not available.
<b>ALTERNATE RESORT</b> [ALTERNATERESORT]		When set to YES and requested resort is not available, return alternate available resorts in the response of general availability.
<b>AMENITY CODE FILTER</b> [AMENITYCODEFILTER]		Indicates if availability response has to be filtered by amenity codes.
<b>BUILD RPE MESSAGE</b> [BUILDRPEMESSAGE]		Send RPE List segment to individual GDS channel as part of PALS RP segment.
<b>COMMISSIONABLE RATE CODE FILTER</b> [COMMISSIONABLERATECODEFILTER]		Indicates if availability response has to be filtered by commission rates.
<b>INCLUDE MULTICURRENCY RATE CODES</b> [INCLUDEMULTICURRENCYRATECODES]		Indicates whether to include multi-currency rate code in rate range for general and regional availability.
<b>Ability to Quote Rates in Foreign Currencies OPERA Control</b> [MULTICURRENCY]		When set to YES, include multi-currency rate code in rate range of area or regional availability response.
<b>RETURN NEGOTIATED ONLY</b> [RETURNNEGOTIATEDONLY]		Return only requested negotiated rates in the response, by default public rates are always returned in general availability when negotiated rates requested.

Table 16-3 (Cont.) Channel Controls — Availability Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>RETURN RATE PLAN CODE</b> [RETURNRATEPLANCODE]		Indicates if channel making the booking is using access rate code or channel rate code.
<b>SEARCH BY RATE LEVEL</b> [SEARCHBYRATELEVEL]		Allow search for channel Availability response based on requested rate level.
<b>TOTAL PRICING WITH PACKAGES TAXES</b> [TOTALPRICINGWITHPACKAGESTAXES]		Indicates if channel supports detail price including taxes, packages in the availability response.
<b>SEARCH ALTERNATE RESORT PROMO AVAILABILITY</b> [SEARCH_ALTERNATE_RESORT_PROMO_AVAILABILITY]		When this parameter is set to Y, it will search alternate resort availability for same promotion code requested for all alternate resorts.
<b>CASHING</b> [CACHEENABLED]		Select to allow the caching of General Availability and Fetch Calendar requests.
<b>IGNORE REGION SEQUENCE</b> [IGNORE_REGION_SEQ]		Select for the channel to return regional availability results by city as configured under Setup>System Configuration>Property>Marketing Cities. If this setting is not selected, OWS regional availability will return results first by region and then by city.
<b>IGNORE REQUESTED CURRENCY IN RATE RANGE</b> [IGNORE_REQUESTED_CURRENCY_IN_RATERANGE_DISPLAY]		This parameter applies to regional availability requests. When the request contains only one RPC code, the response will return the requested code in the currency setup in rate-header/rate-details. If the request contains more than one RPC code, the response will return the rate-range in the resort currency of the hotel and exclude any rate that is loaded in a currency that is not the resort currency. If another rate range currency is setup in property level application settings "RATE RANGE CURRENCY CODE", then response would be returned in this currency.
<b>REQUESTED LANGUAGE CODE FOR GDS</b> [REQUESTED_LANGUAGE_CODE_FOR_GDS]		Return the translated descriptions of channel rates, rooms, guarantee information, policies, marketing and error texts in the language code that is sent in the RLC element (Requested Language Code)of availability and booking requests from the GDS. If there is no translation configured for the language code sent, the response will default to the English description.

Table 16-3 (Cont.) Channel Controls — Availability Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>RESERVATION RULES AND POLICIES IN GENERAL AVAILABILITY</b> [RESV_RULES_POLICIES_FOR_AVAILABILITY]		When set to Yes, the General Availability response will include deposit, cancellation, guarantee and marketing policies. When set to No, these policies will be excluded from the General Availability response. When using General Availability to display an Availability Calendar for a website, there is no need to fetch this extra detail, and setting this to No will help process requests faster and reduce message size.
<b>RETURN EXPECTED CHARGES IN REGIONAL AVAILABILITY EXTENDED</b> [RETURN_EXPECTEDCHARGES_IN_REGIONALAVAILABILITY_EXTENDED_RESPONSE]		Enabling this parameter will return the expected charges for the minimum and maximum rates in the Regional Availability Extended response.
<b>RETURN BARRATES FIRST GENERAL AVAIL</b> [RETURN_BARRATES_FIRST_GENERAL_AVAIL]		When the parameter set to Yes, the rate room combinations will be returned in general availability the way they currently are (with BAR shown separate from the rest of the order). When the parameter set to No, the rate-room combinations will be returned in general availability with BAR included in the mix based on the configured Order By values.
<b>GENERAL AVAILABILITY CACHE</b> [GENERAL_AVAILABILITY_CACHE]		When set to Y, If cache is valid for requested criteria, availability will be read from general cache table.

Table 16-4 Channel Controls — Availability Settings

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>DISPLAY AVAILABILITY ORDER</b> [DISPLAYAVAILABILITYORDER]		RateRoom order in the response would be by rate order or room order.
<b>MATCH AMENITIES</b> [MATCHAMENITIES]		When list of amenity codes are given in general availability request search criteria, return the response of room with amenity order.
<b>MAXIMUM AVAILABLE RATE ROOM</b> [MAXIMUMAVAILABILITYRATE_ROOM]		Maximum availability rate room returned in general availability response.

Table 16-4 (Cont.) Channel Controls — Availability Settings

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>MAX PROPERTY RETURNED</b> [MAXPROPERTYRETURN ED]		Maximum Property Returned for Regional Availability Request.
<b>SEARCH BY ACCESS CODE</b> [SEARCHBYACCESSCODE]		When Use Access Code is set as A then search for negotiated rates will happen against neg channel rate code instead of channel rate code.
<b>MAX AVAILABLE LIST ITEMS</b> [MAX_AVAIL_LIST_ITEMS ]		Maximum number of rate and room records to search in order to provide available rate and room combinations in the general availability response.
<b>NIGHTS ALLOWED FOR AVAILABILITY</b> [NIGHTSALLOWEDFORA VAILABILITY]		Maximum Number of Nights allowed for availability.
<b>OWS CALENDAR MODE</b> [OWS_CALENDAR_MODE ]		This parameter offers a selection of three different modes for the fetch calendar functionality. The following modes are offered on one multiple selection screen. Please ensure that multiple modes are not selected. NONE- This is the original calendar functionality. There are no specific rules applied and all rates will be returned in the response. The availability will be shown for all days and not each day. This mode does not evaluate BAR or channel inventory. This mode must not be combined with any single/multiple rate mode of the LOWEST mode. Rate code - Select a single rate code to use for the calendar functionality or make a multiple selection to have all rate codes returned in the response. When making multiple selection of rate codes, only a maximum of 25 rate codes will be processed for the calendar availability function. This mode must not be combined with NONE mode. LOWEST- The rates will be returned from the lowest to the highest in the response for rates setup in this parameter. This mode must be combined with any single or multiple rate codes.
<b>OWS GOOGLE CALENDAR MAX NIGHTS STAY</b> [OWS_GOOGLE_CALEND AR_MAX_NIGHTS_STAY]		This parameter setting allows google to request availability for their calendar for maximum number of nights per stay date.

**Table 16-4 (Cont.) Channel Controls — Availability Settings**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>REQUESTED BAR PUBLIC RATES</b> [REQUESTED_BAR_PUBLI C_RATES]		When this parameter have value of a-> REQUESTED,b->REQUESTED,BAR,c->REQUESTED,BAR,PUBLIC. When parameter value is set to requested, only requested rate codes will be returned as part of general availability, when value is set to REQUESTED,BAR, requested and bar rates will be returned as part of general availability, when set to REQUESTED,BAR,PUBLIC it would return requested, bar and all available public rates.

## Channel Controls — Blocks

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Interfaces for Channel Controls.

**Table 16-5 Channel Controls — Block Settings**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>MAXIMUM NO OF ROOMS ALLOWED TO BOOK</b> [MAXIMUMNOOFROOMS ALLOWEDTOBOOK]		Maximum No Of Rooms Allowed To Book by external channel.
<b>MASTER ALLOCATION BLOCK ID</b> [MASTER_ALLOCATION_ BLOCK_ID]		Master Allocation Block ID to be used when creating a block through OWS.
<b>MAXIMUM NUMBER OF ROOMS PER BLOCK</b> [MAXIMUM_NUMBER_OF _ROOMS_PER_BLOCK]		Maximum number of rooms per day that can be allocated when creating a Block/ Allotment thorough web.
<b>MINIMUM NUMBER OF ROOMS PER BLOCK</b> [MINIMUM_NUMBER_OF _ROOMS_PER_BLOCK]		Minimum number of rooms per day that can be allocated when creating a Block/ Allotment thorough web.

## Channel Controls — General

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Interfaces for Channel Controls.

Table 16-6 Channel Controls — General Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>DELETE PROFILE ATTRIBUTES</b> [DELETE_PROFILES_ATTRIBUTES_NO_VALUE_IN_REQUEST]		This parameter applies to the following name webservice functions: "UPDATEADDRESS", "UPDATENAME", "INSERTUPDATEUDFs", "UPDATEPHONE". If the parameter is ON and when the request comes with no value specified in the element, the respective attribute of the profile will be removed.
<b>EXTERNAL CONTROLLED</b> EXTERNALCONTROLLED]		Channel is controlled by an external system.
<b>OVERRIDE CHAIN OWNERSHIP</b> [OVERRIDE_CHAIN_OWNERSHIP]		This parameter can be set to yes, When in Opera Chain Membership parameter is on, Generic CRO functionality is on, ORS_CM parameter is on, if parameter value is set to Yes, Profile, Security, Membership WS requires in the input request Domain element with value of CRO Code to manage profile and membership even when WS points to dummy CRO. If valid CRO Code is sent in the message request for the profile, user can manage profile and membership from website.
<b>VIEW COMMISSION PERCENT</b> [VIEW_COMMISSION_PERCENT]		Enables the user to see the commission percent if the rate is commissionable.
<b>RETURN CP2 FIELDS</b> [RETURN_CP2_FIELDS]		If parameter value is set to Y, Complete Pricing fields will be returned in the Availability and Reservation response for GDS channels.
<b>OWS FULL PROTECTION</b> [OWS_FULL_PROTECTION]		When this parameter is set to Y, Full Lock is applied for protected profiles i.e certain Profile fields cannot be inserted/updated/deleted and when set to N Custom Protection template is available for the user.
<b>BILLING EMAIL REQUIRED</b> [BILLING_EMAIL_REQUIRED]		This parameter will set the email_yn value for a profile which is used during PrintPreCheckoutBill.
<b>IGNORE PROFILE HISTORY</b> [IGNORE_PROFILE_HISTORY]		This parameter when set to true will not save profile history in Opera.

Table 16-6 (Cont.) Channel Controls — General Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>MASK CC FOR WSRESPONSE</b> [MASK_CC_FOR_WSRESP ONSE]		When this parameter is set to Y, the following data will be masked in OWS responses: Passport Number, License number, etc. Date of Birth will be not returned in the OWS response. When this parameter is set to N, the following returned data will be unmasked in OWS responses: Passport Number, License number, etc.
<b>MAST PII FOR WSRESPONSE</b> [MASK_PII_FOR_WSRESP ONSE]		When this parameter is set to Y, the following data will be masked in OWS responses: Passport Number, License number, etc. Date of Birth will be not returned in the OWS response. When this parameter is set to N, the following returned data will be unmasked in OWS responses: Passport Number, License number, etc.
<b>OWS CALENDAR CACHE</b> [OWS_CALENDAR_CACHE ]		When set to Y, If cache is valid price and restrictions will be read from calendar cache table.
<b>OWS REGIONAL CACHE</b> [OWS_REGIONAL_CACHE ]		When set to Y, If cache is valid for price details and restrictions will be read from regional cache table.
<b>GDS TOTAL PRICING</b> [GDS_TOTAL_PRICING]		Enables total pricing for GDS Application.
<b>LDAP AUTHORIZATION</b> [LDAP_AUTHORIZATION]		When this parameter is active every OWS Web Service operation must pass valid LDAP user.

Table 16-7 Channel Controls — General Settings

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>DEFAULT LANGUAGE</b> [DEFAULT_LANGUAGE]		This parameter value indicates default language used in opera to store data in main tables for rate description, room description and others.
<b>INVENTORY THRESHOLD COUNT TO INVALIDATE CACHE TIMESTAMP</b> [INVENTORY_THRESHOLD_CACHE]		This parameter value indicates when no of rooms available for any property equal or less than this value update cache time stamp in OWS cached tracking table. When no of rooms available more than this value then time stamp on OWS cached tracking table is not updated.

## Channel Controls — Payment

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Interfaces for Channel Controls.

**Table 16-8 Channel Controls — Payment Parameters**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ALLOW PAYMENT WITHOUT CREDIT CARD NUMBER</b> [ALLOW_MAKEPAYMENT_WITHOUT_CC]		When the parameter value is set to YES, only the credit card type is required in the request. When the parameter value is set to NO, credit card number, expiration date and credit card type are required in the request.
<b>CREDIT CARD AUTHORIZATION REQUIRED</b> [CCAUTHORIZATIONREQUIRED]		Channel performs authorization of credit card before processing booking.
<b>CREDIT CARD SURCHARGE</b> [CREDITCARDSURCHARGE]		Enables credit card surcharges for the channel.
<b>ALLOW BOOK PRIOR CC EXPIRY DATE</b> [ALLOW_BOOK_PRIOR_CC_EXPIRY_DATE]		This parameter determines whether or not to allow bookings to make via OWS if the CC EXPIRY DATE is prior to the booking arrival date. If active, then bookings can be made. If not active, then bookings will not be made.

## Channel Controls — Rates

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Interfaces for Channel Controls.

**Table 16-9 Channel Controls — Rate Parameters**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CHANNEL RATE CATEGORY</b> [CHANNELRATECATEGORY]		Channel Rate Category setup is required.
<b>HTML TEXT EDITOR</b> [HTMLTEXTEDITOR]		Enables html text editor functionality for the channel.

**Table 16-9 (Cont.) Channel Controls — Rate Parameters**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CHANNEL OVERRIDE HIDE PROMOTIONS</b> [CHANNEL_HIDE_PROMO TIONS]		When Enabled, return promotion rate codes for this channel and property only if the promotion code is sent in the request message regardless of the HIDE PROMOTION RATES global parameter setting. If not enabled, promotion rate codes will be displayed based on the HIDE PROMOTION RATES global parameter setting.

**Table 16-10 Channel Controls — Rate Settings**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CHANNEL RATE CODE LENGTH</b> [CHANNELRATECODELE NGTH]		Channel Rate Code Length.
<b>ICON IMAGE URL</b> [ICONIMAGEURL]		Website Logo/Icon Image URL.

## Channel Controls — Reservations

The following tables outline the functions, parameters, and settings that can be configured in the OPERA Cloud Interfaces for Channel Controls.

**Table 16-11 Channel Controls — Reservation Parameters**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>ACCEPT LOWER RATE AMOUNT</b> [ACCEPTLOWERRATEAM OUNT]		Accept lower rate amount from the booking message for the channel.
<b>ADVANCED PACKAGE HANDLE</b> [ADVANCEDPACKAGEHA NDLE]		When set to Yes, returns additional package details during fetch available packages.
<b>CANCEL PENALTY OVERRIDE</b> [CANCELPENALTYOVERR IDE]		Channel is allowed cancel the booking with penalty exists.

Table 16-11 (Cont.) Channel Controls — Reservation Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CORPORATE NUMBER REQUIRED</b> [CORPORATENUMBERRE QUIRED]		Corporate Number required for the channel to book negotiated rates.
<b>LOG RESERVATION REGRETS</b> [LOG_RESERVATION_REG RETS]		When the parameter value is set to YES, for availability requests which are made through external channels, regrets will be logged in reservation_regrets table if the requested availability criteria is not met.
<b>OVERRIDE DEPOSIT RULE</b> [OVERRIDEDEPOSITRULE ]		Override Deposit Rule and allow cancellation refund.
<b>OVERRIDE INVENTORY RESTRICTION</b> [OVERRIDEINVENTORYR ESTRICTION]		Override Restriction or availability for the property and continue with booking.
<b>OWNERS CONTRACT REFERRAL YN</b> [OWNERS_CONTRACT_RE FERRAL_YN]		When Referral Reservation Parameter under ownership group is set to Y and this parameter is set to Y, reservation can be indicated as a Referral Reservation using create/update booking WS.
<b>RETURN ERROR ON LOWER RATES</b> [RETURNERRORONLOWE RRATES]		Return an error when rate received in the booking request by external vendor is lower than Reservation System.
<b>RETURN PACKAGE DETAILS</b> [RETURNPACKAGEDETAI LS]		Returns package details during fetch available packages, allows user to book packages while making booking without making call to additional web service.
<b>SESSION CONTROL</b> [SESSIONCONTROL]		When set to YES, reservations for this channel are created for the session using Guarantee code GDS-SESSION.
<b>SESSION MODIFICATION ALLOWED</b> [SESSIONMODIFICATION ALLOWED]		Modification of reservation is allowed when it is in session.
<b>ATTACH PROFILE ROOM FEATURES TO RESERVATION</b> [ATTACH_PROFILE_ROO M_FEATURES_TO_RESER VATION]		If this parameter is enabled, the room features attached to the profile will be auto attached to the reservation.
<b>CHANNEL GENERIC ROOM TYPE</b> [CHANNEL_GENERIC_RO OM_TYPE]		Enable mapping of one channel room type to multiple opera room types.

Table 16-11 (Cont.) Channel Controls — Reservation Parameters

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>CHANNEL INVENTORY</b> [CHANNEL_INVENTORY]		Activate the Channel Level Inventory Sell Limits Functionality.
<b>OVERRIDE AR SETTLEMENT VISIBLE ON FOLIO</b> [OVERRIDE_SHOW_AR_SETTLEMENT]		This is a Channel Parameter for overriding the OPERA parameter "AR SETTLEMENT VISIBLE ON FOLIO" which is used to Print AR Settlement Payment on the Folio.
<b>OVERRIDE RATES CLOSED DUE TO RANKING</b> [OVERRIDE_RATES_CLOSED_DUE_TO_RANKING]		Activating this parameter enables booking rate codes closed due to rank restriction.
<b>OWS UPDATE PROFILE FOR RESERVATION</b> [OWS_UPD_PROFILE_FOR_RESV]		When parameter value is set to Y, it will update profile attached with reservation during modify booking from OWS Webservices if request has existing profile id with new profile address, phone, email. When Value is set to N profile attached with reservation will not be updated when profile id is in the request.
<b>PREFERENCE COMMENTS OVERLAY</b> [PREFERENCE_COMMENTS_OVERLAY]		When this parameter is enabled, the external channel must provide a full overlay of the comments, specials, preferences, features, and memberships associated with the reservation.
<b>TEXT MESSAGE HANDLING</b> [SMS_CONFIRMATIONS]		Activate Text Message Handling Functionality when reservation is modified.
<b>VAULT TIMEOUT ERROR</b> [VAULT_TIMEOUT_ERROR]		When parameter value is set to YES, an error message will be returned and the reservation not booked if the credit card verification message times out to CC Vault. When the value is set to NO, the reservation will be created with a Cash payment method, and a warning will be logged as reservation comments to the reservation
<b>AUTO INVENTORY ITEM TRACE</b> [AUTO_INVENTORYITEM_TRACE]		Automatically create or delete Reservation Traces when Inventory Items are attached or deleted for a Reservation via the Channel.
<b>DEFAULT PAYMENT METHOD PER CHANNEL</b> [DEFAULT_PAYMENT_METHOD_PER_CHANNEL]		When active, a default payment method will be assigned to the reservation, and the payment method on the incoming booking will be assigned to a designated window.

**Table 16-12 Channel Controls — Reservation Settings**

CONTROL NAME	RELATED FUNCTION / PARAMETER / SETTING	DESCRIPTION
<b>RESERVATION STATUS WINDOW</b> [RESERVATION_STATUS_WINDOW]		This parameter specifies the time in minutes to consider for updating a reservation status from "Reserved" to "Changed."
<b>CONFIRMATION EMAIL FROM</b> [CONFIRMATION_EMAIL_FROM]		This parameter can be used to set the sender email address for the confirmation letter.

## Configuring Channel Mapping

Channel mapping establishes connections between OPERA Cloud codes and the codes used by external channels. The mapping helps ensure smooth and accurate processing of information and transactions between OPERA Cloud and external channels.

You can map channels to the following:

- Amenities
- Channel Letters
- Credit Cards
- Currencies
- Properties
- Reservation Types

### Channel Mapping Amenities

Amenities are the saleable offerings available to external channels. Properties must map their amenity codes to equivalent external channel codes in order for transaction processing to take place between OPERA Cloud and the external channels.

#### Adding Channel Mapping Amenities

Use the following steps to add Amenities to channels:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Amenities**.
2. Click **New**.
3. On the Amenity Management screen, complete the following fields:
  - a. **Property**. Select the property if logged into a chain location.
  - b. **Channel**. Select the channel where the amenity code will be available.
  - c. **Feature Type**. Select the feature type such as Room, Property, and so on.
  - d. **Feature**. Select the feature that belongs to the amenity code.

- e. **Amenity Code.** Select the Global Distribution System (GDS) amenity code from the list.
  - f. **Description.** As an option, enter a text description of the amenity or feature.
4. Click **Save**.

#### Editing Channel Mapping Amenities

Use the following steps to edit the Description field:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Amenities**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to edit and select Edit.
4. Make changes to the description.
5. Click **Save**.

#### Deleting Channel Mapping Amenities

Use the following steps to delete the Channel:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Amenities**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to delete and select **Delete**.

## Channel Mapping Letters

Use the Channel Letters screen to map confirmation and cancellation letter codes to channel properties.

#### Adding Channel Mapping Letters

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Channel Letters**.
2. Click **New**.
3. On the Channel Letters screen, complete the following fields:
  - a. **Property.** Select the property if logged into a chain location.
  - b. **Channel.** Select the channel in which the letter code will be used.
  - c. **Letter Type.** Select a letter type such as Confirmation, Cancellation, and so on.
  - d. **Letter Name.** Select the letter name.
  - e. **Language.** Select a language for the channel letter from the list.
4. Click **Save**.

#### Editing Channel Mapping Letters

Use the following steps to edit the Channel Letter Name field:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Channel Letters**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to edit and select **Edit**.
4. Make changes to the Letter Name.
5. Click **Save**.

#### Deleting Channel Mapping Letters

Use the following steps to delete the Channel.

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Channel Letters**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to delete and select **Delete**.

## Channel Mapping Credit Cards

Use the Channel, Credit Cards screen to map credit card types to channels.

#### Adding Channel Mapping Credit Cards

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Credit Cards**.
2. Click **New**.
3. On the Credit Cards screen, complete the following fields:
  - a. **Channel**. Select the channel in which the credit card will be used.
  - b. **Card Type**. Select a card type code used in OPERA Cloud such as VI for Visa, MC for Master Card, or AX for American Express from the list.
  - c. **Channel Card Type**. Enter the code used by the channel. It is recommended to use codes provided by the channel.
  - d. **Start Date**. Enter the date when the card is available to the channel.
  - e. **End Date**. Enter a date when the property becomes unavailable in the channel (optional).
4. Click **Save**.

#### Editing Channel Mapping Credit Cards

Use the following steps to edit the Credit Card mapping Start Date/End Date:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Credit Cards**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to edit, and select **Edit**.

4. Make changes to the Start Dates/End Date.
5. Click **Save**.

### Deleting Channel Mapping Credit Cards

Use the following steps to delete a Channel:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Credit Cards**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to delete, and select **Delete**.

## Channel Mapping Currencies

Use the Channel Mapping Currencies screen to map currencies to OPERA Cloud currency codes.

### Adding Channel Mapping Currencies

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Currencies**.
2. Click **New**.
3. On the Credit Card Management screen, complete the following fields:
  - a. **Channel**. The channel where the currency code will be used.
  - b. **Currency Code**. Select the currency code used in OPERA Cloud.
  - c. **Channel Currency Code**. Select the currency code used for the channel. It is recommended that you use ISO standards, such as USD for the US Dollar.
  - d. **Channel Decimal Position**. Enter the number of decimals supported by the channel, which is usually two.
  - e. **External Decimal Position**. Enter decimal the position as provided by the channel.
  - f. **Start Date**. Enter the date when the currency code is available to the channel.
  - g. **End Date**. Enter a date when the property becomes unavailable in the channel (optional).
4. Click **Save**.

### Editing Channel Mapping Currencies

Use the following steps to edit the Channel Decimal Position, External Decimal Position, or Start Date/End Date on the Currencies screen:

1. From the **Administration menu**, select **Interfaces**, select **Channel Mapping**, and select **Currencies**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to edit and select **Edit**.
4. Make changes to the Channel Decimal Position, External Decimal Position, or Start Date/End Date.

5. Click **Save**.

### Deleting Channel Mapping Currencies

Use the following steps to delete a Channel:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Currencies**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to delete and select **Delete**.

## Channel Mapping Properties

Use the Channel Mapping, Properties screen to map properties to OPERA Cloud property codes.

### Adding Channel Mapping Properties

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Property Management**.
2. Click **New**.
3. On the Credit Card Management screen, complete the following fields:
  - a. **Channel**. Select the channel where the property code will be used.
  - b. **Property**. Select the property code used in OPERA Cloud.
  - c. **Channel Property**. Enter the property name.
  - d. **Start Date**. Enter the date when the property becomes available to the channel.
  - e. **End Date**. Enter a date when the property becomes unavailable in the channel (optional).
  - f. **City**. Enter the city location of the property.
  - g. **Room Limit**. Enter the property's room limit per single booking.
  - h. **Prevailing Rates**. Select the check box to indicate the prevailing rates to be used by the channel.
4. Click **Save**.

### Editing Channel Mapping Properties

Use the following steps to edit Properties:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Property Management**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu of the channel you want to edit and select **Edit**.
4. Make changes to Channel Property, Start Date/End Date, City, Room Limit, or Prevailing Rates in the Property Management screen.
5. Click **Save**.

### Deleting Channel Mapping Properties

Use the following steps to delete a Channel:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Property Management**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu of the channel you want to delete and select **Delete**.

## Channel Mapping Reservation Types

Reservations are categorized by types such as Guaranteed, Checked-in, and so on. Use the Channel Mapping, Reservation Types screen to map OPERA Cloud reservation types to channels.

### Adding Channel Mapping Reservation Types

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Reservation Types**.
2. Click **New**.
3. On the Reservation Types screen, complete the following fields:
  - a. **Channel**. Select the channel where the reservation code will be used.
  - b. **Reservation Type**. Select the reservation type used in OPERA Cloud.
  - c. **Channel Reservation Type**. Enter the channel reservation type code used by the channel.
  - d. **Requirement Code**. Select a requirement codes such as Credit Card, Hold, and so on used in OPERA Cloud.
  - e. **Start Date**. Enter the date when the reservation type becomes available to the channel.
  - f. **End Date**. Enter a date when the reservation type becomes unavailable in the channel (optional).
4. Click **Save**.

### Editing Mapping Channel Reservation Types

Use the following steps to edit reservation types:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Reservation Types**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to edit and select **Edit**.
4. Make changes to the Channel Reservation Type, Requirement Code, or Start Date/End Date.
5. Click **Save**.

### Deleting Mapping Channel Reservation Types

Use the following steps to delete a Channel:

1. From the **Administration** menu, select **Interfaces**, select **Channel Mapping**, and select **Reservation Types**.
2. Select search criteria and click **Search**.
3. From search results, click the vertical ellipsis **Actions** menu on the channel you want to delete and select **Delete**.

## Channel Property Mapping

You must create and map property values with channel values for various codes such as reservation types, room types, card types, and so on to facilitate property queries and transactions through channels.

## Creating Channel Mapping Card Types

Card Type configuration enables you to map the credit card types associated with your property to channels.

### Adding Card Types

1. From the Administration menu, select **Interfaces**, select **Channel Property Mapping**, and select **Card Type**.
2. Click **New** and complete the following fields:
  - a. **Property**. Select the property from the list.
  - b. **Channel**. Select the channel from the list.
  - c. **Card Type**. Select the property's card type that you want mapped to the channel's card type.
  - d. **Channel Card Type**. Select the channel converted card type. This is the card type that will be configured for the channel.
3. Click **Save**.

### Editing Card Types

1. From the Administration menu, select **Interfaces**, select **Channel Property Mapping**, and select **Card Type**.
2. Enter search criteria and click **Search**.
3. From your search results, select the vertical ellipsis **Actions** menu and select **Edit**.
4. Select a **Channel Card Type** from the list.
5. Select an **Inactive Date** to stop using the selected card, if desired.
6. Click **Save**.

### Deleting Card Types

1. From the Administration menu, select **Interfaces**, select **Channel Property Mapping**, and select **Card Type**.
2. Enter search criteria and click **Search**.
3. From your search results, select the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Channel Rate Mapping

Channel Rate Mappings enables you to map property rate codes with the channel's rate codes. Begin by searching for existing rate code conversions.

### Adding New Channel Rate Mappings

1. From the Administration menu, select **Interfaces**, select **Channel Property Mapping**, and select **Channel Rate Mapping**.
2. Enter the **property** and other search criteria and click **Search**.
3. From your search results, click the vertical ellipsis **Actions** menu and select **New**. Complete the following fields:
  - a. **Channel Rate Code**. Enter a free text for channel rate code.
  - b. **Start Date**. The first date the rate code is available in the channel.
  - c. **End Date**. The last date the rate code is available in the channel.
  - d. **Rate Level**. Search for and select a channel rate level.
  - e. **Property radio button**. Select to keep the property rate description.
  - f. **Custom radio button**. Select to add a customized channel rate description.
  - g. **Rate Category**. Enter the rate category used by the channel host.
  - h. **Order**. This determines the order this Channel Rate Mapping appears when searched.
  - i. **SGA**. Enter the signature airline code. Use the SGA to filter rate codes for specific sources of business. This field can also be used to exclude specific sources of availability and bookings from the selection of rates.
  - j. **BlockRateIndicator**. This field cannot be edited once the channel conversion rate code is saved. To create a conversion using an OPERA Cloud rate code, select the Rate Code option from the list of values. To use inventory from a block, create a conversion for a channel rate using a rate code attached to the block or the block code. The Block Rate Indicator is used primarily for GDS channels as they cannot send the block code in the switch messages.
  - k. **Rate Update**. Select the check box if this rate should be sent to an ADS, GDS, or an ODS partner such as Expedia.
  - l. **Restriction Update**. Select the check box to send restrictions to an ADS, GDS, or ODS partner such as Expedia.
  - m. **Return to SGA**. Select the check box only when you want to return the signature airline code in the channel property availability response.
  - n. **Regional Availability**. Select the check box if this rate is to participate in Regional Availability processing.

### Adding Marketing Text Templates

1. From the Administration menu, select **Interfaces**, select **Channel Property Mapping**, and select **Marketing Text**.
2. Click the **Template tab** and click **New**.
3. Complete the following:
  - a. **Transaction Type**. The transaction type that displays the marketing text (mandatory field).
  - b. **Policy Type**. Select the policy type to use for this property. For example, Commission, Cancel Policy, or other.
  - c. **Policy Detail**. The policy type for specifying the method of returning the text.
  - d. **Start Date**. The first date the rate code is available in the channel (mandatory field).
  - e. **End Date**. The last date the marketing text is available in the channel.
  - f. **Marketing Text**. Enter the marketing message to appear throughout the channel.
4. Click **Save**.

## Channel Publications

The Channel Publication menu enables you to initiate the distribution of availability, rates, and restrictions information to Alternate Distribution System (ADS) channels. It is advised that you use channel publications as a fail over mechanism during network outages or if both systems data are out of sync.

## Reprocessing Availability

Use Reprocessing Availability to send an inventory data snapshot for channel room types to Alternate Distribution System (ADS) partner channels.

1. From the Administration menu, select **Interfaces**, select **Channel Publications**, and select **Reprocess Availability**.
2. Select a **Property**.
3. Select a **Channel**.
4. Select either the **Channel radio button** or the **Property radio button**:
  - a. If you select Channel, select the **Channel Room Type**.
  - b. If you select Property, select the **Property Room Type**.
5. Enter the **Begin Date** to start reprocessing.
6. Enter the **End Date** to end reprocessing.
7. Click **Reprocess Availability**.

## Reprocessing Rate

Use Reprocessing Rate to send rate information to Alternate Distribution System (ADS) partner channels.

1. From the Administration menu, select **Interfaces**, select **Channel Publications**, and select **Reprocess Rate**.
2. Select a **Property**.
3. Select a **Channel**.
4. Select either the **Channel radio button** or the **Property radio button**:
  - a. If you select **Channel**, select the **Channel Rate Code** and **Channel Room Type**.
  - b. If you select **Property**, select the property **Rate Code** and **Room Type**.
5. Enter the **Begin Date** when reprocessing starts.
6. Enter the **End Date** when reprocessing ends.
7. Click **Reprocess Rate**.

## Reprocessing Restrictions

Use Reprocessing Restrictions to send channel or property restrictions data snapshots to Alternate Distribution System (ADS) partner channels.

1. From the Administration menu, select **Interfaces**, select **Channel Publications**, and select **Reprocess Restrictions**.
2. Select a **Property**.
3. Select a **Channel**.
4. Select either the **Channel radio button** or the **Property radio button**:
  - a. If you select **Channel**, select the **Channel Rate Code** and **Channel Room Type**.
  - b. If you select **Property**, select the property **Rate Code** and **Room Type**.
5. Enter the **Begin Date** when reprocessing starts.
6. Enter the **End Date** when reprocessing ends.
7. Click **Reprocess Restrictions**.

## Enhanced Room Key Generation

Room key generation enables you to create guest room keys before guests arrive and to configure default settings to streamline the key creation process and reduce manual input errors.

Use the room key validation, expiry, and additional rooms controls in conjunction with a third-party Door Lock System (DLS) to:

- Define the room key activation start date/time.
- Check if previous keys were made and for which additional rooms.
- Limit the number of additional rooms allowed for key creation.
- Override key options and suppress success notifications when creating keys for multiple reservations.

## Customizing the Additional Rooms Field

1. Go to **Miscellaneous - Property Interface Control**.

2. Choose a reservation and click **Create Key**.
3. Select the **Customize** link.
4. Click the pencil icon next to the **Additional Rooms** field.
5. In the **Basic** tab, select the **</> Custom Validator icon** next to the **Default Value** field.
6. In the Expression Builder screen from the Available Fields search, select the **PreviousKeyAdditionalRooms** binding:  
(Name) **PreviousKeyAdditionalRooms**  
(Description) **#(bindings.PreviousKeyAdditionalRooms.inputValue)**
7. Click **Evaluate**, and then click **Apply**.
8. Click **Save**, and then **Close Customize**.

With this customization, the **Additional Rooms** field populates with all additional rooms associated with the reservation room when the previous key was created (Previous Keys Made > 0).

After the Additional Rooms functionality is customized, when a new key is created with additional rooms selected, the additional rooms are logged and saved with the main room key information. This is per reservation and room.

## Customizing the Create Key Screen Additional Rooms Field

You can customize the Additional Rooms field on the Create Key to populate the Additional Rooms field with the room numbers that were selected when a new key is created for that reservation and room number. This applies to duplicate keys (when Previous Keys Made > 0).

### Prerequisites/Conditions

- **Allow Multiple Room Selection for Keys** check box is selected in the Property Interfaces Configuration for DLS (Door Lock System).
- OPERA Cloud Task **Customize Chain** or **Customize Property** in the **General - Access Options**.
- **Customization must be on for Property / Hub level** — Main Menu – Settings – Customization, select Property/Hub Level.

## DLS (Door Lock System) Property Interface Setup Options

### Administration – Interfaces – Property Interfaces – Property Interfaces

The following are additional setup options for the DLS type property interface for enhanced room key generation on the General Information panel.

- **Send Valid Start Date / Time** — When this check box is selected, the **Valid Start Date** and **Valid Start Time** fields appear on the Create Key screen and the Room Keys screen. These enable you to set the key activation date and time.
- **Limit Additional Number of Rooms To** — When the **Allow Multiple Room Selection for Keys** check box is selected, the **Limit Additional Number of Room To** field is available. This field limits the number of additional rooms you can select or manually enter in the **Additional Rooms** field.

## Enhanced Room Key Generation Validation Rules by Process

**Table 16-13** Enhanced Room Key Generation Validation Rules by Process

Reservation State/Status	Valid Start Date	Valid Start Time	Valid Until Date	Valid Until Time
Reserved, Pre-Arrival (before advance check in or before check in)	Reservation arrival date	Default time set in the <b>Key Valid Start Time</b> OPERA Controls Setting	<b>Valid Until Date</b> field defaults to the reservation departure date or the departure date plus the number of days in the OPERA Cloud Control <b>Key Expiry Days</b> setting.	The <b>Valid Until Time</b> field defaults with the time setting that is chosen in the OPERA Cloud Control <b>Default Keys Expiry Time</b> setting.
During advance check in or when the reservation is indicated as Advance Checked In	Current system date	Default time set in the <b>Key Valid Start Time</b> OPERA Controls Setting	<b>Valid Until Date</b> field defaults to the reservation departure date or the departure date plus the number of days in the OPERA Cloud Control <b>Key Expiry Days</b> setting.	The <b>Valid Until Time</b> field defaults with the time setting that is chosen in the OPERA Cloud Control <b>Default Keys Expiry Time</b> setting.
During check in process	Current system date	Current system time	<b>Valid Until Date</b> field defaults to the reservation departure date or the departure date plus the number of days in the OPERA Cloud Control <b>Key Expiry Days</b> setting.	The <b>Valid Until Time</b> field defaults with the time setting that is chosen in the OPERA Cloud Control <b>Default Keys Expiry Time</b> setting.
When reservation is in house	Current system date	Current system time	<b>Valid Until Date</b> field defaults to the reservation departure date or the departure date plus the number of days in the OPERA Cloud Control <b>Key Expiry Days</b> setting.	The <b>Valid Until Time</b> field defaults with the time setting that is chosen in the OPERA Cloud Control <b>Default Keys Expiry Time</b> setting.

## Enhanced Room Key Generation Impact

The Enhanced Room Key Generation Prerequisiteness with its related controls and tasks (refer to *Enhanced Room Key Generation Prerequisites*) impacts the following areas.

### Property Interfaces Configuration for DLS

DLS property interface additional configuration setup to support sending room key valid start date and time validation (requires DLS vendor support). Refer to *DLS (Door Lock System) Property Interface Setup Options*.

- **Send Valid Start Date/Time** check box to send the start date and start time for the room key request to the third party DLS vendor.
- **Limit Additional Number of Rooms To** field to limit the maximum number (1-999) of additional rooms the key can access. When the **Allow Multiple Room Selection for Keys** check box is checked, the **Limit Additional Number of Room To** field is available. This limits the number of additional rooms you can select or manually enter in the **Additional Rooms** field..

### Property Interface Control Screen

- Additional Search Criteria:
  - Arrival From
  - Arrival To
  - ETA From
  - ETA To
  - Reservation Status
  - Specials
  - Floors
  - Room Features
  - Room Class
  - Confirmation Number/CRS Number
  - Room Status
  - Include Linked Reservations
  - Include Blocks
- Additional Sort Options:
  - Arrival Date and ETR ascending
  - Arrival Date and ETR descending

### Create Key Screen

- **Valid Start Date** field (default values):
  - In house: current business date
  - Future reservations: arrival date
- **Valid Start Time** field (default values):
  - In house: property system time
  - Future reservations: Key Valid Start Time setting, property system time
- **Previous Keys Made** number field:
  - Tracks the number of keys created since the last new key previously made for this specific reservation and room.
  - When there are previous keys made for this reservation and room, the Key Type in the Create Key screen defaults to Duplicate Key.
- **Additional Rooms** field with customization to show the room numbers of additional rooms with previous keys made for that reservation. Refer to *Customizing the Additional Rooms Field*.
- **Number of Keys** field defaults to the number of adults on the reservation.

### Room Keys Screen

- New screen when creating keys for multiple reservations.
- **Suppress Key Success Message** check box to hide the notification that keys have been successfully created to avoid interruption while in the create key process for multiple reservations.

- **Overriding Associated Key Options** check box to override or append the key options (access to specific areas of the property) in the Room Keys screen. Refer to *Overriding Associated Key Options*.
- **Additional Rooms** field with customization to show the room numbers of additional rooms with previous keys made for that reservation. Refer to *Customizing the Additional Rooms Field*.

### Changes Log Screen

Activity Group = Reservation, Activity Type = Keys

- Details the number of keys created or modified for the primary room number, confirmation number, and the logged in user.
- Records the additional room numbers selected. These are only logged on the reservation that the primary key was created for, not on the reservations for those additional rooms.

## Enhanced Room Key Generation Conditions/Assumptions

- Multiple rooms on one room key and Valid Start Date / Valid Start Time functionality is dependent on the DLS supporting it.
- When more than one DLS interface is active at the property, each must be configured with unique room numbers and must support the same functionality. The correct encoder/terminal for the DLS must be chosen during the Create Key process.
- Room key creation functionality shows the room key creation success or failure according to the DLS response.
- If the DLS doesn't respond within the timeout value set in the DLS property interface configuration, OPERA Cloud shows a message that the room key creation timed-out. If this occurs, you can retry creating the room key.

## Configuring Credit Card Readers (Magnetic Stripe)

### Prerequisites for Configuring Credit Card Readers

Configure the Magnetic Stripe Credit Card Reader device types available at your property.

A credit card reader is a device that decodes the credit card information contained on the magnetic strip of a credit or debit card.

### Adding Magnetic Credit Card Reader Devices

1. From the **Administration** menu, select **Interfaces**, click **Interface Devices**, and then select **Credit Card Reader Devices**.
2. Click **New** and enter the following details:
  - a. **Reader Number**. Enter a unique reader number for the type of reader.
  - b. **Description**. Enter a description/name of the reader
  - c. **Separator**
    - i. **Expiry**: Enter the character used as the expiration start date character. Typically, this will be "=".
    - ii. **End of Track**: Enter the character used as the end-of-track separator. Typically, this will be "?".
    - iii. **Name**: Enter the character used as the name separator. Typically, this will be "^".

- iv. **Track 2:** Enter the character used as the track two separator. Typically, this will be ",".
- d. Encrypted Device
  - i. **Secure. Reader:** Available when the CC Vault OPERA Control is active; select the check box if communication with the credit card reader device is encrypted. Enter the appropriate details in the fields below to enable parsing the needed data from the encrypted string provided from the device. (The credit card merchant or device vendor will need to provide the details to be entered).
  - ii. **Software ID:** Enter the version number of the reader device software, as assigned by the device manufacturer (not mandatory except for HID Format Type). This is used as the default value to all workstations that have this Reader No. attached to it.
  - iii. **Encryption Format Codes:** Enter the code assigned by the Credit Card Provider for the encrypted data format for the swiped information.
  - iv. **Format Type:** Choose the type of format used for the encrypted device. IDTECH is specific to the IDTech M130 device; POSITION indicates the needed encrypted data can be found in a specific position in the entire string; FIELDID indicates the needed encrypted data can be found in a specific field in the entire string; HID is specific to the Magtek DynaPro device.
  - v. Separator
    - **Start Data:** Enter the start delimiter defining the fields of encrypted data.
    - **End Data:** Enter the end delimiter defining the fields of encrypted data.
  - vi. Position
    - **KSN Field:** Enter the ordinal number of the Field ID or the Position that holds the KSN, Encryption Key Serial Number, and Transaction Counter data.
    - **ET1 Field:** Enter the ordinal number of the Field ID or the Position that holds the ET1 and Encrypted Track 1 data.
    - **ETS2 Field:** Enter the ordinal number of the Field ID or the Position that holds the ET2 and Encrypted Track 2 data.
- 3. Click **Save**.

#### Editing Magnetic Credit Card Reader Devices

1. From the **Administration** menu, select **Interfaces**, click **Interface Devices**, and then select **Credit Card Reader Devices**.
2. Enter search criteria and click **Search**.
3. Select the device, then click the **vertical ellipsis** and select **Edit**.
4. Update configuration.
5. Click **Save**.

#### Deleting Magnetic Credit Card Reader Devices

1. From the **Administration** menu, select **Interfaces**, click **Interface Devices**, and then select **Credit Card Reader Devices**.
2. Enter search criteria and click **Search**.
3. Select the device, then click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

# Configuring Credit Card Terminals (PIN Entry Payment Devices)

## Prerequisites for Configuring Credit Card Terminals

OPERA Cloud supports Chip and PIN for credit card authorizations and payments. Chip and PIN payment utilizes the EMV standard and requires a microchip on the credit card that holds the cardholder authentication information. To process Chip and PIN payments, you must set up the Chip and PIN payment devices available at your property. Chip & PIN devices can be grouped by [device areas](#) to assist mobile users with finding the required, nearby device.

## Adding Credit Card Terminals

1. From the **Administration** menu, select **Interfaces**, select **Interface Devices**, and then select **Credit Card Terminals**.
2. Click **New** and enter the following details:
  - a. **Property**: Enter or select the property
  - b. **Terminal ID**: Enter the terminal ID number provided by the vendor.
  - c. **Terminal Label**: Enter a label or name for the device that identifies its physical location.
  - d. **Device Area**: Link the device to an area. Refer to [Configuring Device Areas](#).
3. Click **Save**.

## Editing Credit Card Terminals

1. From the **Administration** menu, select **Interfaces**, select **Interface Devices**, and then select **Credit Card Terminals**.
2. Enter search criteria and click **Search**.
3. Select the device, then click the **vertical ellipsis** and select **Edit**.
4. Update configuration.
5. Click **Save**.

## Deleting Credit Card Terminals

1. From the **Administration** menu, select **Interfaces**, select **Interface Devices**, and then select **Credit Card Terminals**.
2. Enter search criteria and click **Search**.
3. Select the device, then click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

# Configuring Delivery Management

## Prerequisites for Configuring Delivery Management

Use Delivery Management to configure email delivery of OPERA Cloud reports and stationery.

For each delivery method you can choose to use the Oracle Cloud Infrastructure SMTP (Simple Mail Transfer Protocol) Email Delivery service or an alternate, external SMTP server. For more information, see [Configuring SMTP Connections](#)

- If using Oracle Cloud Infrastructure SMTP to deliver emails on your behalf, you will also need to setup an SPF record for `spf_3a.oracleindustry.com`, to ensure emails are not treated as spam by the recipient.
- If using an external SMTP server, you will need to setup an Outbound Domain Allowlist entry for the SMTP server **Hostname** and **Port**. For more information, see [Configuring Outbound Domain Allow Listings](#).

When the **Text Message Handling** OPERA Control is active you can also setup communication with an SMS service provider for the delivery of queue rush room text messages to staff mobiles, as well as queue room-ready, reservation confirmations and guest messages to guest mobiles. Communication with SMS service provider can be either through email or HTTP POST.

To configure SFTP destinations for [scheduled report delivery](#), see [Configuring SFTP Connections](#).

The following configuration options are available.

**Table 16-14 Configuration methods and purpose**

Method	Purpose
General	Reports through email.
Confirmation Letters	Reservation confirmations through email (HTML or as PDF attachment). Reservation confirmations through SMS.
Guest Message	Guest messages through SMS.
Billing Folios	Interim, Advanced, Proforma, Information, Settlement folios through email as PDF attachment.
AR	AR Statement and Reminder Letters delivered using email as a PDF attachment.
Text to Guest	Queue Room ready notification to Guest through SMS.
Text to Housekeeping	Queue "rush room" alert to Housekeeping Attendant through SMS.
Other Folios	Deposit, AR, Passerby, Post It Credit Bill, Debit Bill and other folio types delivered through email as a PDF attachment.

 **Note:**

The default Oracle Cloud Infrastructure Email Delivery service will be used when no **Email Server Code** is selected; the "From Address" used is **noreply-hgbu-opera-dev@ocs.oraclecloud.com**.

## Configuring Report Delivery

### Editing Report Delivery by Email

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.

2. Select **General** and click **Search**.
3. Click **Edit** and enter the following details:
  - a. **Property:** Enter or select the property.
  - b. **Activate Email Delivery:** Select check box to activate email delivery functionality.
  - c. **From Email Address:** Enter the sender email address. You can set a **display name** along with the email address, for example: Bell Hotel <accounting@bell.com>. If you do so, enclose the email address in < and > .
  - d. **Email Server Code:** Select an SMTP Code from the list. See [Configuring SMTP Connections](#).
  - e. **Email Subject:** Enter the subject that is to appear in the email message.
  - f. Click **Save**.

## Configuring Reservation Confirmation Delivery

### Adding Reservation Confirmation Delivery by Email

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **Confirmations**, then click **Search**.
3. Click **New** and complete the following:
  - a. **Property:** Enter or select the property.
  - b. **Activate Email Delivery:** Select check box to activate email delivery functionality.
  - c. **HTML Format Delivery:** Select check box to generate email as embedded HTML. Leave unchecked to generate a PDF attachment.

#### **Note:**

For HTML delivery, all images (such as logos, room type images) must be available on a publicly accessible web-server / content management system for download by the email client.

- d. **From Email Address:** Enter the sender email address. You can set a "display name" along with the email address, for example: Bell Hotel <accounting@bellhotel.com>. If you do so, enclose the email address in < and > .
- e. **Email Server Code:** Select an SMTP Code from the list. See [Configuring SMTP Connections](#).
- f. **Email Subject:** Enter the subject that is to appear in the email message. You can use conditional blocks to dynamically generate a subject line

```
<?><Status>[='RESERVED']Reservation confirmation #<ConfirmationNumber>
for <ResortFullName></?> <?><Status>[='CANCELLED']Reservation
cancellation #<CancellationNo> for <ResortFullName></?>
```

- g. **Email Body:** You can configure an email body when **HTML Format Delivery** is not enabled. The reservation confirmation is attached in PDF format. Use the [rich text editor](#) to enter text and select merge codes to display reservation-specific values in the email body. Select the **Merge Codes** button to view and select from the list to insert merge code into the message body. For example, name and confirmation number

merge code can be inserted. Select the **Conditions** button to insert condition blocks of text in the message. All merge codes will be inserted in the position where your cursor is placed.

 **Note:**

Email body is limited to 2000 characters.

- h. Click **Save**.

### Editing Reservation Confirmation Delivery by SMS (Text Message)

Available when the **Text Message Handling** OPERA Control is active.

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **Confirmations** and click **Search**.
3. In the Text Message Delivery Settings panel, click **Edit** and enter the following details:
  - a. **Delivery Method:**
    - i. **URL (HTTP POST):** Post to URL.
    - ii. **Email:** Send as email (email to sms). See [Using the Rich Text Editor](#).
  - b. **Partner/User ID:** Enter the Partner ID or User ID for the delivery provider. This is the Text Messaging Provider name.
  - c. **Service Type/Server:** Enter the service type or the FQDN of SMTP server.
  - d. **Service ID/Account:** Enter the service ID or SMTP email server account.
  - e. **Password:** Enter the SMTP email password.
  - f. **URL:** Enter the URL address for the Text Messaging Provider.
  - g. **URL Parameter Format:** Select Text or XML.
  - h. **Timeout in seconds:** Enter the delivery timeout in seconds for the message. Any message exceeding this limit will be timed out.
  - i. **Message Format:** For email to SMS enter or select the following from the list of values: <TO\_MOBILE>@<URL\_NAME>. The <URL\_NAME> tag is the value from the URL field..
  - j. **Text Message:** Use the rich text editor to enter text and select merge codes to display reservation-specific values in the message. Select the Merge Codes button to view and select from the list to insert merge code into the message body. For example, name and confirmation number merge code can be inserted. Select the Conditions button to insert condition blocks of text in the message. All merge codes will be inserted in the position where your cursor is placed.
  - k. Click **Save**.

### Configuring Confirmation SMS (Text Message) Delivery

#### Adding Reservation Confirmation Delivery by SMS (Text Message)

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **Confirmations** and click **Search**.

3. In the **Text Message Delivery Settings** panel, click **Edit** and enter the following details:
  - a. **Delivery Method:**
    - i. **URL (HTTP POST):** Post to URL.
    - ii. **Email:** Send as email (email to sms). See [Using the Rich Text Editor](#).
  - b. **Partner/User ID:** Enter the Partner ID or User ID for the delivery provider. This is the Text Messaging Provider name.
  - c. **Service Type/Server:** Enter the service type or SMTP email server address.
  - d. **Service ID/Account:** Enter the service ID or SMTP email server account.
  - e. **Password:** Enter the SMTP email password.
  - f. **URL:** Enter the URL address for the Text Messaging Provider.
  - g. **URL Parameter Format:** Select Text or XML.
  - h. **Timeout in seconds:** Enter the delivery timeout in seconds for the message. Any message exceeding this limit will be timed out.
  - i. **Message Format:** For email to SMS enter or select the following from the list of values: <TO\_MOBILE>@<URL\_NAME>. The <URL\_NAME> tag is the value from the URL field..
  - j. **Text Message:** Use the rich text editor to enter text and select merge codes to display reservation-specific values in the message. Select the **Merge Codes** button to view and select from the list to insert merge code into the message body. For example, name and confirmation number merge code can be inserted. Select the **Conditions** button to insert condition blocks of text in the message. All merge codes will be inserted in the position where your cursor is placed.
4. Click **Save**.

### Configuring Guest Message Delivery

#### Editing Guest Message Email Delivery

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **Guest Messages** and click **Search**.
3. Click **Edit** and enter the following details:
  - a. **Property:** Enter or select the property.
  - b. **Activate Email Delivery:** Select to activate email delivery functionality.
  - c. **From Email Address:** Enter the sender email address. You can set a "display name" along with the email address, . If you do so, enclose the email address in < and >.
  - d. **Email Server Code:** Select an SMTP Code from the list. See [Configuring SMTP Connections](#).
  - e. **Email Subject:** Enter the subject that is to appear in the email message.
4. Click **Save**.

### Configuring Guest Message SMS (Text Message) Delivery

#### Adding Guest Message Delivery by SMS (Text Message)

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.

2. Select **Guest Messages** and click **Search**.
3. Click **New** and complete the following:
  - a. **Delivery Method**
    - i. **URL (HTTP POST):** Post to URL.
    - ii. **Email:** Send as email (email to sms).
  - b. **Partner/User ID:** Enter the Partner ID or User ID for the delivery provider. This is the Text Messaging Provider name.
  - c. **Service Type/Server:** Enter the service type or the FDQN of SMTP server..
  - d. **Service ID/Account:** Enter the service ID or SMTP email server account.
  - e. **Password:** Enter the SMTP email password.
  - f. **URL:** Enter the URL address for the Text Messaging Provider.
  - g. **URL Parameter Format:**Select Text or XML.
  - h. **Timeout in seconds:** Enter the delivery timeout in seconds for the message. Any message exceeding this limit will be timed out.
  - i. **Message Format:** For email to SMS enter or select the following from the list of values: <TO\_MOBILE>&<URL\_NAME>. The <URL\_NAME> tag is the value from the URL field.
  - j. **Text Message:** Use the rich text editor to enter text and select merge codes to display reservation-specific values in the message. Select the **Merge Codes** button to view and select from the list to insert merge code into the message body. For example, name and confirmation number merge code can be inserted. Select the **Conditions** button to insert condition blocks of text in the message. All merge codes will be inserted in the position where your cursor is placed.
4. Click **Save**.

## Configuring Billing Folios Delivery

### Adding Billing Folios Email Delivery

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **Billing Folios** and click **Search**.
3. Click **New** and complete the following:
  - a. **Property:** Enter or select the property.
  - b. **Activate Email Delivery:** Select check box to activate email delivery functionality.
  - c. **From Email Address:** Enter the sender email address. You can set a "display name" along with the email address, . If you do so, enclose the email address in < and > .
  - d. **Email Server Code:** Select an SMTP Code from the list. See [Configuring SMTP Connections](#)
  - e. **Email Body:** The folio is attached to email as PDF file; add email body text to display along with the attachment. Use the [rich text editor](#) to enter text and select merge codes to display reservation-specific values in the email body. Select the **Merge Codes** button to view and select from the list to insert merge code into the message body. For example, name and confirmation number merge code can be inserted. Select the **Conditions** button to insert condition blocks of text in the message. All merge codes will be inserted in the position where your cursor is placed.

 **Note:**

E-mail body is limited to 2000 characters.

- f. **Email Subject:** Enter the subject that is to appear in the email message.
4. Click **Save**.

## Configuring AR Statement and Reminder Email Delivery

### Adding AR Statement and Reminder Email Delivery

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **AR** and click **Search**.
3. Click **New** and complete the following details:
  - a. **Property:** Enter or select the property.
  - b. **Activate Email Delivery:** Select to activate email delivery functionality.
  - c. **From Email Address:** Enter the sender email address. You can set a "display name" along with the email address, . If you do so, enclose the email address in < and > .
  - d. **Email Server Code:** Select an SMTP Code from the list. See [Configuring SMTP Connections](#).
  - e. **Email Subject:** Enter the subject that is to appear in the email message.
  - f. **Email Body:** The folio is attached to email as PDF file; add email body text to display along with the attachment. Use the [rich text editor](#) to enter text and select merge codes to display reservation-specific values in the email body. Select the **Merge Codes** button to view and select from the list to insert merge code into the message body. For example, name and confirmation number merge code can be inserted. Select the **Conditions** button to insert condition blocks of text in the message. All merge codes will be inserted in the position where your cursor is placed.

 **Note:**

E-mail body is limited to 2000 characters.

- g. Click **Save**.

## Configuring Queue Room Message to Guest by SMS (Text Message)

### Editing Queue Room Message to Guest by SMS (Text Message)

 **Note:**

Available when the **Text Message Handling** OPERA Control is active.

Used to send queue room ready notifications to guests through SMS.

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.

2. Select **Text to Guest** and click **Search**.
3. In the Text Message Delivery Settings panel, click **Edit** and complete the following:
  - a. **Delivery Method**
    - i. **URL (HTTP POST)**: Post to URL.
    - ii. **Email**: Send as email (email to sms).
  - b. **Partner/User ID**: Enter the Partner ID or User ID for the delivery provider. This is the Text Messaging Provider name.
  - c. **Service Type/Server**: Enter the service type or SMTP email server address.
  - d. **Service ID/Account**: Enter the service type or the FDQN of SMTP server.
  - e. **Password**: Enter the SMTP email password.
  - f. **URL**: Enter the URL address for the Text Messaging Provider.
  - g. **URL Parameter Format**: Select Text or XML.
  - h. **Timeout in seconds**: Enter the delivery timeout in seconds for the message. Any message exceeding this limit will be timed out.
  - i. **Message Format**: For email to SMS enter or select the following from the list of values: <TO\_MOBILE>@<URL\_NAME>. The <URL\_NAME> tag is the value from the URL field.
  - j. **Text Message**: Use the rich text editor to enter text and select merge codes to display reservation-specific values in the message. Select the **Merge Codes** button to view and select from the list to insert merge code into the message body. For example, name and confirmation number merge code can be inserted. Select the Conditions button to insert condition blocks of text in the message. All merge codes will be inserted in the position where your cursor is placed.
  - k. Click **Save**.

### Configuring Queue Rush Room to Housekeeping by SMS (Text Message)

#### Editing Queue Rush Room to Housekeeping by SMS (Text Message)

Available when the **Text Message Handling** OPERA Control is active.

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **Text to Housekeeping** and click **Search**.
3. In the Text Message Delivery Settings panel, click **Edit** and complete the following:
  - a. **Delivery Method**
    - i. **URL (HTTP POST)**: Post to URL.
    - ii. **Email**: Send as email (email to sms).
  - b. **Partner/User ID**: Enter the Partner ID or User ID for the delivery provider. This is the Text Messaging Provider name.
  - c. **Service Type/Server**: Enter the service type or the FDQN of SMTP server.
  - d. **Service ID/Account**: Enter the service ID or SMTP email server account.
  - e. **Password**: Enter the SMTP email password.
  - f. **URL**: Enter the URL address for the Text Messaging Provider.
  - g. **URL Parameter Format**: Select Text or XML.

- h. **Timeout in seconds:** Enter the delivery timeout in seconds for the message. Any message exceeding this limit will be timed out.
- i. **Message Format:** For email to SMS enter or select the following from the list of values: <TO\_MOBILE>@<URL\_NAME>. The <URL\_NAME> tag is the value from the URL field.
- j. **Text Message:** Use the rich text editor to enter text and select merge codes to display reservation-specific values in the message. Select the **Merge Codes** button to view and select from the list to insert merge code into the message body. For example, name and confirmation number merge code can be inserted. Select the **Conditions** button to insert condition blocks of text in the message. All merge codes will be inserted in the position where your cursor is placed.
- k. Click **Save**.

## Configuring Other Folio Delivery by Email

### Adding Other Folio Delivery by Email

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select **Other Folios** and click **Search**.
3. Click **New** and complete the following details:
  - a. **Property:** Enter or select the property.
  - b. **Activate Email Delivery:** Select to activate email delivery functionality.
  - c. **From Email Address:** Enter the sender email address. You can set a "display name" along with the email address, . If you do so, enclose the email address in < and > .
  - d. **Email Server Code:** Select an SMTP Code from the list. See [Configuring SMTP Connections](#)
  - e. **Email Subject:** Enter the subject that is to appear in the email message.
  - f. **Email Body:** The folio is attached to email as PDF file; add email body text to display along with the attachment. Use the [rich text editor](#) to enter text and select merge codes to display reservation-specific values in the email body. Select the **Merge Codes** button to view and select from the list to insert merge code into the message body. For example, name and confirmation number merge code can be inserted. Select the **Conditions** button to insert condition blocks of text in the message. All merge codes will be inserted in the position where your cursor is placed.

 **Note:**

E-mail body is limited to 2000 characters.

- g. Click **Save**.

### Editing Delivery Method Configuration

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select a **Delivery Method** option , then click **Search**.
3. Click **Edit**.
  - a. Update the configuration.

- b. Click **Save**.

### Deleting Delivery Method Configuration

1. From the **Administration** menu, select **Interfaces**, and then select **Delivery Management**.
2. Select a **Delivery Method** option, then click **Search**.
3. Click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Device Areas

Use Device Areas to define the locations where RFID key encoders and EMV PIN Entry Devices (PEDs) are located. Once configured you can assign a device area to each RFID key encoder or EMV PED. Then when processing payment or encoding a room key, you can use device area as a filter, making it much easier to find the devices assigned to that area.

### Adding Device Areas

1. From the **Administration** menu, select **Interfaces**, and then select **Device Areas**.

 **Note:**

When the Multi Property OPERA Control is active, new Device Areas are created by selecting the Template tab. Once created, you can copy locators to specific properties using the Copy action. Refer to [Copying Configuration Codes to Multiple Properties](#) for more information.

2. Click **New** and complete the following fields:
  - a. **Property:** Enter or search for and select a property.
  - b. **Code:** Enter a code that briefly describes the device area (for example, FD for front desk, HL for hall, LBBY for lobby, PL for pool, CF for club floor, VIP for VIP lounge, and so on).
  - c. **Description:** Enter a description of the device area (for example, Front Desk, Club Floor, and so on).
    - i. **Manage Translations:** Click link to configure localized descriptions. For more information, see [Configuring Localized Code Descriptions](#). (Available when the **Multi-language** OPERA Control is active).
  - d. **Sequence:** Enter a number that controls the position of this code in listings. Codes without a sequence number assigned are listed in alphabetical order following codes with a sequence assigned.
3. Click **Save**.

### Editing Device Areas

1. From the **Administration** menu, select **Interfaces**, and then select **Device Areas**.
2. Enter search criteria and click **Search**.

3. Select a device area in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Device Areas

1. From the **Administration** menu, select **Interfaces**, and then select **Device Areas**.
2. Enter search criteria and click **Search**.
3. Select a device area in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Desktop ID Document Scanning

### Prerequisites for Desktop ID Scanning

When the Oracle Hospitality OPERA ID Document Scanning Cloud Service is active you can configure and enable the scanning of identification documents using a partner scanning solution and hardware.

ID document scanning is available in the [Identification panel](#) of a guest or contact profile and is also available as part of the reservation [check-in](#). On completion of an ID document scan, you are presented with the profile information comparison screen, enabling you to retain or overwrite existing values obtained from the scan. In addition to the document data, an image of the ID document may be captured and stored securely as an attachment on the profile. For more information see, [OPERA Controls — Profile](#). Stored ID Document Image Type setting.

### Supported ID Documents Types

- Passport
- Visa
- Drivers License
- ID Card

### Supported ID Scan Vendors

See the Validated Interfaces list available on [Oracle Hospitality Documentation](#).

## Configuring a Desktop ID Document Scanner

### Adding a Desktop ID Document Scanner

1. From the Administration menu, select **Interfaces**, and select **ID Document Scanners**.
2. Click **New** and complete the following:
  - a. **Property:** Enter or select the property.
  - b. **Scanner Type:** Select the Desktop radio button. If ID Document scanning configuration already exists for the selected property, you are presented with the following warning message: Desktop scanner configuration for [Property Code] already

exists. If you continue and save this new configuration it will overwrite the existing record. DELETE IMAGE

- c. **ID Document Scanner:** Enter the partner name or other identifier. This is a free text field.
- d. **URL:** Enter the URL for the ID scanning solution; including domain, port, and resource location . Example: <https://domain.com:443/scan>.
- e. **ID Type Mapping:** Select the applicable [Identification Types](#) for the supportable ID Document Types displayed
  - Drivers License. Select the ID Type for drivers license from the list
  - ID Card. Select the ID Type for ID Card from the list
  - Passport. Select the ID Type for Passport from the list
  - Visa. Select the ID Type for Visa from the list
- Click **Save**.

#### Editing a Desktop ID Document Scanner

1. From the Administration menu, select **Interfaces**, and select **ID Document Scanners**.
2. Select the **ID Document Scanner** configuration entry that has the Desktop column checked.
3. Click the **vertical ellipsis** and select **Edit**.
4. Update the configuration:
  - a. **Inactive:** Select checkbox to mark this integration as inactive.

#### Note:

Property and Scanner Type are read only.

5. Click **Save**.

#### Deleting a Desktop ID Document Scanner

1. From the Administration menu, select **Interfaces**, and select **ID Document Scanners**.
2. Select the **ID Document Scanner** configuration entry that has the Desktop column checked.
3. Click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Mobile ID Document Scanning

### Prerequisites for Mobile ID Scanning

ID Document Scanning is functionality built to support hotel employees embracing the freedom to greet guests anywhere. Architected to fit into the Cloud-first approach of OPERA Cloud, the integration offer's REST APIs for partners to integrate with and take advantage of the hardware built into the tablet. By initiating the scan process from either the guest profile or during the reservation check-in, the tablet camera is used to take an image of the ID Document. Once you are satisfied with the quality of the image, OPERA Cloud will send it to the partner to

analyze the information and return them back to OPERA Cloud. You will be presented with a profile information comparison screen that allows you to select which existing information to overwrite with the data read from the ID Document, which to keep and which to remove. This functionality requires the OPERA Cloud Add-on "Oracle Hospitality OPERA ID Document Scanning Cloud Service" to be active and for the property to contract an integrated vendor.

### Supported ID Documents Types

Passport, Visa, Driver License, and ID Card.

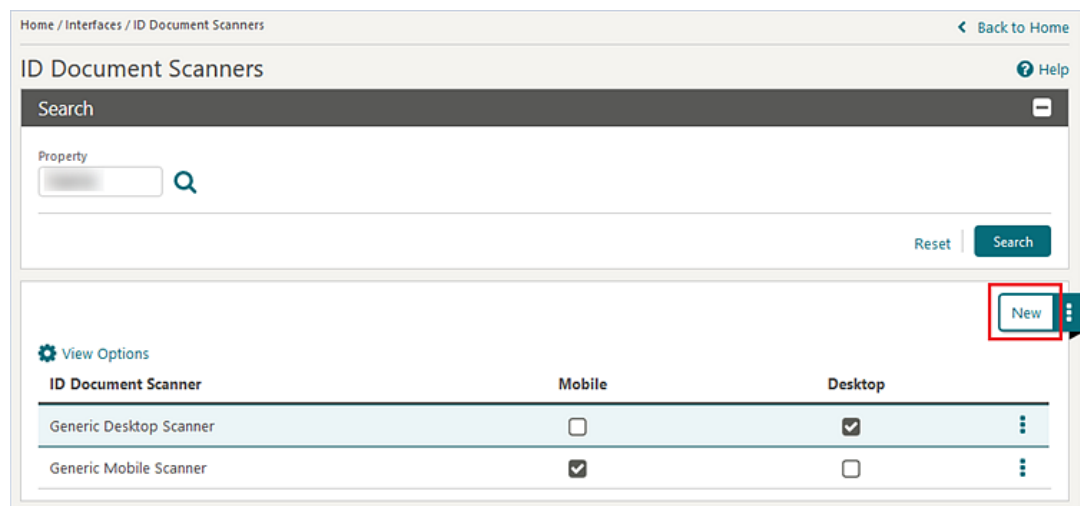

### Supported Vendors

See the Certified Third-Party Interfaces list available on docs.oracle.com

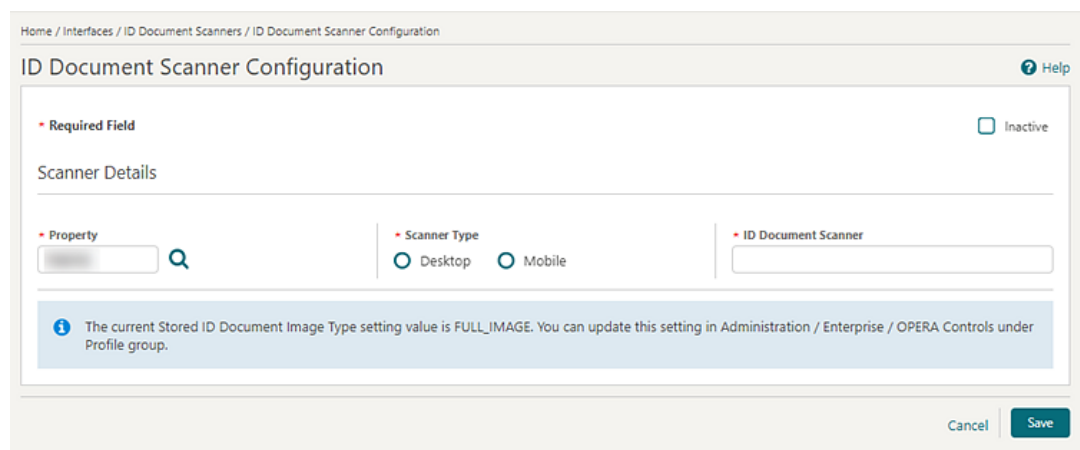

## Configuring a Mobile ID Document Scanner

### Adding a Mobile ID Document Scanner

1. From the Administration menu, select **Interfaces**, and select **ID Document Scanner**.
2. Click **New**.

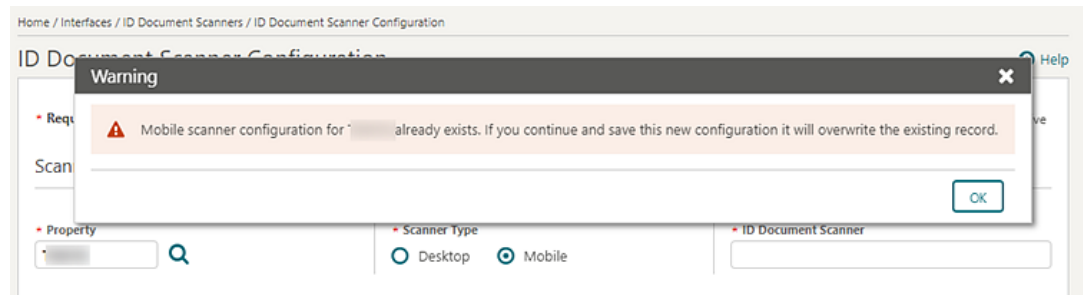

3. Select the **Property** if signed in at Hub level. If signed in at property level, the Property field is populated by default.

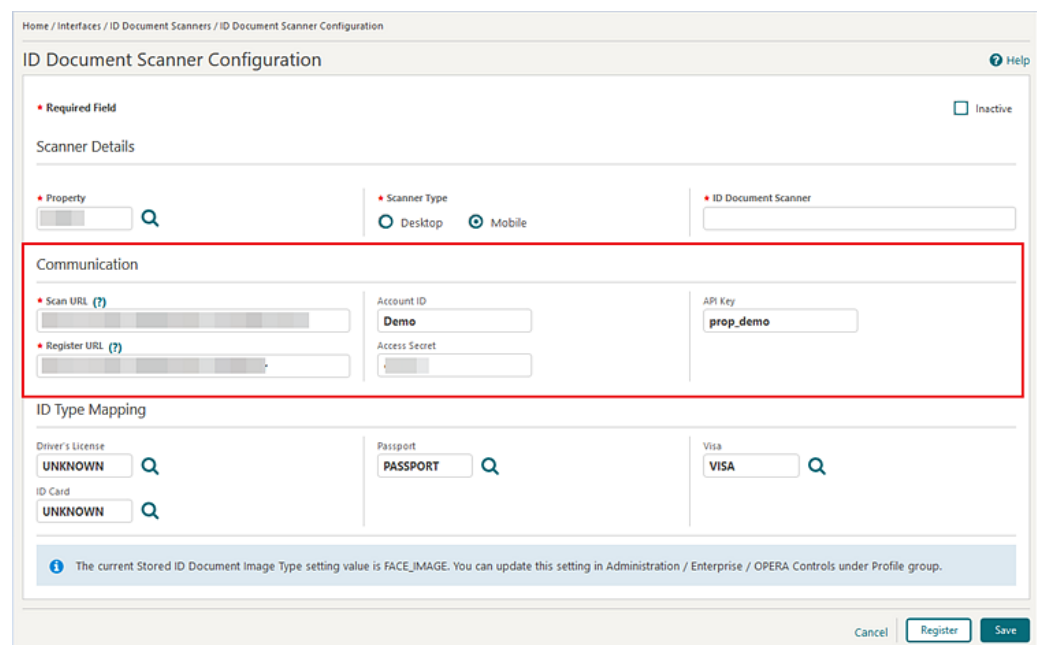

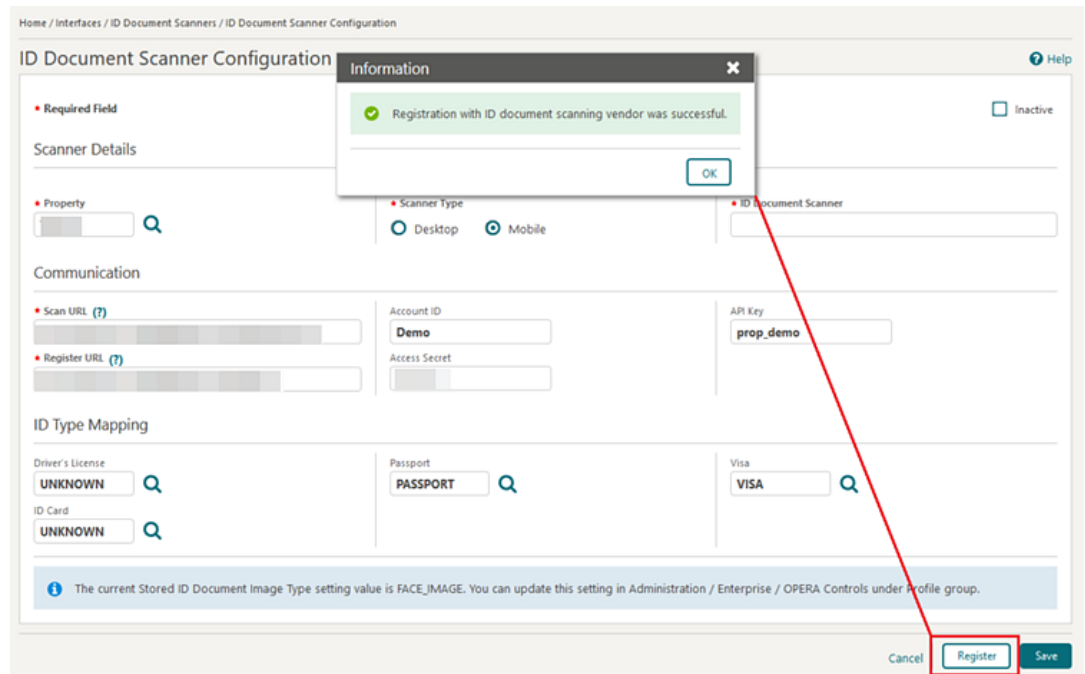

4. Select the **Scanner Type – Mobile** radio button. If ID Document scanning for Desktop configuration already exists for the selected property, you are presented with the following warning message: Mobile scanner configuration for [Property Code] already exists. If you continue and save this new configuration it will overwrite the existing record.

5. Enter the name of the partner into the ID Document Scanner field. This is a free text field.
6. In the Communication section enter details provided by vendor:
  - a. **Scan URL** – enter the full Scan API URL, including domain, port, and resource location. Example: https://domain.com:443/scan.
  - b. **Register URL** – enter the full Register API URL, including domain, port, and resource location. Example: https://domain.com:443/client-register.
  - c. **Account ID**– value provided by vendor if required for their service.
  - d. **Access Secret** – value provided by vendor if required for their service.
  - e. **API Key** – value provided by vendor if required for their service.

7. After entering all values provided by vendor in the Communication section. click **Register** to identify the property to the vendor and generate a security token if entered details are valid.

8. In the ID Type Mapping section, select the **Identification Types** configured in Administration > Client Relations > Geographic Management > Identification Types for the supportable ID Document Types displayed.
9. Click **Save**.

#### Editing a Mobile ID Document Scanner

1. From the Administration menu, select **Interfaces**, and select **ID Document Scanner**.
2. Select the ID Document Scanner configuration entry that has the Mobile column checked.
3. Click the **vertical ellipsis** and select **Edit**.
4. The following fields are read only:
  - a. Property
  - b. Scanner Type
5. You can modify the following fields:
  - a. Inactive check box
  - b. ID Document Scanner
  - c. Scan URL
  - d. ID Type Mappings
  - e. Register URL
  - f. Account ID
  - g. Access Secret
  - h. API Key
6. If any of the Communication fields related to scan registration (including Register URL, Account ID, Access Secret, and API Key) have been updated, click **Register** to update the vendor registration and token.
7. Click **Save**.

### Deleting a Mobile ID Document Scanner

1. From the Administration menu, select **Interfaces**, and select **ID Document Scanner**.
2. Select the **ID Document Scanner** configuration entry that has the Mobile column checked.
3. Click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

### Inactivating a Mobile ID Document Scanner

1. From the Administration menu, select **Interfaces**, and select **ID Document Scanner**.
2. Select the **ID Document Scanner** configuration entry that has the Mobile column checked.
3. Click the **vertical ellipsis** and select **Edit**.
4. Select the **Inactive** check box in the upper right corner.
5. Click **Save**.

## Configuring Printers

Configure email-addressable printers so these printers can be selected as a destination when generating reports and stationery. Reports generated are emailed directly to the printer and printed.

The printers configured here can be selected for Scheduled Reports. For more information, see [Managing Scheduled Reports](#) .

When the Alerts OPERA Control is active you can nominate printers as **Use (in) Alert Printing** and select a nominated printer in [Global Alert Rules](#) and [Reservation Alerts](#).

#### Note:

Printers that are not email addressable do not need to be configured. Reports can be previewed as PDF and then printed to a local or network printer using the locally installed printer on the workstation or tablet.

### Adding Printers

1. From the **Administration** menu, select **Interfaces**, and then select **Printer Configuration**.
2. Click **New** and complete the following:
  - a. **Location:**
    - i. **Global:** Printer is shared across multiple properties when a users location is set to a Hub.
    - ii. **Property:** Printer is property-specific, select the property from the list.
  - b. **Output Type:**
    - i. **Print:** Not used.
    - ii. **Email:** The print job will be delivered via email directly to the printer (the printer has email-to-print capabilities).

- c. **Printer (Name):** The name of the printer that will display to users. Use a naming convention that indicates the physical location of the printer to help users correctly identify the printer.
  - d. **Printer Location:** Not used (displayed based on output type = printer).
  - e. **Printer Email Address:** Enter the email address for the printer.
  - f. **Description:** Enter additional information for the printer - for example the manufacturer, model, install date.
  - g. **Folio Printer:** Enabled when the Credit Bill OPERA Control is active or when the Fiscal Folio Printing OPERA Control is active, or for selected country modes.
  - h. **Use Alert Printing:** Enabled when the Alerts OPERA Control is active. Select this check box if this email addressable printer is to be available for printing alerts. For more information, see [Reservation Alerts](#).
  - i. **Print Tasks:** Select various print tasks that the printer will support. Highlight the required print tasks in the left pane; I and click > to move print tasks to the selected panel; use >> to select all.
3. Click **Save**.

### Editing Printers

1. From the **Administration** menu, select **Interfaces**, and then select **Printer Configuration**.
2. Enter search criteria and click **Search**.
3. In the search results, select the printer and click the vertical ellipsis **Actions** menu, and then click **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Printers

1. From the **Administration** menu, select **Interfaces**, and then select **Printer Configuration**.
2. Enter search criteria and click **Search**.
3. In the search results, select the printer and click the vertical ellipsis **Actions** menu, and then click **Delete**.
4. Click **Delete** to confirm.

### Copying Printers

You can copy or clone a printer. This is a new printer in edit state. You can make changes to these printers on the Printer Configuration screen with defaults from the printer copied.

For example, if you have 1, 2, and 3 front desk printers, setup printer 1, then select this printer and copy. On the Printer Configuration screen, update the information for printer 2, such as Printer Name, Printer Location, Description as so on and save it. Repeat the process for printer 3.

1. From the **Administration** menu, select **Interfaces**, and then select **Printer Configuration**.
2. In the search results, select the printer and click the vertical ellipsis **Actions** menu, and then click **Copy**. New printer configuration is displayed, with the details populated from source / original printer.
3. Update the information, such as Printer Name, Printer Location, Description.

4. Click **Save**.

## Configuring Stationery Custom Message Texts

### Prerequisites for Custom Message Texts for Stationery

Use Custom Message Texts to configure text strings to output on stationery; you can use this feature to add promotional text or other message texts that you want to include in the document generated. The message text can be updated in OPERA Cloud anytime without having to make further modifications to the customized stationery template. Message codes are suffixed with [PCODE] for the property code to support a different message per property.

When the **Multi-language** OPERA Control is active you can add translation for each message string, so that the correct text is fetched and output based on the profile language.

### Editing Custom Message Texts

1. From the **Administration** menu, select **Interfaces**, and select **Report Text Configuration**.
2. Enter search criteria then click **Search**.
3. Select the message text in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Add your custom text in the Reports Text box.
  - a. Click **Manage Translation** to added translated text for each language. (Available when the Multi-language OPERA Control is active).
5. Click **Save**.

### Copying Custom Message Texts

You can copy message texts to other properties from a [hub location](#).

1. From the **Administration** menu, select **Interfaces**, and select **Report Text Configuration**.
2. Enter search criteria then click **Search**.
3. Select the message text in the search result, then click the vertical ellipsis **Actions** menu and select **Copy**.
  - a. **Properties:** Enter or select target properties from the list.
  - b. Click **Copy Report Text**.

# Configuring Property Interface

## Prerequisites for Configuring Property Interfaces

Property Interfaces are integrations with systems such as door locks, on-demand video, call accounting, PBX, voicemail, point of sale, minibar, payment, building management and WIFI/ Internet; that require reservation check in and check out details. Events such as an arrival, room move or departure trigger room and reservation details to be sent to various property interfaces. Systems such as call accounting, minibar and point of sale can also post charges to reservation and AR accounts. Integration with payment solutions, for pre-auth, settlement and refunds is also processed via property interfaces.

## Adding a Property Interface

Fields not applicable to OHIP/Outbound configuration are disabled when selecting an **Outbound** value.

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Click **New** and enter the following details:
  - a. **Property**: Enter or select the property from the list.
  - b. **Interface Type**: Select the interface type from the list.
  - c. **Product Code**: Enter the product ID of the validated system.
  - d. **Outbound**: To configure a Door Lock System via the Oracle Hospitality Integration Platform, select a GUESTKEY\_GENERIC **Outbound System** from the list.
  - e. **IFC8 Product Code**: Field will auto-populate based on the Product Code.
  - f. **Name**: Enter the display name of the system for identification.
  - g. **All Charges**: Choose the default transaction code for any incoming posting messages.
  - h. **Cashier ID**: Select a cashier ID for the interface from the list. See [Configuring Cashiers](#).
  - i. **Path ID**: Enter the Path ID of the interface. In most cases this is a **1**. Only if the vendor is supporting multi-property with one interface, is there a need for more. If setting up a multi-property, the first property must be defined as **1**, and all subsequent properties must follow sequentially and with no gaps.
  - j. **Machine**: Select a server name from the list (where Machines have been configured) where the IFC Controller is installed.
  - k. **Time-out**: Enter a time-out value in seconds on how long the UI will wait for response on outbound messages (Room key and credit card transaction requests).
  - l. **Version**: Will auto-populate once an IFC Controller connects with the specific interface.
3. Click **Save**.
4. Refer to the Table Property Interface Detail Links in the section below for complete interface configuration.

## Editing a Property Interface

### Note:

Interface configuration uses a [presentation page](#), select or customise the presentation style to suit your needs.

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface, then click vertical ellipsis **Actions** menu and click **Edit**.
  - a. Update configuration. See the table below.
  - b. **Inactive**: Select checkbox to inactivate the interface (not yet in use for outbound/inbound messages).
4. Click **Save**.

**Table 16-17** Property Interface Detail Links

Links to Property Interface Configuration		
<a href="#">Property Interface Primary Information</a>	<a href="#">Property Interface Class of Service</a>	<a href="#">Property Interface Room Status</a>
<a href="#">Property Interface General Information</a>	<a href="#">Property Interface Postings</a>	<a href="#">Property Interface Translation</a>
<a href="#">Property Interface Transaction Codes</a>	<a href="#">Property Interface Workstation Setup</a>	<a href="#">Property Interface Rights</a>
<a href="#">Property Interface Rooms</a>	<a href="#">Property Interface Unit Charges</a>	

## Deleting a Property Interface

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface, then click vertical ellipsis **Actions** menu and click **Delete**.
4. Click **Delete** to confirm.

# Configuring Property Interface Rights

## Adding Property Interface Rights

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Select the **General Information** link.
5. Click **New** and complete the following:

- a. **Category:** Select the category to configure the right for. Selecting a category is optional, however if left blank, all available interface rights will appear in the Right field list of values.
  - b. **Right:** Select the interface right from the list
  - c. **Code:** Enter a unique code for the interface right. This field is limited to five characters. This value will appear on the Room Status or Group Bar/Unbar screens when working with the Interface Menu screen.
  - d. **Description:** Enter a short description of the interface right. This value will appear on the Room Status or Group Bar/Unbar screens when working with the Interface Menu screen.
6. Click **Save**.

#### Editing Property Interface Rights

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Property Interface Rights

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Property Interface Primary Information

#### Editing Interface Primary Information

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Select the **Primary Information** link.
5. Click **Edit**.
  - a. **IFC8 Product Code:** Will auto-populate based on the Product Code.
  - b. **Name:** Enter the display name of the system for identification.
  - c. **Cashier ID:** Select a cashier ID for the interface from the list. See [Configuring Cashiers](#).
  - d. **Path ID:** Enter the Path ID of the interface. In most cases this is **1**. Only if the vendor is supporting multi-property with one interface, is there a need for more. If setting up a

multi-property, the first property must be defined as **1**, and all subsequent properties must follow sequentially and with no gaps.

- e. **Machine:** Select a server name from the list (where Interfaces>Machines have been configured) where the IFC Controller is installed.
  - f. **Timeout:** Enter a timeout value in seconds on how long the UI will wait for response on outbound messages (Room key and credit card transaction requests).
  - g. **Version:** Will auto-populate once an IFC Controller connects with the specific interface.
  - h. **Message Expires After (minutes):** Enter the number for minutes that will remove a stale outbound record from the table at startup of the interface.
  - i. **Menu Type:** Select the system type menu that can be used.
  - j. **Menu Name:** Enter a descriptive name for the menu item (Miscellaneous>Property Interface Control).
  - k. **Inactive:** Select checkbox to inactivate the interface (not yet in use for outbound/inbound messages).
6. Click **Save**.

## Configuring Property Interface General Information

The General panel allows you to configure several general interface settings, including night audit commands, EFT setup, wake-up call options, video checkout options, and bill display options. Depending on the interface type you are setting up, the available configurations vary. Refer to the Property Interfaces General Information table below.

### Editing Interface General Information

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Select the **General Information** link.
5. Click **Edit**.
  - See Table Property Interfaces General Information for the applicable interface type.
  - To configure the interface rights. For more information, see [Configuring Interface Rights](#).
6. Click **Save**.

**Table 16-18 Property Interfaces General Information****EFT Interfaces**

- **Handle night audit commands:** Select the check box to notify the vendor, mostly EFT and FIAS interfaces, that the PMS night audit was started and stopped and that the PMS business date had been rolled. If this check box is not selected, the vendor will not be notified of this information.
- **CC Vault Function:** Select the check box to indicate that the EFT interface supports the credit card vault functionality. Selection of this check box will activate the credit card vault interface functionality for this property. See **Credit Card Vault** for details.
- **Regular Transaction:** Selected by default when creating a new EFT Interface, indicates whether or not this interface handles regular transactions.
- **Courtesy Card Handling:** An indication of whether or not the interface handles courtesy cards.
- **Port:** The port that the interface is configured on.
- **IP Address:** The IP address used for the interface.
- **OPI Configuration:** Click link to launch OPI configuration (Available when the OPI Credit Card Processing OPERA Control is active and user is granted the CCONF role).
- **Prepaid Card:** Select this check box to configure the stored value system. An interface should be selected as a Stored Value System when the vendor supports the ability to activate, issue reload, and redeem stored value cards (gift cards).
- **Create Prepaid during Checkin:** Displayed when the Stored Value System check box is selected, select to create a stored value account when the guest is checking in.
- **Show Prepaid Pin:** Displayed when the Stored Value System check box is selected, select the check box to display the stored value pin that is provided by the vendor. The vendor can define whether a PIN is in use or not. This should not be checked unless the Vendor has indicated they will use PINs.
- **Device:** Displayed when the Stored Value System check box is selected, select the device from the list of values if a device is used to read the stored value card (gift card). An example would be an RFID device. This field is rarely populated.
- **Show Prepaid Trxn:** Displayed when the Stored Value System check box is selected, select to choose OPERA Cloud Transactions, Vendor Transactions, or both OPERA Cloud and Vendor Transactions. The option that is selected controls what is displayed in the Stored Value Account Maintenance screen for the interface and the specific stored value account.
- **Prepaid Redeem Trx:** Displayed when the Stored Value System check box is selected, select the stored value redeem transaction method from the drop down list. The transaction code that is selected here will be used any time a stored value account is redeemed.

**CCW Interfaces**

Table 16-18 (Cont.) Property Interfaces General Information

EFT Interfaces	
•	<p><b>Send AR Auth Type:</b> Select to send the AR authorization type to the vendor. This check box should be selected if credit card authorizations will be used for AR Accounts. See <a href="#">AR Credit Cards</a> for details.</p>
•	<p> <b>Note:</b></p> <p>The Send AR Auth Type check box cannot be selected at the same time as the Enable DB Verification check box.</p>
•	<p><b>Allow CC Cancel Transactions:</b> Select to allow credit card transaction cancelations with the CCW interface. This check box should be selected in order to send a notice to the vendor that the credit card settlement transaction was canceled for any reason (e.g., communication error). This notice will only be sent one time to the vendor when the credit card transaction is canceled.</p>
•	<p><b>CC Vault Function:</b> Select the check box to indicate that the CCW interface supports the credit card vault functionality. Selection of this check box will activate the credit card vault interface functionality for this property. See <a href="#">Credit Card Vault</a> for details. The credit card vendor must support the vault functionality. Verify with the vendor that it is supported before activating this function.</p>
•	<p><b>Enable Resend:</b> Select to enable the functionality to resend any credit card settlement payments for a reservation, deposit, or AR account that may have failed due to a disruptive event, such as a session disconnect or an error occurred before the posting could be made, and the settlement was sent to the interface. OPERA Cloud would then check on the settlement posting the next time the reservation is accessed and for any payments that were sent to the interface but not posted to OPERA Cloud another settlement would be initiated with an extra field in the IFC request indicating to the vendor that the record is a resend. This includes any postings from <a href="#">Billing</a>, <a href="#">Deposits</a>, or <a href="#">AR</a> and will not include postings from <a href="#">Passer By</a>, <a href="#">Post It</a>, and Fiscal Payments.</p>
•	<p> <b>Note:</b></p> <p>During the resend of the failed posting, if the interface returns an error/failed status, no reprocessing of the failed resend will occur and no posting will be completed.</p>
•	<p><b>Enable DB Verification:</b> Select to allow direct bill authorizations and settlements with the interface. See <a href="#">Direct Bill Authorizations and Settlements</a> for details.</p>
•	<p> <b>Note:</b></p> <p>Selection of the Enable DB Verification check box displays the CASHIERING &gt; DIRECT BILL AUTHORIZATIONS AND SETTLEMENTS application parameter.</p>
•	<p> <b>Note:</b></p> <p>The Enable DB Verification check box cannot be selected at the same time as the Send AR Auth Type check box.</p>
•	<p><b>Enable Failover:</b> This check box can be selected to use the Failover URL for all credit card transactions. When it is not selected, then the URL address defined in the URL field will be used for all credit card transactions.</p>
•	<p><b>Card Present Flag:</b> Only displayed when MICROS Payment Gateway is the active Credit Card IFC. Select this check box to display a Card Present check box on the Payment, Deposit, and Post It screens. The will allow the user to check this check box if a credit card is present at</p>

**Table 16-18 (Cont.) Property Interfaces General Information****EFT Interfaces**

the time of the payment. This is useful to provide an indicator to the Credit Card Vendor to follow a different process depending on the card present or not.

- **URL:** The URL of the CCW Interface.
- **Send End of Day:** An indication of whether or not information is sent as part of the end of day routine.
- **Send Enhanced Fields:** Select to send additional fields for a credit card transaction request that include Workstation, RoomNum, OriginalAuthSequence, Version, and CardType. With most CCW vendors, these fields will be required.
- **Prepaid Card:** Select this check box to configure the stored value system. An interface should be selected as a Stored Value System when the vendor supports the ability to activate, issue reload, and redeem stored value cards (gift cards).
- **Create Prepaid during Check in:** Displayed when the Stored Value System check box is selected, select to create a stored value account when the guest is checking in.
- **Show Prepaid Pin:** Displayed when the Stored Value System check box is selected, select the check box to display the stored value pin that is provided by the vendor. The vendor can define whether a PIN is in use or not. This should not be checked unless the Vendor has indicated they will use PINs.
- **Device:** Displayed when the Stored Value System check box is selected, select the device from the list of values if a device is used to read the stored value card (gift card). An example would be an RFID device. This field is rarely populated.
- **Show Prepaid Trxn:** Displayed when the Stored Value System check box is selected, select to choose OPERA Cloud Transactions, Vendor Transactions, or both OPERA Cloud and Vendor Transactions. The option that is selected controls what is displayed in the Stored Value Account Maintenance screen for the interface and the specific stored value account.
- **Prepaid Redeem Trx:** Displayed when the Stored Value System check box is selected, select the stored value redeem transaction method from the drop down list. The transaction code that is selected here will be used any time a stored value account is redeemed.
- **Failover URL:** The Failover URL as specified by the Credit Card Interface vendor is displayed here. This URL will be used for all credit card transactions when the Enable Failover check box is selected, in case the vendor's main system goes down for an extended period. When the Enable Failover check box is not selected, then the URL address defined in the URL field will be used for all credit card transactions.

**SVS Interfaces**

<b>DLS (Key Encoding) Interfaces</b>	

Table 16-18 (Cont.) Property Interfaces General Information

**EFT Interfaces**

- **Handle night audit commands:** Select the check box to notify the vendor, mostly EFT and FIAS interfaces, that the PMS night audit was started and stopped and that the PMS business date had been rolled. If this check box is not selected, the vendor will not be notified of this information.
- **On Line Key System:** An indication of whether or not this is an ONLINE key system and this relates to if whether the vendor supports KeyDataChange Requests or not. What determines if a Key Interface is an ONLINE key system or not is that for an ONLINE key system, the vendor requires the KeyRequest, KeyAnswer, KeyRead (Optional), KeyDelete (Optional), and KeyDataChange. If the key system is an OFFLINE system, then the vendor requires only the KeyRequest and KeyAnswer (KeyRead and KeyDelete are optional).
- **Allow Multiple Room Selection for Keys.** An indication of whether or not multiple rooms can be accessed from the same key through this interface, for example one key can be used for connecting rooms that are part of a reservation.
- **Send Track2 Data:** An indication of whether or not Track2 data is sent to the vendor. This is a sequence number that connects the key card to the room. This sequence number can be manipulated if a membership is attached or if the key card is also being used as a gaming card.
- **Send Track1 Data:** An indication of whether or not Track1 data is sent to the vendor. Track 1 is used by the key vendors to get specific data from the PMS and use as needed or for printing on the keycard. It is configurable as a User Defined Format where fields can be chosen from the reservation tables or a literal expression can be entered. One of the uses for Track1 would be to send the Membership ID when the keycard is also used as a gaming card.
- **Display Key Pin Code:** Available only for DLS Interface Types with a KSS Menu Type, select to display the PIN code used to access the guest room. This PIN code is passed in Track3 generated by the key vendor and sent to OPERA Cloud or a Kiosk terminal to provide to the guest instead of a key card.
- **Delete IFC Keys on KeyDelete:** Select to delete the IFC\_KEYS record at the time of Check Out or when a Checked In Reservation is Canceled.
- **Default All Print Details On:** Checked (default) to automatically select all the Print Detail fields when requesting a Room Key, Universal Card, or Gaming Card. Unchecked does not select all the Print Detail fields automatically. When requesting a key, select/deselect any of the Print Details on the Card Details To Be Printed screen. Print Details are available when configured on the Class of Service tab with the PRINT menu Right (in the grid).
- **Display Key PIN Code:** Available for DLS Interface Types with a KSS Menu Type. Select check box to display the PIN code used to access the guest room. This PIN code is passed in Track3 generated by the key vendor and sent to OPERA Cloud or a Kiosk terminal to provide to the guest instead of a key card. (Available when the Display Key PIN OPERA Control is active).

**PBX Interfaces**

Table 16-18 (Cont.) Property Interfaces General Information

## EFT Interfaces

- **Handle night audit commands:** Select the check box to notify the vendor, mostly EFT and FIAS interfaces, that the PMS night audit was started and stopped and that the PMS business date had been rolled. If this check box is not selected, the vendor will not be notified of this information.
- **Enable Rollup Transactions:** Select to enable a rollup transaction functionality for outgoing transactions requested by the interface to display on the vendor's side in a view of the folio as one bill item. Rollup transactions are multiple transactions that were made on the same day that have the same Reference (e.g., Check Number), and can be rolled into one line item. These are identified by having a + sign next to the line item on the Billing screen for example.
- **Phone Display Name:** When the guest calls the Front Desk, selecting this check box displays the primary sharer's name on the Front Desk phone display. A room with sharers will send the guest name from the first reservation checked in for that room to the IFC Vendor; this name will continue to be sent in the messages for all of the following sharer Check-Ins and any reservation changes. A room with no sharers will send the guest name that is on the reservation.
-  **Note:**  
The name that is displayed can manually be changed to one of the other sharer names from Miscellaneous > Interfaces > Interfaces > Display Name after all sharers are checked in. The Display field can only be selected for one guest name per room.
- **Bill display options:** The following bill display options are available.
  - **User defined folio:** Select this option to select a user-defined folio window where the bill is displayed. When you select this option, the Folio field appears. Select the drop-down arrow and select this folios where the bill will be displayed.
  - **Guest folio:** Select this option to display windows that have the guest profile linked to the folio window.
  - **Off:** Select this option to turn the bill display options off through the video system.
- **Video checkout options:** The following video checkout options are available for VID interfaces only.
  - **Allow video check out:** Select this option to allow videos to be checked out from this room. Once this option is selected, you can alter the Check credit limit, Check balance, and Check routing settings.
  - **Check credit limit:** Not currently used.
  - **Check balance:** Select this option to check the video balance against the total balance in OPERA Cloud.
  - **Check routing:** Select this option to allow the charges to go to another room.
- **Wake-up call options:** The following wake up call options are available.
  - **Handle wake-up calls:** Select this option to allow wake up calls through the video or phone system.
  - **OPERA:** If the OPERA button is selected, then a WakeupSet is sent to IFC8 at the time of the wake up call. The Number of Retries field needs to be completed to define the number of times OPERA Cloud attempts to resend the message to the vendor before the call is finally set to unsuccessful (if there is no response or there is an unsuccessful response). The Retry Interval field also needs to be completed to define the amount of time between the retries.
  - **Vendor:** If this option is selected, the WakeupSet message is instantly communicated with the vendor phone system, and the vendor handles the wake up call. This option is only visible if the Handle wake up calls option is selected. If this option button is selected, the Number of Retries field should be set to 0 and the value entered in the

**Table 16-18 (Cont.) Property Interfaces General Information****EFT Interfaces**

Retry Interval field is the amount of time that OPERA Cloud waits for a response from vendor before the call is set to unsuccessful.

- **Number of retries:** Indicates the number of times to retry a wake up call if the original wake up call fails. This option is mandatory if the Handle wake up calls option is selected, and should be set to "0" if the Vendor option button is selected.
- **Retry interval:** If the OPERA button is selected, this is the retry interval of the wake up calls, in seconds. For example, if 60 is entered, then the wake-up call will be retried every minute until the number entered in the Number of Retries is reached. If the Vendor option button is selected, the value entered is the amount of time that OPERA Cloud waits for a response from vendor before the call is set to unsuccessful. This option is mandatory if the Handle wake-up calls option is selected.
- **Wake Set:** Available when the OPERA button is selected, enter the number of seconds the call should be sent to the vendor before the actual set time of the call in OPERA Cloud. For example, if the wake-up call is set for 08:00 but it needs to go to the vendor at 07:58, then the Wake Set would be set to 120. If the field is blank, then the wake-up call will go out at the set wake time.

**VID Interfaces**

For example, if the wake-up call is set for 08:00 but it needs to go to the vendor at 07:58, then the Wake Set would be set to 120. If the field is blank, then the wake-up call will go out at the set wake time.

**All Other Interfaces**

If configuring an interface other than an EFT, CCW, PBX, VID, SVS, MAK, TIK, MSC, MBS, or key card (DLS) interface, the General panel contains of the following options, depending on the interface you select in the Interface Status screen

**Table 16-18 (Cont.) Property Interfaces General Information****EFT Interfaces**

**Handle night audit commands:** Select the check box to notify the vendor, mostly EFT and FIAS interfaces, that the PMS night audit was started and stopped and that the PMS business date had been rolled. If this check box is not selected, the vendor will not be notified of this information.

**Enable Rollup Transactions:** Select to enable a rollup transaction functionality for outgoing transactions requested by the interface to display on the vendor's side in a view of the folio as one bill item. Rollup transactions are multiple transactions that were made on the same day that have the same Reference (e.g., Check Number), and can be rolled into one line item. These are identified by having a + sign next to the line item on the Billing screen for example.

**Video checkout options:** The following video checkout options are available.

- **Allow video check out:** Select this option to allow videos to be checked out from this room. Once this option is selected, you can alter the Check credit limit, Check balance, and Check routing settings.
- **Check credit limit:** Not currently used.
- **Check balance:** Select this option to check the video balance against the total balance in OPERA Cloud.
- **Check routing:** Select this option to allow the charges to go to another room.

 **Note:**

Video checkout options are only available for VID Interfaces.

**Bill display options:** The following bill display options are available.

- **User defined folio:** Select this option to select a user-defined folio window where the bill is displayed. When you select this option, the Folio field appears. Select the drop-down arrow and choose the folios where the bill will be displayed.
- **Guest folio:** Select this option to display windows that have the guest profile linked to the folio window.
- **Off:** Select this option to turn the bill display options off through the video system.

**Wake-up call options:** The following wake up call options are available.

- **Handle wake-up calls:** Select this option to allow wake up calls.
- **OPERA:** If this option is selected, OPERA communicates with the phone system two minutes before a wake up call is scheduled to notify it of the wake up call. This option is only visible if the Handle wake up calls option is selected.
- **Vendor:** If this option is selected, the wake up call information is instantly communicated with the phone system, then they handle the wake up call. This option is only visible if the Handle wake up calls option is selected.
- **Number of retries:** Indicates the number of times to retry a wake up call if the original wake up call fails. This option is only visible if the Handle wake up calls option is selected.
- **Retry interval:** The interval of the wake up calls, in seconds. This option is only visible if the Handle Wake-up calls option is selected.

## Configuring Property Interface Transaction Codes

The Transaction Codes panel allows you to configure how the interface handles posting accounts, sales itemizers, and transaction codes. This would be used by any external system posting charges to OPERA Cloud . For example: minibar, POS or PBX.

## Editing Interface Transaction Codes

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Select the **Transaction Codes** link.
5. Click **Edit**.
  - a. **Cash/Credit Card Postings**: Setting this value will allow you to configure the posting of cash and credit card payments from the Point of Sales (POS) system. Your selection options are:
    - i. **Do not post**: Selecting this option does not post to a customer account.
    - ii. **Post to A/C, no autobalance**: Selecting this option posts a charge to the customer's account, but does not auto-balance the account. Selecting this option also activates the Posting Accounts and Transaction codes option buttons, allowing you to configure the posting account and transaction code settings.
    - iii. **Post to A/C autobalance**: Selecting this options posts a charge to the customer's account and auto-balances the account. Selecting this option also activates the Posting Accounts and Transaction Codes option buttons, allowing you to configure the posting account and transaction code settings.
  - b. **Subtotal Postings**: Setting this value allows you to configure splitting of the incoming charge from the point of sales system. Your selection options are:
    - i. **Do not post**: Selecting this option does not post to the customer account.
    - ii. **Split TIP only**: Selecting this option splits out the tip only. Selecting this option also activates the Posting Accounts, Sales Itemizers, and Transaction Codes option buttons, allowing you to configure the posting account and transaction code settings.
    - iii. **Full split**: Selecting this option allows you to split incoming charges from the point of sales system to the various folios associated with the account. Selecting this option also activates the Posting Accounts, Sales Itemizers, and Transaction Codes option buttons, allowing you to configure the posting account, sales itemizers, and transaction code settings.
  - c. **Difference Posting**: Select a value from the list for when the IFC8 program detects a difference between the total amount and the sum of the individual itemizers, such as Sales-, Tax, Discount itemizers and so on sent by the vendor.
    - **Post**: The interface posts the sales items amounts plus the Difference amount to guest folio using the selected transaction code.
    - **Ignore**: The interface ignores the difference amount and would post the Sales items amount in guest folio to the appropriate transaction codes and the default if needed.
    - **Reject**: The interface rejects the posting of a check when there is a difference in total amount and sales items amount.
6. **Posting Accounts**: It determine how payments are posted from the point of sales system
  - a. Click **New**:
    - i. **Posting Type**: Select a value from the list.

- ii. **Account:** Available for the PM Account and PM Account (No Autobalancing) posting types, select the account number (room) from the list.
  - iii. **Transaction Code:** Available for the PM Account posting type, select the transaction code.
  - iv. **Payment Method:** Enter the payment method code from the POS.
  - v. **Sales Outlet:** Enter the sales outlet code that corresponds to where the posting was originated, for example bar, restaurant, store, etc.
- b. Click **Save**.
- c. To Edit, click the vertical ellipsis **Actions** menu and select **Edit**.
- d. To Delete, click the vertical ellipsis **Actions** menu and select **Delete**.
7. **Sales Itemizers:** Determines how payments are posted from the point of sales system.
- a. Click **New**:
    - i. **Code:** Select a value from the list. ST1 – ST16 (Sales Itemizer1 – Sales Itemizer16), DC1 – DC16 (Discount Itemizer 1 – Discount Itemizer16), SC1 – SC16 (Service Charge 1 – Service Charge 16), TX1 - TX63 (Tax1 - Tax63).
    - ii. **Post Number:** Enter number identifying each record uniquely. There must be no gaps in the numbering. For example, a valid entry is "1, 2, 3, 4, 5, 6, 7". An invalid entry is "1, 2, 4, 5, 7", where the numbers 3 and 6 are missing.
    - iii. **Factor:** Enter a multiplying factor that the itemizer is multiplied with. The standard is 1.
    - iv. **Posting Description:** Enter a posting description reference (Food, Beverage, Tobacco, misc. etc.).
  - b. Click **Save**.
    - i. **Transaction Codes:** This allows you to configure the different methods for routing a charge to the different transaction codes configured in OPERA Cloud. If you select a different value, OPERA Cloud displays a message informing you that current transaction code settings will be deleted.
    - ii. **Dialed Digits:** Select the number of dialed digits that the call accounting system should look at for the unit charge, and/or the number of dialed digits that OPERA Cloud should look at for transactions. For example, if 4 is selected in this field and the number dialed is "1-239-555-1212", the call accounting system will only look at "1239" (the first four digits) as the unique identifier of the unit charge. OPERA Cloud will look at these same four digits as the unique identifier for transactions.
    - iii. **All Charges:** This is where you select your default transaction code for this interface. Note: When configuring transaction codes that will be applied to charges posted by interfaces (e.g., telephone and minibar interface postings), the Post Exclusive Tax as Itemizer OPERA Control will only apply if the Generates Inclusive option is not selected. If the Generates Inclusive option is selected, OPERA Cloud will still generate taxes and service charges according to the generates configuration and lump the generates with the base charge. For example, if the Post Exclusive Tax as Itemizer OPERA Control is active and the transaction code assigned to the phone interface postings in Interface Configuration has the Generates Inclusive option selected, OPERA Cloud will not itemize taxes on phone postings received through the interface. See [Transaction Code Configuration](#) for details.
    - iv. **Minibar Charges:** This is your default minibar transaction code.
  - c. To Edit, click the vertical ellipsis **Actions** menu and select **Edit**.

- d. To Delete, click the vertical ellipsis **Actions** menu and select **Delete**.
8. Transaction Code Mapping
  - a. Click **New**:
    - i. **Default**: Select a transaction code from the list.
    - ii. **Description**: Enter a description.
    - iii. **Revenue Center**: Enter the revenue center.
    - iv. **Code**: Select a transaction code from the list ; repeat for each itemizer listed.
  - b. Click **Save**.
9. Click **Save**.

## Configuring Property Interface Rooms

The rooms panel allows you to filter, add, and edit room entries for interfaces

### Adding Interface Rooms

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Select the **Rooms** link.
5. Click **New** and enter the following details:
  - a. **Type**: Select a Line type from the list or manually add it.
    - i. **R** - Room type
    - ii. **#** - Extension number
    - iii. **H** - House extension
    - iv. **B** - Booth (telephone booth)
  - b. **Room and Line Number Range**: Select check box to enter by range.
    - i. **From Room**: Enter or select a start room.
    - ii. **To Room**: Enter or select a final room.
    - iii. **From Line Number**: Enter a start line number.
    - iv. **To Line Number**: Enter a final line number.
  - c. **Room**: Select a room from the list.
  - d. **Line Number**: Enter a telephone line number.
  - e. **Wake Up Call**: Select an option from the list.
  - f. **Do Not Disturb**: Select an option from the list.
  - g. **Class of Service**: Select an option from the list.
  - h. **Direct Inward Dial**: Select an option from the list.
  - i. **Message Waiting**: Select an option from the list.
  - j. **Mask Dial Number**: Select an option from the list.

- k. **Requires line number setup:** Select check box when configuring a Door Lock Interface.
- l. Click **Save**.

### Importing Interface Rooms

The Import Rooms option allows you to configure line number to room number translation for an interface. For example, the phone lines associated with a hotel room.

Select room type(s) from the lower panel and configure the applicable line types. Complete the following desired fields and select the **Import**.

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Select the **Rooms** link.
5. Click the vertical ellipsis **Actions** menu and select **Import**.
  - a. **Number of Lines:** Select the number of lines that you would like to import for your IFC room configuration. For example, if a room has three lines - extension 1, extension 2, and a fax line, you would select 3.
  - b. **Remove leading Zeros:** Select this check box to remove the leading zeroes on a room number prior to adding a prefix
  - c. **Line Number Prefix:** Enter the number that you would like to precede the room number when creating your external line number. You need to do this for each line that exists in the room (the number of lines are defined in the Number of Lines field).
  - d. **Add to Line Numbers:** Enter the numerical value that you would like to add to the line number during an import. For example, if the room number is 100 and you enter 50 in this field, when the import is done, the line number would become 150.
  - e. **Setup Mask:** Depending on the number of lines defined in the Number of Lines field, one or more Setup Mask - Line xx where "xx" is the line number. Select the link to access the Setup Mask screen and enter the mask field information for the selected line type. .
    - i. **Wake Up Call:** Select an option from the list.
    - ii. **Do Not Disturb:** Select an option from the list.
    - iii. **Class of Service:** Select an option from the list.
    - iv. **Direct Inward Dial:** Select an option from the list.
    - v. **Message Waiting:** Select an option from the list.
    - vi. **Mask Dial Number:** Select an option from the list.
  - f. **Room Types:** Select one or more room types.
  - g. Click **Import**.

### Editing Interface Rooms

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.

3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update configuration.
5. Click **Save**.

#### Deleting Interface Workstation Setup

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Click **Delete** to confirm.

## Configuring Property Interface Class of Service

#### Editing Interface Class of Service

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Select the **Class of Service** link.
5. Click **Edit**.
  - a. Voice Mail Notification
    - i. **Disabled**: Select to disable voice mail notifications in OPERA Cloud.
    - ii. **Enabled**: Select to enable voice mail notifications in OPERA Cloud.
  - b. Message light
    - i. **On/Off**: Select to turn on the message light when a new voice mail arrives.
    - ii. **Not changeable**: Select to indicate that the message light is not supported.
  - c. Automatic Check-in/out
    - i. **Disabled**: Select to disable automatic check-in/out.
    - ii. **Enabled**: Select to allow automatic check-in/out.
    - iii. **Enable with room move**: Select this checkbox to allow automatic check-in/out when a room switch occurs only. Note: On a checked-in reservation, changes to any of the following fields will trigger a guest update record message to the IFC Vendor (upon saving the reservation) - Last Name, First Name, Language, Title, Vip Code, Departure Date, Specials, Member Number, Member Level, and Member Type.
  - d. **Enable with Queue Room**: Select this checkbox to send a check-in message to the interface system when the reservation room is placed on queue. Expectation is that the vendor system handles the logic when guest's are currently in the room. (Available when the Queue Room OPERA Control is active).
  - e. Name Display Format
    - i. **Standard format**: Select a value from the list to determine how the guest's name is displayed in the external system.

- ii. **User defined format:** Select this check box to configure an expression for different data to be provided to the external system.
  - **Defined Format:** Select from the list of values to configure the specific tag for the data.
  - **Format Expression Table:** Select a value from the list for the table to be used to retrieve the data. Table Columns will display in the Available panel for selection.
  - **Format Expression:** Select values from the Available panel and click > to move to the Selected panel. The Format Expression field will be updated based on your selection and can have free text added.

 **Note:**

Upon creating a new MICROS POS of M87 or SPH, the User Defined Format is automatically activated and populated with the required data fields supported by this Vendor.

- f. **Disable Room Equipment @ Check-in:** Select this check box to disable sending a RoomEquipment message to the vendor immediately after the GuestIn message when the RoomEquipment does not change any guest rights. This is to eliminate processing unnecessary records when vendors support all messages but the needed data (Class of Service, No Post, etc.) is included in or understood with the GuestIn message.
  - g. **Disable Room Equipment @ Check-out.:** Select this check box to disable sending a RoomEquipment message to the vendor immediately before the GuestOut message when the RoomEquipment does not change any guest rights. This is to eliminate processing unnecessary records when vendors support all messages but the needed data (Class of Service, No Post, etc.) is included in or understood with the GuestOut message.
  - h. **Disable Guest Data Change @ Check-out.:** Select this check box to disable sending a GuestdataChange message to the interface at the time of a Checkout. This is to eliminate processing unnecessary records when vendors support all messages but the needed data is included in or understood with the GuestOut message.
6. Click **Save**.

## Configuring Property Interface Postings

### Editing Interface Postings

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Select the **Postings** link
5. Click **Edit**.
  - a. **Reference Field.** Select the value you would like to see entered in the Reference field for postings. This field allows you to provide additional information about the charge. When the IFC>Swap Reference and Supplement application parameter is set to Y and

a value exists in the Reference field, any interface posting's will have the information selected in this field displayed under the Supplement column. Depending on the how the default folio is setup it will either display supplement or reference field information on it. Switching this parameter will make the posted charge have different data in the different fields and will display differently on the billing screen as well as the folio.

 **Note:**

If attributes are selected for the Reference or Supplement fields, those will take precedence over the attribute selected for this field. But if both of Reference or Supplement fields are blank, then this attribute selected will be used.

- i. Do not post:** Does not record and zero charge postings.
  - ii. Post:** Posts zero charge postings.
  - iii. Only to IFC\_HIST:** Only sends zero charge postings to the history file.
  - iv. Post and to IFC\_HIST:** Records zero charge posting and records them to the history file.
  - v. Post to IFC\_HIST:** Select this check box to have the interface record a copy of all postings to the IFC\_HIST table.
- b. Zero Charge Postings.:** Set this option to configure how the interface will deal with zero charge postings.
- c. Postings.** Set this option to configure the different checks the interface should make before allowing a posting. Your selection options are:
  - i. Do not check NOPOST flag :** When selected, sends 990000000000 as the credit limit to the interface.
  - ii. Check NOPOST flag only:** When selected, sends 990000000000 as the credit limit to the interface when the No Post flag is not selected on the reservation. If the No Post flag is selected on the reservation, then the credit limit will be 0.
  - iii. Check credit limit:** The following displays how the credit limit will be calculated when this is selected for Postings: Actual Credit Limit(greatest of the approval amount or the credit limit set for the guest payment method) - Guest folio balance - Charges due for remaining stay.
  - iv. Check credit limit per Guest:** Controls on an interface-by-interface basis which interfaces should check the individual spending limit. When selected, the interface will check to see if there is available spending for that particular guest's key, and will then further check that there is enough credit on the room. (Available when the Multiple Guest Room Key OPERA Control is active).
- d. Number Masking:** This setting allows you to indicate whether or not to mask any details displayed in the supplement field. Select a value from the list.
- e. Default Charge:** This default charge will be used when the incoming minibar posting has none or invalid OPERA Cloud articles in the PostSimple message.
- f. Override Credit Limit:** This check box controls whether to allow an override of the credit limit on postings. When this check box is selected, a PostRequest that is over the credit limit will fail with No Credit response unless the payment method included in the PostRequest is configured to a Room posting type that is associated with the Manager Override (see [Configuring Property Interface Transaction Codes](#) for details).

- g. **Check "NoPost" during guest information change:** Select this checkbox to check the NoPost field on the reservation when updating the guest information.
  - h. **IFC Generates Tax.:** The functionality for this check box is also based on how the IFC Post Exclusive Tax As Itemizer OPERA Control is set. Selecting the check box will have the IFC include the tax and leaving the check box un-selected will have PMS generate the tax. But when the IFC Post Exclusive Tax As Itemizer OPERA Control is active and this check box is selected, then exclusive taxes will be posted as itemizers by the POS Interface.
  - i. **Charge Scaling:** This option allows you to set the various charge scaling options. Use this to divide or multiply a charge.  
**Post Type:** Select the posting type. The available options are:
    - i. **Direct:** Uses the actual dollar amount from the message.
    - ii. **Minibar:** Uses the dollar amount from the Article Configuration, not from the message.
    - iii. **Phone:** Uses the dollar amount, based on the transaction configuration, from the Trans Codes IFC Configuration Tab, not from the message.
  - j. **Reference:** Click to select the attributes to include in the Reference field for postings. Select values from the Available panel and click > to move to the Selected panel. When attributes are selected here, they will take precedence over the item selected in the Reference Field drop down list field.
  - k. **Supplement:** Click to select the attributes to include in the Supplement field for postings. Select values from the Available panel and click > to move to the Selected panel. When attributes are selected here, they will take precedence over the item selected in the Reference Field drop down list field.
6. Click **Save**.

## Configuring Property Interface Room Status

The Interface Room Status panel enables changing the configuration of the room status.

### Editing Interface Room Status

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Select the **Room Status** link.
5. Click **Edit**.
  - a. **Send Room Status.** Selecting this check box will send **Checked In, Check Out, Out of Order, Out of Service, Clean, Dirty, Inspected, and Pickup** (Entry-Code set up in the grid) to the Interface any time the room status is changed in OPERA Cloud. The Interface sends the message to the external system with the updated status of the room. This room status could then be reflected, for example, on a display floor panel for each floor as a reference for housekeeping attendants.

 **Note:**

This requires a standalone interface with a partner that supports outgoing Room Status schema only (not through the same Interface that supports guest information and incoming Room Status messages).

6. Click **Save**.
7. **Custom Room Status Translations**
  - a. Click **New**
    - i. **Custom Room Status:** Select a value from the list.
    - ii. **Entry-Code:** Enter the code provided by the vendor to indicate the specific room status that is sent and received by the interface.
    - iii. **Description:** A free-form text description of the room status.
  - b. Click **Save**.
  - c. To Edit, select the translation entry, click the vertical ellipsis **Actions** menu and select **Edit**.
  - d. To Delete, select the translation entry, click the vertical ellipsis **Actions** menu and select **Delete**.

## Configuring Property Interface Translation

The Translation panel is used to configure additional instructions and information for the Interface.

### Editing Interface Translation

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Select the **Translation** link.
5. Click **Edit**.
  - a. **Guest Number Length:** This determines how long the `resv_name_id` is that is sent to the vendor. Some vendor systems only support a certain number of digits in the message.
  - b. **Guest Message ID Length:** Select the length of the `messageId` sent to the vendor. Message IDs are assigned to text messages sent to vendor, and some vendors only support up to a certain number of digits in the message.
  - c. **Group Number Length:** This determines the length of the Block ID sent to the vendor. Some vendor systems only support a certain number of digits in the message.
  - d. **Select Transaction (Type):** Select the appropriate option to indicate the type of translation and then select the **New** or **Edit** actions to work with that translation type.
    - i. **Merchant ID.** This is used by some EFT Interfaces. When this is selected, the Origin Code and Merchant ID columns appear in the grid to the right.

- ii. **Article Number.** Select to translate the article number between OPERA Cloud and the vendor. Refer to [Articles](#) for additional information on article numbers.
  - iii. **Language Code.** Select to translate the language used between OPERA Cloud and the Vendor system.
  - iv. **Key Options.** Select to set up interface key option translations and define how the key options interact with IFC8. When this option button is selected, the OPERA Key Option, IFC8 Key Option, Priority, and Position columns appear in the grid. Select the **New** or **Edit** buttons to create new or edit existing key options. The Key Options Translation - New or Edit screens appear. Complete the fields below and select the **OK** button.
    - i. **OPERA Key Option.** Select the OPERA key option from the list of values. The key options list of values are defined in the property [preferences](#) setup.
    - ii. **IFC8 Key Option:** Enter a 1 or 0 (on or off).
    - iii. **Priority:** Enter the priority of the key option. This allows for greater flexibility when setting up multiple key option configurations.
    - iv. **Position:** Enter the position of the key option within the IFC8 interface configuration.
  - e. **Translation:**
    - i. Click **New** to add Translation.:
      - i. Add details.
      - ii. Click **Save**.
    - ii. To Edit, click the vertical ellipsis **Actions** menu and select **Edit**.
    - iii. To Delete, click the vertical ellipsis **Actions** menu and select **Delete**.
6. Click **Save**.

## Configuring Property Interface Workstation (Encoder) Setup

The Workstation Setup panel allows you to setup the room key encoders for your door lock system.

Prior to adding Workstations/Encoders, [configure Device Areas](#) in order to group key encoders into physical areas at your property.

### Adding Interface Workstation Setup

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Select the **Workstation Setup** link.
5. Click **New** and enter the following details:
  - a. **Terminal:** Enter the terminal ID for the workstation.
  - b. **Device IP / Encoder Number:** Enter the ID or encoder number for the RFID encoder device.
  - c. **Device Area:** Enter or select the area where the workstation device physically resides at your property.

- d. **Location:** Enter a location of the encoder at your property.
  - e. **Type:** Enter or select the type of encoder.
6. Click **Save**.

#### Editing Interface Workstation Setup

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update configuration.
5. Click **Save**.

#### Deleting Interface Workstation Setup

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Property Interfaces Unit Charges

The Unit Charge panel allows you to configure the unit prices for a PBX phone system. When a call is made, OPERA Cloud looks at all defined variables/parameters to try and identify the call and assign a unit charge. If OPERA Cloud is unable to identify the call based on the variables/parameters defined in the system, OPERA Cloud identifies the call as a House call and the default charge is used.

#### Editing Post Unit Charges

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Select the **Unit Charges** link
5. Click **Edit**.
6. **Post unit charge based on:** Select a value from the list:
  - a. Meter pulse
  - b. Total Amount
  - c. Auto choose
7. Click **Save**.

#### Adding Property Interface Unit Charges

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter search criteria and click **Search**.

3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Select the **Unit Charges** link
5. Click **Edit**.
  - a. **Trunk ID**. Enter the trunk ID. A trunk can be defined as a set of phone line going out of or coming into the hotel. A single property can have several trunks. For example, one trunk could be strictly used for local calls and another trunk could be strictly used for international calls.
  - b. **Line Type**. Select the line type. The options are:
    - R1 (Line 1)
    - R2 (Line 2)
    - B (Booth)
    - H (House)
  - c. **VIP code**. Select the VIP code.
  - d. **Default Charge**. Enter the default charge. When a call is made, OPERA Cloud looks at all defined variables/parameters to try and identify the call and assign a unit charge. If OPERA Cloud is unable to identify the call based on the variables/parameters defined in the system, OPERA Cloud identifies the call as a House call and the value entered in this field is used as the default charge.
  - e. **Tariff**. Enter the tariff number. The tariff number allows you to charge a different monetary value for each line type. For example, tariff 1 may be for line 1 and tariff 2 may be for a house line.
6. Click **Save**.

### Editing Property Interface Unit Charges

#### Note:

When editing existing unit charges, charges with an identical trunk ID/line type/VIP code/tariff combinations are grouped together.

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Property Interface Unit Charges

1. From the **Administration** menu, select **Interfaces**, and then select **Property Interfaces**.
2. Enter the search criteria and click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Viewing Property Interface Logs

Interface error and failed message logs are purged according to the Purge IFC Log Days [OPERA Control](#); the default being 180 days.

Interface messages are only purged for inactive interfaces.

### Viewing Interface Error Logs

To view all errors for a property interface.

1. From the **Administration** menu, select **Interfaces**, select **Interface Logs** then select **Error**.
2. Enter search criteria then click **Search**.

### Viewing Failed Interface Messages

To view all failed messages for a property interface.

1. From the **Administration** menu, select **Interfaces**, select **Interface Logs** then select **Failed Messages**.
2. Enter search criteria then click **Search**.

### Viewing Interface Messages

To view all messages for a property interface

1. From the **Administration** menu, select **Interfaces**, select **Interface Logs** then select **Messages**.
2. Enter search criteria then click **Search**.

### Deleting Interface Messages

To delete all messages for a property interface.

1. From the **Administration** menu, select **Interfaces**, select **Interface Logs** then select **Messages**.
2. Enter search criteria then click **Search**.
3. Click **Delete**.

### Viewing Interface Schemas

To view the schemas defined for a property interface (if any), along with the specific attributes of that schema.

1. From the **Administration** menu, select **Interfaces**, select **Interface Logs** then select **Schemas**.
2. Enter search criteria then click **Search**.
3. Double-click a **Schema Name** value in the search result to view the details.

## Viewing Interface Controller Registry

You can view the registry settings of the IFC Controllers. These details are updated every time the IFC Controller is restarted on the selected machine.

#### Viewing Controller Registry

1. From the **Administration** menu, select **Machines**, select Interface Logs then select **Controller Registry**.
2. Enter search criteria then click **Search**.

## Configuring Property Interface Machines

Configure OPERA Cloud with the machine name(s) where the OPERA IFC Controller is deployed to communicate with IFC8.exe's and OPERA Web-service.

#### Adding Property Interface Machines

1. From the **Administration** menu, select **Interfaces**, select **Machines** then select **Machines**.
2. Click **New** and complete the following:
  - a. **Machine**: Enter the computer name
  - b. **Program**: Select a program path from the list
  - c. **Controller Port**: Enter or select a port number.
3. Click **Save**.

#### Editing Property Interface Machines

1. From the **Administration** menu, select **Interfaces**, select **Machines** then select **Machines**.
2. Select the machine, then click the vertical ellipsis **Actions** menu and select **Edit**.
3. Update details.
4. Click **Save**.

#### Deleting Property Interface Machines

1. From the **Administration** menu, select **Interfaces**, select **Machines** then select **Machines**.
2. Select the machine, then click the vertical ellipsis **Actions** menu and select **Delete**.
3. Click **Delete** to confirm.

## Property and Fiscal Interface Monitoring

The Property Interfaces Monitoring dashboard displays the current status of OPERA IFC Controller service and the OPERA Fiscal Interface Service (OFIS).

The dashboard displays the following information:

- Current status of the IFC Controller & OFIS instance (Running, Stopped)
- Related Started/Stopped Date/Time stamps

- The Machine IP Address
- The IfcController / OFIS version
- The current IFC Controller configuration (the local Machine Registry settings)

 **Note:**

When the IFC Controller status shows STOPPED, the communication between OPERA Cloud and Property Interface Systems connected through the IFC8 application or service might be interrupted. Suggested actions:

- Access the IFC Controller PC (Machine) and verify in the Windows Services if the OPERA IFC Controller service is running.
- If it is RUNNING, stop the service and restart it.
- If the Service shows Running in the Services list, verify if Status changes to RUNNING in Property Interface Dashboard, and verify if IFC8 status becomes LinkAlive (all LED = green).
- If the Service shows Running in the Services list but Status is still STOPPED in the Property Interface Dashboard, verify the network connection allowing connection to OPERA Server, verify the IFC user credentials are accurate and valid using the `OperaIfcController.exe` configuration application located on the local interface computer.
- Contact Oracle Hospitality Support for further assistance.

### Viewing the Interface Dashboard

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces Monitoring**.
2. Enter search criteria, then click **Search**.

### Viewing Current Interface Controller Configuration

To obtain current OPERA IFC Controller registry configuration:

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces Monitoring**.
2. Enter search criteria, then click **Search**.
3. Select the Interface Name, then click the vertical ellipsis **Actions** menu and select **View Configuration**.

### Obtaining Details for New Interface Configuration

To obtain the registry settings needed when configuring a new OPERA IFC Controller:

1. From the **Administration** menu, select **Interfaces**, then select **Property Interfaces Monitoring**.
2. Enter search criteria, then click **Search**.
3. Click the vertical ellipsis **Action** menu and select **New Configuration**.
4. The required settings are displayed.

# Configuring Scheduled (Leisure) Activities

## Prerequisites for Scheduled Activities

The follow topics relate to the setup required for integrating with a leisure activity scheduling solution.

## Configuring Scheduling Activities Location

The OPERA Cloud integration with an External Activities Scheduler system requires you to identify the locations where scheduled activities take place so that OPERA Cloud can distinguish these, internally, from locations set up for other purposes .

### Adding Scheduled Activities Locations

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Locations**.
2. Click **New** and enter the following details:
  - a. **Property**: Enter or select the property.
  - b. **Locations**: Enter a code for the location.
  - c. **Description**: Enter a status description.
3. Click **Save**.

### Editing Scheduled Activities Locations

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Locations**.
2. Enter search criteria and click **Search**.
3. Select the status code, click the **vertical ellipsis** and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Scheduled Activities Locations

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Locations**.
2. Enter search criteria and click **Search**.
3. Select the status code, click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Scheduling Activities Status Codes

The OPERA Cloud integration with an External Activities Scheduler system requires you to identify the status codes for scheduled activities so that OPERA Cloud can distinguish these, internally, from status codes set up for other purposes.

### Adding Scheduled Activities Status Codes

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Status Codes**.
2. Click **New** and enter the following details:
  - a. **Property**: Enter or select the property.
  - b. **Status Code**: Enter a code for the status.
  - c. **Description**: Enter a status description.
  - d. **Application**: Select an application for this status code from the list.
  - e. **Language**: Select a language from the list.
  - f. **Priority**: Select a priority to assign to the status from the list.
3. Click **Save**.

### Editing Scheduled Activities Status Codes

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Status Codes**.
2. Enter search criteria and click **Search**.
3. Select the status code, click the **vertical ellipsis** and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Scheduled Activities Status Codes

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Status Codes**.
2. Enter search criteria and click **Search**.
3. Select the status code, click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Scheduling Activities Types

The OPERA Cloud integration with an External Activities Scheduler system requires you to identify the activity types for scheduled activities so that OPERA Cloud can distinguish these, internally, from activities set up for other purposes.

### Adding Scheduled Activities Types

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Types**.
2. Click **New** and enter the following details:
  - a. **Property**: Enter or select the property.
  - b. **Locations**: Enter a code for type.
  - c. **Description**: Enter a status description.
3. Click **Save**.

### Editing Scheduled Activities Types

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Types**.
2. Enter search criteria and click **Search**.
3. Select the status code, click the **vertical ellipsis** and select **Edit**.
4. Update details.
5. Click **Save**.

### Deleting Scheduled Activities Types

1. From the **Administration** menu, select **Interfaces**, select **Scheduled Activities**, then select **Types**.
2. Enter search criteria and click **Search**.
3. Select the status code, click the **vertical ellipsis** and select **Delete**.
4. Click **Delete** to confirm.

## Configuring UDF Mapping

UDF Mapping is used to configured customer tags for an outgoing XML message used with external systems (such as OWS, HTNG). For example, if your property uses UDF10 on a profile to store EmergencyContact; in UDF Mapping you would configure the label (tag) in the profile XML message to be **EmergencyContact** instead of the XML containing the tag **UDF10**.

### Editing UDF Flex Field Mapping

1. From the **Administration** menu, select **Interfaces**, then select **UDF Mapping**.
2. Select **Reservation** or **Profile** and enter UDF flex field and click **Search**.
3. In the search result, select the field and click the vertical ellipsis and select **Edit**.
  - a. **Label**: Enter an XML label for the flex field.
  - b. **Active**: Select to activate UDF mapping for the field.
  - c. **Update Allowed**: Select to allow update of the the UDF field by external systems (such as OWS). If it is not selected, this UDF is read only by external systems.
4. Click **Save**.

## Configuring Client Devices

### Prerequisites for Configuring Client Devices

Configure client devices for users to select from during login. The client device is tracked and displayed in the **Device Code** column in [changes log](#).

**Note:**

A **Default** device code with **Default Device** description is seeded and cannot be deleted.

### Adding Client Devices

1. From the **Administration** menu, select **Interfaces**, and then select **Devices Configuration**.
2. Click **New** and complete the following:
  - a. **Global:** Select to configure client device for all properties.
  - b. **Property:** Enter or select a property for the client device.
  - c. **Code:** Enter a code that identifies the client device; maximum 20 characters. Field supports entry of an IP address.
  - d. **Description:** Enter a description of the client device; maximum 100 characters.
    - i. **Manage Translations:** Click link to configure localized descriptions. For more information, see [Configuring Localized Code Descriptions](#). (Available when the **Multi-language** OPERA Control is active).
  - e. **Device Area:** Select a device area from the list. For more information, see [Configuring Device Areas](#).
  - f. Click **Save** or click **Save and Add Another** to add another Client Device.

### Editing Client Devices

1. From the **Administration** menu, select **Interfaces**, and then select **Devices Configuration**.
2. Enter search criteria and click **Search**.
3. Select a client device in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the configuration.
5. Click **Save**.

### Deleting Client Devices

1. From the **Administration** menu, select **Interfaces**, and then select **Devices Configuration**.
2. Enter search criteria and click **Search**.
3. Select a client device in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

# Part IV

## Role Manager

This part of the OPERA Cloud User Guide contains information on managing OPERA Cloud users and configuring OPERA Cloud roles and tasks.

**Note:**

OPERA Cloud users and their role assignments are setup in Shared Security Domain.

# 17

## Prerequisites for Role Manager

This chapter of the OPERA Cloud User Guide lists the prerequisites for Role Manager menu.

### Prerequisites for Managing Roles

#### OPERA Cloud Tasks

**Group:** Role Manager

**Tasks:** Manage Roles

- Manage Property Role Templates
- Manage Chain Roles and Tasks
- Manage Property Roles and Tasks
- Apply Templates to Property Role
- Assign Tasks to Property Roles without Template

### Prerequisites for Configuring Template and Property Roles

#### OPERA Controls

**Group:** General

**Parameters:** Property Roles without Template

#### OPERA Cloud Tasks

**Group:** Role Manager

**Tasks:** Manage Roles

Manage Property Roles and Tasks

- Apply Templates to Property Role
- Assign Tasks to Property Roles without Template

### Prerequisites for Associating Transaction (Charge) Codes to a Chain Role

#### OPERA Controls

**Group:** Cashiering

**Functions:** Transaction Code by User Role

## Prerequisites for Managing Users

**OPERA Cloud Tasks**

**Group:** Role Manager

**Tasks:** Manage Users

- New/Edit Users
- Reset PIN

# About Roles

## Prerequisites for Managing Roles

When you create roles in Oracle Identity Manager (OIM), you must import and assign tasks (privileges) to these roles in OPERA Cloud. Additionally, the users you create in OIM must be assigned roles (Chain and/or Property). However, role assignment alone does not grant users access to properties. To have access to properties, users must also be assigned to one or more [hubs](#).

### Note:

A process runs regularly to ensure task changes to existing and new roles are updated. This process can take up to 10 minutes to take effect.

In Role Manager, there are two levels of roles:

- **Chain Roles:** Enable the same privileges across all properties in the chain (tenancy).
- **Property Roles:** Typically created from a template (template roles), these roles assign privileges for a single property. When the Property Role without Template OPERA Control is active an independent property role can be created which is not based on a template role.

A user can have one or multiple roles assigned to them, which can be Chain or Property roles or a combination of both. This provides you with flexibility in designing the access privileges that best suit your business requirements.

### Property Role Examples

An example of a user with a property role would be a Front Desk user working at a single property. This user would have access to the default hub plus a property role.

An example of a user with multiple property roles would be a Reservation Manager responsible for a single hotel but requiring different levels of access. This user would have the default hub assigned to them plus a Reservation Agent property role and the Reservation Manager property role for elevated privileges.

### Chain Role Examples

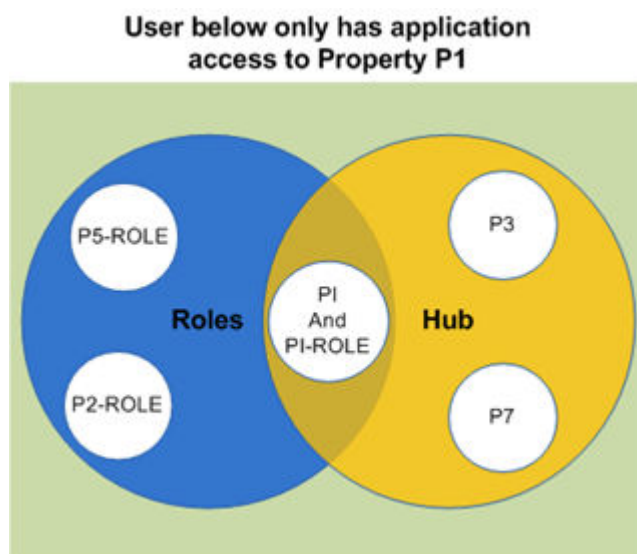

An example of a user with a chain role would be a Regional General Manager responsible for multiple hotels and the same privileges across all of them. If this user requires access to all properties in the chain with the same privileges, this user would have the default hub and a chain role assigned to them. However, if this user only needs access to a subset of properties in the chain, the administrator could create a new hub with only that subset of properties assigned to them. That user would be granted access to this new hub as well as a chain role assigned.

An example of a user with a combination of chain and property roles would be a Revenue Manager requiring access to multiple properties within a chain but only elevated access to select properties. Limited access to some or all properties in the chain is provided through a

chain role and either the default hub or a new hub with a subset of properties. Elevated access to select properties is provided through property roles.

The following figure illustrates the configuration of a user's assigned property roles and assigned hub. In this figure, P1 (Property 1) and P1-Role (Property 1 Role) are the only intersecting access credentials when looking at the roles and properties attached to this user's assigned hub. As a result, a user with this configuration can only access the P1 Property.

**Figure 18-1 Assigned Property Roles and Hub**

### Seeded Roles

The following are roles seeded on provisioning of your chain and property.

Role	Access to	Visible in Role Manager
DATAACCESS	OPERA Cloud for Oracle employee	Yes, View only
SENSITIVEDATAACCESS	OPERA Cloud for Oracle employee	Yes, View only
ADMIN	OPERA Cloud to perform administration tasks	Yes, View only
GUESTEXPERIENCE	Guest Experience Portal	No
DEVELOPERPORTALACCESS	<a href="#">Oracle Hospitality Integration Platform</a>	No
CCCONF	Payment Portal (OPI)- for Credit cards payments confirmation	No
CCTRANS	Payment Portal (OPI) - Credit cards transactions	No
PPCONF	Payment Portal (OPI) - Pre-paid payments confirmations	No
WSACCESS		No

# Configuring Chain Roles

Chain Roles are created in Oracle Identity Manager (OIM) initially, then added in OPERA Cloud.

## Adding a Chain Role

Roles created in Oracle Identity Manager (OIM) appear with a red triangle and exclamation mark to indicate the role does not exist in OPERA Cloud.

1. From **OPERA Cloud Role Manager**, select **Manage Chain Roles**.
2. Enter search criteria, then click **Search**.
3. Select the role created in OIM (red triangle), then click the vertical ellipsis Actions menu and select **Create Role from LDAP**.
4. The Manage Role page appears from which you can grant various tasks to the Chain Role. For more information, see [Assigning Tasks to a Role](#).
5. From the top panel of the Manage Role screen, complete the following fields:
  - a. **Role**: This field is read-only and displays the name of the role as it was configured in OIM.
  - b. **Display Name**: Enter the display name for the role in OPERA Cloud.
  - c. **Description**: Enter a description of the role in OPERA Cloud.
6. Click **Save**.

## Editing a Chain Role

1. From **OPERA Cloud Role Manager**, select **Manage Chain Roles**.
2. Enter search criteria, then click **Search**.
3. Select the role, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Under **Available Tasks**, select or deselect the assigned tasks from the role. For more information, see [Assigning Tasks to a Role](#) for more information.
5. Click **Save**.

## Viewing Users Assigned to a Chain Role

1. From **OPERA Cloud Role Manager**, select **Manage Chain Roles**.
2. Enter search criteria, then click **Search**.
3. Select the role, then click the vertical ellipsis **Actions** menu and select **View Users**.
4. The Users screen appears with the User ID and Display Name for each user.

## Deleting a Chain Role

1. From **OPERA Cloud Role Manager**, select **Manage Chain Roles**.
2. Enter search criteria, then click **Search**.
3. Select the role, then click the vertical ellipsis **Actions** menu and select **Delete Role from Database**.
4. Click **Yes** to confirm the deletion.

# Configuring Template and Property Roles

## Prerequisites for Configuring Template and Property Roles

Template roles are available as a way to maintain the same privileges (tasks) across multiple properties.

Property roles are then created from template roles. You can remove tasks from a property role based on a template role; however, tasks cannot be assigned to a property role if the template role does not already have those tasks assigned.

When the Property Roles without Template OPERA Control is active you can also configure property roles without the need for a template role.

An administrator can remove tasks from a property role; however, tasks cannot be added to a property role if the template role does not already have them. The benefit of a template role is to maintain the same privileges across multiple properties.

## Configuring Property Roles based on a Template Role

A property role can be based on a template role and these roles can be applied to one, multiple, or all properties.

When creating a new property role in Oracle Identity Manager (OIM) and a template of the same name exists, you can apply it to the role in OPERA Cloud. Otherwise, you can create a new template and apply it to the role when there is no template existing of the same name.

## Creating a Template Role

1. From the Side Menu, select **Role Manager**, select **Manage Property Roles**.
2. Click **New** in the Template Roles section.

### **Note:**

A template role cannot be created with the same name as a property role.

3. From the **Available Tasks** panel, select the tasks to assign to the role. See [Assigning Tasks to a Role](#).
4. Click **Save**.

## Applying Template to a Property Role

1. From the Side Menu, select **Role Manager**, select **Manage Property Roles**.
2. Enter or select an Organization (Property) and click **Search** to view all configured template roles and property roles for the property.

### **Note:**

When a property role is created in Oracle Identity Manager (OIM) with the same name as a template role, it appears at the bottom panel with a red triangle and warning link to indicate that the template found and with action link **Apply Template to Role**.

3. Click the vertical ellipsis button for the property role and then select **Apply Template to Role** or click the link provided in the warning message.
4. From the **Available Tasks** panel, select the tasks to assign to the role. See [Assigning Tasks to a Role](#).
5. An **Inconsistent** indicator is displayed when there is an inconsistency with the number of tasks assigned to the property role and the number of tasks assigned to the template role. Click **Edit the Role** to update the property role and add missing tasks.
6. Click **Save**.

### Creating a Template and Applying to a Property Role

1. From the Side Menu, select **Role Manager**, select **Manage Property Roles**.
2. Enter or select an Organization (Property) and click **Search** to view all configured template roles and property roles for the property.

#### **Note:**

When a property role is created in Oracle Identity Manager (OIM) without a template role existing in OPERA Cloud, the role appears in the bottom panel with a red triangle and a "No corresponding template found" warning with **Create Template and Apply to Role** action link.

3. Click the vertical ellipsis button for the property role and then select **Create Template and Apply to Role** or click the link provided in the warning message.
4. From the **Available Tasks** panel, select the tasks to assign to the role. See [Assigning Tasks to a Role](#).
5. Click **Save**.

### Editing a Template Role

#### **Note:**

When the Activate Template Tasks on all Dependant Roles OPERA Control is active, amending the tasks on a template role will result in the tasks assigned to property roles (based on this template role) being updated accordingly. Deleted tasks on template results in deletion of tasks from property role. Addition of tasks on template results in addition of tasks to property role. When the OPERA Control is inactive, each property role must be manually updated to take advantage of the additional tasks added to the template.

1. From the Side Menu, select **Role Manager**, select **Manage Property Roles**.
2. Enter search criteria and click **Search**.
3. Select the template role then click the **vertical ellipsis** and select **Edit**.
4. From the **Available Tasks** panel, select the tasks to assign to the role. See [Assigning Tasks to a Role](#).
5. Click **Save**.

### Configuring Independent Property Roles without Template

When the **Property Role without Template** OPERA Control is active an independent property role can be created which is not based on a template role.

The same property role can be configured in multiple properties and tasks assigned directly to the property role; each independent property role can therefore have different tasks granted in different properties.

When creating a new property role in Oracle Identity Manager (OIM), the name of the role must not be the same as a template role in OPERA Cloud.

You can then assign tasks to the role without inheriting tasks from any template.

### Assigning Tasks to Property Role without Template

1. From the Side Menu, select **Role Manager**, select **Manage Property Roles**.
2. Enter or select an Organization (Property) and click **Search** to view all configured template roles and property roles for the property.

 **Note:**

When a Property Role is created in Oracle Identity Manager (OIM) and the role name doesn't match with any of the existing template roles, it appears at the bottom panel with a red triangle and Warning link to indicate that "No corresponding template found" and with action link **Assign Tasks to Role Without Template**.

3. Click the vertical ellipsis button for the property role and then select **Assign Tasks to Role Without Template** or click the link provided in the warning message.
4. From the **Available Tasks** panel, select the tasks to assign to the role. See [Assigning Tasks to a Role](#).
5. Click **Save**.

## Assigning Tasks to a Role

Once you add a chain or property role, you must add tasks to the role to provide users with access to menus, pages and actions. Regardless of the OPERA Controls active at each property all available tasks are listed for assignment to roles.

The lower part of the Manage Role screen is divided into a Main Tasks panel and an Available Tasks panel. The Main Tasks align with the functional areas in OPERA Cloud and you can select the required tasks for the role you are creating. The All green dot for a Main Task category indicates all tasks in the category are already assigned to the role.

 **Note:**

A process runs regularly to ensure task changes to existing and new roles are updated. This process can take up to 10 minutes to take effect.

Under the Main Tasks panel, task categories have a “New” indicator next to them when new tasks exist after an upgrade.

**Note:**

Assign report group tasks to grant access to specific report groups. Refer to [Report Groups](#) for more information.

### Adding Tasks to a Role

1. From **OPERA Cloud Role Manager**, select either **Manage Property Roles** or **Manage Chain Roles**.
2. Enter or select an **Organization (Property)** or enter a **Role** and click **Search**.

**Note:**

The **Role** search filter is only for Manage Chain Roles and is optional.

3. Select the property or chain role to update, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. From the **Available Tasks** panel, select the **Tasks** you want to assign to the role.

**Note:**

You can select a category from the **Main Tasks** panel to load its tasks under the **Available Tasks** panel for selection.

**Note:**

To grant access to specific report groups, select the respective report group tasks.

5. **Select Tasks** column; displays the number of selected tasks/number of all available tasks.
6. To filter the list of available tasks, enter the name of a specific task or a partial description into the filter field and click **Filter**.
7. Select **View By** check boxes to filter tasks to show tasks **Granted** and/or **Not Granted** to the role.
8. Choose **Select All** to select all tasks in a task category.
9. Click **Save** when you are finished selecting tasks.

## Associating Transaction (Charge) Codes to a Chain Role

### Prerequisites for Associating Transaction (Charge) Codes to a Chain Role

When the **Transaction Code by User Role** OPERA Control is active, you can restrict the sales charges a user can post to a reservation or AR account by associating transaction codes

to their role(s). For example, you could restrict concierge staff to only posting charges for tours, transport and theater tickets.

### Associating Transaction Codes with a Chain Role

1. From the **Role Manager**, select **Manage Chain Roles**.
2. Enter a Role and click **Search**.
3. Select the chain role in the search result, then click the vertical ellipsis **Actions** menu and select **Associate Transaction Codes**.
4. Enter or select a Property.
5. In the Available panel, click the transaction codes you want to assign to the role.

 **Note:**

Use the filter to search by entering a specific transaction code or a partial description and clicking **Go**.

6. Click the arrow **>** to move the selected transaction codes to selected panel.
7. Click the arrow **<** to remove selected transaction codes in selected panel.
8. Click the double greater than arrow **>>** to move all transactions codes matching the search filter to the selected panel.
9. Repeat for next property.
10. Click **Save** when finished.

# 19

## Managing Users

### Prerequisites for Managing Users

After users are registered in Oracle Identity Manager (OIM), you must update them with application-specific attributes in OPERA Cloud. This includes assigning the user to one or more hubs for property access. See the Assigning Hubs to a User section.

### Editing a User

1. From the **OPERA Cloud** menu, select **Role Manage**, select **User Management**, and then select **Manage Users**.
2. Select the **Organization** (Property) from the list and click **Search**. The list of value displays all the organizations that includes Enterprise, Chain and Support based on user assigned roles that are associated with the Manage User task.

 **Note:**

The search retrieves users associated with the selected organization.

3. Click the **Vertical Ellipsis** and select **Edit**.

 **Note:**

The read-only attributes for a user are defined in Oracle Identity Manager (OIM).

4. Complete the following fields for the user:
  - a. **Act as:** This field determines the **Originating Application** value in **Blocks** and **Manage Block** referenced by the **Origin** list field in **Group Rooms Control** search and in reports. For Sales and Event subscribers with the **Sales Allowance** OPERA Control active, the **Originating Application** value in a block must match a value selected in the **Block Origin for Sales Allowance** OPERA Control in order to deduct the block allocation from the sales allowance.

Act As	At	Origin
Reservation Sales	Property	PMS
Reservation Sales	Central	ORS
Conference Sales Person	Property	SC
Conference Sales Person	Central	CS
External	n/a	EXT

- i. **Conference Sales Person:** Select this option for OPERA Cloud Sales and Event Management users.

- i. **At:** Select either **Property** or **Central** (Available with OPERA Cloud Central Management Services).
  - ii. **Reservation Sales Person:** Select this option for OPERA Cloud Property Management users.
    - i. **At:** Select either **Property** or **Central** (Available with OPERA Cloud Central Management Services).
  - iii. **External System:** Select this option for service accounts created specifically when integrating with external solutions.
- b. **Clear Location:** Select to clear the At location.
- c. **Language:** Indicates the user's language (locale) code selected in Identity Manager (SSD). By default, OPERA Cloud is displayed in this language.
- d. **Owner Code:** (Enabled when the **Owner** OPERA Control is active). This field allows you to define the user as a sales owner. When the **Owner** OPERA Control is active a sales owner is select in each sales account (company/agent) profile and in every business block. When the Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition Or Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition is active, [Activities](#) can also be managed for each sales owner. Enter a unique value for the Owner Code; typically the users initials can be used.
- e. **Department:** Enter or select a specific department to associate with the user. For more information, see [Configuring Departments](#).

 **Note:**

Only Departments configured as Global are listed.

- f. **Job Title:** Enter or select a job title for the user. See [Configuring Job Titles](#) for more information.
  - g. **Employee ID:** Indicates the employee ID defined in Identity Manager (SSD) and may contain a combination of up to 20 alpha/numeric characters.
5. Click **Save** when finished.

### Assigning Hubs to a User

Assign one or more [hubs](#) to a user to determines their property location access in multi-property operations.

1. From the **OPERA Cloud** menu, select **Role Manage**, select **User Management**, and then select **Manage Users**.
2. Enter search criteria, then click **Search**.
3. Select the user in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Click **Manage** .
5. Select one or more Hubs in the **Available** panel and use the Down Arrow button to move selected hub(s) to the **Selected Hubs** section. Use the Up Arrow to move Hubs back to the Available panel.
6. Click **Select**.
7. Click **Save**.

### Viewing Assigned Roles

1. From the **OPERA Cloud** menu, select **Role Manage**, select **User Management**, and then select **Manage Users**.
2. Enter search criteria, then click **Search**.
3. Select the user in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Expand the **Roles** pane to view all roles currently assigned to the user.

#### Note:

This area is read-only and shows you which roles are assigned to the user in OIM. This area displays the **Organization** the user belongs to, the **Role Code**, **Role Level** (property or chain), and a **Description** of the role.

### Refreshing User Roles

To immediately update a users roles following changes in Oracle Identify Manager (SSD).

1. From the **OPERA Cloud** menu, select **Role Manage**, select **User Management**, and then select **Manage Users**.
2. Enter search criteria, then click **Search**.
3. Select the user in the search result, then click the vertical ellipsis **Actions** menu and select **Refresh Roles**.

### Resetting User PIN

1. From the **OPERA Cloud** menu, select **Role Manage**, select **User Management**, and then select **Manage Users**.
2. Enter search criteria, then click **Search**.
3. Select the user in the search result, then click the vertical ellipsis **Actions** menu and select **Reset PIN**.

#### Note:

User can then set a new PIN through [Settings](#).

### Validating Service Accounts (Interface Users)

A Success or Error result is displayed.

1. From the **OPERA Cloud** menu, select **Role Manager**, select **Manage Users**, select **Interface Users**, and then select **Validate Interface Users**.
2. Enter the following:
  - a. **Username**: Enter the service account name.
  - b. **Password**: Enter the password.
  - c. Click **Validate**.

# Generating the Configured Roles and Tasks Report

Once roles have been configured and tasks assigned to the roles, you can generate a report listing roles and their assigned tasks per task group.

1. From **Role Manager**, select **Configured Roles and Tasks Report**.
  - a. **Level**: Select either Chain or Property role level
  - b. **Task Group(s)**: Select a Module. For example, Booking Management or Financials from the list.
  - c. **Role(s)**: Select one or more Roles (for example, Admin or Front Desk).
  - d. Click **Search**.
2. Once the report is generated, click **I Want To...** and select **Printable Page** to view a printable version of the online report.

# 21

## OPERA Cloud Tasks

OPERA Cloud Tasks are actions that a user can perform. Tasks are predefined. OPERA Cloud Tasks provide the ability to manage role specific privileges based on the functional requirements and on security considerations. You can do this by enabling and disabling the parent task, tasks, and sub tasks for each role.

OPERA Cloud Tasks comprise the entire set of tasks that are available in role-based security. Some examples of tasks include View Cash Transactions in Reports, Manage Reports, and View Internal Reports / Report Groups.

Each parent task consists of a set of tasks and sub tasks, which are also predefined. For example, the Reservation Management parent task contains the Routing Instruction task and contains New/Edit Routing Instructions and Delete Routing Instructions sub tasks.

The following sections provides a breakdown of Parent Tasks, Tasks, and Sub Tasks for each task group. Based on your property's configuration and your user credentials, you may not have access to all of the tasks listed here.

### OPERA Cloud Tasks — Bookings

Find the Task permissions by navigating to **Role Manager, Role Management**, and selecting **Manage Chain Roles** or selecting **Manage Property Roles**.

Granting or revoking tasks in OPERA Tasks for chain or property roles are logged in the changes log.

**Table 21-1 Task Permissions**

Parent Task	Task	Subtask		
Reservation Management	Routing Instructions	<ul style="list-style-type: none"><li>• New/Edit Routing Instructions</li><li>• Delete Routing Instructions</li><li>• Decline Comp Requests</li><li>• Delete Comp Requests</li><li>• Delete Comp Routing from other Authorizers</li><li>• Add Comp Routing Instructions</li><li>• Approve Comp Requests</li></ul>		
		Associated Profiles	<ul style="list-style-type: none"><li>• Edit Profile</li><li>• Select Another Profile</li><li>• Attach Accompanying Guest</li><li>• Attach/Detach Travel Agent</li><li>• Attach/Detach Source</li></ul>

# Part V

## Toolbox

This part of the OPERA Cloud Help system contains information on working within the Toolbox menu for those responsible for managing OPERA Cloud utilities, systems, and data synchronization.

# 22

## Prerequisites for Toolbox

This chapter of the OPERA Cloud User Guide lists the prerequisites for Toolbox menu.

### Prerequisites for Data Synchronization

#### OPERA Cloud Tasks

**Group:** Toolbox

**Tasks:** Synchronization

- Inventory
- Stay Records
- Room Pool
- Financial Statistics
- Room Status
- Business Events
- Block Occupancies
- Physical Rooms
- Catering Forecast Revenue
- Summary Profile Statistics
- Past Profile / Reservation Statistics
- Sales Allowances
- Package Prices
- Block Rates
- Event Item Class Sequence

### Prerequisites for Synchronizing Room Pools

#### OPERA Controls

**Group:** Room Management

**Functions:** Room Pool

#### OPERA Cloud Tasks

**Group:** Toolbox

**Tasks:**

- Synchronization
- Room Pool

## Prerequisites for Synchronizing Catering Forecast Revenue

### Licenses / Subscriptions

Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition

Or

Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition

### OPERA Controls

**Group:** Events

#### Functions:

- Catering Events
- Event Resources

### OPERA Cloud Tasks

**Group:** Toolbox

#### Tasks:

- Synchronization
- Catering Forecast Revenue

## Prerequisites for Synchronizing Event Item Class Sequence

### Licenses / Subscriptions

Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition

Or

Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition

### OPERA Controls

**Group:** Events

#### Functions:

- Catering Events
- Event Resources

### OPERA Cloud Tasks

**Group:** Toolbox

#### Tasks:

- Synchronization

- Event Item Class Sequence

## Prerequisites for Synchronizing Sales Allowance

### Licenses / Subscriptions

Oracle Hospitality OPERA Cloud Service, Sales and Event Management Standard Edition

Or

Oracle Hospitality OPERA Cloud Service, Sales and Event Management Premium Edition

### OPERA Controls

**Group:** Blocks

**Functions:** Sales Allowance

### OPERA Cloud Tasks

**Group:** Toolbox

### Tasks

- Synchronization
- Sales Allowance

## Prerequisites for Data Management

### OPERA Cloud Tasks

**Group:** Toolbox

**Tasks:** Data Management

- Manage Business Date
- Room Utilities
- Change Function Space Code
- Import Postal Codes
- Status Code Update
- External References Update
- Update Market Code
- Change Revenue Type
- Membership Types
- Imbalance Analysis
  - Create Signature Hash Folio
- Catering Event Function Space Monitor
- Business Block Compare
- Update Owners

- Update Contact
- AR Enter Old Balances
- Preference Utility
- Manual Profile Purge Routine
- Transaction Management

**Tasks:** Refresh Property

## Prerequisites for Managing Business Date

### **OPERA Controls**

**Group:** End Of Day

**Parameters:** Multiple End of Days

### **OPERA Cloud Tasks**

**Group:** Toolbox

**Tasks:** Data Management

Manage Business Date

## Prerequisites for Change Function Space Code

### **OPERA Controls**

**Group:** Events

**Functions:**

- Catering Events
- Simple Events

### **OPERA Cloud Tasks**

**Group:** Toolbox

**Tasks:** Data Management

Change Function Space Code

## Prerequisites for Refresh Property

### **OPERA Cloud Tasks**

**Group:** Toolbox

**Tasks:** Import Shell

**Group:** Data Management

**Tasks:** Refresh Property

## Prerequisites for Update Owner

### **OPERA Controls**

**Group:** General

**Functions:** Owner

### **OPERA Cloud Tasks**

**Group:** Toolbox

**Tasks:** Data Management

Update Owners

## Prerequisites for Block/Catering Status Code Updates

### **OPERA Controls**

**Group:** Events

**Functions:** Catering Events

### **OPERA Cloud Tasks**

Data Management

- Status Code Update

## Prerequisites for Changing Revenue Types

### **OPERA Controls**

**Group:** Events

**Functions:**

- Catering Events
- Event Resources

### **OPERA Cloud Tasks**

Data Management

- Change Revenue Type

## Prerequisites for Updating Contact

### **OPERA Controls**

**Group:** Events

**Functions:** Contacts

**OPERA Cloud Tasks**

Data Management

- Update Contacts

## Prerequisites for Document Number Update

**OPERA Controls**

**Group:** Cashiering

**Parameter:**

- Supporting Documents
- Generate Tax Registration Number

**OPERA Cloud Tasks**

**Group:** Toolbox

**Tasks:** Document Number Update

- AR Invoice Numbers
- Folio Numbers
- Sequence Numbers

## Prerequisites for System Setup

**OPERA Cloud Tasks**

**Group:** Toolbox

**Tasks:** Import Data

- Run Import Data
- External Databases
  - New/Edit External Databases
  - Delete External Databases
- Outbound System Configuration
  - Outbound Custom Headers
- Property SFTP Configuration
- Global SFTP Configuration
- Outbound Monitoring
- Service Locator
  - Edit Service Locator Configuration

## Prerequisites for Configuring Outbound Systems

### OPERA Cloud Tasks

**Group:** Toolbox

**Tasks:** Outbound System Configuration

## Prerequisites for System Setup - Importing Data

### OPERA Cloud Tasks

**Group:** Toolbox

**Tasks:** Import Data

## Prerequisites for Configuring Outbound Domain Allow Listings

### OPERA Cloud Tasks

**Group:** Toolbox

**Tasks:** Outbound System Configuration

- Outbound Domain Allowlisting,
  - Global Outbound Domain Allowlisting (Chain roles)
  - New/Delete Outbound Domain Allowlisting
  - Approve Outbound Domain Allowlisting

## Prerequisites for Data Management - Manual Guest Profile Purge

### OPERA Cloud Tasks

**Group:** Toolbox

**Tasks:** Data Management

Manual Profile Purge Routine

The Utilities feature provides links for synchronizing data, scheduling background processes, data management, room utilities, and transaction management.

## Data Synchronization

### Prerequisites for Data Synchronization

OPERA Cloud works with large amounts of data gathered and exchanged across multiple database tables. This data can change by the minute, and sometimes data discrepancies are created. The Synchronization utilities let you recalculate key data, such as inventory, block rates, stay records, financial statistics, and more to ensure the latest information is correct in all application areas.

## Synchronizing Business Events

Business Event Synchronization enables you to capture past business event data and upload it to [external systems](#). The following OPERA Cloud modules offer data synchronization: Reservations, Blocks, Profiles, Availability, End of Day Routine, Rates, Profiles History, and Configuration. With the exception of Profiles History, all these are standard modules in Business Event setup. Data synchronization is dependent on the subscription of business events and data elements within each module. For more information, see [Configuring Business Events](#)

To initiate Business Event synchronization:

1. From the **OPERA Toolbox** menu, select **Utilities**, select Synchronization , then select **Business Events**.
2. **Property**: Select a property from the list.
3. **External System**: Select the external system to receive the business events.
4. **Reservations**: Select the check box to synchronize reservation events.
  - a. **Arrival**: All reservations whose arrival date is within the date range will be synchronized.
    - i. **From Date**: Enter or select a date.
    - ii. **To Date** : Enter or select a date.
  - b. **Stay**: All reservations whose stay dates are within the date range will be synchronized.
    - i. **From Date**: Enter or select a date.
    - ii. **To Date** : Enter or select a date.
5. **Blocks**: Select the check box to synchronize blocks events.
  - a. **Begin (Arrival)**: All blocks whose begin date is within the date range will be synchronized.
    - i. **From Date**: Enter or select a date.

- ii. **To Date** : Enter or select a date.
  - b. **Stay**: All blocks whose stay dates are within the date range will be synchronized.
    - i. **From Date**: Enter or select a date.
    - ii. **To Date** : Enter or select a date.
- 6. **Availability**: Select the check box to synchronize Availability
- 7. **Rate**: Select the check box to synchronize rate codes. All rates created within the date range will be synchronized
  - a. **From Date**: Enter or select a date.
  - b. **To Date** : Enter or select a date.
- 8. **Profile**: All profiles created within the date range will be synchronized.
  - a. **From Date**: Enter or select a date.
  - b. **To Date** : Enter or select a date.
- 9. **Profile History**: All profiles with stored reservation history and arrivals dates within the date range will be synchronized.
  - a. **From Date**: Enter or select a date.
  - b. **To Date** : Enter or select a date.
- 10. **Night Audit**: Night audit statistical information within the date range will be synchronized
  - a. **From Date**: Enter or select a date.
  - b. **To Date** : Enter or select a date.
  - c. **Hotel Statistics**: Synchronization will include hotel statistics that are within the date range.
  - d. **Market Statistics**: Synchronization will include market statistics that are within the date range.
  - e. **Revenue Sum**: Synchronization will include revenue sums within the date range.
- 11. **Configuration**
  - a. **Commission Code**: All configured commission codes will be synchronized.
  - b. **Commission Transaction**: All configured commission-able transaction codes will be synchronized.
  - c. **Currency Codes**: All configured currency codes will be synchronized.
  - d. **Currency Exchange Rate**: All configured currency exchange rates will be synchronized.
  - e. **Department**: All configured departments will be synchronized.
  - f. **Inventory Control**: All configured restrictions will be synchronized.
  - g. **Market Code**: All configured market codes will be synchronized.
  - h. **Note Type**: All configured note types will be synchronized.
  - i. **Origin Code**: All configured origin codes will be synchronized.
  - j. **Package Codes**: All configured package codes and package groups will be synchronized.
  - k. **Preference**: All configured preferences will be synchronized.
  - l. **Preference Group**: All configured preference groups will be synchronized.

- m. **Reservation Type:** All configured reservation types will be synchronized.
  - n. **Room Class:** All configured room classes will be synchronized.
  - o. **Room Type:** All configured room types will be synchronized.
  - p. **Source Code:** All configured source codes will be synchronized.
  - q. **Transaction Code:** All configured transaction codes will be synchronized.
  - r. **Users:** All configured users will be synchronized.
  - s. **VIP Level:** All configured VIP levels will be synchronized.
12. Click **Synchronize Business Events**.

## Synchronizing Room Inventory

Synchronize Inventory is used to synchronize the future room availability for a property.

1. From the **Toolbox** menu, select **Utilities**, select **Synchronization** then select **Inventory**.
  - a. **Property:** Select or confirm property
  - b. **From Date:** Enter or select a start date; date must be equal or greater than the current date.
  - c. **To Date:** Enter or select an end date
2. Click **Start**.
  - a. Synchronizing progress is indicated; click **OK** to close
  - b. Click **Status** to display progress.

## Synchronizing Room Status

Synchronize Room Status is used to synchronize the room statuses for a property.

1. From the **Toolbox** menu, select **Utilities**, select **Synchronization** then select **Room Status**.
  - a. **Property.** Select or confirm property
  - b. **Date.** Enter or select a start date
2. Click **Synchronize Room Status**.

## Synchronizing Physical Rooms

Use this utility to recalculate and correct any issues with the inventory room count.

1. From the **Toolbox** menu, select **Utilities**, select **Synchronization** then select **Physical Rooms**.
  - a. **Property.** Select or confirm property
2. Click **Synchronize Physical Rooms**.

## Synchronizing Block Occupancies

Use this utility as directed by Oracle support to ensure that the sum of room nights booked in different occupancy levels on a block corresponds to the total number of room nights that has been booked for the same block.

The utility will also correct any discrepancies in the allotment change logs and update these change logs so that the sum of changes again corresponds to the total number of rooms held on the block at that moment in time.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Block Occupancies**.
  - a. **Property**. Select or confirm property
  - b. **From Date**. Enter or select a start date
  - c. **To Date**. Enter or select an end date
  - d. Record Changes on
    - i. **Date of Last Block Change** - Use the date when the business block was most recently changed (the default).
    - ii. **Current Business Date** - Use today's business date.
2. Click **Synchronize Block Occupancies**.

## Synchronizing Room Pools

### Synchronizing Room Pools

Use the Synchronize Room Pools utility to update the block inventory (room allocation) for Opportunities (Available when the Opportunities OPERA Control is active), Blocks (Available when the Business Block OPERA Control is active), Master and sub blocks (Available when the Master Sub Blocks OPERA Control is active), and Master and sub allocations (Available when the Master Sub Allocations OPERA Control is active), based on the current room type to [room pool mapping](#).

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Room Pools**.
  - a. **Property**. Select or confirm property
2. Click **Synchronize Room Pools**.

## Synchronizing Summary Profile Statistics

The Synchronize Summary Profile Statistics Utility is used to populate tables required for various OPERA Cloud reports.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Summary Profile Statistics**.
  - a. **Property**. Select or confirm property
  - b. **Profile Type**. Select a profile type from the list
  - c. **Name**. Search and select a profile

- d. **From Year / Month.** Enter or select a year and month from the list
    - e. **To Year / Month.** Enter or select a year and month from the list
  2. Click **Synchronize Summary Profile Statistics.**

## Synchronizing Financial Statistics

Use this utility to recalculate and update the financial adjustments for a specified period; this ensures that all adjustments and transactions are included in the financial statistics.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Financial Statistics**.
  - a. **Property.** Select or confirm property
  - b. **From Date.** Enter or select a start date
  - c. **End Date.** Enter or select an end date
2. Click **Synchronize Financial Statistics.**

## Synchronizing Catering Forecast Revenue

### [Prerequisites for Synchronizing Catering Forecast Revenue](#)

Use this utility to update forecast revenues on existing events with the updated forecast numbers that have already been configured for event types. The following are specific rules to be aware of when running this utility:

- The utility will not update Catering Package Events.
  - The utility will not update revenue types with expected revenue unless the **Use Forecast Revenue Only** option is selected on the event details tab.
  - If the new forecast revenue for an event type does not contain forecast figures for a specific revenue type, the forecast figures will be blanked out in any updated event with that revenue type.
  - If the new forecast revenue for an event type contains forecast figures for revenue types that do not exist on the existing events, these forecast elements will be added to the updated event.
  - For existing forecast records, the figures will be updated with the new figures that have been set for the appropriate date range per event type and revenue type.
1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Catering Forecast Revenue**.
    - a. **Property.** Select or confirm property
    - b. **From Date.** Enter or select a start date
    - c. **End Date.** Enter or select an end date
    - d. **Event Type.** Select one or more event types from the list
    - e. **Update Adjusted Forecast Records.** Select to also update forecast records that have been manually adjusted. When not selected, revenue types that have been manually updated will not be updated with this utility.
  2. Click **Synchronize Catering Forecast Revenue.**

## Synchronizing Past Profile / Reservation Statistics

Recalculate Past Daily Statistics includes the following

### Running Recalculate Detailed Statistics

This utility is used when a discrepancy in reported statistics is identified by your property. The utility recalculates daily reservation and profile statistics for a specified date range that are then repopulated in the statistics table

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Past Profile / Reservation Statistics**.
2. Select **Detailed Statistics** tab
  - a. **Property**. Select or confirm property
  - b. **From Date**. Enter or select a start date
  - c. **To Date**. Enter or select an end date

 **Note:**

Date ranges that are entered must not exceed three month period

3. Click **Recalculate Detailed Statistics**.

### Running Recalculate Summary Statistics

Recalculates yearly statistics for the specified year. This utility should be run only if it is requested by Oracle support.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Past Profile / Reservation Statistics**.
2. Select **Detailed Statistics** tab
  - a. **Property**. Select or confirm property
  - b. **Year**. Enter or select a year
3. Click **Recalculate Summary Statistics**

### Running Recalculate Revenue Buckets

The Recalculate Revenue Buckets Utility recalculates revenue bucket amounts based on the transaction codes selected for each revenue bucket within a bucket type.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Past Profile / Reservation Statistics**.
2. Select **Detailed Statistics** tab
  - a. **Property**. Select or confirm property
  - b. **From Date**. Enter or select a start date
  - c. **To Date**. Enter or select an end date

**Note:**

Date ranges that are entered must not exceed three month period

3. Click **Recalculate Revenue Buckets**.

## Synchronizing Block Rates

If the rate pricing schedules have been updated since the block was created and the Rate Guaranteed check box is not selected for the block, then the rate amounts on the block are updated to the new rate amounts.

The Rate Guaranteed check box on the Business Block exempts the block from refreshes implemented by this utility.

1. From the **Toolbox** menu, select **Utilities**, select **Synchronization** then select **Block Rates**.
  - a. **Property**: Select or confirm property
  - b. **From Date**: Enter or select a start date
  - c. **To Date**: Enter or select an end date
  - d. **Rate Code**: Select one or more rate codes from the list
2. Click **Synchronize Block Rates**.

## Synchronizing Item Class Sequence

### [Prerequisites for Synchronizing Item Class Sequence](#)

The Event Item Class Sequence utility allows you to synchronize the event item sequence shown on the Event Resources screen when an item group sequence has been changed for a category of items on the Item Inventory Setup screen.

1. From the Toolbox menu, select **Utilities**, select **Synchronization** then select **Event Item Class Sequence**.
  - a. **Property**. Select or confirm property.
  - b. **Minutes**. Enter number of minutes to disconnect users.
2. Click **Event Item Class Sequence**.

## Synchronizing Package Pricing

The Synchronize Package Prices Utility is used to update the package prices , for the select package code(s), in blocks and reservations based on the arrival date and reservation status selected.

1. From the **Toolbox** menu, select **Utilities**, select **Synchronization** then select **Package Prices**.
  - a. **Property**: Select or confirm property
  - b. **From Arrival Date**: Enter or select an arrival date
  - c. **Reservations**: Select checkbox to update reservations

2. **From Date:** Enter or select a start date.
3. **To Date:** Enter or select a start date.
4. Click **Synchronize Stay Records**.

 **Note:**

If a stay record's departure date is greater than 90 days from the property's business date, the Rate Code, Market Code, Channel Code, and Source Code fields on the stay record will not be validated during synchronization (thus preventing it from being suspended). The stay record revenue amounts will still be inserted, based on the Membership Revenue configuration.

## Data Management

### Prerequisites for Data Management

Data Management provides options for managing and updating OPERA Cloud configuration and related transactional data. Access to each option is controlled by a user task. For more information, see [OPERA Cloud Tasks — Toolbox](#).

## Managing Business Date

### Prerequisites for Managing Business Date .

At times you might want to run end of day (night audits) multiple, consecutive times to roll the business date forward several days. In such cases, you can use the Change Business Date utility to run the multiple, consecutive night audits.

To use this feature, change the proposed date to the future date you want for the property's business date. When the OPERA Multi-Property Cloud Service is active, you can set a different business date for each property. To run the Change Business Date utility, there cannot be financial transactions posted to the property and no night audits executed.

 **Note:**

The **Multiple End of Days** OPERA Control must be active and your user role must have **Manage Business Date** task granted in order to use this feature. The **EOD Email Address** OPERA Control setting should be configured with the email address of an individual to receive the final status report upon completion of the multiple end of day processes.

When reaching the Roll Business Date step, OPERA Cloud requires that all other users be logged out before the End of Day sequence rolls the business date. The utility displays a notification message to all logged in users indicating the amount of time remaining to log out.

Observe the following conditions when using the utility to consecutively run multiple end of day processes:

- All inhouse reservations must be checked out before starting the procedure.

- There cannot be any reservations scheduled to check in between now and the target date.
- There cannot be any blocks with a start date between now and the target date.
- There cannot be any reservations with open folios.
- All prior business days must have a closed status.
- The **End of Day > Auto Continue** OPERA Control should be active.

 **Note:**

When running end of day in multiple mode, the **End of Day > Income Audit** OPERA Control is ignored.

### Changing the Business Date

1. From the Toolbox menu, select **Utilities**, select **Data Management**, and then select **Manage Business Date**.
2. Enter the following details:
  - a. Enter or confirm the **Property** name.
  - b. Select the **Proposed Date**.
3. Click **Process**.
4. When prompted, click **Deactivate** to disable all non-mandatory procedures and reports from running during this process.

## Using the Imbalance Analysis Utility

The Imbalance Analysis utility is available to provide the information required to investigate an out of balance financial report and can be very useful for verification purposes. If an imbalance is found in a report, please contact your local Oracle support office. If the report indicates no imbalances but believe your reports are incorrect, consider regenerating the report. If no imbalance is found, OPERA Cloud displays the message: **<Report Name> is in balance**.

### Running Imbalance Analysis

1. From the **Toolbox** menu, select **Utilities**, select **Data Management**, and then select **Imbalance Analysis**.
2. Enter the following details:
  - a. **Property**: Select a property from the list.
  - b. **Start Date**: Enter the start date to run the imbalance analysis. Date defaults to the business date, but it cannot be equal to or greater than the current business date.
  - c. **End Date**: Enter the end date to run the imbalance (maximum date range to be entered can be 180 days). Date defaults to business date, but it cannot be equal to or greater than the current business date.

 **Note:**

You cannot select dates still open when the Income Audit OPERA Control is active

- d. **Verify Imbalance:** Click link then select an option from the list:
  - i. **Guest Ledger with Trial Balance:** Run to verify and view the imbalance between the Guest Ledger columns in the Financial\_Transactions table and the Trial\_Balance table. A grid is displayed informing the user of the transaction, where the difference in figures is originating from, and the dollar amount it is for.
  - ii. **Package Ledger with Trial Balance:** Run to verify and view the imbalance between the Package Ledger columns in the Financial\_Transactions table and the Trial\_Balance table. A grid is displayed informing the user of the transaction, where the difference in figures is originating from, and the dollar amount it is for.
  - iii. **Deposit Ledger with Trial Balance:** Run to verify and view the imbalance between the Deposit Ledger column in the Financial\_Transactions table and the Trial\_Balance table. A grid is displayed informing the user of the transaction, where the difference in figures is originating from, and the dollar amount it is for.
  - iv. **A/R Ledger with Trial Balance:** Run to verify and view the imbalance between the A/R Ledger columns in the Financial\_Transactions table and the Trial\_Balance table. A grid is displayed informing the user of the transaction, where the difference in figures is originating from, and the dollar amount it is for.
  - v. **Passer By:** Run to verify that all the Passer By totals in the Guest\_Ledger table are equal. If there is an imbalance, the transaction is displayed along with amount difference.
  - vi. **Cashiers:** Run to verify that all of the cashiers transactions are equal. If an imbalance should occur, the transaction is listed along with the difference in the amount.
  - vii. **C/O with Balance:** Run to view all the guests that have a "Checked Out" status and folio closed, but still have a balance with the property. Grid displays the name of the guest, Arrival and Departure dates, Reservation Status, and the remaining balance that is still owed.
  - viii. **Invalid Transactions:** Run to view all the invalid transactions, if any should develop. A list of the transactions that are invalid is displayed, along with the amount that it is wrong.
  - ix. **Effective Package Ledger:** Run to verify the accuracy of packages consumed by guests. A grid displays informing the Reservation and Guest ID, Arrival and Departure dates, Reservation Status, and the dollar amount difference. An **Autofix** button is available to attempt to fix the imbalance automatically.
  - x. **Package Ledger with Guest Ledger:** Checks that the Guest Ledger's wrapper transaction is equal to the amount posted in the Package Ledger for the room portion amount of the package.
  - xi. **Summary of All:** Processes all the options listed.
3. Click **Start**.
4. If an imbalance exists, write down the ledger that is shown as out of balance from running the verification. Next run the imbalance analysis for the verification type for the specific ledger only. This will display the list of dates for which that particular ledger is out of balance and other information regarding the transactions causing the imbalance.

5. Run the **Repopulate Trial Balance** action to repopulate the **Trial Balance** table for a specific date.
  - a. Enter the date.
  - b. Click Repopulate Trial Balance link and click **Start**.
  - c. Wait for the procedure to complete, click **OK** to close.
6. Re-Run the imbalance analysis for the verification type for that particular ledger to see if the trial balance table has resolved the imbalance.
  - a. **Fix nagnostleddetail and deposit\_ledger**: Fixes the Guest Ledger and Guest Ledger Detail reports for the property, by finding where the data was missing in the Reservation Details table and repopulating the information.
  - b. **Repopulate missing Bills into Folio Tax**: Select this option to find the missing bill information and repopulate it into the Folio\_Tax table for a specific date.
  - c. **Fix Invalid AR Posting**: Selecting this option fixes invalid A/R postings/bills in Financial\_Transactions table and repopulates the invoice into the AR\_Invoice\_Header for the property.
  - d. **Fix DBs For Adjusted Invoices**: Selecting this option fixes adjusted invoices in the database.

## Entering Old Balances for AR Accounts

This utility is available to enter AR Account balances from an incumbent accounts receivable solution into OPERA Cloud Accounts Receivable.

Once [AR Accounts](#) have been created you can use this utility to create individual back-dated invoices or enter totals per aging period creating one back-dated invoice per period.

Prior to using this utility please ensure:

1. [AR configuration](#) is complete.
2. An AR Old Balances (sales, non-revenue) [transaction code](#) is configured.
3. All the [AR OPERA Controls](#) have been set; especially the Default Market, Source and Room Class settings and Old Balance Transaction Code setting.

Your assigned role(s) must be granted the AR Enter Old Balances task to access this utility.

### Entering AR Accounts Old Balances

1. From the side menu, select **Toolbox**, select **Data Management** then select **AR Enter Old Balances**.
2. Select the property and enter other search criteria and click **Search**.
3. In the search result, click the Account Name of the AR Account you wish to enter balances for.
4. In the Enter Old Balance panel select either tab:
  - a. **Single Folio Balances** to enter details of individual invoices; complete the following:
    - i. **Guest Name**: Select a profile from list to create an invoice in a specific profile name. Default with the profile for the AR Account.
    - ii. **Date**: Select the original invoice date; this will ensure the correct aging is calculated in OPERA Cloud.

- iii. **Supplement:** Enter any supplemental information for this invoice.
  - iv. **Reference:** Enter any reference number for this invoice
  - v. Click **Save**.
  - vi. On the Invoice Details panel complete the following:
    - **Folio No:** Enter the invoice number for which you are entering an old balance.
    - **Original Amount:** Enter the total amount on the old invoice. This amount is tax inclusive. You may specify the individual tax amounts in the Tax 1-20 set of fields.
    - **Tax 1-20:** Enter the tax bucket number.
    - **Trx Code:** Select a tax transaction codes for the selected tax bucket number.
      - Click **Add** to post additional taxes for the invoice.
    - **Paid Amount:** Enter the amount paid against the original amount of this invoice (partial payment).
    - **Currency:** Click to select a currency from the list for the invoice amount. The default is your property local currency.
    - **Foreign Amount:** View-only field showing the amount displayed in foreign currency.
    - **Total:** View-only field showing the outstanding total balance on this folio, if any.
  - vii. Click **Post**.
- b. **Sums Per Aging Period** to enter balances per aging period; complete the following:
    - i. **Guest Name:** Select a profile from list to create an invoice in a specific profile name. Default with the profile for the AR Account.
    - ii. **Aging Periods:** Enter a total in each of the aging levels. OPERA Cloud will create back-dated invoices for the balances entered with an invoice date that falls in the middle of the period covered by the aging bucket. For example, if the business date is 06/29/04 and 150 is entered into the first aging bucket, which is 0 to 10 Days, an invoice dated 06/25/04 is generated for the 150 amount. 06/25/04 is the date for day 5, the mid-point, in the 11-day period between 06/29/04 (day 0) and 06/19/04 (day 10).
    - iii. **Date of Oldest Item:** Required if an amount is entered in the oldest aging bucket. Enter a date that will serve as the end point for the period covered by the oldest bucket; this will allow OPERA Cloud to compute a mid-point when assigning a date to the invoice for this balance. The default date is the minimum date if the balance is to fall within this aging bucket.
  - c. Click **Save**.
5. Repeat process for the next AR Account.

 **Note:**

Once complete you can generate the [OPERA Cloud AR Aging report\(s\)](#) to reconcile the AR Account balances with those in the incumbent AR system. See [Generating Reports](#).

## Business Block Compare

The Business Block Compare utility compares the number of rooms allotted and room allotment revenue figures shown on the business block room grid with the same information computed from the total activity recorded in the change log. Business blocks for which a mismatch exists are displayed in the Business Block Compare Utility grid. In the event of a discrepancy, you can use this utility to correct the change log so that the values on the business block room grid and change log match.

 **Note:**

This utility will correct all the discrepancies for the specified property.

1. From the Toolbox menu, select **Utilities**, select **Data Management** then select **Business Block Compare**.
  - a. **Property:** Enter or select a property.
  - b. **Block Name:** Search and select a block.
  - c. **Block Status:** Select one or more block statuses.
  - d. **From Date:** Enter a Start date of business block.
  - e. **To Date:** Enter an End date of business block.
2. Click **Search**.
3. Review list of blocks.
4. Click **Correct**.

## Changing Function Space

### [Prerequisites for Change Function Space](#)

Use this utility to change the code associated with a function space and update all relevant events.

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Change Function Space Code**.
  - a. **Property:** Enter or select a property.
  - b. **Code:** Select a function space from the list.
  - c. **New Code:** Enter a new code for the function space
2. Click **Change Function Space Code**.

## Purging Guest Profiles

### [Prerequisites for Data Management - Manual Guest Profile Purge](#)

In addition to the auto profile purge process and [profile purge OPERA Controls settings](#) a profile purge utility is available to initiate a purge of unwanted guest profiles. Using a variety of search criteria you can identify profiles that are no longer active or no longer needed. The

Manual Profile Purge Routine can purge a profile that meets all purge criteria even if the **Keep History** check box is selected on the profile. Profile purge activity is recorded in the [Changes Log](#) under **Profile** activity group and **Purge Profile** activity type.

The following search criteria is available:

1. **Name:** Enter the full or part of the last name of the profile.
2. **First:** Enter the full or partial first name for the profile.
3. **Country:** Enter or select a country code to limit purge to profiles with primary address matching the country code.
4. **State:** Enter or select a state code to limit purge to profiles with primary address matching the state code.
5. **Birth Date:** Enter a date to limit purge to profiles with the specific birth date.
6. **Stays Fewer or Equal to:** Enter the minimum number of stays a profile must have to be retained; profiles with this or a fewer number of stays will be considered as candidates for purging.
7. **Last Stay Earlier than:** Select a cutoff date in order to search for profiles based on the recentness of their stay activity. Profiles that do not have any stay dates more recent than this date are considered as candidates for purging. By default, the date displayed is the current business date minus one day.
8. **VIP Code:** Select VIP Codes from the list to purge profiles with the specified VIP Code.
9. **Exclude Restricted:** Select to exclude all profiles marked a restricted.
10. **A/R No:** Select check box to only list profiles with an AR Account.
11. **Exclude Incomplete:** Select check box to exclude profiles without street or city address details.

The following validation checks are performed:

- Profile is Guest type.
- Profile has not been updated within 1 day of when the Manual Profile Purge is going to be run.
- Profile does not have AR Accounts with open invoices. AR invoices with a zero balance are regarded as open until purged based on the **Zero Invoice Purge Days** OPERA Control.
- Profile has no relationships to other profiles. For more information, see [Managing Profile Relationships](#).
- Profile has no active reservations with an outstanding balance or open folio status.
- Profile has no future reservations.
- Profile has no commission-able reservations payable.
- Profile has an Inactive Date (marked inactive).
- Profile does not have membership details for a membership type setup with the **Exclude Profile From Purge** check box selected. For more information, see [Configuring Membership Type Membership Handling](#).

### Impact on External Systems

When executing this utility a PURGE PROFILE business event is triggered to notify integrated solutions of the profile deletion, which will result in one of the following outcomes:

- Profile is also deleted in the integrated solution if the business logic in the solution allow it (e.g., no reservations, etc.).
- If a deletion is not allowed by the integrated solution, the subscription with the integrated solution is removed. For more information, see [Managing Profile Subscription](#).

For more information, see [Configuring External Systems](#).

### Running Guest Profile Purge

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Manual Profile Purge Routine**.
2. Enter search criteria, then click **Search**.
3. Click **Search**.
4. Select a profile in the search result, then click **Purge**.

## Re-provisioning (Refresh) Property

The Refresh Property utility is enabled in non-production environments and provides options to re-provision a property using an imported configuration shell (from a production environment on the same version) or a default seeded configuration. Once re-provisioned, the original Property Details/Property Controls and active subscriptions are restored. For more information, see [Configuring Properties](#).

### Note:

You cannot refresh property if the business date of imported property is within the last three days (from the current date). No transactional data is retained when refreshing a property.

### Note:

When you choose the Utilize Configured Shell option, the GSHELL list value will be available after every release on the Refresh Property screen. But is not intended for use.

### Re-provision Property

1. From the **Toolbox** menu, select **Utilities**, select **Data Management**, and then select **Refresh Property**.
2. Enter or select a property configuration:
3. Configuration:
  - a. **Use the configured shell:** Select an imported property shell from the list. See [Importing Property Configuration Shells](#).
  - b. **Use the Standard OPERA Cloud Configuration.** Select to use default seeded configuration.
4. Click **Refresh Property**.

### View Property Refresh History

Log data is purged after 30 days.

1. From the **Toolbox** menu, select **Utilities**, select **Data Management**, and then select **Refresh Property**.
2. Click **View Refresh History**.
  - a. Enter search criteria , then click **Search**.
  - b. To view log files, select an entry, click the vertical ellipsis **Actions** menu, and select **Download Error File**.

## Updating External Reference

The External Reference Update utility is used to maintain the external reference number of the reservation when changing external systems interfaced through OXI.

This utility might be used, for example, when the integrated central reservation system is switching to another solution provided by the same company/partner.

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **External Reference Update**.
  - a. **Property**: Enter or select a property.
  - b. **From External System.**: Select an external system from the list.
  - c. **To External System**: Select an external system from the list.
2. Click **Update External References**.

## Updating Membership Types

### Running Update Membership Type

Update Memberships utility can be used whenever it is necessary to replace one membership type with another membership type. When changing membership types you may also select the specific membership level you wish to change, as well as specifying the membership level to be assigned to members of the new membership type.

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Update Membership Type**.
2. Select **Update** tab.
  - a. **From Membership**: Select a membership type from the list.
  - b. **From Membership Level**: Select a membership level from the list.
  - c. **To Membership**: Select a membership type from the list.
  - d. **To Membership Level**: Select a membership level from the list.
3. Click **Update Membership Type**.

### Running Delete Membership Type

Delete Membership Type utility enables you to delete selected membership type from OPERA Cloud. The process completely deletes the membership type and all its dependent records

This process requires a lock on many records and it is required that all users are logged off during the process.

1. From the Toolbox menu, select **Utilities**, select **Data Management** then select **Update Membership Type**.
2. Select **Delete** tab.
  - a. **Membership Type**: Select a membership type from the list.
3. Click **Delete Membership Type**.

## Updating Owner

### Prerequisites for Update Owner

The Change Owners utility enables you to change the owner code from one or more selected owners to a new owner on Sales accounts, Contacts, Activities and Blocks

This utility is useful when sales staff leave your organization and new personnel commence, or when Sales responsibilities for a territory etc needs to be reallocated.

#### Note:

As this process requires a lock on many records ensure that users are logged off during the update process

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Update Owners**.
2. Enter the following details:
  - a. **Property**. Select one or more properties from the list
  - b. **Change From Owner(s)**: Select the sales manager / owner(s) from whom you wish to unassign ownership of accounts, contacts, activities, and blocks.
  - c. **Change to Owner**: Select the sales manager /owner to whom the accounts, contacts, activities, blocks are to be reassigned
  - d. **Make Primary For All**: Select to make the Owner primary on all entity types (make Primary checkbox selected and disabled in each section).
  - e. Apply Changes To:
    - i. **Sales Accounts**: Select to update Company, Agent, Source profiles.
      - **Make Primary**: Select to make the Owner primary.
      - Selection Criteria (Filter)
      - **Territory**: Select territories from the list.
      - **Business Segment**: Select business segments from the list.
      - **Country**: Select countries from the list.
      - **State**: Select states from the list.
      - **Industry Code**: Select industry codes from the list.
      - **Type**: Select account types from the list.
      - Postal Code:

- **Use Free Format:** Manually enter postal codes in To/From.
  - **Use Configured Codes:** Select values from lists. The available postal codes depends on your choice of countries and states.
  - **From/To:** Enter the range of postal codes you want to use to filter accounts. Enter only a From code to filter on an individual postal code. Down arrows allow you to select codes if the Use Configured Codes check box is selected.
- ii. **Contacts:** Select to update contacts.
- **Make Primary:** Select to make the Owner primary.
  - Selection Criteria (Filter)
  - **Territory:** Select territories from the list.
  - **Business Segment:** Select business segments from the list.
  - **Country:** Select countries from the list.
  - **State:** Select states from the list.
  - Postal Code:
    - **Use Free Format:** Manually enter postal codes in To/From.
    - **Use Configured Codes:** Select values from lists. The available postal codes depends on your choice of countries and states.
    - **From/To:** Enter the range of postal codes you want to use to filter accounts. Enter only a From code to filter on an individual postal code. Down arrows allow you to select codes if the Use Configured Codes check box is selected.
- iii. **Activities:** Select to update **Activities**.
- **Make Primary:** Select to make the Owner primary.
  - **From Date:** Enter a start date.
  - **To Date:** Enter an end date.
- iv. **Blocks:** Select to update Blocks.
- Selection Criteria (Filter)
  - **From Date:** Enter a block start date.
  - **To Date:** Enter a block end date.
  - **Type:** Select block types from the list.
  - **Market Segment:** Select market segments from the list.
  - **Exempt Status:** Select the block statuses that will be exempt from owner updates on business blocks.
  - **Overall Owner:** Select to update overall owner.
    - **Make Primary:** Select to make the Owner primary.
  - **Rooms Owner:** Select to update rooms owner.
    - **Make Primary:** Select to make the Owner primary.
  - **Catering Owner:** Select to update Catering owner.
    - **Make Primary:** Select to make the Owner primary.

3. Click **Review**.

4. Click **Update Owners**.

## Catering Event Function Space Monitor

The Catering Event Function Space Monitor utility allows you to ensure that all booked events have function space inventory records. This is especially useful in making sure that a function space has been properly booked for the event, thereby avoiding an overbooked situation.

The events shown in the grid are those for which there is a potential problem - inventory is not being held for the event, even though the function space listed in the Room column was attached to the event. (If the function space is properly booked for the event and inventory is being held, the event will not appear on this screen.)

For the events listed in the grid, you should access the event and attach or reattach the function space, then return to this utility to ensure that the inventory is recorded (that is, that the event no longer is listed).

If there is still a problem, delete and re-create the event.

### Running the Catering Event Function Space Monitor Utility

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Catering Event Function Space Monitor**.
2. Enter search criteria and click **Search**.

## Updating Block and Catering Event Status Codes

### Prerequisites for Block/Catering Status Code Updates

For block and catering statuses, you can rename a status code (for example, rename PEN to INQ).

For catering status, you can also change a status code from Deduct to Non-Deduct, or from Non-Deduct to Deduct.

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Status Code Update**.
  - a. **Status**: Select a status from the list.
  - b. **New Status Code**: Enter a new status code.
    - i. **Change Catering Type to Non Deduct Inventory**: Select the update the catering type for the status code.
  - c. **Disconnect Minutes**: Enter the number of minutes to disconnect users.
2. Click **Update Status Code**.

## Changing Revenue Type

### Prerequisites for Changing Revenue Types

The Change Revenue Types Utility can be used to update an event revenue type to another event revenue type. For example, if you create a new revenue type, **BEV** this utility will convert the existing **WINE** revenue type (which may be associated with events, menus, menu items, resource items, revenue type cross references, etc.), to the BEV revenue type.

 **Note:**

The Change Revenue Types Utility can be run while users are accessing OPERA Cloud. However, if you are actively working on a record that would be impacted by the change utility, a message warns that a lock has occurred, which prevents the utility from continuing.

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Change Revenue Type**.
  - a. **Property:** Select or confirm the property.
  - b. **From Revenue Type:** Select a revenue type from the list; inactive revenue types are included in this list.
  - c. **To Revenue Type:** Select a revenue type from the list.
2. Click **Review** to review the implied changes.
3. Click **Change Revenue Type** .

## Updating Contacts

### Prerequisites for Updating Contact

The Update Contact Utility can be used to replace the contact associated with future activities, business blocks, and/or reservations

1. From the **Toolbox** menu, select **Utilities**, select **Data Management** then select **Update Contact**.
  - a. **Property:** Select or confirm the property.
  - b. **Change From Contact:** Click to open the Contact search, select a contact to update.
  - c. **Change To Contact:** Click to open Contact search, select the contact you want to replace with.
  - d. **Update Options:** Select the check boxes that correspond to the entities to update the contact.
    - **Activities:** All future activities.
    - **Blocks:**All future business blocks.
    - **Reservations:** All future reservations (Available when the Reservation Contacts OPERA Control is active).
  - e. **Make Primary for All:** Select this check box to make the new contact the primary contact for updated business blocks and activities.
2. Click **Update Contacts**.

## Room Utilities

The Room Utilities enables you to change room numbers, room types, and room class. The utility will update your changes in other functional areas impacted by your changes.

## Changing Rooms

The Change Room Number utility enables you to change system-generated rooms (required for Oracle Hospitality OPERA Room Reservations Cloud Service) to valid PMS rooms.

1. From the **Toolbox** menu, select **Utilities** select **Room Utilities**, and then select **Change Room Number**.
2. Search for your property and click **Change Room Number**.

## Changing Room Type of a Room

Use this utility to change the room type for a specific room. You cannot change the room type of a room that is configured as a Component Room room type.

### Note:

No-show reservations will not be updated.

### Changing Room Type of a Room

1. From the **Toolbox** menu, select **Utilities** and then select **Change Room Type**.
2. **Property:** Enter or select the property.
3. **Room:** Enter the room to update.
4. **Room Type:** Enter or select the new room type.
5. Click **Change Room Type**.

## Changing Room Type to Another Room Type

The Change Room Type to Another Room Type utility allows specified room type(s) for a property to be changed to another room type on rooms, blocks and reservations. Running this utility updates the room type on in-house and future reservations and blocks with an arrival date equal or greater than the current business date. In addition, this routine updates the associated room configuration to the newly defined room type and will also update the new room types with the appropriate room class. Rate code pricing schedule must be manually updated to add pricing for the new room type and to delete the pricing for the original room type.

### Note:

The original room types will remain available until you manually delete them.

For example, assume you change room type APT to A1 using the Change Room Type to Another Room Type utility. The following situations would occur:

- Rooms previously configured with room type APT are now configured with room type A1.
  - The physical room count for room type APT updated to zero.
- Reservations for room type APT will be assigned to room type A1 on the reservation stay details panel (provided the reservation is in-house or the reservation arrival date is the current business date or a future date).
- Block allocations that held the room type APT will now display the room type A1 (provided the block is in-house or the arrival date is the current business date or a future date).
- Block grid allocations will still display the room type APT however, the target room type A1 will be visible in the block grid and display the inventory that was previously associated with room type APT1.
- Look to Book sales screen will display both room type APT and room type A1 assuming the active dates for both room types are prior to the current business date. The Physical Inventory associated with the room type APT will shift and be accounted for in the room type A1 column.
- Rate Code Pricing schedules retain the pricing for the original APT room type.

## Changing Room Type to Another Room Type

Use the following steps to update rooms configuration, blocks, and reservations with a new room type.

1. From the **Toolbox** menu, select **Utilities**, select **Room Utilities** and then select **Change Room Type to Another Room Type**.
2. **Property**: Select a property from the list.
3. Click **New** and complete the following details in the Instructions panel.
  - a. **Source Room Types**: Select the Source Room Type(s) from the list
  - b. **Target Room Type**: Select the new room type code from the list
4. Click **Review** to see the expected results of your room type changes.
5. Click **Change Room Type**.

## Changing Room Class

Room classes typically define groups of room types having some characteristic in common. The Change Room Class utility enables you to associate one or more room types to a room class for a property. You can also use the utility to associate all room types to the internal "ALL" room class, allowing you to deactivate the Room Class OPERA Control is not required. To associate Room Types to a different Room Class:

1. From the **Toolbox** menu, select **Utilities**.
2. Select the Change Room Class radio button.
  - a. **Property**: Select a Property from the list.
  - b. **Room Class**: Select a Room Class from the list.
  - c. **Room Types**: Select one or more Room Types from the list.
  - d. Click **Change Room Class**.

To associate Room Types to the Default (ALL) Room Class.

1. From the **Toolbox** menu, select **Utilities**.
2. Select the Default Room Class radio button.
  - a. **Property**: Select a Property from the list
  - b. Click **Change Room Class**.
  - c. Deactivate the Room Class OPERA Control. For more information, see [OPERA Controls — Inventory Management](#).

## Transaction Management

Transaction Management utilities provides control over transaction codes. You can assign new transaction codes to existing transaction codes, move transaction codes to new subgroups, and update transaction code ownership from property ownership to central ownership and vice versa. In a multi-property environment, you can generate template records based on property transaction code records.

### Changing Transaction Codes

The Change Code Utility enables you to assign a new transaction code number to an existing transaction code.

This process may require significant time to run depending on the volume of financial data to be updated.

1. From the **Toolbox** menu, select **Utilities**, select **Transaction Management** and then select **Change Code**.
2. **Property**: Enter or select the property.
3. Click **New**.
  - a. **Transaction Code**: Select a transaction code the from list
  - b. **New Transaction Code**: Enter a new (non-existing) transaction code.
4. Click **New** to add another row.
5. Click **Delete** to remove a row.
  - a. Click **Delete** to confirm
6. When ready to process, click **Change Code**.
7. Update progress is indicated; click **OK** to close.
8. Click **Status** to display progress.

### Changing Subgroup

The Change Subgroup utility allows you to modify the Subgroup selected on one or more transaction code(s).

1. From the **Toolbox** menu, select **Utilities**, select **Transaction Management** and then select **Change Subgroup**.

2. **Property:** Enter or select the property.
3. Click **New**.
  - a. **Transaction Code:** Select a transaction code the from list
  - b. **New Subgroup:** Select a subgroup for the transaction code.
4. Click **New** to add another row.
5. Click **Delete** to remove a row.
  - a. Click **Delete** to confirm
6. When ready to process, click **Change Subgroup**.
7. Update progress is indicated; click **OK** to close.
8. Click **Status** to display progress.

## Copying Transaction Groups to Template

The Group to Template utility allows you to copy Transaction Groups from a property to the template in multi-property operations.

1. From the **Toolbox** menu, select **Utilities**, select **Transaction Management** and then select **Group Template**.
2. From the **Vertical Ellipsis**, click **Copy to Template**.
3. **Source Property:** Enter or select the source property.
4. **Transaction Groups:** Select one or more transaction groups from the list.
5. Click **Save**.
6. Review and click **Copy and Continue**.
7. Confirmation panel will display result of the copy; click **Print** to generate a report in new window.

## Copying Transaction Subgroups to Template

The Subgroup (to) Template utility allows you to copy Transaction Subgroups from a property to the template in multi-property operations.

1. From the **Toolbox** menu, select **Utilities**, select **Transaction Management** and then select **Subgroup Template**.
2. From the **Vertical Ellipsis**, click **Copy to Template**.
3. **Source Property:** Enter or select the source property.
4. **Transaction Subgroups:** Select one or more transaction groups from the list.
5. Click **Save**.
6. Review and click **Copy and Continue**.
7. Confirmation panel will display result of the copy; click **Print** to generate a report in new window.

## Copying Transaction Codes to Template

The Transaction Code (to) Template utility allows you to copy Transaction Codes from a property to the template in multi-property operations.

1. From the **Toolbox** menu, select **Utilities**, select **Transaction Management** and then select **Transaction Code Template**.
2. From the **Vertical Ellipsis**, click **Copy to Template**.
3. **Source Property**: Enter or select the source property.
4. **Transaction Subgroups**: Select one or more transaction codes from the list.
5. Click **Save**.
6. Review and click **Copy and Continue**.
7. Confirmation panel will display result of the copy; click **Print** to generate a report in new window.

## Document Number Update

### [Prerequisites for Document Number Update](#)

Document Number update provides options to update the sequences used for Folio Numbers and AR Invoice Numbers.

## Updating AR Invoice Number Sequence

Use this option to update the start/next value for each [folio type](#) in use at your property.

If no folio types are configured you will see 'Default' folio type listed.

### Note:

This activity is not tracked in the Changes Log.

### Updating a Folio Sequence

1. From the **Toolbox** menu, select **Utilities**, select **Document Number Update** then select **Folio Numbers**.
2. Enter search criteria, then click **Search**.
3. In this results panel, each folio type is listed displaying the current start/next value
  - a. Enter a start/next value for a folio type in **New Folio Start Sequence** field.

 **Note:**

The number entered will increment by 1 when generating the first folio. For example, entering 100 as start value will result in folio number 101 as the initial value. No update will occur if you leave the field blank for a folio type listed.

4. Click **Save**.

## Updating Folio Number Sequences

You can set the start number for a folio sequence for any Folio Type or general default folio when Folio Types are not used. The following conditions apply when creating a new Folio Start Sequence:

- The number you enter in the New Folio Start Sequence field increments by one when the folio is generated.
- The Folio Sequence is property specific.
- An error message appears when a duplicate number is attempted.

### Creating a New Start Sequence

1. From the **Toolbox** menu, select **Utilities**, select **Document Number Update**, and select **Folio Numbers**.

 **Note:**

Select the **Show Internal** checkbox to include the Internal Folio Type in the search results.

2. Enter the **Property** name and click **Search**.
  - a. If no Folio Types exist, an option for the property's default folio appears allowing you enter a new Folio Start Sequence value.
  - b. If Folio Types are configured for the property, all Folio Types appear. Each Folio Type displays the current Folio Start Sequence and provides the New Folio Start Sequence field for manually updating the sequence.
3. Locate the **Folio Type** you want to update and enter a new **start** value in the **New Folio Start Sequence** field.
4. Click **Save**.

 **Note:**

The number you enter increments by one when the folio is generated. For example, entering 100 as the start value results in a folio number of 101 as the initial value. No update occurs if you leave the New Folio Start Sequence field blank for a folio type listed.

## Updating Sequence Numbers

Sequence numbers are an ordered list of numbers assigned to various records. Use the Update Sequence Number options to modify the next value in the selected sequence.

**Note:**

Updates to sequence numbers are tracked in the [changes log](#) in the Configuration group.

### Updating Supporting Documents Sequence

Use this option to update the start/next value for supporting documents when the Supporting Documents OPERA Control is active.

1. From the **Toolbox** menu, select **Utilities**, select **Document Number Update** then select **Sequence Numbers**.
2. Enter search criteria, then click **Search**.
3. In the search results panel.
  - a. Select the sequence type, then enter a start/next value in the **New Start Sequence** field.
  - b. Click **Save**.

### Updating Tax Registration Number Sequence

Use this option to update the Tax Registration Number when the Generate Tax Registration Number OPERA Control is active.

A Tax Registration number is assigned to in house reservations during End of Day by the `eod_misc.assign_tax_reg_no` procedure.

1. From the **Toolbox** menu, select **Utilities**, select **Document Number Update** then select **Sequence Numbers**.
2. Enter search criteria, then click **Search**.
3. In the search results panel:
  - a. Select the **Tax Registration Number** sequence type.
  - b. Enter a start/next value in the **New Start Sequence** field.
  - c. Click **Save**.

# 24

## System Setup

### Prerequisites for System Setup

The System Setup menu provides options for configuring connections to external systems and importing data to OPERA Cloud.

## Exporting Property Configuration Shells

You can export the property configuration from a production environment and import it to a non-production environment to refresh (re-provision) the property. Exporting property configuration activity is tracked in the [Changes Log](#).

### Note:

When you choose the **Utilize Configured Shell** option, the `G_SHELL` list value will be available after every release on the Refresh Property screen. But is not intended for use.

### Note:

Configured code description translations in the source shell file are copied during the Import Shell process.

### Exporting Property Configuration

1. From the **Toolbox** menu, select **System Setup** and then select **Export Shell**.
2. **Property:** Enter or select a property.
3. **Export Shell Name:** Enter a filename.
4. **Export Shell:**
  - a. Select **Generate and Download**.
5. **Click Export Shell:** A progress bar displays the export progress.

### Downloading Property Configuration Export

1. From the **Toolbox** menu, select **System Setup** and then select **Export Shell**.
2. **Property:** Enter or select a property.
3. **Export Shell Name:** Enter a filename.
4. **Export Shell:**
  - a. Select **Download Existing**.
5. **Shell Name:** Select a shell file from the list.

6. Click **Download Shell** to download file to default download folder.

## Importing Property Configuration Shells

The Import (Property) Shell option is enabled in non-production environments and used to import a configuration shell from a production environment of the same version. Once the configuration shell is imported, use the [Refresh Property](#) utility to re-provision the property.

**Note:**

The import process runs for several hours, depending on the size of the export.

### Importing Property Configuration

1. From the **Toolbox** menu, select **System Setup** then select **Import Shell**.

- a. **Shell Name.** Enter a value to name the import. This identifier will appear in [Refresh Property](#).
  - b. **Choose File.** Click to browse your local file system and select \*.osh file to upload and import.
2. Click **Import Shell**.

## Configuring Outbound Systems

### Prerequisites for Configuring Outbound Systems

#### Overview

Use Outbound System configuration to establish integrations where web service calls are initiated from OPERA Cloud. For example, for an integrated CRM solution that follows the OPERA Cloud REST specification, you can define an Outbound Code with Outbound Type = CRM and configure the CRM system end point URL and authentication credentials. Then, from the respective area(s) of OPERA Cloud, you can make synchronous (GET/POST) calls from OPERA Cloud to/from the CRM system using REST web-services.

You can create an Outbound System at the Global (Chain) or Property level for the available **Outbound Type(s)**. For each outbound system, you can setup custom [headers](#) to include in the API messages. You can also setup data transformation between OPERA Cloud and the external system, see [Data Value Mappings](#)

Once outbound configuration is complete:

Add the Outbound System **Service Path** URL in Outbound Domain Allowlist configuration, for HTTPS Protocol. See [Configuring Outbound Domain Allow Listings](#).

When the Outbound Domain Allowlist entry is **Ready** status, perform a test connection; if successful the outbound integration is ready.

You can monitor Request and Response messages using [Outbound Monitoring](#).

#### Adding Outbound Systems Configuration

1. From the **Toolbox** menu, select **System Setup**, select **Outbound**, and then select **Outbound System Configuration**.
2. Click **New** and complete the following:
  - a. **Context:** Select a value from the list.
    - i. Select **Global** when you want to define chain-level outbound system configurations that can be used by all properties in the chain.
    - ii. Select **Property** when you want to define property-level outbound system configurations that can be used by the property
  - b. **Outbound Type:** Select an Outbound Type for which you want to create a configuration.
  - c. **Outbound Code:** Enter the unique Outbound Code you want to create, such as SGAP1, CRMC1, CRMP1, and so on.

 **Note:**

The Outbound Code is unique in the given OPERA Cloud multi-tenant instance.

- d. **Outbound Description:** Enter Summary Description of the Outbound System being configured.
- e. **Protocol:** Gets defaulted with the supported protocol REST or XML for the selected Outbound Type for user information.
- f. **Enable External System:** Select this option to create an External System Code and External Database Code in OPERA Cloud, the same as the Outbound Code.
- g. **Enable Conversions:** This option is enabled when you select the above option. Select this option to define [Data Value Mappings](#) for the specific conversion groups.
- h. **Default Property:** This is visible when Context is Global. Select a default property from the list to use it for DVM Conversions.
- i. **External Property:** This field is visible when the above option is selected for defining a Property conversion code.
- j. **Authorization Type:** Select a value from the list.
  - i. **BASIC:** when an external system provides only basic authentication details, such as user account user name and service account password key details.
  - ii. **OAuth :** when an external system provides open authorization details, such as OAuth Token URL, service account and key, and clientid and secret credential details.
  - iii. **TOKEN:** when the vendor system provides only token based authorization. A token key up to 256 characters is allowed.
  - iv. **NONE:** when there is no authorization required. This is applicable only for CRM\_LEGACY outbound type configurations.
- k. **Grant Type:** Select a value from the list:
  - i. **Password:** when an external system provides you with Service Account and Key and Client ID and Key details.
  - ii. **Client Credentials:** when an external system provides you only the Client ID and Key details.
- l. **Scope:** Enter the Scope URL provided by the external system.
- m. **Application Key:** Enter the Application Key provided by the external system.
- n. **Bypass Proxy:** Select the check box when you configure the endpoint URL provided by Oracle Cloud within the same region. Do not enable if the URL is from a cross region or non-Oracle Cloud.
- o. **Service Details:** Enter details.
  - i. **Service Name:** Defaulted value RESTAPIBaseURL.
  - ii. **Service Path:** Enter the external system's REST APIs base URL. The path should not include any relative paths, query parameters, or path parameters.
    - i. For example, you need to set the Base URL only, which is `https://mycrmsystem.com`.

- ii. In this case, for Profile Lookup, the target URL generates as: `https://mycrmsystem.com/crm/v1/externalSystems/{systemCode}/chains/{chainCode}/externalProfiles`.

3. Click **Save**.

### Testing Outbound System Connectivity

1. From the **Toolbox** menu, select **System Setup**, select **Outbound**, and then select **Outbound System Configuration**.
2. Enter search criteria and click **Search**.
3. Select the **Outbound System** in search results, click the vertical ellipsis **Actions**, and select **Test**.
4. Click **OK**.
5. Test Connection Result Messages:
  - a. When the configured Base URL service path is valid, it shows an information message, "Test Connection Successful."
  - b. When the configured Base URL Service path is not secured, it shows an error, "Test Connection Failed - Processing Exception occurred."
  - c. When the configured Base URL Service path is not available, it shows an error, "Test Connection Failed with response status: 502-Bad Gateway."
  - d. When the configured Base URL service path is invalid, it shows an error, "Test Connection Failed - SSLHandshake Error. Please contact Oracle Support."
  - e. When Test connection is performed for GAMING\_SGACSC, GAMING\_SGCMP, it shows an error, "Test connection cannot be done for this configuration."
  - f. When Test connection is performed without adding the Service Path to the proxy allow-list, it shows an error, "Test connection not allowed through proxy. Please contact administrator."

#### **Note:**

Test connection validates **Service Path** URL only when configured and added to the [Outbound Domain Allowlist](#).

### Editing Outbound System

1. From the **Toolbox** menu, select **System Setup**, select **Outbound**, and then select **Outbound System Configuration**.
2. Enter search criteria and click **Search**.
3. Select the **Outbound System** in search results, click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update the details.
5. Click **Save**.

### Deleting Outbound System

1. From the **Toolbox** menu, select **System Setup**, select **Outbound**, and then select **Outbound System Configuration**.

2. Enter search criteria and click **Search**.
3. Select the **Outbound System** in search results, click the vertical ellipsis **Actions** menu, and select **Delete**.
4. Click **Delete** to confirm.

## Data Value Mappings

Data Value Mappings (DMV) configuration is available to setup code conversions (data transformation) for OPERA Cloud and Outbound System values. The **Data Value Mapping** action link is visible when the **Enable Conversions** check box is selected in [Outbound System configuration](#).

### Adding Data Value Mappings

1. From the **Toolbox** menu, select **System Setup**, and then select **Outbound System Configuration**.
2. Enter search criteria, then click **Search**.
3. Select the outbound system in the search result, then click **I Want To . . .** and select **Data Value Mapping**.
  - a. Select a group from the left panel; the right panel loads with predefined codes if available.
  - b. Click **New**.
    - i. **OPERA Cloud Code**: Select a code from the list.
    - ii. **External Code**: Enter the external system code.
    - iii. **External > OPERA Cloud**: Select check box to transform data received from external system.
    - iv. **OPERA Cloud > External**: Select check box to transform data sent to external system.
  - v. Click **Save**.

### Editing Data Value Mappings

1. From the **Toolbox** menu, select **System Setup**, and then select **Outbound System Configuration**.
2. Enter search criteria, then click **Search**.
3. Select the outbound system in the search result, then click **I Want To . . .** and select **Data Value Mapping**.
  - a. Select a group from the left panel.
  - b. Select the code mapping record, then click **Edit**.
  - c. Update the configuration.
  - d. Click **Save**.

### Deleting Data Value Mappings

1. From the **Toolbox** menu, select **System Setup**, and then select **Outbound System Configuration**.
2. Enter search criteria, then click **Search**.

3. Select the outbound system in the search result, then click **I Want To . . .** and select **Data Value Mapping**.
  - a. Select a group from the left panel.
  - b. Select the code mapping record, then click **Delete**.
  - c. Click **Delete** to confirm.

## Custom Headers

Use Custom Headers configuration to define additional custom header names and values for an Outbound System. You can define a maximum of five custom header names and values that are to be included in the API calls to the external system.

### Editing Custom Headers

1. From the **Toolbox** menu, select **System Setup**, and then select **Outbound System Configuration**.
2. Enter search criteria, then click **Search**.
3. Select the outbound system in the search result, then click **I Want To . . .** and select **Data Value Mapping**.
  - a. **Header Name**: Enter a header name.
  - b. **Header Value**: Enter a header value.
  - c. Click **Save**.

## Outbound System Types and Respective Configurations

You can create an Outbound Code at the Global (Chain) level or Property level with the available Outbound Types as explained below.

### CRM Legacy for OXI Profile Lookup/Download

Outbound Type CRM\_LEGACY is used when integrating with OPERA Room Reservations Cloud Service for Profile Lookup and Download and OPERA Customer Loyalty Tracking Cloud Service for membership and award management; along with other legacy OXI integrations.

1. Outbound Code can be created at the Global (Chain) or Property level context based on the CRM system integration requirement.

 **Note:**

It is recommended that you create outbound codes at the Global level if all the properties in the chain use the same external system.

2. Select Outbound Type CRM\_LEGACY.
3. Enter a unique outbound code, for example: CRMORSCHAIN1.
4. Enter a description for the CRM Legacy System summary.

5. Protocol is defaulted with XML for CRM\_LEGACY integration.
6. Select the Authorization Type for CRM Legacy integration:
  - a. Select **NONE** for Non-SSD OPERA V5 ORS.
  - b. Select **BASIC** for SSD OPERA V5 ORS.
7. Enter the Application Key. You must obtain the value from 05 ORS Setup > External Database > Local JNDI. Skip for non-O5-ORS applications.
8. Add a new row, select **GetExternalProfiles**, and enter the service path to fetch profiles. Configure https://{host}/...
  - a. Configure https://{host}/Operajserv/OperaWebSvcs/Lookup for O5 ORS application lookup.
  - b. Configure https://{host}/Operajserv/OXIServlets/ORSLookup for non-ORS application lookup using OXI XML specifications(plquery & plresult).
9. Add a new row, select **DownloadExternalProfile**, and enter the service path to download profiles, for example: https://host/Operajserv/OXIServlets/ORSLookup.
10. Add New row, select **GetMembershipDetails**, enter service path for get membership details of the profile, for example: https://host/Operajserv/OperaWebSvcs/MemberInfo.
11. Add New row, select **PostMembershipNumber**, enter service path for download profiles, for example: https://host/Operajserv/OperaWebSvcs/NewMemberCard.
12. Add New row, select **RedeemAward**, enter service path for download profiles, for example: https://host/Operajserv/OXIServlets/ORSLookup.
13. Save the Outbound Code configuration.
14. If an existing OXI external system (for example ORS) is used for Profile Lookup and Download, ensure the **Lookup** check box is selected for the External System.. See [Configuring External Systems](#).
15. Associate the Outbound code with the External Database code of the OXI Interface. See [Configuring External Databases](#).
16. Define Interface Mappings for Profile Types group for the OXI Interface. See [Configuring Interface Mapping](#).
17. If you are trying to configure an OXI interface for the first time:
  - a. Refer Exchange Interface Setup. See [Interface Setup](#).

## CRM Generic for REST API Profile Lookup/Download

Outbound Type CRM is used to integrate OPERA Cloud CRM functionality such as Profile Lookup and Download, and Create Enrollment, with an external system that follows OPERA Cloud REST APIs specification and standards. Refer Customer Relationship Management Outbound APIs for **externalProfiles** specifications on the OHIP Developer Portal.

1. Context:
  - a. **Global**: Select to create outbound system for all properties.
  - b. **Property**: Select to create outbound system for a specific property.
    - i. **Property**: Select a property from the list.
2. **Outbound Type**: Select **CRM** from list.
3. **Outbound Code**: Enter a unique outbound code, for example: CRMCHAIN1.

4. **Description:** Enter a description for the outbound system.
5. Select **Enable External System** checkbox.
  - a. An [Configuring External Systems](#) matching the outbound code is automatically created, with **Lookup** checkbox selected.
  - b. An [External Database](#) matching the outbound code is automatically created, and the same code is available for Profile Lookup.
6. Select **Enable Conversions** checkbox to enable [data value mapping](#).
7. Enter **External Property Code**.
8. **Protocol** defaults to REST (read only).
9. **Authorization Type:** Select **Basic** or **OAuth** and enter respective authorization details provided for the external system.
10. Service Details.
  - a. **Service Path:** Enter the REST API Base URL provided by the external system: for example, <https://api.mycrmsystem.com/apis/>
11. Save the Outbound Code configuration.

## CRM for IATA

Outbound Type **CRM\_IATA** is used to integrate the OPERA Cloud Travel Agent Profile's IATA number validation functionality with the IATA organization.

1. The outbound code should be created at the Property level.
2. Select Outbound Type **CRM\_IATA**.
3. Enter a unique **Outbound Code**, for example: IATAP1.
4. Enter a **Description** such as IATA Validation System.
5. Protocol is defaulted with REST for CRM\_IATA integration.
6. Select Authorization Type **TOKEN**.
7. Enter the **Token** value provided by IATA.
8. Enter the **Application Key** provided by IATA.
9. Enter the REST API Base URL **Service Path** provided by the IATA organization:
10. Save the Outbound Code configuration.

## Experian QAS Address Validation

Outbound Type ADDRESS\_QAS is used to integrate OPERA Cloud functionality and its respective REST APIs with [Experian QAS](#) address validation functionality and its respective [REST APIs](#). OPERA Cloud Outbound Pattern framework transforms the OPERA REST specifications into Experian REST specifications during outbound communication. An Address Validation Integration user is required to configure the Outbound Code with the following configurations:

- Outbound Code can be created at the Global (Chain) or Property level context based on the Address Validation integration requirement.
- Select the Outbound Type **ADDRESS\_QAS**.

- Enter a unique **outbound code**, for example: ADDQASCHAIN1.
- Enter a **description** of the Address Validation System summary.
- Protocol is defaulted with REST for ADDRESS\_QAS integration.
- Select the Authorization Type **TOKEN**.
- Enter the **Token details** provided by Experian.
- Enter the **RESP API Base URL Service Path** provided by Experian.
  - For example, <https://api.experianaperture.io/docs/index.html>.
- Save the **Outbound Code** configuration.
- Add Custom Headers. For more information, see [Custom Headers](#).
  - **Header name:** Add-Components.
  - **Header value:** True.
- Add Data Value Mappings. For more information, see [Data Value Mappings](#).
  - Define the conversion codes for **State Code** (be sure to include the Country Code field in State Code mapping), Country Code (Experian uses ISO3 codes).

## GBG LOQATE Address Validation

Outbound Type ADDRESS\_GBG is used to integrate OPERA Cloud functionality and its respective REST APIs with [GBG](#) loqate address validation functionality and its respective [REST APIs](#). The OPERA Cloud Outbound Pattern framework transforms the OPERA REST specifications into GBG REST specifications during outbound communication. The Address Validation Integration user must configure the Outbound Code with the following configurations:

- The Outbound Code can be created at the global (Chain) or property level context based on the Address Validation integration requirement.
- Select Outbound Type **ADDRESS\_GBG**.
- Enter a unique **outbound code**, for example: GBGCHAIN1.
- Enter a **description** for the Address Validation System summary.
- Protocol is defaulted with REST for ADDRESS\_GBG integration.
- Select Authorization Type **TOKEN**.
- Enter the **Token details** provided by GBG.
- Enter the **RESP API Base URL Service Path** provided by GBG.
  - For example, <https://api.addressy.com/Capture/Interactive/>.
- Save the **Outbound Code configuration**.

## Service Locator Generic

Outbound Type **SL\_GENERIC** is used to configure the Outbound system details to route the OPERA Cloud user requests and Inbound traffic from OHIP to the integrated systems through Service Locator pattern.

Service Locator configuration allows you to configure API routing for each API operation with the Outbound codes which created with Outbound type SL\_GENERIC.

1. Outbound Code can be created at the Global (Chain) or Property level context based on the Service Locator integration pattern requirements.
2. Select an **Outbound Type SL\_GENERIC**.
3. Enter a unique **outbound code**, for example: SLGENC1.
4. Enter a **description** of the Outbound System summary.
5. Protocol is defaulted with REST for SL\_GENERIC integration.
6. Select Authorization Type **OAuth** with respective authorization details provided by the Integrated Outbound system.
7. Enter the **REST API Base URL Service Path** provided by Outbound Systems.
  - a. For example, <https://api.mycrmsystem.com/apis/>.
8. Save the **Outbound Code** configuration.

## Gaming Custom

Outbound Type GAMING\_CUSTOM is used to integrate OPERA Cloud functionality like Profile Lookup and Download and Create Enrollment with any Gaming/Player Tracking System that follows OPERA Cloud REST APIs specification and standards.

This outbound Type should be used when any gaming vendor has custom integration and message specification transformation requirements. It is implemented using Oracle Integration Cloud (OIC) services.

1. Outbound Code should be created for the Property which requires Scientific Gaming integration.
2. Select Outbound Type **GAMING\_CUSTOM**.
3. Enter a unique **outbound code** in the format of gaming system code and property code, for example: SGACSCP1.
4. Enter and **description** for the gaming system name.
5. Enable **External System**, **Enable Conversions**, and **External Property Code**.
6. Protocol is defaulted with REST for custom gaming integration.
7. Select **Authorization Type OAuth** and provide OAuth Token URL, for example: <https://gaminghost.com/v1/oauth>.
8. Select **Grant Type Client Credentials**, and enter **Client Id & Client Key** and **Application Key** provided by the Gaming/Player Tracking System.
9. Enter the **RESP API Base URL Service Path** provided by gaming vendor, for example: <https://gaminghost.com/v1>.
10. Save the **Outbound System** configuration.
11. Add Data Value Mappings. For more information, see [Data Value Mappings](#).
  - Define the Conversion Codes for Address Type, Gender, Phone Type, State Code, Country Code, Language Code, Profile Type, Title, Membership Level, and Membership Type.

## Gaming Generic

Outbound Type `GAMING_GENERIC` is used to integrate OPERA Cloud functionality like Profile Lookup and Download, and Create Enrollment with any Gaming/Player Tracking System that follows OPERA Cloud REST APIs specification and standards.

1. Outbound Code should be created for the Property which requires Scientific Gaming integration.
2. Select the Outbound Type **GAMING\_GENERIC**.
3. Enter a unique **outbound code**, for example: `GAMGENPPROP3`.
4. Enter a **description** for the gaming system.
5. Enable **External System**, **Enable Conversions**, and **External Property Code**.
6. Protocol is defaulted with REST for Scientific Games integration.
7. Select **Authorization Type OAUTH** and provide the **OAuth Token URL**, for example: `https://gaminghost.com/v1/oauth`.
8. Select **Grant Type Client Credentials**, and enter **Client Id & Client Key** and **Application Key** provided by the Gaming/Player Tracking System.
9. Enter the **RESP API Base URL Service Path** provided by SG, for example: `https://gaminghost.com/v1`.
10. Save the **Outbound System** configuration.
11. Add Data Value Mappings. For more information, see [Data Value Mappings](#).
  - Define the Conversion Codes for Address Type, Gender, Phone Type, State Code, Country Code, Language Code, Profile Type, Title, Membership Level, and Membership Type.

## Scientific Games CMP

Outbound Type `GAMING_SGCMP` is used to integrate OPERA Cloud functionality and its respective REST APIs with [Scientific Games CMP](#) functionality and its respective [REST APIs](#). A Gaming Integration user is required to configure the Outbound Code with the following configurations:

1. Outbound Code should be created for the Property which requires Scientific Gaming integration.
2. Select Outbound Type **GAMING\_SGCMP**.
3. Enter a unique **Outbound Code**, for example, `SGCMPPROP2`.
4. Enter a **Description** of the gaming system.
5. Enable an **External System**, enable **Conversions**, and enter an **External Property Code**.
6. Protocol is defaulted with REST for generic gaming integration.
7. Select **Authorization Type OAUTH** and provide the **OAuth Token URL**, for example, `https://api.sgenvoy.com/V1.6/oauth`.
8. Select **Grant Type Client Credentials**, and enter the **Client Id & Client Key** and the **Application Key** provided by SG.
9. Enter the **RESP API Base URL Service Path** provided by SG, for example, `https://api.sgenvoy.com/V1.6/`.
10. Save the **Outbound System** configuration:

11. Add Data Value Mappings. For more information, see [Data Value Mappings](#).
  - Define the Conversion Codes for Address Type, Gender, Phone Type, State Code, Country Code, Language Code, Profile Type, Title, Membership Level, and Membership Type.

## Scientific Games ACSC

Outbound Type **GAMING\_SGACSC** is used to integrate OPERA Cloud functionality and its respective REST APIs with [Scientific Games ACSC](#) functionality and its respective [REST APIs](#). Gaming Integration user requires to configure the Outbound Code with the following configurations:

1. Outbound Code should be created for the property that requires Scientific Gaming integration.
2. Select Outbound Type **GAMING\_SGACSC**.
3. Enter unique **outbound code**, for example: SGACSCP1.
4. Enter a **description** of the gaming system.
5. Enable **External System**, enable **Conversions**, and enter the **External Property Code**.
6. Protocol is defaulted with REST for Scientific Games ACSC integration.
7. Select **Authorization Type OAUTH** and provide OAuth Token URL, for example: `https://api.sgenvoy.com/oauth`.
8. Select **Grant Type Client Credentials** and enter **Client Id & Client Key** and **Application Key** provided by SG.
9. Enter the **RESP API Base URL Service Path** provided by SG, for example: `https://api.sgenvoy.com`.
10. Save the **Outbound System** configuration:
11. Add Data Value Mappings. For more information, see [Data Value Mappings](#).
  - Define the Conversion Codes for Address Type, Gender, Phone Type, State Code, Country Code, Language Code, Profile Type, Title, Membership Level, and Membership Type.

## RMS Yield Market Lookup

Outbound Type **RMSYIELD** is used to integrate OPERA Cloud yield market lookup functionality to fetch Yield Market Code and Customer value from a Revenue / Yield Management System that conforms to the OPERA Cloud REST APIs specifications.

1. Outbound Code should be created for the Property which requires Yield Market lookup integration.
2. Select Outbound Type **RMSYIELD**.
3. Enter a unique outbound code in the format of gaming system code and property code, for example: `YMLPROP1`.
4. Enter a description for the Yield management system name.
5. Protocol is defaulted with REST for Yield Market Lookup integration.

6. Select **Authorization Type OAUTH** and provide OAuth Token URL. for example: `https://rmsyield.com/v1/oauth`.
7. Select **Grant Type Password** and enter **Client Id & Client Key** provided by Yield Market Lookup vendor.
8. Enter the **RESP API Base URL Service Path** provided by Yield Market Lookup vendor, for example: `https://rmsyield.com/v1`.
9. Save the **Outbound Code** configuration.

## Room Key Encoding (Door Lock Systems)

Outbound Type **GUESTKEY\_GENERIC** is used to integrate room key functionality with any Door Lock system.

**NOT** Outbound Code can be created at **Property** level context.

**NOT** Select Outbound Type **GUESTKEY\_GENERIC**.

**NOT** Enter a unique **Outbound Code**, for example: `GUESTKEYVENDOR1`.

**NOT** Enter a **Description** for the Door Lock system summary.

**NOT** **Protocol** is defaulted with **Rest** for Door Lock System integration.

**NOT** Select **Authorization Type Basic or OAuth** with respective authorization details based on the Door Lock System system details provided.

**NOT** Enter the **REST API Base URL Service Path** provided by the Door Lock system. For example, <https://api.mydlssystem.com/apis/>

**NOT** Save the **Outbound Code** configuration.

## Using Outbound Monitoring

Use Outbound Monitoring to review the outbound web-service call history and view the request & response messages communicated with an [outbound external system](#).

The following details are displayed:

- **Property:** Displays the property of the specific outbound transaction.
- **Reference Id:** Displays the logging record reference code for every outbound call.
- **Request Time:** Displays the date and time when Outbound Request is initiated from OPERA Cloud to Outbound System.
- **Response Time:** Displays the date and time when Outbound Response is received from Outbound System to OPERA Cloud.
- **Status:** Displays the HTTP status response code. Example 200 for successful response, 500 for failed response.
- **Transaction Status:** Displays the Outbound call status whether its Successful or Failed.
- **User Name:** Displays the user who performed the outbound flow use task.

### Viewing Outbound Web Service Call History

1. From the **Toolbox** menu, select **System Setup**, select **Outbound**, then select **Outbound Monitoring**.
2. Enter search criteria, then click **Search**.
3. Click **ReferenceID** to view the Request and Response messages communicated between OPERA Cloud and the outbound system.

## About Data Import

### Prerequisites for System Setup - Importing Data

Data Import enables the import of transactional data to a fully configured OPERA Cloud property using the import template files provided. For more information, see [Preparing Template Data Files](#). Data transformation is not available using this method; as such the data in the import data files must match the current OPERA Cloud configuration.

### Watch Video

The following data types (objects) can be imported:

**Table 24-2 Data Types**

Data Type	Notes	Template Filename
<b>Profiles and Relationships</b>		
Guest /Contact Profiles	Contacts available when the <b>Contacts</b> OPERA Control is active. <ul style="list-style-type: none"> <li>• Profile match and merge is not supported.</li> </ul>	Guest_Contact_Profiles.csv
Sales Accounts (Travel Agent, Company, Source) Profiles	<ul style="list-style-type: none"> <li>• Profile match and merge is not supported.</li> </ul>	Accounts.csv
Relationships	Available when the <b>Relationships</b> OPERA Control is active. <ul style="list-style-type: none"> <li>• Account/Contact relationship only.</li> </ul>	Relationships.csv
<b>Membership Transaction</b>	Available with OPERA Cloud Service, Loyalty  <ul style="list-style-type: none"> <li>• For existing Profile Membership details.</li> </ul>	Membership_Transactions.csv
<b>Reservations</b>	<ul style="list-style-type: none"> <li>• Current and future reservations can be imported.</li> <li>• Room type availability (including sell limits) are checked; reservations exceeding the room type availability will not be imported.</li> <li>• Block pickup is not possible; rooms are deducted from House. Use Rooming List import instead</li> </ul>	Reservations.csv

Table 24-2 (Cont.) Data Types

Data Type	Notes	Template Filename
Ledgers		
<p> <b>Note:</b></p> <p>Ledgers import requires reference to the OPERA Cloud <b>Confirmation Number</b>; therefore, the profile and reservation import must be completed initially. When the <b>Unique Confirmation Number for Linked Reservations</b> OPERA Control is active, also provide the <b>Reservation Name ID</b> for uniqueness.</p>		
Deposit Ledger	<p><b>Deposit Ledger Balance Forward Transaction Code</b> OPERA Control defines the (other) payment transaction code used for import of deposit ledger.</p>	Deposit_Balance.csv
Guest Ledger	<p><b>Guest Ledger Balance Forward Transaction Code</b> OPERA Control defines the sales (non-revenue) transaction code for import of guest ledger.</p>	Guest_Balance.csv

 **Note:**

Transaction code must not be linked to a sub-group / group with tax generates configured. Transaction code must not be enabled for manual posting.

Table 24-2 (Cont.) Data Types

Data Type	Notes	Template Filename
AR Ledger	<p><b>Old Balance Transaction Code</b> OPERA Control defines the sales (non-revenue) transaction code for import of AR Ledger.</p> <div data-bbox="841 436 1127 894" style="border: 1px solid #0070C0; padding: 10px; background-color: #E6F2FF;"> <p> <b>Note:</b></p> <p>Transaction code must not be linked to a sub-group / group with tax generates configured. Transaction code must not be enabled for manual posting.</p> </div>	AR_Balance.csv
Blocks and Room/Rate Grid	<p>Available when the <b>Business Block</b> OPERA Control is active.</p> <ul style="list-style-type: none"> <li>• Past, current and future blocks can be imported.</li> <li>• Only the primary Block, Account, and Contact will be imported.</li> <li>• Three block notes can be imported.</li> <li>• Sell Limits cannot be imported.</li> <li>• Master/Sub Blocks, Packages, and Attachments will not be imported.</li> <li>• Production Data and Change Log Data will not be imported.</li> <li>• Non-primary Blocks/Account/Contacts will not be imported.</li> </ul>	Blocks.csv Room_And_Rate_Grid.csv

Table 24-2 (Cont.) Data Types

Data Type	Notes	Template Filename
<a href="#">Catering Events</a>	Available when the <b>Simple Events</b> or <b>Catering Events</b> OPERA Control is active. <ul style="list-style-type: none"> <li>Past, current and future events can be imported.</li> <li>Event Forecast information will be imported for each Event. Only four Forecast Revenue Types and their corresponding Forecast Revenue will be imported.</li> <li>If any notes are populated in the CSV file, the Note Type defaults to "Event" and the Note Title is derived from the Note Type. Only three event notes will be imported.</li> <li>The Rental Code corresponding to the Rental Amount will always be "Custom". Take this into account during the import process.</li> <li>No resources are imported.</li> <li>Packaged events are not imported.</li> <li>Non Forecast Revenue is not imported.</li> <li>Production Data, Change Log data is not imported.</li> </ul>	Events.csv
<a href="#">Sales Activities</a>	Available when the <b>Activities</b> OPERA Control is active. <ul style="list-style-type: none"> <li>Only the primary Account and Contact will be imported.</li> </ul>	Activities.csv
<a href="#">Stay Records</a>	Available when the <b>Stay Records</b> OPERA Control is active.	<ul style="list-style-type: none"> <li>Stay_Records.csv</li> <li>Stay_Records_Daily_Rates.csv</li> <li>Stay_Records_Memberships.csv</li> <li>Stay_Records_Profiles.csv</li> <li>Stay_Records_Revenue_Details.csv</li> </ul>
<a href="#">Rooms Management</a>		
Out of Service	Available when the <b>Out of Service</b> OPERA Control is active.	Out_Of_Service.csv
Room Conditions	Available when the <b>Room Conditions</b> OPERA Control is active.	Room_Conditions.csv
Room Maintenance	Available when the <b>Maintenance</b> OPERA Control is active.	Room_Maintenance.csv
Room Discrepancies	Available when the <b>Discrepant Rooms</b> OPERA Control is active.	Room_Discrepancies.csv
Guest Service Status	Available when the <b>Guest Service Status</b> OPERA Control is active.	Guest_Service_Status.csv
Customized Task Schedules	Available when the <b>Housekeeping Task Scheduling</b> OPERA Control is active.	Customized_Task_Schedules.csv

**Table 24-2 (Cont.) Data Types**

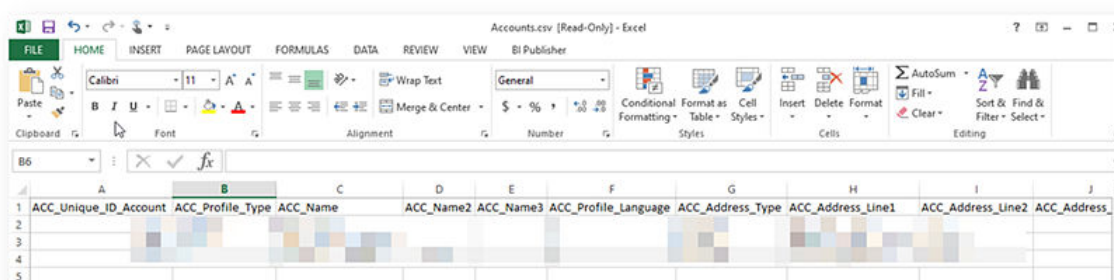

Data Type	Notes	Template Filename
Room Status	<ul style="list-style-type: none"> <li>IP (when the <b>Inspected Status OPERA</b> Control is active)</li> <li>PU (when the <b>Pickup Status OPERA</b> Control is active)</li> </ul>	Room_Status.csv
Track It	<p>Track It is available when the <b>Track It OPERA</b> Control is active.</p> <ul style="list-style-type: none"> <li>Only Track It records in <b>Open</b> status can be imported.</li> <li>Linking Reservations to Track It records is not supported. Reservations details can be added in the <b>Description</b>.</li> </ul>	TrackIt.csv
Out of Order	Available when the <b>Out of Order OPERA</b> Control is active.	Out_Of_Order.csv

**Note:**

Each data file can have a maximum file size of 10MB. You can upload and import multiple files per data type.

Only one import cycle per property is permitted at any given time.

The data import utility is intended for all entities to be uploaded, validated and imported in one cycle to ensure data consistency.

- You can import data type: Individual/Contact profiles only.
- You can import data type: Accounts only.
- You can import data types: Individual/Contact profiles and Accounts together.
- You can import data types: Individual/Contact profiles, Accounts and Relationships together. The unique Id's for Accounts and Individual/Contact profiles referenced in the Relationships data type files must exist in the respective Accounts and Individual/Contact profiles data type files.
- You can import data types: Individual/Contact profiles and Reservations together. The unique Id's for Individual/Contact profiles in the Reservations data type files must exist in the respective Individual/Contact profiles data type files.

- You can import data types: Individual/Contact profiles, Accounts, Relationships and Reservations together.
  - The unique Id's for Individual/Contact and Account profiles referenced in the Reservations data type files must exist in the respective Accounts and Individual/Contact profiles data type files.
  - The unique Id's for Accounts and Individual/Contact profiles referenced in the Relationships data type files must exist in the respective Accounts and Individual/Contact profiles data type files.

You have 14 days from the first successful file upload to complete the data import cycle. If the data import cycle has not been completed in 14 days, you will need to restart the data import process again.

Data import user activity is tracked in the [changes log](#) under the Miscellaneous group and Import Data action type.

### Data File Requirements and Considerations

The upload data files must meet the following requirements:

- All the mandatory columns must be present in the template along with values.
- Column data must meet (not exceed) the OPERA Cloud field length requirements.
- Column data only contains western characters.
- String values are imported 'as-is' in term of letter case.
- Unique Id's (primary key) in each data type must not be used in another file for same data type in the same import cycle. For example, if you are uploading two files **Account01.csv** and **Accounts02.csv** for Accounts data type, a **ACC\_Unique\_ID\_Account** value specified in file **Account01.csv** cannot be used in **Account02csv** or any other files for the same data type within the same import cycle.
- The order/sequence of the columns can be different.
- All column names must match with respective template provided.
- The columns names are case-insensitive.
- Date column values must be in **YYYYMMDD** format.
- There must not be any new line characters in the CSV files.
- The uploaded file for a data type must not contain any additional header columns which are not part of template.
- Non-mandatory columns can be excluded from upload file.
- Any reservation exceeding the inventory checks in place in OPERA Cloud will not be imported, these records will be generated in the error file after the import process is completed. Ensure that the files uploaded for data type "Reservations", the cumulative number of rooms for a room type in all the files do not exceed the inventory checks in place

## Data Type / Entity Relationships

Import Combinations													Primary & Foreign Keys	
Guest/Contact	X	X			X	X	X	X	X	X	X	X	IC_UNIQUE_ID_IND_CONTACT (PK)	
Sales Accounts			X	X	X	X	X	X	X	X	X	X	ACC_UNIQUE_ID_ACCOUNT (PK)	
Relationships					X	X	X	X	X	X	X	X	REL_UNIQUE_ID_RELATIONSHIP (PK), ACC_UNIQUE_ID_ACCOUNT (FK), IC_UNIQUE_ID_IND_CONTACT (FK)	
Blocks						X	X	X	X	X	X	X	BLK_UNIQUE_ID_BLOCK (PK), BLK_ACCOUNT_ID (FK), BLK_CONTACT_ID (FK)	
Block Room & Rate Grid							X	X			X	X	BLK_UNIQUE_ID_BLOCK (FK)	
Reservations *		X							X	X	X	X	RES_UNIQUE_ID_RESERVATION (PK), IC_UNIQUE_ID_IND_CONTACT (FK)	
Catering Events									X	X	X	X	EVT_UNIQUE_ID_EVENT (PK), EVT_BLOCK_ID (FK)	
Activities			X		X			X			X	X	ACT_UNIQUE_ID_ACTIVITY (PK), ACT_ACCOUNT_ID (FK), ACT_BLOCK_ID (FK), ACT_CONTACT_ID (FK)	

\* Denotes deduct from house; no relationship to Block

To establish the relationship between records in each data type, the Unique ID primary key (PK) values are referenced as the foreign key (FK) IDs in other entities.

## Using Data Import

### Preparing Template Data Files

1. From the side menu select **Toolbox**, select **System Setup** then **Import Data**.
2. Click **Download Templates** to download a **templates.zip** file to your workstation.
3. Open the ZIP file and extract the CSV files to a folder.
4. Navigate to the folder, open and prepare the CSV file data based on the templates requirements.

#### Note:

Each data file created must have a maximum file size of 10MB; you can upload and import multiple files per data type. Uniquely name each file. For example: Account01.csv and Accounts02.csv.

### Uploading and Validating Data Files

1. From the **Toolbox** menu, select **System Setup** and then **Import Data**.
2. Enter or select the property to which you want to import data and click **Import Data**.
3. Click **Add Data Types (Objects) to Import** and specify the number of files you have to upload for each data type.
4. For each data type, click **Select/Upload File**.
  - a. Click **Choose File** and select the **CSV** file from the file system. Click **Open** to select.

- b. Click **OK**.
5. Repeat for each data type and file to upload.

 **Note:**

Once the first file is uploaded successfully you have 14 days to complete the import cycle. You can always **Save and Close** the existing import cycle during the 14 day time frame and come back later and make changes. If you don't initiate the **Import Validated Data** into OPERA Cloud within the 14 days' time frame, all the existing files and any references to the files will be removed.

6. Once all the files are uploaded successfully, click **Validate Data** to validate the data against the property configuration, column widths, and Primary-Foreign key relationships.

 **Note:**

Any unused rows must be removed for the validate action to be enabled. All the upload files status must indicate success state for the validate action to be enabled.

### Validation Errors

1. Any validation failures will generate an error file for each uploaded file. You can download the error file by clicking the error file name link or clicking the vertical ellipsis **Actions** menu and selecting **Download Error File** once the validation is completed for all the uploaded files.
2. Review the `[template]_errors.csv` file.
  - Each error record in the file will have **Unique\_Id\_Column** and a column called **ERROR\_MESSAGE** with the Error description (includes the column name, value and error message. For example, `res_rate_code--profroma-reservation Rate Code is not configured in OPERA Cloud`, `res_source_code--ref--source_code is not configured in OPERA Cloud`, `res_room_type--stdx--reservation Room Type is not configured in OPERA Cloud`, `res_room_type_charge--stdx--reservation Room Type Charge is not configured in OPERA Cloud`).
3. Correct the errors in the data CSV file uploaded and save changes to file.
4. From the vertical ellipsis, click **Remove Uploaded File**, click **OK** to confirm.
5. Re-upload the corrected data CSV file, click **Select/Upload File**.
6. Re-validate the data, click **Validate Data**.

### Cancel Upload and Validation Process

You can cancel the import process anytime during the 14 day time frame prior to initiating the import of validated data.

1. Click **Cancel Import Process** to remove all uploaded files and references to the current import cycle.

### Importing Validated Data

Once all files are validated successfully you can import the data.

1. Click **Import Validated Data**.

2. Click **Import Validated Data** to confirm.
3. A Data Import Overview page provides details about the import progress.
4. Once import is complete, click **Close** to return to the import data screen.
5. Click **OK** to confirm.

 **Note:**

This will remove all uploaded files and references to the current import cycle.

## Importing Blocks and Room/Rate Grid

Mandatory columns are marked in bold.

1. "BLK\_Unique\_ID\_Block" CSV column value is stored in "ORIG\_ALLOTMENT\_HEADER\_ID" column.
2. "BLK\_Start\_Date" CSV column value is stored in the "original\_begin\_date" column.
3. Multiple Rate Codes and multiple Owners cannot be imported.
4. Multiple Rate Codes and Owners are not allowed in import CSV.
5. If the Ability to Quote Rates in Foreign Currencies OPERA Control is active, it is expected that the import file has property configured currency.
6. Block Begin Date must fall between Rate Code date range.
7. A group profile is automatically created and linked to Blocks.

 **Note:**

Once all files have been imported successfully, you need to synchronize the data, so the revenue tables for the imported blocks are up to date. For more information, see [Synchronizing Block Occupancies](#)

**Table 24-3 Blocks**

Column	Description	Max Data Length	Sample Data	Mandatory
BLK_Unique_ID_Block	Unique ID value for Block in the uploaded csv files for Data type "Block" within an Import cycle.	200	Ex: (40001, 40002)	
BLK_Start_Date	The Start Date of the Block. The format must be 'YYYYMMDD.'	Date	Ex: (20210121)	
BLK_End_Date	This field should not be less than the Block Start Date/Business Date.	Date	Ex: (20210122)	

Table 24-3 (Cont.) Blocks

Column	Description	Max Data Length	Sample Data	Mandatory
BLK_Name	The Block Name.	40	Ex: (Wedding Block)	
BLK_Code	Group Code. If OPERA Control "Block Code Template" is active, then the block code must be as per the template defined. For better consistency, follow the setting "Block Code Generation Pattern."	20	Ex: (201110WEDD)	
BLK_Room_Status	Business Block Status. The Business Block Status must be pre-configured in OPERA Cloud.	4	Ex: (INQ)	
BLK_Account_ID	The Primary Account ID linked to the Block. Unique ID value for Account profile in the Uploaded csv files for Data type "Account" for an Import cycle.	200	Ex: (200010)	
BLK_Contact_ID	The Primary Contact ID linked to the Block. Unique ID value for Guest/Contact profile in the Uploaded csv files for Data type "Guest/Contact Profiles" for an Import cycle.	200	Ex: (300010)	
BLK_Owner	The Business Block Owner Code.	10	Ex: (All)	
BLK_Market_Code	The Main Market Code. The Market Code must be pre-configured in OPERA Cloud.	10	Ex: (CORP)	
BLK_Source	Origin of booking that is attached to this business block. The Source must be pre-configured in OPERA Cloud.	20	Ex: (CALL)	

Table 24-3 (Cont.) Blocks

Column	Description	Max Data Length	Sample Data	Mandatory
BLK_Reservation_Type	The Reservation Type attached to the Block. The Reservation type must be pre-configured in OPERA Cloud.	8	Ex: (GNON)	
BLK_Inventory_Control	The number of days can be extended from the End Date even after expiration. The OPERA Control parameter "Elastic" should be active to import Elastic Inventory.	1	Ex: (Elastic, Non Elastic)	
BLK_Decision_Date	Decision Date for Rooms. The format must be 'YYYYMMDD.'	DATE	Ex: (20210122)	
BLK_Followup_Date	Rooms Follow-up Date. The format must be 'YYYYMMDD.'	DATE	Ex: (20210122)	
BLK_Catering_Only	Flag which specifies if this is a Catering Only Booking.	1	Ex: (Y, N)	
BLK_Origin	Channel code attached to the business block.	20	Ex: (Default)	
BLK_Allotment_Origin	Determines which application created the Business block: PMS or SC.	3	Ex: SC	
BLK_Type	The Block Type. The OPERA Control Parameter "Business Block Type" should be active. The Block Type must be pre-configured in OPERA Cloud.	8	Ex: (G, W)	
BLK_Room_Owner	Rooms Sales Manager ID. In case the value is not populated in CSV, the value is defaulted to ALL.	10	Ex: (ALL)	
BLK_Rate_Code	The rate code for which this record applies. The Rate Code must be pre-configured in OPERA Cloud.	8	Ex: (RACK)	

Table 24-3 (Cont.) Blocks

Column	Description	Max Data Length	Sample Data	Mandatory
BLK_Currency	<p>Currency Code attached to the Business Block.</p> <p>The Currency Code must be pre-configured in OPERA Cloud.</p> <p>The sequence for the Currency import is as follows:</p> <ul style="list-style-type: none"> <li>• If the Rate Code is populated in the Block Import csv, then Rate Code Currency.</li> <li>• If point.1 is not populated, then Block Import csv Currency column value.</li> <li>• If point.2 is not populated, then Property Currency.</li> </ul>	3	Ex: (USD)	
BLK_Print_Rate_YN	Default value used against Block reservations.	1	Ex: (Y, N)	
BLK_Cutoff_Date	<p>Date on which the available inventory for the block will be cut-off by the system. The format must be 'YYYYMMDD.'</p> <p>In case both the Cut Off date and Cut Off days is populated in Csv, then consider Cut Off date for Import.</p> <p>The OPERA Control parameter "CutOff" should be active.</p>	DATE	Ex: (20210122)	
BLK_Cutoff_Days	The number of days prior to Arrival that the whole block will be cut off.	2 (The Number must be between 0 to 99)	Ex: (5, 6)	
BLK_Catering_Owner	<p>Catering Sales Manager ID.</p> <p>In case value is not populated in CSV, the value is defaulted to ALL.</p>	10	Ex: (ALL)	

Table 24-3 (Cont.) Blocks

Column	Description	Max Data Length	Sample Data	Mandatory
BLK_Catering_Status	The Catering Status. The Currency Status must be pre-configured in OPERA Cloud. If left Blank, the value from Property catering Currency will be populated. This column should be populated when the OPERA control parameter "Use single Block status for Rooms and Catering" is not active.	4	Ex: (INQ)	
BLK_Event_Attendees	The number of Attendees for the Catering Events. This field should be populated when the catering Status is populated.	4 (The Number must be between 0 to 9999)	Ex: (10)	
BLK_Resource_Discount	The default discount percentage applied to the catering items.	3 (The Number must be between 0 to 100)	Ex: (20)	
BLK_Onsite_Name	The Group Representative.	40	Ex: (Adam)	
BLK_Function_Type	The Type of Catering Function.	60	Ex: (Wedding)	
BLK_PostAs	The Catering Info board name.	50	Ex: (Adam and Jill's Wedding)	
BLK_Note1	Block Notes 1	2000	Ex: (Outside Ceremony at 10:00AM)	
BLK_Note2	Block Notes 2	2000	Ex: (Father of the Bride pays everything)	
BLK_Note3	Block Notes 3	2000	Ex: (The block's room charges will be charged to the company's visa.)	

**Table 24-4 (Block) Room and Rate Grid**

<b>(Block) Room and Rate Grid</b>				
<b>Column</b>	<b>Description</b>	<b>Max Data Length</b>	<b>Sample Data</b>	<b>Mandatory</b>
1.	If the "BLK_Rate_Code" column value is populated in the Blocks Import csv, then consider the BLK_Rate_Amount (1, 2, 3, 4, AP) for import from the Block Rate Code configuration, else consider the values for import from Room and Rate Grid import CSV file.			
2.	"BLK_Room_Type" column value within Room and Rate Grid CSV and Block's "Rate Code (Configured Room Types)" value should match, else the record will not be imported.			
3.	"BLK_Block_Date" column value within Room and Rate Grid CSV and Block's "Rate Code (Dates within pricing Schedule)" values should match, else the record will not be imported.			
4.	Room and Rate Grid details will not be imported for a Catering only Block.			
5.	In case the OPERA Control "Occupancy Split per Room" is not active, only "BLK_Occupancy_1" Occupancy column should be populated			
BLK_Unique_ID_Block	Unique ID value for Block in the uploaded csv files for Data type "Room and Rate Grid" within an Import cycle.	200	Ex: (40001, 40002)	
BLK_Room_Type	This is the Room Type booked for this allotment.  The Room Type must be pre-configured in OPERA Cloud.	20	Ex: (STDK, STDQ)	
BLK_Block_Date	Date of Allotment for which the specified room category is booked. The format must be 'YYYYMMDD.'  This date should span within the Block dates for which the Grid is uploaded.	Date	Ex: (20210122)	
BLK_Rate_Amount_1	1 person rate		Ex: (100)	
BLK_Rate_Amount_2	2 person rate		Ex: (150)	
BLK_Rate_Amount_3	3 person rate		Ex: (200)	
BLK_Rate_Amount_4	4 person rate		Ex: (225)	
BLK_Rate_Amount_AP	Additional person rate.		Ex: (250)	
BLK_Occupancy_1	Projected number of rooms with Single occupancy for the particular room type & date to which this record corresponds.	4 (The Number must be between 0 to 9999)	Ex: (1)	

**Table 24-4 (Cont.) (Block) Room and Rate Grid**

<b>(Block) Room and Rate Grid</b>			
BLK_Occupancy_2	Projected number of rooms with Double occupancy for the particular room type & date to which this record corresponds.	4 (The Number must be between 0 to 9999)	Ex: (2)
BLK_Occupancy_3	Projected number of rooms with Triple occupancy for the particular room type & date to which this record corresponds.	4 (The Number must be between 0 to 9999)	Ex: (3)
BLK_Occupancy_4	Projected number of rooms with Quadruple occupancy for the particular room type & date to which this record corresponds.	4 (The Number must be between 0 to 9999)	Ex: (1)

## Importing Catering Events

### Events

- "EVT\_Unique\_ID\_Event" CSV column value is stored in "ORIG\_EVENT\_ID" column (Table: GEM\$EVENT).
- The Rental Code corresponding to the Rental Amount will be "CUSTOM" always.
- For Master/Sub/Alternate Event imports, consider the following:
  - Master Event should be placed in CSV before the Sub/Alternate Event.
  - The above should be imported in sequence.
- Events won't be imported for Out Of Order Function Space.
- Events will be imported for Blocks which have "BLK\_Event\_Attendees" populated in Blocks.csv.
- Return to Inventory status Events should not be imported for active Blocks.

**Table 24-5 Events**

Column	Description	Max Data Length	Sample Data	Mandatory
EVT_Unique_ID_Event	Unique ID value for Event in the uploaded csv files for Data type "Events" within an Import cycle.	200	Ex: (5010, 5011)	

Table 24-5 (Cont.) Events

Column	Description	Max Data Length	Sample Data	Mandatory
EVT_Block_ID	The Business Block ID.	200	Ex: (400010)	
EVT_Type	The Event type of the Event.	8	Ex: (MTG)	
EVT_Name	The Event Name of the Event.	60	Ex: (Meeting)	
EVT_Status	The Event Status of the Event.	8	Ex: (INQ)	
EVT_Start_Date	The Event Start Date. The format must be 'YYYYMMDD.'	DATE	Ex: (20210121)	
EVT_End_Date	The Event End Date. The format must be 'YYYYMMDD.'	DATE	Ex: (1500)	
EVT_Start_Time	The Event Start Time. The format must be 'HH24MI.'	TIME	Ex: (1500)	
EVT_End_Time	The Event End Time. The format must be 'HH24MI.'	TIME	Ex: (1500)	
EVT_Expected_Attendees	The Expected number of people attending the Event.		Ex: (20)	
EVT_Guaranteed_Attendees	The Guaranteed number of people attending the Event.		Ex: (15)	
EVT_Actual_Attendees	The Actual number of people attending the Event.		Ex: (10)	
EVT_Space	Reserved Function Space for the Event	8	Ex: (CORA)	
EVT_Shareable_YN	This flag indicates whether the Shareable Function Space would be booked as Exclusive or Shareable. This flag should be populated for a Shareable Function Space only.	1	Ex: (Y)	
EVT_Master_YN	This flag indicates whether the Event is a Master Event. This flag should be populated if Master/Sub/Alternate Events are to be Imported.	1	Ex: (N)	

Table 24-5 (Cont.) Events

Column	Description	Max Data Length	Sample Data	Mandatory
EVT_Master_Event_Link_ID	Linked Master Event ID. This column should be populated if Master/Sub/Alternate Events are to be Imported.	200	Ex: (5012)	
EVT_Link_Type	Event link type like ALTERNATE/SUB EVENT will be stored. This column should be populated if Master/Sub/Alternate Events are to be Imported.	20	Ex: (ALTERNATE)	
EVT_Setup_Style	Function Space Setup. This column should be populated when "EVT_Space" is provided.	8	Ex: (CONF)	
EVT_Setup_Time	Setup Time in Minutes.		Ex: (15)	
EVT_Tear_Down_Time	Teardown Time in Minutes.		Ex: (15)	
EVT_Rental_Amount	Rental Amount for the Event.		Ex: (105)	
EVT_Display_Doorcard_YN	Display Doorcard Y/N.	1	Ex: (Y)	
EVT_Doorcard	Doorcard Signage	50	Ex: (Adam's and Jill's Reception)	
EVT_Loud_Event	This flag indicated whether it's a Noisy Event.	1	Ex: (N)	
EVT_Do_Not_Move	Don't move Flag.	1	Ex: (N)	
EVT_NOTE1	Event Note 1.	2000	Ex: (Guest book at Entrance)	
EVT_NOTE2	Event Note 2.	2000	Ex: (Guest book at Entrance)	
EVT_NOTE3	Event Note 3.	2000	Ex: (Guest book at Entrance)	
EVT_Forecast_Revenue_YN	This flag indicates, even though resources may be booked, only the forecasted values will drive reporting revenue.	1	Ex: (N)	
EVT_Forecast_Revenue_Type_1	The Forecast Revenue Type 1 of the Event.	8	Ex: (BEV)	

Table 24-5 (Cont.) Events

Column	Description	Max Data Length	Sample Data	Mandatory
EVT_Forecast_Total_Revenue_1	The Forecasted Revenue 1 of the Event.		Ex: (20)	
EVT_Forecast_Revenue_Type_2	The Forecasted Revenue 2 of the Event.	8	Ex: (FOOD)	
EVT_Forecast_Total_Revenue_2	The Forecasted Revenue 2 of the Event.		Ex: (30)	
EVT_Forecast_Revenue_Type_3	The Forecast Revenue Type 3 of the Event.	8	Ex: (RENTAL)	
EVT_Forecast_Total_Revenue_3	The Forecasted Revenue 3 of the Event.		Ex: (100)	
EVT_Forecast_Revenue_Type_4	The Forecast Revenue Type 4 of the Event.	8	Ex: (MISC)	
EVT_Forecast_Total_Revenue_4	The Forecasted Revenue 4 of the Event.		Ex: (25)	

## Importing Membership Transactions

### Loyalty

- **Data Type:** Membership Transactions
- **Notes:** Available with OPERA Loyalty Cloud Services
- **Template Filename:** Membership\_Transactions.csv

Import is associated with existing [Profile Membership details](#), based on **Membership Type** and **Membership Card Number**.

Table 24-6 Membership Transactions

Column	Description	Max Data Length	Sample Data	Mandatory
MT_Arrival_Date	The Arrival Date of the stay. The format must be YYYYMMDD		Ex: (20230124)	✓
MT_CRS_Booking_No	CRS booking number (alphanumeric)	50	Ex: (AB123456C)	✓
MT_Departure_Date	The Departure Date of the stay. The format must be YYYYMMDD		Ex: (20230126)	✓

**Table 24-6 (Cont.) Membership Transactions**

Column	Description	Max Data Length	Sample Data	Mandatory
MT_PMS_Reservation_No	Confirmation number (alphanumeric)	50	Ex: (A12345B)	
MT_Membership_Type (FK)	Membership Type associated with the member profile. Pre-configured in OPERA Cloud	20	Ex: (ABROYAL)	
MT_Membership_Card_No (FK)	Membership Number	50	Ex: (1000001)	
MT_Record_Type	The type of membership transaction, and valid values are: <ul style="list-style-type: none"> <li>• ST (Stay)</li> <li>• OT (Other)</li> </ul>		Ex: (ST)	
MT_Property	OPERA property code. Preconfigured in OPERA Cloud	20	Ex: (ROSIE)	
MT_Currency	Currency code which points were calculated. Preconfigured in OPERA Cloud	20	Ex: (USD)	
MT_Membership_Level	Membership level associated with the member. Preconfigured in OPERA Cloud	20	Ex: (GOLD)	
MT_Profile_Promotion_1	Promotion Code applied to points. Preconfigured in OPERA Cloud	20	Ex: (SEASON)	
MT_Profile_Promotion_2	Promotion Code applied to points. Preconfigured in OPERA Cloud	20		
MT_Rate_Promotion	Promotion Code associated with the reservation. Pre-configured in OPERA Cloud	20	Ex: (NEWYEAR)	
MT_Base_Nights	Base Night points		Ex: (1000)	
MT_Base_Points	Total Base Points (Nights+Revenue+stays)		Ex: (3000)	

(At least one of the following fields must be populated)

Table 24-6 (Cont.) Membership Transactions

Column	Description	Max Data Length	Sample Data	Mandatory
MT_Base_Revenue	Base Revenue Points		Ex: (1000)	
MT_Base_Stay	Base Stay Points		Ex: (1000)	
MT_Bonus_Nights	Bonus Night Points		Ex: (100)	
MT_Bonus_Points	Total Bonus Points (Nights + Stay+Revenue)		Ex: (300)	
MT_Bonus_Revenue	Bonus Revenue Points		Ex: (100)	
MT_Bonus_Stay	Bonus Stay Points		Ex: (100)	
MT_Miscellaneous_Points	Miscellaneous Points		Ex: (100)	
MT_Expiration_Date	Points Expiration Date		Ex: (20231231)	
MT_Notes	Comments related to Points transaction	4000	Ex: (Service Recovery)	
MT_Points_Cost	Cost of Points		Ex: (1000)	
MT_Points_Credit_Date	Date Points were awarded. The format must be YYYYMMDD		Ex: (20230126)	
MT_Transaction_Date	Date of Points Transaction. The format must be YYYYMMDD		Ex: (20230126)	

## Importing Profiles and Relationships

The Keep History YN and ActiveYN fields for Individual/Contact profiles will be defaulted to Y for all the imported profiles.

Table 24-7 Guest (Individual) / Contact Profiles

Column	Description	Max Data Length	Sample Data	Mandatory
IC_Unique_ID_Ind_Contact (PK)	Unique ID value for Guest/Contact Profiles in the uploaded csv files for data type <b>Guest/Contact Profiles</b> within an import cycle.	200	Ex: (30001, INC20001)	
IC_Contact_YN	<ul style="list-style-type: none"> <li>Primary Key</li> <li>Y or N</li> <li>Y for contact; else N</li> </ul>	N/A	Ex: (Y, N)	

Table 24-7 (Cont.) Guest (Individual) / Contact Profiles

Column	Description	Max Data Length	Sample Data	Mandatory
IC_Last_Name	The Last name of an Guest/Contact Profile name.	40	Ex: (Smith, Brown)	
IC_Middle_Name	The Middle name of an Guest/Contact Profile name.	40	Ex: (David, James)	
IC_First_Name	The First name of an Guest/Contact Profile name.	40	Ex: (Robert, John)	
IC_Profile_Language	Primary language used for the profile. The language code needs to be pre-configured in OPERA Cloud.	20	Ex: (DE, E, RU)	
IC_Title	The title of the Individual. The Title code needs to be pre-configured in OPERA Cloud.	20	Ex: (Mr., Mrs., Dr.)	
IC_Nationality	Nationality of the Individual. The Title code needs to be pre-configured in OPERA Cloud.	20	Ex: (IND, US)	
IC_Position	The business title for the Guest/Contact Profile.	60	Ex: (Director)	
IC_Owner_Code	Owner Code associated with the Guest/Contact Profile. If blank value is provided, it will be defaulted to <b>ALL</b> .	10	Ex: (ALL)	
IC_VIP_Code	VIP Code associated with the Guest/Contact Profile. The VIP code needs to be pre-configured in OPERA Cloud.	20	Ex: (VIP, VVIP)	
IC_Address_Type	The address type code. The address code needs to be pre-configured in OPERA Cloud.	20	Ex: (HOME, BUSINESS)	
IC_Address_Line1	The first line of street address.	80		
IC_Address_Line2	The second line of street address.	80		

**Table 24-7 (Cont.) Guest (Individual) / Contact Profiles**

Column	Description	Max Data Length	Sample Data	Mandatory
IC_Address_Line3	The third line of street address.	80		
IC_Address_Line4	The fourth line of street address.	80		
IC_City	The City of this address.	40		
IC_Postal_Code	The Postal Code of the address.	15		
IC_Postal_Code_Ext	The Postal Code Extension of the address.	20		
IC_Country	The Country code of the address; pre-configured in OPERA Cloud.	40		
IC_State	The State code of the address; pre-configured in OPERA Cloud.	40		
IC_Address_Language	The Language code used for the address; pre-configured in OPERA Cloud.	20		
IC_Ref_Currency	Currency code to be used for the commission payment; pre-configured in OPERA Cloud.	20		
IC_Communication_Ty pe1	The Communication type code; pre-configured in OPERA Cloud.	4000		
IC_Communication1	The value for the communication for IC_Communication_Ty pe1.	4000		
IC_Communication_Ty pe2	The Communication type code; pre-configured in OPERA Cloud.	4000		
IC_Communication2	The value for the communication for IC_Communication_Ty pe2.	4000		
IC_Communication_Ty pe3	The Communication type code; pre-configured in OPERA Cloud.	4000		

**Table 24-7 (Cont.) Guest (Individual) / Contact Profiles**

Column	Description	Max Data Length	Sample Data	Mandatory
IC_Communication3	The value for the communication for IC_Communication_Type3.	4000	Ex: (xxx@xxxxx.xx x) Code: EMAIL	

**Sales Account Profiles (Company/Agent/Source)**

- Mandatory columns are marked in bold.
- The ActiveYN field for Accounts defaults to Y for all imported profiles.

**Table 24-8 Sales Account Profiles (Company/Agent/Source)**

Column Name	Description	Max Data Length	Sample Data	Mandatory
ACC_Unique_ID_Account (PK)	Unique ID value for Sales Account in the uploaded csv files for data type <b>Accounts</b> within an import cycle.		Ex: (40001, AC40001)	
ACC_Profile_Type	The type of sales account. The account type can be <b>TA</b> , <b>Source</b> , and <b>Company</b> .		Ex: ( TA, Source, Company)	
ACC_Name	Name of the account profile.	80	Ex: ( Company Name, Source Name)	
ACC_Name2	Second name of the account profile.	80		
ACC_Name3	Third name of the account profile.	80		
ACC_Profile_Language	Primary language of the profile; pre-configured in OPERA Cloud.	20	Ex: (DE, E, RU)	
ACC_Address_Type	The address type code; pre-configured in OPERA Cloud.	80	Ex: (HOME, BUSINESS)	
ACC_Address_Type1	The first line of street address.	80	Ex: 100 West Monroe	
ACC_Address_Type2	The second line of street address.		Ex: Suite 100	
ACC_Address_Type3	The third line of street address.			
ACC_Address_Type4	The fourth line of street address.			

**Table 24-8 (Cont.) Sales Account Profiles (Company/Agent/Source)**

Column Name	Description	Max Data Length	Sample Data	Mandatory
ACC_City	The City of this address.		Ex: (Chicago)	
ACC_Postal_Code	The Postal Code of the address.		Ex: (60601)	
ACC_Postal_Code_Ext	The Postal Code Extension of the address.		Ex: (0401)	
ACC_Country	The Country code of the address; pre-configured in OPERA Cloud.		Ex: (US)	
ACC_State	The State code of the address; pre-configured in OPERA Cloud.		Ex: (IL)	
ACC_Address_Language	The Language code used for the address; pre-configured in OPERA Cloud.		Ex: (E, JPN, CHN)	
ACC_Ref_Currency	Currency code to be used for the commission payment; pre-configured in OPERA Cloud.		Ex: (INR, USD)	
ACC_Communication_Type1	The Communication type code; pre-configured in OPERA Cloud.	4000	Ex: (MOBILE)	
ACC_Communication1	The value for the communication for ACC_Communication_Type1.	4000	Ex: 9999999111	
ACC_Communication_Type2	The Communication type code; pre-configured in OPERA Cloud.	4000	Ex: (WEB)	
ACC_Communication2	The value for the communication for ACC_Communication_Type2.	4000		
ACC_Communication_Type3	The Communication type code; pre-configured in OPERA Cloud.	4000	Ex: (EMAIL)	
ACC_Communication3	The value for the communication for ACC_Communication_Type3.	4000	Ex: (xxxx@xxxxx.xxCode: EMAIL	

Table 24-8 (Cont.) Sales Account Profiles (Company/Agent/Source)

Column Name	Description	Max Data Length	Sample Data	Mandatory
ACC_Owner_Code	Owner Code associated with the Guest/Contact Profile. If NULL, it will default to <b>ALL</b> .		Ex: (ALL , BB)	
ACC_CORP_IATA_ID	Corp ID / IATA	20	76542389	
ACC_TAX1_NO	Tax Number 1	30	28745623	
ACC_TAX2_NO	Tax Number 2	30	9875437	

 **Note:**

The values for **ACC\_CORP\_IATA\_ID / ACC\_TAX1\_NO/ ACC\_TAX2\_NO** columns in **Account.csv** should be as per your standards and conform to the following OPERA Controls.

- Pad Corporate Number Digits-> Pad Corporate Number Digits/ Pad IATA Number Digits
- Allow Duplicate IDs
- IATA Validation
- Bypass Corp Id Validation
- Tax ID Validation

 **Note:**

The Import process does not perform any validations on these fields.

**Relationships (Account/Contact)**

- Records reference the **ACC\_Unique\_ID\_Account** and **IC\_Unique\_ID\_Ind\_Contact** values from Sales Account and Guest/Contact data files respectively.
- The default relationship between the account and Guest/Contact profile will be Employer (Type: ACCOUNT) and Employee (Type: CONTACT) relationship.

**Table 24-9 Relationships (Account/Contact)**

Column Name	Description	Max Data Length	Sample Data	Mandatory
REL_Unique_ID_Relationship (PK)	Unique ID value for Relationship in the uploaded csv files for Data type <b>Relationships</b> within an Import cycle.	200	Ex: (50001, RL50001)	
ACC_Unique_ID_Account (FK)	Foreign Key: Linked Unique ID value of Sales Account Profile. Reference PK value from Sales Account data file within an import cycle.	200	Ex: (40004, AC40004)	
IC_Unique_ID_Ind_Contact (FK)	Foreign Key: Linked Unique ID value of Guest/Contact Profile. Reference the PK value from Guest/Contact data file within an import cycle.	200	Ex: (30003, INC20003)	

## Importing Reservations

- Records reference the **IC\_Unique\_ID\_Ind\_Contact** from the Guest/Contact data file.
- Reservation Status is auto-populated with values: **Reserved** (if arrival date is greater than business date), **Arrival** (if arrival date is equal to business date).
- Payment Instructions. Payment method is set to "Cash". No credit card details are imported.
- All reservations are imported irrespective of the room type or house availability or rate restrictions.

**Table 24-10 Reservations**

Column Name	Description	Max Data Length	Sample Data	Mandatory
RES_Unique_ID_Reservation (PK)	Unique ID value for reservation in the uploaded csv files for Data type <b>Reservations</b> within an Import cycle.	200	Ex: (30001, INC20001)	

Table 24-10 (Cont.) Reservations

Column Name	Description	Max Data Length	Sample Data	Mandatory
IC_Unique_ID_Ind_Contact (FK)	Foreign Key: Unique ID for Linked Guest Profile. Reference PK value from Guest / Contact Profiles data file for an Import cycle.		Ex: (30001, INC20001)	
RES_Confirmation_Number	This is the confirmation number from OPERA5 or third-party PMS. If provided, res_confirmation_number will be migrated as an external reference number of type 'IMPORTCNF' A new/unique OPERA Cloud confirmation number is generated for each reservation.	50	Ex: ( 3451267345)	
RES_CRS_Number	This is the CRS confirmation number from OPERA5 or third-party PMS. res_crs_number will be migrated as an external reference number of type res_external_ref_type_crs (if provided) else 'IMPORTCRS' as default.	50	Ex: (56712345245)	
RES_External_Ref_Type_CRS	The External Reference Type code.	50	Ex: (CRS)	
RES_External_Leg_No_CRS	Leg Number for External Reference	5	Ex: (12345)	
RES_Reservation_Type	The Reservation Type code; pre-configured in OPERA Cloud.	20	Ex: (6PM)	
RES_Arrival_Date	The Arrival Date of the reservation. The format must be YYYYMMDD.		Ex: (20201121)	
RES_Departure_Date	The Departure Date of the reservation. The format must be YYYYMMDD.		Ex: (20201125)	
RES_Room_Type	The Room type code; pre-configured in OPERA Cloud.	50	Ex: (KNGN)	

Table 24-10 (Cont.) Reservations

Column Name	Description	Max Data Length	Sample Data	Mandatory
RES_Room_Type_Charge	The room type to charge code; pre-configured in OPERA Cloud.	50	Ex: (KNGN)	
RES_Number_Rooms	The number of rooms for this reservation.	The value must be between 1 to 150	Ex: (1)	
RES_Number_Adults	The <b>Number of Adults</b> : Defaulted to 1 in case of Null value.	The value must be between 1 to 99	Ex: (2)	
RES_Number_Children	The number of Children.	The Value must be between 0-99	Ex: (1)	
RES_Rate_Code	The Rate Code for the reservation; pre-configured in OPERA Cloud.	20	Ex: (RACK)	
RES_Rate_Amount	The Rate Amount for the reservation.		Ex: (100.00)	
RES_Currency_Code	The Currency code for the reservation; pre-configured in OPERA Cloud.	20	Ex: (USD)	
RES_Fixed_RateYN	The Fixed Rate Flag. • Y or N	1	Ex: ( Y, N)	
Room_Number	The Room Number allocated (pre-assigned) to the reservation.	200	Ex: (101)	
RES_Market_Code	The Market code; pre-configured in OPERA Cloud.	20	Ex: (CORPC)	
RES_Source_Code	The Source code; pre-configured in OPERA Cloud.	20	Ex: (REF)	
RES_Origin_Code	The Origin code; pre-configured in OPERA Cloud.	40	Ex: (PMS)	

Table 24-10 (Cont.) Reservations

Column Name	Description	Max Data Length	Sample Data	Mandatory
RES_Source_Profile_ID (FK)	Unique ID value of the Source profile in the uploaded csv files for Data type <b>Accounts</b> within an Import cycle.  Foreign Key: Unique ID for Linked Accounts Profile. Reference PK value from Accounts Profiles data file for an Import cycle.	200	Ex: (40002, AC40002)	
RES_Company_Profile_ID (FK)	Unique ID value for Company profile in the uploaded csv files for Data type <b>Accounts</b> within an Import cycle.  Foreign Key: Unique ID for Linked Accounts Profile. Reference PK value from Accounts Profiles data file for an Import cycle.	200	Ex: (400013, AC40003)	
RES_Travel_Agent_Profile_ID (FK)	Unique ID value for Travel agent profile in the uploaded csv files for Data type <b>Accounts</b> within an Import cycle.  Foreign Key: Unique ID for Linked Accounts Profile. Reference PK value from Accounts Profiles data file for an Import cycle.	200	Ex: (40004, AC40004)	
RES_Contact_Profile (FK)	Unique ID value of the Guest/contact profile of uploaded csv files for Data type <b>Reservations</b> within an Import cycle.  Foreign Key: Unique ID for Linked Guest Profile. Reference PK value from Guest / Contact Profiles data file for an Import cycle.	200	Ex: (30003, INC20003)	

## Importing Rooms Management

### Out Of Service

Data referenced in this import template is available on the Out of Order by Reason report (hkooobyreason). Available when the Stay Records OPERA Control is active.

Column	Description	Max Data Length	Sample Data	Mandatory
Room	The room for the Out Of Service record. The room must exist in the property.	8	Ex: (101)	
Reason_Code	The Out of Service reason. The reason must exist in the property.	8	EX: (BULB)	
Begin_Date	The Begin Date of the Out of Service record. The Begin Date has to be equal to or greater than the current business date of the property. The Begin Date cannot be after the End Date. The format must be 'YYYYMMDD	8	Ex: (20230501)	
End_Date	The End date of the Out of Service record. The End Date has to be equal to or greater than the Begin Date of the property. The format must be 'YYYYMMDD	8	Ex: (20230510)	
Return_Status	The room status the room will be upon being removed from Out Of Service. Valid values are: - DI - CL - IP (when the Inspected Status OPERA Control is active) - PU (when the Pickup Status OPERA Control is active)	2	Ex: (DI)	

Column	Description	Max Data Length	Sample Data	Mandatory
Repair_Remarks	Any optional remark related to the out of service record.	1000	Ex: (Bathroom Bulb is broken)	

### Out Of Order

Data referenced in this import template is available on the Out of Order by Reason report (hkooobyreason). Available when the Out Of Order OPERA Control is active.

#### Note:

Once imported a [Room Inventory Synchronization](#) must be performed for the date range of the imported Out of Order records.

Column	Description	Max Data Length	Sample Data	Mandatory
Room	The room for the Out Of Order record. The room must exist in the property.	8	Ex: (101)	
Reason_Code	The Out of Order reason. The reason must exist in the property.	8	EX: (BULB)	
Begin_Date	The Begin Date of the Out of Order record. The Begin Date has to be equal to or greater than the current business date of the property. The Begin Date cannot be after the End Date. The format must be 'YYYYMMDD	8	Ex: (20230501)	
End_Date	The End date of the Out of Order record. The End Date has to be equal to or greater than the Begin Date of the property. The format must be 'YYYYMMDD	8	Ex: (20230510)	

Column	Description	Max Data Length	Sample Data	Mandatory
Return_Status	The room status the room will be upon being removed from Out Of Order. Valid values are: - DI - CL - IP (when the Inspected Status OPERA Control is active) - PU (when the Pickup Status OPERA Control is active)	2	Ex: (DI)	
Repair_Remarks	Any optional remark related to the Out of Order record.	1000	Ex: (Bathroom Bulb is broken)	

### Room Conditions

Data referenced in this import template is available on the Room Conditions report (hkassignroomall). Available when the Room Conditions OPERA Control is active.

Column	Description	Max Data Length	Sample Data	Mandatory
Room	The room for the Room Condition record. The room must exist in the property.	8	Ex: (101)	
Assign_Reason	The reason to assign a room condition to the room. The reason must exist in the property.	8	Ex: (CARPET)	
Remarks	Any optional remark related to the room condition.	2000	Ex: (Wet Carpet)	

### Room Maintenance

Unresolved (open) status. Data referenced in this import template is available on the Room Maintenance report (room\_maintenance). Available when the Room Maintenance OPERA Control is active.

Column	Description	Max Data Length	Sample Data	Mandatory
Room	The room for the Room Maintenance record. The room must exist in the property.	8	Ex: (101)	

Column	Description	Max Data Length	Sample Data	Mandatory
Reason	The reason to mark the room for maintenance. The reason must exist in the property.	8	Ex: (WINDOW)	
Repair_Remarks	Any remark related to the room maintenance request.	2000	Ex: (Replace Window)	

### Room Discrepancy

Data referenced in this import template is available on the Room Discrepancy report (hkroomdiscrepancy). Available when the Discrepant Rooms OPERA Control is active.

Column	Description	Max Data Length	Sample Data	Mandatory
Room	The room for the Room Discrepancies record. The room must exist in the property.	8	Ex: (101)	
HK_Status	The housekeeping status of the room. Valid Values are OCC and VAC.	3	Ex: (VAC)	

### Guest Service Status

Data referenced in this import template is available on the Housekeeping Details report (hk\_details). Available when the Guest Service Status OPERA Control is active.

Column	Description	Max Data Length	Sample Data	Mandatory
Room	The room for the Guest Service Status record. The room must exist in the property.	8	Ex: (101)	
Service_Status	The Guest Service Status of the room. Valid values are DND and MUP.	3	Ex: (MUP)	

### Room Status

Data referenced in this import template is available on the Room Discrepancy (hkroomdiscrepancy) or the Housekeeping Details (hk\_details) report.

- IP (when the Inspected Status OPERA Control is active)

- PU (when the Pickup Status OPERA Control is active)

Column	Description	Max Data Length	Sample Data	Mandatory
Room	The room for the Room Status record. The room must exist in the property.	8	Ex: (101)	
Status	The status of the room. Valid Values are: <ul style="list-style-type: none"> <li>• DI</li> <li>• CL</li> <li>• IP (when the Inspected Status OPERA Control is active)</li> <li>• PU (when the Pickup Status OPERA Control is active)</li> </ul>	2	Ex: (DI)	

## Importing Sales Activities

- Mandatory columns are marked in bold.
- The **ACT\_Unique\_ID\_Activity** value is stored in "ORIG\_WO\_NUMBER" field.
- Child Activities will not be imported.

 **Note:**

You can import the sales activities for past dates (historic activities). If any associated entities, such as profiles or blocks, linked to these historic activities are not part of the import, these columns should be left empty in the import file.

**Table 24-11 Sales Activities**

Name	Description	Max Data Length	Sample Data	Mandatory
ACT_Unique_ID_Activity (PK)	Unique ID value for Activity in the uploaded csv files for Data type "Activity" within an Import cycle.	200	Ex: (10001, 10002)	
ACT_Start_Date	The Start Date of the Activity. The format must be 'YYYYMMDD.'	Date	Ex: (20210121)	

Table 24-11 (Cont.) Sales Activities

Name	Description	Max Data Length	Sample Data	Mandatory
ACT_End_Date	The End Date of the Activity. The format must be 'YYYYMMDD.'	Date	Ex: (20210122))	
ACT_Start_Time	The Start Time of the Activity. This field is available for an Appointment Activity. The format must be 'HH24MI.'	Time	Ex: (1400)	
ACT_End_Time	The End Time of the Activity. This field is available for an Appointment Activity. The format must be 'HH24MI.'	Time	Ex: (1500)	
ACT_Type	The Activity Type of the Activity. The Activity Type must be pre-configured in OPERA Cloud.	20	Ex: (FOL, SAL)	
ACT_Owner	The Owner of the Activity.	10	Ex: (ALL)	
ACT_Class	Activity Class like TODO, APPOINTMENT.	20	Ex: (TODO, APPOINTMENT )	
ACT_Purpose	The description of this Activity.	2000	Ex: (Sales Call)	
ACT_Account_ID (FK)	The Primary Account ID linked to the Activity. Unique ID value for Account profile in the Uploaded csv files for Data type "Account" for an Import cycle.	200	Ex: (200010)	
ACT_Block_ID (FK)	The Primary Block ID linked to the Activity. Unique ID value for Block in the Uploaded csv files for Data type "Block" for an Import cycle.	200	Ex: (400010)	

Table 24-11 (Cont.) Sales Activities

Name	Description	Max Data Length	Sample Data	Mandatory
ACT_Contact_ID (FK)	The Primary Contact ID linked to the Activity. Unique ID value for Guest/Contact profile in the Uploaded csv files for Data type "Guest/Contact Profiles" for an Import cycle.	200	Ex: (300010)	
ACT_Priority	Priority of the current Activity.	1	Ex: (Y, N)	
ACT_Completed_Date	Date on which the Activity was completed. The format must be 'YYYYMMDD.'	DATE	Ex: (20210122)	
ACT_Completed_Time	Time on which the Activity was completed. The format must be 'HH24MI.'	Time	Ex: (1500)	
ACT_Notes	Notes about the problem, which can be used by different employees working on this problem.	4000	Ex: (Follow Up call with Customer)	
ACT_RESULT	Activity result. This field is available when activity is completed and Activity Results parameter is Active. The Activity Result must be pre-configured in OPERA Cloud.	2000	Ex: (Success)	

## Importing Stay Records

- **Data Type:** Stay Records
- Mandatory columns are marked in bold.
- Configuration required prior to importing Stay Records:
  - Rate Codes.
  - Revenue Bucket Codes for the 'Profile' bucket type.
  - Revenue Types.

Stay Records import is associated with existing Profiles and Membership Details (Membership Type and Number) if any.

**Table 24-12 Stay Records**

Column	Description	Max Data Length	Sample Data	Mandatory
<b>Filename: Stay_records.csv</b>

				<p><b>Note:</b> Either of the below is required.</p> <ul style="list-style-type: none"> <li>NameID: If nameId is provided, the system will use the same</li> <li>PMSNameID: If pmsNameId is provided, the system will fetch nameId from the name_subscription table</li> </ul>
STP_pmsNameId	Name ID from the external system.	20	EX: (100002)	
STP_profileRole	Represents how the profile is related to the reservation. Only below 4 values can be used: <ul style="list-style-type: none"> <li>CONTACT_ACCOUNT</li> <li>CONTACT_AGENT</li> <li>CONTACT_RESV</li> <li>CONTACT_RESV_BILL</li> </ul>	20	EX: (CONTACT_RESV)	

**Table 24-16 Stay Record Revenue**

Column	Description	Max Data Length	Sample Data	Mandatory
<b>Filename: Stay_Records_Revenue_Details.csv</b>				
STR_Stay_Record_Map_Id	Primary ID to map the record to its parent record (ST_Stay_Record_Map_Id)	NUMBER	EX: (100)	
STR_folioView	Billing Window	40	EX: (1)	
STR_revenueAmount	Revenue Amount	NUMBER	EX: (10000)	
STR_revenueBucketCode	Revenue Type	20	EX: (ROOM REV)	
STR_transactionDate	Transaction Date	DATE	EX: (20230101)	

## Importing Track It

- **Data Type:** Track it
- Mandatory columns are marked in bold.
- Only Track It records in **Open** status can be imported.
- Linking Reservations to Track It records is not supported. Reservations details can be added in the **Description**.

**Table 24-17 Track It Records**

Column	Description	Max Data Length	Sample Data	Mandatory
<b>Filename: TrackIt.csv</b>				
TRACKIT_ID	Unique ID value for Track It record.	NA	Ex: (50001)	
TICKET_NO	The number or identifier assigned to this record	80	Ex: (S-13958636)	
REFERENCE_NO	For the Valet Track It Group, an additional number or identifier assigned to this record.	20	Ex: (32857895)	
TI_GROUP	The Track IT Group like Lost, Baggage, Parcel or Valet.	20	Ex: (BAGGAGE)	

Table 24-17 (Cont.) Track It Records

Column	Description	Max Data Length	Sample Data	Mandatory
<b>Filename: TrackIt.csv</b>				
FOLLOW_UP	The Follow Up Date of the Track It. The format must be 'YYYYMMDD.'	NA	Ex: (20230904)	
DESCRIPTION	The Description of the Track It item. This can also include Reservations details like Name, Number of Nights, Arrival and Departure Dates and Room Number.	2000	Ex: (Black medium sized suitcases)	
LOCATION	The Location associated to this record. The Location must be pre-configured in OPERA Cloud.	20	Ex: (CLOSET)	
ACTION	The Action associated to this record. The Action determines whether the record has a status of Open or Closed. Only Open records can be imported. The Action must be pre-configured in OPERA Cloud.	20	Ex: (STORAGE)	
TRACKIT_TYPE	The Type assigned to this record. The Track It type must be pre-configured in OPERA Cloud.	20	Ex: (LUGG)	
QUANTITY	For Parcel, Baggage or Lost Track It groups this field indicates the number of Items	NA	Ex: (2)	
MSGID	Unique ID used for integration with XXXX	NA	Ex: (5768)	
EXTERNAL_ID	Unique ID used for integration with XXXX	80	Ex: (30299)	

## Importing Ledgers

Ledgers import requires reference to the OPERA Cloud **Confirmation Number**; therefore, the profile and reservation import must be completed initially. When the **Unique Confirmation**

**Number for Linked Reservations** OPERA Control is active, also provide the **Reservation Name ID** for uniqueness.

- For deposit ledger, a 'balance forward' amount is posted to each reservation. The **Deposit Ledger Balance Forward Transaction Code OPERA Control** must reference a transaction code setup as other-payment type.
- For guest ledger, a 'balance forward' amount is posted to each reservation sub-account (1-8). The **Guest Ledger Balance Forward Transaction Code OPERA Control** must reference a sales/non-revenue charge transaction code (with no tax generates).
- For AR Ledger Invoices, a 'balance forward' amount is posted. The **Old Balance Transaction Code OPERA Control** must reference a transaction a sales/non-revenue charge transaction code (with no tax generates).

 **Note:**

Package ledger (allowances) cannot be imported.

### Deposit Ledger

Column Name	Description	Max Data Length	Sample Data	Mandatory
RES_UNIQUE_ID_DEPOSIT	Unique sequence auto-generated field to identify a unique row like a primary key column	20	Ex:(300065)	
RES_CONFIRMATION_NUMBER	OPERA Cloud Reservation Confirmation Number	20	Ex:(2803423)	
RESV_NAME_ID	Reservation Name ID	20	Ex:(300065)	
RES_DEPOSIT_BALANCE	Deposit Amount (Enter a debit amount to post as a credit to deposit ledger)	Number	Ex:(4000)	

### Guest Ledger

- Reservation balance is imported per sub-account (billing windows 1-8).
-  COMP sub-accounts (101-108) are not supported.

Column Name	Description	Max Data Length	Sample Data	Mandatory
RES_UNIQUE_ID_DEPOSIT	Unique sequence auto-generated field to identify a unique row like a primary key column	20	Ex:(300065)	

Column Name	Description	Max Data Length	Sample Data	Mandatory
RES_CONFIRMATION_NUMBER	OPERA Cloud Reservation Confirmation Number	20	Ex:(2803423)	
RES_FOLIO_VIEW	Reservation Sub Account (Billing Window 1-8)	1	Ex:(4000)	
RES_GUEST_BALANCE	Sub Account Balance Amount (Enter a debit amount to post as a debit to the guest ledger)	Number	Ex:(4000)	
RESV_NAME_ID	Reservation Name ID	20	Ex:(300065)	

#### AR Ledger - AR Account Invoices

AR balance is imported per Invoice, per AR Account.

Column Name	Description	Max Data Length	Sample Data	Mandatory
AR_UNIQUE_ID_INVOICE_NO	Unique sequence auto-generated field to identify a unique row like a primary key column	20	Ex:(300065)	
AR_INVOICE_TRANSACTION_DATE	AR Invoice Transaction Date	Date (YYYYMMDD)	Ex:(20231130)	
AR_INVOICE_FOLIO_NO	Actual Bill Number (will be displayed on the reference field)	20	Ex:(236457)	
AR_INVOICE_BALANCE	AR Invoice Balance	Number	Ex:(4000)	
AR_INVOICE_AGE_BUCKET	AR Invoice Age Bucket (Range) per setup of <b>Aging Level Details</b> OPERA Control	1	Ex:(4)	
AR_INVOICE_ACCOUNT_NO	AR Account Number	20	Ex:(2803423)	

# Configuring SFTP Connections

Secure FTP (SFTP) is a secure way to transfer [exports](#) and [scheduled reports](#) to remote servers.

## SSH Options For SFTP

Secure File Transfer Protocol (SFTP) is based on the Secure Shell technology (SSH); the following SSH options are supported for SFTP delivery.

SSH Option	Supported Values
ECDSA	<ul style="list-style-type: none"> <li>ecdsa-sha2-nistp256</li> <li>ecdsa-sha2-nistp384</li> <li>ecdsa-sha2-nistp521</li> </ul>
Public Key Algorithm	<ul style="list-style-type: none"> <li>ssh-dss</li> <li>ssh-rsa</li> </ul>

[Watch Video](#)

## Adding SFTP Configuration

In multi-property operations, SFTP configuration can be global (all properties) or property-specific.

### Note:

The SFTP **Hostname** must be added to the Outbound Domain Allowlist prior to being configured. The default port for Secure FTP (SFTP) is 22. For more information, see [Configuring Outbound Domain Allow Listings](#).

- From the **Toolbox** menu, select **System Setup**, and then **SFTP Configuration**.
- Click **New** and complete the following:
  - Context:** Select a value from the list.
    - Global:** Select to define a chain-level SFTP configuration available to all properties.
    - Property:** Select to define a property-specific SFTP configuration.
  - SFTP Code:** Enter Unique SFTP Code you want to create, preferably with the following recommended format:
    - When creating at Chain Level use **CHAIN CODE+SFTP CODE**.
    - When creating at Property Level use **PROP CODE+SFTP CODE**.
  - Description:** Enter a description.
  - Hostname:** Enter the SFTP Server Hostname.
  - Port Number:** Enter the Port Number.
  - Auth Type:** Select a value from the list.

- g. **Password:** Enter password to authenticate using basic authentication method such as user account and password details.
  - h. **Key:** Enter key to authenticate using open authorization method such as OAuth Token URL and credential details.
  - i. **Key with Passphrase:** Enter key phrase to authenticate using open authorization details like, OAuth Token URL and credential details.
  - j. **Username:** Enter the username.
  - k. **Private Key:** Enter the private key.
  - l. **Passphrase:** Enter the passphrase.
  - m. **Host Key:** Enter the public key of the server specified in **Hostname** (the server's public key).
3. Click **Save**.

#### Editing SFTP Configuration

1. From the **Toolbox** menu, select **System Setup** , and then **SFTP Configuration**.
2. Enter search criteria and click **Search**.
3. Select the SFTP in search result, click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Update configuration.
  - b. **Inactive:** Select the checkbox to set the SFTP connection inactive. Deselect the checkbox to activate.
4. Click **Save**.

#### Validating SFTP Connectivity

1. From the **Toolbox** menu, select **System Setup** , and then **SFTP Configuration**.
2. Enter search criteria and click **Search**.
3. Select the SFTP Code in search results, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Click **Add Rows** to add folder and folder path.
  - a. **Folder Name:** Enter the logical name for the specified folder path.
  - b. **Folder Path:** Enter the folder path.

 **Note:**

Each folder must be validated prior to saving the SFTP configuration. Refresh the page to view validation status.

- i. Click the vertical ellipsis **Actions** menu and select **Validate**.
- ii. Select **Refresh** to view the validation status of each folder.
- iii. Click **Save**.

## Deleting SFTP Configuration

 **Note:**

Ensure the SFTP **Hostname** must be added to the Outbound Domain Allowlist. For more information, see [Configuring Outbound Domain Allow Listings](#).

1. From the **Toolbox** menu, select **System Setup** , and then **SFTP Configuration**.
2. Enter search criteria and click **Search**.
3. Select the SFTP in search result, click vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring External Databases

The External Database Setup feature in the Toolbox menu is essential for external systems configuration in OPERA Cloud and for integration with the correct chain/property. Its purpose is to link each property in the multi-tenant cloud to its respective external system and external database ID.

 **Note:**

External databases are auto-configured for an external system when the **Auto Configure External Databases** checkbox is selected in [Configure External System](#).

The feature enables you to create new external database configurations based on existing Interface Types. You create a unique External Database Code with a description to identify each new configuration. The description should include the External Database Code and a full external database name to explain its system type and use. OPERA Cloud will provide a list of properties that use the Interface Type you specify in your search. From the list, you can highlight and select one or more properties to move into your new configuration. You can save and continue the process of creating the external database.

You can also edit external database setups to update database descriptions and to add or remove linked properties. The search function provides a list of databases, each identified by a code, a description, and an interface type. You can expand each database listed in your search results to reveal the properties attached to the database. You can also elect to show inactive database/interface types or to hide inactive database/interface types using. Database/interface types remain configured even if shown as inactive.

Use the following search criteria to locate an interface type for your property.

1. **Interface Type** : Select an interface type from the list to search interface types already configured. You can then edit the interface type. The same interface type might be associated with multiple databases, so the list shows all of the available databases when referencing the interface type.

2. **Property:** Enter the external database name to filter search results based on a specific property database. The property database can include multiple properties, depending on its current configuration and name.
3. **Code:** Enter an external database code or partial code.

### Adding External Databases

1. From the **Toolbox** menu, select **System Setup** then **External Databases**.
2. Click **New** and enter the following details:
  - a. **Code:** Enter a code for the external database. The code is displayed in profile subscriptions. This code is also seen when configuring Business Events for special External Databases.
  - b. **Description:** Enter full name to explain the location and use.
  - c. **External System:** Select an external system from the list. For more information, see [Configuring External Systems](#)
  - d. **Outbound Code:** Select outbound code to link with external database code. For more information, see [Configuring Outbound Systems](#)
  - e. **Copy Subscription:** Select checkbox to copy default business events configuration for the database code created for an external system.
  - f. **Available > Selected:** Select applicable properties in the **Available** panel and click **>** to move selection to the **Selected** panel.
3. Click **Save and Continue**.

### Editing External Databases

1. From the **Toolbox** menu, select **System Setup** then **External Databases**.
2. Enter search criteria and click **Search**.

#### Note:

Click **Vertical Ellipsis** and select **Show Inactive** to include inactive records

3. Select an external database in the result, click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the details.
  - a. **Inactive:** Click to mark the external database inactive.
5. Click **Save**.

### Deleting External Databases

1. From the **Toolbox** menu, select **System Setup** then **External Databases**.
2. Enter search criteria and click **Search**.
3. Select an external database in the result, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

# Configuring Service Locator Operations

## Watch Video

Service Locator is a routing integration pattern used to route the respective API request from OPERA Cloud to the selected [Outbound Systems](#) or OPERA Cloud internal services. Service Locator configuration allows you to map an outbound code for each OPERA Cloud REST API operation at chain, hub or property level. Whenever users perform any business operation in OPERA Cloud, if the particular operation is configured with an Outbound Code, the request is routed to the outbound system based on the user context and service locator configuration. If there is no outbound code configured for the user operation, then the request is made to the respective OPERA Cloud REST web service.

For example, You have developed your own ContactCenter application using OPERA Cloud REST APIs, with business specific extended functionality for the call center team and whenever your operations team creates or updates a profile in OPERA Cloud, you wish to create and update profiles in the ContactCenter application instead of OPERA Cloud. You need to configure an Outbound Code for the ContactCenter and configure the Outbound Code for the profile APIs in Service Locator for your chain.

Service Locator requires [Configuring Outbound Systems](#)

### Note:

An inbound API call can be bypassed to OPERA Cloud instead of the external system configured in Service Locator by sending the HTTP header `bypass-routing=Y` in the request.

Service Locator configuration at:

- Global (chain) level context is used for the transactions performed by the users at property-level and hub-level context. In this case, create an outbound code at the chain-level as prerequisite.
- Hub level context is used for the transactions performed by the users at hub-level context. In this case, create an outbound code at property level for one of the hub properties as prerequisite.
- Property level context is used for the transactions performed by the users at the same property-level context. In this case, create an outbound code at the property level as prerequisite.

The same routing logic is applied for the inbound requests received from partner systems through the Oracle Hospitality Integration Platform (OHIP) to OPERA Cloud web services.

It is recommended to configure outbound code and service locator at global (chain) context if all properties of the chain reference the same outbound system, else configure specifics for a property or hub.

**Note:**

To use this routing integration pattern, the outbound system should accept and implement the solution by adopting the OPERA Cloud REST APIs specifications.

**Editing Service Locators**

1. From the **Toolbox** menu, select **System Setup**, and then select **Service Locator**.
2. Select the context: **Global (Chain), Hub** or **Property**, select a **Module**, enter any additional search criteria, then click **Search**.
3. Click **Edit** then update the details for each operation.
  - a. **Outbound Code:** Select an outbound code from the list to route the request to the outbound system.
  - b. **Reroute to OPERA :** Select check box to redirect the operation to OPERA Cloud web services when the outbound system is unreachable.
  - c. Click **Save**.

**Copying Service Locators**

To copy the setup of one operation to many other operations.

1. From the **Toolbox** menu, select **System Setup**, and then select **Service Locator**.
2. Select the context: **Global (Chain), Hub** or **Property**, select a **Module**, enter any additional search criteria, then click **Search**.
3. Click **Edit**.
  - a. Select the operation to copy, then click the vertical ellipsis **Actions** menu and select **Copy**.
  - b. Select the destination operations then click **Apply**.

**Error Handling**

Error Message	Root Cause
Unable to reach external endpoint - 403 Forbidden	External service url not white listed.
HTTP Error Status: 404 - Not Found	External service url returning 404
Unable to reach external endpoint - 502 Bad Gateway	External service down - (502)
HTTP Error Status 502 - Bad Gateway	Unexpected Error.
HTTP Error Status: 503 - Service Unavailable	External service unavailable - (503)
HTTP Error Status: 401 - Unauthorized	Wrong credentials configured for OAuth.
Unable to download certificate for OAuth token URL	OAuth token url not added to the allow list.
Egress Proxy Authentication Error	Proxy authorization is not set or wrong proxy credentials.
Error from External system	500-Internal server error, when external system raises any business errors.

# Configuring Outbound Domain Allow Listings

## Prerequisites for Configuring Outbound Domain Allow Listings

Outbound domain allowlist configuration automates the cloud infrastructure changes required to allow outbound HTTPS, SFTP and SMTP communication from OPERA Cloud to a specified host. To initiate processing of the network changes, each outbound domain/host entry must be approved by a user with the **Approve Outbound Domain Allowlisting** task granted.

The following ports are supported:

Protocol	Port
HTTPS	<ul style="list-style-type: none"><li>• 443</li></ul>
SMTP	<ul style="list-style-type: none"><li>• 25</li><li>• 587</li><li>• 58701 - 58799</li></ul>
SFTP	<ul style="list-style-type: none"><li>• 22</li><li>• 22001 - 22099</li></ul>

Outbound Domain Status:

- **Awaiting Approval:** Waiting approval.
- **Pending:** Processing, which may take up to 6 hours.
- **Ready:** Processing complete and available for use.

### Note:

User activity is available in the [Changes Log](#), for the Outbound/SFTP Configuration group and Outbound Domain Allowlist action type.

## Adding Outbound Domain Allowlist Details

1. From the **Toolbox** menu, select **System Setup**, select **Outbound**, then select **Outbound Domain Allowlist**.
2. Click **New** and complete the following:
  - a. **Context**
    - i. **Global:** Select to setup for all properties (Requires the **Global Outbound Domain Allowlisting** task assigned to your chain role).
    - ii. **Property:** Select to setup for a selected property.
      - i. **Property:** Select a property from the list. For more information, see [Changing Your Location in Multi-Property Operations](#).
  - b. **Hostname:** Enter the host name or IP address.
  - c. **Protocol:** Select a value from the list.
  - d. **Port Number:** Enter a port number.
  - e. Click **Save**.

### Approving Outbound Domain Allowlist Details

Requires the **Approve Outbound Domain Allowlisting** task assigned to your role.

#### Note:

Processing may take up to 6 hours.

1. From the **Toolbox** menu, select **System Setup**, select **Outbound**, then select **Outbound Domain Allowlist**.
2. Enter search criteria, then click **Search**.
3. Select the outbound details (in Awaiting Approval status), then click the vertical ellipsis **Actions** menu and select **Approve**.

### Deleting Outbound Domain Allowlist Details

Processing may take up to 6 hours.

1. From the **Toolbox** menu, select **System Setup**, select **Outbound**, then select **Outbound Domain Allowlist**.
2. Enter search criteria, then click **Search**.
3. Select the outbound details, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring SMTP Connections

You can choose to set up and use your own Simple Mail Transfer Protocol (SMTP) servers (with basic authentication) or use the Oracle Cloud Infrastructure Email Delivery service for e-mail delivery.

If using your own SMTP Server:

- The SMTP server must have a public DNS name (we advise against using an IP address).
- The SMTP server must have a valid SSL certificate signed by a trusted Certificate Authority.
- The SMTP server must enforce TLS.
- An outbound allowlist entry must be set up for the SMTP FQDN and port. For more information, See [Configuring Outbound Domain Allow Listings](#).
- If the SMTP server implements IP based allow-listing, contact Oracle support to obtain the Oracle IP address for the region.

If using the Oracle Cloud Infrastructure Email Delivery service, you must set up a Sender Policy Framework (SPF) record to detect email spoofing and send emails securely.

Once setup, you can select an SMTP configuration for each email delivery method. For more information, see [Configuring Delivery Management](#).

## About SPF

Sender Policy Framework (SPF) is used by email receivers to detect email spoofing. Using SPF, an email receiver can check if the Internet Protocol (IP) is explicitly authorized to send for that domain. SPF is implemented by publishing a special TXT record to a domain's DNS records. The TXT record declares which hosts are allowed to send mail on behalf of this domain. Receiving mail servers check the SPF records of sending domains to verify that the email's source IP address is authorized to send from that domain. Without SPF, a spam or phishing email can be "spoofed" to appear that the email comes from a legitimate domain. Domains that implement SPF are much more likely to block emails attempting to spoof your domain. For an overview of how SPF works, see [Sender Policy Framework](#). For details on SPF record syntax, see [SPF Record Syntax](#). Also see [Doc ID: DOC6575](#).

## Adding SMTP Configuration

In multi-property operations, you can configure SMTP connections as global (all properties) or property-specific. Your chain role must be granted the **Global SMTP Configuration** task to add a **Global** entry.

1. From the **Toolbox** menu, select **System Setup**, then select **SMTP Configuration**.
2. Click **New** and complete the following:
  - a. **Context**: Select a value from the list.
    - i. **Global**: Select to define a chain-level SMTP configuration available to all properties.
    - ii. **Property**: Select to define a property-specific SMTP configuration.
      - i. **Property**: Select a property from the list.
  - b. **Server Name**: Enter the SMTP Server address
  - c. **Port**: Enter the SMTP Server port.
  - d. **Username**: Enter the username for SMTP authentication.
  - e. **Password**: Enter the password for SMTP authentication.
  - f. Click **Save**.

## Editing SMTP Configuration

1. From the **Toolbox** menu, select **System Setup**, then select **SMTP Configuration**.
2. Enter search criteria and click **Search**.
3. Select the SMTP server in search result, click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Update configuration.
  - b. **Inactive**: Select checkbox to set the SMTP connection inactive. Deselect the checkbox to activate.
4. Click **Save**.

## Deleting SMTP Configuration

1. From the **Toolbox** menu, select **System Setup**, then select **SMTP Configuration**.
2. Enter search criteria and click **Search**.

3. Select the SMTP server in search result, click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

# Part VI

## Exchange

This part of the OPERA Cloud Help system contains information on working with OPERA Exchange for two-way real-time data communication between OPERA and external interfaces.

# 25

## Prerequisites for Exchange

This chapter of the OPERA Cloud User Guide lists the prerequisites for Exchange menu.

### Prerequisites for OPERA Exchange Interfaces

# OPERA Cloud Exchange Overview

## Prerequisites for OPERA Exchange Interfaces

OPERA Cloud eXchange is an asynchronous electronic data exchange technology used by OPERA Cloud Foundation subscribers to exchange information with external CRS solutions such as OPERA Room Reservations or third-party solutions, and is used by OPERA Cloud Central subscribers to exchange information with remote OPERA Property properties. For example, when you update a profile or reservation in OPERA Cloud, a business event is triggered and processed by the exchange module and sent to the outbound queue, and finally sent to an external system as an XML message. Conversely, updates in the external system are sent to OPERA Cloud.

OPERA Cloud eXchange supports the following functionality to ensure data quality:

- Profile match and merge to prevent duplicates.
- Default values for missing attributes.
- Data Mapping and Conversion

Before you configure a new interface, ensure that you have the necessary privileges. Then document is set up to lead you through the following prerequisites, such as identifying the external systems, defining the database codes, then configuring the interfaces, setting up communication methods, and defining the interface controls. Address the needed mapping for OPERA Cloud Codes with the external system codes and configuring the required business events. Lastly, activate the External Systems for the Property and Interface.

### Note:

Do not activate the external system until the configuration is complete; this creates unnecessary business events being generated and failures.

# 27

## Switching the Interface

Use Switch Interface to toggle between the configured interfaces.

When a user is logged in at Hub level, both Central and Property configured interfaces are shown.

When a user is logged in at a Property level, only the Property configured interfaces are shown.

### Switching Interface

From a hub location, both property and central interfaces are listed. From a Property location, only property interfaces are listed

1. From the **Exchange** menu, select **Switch Interface**.
2. Select the following options:
  - a. **Type**: Select a type from the list.
  - b. **Property Interface**: Select to switch to a property interface.
  - c. **Central Interface**: Select to switch to a central interface 
3. **Property**: Select a property from the list.
4. **Interface**: Select an interface from the list.
5. Click **Save**.

### Creating New Interface

1. From the **Exchange** menu, select **Switch Interface**.
2. Click **Create New Interface Setup**. For more information, see [Interface Setup](#).

# Interface Setup

## Adding an Exchange Interface

1. From the **Exchange** menu, select **Interface Setup**, then select **Interface Setup**.
2. Click **New** and complete the following:
  - a. **Property**: Enter or select the Property.
  - b. Select an Interface that you need to configure.
  - c. In the Description field, the description of the interface automatically populates when you select a defined interface.
  - d. Enter the **External Property**. This is the external system's property code that is configured for the selected interface. You must enter the correct external system resort code here.
  - e. The External Database automatically gets populated in the External Database field when you select an Interface. If the database code is not automatically populated, you can click the search icon to select a database.
    - i. On the External databases screen, search for databases by Interface. If there are no codes available, you can create a new database code in the recommended format, for example, CHAIN-INTERFACE.
    - ii. Click **New** and in the External Databases dialog, enter the **Code**.
    - iii. Enter a **Description** and select or deselect the **Copy Subscription** check box.
    - iv. Select **Properties** from the available list and click **Save**.
    - v. Close the **External Databases** dialog. The database code gets defaulted to interface setup database field.
  - f. Select the **Delta Mode**.
    - i. Set it to Yes if the external system does not send the full message for changes. For example, a room type change is sent for a reservation. The external system sending these delta changes sends only the mandatory message items together with the changed room type. In this case, only the data sent would be updated in OPERA Cloud, and all other data is retained as inserted earlier. This also depends on OXI parameters.
    - ii. Set it to No if the external system sends the entire message for changes as well. This is called a 'full overlay' of data. For example, the external system sends a full message with the updated room type for the room type change. In this case, all data for this record is deleted and re-entered in OPERA Cloud. Based on the interface ID, this is already pre-configured for custom interfaces.
  - g. **Select the Data Flow**: Data Flow defines the data flow for the interface and selects all boxes that apply.
    - i. **External System -> OPERA** : Select for all interfaces that receive data from an external system.

- ii. **OPERA -> External System:** Select for all interfaces that send data from OPERA Cloud to an external system.
  - h. In the Deletion Indicator panel you can set indicators for deleting data in the OPERA Cloud system from an incoming message. This section is accessible only if the Delta Changes flag is set to **Y**, which indicates that the external system does not always send full data for a change. In this case OXI leaves data that is not sent in the message untouched in OPERA Cloud. It is therefore important that the incoming message signals clearly when data gets deleted. This is the purpose of setting the deletion indicators.
    - i. Select the values from the Character drop-down list. Character allowed values ~, \*, ^.
    - ii. Select a numeric value from the Numeric drop-down list. Numeric allowed value **-99999**.
    - iii. Select a date from the Date drop-down list.
    - iv. The Message Format defaults to XML format, which is the only format supported in cloud..
    - v. Select a version in the Set All the Version As drop-down list. When this drop-down is selected, the version in the XML Version grid also changes to the selected version when you click Save. If you wish to change the version only for a particular XML Type, select the row and change the version individually and save.
  - i. Click the vertical ellipsis **Actions** menu and select **Negotiate**. This option negotiates with the OPERA Cloud external system for the supported XML versions and updates in source interface XML versions for the XML types accordingly and is applicable for Oracle Hospitality solution (OPERA to OPERA) integrations only.
3. Click **Save**.

#### Editing an Exchange Interface

1. From the **Exchange** menu, select **Interface Setup**, then select **Interface Setup**.
2. Enter search criteria, then click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
4. Update the details.
5. Click **Save**.

#### Deleting an Exchange Interface

1. From the **Exchange** menu, select **Interface Setup**, then select **Interface Setup**.
2. Enter search criteria, then click **Search**.
3. Select the interface in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Interface Communication Methods

Communication methods defines how the OXI interface receives and transmits messages.

In multi-property operations Communication Methods setup is either Global or Property specific; when Property specific communication is setup this configuration overrides the Global configuration for the specific property.

The communication methods must be set up for each interface before the interface can be activated.

### Editing Interface Communication Methods

#### Note:

Each data flow direction requires its own setup. When no result are listed at a Property level, the Comm Method has been defined at Global (Chain) level.

1. From the **Exchange** menu, select **Interface Setup** and then select **Communication Methods**.
2. In the search panel select:
  - a. **Location**
    - i. **Global**: Select to configure for all properties
    - ii. **Property**: Select to configure for a specific property
      - i. **Property**: Select a property from the list
  - b. **Interfaces**: Click to select one or more OXI interfaces from the list
  - c. Click **Search**.
3. Select an interface and data flow direction from the search result, then click the vertical ellipsis and select **Edit**.
  - a. **Location**
    - i. **Global**: Select to configure for all properties.
    - ii. **Property**: Select to configure for a specific property.
      - i. **Property**: Select a property from the list.
  - b. **Communication Mode**:
    - i. **HTTP(S)/Client**: Select if the data is sent from OPERA Cloud to the External System
    - ii. **Details**
      - i. **URL**: Based on the data flow selected, this will be the GET URL or POST URL and defines the web server location where OXI will either get the messages that are waiting for transfer to OPERA Cloud, or where it will post the messages to the external system.
      - ii. **Username**: Enter the username provided for the client URL when basic authentication is enabled.
      - iii. **Password**: Enter the password provided for the client URL when basic authentication is enabled
      - iv. **Compress Data**: Select checkbox to enable compression of the OXI messages prior to transmission to external systems

- v. **Use Client Certificate:** This option is enabled only when the URL is configured as HTTPS protocol. Select this check box to have the OXI processor use the client certificate to authenticate against the external system server and encrypt the messages exchanged with the external system server  
NOTE: This requires an additional support process to implement
  - vi. **Sleep Timeout:** Enter number of minute where the interface rests between waking up and doing POST and GET functions. If the interface continues to receive messages, then it will not sleep. This field accepts decimals for times smaller than the (1) minute time. Time entered with a dot (.1) will be read as seconds (10 seconds).
  - vii. **Timeout:** Enter in seconds the duration the interface tries to establish a connection before treating it as "timed-out" and creating a log entry. At this time it will go into the "Sleep Time" before attempting again.
- iii. **Server:** Select if the data is posted from the External System to OPERA Cloud
- i. **Sleep Timeout:** Enter number of minute where the interface rests between waking up and doing POST and GET functions. If the interface continues to receive messages, then it will not sleep. This field accepts decimals for times smaller than the (1) minute time. Time entered with a dot (.1) will be read as seconds (10 seconds).

 **Note:**

When Communication Mode is Server, OXI/PMSInterface endpoint URL will be provided to External Systems to call for get/post messages with OPERA Cloud using Interface Service Account created in Shared Security Domain.

For more information, see [Document 2329730.1](#) -SSD SYSTEM ADMINISTRATOR - Creating Interface Service Accounts.

4. Click **Save**.

## Configuring Automatic Transmission Schedule (ATS)

This utility allows the external system to receive data in pre-definable, regular intervals. The AR EXPORT, BLOCK, INVENTORY and PROFILE DAILY STATS data modules are currently supported. At the time the next transmission kicks in, all data for the selected data module between the last transmission and this transmission is sent with this utility. This does not require OPERA Cloud business events, but it does require an OXI two-way Cloud Service subscription. When a message is sent it is identified as RTAV. You can set up multiple schedules that meet the business requirements of your property.

### Adding Automatic Transmission Schedule

1. From the **Exchange** menu, select **Interface Setup** and then select **Automatic Transmission Schedule**.
2. Click **New** and complete the following
  - a. **Property.** Enter or select the property
  - b. **Interface.** Select the interface from the list
  - c. **Module.** Select a Module from the list

- d. **Send Changes Only.** Select to only send changes (delta changes)
  - e. In the Recurrence Pattern panel,
    - i. Frequency
      - If you select Daily, select the hour in the day.
      - If it you select weekly, select the Days in the week and the Hour.
      - If you select Monthly, select the day in the month and hour in the day .
      - If you select Yearly, select the month and the day and hour in the month.
      - If you select Interval, enter the number of minutes to repeat
    - f. **Range Day:** Select the Range Days in advance for which automatic transmission shall occur. If the range is set to 30 days, OXI sends the data with start dates from current business date until 30 days in advance. Automatic Transmission has a message limitation. If the range of days exceeds 30 days, for example 60 days, then the transmission is 2 RTAV messages of 30 days each. If the range of days is 90, then the transmission is 3 RTAV messages of 30 days each, and so on.
    - g. **Future Days:** Select the Future Days. It allows for a range in the future to be returned. For example: If the business date is 06/29/19 and the Range is set for 2 days, then the Range is set from 06/29/19 to 06/30/19. If the Future field is updated to 30, then the begin date of the Range that was sent is 30 days from 06/29/19. The Start Date and End Date calculates the dates based on the Range Days and Future Dates. The start date is calculated based on property's current business date and future days. End date is calculated based on start date and range days.
3. Click **Save**.

#### Editing Automatic Transmission Schedule

1. From the **Exchange** menu, select **Interface Setup** and then select **Automatic Transmission Schedule**.
2. Enter search criteria and click **Search**.
3. Select the transmission schedule then click **Edit**.
  - a. Update the configuration
  - b. **Inactive.** Click to make the schedule inactive.
4. Click **Save**.

#### Deleting Automatic Transmission Schedule

1. From the **Exchange** menu, select **Interface Setup** and then select **Automatic Transmission Schedule**.
2. Enter search criteria and click **Search**.
3. Select the transmission schedule then click **Delete**.
4. Click **Delete** to confirm.

## Data Request

Use Data Request to synchronize data between OPERA Cloud Foundation and OPERA Cloud Central Services / OPERA Room Reservation Cloud Service; with the synchronization initiated from the solution receiving the data. Data Request differs to an [interface resynch](#) in that the data is synchronized as a "pull" rather than a "push".

For example: An "XYZ" **Market Code** is observed in OXI messages but the code does not exist in the OPERA Room Reservations configuration. Selecting to synchronize **Configuration** for the **Item Type** = MARKET CODE and **Level** = SPECIFIC and entering the text "XYZ" , a message is sent to OPERA Cloud Foundation requesting that specific data. A message is returned from OPERA Cloud Foundation containing the **Market Group** and **Market Code** information; which is populated to the Market Code Template and property-level Market Code configuration.

Note: It is not recommended to select all displayed items in the list, instead use **Level** = ALL. To request a large number of specific items, it is recommend to reduce selection to multiple smaller groupings.

### Requesting Synchronize Data

1. From the **Exchange** menu, select **Interface Setup**, and then select **Data Request**.
2. **Property**: Select a property from the list.
3. **Interface**: Select an external system from the list.
4. Data Request Module to Synchronize
  - a. **Reservations**: Select check box to synchronize reservations.
    - i. **Arrival**: Enter an arrival date range.
    - ii. **Stay**: Enter a stay date range.
    - iii. **Created**: Enter a creation date range.
    - iv. **From Date**: Enter a start date.
    - v. **To Date**: Enter an end date.
  - b. **Blocks**: Select check box to synchronize blocks.
    - i. **Begin (Start)**: Enter a start date range.
    - ii. **Stay**: Enter a stay date range.
    - iii. **Created**: Enter a creation date range.
    - iv. **From Date**: Enter a start date.
    - v. **To Date**: Enter an end date.
  - c. **Rates**: Select check box to synchronize rates.
    - i. **From Date**: Enter a start date.
    - ii. **To Date**: Enter an end date.
  - d. **Packages**: Select check box to synchronize packages.
    - i. **From Date**: Enter a start date.
    - ii. **To Date**: Enter an end date.
  - e. **Profiles**: Select check box to synchronize profiles.
    - i. **From Date**: Enter a start date.
    - ii. **To Date**: Enter an end date.
  - f. **Configuration**: Select check box to synchronize configuration.
    - i. **Item**: Select a configuration item from the list.
    - ii. **Level**: Select a level from the list.
    - iii. **Items**: Select items from the list.

reservation, without applying any further matches (based on the profile's same first and last name).

**Table 28-1 Guest / Contact Profile Types**

<b>Message Displayed to the User</b>	<b>Internal Matching Criteria</b>
Matched on Name Code	Matches on Client ID and Name Type
Matched on Membership Number	Matches on the Membership Number
Matched on Credit Card and Name	Matches on the Credit Card Number and the Last Name Note: When the Credit Card Vault functionality is active, credit card numbers are replaced with a Unique ID which will be communicated between OPERA Cloud and OXI.
Matched on Passport Number	Matches on the Passport Number Note: Id type role should be PASSPORT
Matched on Email	Matches on Communication Type Email. Note: This match will be made even when an email type other than EMAIL is used.
Matched on Last and Phone	Matches on the Last Name, Phone Number (stripped of all non-numeric characters), Phone Type
*Matched On Last, Address1, City	Matches on Last Name, Address line 1, and City
*Matched On Last and Address1	Matches on Last Name and Address line 1
*Matched On Last and Postal Code	Matches on Last Name and Postal Code
*Matched On Last and City	Matches on Last Name and City

**Table 28-2 Travel Agent / Company / Source / Group Profile Types**

<b>Message Displayed to the User</b>	<b>Internal Matching Criteria</b>
Matched on Name Code	Matches on Client ID (Name Code) and Name Type
Matched on Credit Card and Name	Matches on the Credit Card Number and the Last Name
Matched on Company and Phone	Matches on the Company Name and the Phone Number (stripped of all non-numeric characters), Phone Type
*Matched on Company, AR number	Matches on Company Name and AR number
*Matched on Company and Address1	Matches on Company Name and Address line 1
*Matched on Company, Postal Code	Matches on Company Name and Postal Code.
*Matched on Company, City	Matches on Company Name and City

 **Note:**

The internal Interface Controls (hidden in normal Interface Controls table) DATABASE\_SIZE has a default value of Large. For a large property, only match criteria without the asterisk will be used for internal entry match. If the Interface Controls DATABASE\_SIZE is set to Small, for smaller properties that can afford a more accurate match without adding performance overhead, all match criteria including the ones with asterisk \* will be evaluated. Contact profiles will also go through Match and Merge rules. No additional setup is required in OXI for Profile Merge rules.

### Examples of Entry Match Criteria

When a profile is sent to OPERA Cloud through OXI it will search the internal entry match criteria based on the above-mentioned hard coded requirements. When a profile does not meet any of these entry match criteria, it will automatically be created newly if the Interface Controls PROF\_CREATION is turned ON. If that Interface Controls is turned off, the profile match will fail and the profile will not be created.

Entry Match Criteria NOT successful:

Example: If a profile is sent with only a first name and last name, it will not even proceed to the weighing points match criteria, as the first name and last name are not sufficient for the entry match criteria. A new profile will be created if the Interface Controls PROF\_CREATION is turned ON. If that Interface Controls is turned OFF, the profile match will fail and the profile will not be created. An exception to the rule: We are preventing the duplication of profiles in case only last/first name are sent for a reservation change. OXI skips the profile match entirely in this case. It searches for the name\_ID (internal ID number) of the profile in OPERA Cloud that is linked to the reservation sent, and if that profile has the same last and first name as the profile sent as part of the reservation change, OXI will update the same profile without applying any further matches.

Entry Match Criteria successful:

Example: If a profile comes with a last name and a membership number, it will pass the entry match criteria and proceed on to the weighing points match criteria. From here, the weighing points configured in the OXI profile matching module decide whether the profile will be merged with an existing OPERA Cloud profile or not.

### Definable Weighing Points Match Criteria

Once the internal entry match was successful, the system will continue matching on the defined weighing points. The configuration of merge rules and weighing points can be done individually for each interface ID/OPERA Cloud property combination in OXI. Each profile type can be configured separately within an interface ID/OPERA Cloud property combination. You have to consider the best possible approach for distributing weighing points to the merge rules, as these may differ by profile type, geographical location of the property, data accuracy sent by external system, etc. All merge rules selected must add up to, or be above the threshold set. This means if the threshold is set to 1000 points, weighing points must be distributed to merge rules of columns or column combinations to add up to at least 1000 points in total. Otherwise no successful profile match will be made.

**Table 28-3 Available fields for setting up Merge Rules**

Merge Attribute	OPERA Cloud Field
ADDRESS1	Address1 within Address
TELEPHONE	Telephone number
CITY	City within address
COMPANY	Company Name related to account profile type
COUNTRY	Country field within address
EMAIL	Email address
FIRST	First Name of Guest or Contact Profile
LAST	Last Name of Guest or Contact Profile
MEMBERSHIPS	Membership Number on a profile
NAME_CODE	Client ID of a profile (IATA Code / CORP id for Account Profile)
PASSPORT_NO	Passport Number
POSTAL_CODE	Postal Code within address
STATE	State within address
AR_NUMBER	Accounts Receivable Number on profile

### Fields

**Profile Type.** The profile type for which merge rules and weighing points are configured. Options are guest, company, travel agent, source, and group.

**Merge Rule.** The 'Threshold' is the initial merge rule that is set automatically when a new interface is being configured. The 'Match' merge rules need to be set manually by you, and can consist of either one data field or a combination of data fields that need to be met to obtain your defined weighing points.

**Type.** OXI will automatically prompt 'Threshold' first in case no entries have been made into the profile matching setup yet. Once the threshold is set, all other types will become 'Match' as they apply to the merge rules.

**Points.** Weighing points for the threshold will be the minimum points a profile has to achieve in order to be matched. Weighing points for the matches are defined by you, and would be set according to the data field/combination of data fields that you select.

- Example: Assume the threshold for minimum points is set to 1000. When you define a merge rule with a single data field entry of Last Name, this will never be eligible to make the full match of 1000 points, so you would probably only give a part of the points to it (e.g., 300). Then you will want to add the next merge rule for another data field that makes the 1000 points complete – like Memberships - where you would give the remaining 700 points to. You can also opt to add another several merge rules consisting of Address 1 and City, for example, and give respective weighing points to these in order to make the 1000 points complete.
- One of the easiest options will be to define a combination of data fields that would meet the necessary 1000 points within the same merge rule, as shown in the sample screen above.

**Apply.** The activation flag for the merge rule. This must be checked for the merge rule to be applied. A merge rule can also be created and then temporarily be deactivated by blanking out this flag.

## Setting up Merge Rules

The merge rules can be configured either as merge rules for individual data fields or for data field combinations, where the weighing points will only apply if all components in that combination match. When setting the merge rules, note the following:

- For Direct Guest merge rules use LAST for the Last name.
- For Travel Agent merge rule uses COMPANY for the TA name and NAME\_CODE for the IATA number.
- For Group merge rule use LAST for the group name.
- For Company merge rule uses COMPANY for the company name and NAME\_CODE for the Corporate ID.
- For Source merge rule use LAST for the source name.

## OXI Interface Controls and Profile Matching

The following OXI Controls determine the profile matching results:

- PROF\_MATCHING. Profile matching only occurs when set to Y. When PROFILE\_MATCHING is active, OXI will validate the incoming profile message before executing the match and merge process to verify that the data contained in the message is sufficient to exceed the threshold points. If the data is not sufficient an optional warning will be generated indicating there is not sufficient data to meet the threshold and the match and merge process will not be executed.

### Note:

Profile matching can be set to N if , prior to system cut-over, the two systems are synchronizing data with the profiles sent from OPERA Cloud to the external system and the external system returning a unique ID. OPERA Cloud then stores this ID for primary match and merge. This process renders the use of match and merge a duplicate effort and therefore inefficient and not required.

- PROF\_CREATION. This Interface control determines whether a new profile should be created if the profile match was not successful. This must be set to Y for all interfaces that transmit reservations. If set to N, any non-matching profiles will be rejected and not created newly.

## OXI Interface Controls and Profile Update in OPERA Cloud

**Table 28-4 Several OXI Interface Controls determine how the profiles are updated in OPERA Cloud:**

IND EXT SYS OVER	<p>Profile overwrite priority for guest profiles.</p> <ul style="list-style-type: none"> <li>• When active the external system can update the OPERA Cloud profile details.</li> <li>• When inactive the OPERA Cloud profile details will remain untouched when a profile is merged with the one sent by external system. This applies to all columns in the NAME table</li> </ul>
------------------	---

**Table 28-4 (Cont.) Several OXI Interface Controls determine how the profiles are updated in OPERA Cloud:**

TA EXT SYS OVER.	<p>Profile overwrite priority for travel agent profiles.</p> <ul style="list-style-type: none"> <li>• When active the external system can update the OPERA Cloud profile details.</li> <li>• When inactive the OPERA Cloud profile details will remain untouched when a profile is merged with the one sent by external system. This applies to all columns in the NAME table</li> </ul>
CORP EXT SYS OVER	<p>Profile overwrite priority for Company / Agent profiles</p> <ul style="list-style-type: none"> <li>• When active the external system can update the OPERA Cloud profile details.</li> <li>• When inactive the OPERA Cloud profile details will remain untouched when a profile is merged with the one sent by external system. This applies to all columns in the NAME table</li> </ul>
SOURCE EXT SYS OVER	<p>Profile overwrite priority for source profiles</p> <ul style="list-style-type: none"> <li>• When active the external system can update the OPERA Cloud profile details.</li> <li>• When inactive the OPERA Cloud profile details will remain untouched when a profile is merged with the one sent by external system. This applies to all columns in the NAME table</li> </ul>
GROUP EXT SYS OVER.	<p>Profile overwrite priority for group profiles</p> <ul style="list-style-type: none"> <li>• When active the external system can update the OPERA Cloud profile details.</li> <li>• When inactive the OPERA Cloud profile details will remain untouched when a profile is merged with the one sent by external system. This applies to all columns in the NAME table</li> </ul>
PHONE/ADDR EXT SYS OVER	<p>Profile overwrite priority for phone and address collections.</p> <p>This parameter determines how the phones/addresses received from the external system update the phones/addresses in OPERA Cloud and which OPERA Cloud records are included in the outbound messages. This parameter will supersede the Delta setting of the interface.</p> <p>A = If received, replace OPERA Cloud values with the received values. If not received, remove the values from OPERA Cloud.</p> <p>B = If received, replace OPERA Cloud values with the received values. If not received, do not remove the values from OPERA Cloud.</p> <p>C = If received, merge the received values with OPERA Cloud values. If not received, remove the values from OPERA Cloud.</p> <p>D = If received, merge the received values with OPERA Cloud values. If not received, do not remove the values from OPERA Cloud .</p> <p>E = If received, replace only those OPERA Cloud values configured in conversion with the received values. If not received, remove only those OPERA Cloud values configured in conversion. In outbound messages, send only those records with converted types. N = Ignore the phone/addresses received. Do not touch the values in OPERA.INTEREST EXT SYS OVER. If set to Y, interests in the OPERA Cloud profile will always be overwritten by external system interests. If set to N, external system interests will be appended to existing OPERA Cloud ones.</p>

**Table 28-4 (Cont.) Several OXI Interface Controls determine how the profiles are updated in OPERA Cloud:**

PREF EXT SYS OVER.	This parameter is applicable only if the profiles are allowed to be updated in general. This means at least one of the parameters IND EXT SYS OVER, CORP EXT SYS OVER, TA EXT SYS OVER, SOURCE EXT SYS OVER, or GROUP EXT SYS OVER should be turned ON. If this parameter is set to Y or N and the interface is configured as 'Delta Changes = Y' and no preferences are received in the profile message, existing preferences in the OPERA Cloud profile will remain untouched. Otherwise, if this parameter is set to 'Y', existing preferences in OPERA Cloud profile will be replaced with the preferences received in the message, if set to 'N', preferences received in the message will be added to the existing preferences in OPERA Cloud profile, if set to 'C', OPERA Cloud profile preferences configured in 'Guest Preference' conversion will be replaced with the preferences received in the message.
PROFComments EXT SYS OVER	This parameter is applicable only if the profiles are allowed to be updated in general. This means at least one of the parameters IND EXT SYS OVER, CORP EXT SYS OVER, TA EXT SYS OVER, SOURCE EXT SYS OVER, or GROUP EXT SYS OVER should be turned ON'. If this parameter is set to Y or N and the interface is configured as 'Delta Changes = Y' and no comments are received in the profile message, existing comments in the OPERA Cloud profile will remain untouched. Otherwise, if this parameter is set to 'Y', existing comments in OPERA Cloud profile will be replaced with the comments received in the message, if set to 'N', only those comments in OPERA Cloud profile last updated by this interface will be replaced with the comments received in the message, all other comments will remain unchanged, if set to 'C', OPERA Cloud profile comments configured in 'Comment Type' conversion will be replaced with the comments received in the message.
NEGRATES EXT SYS OVER	If you allow profiles to be overwritten in general. This means at least one of your parameters IND EXT SYS OVER, CORP EXT SYS OVER, TA EXT SYS OVER, SOURCE EXT SYS OVER, or GROUP EXT SYS OVER have to be turned ON. The functionality of this parameter is further determined by the 'mode' of your interface. If it works with delta changes set to 'yes' (interface configuration->edit interface), the external system can send profile changes only and does not need to send the full profile every time a small change to a profile occurs. OXI will then only update the changed data and not touch the additional data that was found in the OPERA Cloud profile. This also means that the external system needs to indicate intended deletions clearly with deletion indicators in the message. Sending simply blanks will not lead to data deletion if OXI works in 'delta mode'. The deletion indicators can be configured in interface configuration->edit interface. If your interface is set to delta changes 'no', OXI expects a full overlay of all profile data in every profile message, even if the external system only changes very little of the entire profile. Here is how the parameter works: If your interface is setup as 'Delta Changes = Y' and no negotiated rates are sent by the external system in the profile message, this parameter is ignored and the existing OPERA Cloud profile negotiated rates remain untouched. Otherwise the following parameter rules apply: If 'Y', negotiated rates sent by external system will overwrite existing OPERA Cloud profile negotiated rates. If 'N', negotiated rates sent by the external system will be appended to existing OPERA Cloud profile negotiated rates.

## Configuring Profile Match Rules

The merge rules can consist of either one data field or a combination of data fields that need to be met to obtain your defined weighing points.

When the total points meet or exceed the threshold specified for the profile type, the profile is considered a match.

### Adding Profile Match Rules

1. From the side menu, select **Exchange**, then select **Interface Setup** and select **Profile Match Rules**.
2. Click **New** and complete the following
  - a. **Property**. Enter or select the property from the list
  - b. **Interface**. Enter or select the interface from the list
  - c. **Profile Type**. Select a profile type from the list; options are Guest, Company, Travel Agent, Source, and Group
  - d. **Threshold**. Enter a threshold value
  - e. **Active**. Select checkbox to activate
  - f. **Match Criteria**. Click **New** and complete the following
    - i. **Match Rule**. Select one or more data fields from the list
    - ii. **Points**. Enter weighting points amount for the match rule
    - iii. **Active**. Select checkbox to activate the match rule.
    - iv. Repeat to add more match criteria
  - g. Click **Save**.

### Editing Profile Match Criteria

1. From the side menu, select **Exchange**, then select **Interface Setup** and select **Profile Match Rules**.
2. Enter search criteria and click **Search**.
3. Select the match rule and click **Edit**.
4. Update match rules.
5. Click **New** to add a match rule.
6. Select a match rule and click **Delete** to remove a match rule.

### Deleting Profile Match Criteria

1. From the side menu, select **Exchange**, then select **Interface Setup** and select **Profile Match Rules**.
2. Enter search criteria and click **Search**.
3. Select the match rule and click **Delete**.
4. Click **Delete** to confirm.

## Exchange Interface Capabilities

Exchange Capabilities allow the sending system to know whether or not the receiving system supports the specified functionality. The negotiation of interface capabilities is only supported between Oracle Hospitality solution integrations. Exchange Capabilities can automatically maintain the capabilities of the remote systems that OXI and OXIHUB communicate and is designed to have resort and message specific controls of the functionality that a particular property supporting.

The 'Enabled\_YN' flag is what determines whether a particular functionality is available or not. The Enabled flag for all new functionality is set to N by default. The Enabled flag will only be updated through the Capability Message exchange; the Interface Property Capabilities screen lists all the available functions for the Interface Property combination.

The resort that initiated the Capability Exchange will receive the response Capability Exchange message and will set the Enabled flag to Y for the entire list of functions, if any of them were previously set to N. Once again, if the initiating property does indeed update the Enabled flags from N to Y, the update will trigger another exchange of capability messages. This cycle stops on the receiving side when it finds no more functionality to update. The entire process can take up to 3 exchanges of capability messages to correctly update the resorts functionality. If the process of updating a resort's functionality results in the Enabled flag remaining set to N, it could mean that either the target property doesn't support the functionality or the initiating property is still waiting for its Capability Exchange message response.

 **Note:**

XML Schema Version negotiation is available in the collection for exchange with the external system. This allows users to synchronize the highest mutually available XML schema version between interfaces in an automated process.

### Updating Interface Capabilities

1. From the **Exchange** menu, select **Interface Setup**, then select **Interface Setup**.
2. Enter search criteria, then click **Search**.
3. Select the interface in the search result, then click **I Want to...** and select **Update Exchange Capabilities**.
  - a. Click **Update Exchange Capabilities**.

## Configuring Interface Rules

### Prerequisites for Configuring Interface Rules

Interface rules determine whether particular flex field (UDF) data should be updated during data transmission with an external system and are defined globally for **Stay**, **Reservations** and **Profiles** per profile type.

### Adding Interface Rules

1. From the **Exchange** menu, select **Interface Setup**, then select **Interface Rules**.
2. Click **New** and complete the following:

- a. **Interface:** Select an interface from the list.
  - b. **Rule Type:** Select Stay, Reservations or Profiles from the list.
    - i. Select a **Profile Type** is Profile is selected for Rule Type.
  - c. **Display Name:** Enter the display name of the UDF flex field in OPERA Cloud.
  - d. **OPERA Cloud Central Column:** Select a UDF flex field from the list.
  - e. **External Column:** Enter UDF field name which is received from the external system.
  - f. **External Table:** Enter the table for the UDF field.
    - i. For Stay enter "STAY\_RECORDS"
    - ii. For Reservations enter "RESERVATION\_NAME"
    - iii. For Profiles enter "NAME"
  - g. **To OPERA Cloud Central:** Select a rule for data received from the external system.
    - i. **Always:** external data will always overwrite OPERA Cloud data for this field.
      - i. A profile's membership details will not be overwritten; but rather appended to.
      - ii. For the **Last Name** data element, the settings defaults to **Always** and cannot be changed.
    - ii. **Never** – external data will never overwrite OPERA Cloud data for this field, nor will it be displayed in [match & merge](#) . If **Never** is set for a field that is used as match criteria, the value is not considered in possible matches.
    - iii. **When Blank** – external system data will update OPERA Cloud data if this field is blank in the OPERA Cloud profile.
  - h. **To External System:** Select a rule for data sent to the external system.
    - i. **Always** – OPERA Cloud data will always be sent to the external system for this field
    - ii. **Never** – OPERA Cloud data will never be sent to the external system for this field.
3. Click **Save**.

#### Editing Interface Rules

1. From the **Exchange** menu, select **Interface Setup** then select **Interface Rules**.
2. Enter search criteria, then click **Search**.
3. Select an interface rule in the search result, then click the vertical ellipsis **Actions** menu and select **Edit**.
  - a. Update the configuration.
  - b. **Inactive:** Select check box to inactivate the rule.
4. Click **Save**.

#### Deleting Interface Rules

1. From the **Exchange** menu, select **Interface Setup** then select **Interface Rules**.
2. Enter search criteria, then click **Search**.
3. Select an interface rule in the search result, then click the vertical ellipsis **Actions** menu and select **Delete**.
4. Click **Delete** to confirm.

## Configuring Interface Mapping

Use Interface Mapping to configure conversion of OPERA Cloud codes and external system codes at Global (Chain) or Property level. When conversions are defined, the code from an external system is replaced with the OPERA Cloud code for inbound message from the external system; and the OPERA Cloud code is replaced with the code of the external system for outbound message delivered to the external system. Mapping UDFs allows the definition of all reservations, profile and stay UDFs to be exchanged with an external system.

You can use [Copy Conversion Codes](#) to quickly populate the interface conversion codes, instead of manually inputting the codes one by one. When copying, OPERA Cloud and External System values are populated with the same value in the conversion details.

In conversion scenarios where one code converts to multiple codes, one conversion entry must be selected as the default. For example, assume the external system has more market codes than OPERA Cloud, and that some of the OPERA Cloud market codes have to be entered multiple times in the conversion code. If a reservation with such a market code is sent to the external system, OXI must be configured with a conversion record. The **OPERA -> External Default** is the identifier for the conversion record used.

OPERA Cloud Value	External System Value	External > OPERA Cloud	OPERA Cloud > External
GRP	GROUP	Y	Y
GRP	LEIS	Y	N
IND	INDIVIDUAL	Y	N
IND	TRANSIENT	Y	Y

In the above example, a reservation made in OPERA Cloud with market code "GRP" will convert to "GROUP" when sent to the external system, as this is the OPERA > External System Default is set to Y.

- If the reservation in OPERA Cloud is made with market code "IND", OXI will convert to "TRANSIENT" when sent to the external system, as this is the default set for this case.
- The external system sends market codes 'GROUP' and 'LEIS', which will both convert into market code 'GRP' in OPERA. Cloud. If the reservation is updated in OPERA Cloud, the OPERA market code 'GRP' is converted to 'GROUP' when sent to the external system, which could lead to a change in the original market code that the external system has used.

### Seeded Conversions

A few conversion mapping groups are activated and auto-populated as they contain the same values for all interfaces.

#### Note:

Do not change these preset configurations for these interface mappings.

Conversion Group	OPERA Cloud Value	External Value	External > OPERA	OPERA > External
Action Type	CANCEL	CANCEL	Y	Y
	CHECK IN	CHECKIN	Y	Y
	CHECK OUT	CHECKOUT	Y	Y
	DELETE RESERVATION	DELETE	Y	Y
	JOIN GUEST	SHARE	Y	Y
	NEW RESERVATION	ADD	Y	Y
	NOSHOW	NOSHOW	Y	Y
	REACTIVATE NO SHOW	REINSTATE	N	Y
	REACTIVATE WAITLIST	WAITLISTTOACTIVE	Y	Y
	REVERSE CHECK IN	CNXCHECKIN	Y	Y
	REVERSE CHECK OUT	CNXCHECKOUT	Y	Y
	ROLLBACK CANCEL	REINSTATE	Y	Y
	SEPARATE GUEST FROM	ADD	N	Y
	UPDATE RESERVATION	EDIT	Y	Y
	Document Type			Y
Guest Preference Type	NEWSPAPER	NEW	Y	Y
	ROOM_FEATURES	FEA	Y	Y
	SMOKING	PRS	Y	Y
	SPECIALS	SPE	Y	Y
Profile Type	COMPANY	CORPORATE	Y	Y
	D	GUEST	Y	Y
	G	GROUP	Y	Y
	S	WHOLESALE	Y	Y
	TRAVEL_AGENT	TRAVEL	Y	Y
Reservation Status	CANCELLED	CANCELED	Y	Y
	CHECKED IN	INHOUSE	Y	Y
	CHECKED OUT	CHECKEDOUT	Y	Y
	NO SHOW	NOSHOW	Y	Y
	PROSPECT	REQUESTED	Y	Y
	RESERVED	RESERVED	Y	Y
	WAITLIST	WAITLISTED	Y	Y

## Adding Interface Mapping

### Note:

Select the **Show Inactive** check box for first time activation of the conversion group. Highlight the conversions groups that are required and select the **Activate** button. To deactivate a conversion group, uncheck the **Show Inactive** check box, then highlight a conversion code group, and select **Inactivate**.

1. From the **Exchange** menu, select **Interface Mapping** and then select **Interface Mapping**.
2. Enter search criteria and click **Search**.
3. Select a conversion group on the left side of the page.
  - a. Select the **Show Inactive** check box for first time activation of the conversion table. Highlight the conversions group that are required and select the **Activate** button.
  - b. To deactivate a conversion group, uncheck the **Show Inactive** check box, then highlight a conversion code group, and select **Inactivate**
4. Click **New** and complete the following:
  - a. **Global:** Select to configure global interface mapping. (Available with an OPERA Cloud Central Management Services subscription).
  - b. **Property:** Enter or select the property.
  - c. **Interface:** Enter or select the interface. .
  - d. **OPERA Code:** Select an OPERA Cloud code from the list
  - e. **External Code:** Enter the external system code/value.
  - f. **External-OPERA Default:** Select check box to select as default in the case of multiple same entries in the external system value column. It is possible that more OPERA Cloud values than the external system values exist for a conversion code. In this case the external system values would need to be duplicated and will occur more than once in the external system value columns. Only one of the duplicate external system values can be set as External -> OPERA Default Y, and this is the record that OXI uses when processing data from the external system to OPERA Cloud. All other duplicate codes are set to N. OXI automatically warns you if a record has already been set to Y as a default, and you are trying to select another record with the same external system value the same way.
  - g. **OPERA-External Default:** Select checkbox to select as default in the case of multiple same entries in the OPERA Cloud value column. It is possible that more external system values than OPERA Cloud values exist for a conversion code. In this case the OPERA Cloud values need to be duplicated and occur more than once in the OPERA Cloud value columns. Only one of the duplicate OPERA Cloud value can be set as OPERA > External Default Y, and this is the record that OXI uses when processing data from OPERA Cloud to the external system. All other duplicate codes are set to N. OXI automatically warns you if a record has already been set to Y as a default, and you are trying to select another record with the same external system value the same way. For example: The external system has more market codes than OPERA Cloud, and the OPERA Cloud market codes have to be entered multiple times in the conversion code. If a reservation with such a market code is sent by OPERA Cloud , OXI has to know which conversion record to use. The OPERA -> External Default is the identifier for the correct conversion record.

- h. Click **Save**.

#### Editing Interface Mapping

1. From the **Exchange** menu, select **Interface Mapping** and then select **Interface Mapping**.
2. Enter search criteria and click **Search**.
3. From your search results, select a row, then click the vertical ellipsis **Actions** menu, and select **Edit**.
4. Update the configuration.
5. Click **Save**.

#### Deleting Interface Mapping

1. From the **Exchange** menu, select **Interface Mapping** and then select **Interface Mapping**.
2. Enter search criteria and click **Search**.
3. From your search results, select a row, then click the vertical ellipsis **Actions** menu, and select **Delete**.
4. Click **Delete** to confirm.

## Interface Controls

Interface Controls allows you to control the business use cases to turn-On/Off and allows ability to set the default values. Most of the parameters are defaulted with a system default value, you can change the values to instruct OPERA Cloud for the preferred behavior. Default values used in the handling of inbound and outbound message when no mappings/conversion codes are found for the respective messages. The values configured here are used as defaults for incoming and outgoing messages if no matching conversion value from the conversion tables can be applied during data transmission, or if conversions are not activated.

1. From the **OPERA Cloud Exchange** menu, select **Interface Controls** , and then select **Interface Controls** from the drop down list.
2. The Type **Property** and **Interface** fields display the default interfaces based on the Switch Interface context.
3. Click **Search**.
4. Select a Group and drill down to the Settings areas for the Default fields available for Inbound and Outbound data flows. Defaults are applicable only for Blocks, Others, Profiles, Rates and Reservation groups.

### OPERA Cloud Global Parameters for Exchange

- OXI Message Purge Retain Days: Default is 10. Allows System Administrator to set the value between 3 to 28 days. Based on the configured value, messages are purged automatically when they are lapsed beyond retention time.
- OXI Outbound Delivery Retry Count: This functionality allows you to define the retry value for HTTP messages that fail to post because the server is unavailable. This value defined here is as a global configuration applicable for all interfaces and properties.

 **Note:**

Retry Interval is taken from the sleep-time configured for the respective property and interface communication definition.

### Block Parameters and Settings

Block parameters apply if your interface transmits blocks. All parameters are set at the global level.

**Table 30-1 Block Group parameters and settings.**

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
EXTERNAL LOCKED YN	Y/N	From the external external system to OPERA Cloud. The system creating the block can remain the owner of it, which means the block can only be modified by the originating system. Set this parameter to Y if the block created by the external system should be locked in ORS and cannot be modified by ORS users. Set to N if the block created by the external system should be fully changeable in ORS.	Set to Y in case blocks are sent two ways and both systems wants to retain ownership of their blocks. The default setting is Y for OXI-OPERA
EXT SYS BLOCK GENERATES INVENTORY	Y/N	Direction: Data from the external system to OPERA Cloud When a block message from CRS is received, OXI will generate inventory snapshots for the affected dates and room types.	Setting depends on the situations described.

**Table 30-1 (Cont.) Block Group parameters and settings.**

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
HANDLE BLOCK SOLD	1) EXT_SYS- >OPERA 2)NONE 3)OPERA- > EXT_SYS 4)TRANSMIT_BOTH_WAYS	<p>Direction: Data from the external system to OPERA Cloud (EXT_SYS- &gt;OPERA)</p> <p>Update block sold count from external system when sent to OPERA Cloud. This assumes that the external system has all block reservations but not OPERA Cloud. In this case we need a sold count update as part of the block messages.</p> <p>Direction: Data both ways between the external system and OPERA Cloud (NONE)</p> <p>Block sold counts will not be transmitted between the systems. Use this if both systems transmit full reservations both ways, including block reservations. In this case an additional sold count update in the block message is not necessary.</p> <p>Direction: Data from OPERA Cloud to the external system (OPERA- &gt;EXT_SYS)</p> <p>Send block sold counts from OPERA Cloud to external system. This assumes that OPERA Cloud has all block reservations but external system has not. In this case we need to send a sold count update as part of the block messages.</p> <p>Direction: Data both ways between the external system and OPERA Cloud</p>	<p>Setting depends on the situations described.</p> <p>The default setting is NONE for OXI-OPERA</p>

**Table 30-1 (Cont.) Block Group parameters and settings.**

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>(TRANSMIT_BOTH_WAYS)</p> <p>Update block sold counts from external system when sent to OPERA Cloud, and also return sold counts to external system. Use this if block reservations are not transmitted between the systems at all. In this case the block messages must mutually update the sold counts.</p>	

Table 30-1 (Cont.) Block Group parameters and settings.

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
HANDLE MASTER BLOCKS	Y/N	Direction: Data both ways between the external system and OPERA Cloud. OPERA Cloud can convert a single block into a master block, which is used when multiple sub blocks are linked to one block as master. A common scenario for this is a tour series, in which a former single block becomes a master block from which all tour series copies are made. The master block is visibly identified as such in OPERA Cloud and has no inventory. A sub block is linked to a master block through the master block ID. If this parameter is set to Y, OXI will send master blocks in OPERA Cloud with the respective flags so that the external system can apply the same logic. Sub blocks are sent with the master block ID and need to be linked properly to the master block in the receiving system again, where the master could have a separate ID. If the external system is not capable of handling master and sub blocks, this parameter should be set to N. In this case OXI sends a block cancel in case a block converts into a master, to make sure that the external system releases the inventory from that block accordingly. All sub	Setting depends on the situations described. The default is Y for OXI-OPERA Cloud.

**Table 30-1 (Cont.) Block Group parameters and settings.**

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
KEEP BLOCK PACKAGES	Y/N	<p>blocks in OPERA Cloud will be sent as normal single blocks without amaster block ID to such as an external system.</p> <p>-&gt; Direction: Data from the external system to OPERA Cloud.</p> <p>KEEP_BLOCK_PACKAGES parameter determines how to handle the existing OPERA Cloud block packages.</p> <p>This parameter setting will be significant only when the packages are not received as part of the blocks.</p> <p>If this parameter is set to Y, then do not full overlay, keep the block packages as-is.</p> <p>If this parameter is set to N, then full overlay the OPERA Cloud block packages with received block packages.</p> <p>If this parameter is set to Null, then the received allotment entity packages value will gain significance in determining whether to full overlay block packages or to keep them.</p>	
SPLIT INV DETAILS	Y/N	<p>-&gt; Direction: Data from OPERA Cloud to external system.</p> <p>If Y, OXI will split the block inventory detail message into multiple chunks of size less than 32K. If N, OXI will send the entire inventory detail message to the external system.</p>	<p>Set to Y if typical Block inventory is created with long date ranges and all room types.</p> <p>The default setting is N for OXI-OPERA.</p>

**Table 30-1 (Cont.) Block Group parameters and settings.**

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPL CATERING BLOCKS	Y/N	-> Direction: Data from OPERA Cloud to external system  Blocks can be indentified as Catering in ORS or SFA. Set this parameter to Y to send catering only blocks to the external system. If set to N, catering only blocks will be suppressed from sending to the external system.	The default setting is N for OXI-OPERA
UPL DED ONLY	Y/N	-> Direction: Data from OPERA Cloud to external system  If the external system does not distinguish between deductible and non-deductible blocks, you may want to suppress non-deductible blocks from sending, as these would affect the other system's inventory directly and cause inventory imbalances. In such a case you would set this parameter to Y and OXI_HUB will only send deductible blocks. If the external system has a similar concept of handling deductible and non-deductible blocks, you can set this parameter to N and OXI_HUB will send all blocks regardless of their status. In OPERA Cloud, the block status code determines whether a block is considered deductible. Check the OPERA Cloud block status configuration for further information.	Set to N if external system handles deductible and non-deductible blocks. Otherwise set to Y. The default setting is N for OXI-OPERA.

**Table 30-1 (Cont.) Block Group parameters and settings.**

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPL OPEN ONLY	Y/N	<p>-&gt; Direction: Data from OPERA Cloud to external system.</p> <p>If the external system does not have a concept of 'open for pickup' blocks, you may want to suppress non-open blocks from sending, as these would still allow pickup in the other system and cause inventory imbalances when a reservation is sent to non-open block in OPERA Cloud. In such a case you would set this parameter to Y and OXI_HUB will only send open for pickup blocks. If the external system has a similar concept of open for pickup blocks, you can set this parameter to N and OXI_HUB will send all blocks regardless of their status. An open for pickup block is defined by its status. Check the OPERA Cloud block status configuration for further information.</p>	<p>Setting depends on whether external system has a concept of open/non-open blocks.</p> <p>The default setting is N for OXI-OPERA</p>

Table 30-1 (Cont.) Block Group parameters and settings.

Parameter Name	Parameter Values	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
WAIT FOR BLOCK EXT REF	Y/N	-> Direction: Data from OPERA Cloud to external system. If a block is created in OPERA Cloud, OXI can send the block header first and expect a result message with the external system's confirmation number. Only once this confirmation is received would OXI send the block details, as it is now safe to assume that the block details would be accepted by the external system as well. This external confirmation can even be displayed on the block header as of OPERA Cloud 33.02, ensuring OPERA Cloud users that they can pickup reservations from a block without problems, as the external system knows the block as well. Set the parameter to Y if block transmissions shall be handled like this. Set the parameter to N if the external system does not return a response, or if it can safely handle block header and details at the same time.	Set to N unless there is an explicit need that OXI should wait for the returned block confirmation number.

## Block Defaults for OXI

The following are recommended block default settings.

**Table 30-2 Block Defaults for OXI**

Block Defaults	Description
Block Rate Code	<p>Select a rate code that has all of the configured room types for the property. Since rates can be subject to restrictions that either close the rate and or room types depending on hotel occupancy, we strongly suggest making a 'OXI Default' group rate code and insert this value.</p> <ul style="list-style-type: none"> <li>This rate code is to be setup with all viable room types and a single rate detail, at \$0.00, that has all room types linked to it. If proper revenue/ADR is a factor set a rate amount instead. Remember to include the PM room type as groups require this before booking reservations.</li> <li>This rate code should not be subject to restrictions as other rates are.</li> <li>If CRS allotted groups are setup for rates that are indicated as restricted or out of inventory on the hotel side, this default is used to get the group inserted.</li> <li>Warnings in OXI alerts hotel users that the allotment was inserted, the rate was not available and the default was taken instead. Thus allowing the hotel to update the group accordingly.</li> <li>To see any warnings where a default was substituted then OXI offers a warnings report.</li> </ul>
Block Status	<p>OXI shows only the deductible block status types in this list of values as all received blocks from external systems are automatically considered deductible. This is a crucial element for the creation of a block and has to be set.</p>
Block Owner	<p>This is no longer mandatory but depending on the OPERA Cloud function Generic &gt; Owner. If this is indicated, a block owner must be set in order to update the block in OPERA Cloud.</p>
Destination Code	<p>When processing a Canceled, Lost or Turndown message the destination code can be matched to the code used as the default in the OXI Block Defaults tab. If no match is found then the OXI default, if defined, can be applied.</p> <ul style="list-style-type: none"> <li>If a Block Destination Code conversion is active, then OXI tries to convert to the received value: <ul style="list-style-type: none"> <li>If a conversion record found, the converted value is used to match against OPERA Cloud values.</li> <li>If a conversion record not found, the value as received from the message to match against OPERA Cloud values.</li> </ul> </li> <li>If the Destination Code sent in the message matches with an OPERA Cloud Destination Code, the matched value is applied.</li> <li>If the Destination Code sent in the message does NOT match with an OPERA Cloud Destination Code, then OXI checks for a default: <ul style="list-style-type: none"> <li>If a default Destination Code is defined, the default value is applied.</li> <li>If a default Destination Code is not defined, the field is left blank.</li> </ul> </li> </ul>

## Generic Parameters and Settings

All parameters are set at the global level.

**Table 30-3 Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
AUTO RESYNC ON ROLL BUSINESS DATE	B/R	<p>-&gt; Direction: Data both ways between external system and OPERA Cloud.</p> <p>Whether to resync OPERA Cloud transactions without external system confirmation number from OPERA Cloud to external system when the business date is rolled in OPERA Cloud.</p> <p>Note: This is implemented only for those interfaces using XML message format, also for this to work, ROLL BUSINESS DATE business event must be subscribed in OPERA Cloud configuration.</p> <p>This parameter allows the user to pick the modules they would like to auto resync when the OPERA Cloud business date is rolled.</p> <p>Available values are B and R:</p> <ul style="list-style-type: none"> <li>• When B is selected in the parameter, active blocks without subscription records will be resynced.</li> <li>• When R is selected in the parameter, active reservations without external confirmation number will be resynced.</li> </ul>	Set accordingly.

**Table 30-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SUPPRESS RESULT SUCCESS MESSAGES		<p>Direction: Data from OPERA Cloud To External System OXI by default suppresses the Result Success messages for the Inbound messages. This parameter is provided to optimize the message traffic by sending only the useful fail and warning messages to notify the respective external systems. Success messages for selected modules will be suppressed. This parameter is not applicable for New Profile, New Reservation and New Block Business events because the unique IDs exchanged in the result success messages are needed to keep data in sync between OPERA Cloud and the external system.</p>	

**Table 30-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
CREDIT CARD SUPPRESS	Profile Reservation Both N	<p>-&gt; Direction both ways: Credit Card(s) information suppressed.</p> <p>Due to privacy laws, credit card(s) information will be suppressed based on following settings -</p> <p>PROFILE: OXI will not include Profile Credit Card information in the outgoing profile messages and will not store Profile Credit Card information when received through messages of any type from non-opera cloud systems.</p> <p>RESERVATION: OXI will not include any reservation Credit Card information in RESERVATION messages, however Profile Credit Cards for Profiles attached to a reservation may be sent. OXI will however process reservation credit card information into OPERA Cloud.</p> <p>BOTH: OXI will not include ANY Credit card information in the outgoing Reservation and profile messages and will not process any profile credit card information when received through messages of any type from non-opera cloud systems. OXI will however process reservation credit card information into OPERA Cloud.</p> <p>N: OXI will send and process all and any</p>	Set accordingly.

**Table 30-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
DATABASE SIZE	Small/Medium/ Large	<p>credit card information present.</p> <p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines what internal profile match criteria shall be used based on the size of the database.</p> <p>On Individual profiles, Name Code, Membership, Credit Card, Passport, AR Number and Last + Phone will always be considered in the profile matching processes.</p> <p>When database size is set to SMALL the following will also be considered. Last + Phone, Last + Address1 + City, Last + Zip, Last + Address1, Last + City.</p> <p>For Non-Individual profiles Name Code, Membership and Credit Card will always be considered in matching. When database size is set to SMALL, Company + Address1 + City, Company + Zip, Company + Address1, Company + City are also considered.</p> <p>When set to MEDIUM only Company + Address1 + City are considered in addition to the criteria always applied.</p>	Set accordingly.

**Table 30-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
DEFAULT PRINTER	Network Path	-> Direction: no direction The name of the physical printer device configured in OPERA Cloud. Used for OXI back-end printouts.	Used for reports that are not manually selected for printing. Network path is to be set to local machine easily accessed by users.
GENERATE XML	Y/N	-> Direction: Data both ways between external system and OPERA Cloud. The generation of an XML message is required for all generic interfaces where no OXA adapter translates the OPERA Cloud data format into the external system specific format. Even custom interfaces with an OXA adapter (Trust, FTCSR, Pegasus, Marsha, TLX) may benefit from XML generation as it allows users and support personnel to recognize message contents easier. Set to Y to generate an XML message from/to the external system message. Set to N to avoid the XML message creation.	Set to Y for all interfaces using the XML message format. All other interfaces can be set either way.

**Table 30-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
HANDLE PSEUDO ROOMTYPES	Y/N	-> Direction: Data both ways between external system and OPERA Cloud.  If this parameter is set to Y, the interface will accept and send room types flags as pseudo in the data transmission for reservations, blocks, and rates. The OXI room type conversion table will allow the selection of pseudo room types. Set this parameter to N if pseudo room types shall be suppressed from data transmission. This would be the case if the external system has no pseudo room types configured and message would lead to failures, or conversion could be setup falsely.	Set to Y for all interfaces that support pseudo room types.
LANGUAGE HANDLING	ALL ENGLISH ONLY SINGLE BYTE ONLY	->Direction: Data both ways between external system and OPERA Cloud.  This parameter controls the way OXI handles the data in multi- language systems. See the list of values for available options and details.  ALL: Transfer all data irrespective of the Language.  ENGLISH ONLY: Transfer data having language code E (English) or unspecified language code.  SINGLE BYTE ONLY: Transfer data consists of single byte characters	Generic: ALL

**Table 30-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
MULTI ROOMTYPE CONV	Y/N	<p>-&gt; Direction: Data both ways between external system and OPERA Cloud.</p> <p>This parameter should always be set to N in a 2- way interface bases on reasons described below. It can be used for a 1-way interface. If set to N, OXI will mandate a one-to-one room type conversion between external system and OPERA Cloud to keep the inventory in balance. This is very important if the interface uses block or rate messages, as it is not possible to convert one-to- many room types for blocks and rates, and this would result in severe imbalances. You should only set this to Y for interfaces that transmit only reservations, as one-to-many room type conversion could then be allowed to give flexibility. A one-to-many room type conversion must be very carefully considered as it can lead to differences in room type usage between the systems. Sample: OPERA Cloud has only room type KING and the external system converts both KNG and QUE into KING in the OXI room type conversion table. This is possible with the conversion defaults and in this case the OPERA Cloud-&gt;external default is set to N for the record</p>	Set to N for all 2-way interfaces. Set accordingly.

**Table 30-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RATE DETAILS DISTINCT	Y/N	<p>KNG&lt;- &gt;KING and set to Y for the record QUE&lt;-&gt;KING. If the external system sends a reservation with KNG, this will map to KING when entering OPERA Cloud. If the OPERA Cloud user now changes the reservation, the room type will be converted into QUE when sending to external system, as QUE is indicated as OPERA Cloud-&gt;external default in this multi-to-one room type conversion table. The result is that the same reservation exists as QUE in one system and as KING in the other, which may lead to confusion and questions.</p> <p>- &gt; Direction: Data from external system to OPERA Cloud.</p> <p>When receiving messages of type 'DETAIL', OXI will identify the exact rate details to be updated by searching for a match with the begin date, end date, DOW flags and room types.</p> <p>If an exact match is found, OXI will then update the matched rate detail with the values received in the message.</p> <p>If no exact match exists, OXI fails the message.</p>	

**Table 30-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RETRY COUNT	Numeric Value	-> Direction: Data from external system to OPERA Cloud. OXI will retry this number of times to process an incoming message if the first attempt was not successful due to, for example, a locked record. A locked record can occur when OXI tries to process a message while another user is updating this record at the same time in OPERA Cloud. OXI will retry the update x number of times as defined in this parameter. This parameter is directly linked to RETRY_INTERVAL.	Set this value to a number of retries that is appropriate for your operation. We recommend at least 3 times.
RETRY INTERVAL	Numeric Value	- >Direction: Data from OPERA Cloud to external system. Interval in seconds between each retry that OXI will perform to process an incoming message after the first attempt failed. This parameter is directly linked to RETRY_COUNT.	Set this value to an interval you feel is appropriate. We recommend 60 seconds.
SEND COMMENT WITH CONVERSION	Y/N	- >Direction: Data from OPERA Cloud to external system. When set to Y, non-internal comments with conversion code exist only send to external system. If set to N, all the non-internal comments will be sent to the external system. Internal comments will not be sent out always.	Default is N. Set accordingly.

**Table 30-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SEND IFC CREATED ONLY	Y/N	<p>-&gt; Direction: Data from OPERA Cloud to external system.</p> <p>If set to 'Y': Reservations: If set to 'Y', changes and updates made to a record will be sent to this external system only if the record originated in this external system.</p> <p>Rates (Ext Sys must handle rates): When this Parameter is set to 'Y' AND Rate Code Conversion is active: Only Rates for which a conversion has been defined will be sent to this external system. Rates that do not have a defined conversion will not be sent to this external system.</p> <p>If Rate Code Conversion is inactive: All Rates will be sent to this external system.</p> <p>Products/Packages (Ext Sys must handle products): When this Parameter is set to 'Y' AND Product Conversion is active: Only Products for which a conversion has been defined will be sent to this external system. Products that do not have a defined conversion will not be sent to this external system.</p> <p>If Product Conversion is inactive: All Products will be sent to this external system.</p> <p>Rate Code/Rate Category Restrictions: When this Parameter is set to 'Y', only those</p>	<p>Set to N if external system is handling External and OPERA Cloud based data regardless of origin.</p> <p>Set to Y if external system will only handle specific data originated in external system. (See conditions for this to work below.)</p> <p>We recommend N value.</p>

**Table 30-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>Rate Code/Rate Category Restrictions that have an associated Rate Code/Rate Category conversion record will be sent to the external system.</p> <p>Rate Code/Rate Category Restrictions that do not have an associated Rate Code/Rate Category conversion record will not be sent to the external system.</p> <p>If Rate Code conversion is inactive, all Rate Code Restrictions will be sent to the external system.</p> <p>If Rate Category conversion is inactive, all Rate Category Restrictions will be sent to the external system.</p> <p>If set to 'N': External System will receive all Reservations, Rates and Products, irrespective of Conversions configuration.</p>	

**Table 30-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SEND VAULTED CREDIT CARD	Y/N	<p>-&gt; Direction: OPERA Cloud to External system.</p> <p>When CC vault is on, this parameter determines whether to include actual plain text credit card information or the unique id received from CC vault system in the outgoing messages.</p> <p>- Set this to Y if the receiving system is vaulted and is using the same vault and understands vaulted information in the message.</p> <p>- Set this to N if the receiving system is not vaulted or is using a different vault or does not understand vaulted information in the message.</p>	<p>Default for this parameter is N.</p> <p>This parameter should be set to Y only if both sides of the interface is using same vault installation for storing and retrieving credit cards.</p>

Table 30-3 (Cont.) Generic Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SPECIFIC BLOCK EXCHANGE	Y/N	<p>-&gt; Direction: Data between External System to OPERA Cloud and OPERA Cloud to External System.</p> <p>This parameter determines if conditions can be applied to determine which allotments and related reservations are exchanged with the external system. This parameter is an additional condition and does not enable the exchange of reservations and allotments. Its function is conditional to all other configuration items and parameters related to allotments and reservations.</p> <p>If this parameter is set to Y, it will enable a button OXI on OPERA Cloud Block form. This button will allow selection of any external systems where the parameter is set to Y. When an external system has been selected on the allotment form, this block and all reservations related to that block will be sent to the external system.</p> <p>If this parameter is set to N, all allotments and related reservations will be exchanged with the external system.</p>	Default for this parameter is N.

**Table 30-3 (Cont.) Generic Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
WARNINGS AS TRACES	Y/N	-> Direction: Data from external system to OPERA Cloud. Warnings that occur when reservations are sent to OPERA Cloud can be added to these reservations as traces. Users are then prompted with the trace in due time before the guest arrives, and could update the record accordingly. A sample for a reservation warning would be if OXI uses a default instead of converted the incoming value. This warning would indicate to users that the conversion table is incomplete. Set this parameter to Y and OXI will create traces for each mandatory warning that occurred on the reservation. These traces are created for the trace department selected in the OXI Other Defaults for Trace warning. If set to N, no traces will be generated for warnings. This applies only to reservations.	Set to Y if you would like to keep track of your warnings within the reservations where they have occurred.
DELETE ENROLLMENT CODES NOT RECEIVED		Determines whether to keep or delete existing OPERA Cloud membership enrollment codes when they are not received in the message payload.	

Table 30-3 (Cont.) Generic Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
OXI_GENERIC: DELETE ENROLLMENT CODES NOT RECEIVED	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud. This parameter determines whether to keep or delete existing OPERA Cloud membership enrollment codes when they are not received in the message payload. If the value is set to 'Y' and the membership enrollment code is not received in the message payload:</p> <ul style="list-style-type: none"><li>• If no dependency exists, the existing OPERA Cloud membership enrollment code will be inactivated.</li><li>• If a dependency exists, the existing OPERA Cloud membership enrollment code will remain untouched. If the value is set to 'N' and the membership enrollment code is not received in the message payload:</li><li>• The existing OPERA Cloud membership enrollment code will remain untouched.</li></ul>	

## Other Defaults for OXI

**Table 30-4 Other Defaults for OXI and its Description**

Other Defaults	Description
Maximum Availability in advance	<p>This section defines for how long in advance you can receive or send messages for data modules that affect the inventory. If you want to restrict your reservations to the external system to, for example, 720 days in advance and not send any reservations beyond that inventory time span, you would select availability type 'Day' and availability in advance for '720' (days).</p> <ul style="list-style-type: none"><li>• <b>Maximum Availability Type:</b> Setting of the availability types either in Days or by Week</li><li>• <b>Maximum Availability in Advance:</b> Setting of the number of days/weeks availability in advance is allowed</li><li>• <b>Start Day of the Week:</b> Day of the week from which the time format is calculated. Only shows when the Max Availability Type is indicated as DAY.</li></ul>

**Table 30-4 (Cont.) Other Defaults for OXI and its Description**

Other Defaults	Description
External System Currency Details	<ul style="list-style-type: none"> <li data-bbox="922 312 1469 611"> <p>• <b>Currency Code:</b> The currency code the external system is sending and expecting. The revenue amounts sent in STAY messages to the external system are converted to the external system currency code configured in OXI here. The actual currency code (once code conversion, if configured, has occurred) of the revenue amount is also sent along with the revenue amounts.</p> </li> <li data-bbox="922 615 1469 709"> <p>• <b>Currency Format:</b> Select the format mask matching the external system currency code</p> </li> <li data-bbox="922 714 1469 892"> <p>• <b>Currency Multiplier:</b> Currencies that have denominations without decimals need to be set to convert correctly for messages from the external system. Amounts sent by external systems are multiplied by this value when set.</p> </li> <li data-bbox="922 896 1469 1014"> <p>• <b>Decimal Indicator:</b> Auto populated once the Currency Format is selected. Based on the currency format set in OPERA Cloud.</p> </li> </ul>

 **Note:**

If any value for the External System Currency Details is changed, the OXI Services have to be restarted in order to activate the new settings.

**Table 30-4 (Cont.) Other Defaults for OXI and its Description**

Other Defaults	Description
Trace Department	<p>A maximum of two default trace departments can be selected and configured.</p> <ul style="list-style-type: none"> <li>• Trace Department 1 or 2: Select by clicking on the down arrow button. A list of valid OPERA Cloud trace departments appears.</li> <li>• Trace on Arrival Date: Set the trace start date in OPERA Cloud by inserting the number of days prior to the arrival of the guest.</li> <li>• Always Overwrite: If this box is checked, new traces sent by the external system always overwrite existing traces for the same trace department in the reservation. If this box is blank, new traces sent are appended to existing traces in the reservation and is not overwritten.</li> </ul>
Trace Warning	<p>You can decide to capture all mandatory interface warnings as traces in the respective reservation they belong to. To do so, the OXI_GENERIC parameter WARNINGS_AS_TRACES must be set to Active. All warnings that have occurred during the download of a reservation are registered as traces with a start date equal to the current system date.</p> <ul style="list-style-type: none"> <li>• Trace Warning: A list of valid OPERA Cloud trace departments appears.</li> <li>• Always Overwrite: If this box is checked, new warnings always overwrite existing warnings in the reservation. If this box is blank, new warnings are appended to existing warnings in the reservation and are not supposed to be overwritten.</li> </ul>

## Inventory Parameters and Settings

In case your interface does not transmit full reservations and blocks both ways, inventory may be out of sync in either system and adjusted with the help of an inventory snapshot.

This is usually sent from a OPERA Cloud PMS to OPERA Cloud ORS to update ORS with inventory changes at the property that have not been transmitted through the interface. This inventory snapshot contains the total sold count, overbooking level, and out of order rooms per day per room type. It further splits the sold counts into transient and block bookings, as well as definite and tentative bookings.

For example, CLS PMS receives reservations from ORS only and does not send its own reservations back. This means ORS does not know what the exact availability in the PMS is. To make sure ORS has exact sold counts and does not mistakenly overbook the hotel, CLS

PMS sends an inventory snapshot to ORS, containing full reservation and block counts. When OXI-HUB receives this inventory snapshot it directly updates the availability tables for transient reservations and blocks for this property, and thus has an accurate picture of the number of rooms that are still available.

All parameters are set at the global level.

**Table 30-5 Inventory Parameters and Settings**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
CHANGE TO INVENTORY GENERATES	INVENTORY RTAV	-> Direction: OPERA Cloud to External System only. When a Change in Inventory (Overbooking or External Allowance) occurs in OPERA Cloud and Inventory business event "AVAILABILITY/% ALLOWANCE" or "CONFIGURATION/% INVENTORY CONTROL" is generated, OXI can use these event in different ways. - Set to INVENTORY, As is continue to generate the Inventory messages for the above Business Events. - Set to RTAV, Generate the RTAV XML messages instead of Inventory messages for the above Business Events.	Set accordingly.
ENABLE ALLOWANCE	Y/N	-Direction: Data from OPERA Cloud To External System. Inventory allowance for external systems.	Set accordingly.

**Table 30-5 (Cont.) Inventory Parameters and Settings**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
EXTERNAL PHYSICAL ROOMS	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>Applies mainly to OPERA Cloud S&amp;C in this case. The hotel might not allow OPERA Cloud S&amp;C to sell its full physical room capacity. Although the hotel has 100 rooms it may allow only 50 rooms to be sold by the S&amp;C. In this case the physical rooms should be calculated from the inventory snapshot the external system sends to S&amp;C to make sure only 50 rooms are considered. In this case the parameter would be set to Y. Set it to N if OPERA Cloud S&amp;C has the entire physical room inventory from which the sold counts shall be calculated.</p>	If your OPERA Cloud is an S&C standalone install, physical room inventory might not be configured and should be updated by the external system.

**Table 30-5 (Cont.) Inventory Parameters and Settings**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
INV ROOMCLASS	N - No OO - Overbook Only YP - Physical Rooms for Suite YS - Suite as a Single Unit	<p>-&gt; Direction: Data from OPERA Cloud to external system</p> <p>The external system may accept the Room Class totals in the RTAV message.</p> <p>Set the parameter to 'YP' to include Room Class totals in the RTAV message. For Suites (Virtual Rooms), actual physical rooms comprising the Suite will be used for the Room Class totals.</p> <p>Set the parameter to 'YS' to include Room Class totals in the RTAV message. Each Suite (Virtual Room) will be treated as a single unit for the Room Class totals.</p> <p>Set the parameter to 'OO' to only send overbook counts in the RTAV message.</p> <p>Set it to 'N', if Room Class totals are not to be included in RTAV messages.</p>	<p>When the General &gt; Room Class and General &gt; Component Rooms application functions are set to Y and the Inventory &gt; INV_ROOMCLASS OXI Parameter is set to YS, Physical Room Types and Component Room Types cannot be attached to the same Room Class. Also, only 1 Component Room Type can be attached to a Room Class.</p>

**Table 30-5 (Cont.) Inventory Parameters and Settings**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
INV SNAPSHOT BLOCKS	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>Applies mainly to OPERA Cloud S&amp;C in this case. If blocks are not transmitted both ways in this interface but the external system creates blocks that affect its inventory, this parameter should be set to Y. In this case block inventory will be updated in the OPERA Cloud S&amp;C inventory tables from the inventory snapshot sent by external system. Set this parameter to N if it is not necessary to update the OPERA Cloud S&amp;C block inventory from the snapshot. This would be the case if blocks are transmitted fully both ways, or if the external system does not create any blocks at all.</p>	If your OPERA Cloud is an S&C standalone install, set accordingly.

Table 30-5 (Cont.) Inventory Parameters and Settings

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
INV SNAPSHOT RES	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>Applies mainly to OPERA Cloud S&amp;C in this case. If reservations are not transmitted both ways in this interface but the external system creates reservations that affect its inventory, this parameter should be set to Y. In this case transient reservation inventory will be updated in the OPERA Cloud S&amp;C inventory tables from the inventory snapshot sent by external system. Set this parameter to N if it is not necessary to update the OPERA Cloud S&amp;C reservation inventory from the snapshot. This would be the case if reservations are transmitted fully both ways, or if the external system does not create any reservations on its own.</p>	If your OPERA Cloud is an S&C standalone install, set accordingly.
UPL BLOCK INFO	Y/N	<p>-&gt; Direction: Data from OPERA Cloud to External System.</p> <p>Set it to Y if OXI needs to send the block information (block code, ded type, blocked/sold count) to the external system. Set it to N if OXI does not need to send the block information to the external system.</p>	Set as Y/N according to system needs.

## Profiles Parameters and Settings

**Table 30-6 Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
ACCEPT ANONYMIZATION UPDATE	Y/N/YR	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether to anonymize the OPERA Cloud profile when the update profile message is received with anonymize flag and the Profile Information Protection functionality is active.</p> <p>- If set to YR (Yes and Return), the OPERA Cloud profile will be anonymized and a snapshot of the profile will be sent back to the calling system after it has been anonymized in OPERA Cloud. The calling system must be subscribed to the UPDATE PROFILE business event to receive the profile update.</p> <p>- If set to Y the OPERA Cloud profile will be anonymized. A profile update will NOT be sent back to the calling system after the profile is anonymized.</p> <p>- If set to N the OPERA Cloud profile will NOT be anonymized.</p>	Set accordingly.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
ACCEPT CENTRAL MERGE	ALL Select one or more profile types	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether to merge corresponding OPERA Cloud profiles when the received PROFILE message contains MergedIDs.</p> <p>- If this parameter is set to 'ALL' or one or more profile types, OXI will attempt to merge while processing messages of the specified profile types and will update the merged profile with the information received in the message.</p> <p>- If this parameter is not set to any value, OXI will ignore MergedIDs in the message and will update one matching profile with the information received in the message.</p>	Set accordingly.
ACCEPT PRIVACY UPDATE	Y/N	<p>-&gt; Direction: External system to OPERA Cloud.</p> <p>This parameter determines whether to update the privacy options in OPERA Cloud profile when the profile message is received.</p> <p>- If this parameter is set to 'Y' then privacy fields in OPERA Cloud profile will be updated.</p> <p>- If this parameter is set to 'N' then privacy fields in OPERA Cloud profile will NOT be updated.</p>	Set accordingly.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
CHANGE TO PROFILE GENERATES	PROFILE RESERVATIONS	<p>- &gt; Direction: Data from OPERA Cloud to external system.</p> <p>This parameter specifies how OXI will use the following event: a change to a profile occurs in OPERA Cloud and a Profile business event is generated.</p> <p>When this parameter is set to 'Profile': if the external system has a profile concept and can apply the changes to only the profile record.</p> <p>When this parameter is set to 'Reservations': if the external system has a concept of Guest Name Record (GNR), where the guest information is stored with the reservation record. In this case, OXI will search all active reservations linked to that profile and send reservation updates for these records.</p>	The default for this parameter is Profile.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
CORP EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether a company profile shall be overwritten from the external system or not. This may be desirable if the external system has more accurate company data than the OPERA Cloud database. Set to Y and the external system profile details for company profiles will overwrite the existing OPERA Cloud profile. Set to N and the OPERA Cloud details will remain unchanged.</p> <p>Even if this parameter is set to Y you can manipulate how data is being overwritten with the use of profile parameters INTEREST EXT CRS OVER, NEGRATES EXT CRS OVER, PHONE/ADDR EXT CRS OVER, PREF EXT CRS OVER, PROFCOMMENTS EXT CRS OVER.</p>	Set to Y if external system shall be allowed to update.
DISCARD DUPLICATE MEMBERSHIPS	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>If set to Y, discard received memberships if they already exist in another OPERA Cloud profile and issue warning.</p> <p>If set to N, profile will be created without checking if the received memberships already exist in another OPERA Cloud profile.</p>	Set accordingly.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PROCESS INBOUND DOCUMENTS		Global, determines if documents are processed.	
DOCUMENT TYPES TO EXCHANGE	ALL NONE Configured Document Types	-> Direction: Data from OPERA Cloud to External System only. Only Global, and not resort specific, documents will be exchanged based on the parameter setting. Select 'ALL' to exchange all Document Types. Select 'NONE' to exchange no Document Types. Select Document Types in any combination, to restrict the Document Type exchange to the selected values. If the parameter value is not set, as is (backward compatible), with OPERA Cloud interfaces ALL Document Types will get exchanged; but with External Interfaces only 'PASSPORT' Document type will get exchanged.	Select the Document Types to Exchange

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
GLOBAL PROFILE	Y/N	<p>-&gt; Direction: OPERA Cloud to External System only.</p> <p>This parameter defines if all new profiles will be sent to the External System, or if new Profiles will adhere to the property they were created in:</p> <p>If this parameter is set to Y, when a new profile is created in a property that does not have this External System active, a message will be sent as originating from the first listed property having this External System active.</p> <p>If this parameter is set to N, when a new profile is created in a property that does not have this External System active, no message will be generated for the creation of the profile in the external system, until such time that the profile is used by one property with the specified External System active. Once the profile is subscribed, all changes to the profile will be sent to the external system, no matter which property initiates the change.</p>	Set accordingly.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
GROUP EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether a group profile shall be overwritten from the external system or not. This may be desirable if the external system sends many details in the group profile while the OPERA Cloud database only has the name. Set to Y and the external system profile details for group profiles will overwrite the existing OPERA Cloud profile. Set to N and the OPERA Cloud details will remain unchanged.</p> <p>Even if this parameter is set to Y you can manipulate how data is being overwritten with the use of profile parameters INTEREST EXT CRS OVER, NEGRATES EXT CRS OVER, PHONE/ADDR EXT CRS OVER, PREF EXT CRS OVER, PROFCOMMENTS EXT CRS OVER.</p>	Set to Y if external system shall be allowed to update.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
HANDLE RESORT AR NUMBERS	FULLOVERLAY IGNORE MERGE	<p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>This parameter determines how to handle the incoming resort AR numbers in the ResortArs collection.</p> <p>When set to FULLOVERLAY, all received AR Numbers for the resort will get inserted or updated, for new AR numbers OXI will copy the primary address of the profile as AR address. Existing AR numbers will only get deleted if OPERA Cloud parameter 'ACCOUNTS_RECEIVABLES' is set to 'N'</p> <p>When set to MERGE, incoming AR numbers will Only get merged with existing Resort AR Numbers.</p> <p>When set to IGNORE, incoming AR numbers will be ignored.</p>	

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
HANDLE RESORT PAYMENT METHOD	FULLOVERLAY IGNORE MERGE	<p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>This parameter determines how to handle the incoming Profile Resort Payment Method.</p> <p>When set to FULLOVERLAY, existing Profile Resort Payment Method will get overwritten with the incoming value.</p> <p>When set to UPDATE, update only if existing Profile Resort Payment Method is null.</p> <p>When set to IGNORE, incoming Profile Resort Payment Method will be ignored.</p>	

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
IND EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether an individual profile shall be overwritten from the external system or not. This may be desirable if the external system has more accurate guest data than the OPERA Cloud database. Set to Y and the external system profile details for individual profiles will overwrite the existing OPERA Cloud profile. Set to N and the OPERA Cloud details will remain unchanged.</p> <p>Even if this parameter is set to Y you can manipulate how data is being overwritten with the use of profile parameters INTEREST EXT CRS OVER, NEGRATES EXT CRS OVER, PHONE/ADDR EXT CRS OVER, PREF EXT CRS OVER, PROFCOMMENTS EXT CRS OVER.</p>	Set to Y if external system shall be allowed to update.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
INTEREST EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter will come into effect if you allow profiles to be overwritten in general. This means at least one of your parameters IND EXT CRS OVER, CORP EXT CRS OVER, TA EXT CRS OVER, SOURCE EXT CRS OVER, or GROUP EXT CRS OVER have to be set to Y. The functionality of this parameter is further determined by the mode of your interface. If it works with Delta Changes set to Yes (Interface Configuration &gt; Edit Interface), the external system can send profile changes only and does not need to send the full profile every time a small change to a profile occurs. OXI will then only update the changed data and not touch the additional data that was found in the OPERA Cloud profile. This also means that the external system needs to indicate intended deletions clearly with deletion indicators in the message. Sending simply blanks will not lead to data deletion if OXI works in Delta mode. The deletion indicators can be configured in interface configuration &gt; edit interface. If your interface is set to Delta changes No, OXI</p>	Determine whether values shall overwrite or append and select your setting accordingly.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>expects a full overlay of all profile data in every profile message, even if the external system only changes very little of the entire profile.</p> <p>Here is how the parameter works: If your interface is setup as Delta Changes = Y and no interests are sent by external system in the profile message, this parameter is ignored and the existing OPERA Cloud profile interests remain untouched. Otherwise the following parameter rules apply: If Y, interests sent by external system will overwrite existing OPERA Cloud profile interests. If N, interests sent by the external system will be appended to existing OPERA Cloud profile interests.</p>	

Table 30-6 (Cont.) Profiles Group parameters and settings.

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
MAX PROFILE MATCHES	Y/N	<p>-&gt; Direction: External System to OPERA Cloud only.</p> <p>This setting impacts the search depth for profiles meeting matching criteria, prior to establishing weighted points:</p> <ul style="list-style-type: none"> <li>- A lower setting (i.e. 10) will favor execution speed, while correctly matching the vast majority of profiles.</li> <li>- A higher setting (i.e. 100) will favor even very distinct differentiation, while providing very good execution speed.</li> <li>- A setting of 1000 can have a negative impact on performance, when reservations are received with limited profile information.</li> <li>- Leave blank, if you want OXI to always find and weigh all possible matches.</li> </ul> <p>If the value is left blank and you have limited information in the message (i.e. John Smith in New York) and several thousand potential duplicates can be found in the database, processing these reservations may take several minutes. During this time, the OXI Download processor will go into WAITING status and users will be prompted with a warning about the state of the interface.</p>	Set accordingly.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
NEGRATES EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter will come into effect if you allow profiles to be overwritten in general. This means at least one of your parameters IND EXT CRS OVER, CORP EXT CRS OVER, TA EXT CRS OVER, SOURCE EXT CRS OVER, or GROUP EXT CRS OVER have to be set to Y. The functionality of this parameter is further determined by the mode of your interface. If it works with Delta changes set to Yes, (Interface Configuration &gt; Edit Interface), the external system can send profile changes only and does not need to send the full profile every time a small change to a profile occurs. OXI will then only update the changed data and not touch the additional data that was found in the OPERA Cloud profile. This also means that the external system needs to indicate intended deletions clearly with deletion indicators in the message. Sending simply blanks will not lead to data deletion if OXI works in Delta mode. The deletion indicators can be configured in interface configuration &gt; edit interface. If your interface is set to Delta changes = No, OXI</p>	Determine whether values shall overwrite or append and select your setting accordingly.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PHONE EXTENSION SYS OVER		<p>expects a full overlay of all profile data in every profile message, even if the external system only changes very little of the entire profile.</p> <p>Here is how the parameter works: If your interface is setup as Delta Changes = Y and no negotiated rates are sent by the external system in the profile message, this parameter is ignored and the existing OPERA Cloud profile negotiated rates remain untouched. Otherwise the following parameter rules apply: If Y, negotiated rates sent by external system will overwrite existing OPERA Cloud profile negotiated rates. If N, negotiated rates sent by the external system will be appended to existing OPERA Cloud profile negotiated rates.</p> <p>Determines whether to send the phone extension.</p>	

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PHONE/ADDR EXT CRS OVER (see description)		<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines how the phone/addresses received from the external system update the phone/addresses in OPERA Cloud. This parameter will supersede the Delta setting of the interface.</p> <p>A = If received, replace OPERA Cloud values with the received values. If not received, remove the values from OPERA Cloud.</p> <p>B = If received, replace OPERA Cloud values with the received values. If not received, do not remove the values from OPERA Cloud.</p> <p>C = If received, merge the received values with OPERA Cloud values. If not received, remove the values from OPERA Cloud.</p> <p>D = If received, merge the received values with OPERA Cloud values. If not received, do not remove the values from OPERA Cloud.</p> <p>N = Ignore the phone/addresses received. Do not touch the values in OPERA Cloud.</p>	Determine whether values shall overwrite or append and select your setting accordingly.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PREF EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter will come into effect if you allow profiles to be overwritten in general. This means at least one of your parameters IND EXT CRS OVER, CORP EXT CRS OVER, TA EXT CRS OVER, SOURCE EXT CRS OVER, or GROUP EXT CRS OVER have to be set to Y.</p> <p>The functionality of this parameter is further determined by the mode of your interface. If it works with Delta changes set to Yes, (Interface Configuration &gt; Edit Interface), the external system can send profile changes only and does not need to send the full profile every time a small change to a profile occurs. OXI will then only update the changed data and not touch the additional data that was found in the OPERA Cloud profile. This also means that the external system needs to indicate intended deletions clearly with deletion indicators in the message. Sending simply blanks will not lead to data deletion if OXI works in Delta mode. The deletion indicators can be configured in (Interface Configuration &gt; Edit Interface.)</p>	Determine whether values shall overwrite or append and select your setting accordingly.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>If your interface is set to Delta changes no, OXI expects a full overlay of all profile data in every profile message, even if the external system only changes very little of the entire profile.</p> <p>Here is how the parameter works: If your interface is setup as Delta Changes = Y and no preferences are sent by the external system in the profile message, this parameter is ignored and the existing OPERA Cloud profile preferences remain untouched. Otherwise the following parameter rules apply: If Y, preferences sent by external system will overwrite existing OPERA Cloud profile preferences. If N, preferences sent by the external system will be appended to existing OPERA Cloud profile preferences.</p>	

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PROFILE CREATION	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>If you do not have any reason for not creating a new profile in case a match could not be found, this parameter should always be set to either Y or a comma separated combination of the alphabets A, B, C, D, E AND F.</p> <p>Each alphabet stands for specific profile selection:</p> <p>A- Guest B- Corporate C- Group D- Travel Agent E- Source F- Contact</p> <p>For all interfaces that transmit reservations and blocks, this parameter has to be set to either Y or the above alphabet combination and a new profile will be created in case no profile match and merge with an existing OPERA Cloud profile is possible. The reason that a profile fails the match can be that the profile does not make the entry match criteria or that it fails in the weighing point match criteria. Set this parameter to N if you do not transmit blocks and reservations in your interface, and no new profile will be created in case profile match fails.</p>	Set Accordingly.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PROFILE MATCHING	Y/N	-> Direction: Data from external system to OPERA Cloud  Set to Y in order to use the OXI Profile Matching routine with entry match criteria and weighing point match criteria. In case you do not require profile matching, for example, if OPERA Cloud and the external system share their internal profile numbers both ways and always have an ideal match, you can select to set this parameter to N. The OXI Profile Matching routine will then be ignored.	Set Accordingly.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PROFCOMMENTS EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter will come into effect if you allow profiles to be overwritten in general. This means at least one of your parameters IND EXT CRS OVER, CORP EXT CRS OVER, TA EXT CRS OVER, SOURCE EXT CRS OVER, or GROUP EXT CRS OVER have to be set to Y. The functionality of this parameter is further determined by the mode of your interface. If it works with delta changes set to Yes (interface configuration &gt; edit interface), the external system can send profile changes only and does not need to send the full profile every time a small change to a profile occurs. OXI will then only update the changed data and not touch the additional data that was found in the OPERA Cloud profile. This also means that the external system needs to indicate intended deletions clearly with deletion indicators in the message. Sending simply blanks will not lead to data deletion if OXI works in delta mode. The deletion indicators can be configured in (Interface Configuration &gt; Edit Interface.)</p>	Determine whether values shall overwrite or append and select your setting accordingly.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>If your interface is set to delta changes No, OXI expects a full overlay of all profile data in every profile message, even if the external system only changes very little of the entire profile.</p> <p>Here is how the parameter works: If your interface is setup as Delta Changes = Y and no comments are sent by the external system in the profile message, this parameter is ignored and the existing OPERA Cloud profile comments remain untouched. Otherwise the following parameter rules apply: If Y, comments sent by external system will overwrite existing OPERA Cloud profile comments. If N, comments sent by the external system will only overwrite OPERA Cloud profile comments where the update_user=interface ID, and the ones that were last changed by the OPERA Cloud user remain untouched.</p>	

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RELATIONSHIP	None All Global Send Conversion Only	<p>-&gt; Direction: Data from external system to OPERA Cloud and from OPERA Cloud to external system.</p> <p>This parameter manages the transfer of relationship associations between OPERA Cloud and External Systems. This parameter consists of 4 distinct settings (All, None, Global, Send with Conversion only). This parameter is valid only for Profile Schema v3 and above.</p> <p>None - When active, no relationship data will be sent to or received from External system.</p> <p>All - Any update to the relationship will be updated in the receiving system regardless of local or global designation.</p> <p>Global - Only relationship indicated as global will be exchanged. Any local relationships will not be exchanged or updated.</p> <p>Send with Conversion Only - Only relationships with active conversions will be exchanged between systems.</p>	Setting is based on the use of profile relationships; select accordingly.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RELATIONSHIPS INCOMING	ALL GLOBAL NONE	<p>-&gt; Direction: External System to OPERA Cloud only.</p> <p>This parameter manages the transfer of relationship associations between OPERA Cloud and External.</p> <p>None - When active, no relationship data will be sent or received from External system.</p> <p>All - Any update to the relationship will be updated in the receiving system regardless of local or global designation.</p> <p>Global - Only relationship indicated as global will be exchanged. Any local relationships will not be exchanged or updated.</p>	Set Accordingly.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RELATIONSHIPS OUTGOING	ALL GLOBAL NONE	-> Direction: OPERA Cloud to External System only.  This parameter manages the transfer of relationship associations between OPERA Cloud and External.  None - When active, no relationship data will be sent or received from External system. All - Any update to the relationship will be updated in the receiving system regardless of local or global designation. Global - Only relationship indicated as global will be exchanged. Any local relationships will not be exchanged or updated.	Set Accordingly.
REPLACE MEMBERSHIP CARD NUMBER	Y/N	-> Direction: Data from external system to OPERA Cloud  If set to 'Y', update the card number of the existing membership with same type. If set to 'N', inactivate current membership of same type and create a new membership with the received membership number.	Set to Y if external system shall be allowed to update.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SOURCE_EXT_CRIS_OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether a source profile shall be overwritten from the external system or not. This may be desirable if the external system has more accurate data on the source or wholesaler than the OPERA Cloud database. Set to Y and the external system profile details for source profiles will overwrite the existing OPERA Cloud profile. Set to N and the OPERA Cloud details will remain unchanged.</p> <p>Even if this parameter is set to Y you can manipulate how data is being overwritten with the use of profile parameters INTEREST_EXT_CRIS_OVER, NEGRATES_EXT_CRIS_OVER, PHONE_ADDR_EXT_CRIS_OVER, PREF_EXT_CRIS_OVER, PROFCOMMENTS_EXT_CRIS_OVER.</p>	Set to Y if external system shall be allowed to update.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
TA EXT CRS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether a travel agent profile shall be overwritten from the external system or not. This may be desirable if the external system has more accurate agent data than the OPERA Cloud database. Set to Y and the external system profile details for agent profiles will overwrite the existing OPERA Cloud profile. Set to N and the OPERA Cloud details will remain unchanged.</p> <p>Even if this parameter is set to Y you can manipulate how data is being overwritten with the use of profile parameters INTEREST EXT CRS OVER, NEGRATES EXT CRS OVER, PHONE/ADDR EXT CRS OVER, PREF EXT CRS OVER, PROFCOMMENTS EXT CRS OVER.</p>	Set to Y if external system shall be allowed to update.

**Table 30-6 (Cont.) Profiles Group parameters and settings.**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPDATE SALUTATION	Y/N	-> Direction: Data from external system to OPERA Cloud.  When this parameter is set to Y, OXI will update the salutation of a profile based on the profile's title handling, each time a PROFILE message is received.  When this parameter set to N, OXI will insert salutation when inserting a new profile, but will then not update this salutation, to allow users to maintain custom salutations in OPERA Cloud.	Default is N. Set accordingly.
OXI_PROFILES: PROCESS INBOUND DOCUMENTS	Y/N	-> Direction: Data from External System to OPERA Cloud only.  Only Global, and not resort specific, documents will be processed based on the parameter setting. Select 'Y' to process all received Document Types. Select 'N' to ignore all received Document Types.	
OXI_PROFILE: PHONE EXTENSION SYS OVER	Y/N	-> Direction: Data from External system to OPERA Cloud This parameter determines whether to send phone extension .  <ul style="list-style-type: none"> <li>• If this parameter is set to 'Y', phone extensions will be exchanged from external system.</li> <li>• If this parameter is set to 'N', phone extensions will not be exchanged from external system.</li> </ul>	

## Default Profiles for OXI

The following are recommended default settings for Profiles.

**Table 30-7 Default Profiles for OXI and it's Description**

Default Profiles	Description
TA Commission Code	Select a default for commission codes when Travel Agent profiles are transmitted and you would like to apply a default commission code to new TA profiles.
TA/Company Owner	This is no longer mandatory, instead it is dependent on whether the OPERA Cloud function OWNER parameter is active. If this function is active, a profile owner must be set in order to update an account profile in OPERA Cloud. Select the sales associate or owner for a profile from the external system. Ownership by sales associates, as pertains to groups and conferences, is then defaulted when a new Company or Travel Agent profile is sent.
Member Number that shows in Profile and Reservation.	<p>You can select a High Priority Member Type or determine that the member number that made the profile match is shown on top of the guest profile memberships and the reservation memberships screen. These columns are mutually exclusive but you can also leave both columns blank if you don't have a preference for the member number to show.</p> <ul style="list-style-type: none"> <li> <b>High Priority Member Type:</b>            Select a member type from a list of OPERA Cloud values. If a membership record with this member type exists for the profile, or is created during profile download, the member number linked to this member type is inserted as the first record in the OPERA Cloud memberships table. It is then visible on top of the reservation screen and as first record in the profile memberships.         </li> <li> <b>Match Member Number</b>            :            Check this option if you want to give priority to the profile matching member number rather than a specific member type. During download the profile-matching module attempts to find an existing OPERA Cloud profile to merge the incoming data with. If the match can be made based on a member number that is linked to an existing profile, this member number is then visible on top of the reservation screen and as first record in the profile memberships.         </li> </ul>

## Rates Interface Parameters and Settings

Rate parameters apply if your interface transmits rates. All parameters are set at the global level.

**Table 30-8 Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
CONFIDENTIAL RATES	A B C	-> Direction: Data from external system to OPERA Cloud  Select a letter for a rate marked as "Confidential" in the external system can be marked in OPERA Cloud as "Suppress Rate", (do not display the rate to users during the reservation process), "Do Not Print Rate" (do not print the rate on registration cards and confirmation letters), or both.  Values: A - Suppress Rate B - Do Not Print Rate C - Suppress and Do Not Print Rate	Set Accordingly.
EXT SYS DEPENDENT RATES	Y/N	-> Direction: The external system is capable of handling dependent rates.  If set to Y, only the modified rate will be sent to the external system, if set to N, the resulting recalculated dependent rates will be sent to the external system.	Set Accordingly.

**Table 30-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
HANDLE RATES POSTING RHYTHM	FULL OVERLAY IGNORE KEEP UPDATE	-> Direction: Data from external system to OPERA Cloud  This parameter determines how to handle the incoming Rate Posting Rhythm (applies to non-V3 interfaces only).  When set to FULLOVERLAY, existing Rate Posting Rhythm will get overwritten with the incoming value.  When set to UPDATE, update Rate Posting Rhythm only if existing value is null.  When set to KEEP, keep existing Rate Posting Rhythm if the received value is null.  When set to IGNORE, incoming Rate Posting Rhythm will be ignored.	Set Accordingly.

**Table 30-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
KEEP RATE DETAILS	M S P Y	-> Direction: Data from external system to OPERA Cloud  This parameter determines whether the Market code, Source Code, Package Elements and Yield Adjustment information of rate code details will be overwritten by an external system update or not. This parameter can be set to a single value or a comma separated combination of following : M: Market Code S: Source Code P: Package Elements Y: Yield Adjustments  For example if we don't want any modifications to any of these we will set this parameter as 'M,S,P,Y'. To allow updating of this column information just don't set any value in the parameter list.	Set Accordingly.

**Table 30-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
KEEP RATE HEADER PKG	Y/N	-> Direction: Data from external system to OPERA Cloud.  This parameter determines whether package elements attached to the OPERA Cloud rate code will be overwritten by an external system update or not. Set to Y and only package elements attached to the rate header where the update_user = external system ID will be updated. This means that package elements created by an OPERA Cloud user will not be overwritten. If this parameter is set to N, all package elements will be overwritten by changes from the external system, regardless where they have been created.	Set to Y if OPERA Cloud package elements should be kept.

**Table 30-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
NO RATE HEADER UPDATE	(see description)	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>Select the letters for the rate header columns that shall not be updated by rate change messages from external systems.</p> <p>Values:</p> <ul style="list-style-type: none"> <li>A - Rate Description</li> <li>B - Rate Category</li> <li>C - Folio Text</li> <li>D - Market Code</li> <li>E - Source Code</li> <li>F - Commission</li> <li>G - Minimum Stay Through</li> <li>H - Maximum Stay Through</li> <li>I - Min Advance Booking</li> <li>J - Suppress Rate</li> <li>K - Print Rate</li> <li>L - Long Info</li> <li>M - Short Info</li> <li>N - Transaction Code</li> <li>O - Yieldable YN</li> <li>P - Commission %</li> <li>Q - Max Advance Booking</li> <li>R - Yield As</li> <li>S - Sell Sequence</li> <li>T - Discount</li> <li>U - Membership</li> <li>V - Daily Rates</li> <li>W - Day use</li> <li>X - Complimentary</li> <li>Y - House use</li> </ul>	Select all letters that apply. This highly depends whether a GDS interface is installed at the OPERA Cloud level, in which case the update of most rate header columns sent by external system should be prevented.

**Table 30-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RATE DELTA HANDLING	Y N	-> Direction: OPERA Cloud to external system  This parameter determines if the OPERA Cloud Rates will be sent as Delta or FullOverlay messages. This parameter only applies to Non-OPERA Cloud interfaces.  When set to Y, OPERA Cloud Rates will be sent as Delta messages.  When set to N, OPERA Cloud Rates will be sent as FullOverlay messages.	Set Accordingly.

**Table 30-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RATE DETAIL MESSAGE HANDLING	FAIL REMOVE REQUEST	<p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>This parameter applies only when receiving rate messages of type DETAIL, whereby OXI will not receive all rate details belonging to that rate, but is requested to update individual rate details as present in the message. This parameter determines processing principles when receiving details that offend existing rate details (i.e. existing rate DETAIL for one of the room types with dates overlapping).</p> <p>FAIL: When receiving an offending rate detail, OXI will FAIL the message and report RESULT FAIL in the result message returned to the sender.</p> <p>REMOVE: When receiving an offending rate detail, OXI will remove all existing offending rate details and rely on the external system to provide all other replacing details in subsequent messages.</p> <p>REQUEST: When receiving an offending rate detail, OXI will FAIL the message and request the FULL RATE from the sending system. For this setting, the external system must</p>	Set accordingly.

**Table 30-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		support MESSAGEREQUEST V3 or higher.  MAKE ROOM: Make room for the incoming rate details, during this process conflicting rate details will be appropriately adjusted to make room for incoming rate detail using split/insert/update and delete operations.	
RATE EXTERNAL LOCKED YN	Y/N	->Direction: Data from external system to OPERA Cloud.  If this parameter is set to Y the rate code created by the external system will be locked in OPERA Cloud and cannot be modified by OPERA Cloud users. If set to N the rate code created by the external system will fully changeable in OPERA Cloud.	Set to Y, if external system will have control.
RESTRICTION CODES	Open Closed Open for Arrival Closed for Arrival Open for Departure Closed for Departure Min. Stay Through Max. Stay Through Min. Length of Stay Max. Length of Stay Min. Advanced Booking Max. Advanced Booking Length of Stay Not Available Clear All Restrictions Restrictions per Day	-> Direction: Data from OPERA Cloud to External and External System to OPERA Cloud.  Restriction Codes in the Rate Availability and Rate Strategy screens that are supported for the Interface. Select one or multiple restriction codes from a multi-select list of values.  Note: When no value(s) are selected, all restriction types will be sent.	Set Accordingly.

**Table 30-8 (Cont.) Rates Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SUPPORTED CHANNELS	(see description)	-> Direction: Definition of channels. Allowed definition of channels for which restrictions are to be sent through specified interface.	Set Accordingly.

## Rate Defaults for OXI

The following are recommended default settings for Rates.

**Table 30-9 Rate Defaults for OXI and Description**

Rate Defaults	Description
Rate Class	This can be left blank if a rate category default is selected, as the rate category automatically determines the rate class linked.
Rate Category	This default can be used for all rates codes from the external system if no conversion of the rate category is possible, or if no rate category is sent.

## Reservations Interface Parameters and Settings

All parameters are set at the global level.

**Table 30-10 Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
ADDITIONAL REFERENCE EXCHANGE	(see description)	<p>-&gt; Direction: Data from OPERA Cloud to external systems and external systems to OPERA Cloud.</p> <p>Comma separated list of unique additional external reference types that are allowed to be included in the reservation and reservation result messages to the external systems, and accepted from the external systems.</p> <p>This may include actual external system types (such as ORS, OXI-OPERA, MYFIDELIO, etc.), but references belong to those systems will be exchanged from OPERA Cloud to external systems only, those will be ignored while processing inbound messages from external systems to OPERA Cloud to prevent tampering legitimate external system references present in OPERA Cloud.</p>	Set Accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
AUTOPOPULATE MEMBERSHIP YN	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>If this parameter is set to Y, OXI will populate the selected memberships from the reservation message based on the membership type configuration in OPERA Cloud. This means if the membership type is setup to auto populate reservation, OXI will do the same when inserting the reservation. If that membership type is setup to not auto populate reservation or to prompt user, OXI will not copy the membership either.</p> <p>If the parameter is set to N, OXI will copy the selected memberships from the message into the reservation, regardless of the membership type configuration in OPERA Cloud.</p>	Set to Y to allow the same functionality as if OPERA Cloud user enters a membership directly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
COPY COMMENTS FROM PROFILE	Select a profile type accordingly.	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>For profiles which have notes (Type: Reservation) associated with it, this parameter will determine whether to copy them on to reservation as comments.</p> <p>The value(s) of the parameter will also determine the type of profiles the copy is intended.</p> <p>Leave the value blank (null, which is default value) to avoid copying the reservation notes from profile to reservation as comments.</p> <p>If single value is selected then notes from that particular profile type are copied.</p> <p>If multiple values are selected then notes from those selected list of profile types are copied.</p>	Default value is null.
EXT SYS HANDLES DAY USE	Y/N	<p>-&gt; Direction: Data from OPERA Cloud To External System.</p> <p>When parameter value = Y, handling day use rooms has no difference. When parameter value = N, OXI will send a cancellation message to the external system when OPERA Cloud reservation has an external reference number and the number of nights equals 0.</p>	Default is Y. Set accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
EXT SYS MARKET/ SOURCE CONTROL	R/B/E/D/Y or N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter defines the sequence in which OXI identifies the market and source codes to apply in the reservation.</p> <ul style="list-style-type: none"> <li>• R = Use the codes defined in rate definition (rate details first and then rate header),</li> <li>• B = Use the codes defined in block definition,</li> <li>• E = Use the codes received from the external system (after conversion, if applicable),</li> <li>• D = Use the codes defined in OXI defaults,</li> <li>• Y = When used alone, same as ED and</li> <li>• N = When used alone, same as BRD.</li> </ul>	Set accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
EXT SYS PRICE CONTROL	N/Y/YC	<p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>Y -&gt; External rate will be applied with discounts present in the message. The reservation rate will be fixed if OPERA Cloud Fixed Rates is enabled and the inbound message includes an indicator (identified by a structured tag in the message) that the rate should be fixed or if the indicator is not present in the message. If the inbound message includes an indicator that the rate should not be fixed, the reservation rate will not be fixed.</p> <p>In this case, there will be no rate comparison between the rate sent in the message against the rate detail in OPERA Cloud. The rate amount sent in the message will always be used and the decision to fix the rate in OPERA Cloud will be made by the contents of the inbound message.</p> <p>YC -&gt; External rate will be applied with discounts present in the message. The reservation rate will be fixed if OPERA Cloud Fixed Rates is enabled and the inbound message includes an indicator (identified by a structured tag in the</p>	Set to Y as external system has already sold the rate amount, and therefore it should be confirmed in OPERA Cloud as well.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
EXT SYS GENERATED INV	Y/N	<p>message) that the rate should be fixed.</p> <p>If the inbound message includes an indicator that the rate should not be fixed or if the inbound message does not include the fixed rate indicator, then a rate comparison between the rate sent in the message against the rate detail in OPERA Cloud will be executed to determine whether or not to fix the rate. The rate amount sent in the message will always be used, but the decision to fix the rate in OPERA Cloud will be made by the results of the rate comparison. If the rate in the inbound message matches the rate in OPERA Cloud, the rate will not be fixed. If the rate in the inbound message does not match the rate in OPERA Cloud, the rate will be fixed.</p> <p>N -&gt; OPERA Cloud rate will be applied. Any discounts present in the message will be ignored and will not be applied.</p> <p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>When a reservation message from an external system is received, OXI will generate inventory snapshots for the affected dates and room types.</p>	Set Accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
FORCE BLOCK CODE	Block Code / Blank	<p>-&gt; Direction: External System to OPERA Cloud only.</p> <p>When selected, all reservations received will be booked against the selected block, regardless of the presence or value of a block code in the message.</p> <p>When blank, no particular function is associated.</p> <p>Note: This interface parameter is available for the TUI interface only.</p>	Default is blank. Set Accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
FULL OPERA SHARES	Y NS NU	<p>-&gt;Direction: Data both ways between external system and OPERA Cloud.</p> <p>The following rules apply to both incoming and outgoing messages:</p> <p>When this parameter is set to Y, any update on one individual reservation will be reflected in one reservation XML message. Any share related action (combine/break) will be reflected in appropriate share reservation message with only the key information about the reservations involved.</p> <p>When this parameter is set to NS any update, including share related on any of the reservations will be reflected in a reservation XML message containing information about all the relevant shares. External reference of all the share reservations in OPERA Cloud will be updated from the incoming result message.</p> <p>When this parameter is set to NU, it acts similarly to NS, but external reference of only those reservations in OPERA Cloud mentioned in the result message will be updated from the incoming result message.</p> <p>Note: This parameter can be active for any interface that requires</p>	Set to N as this is only used for OPERA Cloud.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
IGNORE RES FOR UPDATE OLDER THAN	Numeric value for number of days	<p>it (ORS / OXI-OPERA / OXI-V7 / OXI-V6).</p> <p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>Enter a numeric value that will be translated into number of days. The value entered here will determine how many days in the past OXI will consider existing reservations for update when matching on external reference number.</p> <p>If the external reference number sent in the message matches the external reference of an existing reservation, then that reservation will be considered for update if the departure date of the existing reservation is same or later than the number of days in the past entered in this parameter. If the departure date of the existing reservation is earlier than the number of days in the past entered in this parameter, then the existing reservation will be ignored and a new reservation will be created.</p> <p>If this parameter is left blank, then ALL existing reservations will be considered for update.</p>	Set Accordingly. The Default setting is blank and this parameter should be left blank if the external system will always send a unique confirmation number.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
INHERIT CONFIRMATION NUMBER	Y/N	<p>-&gt; Direction: External System to OPERA Cloud only.</p> <p>When set to Y, OPERA Cloud will inherit the external system's confirmation number as its own, which will allow passing of the originating (Guest) confirmation number to PMS systems that do not have the capability of processing and storing multiple external references.</p> <p>When set to N, OPERA Cloud will store the external system's confirmation number, assign the OPERA Cloud confirmation number and pass it along to the receiving system.</p> <p>This parameter is subjected to the following restrictions:</p> <ul style="list-style-type: none"> <li>- The parameter can be set to Y for only one external system across the entire OPERA Cloud system</li> <li>- For this one system, it can be selected for any number of resorts</li> <li>- For resorts, where the parameter is set to Y, the parameter SEND IFC CREATED ONLY must be set to Y as well.</li> </ul> <p>The restrictions serve to limit the possibility of colliding confirmation numbers between multiple external systems and OPERA Cloud. It is however the OPERAator's responsibility to set the</p>	Set Accordingly.

<b>Parameter Name</b>	<b>Parameter Value</b>	<b>Direction of transmission where parameter applies. Parameter Description</b>	<b>Recommended Setting</b>
		confirmation number sequences such that this never occurs.	

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
ITEM INVENTORY EXT SYS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>Enter a numeric value that will be translated into number of days.</p> <p>The value entered here will determine how many days in the past OXI will consider existing reservations for update when matching on external reference number.</p> <p>If the external reference number sent in the message matches the external reference of an existing reservation, then that reservation will be considered for update if the departure date of the existing reservation is same or later than the number of days in the past entered in this parameter. If the departure date of the existing reservation is earlier than the number of days in the past entered in this parameter, then the existing reservation will be ignored and a new reservation will be created.</p> <p>If this parameter is left blank, then ALL existing reservations will be considered for update.</p> <p>Default setting is blank and this parameter should be left blank if the external system will always send a unique confirmation number.</p>	Set Accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PACKAGE EXT SYS OVER	(see description)	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines how the package elements received from the external system updates the packages in OPERA Cloud.</p> <p>A = If received, replace OPERA Cloud values with the received values. If not received, remove the values from OPERA Cloud.</p> <p>B = If received, replace OPERA Cloud values with the received values. If not received, do not remove the values from OPERA Cloud.</p> <p>C = If received, merge the received values with OPERA Cloud values. If not received, remove the values from OPERA Cloud.</p> <p>D = If received, merge the received values with OPERA Cloud values. If not received, do not remove the values from OPERA Cloud.</p> <p>N = Ignore the package elements received. Do not touch the values in OPERA Cloud.</p>	Set Accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
PEGASUS CHANNEL UPDATE	ALN/LCL or ORD/RID	-> Direction: Data from external system to OPERA Cloud. For Pegasus only: this parameter determines whether the combination ALN/LCL or ORD/RID are used to map into the OPERA Cloud channel code. For ALN/LCL: If Pegasus sends ALN, this will be used for channel mapping, otherwise the LCL will be used. For ORD/RID: If Pegasus sends ORD, this will be used for channel mapping, otherwise the RID will be used.	Pegasus for Fairmont: ALN/LCL Pegasus for Meridien: ORD/RID
PROMOTION EXT SYS OVER	Y/N	-> Direction: Data from external system to OPERA Cloud This parameter determines whether Promotion elements sent by external system shall overwrite OPERA Cloud Promotion elements or not. Overwriting may be desired, as the property should decide what Promotions the guest has in this reservation. Set to Y and reservation Promotions will always be overwritten by external system Promotions. Set to N and Promotion elements sent by external system will be appended to existing ones in OPERA Cloud.	Set Accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RATE CODE CONVERSION MODE	RATE CODE FLOATING RATE	<p>-&gt; Direction: Data both ways between external system and OPERA Cloud</p> <p>This parameter determines whether to use only one of external SRP and rate level or the combination of both to convert to/from OPERA Cloud rate codes.</p> <p>When set to RATE CODE, when SRP is received from external system, it will be converted to OPERA Cloud rate code, else rate level will be converted to OPERA Cloud rate code and back.</p> <p>When set to FLOATING RATE, combination of the external SRP and rate level will be converted to an OPERA Cloud rate code and back.</p>	<p>Set Accordingly.</p> <p>This parameter is only available for the Pegasus Interface.</p>

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
REINSTATE CANCELLED RESERVATION	ALWAYS - ON ANY UPDATE ACTION REINSTATE - ONLY ON REINSTATE ACTION	Direction: Data from External System to OPERA Cloud.  This parameter determines how canceled reservations will be reinstated when processing inbound reservation messages.  ALWAYS: Canceled reservations will be reinstated when the action type in the reservation message indicates UPDATE or REINSTATE or RESYNC. REINSTATE: Canceled reservations will be reinstated only when the action type in the reservation message explicitly indicates REINSTATE or RESYNC. If the action type in the reservation message is different, reservation will not be reinstated and an appropriate error will be logged.	Set Accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
REMOVE EXT SYS NO	Y/N	<p>-&gt; Direction: Data from OPERA Cloud to external system.</p> <p>This parameter only applies to full 2-way interfaces that send reservations both ways. If a party reservation is split into multiple single reservations in OPERA Cloud, the split-offs need to be sent as new reservations to the external system. In this case the original external confirmation number should be removed before the message is sent to ensure that a new confirmation number is triggered. The same would apply in case a share is broken in OPERA Cloud. Here we would send a new reservation for the broken share and that should result in a new confirmation number as well. Therefore the parameter would be set to Y.</p> <p>If set to N, the external system confirmation number will be kept after a split of a party reservation or a break share. This is required for a 1-way interface where the external system does not return a new confirmation number since it does not know about the change in OPERA Cloud.</p>	Set to Y for all full 2-ways that sent CRS numbers upon receipt of new reservations. Otherwise set to N.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
REMOVE EXT REF ON REINSTATE	NO SHOW	->Direction: Data from OPERA Cloud to External System	Set Accordingly.
	CANCEL	Select NO SHOW if the reinstate no show message sent to the External System should not contain the External Reference Number of the current interface. Select this option when the External System cannot reinstate a no show reservation using the same reference number.	
	NULL	Select CANCEL if the reinstate cancel message sent to External System should not contain the External Reference Number of the current interface. Select this option when the External System cannot reinstate a canceled reservation using the same reference number. If this parameter is NULL, then the External Reference Number of the current interface will always be sent to the External System for reinstate messages.	

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
RESCOMMENTS EXT SYS OVER	Y/N	-> Direction: Data from external system to OPERA Cloud.  This parameter determines whether reservation comments sent by external system shall overwrite OPERA Cloud comments or if they shall be appended to existing ones. If set to Y the OPERA Cloud reservation comments will always be overwritten by the external system comments. If set to N, only comments where the update user = external system ID in the OPERA Cloud database will be updated.	Set to N if you would like to keep OPERA Cloud changes intact.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SHARE RATE CALC METHOD	ENTIRE FULL INACTIVE SPLIT	- >Direction:Data from external system to OPERA Cloud  'INACTIVE' = When OXI Parameter OPERA Cloud FULL SHARES is set to Y, behavior is INACTIVE, regardless of parameter value.  When 'FULL OPERA Cloud SHARES' is set to N, OPERA Cloud determines the share amount as follows:  SPLIT: Each sharer will carry an equal portion of the total rate amount.  FULL: Each sharer will have the full rate amount.  ENTIRE: First sharer will be determined as the primary and carry the entire rate amount, all other sharers will have a zero rate amount.	Defaults to INACTIVE Works with FULL OPERA Cloud SHARES parameter, see explanation before setting.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SHARER REMOVAL MODE	CANCEL DELETE NEITHER	<p>-&gt; Direction: External system to OPERA Cloud only.</p> <p>Applicable only when FULL OPERA Cloud SHARES=N. This parameter determines how should OXI handle share reservations those found in OPERA Cloud but not coming in the message.</p> <p>When this parameter = CANCEL it cancels any sharer present in OPERA Cloud which does not appear in the incoming message.</p> <p>When this parameter = DELETE it deletes any sharer present in OPERA Cloud which does not appear in the incoming message.</p> <p>When this parameter = NEITHER it leaves sharer(s) those present in OPERA Cloud untouched, even if they don't appear in the message.</p>	<p>This parameter is only available when the parameter FULL OPERA Cloud SHARES is set to N.</p> <p>Set accordingly.</p>

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SPECIALS EXT SYS OVER	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines whether special requests sent by the external system will overwrite the ones in OPERA Cloud, or if they will be appended to existing ones.</p> <p>The functionality of this parameter is further determined by the mode of your interface. If it works with Delta changes set to Yes (Interface Configuration&gt;Edit Interface), the external system can send reservation changes only and does not need to send the full reservation every time a small change to a reservation occurs. OXI will then only update the changed data and not touch the additional data that was found in the OPERA Cloud reservation. This also means that the external system needs to indicate intended deletions clearly with deletion indicators in the message. Sending simply blanks will not lead to data deletion if OXI works in Delta mode. The deletion indicators can be configured in interface configuration-&gt;edit interface.</p> <p>If your interface is set to Delta changes No, OXI expects a full overlay of all profile data in every profile</p>	Determine whether values shall overwrite or append and select your setting accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		<p>message, even if the external system only changes very little of the entire profile.</p> <p>Here is how the parameter works: If set to Y and the interface is setup as Delta Changes = Y, ONLY the specials originally inserted by the external system will be overwritten. If set to Y and the interface-&gt; Direction: Data from OPERA Cloud to external system</p> <p>When the reservation message can't be delivered (possibly due to communication errors) to the external system, a trace will be logged against this trace department. Applicable only if OXI processor is configured to deliver the messages.</p> <p>is setup as Delta Changes = N, all reservation specials in OPERA Cloud will be overwritten by the external system specials. If set to N, new specials will be appended to existing ones in OPERA Cloud, regardless whether the interface works in delta mode or not.</p>	

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
SPLIT CANCELLATIONS	CANCEL/ DELETE	-> Direction: Data from external system to OPERA Cloud.  This parameter determines how OXI handles split off reservations, for a 1-way interface, when a cancel message is received for the original multi room reservation from the external system. CANCEL: Split reservations will be canceled. DELETE: Split reservations will be deleted.	Set Accordingly. (For 1-Way Interface)
STAY UPLOAD PROFILE TYPES	(see description)	-> Direction: Data from OPERA Cloud to external systems.  If null all the stay records will be sent to external system. If value(s)are selected; then the stay records will be sent where only those profiles exist on Stay records. (i.e. If selection is only TRAVEL_AGENT, then only Stay Records that have an attached Travel Agent profile will be sent. All other Stay records without this profile will not be sent).	Set Accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
TRACE DEPT FOR DELIVERY FAILURE	(see description)	-> Direction: Data from OPERA Cloud to external system When the reservation message can't be delivered (possibly due to communication errors) to the external system, a trace will be logged against this trace department. Applicable only if OXI processor is configured to deliver the messages.	Set Accordingly.
TRACE DEPT FOR FAILURE IN EXT SYS	(see description)	-> Direction: Data from external system to OPERA Cloud When the external system can't process a reservation message received from OPERA Cloud, if it sends a result message back to OPERA Cloud indicating the error, a trace with the error message will be logged against this trace department.	Set Accordingly.
TRACE DEPT FOR NON REVIEWED	(see description)	-> Direction: Data from external system to OPERA Cloud When a non-reviewed reservation message received from the external system is processed, a trace will be logged against this trace department. If a canceled reservation message is sent from an external system OXI also adds an additional trace reading "Please review this reservation cancelled by XXX external system.", where XXX is replaced with the name of the actual interface.	Set Accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
TRACE ROOM ASSIGNMENT	NO ROOM ALWAYS NEVER	-> Direction: External System to OPERA Cloud only. NO ROOM - OPERA Cloud will trace if Room could not be assigned. ALWAYS - OPERA Cloud will trace Room assignment process. NEVER - OPERA Cloud will not trace Room assignment.	Set Accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPDATE ACCOMPANY GUEST	A B C D N	<p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>This parameter determines how the accompany guest received from the external system updates the accompany guest in OPERA Cloud.</p> <p>A = If received, replace OPERA Cloud values with the received values. If not received, remove the values from OPERA Cloud.</p> <p>B = If received, replace OPERA Cloud values with the received values. If not received, do not remove the values from OPERA Cloud.</p> <p>C = If received, merge the received values with OPERA Cloud values. If not received, remove the values from OPERA Cloud.</p> <p>D = If received, merge the received values with OPERA Cloud values. If not received, do not remove the values from OPERA Cloud.</p> <p>N = Ignore the accompany guest received. Do not touch the values in OPERA Cloud.</p>	Set Accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPDATE FEATURES	A B C D N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines how the features received from the external system updates the features in OPERA Cloud.</p> <p>A = If received, replace OPERA Cloud values with the received values. If not received, remove the values from OPERA Cloud.</p> <p>B = If received, replace OPERA Cloud values with the received values. If not received, do not remove the values from OPERA Cloud.</p> <p>C = If received, merge the received values with OPERA Cloud values. If not received, remove the values from OPERA Cloud.</p> <p>D = If received, merge the received values with OPERA Cloud values. If not received, do not remove the values from OPERA Cloud.</p> <p>N = Ignore the features received. Do not touch the values in OPERA Cloud.</p>	Set Accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPDATE FIXED CHARGES	A	-> Direction: Data from external system to OPERA Cloud	Set Accordingly.
	B	This parameter determines how the fixed charges received from the external system update the fixed charges in OPERA Cloud reservation.	
	C	A = If received, replace OPERA Cloud values with the received values. If not received, remove the values from OPERA Cloud.	
	D	B = If received, replace OPERA Cloud values with the received values. If not received, do not remove the values from OPERA Cloud.	
	N	C = If received, merge the received values with OPERA Cloud values. If not received, remove the values from OPERA Cloud. D = If received, merge the received values with OPERA Cloud values. If not received, do not remove the values from OPERA Cloud. N = Ignore the fixed charges received. Do not touch the values in OPERA Cloud.	

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPDATE INHOUSE RES	Y/N	-> Direction: Data from external system to OPERA Cloud. With this parameter OXI allows you to update reservations that are indicated as Checked In OPERA Cloud PMS. If set to Y, OXI will accept changes to checked in reservations in OPERA Cloud except for arrival date and room type changes. If set to N, OXI will reject any changes to a checked in reservation in OPERA Cloud.	Set to Y if you would like your in-house reservations updated further by the external system.
UPDATE ROUTING TO ROOM	Y/C/N	-> Direction: Data from external system to OPERA Cloud. This parameter determines how the room routing instructions received from the external system update the room routing instructions in OPERA Cloud reservation. Y = Replace all the OPERA Cloud routings with the received routings. If no routings are received, remove all the OPERA Cloud routings. C = Accept all the valid routings received into OPERA Cloud, remove only those OPERA Cloud routings with codes configured in conversion but not received in the message. N = Ignore the routings received. Do not modify any routings in OPERA Cloud.	Set Accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPDATE ROUTING TO WINDOW	Y/C/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter determines how the window routing instructions received from the external system update the window routing instructions in OPERA Cloud reservation.</p> <p>Y = Replace all the OPERA Cloud routings with the received routings. If no routings are received, remove all the OPERA Cloud routings.</p> <p>C = Accept all the valid routings received into OPERA Cloud, remove only those OPERA Cloud routings with codes configured in conversion but not received in the message.</p> <p>N = Ignore the routings received. Do not modify any routings in OPERA Cloud.</p>	Set Accordingly.
UPDATE ALERTS		Determines how the Reservation Alerts received from the external system is processed.	

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPDATE SHARE RES	Y/N	<p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter allows external systems to update a share reservation in OPERA Cloud. If set to Y, OXI will accept changes to shared reservations in OPERA Cloud based on a strict set of rules:</p> <ol style="list-style-type: none"> <li>1. Based on the OXI parameter UPDATE INHOUSE RES, the external system can send changes to checked-in sharers except for changes to the arrival date and room type.</li> <li>2. In case the external system sends a change to the departure date, OXI will check if the room number assigned to the guest is still available for the extended stay. If not, the change will be rejected with an explicit error message. The currently assigned room number will not be removed. OXI will log all warnings in its status tables, visible to the user</li> <li>3. Changed reservation data will be updated equally for all sharers. If for example an update to market code, booker, comment,</li> </ol>	Set to Y if you would like your shared reservations updated further by the external system.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
		etc are sent in the reservation change message, OXI will update the same data equally in all share reservations.	
		<p>4. All changes to the reservation will be applied to all sharers alike except for the data mentioned in the following bullet points. This means that formerly inserted changes to the share reservations in OPERA Cloud are overwritten.</p>	
		<p>a. Rate changes: OXI will apply the rate amount change to the primary sharer, which is identified by the lowest OPERA Cloud confirmation number.</p>	
		<p>b. If changes to the membership details are sent by the external system, this will only be applied to the primary sharer reservation and profile. For data from OPERA Cloud to an external system, OXI</p>	

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPDATE TRANSPORTATION COMMENTS	Y/N	<p>will only send changes to non-inventory fields if these changes have occurred on the Primary Sharer, the reservation with the lowest OPERA Cloud confirmation number.</p> <p>If this parameter is set to N, OXI will reject any changes to shared reservations in OPERA Cloud.</p> <p>-&gt; Direction: Data from external system to OPERA Cloud.</p> <p>This parameter setting will determine if the transportation comments in OPERA Cloud reservation should be modified or not.</p> <p>If the value is set to 'Y' the transportation comments in OPERA Cloud reservation will be updated or deleted based on the existence of transportation comments in the received message.</p> <p>If the value is set to 'N' the transportation comments in OPERA Cloud reservation will not be modified in anyway irrespective of the transportation comments existence in the received message.</p>	Set Accordingly.

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPL DED RES ONLY	Y/N	-> Direction: Data from external system to OPERA Cloud. If set to Y, only deductible reservations will be sent to the external system. In a reservation this is determined by the reservation type and means that only reservations with deductible reservation types would be sent. This is desirable if the external system does not have a concept of tentative and definite reservations and would regard all bookings equally deductible regardless of their status. Set to N if all reservations should be sent to the external system irrespective of the reservation type.	Set to 'N if external system handles deductible and non-deductible reservations. Otherwise set to Y.
USE GUEST STATUS NOTIFICATION EXTENSION YN	Y/N	-> Direction: Data from OPERA Cloud to External Systems. When set to Y, the HTNG function "GuestStatusNotificationExt" will be used to upload reservation data to the external system. When set to N, the HTNG function "GuestStatusNotification" will be used to upload reservation data.	

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
UPDATE ALERTS		<p>-&gt; Direction: Data from external system to OPERA Cloud</p> <p>This parameter determines how the Reservation Alerts received from the external system will get processed in OPERA Cloud.</p> <ul style="list-style-type: none"> <li>• A = If received, replace OPERA Cloud values with the received values. If not received, remove the values from OPERA Cloud.</li> <li>• B = If received, replace OPERA Cloud values with the received values. If not received, do not remove the values from OPERA Cloud.</li> <li>• C = If received, merge the received values with OPERA Cloud values. If not received, remove the values from OPERA Cloud.</li> <li>• D = If received, merge the received values with OPERA Cloud values. If not received, do not remove the values from OPERA Cloud</li> <li>• N = Ignore the Reservation Alerts received. Do not touch the values in OPERA Cloud.</li> </ul>	

**Table 30-10 (Cont.) Reservations Interface Parameters, Settings and Description**

Parameter Name	Parameter Value	Direction of transmission where parameter applies. Parameter Description	Recommended Setting
AUTO ATTACH ELEMENTS	Y/N	Direction: Data from external systems to OPERA Cloud. If this parameter is set to 'Y', OXI auto attaches the reservation elements based on the auto attach element configuration rules. If the parameter is set to 'N', OXI does not auto attach the reservation elements.	Default value is Y. Set accordingly.

## Reservation Defaults for OXI

The following are recommended Default Settings for Reservations.

**Table 30-11 Reservation Defaults for OXI and it's Description**

Reservation Defaults	Description
Room Type	Select a room type that is readily available with high inventory
Rate Code	Select a rate code that has all of the configured room types for the property. Since rates can be subject to restrictions, either close the rate or room types depending on hotel occupancy, recommendation is to make a OXI Default rate code and insert this value.

**Table 30-11 (Cont.) Reservation Defaults for OXI and it's Description**

Reservation Defaults	Description
Setup of the Default Rate	<ul style="list-style-type: none"> <li>• This rate code is to be setup with all viable room types and a single rate detail, at \$0.00, that has all room types linked to it. If proper revenue/ADR is a factor set a rate amount instead.</li> <li>• This rate code should not be subject to restrictions as other rates are. This can decrease the amount of reservations that are rejected by OPERA Cloud.</li> </ul> <p>Points to be considered:</p> <ul style="list-style-type: none"> <li>• If certain CRS booked reservations are allowed into rates that are indicated as restricted or out of inventory on the hotel side, this default is used to allow that booking in. Warnings in OXI alerts hotel users that the reservation was inserted, the rate was not available and the default was taken instead. Thus allowing the hotel to adjust the booking accordingly.</li> <li>• This default maximizes the hotel's efficiency regarding having all bookings in the hotel system. Limiting the scenario of missing reservations, due to closeouts that OXI cannot bypass.</li> <li>• This default lessens the hotel's need to monitor OXI interface on a rigorous schedule.</li> <li>• To make it easier to see these types of defaults being used within the OPERA Cloud PMS, recommendation is the use OXI parameter WARNING AS TRACES = Y.               <ul style="list-style-type: none"> <li>– This setting is highly recommended. Although OXI offers a warnings report, if system users do not have permission to be in the OXI to run the report then this is an alternate solution. Excellent choice for the smaller hotels with fewer resources in the evenings when Reservations Department has left for the day.</li> <li>– OXI enters only mandatory warnings generated into Traces. A Trace lamp is lit on the reservation when viewed.</li> <li>– This parameter also requires that the Others default field <b>Trace Warning</b> is set to a monitoring department; that can be either Front Office or Reservations.</li> </ul> </li> <li>• OPERA Cloud also offers a Trace Report. Which allows a full overview of all reservations where Traces are created.</li> </ul>
Currency	<p>OPERA Cloud property currency code that should be used as default for a reservation in case no currency code is sent or the code cannot be converted.</p>
Market Code	<p>Select the standard market code that should be used in case conversion is not possible, or if the associated block code/rate code for the reservation do not contain a market code. This is in direct relation to the OXI_RESERVATIONS parameter EXT SYS MARKET/SOURCE CONTROL.</p>
Source Code	<p>Select the standard source code that should be used in case conversion is not possible, or if the associated block code/rate code for the reservation do not contain a source code. This is in direct relation to the OXI_RESERVATIONS parameter EXT SYS MARKET/SOURCE CONTROL.</p>

**Table 30-11 (Cont.) Reservation Defaults for OXI and it's Description**

Reservation Defaults	Description
Reservation Type	The reservation type in OPERA Cloud determines whether the booking is deductible from inventory or not. Select your default according to your needs and we highly recommend maintaining proper conversion for this data element as well.
Payment Method	This is the default payment method used by OXI for a reservation in case no payment method is sent or conversion fails. We highly recommend to select this default carefully and to maintain proper conversion for this data element as well.
Discount Reason	<p>Select a default discount reason that OXI can apply in case the external system rate overwrites the OPERA Cloud rate code amount and a discount amount is entered into the reservation in OPERA Cloud. This is only needed if the OPERA Cloud function FIXED RATES is NOT used.</p> <ul style="list-style-type: none"> <li>• Select other defaults according to your needs.</li> <li>• The external system defaults can be set in case no conversion occurs on external system level.</li> </ul>
Conf. Letter Name	The default letter name to be used in the Confirmation field on the PMS reservation screen. For hotels that do not want to use this functionality the field would be left blank.

# Message Status

Use Message Status to view the status of received and transmitted OXI messages. All errors and warnings that occur during message processing are visible and traceable here. You can then reprocess any failed messages after configuration issues are corrected.

 **Note:**

25 messages are displayed per page in the search result , use page navigation to review all messages in search result.

The status of a sent message from OXI are:

- **FAILED:** The message has failed in the external system during upload. The exact reasons depend on the specific system and can be reviewed in Errors and Warnings
- **NEW:** Used for a membership points lookup request to OPERA Cloud Loyalty to retrieve a profile's membership points. This status indicates that a STAY XML message has been built, but the membership points lookup operation has not yet been completed. The Module for this message is "STAY" and the Action Type is "POINTS REQUEST."
- **PROCESSED:** Simply notifies that the message was processed by OXI. It has still not been delivered by the service, at which time it would turn into SUCCESS.
- **REJECT:** Shown in case OXI rejects the message from upload since vital data is missing or the upload file cannot be built.
- **RESULT FAILED:** The external system has sent a result for this message and has informed that the message was unsuccessful on external system side. The exact reasons depend on the specific system and can be reviewed in Errors and Warnings.
- **RESULT SUCCESS :** The external system has sent a result for this message and has informed that the message was successfully updated on external system side.
- **SUCCESS:** Message has been delivered to the external system by the OXI service
- **WARNING:** The message has been processed successfully but still created a mandatory warning that needs to be reviewed in Errors and Warnings

## Messages From the External System

 **Note:**

Click **Refresh** to refresh the results and see updated status of message(s). Click **Show/Hide Timestamps** to display additional columns indicating the processing times.

### Reprocessing Messages from External System

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Select one or more messages in the search result.
4. Click **Reprocess**.
  - a. Click **Yes** to confirm.

### Reprocessing All Messages from External System

Users with the Reprocess All user task granted to their role(s) can perform this action.

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Click **Reprocess All**.

### Marking Messages from External System as Reviewed

Mark a message as reviewed after you have verified an error or warning. Messages will be marked as reviewed and disappear from the search result.

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Select one or more messages in the search result.
4. Click **Mark As Reviewed**.
5. Messages are removed from the search result.

### Hiding Reviewed Messages from External System

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Click **Hide Reviewed**.

### Showing Reviewed Messages from External System

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Click **Show Reviewed**.
4. Reviewed messages are displayed in the result with a background shading

### Marking Messages From External System as Not Reviewed

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.

3. Select one or more messages in the search result.
4. Click **Mark As Un-reviewed**.

#### Deleting Messages from External System

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Select one or more messages in the search result
4. Click **Delete**.
5. Click **Delete** to confirm.

#### Viewing Errors & Warnings from External System

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Select a message in the search result, then click the vertical ellipsis **Actions** menu and select **Errors & Warnings**.
4. The Error Code, Error Description and Error Type captured for the message is displayed.
5. Click **OK**.

#### Viewing Messages from External System

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**.
3. Select a message in the search result.
4. Click the vertical ellipsis and select **View**.

#### Downloading Messages from External System

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Messages From External System**.
2. Enter search criteria then click **Search**
3. Select a message in the search result.
4. Click the vertical ellipsis and select **Download**.

## Messages To External System

#### Note:

Click **Refresh** to refresh the results and see updated status of message(s). Click **Show/Hide Timestamps** to display additional columns indicating the processing times.

### Reprocessing Messages to External System

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Select one or more messages in the search result.
4. Click **Reprocess**.
  - a. Click **Yes** to confirm.

### Reprocessing All Messages to External System

Users with the Reprocess All user task granted to their role(s) can perform this action.

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Click **Reprocess All**.

### Marking Messages to External System as Reviewed

Mark a message as reviewed after you have verified an error or warning. Messages will be marked as reviewed and disappear from the search result.

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Select one or more messages in the search result.
4. Click **Mark As Reviewed**.
5. Messages are removed from the search result.

### Hiding Reviewed Messages to External System

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Click **Hide Reviewed**.

### Showing Reviewed Messages to External System

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Click **Show Reviewed**.
4. Reviewed messages are displayed in the result with a background shading

### Marking Messages to External System as Not Reviewed

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.

3. Select one or more messages in the search result.
4. Click **Mark As Un-reviewed**.

#### Deleting Messages to External System

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Select one or more messages in the search result.
4. Click **Delete**.
5. Click **Delete** to confirm.

#### Viewing Errors & Warnings to External System

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Select a message in the search result, then click the vertical ellipsis **Actions** menu and select **Errors & Warnings**.
4. The Error Code, Error Description and Error Type captured for the message is displayed.
5. Click **OK**.

#### Viewing Messages to External System

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**.
3. Select a message in the search result.
4. Click the vertical ellipsis and select **View**.

#### Downloading Messages to External System

1. From the **OPERA Cloud Exchange**, select **Message Status**, then select **Messages To External System**.
2. Enter search criteria then click **Search**
3. Select a message in the search result.
4. Click the vertical ellipsis and select **Download**.

## Accumulated Business Events

Accumulated Business Events allows you to search and view the Business Events generated for Batch Business Event Interfaces.

#### Search Criteria

- **Interface:** Select the Interface to view the business events generated for the interface. Mandatory selection.
- **Property:** Select the properties to view the business events generated for the interface and Property combination. Mandatory selection.

- **Status:** Select an appropriate batch state to search for (NEW or READY).
- **Module:** Select the Modules to filter from the list. Optional.
- **Created From:** Select the state date of the business events. Optional.
- **Created To:** Select the end date of the business events. Optional.
- **Primary Key:** Enter a Primary Key identifier to search for the specific event.
- **Search:** Apply search action to fetch the events based on the search criteria and results are displayed in the search result area.

#### Search Result

- **Interface ID:** Interface ID associated with the business event.
- **Property:** Property associated with the business event.
- **State:** State of the business event.
- **Module:** Module associated with the business event.
- **Primary Key:** Primary Key identifier assigned to the business event. its a combination of Property, date and event id.
- **Create Date:** Date and time of the business event generated.
- **Refresh:** Applies a fresh search action to fetch the latest business events to display in the search result area.

#### Viewing Accumulated Business Events

1. From the **OPERA Cloud Exchange** menu, select **Message Status**, then select **Accumulated Business Events**.
2. Enter search criteria, then click **Search**.

## Interface Resync

The Interface Resync option can be run individually and in no particular sequence at any time to resync specific data to the external system. One reason for this could be to send all reservations that have not received an external system number during the original transmission. It is recommended that reservations only be resynced once it is certain that the respective rate codes, blocks, and profiles have been built in the external system.

The following are some recommendations:

- Resynchronization for large periods of time during peak work hours is not recommended.
- Resynchronization should be done in the late to early morning hours where Night Management or Night Audit can run them without compromising system performance.
- Resynchronization can be done during the day, however keep in mind that:
  - Smaller time frames are preferable to larger ones.
  - Choose the necessary records to resync over hundreds of records at a time.

## Resynchronization History

For any resync that is executed a record is created in the Resync History screen. This history record assists you in keeping track of all resyncs done and what their status is/was. The Remarks column shows the text for records found and processed. When the remarks are populated with (-1) then 1 or more messages failed to be sent to the External System successfully.

How to utilize history and find unsuccessful records:

- Finding resync messages that did not make it, check and note the Start Date and Start Time.
  - Go to Message Status. Messages to External System.
  - Use the Search Filters to narrow down the messages you are looking for; Populate Module type (i.e. Reservation, Profile, etc.), Created From and Created To for the day of business and Message Type value.
1. From the **OPERA Cloud Exchange** menu, select **Interface Resync** and then select **Resynchronization History** from the drop down list.
  2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
  3. Click **Resync History** on any of the resync modules. In the Resync History pop-up window, you can see the Resync Module that was used.

The following details appear in the pop-up:

- **Status** is the resync status. The status options that you can see are:
  - **New**: Resync has just started.
  - **RUNNING**: Resync is currently being processed.

- **COMPLETED:** Resync is complete and reservations are sent to external system if resync filters have found any records.
- **Start Time and End Time:** The time stamps showing full span of time to for the resync to process.
- **PURGE:** Manual deletion of all resync history. Only resyncs that have not been completed yet will be excluded from the deletion. A warning occurs that has to be confirmed before the purge is performed.
- **REFRESH:** To see the latest status of all resync activities.

## Interface Resync - Blocks

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Blocks**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. Search and select Block Codes. You can select multiple codes.
4. Enter a Period. **From Start Date**, select the first restriction start date for the resync. **To Date**, select the last restriction start date for the resync.
5. Select **All Active Records** check box. Select if no other conditions are to be met except resyncing active records.
6. Select the **Unconverted Blocks** check box.
7. Select the **Include Pickup Counts** check box. Select only if the external system requires the pickup counts within the block message. This would be the case if you were resyncing a block without resyncing all its reservations afterwards. For initial cutover resync we do not recommend including the pickup counts, as reservations may be subsequently resynced and this automatically updates the pickup count in the blocks.
8. Select the **Include Cancelled Blocks** check box. This could be needed for initial cutover resyncs where both systems should have all blocks including the cancelled ones, in case these may be reinstated.
9. Click **Resync History**. Click this button to view when the resync option had last been executed and its status. This shows all resync options that have been executed.
10. Click **Resync**. Click this button to start the resync process. This executes the resync according to the filters you have set.

## Interface Resync - Turnaways

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Turnaways**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. From the Turnaways to Resynchronize, select the **Turnaways**. Select all or part of a turnaway code to be resynced.
4. For Turnaways Filter Conditions, enter the **Rate Code Like**, enter all or part of a rate code to be resynced. Search and select the **Room Type**.
5. Click **Resync** or **Resync History**.

## Interface Resync - Events

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Events**.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Events to Resynchronize panel, for Booking Arrival Date, select a **From Date** and **To Date**.
4. Enter the **Block Codes Like** field and select or unselect **Include Cancelled Events** check box.
5. Click **Resync** or **Resync History**.

## Interface Resync - Function Space

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Function Space**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Function Space to Resynchronize panel, search and select the **Function Space**. You can select multiple spaces.
4. Click **Resync** or **Resync History**.

## Interface Resync - Inventory

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Inventory**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Inventories to Resynchronize panel, select the **Room Type** and **Room Class**. A multi-select list of configured room types and room classes opens when you select this option.
4. Select a Period, **From Start Date** and **To Start Date**.
5. You can select between an **Overbooking** or **Out Of Order** resync by checking one of the radio buttons. When you select Out Of Order, the Room Class option is removed from the screen.
6. Click **Resync** or **Resync History**.

## Interface Resync - Products

This synch is only available from ORS to OPERA Cloud PMS.

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Products**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Products to Resynchronize panel, select **From Start Date** and **To Start Date** for the resync.
4. Select **Products**. This option is to find only Packages that are not linked to groups. This option is usually the most desired for Resync choice and is the default upon entering this screen.
5. Select **Groups**. This option is to find only Packages that are linked to groups.
6. Search and select the **Product Codes**.
7. Click **Resync** or **Resync History**.

## Interface Resync - Profiles

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Profiles**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Profiles to Resynchronize panel, search and select the **Profile Types**.
4. Enter the **Date Type**. Use this menu to select a date type for the resync process. The options contained within this field are Updated Date that is used to resync profiles that have been modified within the selected From/To dates entered. Created Date is used to resync profiles that were created within the parameters of the From/To dates entered.
5. Enter the **From Name**, the specific name of the profile to be resynced. Enter **To Name**, type the specific name of the profile to be resynced. The query takes all names BETWEEN the letters in From Name and To Name. Sample:  
  
Example: If you have typed 'A' into "From Name" and 'G' into "To Name". That means GA would not be taken into account anymore and the resync would only include the latest name with F such as, FZ.
6. Select to resync **Profiles for Active Reservations** . Selecting this option sends only profiles that are attached to active reservations.
7. Select to resync **Profiles For Active Blocks**. Selecting this option sends only profiles that are attached to active blocks.
8. Select to resync **Profiles For Active Reservation and Block**. Selecting this option sends profiles that are attached to active reservations and blocks.
9. Select to resync **Profiles with Membership**.
10. Select to resync **Profiles with Primary Membership**.
11. Select to resync **Profiles with Negotiated Rate**.
12. Select to resync **All**. Selecting this option resyncs all profiles, regardless whether they are linked to active reservations and blocks or not.

 **Note:**

Select the proper Profile Code for your resync to minimize the data flow, as the hotel could have a huge profile database that can lead to a very long resync process.

13. Click **Resync** or **Resync History**.

## Interface Resync - Promotions

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Promotions**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Promotions to Resynchronize panel, select **Limited Use Promotion** check box.
4. Search and select **Promotions**.
5. Click **Resync** or **Resync History**.

## Interface Resync - Rates

You have to select either a date range or check the rate codes in order to resync rates. A 'Total Count' of all active Rate Codes during the time frame entered will be displayed. User has the option to choose each rate code or all if necessary for resync to an external system.

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Rates**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Rates to Resynchronize panel, enter the **From Start Date**. You must select the first rate code start date for the resync. Only rate codes valid for this date are to be shown.
4. Enter **To Start Date**. You must select the last rate code start date for the resync. Only rate codes valid for this date are to be shown.
5. Search and select **Rates**. Shows how many active rate codes you have in the OPERA Cloud database. Once you have selected a date range the count is adjusted to match the number of rate codes that fall into your selected date range.
6. Click **Resync** or **Resync History**.

## Interface Resync - Reservation

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Reservation**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.

3. Enter a Period **Date Type**. Choose from the option **Arrival Date**, **Created Date**, and **Updated Date**. Enter a **From Date**, this date specifies the first arrival date for the reservation resync. Enter **To Date**, this date specifies the last arrival date for the reservation resync.
4. Enter the External System Reference **From**. This specifies an external system confirmation number to resync. You can enter a single number or multiple numbers separated by comma.
5. Enter the External System Number **To**. This specifies the external system confirmation in case you want to specify a range from number/to number.
6. Enter OPERA Cloud Reference Number **From**. This specifies an OPERA Cloud confirmation number to resync. You can enter a single number or multiple numbers separated by comma. Enter OPERA Cloud Reference Number **To** that specify the OPERA Cloud confirmation in case you want to specify a range from number/to number.
7. Select the **All** check box. Select this option if no other conditions are to be met except resynching active records.
8. Select **Include Cancels** check box. Select this option to include the cancels in your resync.
9. Select **Include Checked In** check box. Select this option to include the checked-in guests in your resync.
10. Select **Include No Shows** check box. Select this option to include no shows in your resync.
11. Select the **No External Confirmation** check box. Select this option to resync only reservations without external system confirmation number. If this is unchecked, all reservations will be resynced.
12. Click **Resync** or **Resync History**.

## Interface Resync - Restrictions

You have to select a date range in order to resync rate restrictions. An example of Block Restrictions from OPERA Cloud PMS to ORS.OXI can now send restrictions created from OPERA Cloud Blocks application. These restrictions set on the blocks can also be resynced through the Restrictions resync, by selecting the option for Date Ranges and setting Blocks. The resync offers a multi-pick list of blocks that may have restrictions set on them for selection. For Block Restrictions to work Business Events in OPERA Cloud have to be set.

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Restrictions**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Restrictions to Resynchronize panel, search and select the **Block Codes**. Select a specific block code or a starting letter following by a % in order to filter your search.
4. Enter a **From Date**. Select the first restriction start date for the resync.
5. Enter a **To Date**. Select the last restriction start date for the resync.
6. Select the **All Restrictions** option. Select this restriction for all existing restriction types to be sent to external system.
7. Select **Rate Restriction** option. Select this restriction for rate restrictions to be sent to external system. The search and select Block Code is disabled if this option is selected.

8. Select the **Block Code** option.
9. Click **Resync** or **Resync History**.

## Interface Resync - Stay

Stay files can be created for some interfaces after the guest has checked out and the OPERA Cloud night audit has run.

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Stay**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In Stay to Resynchronize panel, enter a **From Departure Date**. Select the first restriction start date for the resync. Enter **To Departure Date**. Select the last restriction start date for the resync.
4. Enter the **First Name**, type the specific first name of guest whose stay data shall be resynced. Enter the **Last Name**, type the specific last name of guest whose stay data will be resynced.
5. Click **Resync** or **Resync History**.

## Interface Resync - Hurdles

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Hurdles**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Hurdles to Resynchronize panel, select a date for **Hurdles From** and **Hurdles To**. These dates range helps to resync hurdles.

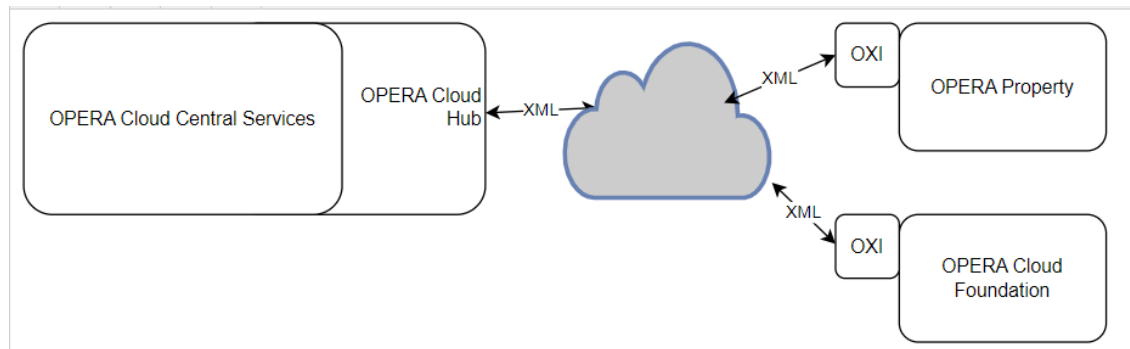

## Interface Resync - Inventory Items

1. From the **OPERA Cloud Exchange** menu, select **Interface Resync**, and then select **Inventory Items**, from the drop down list.
2. The **Type** and **Property** values are taken by default. Search and select an **Interface** that is to be resynced.
3. In the Inventory Items to Resynchronize panel, select the **Inventory Items From** and **Inventory Items To**.

# Activating OPERA Cloud Hub Integration

## Prerequisites for Activating OPERA Cloud Hub Integration

**Central** OPERA Cloud Hub integration enables asynchronous OXI (XML) communication between OPERA Cloud Central Services and (remote) OPERA Cloud Foundation or OPERA Property properties.

The following data exchange is supported:

**Table 33-1 Supported data exchange entities**

Entity	Details	Events	Notes
Profiles	Identification	New	
	Membership	Update	
	Negotiated Rates	Merge	
	Notes		
	Preferences		
	Relationships		
Reservations	Accompanying	New	Routing Codes only for Routing (not transaction codes)
	Alerts	Update	
	Deposit Rules	Cancel	
	Item Inventory	Reinstate	
	Membership	Check in	
	Notes	Check out	
	Preferences		
	Routing		
	Sharers		
	Specials		
Stay Records	Traces		

**Table 33-1 (Cont.) Supported data exchange entities**

Entity	Details	Events	Notes
Blocks	Room Allotment Notes		Includes Opportunities when the <b>Opportunities</b> OPERA Control is active.
Catering Events		New Update	
Sales Activities		New Update	
Rate Restrictions		New Update	
Inventory			
Housekeeping	Out of Order Out of Service	New Update	
Configuration	Rate Class Rate Category Rate Codes Packages Item Class Item Inventory Function Space		

### Cloud Hub Activation

Active the **Cloud Hub Integration for all Properties** function for a hub location to activate integration for all properties, with OXI-OPERA as the system default interface, otherwise active the **Cloud Hub Integration** function for a property location to activate integration for a specific property, with OXI-OPERA as the system default interface.

#### Note:

If you plan to activate or inactive Cloud Hub integration for specific properties, always use the property-level **Cloud Hub Integration** OPERA Control.

### Cloud Hub Automatic Configuration

The Cloud Hub activation process automates the following configuration:

#### Interface Setup

An OXI-OPERA interface is created in the OPERA Cloud Exchange Module. For more information, see [Interface Setup](#)

#### External Database Configuration

An [external system](#), [Outbound System](#) and [external database](#) are configured according to the **Cloud Hub Integration** OPERA Control context (hub or property).

#### Business Event Configuration

[Business Events](#) are auto-configured for OXI-OPERA.

## Exchange Interface Controls

[Interface Controls](#) for OXI-OPERA are configured and cannot be modified.

## Cloud Hub Manual Configuration

The following configuration steps must be completed:

### Interface Defaults

Interface default values for Inbound and Outbound messages are optional. To configure defaults for incoming and outgoing messages, see [Interface Controls](#).

### Interface Rules

Interface rules determine whether particular UDF data should be updated during data transmission to / from OPERA Cloud. For more information, see [Configuring Interface Rules](#).

### Interface Mapping

Interface Mapping defines conversion of OPERA Cloud codes and external system codes at Global(Chain) or Property level for central interfaces. When conversions are defined, the code from an external system is replaced with the OPERA Cloud code for inbound message from the external system; and the OPERA Cloud code is replaced with the code of the external system for outbound message delivered to the external system. For more information, see [Configuring Interface Mapping](#)

## OPERA Property OXI Communication Methods

The Cloud Hub Event Manager URL must be obtained from Oracle services team during provisioning.

For more information, see [Communication Method Setup OXI](#).

1. Select **External System to OPERA**.
  - a. **Comm Type:** Select **HTTP/S**.
    - i. Select **Client**.
    - ii. **URL:** Enter OPERA Cloud URL (example: *https://<cloudhub-evnt-mgr-host>/Operajserv/OXIHUBServlets/ORSInterface*).
    - iii. **Username:** Enter the integration username.
    - iv. **Password:** Enter the password.
    - v. Click **Save**.
2. Select **OPERA to External System**.
  - a. **Comm Type:** Select **HTTP/S**.
    - i. Select **Client**.
    - ii. **URL:** Enter OPERA Cloud URL (example: *https://<cloudhub-evnt-mgr-host>/Operajserv/OXIHUBServlets/ORSInterface*).
    - iii. **Username:** Enter the integration username
    - iv. **Password:** Enter the password.
    - v. Click **Save**.

## Interface Resync

After activation, data synchronization between OPERA Cloud Central Service and OPERA Property or OPERA Cloud Foundation may be required. Identify the primary / source solution and initiate a resynchronization of data to the target system (example: from OPERA Property to OPERA Cloud Central).

- For OPERA Property, see [Resynchronization of Data OXI](#).
- For OPERA Cloud, see [Interface Resync](#).

## Message Status Monitoring

OPERA Cloud Central messages are monitored using [Oracle Hospitality Distribution Channels messages](#) for OXIHUB channel. Grant the **Central Messages Monitoring task** to OPERA Cloud roles. In Oracle Hospitality Distribution Channels, the <property>-**CHANNELMANAGEMENT View Interface messages** task is required to view individual messages and the <chain/cluster- **CLUSTERMGMT View Message Summary in Cluster** task is required to view the total number of messages per channel.

OPERA Cloud Foundation is monitored and managed through [OXI Message Status](#).

# Part VII

## OPERA Cloud Terminology

This part of the OPERA Cloud User Guide describes the OPERA Cloud Terminology.

# OPERA Cloud Terminology A-Z

**Table 34-1 Terminology**

Term	Description
<b>Accompanying Guest</b>	Secondary guests who are added to the reservation. Eligible accompanying guests can have a separate registration card printed. Eligibility is determined by the value set in the <b>Age Threshold to Print Registration Card</b> application setting.
<b>Advance Check In</b>	The ability to flag one or more arrival reservations as Advance Checked In reservations. Note: Pseudo room reservations cannot be identified for Advance Check In.
<b>Advance Checked In</b>	One or more reservations that have been indicated as Advance Checked In reservations but not checked in to the property.
<b>Additional Rooms</b>	This is a multi-select field to choose rooms to include in the key creation with the reservation room. This field is available when the property interface configuration for the active DLS (Door Lock System) has the check box active for <b>Allow Multiple Room Selection for Keys</b> . You can customize the <b>Additional Rooms</b> field on the Create Key screen to populate the field with the room numbers that were selected when the new key was created for that reservation and room number. This applies to duplicate keys (when Previous Keys Made > 0). Without this customization, the field does not populate with the additional room numbers for which the key was created.
<b>Auto Advance Check In</b>	Automatically checks in Advance Checked In reservations when the housekeeping room status of the reservation matches the housekeeping room status defined in the Room Status for <b>Auto Check In of Advance Checked In Reservations</b> OPERA Control setting.
<b>Billing Window</b>	Billing windows are used to assign more than one payee to one reservation or to separate posted transactions using configured routing instructions. A reservation can have up to eight billing windows and each window can be assigned to a different payment method and a different payee.
<b>Business Date</b>	The OPERA property business date.
<b>Credit</b>	If the payment or deposit amount is greater than the posted charges on a billing window, a Credit balance remains. This balance is settled with the Automatic Folio Settlement functionality if the <b>Include Credit Balances</b> check box is selected.
<b>Duplicate Key</b>	A duplicate key is the exact copy of the original, including for Valid Start Date / Valid Start Time and Valid Until Date / Valid Until Time. If this information is modified, then the Key defaults to New. When <b>Previous Keys Made</b> is one or more, then the default is Duplicate Key instead of New Key type. This is editable in the Create Keys screen. When <b>Duplicate Key</b> is the Key Type and changes are made to Additional Rooms, Key Options, Valid Until Date and Valid Until Time, or Valid Start Date and Valid Start Time, the key type switches to a New Key type since a duplicate key is no longer an exact copy of a previous key made when these options are altered.

Table 34-1 (Cont.) Terminology

Term	Description
<b>ETA</b>	The guest's Expected Time of Arrival (Arrival Time) for their reservation. After the reservation is Advance Checked In, the Expected Time of Arrival (ETA) for the reservation is updated with the time the reservation was indicated as Advance Checked In. After the reservation is Advance Checked In, the Arrival Date is changed to read-only and cannot be modified.
<b>ETR</b>	The Expected Time of Return (ETR) and/or an Expected Time of Return Comment on reservations. In the Advance Checked In screen reservations can be sorted by ETR options when an ETR is provided. For ETR options, the Expected Time of Return (ETR) parameter must be On.
<b>Folio</b>	Master bill containing all posted transactions including charges, payments and deposits (if any).
<b>Key Machine Locations</b>	The Key Encoders available for use. By default, OPERA remembers the last location used. You can select a different key encoder.
<b>Key Options</b>	Defines key access to specific areas of the property. The default is key options associated at the room level configuration, such as access to the Parking Garage, the elevator, the pool area.
<b>Key Type</b>	When <b>Previous Keys Made</b> is one or more, then the default is Duplicate Key instead of New Key type. This is editable in the Create Keys screen. When <b>Duplicate Key</b> is the Key Type and changes are made to Additional Rooms, Key Options, Valid Until Date and Valid Until Time, or Valid Start Date and Valid Start Time, the key type switches to a New Key type since a Duplicate Key is no longer an exact copy of a previous key made when these options are altered. When the Key screen is accessed with the Mass Check In, the key type New or Duplicate is not available. Only when the individual Create Key screen is displayed is the key type available and defaults according to whether previous keys were made.
<b>Mass Advance Check In</b>	The option to Advance Check In multiple reservations when the arrival date of the reservations is the current business date of the property.
<b>Mass Check In</b>	Mass Check In functionality provides one easy process to check in multiple reservations for arrivals due in on the property's current business date, and to (optionally) generate their room keys and registration cards. Mass Check In can be used for individuals or blocks within the property. If logged in to a hub, you can Mass Check In individual and/or block reservations one property at a time for each property you have access to, without having to log in and out of each one.
<b>Number of Keys</b>	Default is <b>Per Adult On Reservation</b> to create the same number of keys as the number of adults on the reservation. Use the <b>Per Reservation</b> option to set any number of keys for the reservation.

Table 34-1 (Cont.) Terminology

Term	Description
<b>Override Associated Key Options</b>	<p>Overrides the key options in the Room Keys panel (when multiple reservations are selected for key creation). Key options can be modified or added on the individual reservations Create Key screen as you proceed through the key creation process.</p> <ul style="list-style-type: none"> <li>When deselected (default), the selections added in the <b>Key Options</b> field are appended to existing key options at the room level for the room keys for each of the selected reservations for key creation. For example, you are creating keys for several reservations and the room configuration of the assigned rooms have Garage in the associated <b>Key Option</b> field. In the Room Keys screen, you also select the Lounge key option, and then process the key creation. In the Create Keys screen, both Garage and Lounge key options appear for each reservation.</li> <li>When selected, the selections added or removed in the <b>Key Options</b> field override all existing key options at the room level for the room keys for each of the selected reservations for key creation. For example, you are creating keys for several reservations and the room configuration of the assigned rooms have Garage in the associated <b>Key Option</b> field. In the Room Keys screen, you select the Lounge key option, and then process the key creation. In the Create Keys screen, the Garage key option is overridden and only the Lounge key option appears for each reservation.</li> </ul>
<b>Owner Reservation</b>	Owner reservations are created for the owner of a room, according to the Ownership Record for the selected profile. Owner Reservations are identified by the <b>Owner</b> icon in the Reservation business card.
<b>Owner Referral Reservation</b>	Owner Referral reservations are for the designated guests (authorized users) of an owned room. Owner referral relationships are managed in the owner profile and can be viewed from the Owner Referral panel of the owner referral guest profile. Owner Referral reservations are identified by the <b>Owner Referral</b> icon in the Reservation business card.
<b>Pre-Arrival Reservation</b>	A reservation with an Arrival date >1 day prior to the OPERA property business date.
<b>Previous Keys Made</b>	In the Create Keys screen, this is the number of keys since the last new key previously created for this specific reservation and room. If the <b>Additional Rooms</b> field on the Create Keys screen is customized with PreviousKeyAdditionalRooms, the <b>Additional Rooms</b> field populates with the additional room numbers if the previous key made had additional rooms selected when created. When <b>Previous Keys Made</b> is equal to or greater than 1, then this defaults to Duplicate Key instead of New Key (this is editable.) When Duplicate Key is the default key type and changes are made to Additional Rooms, Key Options, Valid Until Date and Valid Until Time, and/or Valid Start Date and Valid Start Time, the key type switches to New Key because it is not considered a duplicate key of a previous key made when these options are altered. A duplicate key is the exact copy of the original, including the options set in the original key creation. When the reservation is checked out, the Previous Keys Made count resets to zero.
<b>Primary Guest</b>	The guest name under which the reservation is booked. The primary guest's name appears at the top of the list in the Select Guests panel on the Registration Card screen.
<b>Settlement</b>	The process of obtaining payment for a guest's bill.

**Table 34-1 (Cont.) Terminology**

<b>Term</b>	<b>Description</b>
<b>Suppress Key Success Message</b>	When this option is selected, the key success message does not display. Instead, the process continues to the Create Key screen for next reservation. If the request to the DLS (Door Lock System) fails, then the failure notification appears with the option to retry the key creation.
<b>System Date/Time</b>	Operating System date/time.
<b>Valid Start Date</b>	Displays when the <b>Send Valid Start Date/Time</b> check box is active in the DLS property interface configuration. Refer to the <i>Enhanced Room Key Generation Validation Rules by Process</i> topic for more information.
<b>Valid Start Time</b>	Displays when the <b>Send Valid Start Date/Time</b> check box is active in the DLS property interface configuration. Refer to the <i>Enhanced Room Key Generation Validation Rules by Process</i> topic for more information.
<b>Valid Until Date</b>	Defaults to the reservation departure date or to the added days if the OPERA Controls setting <b>Key Expiry Days</b> is set. Refer to the <i>Enhanced Room Key Generation Validation Rules by Process</i> topic for more information.
<b>Valid Until Time</b>	Defaults with the time that is chosen in the <b>Default Keys Expiry Time</b> setting. This can be the reservation ETD (Expected Time of Departure) or the time in the <b>Key Expiry Time</b> setting. Refer to the <i>Enhanced Room Key Generation Validation Rules by Process</i> topic for more information.

# Using Keyboard Shortcuts (Video Transcript)

00:06

In Opera Cloud you can open menus and actions using

00:10

keyboard shortcuts. You can access keyboard shortcuts from

00:14

many screens including the profile presentation,

00:17

the look to book sales screen, and the 'I want to' menus.

00:21

Let's get started. In this example, first I will go to the Look to Book sales

00:26

screen. Go to bookings, select reservations, and then select the

00:31

Look to Book sales screen. Select new reservation.

00:38

To view the keyboard shortcuts press the ctrl key on your keyboard.

00:43

Then the shortcut key combinations appear on the screen

00:46

next to the field or action. You can press the respective keys to open the

00:50

menu or action. In this example, I go back to the Opera

00:55

Cloud dashboard and click the arrivals tile to go to the

00:58

list of arrival reservations. Next, I click the confirmation number to

01:04

go to the reservation. Now on the reservation I click the

01:08

control key and the keyboard shortcuts appear next to the actions.

01:12

---

In this example, I press dc on the keyboard to jump to the deposit

01:16

cancellation section. Next I can press the ctrl key to display

01:21

the shortcuts, and then I select the I key to open the

01:24

'I want to' menu. Press the ctrl key again to display the

01:28

keyboard shortcuts for the actions on the I want to menu. Now, I can see the

01:33

keyboard shortcuts for the actions.

---

# View Property Brochure From Quick Launch (Video Transcript)

00:05

You can add the property brochure to the quick launch menu for easy access. Click

00:10

the quick launch icon, then click manage Quick Links. Now you can add bookmarks to

00:16

the quick launch menu. In this example I enter property brochure and then click

00:21

go to search for the available Quick Links. Select property brochure and then

00:26

click the right arrow to add it to the selected column. Click Save. To confirm

00:31

the property brochure is added to the quick launch menu click manage Quick

00:35

Links. Click the plus sign to expand and you can see the property brochure is

00:39

listed. Click Save. Now you can click to go to the property brochures screen. Here

00:45

you can see I am logged into a chain. I must enter or select a property name

00:50

from the list. Then click select.

00:57

Then click search.

01:01

Now you can scroll down to find all the information for the property brochure.

01:10

You can view the additional property information by clicking the plus icon to

01:14

expand each selection. You could view airport information, alternate properties,

01:19

amenities, additional details, dining and retail information.

---

01:32

You can search for directions using Google Maps and view event space details.

01:37

You can view general notes, browse local attractions, view a property map, and see

01:43

the events calendar.

01:56

You can click an event to view more details.

02:03

You can see property images, a site plan and transportation companies, complete

---

# Using Quick Launch (Video Transcript)

00:06

In this video you will learn how to create quick links

00:08

to OPERA cloud menus and add links to external websites on

00:12

the quick launch menu. To open the quick launch menu click the

00:16

rocket icon on the top navigation. Or click F2 on your keyboard.

00:22

Next, click manage quick links. Now I can find the available OPERA cloud

00:28

menus by entering keywords. In this example, I enter run reports and

00:34

click go. Next select the menu,

00:38

then click the right arrow to add the link to the quick links menu.

00:42

If you have multiple quick links to add, click the double arrows.

00:47

Next, click save. Now the quick link appears in my bookmarks list

00:52

including the shortcut keys to open the run reports menu.

00:56

I can click that link to go directly to the run reports screen.

01:00

Or to open the run reports menu anytime select the shift and the r and p keys.

01:07

To add links to external websites that you access frequently

01:10

click manage custom links. Here, I can add a name for the link.

01:15

---

Enter the website address and click add. To delete a URL click the vertical

01:20

ellipsis menu and select delete. Now, to launch the website

01:25

press F2 from anywhere in the OPERA cloud application,

01:28

and then click the keyboard shortcut displayed shift plus one.

---

# Add Dashboard Tiles (Video Transcript)

00:06

In this video, you will learn how to add a page and tiles to the OPERA Cloud dashboard.

00:11

Let's get started.

00:12

On the OPERA Cloud dashboard, you can click to add page.

00:17

In this example, I am logged in to a property and I selected the Housekeeping page.

00:22

Next, I click Add New Tiles.

00:25

Next to each tile, I enter the number of tiles to add.

00:30

In this example, I add 1 tile for departures, queue reservations, room status, and 1

00:37

task sheet tile.

00:39

And then I click add to dashboard.

00:41

Now, I can drag and drop to re-arrange the tiles.

00:45

I can hover over a tile, and select the gear icon to configure the options.

00:50

Or I can select the X to remove the tile.

00:53

Each tile contains a snapshot of data for the property, you can click to view the results.

00:58

In this example, I click the task sheet dashboard tile to view and manage the task sheets for

01:03

the property.

# Customize the User Interface Using Page Composer (Video Transcript)

00:06

You can customize the OPERA Cloud user interface using Page Composer.

00:10

If you have the Customize Chain or Customize Property task assigned to your role then you

00:14

can re-arrange fields and add or delete fields on any panel with a gear icon.

00:19

Let's get started.

00:20

First, to turn on customization, in OPERA Cloud click the side menu and then click Settings.

00:27

Now I can choose the option to customize, at the chain or the property level.

00:32

In this example, I select to turn on property customization.

00:35

Then click Save.

00:37

Now, I see the customizing mode notification appears next to the OPERA Cloud user name

00:42

on the menu bar.

00:44

Now I can customize any panel with the gear icon.

00:47

In this example, I will customize the overview panel on the reservation, by adding a custom

00:52

field that saves a voucher number to the reservation.

00:54

I will make this field required for reservations with the VFREE rate code.

00:59

I will also add a link to open an external voucher tracking website.

---

01:02

To find the reservation, I go to Bookings, click Reservations and then click Manage Reservation.

01:10

Now, click the I want to menu and then click the confirmation number or guest name to open

01:15

a recently viewed reservation.

01:17

On the reservation overview, click the gear icon, and then click Add Field.

01:22

Go to the bottom of the list to select Flex Field, and then select Add Text.

01:27

Now, to define the properties of the custom field, I select Yes to display the field on

01:33

the screen.

01:34

Then, I select No from the read-only drop-down list, to make this field updateable.

01:39

Next, I select Custom from the required drop down list and then click the code bracket.

01:45

I enter the expression language code, to return "TRUE" only when the reservation rate code

01:50

equals "VFREE" and then click Evaluate.

01:53

Next, I'll click Apply.

01:55

Now, this Flex field is mandatory for reservations with the VFREE rate code.

02:00

Next, I change the field label to "voucher number" and then click save.

02:06

I can click the pencil icon to edit or verify the customization saved.

02:10

Next, to add a link, I click Add Field, go to the bottom of the list and select Flex Field, and then

02:17

---

click Add Link.

02:18

Now, I can change the text description for the field to voucher tracking.

02:23

Then, in the destination field, I enter the URL for the external website.

02:28

I select the checkbox to launch the URL in a New browser tab.

02:33

And then click Save.

02:36

Next, click Close customize.

02:37

Now, I see the voucher number and the voucher tracking link I just created.

02:42

To turn off the ability to customize, I click the side menu and then click settings.

02:48

Then I select off, and then click save.

02:51

Now, on the OPERA Cloud menu I see the customization notification is turned off.

02:57

Let's check the result of the customization.

02:59

To find the reservation, go to Bookings, select Reservations and then select manage reservation.

03:06

Click the I want to menu and then click the reservation confirmation number or name from

03:10

the list of recently viewed reservations.

03:13

Now, I see the Reservation Overview displays the new Voucher Number field and the Voucher

---

# Using the Performance Meter to Troubleshoot in OPERA Cloud (Video Transcript)

00:06

The performance meter tests the network, the workstation browser, and the OPERA cloud server

00:12

performance. Now let's run the performance test. Go to OPERA cloud and select the hamburger menu

00:18

and then click performance meter. To begin the performance test click start performance test.

00:25

When the performance test is complete the progress meter displays the results. If the results are not

00:30

optimal the recommended actions display. When a performance issue is caused by the network

00:36

or the browser performance contact your IT specialist. If there is an issue on any

00:41

of the OPERA cloud servers contact your system administrator and provide the generated result ID.

00:48

In this example, the performance test reported the system is optimized and no actions are needed.

# Create a Guest Profile (Video Transcript)

00:05

In OPERA cloud, a profile contains address and contact details, preferences,

00:10

and membership information for guests, companies, travel agents, sources, and groups. In this video,

00:17

you will learn how to create guest profiles. Let's get started. First, go to client relations,

00:23

select profiles, and then select manage profile. On the manage profiles screen, I can click the

00:28

link to create a guest profile or I can click the I want to menu and select the type of profile

00:34

I want to create. From the list, I can click the link to create a guest profile, company,

00:40

travel agent, source, group, or contact profile, or I can click and go to recently viewed profiles.

00:48

In this example, I click the option to create a guest profile.

00:54

I complete the mandatory fields and any optional fields on the create profile

00:58

screen. In this example, the name field is intended to be a last name or

01:02

family name. Now I enter a primary phone number.

01:10

I can click the vertical ellipsis to delete each communication method

01:13

or click add rows to add more communication methods to the profile.

01:18

On the address tab, I can click the new option to add more addresses to the profile,

01:22

or I can click to delete the address. Next I enter the primary address details.

---

01:38

Then I can click save or save profile and add more details.

01:42

In this example, I click to save the profile and add more details.

01:48

On the profile presentation,

01:50

I can see a list of links to quickly jump to each section of the profile.

01:54

I can also view the related profile notifications, billing information, and reservations.

02:02

I can edit the profile or I can add an image to the profile. In this example, I click edit

02:10

to add the required information to the profile details. I can click the gear icon to customize

02:15

or personalize the screen using page composer. The options displayed in the gear icon depend on your

02:21

user's permissions in role manager. Next, I'll click save. I can click new to add any additional

02:28

information to the profile including communication preferences, contact information, notes,

02:34

attachments, membership enrollments, or negotiated rates. The past and future stays section will

02:40

automatically display any reservations associated to this profile. Next, I click

02:45

the profile details link to jump to that section. I can select the I want to menu to merge profiles,

02:52

anonymize the profile, or to create a reservation, or an activity and attach it to the profile,

02:58

or I can view stay statistics or the changes log for this profile.

# View and Edit Sales Profiles (Video Transcript)

00:05

In this video, you will learn how to search for and edit profiles in OPERA cloud. Let's get

00:11

started. In OPERA cloud I go to client relations, profiles, and then I select manage profile.

00:19

On the manage profile screen, I can select the profile type from the view by

00:23

drop-down list to narrow the results. In this example, I select company from the list.

00:31

Next, I enter the company name Oracle.

00:34

I then click search. In the list of results, I can click the plus sign to view additional details.

00:43

Or I can click the arrow to access I want to menu for each profile. The I want to menu

00:48

contains a variety of tasks. For example, I can merge profiles, create a reservation,

00:55

block, or view activities, billing information, or view future and past reservations for the profile.

01:02

In this example, I will click the profile name to go to the profile. In the profile

01:08

overview section, I can click the vertical ellipsis to change or delete the profile image.

01:15

Or I can click edit to make changes to the profile details, communication methods,

01:20

or address information for the profile. Next, I'll click Save. In the left navigation,

01:26

I can click any of the links to jump to the profile section. In this example,

01:30

I click future and pass stays to jump to the reservations associated with this profile.

---

01:35

Here I can see the list of past reservations for this profile.

# Add an Alternate or an Incognito Name to a Profile (Video Transcript)

00:05

In this video you will learn how to add an alternate or an incognito name to a

00:10

guest profile. An incognito name adds a fictitious name to a profile and can be

00:15

used if a celebrity wants to be anonymous during their hotel stay. An

00:19

alternate name allows you to define an alternate name, title, language, or

00:25

salutation for the profile. In the OPERA Cloud application navigate to client

00:30

relations, profiles, and select manage profile. In this example, I will search

00:36

for a profile with the name test,

00:40

and then click search.

00:44

Select the profile from the list. On the profile presentation I can go

00:51

directly to the profile details section by clicking the link on the Left

00:54

navigation. Next I'll click Edit to make the changes. Below the name I can now see

01:02

the alternate name link and an icon with sunglasses and a hat representing the

01:07

incognito name. An alternate name provides the option to enter the guests

01:11

name in their national character set. In this example I add an alternate Japanese

01:16

name and click Save. Now the Japanese name will print on stationery including

---

01:21

the reservation confirmation or the registration card. Next I click the

01:25

incognito icon to add an incognito name and then click Save.

01:34

You must also click Save at the bottom of the profile details section.

01:42

Now I can click the alternate and incognito links to view the additional

01:46

names for this profile.

# Add Notes to a Profile (Video Transcript)

00:05

in this video you will learn how to add

00:08

notes to a profile and opera cloud let's

00:11

get started navigate to opera cloud

00:14

select client relations profile and then

00:18

select manage profile in this example I

00:21

select company from the view by

00:23

drop-down list I enter Oracle in the

00:26

name field and then click search from

00:29

the list of results I click the profile

00:31

name to open the profile presentation

00:33

page next to the notes details link I

00:36

see the number 1 indicating there is

00:38

already one note saved to this profile

00:40

then I click notes click new to enter a

00:44

new note I then select the type

00:47

---

magnifying glass from the list of note  
00:49  
types  
00:50  
I select the reservation note type and  
00:52  
click select I can edit any of the  
00:55  
details I enter the note in the comment  
00:57  
field and click Save on the note I can  
01:00  
click the vertical ellipsis to edit or  
01:02  
delete this note in this example I  
01:05  
select edit I can change any of the note  
01:09  
details and then select save  
01:11  
I click the X to close notes and go back  
01:14  
to the reservation now I can see the  
01:17  
notes details link with the number 2  
01:19  
indicating there are two notes saved to  
01:21  
this profile

# Create a Sales Activity (Video Transcript)

00:06

In this video, you will learn how to create a meeting activity, invite others, and add

00:10

attachments for a company profile.

00:13

Let's get started.

00:14

You can find the create an activity option in the I want to menu on several screens in

00:18

the application.

00:19

In this example, I go to client relations, and select Activities.

00:23

Next, click the I want to menu, and then click Activity.

00:27

Now, confirm the property, the dates, and enter the start and end times for the meeting.

00:33

Click the type magnifying glass and select meeting from the list then click Select.

00:38

Now, you can edit the purpose.

00:41

Next, click the account magnifying glass and then from the view by drop down list select

00:46

Company.

00:47

Next, enter the company name and click search to look up the company account.

00:52

Now, I can select the account on the left and the contacts for the select account appear

00:56

on the right column.

00:58

---

Scroll down and select the option for the Account only or choose the option to select

01:03

the Account and Contact.

01:05

In this example, I select the Account and the Contact.

01:09

Enter any notes for the meeting.

01:10

And then click, Save activity and add more details.

01:13

Now, I can see the activity overview.

01:16

Scroll down to the activity notifications.

01:19

Click Invite Owners, then click Add.

01:23

Select the checkbox next to the name of the person to invite to the meeting, and then

01:26

click Select.

01:27

Now, I can see the additional meeting attendee.

01:31

Next to the invite owners link, I see the number one for the additional sales owner

01:34

I just added.

01:36

To upload I click the Attachments link, then click New.

01:40

Now, click Choose File and then select the file to upload, and click Open.

01:47

Enter a file name and a description then click Save.

01:50

Now, I can see the table layout file I just uploaded is saved as an attachment to this

01:56

---

meeting.

01:57

I can click the vertical ellipsis to delete, preview, or download the file.

02:00

Now, I can see the number 1 next to the attachments link indicating the file that's now attached.

02:05

Next, I click OPERA Cloud to go to the dashboard.

02:10

Scroll down and now I see the meeting I just created on the appointments dashboard tile.

02:15

I can click the appointment to view the meeting details. Next, I'll click Edit.

02:20

When the meeting is finished, I can click the checkbox to mark the appointment as complete.

02:25

I can enter a follow-up date and time, including any notes to create a follow-up activity.

---

# Create a Walk-in Reservation (Video Transcript)

00:07

In this video, you will learn how to create a walk-in reservation.

00:11

Let's get started. Go to Front Desk, and then select Arrivals.

00:17

Click the I want to menu and then click walk-in reservation.

00:22

In this example, I review the sell messages and then click the X to close.

00:28

Next, I can enter any additional criteria to search for the room availability.

00:33

In this example, I click the plus sign to add 3 nights, and then, I click in the departure date

00:39

field, and confirm the update. Click search.

00:44

Now, scroll down to view the availability.

00:47

In this example, I select the \$220 rate for the gold room type,

00:55

Next, scroll down to review the room type and the rate code details.

01:01

And then click select.

01:05

Now, I see a stay information summary for this new walk-in reservation.

01:09

To continue creating the reservation, I must enter the guest details.

01:14

For the profile name, I can click the link to create a new profile or, as in this example, I

01:21

enter a profile name and then click the magnifying glass to search for an existing profile.

---

01:26

Next, I can enter any additional details to narrow the profile search and then click search.

01:34

Now, I scroll down to select the profile from the list.

01:41

I can click the profile name to go directly to the profile to review

01:45

or change any of the profile details. And then click back to manage profile.

01:52

After searching if I don't find the profile, I am looking for,

01:55

then I can click the link to create a new profile.

02:01

In this example, I scroll down and click select to select the profile.

02:08

Next, I will complete the reservation or booking details.

02:12

Enter any required information, in this example I enter the arrival time.

02:17

Finally, scroll down to select a payment method from the drop-down list.

02:22

In this example, I select cash, enter the required deposit amount and then click book now.

02:31

Now, I can search for and add packages and items to the new reservation.

02:37

In this example, I click add to add the All Year package.

02:41

I review the package details. If needed, I can click the

02:45

red X to remove the package. Next, I click the room selection option.

02:51

I can click the magnifying glass to search for another room or as In this example,

02:55

I click accept room selection. Now, I can click the magnifying glass

---

03:03

to find a different room. Or as in this example,

03:03

I click accept room selection. Now, I have several options I can

03:04

create a registration card, or I can advance check in this reservation or

03:09

as in this example, I click complete check in And the I click complete check in.

03:15

I click No to creating a registration card.

03:19

Now, I can see the new reservation I just created with the Gold room type.

03:24

And I can see the reservation is currently checked in.

03:27

Now, I have the option to go to the reservation or directly to billing.

03:32

In this example, I click go to reservation.

03:36

Now, I can review or change any details for this new walk-in reservation.

# Create A Reservation Using Room Diary (Video Transcript)

00:05

The room diary displays a list of rooms and dates to visualize the reservations.

00:10

Using the room diary you can create a new reservation or add an out of order

00:15

or out of service schedule to a room. In this video you will learn how to create

00:20

a reservation using the room diary. In Opera Cloud go to bookings, reservations

00:26

and then select room diary. On the room diary I can enter details to search for

00:32

the available dates and room options. For example I can select the magnifying

00:37

glass to search for a specific room to use for this reservation or I can scroll

00:42

down to use the room diary to create the reservation. From the view drop-down list

00:47

I can select the number of days to view on the room diary. In this example, I can

00:51

see seven days. On the date cell next to the room number I want to book I double

00:57

click and drag the cursor to select multiple days. Next, I double click to

01:03

open the 'I want to' menu. Now, I see the new reservation dates and room number I

01:08

selected. I click the action to create a reservation. On the look to book sales

01:15

screen I can enter any additional criteria to search for a profile, rate or

01:20

room options. In this example I scroll down and click search to find the

---

01:26

available rates for the selected dates and room I selected previously on the

01:30

room diary. I scroll down and double click the standard King room STDK at

01:35

four hundred and fifty dollars for the picnic rate. Now I can see the room type

01:40

information. I click select. Next, I can see the stay information details and I

01:46

can enter the guest information. In this example, I enter a surname and click the

01:52

magnifying glass to search for an existing profile. I select the first

01:57

profile from the list and click select. Now, this profile is selected for this

02:03

reservation. Next, I scroll down to select cash as the payment method.

02:11

Then, I click book now. If configured the closing script appears and displays the

02:18

reservation confirmation number. I click confirm to create the reservation.

02:25

Now, on the new reservation I can see the confirmation number and I can add any

02:31

updates including notes, guest preferences, or payment instructions to

02:36

the new reservation.

# View Room Availability for Blocks Using Group Rooms Control (Video Transcript)

00:06

In this video, you will learn how to view room availability for blocks on the Group

00:10

Rooms Control screen. Let's get started.

00:13

In OPERA Cloud, go to Bookings, select blocks, and then select Group Rooms control.

00:20

Enter a property, a start date, and any additional information,

00:25

then click search to view the room availability for blocks.

00:28

Now, I can see a daily summary of rooms set aside for blocks.

00:33

I click the arrow to scroll through dates. Next, I click the calendar icon to

00:38

select a different date range. In this example, I click June 8th.

00:48

Now, I see the date range change and the colors display on the 7th and 8th of June.

00:55

Click the Day Details tab to view the legend and the color descriptions.

00:59

In this example, I see the green on June 7 indicates a special event,

01:03

and on both June 7th and 8th there is a rate protect and a non compete indicated.

01:09

The Rate protect option is only available when the Lowest Rate Guaranteed OPERA Control

01:14

is active. The rate protect means no other groups should be booked using rates lower

01:19

than the rates assigned to the block. The black color indicates a non-compete

---

01:23

rate meaning no competing accounts, which are accounts designated with the NC industry code

01:29

should be booked for the same dates as the block marked as non-compete.

01:35

This option is only available when the Non Compete OPERA Control is active.

01:41

The color descriptions typically include special events, holidays, day types, and Rate Protect

01:47

(RP) and Non-Compete (NC) indicators. Depending on your OPERA Cloud configuration

01:54

you may see a different legend and different color descriptions based

01:57

on the services active for the property. Click view options, to turn on or off display

02:02

options by selecting or unselecting the checkbox and then scrolling down to click apply.

02:11

I can click the vertical ellipsis to create a block, create a master block,

02:16

or to create a master allocation.

02:18

Or I can click the plus or the minus sign to show or hide the block summary details.

02:28

I can also click the block code or the account name to go directly to the block or the account.

# Cancel a Reservation (Video Transcript)

00:04

In this video you will learn how to cancel a reservation in Opera Cloud.

00:09

Let's get started. First find the reservation you want to cancel. To find

00:14

the reservation you can go to bookings, reservations, and select manage

00:18

reservation to search for the reservation. Alternatively in this

00:23

example, I go to the Opera Cloud dashboard and click the arrivals tile to

00:27

go to the list of arrival reservations. Next to the reservation I want to cancel

00:33

I click the I want to arrow. On the I want to menu I click show more. Now, I

00:40

click cancel reservation.

00:44

I click the magnifying glass to select the cancel reason from the list and then

00:48

click select. If needed I can edit the cancellation description. Next, I click the

00:54

plus symbol on the deposit cancellation header. Then I scroll down to view the

00:59

cancellation policy for this reservation. In this example, I select cancel

01:04

reservation. A message displays with the cancellation

01:09

policy. Click cancel reservation to confirm. Now

01:12

I can see the cancellation number for this reservation. I can click the

01:16

---

vertical ellipsis to open the Actions menu to text or fax the cancellation

01:20

confirmation letter. In this example I select to preview and print the

01:24

cancellation confirmation letter. I can select a different confirmation letter

01:28

template from the drop-down list or I can click the customize option to

01:32

customize the letter. Then click send.

01:37

Now I can view print or download the cancellation confirmation letter.

# Cancel Mass Reservations (Video Transcript)

00:06

In this video, you will learn how to cancel multiple reservations in OPERA Cloud.

00:10

It's common to use mass cancellation to cancel multiple reservations that are non-guaranteed reservations.

00:17

For example, if the guests did not pay a deposit to confirm the reservations, you can easily

00:22

cancel the reservations using mass cancellation.

00:26

You also have the option to cancel reservations with deposits.

00:29

Let's get started.

00:31

In OPERA Cloud, go to Bookings, Reservations, and select Manage Reservation.

00:37

On the manage reservation screen, I will select mass cancellation from the predefined search

00:41

filters at the bottom of the page.

00:44

Alternatively, I could go to the search type menu and select mass cancellation from the list.

00:51

And finally, click search.

00:55

On the list of results, I select the checkboxes next to the reservations, I want to cancel.

01:01

In this example, I select the first 3 reservations and then click the Mass cancellation option.

01:09

Next, I select the cancel reason from the list.

01:13

The cancel description automatically populates with the reason.

---

01:16

I can edit the description if needed.

01:18

If needed, I can select any of the checkboxes including to delete all reservation traces,

01:21

to ignore the Cancellation Penalty, to Cancel Sharing reservations or to cancel reservations with deposits.

01:31

Then, click Cancel Now.

01:33

When the cancellations process, I can see the cancellation confirmation numbers and

01:38

the successfully cancelled messages.

# Post a Credit Card Deposit on a Reservation (Video Transcript)

00:06

In this video, you will learn how to post and pay for a deposit on an arrival reservation.

00:12

Let's get started. Go to bookings, reservations and then select manage reservations. Enter any

00:21

criteria to find the reservation. In this example, I enter the reservation confirmation number,

00:28

and then click search. Next, click the I want to menu, and then click deposit cancellation.

00:35

Click the vertical ellipsis and then select post unallocated deposit. An unallocated deposit posts

00:41

to the reservation but is not applied to a specific deposit request. Now I can enter the

00:46

payment details. In this example, I select chip and pin from the payment method drop-down list.

00:53

Next, I enter the credit card number. Click ok to verify the credit card was manually entered.

01:00

Then enter the expiration date. I unchecked the option to change the payment method on the

01:05

reservation. Now the payment method only applies to this deposit. Enter the deposit amount. I can

01:12

click the type magnifying glass to select a different reservation type that applies after

01:17

the deposit payment posts to the reservation. In this example, I do not change the deposit

01:22

guarantee deduct reservation type that's already selected, and then click post payment. Now I see

01:28

---

the deposit payment is posted to the reservation. Next, I click the x to close the window.

# Merge Reservations (Video Transcript)

00:06

In this video you will learn how to merge matching reservations. Reservations are considered matching

00:11

when the reservations have sequential reservation dates and have identical first, middle and last

00:16

names. You can merge matching arrival reservations for the current day or for the future dates if the

00:22

OPERA control allow merge reservations for future arrivals is active and turned on. Reservations are

00:29

merged from the matched reservations to the main reservation resulting in one combined

00:33

reservation for the entire length of stay. If the merged reservations have any deposit payments,

00:39

the deposit payments are transferred to the main reservation after the merge. Let's get started.

00:45

Go to bookings, reservations, and then select manage reservation.

00:52

Now enter any criteria to search for a reservation. In this example I enter the

00:58

confirmation number. Then click search. Now click the confirmation number to go to the reservation.

01:05

Click the matching reservations link to see a list of all possible matching reservations.

01:10

Select the check box next to the reservations to merge

01:14

and then click merge reservations. Click OK to confirm. Then click the x to close the window.

01:22

---

The reservation merge activity is recorded in the change log under the cancel action type 01:27 for merged reservations and under the update reservation action type for the main reservation.

# Add An Event to a Block (Video Transcript)

00:04

In this video you will learn how to find a block and create an event for the

00:09

existing block. In OPERA Cloud go to bookings, blocks and select manage block.

00:15

To find the block I must select a property because I'm currently logged

00:19

into a hub. I click the property magnifying glass to select a property

00:23

from the list and then click select. Next I'll delete the date to find all the

00:28

blocks for this property. Now I will enter the block name. In this example I

00:34

enter Oracle as the block name. Next I click search.

00:40

I can click the view icons to change the display for the list of blocks. Next I'll

00:46

find the block and click the block code to go to the block. When I am on the

00:51

block I'll click the I want to menu. Now I click event to create an event for

00:59

the new block. Next I must enter the event type.

01:05

In this example I click the magnifying glass and select meeting with out times

01:10

from the list and then click select. Next I finish entering the required event

01:18

details including the events start and end times. For now the expected attendees

01:24

is set to 50. To create the event the additional fields are optional. As the

01:29

---

event details are confirmed with the guests you can change the event

01:33

information. Next I'll scroll down to select an option to save. I can do the

01:38

following options. Save and create another event. I can save this event, or

01:44

save and manage event. In this example I select save and manage event.

01:52

Now on the event overview I can click Edit to add or change the event details.

01:57

In this example I click the loud event checkbox and then click Save.

# Add Menus and Items to Events (Video Transcript)

00:04

In this video you will learn how to add menus and items to events. First find an

00:12

event and then go to event resources. Let's get started. In OPERA Cloud go to

00:17

bookings, events, and then select manage events. On the manage events screen, if

00:23

you are logged into a hub, you must select a property. Next, I click the

00:27

property magnifying glass and select a property from the list. And then click

00:32

select. In this example, I deleted the dates to find all the events for the

00:36

property. Then I'll click search. Here I can see the block ID, the date range for

00:41

the events and other search options. I can click modify the search criteria to

00:46

change the search results. Click the I want to menu and go to event resources.

00:53

Now I can see an event list in the column on the left. I can see the first

00:57

event is highlighted and the resources for this event appear on the right.

01:02

Next I'll scroll down to select the menu tab. You can click the menu tab to open

01:07

the menu drawer.

01:11

On the menu tab I'll click the event type magnifying glass to select multiple

01:15

event types and then click select. Then I'll click search.

---

01:20

Each event type selected displays different menus related to the event

01:25

type. To find the menu items I must click the plus sign and then I can select a

01:30

menu. In this example I select plated lunch from the list. You can click the

01:35

menu name to see the menu items. Check the box include or remove a menu item.

01:40

Next, I click back to menus. You can see the number of menus added

01:46

reflects the number of event attendees. In this example I selected lunch and

01:53

breakfast and now I can add lunch or breakfast menus to the selected event.

01:57

And then scroll down to click Save.

02:02

Now I can see the plated lunch menu is added to the highlighted event.

02:08

Next I select the event type magnifying glass and check dinner. Then click select

02:13

to find dinner related menus. Then I'll click search. I'll click the plus sign to

02:19

expand the option. And click to select the cash bar.

02:22

I can click the option to save and add more to stay on the menu screen and

02:26

continue saving menus to the event. Next I click the plus sign to expand the

02:31

reception menus and select the Hibiscus menu option from the list. In this

02:36

example, I'll scroll down and click Save to add these menus to the event.

02:42

Here I can see all the menus I've just added to the event.

---

02:48

I can click the items tab to add other resources to the event.

02:58

In this example I select the chocolate fountain.

03:05

And click Save to add the item to the event.

---

# Create a Catering Block and Event (Video Transcript)

00:04

In this video you will learn how to create a new block and create a new

00:08

event for the block. To create a new block in OPERA Cloud, go to bookings,

00:13

blocks, and then select manage block. Click the I want to menu. Now click block

00:21

to create a new block. On the create block screen you can define the block

00:25

details and add the room and catering details. In this example, because I'm

00:30

logged in to a hub, I must select a property. I select the property from the

00:34

list and then click select. Next I select the account magnifying glass to find an

00:39

existing account. On the manage profile screen I can find an account and contact

00:44

name for a company, travel agent, or source profile and connect it to the

00:48

block. I can click the I want to menu to create a new contact profile for a

00:53

company, travel agent, or source. In this example I enter the name Oracle and

00:58

click search to find the account.

01:02

Now I can see a list of accounts and related contacts. When I select an

01:07

account on the left and click search the related contacts appear to the right. I

01:11

can select a contact from the list, choose to create a new contact or

---

01:16

account from the I want to menu or select the vertical ellipsis to create a

01:20

new linked contact. In this example I select the account Oracle Corporation -

01:25

IDC and click search. Now I can select the related contact from the list of

01:31

related contacts. Now I can scroll down to select the

01:35

option to select only the account or to select both the highlighted account and

01:40

contact from the columns. In this example, I scroll down to select both the account

01:45

and contact. Now I see the account, contact, block name, and the block ID are

01:51

filled in. The account name automatically fills in the block name. I can edit any

01:57

of this information as needed. Next I check the catering only option.

02:02

The rooms details section is hidden when this option is selected because rooms

02:06

are not part of the block if this is a catering only event. I continue by

02:11

entering the required information that's noted in red to create the block. Next

02:16

I'll click the magnifying glass to select the room status. In this example, I

02:21

select inquiry from the list and click select. Next I'll click the market

02:27

magnifying glass and select the group corporate market code from the list. And

02:31

then click select. Next I select the source magnifying glass to select catering as

02:38

the source for this block and then click select. In the catering details section I

---

02:43

must enter the number of event attendees to activate the options related to

02:47

events. In this example, I'll enter 50 attendees. You must click outside the

02:54

attendees field to activate the next options.

02:58

I can see the room grid option is not active because previously I selected

03:03

catering only for this block. I can enter any additional information for this

03:07

block and then I can select an option. Save, save and manage block, save and

03:13

create an event, save and add template, or save and add a catering package. For this

03:20

example I'll select the option to save and create an event. Now I can enter the

03:24

required event details. I'll select the event type magnifying glass and select

03:29

breakfast from the list. Then click select. When I select the event type the

03:34

event name is automatically populated with the name breakfast. If needed I can

03:39

edit the name. For this event type the events start and end times begin with

03:44

8:00 a.m. and end with 9:00 a.m. I will change the start time to 9:00 a.m. and

03:49

the end time to 11 a.m. for this event. Next I'll scroll down to select an

03:54

option. I can choose to select the option to save and create another event, save

03:59

and manage event, or save. In this example, I'll click Save. Now I can see the new

04:05

event created for this block ID. I can click the plus sign to view the block

---

04:09

overview. Or I can click the I want to menu for

04:14

more options related to this block and this event.

04:21

I can also click the event details link to edit or add details to this event. Or

04:27

I can click the I want to menu for options related to this event.

---

# View Events on the Function Diary (Video Transcript)

00:05

In this video, you can learn how to view and edit events on the function diary.

00:08

Let's get started. In OPERA Cloud, go to Bookings, Events, and select the Function Diary.

00:17

To display events on the function diary, the property and start date for the event must be selected. In this example, I click the

00:24

magnifying glass and select the hotel from a list. Then I click select.

00:29

Next I'll select a date from the calendar.

00:33

You can define any additional fields and then click search.

00:36

Now I can see the function diary view, with a list of function spaces and a day and time for the event.

00:43

I can hover over each event to view an event snapshot including the event status duration and event label.

00:49

Then to access the event information, you can hover and double click to see the event overview,

00:52

with the related block details.

00:56

Now, I can click the I want to menu to create sub events,

01:01

view event changes, or click to go to the event resources to add menus or items.

01:08

I can click edit to change the event details.

01:11

---

For example, I may need to add details as the event approaches.

01:15

If I make any changes I'll click save. Then I'll click the option to go back to the function diary.

01:21

I can change the range of days that display on the function diary by selecting the number of days from the drop-down list.

01:28

In this example, I selected seven days. Now, I can see 7 days of events displayed.

01:31

I can click the legend to view the event status color descriptions and to view the icon descriptions.

01:41

I can see the selected search options for the events that display on the function diary.

01:46

To change the search options, I can click Modify Search Criteria.

01:51

Now, I can search by a variety of options related to the property event dates or the function space.

01:58

In this example, I will search for events only in the bistro function space.

02:02

I'll start by clicking the space magnifying glass to go to the function space search.

02:09

Now, again I will click on the space magnifying glass

02:12

and then select the bistro space. Then click select. Now, I can click search.

02:19

Next, I'll click the check box for the bistro space. And then click select.

02:25

Then I'll click Search.

02:27

Now, I can see the function diary only displays the events for the bistro function space.

---

# Find Reservations with Opt In Notifications (Video Transcript)

00:04

In this video you will learn how to

00:06

search for reservations where the guest

00:08

"Opted in" to receive notifications.

00:11

An external system must be configured

00:13

and subscribed to the OPERA Cloud

00:15

business events. To get started, navigate

00:18

to the OPERA Cloud application. Go to

00:21

Bookings, Reservations, and select Manage

00:25

Reservation. Select the Advanced Search

00:29

option. To search for the reservation you

00:32

can select a reservation type from the

00:34

drop down list. In this example, I select

00:37

the room assignment reservation type. If

00:39

you do not select a reservation type all

00:41

reservations with "Receive External

---

00:44

Notifications" checked will appear. You

00:47

must select the property and check the

00:49

Receive External Notifications" checkbox.

00:51

You can enter additional information to

00:53

refine your search. When finished click

00:57

search. Now you can see the reservation

01:00

in the room assignment status with the

01:02

received external notifications checkbox

01:04

selected. For these reservations the

01:07

guests Opted-In to receive notifications

01:10

about the reservation. To confirm, click

01:12

the confirmation number. To confirm the

01:16

box is checked scroll down to the

01:19

additional details section on the

01:20

reservation and see the Receive External

01:23

Notifications checkbox. When the room is

01:25

ready, now the guests can receive a text,

---

01:27

phone call or email.

# Opt-in Guest Notifications (Video Transcript)

00:06

In this video you'll learn how to opt in

00:09

a guest to receive notifications about

00:11

their stay. For example if a guest

00:13

arrives and their room is not ready, by

00:15

"opting in" the guest they can receive

00:17

notifications by phone or email when the

00:20

room is ready. This option is called

00:22

receive external notifications. You can

00:25

find this option in various places

00:26

throughout the application including

00:28

when you assign a room and on the

00:30

reservation. To send the notifications an

00:33

external system must be configured and

00:35

subscribed to the OPERA Cloud Business

00:37

Events. To find a reservation you can go

00:39

---

to Bookings, Reservations, Manage

00:42

Reservation, and search for a reservation.

00:44

In the example I found this reservation.

00:47

We'll start by scrolling to the bottom of

00:50

the reservation.

00:52

Here we can find the additional detail

00:55

section and then you will see the

00:56

received external notifications check

00:58

box. Where you can opt-in the guests to

01:01

receive external notifications. Select

01:03

edit and select the receive external

01:05

notifications checkbox. You can select

01:08

the magnifying glass to select any

01:10

communication options attached to the

01:12

profile. Or you can add an additional

01:15

phone number or email as the

01:17

communication method for this

01:19

---

reservation. You can also select to add a

01:21

new phone number to the profile by

01:23

selecting the add two profile checkbox.

01:26

If you do not select the checkbox add to

01:29

profile, this communication method is

01:31

attached only to this reservation. To

01:33

save the changes select save.

---

# Check In Arrival Reservation (Video Transcript)

00:04

In this video you will learn how to check in a reservation. Let's get started.

00:09

First, you must find the reservation. In this example, I click the arrivals tile

00:14

to go to the list of arrival reservations. Next, I'll find the

00:19

reservation I want to check in and click the arrow to open the 'I want to' menu.

00:24

Click check-in. Next, I'll click OK to confirm the profile privacy selection.

00:31

Depending on your system configuration you may have different options for the

00:36

check-in flow. Now, on the verify payment step I can verify or add a payment

00:41

method. In this example, I select cash from the drop-down list and click Save.

00:50

Next, I click complete check-in. I click yes to print a registration card. If it's

00:58

configured for your property, you may have the option to print, email, or fax

01:03

the registration card for the reservation. In this example, I select

01:08

preview and then click process. Now, I can print the guest's registration card and

01:14

the reservation is checked in.

# Reverse Check in a Reservation (Video Transcript)

00:05

In this video you will learn how to reverse check in a reservation. You can

00:11

reverse check in a reservation if no financial transactions are posted to the

00:14

reservation folio. You can reverse reservations with deposits. To reverse

00:19

check-in reservations you must go to each individual reservation. Navigate to

00:24

bookings. reservations and select manage reservations. To find the reservations

00:31

select in house from the drop down list. Enter or click the magnifying glass to

00:36

select the property from the list. Then click search.

00:45

From the list of reservations you can click the confirmation number to go to

00:49

the reservation. Click the I want to menu.

00:56

And then click reverse check-in.

01:01

On the reverse check-in screen you can select maintain room to keep the

01:07

assigned room number or you can select to remove the room

01:10

From the drop-down list. You can also update the housekeeping status. In this

01:15

example, I select to remove the room and then click reverse check-in.

01:21

Now the reservation is not checked in. You can see it's now in the four pm hold

---

01:26

arrival status.

English

All Cloud computing Computer program Sales Related Recently uploaded Watched  
enter Oracle as the block name. Next I click search.

00:40

I can click the view icons to change the display for the list of blocks. Next I'll

00:46

find the block and click the block code to go to the block. When I am on the

00:51

block I'll click the I want to menu. Now I click event to create an event for

00:59

the new block. Next I must enter the event type.

01:05

In this example I click the magnifying glass and select meeting with out times

01:10

from the list and then click select. Next I finish entering the required event

01:18

details including the events start and end times. For now the expected attendees

01:24

is set to 50.To create the event the additional fields are optional. As the

01:29

event details are confirmed with the guests you can change the event

01:33

information. Next I'll scroll down to select an option to save. I can do the

01:38

following options. Save and create another event. I can save this event, or

01:44

save and manage event. In this example I select save and manage event.

01:52

Now on the event overview I can click Edit to add or change the event details.

01:57

In this example I click the loud event checkbox and then click Save.

# Advance Check in Reservation with ETR (Video Transcript)

00:04

In this video you will learn how to move a reservation in the arrival status to the advanced check-in state.

00:10

Advanced check-in allows the guests to post charges to their reservation folio their master bill for the hotel.

00:17

Let's get started. Navigate to the OPERA Cloud application and find the list of expected arrival

00:23

reservations for the current business date.

00:27

Then click the confirmation number.

00:31

The reservation must have a valid payment method selected. Then click on "I want to" and

00:39

select check-in.

00:46

Next click the advanced check-in option.

00:50

The expected time of return screen you can enter the time the guest expects to be back to the hotel.

00:57

You can also add a related comment.

01:00

Select the receive external notifications checkbox to opt in the guest to receive notifications about their reservation.

01:07

To add a new phone number to the profile select the add to profile checkbox.

01:12

If you do not check the box this email or phone number is connected only to the reservation and not to the profile.

01:20

---

Then select save.

01:24

Click OK to confirm moving the reservation to the advanced check-in state.

01:30

Now you can select a room, change

01:32

the payment method attached to the reservation, and you can create room keys for the guests if this option is configured for your hotel.

01:47

When it's time to check in the reservation you can click the complete check-in option at the top of the reservation to check in the guest.

# Reverse Advance Check In Reservations (Video Transcript)

00:00

[Music]

00:04

in this video you will learn how to

00:06

print registration cards for tomorrow's

00:08

arrival reservations let's get started

00:11

in our cloud go to front desk select

00:14

front desk workspace and then select

00:16

registration cards in this example I

00:19

changed the arrival date to tomorrow's

00:21

date then I can enter any additional

00:23

criteria if needed click search now

00:28

scroll down to view the search results

00:30

with the list of reservations next I

00:33

select the checkbox at the top of the

00:35

list to select all the reservations then

00:37

scroll down to select the option to

---

00:39  
process the registration card if I want

00:42  
to select a different template I can

00:44  
click the magnifying glass to select a

00:46  
different registration card template

00:48  
from the list in this example I select

00:51  
the new registration card template and

00:53  
click select next I can choose to print

00:56  
a registration card for the primary

00:58  
guests and any accompanying guests or

01:00  
only the primary guests from the list of

01:03  
report destinations I can choose the

01:05  
option to preview email to print email

01:08  
or fax in this example I select the

01:11  
preview option and then click process

01:14  
now it can print the PDF that contains

01:16  
all the registration cards to the

01:18  
reservations arriving tomorrow

---

01:23

you

---

# Add a Reservation to the Queue (Video Transcript)

00:00

[Music]

00:03

in this video you will learn how to add

00:06

a reservation to the queue you can add a

00:09

reservation to the queue if the assigned

00:11

room or required room type is not ready

00:13

then you can send a text message to

00:15

notify housekeeping let's get started

00:17

first I will search for the reservation

00:20

in Opera Cloud you can search for an

00:22

arrival reservation by clicking the

00:24

arrival reservation style to go to the

00:26

list of arrival reservations

00:28

alternatively to find the reservation

00:31

you can go to front desk and select

00:33

arrivals next enter the guests name and

---

00:37

any other search criteria then click

00:39

search select the I want to option next

00:42

to the reservation and then select place

00:45

reservation on queue to confirm click OK

00:50

to go to the reservation click the

00:52

confirmation number now on the

00:55

reservation I see the priority

00:57

notification with the number indicating

00:59

the priority on the queue for this

01:00

reservation click the priority

01:03

notification to see the total winked um

01:05

on Q and the Q priority here I can

01:09

select to prioritize this reservation or

01:11

to send a text to the guest when the

01:13

room is ready for check-in I can also

01:15

click the vertical ellipsis menu to

01:17

remove the reservation from the queue

---

01:19

check-in the reservation change the

01:22

assigned room or to send a text message

01:24

to housekeeping to rush the room in this

01:27

example I click prioritize to set the

01:29

reservation to first priority and then

# Print Arrival Registration Cards (Video Transcript)

00:00

[Music]

00:04

in this video you will learn how to

00:06

print registration cards for tomorrow's

00:08

arrival reservations let's get started

00:11

in our cloud go to front desk select

00:14

front desk workspace and then select

00:16

registration cards in this example I

00:19

changed the arrival date to tomorrow's

00:21

date then I can enter any additional

00:23

criteria if needed click search now

00:28

scroll down to view the search results

00:30

with the list of reservations next I

00:33

select the checkbox at the top of the

00:35

list to select all the reservations then

00:37

scroll down to select the option to

---

00:39  
process the registration card if I want

00:42  
to select a different template I can

00:44  
click the magnifying glass to select a

00:46  
different registration card template

00:48  
from the list in this example I select

00:51  
the new registration card template and

00:53  
click select next I can choose to print

00:56  
a registration card for the primary

00:58  
guests and any accompanying guests or

01:00  
only the primary guests from the list of

01:03  
report destinations I can choose the

01:05  
option to preview email to print email

01:08  
or fax in this example I select the

01:11  
preview option and then click process

01:14  
now it can print the PDF that contains

01:16  
all the registration cards to the

01:18  
reservations arriving tomorrow

---

01:23

you

---

# Electronic Signature Registration Card (Video Transcript)

00:06

In this video, you will learn how to create

00:08

a digital registration card for the guest to sign on a tablet.

00:12

First, I must find the reservation. In this example,

00:16

I go to the OPERA cloud dashboard and tap the arrivals tile to go to the list

00:20

of arrival reservations. Next tap the arrow to open the 'I want to'

00:25

menu. Tap the e-sign registration card and the

00:29

customized electronic signature template displays.

00:32

If required by the guest I could select another language for the registration

00:36

card. Now I can present the tablet to the

00:38

guest with the option to initial and sign the digital registration card. The

00:44

guest can tap the initial and signature buttons to sign

00:50

and then click save. To make changes to the signature or the initials

00:54

the guest can tap the pencil icon. Now, I can go to the reservation

00:59

to see the electronic signature registration card signed by the guest.

01:04

On the OPERA cloud dashboard, I click the arrivals tile.

---

01:07

To go to the reservation tap the confirmation number.

01:11

Scroll down to see the reservation notifications. Tap

01:14

e-signed registration cards. In this example, I see the number one.

01:19

This indicates there is one registration card attached to this reservation.

01:23

I can tap the vertical ellipsis to preview or print the electronically

01:26

signed registration card. In this example, I select preview to view

01:31

the digital registration card that was signed by the guest.

---

# Mass Advance Check In (Video Transcript)

00:04

In this video you will learn how to move multiple reservations to the advanced

00:09

check-in state. This is called mass advance check-in. Advanced Check-in

00:15

allows guests to post charges to their reservation folio prior to check-in and

00:19

helps the rooms management team prioritize room cleaning and room

00:23

assignment. Let's get started. Navigate to the Opera Cloud dashboard and click the

00:29

arrivals tile to go to the list of arrivals. Select the check box next to

00:35

each reservation you want to move to the advanced check-in state. Then, click the

00:42

mass advance check-in option. Click process to update the reservations. Now, I

00:50

can review the advanced check-in status. In this example, one reservation did not

00:55

process and the error message explains the multi-room reservation cannot be

01:00

processed as an advanced check-in, and two of the reservations processed the

01:05

advanced check-in successfully. If you want to print the status you can

01:10

click the print option. Click ok. The next step depends on your configuration and

01:17

you may have different options here. In this example, after the advance check-in

01:25

is successful I have the option to create registration cards for the

01:28

---

advanced check-in reservations. I can select the option to preview to print,

01:33

email, or a fax. In this example, I select the option to preview to print, and click

01:39

process. Now I can print the registration cards for the guests to sign. Next I

01:45

close the window. Now when I go back to the list of

01:50

arrivals I can see the reservations I selected are now in the advanced

01:53

check-in state.

01:59

you

---

# Create a Room Key (Video Transcript)

00:05

In this video you will learn how to make a key and how to change the key's access.

00:11

To create a key the reservation must have an assigned room. Let's get started

00:17

in Opera Cloud go to miscellaneous and select property interface control. The

00:23

property I'm logged into is selected. I can click the magnifying glass to select

00:28

a different property. Next, I scroll down and select the reservation status

00:33

magnifying glass. I select the checkbox to add in house reservation statuses and

00:39

then click select. I deselect the include blocks checkbox because I don't want to

00:45

include blocks in the results, and then I click search. Now, I'll scroll down to see

00:51

the list of search results. On the list of results I see the reservations with

00:56

assigned rooms and I can see the number of duplicate keys previously created for

01:02

each reservation. Next, I select the checkbox next to the reservations I want

01:06

to create a key for and then click the option to create key.

01:11

I'll scroll down to change the key options. In this example, I select the

01:17

option to create two keys for each reservation. Then, I select the start and

01:22

end date range for the keys. Next, I'll scroll down and turn on the option to

01:28

---

display all key encoder locations. Now, I can select the tabs to find the key

01:33

encoders in various locations around the property. In this example, I select a

01:38

default key encoder at the main entrance. Next, I'll click process. This key encoder

01:45

did not create a key and I see a message to select an alternate location. Next, I

01:50

turn on the option to display all the encoders and then select the key encoder

01:54

in the left hallway and then click create key.

02:01

Now I can see the keys created successfully.

---

# Check Out a Reservation (Video Transcript)

00:04

In this video you will learn how to check out a reservation in Opera Cloud.

00:08

Let's get started. From the Opera Cloud dashboard click the expected departure

00:13

tile to find the due out reservations. If I select a checked in reservation I

00:19

would be presented with the action to check out early. Instead,

00:23

in this example I will select the arrow to open the 'I want to' menu next to the departure

00:27

reservation. And then I'll select checkout. Now, on the billing screen I

00:35

click the split view icon to change the view and see multiple folio windows side

00:39

by side. I can drag and drop charges from one billing window to another billing

00:45

window. I can also select the vertical ellipsis menu to edit or transfer a

00:50

posting, post a payment or adjustment, make a quick split, or view the interim

00:56

folio, or I could click post charge to post last-minute charges or rebates to

01:01

the folio. Next, I click checkout. Now, I can see the folio statement with the

01:07

amount due and selected payment method. Next, I'll click settle folio to post the

01:12

cash payment and settle the folio balance. I can print the payment receipt

01:17

or checkout now. I click checkout now. Now, I can update the room status. I select

01:24

---

dirty and click Save. I can see the reservation status is now checked out.

---

# Quick Check Out (Video Transcript)

00:05

In this video, you will learn how to check out a reservation using Quick

00:09

Check out.

00:10

Let's get started.

00:11

In OPERA Cloud go to front desk, select Front Desk Workspace, and then select quick check

00:17

out.

00:19

If needed, I can click modify search criteria to define the options to find the reservations.

00:25

Now, I select the checkbox next to each reservation I want to check out.

00:30

Next, I can select any of the following check out options; if I want to check out multiple

00:36

reservations, I select Mass Check Out and then step through the manual folio settlement

00:41

process and checkout each selected reservation.

00:45

Or to automatically process the credit card or direct bill settlements, I can select Auto

00:50

Check Out.

00:52

Alternatively, I can select the Check Out Zero Balance Departures option to check out

00:57

reservations with a zero balance.

01:01

In this example, I click auto check out.

01:04

---

Auto checkout verifies the credit card assigned to each reservation has a sufficient authorization

01:08

to cover the folio balance, and the direct billing accounts are not restricted, and also

01:14

have not exceeded the limits.

01:16

Any cash guest folios must have a zero balance for auto check out to process successfully.

01:21

Now, I can see one reservation successfully processed the auto checkout.

01:26

The other two reservations did not process the auto check out, because the payment method

01:30

of the direct bill or the credit card is not set up on these reservations.

01:35

Click close.

01:36

Next, I select Mass Checkout to manually process the remaining reservations that were previously

01:43

selected.

01:44

I can update the payment details, if needed, and then click Settle and Send Folio.

01:50

Now, I can click the link to select a Folio Style or as in this example I continue with

01:56

the default folio style, and then I select a Report Destination.

02:00

I can select to preview, email, or download the folio.

02:05

In this example.

02:06

I select email, and click the link to enter an email address, and then click save.

02:28

Next, click Process.

---

02:31

Now, I see the payment processed and if needed I can click to print the receipt.

02:37

Scroll down, and click check out now.

02:42

Now, I see the reservation is checked out and the room number.

02:48

Next, the 3rd and final previously selected reservation automatically displays to continue

02:53

the check out process.

02:55

Click settle and send folio.

02:59

Select a folio destination, and then click save.

03:02

And then click process.

03:05

Now, I see the payment is applied to the folio and the balance is 0.

03:10

Next.

03:12

I click Schedule Check Out, enter a check out time, and then click ok.

03:17

Now, I see the 3 reservations I previously selected are not displaying as available to

03:24

check out any more because these reservations checked out successfully.

# Apply Credit Card Rebate to a Reservation (Video Transcript)

00:04

In this video you will learn how to apply a credit card rebate to a

00:09

reservation. Let's get started. In OPERA Cloud go to front desk and then

00:16

select in-house. To search for the reservation I must select a property. I

00:22

select the property from the list and then click select.

00:34

Next click search. I'll click the confirmation number to go to the

00:39

reservation. First I'll click the payment instructions to confirm a credit card

00:45

as a payment method is set up for this reservation. Here I can see the credit

00:51

card payment method for each window.

00:58

Next I'll scroll up to the top of the reservation and click the I want to menu.

01:06

And then click billing. At the top of the billing screen click post payment.

01:13

Now select the window to apply the rebate. In this example, I select window 3.

01:22

You can see the credit card payment method applies to this window. In the

01:27

amount field I enter the rebate amount as a negative number. For example, I enter

01:32

negative \$20. Next I must enter a value in the reference field that's a minimum

01:39

of 6 alpha or numeric characters. In this example, I enter rebate.

---

01:47

I can check the override debit activity to process rebate checkbox. If you do not

01:55

check this option, and it's configured, OPERA validates if the debit or credit

01:59

card was previously charged for this guest and it validates if the sum of the

02:05

previous amounts charge was greater than or equal to the amount of the rebate. To

02:10

override this validation, check this box. Next click apply payment. If a

02:19

chip-and-pin terminal is configured then you can select the terminal to process

02:23

the transaction. In this example, I click to select the terminal labeled

02:28

front-desk left. Then click select terminal.

# Change Rooms for an In House Reservation (Video Transcript)

00:05

In this video you will learn how to change rooms for an in-house reservation.

00:09

Let's get started. Click the in-house reservation style to go to the list of

00:14

in-house reservations. First, define the reservation. Click the 'I want to' arrow

00:20

next to the reservation. Select move room. Next, I select the clean

00:27

check box to include rooms which are in either the clean or inspected room

00:31

status. In this example, I delete the room type to search for all the rooms in

00:36

either the inspected or clean status. Click search. Scroll down and click

00:43

select room to assign a new room to the reservation. I select the check box to

00:48

update the room type to charge on the reservation. Then I click the magnifying

00:53

glass to select a move reason from the list. Click select. The description Auto

00:59

fills with the selected reason. I can edit the description if needed. Now, I can

01:04

select the room status for the previously departed room. In this example,

01:08

I keep the default selection of dirty and click assign room. Click accept

01:14

room selection. Now, the new room is assigned to the reservation.

---

# Using Batch Room Assignment (Video Transcript)

00:06

In this video you will learn how to manually and automatically assign rooms to multiple

00:10

reservations. Let's get started. In OPERA cloud select front desk, front desk workspace, and then

00:17

select room assignment. To find the reservations I click modify search criteria. Now, I can enter the

00:24

arrival date and click search. Now I can see a list of reservations for the arrival date I specified.

00:31

In this example i select the first reservation and then click the manual assign option.

00:38

Selecting the manual assign option allows me to select the exact room to assign to this

00:42

reservation. Now I can select any additional room options. In this example, I scroll down

00:48

to find a clean room and click select room. I click ok to confirm the room assignment.

00:54

Now on the list of reservations I click the check box at the top of the list to select

00:59

all the remaining reservations. Next, I select auto-assign. Now I can select any relevant room criteria.

01:07

In this example, I select the checkbox include departure rooms to include rooms in the due

01:12

out status and then I select the checkbox to include the rooms in the clean and pickup status.

01:19

Next, I click assign. Now I can see the rooms were automatically assigned to these reservations.

# Manage Rate Restrictions (Video Transcript)

00:04

In this video you will learn how to manage rate and room restrictions. You

00:10

can use restrictions to control availability based on demand, experience

00:14

or forecasting. For example, during a weekend when demand is high you can

00:20

apply a two-night minimum stay restriction on all or specific rates and

00:24

rooms. Let's get started. Go to inventory and then select manage restrictions. I

00:31

can search for existing rate restrictions or I can create a new

00:35

restriction. In this example I click new to apply a new restriction. Select the

00:42

date range for the restriction. In this example, I select Friday as the start

00:47

date and Sunday as the end date. From the restriction drop-down list

00:56

I select minimum stay through. Then, I click the plus icon to increase the days

01:04

to 2. I can select a specific room class room type or I can select a specific

01:10

rate category or rate code for the restriction. In this example, I select

01:16

house to apply the restriction to all the rooms. I can select the category or

01:21

code magnifying glass to select a specific rate to apply the restriction

01:25

to or if I do not select a specific rate category or rate code the restriction

01:31

---

applies to all rates. Next click Save. Now, I can see the restriction I just

01:36

created and it applies from Thursday through Sunday.

01:39

I can click the list icon to display the restrictions in a list view

01:45

or I can click the week view icon to see the calendar view of the restrictions

01:51

setup for the week. Next, I click the vertical ellipsis and select change log. I

01:56

can adjust the property and the date and then click search. Now, I see the list of

02:02

changes to restrictions for this property and this specific date.

# View Property Availability and Configure Sell Limits (Video Transcript)

0:06

In this video you will learn how to view property availability and change the sell limits.

0:12

Property availability provides a comprehensive view by day of

0:15

the available and sold rooms for the property to manage room inventory.

0:21

Let's get started. Go to inventory

0:25

and select property availability. Now I can change the property or the date.

0:33

Or I could select to display the search results by room type or room class.

0:38

I also have the option to click either the room class or room type magnifying glass to select a

0:43

specific room type or room class. Next, I click search.

0:49

I can view the property availability for 28 days.

0:53

The list of room types displays on the

0:55

left with each day displaying the maximum number of available rooms.

0:59

I click view options to select which values display on the property availability view.

1:04

For example, I can select these various options to display availability for the entire property.

1:09

Or I can select options to display availability for each room type, such as the number of arrivals

1:15

---

departures or the number of persons. The rooms available to sell considers

1:20

the out of order rooms and the sell limit. I click expand all to expand the room type rows

1:26

to display all the selected availability view options.

1:30

I click the available rooms number below the date for the deluxe kingroom type

1:34

to set the sell limits for the specific day. I can also select a date range or

1:39

a day of the week to set the sell limits for a specific period of time.

1:42

I can set sell limits using positive numbers to allow overbooking or by using negative

1:47

numbers to set an underbooking ceiling. Next, I click on the minus sign to decrease

1:52

the number of available rooms to 35. Or by using 0 I can reset the sell limits

1:59

and then click save. Now, I can see the negative 2

2:03

sell control value for the room type after I reduce the sell limit from 37 to 35.

# Assigning Room Conditions (Video Transcript)

00:04

In this video you will learn how to assign conditions to a room. For example,

00:10

if you need to schedule a sales tour or maintenance repairs, you can use room

00:15

conditions to set aside the room for a special purpose. You can add a condition

00:19

to prevent a room from being assigned to a guest. To add a condition to a room,

00:24

navigate to OPERA Cloud and go to Inventory. Select Room Management, and then Room

00:33

Conditions. You must click the magnifying glass to select a property from the list.

00:37

And then click Select. Now click the vertical ellipsis and

00:42

select New. Next click the magnifying glass to select the room. Here you can

00:49

see the room type, the room number, and a description. Click Select. Then click the

00:55

magnifying glass and select the desired condition from the list. If the room

01:00

condition type is available then you can assign the room to a reservation and

01:04

click select. You can edit the remarks and then click Set Condition.

01:14

Now the room is labeled with the condition, and appears in a list below

01:18

the search options. To edit or delete the room condition, you can select the

01:23

vertical ellipsis next to the room.

---

# Update Room Status (Video Transcript)

In this video you will learn how to use the housekeeping board to view and edit

0:10

the housekeeping status for rooms in the hotel. Let's get started. Navigate to

0:16

inventory, rooms management, and then select housekeeping board. To create the

0:22

housekeeping board first you must select the property. In this example I click the

0:27

magnifying glass, then I select the property Rosie from the list and click

0:31

select. Next I will select the magnifying glass

0:36

to open the reservation status menu and select checked out reservations. Click

0:42

select then scroll down and click search.

0:48

Now you can see the housekeeping status for the rooms with checked out

0:52

reservations. You can click the list icon to switch to the list view and display

0:57

the rooms grouped by housekeeping status. The header includes the number of rooms

1:01

in each status. You can click view options to add a column. In this example

1:06

I selected the room status checkbox. Now the room status column appears on the

1:10

list view. You can click the table icon to display the table view. In the table

1:17

view you can sort the rooms by clicking the columns on the header. In this

1:22

example I click room status and the rooms are now sorted by status.

---

1:30

From any of the views you can select the room and click the option to update the

1:35

room status. Now you can make changes to the housekeeping status, room status or

1:40

the turndown status. You can also change the guest service

1:46

status - do not disturb or request to make up the room. Select the option and

1:52

then click close.

---

# Auto Generate Task Sheets (Video Transcript)

00:06

In this video, you will learn to auto generate housekeeping task sheets in

00:11

OPERA cloud. Using auto-generate OPERA cloud

00:14

intelligently assigns rooms to task sheets

00:17

based on a number of housekeeping attendants available and the

00:20

housekeeping credits per room. Any rooms remaining not assigned are

00:25

automatically added to a floating overflow task sheet for manual

00:29

assignment. In OPERA administration when the

00:32

housekeeping task scheduling OPERA control is active

00:35

each room will have a different task assigned according to the task schedule

00:39

setup for the room type. Let's get started. On the OPERA cloud

00:43

menu go to inventory, select task sheets and then

00:46

select auto-generate task sheets. I select the

00:50

task magnifying glass and select full-service, light service

00:54

and the complete room service task from the list and then click

00:58

select. Next I add task instructions that will display on task sheet reports

01:03

---

and in the mobile task sheet companion for the housekeeping attendance.

01:07

Then I add room instructions that appear for each room.

01:11

Next, I click the magnifying glass and select the checkbox on the top

01:15

to select all the attendance from the list and then click

01:18

select. Next, I enter 60 as the maximum number of credits to be assigned to any

01:23

one task sheet. Credits are divided evenly by the number

01:27

of housekeeping attendants. And then click next. Next I select the

01:31

pickup checkbox to include both the dirty or pickup rooms in the room

01:35

criteria. If required, I can change the breakout

01:39

options and then click generate task sheets. Now I see the task

01:43

sheets generated for the day. If needed I can make manual adjustments

01:48

to each task sheet. For example, in this single task sheet

01:51

view I can click edit to assign a different room attendant

01:55

or to update the task sheet instructions. I can also select a different task sheet

02:00

from the drop-down list. To view multiple task sheets I can click

02:03

the view card icon to see the task sheets side by side.

02:07

Now click OPERA cloud to go back to the dashboard.

02:10

---

On the task sheet dashboard tile, I can see the details and progress of the

02:15

housekeeping tasks. I can click the tile to go to the task

02:20

sheets.

# Manually Create Task Sheet (Video Transcript)

00:06

In this video, you will learn how to manually create a task sheet in OPERA Cloud.

00:11

Let's get started.

00:12

On the OPERA Cloud menu, go to Inventory, select Task Sheets, and then select Create

00:18

Manual Task Sheets.

00:19

I click New.

00:20

Next, I select the task magnifying glass, and check the full service checkbox.

00:25

And click select.

00:26

Next, I select the Room magnifying glass, and select the rooms in the pickup and dirty

00:31

status from the list and then click select.

00:34

Next, I enter 15 for the number of credits to allocate per room.

00:39

Then I enter the room instructions.

00:41

And then click create.

00:43

Now I can see the task sheet I just created.

00:46

I can click the detail tab to view the rooms per task sheet.

00:49

Or I can select the vertical ellipsis to create a task sheet report.

00:54

---

Or I can click new to create another new task sheet.

00:57

I can click to manage task sheets to view the actions for each task sheet, including

01:02

updating the status, or make changes to the task sheets including assigning a housekeeping

01:08

attendant or adding instructions.

01:09

I can click the view icons to display one or multiple task sheets.

# Use the Task Sheet Companion on a Tablet (Video Transcript)

00:06

In this video, you will learn how to use the task sheet companion on a tablet device, to

00:11

manage the rooms assigned to a housekeeping room attendant.

00:15

Let's get started.

00:17

Click the task sheets dashboard tile to go to task sheets.

00:21

Alternatively, you can navigate to Inventory, task sheets, and then select manage task sheets.

00:28

Now, you can see the housekeeping task sheets for the day.

00:32

Click Manage.

00:34

To find and select the assigned task sheet I can double-click any of the task sheets

00:38

on the right or I can select the task sheet number from the drop-down menu.

00:43

Next, click the actions menu.

00:46

Then click "go to task sheet companion".

00:49

The assigned rooms are prioritized according to a cleaning priority.

00:52

The details for the first room are displayed; including the task to be completed, plus any

00:57

notes and the arrival, or the inhouse, or departure reservation details.

01:02

I click the Traces link to find any housekeeping tasks setup as traces for this room.

---

01:07

Now, I can see this room needs more pillows and towels.

01:11

After I stock the room with pillows and towels I can click the vertical ellipsis to mark each

01:15

task as complete.

01:17

Then close the window.

01:18

Next, I click Start to begin the tasks for the room and activate the timer.

01:23

The time allocated for the task, displays just below the timer.

01:27

If assistance is needed to complete the task, I can click need assistance to send an emergency

01:32

message or to request assistance.

01:34

Then if configured, the other users will receive a notification in OPERA Cloud.

01:39

Once the task is complete, I can update the room status to Clean and then click finish.

01:47

I can turn on the "Go on break" option to indicate an on-break status on the Attendant

01:52

Console in OPERA Cloud.

01:56

I can turn off the 'Go on Break' option to resume my work.

01:58

I click next room to move on to the next room in the list, or to skip a room.

02:02

Or I can double click the next room in the task list to move to the next room.

# Create and Resolve a Room Maintenance Task (Video Transcript)

00:05

In this video, you will learn how to create and resolve a room maintenance request

00:09

in OPERA cloud. You can create a room maintenance request for any guest room

00:13

with an issue that requires action. In this example, I will create a maintenance request

00:18

for broken air conditioning in a guest room. Let's get started. On the OPERA cloud dashboard,

00:23

you can view the number of resolved and unresolved maintenance requests.

00:28

To create a new maintenance request I go to inventory, room management, and then select

00:34

room maintenance. Then click new. Enter the room number. Next, I click the reason drop-down list

00:41

and select A/C from the list. To assign this request to a specific staff member to action

00:47

I can select a person from the user drop-down list. I add comments to the remarks section

00:55

and then click Save. I can click the view icons to change how the requests display.

01:01

Now, when I click on the plus sign next to today I can see the maintenance request I just created

01:06

for today. Now, let's learn how to resolve a maintenance request in OPERA cloud mobile.

01:13

From the OPERA cloud mobile menu tap room maintenance. I can tap the plus icon to create

01:19

---

a new maintenance request or as in this example, I will search for the maintenance request I just

01:24

created. To find the request I tap search. Now, I select all requests from the drop-down list.

01:33

If I selected a person when I created the request in the previous step then I would select assign

01:38

requests. Now, I can see the request I just created. When the request is complete I can

01:44

double-tap the request and select resolve. Now, the maintenance request is marked as resolved.

# Post Charges to a Reservation using Post it (Video Transcript)

00:05

In this video, you will learn how to use Post it.

00:07

You can use this feature when restocking minibar items in a guest's room or as a Point-of-Sale in the gift shop.

00:13

Let's get started.

00:15

In OPERA Cloud, I click the quick launch menu and then select post it.

00:19

Alternatively, I could go to the financials menu, select cashiering, and then select post it.

00:26

I enter my PIN and then select login.

00:30

Now, I click the drinks and snack items the guest consumed from the minibar to add the items to the cart.

00:36

I click the red x to remove an item.

00:39

Next, I click pay.

00:41

Now, I can enter the payment information to settle the cart to cash or credit card.

00:46

Or I can select the checkbox to "charge to a room".

00:50

In this example, I select the check box charge to a room.

00:53

Then I enter a room number and click search.

00:56

I select the inhouse reservation from the list, and click Complete sales.

---

01:01

Now, a charge for the minibar items is posted to the reservation.

# Managing Reservation Billing (Video Transcript)

00:06

In this video you will learn how to post charges, make payments, view the guest's folio,

00:11

and manage the billing options for a reservation. Let's get started. First to find the reservation

00:17

click front desk and then in-house. Enter the room number and click search. Next click the

00:24

arrow to open the I want to menu. On the I want to menu I can access actions related

00:30

to this reservation including the action to check out early, edit payment instructions,

00:35

set up routing instructions, or to go to the profile, or the reservation. In this example,

00:41

I click billing to go to the billing details for this reservation. I can click the split view

00:46

option to view window number one and window number two side by side, or I can click the arrow to open

00:52

a list and select a different billing window to view in the panel. Next to add a charge to the

00:57

reservation I click post charge. Each reservation has up to eight separate billing windows.

01:04

Now click the code magnifying glass to select a code from the list and then click select. In this

01:10

example, the billing window number two is selected and I enter one thousand dollars as the price.

01:16

I could change the quantity but in the example I leave the quantity as

01:20

---

one and then click apply charge. Now I can see on billing window number two the one thousand

01:27

dollar banquet beverage charge is applied. I click the information folio to preview,

01:33

print, download, or email an information folio for this reservation. In this example I select email

01:43

add an email address,

01:47

and then click save. Then I click process to send the folio by email. I can click the vertical

01:54

ellipsis to view more options for each billing window including edit posting, transfer posting,

02:00

or to generate an interim folio. To add another reservation in billing I click other reservation

02:06

and then click add a reservation. Now I can click search. Select the check box next to the

02:13

reservation you want to add and then click select. Now I see the reservation is added and I can

02:19

switch between the two reservations. To transfer charges between billing windows or reservations

02:24

select the check box of the charges you want to transfer and then drag and drop the posting

02:29

from one window to another window or to another reservation listed. To post a payment to a window

02:36

click post payment. Now window 1 is selected. If needed I can click any window to post another

02:41

payment. Next I enter the amount 1058.80. I can select any payment method from the list and then

02:49

click apply payment. Now I can select preview, email to print for a pdf version or to email

02:56

---

and then click process. Now I see the billing window number one is paid with a zero balance.

---

# Create an Accounts Receivable Account (Video Transcript)

00:06

In this video, you will learn how to create an accounts receivable account for a company.

00:11

Let's get started. In OPERA cloud go to financials, select accounts receivable, and

00:17

then select manage accounts receivables. You can search for an existing account or to create a new

00:22

A/R account I click the I want to menu. And then click account. Now, I can search for the company

00:29

profile or create a new company profile. In this example, I will search for a profile. I select

00:35

company from the drop-down list. Next, I'll enter the company name and any optional information,

00:41

then click search. Now, to select the profile click the row and then click select. Select

00:48

the primary account checkbox to designate this account as the primary account for the company.

00:53

Select the permanent account checkbox if this account is a permanent accounts receivables

00:58

account. Permanent A/R accounts will not be purged when the account has a zero balance.

01:03

Click the account type magnifying glass and select the account type from the list,

01:08

then click select. Enter a unique A/R account number. If you want to include

01:14

this account in batch statements, then select the check box include in batch statements.

01:20

---

Next, click the address magnifying glass. I can edit delete or create a new address for this ar  
01:26  
account. In this example, I click edit to add the name of the city and click save. Next, click the  
01:32  
address and then click Select, and then click Save. Now, I see the A/R account setup for this  
01:40  
profile. I can click the arrow to open the I want to menu, or I can click the account number to  
view  
01:46  
the details for this A/R account. Now, to confirm this A/R account saved to the profile I must  
find  
01:52  
the profile. Let's go to client relations, profiles, and then select manage profile.  
01:58  
Next, click the I want to menu to see the list of recently viewed profiles. Then click the profile  
02:04  
name. Now, on the profile, I see the number one next to the account receivables link  
indicating  
02:10  
there is one A/R account for this profile. Click the account receivables link. Now,  
02:15  
I can click manage and then the arrow to open the I want to menu. Click account to go to  
02:20  
the A/R account and view an account overview and a list of actions for this A/R account.

---

# Manage AR Accounts, Invoices, and Payments (Video Transcript)

00:06

In this video you will learn how to view and manage accounts receivable invoices

00:10

in OPERA cloud. Let's get started. First let's transfer any front office guest ledger invoices

00:18

settled with the AR direct bill payment method through to their respective AR accounts.

00:25

AR direct bill settlement is often used when a company is accepting chargebacks for specific

00:29

charges such as, meals and accommodation for an employee. Go to financials, account receivables

00:37

then select direct bill transfer. To view a list of direct bill invoices ready for transfer into

00:43

AR, Click search. Next select an invoice to view the folio, manage invoice details, or go to the

00:51

AR account. I can use this area to confirm the correct AR account is linked to the invoice and

00:56

to verify the invoice charges against any purchase order received. In this example I select the check

01:02

box next to the invoices I want to transfer into AR, and then select transfer selected invoices.

01:08

If the direct billing invoices are not manually transferred, as in this example, then you can

01:14

set up OPERA cloud to auto transfer direct bill invoices during the end of day process. Next

01:20

let's learn how to manage invoices in accounts receivable. First to find the AR account, go

01:26

to financials, select accounts receivables, then select manage accounts receivables. Click search.

---

01:36

Now click the balance to open manage account invoices for the AR account.

01:41

Select the check box next to the invoice. Now I have the option to manage the invoice details,

01:47

view the folio, edit the invoice, transfer, finalize or apply a payment to the invoice.

01:54

In this example I select apply payment to settle the invoice.

02:00

Next I select the method magnifying glass and select the payment method from the list

02:06

and then click select. You can select to apply the payment as an unallocated payment to the

02:13

AR account or to the oldest invoice. In this example, I select the option to apply the payment

02:20

to the selected invoices. Now enter the credit card number, expiration date, and the amount.

02:31

Click save payment, and then click post payments. You can select the option to

02:38

email or print a payment receipt, then select the report destination, and then click process.

02:44

Now you can see the invoice payment and the batch report successfully processed. Click close. Now

02:52

let's learn how to create an invoice. Click new. Create the invoice with the default information or

02:59

I can change the invoice name, source, or market code, in room class if needed. In this example,

03:05

I leave the default values. Enter the price, then select the transaction code magnifying glass

03:14

and select the code from the list, then click select. You can click add row to add more

03:20

---

amounts to the invoice. Then click the green check mark to post the charge. Any additional

03:25

taxes or charges are calculated and displayed. Then click create invoice. A new invoice for

03:31

100 dollars is displayed in the AR account. Next let's learn how to transfer this invoice.

03:37

Select the check box next to the invoice and click transfer. To find the AR account to

03:43

transfer the invoice to I can enter any search criteria, and then click search.

03:49

Select the destination AR account from the list of results and then scroll down and click select.

03:56

Then click transfer. Now let's go to the manage account invoices to confirm the invoice transfer

04:02

to the destination AR account. Go to financials, account receivables and then select manage account

04:10

receivables. Click search. Click the AR account balance. Now I see the invoice 9110 has been

04:19

transferred to the Acme Corporate AR account and the transferred column displays a check mark. Next

04:26

let's learn how to finalize an invoice. Once an invoice is finalized you can no

04:31

longer make adjustments to the invoice. Select the checkbox next to the invoices you want to finalize

04:38

and then click finalize invoice. Now I see finalized just below the invoice number.

04:45

Finally, let's learn how to combine and compress multiple invoices into a single invoice.

04:51

First I select multiple invoices and then click compress invoices. Now enter any information.

04:59

---

In this example I enter Thursday's invoices in the supplement field then click compress

05:06

invoices. Now the parent invoice folder icon displays next to the new parent invoice.

05:12

I can click the plus sign to expand the parent invoice and view the compressed invoice details.

---

# Using Track It (Video Transcript)

00:06

In this video, you will learn how to use Track It. In this example, I will set up a task request for

00:11

the delivery of luggage to an arriving guest's room and then action the request on the OPERA

00:16

cloud mobile application. Let's get started. To set up a Track It request in OPERA cloud

00:22

go to miscellaneous and then select Track It. Track It manages the storage and delivery of

00:28

guest baggage, parcels, vehicles, and valet parking, and lost items. Click new. Next I select baggage.

00:38

Now I can enter a ticket number. In this example, the ticket number will be the luggage tag number

00:42

on the bags that are delivered to the guest. I click the type magnifying glass and select luggage

00:48

from the list. I can now click select. I click the action magnifying glass and select deliver to room.

00:55

Then click select. To change the number of bags. I click the plus sign to increase the quantity to 2.

01:02

I click the location magnifying glass and select bell desk storeroom to specify the

01:07

current location of the luggage, then click select. Next, I enter the description, black suitcase.

01:14

To link this Track It request to the guests reservation I click the name magnifying glass.

01:21

Now I can search for the arrival reservation by entering a variety of options. In this example,

01:27

I enter the room number and click search. Next I click the reservation and click select. Now

---

01:32

I can see the reservation linked to this new Track It request just created, then click save.

01:38

To find the Track It request I just created, with the open checkbox selected, I click search.

01:44

Now I can see the Track It request I just created. I can click the vertical ellipsis to edit, delete,

01:50

or view the history of this Track It request. Now on a mobile device, I will demonstrate how to view,

01:55

assign, and close this Track It request, once the bags are delivered to the guest. Go to the OPERA

02:01

cloud mobile application and tap Track It requests. In this example, I tap baggage. From the drop-down

02:10

list. I select unassigned requests. Next I tap the Track It request from the list and then tap claim.

02:18

Now I select my requests from the drop-down list. Then, after the suitcases are delivered

02:23

to the guest I can select delivered item completed from the action drop-down list.

---

# Using OPERA Cloud Reports (Video Transcript)

00:06

In this video, you will learn how to generate reports in OPERA Cloud.

00:10

Let's get started.

00:11

Go to reports, and then select manage reports.

00:14

I can search for a report by report name or I can select a report group from the drop-down

00:19

list to view a list of reports for the report group.

00:23

The report groups available depend on the report group tasks assigned to your user's

00:27

role.

00:28

In this example, to see a list of all reports, I select all report groups and then click

00:33

search.

00:34

I can generate a report with the default parameters or I can choose to edit the report parameters

00:39

before generating the report.

00:42

In this example, I select the option to edit the report parameters to change the default

00:47

report parameters for the reservation forecast report.

00:50

Now, I can select a date range and change any of the other report parameters.

00:54

---

I can choose to select a specific rate code for this report from the drop-down list, or

00:59

as in this example, I select all rate codes.

01:02

Next, I can select the option to generate the report, I can download, email, or preview

01:08

the report.

01:09

I can download the report in any of the following formats: HTML, RTF, PDF, XML, Delimited, Delimited

01:18

Data, and Excel which can be used for BI Publisher-based reports.

01:22

Or I can email to one or more recipients by using a comma between email addresses.

01:27

In this example, I select to preview the report as a PDF, and then I can print the report

01:32

to a local or network printer.

01:34

Now, I see the reservation forecast PDF report.

01:37

I can download or print the report directly from the browser.

01:40

Let's take a look at another report.

01:42

Now, I select the AR Activity report from the reports list.

01:46

And then click the edit report parameters option.

01:48

I can change any of the AR activity report parameters.

01:52

And then I click to preview the AR Activity report.

01:54

Now, I can view the AR Activity report.

---

# Create and Manage Scheduled Reports (Video Transcript)

00:06

In this video you will learn how to create and manage a scheduled report. Using the

00:10

report scheduler you can schedule reports to automatically generate at a specific time interval

00:15

and frequency to selected destinations. Let's get started. In OPERA cloud go to reports and then

00:21

select manage reports. In this example, I select arrival from the report group drop down list

00:27

and then click search. Now I select the arrivals detailed report from the list and then click the

00:33

vertical ellipsis and select schedule report. Next I step through the process to configure the report

00:39

parameters, the time intervals, and the report destination. I can configure the schedule to

00:45

dynamically calculate the arrival date for the report. In this example, to schedule the report

00:50

to generate with tomorrow's arrivals I select the business date from the activity date range

00:55

options and then click plus one. Now I can see the validate date option displays the date range

01:00

configured for this report. In this example, the report runs today and generates for tomorrow's

01:05

date. Next, select any search criteria or options to configure what outputs on the

01:10

report. In this example, room number is selected. Next I can use the arrows to select the sort order

01:17

---

and then click next. Now I can define the report intervals including the start date and time

01:23

and how often the report repeats. To set the report schedule to run indefinitely do not select

01:28

an end date. In this example I select repeat and one day intervals and then I set the time to 12 pm.

01:36

Then click next. Now the report is scheduled to run every day at 12 pm. To define the

01:43

report destination I change the file name to arrivals report and I select a file type

01:49

from the drop-down list. In this example I select pdf, then click new. From the mode drop-down list

01:57

I can select to email, print or post the pdf to an ftp server by selecting sftp.

02:04

In this example, I select to email the report in pdf format. Then I enter the recipient's email

02:11

address and click save. Now I click manage scheduled reports to see a list of all the

02:17

scheduled reports including the scheduled report I just created. I can pause the report schedule

02:23

by turning the reported scheduled toggle off. Now I can click the vertical ellipsis to edit, delete,

02:29

or view the report destinations, or I can choose to run the report right now. Then click ok to confirm.

---

# Importing Data to OPERA Cloud (Video Transcript)

00:06

In this video, I will demonstrate importing data to a fully configured OPERA Cloud property.

00:14

The files imported must match the current OPERA Cloud property configuration and you

00:18

can not change the data using the import process.

00:22

You can use the import data option to import the following data types: Guest and Contact

00:27

Profiles, Sales Accounts, Sales Activities, Account and Contact relationships, future

00:35

reservations, catering events, Blocks including the Room/Rate Grid for current and future blocks.

00:40

Now, let's take a look at how to import data into OPERA Cloud.

00:44

Click the hamburger menu, and then select Toolbox.

00:50

Select System Setup, and then click Import Data.

00:54

Click Download Templates, and then click ok to download and save the templates.zip file.

01:00

The zip file contains CSV templates for each data type and a readme file with prerequisites,

01:01

requirements, and instructions on how to import the files.

01:02

Open the ZIP file and extract the files.

01:04

Now, I can see CSV template files for each data type and the readme.txt file.

01:10

---

Next, I can click on and open the readme.txt to review the file names, requirements, prerequisites,

01:18

the mandatory columns for each CSV file, and the instructions for importing the files.

01:25

For example, each data file created must not exceed the maximum file size of 10MB and you

01:31

can upload and import multiple files per data type.

01:35

Now, let's go back to OPERA Cloud to continue the data import process.

01:41

The property I am logged into displays or I can click the magnifying glass to select

01:46

another property.

01:48

And then click import data.

01:51

Now, click add data types to import.

01:54

Next, enter the number of files to upload for each data type.

01:59

In this example, I enter 1 account, 1 profile, 1 relationship, and 3 reservation data type

02:06

files.

02:07

And then click add.

02:09

This process adds 6 rows, one for each file.

02:12

Next, I click select/upload file to upload the accounts file.

02:17

Now, I navigate to the file and then click open to select the file.

02:21

And then click ok.

---

02:24

Now, I can see the file uploaded successfully,

02:29

After the first file uploads, I can click the save and close option, and then anyone

02:34

assigned with the import data task can continue and complete the import process within the

02:39

next 14 days.

02:42

I can remove unused rows by clicking the vertical ellipsis and then selecting remove unused row.

02:48

Next, I click select/upload file and browse for the rest of the CSV files for each data

02:54

type and then click ok.

02:58

Once all the files are uploaded successfully, click validate data.

03:03

If any errors are generated I can click on the link to view the details or I can click

03:08

the vertical ellipsis to download the error log file.

03:11

Next, I save the file and click ok.

03:15

The CSV error file contains a unique identifier and the error message description.

03:22

Now, I can fix the error and re-upload the corrected file.

03:29

First, remove the existing file with the error by clicking the vertical ellipsis and then

03:34

select remove uploaded file.

03:39

Click ok.

03:41

---

Once the file is removed, I can re-upload the file with the corrections.

03:53

Click on validate data again.

03:55

Now, I can see all the files are successfully validated.

03:59

And then click on import validated data.

04:05

And then click on import data into opera.

04:08

This imports the data to opera cloud.

04:12

I can see the import is successful.

04:15

You can view the import log for 14 days.

04:18

including the file name, import status, the date and the user name.

04:23

Now, I click on close import.

04:32

Click ok to continue.

04:34

Now, let's take a look at the import logs in the changes log for opera cloud.

04:41

Click on the main hamburger menu, and then click Opera cloud to go back to the application.

04:47

Go to Miscellaneous, and then click changes log.

04:50

Next, from the group drop-down list select Miscellaneous.

04:55

And then from the action type drop-down menu select import data.

05:00

I can change the dates if needed, and then click search.

05:04

---

Now, I can see the list of actions for my user including the date, time, action type,  
05:10  
and description.

# Configure and View Sell Messages (Video Transcript)

00:06

In this video, you will learn how to configure and view sell messages.

00:10

An Administrator can configure sell messages to display on specific screens, and for specific

00:16

dates, ensuring the sell messages are relevant to the agent's workflow for a specific time

00:21

frame.

00:22

Let's get started.

00:23

First, to configure the sell messages click the hamburger menu and go to Administration.

00:30

Click Bookings, Marketing management, and then select sell messages.

00:40

Now, I see the list of sell messages for the property and the date range.

00:45

Let's click new to add a new sell message.

00:48

Enter the new sell message text, now.

00:51

I can specify to setup the sell message globally for all properties, for a hub, or for a specific

00:58

property by selecting the respective option.

01:02

I can specify a begin and end date for the message to display for a specific date range.

01:07

Next, I can select a language for this sell message, ensuring the appropriate sell message

01:11

displays based on a user's native language.

---

01:15

And then I click the display sell messages magnifying glass to select one or more areas

01:20

of the application to display this new sell message.

01:25

The options available in this list depends on the Cloud Services active at the property.

01:30

In the example, I select the checkbox for the Group Rooms Control screen and then click

01:37

select.

01:38

Click save.

01:40

Now, I can see the Sell Message I just created for the Group Rooms Control screen.

01:51

I can click the vertical ellipsis to edit or delete each sell message.

01:56

Now, let's take a look at how the sell message displays in OPERA Cloud.

02:01

Go to bookings, blocks, and then select group rooms control.

02:06

I enter date and then click Search.

02:10

Now, I can see the sell message I recently added displaying here.

02:15

I can click the sell messages link to display or hide all the sell messages on this screen.

# Using the OPERA Cloud Digital Assistant (Video Transcript)

00:05

In this video, you will learn how to use the OPERA Cloud Digital Assistant.

00:09

The OPERA Cloud Digital Assistant is a chatbot that helps you accomplish a variety of tasks

00:15

using natural language conversations. You can interact with the Digital Assistant

00:20

by using the keyboard or by speaking through the microphone of the device.

00:25

The digital assistant is available for the OPERA Cloud desktop and mobile applications.

00:30

Updates made using the digital assistant are tracked in the

00:34

Changes Log with your user name. At this time, the digital assistant

00:38

is only available in English and only for one specific property at a time.

00:42

Let's get started. In the lower right,

00:45

click or tap the conversation icon to open the OPERA Cloud Digital Assistant.

00:50

To clear the content of the previous chat, click the conversation icon with an X on the

00:55

top navigation bar of the Digital Assistant. To interact with the digital assistant I can click

01:01

the microphone icon and speak through the device microphone to initiate the conversation.

01:07

Or I can type to initiate the conversation. To turn on the digital assistant's audio reply,

01:13

I can click the speaker icon and the chatbot responses will be read out loud.

---

01:18

I can click the speaker icon again to mute the audio responses.

01:22

In this example, I will use the keyboard to type the conversation.

01:27

I enter "Hi" and then click the arrow. Now, I see a list of options.

01:33

I click the arrows to scroll through the available options.

01:37

Now, I can check the following options: tonight's Maximum occupancy, the expected arrivals for

01:44

today, or the expected departures for today. Next, I can check a room status or update the

01:50

status for a room from clean to dirty. Or I can check in or check out a reservation.

01:57

Now, let's take a look at the house status statistics.

02:01

In this example, I type arrivals. Now, I see the options to view

02:06

tonight's maximum occupancy, today's expected arrivals or departures.

02:13

In this example, I tap expected arrivals today.

02:18

Now, I see the expected arrivals for today including the property name,

02:22

date, expected number of people and the number of expected rooms for today's

02:27

arrival reservations. I enter arrivals again,

02:31

and then click tomorrow. Now, I see the expected arrivals for tomorrow.

02:37

Let's check in a reservation. Type check in.

02:41

---

Next, I select the confirmation number option.

02:44

I enter the confirmation number and then click the arrow.

02:49

The reservation details display, and then I click check in.

02:54

Next, a successful reservation check in message displays for

02:57

room 13. Next,

03:00

I enter "Hi" for a list of available options. I click the arrows to scroll through the options,

03:07

and then click Check Room Status. And then I enter a room.

03:12

Now, I can see the room is dirty and I have the option to update the housekeeping room status

03:17

or to check another room status. I click update room status

03:22

and then click clean.

03:24

Now, I see Room 13 is updated and is now clean.

---

# View Room Availability for Blocks Using Group Rooms Control (Video Transcript)

00:06

In this video, you will learn how to create a block and allocate rooms on

00:10

the room and rate grid. Let's get started.

00:14

First, I will create a new block. In Opera Cloud go to Bookings, select Blocks,

00:20

and then select Manage Block. I click create block.

00:25

I click the property magnifying glass and select a property from the list.

00:27

Next, I click the account magnifying glass. To link a company, I enter the company name,

00:34

and then click search. Now, I see a list of company accounts on the left,

00:39

once I select an account any linked contacts display on the right.

00:43

Or I can click the I want to menu to create a new company profile.

00:48

In this example, I select a company account and then scroll down to select the account only.

00:58

I update the default block name to company conference.

01:03

Next, I complete the required fields. I click the market magnifying glass,

01:08

to select the market from the list and then click select.

01:12

Next, click the source magnifying glass and select the source from the list

01:19

and then click select.

---

01:22

Now, click the reservation type magnifying glass, select the reservation type from the list

01:27

and then click select. I can scroll down to complete any additional

01:32

room details or catering details for the block. In this example, the rate code is mandatory.

01:39

I click the rate code magnifying glass to select a rate code from the list and then click select.

01:47

Next, I click Yes, to automatically update the

01:51

market and source code for the selected rate code.

01:55

This property has the OPERA Cloud Sales and Event Management Premium Cloud Service active,

02:00

so now I have the option to quickly setup the block room allocation by selecting a room pool,

02:05

entering the number of rooms to allocate, and I can also enter a rate amount or define the

02:10

cut off date or days. For the catering details,

02:13

I must enter the number of event attendees. Next, I click save and go to room grid to

02:18

manage the room allocation for this block. Now, I see the house availability per room type

02:23

for the block dates and I also see there are zero rooms allocated to the block right now.

02:28

If I click to expand the rates, I can see the pricing for 1-4 adults room occupancy display

02:33

because I previously selected the rate code when creating this block.

02:38

Now, to allocate rooms to this block, I click the actions menu,

02:42

---

and then click Load Room Grid. I can specify the date range,

02:44

or the days of the week, and the number of rooms per room type for the block.

02:46

On the room grid options, I can specify the days of the week,

02:49

the cut off date or the number of cut off days to release the rooms back to the inventory.

02:54

Entering a cut off date means rooms not picked up with reservations by this date

02:58

are returned to the house availability. Or I can enter a number of cutoff days,

03:03

and instead of assigning one cut off date to release all available rooms for the block,

03:07

defining the number of days for the Cutoff Days releases the rooms one night at a time.

03:12

The cutoff days field is only available if the Cutoff Date field is empty.

03:17

To add 5 standard rooms to the block, I select the checkbox for the standard room type

03:21

and then add 5 to the number of rooms. And then click save and continue.

03:26

Next, I select the deluxe room type and add 5 to the number of rooms,

03:30

and click save and continue. And finally, I select the checkbox

03:34

for the translation6 room type and then add 10 to the number of rooms.

03:38

And click save. Now, I can see these

03:41

rooms are allocated to the block. Let's take a look at how to add more

03:44

rooms to the block. Go to the action menu,

03:47

---

and click the load room grid option. Now, I can select the checkbox next to

03:51

room type, I want to update. Next, I must select the checkbox to

03:55

increase / decrease the number of rooms, and then add the number of rooms.

03:58

If I want to decrease the number of rooms I would enter a negative number.

04:02

In this example, I add 2 standard rooms and then click save.

04:06

Now, I can see the standard room type increased by 2 rooms, from 5 to 7 rooms.

04:12

I can also find the room and rate grid directly from the block.

04:15

Next, I click the block name to go to the block.

04:19

On the block, I can edit the details or I can go to the

04:23

I want to menu to find actions related to this block.

04:27

In this example, I click the option to go to the room and rate grid.

04:33

To view or update the room allocation click manage.

04:38

Now, click actions and then load room grid to make

04:41

any more changes to the room allocation for this block.

---

# Create a Sales Account Profile (Video Transcript)

00:06

In this video, you will learn how to create a sales account profile.

00:10

A sales account refers to a company, travel agent, or any booking source and is used to

00:16

track statistics for the business. Let's get started.

00:20

In OPERA Cloud go to Client Relations, Profiles, and then select Manage Profile.

00:26

Next, I click the I want to menu, and then click to create a travel agent profile.

00:33

Enter the travel agent name, and any other optional information.

00:39

Click the magnifying glass to select a communication type from the list.

00:43

In this example, I select business phone number and then click select.

00:48

Now, I enter the phone number and the email address.

00:54

Then, I enter the address details. Now, I can select one of the following options;

01:00

to save the profile and add more details, to save and create linked profile, or save.

01:06

In this example, I click save profile and add more details.

01:11

Now, on the travel agent profile I can access any of the detail links to add or edit the details.

01:22

With an OPERA Cloud Sales and Event Management subscription,

01:26

Sales information can be added to Company, Travel Agent, Source, or Contact profiles.

---

01:32

Click the Sales Information link and then click edit to enter the details.

01:37

Now, select the magnifying glass next to each option to select the relevant

01:41

details for this sales account profile. You can select any of the following options:

01:47

territory, priority, business potential, account type, business segments, industry,

01:54

account source, mail action, competition, scope, or the scope city.

02:01

You can use these fields as filters and view the data in

02:04

sales reports to analyze and assist in the sales decision-making.

02:08

And click Save. Click close.

02:12

Let's take a look at negotiated rates. Any profile type can have negotiated rates,

02:18

however negotiated rates are typically associated with companies,

02:22

travel agents, or booking sources with an ongoing relationship or agreement with the property.

02:30

When an agent creates a reservation using the Look to Book Sales screen,

02:34

any negotiated rates associated with the linked profiles display to ensure

02:38

the contracted rate is quoted to the customer. If OPERA Cloud is configured for multiple

02:44

properties, then you can select negotiated rates at one property and distribute

02:49

the rates to the other properties. I can search for rate codes associated

02:52

---

with a property or as in this example, I can assign a negotiated rate code to the profile.

02:59

Click New, and then click the rate code magnifying glass to select a rate code from the list

03:10

and then click select. I can change the start or end dates,

03:14

or change the sequence order for the rate code to display and then click Save.

03:19

Now, let's take a look at Financials for this sales account.

03:23

Click the Financials link.

03:28

Click the vertical ellipse and then click edit.

03:31

Now, I can setup default charge routing instructions for this sales account.

03:35

Routing instructions automatically transfer charges to a billing window

03:38

for the associated profile. A typical scenario for this option

03:42

is to select the routing codes that will automatically transfer the accommodation

03:46

charge to a separate billing window. I search for the available routing

03:50

or charge codes on the left and then select by clicking the right arrow.

03:55

Next, select a payment method from the drop-down list, and update any additional information.

04:02

Select the Auto Populate Routing check box if you want to automatically apply

04:06

these routing instructions to all new reservations linked to

04:09

this this profile . And then click Save.

---

04:13

Now the default routing instructions are saved to this sales account profile.

04:21

Click close.

04:22

Now, let's take a look at how to add notes to the sales account profile.

04:28

Click the Notes link. Click New.

04:30

Change any of the information and then add the note text in the comment field and click save.

04:37

The note displays, select the vertical ellipse to edit or delete the note.

04:43

To see more actions related to this profile, click the I want to menu.

04:47

Now, I can create a new activity, reservation, or block for this profile.

---

# Setup a Sales Account Forecast (Video Transcript)

00:04

In this video, you will learn how to set up a sales account forecast details.

00:08

This tracks the expected room nights, room revenue,

00:12

food and beverage revenue, and any other revenue.

00:16

Let's get started.

00:17

First, you must find the sales account.

00:20

In OPERA Cloud, go to client relations, profiles, and then select Manage profile.

00:28

Enter the search criteria to find the account profile.

00:31

Sales accounts are typically company or travel agent profiles.

00:35

In this example, to search for a profile I select travel agent from the drop-down list,

00:40

enter a name, and then click search.

00:43

Next to the Sales Account Profile name I want to create a sales forecast for,

00:47

I click the arrow to open the I want to menu and then click Forecast.

00:53

In this example, click New to enter new sales forecast for this travel agent account profile.

01:01

Click the magnifying glass to select the from and to

01:03

dates to define the time period for the forecast.

---

01:07

The forecast time period can represent calendar months or fiscal time periods,

01:11

and is based on the Forecast Reporting Period Control setting in OPERA Cloud Administration.

01:17

Enter the potential number of room nights to include in this sales forecast time period.

01:23

Enter the potential average rate.

01:26

Now, based on the time period and the average rate,

01:29

the room revenue is automatically calculated.

01:32

I can make adjustments to the room revenue amount.

01:36

And then I have the option to enter the potential Food and Beverage revenue

01:40

and any other expected revenue for this forecast time period.

01:44

Now, I can select save or I can click to save add more, meaning I can save this sales forecast

01:52

and then create another sales forecast for another time period.

02:21

In this example, I create another sale forecast and then click save.

02:26

Now, I see the sales forecast details I just created.

02:30

The first sales forecast detail I just created was for the time period August 2022 until April 2022.

02:38

Next, the second sales forecast detail I created was for February through March 2022.

02:45

If you want to delete all the forecast details, select the checkbox at the

---

02:49

top of the list to select all entries, then click the vertical ellipse and click delete.

02:55

To edit or delete any of the forecast details individually,

02:58

click the checkbox and then click the vertical ellipse next to each forecast detail.

03:03

In this example, I click edit and now I can update any of the details, and then click save.

03:12

Now, I see the forecast link appear for this profile,

03:15

indicating there are forecast details available.

# Enrolling Guests in Loyalty Programs (Video Transcript)

0:05

In this video, you will learn how to enroll a guest in a membership program in OPERA Cloud.

0:11

A membership program is typically a gaming or loyalty program that's configured using

0:16

an API to integrate OPERA Cloud with an external membership system.

0:21

In this example, I will follow the steps to create a new profile and then enroll that profile.

0:27

Let's get started.

0:28

In OPERA Cloud go to client relations, select manage profiles, and then select profile.

0:37

Click the I want to menu... and then click enroll guest.

0:41

This option creates a new profile and then enrolls the guest.

0:45

Alternatively, if you want to enroll an existing profile.

0:49

You can find the existing profile and then click the I want to menu.

0:54

Now, I select the enrollment type from the drop-down list.

0:58

In this example, I select Loyalty from the list.

1:02

I enter the guest's name, and then scroll down and select the type magnifying glass.

1:10

Select a communication type from the list,

1:13

and then click select. Enter the communication value,

---

1:17

in this example I enter business phone number and then an email address.

1:24

Next, I enter the guest's address. Click the Address Type magnifying glass, select

1:30

business address, and then click select. Enter the address details,

1:37

and then click enroll to add more details. Now, I see the profile was successfully

1:42

created. And I see the

1:44

next to the membership link displays a number 1, indicating the enrollment was successful.

1:49

Now, I can click the membership link to edit, delete or view more details.

# Using Profile Lookup from an External System (Video Transcript)

0:06

In this video, you will learn how to lookup a profile in an external system

0:10

and then download the profile to OPERA Cloud. You can use this option when another system

0:15

manages the profile data and integrates with OPERA Cloud.

0:19

Let's get started. To lookup a profile go to Client Relations,

0:24

Profiles, and then select Manage Profile. Next enter the guest's name, select the

0:32

external system from the Lookup Profile drop-down list, and then click search.

0:39

Now, I see the tabs at the top of the search results, each tab represents an integrated

0:44

external system. Click the tab to view

0:47

the profiles from the external system. The number of profiles returned from the external

0:52

system displays as a number on the tab. In this example, on the last tab I see the

0:58

number one next to the external system name. Scroll to the right to view more details.

1:04

In this example, I click the vertical ellipse and then select the option to download the profile.

1:16

Downloading the profile adds the profile to OPERA Cloud.

1:21

Now, I see the profile in OPERA Cloud.

---

# Create a Reservation (Video Transcript)

0:05

In this video, you will learn how to create a reservation in OPERA Cloud.

0:11

Let's get started.

0:13

Go to Bookings, Reservations, and then select the Look to Book Sales Screen.

0:20

If configured, you may be prompted to enter any information about the person who called

0:24

to make the reservation.

0:27

In this example, I enter the caller's name and phone number.

0:31

And then click New Reservation.

0:34

You can review and close any sell messages.

0:38

Sell messages typically mention special promotions to offer the guest or events near the property.

0:44

Now, I select the arrival date, the number of nights, number of rooms, adults, and children

0:51

for this reservation.

0:53

I can search for or create a guest profile now, or later in this process.

0:59

In this example, I click search to view the room type and rate availability.

1:05

Now, I see the best available rates, including the number of available rooms for each room

1:10

type.

---

1:12

I click the property name to view the Property Brochure and find out more about the amenities,

1:18

transportation, and local attractions for this property.

1:24

If the reservation is for more than one night, then I can toggle between viewing the nightly

1:28

rate, the average rate, or the total cost of the stay for each room type and rate.

1:36

Click the price tabs to view the details about each room type and rate.

1:40

I can click the room image to view more photos for this room type.

1:45

I click view policies to see the rate's deposit and cancellation policy for each reservation

1:50

type.

1:52

I click Show Estimated Amount to view the estimated amounts for each reservation type.

1:58

Next, I click the X to close the details for this room type and rate.

2:03

Now, I click "initial display set" to view more available rooms and rates.

2:11

Or click next rates to view the next best available rate, and continue to browse rates.

2:21

Click the plus sign to expand and view the room details for the rate.

2:26

To book the reservation for this room type, click select.

2:33

On the left, I see the reservation Stay Information displays including a summary of the deposit

2:38

or cancellation policy.

2:40

Next, I click the magnifying glass to search for an existing guest profile.

---

2:46

Alternatively, I could click the link to create a new profile.

2:51

Now, I enter the guest's last name and then click search.

2:58

If there are external solutions integrated with OPERA Cloud, then I see the solution

3:02

appear as a tab, that I can click to view and download the profiles available from that

3:06

external solution.

3:08

In this example, I select the profile from the list and then scroll down to click select.

3:15

The room type and rate amount are pre-populated based on the what I selected on the Look to

3:19

Book screen.

3:21

Next, I enter the a market code and source code for statistical tracking.

3:27

In some cases, the market and source code fields are automatically populated based on

3:32

the rate code.

3:33

Now, I click the packages magnifying glass to add a packages or items.

3:40

In this example, I add an 18 hole golf package.

3:45

I can add more packages by changing the number or I can change the date for the package.

3:51

In this example, I enter 4.

3:55

And then click continue booking.

3:59

Next, I click the items magnifying glass.

---

4:05

If an item is available to add to the reservation, then the number of items is highlighted in

4:09

the date column.

4:11

I click the green check mark to confirm, and then click continue booking.

4:16

In this example, I click to add an extra bed to the reservation, on Monday June 20th.

4:22

Now, I see the packages and items I added included in the Reservation Stay information.

4:29

If needed, I click more to go to the membership details or to go to the charge routing instructions

4:34

for this reservation.

4:36

To set up a share reservation, I can click add a sharing guest.

4:41

I can click show more to add special requests, or to add the guest's smoking preference.

4:47

Next, I scroll down to enter the payment information.

4:51

Select the payment method from the drop-down list, and then click book now.

4:57

if configured, you may see a closing script to read to the caller confirming the reservation

5:01

details.

5:04

Click confirm.

5:05

Now, I see the confirmation number for the new reservation I just created.

5:11

I can scroll down to view any information or actions for this reservation.

---

# Posting Charges to an Event (Video Transcript)

0:06

In this video, you will learn how to post charges to an event for a block.

0:10

In OPERA Cloud go to Bookings, Events, and then select Event Posting.

0:16

Now, I can click modify the search criteria, to enter the block id, the block name, or

0:23

the event id to search for events.

0:25

To view the events for this morning, I could enter a time, for example, if I enter 8am

0:30

I would see all the events after 8am.

0:34

In this example, I enter the block id to view all the events for the block, and then click

0:39

search.

0:41

The event search criteria displays at the top of the page.

0:46

To post event charges, the events must have a posting master checked in, and the events

0:51

must be in the actual status.

0:54

I can select the transaction code magnifying glass to change the transaction code for the

0:59

revenue charge.

1:01

The available transaction codes depend on the property's configuration.

1:05

The system administrator configures for revenue type mapping to determine which transaction

---

1:10

codes are available based on the event type, space, catering value, or the revenue type.

1:16

Next, I select the checkbox at the top of the list to select all of the revenue charges.

1:23

And then click post, to post the charges to the event.

1:28

Now, enter your cashiering id and pin, which is required to post charges to an event.

1:35

And then click login.

1:38

Now, I see the charges display in a green color, this indicates the charges are now

1:44

posted to the event.

1:46

Now, let's take a look at how to create a banquet check for the event.

1:50

I select the check box next to the revenue amount and then, click the I Want to menu.

1:57

Click banquet check, to create the Banquet check for this block.

2:00

Now, if multiple accounts or contacts linked to the block, I can click either the bank

2:05

account or the point of contact magnifying glass to select the relevant accounts that

2:10

will print on the banquet check.

2:18

I can select the checkbox, to break the page per day, include the PMS posting, or I can

2:25

select to display the discount on the banquet check.

2:30

I can also select the printing method, to display the revenue summary, or I can specify

2:35

the currency that prints on the banquet check.

---

2:38

Next, I can select to preview, email or to download the banquet check.

2:44

In this example, I select preview.

2:48

And then click process.

2:50

Now, I see the banquet check I just created for this block.

2:56

Click close to go back to the application.

3:09

If the guest has a question about what's posted to their posting master account for the event,

3:14

I can go to billing to see exactly what's posted to the guest folio.

3:17

Let's take a look at how to review the guest's billing charges.

3:18

In this example, I will go to the next event by clicking the event id.

3:19

Then click the I want to menu, and click billing.

3:22

Now, enter your cashiering id and PIN, and click Login.

3:28

In billing, I can view the guest's charges on the folio.

# Change the Priority of Queue Reservation (Video Transcript)

00:00

[Music]

00:04

In this video, you will learn how to prioritize reservations in the queue.

0:09

In this example, I click the queue reservations dashboard tile.

0:14

Now, I see the list of reservations in the queue.

0:18

Click the queue priority number to see the queue details.

0:22

Click the plus or minus to change the priority number for this reservation in the queue.

0:28

Click the vertical ellipse to remove the reservation from the queue, check in the

0:32

reservation, assign a room, or send a text to notify housekeeping to get this room ready.

0:40

If configured, I can send a text to a guest to let them know their room is ready.

0:45

Or I can click prioritize to move this reservation to the top of the queue.

0:50

Now, I see the reservation is prioritized at the top of the list, click OK.

0:56

Click the confirmation number to go to the reservation.

0:59

Now, I can see this reservation is queue priority #1 on the wait-list.

1:05

To change the sort order of the reservations in the queue

1:08

select different options from the drop-down list.

---

1:11

Let's take a look at how to prioritize the guest who waited the longest time to be next

1:16

in the queue and receive the next available room.

1:20

In this example, I can select queue wait time descending,

1:24

Click the queue priority number at the top of the list and with the longest queue wait time.

1:32

And then click prioritize to move this reservation to the top of the list.

1:50

To update the queue wait times for each reservation,

1:53

I can click search to refresh the list.

# Managing Opportunities (Video Transcript)

00:00

[Music]

Transcript

0:06

In this video, you will learn how to Manage Opportunities to track and manage all prospective

0:10

business inquiries.

0:12

Opportunities provide the ability to quickly capture and manage perspective business inquiries

0:16

from existing and new customers.

0:19

Let's get started.

0:20

In OPERA Cloud, go to Bookings, blocks, and then select Manage Block.

0:27

Click the I Want To ... menu then select Create Opportunity.

0:33

In the Block Definition panel, enter a property, start date, end date, Block Name, Block Code,

0:41

Reservation Type and any additional information.

0:45

In the Room Details panel, I can select a Rate Code from the Rate code magnifying glass

0:49

and then click select.

0:51

I can select a Room type from the Room type magnifying glass and then click select.

0:56

Next, click save to save the details for the Opportunity.

1:00

Or I can click Save and Manage Block to open Block Presentation.

---

1:04

In the Block Overview panel, I can click Edit to add more details to the Opportunity.

1:10

Then click Save.

1:11

I can also click Save and Go To Room Grid to open the Room & Rate Grid.

1:16

In the Room and Rate Grid screen, I can click Edit to allocate rooms and rates for the opportunity.

1:22

And then click Save.

1:24

To Update Opportunities, go to Bookings, blocks, and then select Manage Block.

1:30

In the Manage Block screen, I select the Manage Opportunities check box and then enter any

1:35

additional search criteria

1:37

Then click Search.

1:39

I select the opportunity block in the search result.

1:42

To update the Opportunity I click the I Want to.. menu and then select Block.

1:47

I can update the details by clicking the Edit option and then click Save.

1:53

To convert an opportunity to a confirmed block, select Bookings, Blocks, and then select Manage

1:59

Block.

2:00

I select the Manage Opportunities check box and then enter additional search criteria

2:05

Then click Search

2:07

---

I select the opportunity block in the search result, then click the I Want to.. menu and

2:12

select Convert Opportunity To Block.

2:15

Now, I can see the Block status updated.

2:19

To update the status of an opportunity to lost, in the Manage Block screen, I click

2:23

the I Want to.. menu and select Release Opportunity.

2:28

In the Cancellation Details panel, I can select a cancellation reason from the Block Cancel

2:33

Reasons magnifying glass.

2:35

I can enter a destination and a property name if the opportunity is booked elsewhere.

2:40

To cancel any pseudo room reservations created for the block, I can select the Cancel PM

2:44

Reservations checkbox and select a PM Cancel reason and then click Select.

2:50

The cancellation number is recorded in the Viewing Changes Log Details.

2:54

then click Save.

2:55

Now, I can see the Opportunity status updated to a Lost status.

---

# Swapping or Shifting Assigned Rooms (Video Transcript)

In this video, you will learn how to swap or shift the assigned rooms between two reservations

0:05

with matching arrival dates and room types.

0:07

If one of the rooms is marked Do Not Move or the rooms are not available for the entire

0:12

stay date range of the other reservations,

0:15

then swapping/shifting is not allowed.

0:17

Rooms can only be swapped or shifted before check-in.

0:20

Let's get started!

0:22

To swap assigned rooms, in the OPERA cloud menu, select Front Desk,

0:27

Front Desk Workspace, and then Room Assignment.

0:31

When using the room assignment window to Swap, Shift, or use the Swap/Shift button, you must

0:36

click the modify search criteria link,

0:38

and leave the Room Assignment filter empty.

0:41

Or in the OPERA Cloud menu, select Front Desk, then select, Arrivals.

0:48

Click Search.

0:49

In the search results, I can select any two reservations of the same type.

---

0:53

Next, click Swap Rooms.

0:55

Then confirm, and click OK.

0:58

The rooms have swapped.

0:59

To shift the assigned room to another reservation, Select Front Desk, Front Desk Workspace, and

1:06

then Room Assignment,

1:07

or select Front Desk, and then Arrivals.

1:11

Click Search.

1:13

In the search results, Select a reservation with a room assigned, then select one reservation

1:18

without an assigned room.

1:21

Click the Shift Rooms.

1:23

Then confirm, then click OK.

1:27

The rooms have shifted.

1:29

To ensure which reservations you can swap or shift, you can access the Swap/Shift Rooms

1:34

screen.

1:35

To use the Swap/Shift Rooms screen, Select Front Desk, Front Desk Workspace, and then

1:41

Room Assignment, or select Front Desk,

1:45

---

and then Arrivals.

1:46

Click Search.

1:48

Select a single reservation either assigned or unassigned based on your choice to swap

1:52

or shift.

1:53

Next, click Swap/Shift Rooms.

1:56

Enter the search criteria on the Swap/Shift Rooms page and click Search.

2:01

The Swap/Shift Rooms screen displays the Profile and Reservation details of the source reservation.

2:06

In this example Click Swap Rooms, based on the criteria that was previously entered.

2:11

The confirmation window appears.

2:13

click OK.

2:14

The rooms have swapped.

2:16

The Swap/Shift Rooms link is also available from the Assign Room or Room Details screen.

2:22

Select Front Desk, Front Desk Workspace, and then select Room Assignment.

2:27

Or select Front Desk, then select Arrivals.

2:30

Click Search.

2:32

Then locate the reservation in the search results and click the Assign Room link.

2:36

Or, locate the reservation in the search results, click the I Want To icon and then click, Assign

---

2:43

Room.

2:45

The Assign Room window appears and you are able to click the Swap/Shift rooms link to

2:49

start the process.

---

# Create Block Reservations Using the Rooming List (Video Transcript)

In this video, you will learn how to create multiple reservations for a block

0:10

using the Rooming List options. Let's get started.

0:14

To add the reservations, first, you must find the block,

0:17

in the open for pickup status. Go to Bookings, select Blocks,

0:23

and then select manage blocks. Next, click search.

0:28

Now, I can see the blocks open for pick up in the status column.

0:31

Next to the block, click the I want to menu and then click Rooming List.

0:37

There are two ways to add a list of reservations to a block.

0:40

On the Rooming list screen, you can manually enter the reservations using the Add rows option

0:46

or you can import a Rooming List file with a complete list of reservations.

0:51

The reservations created or imported using the rooming list option will use the block's

0:56

posting master reservation as a template. Now, I can click the Change Template option

1:02

to select a different posting master reservation template

1:06

for the reservations created or imported. To create reservations for this block, I click add

1:12

rows to add a row for each new reservation. Now, I can enter the name for this reservation

---

1:17

and scroll to the right to add any other reservation details.

1:22

The payment method is required for each reservation.

1:29

In this example, I click add payment information.

1:33

Next, I select a payment method from the drop-down list.

1:38

And then click ok. Scroll left and right to

1:41

enter the required fields including the check in, check out date and any additional details.

1:48

Click save. Now, the new reservation displays the

1:52

confirmation number in the first column. Let's look at how to import reservations

1:57

using a rooming list file. Here is an example rooming list .xls file.

2:03

You can use a .csv , .xls or .xlsx file. The following columns are required in the rooming

2:13

list file the line number, the first name, last name, and the check in and check out dates.

2:20

You can update or add to the reservation details after the reservations are imported.

2:26

To import a list of reservations, click import rooming list.

2:31

Select Choose file, navigate to the rooming list file on your computer, and then click Open.

2:37

Click Import file. To map the data in the file

2:41

to OPERA Cloud, select the column names from corresponding drop-down lists.

2:47

In this example, I select the guest first and last name, the arrival and departure dates,

---

2:53

the line number, the room type, and the number of adults because these are the columns in

2:58

the RoomingList.xls file. Next, click Add Reservations.

3:03

Now, I see the list of reservations I just imported.

3:07

I can make any changes to these new reservations.

3:10

And then click Save. In this example,

3:13

I must borrow rooms from the house inventory.

3:16

And then click borrow. Now, I see the new reservations

3:21

for the block are imported with new confirmation numbers to OPERA Cloud.

# Obtaining the Host Key for SFTP Configuration (Video Transcript)

0:00

In this video, you will learn how to obtain a host key to configure the SFTP server.

0:06

Ensuring that the SFTP server is validated is essential for the SFTP protocol.

0:11

Validating the server is required,

0:13

and the key is designed to protect against man-in-the-middle attacks where the hacker

0:17

intercepts,

0:18

and relays an impersonated message to the other party.

0:21

ssh-keyscan is a utility for gathering the public ssh host keys of the SFTP host.

0:27

Follow these instructions to obtain the host's public key information.

0:30

Verify the workstation or server from which you execute the following commands, can access

0:35

the SFTP server.

0:37

Open the command prompt or terminal, and complete the following actions:

0:41

On Microsoft Windows, open the "Command Prompt" (or cmd).

0:45

On an Apple macOS, open the "Terminal."

0:48

For this demonstration we will use Microsoft Windows.

0:51

I enter ssh-keyscan in the command prompt.

---

0:55

Replace with the fully qualified domain name of the SFTP server.

1:00

When using a non-standard port (other than port 22), I enter `ssh-keyscan -p .`

1:09

Replace with the port the SFTP server is listening to, and replace with

1:15

the fully qualified

1:16

domain name of the SFTP server.

1:18

You can generate the host key with IP address of the SFTP Server.

1:22

An example would be, `ssh-keyscan server1.example.com`.

1:28

The above command should return text following this format:

1:31

.

1:36

For example I enter `ssh-keyscan server1.example.com` from my command prompt on Windows, or Terminal

1:45

on Mac OS.

1:46

After running this command it will return the following value shown on the screen:

1:50

After examining the return value, copy and paste this return value into the SFTP configuration.

1:57

In a second example, I use the command `C:\Users\ssh-keyscan server2.example.com`

2:09

After running this command it will return the following value shown on the screen:

2:13

Copy and paste this return value into the SFTP configuration.

2:17

---

To copy and paste the value,

2:19

From the Toolbox menu, select System Setup, and then SFTP Configuration.

2:24

Click New, and on the Manage SFTP Configuration screen, paste the value in the Host Key box.

2:32

Ensure that the text you copy does not include the command, extra blank lines, or whitespaces.

---

# Configuring a Service Locator (Video Transcript)

In this video, you will learn how to configure a Service Locator.

0:04

Service Locator is a routing integration pattern available in OPERA Cloud to route the respective

0:09

API request

0:10

from OPERA Cloud to the configured Outbound System or OPERA internal services,

0:15

based on the service locator configurations defined for the operation.

0:20

Service Locator requires Outbound System configuration for the Service Locator Generic type to be

0:25

completed first.

0:26

You can configure the Service Locator at the Global (chain), Hub, and Property levels.

0:32

To configure the service locator,

0:34

From the Toolbox menu, select System Setup, and then select Service Locator.

0:40

Now, select the context: Global (Chain), Hub, or Property, select a Module, enter any additional

0:48

search criteria, then click Search.

0:51

Click Edit to update the details for each operation.

0:55

Select an outbound code from the list to route the request to the outbound system.

0:59

---

Select the Reroute to OPERA check box to redirect the operation to OPERA Cloud web services

1:03

when the outbound system is unreachable.

1:06

Click on the question mark to read the tooltip.

1:09

Click Save.

1:10

To copy the Service Locators setup from one operation to many other operations,

1:14

select a module, then click the vertical ellipsis Actions menu and select Copy.

1:20

Select the destination operations, then click Apply.

---

# Redeeming Loyalty Awards for Packages (Video Transcript)

0:00

With an Oracle Hospitality OPERA Cloud Service Loyalty subscription,

0:03

or when the Loyalty Membership Configuration OPERA Control is active with the OPERA Cloud Customer

0:09

Loyalty Tracking Cloud Service, members can redeem award points

0:13

towards packages based on validity dates, tier, and other factors.

0:16

Once redeemed, the Points Available value in profile membership is

0:21

updated based on updates or cancellations. An Award record is also created for each night

0:26

on the profile membership panel. Let's get started!

0:29

The package offer is based on the available points balance, member level or tier, validity dates,

0:35

and other criteria. Points are validated

0:37

when the package is selected. To add package awards to reservations:

0:41

In the OPERA Cloud menu, select Bookings, Reservations,

0:46

and then select Manage Reservation. Enter search criteria, and click Search.

0:51

Now, in the search result, select the reservation you want to add the package award to,

0:56

then click I Want to . . . , and the link to packages appears in the reservation area,

---

1:00

or click the confirmation number to open the Manage Reservation screen.

1:05

When the Reservation appears, in the reservation area you can click the Packages link.

1:09

You can also click the Search Available Member Package Awards

1:13

link above the reservation overview. This opens the Available Award Packages.

1:17

The available Award Packages are displayed with details on the Calculation Rule,

1:21

Posting Rhythm, and Points required. Click Add on the package item to select

1:26

it for the reservation. In the Selected Packages panel,

1:29

update the quantity, if required, and then click the check mark to confirm availability.

1:34

Click Save. To Update or cancel

1:36

the Package Award for a reservation... Select the reservation in the search result,

1:40

then click the confirmation number to open the Manage Reservation screen,

1:43

or click I Want to . . . In the Reservation Area

1:47

click the Packages link. In the Selected Packages panel,

1:51

click the pencil icon to update the package or click the red cross icon

1:54

to remove or cancel the award package. Note: When cancelling a reservation with

1:58

package award or just cancelling a package award for a reservation,

2:01

the deducted points are credited to the member, less any cancellation penalties,

---

2:06

and the award appears as cancelled on the profile membership type Award List.

# Redeeming Loyalty Awards for Payment (Pay with Points) (Video Transcript)

0:00

With an Oracle Hospitality OPERA Cloud Service Loyalty subscription,

0:04

or when the Loyalty Membership Configuration OPERA Control is active with the OPERA Cloud

0:09

Customer Loyalty Tracking Cloud Service,

0:12

member award points can be redeemed for payment towards a reservation account balance, offered

0:16

based on specific validity dates,

0:19

the member's tier or level, and other factors.

0:22

Point redemption is posted as a rebate charge on the reservation account.

0:25

Let's get started!

0:27

You can redeem a payment award only if the following conditions are met:

0:30

One...

0:31

The billing window must be linked to the profile with the primary loyalty membership.

0:34

Two...

0:36

The available points balance must be sufficient to cover the redeemed amount.

0:40

and Three...

---

0:41

The points or amount entered cannot exceed the Maximum Points to Pay or Maximum Amount

0:44

Allowed.

0:46

In the OPERA Cloud menu, select Front Desk, then select In House or Departures.

0:51

Enter search criteria, and then click Search.

0:54

Now, in the search result, select the reservation you want to pay with the member's points,

0:59

then click the I Want to . . . menu,

1:01

then click, Billing.

1:03

Enter the PIN and click Login, and select a billing window in the right panel,

1:07

and then click Award Points.

1:10

And in the points redemption pop-up window, select a value from the Award Type list.

1:14

The Transaction Code, Maximum Points to Pay, and Maximum Amount Allowed details are updated.

1:20

In the Redeem field, select points or amount from the list.

1:23

Then enter the points you want to redeem or enter a currency amount based on your Redeem

1:27

option.

1:28

Now, the points to redeem are calculated based on the award type and currency conversion.

1:33

Click Post Redemption.

1:34

---

An Award is applied to the member profile for the amount of points redeemed.

1:39

To view this, Click Profile Name, Membership, View Details, Award List.

---

# Redeeming Loyalty Awards for Rate (Free Night Stay) (Video Transcript)

0:00

With an Oracle Hospitality OPERA Cloud Service, Loyalty subscription,

0:04

or when the Loyalty Membership Configuration OPERA Control is active with the OPERA Cloud

0:09

Customer Loyalty Tracking Cloud Service,

0:11

you can redeem member award points for rate awards; offered based on specific validity

0:16

dates, the member's tier or level, and other factors.

0:20

Once redeemed, the Points Available value in the profile membership is updated based

0:24

on updates or cancellations.

0:26

An Award record is also created for each night on the profile membership panel.

0:31

Let's get started!

0:32

To redeem a stay, the available points balance must be sufficient to cover all nights.

0:36

If the member does not have sufficient points for any of the available awards, no Awards

0:40

appear.

0:41

To redeem the awards...

0:42

In the OPERA Cloud menu, click Bookings, Reservations, and then click Look To Book Sales Screen.

---

0:50

You can enter the caller and contact information, which is available when the Caller Information

0:54

OPERA Control is active.

0:56

or

0:57

Click New Reservation and in the search panel, complete the following:

1:00

Enter the reservation stay details

1:01

or

1:02

in the Name field, enter the name and search for the loyalty member profile.

1:06

The Member Number field is populated automatically when Auto Populate from Name is checked in

1:11

the membership type.

1:12

Now, Select the Redeem Awards check box to indicate an Award reservation.

1:17

Note: When you check this check box, the Rooms field is set to 1 and disabled.

1:21

Click Search and the Minimum Stay Availability panel displays a list of the available Awards

1:25

rates and the points per night.

1:27

or

1:28

Click the More Display Sets link to view the available Awards rates and the points per

1:32

night.

1:33

---

Then, click the rate and room type cell to select for the reservation.

1:36

Click Select.

1:37

The Stay Information panel displays the Total Points Deducted and the Remaining Points Balance.

1:42

To Update or Cancel Rate Award Redemption...

1:44

When changing the Rate Code, the deducted points are credited less any cancellation

1:48

penalties

1:49

and the award appears as cancelled in the profile membership Award List panel.

1:53

In the OPERA Cloud menu, click Bookings, Reservations, then click Manage Reservation.

2:05

Select the reservation in the search result, then click the I Want to . . . menu, Reservation,

2:11

or click the confirmation number to open the Manage Reservation screen.

2:15

Update the stay details as needed.

2:16

When cancelling an Award reservation, the deducted points are credited less any cancellation

2:20

penalties

2:21

and the award appears as cancelled on the profile membership type Award List.

# Redeeming Loyalty Awards for Upgrade (Video Transcript)

0:00

With an Oracle Hospitality OPERA Cloud Service Loyalty subscription,

0:04

or when the Loyalty Membership Configuration OPERA Control is active with the OPERA Cloud

0:09

Customer Loyalty Tracking Cloud Service,

0:12

members can redeem award points towards room upgrades based on validity dates, tier, and

0:17

other factors.

0:18

For room type upgrade awards, an available Search member upgrade awards link appears

0:22

in reservation Book Now,

0:24

when an upgrade award is available for the dates and the room type booked.

0:27

The Search available member upgrade awards link

0:29

also appears in the reservation presentation for future or arrival reservations based on

0:34

the Member Upgrade Award Prompt All Dates OPERA Control.

0:38

This link appears only for Members of the Primary Loyalty Program.

0:42

Note: The Search available member upgrade awards link does not display during reservation

0:47

check-in.

0:48

---

Let's get started!

0:49

To book a Room Type Upgrade Award Redemption...

0:51

The upgrade offer displayed is based on the available points balance, member level or

0:55

tier, validity dates, and other criteria.

0:58

If the member doesn't have sufficient points no upgrade award link will be displayed.

1:02

1:03

From the OPERA Cloud menu, select Bookings, Reservations, and then click Look To Book

1:07

Sales Screen.

1:09

Enter the caller and contact information.

1:11

This is displayed when the Caller Information OPERA Control is active.

1:15

Click New Reservation and in the search panel, enter the reservation stay details.

1:20

In the Name field, enter and search for the loyalty member profile.

1:23

Then, select the profile from the search result and click Select.

1:27

The Member Number field is populated.

1:29

Click Search and then click the rate and room type cell to select for the reservation, then

1:34

click Select.

1:36

The Book Now page is displayed to enter the reservation details.

1:39

---

Click the Search available member upgrade awards link at the top of the page.

1:42

The Member Award Upgrade page displays the details of the upgrade available.

1:46

Click Select to confirm and proceed with the upgrade.

1:49

Note: The room type is updated and Room Type to Charge field retains the original room

1:53

type.

1:54

Complete the Booking Details of the reservation details and Click Book Now.

1:58

Next let's add an Upgrade Award to an Existing Reservation.

2:02

To redeem an upgrade, the available points balance must be sufficient to cover all nights

2:06

and the room type to upgrade to must be available for the reservation dates.

2:10

From the OPERA Cloud menu, click Bookings, Reservations, and then click Manage Reservation.

2:17

Enter search criteria and click Search.

2:19

Next, select the reservation in the search results.

2:23

You can click the I Want To . . . menu and select Reservation, or click the confirmation

2:27

number.

2:28

Click the Search available member upgrade awards link at the top of the page

2:31

The Member Award Upgrade page displays the details of the upgrades available.

2:35

Select the upgrade you would like to apply and click Save to confirm and proceed with

---

2:39

the upgrade.

2:40

To Update a Room Type Upgrade Award Redemption Reservation...

2:43

When increasing the length of stay, additional points are deducted and an additional award

2:48

will show

2:49

for each additional night on the profile membership Award List panel.

2:52

When reducing the length of the stay, the deducted points are credited less any cancellation

2:57

penalties

2:58

and the award appears as cancelled on the profile membership Award List panel.

3:01

When changing the room type, the deducted points are credited less any cancellation

3:05

penalties

3:06

and the award appears as cancelled on the profile membership Award List panel.

3:10

When cancelling a room type upgrade award redemption reservation,

3:14

the deducted points will be credited and the award will show as cancelled on the profile

3:18

membership Award List panel.

3:20

To update an existing reservation...

3:23

From the OPERA Cloud menu, click Bookings, Reservations, and then click Manage Reservation.

3:29

---

Enter the search criteria, and click Search.

3:31

Next select the reservation in the search results.

3:34

You can click the I Want to . . . menu and select Reservation or,

3:37

click the confirmation number to open the Manage Reservation page.

3:40

Then update the stay details as needed.

---

# Copy Reports (Video Transcript)

In this video, you will learn to copy a report from one property to other

0:09

properties in a hub. Let's get started.

0:12

First, you change must change your location to a hub.

0:15

Click the location on the top navigation, then click the location drop-down list.

0:20

Now select the hub radio button, and click search.

0:24

Select the hub from the list, and then click select.

0:32

Now, I see I am logged in to the hub location. Next, go to reports, and then select

0:38

manage reports. Click the property magnifying glass.

0:48

Select a property from the list and click select.

0:53

Click search.

0:57

Now, I can select the checkbox next to the reports I want to copy.

1:01

And then click the Copy to property option.

1:06

Next, select the property magnifying glass to select one or more destination properties

1:10

from the list of properties assigned to the hub and then click copy report.

1:22

Now, I can see the report successfully copied to the other properties.

1:27

Click ok.

# Adding Reports (Video Transcript)

On provisioning of your OPERA Cloud tenancy, all OPERA Cloud reports are setup in their

0:05

default report groups, with default parameters

0:08

You may, however, like to add other instances of these reports in other report groups or

0:12

with different report parameter presets to suit your needs.

0:16

You can add multiple instances of the same report and preset the report parameters in

0:20

various ways,

0:22

saving time having to select the parameters each time you generate the report.

0:26

For example,

0:28

the "res\_detail" Arrival Report can be configured multiple times with various filters, sort

0:33

order and column selections.

0:35

For example: Arrivals sorted by Last Name, Arrivals by VIP Only , Arrivals by Estimated

0:41

Time of Arrival and more..

0:44

Lets gets started.

0:45

From the OPERA Cloud menu, select Reports, and then select Manage Reports.

0:51

Click New Report and complete the following: Select a property from the list.

0:56

Select Oracle Report and select the res\_detail report from the report list.

---

1:02

Select a report group to add this report to and enter a display name for the report.

1:06

In the Parameter form area select Existing.

1:09

Search for the form name that matches the internal name entered previously.

1:13

The report parameters appear below and you can setup the default parameters each time

1:17

this report is generated.

1:19

For a VIP Only arrival report, select the VIP Only check box; select other criteria

1:25

and options as needed.

1:27

Scroll down to the layout section to change the sort order.

1:30

In this example we can sort by ETA, Estimated Arrival Time.

1:35

Then click SAVE to complete the setup.

1:37

The VIP Arrivals report is now available in the Arrivals report Group when entering "VIP"

1:42

in the report name and clicking Search.
