This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Documentation accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Related resources

All documentation and other supporting materials are available on the [Oracle Help Center](#).

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Additional copyright information

This documentation is for internal-use only.

This documentation may include references to materials, offerings, or products that were previously offered by Phase Forward Inc. Certain materials, offerings, services, or products may no longer be offered or provided. Oracle and its affiliates cannot be held responsible for any such references should they appear in the text provided.

1

About this guide

This guide provides instructions to use the Standard File-Based Integration (SFBI, formerly known as IVRS) for Oracle InForm.

Note:

Though the integration is officially known as SFBI, some user interface elements in the Oracle InForm application might still use the IVRS legacy name.

2

SFBI module overview

The SFBI module, formerly known as IVRS, allows the Oracle InForm application to integrate data from Interactive Web Response Systems (IWRS) vendors to create and enroll subjects, and insert or update their Case Report Form (CRF) data, eliminating the need for double data entry and reducing transcription errors.

With the SFBI module, Oracle InForm users can view audit logs, research errors, and correct and reprocess any inbound transaction.

3

Supported SFBI to Oracle InForm transaction types and formats

The SFBI import process supports the following Oracle InForm transaction types:

- Screen a new patient
- Enroll a new patient and create case report book (CRB)
- Insert new patient data in the CRB
- Update existing patient data in the CRB
- Transfer a patient from one site to another

The SFBI import process supports the following file formats:

- XML
- DAT/MAP

4

Access the Log Viewer

The **Log Viewer** will display error and informative messages for each transaction.

To access the log viewer:

1. Log in to Oracle InForm.
2. Go to **IVRS-<Vendor>**.
3. Go to **Integrated Log Viewer**.

A detailed list of inbound transactions appears.

4. Select a row to display more details about the transaction.

You can filter transactions by **Category**, **Log Type**, **Status**, and **Filter**.

5

Retry import transactions through Error Recovery

Error Recovery allows you to re-upload files that were flagged with an error during an import transaction. You can either re-upload the same file if the error was due to external conditions, or adjust and re-upload the file if the error was caused by discrepancies in the content of the file. file.

To re-upload a file with Error Recovery:

1. Log in to Oracle InForm.
2. Go to **IVRS-<Vendor>**.
3. Go to **Integrated Log Viewer**.
4. Select a transaction that resulted in error.
5. On **Upload revised data** file, click **Browse** and select the file to re-upload.
6. Click **Submit**.
