## Release Notes for Configuration Designer

Release 24.1

F95247-02

May 2024

ORACLE®

Copyright © 2024, Oracle and/or its affiliates.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

# Preface

This preface contains the following sections:

- [Documentation accessibility](#)
- [Diversity and Inclusion](#)
- [Related resources](#)
- [Access to Oracle Support](#)

## Documentation accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

## Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## Related resources

Product documentation and other supporting materials are available on the [Oracle Help Center](#).

## Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through Support Cloud.

Contact our Oracle Customer Support Services team by logging requests in one of the following locations:

- English interface of Oracle Health Sciences Customer Support Portal (<https://hsghbu.custhelp.com/>)
- Japanese interface of Oracle Health Sciences Customer Support Portal (<https://hsghbu-jp.custhelp.com/>)

You can also call our 24x7 help desk. For information, visit <http://www.oracle.com/us/support/contact/health-sciences-cloud-support/index.html> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

# 1

## What's new

Learn about new and enhanced functionality in this release.

- [Artifacts](#)  
The artifact modal has a new Reference Code field.
- [Bulk association](#)  
Country bulk association prevents cancellation while the request processes and improved Dependency and Milestone association prevents partial dependency creation.
- [Lifecycles](#)  
We improved error messaging related to failed lifecycle imports.

## Artifacts

The artifact modal has a new Reference Code field.

### Customize an Artifact modal

To ensure proper document matching in Oracle Site Activate-Phlex integrations, we added a new "Reference Code" field to the Artifact modal. When you customize an artifact in Configuration Designer, use this field to add, edit, save, or delete the Phlex Reference Code value.

Customize an Artifact

Name	1st Site Essential Document Package Sent
Type	Document Rule
Contract Type	None
Level	Study Country
Category	Country specific documentation
IRB/EC Type	None
Display Order Position	0
TMF Identifier	123
TMF sub type	1
TMF sub sub type	b
Reference Code	12.34
Description	

*Epic: CHK-43504*

## Bulk association

Country bulk association prevents cancellation while the request processes and improved Dependency and Milestone association prevents partial dependency creation.

### **Bulk association modal**

We improved country bulk association to prevent incomplete processing. Now, after you click “Associate Countries” to submit a bulk association request, the association modal’s Cancel button will be disabled while Configuration Designer processes the request. After processing successfully, the modal will automatically close, and the Artifacts, Dependencies, or Milestones grid will refresh as it did previously. If the request isn’t successful, the modal displays an error message, and the Cancel button will be enabled.

*Epic: CHK-43504*

## Lifecycles

We improved error messaging related to failed lifecycle imports.

### **Lifecycle import**

With release 24.1, we improved the error messaging displayed for failed lifecycle imports. Now, when the import fails due to a missing base item name, the error message identifies the missing information to help users resolve the issue.

*Epic: CHK-43504*

# 2

## Stability improvements

Learn about the service corrections included in this release.

- [Dependencies](#)

### Dependencies

Description	Ticket	Severity
The drop-down selections for Changes, Added, and Deleted did not show modified items as designed.	CHK-44416	3

# 3

## Previously reported known issues

These issues were reported prior to this current release.

- [Artifacts](#)
- [Bulk delete](#)
- [Configurations](#)
- [Dependencies](#)
- [Deploys](#)
- [Roles](#)

### Artifacts

Description	Ticket	Severity
The budget create and budget edit pages show all collections beyond contract collections.	CHK-22317	3

### Bulk delete

Description	Ticket	Severity
Large bulk deletes complete, but the user's browser's request can time out, which results in a continuous spinner icon. <b>Workaround:</b> Refresh the page.	CHK-29927	3
Configuration Designer does not automatically refresh the page as designed when a user performs a Bulk Delete on the last page of the Dependencies or Milestones tab. <b>Workaround:</b> Manually refresh the page.	CHK-44440	4

## Configurations

Description	Ticket	Severity
If deploys are in progress when viewing notes for a configuration, the deploy indicator text displays above the note list instead of below and can overlap the note fields and other user interface elements for the duration of the deployment.	CHK-41560	3
A child configuration will inherit a dependency from the parent configuration even when the child configuration already includes an exact duplicate of that dependency.	CHK-42130	3

## Dependencies

Description	Ticket	Severity
The dependencies tab displays an inconsistent number of results per page.	CHK-17129	3
An error occurs if the prerequisite and successor artifacts (activities) are the same between the two dependencies and if there is an identical attribute between them.	CHK-21830	3

## Deploys

Description	Ticket	Severity
When deploying a configuration with features not available on the Oracle Site Activate instance, a hard failure occurs instead of an alert.	CHK-8280	3

## Roles

Description	Ticket	Severity
When exporting data from the Roles tab, the export includes unexpected permissions fields.	CHK-20240	3

# 4

## Severity definitions

Learn more about how we describe the four issue severity levels.

Severity	Description
1	Your production use of the supported programs is stopped or so severely impacted that you cannot reasonably continue work. You experience a complete loss of service. The operation is mission critical to the business and the situation is an emergency.
2	You experience a severe loss of service. Important features are unavailable with no acceptable workaround; however, operations can continue in a restricted fashion.
3	You experience a minor loss of service. The impact is an inconvenience, which may require a workaround to restore functionality.
4	You request information, an enhancement, or documentation clarification regarding your software but there is no impact on the operation of the software. You experience no loss of service. The result does not impede the operation of a system.

# 5

## Browser support

Use a certified or supported web browser to ensure expected functionality and technical support.

Our goal is to provide customers with the best experience and advanced capabilities while maintaining maximum security. As products are enhanced, older browsers may no longer provide the capabilities required to support these key objectives. We test the current release as follows to certify and/or support browsers:

- **Certified browsers** undergo full testing for new features and regressions. Browser-related issues found after release are prioritized for fixes in future patches or releases.
- **Supported browsers** undergo focused testing on commonly-used pages. We also address all browser-related critical and blocker issues that originate in our applications.

The following table specifies the certified and supported browsers for desktop and laptop computers:

Product	Release	Certified (Latest version as of GA)	Supported
Oracle Site Activate Configuration Designer	24.1	Google Chrome	None

# 6

## Revision history

This book's revision date history and part number list will develop over time as we make any major, minor, or hotfix releases available for 24.1.

Date	Part Number	Description
02May2024	F95247-02	General Availability Release Notes
12Apr2024	F95247-01	Pre-General Availability Release Notes
