This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

# Preface

This preface contains the following sections:

- [Documentation accessibility](#)
- [Diversity and Inclusion](#)
- [Related resources](#)
- [Access to Oracle Support](#)

## Documentation accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

## Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## Related resources

Product documentation and other supporting materials are available on the [Oracle Help Center](#).

## Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through Support Cloud.

Contact our Oracle Customer Support Services team by logging requests in one of the following locations:

- English interface Customer Support Portal (<https://hsgbu.custhelp.com/>)
- Japanese interface Customer Support Portal (<https://hsgbu-jp.custhelp.com/>)

You can also call our 24x7 help desk. For information, visit <https://www.oracle.com/life-sciences/support/> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

## What's new for Oracle Site Activate users

Learn about updates in this release.

- [Enhanced report](#)  
We made updates to ensure acceptable performance for the Milestone Prediction Dashboard report.
- [CSV extracts](#)  
Nightly CSV extracts no longer include unused public views.

### Enhanced report

We made updates to ensure acceptable performance for the Milestone Prediction Dashboard report.

#### Milestone Prediction Dashboard

With release 23.3, the following fields exist but now have NULL values in the milestone\_predictions view:

- number\_of\_countries
- sites\_in\_study
- sites\_in\_country
- start\_month
- pi\_counts
- therapeutic\_area
- phase

The above change in the milestone\_predictions view means that the following columns are now blank in the Milestone predictions and Prediction analysis worksheets:

- No. of Countries
- No. of Sites in Study
- No. of Sites in Country
- Study Attributes

We also deprecated these unused feature importance fields since they are no longer applicable to current prediction models:

#### milestone\_predictions

- importance\_rank\_0\_score
- importance\_rank\_0\_feature
- importance\_rank\_1\_score
- importance\_rank\_1\_feature

- importance\_rank\_2\_score
- importance\_rank\_2\_feature
- importance\_rank\_3\_score
- importance\_rank\_3\_feature
- importance\_rank\_4\_score
- importance\_rank\_4\_feature

## CSV extracts

Nightly CSV extracts no longer include unused public views.

We removed the following unused, redundant public views from the nightly CSV extracts to ensure appropriate system performance:

- account\_categories
- account\_process\_artifact\_activities
- account\_process\_artifacts
- account\_process\_countries
- account\_process\_country\_artifact\_activities
- account\_process\_milestone\_predecessors
- account\_process\_milestones
- account\_process\_scenario\_artifact\_countries
- account\_process\_scenarios
- account\_processes
- account\_study\_level\_status\_labels
- account\_system\_features
- account\_user\_countries
- account\_user\_history
- geo\_languages
- global\_milestones
- study\_country\_sites\_status
- study\_level\_amendments
- study\_level\_artifact\_predecessors
- study\_level\_document\_activities
- study\_level\_global\_milestones
- study\_level\_global\_tasks
- study\_library\_groups

# 2

## What's new for Oracle Site Select users

Learn about new and enhanced functionality in this release.

- [Enhanced reports](#)  
Oracle Site Select reports have enhanced filters and minor usability improvements.
- [Data Export Utility](#)  
The Data Export Utility includes two new data columns.

### Enhanced reports

Oracle Site Select reports have enhanced filters and minor usability improvements.

#### Report filters and usability enhancements

With release 23.3, we enhanced filter options for Oracle Site Select reports to improve load time.

- By default, reports no longer have any studies selected upon first load. We updated the Study Name filter labels to "Study (Required)," and when dashboard or worksheet data can be filtered by study, the Study (Required) filter displays at the top of the filter panel. Users can optionally select all studies if preferred.
- All multi-select filters now display values in a drop-down list with an "Apply" button. When clicked, the report updates based on the applied values.

The enhancements above were made to all Oracle Site Select reports with the exception of Resource Allocation, which does not include a study filter and already uses the multi-select drop-down design.

We also made the following individual report updates:

- Notes Report – We corrected the spelling of the Therapeutic Area filter label.
- Site Progress – The PI cro Tier filter is relabeled to PI CRO Tier. We added filters for Site Data Sources and PI CRO Tier on the Site Details worksheet. These filters were already being applied to the data within the worksheet but were not previously visible. These filters are now visible and consistent with other worksheets within the report.
- Site User Engagement – We corrected the spelling of the Communication Category filter label. We also made this correction on the email data export worksheet.
- Survey Response Analysis – On the Question Analysis dashboard, we corrected the spelling of the Therapeutic Area filter label.

### Data Export Utility

The Data Export Utility includes two new data columns.

#### Study site data cube

In release 23.3, we added two new data columns to the Study site data cube:

1. all\_tasks\_completed\_on
2. institution\_lhn\_matching\_patients

# 3

## Stability improvements

This section identifies issues fixed in this release.

- [Database structure and content](#)

### Database structure and content

Description	Ticket	Severity
Study level notes were visible in the Oracle Site Activate user interface but were not available as expected in the study level notes table. The notes were also not available as expected in the Data Export Utility Study Notes data cube.	LSRPT-5767	2
Notes on milestone and activity were visible in the Oracle Site Activate user interface but were not available as expected in the study level notes table.	LSRPT-5852	2

# 4

## Severity definitions

Learn more about how we describe the four issue severity levels.

Severity	Description
1	Your production use of the supported programs is stopped or so severely impacted that you cannot reasonably continue work. You experience a complete loss of service. The operation is mission critical to the business and the situation is an emergency.
2	You experience a severe loss of service. Important features are unavailable with no acceptable workaround; however, operations can continue in a restricted fashion.
3	You experience a minor loss of service. The impact is an inconvenience, which may require a workaround to restore functionality.
4	You request information, an enhancement, or documentation clarification regarding your software but there is no impact on the operation of the software. You experience no loss of service. The result does not impede the operation of a system.

# 5

## Browser support

Use a supported or certified web browser to ensure expected functionality and technical support.

Our goal is to provide customers with the best experience and advanced capabilities while maintaining maximum security. As products are enhanced, older browsers may no longer provide the capabilities required to support these key objectives. We test the current release as follows to certify and/or support browsers:

- **Certified browsers** undergo full testing for new features and regressions. Browser-related issues found after release are prioritized for fixes in future patches or releases.
- **Supported browsers** undergo focused testing on commonly-used pages. We also address all browser-related critical and blocker issues that originate in our applications.

The following table identifies the current certified or supported browsers for desktop and laptop computers:

Product	Release	Certified (Latest version as of GA)	Supported (Latest versions as of GA)
Oracle Site Analyze	23.3	None	Google Chrome, Microsoft Edge (Chromium), and Mozilla Firefox

# 6

## Revision history

This book's revision date history and part number list will develop over time as we make any major, minor, or hotfix releases available for release 23.3.

<b>Date</b>	<b>Part number</b>	<b>Description</b>
20Feb2024	F89489-03	General Availability Release Notes (Oracle Site Activate)
13Dec2023	F89489-02	General Availability Release Notes (Oracle Site Select)
21Nov2023	F89489-01	Pre-General Availability Release Notes
