Oracle Life Sciences Site Analyze Release Notes, Release 24.1

F95249-03

Contents

Preface

This preface contains the following sections:

- Documentation accessibility
- Diversity and Inclusion
- Related resources
- Access to Oracle Support

Documentation accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Related resources

Product documentation and other supporting materials are available on the Oracle Help Center.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through Oracle Support Cloud.

Contact our Oracle Customer Support Services team by logging requests in one of the following locations:

- English interface Customer Support Portal (https://hsgbu.custhelp.com/)
- Japanese interface Customer Support Portal (https://hsgbu-jp.custhelp.com/)

You can also call our 24x7 help desk. For information, visit https://www.oracle.com/life-sciences/support/ or visit https://www.oracle.com/corporate/accessibility/learning-support.html#support-tab if you are hearing impaired.

1

Release 24.1.0.1 (available for this release 08Jul2024)

This hotfix included one infrastructure update and a correction to prevent duplicate data.

- **What's new**
  We updated our infrastructure to address data refresh duration.

- **Stability improvement**
  We corrected a duplicate data issue.

What's new

We updated our infrastructure to address data refresh duration.

- **Infrastructure**

Infrastructure

Infrastructure update

We made an infrastructure update to significantly improve total data refresh time from the Oracle Site Activate to Oracle Site Analyze public views.

Stability improvement

We corrected a duplicate data issue.

- **Oracle Site Activate standard reports**

Oracle Site Activate standard reports

Description	Ticket	Severity
We corrected an issue that caused duplicate records in the study_level_contracts public view.	LSRPT-6155	3

2
Release 24.1

See descriptions of enhancements, stability improvements, and issue lists published in the 24.1 GA release notes.

- What's new for Oracle Site Activate users
  Learn about new and updated fields in this release.

- What's new for Oracle Site Select users
  Learn about a report enhancement in this release.

- Stability improvements
  These are the issues we corrected in this release.

- Previously reported known issue
  This is an unresolved issue reported prior to this current release.

What's new for Oracle Site Activate users

Learn about new and updated fields in this release.

- New and updated fields
  We added new public view fields and updated the logic for two existing fields in this release.

New and updated fields

We added new public view fields and updated the logic for two existing fields in this release.

New fields

With release 24.1, we added the following new fields:

account_user_system_roles

- access_to_unblinded_documents
- enable_access_to_activate_etmf
- enable_adding_ associated_ document_ versions
- enable_status_change_for_closed_studies
- enable_tmf_status_change

study_level_activities

- unblocked_at

study_level_artifacts

- display_revision
- tmf_identifier

study_level_artifacts_discontinued

- display_revision
- tmf_identifier

study_level_contracts

- display_revision

study_level_documents

- display_revision

tmf_dia_artifacts

- tmf_version_id

Updated fields

With release 24.1, we updated the logic of the following fields:

study_level_artifacts

- tmf_uid

study_level_artifacts_discontinued

- tmf_uid

TMF_uid has been showing the value of TMF_identifier. The logic for this field in the public views is updated with release 24.1 to populate the actual TMF UID mapped to the document, and a new field TMF_identifier (noted above) is created and has the value of TMF_identifier.

What's new for Oracle Site Select users

Learn about a report enhancement in this release.

- Enhanced report
  We updated the Notes report to reflect the site note deletion enhancement in Oracle Site Select.

Enhanced report

We updated the Notes report to reflect the site note deletion enhancement in Oracle Site Select.

Notes report

With release 24.1, Oracle Site Select introduced an enhancement that allows permissioned users to delete site notes. To reflect that enhancement, we updated the Notes report to no longer include site notes that have been deleted from the Oracle Site Select user interface.

Stability improvements

These are the issues we corrected in this release.

- Oracle Site Activate standard reports
- Data Export Utility for Oracle Site Activate

Oracle Site Activate standard reports

Description	Ticket	Severity
Study level filtering in the Open Activities and Submission and Approval Status reports did not show data for users with individual study assignments.	LSRPT-5544	1
We corrected an issue where certain metadata fields in Study Level Artifacts public view were null for sites in study level submissions. Now, for sites included in either country or study level submission, the following 11 fields are populated with the correct package and site metadata:	LSRPT-5881	3

1. country_submission_site
2. package_id
3. package_submission_date
4. study_site_id
5. site_approved
6. site_number
7. display_status
8. pi_first_name
9. pi_last_name
10. institution
11. irb_ec_type

Data Export Utility for Oracle Site Activate

Description	Ticket	Severity
An error occurred in the Data Export Utility when a user attempted to preview a very large export with all available columns and several filters. To help users understand the issue, we added the new error message "Query time out. Please update filters to reduce the report volume."	CHK-44545	3

Previously reported known issue

This is an unresolved issue reported prior to this current release.

- Oracle Site Activate standard reports

Oracle Site Activate standard reports

Description	Ticket	Severity
Oracle Site Analyze releases 23.3 and 24.1 do not include the Study Startup Industry Benchmark report.	LSRPT-5896	2

3

Severity definitions

Learn more about how we describe the four issue severity levels.

Severity	Description
1	Your production use of the supported programs is stopped or so severely impacted that you cannot reasonably continue work. You experience a complete loss of service. The operation is mission critical to the business and the situation is an emergency.
2	You experience a severe loss of service. Important features are unavailable with no acceptable workaround; however, operations can continue in a restricted fashion.
3	You experience a minor loss of service. The impact is an inconvenience, which may require a workaround to restore functionality.
4	You request information, an enhancement, or documentation clarification regarding your software but there is no impact on the operation of the software. You experience no loss of service. The result does not impede the operation of a system.

4
Browser support

Use a supported or certified web browser to ensure expected functionality and technical support.

Our goal is to provide customers with the best experience and advanced capabilities while maintaining maximum security. As products are enhanced, older browsers may no longer provide the capabilities required to support these key objectives. We test the current release as follows to certify and/or support browsers:

- **Certified browsers** undergo full testing for new features and regressions. Browser-related issues found after release are prioritized for fixes in future patches or releases.

- **Supported browsers** undergo focused testing on commonly-used pages. We also address all browser-related critical and blocker issues that originate in our applications.

The following table identifies the current certified or supported browsers for desktop and laptop computers:

Product	Release	Certified (Latest version as of GA)	Supported (Latest versions as of GA)
Oracle Site Analyze	24.1	None	Google Chrome, Microsoft Edge (Chromium), and Mozilla Firefox

5
Revision history

This book's revision date history and part number list will develop over time as we make major, minor, or hotfix releases available for release 24.1.

Date	Part number	Description
08Jul2024	F95249-03	Added release 24.1.0.1 (available for this release 08Jul2024)
02May2024	F95249-02	General Availability Release Notes
12Apr2024	F95249-01	Pre-General Availability Release Notes
