What's new for Oracle Site Select users

Learn about new and enhanced functionality in this release.

Study level filtering

In release 25.1, we added study level filtering to the following Oracle Site Select Site progress reports:

- Next Actions
- Notes Report
- Site Progress Report
- Site Study Interest and Exclusion Report
- Survey Response Analysis

When determining access, study level filtering limits data shown based on the user's team assignments in Oracle Site Select. Users can view studies linked to their assigned team if the team is enabled, has at least one associated study, and has *Analyze reports* permission enabled. All three conditions must be met for study level access to be granted.

Notes Report

In this release, we enhanced the Notes Report to add a new Note Label filter and Labels column. The new filter allows users to search for one or more specific note labels.

Study Name	Bucket	Bucket State	PI Name	Institution	Country Name	Context	Labels	Created By	Created At	Content
20190201005	evaluate	Short list	Dr. [redacted]	United States	Evaluate - Short list	Notes_and_01	Notes_and_01	20-Aug-2023 09:40:34 PM	Antibiotics used to prevent blood clots	
20190201005	evaluate	Short list	Dr. [redacted]	United States	Evaluate - Short list	Notes_and_01	Notes_and_01	20-Aug-2023 09:40:34 PM	Information: users need additional details	
Study 5	evaluate	Short list	Dr. [redacted]	United States	Evaluate - Short list	Notes_and_01	Notes_and_01	20-Aug-2023 09:40:34 PM	Transformer: Applied to the site via a patch	
Study 5	invest	Invest	Dr. [redacted]	United States	Evaluate - Short list	Notes_and_01	Notes_and_01	20-Aug-2023 09:40:34 PM	Alternative for observation management	
Study 4	invest	Invest	Dr. [redacted]	United States	Invest - Invest	Notes_and_01	Notes_and_01	20-Aug-2023 09:40:34 PM	Continuously: Reduce information and suppress the future system	

Survey Response Analysis report

Oracle Site Select includes support for advanced grid and list survey question types. In this release, we enhanced the Survey Response Analysis report to include the advanced question types as well. The question types added to the Survey Response Analysis report are:

- Numeric and percentage grid
- Textbox grid
- Dropdown menu grid
- Checkbox grid
- Radio grid

- Continuous sum
- Textbox list (numeric and percentage validation)
- Dropdown menu list
- Checkbox list
- Radio button list

Additionally, when calculating an individual site's survey score, the report uses the new "total_possible_score," which reflects the maximum possible score based on the site's actual survey responses and branch logic.

2

Previously reported known issue

This is an unresolved issue reported prior to this current release.

Oracle Site Activate standard reports

Description	Ticket	Severity
The Study Startup Industry Benchmark report is not available at this time.	LSRPT-5896	2

3

Severity definitions

Learn more about how we describe the four issue severity levels.

Severity	Description
1	Your production use of the supported programs is stopped or so severely impacted that you cannot reasonably continue work. You experience a complete loss of service. The operation is mission critical to the business and the situation is an emergency.
2	You experience a severe loss of service. Important features are unavailable with no acceptable workaround; however, operations can continue in a restricted fashion.
3	You experience a minor loss of service. The impact is an inconvenience, which may require a workaround to restore functionality.
4	You request information, an enhancement, or documentation clarification regarding your software but there is no impact on the operation of the software. You experience no loss of service. The result does not impede the operation of a system.

4

Browser support

Use a supported or certified web browser to ensure expected functionality and technical support.

Our goal is to provide customers with the best experience and advanced capabilities while maintaining maximum security. As products are enhanced, older browsers may no longer provide the capabilities required to support these key objectives. We test the current release as follows to certify and/or support browsers:

- **Certified browsers** undergo full testing for new features and regressions. Browser-related issues found after release are prioritized for fixes in future patches or releases.
- **Supported browsers** undergo focused testing on commonly-used pages. We also address all browser-related critical and blocker issues that originate in our applications.

The following table identifies the current certified or supported browsers for desktop and laptop computers:

Product	Release	Certified (Latest version as of GA)	Supported (Latest versions as of GA)
Oracle Site Analyze	25.1	None	Google Chrome, Microsoft Edge (Chromium), and Mozilla Firefox

5

Revision history

This book's revision date history and part number list will develop over time as we make major, minor, and hotfix releases available for release 25.1.

Date	Part number	Description
