This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software" or "commercial computer software documentation" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

# Preface

This guide outlines the information you need to know about Oracle Retail Brand Compliance Management Cloud Service new or improved functionality in this update, and describes any tasks you might need to perform for the update. Each section includes a brief description of the feature, the steps you need to take to enable or begin using the feature, any tips or considerations that you should keep in mind, and the resources available to help you.

## **Audience**

This document is intended for the users and administrators of the Oracle Retail Brand Compliance Management Cloud Service.

## **Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>

## **Access to Oracle Support**

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

## **Customer Support**

To contact Oracle Customer Support, access My Oracle Support at the following URL: <https://support.oracle.com>

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

## **Oracle Help Center (docs.oracle.com)**

Oracle Retail product documentation is available on the Oracle Help Center at <https://docs.oracle.com/en/industries/retail/index.html>.

(Data Model documents can be obtained through My Oracle Support.)

## **Comments and Suggestions**

Please give us feedback about Oracle Retail Help and Guides. You can send an e-mail to: [retail-doc\\_us@oracle.com](mailto:retail-doc_us@oracle.com)

---

## **Oracle Retail Cloud Services and Business Agility**

Oracle Retail Brand Compliance Management Cloud Service is hosted in the Oracle Cloud with the security features inherent to Oracle technology and a robust data center classification, providing significant uptime. The Oracle Cloud team is responsible for installing, monitoring, patching, and upgrading retail software.

Included in the service is continuous technical support, access to software feature enhancements, hardware upgrades, and disaster recovery. The Cloud Service model helps to free customer IT resources from the need to perform these tasks, giving retailers greater business agility to respond to changing technologies and to perform more value-added tasks focused on business processes and innovation.

Oracle Retail Software Cloud Service is acquired exclusively through a subscription service (SaaS) model. This shifts funding from a capital investment in software to an operational expense. Subscription-based pricing for retail applications offers flexibility and cost effectiveness.

# 1

## Feature Summary

This chapter describes the feature enhancements in this release.

### Noteworthy Enhancements

This guide outlines the information you need to know about new or improved functionality in the Oracle Retail Brand Compliance Management Cloud Service update and describes any tasks you might need to perform for the update. Each section includes a brief description of the feature, the steps you need to take to enable or begin using the feature, any tips or considerations that you should keep in mind, and the resources available to help you.

#### Note:

Where new fields, User Interface (UI) changes, or glossary entries are introduced as part of a change, the portal owner may need to apply their own translations of the core system text.

#### Column Definitions

- **Feature:** Provides a description of the feature being delivered.
- **Module Impacted:** Identifies the module impacted associated with the feature, if any.
- **Scale:** Identifies the size of the feature. Options are:
  - **Small:** These UI or process-based features are typically comprised of minor field, validation, or program changes. Therefore, the potential impact to users is minimal.
  - **Large:** These UI or process-based features have more complex designs. Therefore, the potential impact to users is higher.
- **Delivered:** Is the new feature available for use immediately after upgrade or must the feature be enabled or configured? If no, the feature is non-disruptive to end users and action is required (detailed steps below) to make the feature ready to use.
- **Customer Action Required:** You must take action before these features can be used. These features are delivered disabled and you choose if and when to enable them.

**Table 1-1 Noteworthy Enhancements**

Feature	Module Impacted	Scale	Delivered	Customer Action Required?
<a href="#">Editable Text Filters</a>	Reports	Small	Yes	No
<a href="#">Contains Text Filter</a>	Reports	Small	Yes	No

**Table 1-1 (Cont.) Noteworthy Enhancements**

Feature	Module Impacted	Scale	Delivered	Customer Action Required?
<a href="#">Multiple Country of Origin System Parameter</a>	Product	Small	Yes	Yes System parameter configuration
<a href="#">Project &amp; Activity Brief Reporting</a>	Project and Reports	Small	Yes	Yes Permissions configuration

## Editable Text Filters

The report filters functionality has been extended to cater for Editable Text Selector fields - those where a statement is constructed from a phrase selected from a glossary plus inline variable data.

The phrase and data are stored as separate elements, so new fields have been added for reporting purposes, which contain the full constructed statement as a text string. This allows the text operators to be used on the full statement when applying a report filter.

The statements are stored in the specification's pack copy language if specified, otherwise in the portal's default language. No cross-translation of languages is attempted.

The new fields will be automatically populated as part of the upgrade.

## Contains Text Filter

The report filters functionality has been extended to provide additional text comparison operators for use when applying filters to certain columns that are selected from a glossary, such as Ingredients. Previously, a separate filter clause had to be added for each glossary item. Now multiple glossary items can be covered by a single text-based search operator.

New *Contains Text* and *Does Not Contain Text* operators are added to the set of operators used to apply filters to Report Data Sources, Designs, KPI Templates, and Schedules. They are available for use by the following fields:

- Activity Name
- Advanced Packaging Component Material
- Advanced Packaging Material
- Ingredient
- Packaging Component Material
- Site Activity Name
- Supplier Activity Name

The new operators are in addition to the existing *Contains* and *Does Not Contain* operators, which remain unchanged.

The *Contains Text/Does Not Contain Text* operators allow the user to enter a text string which will be applied as a wildcard comparison. For example, 'nut' to return matches on ingredients that contain the word nut anywhere in their description (such as nut, nuts, walnut, walnuts, chopped walnuts, water chestnut, and so on.) Thus, a single clause can be used instead of having to specify one for each possible ingredient.

If multiple clauses are specified to search for multiple strings, such as 'nut' and 'milk' together, they are applied as OR logic, regardless of whether AND or OR has been specified on the clause. For example, searching for Contains Text 'nut' and Contains Text 'milk' will return results that contain either 'nut' or 'milk'.

When used for versioned glossaries, the current and all previous versions of the glossary ID will be included.

The search is also applied to translations for active locales. For example, if the ingredient 'milk' has a French translation of 'lait', applying the search with either 'milk' or 'lait' as the text string will return results.

## Multiple Country of Origin System Parameter

An enhancement has been made to introduce a system parameter to control whether the Country of Origin fields in the Product Specification's OLC section allow multiple or single countries to be selected.

The Multiple Country of Origin feature in release 19.3 permitted the selection of multiple countries of origin in the Other Labelling Copy section. This enhancement extends that further by controlling its use with a new *Allow Multiple Product Country of Origin* system parameter. If enabled, the Country of Origin fields in the OLC section allow multiple countries to be selected; if not enabled, just a single country may be selected. The rule applies to all specification types.

## Project & Activity Brief Reporting

An enhancement has been made to provide additional reporting on Project and Activity Briefs.

A data extract of Project and Activity Brief data can be scheduled as a report, utilizing pre-configured criteria for filtering Projects, Activities, and their Brief questions.

The key features are:

- A new Project & Activity Brief Extracts glossary in the Reporting Admin area for configuring the data extract criteria.
- A new Project & Activity Brief Extract report type, and selection of the extract criteria from the Project & Activity Brief Extracts glossary are added to the Report Schedule record, for scheduling the Brief Extract as a report.
- A new Project & Activity Brief Extracts folder is added to the Report Outputs area to group the generated brief extract reports.
- The new Project & Activity Brief Extract report is created as a spreadsheet, containing columns that represent data from the Project and Activity records, and their Brief questions and answers, as defined by the extract criteria.

The existing Brief Extract data extract facility remains available but is changed:

- To also output the data extract file to the new folders in the Report Outputs area: Project Brief Extracts or Activity Brief Extracts. The Confirmation Step allows a sub-folder to be selected.
- On completion, a link to the file is now emailed, instead of the actual data file.
- The file format is changed from Excel xls to xlsx, to match that of the new Brief Extract file.
- The extract will include a Section Name Column for each question as a question can be repeated across sections within one brief. This field will not be visible in the Brief Extract confirmation step as the Section Name is not available to select as a List View field.

## Post Release Tasks and Impact on Existing Installation

The following post release tasks and impact on an existing installation must be taken into account as part of this release.

### Multiple Country of Origin System Parameter

Set the *Allow Multiple Product Country of Origin* system parameter according to whether multiple or single countries are to be selectable for the Country of Origin fields in the Product Specification's Other Labelling Copy section. The parameter is in the Product page of the System Parameters page. By default the parameter is checked, to allow for multiple countries.

### Permissions

The Project & Activity Brief Reporting enhancement requires the following to be added to the Permissions spreadsheet.

Add the following entries to the bottom of the Admin page:

Record (A)	Authority Profile (B)	Menu Option (C)	Sub Menu Option (D)	Action (E)	Data Record (F)	User Mode (L)	Access Level (M)
Admin	ADVANCED REPORTING ADMINISTRATOR	Admin	Manage Extract Criteria			NORMAL	Y
Admin	ADVANCED REPORTING ADMINISTRATOR				EXTRACT CRITERIA	NORMAL	F
Admin	ADVANCED REPORTING ADMINISTRATOR			SET TO ACTIVE	EXTRACT CRITERIA	NORMAL	Y

Record (A)	Authority Profile (B)	Menu Option (C)	Sub Menu Option (D)	Action (E)	Data Record (F)	User Mode (L)	Access Level (M)
Admin	ADVANCED REPORTING ADMINISTRATOR			SET TO INACTIVE	EXTRACT CRITERIA	NORMAL	Y
Admin	ADVANCED REPORTING ADMINISTRATOR			NEW VERSION	EXTRACT CRITERIA	NORMAL	Y

The instructions for downloading and uploading the amended Permissions spreadsheet are as follows:

1. Log in as an Oracle Authorized Administrator user and go to Company > Admin > Roles & Permissions.
2. Open the Permissions page.
3. Download the active spreadsheet by selecting the row with *true* in the Active Permissions column, click *Download Selected*, and save locally.
4. Edit the downloaded spreadsheet, make the changes described above, then save the spreadsheet.
5. Upload the edited spreadsheet by clicking *Upload Permissions*, select the spreadsheet, and click *Ok*.
6. Apply the changes by selecting the uploaded spreadsheet row, click *Process Selected*, and then click *Ok* to confirm.

## System Text

The Multiple Country of Origin System Parameter enhancement introduces a new system parameter.

The Project & Activity Brief Reporting enhancement includes new options in the Reporting Admin area and a new folder in the Report Outputs area.

System Text records for the new labels are added automatically during the release process, however any translation overrides must be added manually, by the retailer administrator.

The fix for editing CE Marking to utilize UKCA marking (item 32372838) introduces a new System Text record:

```
productSpecification.page.olcSection.page.quantityPage.brimfulContainerSymbol
```

The fix for including the Biodegradable checkbox (item 32437411) introduces a new System Text record:

```
reportQueryColumn.ADV_PACKAGING_COMPONENT_BIODEGRADABLE=Packaging Component Biodegradable
```

The fix for including the Source field from the Allergen section (item 32517607) introduces two new System Text records:

```
orbcmReports.allergenSource  
reportQueryColumn.ALLERGEN_SOURCE
```

The fix for the Project Type field label (item 32503217) introduces a new System Text record:

```
projectSchedulingSelectProjectsWizardStep.projectType=Project Type
```

The fix for the Reason column label (item 31940776) introduces a new System Text record:

```
view.site.page.sitesAuditsAndVisits.fieldSet.maintenanceAudit.reason
```

The system text records are added automatically during the release process, however any translation overrides must be added manually, by the retailer administrator.

## Enabling User Roles

If they do not already exist, configure the *Power User*, *Account Administrator*, *Assistant Technologist*, and *Site Inspector* user roles, and assign to the appropriate users.

## Enabling Artwork with SSO

Artwork is not a core Brand Compliance module, but a third-party add-on application. This process enables the integration with the third-party Artwork application, where it is used.

For existing installations that use the Artwork module, in order to configure single sign on (SSO) between Brand Compliance and the Artwork solution (using IDCS or OCI IAM authentication), the following steps must be taken by the Customer or their Partner:

1. Ensure the MYARTWORK external system has been created in Brand Compliance PROD and STAGE.
2. Raise an SR service requesting for creation of the Artwork Application for PROD and STAGE. The call back URLs and IDCS or OCI IAM URLs must be provided in the SR.
3. Once created, you will be able to gather the Client ID and Client Secret from IDCS or OCI IAM.

Refer to the Artwork chapter in the *Oracle Retail Brand Compliance Management Cloud Service Administration Guide* for the full process for enabling Artwork with SSO.

# 2

## Client Requirements

This chapter covers the Client System requirements supported for Oracle Retail Brand Compliance Management Cloud Service.

### Client System Requirements

**Note:**

Oracle Retail assumes that the retailer has ensured its Operating System has been patched with all applicable Windows updates.

The following web browsers are supported:

- Mozilla Firefox
- Microsoft Edge
- Google Chrome (Desktop)

Microsoft has deprecated Internet Explorer 11 in Windows 10 and recommends using Edge as the default browser. Refer to the [Oracle Software Web Browser Support Policy](#) for additional information.

# 3

## Noteworthy Resolved Issues

This following table highlights specific key fixes that are included in this release. In some cases, only a percentage of the overall fixed defects are listed.

Affected Component	Defect Number	Description
General: Error Logging	32308757	<b>Formatting of session restart link</b> When a system exception occurs, the stack trace log has a <i>Please click here to restart your session</i> link. This was usually shown in blue text on a blue background, so to improve clarity, the text color has been changed to white.
General: GNB	31644220, 32488553	<b>GNB Synchronization Issues</b> A change has been made to rectify Global Network Bus data synchronization issues, to ensure common failures are retried automatically. This issue only relates to portals that operate with a Global Network Bus (GNB) application.
General: IDCS or OCI IAM Users	32423080	<b>Deletion of IDCS Profiles</b> A change has been made to prevent the automatic deletion of IDCS profiles when deleting User records in Brand Compliance. This is a result of technical issues, and a concern it may allow IDCS profiles in a Production environment to be deleted from a Stage environment, if the IDCS connection details were not updated following a restore from production.

Affected Component	Defect Number	Description
General: IDCS or OCI IAM Users	32954820	<p><b>IDCS Synchronization in System Parameters Change History</b></p> <p>A fix has been made to rectify an issue with the hourly IDCS synchronization job adding an entry to the Change History log in the System Parameters configuration record.</p> <p>Although the System Parameters record does show when the last IDCS synchronization took place, writing the event to the Change History log has now been suppressed, as the log is intended to record when changes are made to the editable system parameters.</p>
General: News	30203744	<p><b>Archived News records opening a blank new window</b></p> <p>When the Users Preference setting <i>Open all documents in new browser windows</i> is enabled, Archived News records opened by using the Archived News link on the Home Page, do not display any information in the new window. Archived News records opened in this way should ignore the setting, and open as a new tab on the Application TAB bar.</p> <p>An update now ensures that when opening Archived News records from the Archived News Link, they open as a new tab on the Application TAB bar (thereby ignoring the <i>Open all documents in new browser windows</i> setting).</p> <p><b>Note:</b> When Archived News records are opened in this way, it is not possible to edit the record. Opening an Archived News record by using the Manage News link on the home page, will allow the records to be edited.</p>

Affected Component	Defect Number	Description
Product: Pack Copy	32525922, 32614081, 32672727	<p><b>Pack Copy reports displaying User Login ID instead of User Name</b></p> <p>The pack copy reports were outputting the Product Technologist Login ID rather than Name under the Non-Copy Information for the Product Technologist and Other Contacts fields.</p> <p>The Pack Copy Reports have been updated to utilize the required Name element from the SPEC API data source.</p>
Product: Pack Copy	33087576	<p><b>Incorrect mapping in header of a multi product/site Pack Copy file</b></p> <p>A fix has been made to rectify an issue with the header of a Pack Copy file being incorrect. The issue occurred when the specification was for a multi product and multi site specification. It was due to the product coverage details being taken from the Product Record when it should have been taken from the Product Specification.</p>
Product: Specifications	28961175, 31498573	<p><b>Intolerances not being validated when the ingredient not in the default Language</b></p> <p>When the Set Pack Copy Language is set to True, the pack copy language can be different from the base language. When a specification was configured to use a different pack copy language than the base (default) language, validation was not identifying the ingredients for intolerance validation.</p> <p>A fix has been implemented, so irrespective of the pack copy language, the validation will now generate the relevant validation errors for intolerances.</p>
Product: Specifications	30764648	<p><b>Validation of Assurance Standard in Specifications</b></p> <p>A fix has been made to Product Specifications, when validating the selected Assurance Standard, to check that the selected Assurance Standard is active within the glossary.</p>

Affected Component	Defect Number	Description
Product: Specifications	31574362	<p><b>Additional Product Information validation in CNF Specification</b></p> <p>A fix has been made to the validation of the Additional Product Information section, of the Constructed Non Food specification, to correct the error message which appeared for empty mandatory comments.</p>
Product: Specifications	31711051	<p><b>Error when progressing status of a Specification</b></p> <p>A fix has been made to rectify a Record is out of date type error that occurred when progressing the status of a Product Specification. This occurred when the <i>Cascade Product Number from Produce Specification to Product Record</i> system parameter was set.</p>
Product: Specifications	31872539	<p><b>Cutter Guide validation in Produce Specifications</b></p> <p>A fix has been made to the validation for the presence of Cutter Guide Attachments in the Other Labelling Copy section for Produce specifications.</p> <p>When validating a Produce specification to progress to Draft - Pack Copy Sent status, Cutter Guide Attachments now results in an error rather than a warning, if not populated.</p>
Product: Specifications	31973751 32266471, 32488903	<p><b>When editing a Specification, an error is generated when the Nutrition section is opened</b></p> <p>An error occurred on a draft Specification, in edit mode, when opening the Nutrition Section. The error was caused when a new version of the nutrition panel was created after the GDA or NVR/RDA Categories on the specification had been deactivated.</p> <p>A fix has been implemented so when opening the Nutrition section against the Specification, the new version of the Nutrition Panel is applied successfully with no errors.</p>

Affected Component	Defect Number	Description
Product: Specifications	32374821, 32375047	<p><b>Help text in Advanced Packaging section</b></p> <p>A fix has been made to rectify an issue with help text not appearing for the Recycling table column headings in the Advanced Packaging specification section.</p>
Product: Specifications	32614039, 32949706	<p><b>Mould Type missing from Packaging table</b></p> <p>A fix has been made to ensure the Mould Type field is present in the Packaging Attributes table of the Product Specification's Advanced Packaging section.</p>
Product: Specifications	32616127	<p><b>CNF specification edits not saving, intermittently</b></p> <p>Changes to the Details table on the Component Section of CNF specifications were intermittently not being saved. No errors or validation issues indicated a problem when this occurred.</p> <p>An update has been implemented to resolve the issue so changes to the Component section on CNF Specifications are successfully saved.</p>
Product: Specifications	32826302	<p><b>Error when opening specification linked to a product created by Product REST API</b></p> <p>When the Product REST API was used to create a Product that included a Product Record Other User (Other Contacts), the specifications linked to the product would cause an error when attempting to open the record.</p> <p>A modification has been made to the Product REST API to ensure that the Product Record Other User records are created appropriately and the modification of an existing Product Record Other User record, is limited to modifying the associated &lt;user&gt; element only.</p>
Product: Specifications	33087964	<p><b>Combined Specification Nutrients Glossary</b></p> <p>A fix has been made to the Combined Specification Nutrients glossary to rectify an issue with the column headings overlapping.</p>

Affected Component	Defect Number	Description
Product: Specifications	33087981	<p><b>Unable to revert a Specification to previous state</b></p> <p>A fix has been made to rectify an issue with not being able to revert a Not Progressed product specification to a previous state. The issue occurred if a section name had not been previously populated; although validated as a mandatory field, the specification is not editable at that status. The validation is now suppressed when using the option to revert the Not Progressed specification back to its previous status.</p>
Product: Specifications and Produce Product Records	32896973	<p><b>Duplication of Secondary Sites and Supplier Contacts</b></p> <p>A fix has been made to rectify an issue in the Produce Product Record whereby duplicate sites would appear in the Secondary Sites table of the Additional Supplier Information page. The duplicates would appear when there was a minimum of two secondary sites before adding further sites.</p> <p>A similar issue has also been corrected for the Supplier Contacts table in the Product Specification's Main Details section.</p>
Product: Specifications Admin	31618039	<p><b>Order of columns in Nutrition Panel</b></p> <p>A fix has been made to the Nutrition Panel maintenance in the Admin area, where the declaration columns in the Available Columns section, were not listed in the correct order when in read mode.</p>
Product: Specifications Admin	31618055	<p><b>Removing columns from Nutrition Panel</b></p> <p>A fix has been made to the Nutrition Panel maintenance in the Admin area to allow multiple columns to be removed from the Available Columns table with a single action.</p>

Affected Component	Defect Number	Description
Product: System Text	32372838	<p><b>CE marking requires updating to allow for UKCA marking</b></p> <p>It was not possible to update the current CE marking for European compliance to the UKCA marking for UK compliance of goods required as part of changes required under Brexit.</p> <p>The application has been updated to allow the marking text to be editable under system text in the Admin area. See Post Release Tasks for how to implement.</p>
Project: Activities	32216326	<p><b>Translate action in Activities</b></p> <p>A fix has been made to remove the Translate option from the Actions menu of the Project Activity record, as that action is only relevant for glossary records in the Admin area.</p>
Project: Admin	32446399	<p><b>Error when opening Batch Jobs</b></p> <p>A fix has been made to rectify an error that occurred when navigating to Batch Jobs in the Admin area after having deactivated and deleted a Brief Template, an Activity Template, or an Activity Type.</p>
Project: Brief Extract	30246164, 31993419, 32565862	<p><b>Brief extract fails when criteria includes a date filter</b></p> <p>To reduce the brief extract file size to within the maximum data size allowed, the advanced search criteria can be utilized to reduce the number of records, in the list view, which the brief extract will be based on.</p> <p>Previously when a user included a date filter in the advanced search criteria to reduce the list view, the extract failed.</p> <p>A fix has been made to rectify this error associated with date fields, allowing the record list view to be reduced as required without error.</p>

Affected Component	Defect Number	Description
Project: Brief Extract	32332243	<p><b>Brief Extract times out</b></p> <p>When attempting to run a Brief, the application times out. The issue is caused by the process attempting to retrieve all the Briefs for all projects/activities. An update has been made so only the Briefs for the projects/activities listed in the list view will be retrieved.</p> <p><b>Note:</b> The advanced search facility should still be utilized to limit the number of projects/activities in the list view before selection of the Brief Extract feature.</p>
Project: Project Creation	30582050, 32131110	<p><b>Error when creating Project</b></p> <p>A fix has been made to rectify an error that occurred when creating a new Project. The error occurred when adding a project to another project, using the Project Hierarchy or Project Hierarchy All views.</p>
Projects: System Text	32503217	<p><b>Schedule Projects system text</b></p> <p>A new system text item is provided for the Project Type field label in the Schedule Projects wizard. See Post Release Tasks for further details.</p>
Reports: Allergen	32070830	<p><b>Soft Coded Columns for Dietary &amp; Allergen Data Sources not available</b></p> <p>The soft coded columns feature for Dietary &amp; Allergen Data Sources were no longer available as the feature had been deactivated.</p> <p>An update has now been completed to activate the soft-coded columns features for Dietary &amp; Allergen Data Sources, so they are now available.</p>

Affected Component	Defect Number	Description
Reports: Allergen	32517607	<p><b>The Allergen data source query does not include the Source field</b></p> <p>The query for Allergens did not include the Source field as an optional column from the Allergens section of specifications. An update to the query now allows for the Source field to be included in a report data source for new/updated report templates to utilize.</p> <p>Two new system text entries are available for managing the column header text and the query column name. See Post Release Tasks for further details.</p>
Reports: Allergen	NA	<p><b>The Allergen queries include columns not relevant to their area of the D&amp;A section</b></p> <p>When creating a data source record using the either the Allergen - Contains or Allergen - Suitable For query, some of the columns available for selection were not relevant, as they are not available within the UI.</p> <p>The queries have been updated to remove the redundant columns. The columns are:</p> <ul style="list-style-type: none"> <li>• Formal Control Programme</li> <li>• Risk of Cross Contamination</li> <li>• Present in the Same Plant</li> <li>• Present in the Same Line</li> </ul>
Reports: Allergen	NA	<p><b>The Declared column in the Dietary &amp; Allergens Section query is never Populated</b></p> <p>The Declared column in the Dietary &amp; Allergen Section was never populated as it was mapped to an unused field.</p> <p>The query has been updated to map the Declared column to the correct field and now provides the correct data for reports.</p>

Affected Component	Defect Number	Description
Reports: Allergen	NA	<p><b>The labels for the Dietary &amp; Allergens Section query columns are Incorrect</b></p> <p>When selecting report filters in Report Schedules for a report based on the Dietary &amp; Allergens Section query, the labels (system text) for Is declared and Declaration were switched.</p> <p>An update to the system text has been completed to correctly label the Is declared and Declaration columns for the Dietary &amp; Allergens Section query.</p>
Reports: Audit	NA	<p><b>Audit Query Lead Business Category data from incorrect records</b></p> <p>The Audit Query only provided the Business Category Path and Desc values from the Site record, but they were not available from the Audit record for default reporting as required by the scope. The Business Category Path and Desc Level 1-5 values were only provided from the Audit record.</p> <p>These values were required as an optional field from the Site record.</p> <p>An update to the query now provides the following to meet original scope requirements:</p> <ul style="list-style-type: none"> <li>• The Business Category Path and Desc values from the Audit record to provide the required default values for relevant reports.</li> <li>• The Business Category Path and Desc Level 1-5 values from the Site record.</li> </ul> <p>Although the Business Category Path and Desc Level 1-5 values from the Audit record are not part of scope, they have been retained within the query.</p>

Affected Component	Defect Number	Description
Reports: Business Categories	32456471	<p data-bbox="987 275 1377 359"><b>Unable to replicate the Business Category information in BI reports</b></p> <p data-bbox="987 369 1377 569">The Business Category fields in the data source queries, for BI reporting, did not hold the expected values to allow replication of information provided by existing JasperSoft reports.</p> <p data-bbox="987 579 1377 743">The application queries have been updated to set the Business Category fields in the data sources with the expected values to allow replication of existing JasperSoft reports.</p>
Reports: Ingredients	31674641	<p data-bbox="987 764 1377 848"><b>Declared Quantity missing from Ingredients reporting data source</b></p> <p data-bbox="987 858 1377 995">A fix has been made to the Ingredients reporting data source to include the Declared Quantity field from the specification's Other Labelling Copy section.</p>
Reports: Nutrition	32130338	<p data-bbox="987 1016 1377 1100"><b>Soft Coded Columns for Nutrient Data Sources not available</b></p> <p data-bbox="987 1110 1377 1194">The soft coded columns feature for Nutrient Data Sources were not implemented.</p> <p data-bbox="987 1205 1377 1337">An update has now been completed to activate the soft-coded columns features for Nutrient Data Sources, so they are now available.</p>

Affected Component	Defect Number	Description
Reports: Nutrition	NA	<p><b>The Reporting Data Source columns for the Nutrition Section query showed duplicate columns</b></p> <p>The Selected Columns picker against Reporting Data Sources showed duplicate columns for the Nutrition Section query. The duplicated columns included the Per serving value and Per 100 value fields.</p> <p>The duplicate fields were actually as prepared fields but rendered as a duplicate due to the system text setup for the page. All fields are now presented, without duplication, in the Selected Columns selection window due to an update to the system text setup for the Reporting Data Sources page.</p>
Reports: Nutrition	NA	<p><b>The Nutrition Section query generates unexpected reporting data</b></p> <p>A report based on the Nutrition Section query would generate more rows of data than expected. The query was including records not expected in the output.</p> <p>The underlying SQL joins for the query have been updated to ensure the Nutrition Section query filters out unnecessary data and provides only the required data.</p>
Reports: Packaging	32437411	<p><b>Advanced Packaging Components query does not include Biodegradable checkbox</b></p> <p>The query for Advanced Packaging Components did not include the Biodegradable checkbox from the Advanced Packaging section.</p> <p>An update to the query now allows for the Biodegradable checkbox field to be included in a report data source for new/ updated report templates to utilize.</p> <p>A new system text entry is available for managing the report column header text. See Post Release Tasks for further details.</p>

Affected Component	Defect Number	Description
Reports: Projects	32816696	<p><b>Project Activities reports not completing</b></p> <p>A performance improvement has been made, to rectify issues with the running of certain Project Activity reports.</p>
Reports: Scorecards	NA	<p><b>The Scorecard query does not include all required Business Category data</b></p> <p>The existing Scorecard query retrieved the Business Category from the Scorecard record as this is the only business category field and only the Lead Business Category from the Site associated with the Scorecard.</p> <p>The Other Business Category data from the Site record associated with the Scorecard record is now retrieved for the Scorecard query to enable it to fulfill the reporting requirements.</p>
Reports: Specifications	NA	<p><b>The data sources based on specifications records include those with a status of Deleted</b></p> <p>Most core report data sources contain a default filter to exclude deleted records based on a Deleted flag. Product Specification records also have a Deleted status which was not included in the default filter and therefore those records would be included in the record results.</p> <p>The default filter, for the relevant core reports, has been updated to check for the Deleted flag and the Spec Status, so it will exclude the specification if either condition is set.</p>

Affected Component	Defect Number	Description
Reports: Specifications	NA	<p data-bbox="987 275 1373 386"><b>The Produce Secondary Site query Business Category is not mapped to the Produce Product record</b></p> <p data-bbox="987 401 1373 541">The Produce Secondary Site query was retrieving Business Category data from the secondary sites (rather than Produce Product per the scope requirement).</p> <p data-bbox="987 556 1373 863">An update has been implemented so the query will retrieve the default Business Category information from the Produce Product record. The report template has also been updated to output this information per the scope requirements. In addition, the Primary Site and Product Record Business Category fields are labelled appropriately.</p>
Reports: Surveillance	NA	<p data-bbox="987 877 1373 961"><b>The Surveillance Classifications query does not include all the required Data</b></p> <p data-bbox="987 976 1373 1087">The Surveillance Classifications query was missing required Product record data available in the portal.</p> <p data-bbox="987 1102 1373 1234">The Surveillance Classifications query has been updated to capture the necessary Product record data required for use by reports.</p>

Affected Component	Defect Number	Description
Supplier: Alerts	32832030	<p data-bbox="987 275 1365 302"><b>Extracting Alert Response data</b></p> <p data-bbox="987 310 1365 506">A fix has been made to rectify issues with the extract of Alert Response data when the data contained commas, new lines, or double quotation marks. The issue resulted in columns becoming out of synch.</p> <p data-bbox="987 514 1365 659">The extract now returns the text value for the CSV column enclosed in double quotation marks, if required, the rules being:</p> <ul data-bbox="987 667 1365 1045" style="list-style-type: none"> <li data-bbox="987 667 1365 812">• If the value contains a comma, newline, or double quotation mark, the text is enclosed in double quotation marks.</li> <li data-bbox="987 821 1365 924">• Any double quotation mark characters in the value are escaped with another double quotation mark.</li> <li data-bbox="987 932 1365 1045">• If the value does not contain a comma, newline, or double quotation mark, the value is returned unchanged.</li> </ul> <p data-bbox="987 1054 1365 1108">New lines and carriage returns are replaced with a space.</p>
Supplier: Audits	31573316	<p data-bbox="987 1125 1365 1180"><b>Mandatory fields when completing an Audit</b></p> <p data-bbox="987 1188 1365 1333">When saving a non conformance/issue for an Audit, if the Completed Date is populated, the following fields are now mandatory:</p> <ul data-bbox="987 1341 1365 1465" style="list-style-type: none"> <li data-bbox="987 1341 1365 1369">• Due Date</li> <li data-bbox="987 1377 1365 1404">• Assigned To</li> <li data-bbox="987 1413 1365 1440">• Required Action</li> <li data-bbox="987 1449 1365 1476">• Completed By</li> </ul>
Supplier: Audits	32998822	<p data-bbox="987 1482 1365 1537"><b>Error when progressing an Audit</b></p> <p data-bbox="987 1545 1365 1625">A fix has been made to rectify an error that occurred when progressing the status of an Audit.</p> <p data-bbox="987 1633 1365 1688">The issue occurred when referencing the record's status.</p> <p data-bbox="987 1696 1365 1776">The fix has also been applied to the creation of Audits, Scorecards, Suppliers, and Projects.</p>

Affected Component	Defect Number	Description
Supplier: Audits & Visits	31999733	<p><b>Changed On column in list views</b></p> <p>A fix has been made to make the Changed On column available for adding to Audits &amp; Visits list views. The column shows the dates that the Audit/Visit status changed.</p> <p>The dates on which the Audit or Visit is created and updated are available for selection within the Audit/Visit Details group.</p>
Supplier: Scorecards	29303067	<p><b>Error when validating a Scorecard</b></p> <p>A fix has been made to rectify an error that occurred when validating a Scorecard.</p>
Supplier: Sites	31940776	<p><b>Reason system text</b></p> <p>A fix has been made to change the system text key of the Reason column in the Sites list view.</p> <p>The column was sharing the system text with the Reason field on the Visit record. It now has a separate system text item. See Post Release Tasks for further details.</p>
Supplier: Sites	32326152, 33045056	<p><b>Unable to edit Use Supplier Address field</b></p> <p>A fix has been made to allow retailer users with the <i>Retailer Supplier &amp; Site Administrator</i> authority profile to edit the Use Supplier Address field on the Site record. Previously, it was only editable by supplier users.</p>
Supplier: Suppliers	31206061, 31577784, 32381330, 32457970, 32873272	<p><b>Re-send Registration Notification</b></p> <p>The Re-send Registration Notification option has been removed from the Actions menu in the Suppliers list view.</p>

## Deprecated Features

As part of the continuous delivery model for cloud services, features and technical components of a solution may be removed or replaced to enhance the security, performance, and overall quality of the cloud service. When this occurs, the deprecation of a feature or component will be announced in advance, allowing customers sufficient time to anticipate the change and transition to any enhanced replacement feature/component. After the deprecation is announced, the deprecated feature or component will remain in the solution until the planned removal date and will not be enhanced or made compatible with other new features.

For the full schedule of planned deprecations for this product, see the Deprecation Advisory accessed from the following MOS Documentation Library: Oracle Retail Brand Compliance Management Cloud Service Documentation Library at [Doc ID 2400174.1](#).
