Release Readiness Guide

Release 21.0.002
F45485-01
August 2021

Copyright © 2021, Oracle and/or its affiliates.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software" or "commercial computer software documentation" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Contents

1 Feature Summary

Noteworthy Enhancements	1-1
Table Tile	1-2
Data Visualizer Integration for Expanded Reports	1-4

2 System Requirements

Browser Requirements and Compatibility	2-1
Supported Oracle Retail Products	2-1

3 Known Issues

Preface

This guide outlines the information you need to know about Oracle Retail Home new or improved functionality in this update, and describes any tasks you might need to perform for the update. Each section includes a brief description of the feature, the steps you need to take to enable or begin using the feature, any tips or considerations that you should keep in mind, and the resources available to help you.

Audience

This document is intended for the users and administrators of the Oracle Retail Home.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Customer Support

To contact Oracle Customer Support, access My Oracle Support at the following URL:

<https://support.oracle.com>

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

Oracle Help Center (docs.oracle.com)

Oracle Retail Product documentation is available on the following website <https://docs.oracle.com/en/industries/retail/html>

Comments and Suggestions

Please give us feedback about Oracle Retail Help and Guides. You can send an e-mail to: retail-doc_us@oracle.com

Oracle Retail Cloud Services and Business Agility

Oracle Retail Home is hosted in the Oracle Cloud with the security features inherent to Oracle technology and a robust data center classification, providing significant uptime.

The Oracle Cloud team is responsible for installing, monitoring, patching, and upgrading retail software.

Included in the service is continuous technical support, access to software feature enhancements, hardware upgrades, and disaster recovery. The Cloud Service model helps to free customer IT resources from the need to perform these tasks, giving retailers greater business agility to respond to changing technologies and to perform more value-added tasks focused on business processes and innovation.

Oracle Retail Software Cloud Service is acquired exclusively through a subscription service (SaaS) model. This shifts funding from a capital investment in software to an operational expense. Subscription-based pricing for retail applications offers flexibility and cost effectiveness.

1

Feature Summary

This chapter describes the feature enhancements in this release.

Note:

The non-sequential version number of this Oracle Retail application is intentional.

Noteworthy Enhancements

This guide outlines the information you need to know about new or improved functionality in the Oracle Retail Home update and describes any tasks you might need to perform for the update. Each section includes a brief description of the feature, the steps you need to take to enable or begin using the feature, any tips or considerations that you should keep in mind, and the resources available to help you.

Column Definitions

- **Feature:** Provides a description of the feature being delivered.
- **Scale:** Identifies the size of the feature. Options are:
 - **Small:** These UI or process-based features are typically comprised of minor field, validation, or program changes. Therefore, the potential impact to users is minimal.
 - **Large:** These UI or process-based features have more complex designs. Therefore, the potential impact to users is higher.
- **Delivered:** Is the new feature available for use immediately after upgrade or must the feature be enabled or configured? If no, the feature is non-disruptive to end users and action is required (detailed steps below) to make the feature ready to use.
- **Customer Action Required:** You must take action before these features can be used. These features are delivered disabled and you choose if and when to enable them.

Table 1-1 Noteworthy Enhancements

Feature	Scale	Delivered	Customer Action Required?
Table Tile	Small	Enabled	No
Data Visualizer Integration for Expanded Reports	Small	Enabled	No
Integration Health UI	Small	Enabled	No
Version History	Small	Enabled	No

Table Tile

A new tile report layout is available in Retail Home, allowing display of data in a table format inside a tile. The report can be configured to display data in one of two layouts:

- 1 description and up to 3 metrics in each row, all text
- 1 image, 2 descriptions, and up to 3 metrics in each row

Instructions for how to configure this tile layout will be found in the *Oracle Retail Home Administration Guide*.

Data Visualizer Integration for Expanded Reports

Retail Home is now able to support displaying a report from Oracle Data Visualizer when clicking on the Expanded Report button in the corner of a metric tile on a Retail Home dashboard. A tile can be configured with a link to which report should be displayed as the expanded report for that tile. This ability requires a Retail Insights Cloud Service subscription.

Instructions for how to configure this integration will be found in the Retail Home Administration Guide.

Integration Health UI

A new page is available in Retail Home that displays the current status of configured integration points in Retail Home. It is available only to Retail Home Administrators. The page displays the currently configured integration points, along with a status indicator for whether that integration point is working or not. If an integration point is not working, any related error message is displayed on the page as well.

The screenshot shows the 'Integration Status' page in Oracle Retail Home. It features a table under the 'Application Integration' section:

Application Name	Status	Captured Errors
Retail Insights	Active	
Oracle Retail Home	Active	
Seed Data App	Active	
test	Active	

Version History

Retail Home is now tracking installed versions in an environment, so when a Retail Home Administrator views the Subscription Metrics/Version History page, Retail Home's version history will appear.

2

System Requirements

This chapter covers the Client System requirements for Oracle Retail Home.

Browser Requirements and Compatibility

The following browsers are supported:

- Mozilla Firefox
- Microsoft Edge
- Google Chrome (Desktop)

Microsoft has deprecated Internet Explorer 11 in Windows 10 and recommends using Edge as the default browser. Refer to the [Oracle Software Web Browser Support Policy](#) for additional information.

Supported Oracle Retail Products

Retail Home is able to integrate with all Cloud versions of Oracle Retail products. Note that not all Oracle Retail Cloud Services support all features of Retail Home integration.

3

Known Issues

Affected Component	Defect Number	Summary
Data Visualizer integration	N/A	If the user has not logged in to Retail Insights, any expanded reports that use Data Visualizer will not display. As a workaround the user can log into Retail Insights once, and then expanded reports will display inside Retail Home normally.
Data Visualizer integration	N/A	Data Visualizer expanded reports currently only display correctly in Firefox. Other browsers are not able to display them.
Dashboard Configuration	N/A	Trying to delete an application with filters created for it will cause an error. Filters can be deleted first as a workaround.
