Oracle® Retail Trade Management Customs Entry User Guide, Release 22.1.301.0

Oracle welcomes customers' comments and suggestions on the quality and usefulness of this document.

Your feedback is important, and helps us to best meet your needs as a user of our products. For example:

- Are the implementation steps correct and complete?
- Did you understand the context of the procedures?
- Did you find any errors in the information?
- Does the structure of the information help you with your tasks?
- Do you need different information or graphics? If so, where, and in what format?
- Are the examples correct? Do you need more examples?

If you find any errors or have any other suggestions for improvement, then please tell us your name, the name of the company who has licensed our products, the title and part number of the documentation and the chapter, section, and page number (if available).

Note:

Before sending us your comments, you might like to check that you have the latest version of the document and if any concerns are already addressed. To do this, access the Online Documentation available on the Oracle Technology Network Web site. It contains the most current Documentation Library plus all documents revised or released recently.

Send your comments to us using the electronic mail address: retail-doc_us@oracle.com

Please give your name, address, electronic mail address, and telephone number (optional).

If you need assistance with Oracle software, then please contact your support representative or Oracle Support Services.

If you require training or instruction in using Oracle software, then please contact your Oracle local office and inquire about our Oracle University offerings. A list of Oracle offices is available on our Web site at <http://www.oracle.com>.

Preface

This document describes the Oracle Retail Trade Management user interface. It provides step-by-step instructions to complete most tasks that can be performed through the user interface.

Audience

This document is for users and administrators of Oracle Retail Trade Management. This includes merchandisers, buyers, business analysts, and administrative personnel.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Customer Support

To contact Oracle Customer Support, access My Oracle Support at the following URL:

<https://support.oracle.com>

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

Improved Process for Oracle Retail Documentation Corrections

To more quickly address critical corrections to Oracle Retail documentation content, Oracle Retail documentation may be republished whenever a critical correction is needed. For critical corrections, the republication of an Oracle Retail document may at times not be attached to a numbered software release; instead, the Oracle Retail document will simply be

replaced on the Oracle Technology Network Web site, or, in the case of Data Models, to the applicable My Oracle Support Documentation container where they reside.

Oracle Retail product documentation is available on the following web site:

<https://docs.oracle.com/en/industries/retail/index.html>

An updated version of the applicable Oracle Retail document is indicated by Oracle part number, as well as print date (month and year). An updated version uses the same part number, with a higher-numbered suffix. For example, part number E123456-02 is an updated version of a document with part number E123456-01.

If a more recent version of a document is available, that version supersedes all previous versions.

Oracle Help Center (docs.oracle.com)

Oracle Retail product documentation is available on the following web site:

<https://docs.oracle.com/en/industries/retail/index.html>

(Data Model documents can be obtained through My Oracle Support.)

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Customs Entry Overview

The movement of goods through customs in the import country can be tracked through the customs entry module.

You can track the following information in the customs entry module:

- Forms
- Protests
- Timelines
- Shipments, orders, and items
- Departure, arrival, export, and import dates
- Missing documents
- Bills of lading and containers
- Charges and assessments
- Licenses and visas

A customs entry batch program transmits data to brokers so they can prepare the necessary documentation. When you finalize transportation records in the transportation module, the customs entries are created automatically. As additional information is acquired, it can be entered manually.

When the charges and assessments are complete, you can choose to allocate the costs to the actual landed cost module. When the customs entry is complete, you can confirm the record. If you have access to the Oracle Retail Invoice Matching product, non-merchandise invoices are created automatically from confirmed customs entries.

2

Create a Customs Entry

To create a customs entry, follow the steps listed below.

1. From the Tasks menu, select **Trade Management > Import Financials > Create Customs Entry**. The Customs Entry window appears.
2. In the Customs Entry header, the customs entry number is auto-generated, if you create a customs entry. The ALC status as well as the status of the customs entry are displayed in the top right corner of the window. If you create a customs entry the ALC status defaults to Pending and the status of the customs entry to Worksheet.
3. Enter, select or search for customs entry data, in the individual sections. For more information about the individual sections of the Customs Entry window, see the [Define/Enter a Customs Entry](#) section.
4. Then select one of the following options.
 - Click **Save and Close** to save you entries and close the Customs Entry window.
 - Click the arrow on the right side of the button to display the additional save options.
 - Click **Save** to save your entries.
 - Click **Save and Create Another** to create additional entries.
 - Click **Cancel** to reject all entries and close the Customs Entry window.

Define/Enter a Customs Entry

You can track the movement of goods through customs in the import country through the Customs Entry (CE) module.

The Create Customs Entry option opens the Customs Entry window. This window allows you to view and maintain customs entries. You can also calculate assessments and allocate them to actual landed cost (ALC).

The Customs Entry window contains the following sections.

- [Customs Entry Header](#)
- [Details](#)
- [Comments](#)
- [Customs Entry Toolbar](#)

Allocate Customs Entry Charges to Actual Landed Cost

The duties, taxes, and fees which must be paid to the import authority to clear merchandise through customs are captured on customs entries. These charges, along with the merchandise cost of the item and any expenses incurred when transporting, make up an item/location's actual landed cost. The customs entry charges can be allocated to the actual landed cost module where they can be compared to the estimated charges and subsequently finalized. This adjusts weighted average cost and the stock ledger with the difference between the estimated and actual values.

To allocate customs entry charges to actual landed cost, after the shipments, order, items and charges have been entered on the entry, select the **Allocate ALC** button at the bottom of the Customs Entry page. The ALC Status will change from Pending to Allocated. For more information about Actual Landed Costs, see "[Actual Landed Cost Overview](#)" in the *Oracle Retail Trade Management Actual Landed Cost User Guide*.

Confirm a Customs Entry

When all of the charges for the shipment/purchase order/items have been accurately captured on the customs entry, the entry can be confirmed. Confirming an entry indicates it is accurate and complete. Upon confirmation, non-merchandise invoices will be automatically generated and transmitted to Retail Invoice Matching. Once a customs entry is confirmed, it cannot be set back to Worksheet and the details can no longer be modified.

To confirm a customs entry, follow the steps below:

1. From the Tasks menu, select **Trade Management > Import Financials > Manage Customs Entries**.

The Customs Entry Search page appears.

2. Enter criteria to find the entry you wish to confirm. Click **Search**.
