

Oracle[®]Retail Process Orchestration and Monitoring

Release Readiness Guide

Release 23.2.201.0

F80200-01

April 2023

The Oracle logo, consisting of a solid red square with the word "ORACLE" in white, uppercase, sans-serif font centered within it.

ORACLE[®]

Copyright © 2023, Oracle and/or its affiliates.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

3 Noteworthy Resolved Issues

Preface

This guide outlines the information you need to know about Oracle Retail Process Orchestration and Monitoring new or improved functionality in this update, and describes any tasks you might need to perform for the update. Each section includes a brief description of the feature, the steps you need to take to enable or begin using the feature, any tips or considerations that you should keep in mind, and the resources available to help you.

Audience

This document is intended for the users and administrators of the Oracle Retail Process Orchestration and Monitoring.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Customer Support

To contact Oracle Customer Support, access My Oracle Support at the following URL:

<https://support.oracle.com>

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

Oracle Help Center (docs.oracle.com)

Oracle Retail Product documentation is available on the following website <https://docs.oracle.com/en/industries/retail/html>

Comments and Suggestions

Please give us feedback about Oracle Retail Help and Guides. You can send an e-mail to: retail-doc_us@oracle.com

Oracle Retail Cloud Services and Business Agility

Oracle Retail Process Orchestration and Monitoring is hosted in the Oracle Cloud with the security features inherent to Oracle technology and a robust data center classification, providing significant uptime. The Oracle Cloud team is responsible for installing, monitoring, patching, and upgrading retail software.

Included in the service is continuous technical support, access to software feature enhancements, hardware upgrades, and disaster recovery. The Cloud Service model helps to free customer IT resources from the need to perform these tasks, giving retailers greater business agility to respond to changing technologies and to perform more value-added tasks focused on business processes and innovation.

Oracle Retail Software Cloud Service is acquired exclusively through a subscription service (SaaS) model. This shifts funding from a capital investment in software to an operational expense. Subscription-based pricing for retail applications offers flexibility and cost effectiveness.

1

Feature Summary

This chapter describes the feature enhancements in this release.

Noteworthy Enhancements

This guide outlines the information you need to know about new or improved functionality in the Oracle Retail Process Orchestration and Monitoring Cloud Service update and describes any tasks you might need to perform for the update. Each section includes a brief description of the feature, the steps you need to take to enable or begin using the feature, any tips or considerations that you should keep in mind, and the resources available to help you.

Column Definitions

- **Feature:** Provides a description of the feature being delivered.
- **Module Impacted:** Identifies the module associated with the feature, if any.
- **Scale:** Identifies the size of the feature. Options are:
 - **Small:** These UI or process-based features are typically comprised of minor field, validation, or program changes. Therefore, the potential impact to users is minimal.
 - **Large:** These UI or process-based features have more complex designs. Therefore, the potential impact to users is higher.
- **Delivered:** Is the new feature available for use immediately after upgrade or must the feature be enabled or configured? If no, the feature is non-disruptive to end users and action is required (detailed steps below) to make the feature ready to use.
- **Customer Action Required:** You must take action before these features can be used. These features are delivered disabled and you choose if and when to enable them.

Feature	Module Impacted	Scale	Delivered	Customer Action Required?
Batch Schedule Customization	Batch Schedule	Large	Yes	If desired
Nightly Batch Summary Report	Report	Small	Yes	No
Enhanced Audit Events	Audit	Small	Yes	No
Enhanced Schedule Maintenance	Batch Schedule	Medium	Yes	No
Batch Schedule Display Name	Batch Schedule	Small	Yes	No
One Nightly per Day Validation	Scheduler	Small	Yes	If desired

Batch Schedule Customization

Users can create custom Batch Flows, Processes, and Jobs (custom entities) for a batch schedule through the POM UI itself. Only the Standalone (also known as Adhoc) cycle can be customized. Before this version, customizing a batch schedule could only be done through the Batch Schedule Spreadsheet.

The Standalone tab on the Batch Administration screen has been enhanced to provide controls for creating, editing, and deleting custom entities. These entities can then be scheduled through the Scheduler Administration screen just like regular batch entities. Custom entities can be exported from one environment into another using the Export, Import features on the Batch Administration screen.

Users can click **Create Custom Entities**, then either **Create Flow** or **Create Process** in the **Standalone** tab of the Batch Administration screen. Processes and jobs can also be added to the custom flow and process either by creating a new process/job, or adding an existing process/job, or importing a process/job from an existing custom flow/process respectively.

Predecessor Process	Process Name	Successor Process	Number of Jobs
Flow	CUSTOM_FLOW_DEMO_CPROCESS	COPY_CUSTOM_1_CPROCESS	0
CUSTOM_FLOW_DEMO_CPROCESS	COPY_CUSTOM_1_CPROCESS	COPY_CUSTOM_PROCESS_TEST_1_CPROCESS	1
COPY_CUSTOM_1_CPROCESS	COPY_CUSTOM_PROCESS_TEST_1_CPROCESS	COPY_COPY_CUSTOM_3_CPROCESS	1
COPY_CUSTOM_PROCESS_TEST_1_CPROCESS	COPY_COPY_CUSTOM_3_CPROCESS	COPY_COPY_CUSTOM_CPROCESS	1
COPY_COPY_CUSTOM_3_CPROCESS	COPY_COPY_CUSTOM_CPROCESS	COPY_CUSTOM_PROCESS_TEST_2_CPROCESS	1
COPY_COPY_CUSTOM_CPROCESS	COPY_CUSTOM_PROCESS_TEST_2_CPROCESS	COPY_COPY_CUSTOM_2_CPROCESS	2
COPY_CUSTOM_PROCESS_TEST_2_CPROCESS	COPY_COPY_CUSTOM_2_CPROCESS	Flow	3

AIF

Process Name: CUSTOM_CPROCESS
Description:
Application: RI
Comment: CUSTOM_CPROCESS Comment

Jobs in New Process

3 Job(s) have been added to this Process. [Create New Job](#), [Add Existing Job](#), or [Import Job From Existing Process](#)

Enabled	Job Name	Description	Application
<input type="checkbox"/>	CREATE_PARTITION_EXECUTION_JOB		RI
<input type="checkbox"/>	AGG_UTLITY_PRE_JOB		RI
<input type="checkbox"/>	W_RTL_MCAL_WEEK_SHIFT_DS_COPY_JOB		RI

Nightly Batch Summary Report

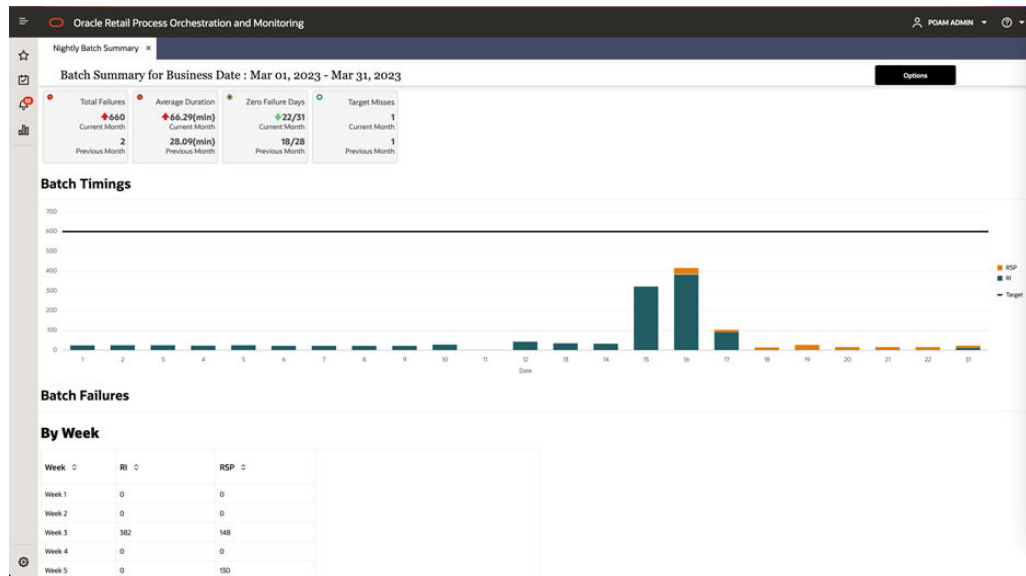

Users can view a configurable Batch Summary report. This report displays Nightly Cycle statistics across select schedules. The user can select the month and schedule(s) for which the report is to be run.

The different statistics are represented by tiles at the top of the reports:

- Total Failures
- Average Duration
- Zero Failure Days
- Target Misses

A batch timings bar graph is also shown, depicting a bar for each day of the month. Each bar represents a stacked Nightly batch run duration in minutes for each selected schedule. The Target Batch Duration can be set at a schedule level within POM and is represented by a horizontal line on the graph.

The report also provides total batch failures by week.

Enhanced Audit Events

All significant batch events are now audited. These can be viewed on the Audit Events screen accessed through the AMS Utilities task menu.

Audit Events

Schedule Name: AIF
Event Type: Enter Event Type (Optional)
Fetch Events

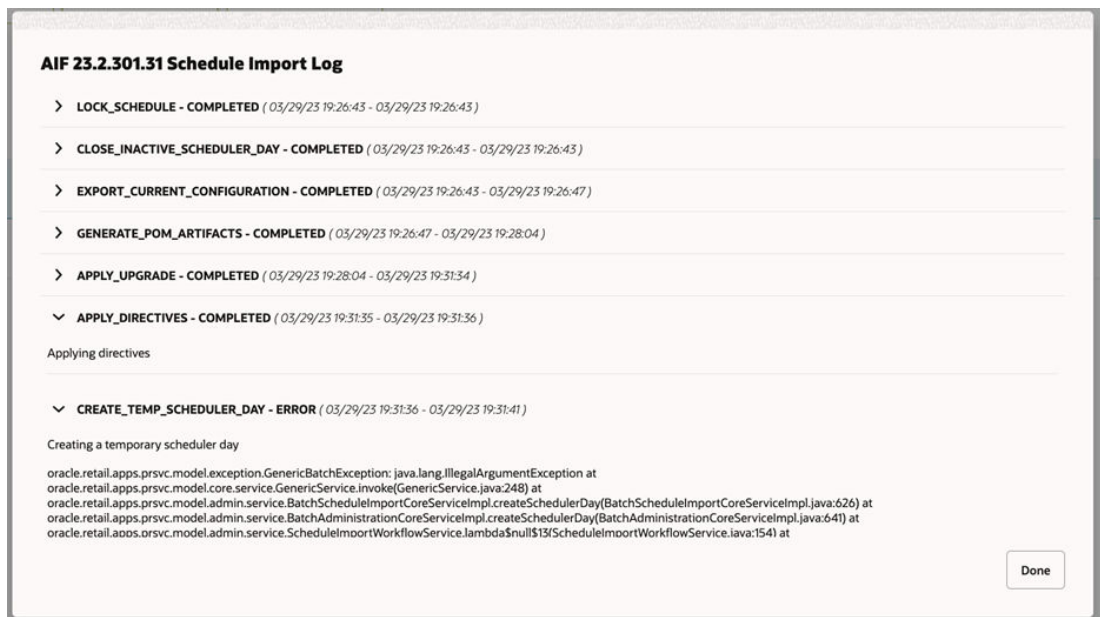

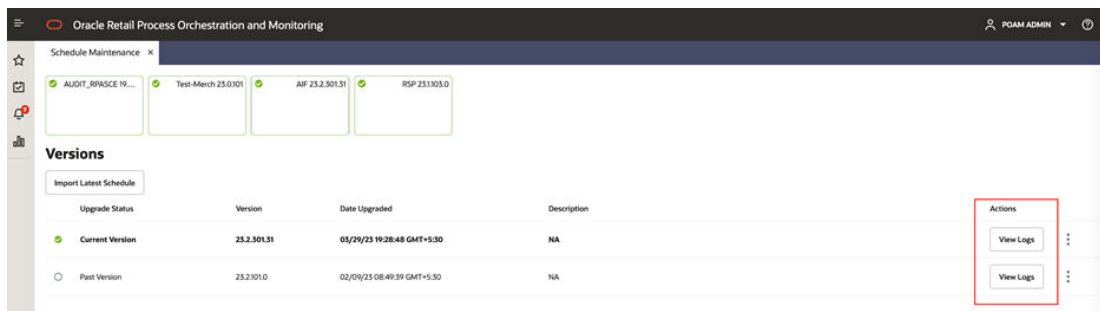

AIF Events

Event Id	Event Type	Created By	Created Date	Comment	Business Date	Flow	Process	Job	Flow Run Id
2930	SCHEDULER_DAY_START	RGBU_POM_QA1D9	04/04/23 13:17:27 GMT+5:30		2023-03-15	Nightly

Enhanced Schedule Maintenance

A new **View Logs** button is available on the Schedule Maintenance screen. Clicking the button shows the schedule import log for the selected schedule. This displays the list of activities completed as part of the schedule import along with the status, timestamp, and other information such as success log, error message, skip reason, and so on.

Batch Schedule Display Name

Applications now have the ability to specify, on the Schedule tab of the Batch Schedule spreadsheet, a Display Schedule Name that is different than the traditional Schedule Name. This new field will be used as the schedule name shown on all POM screens, reports, and emails. Retail Home has also been modified to use this same display name on the POM Tile.

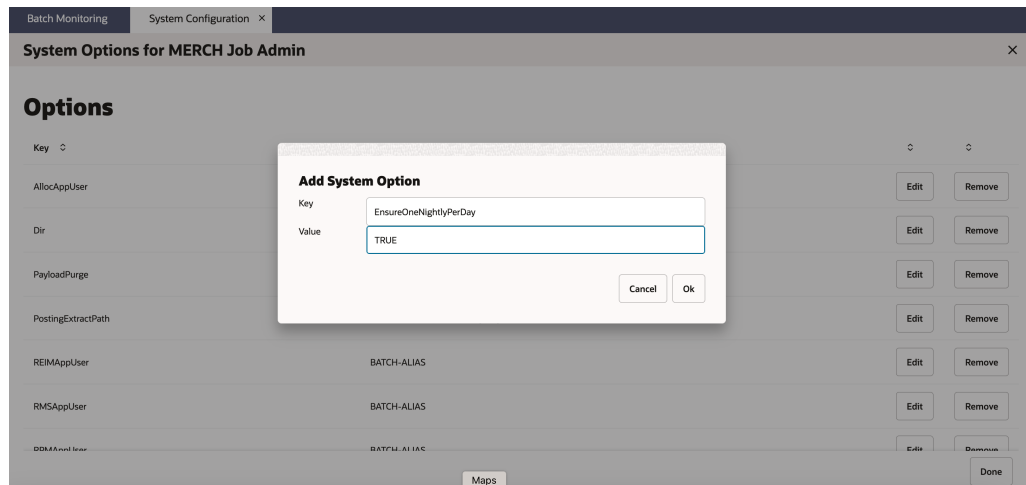

One Nightly per Day Validation

The Scheduler now performs an additional configurable validation for Nightly tasks. This is known as the 'One Nightly per Day' validation rule. This rule is turned off by default, meaning that if it's not explicitly set, the Scheduler will not enforce it. However, if this rule is explicitly set, the Scheduler will try to ensure that two consecutive Nightly cycles are not run on the same calendar day (based on the time zone set). For example, consider the case where the Nightly is set up with the WEEKLY frequency, and is scheduled to run at 9 am on Sunday and then 6 pm on Monday. If this validation is not enforced, the Scheduler would schedule the Nightly cycle at 9 am on Sunday and then again at 6 pm on Sunday itself.

In such cases, if this rule is in place, the Scheduler delays the Nightly Cycle to the same time for the next day. A Notification is also created to signal that the Nightly has been adjusted in adherence to this rule.

 **Note:**

As stated previously, the default is to not enforce this validation. This behavior can be changed by creating system option `EnsureOneNightlyPerDay` and setting it to `TRUE` on the **System Configuration – System Options** screen

If this system option already exists then modify its value to either `TRUE` or `FALSE` based on the desired behavior.

2

System Requirements

This chapter covers the Client System requirements for Oracle Retail Process Orchestration and Monitoring Cloud Service.

Browser Requirements

 **Note:**

If running Windows, Oracle Retail assumes that the retailer has ensured its Operating System has been patched with all applicable Windows updates.

The following web browsers are supported:

- Mozilla Firefox
- Microsoft Edge
- Google Chrome (Desktop)
- Apple Safari

Microsoft has deprecated Internet Explorer 11 in Windows 10 and recommends using Edge as the default browser. Refer to the [Oracle Software Web Browser Support Policy](#) for additional information.

3

Noteworthy Resolved Issues

This following table highlights specific key fixes that are included in this release. In some cases, only a percentage of the overall fixed defects are listed.

Affected Component	Defect Number	Description
User Interface – Scheduler Administration screen	35132170	UNABLE TO DELETE MERCH ADHOC SCHEDULER TASKS. Deleting Adhoc scheduler tasks in POM did not work when the schedule time was set to a blank value.
