This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Send Us Your Comments

Oracle® Retail Xstore Office Cloud Service Service Administration Action List, Release 23.2.301.0

Oracle welcomes customers' comments and suggestions on the quality and usefulness of this document.

Your feedback is important, and helps us to best meet your needs as a user of our products. For example:

- Are the implementation steps correct and complete?
- Did you understand the context of the procedures?
- Did you find any errors in the information?
- Does the structure of the information help you with your tasks?
- Do you need different information or graphics? If so, where, and in what format?
- Are the examples correct? Do you need more examples?

If you find any errors or have any other suggestions for improvement, then please tell us your name, the name of the company who has licensed our products, the title and part number of the documentation and the chapter, section, and page number (if available).

Note:

Before sending us your comments, you might like to check that you have the latest version of the document and if any concerns are already addressed. To do this, access the Online Documentation available on the Oracle Technology Network Web site. It contains the most current Documentation Library plus all documents revised or released recently.

Send your comments to us using the electronic mail address: retail-doc_us@oracle.com

Please give your name, address, electronic mail address, and telephone number (optional).

If you need assistance with Oracle software, then please contact your support representative or Oracle Support Services.

If you require training or instruction in using Oracle software, then please contact your Oracle local office and inquire about our Oracle University offerings. A list of Oracle offices is available on our Web site at <http://www.oracle.com>.

Preface

The *Oracle® Retail Xstore Office Cloud Service Service Administration Action List* describes all available functions of Release 23.2.301.0.

Audience

This guide is for technical personnel who configure, maintain and support, or use Oracle Retail Xstore Office.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Related Documents

For more information, see the following documents in the Oracle Retail Xstore Point-of-Service Release Notes.

See the Oracle Retail Xstore Office Cloud Service documentation library at the following URL:

<https://docs.oracle.com/en/industries/retail/index.html>

Customer Support

To contact Oracle Customer Support, access My Oracle Support at the following URL:

<https://support.oracle.com>

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received

- Screen shots of each step you take

Review Patch Documentation

When you install the application for the first time, you install either a base release (for example, 23.0) or a later patch release (for example, 23.0.1). If you are installing the base release or additional patches, read the documentation for all releases that have occurred since the base release before you begin installation. Documentation for patch releases can contain critical information related to the base release, as well as information about code changes since the base release.

Improved Process for Oracle Retail Documentation Corrections

To more quickly address critical corrections to Oracle Retail documentation content, Oracle Retail documentation may be republished whenever a critical correction is needed. For critical corrections, the republication of an Oracle Retail document may at times not be attached to a numbered software release; instead, the Oracle Retail document will simply be replaced on the Oracle Help Center (docs.oracle.com) Web site, or, in the case of Data Models, to the applicable My Oracle Support Documentation container where they reside.

This process will prevent delays in making critical corrections available to customers. For the customer, it means that before you begin installation, you must verify that you have the most recent version of the Oracle Retail documentation set. Oracle Retail documentation is available on the Oracle Help Center (docs.oracle.com) at the following URL:

<https://docs.oracle.com/en/industries/retail/index.html>

An updated version of the applicable Oracle Retail document is indicated by Oracle part number, as well as print date (month and year). An updated version uses the same part number, with a higher-numbered suffix. For example, part number E123456-02 is an updated version of a document with part number E123456-01.

If a more recent version of a document is available, that version supersedes all previous versions.

Oracle Retail Documentation on the Oracle Help Center (docs.oracle.com)

Oracle Retail product documentation is available on the following web site:

<https://docs.oracle.com/en/industries/retail/index.html>

(Data Model documents can be obtained through My Oracle Support.)

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.

Convention	Meaning
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>monospace</code>	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1

Overview

When starting an Xstore Office Cloud Service implementation, there are a number of key considerations and actions you will need to take. This document outlines the most important actions and provides a general timeline for when many of these actions should be completed to ensure success for your implementation. These actions are divided up into the following phases:

- [Pre-Provisioning](#)
- [Provisioning](#)
- [Post-Provisioning](#)
- [Deployment](#)

Audience

This document is intended for your service administrator. The service administrator is the key person in your business that manages your Xstore Office Cloud Service. Oracle will target important communications to the service administrator, such as the initial welcome email that is described in this document. If the person who receives this email is not the person or part of the group of people that will be taking responsibilities for the tasks in this document, please work with your Customer Success Manager (CSM) to have that the name updated.

2

Pre-Provisioning

Pre-provisioning is the period after contracts are signed, but before receiving your environments, where some key activities can occur related to your upcoming implementation. For Xstore Office Cloud Service implementations, your Customer Success Manager (CSM) will be your main point of contact for these activities.

Activate Your Service into a Cloud Account

You will receive an activation email from Oracle in the initial stages of provisioning, often immediately following your subscription order being booked. You will need to activate your cloud service into a cloud account in order to begin the provisioning activities for your Oracle Retail services. Promptly completing the activations steps will better enable on-time environment delivery.

On activation of your cloud account, you will have access to Oracle Cloud Infrastructure Console and the Identity and Access Management (OCI IAM) and your default identity domain will be created. An identity domain is a container for managing users and roles, federating and provisioning of users, secure application integration through Oracle Single Sign-On (SSO) configuration, and OAuth administration. It represents a user population in Oracle Cloud Infrastructure and its associated configurations and security settings (such as MFA).

Your default identity domain will be of the Oracle Apps type. Each identity domain type is associated with a different set of features and object limits.

Oracle Retail Best Practice for Tenancy, Applications, and Identity Domains

Oracle Retail recommends that all retail applications use the same OCI IAM Domain. All retail application environments must reside within the same OCI IAM domain for Single Sign-On (SSO) to function across production and non-production environments.

If the customer requires separating the identity management for production and non-production environments, the tenancies, domains, and application environments must be organized such that all production (prod) applications are in the same identity domain and all non-production (stage, dev, and so on) applications are in the same identity domain.

For Oracle Retail enterprise integration, the server-to-server security credentials required to flow among the Oracle Retail Applications (for example, Merchandise Foundation Cloud Service to Planning), the applications must reside in the same tenancy.

Note:

Activation of your cloud service into a cloud account does NOT impact billing or the subscription service period. Those details are connected to the subsequent environment delivery of the cloud services.

Activating into a New Oracle Cloud Account

Note:

An Oracle Cloud Account is not the same as your My Oracle Support account. The Oracle Cloud Account account exists within the OCI console and includes your identity domain(s) for managing user access and security.

To start the setup, click the **Activate** link provided in the received email. Then the following steps are required:

1. Provide the desired name for the Oracle Cloud Account.
A best practice is to use a name which will encompass the scope of services to be managed in the account, such as a combination of your company name and retail, for example, **mystoresretail**. After activation, you can adjust the displayed name for the cloud account.
2. Provide your email address as the customer administrator who receives the activation email.
The email address must match the initial email. If you would like a different contact to be used as the administrator, this can be managed after activation in coordination with your CSM.
3. The activation success message will display, and you will receive a new welcome email with access credentials.

Activating into an Existing Oracle Cloud Account

Activate your Retail cloud service within the Account Management section of your existing Oracle Cloud Account:

1. Log in to your existing Oracle Cloud Account.
Clicking the **Activate** link brings you to the login page.
2. Within the Dashboard, click the **Account Management** menu and then select the **Activate** tab.
Available services to activate will be listed; you may need to select **Show: Pending Activations**.
3. Click **Cloud Service Account Setup** to complete the setup. This setup will enable you to select the current Oracle Cloud Account as the destination for the cloud service activation.

If you have any issues, see appendix [Frequently Asked Questions](#).

Prepare Project Team

During this time, you will also be putting together your project plan for the deployment and go-live phases of your implementation. It is important to consider the following during this planning phase to prepare your project team for the Xstore Office Cloud Service implementation:

- **Oracle Cloud Infrastructure Identity and Access Management** - As noted above, you will be using the OCI IAM UI as part of user management for your Xstore Office Cloud Service. During the pre-provisioning timeframe, familiarize yourself with this solution and its features.

<https://docs.oracle.com/en-us/iaas/Content/Identity/home.htm>

- **Security Configurations** - During this phase, you should designate a portion of your team to becoming familiar with OCI IAM and the enterprise roles, duties, and privileges that will be part of the Xstore Office Cloud Service you are implementing.

For information on OCI IAM, see Managing Users <https://docs.oracle.com/en-us/iaas/Content/Identity/users/about-managing-users.htm#understand-user-lifecycle>.

3

Provisioning

Once your environments are ready for you, the person designated as your service administrator will receive a welcome email: one for each cloud service and each environment (stage, production, and so on). This email has several key pieces of information:

- User name

This user is referred to as the Service Administrator user in this document. A temporary password will be sent in a separate email.

- Link to the OCI IAM Domains UI
- Links to your Supplier Evaluation cloud services

You should receive one email for each cloud service you purchased, including the Oracle Retail Integration Cloud Service.

- Customer Support (CSI) Number

It is recommended that you save this email for future reference, because at this point the service administrator is the only person with access.

Access OCI IAM

Once you receive your welcome email, it is recommended that you, as the system administrator, log in to the OCI IAM console to verify your access and set a new password. You will be assigned to the application administrator group for your production and pre-production Supplier Evaluation cloud service environments.

It is also recommended that you add additional administrators in order to have a backup administrator and share in user management administration, as at this point no one else in your organization will have access to OCI IAM or Supplier Evaluation solutions. For assistance in creating users or adding them to groups, see the following documents:

- [Managing Users](#)

4

Post-Provisioning

In the first few days after your initial provisioning, it is recommended that you do each of the following tasks, as they are applicable for your implementation.

Cloud Service Documentation

Refer to the Deployment chapter for a complete list of documentation, training materials, and information about the Oracle Retail community.

<https://docs.oracle.com/en/industries/retail/index.html>

Cloud Service Access

Set up accounts for users who will be part of implementing the service, including business owners and implementation partners.

Access My Oracle Support

Validate access to the My Oracle Support portal (see Register Customer Support Identifier for registration and access to the Support portal) to ensure you have access to log Service Requests, view the knowledge base, and download content.

5

Deployment

The deployment phase is when you will be designing, configuring, and building the integration, conversions, training, reports, and any extensions needed to run the Xstore Office Cloud Service for your business. Here are some other things to consider as you transition into this phase.

Get Started

Review additional product-specific tools and resources that help you and your implementation team by referencing the Documentation libraries at this location: <https://docs.oracle.com/en/industries/retail/index.html>

The key documents for Xstore Office Cloud Service are:

- Implementation Guide
- Administration Guide
- Security Guide
- User Guides

Leverage Oracle Support

Attend a session on Working Effectively with Support (WEWS) to learn about support policies and best practices when working with Oracle Support. Oracle Support representatives are ready 24/7 to answer questions and address issues about your service. Access the Oracle Support Contacts Global Directory to find the Oracle Support Hotline for your country, and explore the page on *Working Effectively with Oracle Support - Best Practices* found on My Oracle Support under [Doc ID 166650.1](#).

Get Connected

Register for RGBU support communities:

- Use My Oracle Support Community ([ID 2299812.1](#)) to post technical questions and get resolution on technical issues.
 - See *Getting Started* to learn how to use the Support Community.
- Use The RACK to view informative resources and participate in discussions around Retail Solutions at www.oraclecleretailrack.com.
- Join a Community, leverage your peers:
 - Register to join the Oracle Retail User Group (ORUG) Community by sending an email to OracleRetail-Community_ww@oracle.com and including member name, member email, and retailer name.
 - Follow ORUG on LinkedIn: <https://oracle.com/orug-linkedin>.
- Read about all things Oracle Retail at www.oracle.com/retail.

6

Frequently Asked Questions

This chapter provides answers to frequently asked questions.

Cloud Account Activation

Since the Xstore Office Cloud Service is installed using the default OCI IAM domain details, it is important to ensure any activation concerns are resolved during the pre-provisioning/provisioning period, as making changes after your Xstore Office Cloud Service is provisioned may require extended downtime.

What should I do if I cannot activate my service into an existing Oracle Cloud Account?

Inform your CSM or sales representative if you run into issues, providing the following information:

- Existing Oracle Cloud Account name
- Subscription ID of a service in the account
- Administrator email for the account

What do I do if I experience errors or failures while attempting to activate my Cloud account?

The administrator email address must match the email which received the activation notification. If this does match and you are still running into issues, inform your CSM or sales representative, providing the following information:

- Intended activation approach (new Oracle Cloud Account or activate within an existing Oracle Cloud Account)
- Any error or failure messages received - include screen shots if possible

Can I use another identity management solution?

Only OCI IAM is supported in Xstore Office Cloud Service implementations, however OCI IAM can also be integrated with external identity management providers, such as Active Directory, using its APIs.

A

Appendix: List of Key URLs

This appendix lists the URLs for key solutions and tools.

Solution/Tool	URL
Xstore Office Cloud Service URL	URL will be of the format: <code>https:// \${service}.retail.\${region}.ocs.oraclecloud.com/ rgbu-omni- <cust>-<Envtype><num>-xocs/xadmin</code>
Identity Management URL	<code>https://<host>.identity.oraclecloud.com/ui/v1/adminconsole</code>
