This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

This document is a reference of the error messages as seen for your Oracle Fusion Middleware component, product, or service.

Audience

This manual is intended for anyone who uses Oracle Fusion Middleware and requires more information about an error message encountered in the product.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
`monospace`	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1

ADFDI-00100 to ADFDI-55516

ADFDI-00100
Unable to send a request for BindingContext: a DIRemoteServlet call is already in progress.

Category:
Session

Cause:
A request to DIRemoteServlet was attempted while another one is already in progress.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00101
unexpected value found in attribute metadata: {0}

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00103
Unable to locate start element: BindingContainer in response stream.

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00105
invalid child element <{0}> encountered within <{1}> element

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00106
missing end element: </{0}>

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00107
row limit exceeded

Category:
Session

Cause:
Too many rows exist in result set.

Action:
Refine your query in order to reduce the number of matching rows.

ADFDI-00108
An attempt to communicate with the server failed since there was no valid user session available.

Category:
Session

Cause:
A valid user session was not available during an attempt to communicate with the server.

Action:
Log in to the server and retry the request. Or, contact the network administrator to review the security configuration.

ADFDI-00109
invalid GetResourceBundle response

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00110
unable to locate element {0} or parse its contents

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00111
unable to create request object

Category:
Session

Cause:
Unable to establish a connection to the DIRemoteServlet.

Action:
Verify that the DIRemoteServlet URL is specified properly and retry request. The system administrator can check the server logs for more information.

ADFDI-00112
unable to create XmlTextWriter

Category:
Session

Cause:
An unexpected error occurred while sending a request to the DIRemoteServlet.

Action:
Retry your request. The system administrator can check the server logs for more information.

ADFDI-00113
unable to get request stream

Category:
Session

Cause:
An unexpected error occurred while sending a request to the DIRemoteServlet.

Action:
Retry your request. The system administrator can check the server logs for more information.

ADFDI-00114
The DIRemoteServlet returned an unrecognized value for element {0}, attribute {1}: {2}.

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00115
The DIRemoteServlet returned an unexpected element type in the response XML: {0}

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00116
The DIRemoteServlet returned invalid XML: unexpected end of response.

Category:
Session

Cause:
An unexpected error occurred while reading the DIRemoteServlet response.

Action:
Retry your request. The system administrator can check the server logs for more information.

ADFDI-00117
The operation cannot be completed due to an unexpected error on the server. Contact your administrator to review the server logs to find more detailed information regarding the cause.

Category:
Session

Cause:
An unexpected error occurred while reading the server response.

Action:
The system administrator can check the server logs for more information.

ADFDI-00118
The DIRemoteServlet returned an error. A subsequent error occurred reading the error details from the response.

Category:
Session

Cause:
An unexpected error occurred while reading the DIRemoteServlet response.

Action:
Retry your request. The system administrator can check the server logs for more information.

ADFDI-00119
The DIRemoteServlet returned an error. A subsequent error occurred reading the error details from the response: unexpected element type: {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00120
The DIRemoteServlet returned an error. A subsequent error occurred reading the error details from the response: unexpected element name: {0}.

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00121
The expected XML element {0} was not found. Instead, the element {1} of type {2} was found.

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00122
An unexpected XML element name was encountered (expected: {0}, found {1}).

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00123
The expected XML end element {0} was not found. Instead, the element {1} of type {2} was found.

Category:
Session

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00124
The expected XML end element {0} was not found. Instead, the element {1} was found.

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00125
The expected XML attribute {0} for element {1} was not found.

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet is invalid.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00126
An attempt was made to set the row position for control binding {0} to {1}. Iterator has {2} rows.

Category:
Session

Cause:
Row index out of bounds.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00127
A version mismatch was detected for {0}. Version {1} was found, version {2} was expected.

Category:
Requests/Responses

Cause:
The servlet version did not match the required level for the client.

Action:
Upgrade the client and/or server so that compatible versions are in use.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ADFDI-00128
unable to locate the column metadata for column with ID: {0}

Category:
Session

Cause:
The binding container metadata did not match the data returned from the server.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00129
invalid Encode URL response

Category:
Session

Cause:
The response received from the server for this request could not be processed. It may be caused by an exception in the server component.

Action:
Retry your request. The system administrator can check the server logs for more information.

ADFDI-00130
The size of requested resource bundle ({1}) exceeds the maximum allowable limit: {0} bytes.

Category:
Files

Cause:
The size of the resource bundle exceeded the supported size.

Action:
Reduce the size of the resource bundle.

ADFDI-00131
The connection attempt has been canceled.

Category:
Session

Cause:
The attempt to connect to the server was canceled.

Action:
Retry the current action.

ADFDI-00132
unable to execute Wininet method {0}; error code: {1}

Category:
Requests/Responses

Cause:
The Wininet library was unable to provide the requested service.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Retry the current action, confirm connectivity, and/or consult the client logs for more information.

ADFDI-00133
The user session has changed.

Category:
Session

Cause:
The user session timed out or was otherwise invalid.

Action:
Retry the current action, re-login, or re-establish a valid user session.

ADFDI-00134
An attempt to connect to the web application has failed.

Category:
Session

Cause:
The web application may not have been running or may not have been configured to allow client connections.

Action:
Confirm that the web application is accepting connections from a web browser.

ADFDI-00135
The server-side list is not positioned as expected.

Category:
Session

Cause:
The server-side list was not positioned as expected.

Action:
This is an unexpected error condition. The system administrator can check the server logs for more information.

ADFDI-00136
A server side certificate could not be verified. Open Internet Explorer, visit the site that your workbook is attempting to reach, install the certificate, and retry the current action.

Category:
Session

Cause:
A server side certificate could not be verified.

Action:
Open Internet Explorer, visit the site that your workbook is attempting to reach, install the certificate and retry the current action.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ADFDI-00137
The client and server versions are not compatible. Install the client (add-in) that matches the server.

Category:
Deployment

Cause:
The version of the server was not compatible with the version of the client.

Action:
Install the client (add-in) that matches the server. Contact the system administrator and ensure that the client and server versions match.

ADFDI-00138
The current user is not authorized to access the binding container.

Category:
Security

Cause:
The current user did not have the necessary permissions to access the binding container.

Action:
Log out and log back in as a different user, or contact the system administrator to request the necessary permissions.

ADFDI-00139
The setup action has failed unexpectedly. Review the server log files for more information.

Category:
Programmatic

Cause:
The specified setup action failed to execute as expected.

Action:
Review the server logs for more details on the cause of the failure.

ADFDI-00140
An error was encountered while connecting to or communicating with the web application. Details: {0} ({1}: {2}).

Category:
Requests/Responses

Cause:
The client encountered an error when attempting to communicate with the web application.

Action:
Review the server logs for more details on the cause of the failure.

ADFDI-00141
An attempt to establish a user session with the web application has failed.

Category:
Session

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Something has prevented the client from establishing a valid user session with the web application.

Action:
Obtain and send the Connection Failure Report to the system administrator.

ADFDI-00142
The transaction size limit was exceeded.

Category:
Programmatic

Cause:
Too much data was sent to the server without committing any changes to the database.

Action:
Reduce the amount of pending changes and retry the current action.

ADFDI-00143
Failed to locate metadata.

Category:
Configuration

Cause:
The server could not find the metadata requested by the client.

Action:
Contact the system administrator to make sure the workbook metadata is correctly deployed.

ADFDI-00144
Invalid metadata key

Category:
Configuration

Cause:
The key used to reference the client metadata was invalid.

Action:
Contact the workbook developer to correct the metadata key.

ADFDI-00145
A server-side error has occurred when loading metadata.

Category:
Programmatic

Cause:
A server-side error occurred that prevented the client from loading metadata.

Action:
Review the server logs for more details on the cause of the failure.

ADFDI-00146
Invalid ClientMetadata response

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Session

Cause:
The XML response returned from the DIRemoteServlet was invalid.

Action:
Review the server logs for more details on the cause of the failure.

ADFDI-00147
Create savepoint failed

Category:
Session

Cause:
An unexpected error occurred while creating a savepoint.

Action:
Review the server logs for more details on the cause of the failure.

ADFDI-00148
Restore savepoint failed

Category:
Session

Cause:
An unexpected error occurred while restoring a savepoint.

Action:
Review the server logs for more details on the cause of the failure.

ADFDI-00149
An unexpected exception occurred on the server. Review the server logs for more details on the cause of the failure.

Category:
Programmatic

Cause:
An unexpected error occurred while the server handled a client request.

Action:
Review the server logs for more details on the cause of the failure.

ADFDI-00150
Unexpected Java data type. Name: {0}

Category:
Programmatic

Cause:
An attempt was made to use an unsupported Java data type.

Action:
Replace the unsupported data type with a supported type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ADFDI-00151
Unable to save connection failure report: {0}.

Category:
Files

Cause:
There was an unexpected exception while attempting to save the connection failure report to the specified file.

Action:
Review the inner exception details to determine root cause.

ADFDI-00152
The business operation, {0}, could not be completed because the attempt to connect to the server failed.

Category:
Session

Cause:
Something has prevented the client from establishing a valid user session with the web application.

Action:
Save and review the connection failure report.

ADFDI-00153
The business operation, {0}, could not be completed because the attempt to connect to the server was canceled.

Category:
Session

Cause:
The user canceled and prevented the client from establishing a valid user session with the web application.

Action:
Save and review the connection failure report.

ADFDI-00500
Unable to execute WinINet method {0}; error code: {1}

Category:
Requests/Responses

Cause:
The WinINet library was unable to provide the requested service.

Action:
Retry the current action, confirm connectivity, and/or consult the client logs for more information.

ADFDI-00501
An unexpected status: {0} ({1}) was returned from the server while requesting the URL: {2}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Requests/Responses

Cause:
The client was unable to complete its request to the server for the given URL. The server returned an unexpected status code.

Action:
Retry the current action, confirm connectivity, and/or consult the client logs for more information.

ADFDI-00502
The client was unable to establish an unauthenticated session with the web application.

Category:
Requests/Responses

Cause:
An unexpected problem prevented the client from establishing a valid, unauthenticated session with the web application.

Action:
Retry the current action, confirm the authentication configuration and connectivity, and/or consult the client logs and exception details for more information.

ADFDI-00505
An unexpected error has occurred during the current operation. See Details for more information.

Category:
Other

Cause:
There was an unexpected error during the current operation.

Action:
Review configuration and installation. Then, retry the operation.

ADFDI-01001
A validation error occurred for metadata property {0}. Detail: {1}

Category:
Configuration

Cause:
An invalid property value was specified in the configuration metadata.

Action:
Correct the specified property.

ADFDI-01002
A validation warning occurred for metadata property {0}. Detail: {1}

Category:
Configuration

Cause:
An invalid property value was specified in the configuration metadata.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the specified property.

ADFDI-04000
{0} is installed on this computer with an incompatible installer. Please uninstall the currently installed version and retry the installation with the new installer.

Category:
Installation

Cause:
The product was previously installed with an installation method that is not compatible with the current one.

Action:
Remove the previous installation.

ADFDI-04001
The .NET Framework 4.0 is not installed.

Category:
Installation

Cause:
The .NET Framework 4.0 prerequisite was not installed.

Action:
Install the .NET Framework 4.0.

ADFDI-04002
The Visual Studio 2010 Tools for Office Runtime prerequisite is either not installed or does not meet the minimum required version.

Category:
Installation

Cause:
The Visual Studio 2010 Tools for Office Runtime prerequisite was either not installed or did not meet the minimum required version.

Action:
Install Visual Studio 2010 Tools for Office Runtime.

ADFDI-05002
Unable to locate page definition element in {0}

Category:
Programmatic

Cause:
The root element was missing from the page definition file.

Action:
Ensure that the page definition file is well formed.

ADFDI-05006
A component already exists at origin {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
An attempt was made to insert or move a component to a cell that is already in use as the origin of another component.

Action:
Choose a different destination cell for the insertion or move operation.

ADFDI-05012
Unable to locate or open the page definition: {0}. Control bindings are not available for this worksheet. File: {1}.

Category:
Configuration

Cause:
An attempt was made to load the file specified. Either some portion of the file path was invalid, the file did not exist, or the user had insufficient permissions to open the file.

Action:
Ensure that the relevant properties are configured correctly.

ADFDI-05013
There is no page definition selected. Control bindings are not available for this worksheet.

Category:
Configuration

Cause:
User canceled the operation of selecting a page definition.

Action:
Select a valid page definition to associate with the current worksheet.

ADFDI-05016
The workbook, {0}, is missing one or more required settings: ApplicationHomeFolder, WebPagesFolder.

Category:
Configuration

Cause:
The specified workbook was missing one or more settings required for publishing.

Action:
Provide valid values for all settings required for publishing.

ADFDI-05019
The component cannot be placed at the requested location since it would overlap with one or more other components.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt was made to place a component in a position that would overlap with other components.

Action:
Choose a different location that will not overlap.

ADFDI-05021
The destination workbook name, {0}, is already being used by an open workbook. The published workbook name cannot be the same as an open workbook even if the directories are different.

Category:
Files

Cause:
The published workbook name was the same as a workbook that was currently open.

Action:
Choose a different name or close the open workbook.

ADFDI-05022
An unexpected exception has occurred. The workbook {0} cannot be published.

Category:
Other

Cause:
An unexpected exception occurred while attempting to publish the workbook.

Action:
Verify settings, installation, and configuration. Then, retry the operation.

ADFDI-05023
There is a mismatch between the destination file extension, {0}, and source file extension, {1}. The workbook cannot be converted during publication.

Category:
Files

Cause:
The publish destination and source workbooks did not have the same file extension.

Action:
Publish the workbook to a file with the same extension. Or, convert the workbook to the desired type before publishing.

ADFDI-05024
This workbook cannot be published because the format is not supported. Use a supported format like 'Excel Workbook (*.xlsx)'.

Category:
Files

Cause:
The source workbook was not a supported file type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Convert the workbook to a supported type.

ADFDI-05025
The destination file path exceeds the Excel limit of 219 characters. File path: {0}

Category:
Files

Cause:
The file path length exceeded the length limitation imposed by Microsoft Excel.

Action:
Reduce the length of the path and retry the publish operation.

ADFDI-05026
Cannot publish a customizable workbook to the destination: {0}

Category:
Files

Cause:
The customizable workbook was published to a invalid destination.

Action:
Publish the customizable workbook to a location under the public_html directory of the project associated with current workbook.

ADFDI-05027
Unable to load one or more data binding registry files.

Category:
Files

Cause:
One of more data binding registry files could not be loaded.

Action:
Ensure that the affected files are present at the expected locations.

ADFDI-05500
The attempt to re-establish the server state has failed.

Category:
Data

Cause:
A failed attempt was made to re-establish the server state for a new user session.

Action:
Check the configuration of the workbook to ensure that the attributes and actions used to reestablish the server state are defined correctly. Check the server to determine whether data has been deleted.

ADFDI-05501
The value in the cache was not equal to the attribute value. Attribute binding ID: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
The value in the cache was not equal to the attribute value.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05502
Unable to locate control binding {0} in binding container {1}

Category:
Programmatic

Cause:
A failed attempt was made to locate the binding information of a UI component.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05503
An incorrect binding type, {0}, exists for the control binding {1} in the binding container {2}.

Category:
Programmatic

Cause:
The binding type of the component differed from the binding type defined in the binding container.

Action:
Check the configuration of the workbook and retry the operation. Ensure that the control binding type is defined correctly.

ADFDI-05504
Unable to find attribute: {0}

Category:
Programmatic

Cause:
A failed attempt was made to find an attribute in the data context cache.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05505
Unable to find action: {0}

Category:
Programmatic

Cause:
A failed attempt was made to find a restore data context action in the data context cache.

Action:
Check the configuration of the workbook and retry the operation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ADFDI-05506
Unable to find list control binding: {0}

Category:
Programmatic

Cause:
A failed attempt was made to locate the list control binding.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05507
Invalid list control binding: {0}

Category:
Programmatic

Cause:
The binding type of the list control was not valid.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05509
Unable to find component: {0}

Category:
Configuration

Cause:
A failed attempt was made to find the binding of the component.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05510
Unable to insert column; column out-of-bounds

Category:
Programmatic

Cause:
A failed attempt was made to insert a dynamic column into the Table because the column was not within the named range.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05511
Unable to remove column; column out-of-bounds

Category:
Programmatic

Cause:
A failed attempt was made to delete a dynamic column into the Table because the column was not within the named range.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05517
Unable to find the control {0} in the binding container.

Category:
Configuration

Cause:
A failed attempt was made to locate the control in the binding container.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05518
Unable to set expression value for read-only expression

Category:
Configuration

Cause:
A failed attempt was made to set the value for a read-only expression.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05519
Unable to find component method, {0}, to invoke.

Category:
Configuration

Cause:
A failed attempt was made to invoke the specified component method.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05524
Unable to position on the current table row.

Category:
Programmatic

Cause:
A failed attempt was made to update the row position in a table for the purpose of invoking an action set on the row.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05529
Unable to load binding container metadata

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A failed attempt was made to load the metadata that defines the binding container.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05530
This worksheet, {0}, could not be initialized due to an unexpected error. The worksheet cannot be used.

Category:
Session

Cause:
A failed attempt was made to initialize a worksheet.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05537
The integrity of the workbook integration could not be determined. This workbook cannot be used safely. The integration will now terminate.

Category:
Session

Cause:
The server was unable to read the client registry.

Action:
Verify/correct the client registry in the web application.

ADFDI-05538
The workbook integration has been altered after publishing. It can no longer be used safely. The integration will now terminate.

Category:
Session

Cause:
The tampering check has determined that the workbook has been altered.

Action:
Obtain a fresh, unaltered copy of the published workbbook.

ADFDI-05555
Required property {0} missing for component {1}.

Category:
Programmatic

Cause:
Required component property not defined.

Action:
Check the configuration of the workbook and retry the operation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ADFDI-05558
CacheDataContext must specify an action and at least one attribute.

Category:
Configuration

Cause:
The metadata for this worksheet contains one or more invalid CacheDataContext definitions.

Action:
Review and resolve CacheDataContext configuration issues and retry.

ADFDI-05559
Row cache data is invalid.

Category:
Data

Cause:
The row data cached for an ADF Table component is not valid.

Action:
Re-download ADF Table data.

ADFDI-05561
Failed to read multi-sync response as expected.

Category:
Programmatic

Cause:
The number of multi-sync responses did not match the number of multi-sync requests.

Action:
Check your configuration and try the operation again.

ADFDI-05562
Dependent list component has been misconfigured.

Category:
Programmatic

Cause:
The developer has incorrectly configured a list component that depends on another list component.

Action:
Enable verbose logging on the client and review log for additional details on the specific configuration issue.

ADFDI-05563
Restore Server Data Context Cache is corrupted

Category:
Programmatic

Cause:
The hidden cache of data was not in the expected format

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Obtain a new version of the workbook or Clear All Data

ADFDI-05564
The list binding "{0}" has {1} values. Only the first {2} items are stored in the cache.

Category:
Data

Cause:
The number of items in the list exceeded the allowable limit.

Action:
Reduce the number of items in the list. Or, configure the workbook to use a web page dialog for selecting an item from a large list of values.

ADFDI-05565
Unable to retrieve values for the list binding "{0}"

Category:
Programmatic

Cause:
A failed attempt was made to retrieve list values from the server.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05566
Unable to retrieve values for the list binding "{0}", or for one or more of its dependent lists

Category:
Programmatic

Cause:
A failed attempt was made to retrieve list values from the server.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05567
Unable to restore server state. This condition is an unrecoverable error. You will now be logged out of your current session.

Category:
Programmatic

Cause:
The attempt to restore server state failed.

Action:
Log in to the application and retry the operation. Examine the server logs for additional information.

ADFDI-05568
Failed to initialize cache for List binding: {0} in component/column: {1}, owned by type: {2} (in table: {3}).

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
A failed attempt was made to retrieve and cache list values from the server.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05569
Unable to report table status: status column is not visible.

Category:
Configuration

Cause:
The table was configured so that the Status column is not visible.

Action:
Configure the table so that the Status column is visible.

ADFDI-05570
The Automation API encountered an unexpected condition. Details: {0}

Category:
Configuration

Cause:
The Automation API encountered an unexpected condition.

Action:
Check the configuration of the workbook and/or the automation scripts.

ADFDI-05571
Failed to find resource. Alias: {0} Key: {1}

Category:
Configuration

Cause:
The specified alias-key combination could not be located.

Action:
Check the configuration of the workbook and/or resource files.

ADFDI-05572
Failed to find resource bundle. Alias: {0}

Category:
Configuration

Cause:
The specified resource bundle could not be located.

Action:
Check the configuration of the workbook and/or resource files.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ADFDI-05573
Unable to perform the requested action because the worksheet protection could not be changed.

Category:
Configuration

Cause:
A failed attempt was made to temporarily remove protection from the worksheet.

Action:
Check the protection configuration of the worksheet and retry the operation.

ADFDI-05574
You have modified cells in the key column. This operation can lead to data corruption. Your change will now be reverted.

Category:
Data

Cause:
An attempt was made to modify cells in the key column of an ADF Table.

Action:
Do not modify cells in the key column.

ADFDI-05575
Unable to revert the changes to cells in the key column. The affected table(s) should be considered corrupt. You should revert to a previous version.

Category:
Other

Cause:
A failed attempt was made to revert changes to the key column.

Action:
Obtain a fresh copy of the integrated workbook and re-attempt the operation without modifying cells in the key column.

ADFDI-05576
The action, {0}, cannot be invoked in this context.

Category:
Programmatic

Cause:
An attempt was made to invoke a row-level action in a non-row-level action set.

Action:
Remove this action from this action set.

ADFDI-05577
Failed to retrieve table row data from the server.

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A failed attempt was made to retrieve table row data from the server.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05578
The reserved table named range, '{0}', cannot be found or is invalid.

Category:
Configuration

Cause:
A failed attempt was made to access the reserved named range for the table component.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05579
An unexpected error occurred while performing an operation on the table identified by: {0}. Close the workbook without saving it and retry the operation.

Category:
Configuration

Cause:
A failed attempt was made to execute a table operation.

Action:
Close the workbook without saving it and retry the operation.

ADFDI-05580
Unable to bind expression part: {0}

Category:
Configuration

Cause:
A failed attempt was made to bind the expression part.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05581
Unable to write component data into worksheet: {0}

Category:
Programmatic

Cause:
A failed attempt was made to write component data to the worksheet.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-05582
Unable to download flagged rows because the table structure has changed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
The DownloadFlaggedRows action was invoked on a table and the column structure is different from when rows were last downloaded.

Action:
Check the configuration of the worksheet.

ADFDI-05584
Unable to convert: '{0}' to the target time zone. Close the workbook without saving it and retry the operation.

Category:
Data

Cause:
An unexpected failure has occurred while converting date time values from one time zone to another.

Action:
Close the workbook without saving it and retry the operation.

ADFDI-05585
The {0} element in the dialog page {1} should be a element; the type <{2}> is not supported.

Category:
Configuration

Cause:
The HTML tag used for the reserved element in the dialog page was not supported.

Action:
Contact the developer of this dialog page to use tag for the reserved element

ADFDI-05586
Failed to hook event handler to the {0} element due to {1}. Closing the dialog with client side scripts is disabled.

Category:
Other

Cause:
Unable to hook an event handler to the reserved html element in the dialog page.

Action:
Close the dialog manually if it is not closed automatically. The developer of this dialog page should avoid using client side scripts to change the value of the reserved element.

ADFDI-05587
The client and server versions do not match. Using this version of the client may result in unexpected behavior or errors.

Category:
Upgrade

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The client and server versions did not match.

Action:
Install a client that matches the server version.

ADFDI-05588
The number of resource bundles ({1}) exceeds the supported limit of {0}.

Category:
Files

Cause:
The number of resource bundles exceeded the supported limit.

Action:
Reduce the number of resource bundles in this workbook.

ADFDI-05589
You are not authorized to use this worksheet for interacting with the web application.

Category:
Security

Cause:
The current user did not have the necessary permissions to access the page definition file associated with this worksheet.

Action:
Log out and log back in as a different user, or contact the system administrator to request the necessary permissions.

ADFDI-05591
The user session has changed. Re-try the operation.

Category:
Session

Cause:
The user session changed during the execution of an action set.

Action:
The end-user should re-try the operation.

ADFDI-05592
Too much changed data was uploaded.

Category:
Data

Cause:
The amount of changed data that was uploaded exceeds the web application limit.

Action:
Retry the operation with less changed data.

ADFDI-05594
Failed to load the client metadata

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Requests/Responses

Cause:
A failure occured when loading the client metadata

Action:
Check the client and server logs for details about the failure.

ADFDI-05595
DownloadForInsert action ignored for table: {0}. InsertRowEnabled is false.

Category:
Programmatic

Cause:
DownloadForInsert action was included in an action-set, but was not applicable since InsertRowEnabled was false.

Action:
The developer should remove the action, or alter the table so that InsertRowEnabled is true.

ADFDI-05597
Dynamic columns are always visible. Ignoring Visible expression: {0}

Category:
Metadata

Cause:
The workbook configuration specified a Visible expression for a dynamic column

Action:
The developer should adjust the configuration: remove the Visible expression or set Dynamic to True.

ADFDI-05598
TableRowErrorsCache '{0}' is out of space. All previous entries will be purged.

Category:
Other

Cause:
The worksheet storing error message details was out of space.

Action:
No action required.

ADFDI-05599
The source scheme is not supported: {0}.

Category:
Configuration

Cause:
The specified URL had an unsupported scheme.

Action:
The workbook developer should use a URL with a supported scheme.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ADFDI-05600
The URL is invalid: {0}.

Category:
Configuration

Cause:
The specified URL was incorrectly formatted.

Action:
The developer should verify and correct the URL.

ADFDI-05601
Invalid binding attribute {0} in ADF Input Date component/column: {1}.

Category:
Configuration

Cause:
The datatype of binding attribute was not date or datetime.

Action:
Use ADF Input Date only for attributes with date or datetime type.

ADFDI-05602
Unable to capture server state.

Category:
Session

Cause:
The attempt to save the current server state failed.

Action:
Log in to the application and retry the operation. Examine the server logs for additional information.

ADFDI-05603
Unable to create a temporary row.

Category:
Programmatic

Cause:
The attempt to create a temporary row failed.

Action:
Log in to the application and retry the operation. Examine the server logs for additional information.

ADFDI-05604
Unable to launch the update web page in the default web browser. Check the default browser settings and try again.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The default web browser could not successfully be launched.

Action:
Check the default browser settings.

ADFDI-05605
Unable to evaluate a nested custom property in EL.

Category:
Configuration

Cause:
A custom property string value referenced in EL was found to contain custom property EL within its value.

Action:
The developer needs to modify the custom property value to remove nested custom property EL.

ADFDI-05606
Status initialized row(s) downloaded into table {0} will be ignored since InsertRowEnabled is false.

Category:
Programmatic

Cause:
One or more status initialized rows were downloaded into the table, but would be ignored since InsertRowEnabled is false.

Action:
The workbook developer should ensure that no status initialized rows are downloaded, or alter the table so that InsertRowEnabled is true.

ADFDI-05607
Unable to load requested resource bundle: {0}.

Category:
Configuration

Cause:
A resource bundle specified in the workbook metadata could not be located/loaded.

Action:
The developer needs to check the configuration of the workbook and ensure that the resource bundle is accessible.

ADFDI-06000
Workbook {0} is not enabled for {1}.

Category:
Files

Cause:
The specified workbook was not the expected type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Specify only workbooks enabled for use with this product.

ADFDI-06001
An unexpected exception has occurred. The workbook {0} cannot be published.

Category:
Other

Cause:
An unexpected exception occurred while attempting to publish the workbook.

Action:
Verify settings, installation, and configuration. Then, retry the operation.

ADFDI-06002
Error parsing the command line arguments.

Category:
Configuration

Cause:
The command line arguments were not specified in the correct format.

Action:
Check the usage of the tool and correct the input format.

ADFDI-06003
Unexpected arguments specified: {0}

Category:
Configuration

Cause:
The number of command line arguments exceeded the expected number.

Action:
Specify only the expected arguments.

ADFDI-06005
The source workbook filepath is relative: {0}

Category:
Configuration

Cause:
The source workbook path provided was relative, not absolute.

Action:
Provide a fully-qualified file path.

ADFDI-07507
given buffer size is incorrect; given: {0}

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An incorrect value was supplied for the Workbook Parameters buffer size.

Action:
Ensure that compatible versions of the client and server framework are in use. Check the workbook configuration and retry the operation with a different workbook.

ADFDI-07508
did not find expected start tag; found: {0}

Category:
Data

Cause:
The workbook's internal format may be corrupted.

Action:
Ensure that compatible versions of the client and server framework are in use. Check the workbook configuration and retry the operation with a different workbook.

ADFDI-07509
did not find expected end tag; found: {0}

Category:
Data

Cause:
The workbook's internal format may be corrupted.

Action:
Ensure that matching versions of the client and server framework are in use. Check the workbook configuration and retry the operation with a different workbook.

ADFDI-07510
mode length is incorrect; found: {0}

Category:
Data

Cause:
The workbook's internal format may be corrupted.

Action:
Ensure that compatible versions of the client and server framework are in use. Check the workbook configuration and retry the operation with a different workbook.

ADFDI-07511
AppRoot length is incorrect; found: {0}

Category:
Data

Cause:
The workbook's internal format may be corrupted.

Action:
Ensure that compatible versions of the client and server framework are in use. Check the workbook configuration and retry the operation with a different workbook.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ADFDI-07512
Workbook initialization parameters length is incorrect; found: {0}

Category:
Session

Cause:
The workbook's internal format may be corrupted.

Action:
Ensure that compatible versions of the client and server framework are in use. Check the workbook configuration and retry the operation with a different workbook.

ADFDI-07513
Destination length {0} is less than found length {1}.

Category:
Data

Cause:
Internal buffer size mismatch detected.

Action:
Ensure that compatible versions of the client and server framework are in use. Check the workbook configuration and retry the operation with a different workbook.

ADFDI-07516
A worksheet version mismatch was detected in worksheet {0}. Version {1} was found, version {2} was expected.

Category:
Data

Cause:
The workbook's internal format may be corrupted, or incompatible versions of the framework are in use.

Action:
Ensure that compatible versions of the framework are in use; upgrade the workbook and framework.

ADFDI-07517
There are no more rows available in the metadata worksheet {0}.

Category:
Data

Cause:
The maximum capacity for storing metadata has been reached, or the workbook's internal format may be corrupted.

Action:
Remove some components from the workbook in order to free up space.

ADFDI-07518
The workbook has no metadata.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
The workbook may be corrupted or the metadata has been erased manually.

Action:
Publish the workbook and try again or contact administrator.

ADFDI-07520
Unable to evaluate the expression '{0}' in '{1}'. Detail: {2}

Category:
Programmatic

Cause:
A failed attempt was made to evaluate an invalid expression.

Action:
Verify and correct the expression.

ADFDI-07521
Unable to evaluate the Excel formula '{0}' in '{1}'. Detail: {2}

Category:
Programmatic

Cause:
A failed attempt was made to evaluate an invalid Excel formula.

Action:
Verify and correct the Excel formula.

ADFDI-07522
Unable to execute the command '{0}' while a cell is in edit mode. Accept or cancel the changes to the current cell and then retry the command.

Category:
Programmatic

Cause:
An attempt was made to invoke a menu or toolbar command while a cell is open in editing mode.

Action:
Accept or cancel the changes to the current cell and then retry the command.

ADFDI-07527
The workbook designer could not initialize due to an unexpected error. The designer cannot be used with this workbook.

Category:
Session

Cause:
A failed attempt was made to initialize the workbook for Design Time mode.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-07528
This workbook could not be initialized due to an unexpected error. The workbook integration cannot be used.

Category:
Session

Cause:
A failed attempt was made to initialize the workbook for Run Time mode.

Action:
Check the configuration of the workbook and retry the operation. Ensure that the web application is running and accepting requests.

ADFDI-07529
An unexpected exception has occurred. The workbook cannot initialize and will now abort.

Category:
Session

Cause:
A failed attempt was made to initialize the workbook for an unknown mode.

Action:
Check the configuration of the workbook and retry the operation.

ADFDI-07530
An unexpected exception has occurred. The workbook cannot switch to test mode.

Category:
Session

Cause:
A failed attempt was made to switch from Design Time mode to Test mode.

Action:
Check the configuration of the workbook and retry the operation. Ensure that the web application is running and accepting requests.

ADFDI-07532
The workbook {0} cannot be used with this installation of {1}.

Category:
Installation

Cause:
An attempt was made to open a design-time or test mode workbook using the add-in installed for runtime use.

Action:
Use only published workbooks with the add-in installed for runtime use. Enable the designer tools in order to use workbooks in other modes.

ADFDI-07538
The Automation API encountered an unexpected condition. Details: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
The Automation API encountered an unexpected condition.

Action:
Check the configuration of the workbook and/or the automation scripts.

ADFDI-07541
Unable to write metadata to file: {0}

Category:
Files

Cause:
There was an unexpected exception while attempting to write the XML to the specified file.

Action:
Review the inner exception details to determine root cause.

ADFDI-07542
Unable to import workbook configuration metadata.

Category:
Files

Cause:
There was an unexpected exception while attempting to load the workbook configuration metadata into the current workbook.

Action:
Review the inner exception details to determine root cause.

ADFDI-07543
Unable to import workbook configuration metadata due to schema validation failures.

Category:
Files

Cause:
The attempt to import workbook configuration metadata failed due to XML schema validation failures.

Action:
Review the client logs for detailed information on the schema validation failures and correct the XML.

ADFDI-07544
Unexpected exception during write to metadata cache. The workbook may be corrupted.

Category:
Files

Cause:
The attempt to write workbook configuration metadata failed while writing to the cache.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Discard the workbook and review the inner exception details to determine root cause.

ADFDI-07545
Unable to display help file.

Category:
Other

Cause:
The attempt to display the help file failed unexpectedly.

Action:
Check the local browser and network settings. Then, retry the operation.

ADFDI-07546
Duplicate component id detected during import: {0}. Replacing with {1}.

Category:
Other

Cause:
A duplicate component id was found.

Action:
Review and update any dependencies on the old component id.

ADFDI-07547
Unable to save diagnostic report: {0}.

Category:
Files

Cause:
There was an unexpected exception while attempting to save diagnostic report to the specified file.

Action:
Review the inner exception details to determine root cause.

ADFDI-07548
The value '{0}' is not valid for the property {1}.

Category:
Configuration

Cause:
The property value entered was not valid.

Action:
Enter a valid property value.

ADFDI-07550
There was a problem loading the user settings file.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An unexpected problem prevented the program from properly reading or parsing the user settings file.

Action:
Check whether the file is accessible or has become corrupted. Delete the file and retry the operation.

ADFDI-07551
There was a problem writing to the user settings file.

Category:
Configuration

Cause:
An unexpected problem prevented the program from properly creating and/or writing to the user settings file.

Action:
Check whether the file is accessible and that sufficient disk space is available. Retry the operation.

ADFDI-07553
This workbook contains features that are incompatible with this version of {0}. This workbook will now be disabled.

Category:
Files

Cause:
This workbook was edited by a newer version of ADFdi and includes new features that are incompatible with earlier versions. In rare cases, this condition might be the result of a corrupted workbook.

Action:
Install a newer version of the client and re-open the workbook.

ADFDI-50001
Resource bundle not found. bundle: {0}

Category:
Configuration

Cause:
Unable to load the desired resource bundle class.

Action:
Review the server logs for additional detail on the underlying cause.

ADFDI-50002
Resource key not found. bundle: {0} key: {1}

Category:
Configuration

Cause:
Unable to find the desired key in the bundle.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the server logs for additional detail on the underlying cause.

ADFDI-55000
An unexpected exception occurred on the server. Consult the server logs for more detail.

Category:
Requests/Responses

Cause:
An unexpected condition arose while handling the desktop integration request.

Action:
Review the server logs for additional detail on the underlying cause.

ADFDI-55001
XML element {0} missing required attribute {1}

Category:
Requests/Responses

Cause:
Invalid request XML was received.

Action:
Review the server logs to ensure that only supported clients are accessing the ADFdi Remote Servlet.

ADFDI-55002
The object, {0}, is not available.

Category:
Configuration

Cause:
An expected object was not found or was unavailable.

Action:
Ensure that both the client and server metadata are configured correctly.

ADFDI-55003
The object, {0}, is not available. Name: {1}

Category:
Configuration

Cause:
An expected object was not found or was unavailable.

Action:
Ensure that both the client and server metadata has been configured correctly.

ADFDI-55004
invalid GetResourceBundle request XML

Category:
Requests/Responses

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55005
invalid SyncModel request XML

Category:
Requests/Responses

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55006
unexpected value specified for XML element {0}

Category:
Requests/Responses

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55007
invalid request XML

Category:
Requests/Responses

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55008
invalid request method: {0}

Category:
Requests/Responses

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55009
user session unavailable

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Session

Cause:
The user was not authenticated.

Action:
No action is required.

ADFDI-55010
expected XML element {0}; current element is {1}

Category:
Requests/Responses

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55011
unexpected end-of-file in XML input stream

Category:
Requests/Responses

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55012
invalid XML element: {0}

Category:
Requests/Responses

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55013
expected XML reader state {0}; current state is {1}

Category:
Requests/Responses

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ADFDI-55014
invalid child XML element {1} within XML element {0}

Category:
Requests/Responses

Cause:
The XML request sent by the client was invalid.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55017
The current row count exceeds the configured limit.

Category:
Data

Cause:
The maximum number of rows requested by the client was exceeded.

Action:
Submit a new request that conforms to the limit.

ADFDI-55018
exception occurred while reading an XML request

Category:
Requests/Responses

Cause:
A malformed request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55019
exception occurred while writing the XML response

Category:
Requests/Responses

Cause:
Details about the underlying cause of the error are contained in the server logs.

Action:
Review the server logs for details about additional steps to take.

ADFDI-55021
A version mismatch was detected for {0}. Version {1} was found, version {2} was expected.

Category:
Requests/Responses

Cause:
The client version does not match the required level for the DIRemoteServlet.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Upgrade the client and/or server so that compatible versions are in use.

ADFDI-55022
invalid SessionStatus request XML

Category:
Requests/Responses

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55023
invalid MultiSyncModel request XML

Category:
Requests/Responses

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55025
The control binding definition for item {0} is incorrect or incompatible. {1}

Category:
Requests/Responses

Cause:
The control binding definition has been misconfigured, or an incompatible control binding has been encountered.

Action:
Check the control binding definition and ensure that only supported control bindings are used.

ADFDI-55026
invalid TamperCheck request XML

Category:
Requests/Responses

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55027
invalid EncodeURL request XML

Category:
Requests/Responses

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55028
unexpected value specified for XML element {0}: {1}

Category:
Requests/Responses

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

ADFDI-55030
Cannot find the client registry file: {0}

Category:
Requests/Responses

Cause:
System could not find the client registry file in the web-inf location.

Action:
Contact administrator

ADFDI-55031
An error occurred while trying to read client registry file

Category:
Requests/Responses

Cause:
While trying to read the client registry file, an I/O error occurred.

Action:
Check logs for details of I/O error and address root case to enable file access.

ADFDI-55032
Unable to set attribute {0} (row object unavailable: {1})

Category:
Requests/Responses

Cause:
Client attempted to set an attribute value when no server row is available.

Action:
Refresh the client data and retry the operation.

ADFDI-55033
{0}: cannot convert the input value ({1}) to the expected data type ({2}).

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Requests/Responses

Cause:
The input values were not consistent with expected data type.

Action:
Correct input values according to data type.

ADFDI-55034
Tamper check is disabled.

Category:
Configuration

Cause:
The servlet was configured to disable the tamper check feature.

Action:
Adjust servlet initialization parameters as desired.

ADFDI-55035
Tamper check did not succeed. Result: {0}

Category:
Data

Cause:
Tamper check was unable to match the hashcode of the client to the expected value.

Action:
Adjust the configuration of tamper check or obtain a new copy of the workbook.

ADFDI-55036
Received a request with unexpected content type: {0}

Category:
Requests/Responses

Cause:
A request with an unexpected content type was received.

Action:
Use only supported content types.

ADFDI-55037
Tamper check is configured to allow missing entries.

Category:
Configuration

Cause:
The tamper check feature was configured to allow missing entries.

Action:
Adjust servlet initialization parameters as desired.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ADFDI-55038
The region binding includes an unsupported control type: {0}

Category:
Configuration

Cause:
The page definition was configured to use an unsupported control type.

Action:
Remove the unsupported type.

ADFDI-55039
Unexpected servlet failure

Category:
Requests/Responses

Cause:
The servlet has failed due to an unexpected condition.

Action:
Review the server logs for more information.

ADFDI-55040
Unable to read requested resource bundle: {0}

Category:
Configuration

Cause:
An attempt was made to load a resource bundle that was not available.

Action:
Review the configuration to ensure that the resource bundle is available.

ADFDI-55041
Aborting the commit action for a transaction.

Category:
Data

Cause:
The commit action was aborted for the transaction due to error in the binding container.

Action:
Clear the error conditions and retry the operation.

ADFDI-55042
Unable to set position for {0} with value {1}

Category:
Data

Cause:
A failed attempt was made to position a control binding by attribute value.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Refresh the client data and retry the operation or review the server logs for more information.

ADFDI-55043
Unable to locate parameter {0} for binding container {1}

Category:
Configuration

Cause:
A failed attempt was made to set a parameter.

Action:
Review the configuration to ensure that the parameter is available.

ADFDI-55044
user session has changed

Category:
Session

Cause:
The client user session timed out or was otherwise invalid.

Action:
Establish a valid user session.

ADFDI-55045
unable to set position to row {0}

Category:
Data

Cause:
A failed attempt was made to position a control binding by row index value.

Action:
Refresh the client data and retry the operation or review the server logs for more information.

ADFDI-55046
A value is required for {0}.

Category:
Data

Cause:
An attempt was made to set an empty value for a mandatory attribute.

Action:
Provide a non-empty value for this property.

ADFDI-55047
retry failed for batch request #{0}

Category:
Requests/Responses

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A failed attempt was made to retry a successful batch request after restoring to datacontrol savepoint.

Action:
Review the server logs for more details about the cause of the failure.

ADFDI-55048
The current user is not authorized to access the binding container: {0}

Category:
Security

Cause:
The current user did not have the necessary permissions to access the binding container.

Action:
Log out and log back in as a different user, or contact the system administrator to request the necessary permissions.

ADFDI-55049
unable to run the setup action: {0}

Category:
Programmatic

Cause:
The specified setup action was either unavailable on the server or failed with an exception.

Action:
Review the configuration to ensure the setup action id is correct, and see server logs for more details on the cause of failure.

ADFDI-55051
The transaction size limit was exceeded

Category:
Data

Cause:
Too much data was sent to the server without committing any changes to the database.

Action:
Reduce the amount of pending changes and retry the current action.

ADFDI-55052
invalid client metadata request

Category:
Requests/Responses

Cause:
An invalid request was received.

Action:
Review the server logs to ensure that only supported clients are accessing this servlet.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ADFDI-55053
Row changes could not be applied: resubmit the changes.

Category:
Requests/Responses

Cause:
Some other errors prevented the changes for this row from being applied.

Action:
Correct the other errors and retry the operation.

ADFDI-55054
Unable to position a range paging rowset with pending changes.

Category:
Data

Cause:
An attempt was made to navigate a rowset in range paging mode when the rowset has pending changes.

Action:
Commit or rollback pending changes before navigating.

ADFDI-55055
Authorization enforcement has been disabled for this instance of {0}

Category:
Security

Cause:
The web application was configured so that authorization will not be enforced by ADF Desktop Integration.

Action:
Configure the web application so that authorization is enforced by ADF Desktop Integration.

ADFDI-55056
{0} cannot be updated to an error value.

Category:
Data

Cause:
The value entered is an error value.

Action:
Refer to the client documentation for how to resolve the error value.

ADFDI-55057
The value "{0}" cannot be found in the list of items for "{1}".

Category:
Data

Cause:
An attempt was made to set a list to an invalid value.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Choose a value from the available list of items.

ADFDI-55502
The length of the source data, {0}, is greater than the size of the destination buffer, {1}.

Category:
Data

Cause:
Internal buffer size mismatch was detected.

Action:
Ensure that compatible versions of the client and server framework are in use. Check the workbook configuration and retry the operation with a different workbook.

ADFDI-55510
unable to find expected workbook parameters start tag; found: {0}

Category:
Data

Cause:
The internal format of the workbook might be corrupted.

Action:
Run the workbook admin tool on this workbook. Ensure that compatible versions of the client and server framework are in use.

ADFDI-55511
unable to find expected workbook parameters end tag; found: {0}

Category:
Data

Cause:
The internal format of the workbook might be corrupted.

Action:
Run the workbook admin tool on this workbook. Ensure that compatible versions of the client and server framework are in use.

ADFDI-55512
The workbook parameters buffer size is incorrect: {0}.

Category:
Data

Cause:
The internal format of the workbook might be corrupted.

Action:
Run the workbook admin tool on this workbook. Ensure that compatible versions of the client and server framework are in use.

ADFDI-55513
The workbook parameters mode length is incorrect: {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
The internal format of the workbook might be corrupted.

Action:
Run the workbook admin tool on this workbook. Ensure that compatible versions of the client and server framework are in use.

ADFDI-55514
The workbook parameters application root length is incorrect: {0}.

Category:
Data

Cause:
The internal format of the workbook might be corrupted.

Action:
Run the workbook admin tool on this workbook. Ensure that compatible versions of the client and server framework are in use.

ADFDI-55515
The workbook parameters collection length is incorrect: {0}.

Category:
Session

Cause:
The internal format of the workbook might be corrupted.

Action:
Run the workbook admin tool on this workbook. Ensure that compatible versions of the client and server framework are in use.

ADFDI-55516
Unexpected filter failure

Category:
Requests/Responses

Cause:
The filter has failed due to an unexpected condition.

Action:
Review the server logs for more information.

Copyright © 2000, 2026, Oracle and/or its affiliates.

2

BEA-000001 to BEA-2194843

BEA-000001
Server must be started by Node Manager when consensus leasing is enabled.

Category:
ConsensusLeasing

Cause:
The server was not started by Node Manager.

Action:
Start the server using Node Manager.

BEA-000101
Cannot resolve ClusterAddress: {0}

Category:
Cluster

Cause:
The cluster address {0} could not be resolved. ClusterAddress should be a DNS name that maps to multiple IP addresses.

Action:
Set the correct ClusterAddress property for the cluster.

BEA-000102
Joining cluster {0} on {1}:{2}

Category:
Cluster

Cause:
The server has joined cluster {0}.

Action:
No action is required.

BEA-000103
Disconnecting from cluster {0}

Category:
Cluster

Cause:
When a server is suspended, it is no longer a member of cluster {0}.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-000104
Cluster members are running incompatible versions. Local version: {0}. Remote version ({1}): {2}

Category:
Cluster

Cause:
This server is a different version than other servers in this cluster.

Action:
Ensure that all members of this cluster are running the same version.

BEA-000105
The server is leaving the cluster because it is an incompatible version.

Category:
Cluster

Cause:
This server is running a different version of WebLogic Server.

Action:
Set a different multicast address for this cluster. Use an address in the range of 224.0.0.0 - 239.255.255.255. Avoid the reserved range 224.0.0.0 - 224.0.1.255.

BEA-000107
Failed to install {0} in place of those currently installed due to {1}.

Category:
Cluster

Cause:
An error occurred while resolving non-local conflicting offers for a node in the JNDI tree.

Action:
Check the preceding conflict start message in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-000108
Attempt to retract offer {0}, which is neither installed nor pending.

Category:
Cluster

Cause:
An attempt was made to retract an offer, which was neither previously installed nor is in the conflict resolution stage.

Action:
No action is required.

BEA-000109
An error occurred while sending multicast message: {0}.

Category:
Cluster

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred while trying to send a message over multicast.

Action:
WebLogic Server will try to recover from this error. If the problem continues to persist, make sure that the network infrastructure and NIC are functioning properly. If you believe no environment problems exist, contact My Oracle Support and provide the stack trace for further analysis.

BEA-000110
Multicast socket receive error: {0}.

Category:
Cluster

Cause:
An error occurred while trying to receive a message over the multicast.

Action:
Ensure that the NIC is functioning properly. If it appears that no environment problems exist, contact My Oracle Support and provide the stack trace for further analysis.

BEA-000111
Adding {0} with ID:{2} to cluster:{1} view.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000112
Removing {0} with ID:{2} from cluster:{1} view due to timeout.

Category:
Cluster

Cause:
Removing {0} from cluster as it failed to send heartbeats in the past 30 seconds.

Action:
If a server has been shut down or suspended, no action is required. If the remote server {0} appears to be hung, take thread dumps and send them to My Oracle Support.

BEA-000113
Removing {0} from cluster view due to PeerGone.

Category:
Cluster

Cause:
The TCP/IP connection to server {0} was lost.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
If a server has been shut down or suspended, no action is required. If the remote server {0} appears to be hung, take thread dumps and send them to My Oracle Support.

BEA-000114
Failed to find cluster license: {0}

Category:
Cluster

Cause:
A valid license file is required to run clusters.

Action:
Contact an Oracle sales representative for a valid license.

BEA-000115
Lost {0} multicast message(s).

Category:
Cluster

Cause:
This is an informational message. When a server joins a stable cluster, this message will appear since multicast messages sent out by servers in the cluster were not received.

Action:
No action is required.

BEA-000116
Failed to join cluster {0} at address {1} due to: {2}.

Category:
Cluster

Cause:
This happens if you specify an incorrect multicast address for the cluster. Use an address in the range of 224.0.0.0 - 239.255.255.255. Avoid the reserved range 224.0.0.0 - 224.0.1.255.

Action:
Set a valid multicast address and try again.

BEA-000117
Received a stale replication request for object {0}.

Category:
Cluster

Cause:
This happens when a network problem exists, or one of the servers is taking a long time to collect garbage, causing the virtual machine to freeze.

Action:
Tune garbage collection so that it does not pause. If the problem still persists, contact My Oracle Support.

BEA-000118
Lost {0} replication updates of object {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Cluster

Cause:
If the secondary failed to receive some of the updates, it indicates this to the primary server by causing a NotFoundException to the primary so that the primary server can recreate the session state.

Action:
No action is required.

BEA-000119
Missing multicast address for cluster: {0}. Set the MulticastAddress="a.b.c.d" property for the cluster. Use an address in the range of 224.0.0.0 - 239.255.255.255. Avoid the reserved range 224.0.0.0 - 224.0.1.255.

Category:
Cluster

Cause:
The cluster does not have a defined multicast address.

Action:
Specify a valid multicast address.

BEA-000120
Received error while creating ClusterRuntimeMBean.

Category:
Cluster

Cause:
The JMX framework failed to initialize the ClusterRuntimeMBean.

Action:
Check the cluster configuration. If it appears that there are no configuration problems, contact My Oracle Support.

BEA-000121
Two domains in the same LAN should not use the same multicast address. Domains in conflict are {0} and {1}.

Category:
Cluster

Cause:
Two clusters on the local area network are using the same multicast address.

Action:
Change the multicast address of either domain {0} or {1}.

BEA-000122
Clusters {0} and {1} cannot use the same multicast address.

Category:
Cluster

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Multiple clusters in the same domain are using the same multicast address.

Action:
For efficiency purposes, use two different multicast addresses.

BEA-000123
Conflict start: You tried to bind an object under the name {0} in the JNDI tree. The object {1} is non-clusterable, and you have tried to bind more than once from two or more servers. Such objects can only be deployed from one server.

Category:
Cluster

Cause:
The cluster is not homogeneous. Two servers in the cluster are providing different services under the same name {0}. If the object is non-clusterable, only one server in the cluster can provide this service.

Action:
There are various options. 1. Make the object clusterable. 2. Change the JNDI name of the object under which it is bound. 3. Make sure the object gets deployed only on one server. 4. Deploy the service on all the servers. However, binding it into the JNDI tree, set the replicate bindings property to false.

BEA-000124
Conflict start: The object {1} you tried to bind under the name {0} in the JNDI tree is clusterable but is incompatible. Ensure that all the servers in the cluster use an identical copy of the object.

Category:
Cluster

Cause:
The object {1} is clusterable. However, it implements different or incompatible interfaces on different servers.

Action:
Ensure that all the servers in the cluster use an identical copy of the object.

BEA-000125
Conflict resolved: {0} for the object {1} under the bind name {0} in the JNDI tree.

Category:
Cluster

Cause:
Corrective action was taken to resolve the conflict.

Action:
No action is required.

BEA-000126
All session objects should be serializable to replicate. Check the objects in the session. Failed to replicate a non-serializable object.

Category:
Cluster

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Objects in the session are not serializable or externalizable.

Action:
Ensure that all user-defined objects in the HTTP session are serializable.

BEA-000127
Adding {0} to the cluster.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000128
Updating {0} in the cluster.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000129
Removing {0} from the cluster.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required unless you did not shut down a server.

BEA-000133
Waiting to synchronize with other running members of {0}.

Category:
Cluster

Cause:
The cluster member is waiting to synchronize cluster information with other cluster members before completing startup and entering running mode.

Action:
No action is required.

BEA-000137
Error sending multicast message: {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Cluster

Cause:
The multicast message failed to send due to an IOException.

Action:
Enable cluster debugging to see a detailed message.

BEA-000138
Listening for announcements from cluster {0} on {1}:{2}.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000139
There are two clusters in the network that are possibly running different versions of WebLogic Server. These two clusters probably have the same name {0} and they are using the same address {1} and port {2}.

Category:
Cluster

Cause:
There are two clusters in the network that are possibly running different versions of WebLogic Server. These two clusters probably have the same name {0} and they are using the same address {1} and port {2}.

Action:
Change either the multicast address or the multicast port.

BEA-000140
Failed to deserialize statedump from server {0} with {1}.

Category:
Cluster

Cause:
The server failed to deserialize an object since it does not have the class definition. This usually happens if the application classes are not deployed on all the nodes in the cluster. It is preferable to deploy beans to all the nodes of the cluster.

Action:
Ensure that all the classes are available on all the nodes of the cluster.

BEA-000141
TCP/IP socket failure occurred while fetching state dump over HTTP from {0}.

Category:
Cluster

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An IOException occurred in the operating system.

Action:
Ensure that no problems exist in the network. If the problem persists, contact My Oracle Support with the stack trace for further analysis.

BEA-000142
Trying to download cluster JNDI tree from server {0}.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000143
Trying to download {1} from a server listening on {0}.

Category:
Cluster

Cause:
This is an informational message.

Action:
If this message continues to appear, ensure that the network is stable. Contact My Oracle Support for further assistance.

BEA-000144
Managed Server {0} has been suspended or shut down.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000145
Managed Server {0} is tagged as a migratable server. A cluster that has migratable servers should configure a JDBC data source to ensure that the migratable server is highly available.

Category:
Cluster

Cause:
The cluster is misconfigured.

Action:
Configure the DataSourceForAutomaticMigration property.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-000147
Server "{0}" failed to renew lease in the {1}.

Category:
Cluster

Cause:
The server failed to renew the lease on time.

Action:
No action is required.

BEA-000148
Migratable server "{0}" is misconfigured. For automatic migration, a pool of machines should be assigned to the cluster or each migratable server in the cluster should have at least a couple of machines assigned to it for automatic migration.

Category:
Cluster

Cause:
The migratable server is misconfigured.

Action:
Ensure that the server is targeted to a machine and restart the migratable server.

BEA-000149
Server failed to get a connection to the {1} during {0}.

Category:
Cluster

Cause:
The database or the consensus leasing basis appears to be down.

Action:
Ensure that the database is accessible to the cluster. In the case of consensus leasing basis the server is in the minority partition and the leasing basis is in some other partition that is not reachable.

BEA-000150
Server failed to get a connection to the {1} in the past {0} seconds for lease renewal. Or, Server could get a connection but failed to renew the lease. Server will shut itself down.

Category:
Cluster

Cause:
The database or consensus leasing basis appears to be down.

Action:
Ensure that the database is accessible to the cluster. In the case of consensus leasing basis, the server is in the minority partition and the leasing basis is in some other partition that is not reachable. If this message continues to appear even when the database is accessible, something may be wrong in the database. Contact My Oracle Support for further assistance.

BEA-000151
Server "{0}" has taken over the role of Cluster Master.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000152
Server "{0}" lost the privileges to be the Cluster Master.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000153
Cluster is misconfigured. For automatic migration, a pool of machines should be assigned to the cluster or each migratable server in the cluster should at least have a couple of machines assigned to it for automatic migration.

Category:
Cluster

Cause:
The cluster is misconfigured.

Action:
Assign a pool of machines for automatic migration and refer to WebLogic Server documentation for more details.

BEA-000154
Cluster is misconfigured. The remote cluster address {0} is not a valid URL.

Category:
Cluster

Cause:
The server is misconfigured.

Action:
Set the correct remote cluster address and restart the servers. If it is not clear on how to set remote ClusterAddress, refer to WebLogic Server documentation.

BEA-000155
Configured cluster address is invalid : {0}. Constructing cluster address dynamically.

Category:
Cluster

Cause:
The cluster configuration is invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the cluster address contains either a DNS name or a comma-separated host list (or IP list) or a comma-separated host:port list (or IP:port list).

BEA-000156
Could not send out new attributes for cluster member {0}: {1}.

Category:
Cluster

Cause:
There was a problem sending out changed member attributes.

Action:
Examine the server logs.

BEA-000158
Server has stopped sending cluster heartbeats and announcements. It is still receiving heartbeats and announcements from other cluster members.

Category:
Cluster

Cause:
The server is going out of the cluster as a result of the suspend or shutdown operation.

Action:
No action is required

BEA-000159
The clocks of the machines hosting local server and remote server "{0}" are off by {1} seconds

Category:
Cluster

Cause:
The clocks of the machines hosting servers in the cluster are not synchronized.

Action:
Ensure that all the machines are synchronized to the same time.

BEA-000160
A request to synchronize the JNDI tree has been made over an insecure channel. Configure a secure HTTP channel for all of the servers in the cluster.

Category:
Cluster

Cause:
The cluster was configured to encrypt multicast data but the request to synchronize the JNDI tree was done on a non-secure channel (HTTP). To secure the cluster completely, configure a secure HTTP channel for all of the servers in the cluster.

Action:
Configure a secure HTTP channel on all of the servers in the cluster.

BEA-000161
Multicast message from server {0} appears to have been tampered with.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Cluster

Cause:
The authenticity of the message could not be verified.

Action:
Ensure that the network is not being hijacked.

BEA-000162
Starting "{0}" replication service with remote cluster address "{1}"

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000163
Stopping "{0}" replication service

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000164
Synchronized cluster JNDI tree from server {0}.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000165
Some other domain has a cluster that is configured to use the same multicast address and port as a cluster in {0}. Two domains in the same LAN should not use the same multicast address.

Category:
Cluster

Cause:
Two clusters on the local area network are using the same multicast address.

Action:
Change the multicast address of either domain.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-000166
Some other cluster in this domain is configured to use the same multicast address as {0}. Clusters cannot use the same multicast address.

Category:
Cluster

Cause:
Multiple clusters in the same domain are using the same multicast address.

Action:
For efficiency purposes, use two different multicast addresses.

BEA-000167
Some services failed to roll back successfully when trying to abort the migration: {0}.

Category:
Cluster

Cause:
An exception caused the rollback to fail: {0}.

Action:
It would be safest to shut down this server so that any lingering services will stop. They will not be automatically restarted upon reboot. Once the cause of the rollback has been fixed, attempts to migrate to this server should be successful.

BEA-000168
Failed to restart/migrate server "{0}" because of {1}

Category:
Cluster

Cause:
There was an error while restarting migratable server: {1}

Action:
Examine the server logs.

BEA-000170
The server {0} did not receive the multicast packets that it sent.

Category:
Cluster

Cause:
Each WebLogic Server instanec is expected to receive the messages it multicast to its multicast group. Since the server does not receive its own messages, the multicast address configuration in the cluster configuration or the interface address specification may be wrong.

Action:
Ensure that the cluster configuration and server interface configuration are valid

BEA-000171
Failed to load the custom Singleton Services SQL Query Helper: {0}, because of {1}.

Category:
Cluster

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The most likely cause for failing to load the named class is either a typo in the name of the class or that the class is missing from the server classpath.

Action:
Ensure that the provided classname is valid and that the class exists in the classpath of the server.

BEA-000172
TCP/IP socket failure occurred while fetching state dump over HTTP from {0}. Error message received: {2}. The request was generated by {3}. {1}

Category:
Cluster

Cause:
An IOException occurred in the operating system.

Action:
Ensure that no problems exist in the network. If the problem persists, contact My Oracle Support with the stack trace for further analysis.

BEA-000176
{0} does not specify a machine.

Category:
Cluster

Cause:
{0}'s configuration does not specify the machine on which it is running. Machines must be specified if scripts are to be executed when migrations happen.

Action:
Specify the machine on which {0} is running in the server's console page.

BEA-000178
Failed to execute {0} because of {1}.

Category:
Cluster

Cause:
While trying to run {0}, an exception occurred: {1}.

Action:
Check that the script, {0}, is fully debugged. It may help to run the script by hand to see if any errors are raised.

BEA-000179
{0} failed while altering its lease.

Category:
Cluster

Cause:
An exception occurred: {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that, if a database is being used for leasing, it is available.

BEA-000180
Unable to retrieve Job {0} from the database. The retrieval failed with {1}

Category:
Cluster

Cause:
An error occurred while reading a job from the database.

Action:
ENsure that the classes corresponding to the job are present in the server classpath and are of the correct version.

BEA-000182
Job Scheduler created a job with ID {0} for TimerListener with description {1}

Category:
Cluster

Cause:
Job Scheduler created an entry in the database for a submitted job.

Action:
No action is required.

BEA-000183
Successfully cancelled job with ID {0}

Category:
Cluster

Cause:
Job Scheduler removed a job entry from the database based on application request

Action:
No action is required.

BEA-000184
This server did not attempt to renew its lease for {0} seconds. The server may need to be restarted or migrated.

Category:
Cluster

Cause:
The thread that is supposed to regularly renew the lease has become blocked for some reason.

Action:
Ensure that the server is not overloaded with work and that there are enough system resources available on the machine.

BEA-000185
Despite the delay in the lease-renewing thread, the server has successfully renewed its lease. It is no longer in imminent risk of being migrated or restarted.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Cluster

Cause:
The thread that is supposed to regularly renew the lease became blocked, but is running properly again and has successfully renewed the lease.

Action:
No action is required.

BEA-000186
An error was encountered while migrating {0}: {1}

Category:
Cluster

Cause:
See the error in the message body.

Action:
Ensure that there are enough candidate servers running in the cluster.

BEA-000187
The Singleton Service {0} is now registered on this server. This server may be chosen to host this service.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000188
The Singleton Service {0} is no longer registered on this server.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000189
The Singleton Service {0} is now active on this server.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-000190
The Singleton Service {0} has been deactivated on this server.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000191
Now monitoring the Migratable Server {0}

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-000192
A running server was not found to host {0}. The server will retry in a few seconds.

Category:
Cluster

Cause:
All running servers failed when asked to activate {0}.

Action:
Ensure that there is at least one active candidate server for this service and that there is no bug in the activate() method. The service will be tried on all running servers in another few seconds.

BEA-000193
The JTA service for {0} has failed, but {0} is still running. JTA cannot be migrated from a running server.

Category:
Cluster

Cause:
The JTA service failed.

Action:
Check the logs of {0}; {0} should be restarted once the cause of the error has been determined and fixed. Upon restart, the JTA service will be migrated and running transactions recovered.

BEA-000194
An error was encountered while trying to report a migration event: {0}.

Category:
Cluster

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The most likely cause is the Administration Server being unavailable. If this is intended, this message can be ignored.

Action:
If monitoring information is desired, the Administration Server should be running and reachable.

BEA-000195
An error was encountered while trying to save a migration event. The error was: {0}.

Category:
Cluster

Cause:
An internal WebLogic Server error occurred while trying to create a runtime MBean to encapsulate this data.

Action:
Contact My Oracle Support and provide the stack trace for further analysis.

BEA-000196
Received data about a migration of type {0}, but no such type is recognized by the Administration Server.

Category:
Cluster

Cause:
If the Managed Servers have been upgraded to a newer version of WebLogic Server, they may be reporting data that the Administration Server does not know how to handle.

Action:
Upgrade the Administration Server to the same version as the cluster members.

BEA-000197
Listening for announcements from cluster using unicast cluster messaging

Category:
Cluster

Cause:
Unicast cluster messaging mode is enabled.

Action:
No action is required.

BEA-000198
All replication calls for cluster {0} must be made over channel {1}

Category:
Cluster

Cause:
All replication calls for cluster {0} must be made over channel {1}

Action:
Check the configured channel for replication calls.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-000199
Replication calls can only be made by {0} over {1} channel

Category:
Cluster

Cause:
Replication calls can only be made by {0} over {1} channel

Action:
Check the roles of the users for whom the replication calls are being made.

BEA-000214
WebLogic Server "{1}" version: {0} Copyright (c) 1995,2017, Oracle and/or its affiliates. All rights reserved.

Shutdown has completed.

Category:
WebLogicServer

Cause:
Shutdown has completed.

Action:
No action needed.

BEA-000240
Cannot cancel the server shutdown because the request was from a null user (Principal).

Category:
WebLogicServer

Cause:
Server shutdown could not be canceled because the user account that was used to issue the cancel command does not have the appropriate privileges.

Action:
The command can only be executed by a user from the administrator group. Retry the command with a user account that has administrator privilieges.

BEA-000241
Cannot cancel the server shutdown because the request was from a nameless user (Principal).

Category:
WebLogicServer

Cause:
Server shutdown could not be canceled because the user account that was used to issue the cancel command does not have the appropriate privileges.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
The command can only be executed by a user from the administrator group. Retry the command with a user account that has administrator privilieges.

BEA-000242
Cannot cancel server shutdown because there is no shutdown in progress.

Category:
WebLogicServer

Cause:
The server shutdown cannot be canceled as the server is not in the state 'Shutdown in Progress'.

Action:
No action is needed. Check the Administration Console for the state of the server.

BEA-000243
It is too late to cancel the server shutdown because the shutdown is already in progress.

Category:
WebLogicServer

Cause:
The server has already started to shut down. It is too late to cancel shutdown at this point.

Action:
No action is needed.

BEA-000244
Canceling server shutdown.

Category:
WebLogicServer

Cause:
An administrator has issued a cancel shutdown operation.

Action:
No action is needed.

BEA-000246
Server shutdown has been canceled and logins are enabled.

Category:
WebLogicServer

Cause:
The cancel shutdown operation was successful.

Action:
No action is needed.

BEA-000248
An exception occurred while trying to find a localized T3Srvr message, message ID {0}, {1}

BEA-000320
Error creating runtime MBean for execute queue {0}.

Category:
WebLogicServer

Cause:
An internal system error occurred.

Action:
Contact My Oracle Support with the server logs.

BEA-000329
Started the WebLogic Server Administration Server "{0}" for domain "{1}" running in production mode.

Category:
WebLogicServer

Cause:
The production mode of the server is enabled.

Action:
Set the weblogic.ProductionModeEnabled property of the domain in the startup script to change the server mode.

BEA-000330
Started the WebLogic Server Managed Server "{0}" for domain "{1}" running in production mode.

Category:
WebLogicServer

Cause:
The production mode of the server is enabled.

Action:
Set the weblogic.ProductionModeEnabled property of the domain in the startup script file to change the server mode.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-000331
Started the WebLogic Server Administration Server "{0}" for domain "{1}" running in development mode.

Category:
WebLogicServer

Cause:
The production mode of the server is disabled (default).

Action:
Set the weblogic.ProductionModeEnabled property of the domain in the configuration script to change the server mode.

BEA-000332
Started the WebLogic Server Managed Server "{0}" for domain "{1}" running in development mode.

Category:
WebLogicServer

Cause:
The production mode of the server is disabled (default).

Action:
Set the weblogic.ProductionModeEnabled property of the domain in the startup script to change the server mode.

BEA-000333
Queue usage is greater than QueueLengthThresholdPercent "{0}%" of the maximum queue size. An attempt will be made to allocate ThreadsIncrease "{1}" thread(s) to help.

Category:
WebLogicServer

Cause:
The server is under high load.

Action:
Review the execute queue settings.

BEA-000337
{0} has been busy for "{1}" seconds working on the request "{2}", which is more than the configured time (StuckThreadMaxTime) of "{3}" seconds in "{4}". Stack trace: {5}

Category:
WebLogicServer

Cause:
The server is extremely busy or the thread is hung.

Action:
Monitor the method that the hung thread is running. Use the Administration Console monitor execute request feature or take a thread dump (weblogic.Admin THREAD_DUMP).

BEA-000339
{0} has become "unstuck".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
WebLogicServer

Cause:
A thread previously stuck is now available.

Action:
No action is needed.

BEA-000342
Unable to initialize the server: {0}.

Category:
WebLogicServer

Cause:
An exception occurred during the server initialization.

Action:
Analyze the weblogic.log file to determine why the server did not initialize completely.

BEA-000343
The health monitor for "{0}" failed to register because of exception "{1}".

Category:
WebLogicServer

Cause:
Refer to the exception printed in the log message.

Action:
Refer to the exception printed in the log message.

BEA-000344
The health monitor for "{0}" failed to unregister because of exception "{1}".

Category:
WebLogicServer

Cause:
Refer to the exception printed in the log message.

Action:
Refer to the exception printed in the log message.

BEA-000345
******* * * The selected version of Java, {0}, contains a known security flaw. Please upgrade to at least {1} * *******

Category:
WebLogicServer

Cause:
JEP-290 support is missing.

Action:
Upgrade the version of Java used to run WebLogic Server.

Cause:
The server progressed through the startup or shutdown sequence.

Action:
No action is required.

BEA-000366
The server failed to shut down. Exception: {0}

Category:
WebLogicServer

Cause:
Inspect the log file for indications of the root cause of the failure.

Action:
Inspect the log file for indications of the root cause of the failure.

BEA-000371
An error occurred during server shutdown: {0}.

Category:
WebLogicServer

Cause:
Inspect the log file for indications of the root cause of the failure.

Action:
Inspect the log file for indications of the root cause of the failure.

BEA-000374
Waiting for ExecuteQueue {0} to finish {1} pending requests.

Category:
WebLogicServer

Cause:
The server found pending requests in one of the execute queues while suspending. The server will wait for the requests to complete.

Action:
No action is required.

BEA-000377
Starting WebLogic Server with {0} Version {1} from {2}.

Category:
WebLogicServer

Cause:
The server is starting.

Action:
No action is needed.

BEA-000378
The server failed to shut down within the configured timeout of {0} seconds. The server process will now exit.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
WebLogicServer

Cause:
Forced shutdown is taking too long to complete.

Action:
No action is needed.

BEA-000381
ServerLifeCycle operation failed. Message: {0} {1}

Category:
WebLogicServer

Cause:
A server operation, such as shutdown, failed.

Action:
If the error is not application related, contact My Oracle Support.

BEA-000382
A critical service failed. The server will automatically transition to the ADMIN state.

Category:
WebLogicServer

Cause:
A server lifecycle operation or a critical service failed.

Action:
The server logs contain information about the failure. If the error is not application related, contact My Oracle Support.

BEA-000383
A critical service failed. The server will shut itself down.

Category:
WebLogicServer

Cause:
A critical service failed.

Action:
The server logs contain information about the failure. If the error is not application related, contact My Oracle Support.

BEA-000384
A fatal configuration failure occurred during startup. Check if the config.xml file contains invalid entries. Reason: {0}

Category:
WebLogicServer

Cause:
The server failed to start due to invalid configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check if the config.xml file contains invalid entries. Contact My Oracle Support for more information.

BEA-000385
Server health failed. Reason: {0}

Category:
WebLogicServer

Cause:
Inspect the log file for indications of the root cause of the failure.

Action:
Inspect the log file for indications of the root cause of the failure.

BEA-000386
Server subsystem failed. Reason: {0}

Category:
WebLogicServer

Cause:
Inspect the log file for indications of the root cause of the failure.

Action:
Inspect the log file for indications of the root cause of the failure.

BEA-000388
JVM called the WebLogic Server shutdown hook. The server will force shutdown now.

Category:
WebLogicServer

Cause:
The JVM called the WebLogic Server shutdown hook. The server will force shutdown now.

Action:
No action is needed.

BEA-000394
Deadlock detected: {0}.

Category:
WebLogicServer

Cause:
There are threads deadlocked in the server.

Action:
Report this error to My Oracle Support if the deadlock involves WebLogic Server internal code.

BEA-000395
The following extensions directory contents added to the end of the classpath: {0}.

Category:
WebLogicServer

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Extensions directory contents were added to the classpath.

Action:
No action is needed.

BEA-000396
Server {0} has been requested by {1}.

Category:
WebLogicServer

Cause:
A request was made to perform the specified server operation.

Action:
No action is needed.

BEA-000398
Secure mode enabled for WebLogic Server "{0}".

Category:
WebLogicServer

Cause:
Secure mode is enabled.

Action:
None.

BEA-000401
Socket queue full, dropping socket {0}.

Category:
Socket

Cause:
The internal queue for socket read requests is full. Additional read requests for sockets will be dropped.

Action:
Check for other log messages that give more information about the failure.

BEA-000402
There are: {0} active sockets, but the maximum number of socket reader threads allowed by the configuration is: {1}. The configuration may need altered.

Category:
Socket

Cause:
When non-native I/O is used, I/O is performed in a blocking manner. Therefore, if the number of socket reader threads is less than the number of active sockets, performance may degrade significantly.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Optimally, increase the ThreadPoolPercentSocketReaders, or the ThreadPoolSize, or both. Optimally, decrease the SocketReaderTimeoutMinMillis, or the SocketReaderTimeoutMaxMillis, or both.

BEA-000403
IOException occurred on socket: {0} {1}.

Category:
Socket

Cause:
An unexpected IOException occurred while performing I/O for the socket.

Action:
Check network connectivity. If the situation persists after environmental issues are resolved, contact My Oracle Support.

BEA-000404
ThreadDeath in processSockets {0}.

Category:
Socket

Cause:
A ThreadDeath error occurred while processing sockets.

Action:
Check for other log messages that give more information about the failure.

BEA-000405
Uncaught Throwable in processSockets {0}.

Category:
Socket

Cause:
A Throwable was caught while processing sockets.

Action:
Check for other log messages that give more information about the failure.

BEA-000406
{0}

Category:
Socket

Cause:
This is an informational message.

Action:
No action is required.

BEA-000409
Problem on socket: {0} {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Socket

Cause:
An exception occurred while registering the socket with the muxer. It is possible that the file descriptor cannot be obtained from the socket.

Action:
Capture the errors and send the server log files to My Oracle Support.

BEA-000414
Could not initialize the POSIX performance pack.

Category:
Socket

Cause:
The shared library for the POSIX performance pack could not be loaded.

Action:
Ensure that the muxer shared library (libmuxer.so) exists in a directory that is in the LD_LIBRARY_PATH. If the situation persists, contact My Oracle Support.

BEA-000415
System has file descriptor limits of soft: {0}, hard: {1}

Category:
Socket

Cause:
This is an informational message.

Action:
No action is required.

BEA-000416
Using effective file descriptor limit of: {0} open sockets and files.

Category:
Socket

Cause:
This is an informational message.

Action:
No action is required.

BEA-000421
Uncaught Throwable in processSockets {0}.

Category:
Socket

Cause:
A Throwable was caught while processing sockets.

Action:
Check for other log messages that give more information about the failure.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-000429
Muxer received error: {0} {1}.

Category:
Socket

Cause:
An unexpected error occurred while processing socket I/O requests.

Action:
Capture the errors and send the server log files to My Oracle Support.

BEA-000431
Accepted connection: filtering is set to: "{0}", remote address: "{1}", remote port: "{2,number,0}", local address: "{3}", local port: "{4,number,0}", protocol: "{5}"

Category:
Socket

Cause:
This is an informational message for the administrator.

Action:
No action is required.

BEA-000432
Unable to load performance pack. Using Java I/O instead. {0}

Category:
Socket

Cause:
The native library for the performance pack was unable to be loaded.

Action:
Ensure that the classpath and the environment is set up properly. If the situation persists, contact My Oracle Support.

BEA-000435
Unable to initiate read for the socket. The maximum allowed number of pending I/O requests ({0}) has been exceeded.

Category:
Socket

Cause:
The maximum allowed number of pending I/O requests ({0}) has been exceeded. Further read requests for the socket cannot be initiated.

Action:
Check for other log messages that give more information about the failure.

BEA-000436
Allocating {0} reader threads.

Category:
Socket

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is an informational message.

Action:
No action is required.

BEA-000437
The default setting for MuxerClass was overridden and no muxer class name was specified. Resorting to implementation class: {0}.

Category:
Socket

Cause:
This is an informational message.

Action:
No action is required.

BEA-000438
Unable to load performance pack. Using Java I/O instead. {0}

Category:
Socket

Cause:
The native performance pack was unable to be loaded.

Action:
Ensure that the appropriate path for the native libraries is set properly in the environment.

BEA-000439
Unable to create the Java socket muxer.

Category:
Socket

Cause:
Creation of the Java socket muxer failed.

Action:
Ensure that the classpath is set properly.

BEA-000440
Unable to initiate I/O for {0} {1}.

Category:
Socket

Cause:
The initiation of the I/O operation failed, which could have been caused by the network, I/O or other problems.

Action:
Correct any conditions as suggested by the error message, if applicable.

BEA-000441
Unable to find internal data record for the socket {0}, with I/O completion result {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Socket

Cause:
The internal data record for the socket could not be found while completing an I/O operation.

Action:
Check for other log messages that give more information about the failure.

BEA-000442
The connection attempt was rejected because the incoming protocol is not enabled on channel "{0}".

Category:
Socket

Cause:
The connection attempt was rejected because a protocol was not enabled for this server, as determined by the ServerMBean, or was not enabled on this particular channel.

Action:
Enable the protocol on the channel.

BEA-000443
The connection attempt was rejected because the incoming protocol {1} is not enabled on channel {0}.

Category:
Socket

Cause:
The connection attempt was rejected because the {1} protocol was not enabled for this server, as determined by the ServerMBean, or was not enabled on this particular channel.

Action:
Enable the {1} protocol on the channel.

BEA-000444
Could not load the performance pack that can take advantage of the /dev/(e)poll device due to: {0}. Will attempt to use the performance pack that does not depend on the /dev/(e)poll device.

Category:
Socket

Cause:
The operating system does not support the /dev/(e)poll or the device is not initialized.

Action:
Ensure that the operating system supports the /dev/(e)poll device.

BEA-000445
Connection rejected, filter blocked {0}, {1}

Category:
Socket

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The incoming message was not recognized as one of the supported protocols.

Action:
Ensure that the server is configured for the relevant protocol.

BEA-000446
Native I/O enabled.

Category:
Socket

Cause:
This is an informational message.

Action:
No action is required.

BEA-000447
Native I/O disabled. Using Java I/O.

Category:
Socket

Cause:
This is an informational message.

Action:
No action is required.

BEA-000448
Socket channel support has been enabled for a JVM on which the feature is unsupported.

Category:
Socket

Cause:
This error is caused by turning on a feature that is not supported on the underlying JVM.

Action:
Either disable socket channel support or use a JVM version on which this feature is supported.

BEA-000449
Closing the socket, as no data read from it on {1}:{2} during the configured idle timeout of {0} seconds.

Category:
Socket

Cause:
The WebLogic Server instance or the network may be overloaded, which is causing the socket to idle timeout.

Action:
Capacity tuning of the server is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-000451
Closing the socket, as end of file is encountered while reading from the socket to the ONS server at {0}.

Category:
Socket

Cause:
The connection to the remote Oracle Notification Server (ONS) process might have been disconnected.

Action:
Check the status of the remote ONS process.

BEA-000452
An exception occurred on the socket to the ONS server at {0}: {1}.

Category:
Socket

Cause:
An exception occurred while reading from the socket. The connection to the remote Oracle Notification Server (ONS) process might have been disconnected.

Action:
Check the network connectivity to the remote ONS process. If the situation persists after environmental issues are resolved, contact My Oracle Support.

BEA-000453
An exception occurred while processing the message sent from the ONS at {0}: {1}

Category:
Socket

Cause:
An error occurred while parsing the message received from the remote ONS.

Action:
Check the ONS log file for additional details.

BEA-000454
Unable to establish connection to the remote ONS process at {0}:{1}. Exception occurred while doing handshake: {2}

Category:
Socket

Cause:
An exception occurred while doing handshake with the remote ONS process.

Action:
Check the exception and ONS log file for additional details.

BEA-000455
Attempting to remove unregistered HandshakeCompletedListener: class={0}, instance={1}.

Category:
Socket

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The unregistered HandshakeCompletedListener: class={0}, instance={1}, is attempting to be removed.

Action:
The unregistered HandshakeCompletedListener: class={0}, instance={1}, is attempting to be removed.

BEA-000456
Unable to load performance pack. Using Java I/O instead.

Category:
Socket

Cause:
The native library for the performance pack could not be loaded.

Action:
Ensure that the classpath and the environment is set up properly. If the situation persists, contact My Oracle Support.

BEA-000457
NIOInputStream received error while closing java.nio.channels.Selector: : {0} {1}.

Category:
Socket

Cause:
An unexpected error occurred while processing socket I/O requests.

Action:
If the situation persists, capture the errors and send the server log files to My Oracle Support.

BEA-000458
{0}

Category:
Socket

Cause:
See the message body.

Action:
Review the message body to determine the appropriate action to take.

BEA-000501
Peergone send failed - target unreachable.

Category:
RJVM

Cause:
This is an informational message.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-000502
Peergone send failed - target already gone.

Category:
RJVM

Cause:
This is an informational message.

Action:
No action is required.

BEA-000503
Incoming message header or abbreviation processing failed. {0}

Category:
RJVM

Cause:
While processing an incoming message an error was encountered. It is likely that the message was corrupted.

Action:
This is most likely a temporary situation. No action is required. If this situation continues, contact My Oracle Support with the server logs and configuration.

BEA-000504
Unmarshal exception: received illegal command code: {0}

Category:
RJVM

Cause:
A message containing an invalid command code was received. This message cannot be processed. One of the possible reasons is that the message was corrupted in transit.

Action:
This is most likely a temporary situation. No action is required. If this situation continues, contact My Oracle Support with the server logs and configuration.

BEA-000505
Peer did not send us a valid heartbeat interval; using the default heartbeat specified as a property.

Category:
RJVM

Cause:
The incoming message has an invalid heartbeat interval. This is either due to message corruption in transit or to an invalid choice for the heartbeat interval on the peer that is attempting to establish communication with this JVM.

Action:
If the peer that is attempting to establish communication is overriding the default heartbeat interval, ensure that a valid interval is used. If not, contact My Oracle Support with the server logs and configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-000506
Closing: {0} because of {1}

Category:
RJVM

Cause:
This JVM has received an incoming message that is incompatible with the way the protocols are supposed to work.

Action:
This is most likely a temporary situation. No action is required. If this situation continues, contact My Oracle Support with the server logs and configuration.

BEA-000507
Could not create/send request to close duplicate connection message. {0}

Category:
RJVM

Cause:
Creation or sending of the message to request closing a connection caused an I/O error.

Action:
This is most likely a temporary situation. No action is required. If this situation continues, contact My Oracle Support with the server logs and configuration.

BEA-000508
ID: {0} in use by: {1}, can not install {2}

Category:
RJVM

Cause:
The ID {0} is already associated with and in use by {1} and hence cannot be used in association with {2}.

Action:
Ensure that unique IDs are used in registration.

BEA-000509
Finder not initialized.

Category:
RJVM

Cause:
This JVM was created without a valid finder.

Action:
Ensure that a valid finder is used when creating this JVM.

BEA-000510
Unsolicited response: {0}

Category:
RJVM

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A duplicate response has been received for a request that has already received its response.

Action:
This is most likely a temporary situation. No action is required. If this situation continues, contact My Oracle Support with the server logs and configuration.

BEA-000511
Unsolicited error response for: {0}

Category:
RJVM

Cause:
A duplicate error response was received for a request that has already received its response or its error response.

Action:
This is most likely a temporary situation. No action is necessary. If this situation continues, contact My Oracle Support with the server logs and configuration.

BEA-000512
New heartbeat period: {0} is different from established heartbeat period: {1}; using established heartbeat period

Category:
RJVM

Cause:
This is an informational message.

Action:
No action is required.

BEA-000513
Failure in heartbeat trigger for RJVM: {0}. {1}

Category:
RJVM

Cause:
This error indicates a temporary failure in the heartbeat trigger mechanism.

Action:
No action is required. This is usually a temporary failure.

BEA-000514
openConnection() failed. {0}

Category:
RJVM

Cause:
Possible causes are an invalid target address or the target not being active or reachable.

Action:
This is most likely a temporary situation. No action is required. If this situation continues, contact My Oracle Support with the server logs and configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-000515
execute failed {0}

Category:
RJVM

Cause:
A failure was encountered when handling the incoming HTTP message.

Action:
This is most likely a temporary situation. No action is required. If this situation continues, contact My Oracle Support with the server logs and configuration.

BEA-000519
Unable to connect to a remote server on address {1} and port {2,number,0} with protocol {0}. The exception is {3}

Category:
RJVM

Cause:
The target is either not reachable or is not active.

Action:
Ensure that the target is active.

BEA-000570
Network Configuration for Channel "{0}" Listen Address {1} Public Address {2} Http Enabled {3} Tunneling Enabled {4} Outbound Enabled {5} Admin Traffic Enabled {6} ResolveDNSName Enabled {7}

Category:
RJVM

Cause:
This is an informational message.

Action:
No action is required.

BEA-000572
The server rejected a connection attempt {0} probably due to an incorrect firewall configuration or administrative command.

Category:
RJVM

Cause:
The incoming connection attempt was probably made through an address translating firewall. WebLogic Server needs to be correctly configured for this to work. This message can also occur if an administration connection attempt, requiring administrator level security, is made on a non-administrative port.

Action:
Configure the public and private addresses for this WebLogic Server instance to reflect the configuration of the firewall. The private address is the actual address the server is running. The public address is the address that external clients use to connect.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-000573
RequestTimeout for message id {0} with message: {1}.

Category:
RJVM

Cause:
The server timed out while waiting for a response to a request. The configured timeout may not be sufficient enough for the runtime environment.

Action:
Consider raising the value of the "weblogic.jndi.responseReadTimeout" property.

BEA-000574
Bootstrap to {0} failed. The remote side declared peer may be gone on this JVM.

Category:
RJVM

Cause:
Bootstrapping to the remote address has failed likely due to a PeerGone on this JVM.

Action:
Check whether the remote server is up and running

BEA-000577
Unable to get weblogic.rjvm.WebRjvmSupport.webRjvmSupport from HK2 services. exception: {0}

Category:
RJVM

Cause:
weblogic.rjvm.WebRjvmSupport is not registered as an HK2 service.

Action:
Contact My Oracle Support with the server logs and configuration.

BEA-000578
Unable to load weblogic.rjvm.WebRjvmSupport.webRjvmSupport. exception: {0}

Category:
RJVM

Cause:
Class weblogic.servlet.internal.utils.WebRjvmSupportImpl can be loaded.

Action:
Contact My Oracle Support with the server logs and configuration.

BEA-000579
Failed to get client certificate. exception: {0}

Category:
RJVM

Cause:
Failed to get client certificate. exception: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the custom class which is specified by the system property weblogic.security.SSL.ClientCertPlugin.

BEA-000580
Failed to send {0}. {1}

Category:
RJVM

Cause:
While sending a message an error was encountered.

Action:
This is most likely a temporary situation. No action is required. If this situation continues, contact My Oracle Support with the server logs and configuration.

BEA-000609
An error occurred during server shutdown: {0}.

Category:
Common

Cause:
The indicated error has occurred while the server was shutting down.

Action:
Check for other log messages that give more information about the failure.

BEA-000610
Expected RemoteException, RuntimeException, or Error {0}

Category:
Common

Cause:
An unexpected low-level message was sent to the server.

Action:
This is likely due to an internal client/server error that should be reported to My Oracle Support.

BEA-000611
No resources in the pool {0} will be tested, as specified MaxUnavailable {1} has been reached.

Category:
Common

Cause:
The application MaxUnavailable attribute for this pool has been configured. Since the number of unavailable resources in the pool has reached or exceeded the configured limit, no more resources will be tested (as resources become unavailable to the application during the testing).

Action:
If necessary, tune the value for the MaxUnavailable attribute for the pool.

BEA-000612
All {1} resource instances currently available in the pool {0} are being tested.

Category:
Common

Cause:
This is a warning indicating that all currently available resources in the pool are being tested. Therefore, some or all of them may become unavailable to the application for a short time.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Reduce the current setting of the MaxUnavailable attribute for the pool.

BEA-000613
Testing of resources upon creation has been dynamically enabled for pool "{0}".

Category:

Testing of resources when being released has been dynamically disabled for pool "{0}".

Category:
Common

Cause:
This is an informational message.

Action:
No action is required.

BEA-000619
Unable to forcibly release resource "{1}" back into the pool "{0}". Received exception: {2}.

Category:
Common

Cause:
As part of the InactiveResourceTimeout feature, resources that are found to be inactive for the configured period of time are forcibly released back into the pool. The operation could not be performed for the indicated reason.

Action:
Contact My Oracle Support.

BEA-000620
Forcibly releasing inactive resource "{1}" back into the pool "{0}".

Category:
Common

Cause:
The resource was found to be unused by the application for the specified duration, and hence is being forcibly released back into the pool.

Action:
Check application code for leakages of resource objects, or tune the configured value of the relevant pool attribute.

BEA-000621
Expected RemoteException, RuntimeException, or Error {0}

Category:
Common

Cause:
An unexpected low-level message was sent to the server.

Action:
This is likely to be due to an internal server/client error that should be reported to My Oracle Support.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-000622
Ignoring attempt to release resource "{1}" to pool "{0}" after the pool has been shut down.

Category:
Common

Cause:
Application is trying to release a resource to a pool after the pool has been shutdown.

Action:
Check application behaviour. All resources should be closed before the application is shutdown.

BEA-000623
Setting CapacityIncrement for pool "{0}" to 1. The specified value of "{1}" is not valid.

Category:
Common

Cause:
The application had specified an invalid value for CapacityIncrement.

Action:
Check and correct the specified value for CapacityIncrement for the indicated pool.

BEA-000624
Setting frequency of testing of free resources in pool "{0}" to 5 seconds, since the specified value of "{1}" is not valid.

Category:
Common

Cause:
The application had specified an invalid value for the test frequency.

Action:
Check and correct the specified value for TestFrequencySeconds for the indicated pool.

BEA-000625
The application has disabled periodic testing of free resources in pool "{0}".

Category:
Common

Cause:
This is an informational message.

Action:
No action is required.

BEA-000626
Free resources in pool "{0}" will be tested every "{1}" seconds.

Common

Cause:
This is an informational message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-000627
Reached maximum capacity of pool "{0}", making "{2}" new resource instances instead of "{1}".

Category:
Common

Cause:
This is an informational message.

Action:
No action is required.

BEA-000628
Created "{1}" resources for pool "{0}", out of which "{2}" are available and "{3}" are unavailable.

Category:
Common

Cause:
This is an informational message.

Action:
No action is required.

BEA-000629
Recreated "{2}" out of "{1}" resources for pool "{0}".

Category:
Common

Cause:
As part of forcibly suspending a pool, all resources currently in use are destroyed and recreated. This message indicates that not all required resources were recreated.

Action:
Contact My Oracle Support.

BEA-000630
Unable to create "{1}" resources for pool "{0}".

Category:
Common

Cause:
As part of the ConnectionCreationRetry feature, pools periodically attempt to create unavailable resources. This message indicates that in the current attempt, the indicated number of resources could not be created.

Action:
Check whether the failure condition that prevents the resources from being created (for example, the database server or downed network connectivity to it) is still persisting.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-000631
Unknown resource "{1}" being released to pool "{0}": {2}

Category:
Common

Cause:
Application is trying to release a resource to a pool that is no longer part of the pool. This could happen if the pool was forcibly suspended (which results in all borrowed resources being closed and replaced with new ones) while the resource was borrowed by the application.

Action:
Check application behavior.

BEA-000632
Resource Pool "{0}" shutting down, ignoring {1} resources still in use by applications..

Category:
Common

Cause:
The administrator is shutting down the pool while applications are still using resources that they have obtained from the pool. It is possible that these resources may have been leaked by the applications.

Action:
Check application behavior.

BEA-000633
Resource Pool "{0}" suspending due to consecutive number of resource creation failures exceeding threshold of {1}

Category:
Common

Cause:
Resource creation or resource tests have repeatedly failed.

Action:
Determine the cause of resource failures and take corrective action.

BEA-000634
Resource hang detected for pool "{0}", group "{1}". Waited {2} milliseconds where a typical test has been taking {3}.

Category:
Common

Cause:
Resource tests have been taking longer than expected.

Action:
Correct the condition that causes the resource tests to block for extended periods of time.

BEA-000635
Resource Pool "{0}", group "{1}" disabled due to number of resource creation or test failures exceeding threshold of {2}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Common

Cause:
Resource creation or resource tests have repeatedly failed.

Action:
Determine the cause of resource failures and correct.

A ThreadDeath exception caused a shutdown.

Action:
No action is required.

BEA-000801
ExecuteRequest: {0} cancelled.

Category:
Kernel

Cause:
This only happens when WebLogic Server is used in conjunction with an IDE, which uses JVMDI to cancel in-flight requests. If this occurs in normal operation, contact My Oracle Support.

Action:
No action is required.

BEA-000802
ExecuteRequest failed {0}.

Category:
Kernel

Cause:
An execute request generated an exception that was not handled.

Action:
Contact My Oracle Support.

BEA-000803
The Class {0} has a setter {1} for attribute {2} which does not have a constructor that could be initialized from a String value of {3}.

Category:
Kernel

Cause:
No constructor that takes a String argument was found for the declared attribute type.

Action:
Provide a constructor with a String argument.

BEA-000804
The Class {0} attribute {1} could not be initialized with value {2}. The exception message is {3}.

Category:
Kernel

Cause:
See the exception stack trace for details.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Take the appropriate action based on the error message.

BEA-000805
The self-tuning thread pool is disabled. An execute queue will be created for each Work Manager definition.

Category:
Kernel

Cause:
The server is starting.

Action:
No action is required.

BEA-000807
Work Manager {0} has reached its capacity. It is rejecting from thread {1}. The message is {2}. Throwable is {3}.

Category:
Kernel

Cause:
This is a Work Manager bug.

Action:
No action is required.

BEA-000808
The executing thread is a non-WebLogic Server thread. Modify the application to use the Commonj Work Manager API.

Category:
Kernel

Cause:
The use of an application spawned a Java thread instead of the Commonj Work Manager API.

Action:
Modify the application to use the Commonj Work Manager APIs.

BEA-000810
The memory pressure field has changed from {0} to {1}.

Category:
Kernel

Cause:
The memory pressure in the system has gone either up or down.

Action:
The system should be responding to the memory pressure level. No further action should be taken.

BEA-000902
A duplicate expression was found in the system property {0}.nonProxyHosts: {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Net

Cause:
The system property {0}.nonProxyHosts contains a pipe character delimited list of hosts, which should be connected to directly and not through the proxy server.

Action:
Check the system property {0}.nonProxyHosts. The value can be a list of hosts, each separated by a |. In addition, a wildcard character (*) can be used for matching. For example: -D{0}.nonProxyHosts="*.foo.com|localhost".

BEA-000903
Failed to communicate with proxy: {0}/{1}. Will try connection {2}/{3} now.

Category:
Net

Cause:
An IOException was received while communicating with the proxy server.

Action:
Check the exception for more information. Check if the proxy is running by pinging the proxy: {0}/{1} from the same machine.

BEA-000904
{0} initializing the URL stream handler with custom factory: {1}.

Category:
Net

Cause:
The factory class that was specified against the system property weblogic.net.http.URLStreamHandlerFactory failed to load or invoke.

Action:
Check the system property weblogic.net.http.URLStreamHandlerFactory. This property is used to set a custom URLStreamHandlerFactory.

BEA-000905
Could not open connection with host: {0} and port: {1}.

Category:
Net

Cause:
The connection attempt failed.

Action:
Ensure that the server is running on the specified host and port.

BEA-000906
Failed to communicate with proxy: {0}/{1}.

Category:
Net

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An IOException was received while communicating with the proxy server.

Action:
Check the exception for more information. Check if the proxy is running by pinging the proxy: {0}/{1} from the same machine.

BEA-001035
The following error has occurred: {0}.

Category:
JDBC

Cause:
The embedded message should contain an explanation of the failure.

Action:
Take appropriate action based on the reported error.

BEA-001058
Could not get JNDI context: {0}

Category:
JDBC

Cause:
Look at the printed exception to see why the call failed.

Action:
Correct the problem and re-run the operation.

BEA-001064
Ignoring the property "enableTwoPhaseCommit" for JDBCTxDataSource "{0}". This property is used only for those drivers that do not natively support XA.

Category:
JDBC

Cause:
The property EnableTwoPhaseCommit was configured to "true" for an XADataSource and will be ignored.

Action:
No action is required.

BEA-001066
Delaying {0,number} seconds before making a {1} pool connection.

Category:
JDBC

Cause:
Some databases cannot handle a tight loop of making multiple connections from one application. If this is the case and the delay is more than 2 seconds, this message will be printed.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-001067
Connection for pool "{0}" refreshed.

Category:
JDBC

Cause:
A connection for the specified pool has been refreshed.

Action:
No action is required.

BEA-001068
Connection for pool "{0}" created.

Category:
JDBC

Cause:
A connection for the specified pool has been created.

Action:
No action is required.

BEA-001072
Connection for XA pool "{0}" created.

Category:
JDBC

Cause:
A connection for the specified XA pool has been created.

Action:
No action is required.

BEA-001073
Connection for XA pool "{0}" refreshed.

Category:
JDBC

Cause:
A connection for the specified XA pool has been refreshed.

Action:
No action is required.

BEA-001074
A JDBC pool connection leak has been detected. A connection leak occurs when a connection obtained from the pool was not closed explicitly by calling close() and then was disposed by the garbage collector and returned to the data source connection pool. The following stack trace at create shows where the leaked connection was created. {0}

Category:
JDBC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A JDBC pool connection leak was detected. A connection leak occurs when a connection obtained from the pool was not closed explicitly by calling close() and then was disposed by the garbage collector and returned to the data source connection pool. A stack trace is printed indicating where the leaked connection was created.

Action:
Close the connection appropriately.

BEA-001076
An attempt has been made to release a connection that belongs to a non-existing pool. Ensure that the pool "{0}" has been destroyed by intent.

Category:
JDBC

Cause:
An attempt was made to release a connection that belongs to a non-existing pool.

Action:
Correct the destroy operation to specify a valid pool name.

BEA-001083
Multi data source "{0}" was created with {1,number} connection pools for {2}.

Category:
JDBC

Cause:
A multi data source was created with the specified number of connection pools.

Action:
No action is required.

BEA-001084
Multi data source "{0}" will be shutdown

Category:
JDBC

Cause:
The specified multi data source is being shut down.

Action:
No action is required.

Data source "{0}" with JNDI name "{1}" will be shut down.

Category:
JDBC

Cause:
The specified data source is being shut down.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-001089
Data source connection pool {0} has been started for application {1}, module {2}.

Category:
JDBC

Cause:
The specified data source connection pool is being started.

Action:
No action is required.

BEA-001099
Data source connection pool "{0}" reset by "{1}".

Category:
JDBC

Cause:
The specified connection pool has been reset.

Action:
No action is required.

BEA-001100
Data source connection pool "{0}" shut down by "{1}".

Category:
JDBC

Cause:
The specified data source connection pool has been shut down, as requested by the application.

Action:
No action is required.

BEA-001101
Data source connection pool "{0}" disabled by "{1}".

Category:
JDBC

Cause:
The specified data source connection pool has been disabled.

Action:
No action is required.

BEA-001102
Data source connection pool "{0}" enabled by "{1}".

Category:
JDBC

Cause:
The specified data source connection pool has been enabled.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-001104
A globally scoped data source connection pool named ({0}) already exists.

Category:
JDBC

Cause:
When adding or referencing a JDBC data source connection pool that is an application-scoped pool, a globally scoped data source connection pool with the same name already exists. The locally scoped pool has precedence over the global pool.

Action:
If you want to reference the global pool in your application, the name of the global pool or the application-scoped pool must be changed to be unique.

BEA-001105
Referenced global pool ({0}) has the same name as a locally defined data source connection pool or data source ({1}).

Category:
JDBC

Cause:
When deploying a JDBC data source connection pool (not application-scoped) an application (locally) scoped data source connection pool with the same name already exists. The locally scoped pool has precedence over the global pool.

Action:
If you want to reference the global pool in your application, the name of the global pool or the application-scoped pool must be changed to be unique.

BEA-001107
There is a globally defined data source ({0}) with the same JNDI name ({1}) as a locally defined data source.

Category:
JDBC

Cause:
It is possible to use a resource descriptor with application-scoped pools. If the local JNDI lookup reveals that there is a pool with the JNDI name that is specified in the resource descriptor, it is assumed that this is a pool that the application meant to use and it is bound into comp/env. However, a check in the global namespace indicates that there is also a global pool with the same JNDI name.

Action:
If you want to reference the global pool in your application, the JNDI name of the global pool or the application-scoped pool must be changed to be unique.

BEA-001108
A locally scoped pool ({0}) was bound into comp/env with the JNDI name ({1}).

Category:
JDBC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
It is possible to use a resource descriptor with application-scoped pools. If the local JNDI lookup reveals that there is a pool with the JNDI name specified in the resource-descriptor, it is assumed that this is the pool that the application meant to use and it is bound into comp/env.

Action:
No action is required. If this association is not desired, specify a unique JNDI name in the resource descriptor.

BEA-001109
A globally scoped pool ({0}) was bound into comp/env with the JNDI name ({1}).

Category:
JDBC

Cause:
It is possible to use a resource descriptor with global data source connection pools. If the JNDI lookup reveals that there is a pool with the JNDI name that is specified in the resource descriptor, it is assumed that this is the pool that the application was meant to use and it is bound into comp/env.

Action:
No action is required. If this association is not desired, specify a unique JNDI name in the resource descriptor.

BEA-001110
No test table set up for pool "{0}". Connections will not be tested.

Category:
JDBC

Cause:
TestConnectionsOnReserve, TestConnectionsOnRelease, TestConnectionsOnCreate, TestFrequencySeconds were configured but TestTableName was not configured.

Action:
Configure a valid TestTableName for the data source connection pool.

BEA-001111
Unable to verify the test "{1}" set up for pool "{0}". Connections will not be tested. The test will not be used by isValid either.

Category:
JDBC

Cause:
While creating a data source connection pool with the attributes specified to test the pool connections, a test is run during the pool initialization. This test failed with the printed error.

Action:
Check the SQL error that occurred and correct the problem. The specified TestTableName might not exist.

BEA-001112
Test "{1}" set up for pool "{0}" failed with exception: "{2}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JDBC

Cause:
The specified data source connection pool has been configured with one or more attributes to test the pool connections. One of those test attempts failed. The associated error is printed.

Action:
Check the associated error to see what the problem is and correct it. Normally, this indicates that a connection was lost to the database (the database is down). This needs to be corrected by the database administrator.

BEA-001113
Data source connection pool "{0}" shrunk by "{1}".

Category:
JDBC

Cause:
The data source connection pool has been shrunk by the specified amount as requested by the application.

Action:
No action is required.

BEA-001114
Soft shutdown called on data source connection pool "{0}" by "{1}".

Category:
JDBC

Cause:
A soft shutdown operation on the specified data source connection pool has been started, as requested by the application.

Action:
No action is required.

BEA-001115
Hard shutdown called on data source connection pool "{0}" by "{1}".

Category:
JDBC

Cause:
A hard shutdown operation on the specified data source connection pool has been started, as requested by the application.

Action:
No action is required.

BEA-001116
Disable and freeze users called on data source connection pool "{0}" by "{1}".

Category:
JDBC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An operation to disable and freeze users on the specified data source connection pool has been started, as requested by the application.

Action:
No action is required.

BEA-001117
Disable and drop users called on data source connection pool "{0}" by "{1}".

Category:
JDBC

Cause:
An operation to disable and drop users on the specified data source connection pool has been started, as requested by the application.

Action:
No action is required.

BEA-001118
Unable to register for receiving MBean notifications of dynamic configurations changes for data source connection pool "{0}": "{1}". Pool will not be dynamically reconfigured.

Category:
JDBC

Cause:
The server was unable to register for receiving MBean notifications of dynamic configurations changes for the specified data source connection pool. The connection pool will not be dynamically reconfigured.

Action:
Check the exception that is printed along with this message to see what the cause of the failure was.

BEA-001119
Unable to delete configuration MBean for pool "{0}": "{1}"

Category:
JDBC

Cause:
While doing a forced shutdown, the data source connection pool was removed but the associated MBean for the connection pool was not removed.

Action:
Check the exception that is printed along with this message to see what the cause of the failure was.

BEA-001120
Created data source named {0} for Pool {1}.

Category:
JDBC

Cause:
There was a user request to create a data source, either implicitly or explicitly.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-001121
Created TX data source named {0} for Pool {1}.

Category:
JDBC

Cause:
The user requested that the TX data source be created, either implicitly or explicitly.

Action:
No action is required.

BEA-001122
Destroyed TX data source named {0} for Pool {1}.

Category:
JDBC

Cause:
There was a user request to destroy the TX data source, either implicitly or explicitly.

Action:
No action is required.

BEA-001123
Destroyed data source named {0} for Pool {1}.

Category:
JDBC

Cause:
There was a user request to destroy the data source, either implicitly or explicitly.

Action:
No action is required.

BEA-001124
Created Connection Pool named {0}.

Category:
JDBC

Cause:
There was a user request to create the data source connection pool, either implicitly or explicitly.

Action:
No action is required.

BEA-001125
Created multi data source named {0}.

Category:
JDBC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
There was a user request to create the multi data source, either implicitly or explicitly.

Action:
No action is required.

BEA-001126
Destroyed Connection Pool named {0}.

Category:
JDBC

Cause:
There was a user request to destroy the data source connection pool, either implicitly or explicitly.

Action:
No action is required.

BEA-001127
Destroyed multi data source named {0}.

Category:
JDBC

Cause:
There was a user request to destroy the multi data source, either implicitly or explicitly.

Action:
No action is required.

BEA-001128
Connection for pool "{0}" has been closed.

Category:
JDBC

Cause:
A connection for the specified data source connection pool has been closed.

Action:
No action is required.

BEA-001129
Received exception while creating connection for pool "{1}": {0}.

Category:
JDBC

Cause:
The exception message should indicate the probable cause of the error.

Action:
Check the error to see why the connection creation failed and correct the problem.

BEA-001130
Disabled statement caching for connection in pool "{0}" as it is using the WebLogic Type-2 XA driver.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JDBC

Cause:
Statement caching was disabled for the specified data source connection pool because it is using the WebLogic Type-2 XA driver. This driver has a limitation based on the implementation using the ORACLE OCI interface. Cursors are closed when the XAResource.end is called, causing all prepared statements to be no longer valid.

Action:
No action is required. Use a different driver if you want to use the prepared statement cache with the driver.

BEA-001131
Received an exception when closing a cached statement for the pool "{0}": {1}.

Category:
JDBC

Cause:
When closing a prepared statement in the prepared statement cache for the specified data source connection pool, an error occurred.

Action:
Check the associated error that is printed and, if possible, correct the problem.

BEA-001132
Initialized statement cache of size "{1}" for connection in pool "{0}".

Category:
JDBC

Cause:
A prepared statement cache has been enabled for a connection in the specified data source connection pool.

Action:
No action is required. If you do not want statement caching turned on for the pool, do not configure or disable it.

BEA-001133
Statement caching is not enabled for connection in specified data source connection pool "{0}".

Category:
JDBC

Cause:
A configured data source connection pool has been started without statement caching being enabled.

Action:
No action is required. If you want statement caching turned on for the pool, configure and enable it.

BEA-001134
Statement caches of connections in the data source connection pool "{0}" have been cleared by "{1}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JDBC

Cause:
The statement caches for connections in the specified data source connection pool have been cleared, as requested by the application.

Action:
No action is required.

Check earlier messages that are printed in the log.

Action:
No action is required.

BEA-001149
Shutdown of the JDBC service has completed.

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

BEA-001150
Connection pool "{0}" deployment failed with the following error: {1}.

Category:
JDBC

Cause:
The cause should be indicated in the exception message.

Action:
Correct the problem described in the exception message.

BEA-001151
Data source "{0}" deployment failed with the following error: {1}.

Category:
JDBC

Cause:
The cause should be indicated in the exception message.

Action:
Correct the problem described in the exception message.

BEA-001152
Cannot enable statement caching for connection in pool "{0}", because it is using the WebLogic Type-2 XA driver.

Category:
JDBC

Cause:
Statement caching has been disabled for the specified data source connection pool because the connection pool is using the WebLogic Type-2 XA driver. This driver has a limitation based on the implementation using the ORACLE OCI interface. Cursors are closed when XAResource.end is called, causing all prepared statements to no longer be valid.

Action:
No action is required. Use a different driver if you want to use the prepared statement cache with the driver.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-001154
Disabling statement caching for connection in pool "{0}".

Category:
JDBC

Cause:
Statement caching has been disabled for the specified data source connection pool for one or more reasons. 1. The size is explicitly configured to 0. 2. The Oracle replay driver is being used. 3. The Oracle statement cache is enabled.

Action:
No action required.

BEA-001155
The following exception has occurred:

Category:
JDBC

Cause:
An error condition has occurred.

Action:
Look for the associated exception in the log or your program to see what the results are. In general, this stack trace will help with debugging an existing problem.

BEA-001156
Stack trace associated with message {0} follows:

Category:
JDBC

Cause:
An error condition was reported.

Action:
No action is required.

BEA-001157
Data source connection pool "{0}" being suspended by user "{1}".

Category:
JDBC

Cause:
The specified data source connection pool is being suspended, as requested by the application.

No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-001163
Data source connection pool "{0}" being shut down by user "{1}".

Category:
JDBC

Cause:
The specified data source connection pool is being shut down, as requested by the application.

Action:
No action is required.

BEA-001164
Unable to initialize connection in pool "{0}". Initialization SQL = "{1}". Received exception: "{2}".

Category:
JDBC

Cause:
The exception message should contain a reason for the failure.

Action:
Take appropriate corrective action.

BEA-001165
Invalid statment cache size "{1}" specified for connection in pool "{0}".

Category:
JDBC

Cause:
An invalid value has been specified for statement cache size for connections in the indicated data source connection pool.

Action:
Check the allowed limits for statement cache size for this data source connection pool and fix the specified value.

BEA-001166
Activation of application-scoped data source connection pool "{1}":"{2}":"{0}" failed. Received exception: "{3}".

Category:
JDBC

Cause:
The error message should contain the reason for the failure.

Action:
Take appropriate corrective action.

BEA-001167
Deactivation of application-scoped pool "{1}":"{2}":"{0}" failed. Received exception: "{3}".

Category:
JDBC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The error message should contain the reason for the failure.

Action:
Take appropriate corrective action.

BEA-001168
Attempt to resume JDBCService when it is already running...Ignoring.

Category:
JDBC

Cause:
The application attempted to resume JDBCService, although the service is already running.

Action:
Take appropriate corrective action.

BEA-001169
Error occured during shutdown of pool "{0}". Received exception: "{1}".

Category:
JDBC

Cause:
The exception should contain the reason for the failure.

Action:
Take appropriate corrective action.

BEA-001170
Unable to initialize JDBC Log. Received exception: "{0}".

The specified data source connection pool is being started, as requested by the administrator.

Action:
No action is required.

BEA-001547
The "{0}" field value "{1}" in table reference "{2}" format [[[catalog.]schema.]table) is too long. The database supports a maximum length of "{3}" for this field.

Category:
JDBC

Cause:
This is a configuration error.

Action:
When configuring a table name, choose a shorter name for the indicated field. Note that JDBC stores automatically append "WLStore" to the table name.

BEA-001548
Empty field value in table reference "{0}" (format [[[catalog.]schema.]table).

Category:
JDBC

Cause:
This is a configuration error.

Action:
Ensure that the entire table reference is blank, or that the table field is not blank. If there is no schema, ensure that there are no periods "." in the table reference. Do not start the table reference with a period ".". Note that JDBC stores automatically append "WLStore" to table references.

BEA-001549
An old style WebLogic driver URL {0} is used. Because the WebLogic driver URL auto-convert switch is turned on, it is converted to {1}.

Category:
JDBC

Cause:
An old style WebLogic driver URL is used and the WebLogic driver URL auto-convert switch is turned on.

Action:
No action is required.

BEA-001550
WebLogic Oracle driver is being used. The driver URL is {0}. WebLogic Server no longer supports the WebLogic Oracle driver.

Category:
JDBC

Cause:
The WebLogic Oracle driver has been deprecated and removed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Stop using the WebLogic Oracle driver, use the Oracle Thin driver instead.

BEA-001551
Application context for member data source {1} not found for standalone multi data source module {0}. Ensure that multi data source standalone modules have a higher deployment order than member data source standalone modules.

Category:
JDBC

Cause:
The deployment order of the multi data source is the same or lower than one of its member data sources.

Action:
Change the deployment order of the standalone multi data source to be greater than each member data source's deployment order.

BEA-001552
The logging last resource (LLR) data source {0} will not function when it is a participant in a global transaction that spans multiple WebLogic Server instances because remote JDBC support is disabled. LLR will function in single-server configurations.

Category:
JDBC

Cause:
Remote JDBC access over RMI is disabled.

Action:
Either configure the data source to use an XA-capable driver, or enable remote JDBC on all servers.

BEA-001553
Unable to deploy JDBC data source {0}. No credential mapper entry found for password indirection user {1}

Category:
JDBC

Cause:
No credential mapper entry was found for user {1} on data source {0}

Action:
Ensure that a credential mapper entry is defined for the data source {0} that maps the specified user name {1} to a password. The WebLogic Server administration console provides support for managing data source credential mapper entries.

BEA-001554
Data source connection pool "{0}" Connection Unwrap Data:

Category:
JDBC

Cause:
This is an informational message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-001555
Invalid member data source {1} specified for multi data source {0}. GridLink data source may not be used in multi data source configurations.

Category:
JDBC

Cause:
A GridLink data source was specified as a multi data source member.

Action:
Either use a single GridLink data source or define generic data sources for use in a multi data source configuration.

BEA-001556
Data source {0} for service {1} registering with ONS daemons using configuration string {2}.

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

BEA-001557
Data source {0} for service {1} unregistering with ONS daemons {2}.

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

BEA-001558
Data source {0} for service {1} received a service down event for instance {2}.

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

BEA-001559
Data source {0} for service {1} received a node down event for node {2}.

Category:
JDBC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is an informational message.

Action:
No action is required.

BEA-001560
Data source {0} for service {1} received a service up event for instance {2}.

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

BEA-001561
Data source {0} for service {1} received a node up event for node {2}.

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

BEA-001562
Data source {0} for service {1} not registering for Fast Application Notification (FAN) events.

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

BEA-001563
ADM_DDL LLR (logging last resource) connection pool {0} did not find its table {1}.

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

BEA-001564
JTSLoggableResourceTable.existsForADMDDL about to return: return value = {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

BEA-001565
Logging last resource (LLR) data source {0} using LLR table {1} defined by system property weblogic.llr.table.{0}

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

BEA-001566
JTSLoggableResourceTable.init for ADMDDL is generating SQL statement(createSQL): {0}.

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

BEA-001567
SQLRuntimeException caught at existsForADMDDL for poolName: {0} ddlName: {1} by: {2}.

Category:
JDBC

Cause:
Look at the printed exception to see why the call failed.

Action:
Correct the problem and run the operation again.

BEA-001568
Data source {0} for service {1} received a service up event

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-001569
Data source {0} failed to create runtime MBean for RAC instance {1}. Exception={2}

Category:
JDBC

Cause:
Refer to the exception error message for the cause of the failure.

Action:
Try redeploying the data source or restart the WebLogic Server instance.

BEA-001570
Attempt to enable Fast Application Notification (FAN) support for a non-GridLink data source {0}, which is not supported.

Category:
JDBC

Cause:
Subscribing to FAN events is only supported by GridLink data sources.

Action:
Either set the FAN enabled attribute to false or configure a GridLink data source.

BEA-001571
Unable to load the connection labeling callback class "{0}", got exception : {1}.

Category:
JDBC

Cause:
This is most likely because the application-defined class' location has not been added to the CLASSPATH environment varible.

Action:
Please check that you specified the correct class name and that your CLASSPATH includes this class.

BEA-001572
Application-configured connection labeling callback class {0} does not implement required interface {1}.

Category:
JDBC

Cause:
The configured class {0} does not implement the required interface {1}.

Action:
Refer to the WebLogic Server documentation.

BEA-001573
Connection labeling callback class {0} loaded.

Category:
JDBC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is an informational message.

Action:
No action is required.

BEA-001574
Unable to load the connection Initialization callback class "{0}", got exception : {1}.

Category:
JDBC

Cause:
This is most likely because the application-defined class' location has not been added to the CLASSPATH environment varible.

Action:
Please check that you specified the correct class name and that your CLASSPATH includes this class.

BEA-001575
Application configured connection initialization callback class {0} does not implement required interface {1}.

Category:
JDBC

Cause:
The configured class {0} does not implement the required interface {1}.

Action:
Refer to the WebLogic Server documentation.

BEA-001576
Connection Initialization callback class {0} loaded.

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

BEA-001580
An exception was thrown from the ConnectionHarvestingCallback: {0}.

Category:
JDBC

Cause:
The application callback threw an exception when the callback was called.

Action:
Look at the associated message. If more information is desired, turn on connection debuggging.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-001581
An invalid scope of Application instead of Global is specified for data source {0}, URI = {1}.

Category:
JDBC

Cause:
The configuration is invalid. The specified data source must have a Global scope.

Action:
Correct the configuration for the specified data source.

BEA-001582
oracle.jdbc.DRCPConnectionClass must be specified if and only if a Database Resident Connection Pooling (DRCP) pool is defined.

Category:
JDBC

Cause:
The configuration is invalid.

Action:
Correct the configuration for the specified data source.

BEA-001583
The WebLogic statement cache size is disabled because Oracle statement cache is configured.

Category:
JDBC

Cause:
The WebLogic statement cache is disabled.

Action:
No action is required.

BEA-001584
Data source connection pool "{0}" disabled by multi data source "{1}".

Category:
JDBC

Cause:
The specified data source connection pool has been disabled by a multi data source.

Action:
No action is required.

BEA-001585
Data source connection pool "{0}" re-enabled by multi data source "{1}".

Category:
JDBC

Cause:
The specified data source connection pool has been re-enabled by a multi data source.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-001586
EndRequest failed: {0}

Category:
JDBC

Cause:
This generally happens because the application failed to complete a local transaction before closing the connection. See the associated message to determine if this is the case.

Action:
The error is ignored if the connection can be cleared. This is, however, an application error to not complete the transaction. Fix the software.

BEA-001587
For LLR RAC DataSource {0} Member of MultiDataSource, test-on-reserve is disabled, and the health of the DataSource cannot be verified.

Category:
JDBC

Cause:
test-on-reserve is disabled in the data source configuration.

Action:
Enable test-on-reserve in the data source configuration. If all member data sources are marked as unhealthy and the WLS Administration Server fails to boot, use WLST to change the configuration.

BEA-001588
Shrinking connection pools due to memory pressure level of {0} exceeding shrink threshold of {1}.

Category:
JDBC

Cause:
There is increased memory consumption in the server.

Action:
No action is required.

BEA-001589
Setting all data source statement cache sizes to {0}% of configured sizes due to memory pressure level of {1}.

Category:
JDBC

Cause:
There is increased memory consumption in the server.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-001590
Setting {0} statement cache size to {1} ({2}% of configured size {3}).

Category:
JDBC

Cause:
There is increased memory consumption in the server.

Action:
No action is required.

BEA-001591
Configuring data source {0} for partition {1}: {2}.

Category:
JDBC

Cause:
See the message body.

Action:
No action required.

BEA-001592
Forcibly releasing inactive connection "{1}" back into the data source connection pool "{0}".

Category:
JDBC

Cause:
The connection was found to be unused by the application for the specified duration (configured using InactiveConnectionTimeoutSeconds attribute of the pool MBean), and therefore is being forcibly released back into the pool.

Action:
Check the application code for leakages of connection objects, or tune the configured value of the specified connection pool attribute.

BEA-001593
Forcibly releasing harvested connection "{1}" back into the data source connection pool "{0}".

Category:
JDBC

Cause:
The connection was harvested and the application callback did not close the connection. This occurs only when Connection Leak Profiling is enabled.

Action:
Close the connection in the ConnectionHarvestingCallback.cleanup() method.

BEA-001594
Forcibly releasing an already closed connection "{1}" back into the data source connection pool "{0}".

Category:
JDBC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
When isClosed() is called on the connection, either directly by the application or when accessing a connection, the driver indicates that the connection is already closed. The connection is closed in the WLS data source and returned to the pool. The connection will be replaced in the pool with a new connection.

Action:
No action is required.

BEA-001595
Forcibly releasing connection "{1}" back into the data source connection pool "{0}" because of an initialization failure.

Category:
JDBC

Cause:
A failure occurred on the connection during initialization. The connection will be removed from the pool if it continues to have problems.

Action:
This may indicate a problem with the database. Review other errors in the WLS data source or the database logs.

BEA-001596
Data source connection pool "{0}" Connection Local Transaction Leak Data:

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

BEA-001597
Data source connection pool "{0}" Closed JDBC Object Usage Data:

Category:
JDBC

Cause:
This is an informational message.

Action:
No action is required.

BEA-001598
Oracle Notification Service (ONS) initialization failed for data source {0}. ONS events will not be processed.

Category:
JDBC

Cause:
The ONS host and pair list is invalid or was unavailable for connection.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the ONS configuration to make sure that it is correct and available.

BEA-001599
When creating Active GridLink (AGL) data source named {0}, the URL should be the long format with a SERVICE_NAME.

Category:
JDBC

Cause:
An incorrect URL is specified for an AGL data source.

Action:
Correct the URL specified for the AGL data source.

BEA-001600
An error occurred while repurposing connection for pool {0}: {1}

Category:
JDBC

Cause:
Refer to the exception message for information about the condition that caused the error.

Action:
Correct the condition that led to the error.

BEA-002001
Received an unknown message type.

Category:
IIOP

Cause:
This should not occur. This indicates that the client is sending garbaged messages. It might also indicate that malicious third parties are trying to access the server using IIOP.

Action:
Contact My Oracle Support.

BEA-002002
Failed to parse method name {0}.

Category:
IIOP

Cause:
This can happen for a variety of reasons. Normally, it is because the caller made a request for a non-existent method. Alternatively, the IDL mangling of the method name may be ambiguous, so WebLogic Server cannot decide which method to call.

Action:
If the IDL mangling is causing a problem, try changing the name of the method. In particular, names such as getSomedata() (where somedata is also the name of an attribute or method) can cause problems. Also, some bugs with name mangling exist in JDK 1.3.1. Try using a JDK 1.4 client.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-002003
Unable to send the message: {0}.

Category:
IIOP

Cause:
Some sort of communication failure has occurred. This could be because the target closed the IIOP connection or because of some transient network fault.

Action:
Verify that the client-server network connection is working.

BEA-002005
OutOfMemoryError in adapter: {0}.

Category:
IIOP

Cause:
This is often caused by marshalling mismatches between the client and the server and is generally a bug in either the client or the server or both.

Action:
Restart the server and contact My Oracle Support.

BEA-002006
Cannot scavenge idle connections, {0}

Category:
IIOP

Cause:
The server was unable to schedule a trigger to watch for idle IIOP connections. The fact that it was unable to do so indicates some core failure in the server.

Action:
Restart the server. If this occurs again, contact Oracle Customer Support.

BEA-002008
Failed to export {0}. The following exception occurred: {1}.

Category:
IIOP

Cause:
This is most often caused by the server being unable to find or generate an IIOP stub for the remote object. Ensure that the Common Object Request Broker API (CORBA) objects have corresponding _Stub classes in the server classpath. RMI-IIOP object stubs should be generated automatically.

Action:
For CORBA objects, ensure that the idlj was run on the server class. For RMI-IIOP objects, contact My Oracle Support.

BEA-002011
Failed to marshal exception {0}: {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
IIOP

Cause:
The server could not find the appropriate exception definitions in its classpath. For Common Object Request Broker API (CORBA) exceptions, the application must contain the exception helper classes as well as the exception classes.

Action:
Add missing exception classes to the application.

BEA-002012
Failed to send exception {0}: {1}.

Category:
IIOP

Cause:
This only happens if the connection between the client and server was very unreliable.

Action:
Verify that the client-server network connection is working. Contact My Oracle Support.

BEA-002013
Complete failure to send exception {0}: {1}.

Category:
IIOP

Cause:
Some sort of communication failure has occurred. This could be because the target closed the IIOP connection or because of some transient network fault.

Action:
Verify the client-server network connection.

BEA-002014
IIOP subsystem enabled.

Category:
IIOP

Cause:
The IIOP subsystem is operational and is listening for incoming IIOP requests.

Action:
No action is required.

BEA-002015
Using javax.rmi.CORBA.UtilClass {0}; The IIOP subsystem requires a WebLogic Server-compatible UtilClass.

Category:
IIOP

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Some application code, or a foreign object request broker (ORB), set the system property javax.rmi.CORBA.UtilClass or tried accessing javax.rmi.CORBA.Util functions before the IIOP subsystem had initialized.

Action:
The IIOP subsystem will not function correctly in this scenario. Correct the application code and restart the server.

BEA-002016
Using javax.rmi.CORBA.PortableRemoteObjectClass {0}, the IIOP subsystem requires a WebLogic Server-compatible PortableRemoteObjectClass.

Category:
IIOP

Cause:
Some application code, or a foreign object request broker (ORB), set the system property javax.rmi.CORBA.PortableRemoteObjectClass or tried accessing javax.rmi.PortableRemoteObject functions before the IIOP subsystem had initialized.

Action:
The IIOP subsystem will not function correctly in this scenario. Correct the application code and restart the server.

BEA-002017
LocateRequest is {0}.

Category:

Action:
No action is required.

BEA-002022
Could not bind SecurityService {0}.

Category:
IIOP

Cause:
This is an internal JNDI problem.

Action:
Contact My Oracle Support.

BEA-002023
Could not resolve SendingContext RunTime: {0}.

Category:
IIOP

Cause:
An invalid object reference for SendingContext RunTime was provided by the client.

Action:
Contact My Oracle Support.

BEA-002026
Transaction mechanism is {0}.

Category:
IIOP

Cause:
This is an informational message.

Action:
No action is required.

BEA-002027
Complete failure to rewrite exception from {0}: {1}.

Category:
IIOP

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This error should not occur.

Action:
Contact My Oracle Support.

BEA-002028
An OTS error occurred: {0}, {1}.

Category:
IIOP

Cause:
OTS errors are generally not bugs but always result in exception information being lost when propagated to the caller. Thus, the root cause is always logged, so that system administrators can determine the real cause. OTS errors are generally caused by some transaction subsystem operation (for instance, a transaction being rolled back).

Action:
Ensure that this is an expected error.

BEA-002033
Codeset for {0} data set to {1}, OSF registry entry {2}.

Category:
IIOP

Cause:
This is an informational message.

Action:
No action is required.

Replacer: {0}

Category:
IIOP

Cause:
The replacer did not have enough information to do a proper replacement.

Action:
Contact My Oracle Support.

BEA-002041
Connection attempt was rejected because IIOP is not enabled on this channel.

Category:
IIOP

Cause:
The connection attempt was rejected because IIOP is not enabled at all for this server, as determined by the ServerMBean, or is not enabled on this particular channel.

Action:
Enable IIOP.

BEA-002043
Naming exception: {0}

Category:
IIOP

Cause:
A standard exception was generated by the naming implementation.

Action:
No action is required.

BEA-002044
Class not found: class= {0}, repId={1}, codebase={2}

Category:
IIOP

Cause:
Class not found.

Action:
Add the required class to CLASSPATH.

BEA-002605
Adding address: {0} to the licensed client list.

Category:
Server

Cause:
The server accepted a connection from the specified client.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-002606
The server is unable to create a server socket for listening on channel "{3}". The address {0} might be incorrect or another process is using port {1,number,0}: {2}

Category:
Server

Cause:
The address was incorrect or another process was using the port.

Action:
Use ipconfig or ifconfig to check if the listen address is valid, and use netstat to check that the specified port is not in use by another process.

BEA-002607
Channel "{2}", listening on {0}:{1,number,0}, was shut down.

Category:
Server

Cause:
The server or channel was shut down.

Action:
No action is required. If this was an unexpected error, contact My Oracle Support.

BEA-002608
The ListenThread failed because of an error: {0}

Category:
Server

Cause:
An exception occurred when the server socket was unable to accept client connections.

Action:
Check the file descriptor limit. Tune the operating system parameters that handle socket creation using ServerSocket.

BEA-002609
Channel Service initialized.

Category:
Server

Cause:
The Channel subsystem is operational.

Action:
No action is required.

BEA-002610
Dynamic Listener Service initialized.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Server

Cause:
The dynamic listener subsystem is operational.

Action:
No action is required.

BEA-002611
The hostname "{0}", maps to multiple IP addresses: {1}.

Category:
Server

Cause:
The host name of the server resolved to multiple IP addresses, which can cause problems for the Administration Server.

Action:
Check if this was done on purpose.

BEA-002612
Channel "{2}", listening on {0}:{1,number,0}, did not start did not start properly.

Category:
Server

Cause:
Some of the listen ports did not open or failed within the configured grace period.

Action:
Ensure that none of the configured listen ports are in use by other processes.

BEA-002613
Channel "{2}" is now listening on {0}:{1,number,0} for protocols {3}.

Category:
Server

Cause:
The server successfully started the listen thread and server socket.

Action:
No action is required.

BEA-002614
Reopening channel "{2}" on {0}:{1,number,0}.

Category:
Server

Cause:
The server backed off because a socket exception occurred while accepting client connections. The server is now ready to accept connections.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-002615
After having failed to listen, the server is now listening on channel "{2}" on {0}:{1,number,0}.

Category:
Server

Cause:
The server backed off because a socket exception occurred while accepting client connections. The server is now ready to accept connections.

Action:
No action is required.

BEA-002616
Failed to listen on channel "{2}" on {0}:{1,number,0}, failure count: {3}, failing for {4} seconds, {5}

Category:
Server

Cause:
An exception occurred while trying to accept client connections. The server will try to back off to aid recovery.

Action:
The operating system (OS) limit for the number of open file descriptors (FD limit) needs to be increased. Tune the OS parameters that might help the server to accept more client connections (for example, TCP accept back log).

BEA-002617
Attempting to close and reopen the server socket on channel "{2}" on {0}:{1,number,0}.

Category:
Server

Cause:
The server listener could not accept a socket connection and failed after several simple retries. It has closed and reopened the server socket.

Action:
Check if the file decriptor limit needs to be increased. Tune the operating system parameters that might help the server accept more client connections.

BEA-002618
An invalid attempt was made to configure a channel for unconfigured protocol "{0}".

Category:
Server

Cause:
The server configuration specified a channel that uses a protocol that is not enabled.

Action:
Enable the protocol in the server configuration.

BEA-002619
One or more listen ports did not start properly.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Server

Cause:
One or more listen ports failed to open during server startup.

Action:
Ensure that none of the configured listen ports are in use by other processes.

BEA-002620
An invalid attempt was made to configure a channel for server "{0}" on an unknown listen address "{1}".

Category:
Server

Cause:
The server configuration specified a channel that uses a listen address that does not exist.

Action:
Correct the server configuration.

BEA-002621
The connection was rejected because the server license only allows connections from {0} unique IP addresses.

Category:
Server

Cause:
Clients tried to connect from more distinct addresses than the license allows.

Action:
Use a server license that allows for more clients to connect.

BEA-002622
The protocol "{0}" is now configured.

Category:
Server

Cause:
The server has loaded a protocol making it available for outbound traffic and configurable for inbound traffic.

Action:
No action is required.

BEA-002623
Connection rejected, the server is in the {0} state. Remote Server contacting us is {1}

Category:
Server

Cause:
Clients tried to connect to the server before it was in the RUNNING state.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Connect to the server after it has started.

BEA-002624
The administration protocol is "{0}" and is now configured.

Category:
Server

Cause:
The server has loaded the administration protocol making it available for outbound traffic and configurable for inbound traffic.

Action:
No action is required.

BEA-002625
An attempt to configure channel "{0}" failed because of {1}.

Category:
Server

Cause:
The cause is detailed in the accompanying exception.

Action:
Review the exception.

BEA-002626
The protocol "{0}" could not be loaded: {1}

Category:
Server

Cause:
Consult the exception for why the protocol could not be loaded.

Action:
Consult the exception for why the protocol could not be loaded.

BEA-002627
The domain configuration must have at least one administration channel on every server or no administration channels at all.

Category:
Server

Cause:
The server was contacted by a server that did not reflect the same administration state as itself.

Action:
Modify the domain configuration so that all servers have administration channels, or enable the domain-wide administration port.

BEA-002628
Unable to export RemoteLifeCycleOperations RMI object due to {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Server

Cause:
The RMI export failed.

Action:
Contact My Oracle Support and provide the logs.

BEA-002630
Accepting connections again.

Category:
Server

Cause:
The server is accepting client connections again after refusing connections as part of server throttling.

Action:
No action is required.

BEA-002631
Max threshold reached for open sockets [total open sockets: {0}, allowed max: {1}]. No more connections allowed.

Category:
Server

Cause:
The MaxOpenSocketCount attribute of the server configuration defines the upper bound of the number of open sockets.

Action:
Increase the MaxOpenSocketCount attribute of the server configuration. Use the server tuning tab in the Administration Console.

BEA-002632
Found jrmp.jar in {0} directory. JRMP service is now enabled.

Category:
Server

Cause:
JRMP is enabled.

Action:
No action is required.

BEA-002633
A port conflict was detected in the server "{4}" configuration. The server "{4}" is configured to listen on two ports that have the same port number and IP address. Channel "{0}" address "{1}" conflicts with channel "{2}" address "{3}".

Category:
Server

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The server is configured to listen on two ports that have the same port number and IP address.

Action:
Ensure that the address identities [ListenAddress and ListenPort combinations] are distinct and unique.

BEA-002634
The server "{0}" disconnected from this server.

Category:
Server

Cause:
The remote server may have crashed, been shut down normally or been partitioned from the network.

Action:
No action is required.

BEA-002635
The server "{0}" connected to this server.

Category:
Server

Cause:
The remote server may have been booted or a network partition may have been resolved.

Action:
No action is required.

BEA-002636
Unable to update server "{0}" with local channel information.

Category:
Server

Cause:
The remote server may have crashed, been shut down normally or been partitioned from the network.

Action:
No action is required.

BEA-002637
Failed to register a disconnect listener because of {0}

Category:
Server

Cause:
This can happen during server startup when the incoming network connection is not suitable for callbacks and the booting server does not yet have a listen port open.

Action:
No action is required. The server should eventually be connected properly.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-002638
{0} was issued remotely from {1}.

Category:
Server

Cause:
Log the host address of the machine that issued the SLC operation.

Action:
No action is required.

BEA-002639
ServerRuntime:{0}

Category:
Server

Cause:
This is an informational message.

Action:
No action is required.

BEA-002640
A request has been received to force a shutdown of the server.

Category:
Server

Cause:
This is an informational message.

Action:
No action is required.

BEA-002641
-DserverType is set to an unrecognized value: {0}. The server will start with all services enabled.

Category:
Server

Cause:
An undefined server type was specified or a typographical error was made.

Action:
See the WebLogic Server documentation for valid values for -DserverType.

BEA-002642
{0} not found. The server will start with all services enabled.

Category:
Server

Cause:
The file was deleted or moved.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Replace the file from the WebLogic Server installation.

BEA-002643
Attempt to read {0}, failed: {1}

Category:
Server

Cause:
The file has been corrupted or had its permissions changed.

Action:
Replace the file with one from the WebLogic Server installation.

BEA-002644
The JAR file {0} being processed as a potential service plug-in could not be read: {1}

Category:
Server

Cause:
The file may be damaged.

Action:
Check the file, replace & and try again.

BEA-002645
The manifest of the JAR file {0} being processed as a potential service plug-in, could not be read: {1}

Category:
Server

Cause:
The manifest may be corrupted.

Action:
Replace the file and retry.

BEA-002646
Unable to load the service plug-in activator class from {0}: {1}

Category:
Server

Cause:
The plug-in JAR file does not meet the service plug-in requirements.

Action:
Check the contents of the JAR file and retry.

BEA-002647
The service plug-in, {1}, was added from {0}.

Category:
Server

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The plugin was placed in the domain lib directory.

Action:
No action is required. To remove the plug-in, remove it from the domain lib directory.

BEA-002648
Could not obtain the relevant ServerRuntimeMBean for server {0}.

Category:
Server

Cause:
The remote server runtime object for server {0} could not be obtained. This can happen if the server has already been shut down or is otherwise unavailable.

Action:
If the server is active when this error occurs, contact My Oracle Support.

BEA-002649
A port conflict was detected in the server "{3}" configuration. Both TCP and SDP channels are configured to listen on the same port number and IP address. Channels "{0}" and "{1}" on address "{2}".

Category:
Server

Cause:
Both TCP and SDP channels are configured to listen on the same port number and IP address.

Action:
Ensure that the channels with the same [ListenAddress and ListenPort combinations] either all support SDP or do not support SDP.

BEA-002650
Unable to schedule reconnection to a disconnected server.

Category:
Server

Cause:
The default timer manager has stopped. This is normal during server shutdown.

Action:
None required if the server is in the process of shutting down.

BEA-002651
The process for the server {0} has not completely shut down. This problem should be reported and you may have to kill the process manually.

Category:
Server

Cause:
The process for the server {0} has not completely shut down.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Kill the process manually.

BEA-002652
The server has no configured channels.

Category:
Server

Cause:
The server has no configured channels.

Action:
Create or define a correct channel configuration.

BEA-002653
The server''s administration channel conflicts with the Administration Server''s channel.

Category:
Server

Cause:
The server's administration channel conflicts with the Administration Server's channel.

Action:
Check the server channel configuration and fix the conflicts.

BEA-002654
Initialization Failed: {0}

Category:
Server

Cause:
Initialization Failed: {0}

Action:
Review the returned error and take appropriate action to fix it.

BEA-002655
Cannot dynamically create new channel with admin protocol on Managed server {0} while it is running.

Category:
Server

Cause:
An attempt was made to create a new channel with admin protocol on Managed server {0} while the server is running.

Action:
Shut down the Managed Server and then try creating the channel again.

BEA-002656
Cannot dynamically enable or disable adminstration port on Managed Server {0} while it is running.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Server

Cause:
An attempt was made to dynamically enable or disable the adminstration port on Managed Server {0} while the server is running.

Action:
Shut down the Managed Server and then try enabling or disabling the port again.

BEA-002657
Cannot change MaxOpenSockCount enablement dynamically on Managed Server {0} while it is running.

Category:
Server

Cause:
An attempt was made to dynamically change MaxOpenSockCount enablement on Managed Server {0} while the server is running.

Action:
Shut down the Managed Server and then try to change MaxOpenSockCount enablement again.

BEA-002658
No configured outbound channel for {0}.

Category:
Server

Cause:
No configured outbound channel for {0}.

Action:
Review the returned error and take appropriate action to fix it.

BEA-002659
Only local HostID is supported {0}.

Category:
Server

Cause:
Only the local HostID is supported {0}

Action:
Check and fix the error.

BEA-002660
Failed to parse replication ports for server {0} port range: {1}.

Category:
Server

Cause:
Parsing replication ports for server {0} port range: {1} failed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check and fix the error.

BEA-002661
Server failed to bind to any usable port.

Category:
Server

Cause:
The server failed to bind to any usable port.

Action:
See the preceding log message for details.

BEA-002662
Server was unable to verify whether {0} maps to multiple addresses due to {1}.

Category:
Server

Cause:
Review the contents of the included error message for the cause.

Action:
Review the contents of the included error message to determine the appropriate action to take.

BEA-002663
Uncaught Throwable in processSockets {0}.

Category:
Server

Cause:
An unhandled Throwable error occurred while processing sockets.

Action:
Check for other log messages that give more information about the failure.

BEA-002664
Failed to start Admin Channel {0}.

Category:
Server

Cause:
There was an error binding to the Admin Channel port. The port may already be in use.

Action:
Check for a port conflict.

BEA-002665
A partition "{0}" appears to use a server resource; channel: {1}.

Category:
Server

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The server channel is a shared resource and cannot belong to a partition.

Action:
Check whether this is not a Coherence partition. Otherwise configure either port-offset or explicit-port or uri-prefix.

BEA-002666
RemoteChannelService: {0} {1}

Category:
Server

Cause:
managed server failed to connect AdminServer due to this error.

Action:
Check exception message to resolve connection error.

BEA-002900
Initializing self-tuning thread pool.

Category:
WorkManager

Cause:
The server is starting.

Action:
No action is required.

BEA-002901
Creating Work Manager "{2}" with configured minimum threads constraint "{3}" and maximum threads constraint "{4}" for module "{0}" and application "{1}"

Category:
WorkManager

Cause:
The application is being initialized.

Action:
No action is required.

BEA-002902
Creating execute queue "{0}".

Category:
WorkManager

Cause:
The server is starting.

Action:
No action is required.

BEA-002903
Creating Work Manager from "{1}" WorkManagerMBean for application "{0}"

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
WorkManager

Cause:
The application is being initialized.

Action:
No action is required.

BEA-002908
Unable to create runtime MBean for Work Manager {0}. {1}

Category:
WorkManager

Cause:
A fatal error occurred while creating the runtime MBeans.

Action:
Contact My Oracle Support with the server logs.

BEA-002911
Work Manager {0} failed to schedule a request due to {1}

Category:
WorkManager

Cause:
Work Manager did not schedule a request due to a fatal failure.

Action:
This is a critical failure. Report to My Oracle Support with the logs.

BEA-002912
Overload Manager {0} rejected request as current length {1} exceeds max capacity of {2}

Category:
WorkManager

Cause:
A request was rejected as the overload capacity was reached or exceeded.

Action:
No action is required.

BEA-002913
Work Manager {0} rejected request as the server is low on memory

Category:
WorkManager

Cause:
A request was rejected as the server was low on memory.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-002914
Shutdown callback invocation failed with: {0}

Category:
WorkManager

Cause:
There was an internal WebLogic Server error in the application shutdown.

Action:
Report to My Oracle Support with the logs.

BEA-002916
Request belonging to Work Manager {0}, application {1} is rejected as the WorkManager is shutdown.

Category:
WorkManager

Cause:
The request was refused entry because the Work Manager was shutdown.

Action:
No action is required.

BEA-002917
Enqueued request belonging to Work Manager {0}, application {1} is cancelled as the Work Manager is shutdown.

Category:
WorkManager

Cause:
The request was refused because the Work Manager was shutdown.

Action:
No action was required.

BEA-002918
Server detected execute queue(s) in self-tuning mode. Execute queues will not be self-tuned. They retain their behavior from earlier releases. Consider using Work Managers to take advantage of self-tuning.

Category:
WorkManager

Cause:
The execute queues were detected in the self-tuning server.

Action:
Consider removing the execute queues. The server automatically adjusts the thread pool size for optimal performance. Work Managers can be used to change the default behavior where needed.

BEA-002919
Unable to find a Work Manager with name {0}. Dispatch policy {0} will map to the default Work Manager for the application {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
WorkManager

Cause:
There is no Work Manager with the given name.

Action:
This could indicate a configuration error. Check the dispatch-policy and ensure that it matches the name of a Work Manager defined either within the same application or globally.

BEA-002920
An instance of the mSA Work Manager

Category:
WorkManager

Cause:
This is an informational message.

Action:
No action is required.

BEA-002921
The name of the Work Manager

WorkManager

Cause:
This is an informational message.

Action:
No action is required.

BEA-002927
Number of requests that are currently executing

Category:
WorkManager

Cause:
This is an informational message.

Action:
No action is required.

BEA-002928
Number of requests executed out of turn to satisfy this constraint

Category:
WorkManager

Cause:
This is an informational message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-002929
Number of requests that must be executed to satisfy the constraint

Category:
WorkManager

Cause:
This is an informational message.

Action:
No action is required.

BEA-002930
The maximum time a request had to wait for a thread. Only requests whose execution is needed to satisfy the constraint are considered.

Category:
WorkManager

Cause:
This is an informational message.

Action:
No action is required.

BEA-002931
Number of requests that must be executed to satisfy the constraint

Category:
WorkManager

Cause:
This is an informational message.

Action:
No action is required.

BEA-002932
An instance of the MaxThreadsConstraint for a particular Work Manager

Category:
WorkManager

Cause:
This is an informational message.

Action:
No action is required.

BEA-002933
Number of requests that are currently executing

Category:
WorkManager

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is an informational message.

Action:
No action is required.

BEA-002934
Number of requests that are denied a thread for execution because the constraint is exceeded

Category:
WorkManager

Cause:
This is an informational message.

Action:
No action is required.

BEA-002935
request-class-name reference within ContextCase element for entry {0} with value: {1} ;cannot be resolved for Work Manager.

Category:
WorkManager

Cause:
The request class specified in the context case is not defined.

Action:
Ensure that a request class with the same name as was specified in the context case request-class-name is configured.

BEA-002936
maximum thread constraint {0} is reached

Category:
WorkManager

Cause:
The number of threads assigned to this work manager has reached the configured value in the maximum threads constraint

Action:
No action is required.

BEA-002937
The maximum thread constraint {0} is no longer reached.

Category:
WorkManager

Cause:
The number of threads assigned to this Work Manager has dropped below the configured value in the maximum threads constraint.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-002938
Global work manager "{0}" created with customized configuration

Category:
WorkManager

Cause:
The default configuration for a global work manager has been overriden and the work manager is created with a customized configuration

Action:
no action needed

BEA-002939
The maximum thread constraint {0} has been reached {1} times for the last {2} seconds.

Category:
WorkManager

Cause:
The number of threads assigned to this work manager has reached the configured value for the maximum threads constraint.

Action:
No action is required.

BEA-002940
Shutting down work manager "{0}" according to the configured work manager shutdown trigger.

Category:
WorkManager

Cause:
A work manager is being shut down because the number of stuck threads has reached the configured value in a work manager shutdown trigger.

Action:
Monitor the stuck threads to determine the reason why the requests have been taking a long time to process. If resumeWhenUnstuck is true, the work manager will be resumed when there are no more stuck threads for the work manager.

BEA-002941
Removed {0} threads from the standby thread pool.

Category:
WorkManager

Cause:
The server is reducing the number of threads in the standby thread pool either because they are not needed or to reduce overall resource usages of the server.

Action:
No action is required as the server auto tunes.

BEA-002942
CMM memory level becomes {0}. Setting standby thread pool size to {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
WorkManager

Cause:
CMM memory level has changed. Standby thread pool size may be adjusted accordingly.

Action:
No action is required.

BEA-002943
Maximum Threads Constraint "{0}" queue for work manager "{1}" reached maximum capacity of {2} elements. Consider setting a larger queue size for the maximum threads constraint.

Category:
WorkManager

Cause:
The max threads constraint queue is full.

Action:
Consider setting a larger queue size for the max threads constraint.

BEA-002944
Maximum Threads Constraint "{0}" queue for work manager "{1}" reached maximum capacity of {2} elements {3} times for the last {4} seconds. Consider setting a larger queue size for the maximum threads constraint.

Category:
WorkManager

Cause:
The max threads constraint queue is full.

Action:
Consider setting a larger queue size for the max threads constraint.

BEA-002945
Unable to perform ThreadLocal cleanup for self-tuning thread pool threads due to error: {0}

Category:
WorkManager

Cause:
Please see the error in the message for additional information.

Action:
Check the error in the message for details of the error and take approriate action if possible. It is also possible that ThreadLocal cleanup is not supported on your platform.

BEA-002946
Partition configuration for partition {0} is not available while loading work manager components for the partition.

Category:
WorkManager

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This message can be ignored if partition configuration is available at a later time. This could happen if the partition has just been created or if it has just been migrated from another server.

Action:
Check whether there is a log message WLS-002947 in the log file for the same partition. If not, verify if the partition is being created properly.

BEA-002947
Partition configuration for partition {0} is available. Work manager components for the partition have been loaded successfully.

Category:
WorkManager

Cause:
Partition configuration was not available earlier when trying to load work manager components for the partition. This message indicates that the partition configuration is now available and the work manager components have been loaded successfully.

Action:
No action is required. Earlier warning messages WLS-002946 and WLS-002948 for the same partition can now be disregarded.

BEA-002948
Error occurred while loading work manager components for partition {0}: {1}

Category:
WorkManager

Cause:
Please see the error in the message for additional information.

Action:
Check the error in the message for details of the error and take approriate action if possible.

BEA-002949
Work manager components configured for partition {0} is being accessed, but the partition is not deployed to this server.

Category:
WorkManager

Cause:
This can occur when there are possible inconsistencies in partition or resource group target configuration.

Action:
Check the partition or resource group targets configuration.

BEA-002950
Partition "{0}" is configured with a minimum threads constraint cap of {1}, which is less than the sum of all configured minimum threads constraints in the partition.

Category:
WorkManager

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The WebLogic administrator has set a cap on the number of threads that will be allocated to this partition for satifying its minimum threads constraints. The configured value is less than the sum of all configured minimum threads constraints configured in this partition.

Action:
Request a higher partition minimum threads constraint cap setting from the WebLogic administrator.

BEA-002951
An error occurred while trying to create a thread under the global context due to error: {0}. A thread wass created under the context of partition "{1}" instead.

Category:
WorkManager

Cause:
Check the error in the message for additional information about what might have caused the error.

Action:
Resource Consumption Management may not work properly with this error. Contact My Oracle Support and provide them with the logs.

BEA-002952
Partition maximum threads constraint for partition {0} has been reached.

Category:
WorkManager

Cause:
The number of threads assigned to this partition has reached the configured partition maximum threads constraint value.

Action:
No action is required.

BEA-002953
The partition maximum threads constraint for partition {0} has been reached {1} times in the last {2} seconds.

Category:
WorkManager

Cause:
The number of threads assigned to this partition has reached the configured partition maximum threads constraint value.

Action:
No action is required.

BEA-002954
The Partition Maximum Threads Constraint "{0}" queue reached maximum capacity of {2} elements when trying to add a work entry for work manager "{1}" to the queue. Consider setting a larger queue size for the partition maximum threads constraint.

Category:
WorkManager

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The partition maximum threads constraint queue is full.

Action:
Consider setting a larger queue size for the partition max threads constraint.

BEA-002955
The Partition Maximum Threads Constraint "{0}" reached maximum capacity of {2} elements {3} times in the last {4} seconds when trying to add work entries for work managers including "{1}". Consider setting a larger queue size for the partition maximum threads constraint.

Category:
WorkManager

Cause:
The partition maximum threads constraint queue is full.

Action:
Consider setting a larger queue size for the partition maximum threads constraint.

BEA-002956
The thread count tuning feature in the self-tuning thread pool has stopped due to {0}.

Category:
WorkManager

Cause:
The self-tuning timer task has to stop due to an unrecoverable error.

Action:
The self-tuning thread pool would continue to process work request, althought without further adjustment of the thread pool size. Consider restarting the server if the thread pool size can no longer handle the work load of the server.

BEA-002957
Fair share request class "{0}" is configured with a fair share value of {1}, which is higher than the recommended maximum value of 100.

Category:
WorkManager

Cause:
The configured fair share value is higher than the recommended maximum value of 100.

Action:
Consider configuring a fair share value between 1 and 100 for the fair share request class.

BEA-002958
WorkManager state dump has been enabled.

Category:
WorkManager

Cause:
WorkManager state dump is enabled.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-002959
Self-tuning thread pool contains {0} running threads, {1} idle threads, and {2} standby threads

Category:
WorkManager

Cause:
This is an informational message.

Action:
No action is required.

BEA-003000
Could not send cache multicast message for key "{0}", {1}.

Category:
Cache

Cause:
UThis error is usually caused by some communication failure.

Action:
Check the exception message for details.

BEA-003001
Leasing failure: {0}

Category:
Cache

Cause:
This error is usually caused by some communication failure.

Action:
Check the exception message for details.

BEA-003002
Replication failure: {0}

Category:
Cache

Cause:
This error is usually caused by some communication failure.

Action:
Check the exception message for details.

BEA-003004
Unexpected failure {0}

Category:
Cache

Cause:
This is a general purpose warning message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required. The cache will try to adjust to the failure.

BEA-003005
CacheFilter not caching the response for uri: {0} reason: {1}

Category:
Cache

Cause:
CacheFilter does not cache responses unless the status is 200.

Action:
Check the message for information on how to fix the problem.

BEA-003090
Could not send cache multicast message for key "{0}", {1}.

Category:
LLD

Cause:
This error is usually caused by some communication failure.

Action:
Check the exception message for details.

BEA-003101
Modified non-dynamic {0} property on the Administration Server.

Category:
Cluster

Cause:
The non-dynamic {0} property was updated while the server was in a running state.

Action:
Reboot the Administration Server so that the {0} property takes effect.

BEA-003102
There was a failure in the execution of the post script {0} while deactivating MigratableTarget {1}. Since post script failure is marked as fatal, the MigratableTarget will not be automatically migrated. To enable automigration, fix the post script failure and manually migrate the failed migratable target or disable the post script failure fatal flag.

Category:
Cluster

Cause:
The execution of the post deactivation script failed.

Action:
Fix the post deactivation script and migrate the MigratableTarget manually.

BEA-003103
{0} failed to release its lease because of {1}. This may affect its automatic migration behavior.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Cluster

Cause:
An exception occurred: {1}.

Action:
If a database is being used for leasing, ensure that it is available.

BEA-003104
Failed to notify the execution failure of the post script {1} for {0} to the SingletonServiceStateManager because of {2}. This may affect its automatic migration behavior.

Category:
Cluster

Cause:
An exception occurred: {2}.

Action:
Ensure that the network is working properly.

BEA-003105
The asynchronous replication request timed out while attempting to add object {0} to the replication queue. This session has not been replicated to any backup at this point.

Category:
Cluster

Cause:
The asynchronous replication request timed out while attempting to add object {0} to the replication queue. Once full, the queue waits until it has space for the object. This wait took longer than the ClusterMBean specified AsyncSessionQueueTimeout, thus the session object was not put into the queue and will not be replicated at this time.

Action:
This could be due to the secondary server or persistent store slowing down the replication process. To better handle this, the SessionFlushInterval and the SessionFlushThreshold can be reduced to replicate less at a time and to replicate more often. Checking the performance of the secondary server or persistent store is advised.

BEA-003106
An unexpected exception occured during replication: {0}. Future session updates should replicate as expected.

Category:
Cluster

Cause:
An unexpected runtime exception occured during replication probably from the Remote Management Interface (RMI) stub. Future session updates should replicate as expected.

Action:
Ensure that no problems exist in the network. If the problem persists, contact My Oracle Support and provide them with the stack trace for further analysis.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-003107
Lost {0} unicast message(s).

Category:
Cluster

Cause:
This is an informational message. When a server joins a stable cluster, this message will appear since the server did not receive unicast messages sent out by other servers in the cluster.

Action:
No action is required.

BEA-003108
Unicast receive error : {0}

Category:
Cluster

Cause:
An error occurred while trying to receive a message over the cluster broadcast.

Action:
Ensure that the NIC is functioning properly. If it appears that no environment problems exist, contact My Oracle Support and provide the stack trace for further analysis.

BEA-003109
Cluster {0} uses a database as the migration basis but no data source for migration has been configured.

Category:
Cluster

Cause:
Cluster {0} uses a database as the migration basis but no data source for migration has been configured.

Action:
Ensure that the data source exists and is set for database migration basis.

BEA-003110
Connection attempt was rejected because the incoming protocol {1} is not enabled on channel {0}.

Category:
Cluster

Cause:
The connection attempt was rejected because the {1} protocol is not enabled at all for this server, as determined by the ServerMBean, or is not enabled on this particular channel.

Action:
Enable the {1} protocol on the channel.

BEA-003111
No channel exists for replication calls for cluster {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Cluster

Cause:
No channel exists for replication calls for cluster {0}.

Action:
Configure the channels for replication calls.

BEA-003112
Channels "{0}" configured for replication traffic.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-003113
Using one-way RMI for replication

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-003114
Ignoring one-way RMI calls for replication because multiple replication channels are not present.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-003115
Failed to synchronize a secondary session due to missing updates.

Category:
Cluster

Cause:
The Work Manager queue might be full and as a result update messages were dropped.

Action:
Either increase the number of servers in the cluster (preferred) or add more replication channels (requires server restart).

BEA-003116
Starting Member Death Detector.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-003117
Starting Member Death Detector Heartbeat Receiver.

Category:
Cluster

Cause:
None.

Action:
None.

BEA-003118
WLS Server "{0}" does not have an associated machine configured. Member Death Detector will not be enabled for this server.

Category:
Cluster

Cause:
No associated machine configured with the server.

Action:
Please associate a machine with this server.

BEA-003119
The singleton service {0} is now registered on this server but will not be activated because this server is not part of a cluster.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-003120
Hostname {0} failed to resolve during cluster initialization.

Category:
Cluster

Cause:
A name service such as DNS is unavailable or unstable.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the name service configuration or name service availability.

BEA-003121
Unicast cluster may not function correctly as the listen address of server {0} is not specified.

Category:
Cluster

Cause:
The listen address of the Managed Server was not specified.

Action:
Set the listen address of the Managed Servers.

BEA-003122
{0} : A cluster that has migratable servers could not create/execute an SQL statement when validating the database connection. The cluster is misconfigured. Check the leasing table on the database and connection configuration.

Category:
Cluster

Cause:
The cluster is not configured correctly.

Action:
Check the leasing table in the database and connection configuration.

BEA-003123
Singleton Monitor has detected that the singleton service {0} is in a failed state.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-003124
Singleton Monitor has detected that the singleton service {0} has an expired status.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-003125
Singleton Monitor has detected that the singleton service {0} has no lease.

Category:
Cluster

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-003131
The singleton service {0} has failed with failure state : {1}. Summary of reason Code : {2}

Category:
Cluster

Cause:
A critical service has failed, most likely due to an exception.

Action:
Depending on the cause, corrective action must be taken to resolve the failure. If the problem still persists, contact My Oracle Support for further analysis.

BEA-003132
An EJB is configured to use the clustered EJB timer implementation but the data-source-for-job-scheduler cluster attribute is not configured.

Category:
Cluster

Cause:
While deploying an EJB, the EJB container determined that the data-source-for-job-scheduler cluster attribute has not been set.

Action:
You must either set the timer-implementation attribute of your weblogic-ejb-jar.xml descriptor to Local or configure the data-source-for-job-scheduler attribute for your cluster.

BEA-003133
An EJB is configured to use the clustered EJB timer implementation but the data-source-for-job-scheduler attribute is not configured in partition "{0}".

Category:
Cluster

Cause:
While deploying this EJB, the EJB container determined that the data-source-for-job-scheduler partition attribute has not been set.

Action:
You must either set the timer-implementation attribute of your weblogic-ejb-jar.xml descriptor to Local or configure the data-source-for-job-scheduler attribute for your partition.

BEA-003134
An EJB is configured to use the clustered EJB Timer implementation but this server is not part of a cluster.

Category:
Cluster

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
You cannot deploy an EJB that uses clustered EJB timers to a server that is not part of a cluster.

Action:
You must either set the timer-implementation attribute of your weblogic-ejb-jar.xml descriptor to Local or ensure that any servers to which you deploy the EJB are part of a cluster.

BEA-003135
Job Scheduler service was not started for this partition because the data source for the job scheduler is not configured for this partition.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required unless the job scheduler service is needed in this partition, in which case you can configure a data source for the job scheduler for this partition and restart the partition.

BEA-003136
Job scheduler service was not started for this partition because this server does not belong to a cluster.

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-003137
Server in cluster {0} was unable to bind MulticastSocket to address {0}. Will bind to IP_ANY instead.

Category:
Cluster

Cause:
This was caused by an invalid multicast IP address.

Action:
Configure the cluster to use a valid multicast IPv4 or IPv6 address.

BEA-003138
Synchronized {1} from server {0}.

Cluster

Cause:
This is an informational message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-003139
AssertionError is raised on installing ServiceOffer from remote node : {0}

Category:
Cluster

Cause:
Internal data structure is corrupted.

Action:
If there is no other problems, no action is required. Corrupted offer will be simply ignored.

BEA-003140
Partition {0} from server {1} {2} for cluster view {3}

Category:
Cluster

Cause:
The partition has been started/stopped on a particular server in the cluster

Action:
No action is required

BEA-003141
Thread {0} attempted a re-entrant call to the WLS Replication Service while actively replicating session state to a secondary server.

Category:
Cluster

Cause:
During replication of the application''s session state, an attempt was made by the same thread to access the same session instance that is actively being serialized..

Action:
None

BEA-003142
An exception occurred while ensuring replica {0} replicated: {1}

Category:
Cluster

Cause:
An exception occurred while ensuring replica {0} replicated: {1}

Action:
Please check the exception for the exact error message.

BEA-003143
An exception occurred while locally cleaning up replica {0} for replication key {1}: {2}

Category:
Cluster

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An exception occurred while locally cleaning up replica {0} for replication key {1}: {2}

Action:
Please check the exception for the exact error message.

BEA-003144
All session objects should be serializable to replicate. Check the objects in the session. Failed to replicate a non-serializable object in context {0}.

Category:
Cluster

Cause:
Objects in the session are not serializable or externalizable.

Action:
Ensure that all user-defined objects in the HTTP session are serializable.

BEA-003145
An exception occurred while starting TimerMaster for {0}: {1}

Category:
Cluster

Cause:
An exception occurred while starting TimerMaster service for job scheduler for {0}. The exception is {1}

Action:
Please check the exception for the cause and take appropriate action.

BEA-003146
Unicast cluster may not function correctly as the listen address of server {0} is not specified.

Category:
Cluster

Cause:
The listen address of the Managed Server was not specified.

Action:
Set the listen address of the Managed Servers.

BEA-003147
Detected Exception occurred when calling {0} method. Timer info: {1}

Category:
Cluster

Cause:
An exception occurred: {2}.

Action:
See transaction error and check the root cause

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-003148
The Clustered Timer: {0} has failed to successfully time out in {1} consecutive attempts. Scheduler will automatically delay the timeout for {2} seconds. Timer info: {3}

Category:
Cluster

Cause:
This is an informational message.

Action:
No action is required.

BEA-003149
Failed to fire retry timer because of Leasing problem and reset retry state. Timer info: {0}

Category:
Cluster

Cause:
An exception occurred: {1}.

Action:
If the problem persists, contact My Oracle Support and provide them with the stack trace for further analysis.

BEA-003150
Server "{0}" has acquired the role of Singleton Master for the cluster.

Category:
Cluster

Cause:
TBD

Action:
TBD

BEA-003151
Server "{0}" is no longer the Singleton Master for the cluster.

Category:
Cluster

Cause:
TBD

Action:
TBD

BEA-003501
The migration of server {0} from machine {1} has failed. No suitable candidate machines could be found.

Category:
Cluster

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
No candidate machines are available, or the server {0} has encountered an error on booting independent of its location.

Action:
Further migration of server {0} has been disabled. When the cause of the problem has been determined and fixed, the server {0} should be started by the user, at which point it will resume standard automatic migration behavior.

BEA-003502
Beginning the migration of server {0} from machine {1} to machine {2}

Category:
Cluster

Cause:
The failure of server {0} has provoked a migration attempt to a new machine, machine {2}.

Action:
No action is required, but the logs of server {0} should be examined to determine why it crashed and could not successfully restart on machine {1}.

BEA-003503
The migration of server {0} from machine {1} to machine {2} has succeeded.

Category:
Cluster

Cause:
The failure of server {0} provoked a migration attempt to a new machine, machine {2}. The migration is now complete.

Action:
No action is required.

BEA-003504
The migration of server {0} from machine {1} to machine {2} has failed, because machine {2} is not reachable.

Category:
Cluster

Cause:
Machine {2} was not reachable. A new machine for server {0} will be chosen.

Action:
No action is required.

BEA-003800
Could not parse the user random seed property whose value is {0}. Using seed {1}

Category:
WebLogicServer

Cause:
The seed used to randomize startup services was not parseable. The seed is given to the server with the com.oracle.weblogic.debug.RandomizeServerServices.seed system property.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the value of the com.oracle.weblogic.debug.RandomizeServerServices.seed property given to the server, and make sure it can be parsed into a valid long value

BEA-003801
Could not read server service randomizer file {0}. The seed used in this run is randomSeed

Category:
WebLogicServer

Cause:
The seed file used to randomize startup services was not parseable. The name of the seed file is given to the server with the com.oracle.weblogic.debug.RandomizeServerServices.filename system property.

Action:
Check the value of the com.oracle.weblogic.debug.RandomizeServerServices.filename property given to the server, and make sure it points to a file that contains one line that can be parsed into a long which should be used for the random seed

BEA-003802
The order in which the server services are started has been randomized with seed {0}{1}

Category:
WebLogicServer

Cause:
The server service randomizer was used to randomize server services with the given seed

Action:
No action necessary

BEA-003803
Could not write server service randomizer file {0}. The seed used in this run is {1}

Category:
WebLogicServer

Cause:
When using the service randomizer the system attempted to write the seed used to a file for later use, but the system could not write the file

Action:
Ensure that the randomizer file is in a directory where the system can write and that there is enough disk space in that file system

BEA-003804
The randomizer file with location {0} is not readable. The seed used in this run is {1}

Category:
WebLogicServer

Cause:
The randomizer file at the given location is not readable

Action:
Ensure that the randomizer file is readable by the system

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-003805
The data found in randomizer file with location {0} is not parseable into a long. The seed used in this run is {1}

Category:
WebLogicServer

Cause:
The randomizer file at the given location has bad data in it

Action:
Ensure that the randomizer file has one line that can be parsed into a long value

BEA-003806
There was an error redirecting {0}. The stream will not be redirected.

Category:
WebLogicServer

Cause:
This is caused due to an I/O error in initializing the new stream.

Action:
Correct the error based on the exception messages reported and restart the server.

BEA-004501
Bootstrap request was rejected from server {0} of cluster {1}.

Category:
ConsensusLeasing

Cause:
Server configuration parameters, such as listen-address and port, are duplicated between servers in different clusters.

Action:
Change server configuration parameters of the servers in the domain.

BEA-004502
Exception occurred during unicast connection bootstrapping: {0}

Category:
ConsensusLeasing

Cause:
See displayed exception.

Action:
Report this error to My Oracle Support.

BEA-010000
Exception occurred during ejbActivate: {0}

Category:
EJB

Cause:
An error occurred while calling ejbActivate() on the bean.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check your implementation of the ejbActivate method.

BEA-010001
While deploying EJB "{0}", class {1} was loaded from the system classpath. As a result, this class cannot be reloaded while the server is running. To prevent this behavior in the future, make sure the class is not located in the server classpath.

Category:
EJB

Cause:
The specified class is located in the server classpath.

Action:
Remove this class from the server classpath. It should only be located in the packaged application.

BEA-010002
An error occurred while undeploying: {0}.

Category:
EJB

Cause:
An error occurred while undeploying.

Action:
Please check the exception for the exact error message.

BEA-010003
Exception occurred while loading _WL_TIMESTAMP FILE.

Category:
EJB

Cause:
The container generates the _WL_GENERATED file, which stores the server version of the appc compiler. If the current server version is different from the version specified in the _WL_GENERATED file, appc recompiles the beans. There was an error reading this file.

Action:
The container will automatically recompile the beans.

BEA-010006
Error occurred while saving ejb deployment timestamps. {0}

Category:
EJB

Cause:
The container generates the _WL_GENERATED file, which stores the server version of the appc compiler. if the current server version is different from the version specified in the _WL_GENERATED file, appc recompiles the beans. There was an error writing this file.

Action:
Please check the exception for the exact error message. The container will recompile the beans if this file is not found.

A stateless session bean with bean-managed transactions must commit or roll back a transaction before the business method completes.

Category:
EJB

Cause:
See the message body.

Action:
Check the exception for the exact error message.

BEA-010051
EJB exception occurred during invocation from home: {0} generated exception: {1}

Category:
EJB

Cause:
See the message body.

Action:
No action required.

BEA-010052
An exception occurred while creating the free pool for EJB {0}. Since this occurred during server startup, when a dependent resource may be unavailable, the error will be ignored and deployment will proceed. The EJB container will instead attempt to create the bean instances on demand. The exception was: {1}

Category:
EJB

Cause:
An exception occurred while the EJB container was initializing the free pool of bean instances. The root exception should be printed as part of the warning message issued by the EJB container. Check the server log for further details.

Action:
If you believe the root exception is due to a temporary condition that will automatically be resolved, no action is required. If this exception was not due to a temporary condition, fix the cause of the root exception. If changes to your application are required to fix this issue, redeploy the updated application.

BEA-010054
EJB deployment: {0} has a class {1} that is in the classpath. This class should only be located in the ejb-jar file.

Category:
EJB

Cause:
{1} is in the classpath.

Action:
Remove this class from the classpath. It should only be in the ejb-jar.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-010055
Could not load the RDBMS deployment descriptor for EJB {0} from the file {1}. The file was not found in the JAR file {2}.

Category:
EJB

Cause:
{1} is missing from the JAR file.

Action:
Please add the missing file to the JAR file.

BEA-010057
Could not find a license for EJB 3.0. Please contact Oracle to get a license.

Category:
EJB

Cause:
Unable to get license for EJB 3.0.

Action:
Contact Oracle to get a license.

BEA-010058
The EJB deployment named {0} is being recompiled within the WebLogic Server instance. Please consult the server logs if there are any errors. It is also possible to run weblogic.appc as a standalone tool to generate the required classes.

Category:
EJB

Cause:
See the message body.

Action:
No action required.

BEA-010059
An error occurred while attempting to invalidate the target Read-Only Entity EJB: {0}. The error was: {1}

Category:
EJB

Cause:
The invalidation of read-only beans failed.

Action:
Check the message for the cause.

BEA-010060
The Message-Driven EJB {0} has connected or reconnected to the JMS destination {1}.

Category:
EJB

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The JMS connection has been re-established.

Action:
No action is required.

BEA-010061
The Message-Driven EJB {0} is unable to connect to the JMS destination {1}. The Error was: {2}

Category:
EJB

Cause:
The JMS destination is not available due to a network problem or a problem with the JMS provider, or the configuration information in the MDB deployment descriptor or annotation or both is incorrect. This warning may also occur during WebLogic cluster startup if the JMS destination is located on another server.

Action:
Check that the JMS provider is running and that network connectivity is available. Also check that the configuration information in the MDB deployment descriptor and/or annotation is correct.

BEA-010065
MessageDrivenBean threw an Exception in onMessage(). The exception is: {0}.

Category:
EJB

Cause:
The onMessage method of the MDB may have generated an exception for a legitimate reason, such as the loss of a database connection. If that is not the case, then the MDB may have a programming error that causes it to generate an unchecked Java exception, such as a NullPointerException.

Action:
Unless you are sure that the MDB has generated the exception on purpose, check the source code to ensure that it does not contain any programming errors that might cause it to generate an unchecked Java exception such as a NullPointerException or IndexOutOfBoundsException.

BEA-010066
The Entity EJB {0} generated an exception when its unsetEntityContext was called. This error is ignored by the EJB container. The error is: {1}

Category:
EJB

Cause:
See the message body.

Action:
No action required.

BEA-010067
Exception during ejbRemove: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
See the message body.

Action:
No action required.

BEA-010071
Error occurred while performing Pop of Caller Principal: {0}

Category:
EJB

Cause:
This is a possible internal container error.

Action:
Check the security settings related to the run-as roles and principals setting.

BEA-010072
Error occurred while starting EJB module {0}. Exception is: {1}

Category:
EJB

Cause:
The container was unable to start the EJB module.

Action:
Check the exception for the exact error message.

BEA-010073
Unable to add the {0} interface "{1}" and any dependent classes to the client-jar since it was loaded from the classpath.

Category:
EJB

Cause:
EJB interface and other dependent classes exist in the system classpath.

Action:
Please remove the classes from the system classpath.

BEA-010074
Unable to create the client-jar file due to classes being loaded from the classpath rather than the input JAR. Please modify your classpath so that it does not contain these classes and try again.

Category:
EJB

Cause:
EJB interface and other dependent classes exist in the system classpath.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Please modify your classpath so it does not contain these classes and try again.

BEA-010075
Skipping creation of the client-jar since no EJBs with a remote client view are contained in the JAR file.

Category:
EJB

Cause:
See the message body.

Action:
No action required.

BEA-010076
Client-jar {0} created.

Category:
EJB

Cause:
See the message body.

Action:
No action required.

BEA-010079
An error occurred while attempting to receive a message from JMS for processing by a Message-Driven Bean: {0} The exception is : {1}

Category:
EJB

Cause:
The JMS provider for the MDB may have been shut down or has crashed, or network connectivity may have been lost.

Action:
Check that the JMS provider is available and accessible through the network.

BEA-010080
An error occurred while attempting to process a message inside a Message-Driven Bean: {0} Exception is : {1}

Category:
EJB

Cause:
This error usually occurs if the onMessage method of the MDB throws an exception.

Action:
Check that the MDB is able to process messages by ensuring that any resources it uses (such as database connections) are available. Check the MDB source code to ensure that it does not have any bugs that cause an exception (such as a NullPointerException) to be generated.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-010081
The Message-Driven Bean {0} was configured to use a JMS Topic, requires container-managed transactions, and uses a foreign JMS provider. Only one thread will be used to receive and process all messages.

Category:
EJB

Cause:
The nature of the JMS API does not permit this in a standard way.

Action:
No action is required. However, if you require better performance for a foreign JMS provider and do not need exactly-once transactional semantics, redeploy the MDB so that it has a transaction mode of NotSupported.

BEA-010082
Failed to undeploy security role for resource {0}, while undeploying EJB.

Category:
EJB

Cause:
Unable to remove the role from the security layer.

Action:
Check the exception for the exact error message.

BEA-010083
Failed to undeploy security policy for resource {0}, while undeploying EJB.

Category:
EJB

Cause:
The policy could not be removed from the security layer.

Action:
Check the exception for the exact error message.

BEA-010084
The Message-Driven Beans are being suspended. This may take a minute or two.

Category:
EJB

Cause:
The server is being suspended or shut down.

Action:
No action is required.

BEA-010085
The Message-Driven Beans have all been suspended.

Category:
EJB

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The server is being suspended or shut down.

Action:
No action is required.

BEA-010086
The deployment unit {0} that contains Message-Driven Beans is undeployed already. The server cannot start the Message-Driven Beans that are part of undeployed unit.

Category:
EJB

Cause:
The beans were started after having been undeployed.

Action:
No action is required.

BEA-010087
The EJB deployment named {0} is being recompiled within the WebLogic Server instance. Please consult the server logs if there are any errors. It is also possible to run weblogic.appc as a standalone tool to generate the required classes. The generated source files will be placed in {1}.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-010088
Could not find a license for in-memory replication of the EJB. This feature is disabled.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-010089
Failed to create copy of bean {0} with error: {1}.

Category:
EJB

Cause:
The server was unable to create the secondary server.

Action:
Check the exception for the exact error message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-010090
Failed to update secondary copy with: {0}

Category:
EJB

Cause:
The server was unable to update the secondary.

Action:
Check the exception for the exact error message.

BEA-010091
Failure during stateful session bean replication: {0}

Category:
EJB

Cause:
The container was unable to replicate the stateful session bean.

Action:
Check the exception for the exact error message.

BEA-010092
Failure while updating secondary server during replication of {0}. The error was: {1}

Category:
EJB

Cause:
The server was unable to update the secondary server.

Action:
Check the exception for the exact error message.

BEA-010094
Failed to update the secondary copy of a stateful session bean from home {0}.

Category:
EJB

Cause:
The server was unable to update the secondary server.

Action:
Check the exception for the exact error message.

BEA-010096
The Message-Driven EJB {0} is unable to connect to the JMS destination or bind to JCA resource adapter {1}. The connection failed after {2} attempts. The MDB will attempt to reconnect/rebind every {3} seconds. This log message will repeat every {4} seconds until the condition clears.

Category:
EJB

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The JMS provider or JCA resource adapter is not available, or the configuration is incorrect and WebLogic Server is not able to connect.

Action:
Ensure that the JMS provider is running and is reachable using the network, or the JCA resource adapter is deployed. Also ensure that the configuration information in the MDB deployment descriptor or the annotation or both are correct.

BEA-010097
Exception occurred during the invocation of EJB {0} with primary key {1}.

Category:
EJB

Cause:
The bean generated a system exception.

Action:
Check the exception for the exact error message.

BEA-010098
The database type {0} mentioned in weblogic-cmp-rdbms-jar.xml does not match the database type returned by the driver {1}.

Category:
EJB

Cause:
The database type {0} mentioned in weblogic-cmp-rdbms-jar.xml does not match the database type returned by the driver {1}.

Action:
Check the database-type tag inside weblogic-cmp-rdbms-jar.xml.

BEA-010099
WARNING(S) from EJB QL Compiler. {0}

Category:
EJB

Cause:
The compilation of EJB-QL succeeded. These are some non-fatal warnings.

Action:
Check the message for the exact warnings.

BEA-010100
This server is not part of a cluster. Therefore the InMemory replication feature for StatefulSession EJB {0} will have no effect on this server.

Category:
EJB

Cause:
The bean has been deployed on a server, which is not a part of cluster. Hence the InMemory replication feature will be ignored.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-010102
Error encountered while attempting to create default DBMS table {0}. Error text: {1}

Category:
EJB

Cause:
An error was encountered while attempting to create the default DBMS table.

Action:
Take appropriate action based on the logged error message.

BEA-010124
Method SecurityHelper.{0} returned a NULL principal. The CallerPrincipal stack has been corrupted.

Category:
EJB

Cause:
One cause of corruption might be that a bean has created its own threads. Note that this would be in violation of EJB2.0 Final Spec Chapter: Runtime Management 24.1.2.

Action:
Review your code about thread safety. If a bean does not create its own thread, this is likely a bug in the EJB subsystem and you should probably contact My Oracle Support.

BEA-010127
Incorrect data source type detected. The data source with JNDI name {0}, specified in the RDBMS deployment descriptor for the EJB {1}, does not support global transactions.

Category:
EJB

Cause:
The EJB container requires that a data source which supports global transactions be specified for transactions to be managed correctly.

Action:
Specify the correct data source for the EJB.

BEA-010128
Error during deployment of EJB {0}. The EJB references an application-level cache, {1}, that is not defined in the weblogic-application.xml descriptor.

Category:
EJB

Cause:
The weblogic-ejb-jar.xml descriptor for the EJB refers to an unknown application-level cache.

Action:
Ensure that the application-level cache is defined in the weblogic-application.xml descriptor and ensure the cache name defined in the weblogic-ejb-jar.xml is correct.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-010129
Error during deployment of EJB {0}. The EJB references a MultiVersion application-level cache {1}, but it must use an Exclusive cache instead. EJBs with a concurrency-strategy of Exclusive must use an Exclusive cache.

Category:
EJB

Cause:
An incorrect concurrency strategy is specified. The concurrency-strategy you specify for the bean must be compatible with the caching-strategy specified in weblogic-application.xml.

Action:
Specify the correct concurrency strategy.

BEA-010130
An error occurred during deployment of EJB {0}. The EJB references an Exclusive application level cache {1}, but it must use a MultiVersion cache instead. EJBs with a concurrency-strategy of Database, ReadOnly, or Optimistic must use a MultiVersion cache.

Category:
EJB

Cause:
An incorrect concurrency strategy is specified. The concurrency-strategy you specify for the bean must be compatible with the caching-strategy specified in weblogic-application.xml.

Action:
Specify the correct concurrency strategy.

BEA-010132
Error during deployment of EJB {0}. The EJB has been deployed with use-select-for-update set to true. The database indicates it does not support SELECT ... FOR UPDATE.

Category:
EJB

Cause:
The database indicates it does not support SELECT ... FOR UPDATE.

Action:
Modify use-select-for-update to false, or use a different database that supports SELECT ... FOR UPDATE.

BEA-010139
Bean with primary key {0} already exists.

Category:
EJB

Cause:
A bean with the indicated primary key value already exists.

Action:
Do not use a non-unique value as a primary key.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-010141
Creation of Many-To-Many relationship for primary key: {0} and {1} effected {2} rows in {3}, instead of just 1.

Category:
EJB

Cause:
JoinTable contains a non-unique row for specified primary keys, indicating a Many-To-Many relationship.

Action:
Check the JoinTable to remove the duplicate row.

BEA-010144
The setXXX method for a primary key field may only be called during ejbCreate.

Category:
EJB

Cause:
The setXXX method for a primary key field may only be called during ejbCreate.

Action:
Remove the setXXX method call (for a primary key field) from places other than ejbCreate.

BEA-010145
When a cmp-field and a cmr-field (relationship) are mapped to the same column, the setXXX method for the cmp-field may not be called.

Category:
EJB

Cause:
The cmp-field is read-only.

Action:
Remove the setXXX method call if cmp-filed is also used as cmr-field.

BEA-010146
The setXXX method for a cmr-field that is mapped to a primary key may not be called.

Category:
EJB

Cause:
The cmr-field is read-only.

Action:
Remove the setXXX method call if it is cmr-field mapped to a primary key.

BEA-010147
The setXXX method for a cmr-field may not be called during ejbCreate. The setXXX method should be called during ejbPostCreate instead.

Category:
EJB

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The setXXX method should be called during ejbPostCreate instead.

Action:
Move the setXXX method call for a cmr-field to ejbPostCreate.

BEA-010148
In EJB {0}, the primary key field {1} was not set during ejbCreate.

Category:
EJB

Cause:
All primary key fields must be initialized during ejbCreate.

Action:
Be sure to initialize the primary key field during ejbCreate.

BEA-010149
According to the EJB 2.0 specification, a value of "null" may not be assigned to a collection valued cmr-field.

Category:
EJB

Cause:
This violates the EJB 2.0 specification.

Action:
Avoid using a null argument for a collection valued cmr-field.

BEA-010152
Illegal value for concurrency-strategy. Value was {0}, but must be one of ReadOnly, Exclusive, Database, or Optimistic.

Category:
EJB

Cause:
An illegal value was used for concurrency-strategy.

Action:
Specify a correct value for concurrency-strategy. It must be one of ReadOnly, Exclusive, Database, or Optimistic

BEA-010153
Only instances of beans with a remote client view can invoke getEJBObject().

Category:
EJB

Cause:
See the error message body.

Action:
Remove the getEJBObject() method call from the local client.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-010154
Only instances of beans with a local client view can invoke getEJBLocalObject().

Category:
EJB

Cause:
See the error message body.

Action:
Remove the getEJBLocalObject() method call from remote client.

BEA-010155
Only instances of beans with container-managed transaction demarcation can use getRollbackOnly().

Category:
EJB

Cause:
See the error message body.

Action:
Remove the getRollbackOnly() method call if container-managed transaction is not used, or enable container-managed transaction for EJB.

BEA-010156
Illegal attempt to call EJBContext.getRollbackOnly() from an EJB that was not participating in a transaction

Category:
EJB

Cause:
See the error message body.

Action:
Make sure to begin the transaction before calling the getRollbackOnly() method.

BEA-010157
Only instances of beans with container-managed transaction demarcation can use setRollbackOnly().

Category:
EJB

Cause:
See the error message body.

Action:
Remove the setRollbackOnly() method call if container-managed transaction is not used, or enable container-managed transaction for EJB.

BEA-010158
Illegal attempt to call EJBContext.setRollbackOnly() from an EJB that was not participating in a transaction

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
See the error message body.

Action:
Begin the transaction before calling the setRollbackOnly() method.

BEA-010159
To support the use of Handles and HomeHandles, an EJB must be deployed with a JNDI name. This EJB, {0}, was deployed without specifying a JNDI name. To specify a JNDI name for this EJB, add a jndi-name element to the weblogic-ejb-jar.xml deployment descriptor or corresponding annotation for this EJB.

Category:
EJB

Cause:
This EJB, {0}, was deployed without specifying a JNDI name.

Action:
To specify a JNDI name for this EJB, add a jndi-name element to the weblogic-ejb-jar.xml deployment descriptor or corresponding annotation for this EJB.

BEA-010160
Security violation: User {0} has insufficient permission to access EJB {1}.

Category:
EJB

Cause:
The specified user has insufficient permission to access the EJB.

Action:
Grant sufficient permissions to the user to enable to access the EJBResource.

BEA-010166
Error occurred while starting transaction: {0}.

Category:
EJB

Cause:
An exception occurred while starting the Message-Drive Bean transaction.

Action:
Take appropriate action based on the text of the exception message.

BEA-010167
Message-Driven Beans are not allowed to call {0}.

Category:
EJB

Cause:
The method is unavailable for MDBs.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Remove the method call from the MDBs.

BEA-010168
Method {0} has been declared in an assembly-descriptor exclude-list and cannot be executed.

Category:
EJB

Cause:
The specified method is declared in the exclude-list.

Action:
Remove the method name from the exclude-list or remove the method call.

BEA-010173
env-entry for type java.lang.Character had length = 0.

Category:
EJB

Cause:
If there is env-entry for type java.lang.Character, the parameter value should not be length = 0.

Action:
Use a non-zero length value for java.lang.Character env-entry.

BEA-010188
Error encountered while attempting to drop Default DBMS Table {0}.

Category:
EJB

Cause:
See the exception stack trace included in the logged message.

Action:
Take appropriate action based on the exception stack trace in the logged message.

BEA-010189
Error encountered while attempting to alter Default DBMS Table: {0}.

Category:
EJB

Cause:
See the exception stack trace included in the logged message.

Action:
Take appropriate action based on the exception stack trace in the logged message.

BEA-010191
The alter table option is not supported in {0}. Use the DropAndCreate option.

Category:
EJB

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The alter table option is not supported in the given database.

Action:
Use the DropAndCreate option.

BEA-010194
Only instances of beans with bean-managed transaction demarcation can use getUserTransaction().

Category:
EJB

Cause:
An illegal invocation was made to the getUserTransaction() method on a Container Managed Bean.

Action:
Remove the getUserTransaction() method call from EJBs that are using container-managed transaction.

BEA-010195
Security violation: User {0} has insufficient permission to access method {1}.

Category:
EJB

Cause:
The specified user has insufficient permission to access the specified method.

Action:
Grant sufficient permissions to the user to enable access to the method.

BEA-010197
The entity bean {0} uses optimistic concurrency with read-verification enabled. The database indicates that exclusive row locks are not supported. Read-verification will not guarantee data integrity if the isolation level of the transaction is lower than repeatable read.

Category:
EJB

Cause:
This is a mismatch problem between the concurrency strategy and the transaction isolation level.

Action:
If data integrity should be guaranteed under a read-verification enabled configuration, use the appropriate transaction isolation level.

BEA-010198
An exception occurred while uninitializing the EJB module {0}.

Category:
EJB

Cause:
Check the exception for the exact cause.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the exception for the exact error message, and take appropriate action.

BEA-010199
EJB {0} with run as role {1} has no run-as-principal-name specified in its deployment descriptor or annotation. The EJB container has chosen principal-name {2} from the security-role-assignment list for role {1} to be the run as principal name.

Category:
EJB

Cause:
The specified EJB with the specified run as role has no run-as-principal-name specified in its deployment descriptor or annotation.

Action:
Specify run-as-principal-name explicitly if the chosen principal-name is not the appropriate one.

BEA-010201
The Message-Driven Bean {0} encountered an error while recovering a JMS session. This is a secondary error. The original error occurred while the Message-Driven Bean was processing a message. The recover action was taken in an attempt to recover from the original error, which will be logged separately.

Category:
EJB

Cause:
The Message-Driven Bean may have generated an exception, or there may be a problem with the JMS provider.

Action:
Check that the JMS provider is running and accessible through the network. In addition, check that the Message-Driven Bean onMessage method does not generate any unchecked Java exceptions such as NullPointerException or IndexOutOfBoundsException.

BEA-010202
Call-by-reference is not enabled for EJB {0}. The server will have better performance if it is enabled. To enable call-by-reference, set the enable-call-by-reference element to True in the weblogic-ejb-jar.xml deployment descriptor or corresponding annotation for this EJB.

Category:
EJB

Cause:
Call-by-reference is not enabled.

Action:
If appropriate, enable call-by-reference in the weblogic-ejb-jar.xml deployment descriptor or corresponding annotation for the EJB.

BEA-010204
The EJB component, {0}, will be rolled back and redeployed to update class {1}. This class is not a bean implementation class. Only bean implementation classes can be updated without redeploying the entire module, and only when enable-bean-class-redeploy is set to True in weblogic-ejb.jar.xml.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
A command was issued to update the specified class.

Action:
No action is necessary. This is just an informative message indicating why the EJB module is being redeployed, since this can cause disruption to clients using an EJB in this EJB module.

BEA-010205
The EJB module, {0}, will be rolled back and redeployed to update the class {1}. Bean implementation classes, such as this, can be updated without redeploying the entire EJB module. However, this can only be done if enable-bean-class-redeploy is set to True in weblogic-ejb.jar.xml or the corresponding annotation. If this is the behavior you want, set this value to True and redeploy.

Category:
EJB

Cause:
A command was issued to update the specified class.

Action:
No action is necessary. This is just an informative message indicating why the EJB module is being redeployed since this can cause disruption to clients using an EJB in this EJB module.

BEA-010206
The EJB module, {0}, will be rolled back and redeployed to update the class {1}. This bean implementation class could not be updated without redeploying the entire EJB module because it was changed incompatibly. Incompatible changes are any changes that cause the EJB compiler to be run. This includes modifying a public variable name or a public method signature.

Category:
EJB

Cause:
A command was issued to update the specified class.

Action:
No action is necessary. This is just an informative message to let the user know why the EJB module is being redeployed since this can cause disruption to clients using an EJB in this EJB module.

BEA-010207
License validation not passed for {0}.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-010208
ddl-file {0} created.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-010209
ddl-file {0} could not be deleted.

Category:
EJB

Cause:
See the message body.

Action:
Check the file permissions.

BEA-010210
Unable to write to ddl-file {0}.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-010211
Unable to alter the table, as the primary key has changed.

Category:
EJB

Cause:
See the message body.

Action:
Use the DropAndCreate option to create the table.

BEA-010212
The EJB {0} contains at least one method without an explicit transaction attribute setting. The default transaction attribute of {1} will be used for the following methods: {2}.

Category:
EJB

Cause:
The ejb-jar.xml deployment descriptor or corresponding annotation does not contain transaction attribute settings for the specified EJB methods.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Assign transaction attributes for all methods of your EJB.

BEA-010213
Message-Driven EJB: {0}"s transaction was rolled back, because {1}. The transaction details are: {2}.

Category:
EJB

Cause:
The transaction was rolled back by the MDB container.

Action:
This is an informational message. No action is needed.

BEA-010214
Error starting MDB {0}.

Category:
EJB

Cause:
This error itself does not provide the cause of the error. The log file will contain an exception stack indicating the root cause of the failure.

Action:
Inspect the log file for indications of the root cause of the failure.

BEA-010215
The durable subscription store with jms-client-id equal to {0} is deleted when MDB {1} is removed from the server.

Category:
EJB

Cause:
The durable subscription store is deleted when the MDB is removed from the server and its durable-subscription-deletion is set to true.

Action:
This is an informational message. No action is needed.

BEA-010216
The Message-Driven EJB: {0} is generating an exception when processing the messages. Delivery failed after {1} attempts. The EJB container will suspend the message delivery for {2} seconds before retry.

Category:
EJB

Cause:
The Message-Driven Bean is generating an exception.

Action:
Check the message delivery methods and resolve the exception condition.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-010221
The Message-Driven EJB: {0} is unable to bind to the JCA resource adapter: {1}. The Error was: {2}

Category:
EJB

Cause:
The JCA resource adapter is not deployed, or the configuration information in the MDB deployment descriptor or corresponding annotation is incorrect.

Action:
Check that the JCA resource adapter is deployed and the configuration information in the MDB deployment descriptor or corresponding annotation is correct.

BEA-010222
The aggregate query {0} has a primitive return type but the query returned null because there were no values to which to apply the aggregate function.

Category:
EJB

Cause:
There were no values to which to apply the aggregate function

Action:
Handle ObjectNotFoundException correctly on the application side.

BEA-010223
EJB deployed Message Driven Bean {0}.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-010224
The EJB Timer: {0} has failed to successfully time out in {1} consecutive attempts. The container will delay the timeout for {2} milliseconds as configured for the timer.

Category:
EJB

Cause:
This was caused by a failed ejbTimeout.

Action:
It is possible that no action needs to be taken. However, it may be good to investigate why the original ejbTimeout failed.

BEA-010225
The EJB Timer: {0} has failed to successfully time out in {1} consecutive attempts. Since no retry delay was configured for this timer, the container will automatically delay the timeout for {2} seconds.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
This was caused by a failed ejbTimeout.

Action:
It is possible that no action needs to be taken. However, it may be good to investigate why the ejbTimeout has consecutively failed.

BEA-010226
Error executing clustered EJB timer for EJB {0} of module {1} of application {2}. While executing, the timer was unable to find a necessary internal resource required to execute. The most likely cause of this issue is that the EJB is no longer configured to use the clustered EJB timer service but timers still exist in the database.

Category:
EJB

Cause:
The most likely cause of this error is that the EJB associated with this timer is no longer configured to use the clustered EJB timer service.

Action:
If the EJB in question is no longer configured to use EJB timers, the timers associated with it should be removed from the database. This can be achieved by re-enabling clustered EJB timers for the EJB and then undeploying the EJB. This will cause any timers associated with the EJB to be removed from the database.

BEA-010227
EJB exception occurred during invocation from home or business: {0} generated exception: {1}

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-010228
Failed to update the secondary copy of a stateful session bean business: {0}.

Category:
EJB

Cause:
The server was unable to update the secondary server.

Action:
Check the exception for the exact error message.

BEA-010230
EJB {0} : method name {1} and method name {2} are equal under case-insensitive comparison but both methods have declarative security settings. Declarative security checks are case-insensitive.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
Both of the specified methods have declarative security settings.

Action:
Avoid case-insensitive method name conflicts if method permissions are configured.

BEA-010231
The lock request from EJB {0} with primary key {1} timed-out after waiting {3} ns. The transaction or thread requesting the lock was {2}.

Category:
EJB

Cause:
See error message body.

Action:
See error message body.

BEA-010232
The version of EJB in Module "{0}" is "{1}". However, the deprecated "enable-bean-class-redeploy" feature is not supported in EJB 3.

Category:
EJB

Cause:
See error message body.

Action:
Use the FastSwap feature instead and remove the "enable-bean-class-redeploy" settings in the weblogic-ejb-jar.xml.

BEA-010233
The configuration of "MessagesMaximum" is ignored for non Weblogic JMS.

Category:
EJB

Cause:
See error message body.

Action:
No action is required.

BEA-010234
Failed to unbind {0} from JNDI tree due to {1}.

Category:
EJB

Cause:
See the message body.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
If the application is redeployed, restart the target cluster/server on which the application has been deployed. Please report the issue to My Oracle Support with relevant details.

BEA-010235
The Message-Driven EJB {0} has connected or reconnected to the JCA resource adapter {1}.

Category:
EJB

Cause:
The Message-Driven EJB has been re-associated with the JCA resource adapter.

Action:
No action is required.

BEA-010236
The Message-Driven EJB {0} (status: {1}) has not been associated with the JCA resource adapter, so trying suspending it actually did nothing.

Category:
EJB

Cause:
The Message-Driven EJB has not been associated with the JCA resource adapter, so trying suspending it actually did nothing.

Action:
No action is required.

BEA-010237
The Message-Driven Bean {0} was configured to use a JMS Topic, does not require transactions, and uses a non-WebLogic JMS provider. Only one thread will be used to receive and process all messages.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-010239
EJB container creates a {0} bean with name {1} belonging to {2} module.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-010240
The Message-Driven Bean {0} has connected to JMS destination {1}, but was suspended on its startup because property {2} is set.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-010241
The Message-Driven Bean {0} has connected to Resource Adapter {1}. Property {2} is ignored, because it is not supported by JCA-Based Message-Driven Bean.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-011047
In ejb-jar.xml or annotation, EJB {0} has container-transactions set when the EJB has a transaction-type of Bean. The container-transaction settings will be ignored.

Category:
EJB

Cause:
The specified EJB has container-transactions set when the EJB has a transaction-type of Bean.

Action:
No action is required.

BEA-011057
The table {0} was created by the user. The container does not drop or alter user-created tables. The container would verify the table in this case.

Category:
EJB

Cause:
The table was already created by the user.

Action:
Drop the table if the existing table is not correct. The container will then be able to create the table.

BEA-011059
The container was unable to create the DDL file.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
This error does not provide the cause of the error. The log file will contain an exception stack indicating the root cause of the failure.

Action:
Inspect the log file for indications of the root cause of the failure.

BEA-011061
Stack trace associated with message {0} follows:

Category:
EJB

Cause:
An error condition was reported.

Action:
Look for the associated exception in the log or your program to see what the results are. In general, this stack trace will help with debugging an existing problem.

BEA-011062
The following exception has occurred:

Category:
EJB

Cause:
An error condition was reported.

Action:
Review the stack trace, which will help with debugging an existing problem.

BEA-011063
Stateless session beans with bean-managed transactions must commit or roll back their transactions before completing a business method. The method {0} of EJB {1} either returned or generated an Exception without properly completing a transaction.

Category:
EJB

Cause:
A transaction started by the stateless session bean method did not complete before the method completed.

Action:
Check the bean code to determine what caused the transaction to not commit or roll back, and fix code. Pay special attention to any exceptions that may be generated by the method, causing commit or rollback calls to be skipped. Blocks can be used to ensure transactions are properly completed in all situations.

BEA-011070
In the <weblogic-rdbms-bean>, for <ejb-name> {0}, some <field-group>(s) are defined but are not used in any <weblogic-query>, <weblogic-relationship-role> or <relationship-caching> <caching-element>s. The <group-name>(s) of the unreferenced <field-group>(s) are: {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
Some field group definitions are not referenced in any query or relationship.

Action:
Remove the field groups listed in the logged message from the descriptor or include its usage appropriately.

BEA-011071
In the <weblogic-rdbms-bean>, for <ejb-name> {0}, some <relationship-caching>(s) are defined but are not used in any <weblogic-query>. The <caching-name>(s) of the unreferenced <relationship-caching>(s) are: {1}

Category:
EJB

Cause:
There are unused relation cachings defined in the weblogic-rdbms descriptor.

Action:
Remove the unused relationship cachings listed in the logged message from the descriptor or include its usage appropriately.

BEA-011073
An error occurred while the EJB container was attempting to obtain information about the table {0} from the database. This information is necessary to validate the mapping between the fields of the EJB {1} and the table. The exception is: {2}

Category:
EJB

Cause:
The most likely cause is an error communicating with the database. The error message should include the specific error message.

Action:
The action depends on the specific error that occurred. Actions may range from retrying the failed deployment to seeking help from your database administrator. Also, ensure that you are using a supported database.

BEA-011076
Unable to deploy the EJB {0} because the database table {1} is not accessible. Ensure that this table exists and is accessible.

Category:
EJB

Cause:
A required database table was not accessible.

Action:
Ensure that the database table exists and is accessible.

BEA-011077
The EJB deployment contains settings for automatically creating or altering database tables. However, the server is in production mode, so no database tables will be created or altered.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
The server is in production mode so the create-default-dbms-tables settings are being ignored.

Action:
No action is required. To suppress the warning, remove the create-default-dbms-tables setting from your EJB deployment.

BEA-011078
An exception occurred while starting the freepool idle timeout timer for ejb: {0}, {1}.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-011079
An exception occurred while stopping the freepool idle timeout timer for ejb: {0}, {1}.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-011080
An exception occurred while starting the Cache idle timeout timer for cache: {0}, {1}.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-011081
An exception occurred while stopping the Cache idle timeout timer for cache: {0}, {1}.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-011082
Error: The message-destination-link {0} for the Message-Driven Bean {1} in the application module {2} could not be resolved. The target message-destination for the Message-Driven Bean could not be found. Ensure that the link is correct.

Category:
EJB

Cause:
The target of the message-destination-link could not be found in the application.

Action:
Fix the message-destination-link to point to a valid message-destination.

BEA-011083
The EJB specification prohibits stateful session beans from using the TimerService.

Category:
EJB

Cause:
An illegal call was made to the getTimerService() method on the stateful session beans SessionContext.

Action:
Correct the stateful session bean code so that it does not call the getTimerService() method from the bean class.

BEA-011084
This EJB class does not support EJB timers and therefore is prohibited from using the TimerService. To use EJB timers, the bean class must implement javax.ejb.TimedObject or have a method that is annotated with @Timeout.

Category:
EJB

Cause:
An illegal call to the getTimerService() method on the EJBContext.

Action:
Correct the EJB class so it either implements the javax.ejb.TimedObject interface or ensure that it does not call the getTimerService() method on the EJBContext.

BEA-011085
This timer has either expired or been canceled and therefore cannot be invoked.

Category:
EJB

Cause:
An illegal call to a timer object after the timer had expired or was canceled.

Action:
Ensure your bean class does not invoke expired or canceled timers.

BEA-011086
The timer associated with this TimerHandle has either expired or been canceled.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
The timer associated with the TimerHandle has expired or been canceled.

Action:
No action is required.

BEA-011087
This TimerHandle is being invoked outside of the context of the application in which it was created. Since timers are local objects, they can only be called from within the same application in which they were created.

Category:
EJB

Cause:
This TimerHandle is being invoked outside of the context of the application in which it was created.

Action:
Ensure that your application does not pass any TimerHandle references outside of the scope of the application.

BEA-011088
The following error occurred while invoking the ejbTimeout(javax.ejb.Timer) method of EJB {0}.

Category:
EJB

Cause:
This could be caused by erroneous code in the ejbTimeout method or by the failure of a dependent resource.

Action:
All exceptions that occur while invoking or attempting to invoke the ejbTimeout method should be investigated and resolved. If the ejbTimeout method is non-transactional, that is, has a transaction attribute of NotSupported, or if the bean uses bean-managed transactions, the ejbTimeout method may not be retried, leading to missed timeout notifications.

BEA-011089
The following error occurred while attempting to remove an EJB timer from the persistent store for EJB {0}.

Category:
EJB

Cause:
This is an unexpected error so the cause is unknown. The accompanying exception and stack trace should provide information as to the cause of the error.

Action:
This cause of this error should be investigated and resolved promptly.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-011090
The following error occurred while preparing to invoke the ejbTimeout(javax.ejb.Timer) method of EJB {0}.

Category:
EJB

Cause:
This is an unexpected error so the cause is unknown. The accompanying exception and stack trace should provide information as to the cause of the error.

Action:
All exceptions that occur while attempting to invoke the ejbTimeout method should be investigated and resolved.

BEA-011091
The table {0} cannot be dropped or created since it uses a trigger to update the optimistic column of the EJB. The container will only verify the existence of the table.

Category:
EJB

Cause:
The table uses a trigger to update the optimistic column of the EJB.

Action:
To suppress this warning, set the create-default-dbms-tables value in the RDBMS deployment descriptor to Disabled.

BEA-011092
In production mode, the DropAndCreate, DropAndCreateAlways, and AlterOrCreate options are ignored. The container will only attempt to verify the existence and increment value of the sequence {0}.

Category:
EJB

Cause:
Options that apply only to development mode are ignored in production mode.

Action:
Do not use these values for Automatic Oracle SEQUENCE Generation in production mode.

BEA-011093
The SEQUENCE named {0} with INCREMENT {1} was not found in the database. This SEQUENCE was specified in the CMP deployment descriptor to be used for automatic primary key generation.

Category:
EJB

Cause:
The SEQUENCE was not found.

Action:
Examine the <automatic-key-generation> tag in the CMP deployment descriptor. In particular, re-examine the <generator-name> and verify that this is the correct name of the SEQUENCE.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Also, re-examine the <key-cache-size> and verify that this is the correct size of the SEQUENCE INCREMENT value.

BEA-011094
The SEQUENCE named {0} does not have INCREMENT value of {1} in the database as specified in the CMP deployment descriptor. Either modify the key-cache-value for this SEQUENCE in the deployment descriptor or update the SEQUENCE in the database.

Category:
EJB

Cause:
The SEQUENCE named {0} does not have an INCREMENT value of {1} in the database as specified in the CMP deployment descriptor.

Action:
In the <automatic-key-generation> tag of the CMP deployment descriptor, re-examine the <key-cache-size> and verify that this is the correct size of the SEQUENCE INCREMENT value.

BEA-011095
During EJB deployment, error(s) were encountered while attempting to CREATE the SEQUENCE named {0} with INCREMENT value {1}. {2}

Category:
EJB

Cause:
During EJB deployment, error(s) were encountered while attempting to CREATE the SEQUENCE named {0} with INCREMENT value {1}.

Action:
The message contains the cause of the error. See the message body and resolve the reported error.

BEA-011096
During EJB deployment, error(s) were encountered while setting up The SEQUENCE named {0} with INCREMENT value {1}. {2}

Category:
EJB

Cause:
During EJB deployment, error(s) were encountered while setting up The SEQUENCE named {0} with INCREMENT value {1}.

Action:
The message contains the cause of the error. See the message body and resolve the reported error.

BEA-011097
During EJB deployment, error(s) were encountered while attempting to ALTER the SEQUENCE named {0} with INCREMENT value {1}. {2}

Category:
EJB

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
During EJB deployment, error(s) were encountered while attempting to ALTER the SEQUENCE named {0} with INCREMENT value {1}.

Action:
The message contains the cause of the error. See message body and resolve the reported error.

BEA-011098
No generated primary key was returned from the database insert statement as expected. Verify that the primary key database column for this EJB is an IDENTITY column as declared in the CMP deployment descriptor for this EJB.

Category:
EJB

Cause:
This is most likely caused by a database configuration error. It may also be caused by a JDBC driver that does not support the getGeneratedKeys() method on java.sql.Statement.

Action:
Verify that the primary key column in the database is marked as an IDENTITY column (or a functional equivalent is setup for the column such as a database trigger to insert a value into the primary key column).

BEA-011099
Multiple generated keys were returned from the database insert statement. The EJB container is unable to determine which generated key corresponds to the primary key column. To use the IDENTITY primary key generator, you must only have a single automatically generated database column per EJB.

Category:
EJB

Cause:
This is most likely caused by a database configuration error. Each EJB may only have a single automatically generated database column.

Action:
Verify that the database table corresponding to the EJB only has a single generated column.

BEA-011109
Failed to register JACC policy context handlers for the EJB container.

Category:
EJB

Cause:
An unexpected error condition occurred while registering JACC context policy handlers.

Action:
See the error message stack trace for details on how to resolve this issue.

BEA-011110
The SEQUENCE named {0} has key-cache-size set to {1}, which is less than the INCREMENT_BY value for the sequence in the database. This may generate missing keys.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
The SEQUENCE named {0} has key-cache-size set to {1}, which is less than the INCREMENT_BY value for the sequence in the database.

Action:
In the <automatic-key-generation> tag, re-examine the <key-cache-size> and verify that it is set correctly.

BEA-011111
The SEQUENCE named {0} has key-cache-size set to {1} which is greater than the INCREMENT_BY value for the sequence in the database. This is not allowed as it may generate duplicate keys.

Category:
EJB

Cause:
The key-cache-set size for the SEQUENCE is not valid.

Action:
in the <automatic-key-generation> tag, re-examine the <key-cache-size> and set it to a value less than or equal to the INCREMENT_BY value for the sequence in the database.

BEA-011120
The CMP EJB {0} has enable-batch-operations set to true. The update queries, however, are not suitable for batching. Batched operations are turned off for this batch and the queries will be executed with multiple update statements.

Category:
EJB

Cause:
Batching is turned off for update queries.

Action:
No action is required.

BEA-011121
Error in Message-Driven Bean EJB {0}. The plugin-class {1} could not be found in the server classpath.

Category:
EJB

Cause:
The plugin-class could not be found in the server classpath.

Action:
Add the plugin-class in the server classpath.

BEA-011122
Error in Message-Driven Bean EJB {0}. The plugin-class {1} could not be instantiated.

Category:
EJB

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The plugin-class could not be instantiated.

Action:
Add the plugin-class in the server classpath.

BEA-011123
Error in Message-Driven Bean EJB {0}. The plugin-class {1} could not be found in the server classpath.

Category:
EJB

Cause:
The plugin-class could not be accessed.

Action:
Add the plugin-class in the server classpath.

BEA-011124
Error in Message-Driven Bean EJB {0}. The plugin-class {1} does not implement weblogic.ejb.spi.SecurityPlugin.

Category:
EJB

Cause:
The plugin-class does not implement weblogic.ejb.spi.SecurityPlugin.

Action:
Make the plugin-class implement weblogic.ejb.spi.SecurityPlugin.

BEA-011125
An unexpected error was encountered while attempting to remove any EJB timers from the persistent store for the EJB {0}.

Category:
EJB

Cause:
An unexpected error occurred while attempting to remove EJB timers from the persistent store.

Action:
See the particular error message for details about the error. If your application is failing to deploy because of this error, it may be necessary to manually remove the timers from the store.

BEA-011126
The same exception has consecutively caused the expiration to fail for EJB timer {0}. Consecutive errors of this type will no longer be logged for the current timer expiration.

Category:
EJB

Cause:
The same exception has consecutively caused expiration of an EJB timer to fail.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Investigate what caused the ejbTimeout method to fail. The original exception will be logged in a previous error message.

BEA-011127
Error deserializing one or more EJB timers from the persistent store for the EJB deployment {0}. An incompatible change to the class of a Serializable object associated with the timer may be the cause. If this is the case, you can either undeploy your application entirely to remove the EJB timers from the persistent store or revert the incompatible changes to the Serializable class so the EJB timer can be deserialized. The error was: {1}

Category:
EJB

Cause:
A common cause of this error is an incompatible serializable class change in your application.

Action:
If the error is due to an incompatible serializable class change in your application, there are two options for dealing with the serialization errors. The first option is to completely undeploy the EJB. which will cause all of the EJB timers in the persistent store to be permanently removed. The second option is to revert changes to the serializable class that is associated with the EJB timer and redeploy the application. This allows the EJB timer to be deserialized.

BEA-011128
Error creating an instance of the EJB {0}: {1}

Category:
EJB

Cause:
See the reported error message for the cause. This error may be due to a configuration issue or a bug in the EJB container.

Action:
See the specific error message for details and take appropriate action.

BEA-011132
Error deploying EJB {0}. While binding a business interface to the JNDI name {1}, the following error occurred: {2}

Category:
EJB

Cause:
See the specific error for details.

Action:
The action to take depends on the specific error that occurred. If the error was a JNDI naming conflict, you may need to choose a different JNDI name for the interface.

BEA-011135
The EJB {0} is a singleton session bean. EJB 2.1 client views are not supported for singleton session beans.

Category:
EJB

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
See the message body.

Action:
No action is required.

BEA-011136
wasCancelCalled() should only be invoked from within an asynchronous business method invocation with return type Future.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-011137
A singleton session bean with bean-managed transactions must commit or roll back a transaction before the business method completes.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-011139
The following exception occurred when processing the asynchronous invocation : {0}.

Category:
EJB

Cause:
There error was encountered during the asynchronous invocation.

Action:
See the exception stack trace for details.

BEA-011140
The argument {0} is not a valid local client view for the EJB {1}.

Category:
EJB

Cause:
The argument is not a valid local client view for the EJB.

Action:
Review the EJB configuration and calling code to determine the discrepancy.

BEA-011141
This EJB has already been removed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
The EJB has already been removed.

Action:
Avoid the call for removed objects.

BEA-011142
Error creating EJB reference: {0}

Category:
EJB

Cause:
An exception occurred while creating an EJB reference.

Action:
The reported exception contains the root cause of the issue. Review the exception to identify the exact problem.

BEA-011143
Error removing stateful session bean: {0}

Category:
EJB

Cause:
An unexpected error occured while trying to remove a stateful session bean.

Action:
The reported exception has the root cause of the issue. Review the exception to identify the actual problem.

BEA-011144
Singleton EJB {0} failed to initialize.

Category:
EJB

Cause:
A singleton EJB {0} failed to initialize.

Action:
The message body has the root cause of the issue. Review it to identify the essential problem.

BEA-011145
Illegal call to a Write method from a Thread holding Read lock.

Category:
EJB

Cause:
An illegal call to a Write method was made

Action:
Remove or rewrite the call.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-011146
Timed out while trying to aquire lock on Singleton {0} to invoke method {1}.

Category:
EJB

Cause:
A timeout occurred while trying to aquire a lock.

Action:
Check Singleton concurrency. A timeout has been reached.

BEA-011147
Singleton {0} is in use by another thread.

Category:
EJB

Cause:
While this Singleton is being invoked, it cannot be called from other threads.

Action:
Check Singleton concurrency.

BEA-011148
Singleton {0} not initialized as Singleton {1} from the DependsOn transitive, closure failed initialization.

Category:
EJB

Cause:
A singleton was not initialized as a Singleton from the DependsOn transitive, closure failed initialization.

Action:
Check the server log for the cause of the dependent Singleton initialization error and resolve it.

BEA-011149
The EJB {0} contains an illegal value for the activation config property MessagesMaximum. The specified value is {1} but the legal values are -1, and 1 through 2^63-1.

Category:
EJB

Cause:
See the error message body.

Action:
Correct the activation config property.

BEA-011151
Unable to determine the {3} to use for Message Driven Bean {0}. Activation Configuration of Message Driven Bean {0} includes conflicting values specified using {1} and {2}. Consider dropping {2} and specifying the intended {3} using property {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
See the error message body.

Action:
See the error message body.

BEA-011152
ConnectionFactoryResourceLink and DestinationResourceLink configuration attributes cannot be mixed with any of the following settings: DestinationJNDIName, InitialContextFactory, ProviderUrl, ConnectionFactoryJNDIName. Ensure that they are mutually exclusive for ejb {0}.

Category:
EJB

Cause:
Conflicting configuration attributes were specified.

Action:
Ensure that these configuration attributes are mutually exclusive.

BEA-011153
EJB {0} has a redundant Activation configuration, property {1} will be used, property {2} can be dropped.

Category:
EJB

Cause:
There is a redundant configuration property.

Action:
See the message body.

BEA-011154
The EJB {0} contains an illegal value for the activation config property TopicMessagePartitionMode. The specified value is {1} but the legal values are Isolated or Shared.

Category:
EJB

Cause:
See the error message body.

Action:
Correct the activation config property.

BEA-011155
Access is denied on a nonexistent method.

Category:
EJB

Cause:
The specified method is not existing.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Make sure the method is existing.

BEA-011156
Non numeric value was configured for activation config property {0}.

Category:
EJB

Cause:
Non numeric value was configured for activation config property {0}.

Action:
Correct activation config property setting.

BEA-011157
An exception occurred while preparing the EJB module {0}.

Category:
EJB

Cause:
Check the exception for the exact cause.

Action:
Check the exception for the exact error message, and take appropriate action.

BEA-011158
An exception occurred while initializing the EJB module {0}.

Category:
EJB

Cause:
Check the exception for the exact cause.

Action:
Check the exception for the exact error message, and take appropriate action.

BEA-011159
An exception occurred while starting the EJB module {0}.

Category:
EJB

Cause:
Check the exception for the exact cause.

Action:
Check the exception for the exact error message, and take appropriate action.

BEA-011160
The {0} operation has been scheduled for Message-Driven Bean {1} (listening to JMS destination {3}) of application {2}, but error occurred during {0} operation's execution : {4}.

Category:
EJB

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
See the message body.

Action:
Review the reported exception details to identify the exact problem. Correct it and then try again.

BEA-011161
An exception occurred while creating JMS {0} for JMS destination {2} for Message-Driven Bean {1}.

Category:
EJB

Cause:
See the message body.

Action:
No action is required, as Message-Driven Bean will try recovering from the error. If Message-Driven Bean cannot be recovered, please check and ensure JMS resources are available.

BEA-011162
The Timeout(javax.ejb.Timer) method of EJB {0} cannot be invoked because it was already undeployed.

Category:
EJB

Cause:
This could be caused when EJB is being undeployed or in production redeployment.

Action:
No action is required.

BEA-011278
The following dependency that was declared by {0} is not a Singleton Session Bean: {1}.

Category:
EJB

Cause:
A dependency that was specified by a Singleton Session Bean must also be a Singleton Session Bean.

Action:
Remove the illegal dependency from the dependency list or replace it with a Singleton Session Bean.

BEA-011279
The following exception occured in PreDestroy processing for singleton session bean {0}: {1}.

Category:
EJB

Cause:
This is an informational message.

Action:
No action is required.

BEA-012030
Illegal DOCTYPE for a WebLogic RDBMS CMP EJB11 descriptor file. DOCTYPE {0} not permitted. Only DOCTYPE {1} permitted here.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
An illegal DOCTYPE was used.

Action:
Make sure to update appropriate DOCTYPE to the descriptor file.

BEA-012031
The EJB {0} has a finder {1} for which the sql-select-distinct attribute has been specified. This attribute has been deprecated and will not be supported in future releases.

Category:
EJB

Cause:
The deprecated sql-select-distinct attribute was used.

Action:
Use the EJB-QL DISTINCT clause instead. The container will automatically filter duplicates if necessary.

BEA-012032
For EJB {0}, a weblogic-query element in the CMP deployment descriptor has no matching query element in the ejb-jar.xml descriptor. The settings specified in the weblogic-query element will be ignored. The EJB method referred to by the weblogic-query element is {1}.

Category:
EJB

Cause:
The weblogic-query element references a wrong or non-existent query method for this entity EJB.

Action:
Remove the weblogic-query element or update it so that it references the correct query method.

BEA-012033
Compiling generated EJB classes produced the following Java compiler output: {0}

Category:
EJB

Cause:
While compiling EJB generated classes, the Java compiler produced output.

Action:
Typically, there is no action to take. The Java compiler output is printed for informational purposes.

BEA-012035
The Remote interface method: {0} in EJB {1} contains a parameter of type {2} which is not serializable. Though the EJB {1} has call-by-reference set to false, this parameter is not serializable and hence will be passed by reference. A parameter can be passed using call-by-value only if the parameter type is serializable.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
The EJB has call-by-reference set to false. A parameter can be passed using call-by-value only if the parameter type is serializable. As this parameter is not serializable, the parameter will be passed by reference.

Action:
The parameter should implement the java.io.Serializable interface for it to be passed by value.

BEA-012036
Compiling generated EJB classes produced the following Java compiler error message: {0}

Category:
EJB

Cause:
While compiling EJB generated classes, the Java compiler produced output.

Action:
Check for other log messages that give more information about the failure.

BEA-012037
In weblogic-ejb-jar.xml or annotation, a singleton-session-descriptor element was found for EJB {0}. This EJB was not declared as a singleton session bean in ejb-jar.xml or annotation.

Category:
EJB

Cause:
There is an incompatible configuration between weblogic-ejb-jar.xml and ejb-jar.xml.

Action:
Modify weblogic-ejb-jar.xml or ejb-jar.xml to keep configuration consistency whether singleton or non-singleton.

BEA-014000
Problem, encountered illegal value for transaction-isolation {0}.

Category:
EJB

Cause:
See the error message body.

Action:
Specify one of the following legal values: TransactionSerializable, TransactionReadCommitted, TransactionReadCommittedForUpdate, TransactionReadCommittedForUpdateNoWait, TransactionReadUncommitted, or TransactionRepeatableRead.

BEA-014001
RDBMS descriptor {0} contains transaction-isolation settings. These settings may conflict with isolation-level settings in your weblogic-ejb-jar.xml descriptor and will be lost if you edit this descriptor in the console.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
The specified RDBMS descriptor contains transaction-isolation settings.

Action:
Move the isolation-level settings to the weblogic-ejb-jar.xml descriptor.

BEA-014003
EJB {0} uses optimistic concurrency and contains a finder or select method, {1}, for which include-updates is true. This combination of features does not work properly with database {2}.

Category:
EJB

Cause:
Optimistic concurrency is implemented by reading data in a local transaction to avoid holding database locks, unless Oracle is used as the database. Oracle read consistency does not hold read locks, so in this case reads are performed using the current JTA transaction. When reads are performed in a local transaction updates that have been flushed prior to commit of the transaction are not visible.

Action:
Set include-updates for the query to false to avoid this warning message, or if you are using Oracle as your database, set the database-type to Oracle in weblogic-cmp-jar.xml.

BEA-014004
In EJB {0}, <generator-type> is set to {1}. It is incompatible with Batch Operations due to database limitations. Both order-database-operations and enable-batch-operations are turned off by EJB container.

Category:
EJB

Cause:
These are database limitations.

Action:
Turn off automatic-key-generation in order to use batch operations.

BEA-014005
The configured dispatch policy {1} for Message-Driven Bean (MDB) {0} will be ignored: the MDB is not running in a WebLogic thread.

Category:
EJB

Cause:
The queue MDB is driven asynchronously by a non-WebLogic JMS implementation and runs in a non-WebLogic thread mechanism, so the MDBs application thread pool is not configurable.

Action:
To disable this warning, remove the dispatch-policy setting from the MDBs WebLogic descriptor file.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-014006
The Message-Driven Bean (MDB) named {0} has a dispatch policy {1} that refers to an unknown execute queue thread pool. The default execute thread pool will be used instead.

Category:
EJB

Cause:
The specified MDB named has a dispatch policy that refers to an unknown execute queue thread pool.

Action:
Create an execute thread queue pool for the server named {1}, or modify the dispatch-policy attribute in the MDBs WebLogic descriptor file to the name of an already existing execute queue thread pool.

BEA-014007
The bean named {0} contains BLOB or CLOB fields or both, and uses Optimistic Concurrency but no version or timestamp column has been specified. This may result in corruption of BLOB and CLOB data.

Category:
EJB

Cause:
The specified bean contains BLOB or CLOB fields or both, and uses Optimistic Concurrency but no version or timestamp column has been specified.

Action:
Specify "version" or "timestamp" in the <table-map> <verify-columns> element and specify the name of the <version> or <timestamp> column in the <optimistic-column> element.

BEA-014008
In EJB {0}, {1} references an SqlShape element {2} that is not defined. The list of SqlShape elements that are defined for this EJB is: {3}.

Category:
EJB

Cause:
An undefined SqlShape element was referenced.

Action:
Use an existing SqlShape or create the SqlShape that you wish to use.

BEA-014009
The Message-Driven Bean {0} of application {1} will now be suspended, as it listens to global JMS destination {2} and a new application version {3} is being redeployed.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-014010
The Message-Driven Bean {0} of application {1} will now be suspended, as it listens to global JMS topic {2} and a new application version {3} is being redeployed. Note also that the current Message-Driven Bean is not a durable subscriber to the topic, and messages published by the topic after the currently active version of the Message-Driven Bean is suspended may not be received by the new application version.

Category:
EJB

Cause:
The specified Message-Driven Bean listens to the specified global JMS topic and a new application version is being redeployed.

Action:
To ensure that the new application version will receive all messages published while the Message-Driven Bean was suspended, set the activation config property "subscriptionDurability" to "durable" in the deployment descriptor or annotation.

BEA-014011
EJB {0} uses optimistic-concurrency and has the use-select-for-update element in the RDBMS deployment descriptor set to true. This combination of features is incompatible. The use-select-for-update is turned off by the EJB container in this case.

Category:
EJB

Cause:
Optimistic concurrency is implemented by reading data in a local transaction to avoid holding database locks. The element use-select-for-update in the RDBMS deployment descriptor when set to true, will cause SELECT ... FOR UPDATE to be used whenever the bean is loaded from the database, thus locking the table. This conflicts with the Optimistic Concurrency strategy.

Action:
Set use-select-for-update element in the RDBMS deployment descriptor to false to avoid this warning message.

BEA-014012
EJB {0} uses optimistic-concurrency and disables cluster invalidation, but does not have verify-rows set to Read. This combination will prevent detection of stale data if the bean is never modified in a transaction.

Category:
EJB

Cause:
Optimistic concurrency beans verify consistency of data only if the bean has been modified, unless verify-rows is set to Read. If some other member of a cluster modifies a bean, other members will not be notified of this modification and will continue to store stale data unless the other members also attempt to modify the bean.

Action:
Set either of the elements verify-rows to Read or cluster-invalidation-disabled to false in the RDBMS deployment descriptor to avoid this warning message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-014013
EJB {0} does not have a concurrency-strategy of either optimistic or readOnly and disables cluster invalidation. Cluster invalidation is relevant only for these concurrency strategies.

Category:
EJB

Cause:
When an EJB is using either optimistic or readOnly concurrency-strategy and is deployed to a cluster, the container invalidates such beans on modification to avoid throwing OptimisticConcurrencyExceptions. This invalidation can be turned off by setting the cluster-invalidation-disabled to true in the RDBMS deployment descriptor.

Action:
Set cluster-invalidation-disabled to false in the RDBMS deployment descriptor to avoid this warning message.

BEA-014014
The Message-Driven Bean (MDB) named {0} has a dispatch policy {1} that refers to an unknown work manager. The default work manager will be used instead.

Category:
EJB

Cause:
The specified MDB has a dispatch policy that refers to an unknown work manager.

Action:
Create a work manager for the server named {1}, or modify the dispatch-policy attribute in the MDBs WebLogic descriptor file to the name of an already existing work manager.

BEA-014016
EJB {0} uses readonly-concurrency and has the use-select-for-update element in the RDBMS deployment descriptor set to true. As the bean is read-only, select-for-update is unnecessary.

Category:
EJB

Cause:
Read-only beans cannot be updated. Therefore, use-select-for-update is unnecessary.

Action:
Set use-select-for-update element in the RDBMS deployment descriptor to false to avoid this warning message.

BEA-014017
EJB {0} uses exclusive-concurrency and has the use-select-for-update element in the RDBMS deployment descriptor set to true. As the bean is locked at the server level during a transaction, select-for-update on the database is unnecessary.

Category:
EJB

Cause:
Exclusive concurrency is implemented by locking the bean at the server level when the bean participates in a transaction. Setting the element use-select-for-update in the RDBMS deployment descriptor to true causes SELECT ... FOR UPDATE to be used whenever the

Copyright © 2000, 2026, Oracle and/or its affiliates.

bean is loaded from the database, thus locking the row in the database too. This may be unnecessary, as the bean is locked by the container.

Action:
Set use-select-for-update element in the RDBMS deployment descriptor to false to avoid this warning message.

BEA-014018
EJB {0} uses a verify-columns element in the RDBMS deployment descriptor. This element is applicable only for optimistic concurrency beans. Since this bean does not use optimistic concurrency, this element will be ignored.

Category:
EJB

Cause:
verify-columns is applicable only for optimistic concurrency beans. As the bean does not use optimistic concurrency, this element will be ignored.

Action:
Remove verify-columns element in the RDBMS deployment descriptor to avoid this warning message.

BEA-014019
EJB {0} uses a verify-rows element in the RDBMS deployment descriptor. This element is applicable only for optimistic concurrency beans. Since this bean does not use optimistic concurrency, this element will be ignored.

Category:
EJB

Cause:
verify-rows is applicable only for optimistic concurrency beans. As the bean does not use optimistic concurrency, this element will be ignored.

Action:
Remove the verify-rows element in the RDBMS deployment descriptor to avoid this warning message.

BEA-014020
EJB {0} uses an optimistic-column element in the RDBMS deployment descriptor. This element is applicable only for optimistic concurrency beans. Since this bean does not use optimistic concurrency, this element will be ignored.

Category:
EJB

Cause:
optimistic-column element is applicable only for optimistic concurrency beans. If the bean does not use optimistic concurrency, this element will be ignored.

Action:
Remove the optimistic-column element in the RDBMS deployment descriptor to avoid this warning message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-015017
In bean class {0}, the @EJB annotation is at class level, so the beanInterface must be explicitly specified.

Category:
EJB

Cause:
See the message body.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-015018
In interceptor class {0}, the @EJB annotation is at class level, so the beanInterface must be explicitly specified.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-015022
{0} is not valid in this context. Bean class: {1}.

Category:
EJB

Cause:
{0} is not valid in this context. Bean class: {1}.

Action:
Remove {0} from the invalid location.

BEA-015023
{0} is not valid in this context. Bean method: {1}.{2}.

Category:
EJB

Cause:
{0} is not valid in this context. Bean method: {1}.{2}.

Action:
Remove {0} annotation from invalid location.

BEA-015024
Could not specify @JNDIName on local business interface {0} of Bean {1}.

Category:
EJB

Cause:
The @JNDIName could not be specified on the local business interface {0} of Bean {1}.

Action:
Remove the annotation from the local business interface.

BEA-015025
Unable to load a class that is specified in your ejb-jar.xml: {0}.

Category:
EJB

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A class that is specified in your ejb-jar.xml cannot be loaded.

Action:
Check ejb-jar.xml in the EJB JAR file.

BEA-015026
Reference name {0} of @{1} annotation on class {2} is not unique.

Category:
EJB

Cause:
Reference name {0} of @{1} annotation on class {2} is not unique.

Action:
Change the reference name {0} of @{1} annotation on class {2}.

BEA-015027
The Message-Driven EJB is transactional, but the JMS connection factory referenced by the JNDI name {0} is not a JMS XA connection factory.

Category:
EJB

Cause:
The Message-Driven EJB is transactional, but the JMS connection factory referenced by the JNDI name {0} is not a JMS XA connection factory.

Action:
Make the Message-Driven EJB non-transactional, or use a different connection factory that supports XA.

BEA-015028
The EJB {0} contains an illegal value for the activation config property DistributedDestinationConnection. The specified value is {1} but the legal values are EveryMember and LocalOnly.

Category:
EJB

Cause:
See the error message body.

Action:
Correct the activation config property.

BEA-015029
The EJB {0} contains an illegal value for the activation config property TopicMessagesDistributionMode. The specified value is {1} but the legal values are Compatibility, One-Copy-Per-Server, or One-Copy-Per-Application.

Category:
EJB

Cause:
See the error message body.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the activation config property.

BEA-015030
The EJB {0} has an illegal permutation on distributed topic type and topicMessagesDistributionMode. Replicated distributed topics work with Compatibility, One-Copy-Per-Server, or One-Copy-Per-Application, but partitioned distributed topics only work with One-Copy-Per-Server or One-Copy-Per-Application. The EJB is configured to partitioned distributed topic and Compatibility.

Category:
EJB

Cause:
See the error message body.

Action:
Review the compatibility of distributed topic types and topicMessagesDistributionMode and fix them.

BEA-015031
The EJB {0} has a distributedDestinationConnection configured but the EJB is configured to connect to a remote cluster. Since the distributedDestinationConnection configuration is only valid in a local cluster, the setting will be ignored.

Category:
EJB

Cause:
See the error message body.

Action:
Connect to a local cluster, or remove the distributedDestinationConnection configuration.

BEA-015032
The EJB {0} is configured with the activation config property topicMessagesDistributionMode but the EJB is configured to connect to a JMS Queue. The topicMessagesDistributionMode is valid only for JMS Topic destinations.

Category:
EJB

Cause:
See the error message body.

Action:
Correct the activation config property.

BEA-015033
The EJB {0} has an invalid value configured for the activation config property {1}. Only WebLogic JMS server 10.3.4 or later versions support the values One-Copy-Per-Server or One-Copy-Per-Application. Prior to 10.3.4.0 Weblogic JMS server or other non-Weblogic JMS vendors, only the Compatibility value is supported.

Category:
EJB

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
See the error message body.

Action:
Correct the activation config property.

BEA-015034
This destinaiton {1} is a remote replicated distribution topic which does not support durable subscriptions when the Message-Drive Bean {0} works in Compatibility mode.

Category:
EJB

Cause:
See the error message body.

Action:
Review and fix the compatibility of the activation config property SubscriptionDurability and topicMessagesDistributionMode.

BEA-015035
The EJB {0} is configured to support One-Copy-Per-Server mode but the partitioned topic is configured as LocalOnly. To support One-Copy-Per-Server mode, the LocalOnly setting will be overridden with EveryMember.

Category:
EJB

Cause:
See the error message body.

Action:
Change distributed-destination-connection to EveryMember to remove the warning.

BEA-015036
In the EJB {0}, the value for the activation config property {1} will be ignored since it is overridden with the value {2}.

Category:
EJB

Cause:
See the error message body.

Action:
To remove this warning, remove the duplicated configuration from the activation config property.

BEA-015037
In EJB {0}, the throws clause for method {1} in the bean class contains exceptions that are NOT in the throws clause of the corresponding {2} interface method.

Category:
EJB

Cause:
See the error message body.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the throws clause. Implementation methods must have all exceptions that are provided by the corresponding interfaces.

BEA-015038
Problems definitively matching up the interface method {0} with a method in the bean class. Please modify your bean class to implement the interface {1}.

Category:
EJB

Cause:
See the message body.

Action:
No action is required.

BEA-015039
Cannot start an inactive Message-Driven Bean {0}. A redployment may be needed.

Category:
EJB

Cause:
See the error message body.

Action:
Redeploy the application and restart it.

BEA-015040
The Message-Driven Bean {0} is inactive now.

Category:
EJB

Cause:
This is an informational message.

Action:
No action is required.

BEA-015041
The Message-Driven Bean {0} is active now.

Category:
EJB

Cause:
This is an informational message.

Action:
No action is required.

BEA-015042
The JNDI name {0} is set for {1} home interface of EJB {2}, but cannot find {1} home in deployment descriptor. Specify {1} home in ejb-jar.xml.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
See the error message body.

Action:
Specify {1} home in ejb-jar.xml.

BEA-015043
A concurrent-call attempt failed on a stateful session bean instance because the lock was held by another thread or transaction, either because concurrent-access is prohibited or access could not be granted in a specific time period. You may change the concurrent-access behavior using the @AccessTimeout annotation or a corresponding element in deployment descriptor.

Category:
EJB

Cause:
See the message detail.

Action:
No action is required.

BEA-015044
@JNDIName is specified on multiple classes for the same business interface {0} but the value is different. Class: {1}; Class: {2}.

Category:
EJB

Cause:
@JNDIName is specified on multiple classes for the same business interface {0} but the value is different. Class: {1}; Class: {2}.

Action:
Remove @JNDIName from either {1} or {2}.

BEA-015045
@JNDIName on the bean implementation class does not provide the class of the client view, but more than one client view exists. Class: {0}.

Category:
EJB

Cause:
@JNDIName on the bean implementation class does not provide the class of the client view, but more than one client view exists. Class: {0}.

Action:
Remove @JNDIName from {0} or provide the class name of each client view.

BEA-015046
Illegal operation, context data is not supported for the Entity Bean.

Category:
EJB

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An illegal operation has occurred, context data is not supported for the Entity Bean.

Action:
Remove the retrieval operation for the Entity Bean's context data.

BEA-015047
Unable to bind portable JNDI name {0}.

Category:
EJB

Cause:
The portable JNDI name could not be bound. See the exception for the cause.

Action:
Check the exception for the exact error message.

BEA-015048
This EJB class does not have a timeout method. To use TimerService, the bean class must implement javax.ejb.TimedObject or have a method that is annotated with @Timeout.

Category:
EJB

Cause:
You are trying to create a timer but the corresponding EJB does not have a timeout method.

Action:
Correct the EJB class and add a timeout method.

BEA-015049
Interface {0} implemented by EJB class {1} will be treated as a local business interface, because all implemented interfaces by the bean class should be local business interfaces by default. Note that this interface extends java.rmi.Remote exceptionally.

Category:
EJB

Cause:
Interface {0} defaults to be a local business interface but it extends java.rmi.Remote.

Action:
No action is required if the default works for you. If, however, you do want to use {0} as a remote business interface, specify it explicitly using @Remote annoation or deployment descriptor.

BEA-015050
{2} beans with bean-managed transactions must commit or roll back their transactions before completing a lifecycle callback interceptor method. The method {0} of EJB {1} either returned or generated an exception without properly completing a transaction.

Category:
EJB

Cause:
A transaction started by the {2} bean lifecycle callback method did not complete before the method completed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the bean code to determine what caused the transaction to not commit or roll back and fix the code. Pay special attention to any exceptions that may be generated by the method, causing commit or rollback calls to be skipped. Blocks can be used to ensure transactions are properly completed in all situations.

BEA-015051
The following exception occured in {1} processing for stateful session bean {0}: {2}.

Category:
EJB

Cause:
This is an informational message.

Action:
No action is required.

BEA-015052
Cannot find proper lifecycle callback method {0} in bean class {1} of EJB {2}.

Category:
EJB

Cause:
A lifecycle callback method in bean class must have the signature: "void <METHOD>()"

Action:
Check the bean code to have the correct signature of the lifecycle callback method.

BEA-015054
Error deploying EJB {0}. The JMS connection factory referenced by the JNDI name {0} is a PooledConnectionFactory.

Category:
EJB

Cause:
The JMS connection factory referenced by the JNDI name {0} is a PooledConnectionFactory. For example, the specified JNDI name may be the JNDI name of a resource reference.

Action:
Specify a JMS connection factory JNDI name that, when looked up, does not return a PooledConnectionFactory. For example, specify a JMS connection factory JNDI name that is not the JNDI name of a resource reference.

BEA-015055
Error occurred during full state replication for replica {1} of stateful session bean {0} of resource group {2}: {3}

Category:
EJB

Cause:
The exception was: {3}

Action:
Check the exception for the exact error message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-015056
Unregistered replicas for stateful session bean {0}

Category:
EJB

Cause:
Unregistered replicas for stateful session bean {0}

Action:
No action required

BEA-015057
An error occurred while attempting to process a message inside a Message-Driven Bean: {0} Exception is : {1}. {2} such exceptions were suppressed in logging.

Category:
EJB

Cause:
This error usually occurs if the onMessage method of the MDB throws an exception.

Action:
Check that the MDB is able to process messages by ensuring that any resources it uses (such as database connections) are available. Check the MDB source code to ensure that it does not have any bugs that cause an exception (such as a NullPointerException) to be generated.

BEA-015058
Error deploying EJB {0}. It references an initial context factory {1} which enables object based security, which is not needed and is not supported by message driven beans.

Category:
EJB

Cause:
Error deploying EJB {0}. It references an initial context factory {1} which enables object based security, which is not needed and is not supported by message driven beans.

Action:
Do not setup MDBs to use an initial context that enables object based security. For example, use a weblogic.jndi.WLInitialContextFactory instead.

BEA-015059
Error deploying EJB {0}. The JMS connection factory with JNDI name {1} is object-based-security enabled and is not supported by MDBs.

Category:
EJB

Cause:
The JMS connection factory with the JNDI name {1} is object-based-security enabled and is not supported by MDBs.

Action:
Do not use object-based-security enabled JMS connection factorys for MDBs.

BEA-015060
Activation exception for stateful session ben {0}: {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
EJB

Cause:
An exception occurred while reading or processing the state of the bean.

Action:
Please check the exception for the exact error message.

BEA-015061
Exception reading the replicated state of stateful session bean {0}: {1}.

Category:
EJB

Cause:
An exception occurred on reading the replicated state of stateful session bean, for example an application upgrade may have introduced a Java serialization incompatibility on the bean state between old and new versions.

Action:
Please check the exception for the exact error message.

BEA-015062
Exception on creating replicated stateful session bean {0}: {1}.

Category:
EJB

Cause:
An exception occurred on creating replicated stateful session bean

Action:
Please check the exception for the exact error message.

BEA-015063
{0} following exceptions were suppressed in logging during a message processing inside Message-Driven Bean. The last occurrence of this exception has a timestamp {1}: {2} Exception is : {3}.

Category:
EJB

Cause:
This can happen if the onMessage method of the MDB consecutively throws exceptions.

Action:
Check that the MDB is able to process messages by ensuring that any resources it uses (such as database connections) are available. Check the MDB source code to ensure that it does not have any bugs that cause an exception (such as a NullPointerException) to be generated.

BEA-015064
An exception occurred in replication for stateful EJB {0} on {1} partition shutting down: {2}

Category:
EJB

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An exception occurred in replication for stateful EJB {0} on {1} partition shutting down: {2}

Action:
Please check the exception for the exact error message.

BEA-015065
An error occurred on check server or partition state during deactivation of stateful EJB {0}: {1}

Category:
EJB

Cause:
An error occurred on check server or partition state during deactivation of stateful EJB {0}: {1}

Action:
Please check the exception for the exact error message.

BEA-015066
An exception occurred while cleaning up replicas states locally for stateful EJB {0} on {1} partition shutting down: {2}

Category:
EJB

Cause:
An exception occurred while cleaning up replicas states locally for stateful EJB {0} on {1} partition shutting down: {2}

Action:
Please check the exception for the exact error message.

BEA-015067
Ensure bean states are replicated for stateful EJB {0} on {1} partition shutting down

The JMS transaction branch {1} for destination {0} was administratively committed.

Category:
JMS

Cause:
This was caused by an administrative action.

Action:
No action is required.

BEA-040421
An administrative request to commit the JMS transaction branch {1} on destination {0} failed with the following exception. {2}

Category:
JMS

Cause:
The cause of the failure may be indicated by the exception provided in the error message.

Action:
The transaction may be in an invalid state to allow commit processing. Attempt the operation again or wait for the Transaction Manager to resolve the transaction branch.

BEA-040422
The JMS transaction branch {1} for destination {0} was administratively rolled back.

Category:
JMS

Cause:
This was caused by an administrative action.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-040423
An administrative request to rollback the JMS transaction branch {1} on destination {0} failed with the following exception. {2}

Category:
JMS

Cause:
The cause of the failure may be indicated by the exception provided in the error message.

Action:
Attempt the operation again or wait for the Transaction Manager to resolve the transaction branch.

BEA-040430
The "UserTransactionsEnabled" attribute on the JMSConnectionFactory "{0}" has been deprecated and replaced by the "XAConnectionFactoryEnabled" attribute. The changes are propagated to/from this new attribute.

Category:
JMS

Cause:
A deprecated attribute was used.

Action:
Use the XAConnectionFactoryEnabled attribute instead.

BEA-040431
The "XAServerEnabled" attribute on the JMSConnectionFactory "{0}" has been deprecated and replaced by the "XAConnectionFactoryEnabled" attribute. The changes are propagated to/from this new attribute.

Category:
JMS

Cause:
A deprecated attribute is used.

Action:
Use the XAConnectionFactoryEnabled attribute instead.

BEA-040442
While attempting to bind JNDI name {0} for destination {1} in module {2}, a JNDI name conflict was found. This destination has not been bound into JNDI.

Category:
JMS

Cause:
Some other entity has already bound this JNDI name globally.

Action:
Determine the owner of the currently bound JNDI name and remove it if it should not be there, or change the JNDI name of this destination so that it does not conflict with the existing one.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-040443
While attempting to change the JNDI name from {0} to {1} for destination {2} in module {3}, a JNDI name conflict was found. This destination is no longer globally bound into JNDI under any name.

Category:
JMS

Cause:
Some other entity has already bound this JNDI name globally.

Action:
Determine the owner the currently bound JNDI name and remove it if it should not be there, or change the JNDI name of this destination so that it does not conflict with the existing one.

BEA-040444
While attempting to unadvertise the JNDI name {0} for destination {1} in module {2}, an error occurred. The name may or may not be unadvertised globally.

Category:
JMS

Cause:
A network connection between the local server and the Administration Server may have gone down.

Action:
Make sure that network connectivity is working properly and that the Administration Server is reachable.

BEA-040445
While attempting to change the JNDI name from {0} to {1} for destination {2} in module {3}, a JNDI name conflict was found. This destination is no longer locally bound into JNDI under any name.

Category:
JMS

Cause:
Some other entity has already bound this JNDI name locally.

Action:
Determine the owner of the currently bound JNDI name and remove it if it should not be there or change the JNDI name of this destination so that it does not conflict with the existing one.

BEA-040446
While attempting to unadvertise the JNDI name {0} for destination {1} in module {2}, an error occurred. The name may or may not be unadvertised locally.

Category:
JMS

Cause:
A network connection between the local server and the Administration Server may have gone down.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Make sure that network connectivity is working properly and that the Administration Server is reachable.

BEA-040447
While attempting to bind the JNDI name {0} for destination {1} in module {2}, a JNDI name conflict was found. This destination has not been bound into JNDI locally.

Category:
JMS

Cause:
Some other entity has already bound this JNDI name locally.

Action:
Determine the owner of the currently bound JNDI name and remove it if it should not be there, or change the JNDI name of this destination so that it does not conflict with the existing one.

BEA-040448
JMSFileStoreMBean has been deprecated, and has been replaced with FileStoreMBean. The JMSFileStoreMBean "{0}" has been replaced in the configuration with a FileStoreMBean with the same name.

Category:
JMS

Cause:
A deprecated MBean was replaced in the configuration.

Action:
No action is required.

BEA-040449
JMSJDBCStoreMBean has been deprecated, and has been replaced with JDBCStoreMBean. The JMSJDBCStoreMBean "{0}" has been replaced in the configuration with a JDBCStoreMBean with the same name.

Category:
JMS

Cause:
A deprecated MBean was replaced in the configuration.

Action:
No action is required.

BEA-040450
The "PagingStore" attribute on the JMSServerMBean "{0}" has been deprecated. It is being replaced in the configuration with the new "PagingDirectory" attribute.

Category:
JMS

Cause:
A deprecated MBean attribute was replaced in the configuration.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-040451
The PagingStore attribute on the JMSServerMBean {0} has been deprecated. Since it currently refers to a JMSJDBCStoreMBean, and paging to a JDBC store is not supported, the JMS server will page messages to its local working directory.

Category:
JMS

Cause:
A deprecated MBean attribute was replaced in the configuration.

Action:
No action is required.

BEA-040452
The server session pool feature has been deprecated, and it will be removed in an upcoming release. New applications should use message-driven beans (MDBs) instead.

Category:
JMS

Cause:
A deprecated feature was detected in the configuration.

Action:
Plan to replace use of server session pools in your application.

BEA-040453
The BytesPagingEnabled and MessagesPagingEnabled parmeters on the JMSServer {0} have been deprecated. These parameters are now ignored. The MessageBufferSize parameter should be used to configure paging in this release.

Category:
JMS

Cause:
A deprecated parameter was encountered.

Action:
Plan to use the new MessageBufferSize to control paging.

BEA-040455
Flow control has been enabled on JMS server "{0}" because memory is low

Category:
JMS

Cause:
Too much memory is being used.

Action:
Either increase the amount of memory available to the server, or decrease the MessageBufferSize parameter on the JMS server so that fewer messages remain in memory.

BEA-040456
An entity of type "{3}" with name "{2}" in JMS module "{0}" is not targeted. There is no subdeployment with name "{1}" in the configuration repository (config.xml). Therefore, this entity will not exist anywhere in the domain.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMS

Cause:
The entity of the given name and type in the given JMS module does not have a corresponding subdeployment in the configuration repository (config.xml). In order for this entity to exist in the domain, it must be targeted with a sub-deployment element.

Action:
Add a sub-deployment stanza to the appropriate deployment descriptor in config.xml. This will either be a jms-system-resource for a system module, or an app-deployment for a stand-alone JMS deployable module. If the JMS module is inside a Java EE application (an EAR file), then you must add the sub-deployment stanza to the subdeployment that represents this JMS module in the Java EE application. You do not necessarily have to target the subdeployment yet. Simply adding the subdeployment with no targets will remove this warning. However, if you wish for this entity to exist somewhere in your domain you must target the sub-deployment.

BEA-040457
The Template named "{1}" element of Distributed Destination "{0}" is not supported and hence ignored. Please consider using a Uniform Distributed Destination.

Category:
JMS

Cause:
An unsupported attribute JMSTemplate is used in a Distributed Destination.

Action:
Use a Uniform Distributed Destination instead.

BEA-040458
Unable to unprepare {0} in module {1} due to {2}.

Category:
JMS

Cause:
The prepared entity could not unprepare itself in a failure case.

Action:
Refer to the available exception for more information.

BEA-040459
Unable to deactivate {0} in module {1} due to {2}.

Category:
JMS

Cause:
The activated entity could not deactivate itself in a failure case.

Action:
Refer to the available exception for more information.

BEA-040460
Unable to close the JMS component of module {0} due to {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMS

Cause:
The JMS component could not close itself.

Action:
Refer to the available exception for more information.

BEA-040461
Unable to deactivate {0} in module {1} due to {2}.

Category:
JMS

Cause:
The activated entity could not deactivate itself in a failure case.

Action:
Refer to the available exception for more information.

BEA-040464
Unable to destroy {0} in module {1} due to {2}.

Category:
JMS

Cause:
The initialized entity could not destroy itself in a failure case.

Action:
More information may be available from the exception.

BEA-040467
Unable to deactivate {0} in module {1} due to {2}.

Category:
JMS

Cause:
The activated entity could not deactivate itself in a failure case.

Action:
More information may be available from the exception.

BEA-040470
Unable to deactivate {0} in module {1} due to {2}.

Category:
JMS

Cause:
The activated entity could not deactivate itself during dynamic deletion.

Action:
More information may be available from the exception.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-040475
The destination {0} does not have an associated quota object. The setting of bytesMaximum to {1} will have no effect.

Category:
JMS

Cause:
Quotas have been reworked. They are no longer hierarchical in nature. Instead, they are objects that can be pointed to explicitly and can be optionally shared between destinations. Hence quotas no longer work as they did in previous releases. When converting from older releases, a decision is made about how to handle quotas based on the setting of the old parameters. These decisions may have been wrong, which would cause this warning to happen.

Action:
Please consider removing this destination from the interop module. Put it in another module. This will allow you to use the new quota features.

BEA-040476
The destination {0} does not have an associated quota object. The setting of messagesMaximum to {1} will have no effect.

Category:
JMS

Cause:
Quotas have been reworked. They are no longer hierarchical in nature. Instead, they are objects that can be pointed to explicitly and can be optionally shared between destinations. Hence quotas no longer work as they did in previous releases. When converting from older releases a decision is made about how to handle quotas based on the setting of the old parameters. These decisions may have been wrong, which would cause this warning to happen.

Action:
Please consider removing this destination from the interop module. Put it in another module. This will allow you to use the new quota features.

BEA-040477
An error occurred while unbinding a remote JNDI object from local JNDI name "{0}". The exception encountered was {1}.

Category:
JMS

Cause:
There may be an error in the JNDI subsystem. See the exception for more information.

Action:
Check the exception message for more detail.

BEA-040478
The JMS subsystem could not deploy or undeploy the default JMS connection factories due to {0}.

Category:
JMS

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
There may be an error in the JNDI subsystem. See the exception for more information.

Action:
Check the exception message for more detail.

BEA-040479
The system failed to roll back an added connection consumer of name {0}. The exception received was {1}.

Category:
JMS

Cause:
See the exception for more information.

Action:
Check the exception message for more detail.

BEA-040480
The system failed to remove a connection consumer of name {0}. The exception received was {1}.

Category:
JMS

Cause:
See the exception for more information.

Action:
Check the exception message for more detail.

BEA-040490
{0} {1} has a conflicting name attribute value, which is now changed to have a unique name with its JMSServer name. The new destination-name attribute now holds the original name value.

Category:
JMS

Cause:
A name conflict has been detected during upgrade for JMS destinations, maybe because in WebLogic Server versions prior to 9.2, more than one destination was allowed to have the same name, as long as the destinations belonged to different JMS servers.

Action:
Ensure that destinations are created with their name decorated with the target JMS server name to avoid conflict.

BEA-040491
A {0} {1} with multiple targets has been split into multiple deployments one for each unique target.

Category:
JMS

Cause:
A JMS Deployment found with multiple unique targets configured.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
In WebLogic Server versions prior to 9.2, both JMSConnectionFactory and ForeignJMSServer were allowed to be targeted to more than one server, cluster, or both. During upgrade of this configuration to WebLogic Server 9.2, these configuration entities are split into more than one entity, one for each unique target.

BEA-040494
An error occurred while shutting down the JMS server {0}: {1}.

Category:
JMS

Cause:
See the detail message.

Action:
The server should still shut down normally. No action is required.

BEA-040496
The template {0} does not have an associated quota object. The setting of bytesMaximum to {1} will have no effect.

Category:
JMS

Cause:
Quotas have been reworked. They are no longer hierarchical in nature. Instead, they are objects that can be pointed to explicitly and can be optionally shared between destinations. Hence quotas no longer work as they did in previous releases. When converting from older releases a decision is made about how to handle quotas based on the setting of the old parameters. These decisions may have been wrong, which would cause this warning to happen.

Action:
Please consider removing this template from the interop module. Put it in another module. This will allow you to use the new quota features.

BEA-040497
The template {0} does not have an associated quota object. The setting of MessagesMaximum to {1} will have no effect.

Category:
JMS

Cause:
Quotas have been reworked. They are no longer hierarchical in nature. Instead, they are objects that can be pointed to explicitly and can be optionally shared between destinations. Hence quotas no longer work as they did in previous releases. When converting from older releases a decision is made about how to handle quotas based on the setting of the old parameters. These decisions may have been wrong, which would cause this warning to happen.

Action:
Consider removing this template from the interop module. Put it in another module. This will allow you to use the new quota features.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-040498
An error occurred while forwarding a message for distributed destination member {0}: {1}

Category:
JMS

Cause:
There may be a temporary network problem, or one of the members of the cluster may be unavailable.

Action:
See the detail message.

BEA-040499
An error occurred while pushing messages to a JMS client: {0}

Category:
JMS

Cause:
There may be a network failure.

Action:
The JMS protocol will recover automatically from such a problem eventually. Check for networking issues or crashed clients.

BEA-040500
Unable to deactivate entity "{0}" in module "{1}" due to {2}.

Category:
JMS

Cause:
The activated entity could not rollback the proposed targeting change.

Action:
More information may be available from the exception.

BEA-040501
Unable to roll back targeting change of the entity "{0}" in module "{1}" due to {2}.

Category:
JMS

Cause:
The changed entity could not roll back in a failure case.

Action:
More information may be available from the exception.

BEA-040502
While attempting to change the targeting of JMS module "{0}", an error occurred while activating the change. The exception returned is: {1}

Category:
JMS

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The JMS module failed to activate a prepared change during a targeting update.

Action:
More information may be available from the exception.

BEA-040503
The delivery mode override value of destination "{0}" hosted on JMS server "{1}" has been changed from {2} to {3}.

Category:
JMS

Cause:
During the upgrade process, a configuration was detected that would force all messages through the given destination to be non-persistent. Therefore, the upgrade process made that override explicit.

Action:
Review your application code and configuration. If you need a behavior other than the one that the upgrade process chose, you can modify the resulting configuration using the DeliveryMode parameter of the OverridesParams of the destination, or with the HasStore or AllowsPersistentDowngrade parameters of the JMS server on which the destination is targeted.

BEA-040504
While attempting to add an entity with name "{0}", an error occurred while trying to convert the old style entity to the new style entity. The error was "{1}".

Category:
JMS

Cause:
See the description of the exception that occurred for more information on the cause of this failure.

Action:
Take appropriate action based on the determined cause.

BEA-040505
The JMS module named "{0}" inside application "{1}" does not have a sub-deployment stanza named "{0}". Without such a stanza, no entities inside the module will be deployed, since the subdeployments inside of the sub-deployment stanza named "{0}" control where JMS entities inside this module are targeted.

Category:
JMS

Cause:
When a JMS module is inside an EAR file, the targeting information for entities inside that module are nested within a sub-deployment named after the name of the JMS module found in the weblogic-application.xml file of the EAR file. If no sub-deployment exists with the name of the JMS module, then no targeted entities inside the module will become available. This is usually an oversight on the part of the administrator.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Add a sub-deployment stanza with the name of the JMS module as specified in the weblogic-application.xml file to the app-deployment stanza. Nested inside that sub-deployment, you can target the entities in the module as you normally would.

BEA-040506
The JMS store-and-forward (SAF) forwarder has successfully connected to the remote destination "{0}".

Category:
JMS

Cause:
This is an informational message.

Action:
No action is required.

BEA-040507
The JMS store-and-forward (SAF) forwarder failed to connect to the remote destination "{0}", because of {1}.

Category:
JMS

Cause:
This is either due to a configuration error, a network failure, or the remote destination being temporarily unavailable.

Action:
Check the configuration, network connection, or remote destination.

BEA-040508
BridgeDestinationMBean has been deprecated. The BridgeDestination "{0}" has been replaced in the configuration with a JMSBridgeDestination with the same name.

Category:
JMS

Cause:
A deprecated MBean is being replaced in the configuration.

Action:
No action is required.

BEA-040509
Failed to ${1} JMS Server "{0}" because the earlier attempt to ${2} was failed.

Category:
JMS

Cause:
This error occurred during deployment of the JMS server.

Action:
Fix any deployment errors related to this JMS server.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-040510
While attempting to rename a connection factory named "{0}", an error occurred while attempting to establish a JNDI listener. The cause was {1}.

Category:
JMS

Cause:
There was an error while attempting to establish a JNDI listener. The description of the cause may provide more information about the true cause of the error.

Action:
The cause of this problem may give an indication of the source of this problem. If this problem persists, contact My Oracle Support.

BEA-040511
The system is waiting to unbind connection factory "{0}". An attempt is being made to change the JNDI name of this connection factory from "{1}" to "{2}".

Category:
JMS

Cause:
An attempt is being made to unbind a connection factory from a JNDI name in order to dynamically change the JNDI from one name to another. This message will repeat every twenty seconds for five minutes.

Action:
No action is required.

BEA-040512
An attempt is being made to change the JNDI name of connection factory "{0}" from "{1}" to "{2}". The system has waited to unbind "{1}" for five minutes. The new JNDI name "{2}" may or may not be bound properly.

Category:
JMS

Cause:
The connection factory was not fully unbound after five minutes. Some error may have occurred while attempting to unbind this connection factory.

Action:
In order to maintain the integrity of the connection factory it is recommended you untarget and retarget the connection factory that failed. Otherwise, the connection factory is in an indeterminate state.

BEA-040513
While attempting to rename a connection factory named "{0}", an error occurred while attempting to remove a JNDI listener. The cause was {1}.

Category:
JMS

Cause:
There was an error while attempting to remove a JNDI listener. The description of the cause may provide more information about the true cause of the error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
The cause of this problem may give an indication of the source of this problem and the action to take. If this problem persists, contact My Oracle Support.

BEA-040514
While attempting to rename a connection factory named "{0}" an error occurred in the JNDI listener. The error was {1}

Category:
JMS

Cause:
While attempting to dynamically change the JNDI name of a connection factory, a JNDI error occurred. The error itself will tell more about the cause of this failure.

Action:
The cause of this problem may give an indication of the source of this problem and the action to take. If this problem persists, contact My Oracle Support.

BEA-040515
A failured occured while attempting to unregister an InterceptionPoint, {0}.

Category:
JMS

Cause:
An exceptoin coccurred while attempting to unregister an InterceptionPoint. The error will provide more details about the cause of this failure.

Action:
The cause of this problem may give an indication of the source of this problem. If this problem persists, contact My Oracle Support.

BEA-040520
One or more Weighted Distributed Destination (WDD) resources were detected in JMS configuration module "{1}": {0}. This resource type was deprecated as of WebLogic Server 10.3.4.0. Consider using a Uniform Distributed Destination (UDD) instead. If you want to suppress this warning, set system property "weblogic.jms.WDD.SuppressDeprecationWarnings" to true when starting each WebLogic Server instance.

Category:
JMS

Cause:
Deprecated resource was used.

Action:
Use the Uniform Distributed Destination instead.

BEA-040521
The JMS resource "{0}" that you are trying to create in module "{1}" is a Weighted Distributed Destination (WDD). This resource type was deprecated as of WebLogic Server 10.3.4.0. Consider using a Uniform Distributed Destination (UDD) instead. If you want to suppress this warning, set system property "weblogic.jms.WDD.SuppressDeprecationWarnings" to true when starting each WebLogic Server instance.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMS

Cause:
A deprecated resource is trying to create.

Action:
Use the Uniform Distributed Destination instead.

BEA-040522
Failed to update distributed destination membership in a multi-domain environment: {0}.

Category:
JMS

Cause:
Cross domain security configuration is not properly set up.

Action:
Check the security configuration, especially the cross-domain security configuration if the cross domain security feature is enabled. Contact My Oracle support if the problem persists.

BEA-040523
One or more properties - "{4}", specified by {3} with JNDI name {1} defined in the application {0} deployed to {2} are not recognized by WebLogic Server and are ignored. To change the log level of this message, see the {5} property of {3}.

Category:
JMS

Cause:
One or more properties set for a {3} are not recognized by WebLogic Server.

Action:
If the intent of the application is to specify properties recognized by WebLogic Server, check for a misspelling of the property name(s).

BEA-040524
The subdeployment "{0}" used by an entity of type {1} with name "{2}" in JMS module "{3}" defined in {4}, has no target specified in the configuration repository (config.xml). A subdeployment without a valid target will not be deployed.

Category:
JMS

Cause:
The subdeployment "{0}" is not targeted, so the entity was ignored by the JMS module defined in {4}.

Action:
Specifiy a valid target for the subdeployment "{0}".

BEA-040525
Shut down JMS connections for resource group {0}.

Category:
JMS

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
JMS connections for a resource group were shut down because the resource group has been shut down.

Action:
No action is required.

BEA-040526
JMS Module "{3}" deployed to {4} defines an entity of type {1} with name "{2}" with default targeting enabled. There is no JMS server having a persistent store with distribution policy "{0}" available in {4} to host the entity. The destination "{2}" will be hosted when a JMS server having a persistent store with distribution policy "{0}" is configured in {4}.

Category:
JMS

Cause:
For hosting the entity of type "{1}" with name "{2}" , with default targeting enabled defined in the JMS module "{3}" deployed to {4}, there should be exactly one JMS server with persistent store having distribution policy "{0}" defined in {4}. However, no candidate JMS server was found to host that entity.

Action:
Create a JMS server in {4} with a persistent store having the distribution policy set to "{0}".

BEA-040527
JMS Module "{2}" deployed to {3} defines an entity of type {0} with name "{1}" with default targeting enabled. There is no SAF agent having a persistent store with distribution policy "Distributed" available in {3} to host the entity. The destination "{1}" will be hosted when a SAF agent having a persistent store with distribution policy "Distributed" is configured in {3}.

Category:
JMS

Cause:
For hosting the entity of type "{0}" with name "{1}" , with default targeting enabled defined in the JMS module "{2}" deployed to {3}, there should be exactly one SAF agent with persistent store having distribution policy "Distributed" defined in {3}. However, no candidate SAF agent was found to host that entity.

Action:
Create an SAF agent in {3} with a persistent store having the distribution policy set to "Distributed".

BEA-040528
Start JMS service for partition [{0}]

Category:
JMS

Cause:
The partition is starting up.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-040529
Shut down JMS service for partition [{0}].

Category:
JMS

Cause:
The partition is shutting down.

Action:
No action is required.

BEA-040530
JMS Destination Definition with JNDI name "{0}" defined in the application "{1}" deployed to {2} will not be hosted as there is no JMS Server having a persistent store with distribution policy "Distributed" available.

Category:
JMS

Cause:
For hosting the JMS destination definition with JNDI name "{0}" defined in the application "{1}" there must be at least one JMS server having a persistent store with distribution policy "Distributed" However, no JMS server is available in {2} to host the JMS destination definition.

Action:
Create a JMS server in {2} with a persistent store having a distribution policy set to "Distributed".

BEA-040531
One or more JMS Servers - "{0}" were not considered to host the entity {3} deployed to "{2} " as they do not have a persistence store with distribution policy set to "{1}".

Category:
JMS

Cause:
The JMS Servers do not have a persistent store with a persistent store set to the indicated value.

Action:
No action is required.

BEA-040532
One or more JMS Servers - "{0}" were not considered to host the destination defined by JMS Destination Definition with JNDI name "{2}" defined in the application "{3}" deployed to {4} as they do not have a persistence store with distribution policy set to "{1}".

Category:
JMS

Cause:
The JMS servers do not have a persistent store with the distribution policy set to the indicated value.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-040533
The application "{0}" uses a JMS Destination Definition to create a WebLogic JMS {4} with JNDI name "{1}", its generated configuration name is "{3}" and its generated JMS module name is "{2}".

Category:
JMS

Cause:
This is an informational message.

Action:
No action is required.

BEA-040534
Topic "{0}" in module "{1}" has a subscription limit of "{2}" configured.

Category:
JMS

Cause:
This is an informational message.

Action:
No action is required.

BEA-040535
Topic "{0}" in module "{1}" has illegal subscription limit value "{2}" configured via command line system property "{3}". Values must be a positive integer. The limit will be ignored.

Category:
JMS

Cause:
Subscription limit values must be a positive integer.

Action:
Modify system property to specify a legal value and restart the WebLogic server.

BEA-040536
Multiple {1} or/and SAF {1} have been configured with the same name ("{0}") within the same security realm. This potentially may cause those destinations to have the same security policy even if different security policies are specified.

Category:
JMS

Cause:
Potential configuration error.

Action:
Modify the configuration to uniquely name all destinations, including both regular destinations and SAF destinations.

BEA-040537
No more than one {1} or SAF {1} has been configured with the same name ("{0}") within the same security realm. A previously detected warning condition has been cleared.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMS

Cause:
This is an informational message.

Action:
No action is required.

BEA-045002
An error occurred while binding the remote JNDI object to the local JNDI name "{0}".

Category:
JMSExceptions

Cause:
The local JNDI name that is attempting to bind to may not be valid.

Action:
Check the JNDI name to see if its syntax is correct.

BEA-045028
The messages threshold for the JMS server {0} has been exceeded for more than one hour.

Category:
JMSExceptions

Cause:
The threshold of the JMS server was exceeded.

Action:
Verify that the messages are being consumed and that sufficient memory is available.

BEA-045029
The messages threshold for the JMS server {0} has been exceeded for more than 90 percent of the running time of the server.

Category:
JMSExceptions

Cause:
The messages threshold of the JMS server was exceeded.

Action:
Verify that the messages are being consumed and that sufficient memory is available.

BEA-045030
The bytes threshold for the JMS server {0} has been exceeded for more than one hour.

Category:
JMSExceptions

Cause:
The bytes threshold of the JMS server was exceeded.

Action:
Verify that the messages are being consumed and that sufficient memory is available.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-045031
The bytes threshold for the JMS server {0} has been exceeded for more than 90 percent of the running time of the server.

Category:
JMSExceptions

Cause:
The bytes threshold of the JMS server was exceeded.

Action:
Verify that the messages are being consumed and that sufficient memory is available.

BEA-045032
While attempting to create destination {1} in module {2} the JMS server {0} could not be found.

Category:
JMSExceptions

Cause:
The JMS server may be shutting down or may not have completed startup.

Action:
Deploy the module again once the JMS server has completed startup.

BEA-045039
An attempt was made to add a JMS entity of an unknown type {1} in the module {0}.

Category:
JMSExceptions

Cause:
The JMS module given to the update was invalid. It contained an unknown type.

Action:
Ensure that the JMS module is valid.

BEA-045040
While attempting to add a {1} named {2} in module {0}, an error occurred.

Category:
JMSExceptions

Cause:
A linked ModuleException will contain more detail about the cause of the failure.

Action:
Examine the linked exception, which will contain more information about the cause of this failure.

BEA-045041
An attempt was made to remove a JMS entity of an unknown type {1} in the module {0}.

Category:
JMSExceptions

Cause:
The JMS module given to the update was invalid. It contained an unknown type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the JMS module is valid.

BEA-045042
An error occurred while adding {1} to the JMS module {0}.

Category:
JMSExceptions

Cause:
See the linked exception for more detail.

Action:
The linked exception will contain more information about why this add operation failed.

BEA-045043
An error occurred while removing {1} from the JMS module {0}.

Category:
JMSExceptions

Cause:
See the linked exception for more detail.

Action:
The linked exception will contain more information about why this add operation failed.

BEA-045045
A subdeployment named {1} was not found in the module {0}.

Category:
JMSExceptions

Cause:
A subdeployment removal was attempted, but the subdeployment was unknown to the module.

Action:
Contact My Oracle Support.

BEA-045047
The SubDeploymentMBean {0} in deployment {1} can only be targeted to one JMSServerMBean because an entity that can only be targeted to a single JMS server (for example a queue, topic or quota) has a sub-deployment-name element with value {0}

Category:
JMSExceptions

Cause:
The SubDeploymentMBean of the given name cannot be targeted to anything but a single JMS server because an element of the JMS module that points to that subdeployment can only be targeted to a single JMS server.

Action:
Modify the target of the subdeployment so that it only contains a single JMS server.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-045048
The JMS server named {0} has a temporary template configured. The JMSSystemResourceMBean name of the module containing the temporary template is {1}, and the template name is {2}. However, a JMSSystemResourceMBean of name {1} could not be found. The JMS server {0} will not boot until this problem has been fixed.

Category:
JMSExceptions

Cause:
The temporary template for a JMS server must come from a JMSSystemResourceMBean. A common mistake is to put the temporary template into an AppDeployment. However, because the temporary template must be owned by the administrator, all temporary templates must come from JMSSystemResourceMBeans, not AppDeployments.

Action:
Put the temporary template into a JMSSystemResource.

BEA-045049
JMS server {0} does not have a configured temporary template. However an attempt was made to create a temporary destination. This is not allowed.

Category:
JMSExceptions

Cause:
A JMS server without a configured temporary template was used to create a temporary destination. This usage is not allowed.

Action:
Create a JMSSystemResource that contains a template. Use that template as the temporary template for this JMS server.

BEA-045050
A destination named {3} has a jms-create-destination-identifier named {1}. However, another destination named {2} has the same jms-create-destination-identifier. Two destinations with the same jms-create-destination-identifier cannot both be located on the JMS server named {0}.

Category:
JMSExceptions

Cause:
Two destinations cannot both have the same jms-create-destination-identifier on the same JMS server, even if the two destinations are from different modules.

Action:
Either deploy the destination with the offending jms-create-destination-identifier to a different JMS server, or change the value of the jms-create-destination-identifier attribute.

BEA-045051
Two destinations with name {1} were deployed to the JMS server {0}.

Category:
JMSExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Two destinations with the same fully qualified name cannot be deployed to the same JMS server. This error should have been caught during the validation phase of the JMS module.

Action:
Contact My Oracle Support.

BEA-045052
An attempt was made to change the target of a JMS entity that cannot have its target changed. The entity has name "{0}". The original target has name "{1}". The proposed target has name "{2}"

Category:
JMSExceptions

Cause:
An attempt was made to change the target of an entity that cannot have its target changed dynamically.

Action:
Untarget a subdeployment and then retarget that subdeployment elsewhere. However, by doing so, the persistent state maintained for entities retargeted in this fashion will not be kept on the old target and may or may not be removed by the system.

BEA-045054
Cannot dynamically add member {1} to sistributed destination {0}.

Category:
JMSExceptions

Cause:
This member has either not been prepared yet or has already been removed.

Action:
Ensure that the distributed destination member is not removed and is in a prepared state.

BEA-045055
Cannot dynamically remove member {1} from distributed destination {0}.

Category:
JMSExceptions

Cause:
This member has either not been activated yet or is an invalid member.

Action:
Ensure that the distributed destination member is valid and is in an activated state.

BEA-045060
The JMS module named "{0}" is neither an AppDeployment nor a JMSSystemResource.

Category:
JMSExceptions

Cause:
An invalid application context was passed to a JMS module.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Contact My Oracle Support.

BEA-045061
An attempt was made to create a durable subscription on a queue named "{3}". The client identifier is "{0}", the subscriptionName is "{1}" and the selector is "{2}". Durable subscriptions may only be created on topics.

Category:
JMSExceptions

Cause:
An attempt was made to create a durable subscription on a queue.

Action:
Do not attempt to create a durable subscription on a queue.

BEA-045062
There can be no more than one jms-interop-module element in the config.xml file.

Category:
JMSExceptions

Cause:
More than one jms-interop-module element was found in the config.xml file.

Action:
Do not attempt to define more than one jms-interop-module element in the config.xml file.

BEA-045063
The jms-interop-module must have name interop-jms and a descriptor file name jms/interop-jms.xml. This has name "{0}".

Category:
JMSExceptions

Cause:
An attempt was made to use a jms-interop-module with a name other than interop-jms.

Action:
Do not attempt to define a jms-interop-module element in the config.xml file with a name other than interop-jms.

BEA-045064
The target named "{1}" of a JMS module inside a deployment named "{0}" must be a WebLogic Server instance or a cluster. Instead, it is of type "{2}".

Category:
JMSExceptions

Cause:
An attempt was made to target a JMS module to an invalid type of target.

Action:
Do not attempt to target a JMS module to anything other than WebLogic Server instances or clusters. Any other type of target is not understood.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-045065
A JMS module with fully qualified name "{1}" in an application named "{0}" does not have the proper hierarchy of targets. In particular, the subdeployment named "{2}" has a target "{3}" that is not a subtarget of any of the targets of "{0}". For example, the target "{3}" is not a subtarget of "{4}".

Category:
JMSExceptions

Cause:
A target of a subdeployment of a JMS module was not contained within the targets of the whole JMS module.

Action:
Ensure that the JMS module is targeted to a super-set of all the targets of the subdeployment, or retarget the subdeployment within the set of targets for the JMS module.

BEA-045066
The target named "{1}" of a JMS subdeployment named "{3}" inside a deployment named "{0}" must be a JMS server, WebLogic Server instance, or a cluster. Instead, it is of type {2}.

Category:
JMSExceptions

Cause:
An attempt was made to target a JMS subdeployment to an invalid type of target.

Action:
Do not attempt to target a JMS subdeployment to anything other than JMS servers, WebLogic Server instances or clusters. Any other type of target is not understood.

BEA-045067
The field "destination-name" was set to "{3}", in the distributed destination member "{2}", in the distributed destination "{1}", in the module "{0}". The destination-name field of a distributed destination may only be set in the interop module.

Category:
JMSExceptions

Cause:
An attempt was made to set the destination-name field of a distributed destination member type. This is only allowed in the interop module in order to accommodate older clients.

Action:
Change the name of the distributed destination member to the name of the physical queue or topic being referenced, and unset the destination-name field.

BEA-045068
The physical destination named "{3}", in the distributed destination member "{2}", in the distributed destination "{1}", in the module "{0}" does not exist.

Category:
JMSExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt was made by a distributed destination member to reference a destination that does not exist. The physical destination referenced to by a distributed destination must already exist.

Action:
Create the physical destination before referring to it, or create the physical destination in the same edit session as the creation of the distributed destination member.

BEA-045069
The JMS module entity named "{2}" of type "{1}" does not exist in the JMSSystemResource "{0}".

Category:
JMSExceptions

Cause:
An attempt was made to reference a JMS module entity that does not exist in the specified JMSSytemResource.

Action:
Create the JMS module entity in the specified JMSSystemResource before referring to it.

BEA-045070
The configuration entity named "{2}" of type "{1}" does not exist in the domain "{0}".

Category:
JMSExceptions

Cause:
An attempt was made to reference a configuration entity that does not exist in the specified domain.

Action:
Create the configuration entity in the specified domain before referring to it.

BEA-045071
The JMS module entity named "{2}" of type "{1}" cannot be created in JMSSystemResource "{0}".

Category:
JMSExceptions

Cause:
The JMS module entity creation using the the JMSModuleHelper API failed. See the accompanying exception for details.

Action:
Resolve the problem identified by the accompanying exception, and retry the operation.

BEA-045072
The configuration entity named "{2}" of type "{1}" cannot be created in domain "{0}".

Category:
JMSExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The configuration entity creation using the JMSModuleHelper API failed. See the accompanying exception for details.

Action:
Resolve the problem identified by the accompanying exception, and retry the operation.

BEA-045073
The JMS module entity named "{2}" of type "{1}" cannot be deleted from JMSSystemResource "{0}".

Category:
JMSExceptions

Cause:
The JMS module entity deletion using the JMSModuleHelper API failed. See the accompanying exception for details.

Action:
Resolve the problem identified by the accompanying exception, and retry the operation.

BEA-045074
The configuration entity named "{2}" of type "{1}" cannot be deleted from the domain "{0}".

Category:
JMSExceptions

Cause:
The configuration entity deletion using the JMSModuleHelper API failed. See the accompanying exception for details.

Action:
Resolve the problem identified by the accompanying exception, and retry the operation.

BEA-045075
The JMS module managed entity named "{2}" of type "{1}" cannot be found in the JMSSytemResource "{0}" for modification.

Category:
JMSExceptions

Cause:
The JMS module entity modification using the JMSModuleHelper API failed. See the accompanying exception for details.

Action:
Resolve the problem identified by the accompanying exception, and retry the operation.

BEA-045076
An attempt was made to find and modify a JMS module entity named "{2}", of type "{1}", from the JMSSystemResource "{0}" using a null modifier.

Category:
JMSExceptions

Cause:
The JMSEntityModifier argument for the findAndModifyEntity() helper API cannot be null.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Use a valid weblogic.jms.extensions.JMSEntityModifer implementation as the modifier argument.

BEA-045077
The destination named "{0}" on the JMS server "{1}" would have caused the JMS server not to boot because the destination StoreEnabled value is true, but the JMS server does not have a store.

Category:
JMSExceptions

Cause:
This configuration does not work in older releases because the destination StoreEnabled value is true, but the JMS server does not have a store.

Action:
Modify the configuration to remove this discrepency, and re-run the upgrade process. Either add a store to the JMS server or change the value of the StoreEnabled parameter on the destination.

BEA-045078
The destination named "{0}" on the JMS server "{1}" has a DeliveryParamsOverrides.DeliveryMode parameter set to persistent, but the JMS server does not have a store.

Category:
JMSExceptions

Cause:
Messages cannot be made persistent on this JMS server because it does not have a store.

Action:
Modify the configuration to remove this discrepency, and re-run the upgrade process. Either add a store to the JMS server or change the value of the DeliveryParamsOverrides.DeliveryMode parameter.

BEA-045079
An attempt was made to send a persistent message to the destination "{0}" hosted on the JMS server "{1}". This JMS server does not have a store, so the quality of service requested is not available.

Category:
JMSExceptions

Cause:
An attempt was made to send a persistent message to a destination hosted by a JMS server that does not have a store. Since the message cannot be persisted, this message cannot be sent at the required quality of service.

Action:
There is a parameter on the JMS server called "AllowsPersistentDowngrade". If this parameter is set to true, then persistent messages sent to this JMS server will be downgraded to non-persistent.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-045080
The flow steps value {1} is larger than the flow interval value {2} in the connection factory "{0}". The flow steps value must be less than or equal to the flow interval value.

Category:
JMSExceptions

Cause:
This is an invalid configuration. The flow steps value must be less than the entire flow interval.

Action:
Modify the configuration of the connection factory to have the flow steps value be less than or equal to the flow interval.

BEA-045081
The SessionsMaximum attribute of a JMSSessionPoolMBean has the bad value {0}. The value should be -1 or a positive integer.

Category:
JMSExceptions

Cause:
This is an invalid configuration.

Action:
Modify the configuration of the JMSSessionPoolMBean.

BEA-045082
An unexpected naming exception occurred while binding the destination "{0}" to the JNDI name "{1}".

Category:
JMSExceptions

Cause:
The naming exception should contain more information about why this operation failed.

Action:
See the attached naming exception message, which should have more information about why this operation failed.

BEA-045083
An unexpected naming exception occurred while binding the destination "{0}" to the JNDI name "{1}" to the local JNDI context.

Category:
JMSExceptions

Cause:
The naming exception should contain more information about why this operation failed.

Action:
See the attached naming exception, which should have more information about why this operation failed.

BEA-045084
An unexpected naming exception occurred while binding the destination "{0}" to the JNDI name "{1}" to the application JNDI context.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSExceptions

Cause:
The naming exception should contain more information about why this operation failed.

Action:
See the attached naming exception, which should have more information about why this operation failed.

BEA-045085
Could not find a license for JMS. Contact Oracle to obtain a license.

Category:
JMSExceptions

Cause:
A license for JMS was not obtained.

Action:
Contact Oracle to obtain a license.

BEA-045086
The jms-system-resource cannot have the name interop-jms.

Category:
JMSExceptions

Cause:
An attempt was made to define a jms-system-resource with the name interop-jms.

Action:
Do not attempt to define a jms-system-resource element in the config.xml file with the name interop-jms.

BEA-045087
The JMS deployment "{0}" has the descriptor file name "{1}", which is reserved for internal use only.

Category:
JMSExceptions

Cause:
An attempt was made to define a JMS deployment with the reserved file name "interop-jms.xml". This name is reserved by the system for use as the interop module.

Action:
Do not attempt to define a JMS deployment with the reserved name "interop-jms.xml" as its file name.

BEA-045088
The JMS module descriptor file "{1}" used by the JMS system resource "{0}" is illegal. Either the descriptor file name does not end with -jms.xml or the descriptor is being used by another JMS system resource in the configuration.

Category:
JMSExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt was made to define a JMS system resource with the illegal descriptor file name.

Action:
Do not attempt to define a jms-system-resource element in the config.xml file with the illegal descriptor file name.

BEA-045089
SAF error destination {2} of {1} is targeted to a different subdeployment from {0}.

Category:
JMSExceptions

Cause:
The configuration was invalid.

Action:
Correct the deployment descriptor.

BEA-045090
The error handling {1} configured for {0} does not exist in the module.

Category:
JMSExceptions

Cause:
The configuration was invalid.

Action:
Correct the deployment descriptor.

BEA-045091
One of the target ("{1}") of the subdeployment "{2}" for the imported destinations "{0}" is not a legal target type.

Category:
JMSExceptions

Cause:
The configuration was invalid.

Action:
Correct the configuration.

BEA-045092
Imported destinations "{0}": its subdeployment is targeted to a target ("{1}"), which is a receiving-only SAF agent.

Category:
JMSExceptions

Cause:
The configuration was invalid.

Action:
Correct the configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-045093
A UDQ named "{0}" was found in the JMS interop module. UDQs were not available prior to the 9.0 release of WebLogic Server, and therefore cannot be in the JMS interop module. Create another JMS module and put the UDQ in that module.

Category:
JMSExceptions

Cause:
An invalid entity type was found in the JMS module that handles interoperating clients. This element should be placed into a different JMS module.

Action:
Place the entity into another JMS module, and either deploy that module as a system resource or as a deployable resource.

BEA-045094
A UDT named "{0}" was found in the JMS interop module. UDTs were not available prior to the 9.0 release of WebLogic Server, and therefore cannot be in the JMS interop module. Create another JMS module and put the UDT in that module.

Category:
JMSExceptions

Cause:
An invalid entity type was found in the JMS module that handles interoperating clients. This element should be placed into a different JMS module.

Action:
Place the entity into another JMS module, and either deploy that module as a system resource or as a deployable resource.

BEA-045095
An SAF imported destinanation named "{0}" was found in the JMS interop module. SAF imported destinations were not available prior to the 9.0 release of WebLogic Server, and therefore cannot be in the JMS interop module. Create another JMS module and put the SAF imported destinations in that module.

Category:
JMSExceptions

Cause:
An invalid entity type was found in the JMS module that handles interoperating clients. This element should be placed into a different JMS module.

Action:
Place the entity into another JMS module, and either deploy that module as a system resource or as a deployable resource.

BEA-045096
An SAF remote context named "{0}" was found in the JMS interop module. SAF remote contexts were not available prior to the 9.0 release of WebLogic Server, and therefore cannot be in the JMS interop module. Create another JMS module and put the SAF remote context in that module.

Category:
JMSExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An invalid entity type was found in the JMS module that handles interoperating clients. This element should be placed into a different JMS module.

Action:
Place the entity into another JMS module, and either deploy that module as a system resource or as a deployable resource.

BEA-045097
An SAF error handlings named "{0}" was found in the JMS interop module. SAF error handlings were not available prior to the 9.0 release of WebLogic Server, and therefore cannot be in the JMS interop module. Create another JMS module and put the SAF error handlings in that module.

Category:
JMSExceptions

Cause:
An invalid entity type was found in the JMS module that handles interoperating clients. This element should be placed into a different JMS module.

Action:
Place the entity into another JMS module, and either deploy that module as a system resource or as a deployable resource.

BEA-045098
There is a JMS system resource and an application deployment both named "{0}". The names of all JMS system resources and all application deployments must be different.

Category:
JMSExceptions

Cause:
Both a JMS system resource and an application deployment have the same name. This would cause similarly named resources in a JMS module descriptor file to have conflicting runtime names, and therefore is not allowed.

Action:
Change the name of either the JMS system resource or application deployment so that there is no name conflict.

BEA-045099
An attempt was made to create a temporary destination. However, no JMS server in the cluster is able to host temporary destinations. Ensure that at least one of the JMS servers in the cluster has the HostingTemporaryDestinations parameter set to true (which is the default).

Category:
JMSExceptions

Cause:
None of the JMS servers in the cluster are available for hosting temporary destinations.

Action:
Modify the HostingTemporaryDestinations parameter on at least one JMS server in the cluster. Note that in releases prior to 9.0, the default for the ability to host temporary destinations was false, while in 9.0 and beyond, the default for the ability to host temporary destinations is true.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-045100
The createQueue or createTopic call was made with a null or zero length destination name.

Category:
JMSExceptions

Cause:
The createQueue or createTopic call must be made with the name of a destination to find.

Action:
Do not pass a null or zero length string to createQueue or createTopic.

BEA-045101
The destination name passed to the createTopic or createQueue "{0}" is invalid. If the destination name does not contain a "/" character, then it must be the name of a distributed destination that is available in the cluster to which the client is attached. If it does contain a "/" character, then the string before the "/" must be the name of a JMS server or a ".". The string after the "/" is the name of a the desired destination. If the "./" version of the string is used then any destination with the given name on the local WebLogic Server instance will be returned.

Category:
JMSExceptions

Cause:
Either a distributed destination of the given name does not exist in the cluster to which the client is attached or the destination name passed to createTopic or createQueue does not contain a "/" character, or there is nothing before the "/" character.

Action:
Ensure that the distributed destination is available on the same cluster where the client is located, or format the destination name string properly.

BEA-045102
A destination named "{0}" was not found on WebLogic Server instance "{1}".

Category:
JMSExceptions

Cause:
An attempt was made to find a destination of a given name on a particular WebLogic Server instance. No destination of that name could be found on that WebLogic Server instance.

Action:
It is possible that the createTopic or createQueue call was routed to a WebLogic Server instance that does not contain a destination with the given name. The set of WebLogic Server instances where this request can be routed can be controlled by using a connection factory that is only targeted to WebLogic Werver instances that have destinations of the desired name.

BEA-045103
While trying to find a topic or a queue, the specific JMS server requested could not be found. The linked exception may contain more information about the reason for failure.

Category:
JMSExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A specific JMS server was requested by a call to createTopic or createQueue. However, the system could not locate the JMS server of that name.

Action:
The WebLogic Server instance on which that JMS server is targeted may be down. The JMS server may be suspended. Check on the status of the JMS server and also on the status of the communication between the servers in the cluster. Check the linked exception for more information about the cause of this failure.

BEA-045104
While trying to find a topic or a queue, the specific JMS server requested could not be found.

Category:
JMSExceptions

Cause:
A specific JMS server was requested by a call to createTopic or createQueue. However, the system could not locate the JMS server of that name.

Action:
Ensure that the JMS server requested exists in the configuration of the cluster to which the client is attached.

BEA-045105
While trying to find a topic or a queue, communication failed with the specific JMS server requested. The linked exception may contain more information about the reason for failure.

Category:
JMSExceptions

Cause:
A specific JMS server was requested by a call to createTopic or createQueue. However, the system could not communicate with the JMS server of that name.

Action:
The WebLogic Server instance on which that JMS server is targeted may be down. The JMS server may be suspended. Check on the status of the JMS server and also on the status of the communication between the servers in the cluster. Check the linked exception for more information about the cause of this failure.

BEA-045106
A destination named "{0}" was found. However, the requested destination was of type "{1}", and the destination found was not of that type.

Category:
JMSExceptions

Cause:
Either the user called createTopic and the destination found was a queue or the user called createQueue and the destination found was a topic.

Action:
Ensure that the destination name requested is of the correct type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-045107
A communication failure occurred while attempting to remove a durable subscription. The linked exception may contain more details about the cause of the failure.

Category:
JMSExceptions

Cause:
While attempting to remove a durable subscription a communication failure occurred.

Action:
Check on the status of WebLogic Server instance where the destination which the durable subscription refers to resides. Check the linked exception for more information about the cause of this failure.

BEA-045108
The JMS system does not understand request ID {0}.

Category:
JMSExceptions

Cause:
An invalid request ID was presented to the front end manager.

Action:
If this condition persists, contact My Oracle Support.

BEA-045109
A foreign server named "{0}" was found which does not have a connection URL specified. However, it contains a "{2}" named "{1}" that has the same local and remote JNDI name value "{3}". This is an invalid configuration and is not allowed.

Category:
JMSExceptions

Cause:
The user has configured a foreign server without a connection URL and has either a foreign connection factory or a foreign destination with both the local and remote JNDI name matching.

Action:
Ensure that either the foreign server has a connection URL to the foreign server or that the local and remote JNDI names are different.

BEA-045110
The JMS resource named "{0}" has incorrect targeting information. This resource has the default-targeting-enabled attribute set to true and has a valid sub-deployment-name value specified.

Category:
JMSExceptions

Cause:
A JMS resource cannot have both default targeting enabled and a subdeployment name specified.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that either the default targeting is enabled or that the valid subdeployment name is specified.

BEA-045111
The JMS resource named "{0}" has incorrect targeting information. A JMS physical destination cannot have the default-targeting-enabled attribute set.

Category:
JMSExceptions

Cause:
A JMS physical destination cannot have the default-targeting-enabled attribute set.

Action:
Ensure that the default-targeting-enabled attribute is not set for the physical destinations.

BEA-045112
The flow minimum value {1} is larger than or equal to the flow maximum value {2} in connection factory "{0}". The flow minimum value must be less than the flow maximum value.

Category:
JMSExceptions

Cause:
This is an invalid configuration. The flow minimum value must be less than the flow maximum value.

Action:
Modify the configuration of the connection factory to have the flow minimum value be less than the flow maximum value.

BEA-045113
JMS distributed destination forward request denied for the destination named "{1}". Reason "{0}".

Category:
JMSExceptions

Cause:
JMS distributed destinations may not have been fully initialized.

Action:
If forwarding does not begin after a few minutes, contact My Oracle Support.

BEA-045114
Failed to unsubscribe the subscription "{0}", client ID "{1}". This connection has a client ID policy of UNRESTRICTED and cannot unsubscribe a durable subscription without a topic object.

Category:
JMSExceptions

Cause:
An attempt was made to unsubscribe a durable subscription using the standard javax.jms.Session.unsubscribe(String name) method from a connection that has a client ID policy of UNRESTRICTED.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Use the weblogic.jms.extensions.WLSession.unsubscribe(Topic topic, String name) API to unsubscribe a durable subscription from a connection that has a client ID policy of UNRESTRICTED. If using a pre-AS11gR1PS3 Java client, upgrade to a AS11gR1PS3 client. If using a non-Java client, clean up the durable subscription from the Administration Console or use WebLogic Scripting Tool (WLST) commands or scripts.

BEA-045115
The SubDeploymentMBean {0} in JMS Module {1} contains a standalone queue, topic or quota that can only be targeted to a single non-clustered JMS Server or to a clustered JMS Server with Singleton distribution-policy.

Category:
JMSExceptions

Cause:
The SubDeploymentMBean of the given name cannot be targeted to anything but a single non-clustered JMS Server or to a clustered JMS Server with Singleton distribution-policy.

Action:
Modify the target of the subdeployment so that it contains only a single non-clustered JMS Server or a clustered JMS Server with Singleton distribution-policy.

BEA-045116
The Replicated Distributed Topic (RDT) cannot have its members hosted by a cluster targeted JMSServer. The RDT named {0} in JMS Module {2} has its subdeployment {1} targeted to the Clustered JMSServer {3}.

Category:
JMSExceptions

Cause:
The RDT named {0} in JMS Module {2} has its subdeployment {1} targeted to the Clustered JMSServer {3}.

Action:
Modify the target of the subdeployment so that it does not contain a cluster targeted JMSServer.

BEA-045119
The current JMS message is a Unit-of-Order (UOO) or Unit-of-Work (UOW) message that cannot be sent to the distributed destination (DD) "{0}". This DD has its UnitOfOrderRouting attribute configured to "Hash", which does not support UOO/UOW messages when either a DD is configured in a Resource Group scope, or a DD is hosted on a JMS server that is targeted to a cluster. To fix this issue: change the UnitOfOrderRouting attribute to "PathService" and ensure a Path Service is configured and running in the current scope.

Category:
JMSExceptions

Cause:
A Unit-of-Order (UOO) or Unit-of-Work (UOW) JMS message cannot be sent to distributed destinations that have at least one member hosted by a cluster-targeted JMS Server, but the specified Distributed destination has one or more of its members hosted by a cluster-targeted JMS server. The current JMS message is a Unit-of-Order (UOO) or Unit-of-Work (UOW) message that cannot be sent to the distributed destination (DD). This DD has its UnitOfOrderRouting attribute configured to "Hash", which does not support UOO/UOW

Copyright © 2000, 2026, Oracle and/or its affiliates.

messages when either a DD is configured in a Resource Group scope, or a DD is hosted on a JMS server that is targeted to a cluster.

Action:
To fix this issue: change the UnitOfOrderRouting attribute to "PathService" and ensure a Path Service is configured and running in the current scope.

BEA-045120
An injected JMSContext cannot be used when there is neither a transaction nor a valid request scope.

Category:
JMSExceptions

Cause:
An injected JMSContext was used when there is neither a transaction or a valid request scope.

Action:
Change your application so that it only uses an injected JMSContext when there is either a transaction or a valid request scope.

BEA-045121
Exception encountered whilst injecting a JMSContext: unable to create InitialContext: {0}

Category:
JMSExceptions

Cause:
An exception was encountered whilst injecting a JMSContext: unable to create InitialContext: {0}

Action:
Review the cause of the exception, fix the problem and try again.

BEA-045122
Error injecting JMSContext: unable to lookup connection factory with lookup name {0}. The exception was {1}.

Category:
JMSExceptions

Cause:
An error was encountered whilst injecting a JMSContext: unable to lookup connection factory with lookup name {0}. The exception was {1}.

Action:
Review the cause of the exception, fix the problem and try again.

BEA-045123
The method {0} is not permitted on a container-managed (injected) JMSContext.

Category:
JMSExceptions

Cause:
An attempt was made to call the method {0} on a container-managed (injected) JMSContext. The use of this method is not permitted.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Amend the application so that it does not call methods that are not permitted on a container-managed (injected) JMSContext. Then try again.

BEA-045124
A session mode of SESSION_TRANSACTED is not permitted on a container-managed (injected) JMSContext.

Category:
JMSExceptions

Cause:
An attempt was made to use a container-managed (injected) JMSContext which specified a session mode of SESSION_TRANSACTED. This session mode is not permitted because the JMS specification forbids the use of the commit method on a container-managed (injected) JMSContext.

Action:
Amend the code which declares the injected JMSContext to use a different value of JMSSessionMode, or omit the JMSSessionMode annotation.

BEA-045125
WebLogic JMS extension methods are only available on injected JMSContext objects if the JMS provider being used is WebLogic JMS

Category:
JMSExceptions

Cause:
The application injected a JMSContext for a foreign JMS provider, cast it to weblogic.jms.client.JMSContextInternal and called a method defined on that interface.

Action:
Amend the code to remove the cast to weblogic.jms.client.JMSContextInternal and the call to any methods on that interface.

BEA-045126
WebLogic JMS extension methods are only available on injected JMSContext objects if the JMS provider being used is WebLogic JMS

Category:
JMSExceptions

Cause:
The application injected a JMSContext for a foreign JMS provider, cast it to weblogic.jms.extensions.WLJMSContext and called a method defined on that interface.

Action:
Amend the code to remove the cast to weblogic.jms.extensions.WLJMSContext and the call to any methods on that interface.

BEA-045127
The application "{1}" has defined a resource using {2} Definition with JNDI name "{0}". There is, however, an object already bound to JNDI using that name.

Category:
JMSExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The JNDI name used by {1} Definition is already bound to JNDI.

Action:
Define the resource with a different JNDI name.

BEA-045128
The application "{1}" has defined duplicate resources using {2} Definition with JNDI name "{0}", but the duplicate resources defined by the application are not compatible.

Category:
JMSExceptions

Cause:
The application has defined duplicate resources that are not compatible.

Action:
Fix the duplicate resources defined by {2} Definition and redeploy the application.

BEA-045129
{0} in an application.xml and classes outside of a module, is allowed to define a resource only in java:global and java:app namespaces. the application "{1}" has, however, defined a {0} with the name "{2}", which is not valid.

Category:
JMSExceptions

Cause:
An environment entry declared in the application.xml descriptor and classes outside of a module must specify a JNDI name in the namespace java:app or java:global.

Action:
Define the {0} resource in one of the allowed JNDI namespaces.

BEA-045130
The application "{1}" has defined a {0} resource with name "{2}" in a namespace that is not a well-defined namespace by the Java EE specification. The {0} resource is allowed only in one of the JNDI namespaces - java:global, java:app, java:module and java:comp.

Category:
JMSExceptions

Cause:
An invalid JNDI namespace was used to define a {0} resource.

Action:
Define the {0} resource in one of the allowed JNDI namespaces.

BEA-045131
The application "{0}" has specified one or more properties to define a {1} resource. The value set for a property specified by {2} does not, however, match the value expected by WebLogic.

Category:
JMSExceptions

Cause:
The value set for a property does not match the value expected by WebLogic,

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Find the nested exception for more details and correct the configuration.

BEA-045132
The application "{0}" has defined a {1} resource using {2} and specified a property "{3}" with value "{4}", which is not the expected type for that property.

Category:
JMSExceptions

Cause:
An unexpected type was used for the property.

Action:
Check all properties in the defined resource.

BEA-045133
The Uniform Distributed Queue/Topic cannot be hosted by a cluster targeted JMSServer that does not have its distribution-policy set to Distributed. The UDQ/UDT named {0} in JMS Module {2} has its subdeployment {1} targeted to the Clustered JMSServer {3}.

Category:
JMSExceptions

Cause:
The Uniform Distributed Queue/Topic cannot be hosted by a cluster targeted JMSServer that does not have its distribution-policy set to Distributed. The UDQ/UDT named {0} in JMS Module {2} has its subdeployment {1} targeted to the Clustered JMSServer {3}.

Action:
Modify the target of the UDQ/UDT subdeployment so that it is targeted cluster targeted JMSServer with distribution-policy set to Distributed.

BEA-045134
JMS Module "{3}" deployed to {4} defines an entity of type {1} with name "{2}" and with default targeting option enabled. There are more than one JMS servers "{5}", having a persistent store with distribution policy "{0}" available in {4} to host the entity, which is not allowed.

Category:
JMSExceptions

Cause:
For hosting the entity of type {1} with name "{2}" , and with default targeting option enabled defined in the JMS module "{3}" deployed to {4}, there must be exactly one JMS server with persistent store having distribution policy "{0}" defined in "{4}", but more than one candidate JMS servers were found to host that entity.

Action:
Ensure that there is exactly one JMS server with store distribution policy "{0}" defined in scope {4} or use subdeployment to target the entity to the required JMS server.

BEA-045135
JMS Module "{2}" deployed to {3} defines an entity of type {0} with name "{1}" and with default targeting option enabled. There are more than one SAF agents "{4}", having a persistent store with distribution policy "Distributed" available in {3} to host the entity, which is not allowed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSExceptions

Cause:
For hosting the entity of type "{0}" with name "{1}" , with default targeting enabled defined in the JMS module "{2}" deployed to "{3}", there should be exactly one SAF agent with persistent store having distribution policy "Distributed" defined in "{3}", but more than one candidate SAF agents were found to host that entity.

Action:
Ensure that there is exactly one SAF agent with persistent store having distribution policy "Distributed" defined in scope {3} or use subdeployment to target the entity to the required SAF agent.

BEA-045136
The JMS Server with name "{0}" specified by the property jms-server-name of {1} with JNDI name "{2}" in application {3} is not available in the {4}.

Category:
JMSExceptions

Cause:
The client application has specified a JMS Server with name {0}, which is not available in the {4}.

Action:
If the intent of the application is to target the {5} to a particular JMS Server, specify a valid JMS Server using property jms-server-name.

BEA-045137
Weighted (Non-Uniform) Distributed Destination/Destinations configured under a JMS module "{0}" are not supported because JMS module "{0}" exists under "{1}". Weighted (Non-Uniform) Distributed Destination are not supported in the Resource Group or Resource Group Template scopes.

Category:
JMSExceptions

Cause:
Weighted (Non-Uniform) Distributed Destination/Destinations are not supported under a Resource Group or Resource Group Template scope.

Action:
Correct the configuration.

BEA-045138
A Uniform Distributed Topic "{0}" in JMS module "{1}" is configured with a forwarding policy "Replicated". This policy is unsupported in a Resource Group or Resource Group Template scope and the JMS module "{1}" is configured under "{2}"

Category:
JMSExceptions

Cause:
A Uniform Distributed Topic with forwarding policy "replicated" was used under a Resource Group or Resource Group Template deployment scope.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Configure the topic to use a "Partitioned" policy or configure a non-distributed topic instead.

BEA-045139
The JMS Server with name "{0}" specified by the property jms-server-name of JMS Destination Definition with JNDI name "{1}" in application {2} has a persistent store with distribution policy "{3}". A JMS Server with a store having distribution policy "Distributed" is only allowed to host the destination defined by JMS Destination Definition.

Category:
JMSExceptions

Cause:
The client application has specified JMS Server with name {0}, having a store with distribution policy {3}, which is not allowed to host a destination defined by a JMS Destination Definition.

Action:
Specify a JMS werver that has distribution policy "Distributed" for property jms-server-name of a JMS Destination Definition.

BEA-045140
Error using a JMSContext object that was injected using @Inject. The JNDI name {0} specified in the @JMSConnectionFactory annotation does not refer to a javax.jms.ConnectionFactory or javax.jms.XAConnectionFactory, it refers to a {1}.

Category:
JMSExceptions

Cause:
An error was encountered while using a JMSContext object that was injected using @Inject. The lookup name {0} specified in the @JMSConnectionFactory annotation does not refer to a javax.jms.ConnectionFactory or javax.jms.XAConnectionFactory, it refers to a {1}.

Action:
Correct the lookup name specified using @JMSConnectionFactory and try again.

BEA-045141
Error using a JMSContext object that was injected using @Inject. Unable to look up the connection factory using the JNDI name {0} that was specified in the @JMSConnectionFactory annotation.

Category:
JMSExceptions

Cause:
An error was encountered while using a JMSContext object that was injected using @Inject. The @JMSConnectionFactory annotation specified that the connection factory to be used could be obtained using the JNDI name (0), but an error occurred while looking up the connection factory.

Action:
Correct the lookup name that was specified using @JMSConnectionFactory and try again.

BEA-045142
WebLogic Server has detected a deprecated JMS Interop Module in your configuration. This feature will be removed in a future release. Oracle recommends that you take appropriate measures to remove dependencies on JMS Interop Modules.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSExceptions

Cause:
A deprecated JMS Interop Module was used in the configuration.

Action:
Remove JMS Interop Modules from the configuration.

BEA-045143
The Subdeployment "{0}" in JMS Module "{1}" contains a standalone Queue or standalone Topic that can only be targeted to the JMS Server/JMS Servers that references a store configured with "Singleton" distribution-policy.

Category:
JMSExceptions

Cause:
A SubDeployment is being referenced by a singleton style resource such as a standalone Queue or standalone Topic, so it must target to the JMS Server/JMS Servers that references a Store configured with "Singleton" distribution-policy. Note that a asubdeployment under a Resource Group or Resource Group Template scope must be targeted to a single JMS Server or to a single SAF Agent.

Action:
Modify the target of the subdeployment so that it contains only JMS server/JMS servers that reference a Store configured with "Singleton" distribution-policy. Note the you must target a subdeployment to single JMS Server or single SAF Agent under a Resource Group or Resource Group Template scope.

BEA-045144
The SubDeployment "{0}" in JMS Module "{1}" contains a Distributed Queue or Distributed Topic that can only be targeted to the JMS Server/JMS Servers that references a Store configured with "Distributed" distribution-policy.

Category:
JMSExceptions

Cause:
The SubDeployment of the given name cannot be targeted to anything but the JMS Server/JMSServers that references a Store that is configured with "Distributed" distribution-policy.

Action:
Modify the target of the subdeployment so that it contains only JMS server/JMS servers that references a Store with "Distributed" distribution-policy. Note the you must target a subdeployment to a single JMS Server or single SAF Agent under a Resource Group or Resource Group Template scope.

BEA-045145
The URL "{0};" references a WebLogic MT partition, but WebLogic JMS Client for Microsoft .NET does not support partitions.

Category:
JMSExceptions

Cause:
WebLogic MT partitions are not supported by WebLogic JMS Client for Microsoft .NET.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Do not use a partition-scoped url. Use a domain-level provider url instead.

BEA-045146
Destination "{0};" with JNDI name "{1};" is scoped to a WebLogic MT partition, but WebLogic JMS Client for Microsoft .NET do not support partitons.

Category:
JMSExceptions

Cause:
WebLogic MT partitions are not supported by WebLogic JMS Client for Microsoft .NET.

Action:
Do not use a partition-scoped destination. Use a domain-level destination instead.

BEA-045147
ConnectionFactory "{0};" is scoped to a WebLogic MT partition, but WebLogic JMS Client for Microsoft .NET does not support partitons.

Category:
JMSExceptions

Cause:
WebLogic MT partitions are not supported by WebLogic JMS Client for Microsoft .NET.

Action:
Do not use a partition-scoped connection factory. Use a domain-level connection factory instead.

BEA-045148
JMS Destination Definition with JNDI name "{0}" defined in the application "{1}" which is deployed to {2} will not be hosted as there are more than one JMS Servers having a persistent store with distribution policy "Distributed" available.

Category:
JMSExceptions

Cause:
For hosting the JMS Destination Definition with JNDI name "{0}" defined in the application "{1}" there must be at least one JMS server with a persistent store with distribution policy "Distributed" available in {2} to host the JMS destination. More than one JMS servers are available, however, as candidates in {2} to host the destination defined by the JMS Destination Definition.

Action:
Ensure that there is exactly one JMS server available to host the JMS Destination Definition or specify a JMS Server having distribution policy "Distributed" using the property "jms-server-name" to host the destination defined by the JMS Destination Definition on the specified JMS server.

BEA-045149
The application "{0}" has defined a {1} resource with name "{3}" using {2} in an application client module "{4}" and specified a resource adapter "{5}".

Category:
JMSExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A {2} in an application client module specifying a resource adapter is not allowed.

Action:
Update the application client module to be compliant.

BEA-045150
The target named "{1}" of an SAF imported destination named "{3}" inside a deployment named "{0}" must be an SAF agent, WebLogic Server instance, or a cluster. Instead, it is of type {2}.

Category:
JMSExceptions

Cause:
An attempt was made to target an SAF imported destination to an invalid type of target.

Action:
Do not attempt to target an SAF imported destination to anything other than JMS servers, ServerMBean or ClusterMBean. Any other type of target is not understood.

BEA-045151
The target named "{1}" of an SAF imported destination named "{3}" inside a deployment named "{0}" must be an SAF agent. Instead, it is of type {2}.

Category:
JMSExceptions

Cause:
An attempt was made to target an SAF imported destination to an invalid type of target.

Action:
Do not attempt to target an SAF imported destination to anything other than JMS servers. Any other type of target is not understood.

BEA-045152
The JMS Module "{1}" deployed to {2} defines a Foreign Server with name "{0}" and is targeted to subdeployment {3}. The subdeployment {3} is, however, targeted to a JMS Server with distribution policy "Singleton", which is not allowed to be used as a target for a Foreign Server.

Category:
JMSExceptions

Cause:
A Foreign Server is not allowed to be targeted to a subdeployment that has a JMS Server with distribution policy "Singleton".

Action:
Change the target of the subdeployment to have a JMS Server with distribution policy "Distributed" used by the Foreign Server or use default targeting.

BEA-045153
The JMS resource with JNDI name "{2}" defined using {0} by the application "{1}" does not have proper hierarchy of targets. "{3}" specified by property jms-server-name is not a subtarget of "{4}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSExceptions

Cause:
The JMS resource with JNDI name "{2}" defined using {0} by the application "{1}" does not have proper hierarchy of targets. "{3}" specified by property jms-server-name is not a subtarget of "{4}".

Action:
Specify a JMS Server for property jms-server-name which is available in the same hierarchy as that of the application deployment.

BEA-045154
A Uniform Distributed Destination can only be targeted to a JMS Server that is in the same Resource Group or Resource Group Template scope as the uniform distributed destination. JMS Server "{0}" is not in the same scope as the destination.

Category:
JMSExceptions

Cause:
A Uniform Distributed Destination can only be targeted to a JMS Server that is in the same Resource Group or Resource Group Template scope as the uniform distributed destination. JMS Server "{0}" is not in the same scope as the destination.

Action:
Target the Uniform Distributed Destination to JMS Server defined in the same Resource Group/Resource Group Template scope as the uniform distributed destination.

BEA-045155
There is scope conflict. Either a naming context is attached to a pre-12.2.1 WebLogic Server but the scope type is Resource Group or Resource Group Template (the Domain scope type is the only valid type in this case), or a naming context is attached to a partition but the scope type is Domain or a Resource Group Template (the Resource Group scope type is the only supported type in this case).

Category:
JMSExceptions

Cause:
There is scope conflict. Either a naming context is attached to a pre-12.2.1 WebLogic Server but the scope type is Resource Group or Resource Group Template (the Domain scope type is the only valid type in this case), or a naming context is attached to a partition but the scope type is Domain or a Resource Group Template (the Resource Group scope type is the only supported type in this case).

Action:
When accessing resource group template or domain level configuration ensure that the specified naming context is attached to a domain level scope.Also, when accessing either resource group or resource group template configuration, ensure that the naming context is attached to WebLogic 12.2.1 or greater server.

BEA-045156
Could not find partition name in the given "Context" Object.

Category:
JMSExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Could not find partition name in the given "Context" Object.

Action:
Verify valid partition name is attached to the "Context" Object.

BEA-045157
{0} named "{1} " does not exist in the {2} scope.

Category:
JMSExceptions

Cause:
{0} named "{1} " does not exist in the {2} scope.

Action:
Specify a {0} which exists for deleting the same.

BEA-045158
A {0} named "{1} " does not exist in the Resource Group or Resource Group Template {2}.

Category:
JMSExceptions

Cause:
A {0} named "{1} " does not exist in the Resource Group or Resource Group Template {2}.

Action:
Specify a {0} which exists.

BEA-045159
A {0} "{1}" does not exist under {2}.

Category:
JMSExceptions

Cause:
A {0} "{1}" does not exist under {2}.

Action:
Specify a correct scope name, partition name and scope type.

BEA-045160
The Target name "{0}" is not allowed in {1} scope. Target name must be null in Resource Group/Resource Group Template scope and It should not be null for Domain scope.

Category:
JMSExceptions

Cause:
The Target name "{0}" is not allowed in {1} scope. Target name must be null in Resource Group/Resource Group Template scope and It should not be null for Domain scope.

Action:
Specify a valid target.

BEA-045161
Parameter {0} can't be null or empty.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSExceptions

Cause:
Parameter {0} can't be null or empty.

Action:
Specify a valid {0}.

BEA-045162
Operation "{0}" cannot be invoked in Resource Group or Resource Group Template scope.

Category:
JMSExceptions

Cause:
Operation "{0}" cannot be invoked in Resource Group or Resource Group Template scope.

Action:
Operation "{0}" is not allowed in current scope. Please verify your configuration.

BEA-045163
Targets of Uniform Distributed Destination deployment overlap. JMS Server named: " {0} " is been identified twice as potential JMSServer for hosting the Uniform Distributed Destionation's members under the Uniform Distributed.

Category:
JMSExceptions

Cause:
Weblogic Internal Error.

Action:
An Uniform Destionation can be targeted to single JMS Server.Please verify the configuration.

BEA-045164
Invalid partition name: the given partition Name {0} does not exist under {1}.

Category:
JMSExceptions

Cause:
Invalid partition name: the given partition Name {0} does not exist under {1}.

Action:
Verify whether partition name exist in given scope {1}.

BEA-045165
Object-based security is enabled on the JMS connection factory with JNDI name "{0}", therefore it can only be used by a 12.2.2.1.0 or later client.

Category:
JMSExceptions

Cause:
Object-based security is enabled on the JMS connection factory with JNDI name "{0}", therefore it can only be used by a 12.2.2.1.0 or later client.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Use another JMS connection factory whose Security Policy is ThreadBased.

BEA-045166
The InitialContextFactory {0} is not supported by Foreign Server.

Category:
JMSExceptions

Cause:
The InitialContextFactory {0} is not supported by Foreign Server.

Action:
Do not use this InitialContextFactory {0} because it is not supported by Foreign Server.

BEA-045167
The proposed JNDI name {0} for destination {1} is already bound by another object of type {2}. {3}

Category:
JMSExceptions

Cause:
TBD

Action:
TBD

BEA-045168
Connection is closed because {0} is shutting down.

Category:
JMSExceptions

Cause:
The associated ResourceGroup or Partition is coming down.

Action:
No action is required.

BEA-045169
The method "{0}" is not supported in {1} scope. The scope type should be Resource Group.

Category:
JMSExceptions

Cause:
The method "{0}" is not supported in {1} scope. The scope type should be Resource Group.

Action:
Specify a valid scope.

BEA-045170
A JMS module has an incorrectly configured store-and-forward (SAF) error handler named "{0}". The error handler is configured with a "Redirect" error handling policy, and this policy requires an explicitly configured error destination in the error handler, where the error destination must not be the same as any of the destinations that use the error handler.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSExceptions

Cause:
The module configuration was invalid.

Action:
Correct the module configuration.

BEA-050000
{0} is an obsolete property. Use {1} to create the context instead.

Category:
JNDI

Cause:
Property {0} is obsolete. However, this property name can still be used to retrieve the property value.

Action:
Use property {1} instead of {0} in the future.

BEA-050001
WLContext.close() was called in a different thread than the one in which it was created.

Category:
JNDI

Cause:
The threads used to create and close the context are different. As a result, the context entries associated with the creating thread might not be cleaned up.

Action:
Close the context in the creating thread.

BEA-050002
Cannot replicate the object that is bound in the JNDI under the name {0}.

Category:
JNDI

Cause:
A non-serializable object cannot be serialized.

Action:
If the object was not intended to be replicated, set the replicate bindings to false. If the object should be replicated to all nodes in the cluster, ensure that the object is serializable or externalizable.

BEA-050003
Cannot create initial context. Reason: {0}

Category:
JNDI

Cause:
Initial context cannot be created.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the exception in the message body.

BEA-050004
Unable to bind. Reason: {0}

Category:
JNDI

Cause:
This was unable to bind.

Action:
Check the exception in the message body.

BEA-050005
Unable to unbind. Reason: {0}

Category:
JNDI

Cause:
This was unable to unbind.

Action:
Check the exception in the message body.

BEA-050006
An attempt was made to look up the versioned object "{0}" from an external client or another application. This can potentially cause in-flight work of the application version not being tracked properly, and thus, be retired prematurely.

Category:
JNDI

Cause:
An attempt was made to look up the versioned object "{0}" from an external client or another application. This can potentially cause in-flight work of the application version not being tracked properly, and thus, be retired prematurely.

Action:
Ensure that the possibility of premature retirement of the application version is either tolerated or handled properly. To disable this check, set the JNDI environment property as specified by weblogic.jndi.WLContext.ALLOW_EXTERNAL_LOOKUP to "true" when performing lookup of the versioned object.

BEA-050007
An attempt was made to look up the non-versioned global resource "{0}" from an application version "{1}". This can potentially cause conflict of the global resource usages among multiple application versions.

Category:
JNDI

Cause:
An attempt was made to look up the non-versioned global resource "{0}" from an application version "{1}". This can potentially cause conflict of the global resource usages among multiple application versions.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that usages of the global resource by multiple application versions do not conflict. To disable this check, set the JNDI environment property as specified by weblogic.jndi.WLContext.ALLOW_GLOBAL_RESOURCE_LOOKUP to "true" when performing lookup of the global resource.

BEA-050008
Illegal cross partition JNDI lookup detected for "{0}" from source context "{1}" to destination context "{2}".

Category:
JNDI

Cause:
An attempt was made to access the "{0}", the current partition is "{1}" but the target partition is "{2}". This cross partition should be taken care of by visibility control.

Action:
Either configure "{0}" to allow cross partition access or modify the application to avoid cross partition lookup. For example, you can use a remote (host:port) url to target the destination.

BEA-055001
Invalid time-to-deliver, must be >= -1

Category:
JMSClientExceptions

Cause:
The time-to-deliver parameter passed to setTimeToDeliver was invalid.

Action:
Change the code to pass a time-to-deliver parameter that is >= -1.

BEA-055002
Cannot convert {0} to a boolean.

Category:
JMSClientExceptions

Cause:
An object that was not null, not a boolean, and not a string could not be converted to a boolean value.

Action:
Ensure that the object passed in is either a boolean or a string.

BEA-055003
Cannot convert null to a byte.

Category:
JMSClientExceptions

Cause:
The null object cannot be converted to a byte value

Action:
Avoid passing null where a byte value is expected

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-055004
Cannot convert {0} to a byte.

Category:
JMSClientExceptions

Cause:
An object that was not null, not a byte, and not a string could not be converted to a byte value

Action:
Ensure that the object passed in is either a byte or a string.

BEA-055005
Cannot convert null to a short.

Category:
JMSClientExceptions

Cause:
The null object cannot be converted to a short value.

Action:
Avoid passing null where a short value is expected.

BEA-055006
Cannot convert {0} to a short.

Category:
JMSClientExceptions

Cause:
An object that was not null, not a short, and not a string could not be converted to a short value.

Action:
Ensure that the object passed in is either a short or a string.

BEA-055007
Could not serialize object.

Category:
JMSClientExceptions

Cause:
An object could not be serialized. The linked exception may contain more details.

Action:
See the linked exception which may contain more details.

BEA-055008
Invalid RedeliveryLimit, must be >= -1.

Category:
JMSClientExceptions

Cause:
The RedeliveryLimit parameter passed to setRedeliveryLimit was invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Change the code to pass a RedeliveryLimit parameter that is >= -1.

BEA-055009
Invalid SendTimeout, must be >= 0

Category:
JMSClientExceptions

Cause:
The SendTimeout parameter passed to setSendTimeout was invalid.

Action:
Change the code to pass a SendTimeout parameter that is >= 0.

BEA-055014
Error sending message

Category:
JMSClientExceptions

Cause:
The linked exception will contain more details concerning the failure to send the message.

Action:
The action will depend on the error that occurred. More information about the specific error that occurred can be found in the linked exception.

BEA-055015
Invalid DeliveryMode

Category:
JMSClientExceptions

Cause:
The DeliveryMode parameter passed to setDeliveryMode was invalid.

Action:
Change the code to pass a valid DeliveryMode value.

BEA-055016
Invalid Priority

Category:
JMSClientExceptions

Cause:
The Priority parameter passed to setPriority was invalid.

Action:
Change the code to pass a valid Priority value.

BEA-055017
Durable connection consumers are not supported.

Category:
JMSClientExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The system does not support durable connection consumers.

Action:
Do not attempt to create a durable connection consumer.

BEA-055018
QueueSessions do not support multicast.

Category:
JMSClientExceptions

Cause:
The MULTICAST_NO_ACKNOWLEDGE flag was set in createQueueSession.

Action:
Do not use MULTICAST_NO_ACKNOWLEDGE when creating a QueueSession.

BEA-055019
Duplicate session

Category:
JMSClientExceptions

Cause:
The cause is unknown.

Action:
Contact My Oracle Support.

BEA-055021
ClientID is null

Category:
JMSClientExceptions

Cause:
ClientID is null in a call to setClientID.

Action:
Do not use null in a call to setClientID.

BEA-055022
Zero length clientID

Category:
JMSClientExceptions

Cause:
The clientID passed to setClientID was zero length.

Action:
The clientID must not be zero length.

BEA-055023
Invalid value for messagesMaximum, {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSClientExceptions

Cause:
The value given for messagesMaximum in createConnectionConsumer is invalid.

Action:
Change the code to pass a valid messagesMaximum value.

BEA-055024
No such method {0}

Category:
JMSClientExceptions

Cause:
The given method identification number does not exist.

Action:
Check for other log messages that give more information about the failure.

BEA-055025
Invalid messagesMaximum value

Category:
JMSClientExceptions

Cause:
The messagesMaximum parameter passed to setMessagesMaximum was invalid.

Action:
Change the code to pass a valid messagesMaximum value.

BEA-055026
Invalid overrunPolicy value, {0}

Category:
JMSClientExceptions

Cause:
The overrun policy passed to setOverrunPolicy is invalid.

Action:
Change the code to pass a valid overrun policy value.

BEA-055027
Invalid redelivery delay, must be >= -1

Category:
JMSClientExceptions

Cause:
The redeliveryDelay parameter passed to setRedeliveryDelay was invalid.

Action:
Change the code to pass a valid redeliveryDelay value.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-055028
Name must not be null.

Category:
JMSClientExceptions

Cause:
The name parameter passed to createDurableSubscriber was null.

Action:
Change the code to pass a valid name to createDurableSubscriber.

BEA-055029
Name must not be an empty string.

Category:
JMSClientExceptions

Cause:
The name parameter passed to createDurableSubscriber had a length of zero.

Action:
Change the code to pass a valid name to createDurableSubscriber.

BEA-055030
This topic does not support durable subscriptions.

Category:
JMSClientExceptions

Cause:
Durable subscribers are not supported on Distributed Topics and no subscribers at all are supported on SAF topics

Action:
Avoid attempting to create a durable subscriber on a distributed topic or do not create a subscriber on an SAF topic.

BEA-055031
This connection does not have a clientID.

Category:
JMSClientExceptions

Cause:
Unsubscribe was called on a connection without a clientID.

Action:
Avoid attempting to unsubscribe a connection with no clientID

BEA-055032
An attempt was made to create a named consumer ({0}) on a connection with no clientID.

Category:
JMSClientExceptions

Cause:
An attempt was made to create a named consumer on a connection with no clientID.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Avoid attempting to create a named consumer on a connection with no clientID.

BEA-055033
Queues do not support multicast.

Category:
JMSClientExceptions

Cause:
Queues do not support multicast.

Action:
Avoid attempting to create a multicast consumer on a queue

BEA-055034
Topic {0} does not support multicast.

Category:
JMSClientExceptions

Cause:
An attempt was made to create a multicast consumer on a topic that does not support multicast.

Action:
Avoid attempting to create a multicast consumer on the given topic.

BEA-055035
Cannot open multicast socket, {0}.

Category:
JMSClientExceptions

Cause:
An attempt was made to open a multicast socket and failed. The reason for the failure may be in the exception

Action:
For more details, check the printed exception on the failure to open the multicast socket.

BEA-055036
Cannot join multicast group ({0}) {1}

Category:
JMSClientExceptions

Cause:
An attempt was made to join a multicast group and failed. The reason for failure may be in the exception.

Action:
For more details, check the printed exception on the failure to join the multicast group.

BEA-055037
Subscription {0} is in use.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSClientExceptions

Cause:
Two subscriptions with the same name are not allowed.

Action:
Avoid attempting to use a subscription name more than once. If necessary, unsubscribe the previous subscription

BEA-055038
An unexpected response ({0}) was received from the server.

Category:
JMSClientExceptions

Cause:
An internal protocol error has occurred.

Action:
Contact My Oracle Support.

BEA-055039
A system error has occurred. The error is {0}.

Category:
JMSClientExceptions

Cause:
The cause of this error may be contained in the printed exception.

Action:
The action will depend on the error that has occurred. Contact My Oracle Support.

BEA-055040
Subscription {0} is in use.

Category:
JMSClientExceptions

Cause:
An attempt was made to remove the named subscription while the subscription was in use.

Action:
Avoid attempting to remove a subscription that is currently in use.

BEA-055041
Cannot leave multicast group ({0}) {1}

Category:
JMSClientExceptions

Cause:
An attempt was made to leave a multicast group and failed. The reason for failure may be in the exception.

Action:
For more details, check the printed exception on the failure to leave the multicast group.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-055042
No such method {0} for class {1}.

Category:
JMSClientExceptions

Cause:
The given method number could not be found in the given class.

Action:
Check for other log messages that give more information about the failure.

BEA-055043
No such method {0} for class {1}.

Category:
JMSClientExceptions

Cause:
The given method number could not be found in the given class.

Action:
Check for other log messages that give more information about the failure.

BEA-055044
Multicast sessions do not support synchronous receives.

Category:
JMSClientExceptions

Cause:
An attempt was made to do a synchronous receive on a multicast consumer.

Action:
Avoid attempting to make a synchronous receive with a multicast consumer.

BEA-055045
An invalid value ({0}) for timeout was specified.

Category:
JMSClientExceptions

Cause:
The timeout given to a receive call is invalid. Timeout values must be positive.

Action:
Change the code so that it does not pass a negative number into a receive call.

BEA-055046
A listener already exists.

Category:
JMSClientExceptions

Cause:
A call to receive cannot be made if the consumer already has a listener.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Avoid attempting to call receive if a listener already exists for the consumer.

BEA-055047
No such method {0}

Category:
JMSClientExceptions

Cause:
The given method identification number does not exist.

Action:
Check for other log messages that give more information about the failure.

BEA-055048
Multicast selectors are not supported in the thin client.

Category:
JMSClientExceptions

Cause:
Multicast selectors are not supported in the thin client.

Action:
If selectors are required, avoid using the JMS thin client. If selectors are not required, avoid using them while using the thin client.

BEA-055049
An error occurred. See {0}.

Category:
JMSClientExceptions

Cause:
See the message body.

Action:
Check for other log messages that give more information about the failure.

BEA-055050
An error occurred {0}

Category:
JMSClientExceptions

Cause:
See the message body.

Action:
Check for other log messages that give more information about the failure.

BEA-055051
An error occurred {0}

Category:
JMSClientExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
See the message body.

Action:
Check for other log messages that give more information about the failure.

BEA-055052
Invalid selector {0}

Category:
JMSClientExceptions

Cause:
An error occurred while parsing a selector. The printed exception should have more detail.

Action:
The course of action will depend on the nature of the error. Use a well-formed selector.

BEA-055053
Error creating connection to the server: {0}.

Category:
JMSClientExceptions

Cause:
The printed exception may have information regarding the cause of this failure.

Action:
The course of action will depend on the error printed out in the exception.

BEA-055054
Error finding dispatcher: {0}.

Category:
JMSClientExceptions

Cause:
See the message body.

Action:
Check for other log messages that give more information about the failure.

BEA-055055
No transaction

Category:
JMSClientExceptions

Cause:
A call to commit was made on a session but there is no current transaction.

Action:
Avoid calling commit on a session that is not currently in a transaction.

BEA-055056
Error committing session

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSClientExceptions

Cause:
An error occurred while committing an XA session.

Action:
Examine the transaction logs to see what occurred to the transaction

BEA-055057
No transaction

Category:
JMSClientExceptions

Cause:
A call to rollback was made on a session but there is no current transaction.

Action:
Do not call rollback on a session that is not currently in a transaction.

BEA-055058
Error committing session

Category:
JMSClientExceptions

Cause:
An error occurred while committing an XA session.

Action:
Examine the transaction logs to see what occurred to the transaction.

BEA-055059
getXAResource can be called only from the server.

Category:
JMSClientExceptions

Cause:
A call to getXAResource was made from a client JVM; getXAResource is not supported in the client.

Action:
Avoid calling getXAResource from a client JVM.

BEA-055060
No transaction.

Category:
JMSClientExceptions

Cause:
A call to commit was made on a session but there is no current transaction.

Action:
Avoid calling commit on a session that is not currently in a transaction.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-055061
No transaction.

Category:
JMSClientExceptions

Cause:
A call to rollback was made on a session but there is no current transaction.

Action:
Avoid calling rollback on a session that is not currently in a transaction.

BEA-055062
This session is transacted.

Category:
JMSClientExceptions

Cause:
A call to recover was made on a transacted session.

Action:
Avoid calling recover on a transacted session. Use rollback instead.

BEA-055063
This session has consumer listeners.

Category:
JMSClientExceptions

Cause:
The session on which setMessageListener was called already has consumer listeners.

Action:
Avoid calling setMessageListener on a session that already has consumer listeners.

BEA-055064
Unsupported topic operation on a queue session

Category:
JMSClientExceptions

Cause:
A call to createTopic was made on a QueueSession.

Action:
Avoid calling createTopic on a QueueSession.

BEA-055065
Unsupported topic operation {0} on a queue session.

Category:
JMSClientExceptions

Cause:
A call to {0} was made on a QueueSession.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Avoid calling {0} on a QueueSession.

BEA-055066
Unsupported topic operation on a queue session

Category:
JMSClientExceptions

Cause:
A call to createTemporaryTopic was made on a QueueSession.

Action:
Avoid calling createTemporaryTopic on a QueueSession.

BEA-055067
Unsupported topic operation on a queue session

Category:
JMSClientExceptions

Cause:
A call to unsubscribe was made on a QueueSession.

Action:
Avoid calling unsubscribe on a QueueSession.

BEA-055068
There is no subscription from which to unsubscribe.

Category:
JMSClientExceptions

Cause:
The user called unsubscribe on a session that does not have a subscription.

Action:
Avoid calling unsubscribe on a session that does not have a subscription.

BEA-055069
Unsupported queue operation on a topic session

Category:
JMSClientExceptions

Cause:
A call to createQueue was made on a TopicSession.

Action:
Avoid calling createQueue on a TopicSession.

BEA-055070
Unsupported queue operation on a topic session

Category:
JMSClientExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A call to createBrowser was made on a TopicSession.

Action:
Avoid calling createBrowser on a TopicSession.

BEA-055071
Unsupported queue operation on a topic session

Category:
JMSClientExceptions

Cause:
A call to createTemporaryQueue was made on a TopicSession.

Action:
Avoid calling createTemporaryQueue on a TopicSession.

BEA-055072
Wrong connection for this temporary destination

Category:
JMSClientExceptions

Cause:
An attempt was made to call createConsumer on an invalid connection from a temporary destination.

Action:
Create consumers using the same connection that was used to create the temporary destination.

BEA-055073
Dropping new message

Category:
JMSClientExceptions

Cause:
A new message is being dropped because too many messages have arrived.

Action:
Either consume messages faster or produce messages slower for this session.

BEA-055074
Dropping old message

Category:
JMSClientExceptions

Cause:
An old message is being dropped because too many messages have arrived.

Action:
Either consume messages faster or produce messages slower for this session.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-055075
It is possible that the client is malfunctioning: a RuntimeException was thrown from its onMessage method.

Category:
JMSClientExceptions

Cause:
The onMessage method of the client threw a RuntimeException.

Action:
Modify the code such that the RuntimeException does not occur from within the body of the user code. This warning is required by section 4.5.2 of the JMS Specification.

BEA-055076
The session is closed.

Category:
JMSClientExceptions

Cause:
An operation was attempted on a closed session.

Action:
Avoid attempting this operation on a closed session.

BEA-055077
Cannot override producer destination.

Category:
JMSClientExceptions

Cause:
A call to send with a non-null destination was made on a producer that is already bound to a destination.

Action:
Avoid calling send with a non-null destination on a producer that is already bound to a destination.

BEA-055078
Cannot override producer destination

Category:
JMSClientExceptions

Cause:
A call to send with a non-null destination was made on a producer that is already bound to a destination.

Action:
Avoid calling send with a non-null destination on a producer that is already bound to a destination.

BEA-055079
Must provide destination to send to

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSClientExceptions

Cause:
There is no destination to send to.

Action:
Use the version of send that has a destination or bind a destination to the producer before calling send.

BEA-055080
Must provide destination to send to

Category:
JMSClientExceptions

Cause:
There is no destination to send to.

Action:
Use the version of send that has a destination or bind a destination to the producer before calling send.

BEA-055081
Unsupported topic operation on a queue session

Category:
JMSClientExceptions

Cause:
A call to createDurableConnectionConsumer was made on a QueueConnection.

Action:
Avoid calling createDurableConnectionConsumer on a QueueConnection.

BEA-055082
The connection is closed.

Category:
JMSClientExceptions

Cause:
The connection has been closed. Only a few operations are valid on a closed connection.

Action:
Avoid calling any illegal operations on a closed queue connection.

BEA-055083
Cannot set clientid to {0}. The client ID is already set to {1}

Category:
JMSClientExceptions

Cause:
The clientID {1} is already set on this connection. The clientID cannot be set to {0}

Action:
Avoid attempting to set a clientID on a connection that already has one.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-055084
A connection consumer works only on the server.

Category:
JMSClientExceptions

Cause:
A connection consumer can be created only in the same JVM in which the server is running.

Action:
Avoid attempting to create a connection consumer on a JVM that is not running the server.

BEA-055085
Destination is null.

Category:
JMSClientExceptions

Cause:
In a call to createConnectionConsumer or createConsumer, the destination parameter was null.

Action:
Avoid using null for the destination in a call to createConnectionConsumer or createConsumer.

BEA-055086
Foreign destination

Category:
JMSClientExceptions

Cause:
Foreign destinations are not supported when creating connectionConsumers.

Action:
Avoid using a foreign destination in a call to createConnectionConsumer.

BEA-055087
The session already has a message listener.

Category:
JMSClientExceptions

Cause:
A consumer may not have an individual message listener if its parent session already has one defined.

Action:
Avoid attempting to set a message listener for a consumer if the session already has a listener defined.

BEA-055088
The consumer is closed.

Category:
JMSClientExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The consumer has been closed. Only a few operations are valid on a closed consumer.

Action:
Avoid calling any illegal operations on a closed consumer.

BEA-055089
Destination is null.

Category:
JMSClientExceptions

Cause:
In a call to send, the destination parameter was null.

Action:
Avoid using null for the destination in a call to send.

BEA-055090
Foreign destination

Category:
JMSClientExceptions

Cause:
Foreign destinations are not supported when sending.

Action:
Avoid using a foreign destination in a call to send.

BEA-055091
Destination {0} must be a queue.

Category:
JMSClientExceptions

Cause:
An attempt was made to publish to a queue.

Action:
Avoid using publish to a queue. Use send instead.

BEA-055092
Destination {0} must be a topic.

Category:
JMSClientExceptions

Cause:
An attempt was made to send to a topic.

Action:
Avoid using send to a topic. Use publish instead.

BEA-055093
Error converting foreign message

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSClientExceptions

Cause:
An I/O exception occurred while converting a foreign message. The cause of the failure may be contained in the linked exception.

Action:
Examine the linked I/O exception.

BEA-055094
The producer is closed.

Category:
JMSClientExceptions

Cause:
The producer has been closed. Only a few operations are valid on a closed producer.

Action:
Avoid calling any illegal operations on a closed producer.

BEA-055095
The browser is closed.

Category:
JMSClientExceptions

Cause:
The browser has been closed. Only a few operations are valid on a closed browser.

Action:
Avoid calling any illegal operations on a closed browser.

BEA-055096
Cannot convert null to a char.

Category:
JMSClientExceptions

Cause:
The null object cannot be converted to a char value.

Action:
Avoid passing null where a char value is expected.

BEA-055097
Cannot convert {0} to a char.

Category:
JMSClientExceptions

Cause:
An object that was not null, not a character, and not a string could not be converted to a char value.

Action:
Ensure that the object passed in is either a character or a string.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-055098
Cannot convert null to an int.

Category:
JMSClientExceptions

Cause:
The null object cannot be converted to an int value.

Action:
Avoid passing null where an int value is expected.

BEA-055099
Cannot convert {0} to an int.

Category:
JMSClientExceptions

Cause:
An object that was not null, not an integer, and not a string could not be converted to an int value.

Action:
Ensure that the object passed in is either an integer or a string.

BEA-055100
Cannot convert null to a long.

Category:
JMSClientExceptions

Cause:
The null object cannot be converted to a long value.

Action:
Avoid passing null where a long value is expected.

BEA-055101
Cannot convert {0} to a long.

Category:
JMSClientExceptions

Cause:
An object that was not null, not a long, and not a string could not be converted to a long value.

Action:
Ensure that the object passed in is either a long or a string.

BEA-055102
Cannot convert null to a float.

Category:
JMSClientExceptions

Cause:
The null object cannot be converted to a float value.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Avoid passing null where a float value is expected.

BEA-055103
Cannot convert {0} to a float.

Category:
JMSClientExceptions

Cause:
An object that was not null, not a float, and not a string could not be converted to a float value.

Action:
Ensure that the object passed in is either a float or a string.

BEA-055104
Cannot convert null to a double.

Category:
JMSClientExceptions

Cause:
The null object cannot be converted to a double value.

Action:
Avoid passing null where a double value is expected.

BEA-055105
Cannot convert {0} to a double.

Category:
JMSClientExceptions

Cause:
An object that was not null, not a double, and not a string could not be converted to a short value.

Action:
Ensure that the object passed in is either a double or a string.

BEA-055106
A byte[] cannot be converted to a string.

Category:
JMSClientExceptions

Cause:
A byte[] cannot be converted to a string.

Action:
Avoid passing a byte array that needs to be converted to a string.

BEA-055107
Cannot convert {0} to a byte[].

Category:
JMSClientExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The given object could not be converted to a byte[].

Action:
Ensure that the object passed in can be converted to a byte array.

BEA-055108
Read past end of message.

Category:
JMSClientExceptions

Cause:
An attempt was made to read past the end of a StreamMessage. A linked EOFException may contain more information.

Action:
Avoid attempting to read past the end of a StreamMessage. See the linked EOFException for more information.

BEA-055109
Error reading from stream.

Category:
JMSClientExceptions

Cause:
There was an error reading the stream from a StreamMessage. A linked IOException may contain more information.

Action:
See the linked IOException for more information.

BEA-055110
Error writing to stream.

Category:
JMSClientExceptions

Cause:
There was an error writing to the stream of a StreamMessage. A linked IOException may contain more information.

Action:
See the linked IOException for more information.

BEA-055111
Cannot convert from {0} to {1}

Category:
JMSClientExceptions

Cause:
A StreamMessage was unable to convert one type to another.

Action:
Ensure that the two types are compatible. Avoid attempting to convert incompatible types.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-055112
Error reading from stream.

Category:
JMSClientExceptions

Cause:
There was an error reading the stream from a StreamMessage. A linked ArrayIndexOutOfBoundsException may contain more information.

Action:
See the linked ArrayIndexOutOfBoundsException for more information.

BEA-055113
Error reading from stream.

Category:
JMSClientExceptions

Cause:
There was an error reading the stream from a StreamMessage. A linked ArrayStoreException may contain more information.

Action:
See the linked ArrayStoreException for more information.

BEA-055114
There was an eeror when deserializing an object. Some typical reasons for failure are: missing application class, application class version mismatch, or Java objects not being supported.

Category:
JMSClientExceptions

Cause:
There was an error deserializing an object. A linked IOException may have more details.

Action:
See the linked IOException for more details.

BEA-055115
Error deserializing an object.

Category:
JMSClientExceptions

Cause:
There was an error deserializing an object. A linked ClassNotFoundException may have more details.

Action:
See the linked ClassNotFoundException for more details.

BEA-055116
Internal error unknown message type {0}

Category:
JMSClientExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This error should never happen.

Action:
Contact My Oracle Support.

BEA-055117
Invalid delivery mode {0}

Category:
JMSClientExceptions

Cause:
The delivery mode passed into setJMSDeliveryMode is invalid

Action:
Change the code so that it calls setJMSDeliveryMode with a valid delivery mode.

BEA-055118
Invalid redelivery limit, must be >= -1.

Category:
JMSClientExceptions

Cause:
The redelivery limit parameter passed to setJMSRedeliveryLimit was invalid.

Action:
Change the code to pass a redelivery limit parameter that is >= -1.

BEA-055119
Invalid priority, {0}

Category:
JMSClientExceptions

Cause:
The priority parameter passed to setJMSPriority was invalid.

Action:
Change the code to pass a valid priority value.

BEA-055121
Invalid property name, "{0}"

Category:
JMSClientExceptions

Cause:
The property name passed to setObjectProperty was invalid.

Action:
Change the code to pass a valid property name.

BEA-055122
Property write attempted in READ mode.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSClientExceptions

Cause:
An attempt was made to write a property but the message is read-only.

Action:
Avoid attempting to write a property to a message in read-only mode.

BEA-055123
Invalid property value, {0}

Category:
JMSClientExceptions

Cause:
The property value passed to setObjectProperty was invalid.

Action:
Change the code to pass a valid property value.

BEA-055125
Unknown underlying stream type, cannot convert 6.0 class.

Category:
JMSClientExceptions

Cause:
While attempting to read a message created by an older version of WebLogic Server, a failure occurred.

Action:
It may not be possible to read the older version of the message. Contact My Oracle Support.

BEA-055126
Stream is corrupted. Possible older version

Category:
JMSClientExceptions

Cause:
While attempting to read a message created by an older version of WebLogic Server, a failure occurred.

Action:
It may not be possible to read the older version of the message. Contact My Oracle Support.

BEA-055127
Unsupported version

Category:
JMSClientExceptions

Cause:
The version of the message being read is unsupported.

Action:
Contact My Oracle Support.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-055128
Read attempted in WRITE mode.

Category:
JMSClientExceptions

Cause:
An attempt was made to read a message in WRITE mode.

Action:
Avoid attempting to read a message in WRITE mode.

BEA-055129
Write attempted in READ mode.

Category:
JMSClientExceptions

Cause:
An attempt was made to write a message that is read-only.

Action:
Avoid attempting to write to a message in read-only mode.

BEA-055130
Invalid data type: {0}

Category:
JMSClientExceptions

Cause:
The class name given is not a valid data type. The type for setObject must be number, string, boolean, byte, character, or null.

Action:
Pass one of the acceptable data types to setObject in a MapMessage.

BEA-055131
Illegal name: {0}

Category:
JMSClientExceptions

Cause:
The given name is not legal. It is either null or of zero length.

Action:
Pass a non-null or non-zero-length string as the name of a MapMessage element.

BEA-055132
Could not copy message.

Category:
JMSClientExceptions

Cause:
The system could not copy a MapMessage. The linked IOException should contain more information about the nature of the error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Examine the linked exception to discover what caused the failure.

BEA-055133
Could not deserialize message.

Category:
JMSClientExceptions

Cause:
The system could not deserialize a MapMessage. The linked IOException should contain more information about the nature of the error.

Action:
Examine the linked exception to discover what caused the failure.

BEA-055134
Unsupported class version {0}. Expected a value between {1} and {2} inclusive.

Category:
JMSClientExceptions

Cause:
While attempting to interoperate between different releases or service packs, an error occurred while attempting to serialize or deserialize an object. The version number of the object was not in the expected range. If {0} is larger than {1} then it is possible an attempt was made to access a newer JMS version than the current version. Otherwise a possible attempt has been made to interoperate with an unsupported older version of JMS.

Action:
Ensure that the versions of Oracle products that are interoperating are supported. If the versions should be supported, contact My Oracle Support.

BEA-055135
Could not write object, expected simple type, but got class {0}

Category:
JMSClientExceptions

Cause:
The given object class could not be written because it is not a simple type.

Action:
Contact My Oracle Support.

BEA-055136
Could not read object, unrecognized class code {0}.

Category:
JMSClientExceptions

Cause:
An unknown class code was received. The object cannot be read.

Action:
Contact My Oracle Support.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-055137
JMSProducerSendResponse versions {0}, {1} not compatible with peer: {2}

Category:
JMSClientExceptions

Cause:
An interoperability error occurred.

Action:
Only use versions of Oracle products that can interoperate with each other. If the versions being used should interoperate, contact My Oracle Support.

BEA-055138
Peer not compatible with DistributedDestinationImpl version {0}. Peer Major Version is less than 6.

Category:
JMSClientExceptions

Cause:
An interoperability error occurred.

Action:
Only use versions of Oracle products that can interoperate with each other. If the versions being used should interoperate, contact My Oracle Support.

BEA-055139
Invalid Temporary Destination

Category:
JMSClientExceptions

Cause:
An attempt was made to delete an invalid temporary destination.

Action:
Avoid attempting to delete invalid temporary destinations.

BEA-055140
Internal error or marshalling error, unknown destination type {0}

Category:
JMSClientExceptions

Cause:
An unknown type was encountered when marshalling a destination.

Action:
Contact My Oracle Support.

BEA-055141
Destination is null.

Category:
JMSClientExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
While checking a destination type, the incoming destination was null.

Action:
Avoid attempting to discover the type of a null destination.

BEA-055142
Foreign destination, {0}

Category:
JMSClientExceptions

Cause:
While checking a destination type, the incoming destination was foreign.

Action:
Avoid attempting to discover the type of a foreign destination.

BEA-055143
Destination must be a queue, {0}

Category:
JMSClientExceptions

Cause:
The given destination must be a queue, but it is not a queue.

Action:
Use the proper type of destination when checking types.

BEA-055144
Destination must be a topic, {0}

Category:
JMSClientExceptions

Cause:
The given destination must be a topic, but it is not a topic.

Action:
Use the proper type of destination when checking types.

BEA-055145
Unknown stream version: {0}

Category:
JMSClientExceptions

Cause:
The given version number is invalid for a buffered stream.

Action:
Contact My Oracle Support.

BEA-055146
The stream cannot handle raw objects.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSClientExceptions

Cause:
The stream is probably from an unintended source, such as a Web browser.

Action:
Only connect to the Oracle product TCP port with a proper client. If the client is a proper client, contact My Oracle Support.

BEA-055147
Not implemented

Category:
JMSClientExceptions

Cause:
readLine was called, but it has not been implemented.

Action:
Contact My Oracle Support.

BEA-055148
The stream cannot handle raw objects.

Category:
JMSClientExceptions

Cause:
A raw object could not be written to the buffered stream.

Action:
Contact My Oracle Support.

BEA-055149
Attempt to read past end of message ({0})

Category:
JMSClientExceptions

Cause:
The end of the BytesMessage was reached, but an attempt was made to read past it. {0} indicates where the attempt was made and will only be significant to My Oracle Support.

Action:
Avoid attempting to read past the end of the BytesMessage.

BEA-055150
Error reading from stream ({0}).

Category:
JMSClientExceptions

Cause:
The linked IOException will have more detail on the cause of the failure.

Action:
Examine the linked exception to discover what caused the problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-055151
Length ({0}) is negative.

Category:
JMSClientExceptions

Cause:
In a call to readBytes, the length parameter is negative.

Action:
Fix the code to ensure a negative length is not passed to readBytes.

BEA-055152
length ({0}) is greater than the length of the array ({1}).

Category:
JMSClientExceptions

Cause:
In a call to readBytes, the length parameter is larger than the size of the bytes array to fill.

Action:
Fix the code to ensure the length passed to readBytes is less than or equal to the length of the output array.

BEA-055153
Error writing to stream ({0}).

Category:
JMSClientExceptions

Cause:
The linked IOException will have more detail on the cause of the failure.

Action:
Examine the linked exception to discover what caused the problem.

BEA-055154
Invalid object type: {0}

Category:
JMSClientExceptions

Cause:
The object passed to writeObject is not valid.

Action:
Only send valid object types to writeObject. Example valid types include boolean, byte, short, and integer.

BEA-055155
Cannot forward message

Category:
JMSClientExceptions

Cause:
Modified received messages are not supported when using forward methods.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Avoid modifying a received message in a call to forward.

BEA-055156
Peer neither compatible with {0} or {1} or {2} or {3}. PeerInfo is {4}.

Category:
JMSClientExceptions

Cause:
A version mismatch occurred in a message.

Action:
Check for other log messages that give more information about the failure.

BEA-055157
Invalid compression threshold

Category:
JMSClientExceptions

Cause:
The compression threshold was invalid.

Action:
Change the code to pass a valid compression threshold.

BEA-055158
WebLogic Server JMS failed to decompress the message body.

Category:
JMSClientExceptions

Cause:
The linked IOException will have more detail on the cause of the failure.

Action:
Examine the linked exception to discover what caused the problem.

BEA-055159
Message consumer received a compressed message with unknown compression tag - {0}

Category:
JMSClientExceptions

Cause:
Contact My Oracle Support.

Action:
Contact My Oracle Support.

BEA-055160
WebLogic Server JMS failed to deserialize the text message.

Category:
JMSClientExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Contact My Oracle Support.

Action:
Contact My Oracle Support.

BEA-055161
Cannot forward foreign messages.

Category:
JMSClientExceptions

Cause:
Foreign messages are not supported when using forward methods.

Action:
Avoid forwarding a foreign message.

BEA-055162
WebLogic Server JMS failed to serialize the text message for interoperability.

Category:
JMSClientExceptions

Cause:
Contact My Oracle Support.

Action:
Contact My Oracle Support.

BEA-055163
WebLogic Server JMS failed to serialize the XML message for interoperability.

Category:
JMSClientExceptions

Cause:
Contact My Oracle Support.

Action:
Contact My Oracle Support.

BEA-055164
Cannot forward a message to a WebLogic Server instance prior than version 9.0.

Category:
JMSClientExceptions

Cause:
Cannot forward a message to a WebLogic Server instance prior than 9.0.

Action:
Avoid forwarding a message to a WebLogic Server instance prior than 9.0.

BEA-055165
The following exception has occurred: {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSClientExceptions

Cause:
An error condition has occurred.

Action:
Look for the associated exception in the log or the program to see what the results are. In general, this stack trace will help in debugging an existing problem.

BEA-055167
Single session cannot support more than one synchronous message-prefetching consumer.

Category:
JMSClientExceptions

Cause:
There is another opened synchronous message-prefetching consumer.

Action:
Close the other synchronous message-prefetching consumer.

BEA-055168
Synchronous message-prefetching consumer cannot support user transaction.

Category:
JMSClientExceptions

Cause:
Synchronous message-prefetching consumer cannot support user transaction.

Action:
Disable the user transaction or the synchronous message-prefetching consumer in the jms connection factory setting.

BEA-055169
Network connection to server was lost.

Category:
JMSClientExceptions

Cause:
The network connection to the server was lost.

Action:
This is usually a recoverable error when the JMS client is using the auto-reconnect/failover feature. This error is exposed to the user (JMS client code developer) when the auto-reconnect feature cannot make a decision without user input on a particular course of action after failover. The user can consciously code to continue to use relevant refreshed JMS objects with a potential lowered quality of service such as duplicate/lost/out-of-order messages, or decide to close the relevant JMS object.

BEA-055170
Cannot convert string property from its internal format.

Category:
JMSClientExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The string property cannot be converted from its internal format.

Action:
Contact My Oracle Support.

BEA-055171
Failed to unsubscribe subscription "{0}", client ID "{1}". This connection has a client ID policy of UNRESTRICTED and cannot unsubscribe a durable subscription using the standard javax.jms.Session.unsubscribe() API.

Category:
JMSClientExceptions

Cause:
An attempt was made to unsubscribe a durable subscription using the standard javax.jms.Session.unsubscribe(String name) method from a connection that has a Client ID policy of UNRESTRICTED.

Action:
Use weblogic.jms.extensions.WLSession.unsubscribe(Topic topic, String name) API to unsubscribe a durable subscription from a connection that has a Client ID policy of UNRESTRICTED.

BEA-055172
Failed to unsubscribe subscription "{0}", client ID "{1}". This connection has a Client ID policy of UNRESTRICTED and cannot unsubscribe a durable subscription with a null topic or distributed topic instance.

Category:
JMSClientExceptions

Cause:
An attempt was made to unsubscribe a durable subscription with a null Topic object or a distributed topic object from a connection that has a Client ID policy of UNRESTRICTED.

Action:
Provide a standalone topic object or a member of a distributed topic when calling weblogic.jms.extensions.WLSession.unsubscribe(String topic, String name).

BEA-055173
Read past end of message ({0})

Category:
JMSClientExceptions

Cause:
An attempt was made to read past the end of a StreamMessage. A linked EOFException may contain more information

Action:
Do not attempt to read past the end of a StreamMessage. See the linked EOFException for more information

BEA-055174
Error reading from stream ({0})

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSClientExceptions

Cause:
There was an error reading the stream from a StreamMessage. A linked IOException may contain more information

Action:
See the linked IOException for more information

BEA-055175
Error writing to stream ({0})

Category:
JMSClientExceptions

Cause:
There was an error writing to the stream of a StreamMessage. A linked IOException may contain more information

Action:
See the linked IOException for more information

BEA-055176
Active transaction detected during send, publish, or receive while using a non-XATransaction Resource Adapter.

Category:
JMSClientExceptions

Cause:
An active transaction was detected during send, publish, or receive while using a non-XATransaction Resource Adapter.

Action:
Use the XATransaction Resource Adapter instead.

BEA-055177
An invalid value ({0}) for session mode was specified.

Category:
JMSClientExceptions

Cause:
An invalid value of the sessionMode parameter was specified when creating a JMSContext. The only valid values are JMSContext.AUTO_ACKNOWLEDGE, JMSContext.CLIENT_ACKNOWLEDGE, JMSContext.DUPS_OK_ACKNOWLEDGE and JMSContext.SESSION_TRANSACTED

Action:
Change the code so that it passes in a valid session mode. See the JMS API for more information.

BEA-055178
This method may not be called in a Java EE web or EJB container

Category:
JMSClientExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The code calls a JMS method which the JMS, EJB or Java EE specification states must not be called in a Java EE web or EJB container. See section EE.6.7 "Java Message Service (JMS) 2.0 Requirements" in the Java EE 7 platform specification" and section 16.3.5 "JMS API Requirements" in the EJB 3.2 specification.

Action:
Change the code so that it uses methods that are valid a Java EE web or EJB container.

BEA-055179
JMSContext is closed

Category:
JMSClientExceptions

Cause:
The code called the close methods on a JMSContext which had been previously closed.

Action:
Change the code so that it uses a JMSContext that has not been closed.

BEA-055180
Cannot set the setClientID method on a JMSContext because the JMSContext is in an invalid state

Category:
JMSClientExceptions

Cause:
The setClientID method was called on a JMSContext when the JMSContext is in an invalid state. It only valid to call the setClientID method on a JMSContext immediately after the JMSContext has been created and before any other action on the JMSContext is taken. It is also only valid to call the setClientID method on a JMSContext if the client ID has not already been administratively configured.

Action:
Change the code to endure that the setClientID method on a JMSContext is only called immediately after the JMSContext has been created and before any other action on the JMSContext is taken, and only if the client ID has not already been administratively configured.

BEA-055181
Invalid client ID. Client ID may not be null.

Category:
JMSClientExceptions

Cause:
The setClientID method was called on a JMSContext but the specified client ID was null.

Action:
Change the code so that the specified client ID is neither null nor an empty string.

BEA-055182
Invalid client ID. Client ID may not be an empty string.

Category:
JMSClientExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The setClientID method was called on a JMSContext but the specified client ID was an empty string.

Action:
Change the code so that the specified client ID is neither null nor an empty string.

BEA-055183
JMSConsumer is closed

Category:
JMSClientExceptions

Cause:
The code called the close method on a JMSConsumer which had been previously closed.

Action:
Change the code so that it uses a JMSConsumer that has not been closed.

BEA-055184
Message is null

Category:
JMSClientExceptions

Cause:
The code called the send method on a JMSProducer with a null value for the message parameter.

Action:
Change the code so that the message parameter passed to the JMSProducer send method is not null

BEA-055185
An invalid value ({0}) for delivery mode was specified

Category:
JMSClientExceptions

Cause:
The setDeliveryMode method on JMSProducer was called with an invalid value of the deliveryMode parameter. The only valid values are DeliveryMode.NON_PERSISTENT, DeliveryMode.PERSISTENT.

Action:
Change the code so that it passes in a valid delivery mode. See the JMS API for more information.

BEA-055186
An invalid value ({0}) for message priority was specified

Category:
JMSClientExceptions

Cause:
The setPriority method on JMSProducer was called with an invalid value of the setPriority parameter. Priority must be a valie between 0 and 9.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Change the code so that it passes in a valid priority value. See the JMS API for more information.

BEA-055187
Message property name must not be null.

Category:
JMSClientExceptions

Cause:
The message property name parameter was null. This is not valid.

Action:
Change the code to pass a message property name which is not null.

BEA-055188
Message property name must not be an empty string

Category:
JMSClientExceptions

Cause:
The message property name parameter was an empty string. This is not valid.

Action:
Change the code to pass a message property name which is not an empty string.

BEA-055189
Message property value must not be of type ({0})

Category:
JMSClientExceptions

Cause:
The message property name was of an invalid type. A message property value must be of type Boolean, Byte, Short, Integer, Long, Float or Double.

Action:
Change the code to pass a message property value of a valid type. Valid types are Boolean, Byte, Short, Integer, Long, Float and Double.

BEA-055190
Message property name ({0}) must not be a reserved word

Category:
JMSClientExceptions

Cause:
The message property name is a reserved word. This is not valid. A message property name cannot be NOT, AND, OR, BETWEEN, LIKE, IN, IS, or ESCAPE.

Action:
Change the code to pass a message property name which is not a reserved word.

BEA-055191
Message property name ({0}) contains an invalid character.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSClientExceptions

Cause:
Message property name contains an invalid character. The first character must be a letter and subsequent characters must be either a letter or a digit. A letter is any character for which the method Character.isJavaLetter returns true. This includes '_' and '$'. A letter or digit is any character for which the method Character.isJavaLetterOrDigit returns true.

Action:
Change the code to pass a message property name which contains valid characters.

BEA-055192
Message property name ({0}) contains an invalid first character.

Category:
JMSClientExceptions

Cause:
Message property name contains an invalid start character. The first character must be a letter and subsequent characters must be either a letter or a digit. A letter is any character for which the method Character.isJavaLetter returns true. This includes '_' and '$'. A letter or digit is any character for which the method Character.isJavaLetterOrDigit returns true

Action:
Change the code to pass a message property name which contains valid characters.

BEA-055193
Message body is a {0} and cannot be assigned to the specified class {1}

Category:
JMSClientExceptions

Cause:
Message body is a {0} and cannot be assigned to the specified class {1}. The application called the getBody method on a Message object. This method returns the message body as an object of the specified type. The message body must be capable of being assigned to the specified type. This means that the specified class or interface must be either the same as, or a superclass or superinterface of, the class of the message body.

Action:
Specify a class which is suitable for the actual body type

BEA-055194
Message body is a StreamMessage and the getBody method cannot be used

Category:
JMSClientExceptions

Cause:
The application called the getBody method on a Message object. Message body is a StreamMessage and the getBody method cannot be used with this type of message.

Action:
Use the methods specific to StreamMessage to obtain the message body. Do not use the getBody method.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-055195
Shared durable connection consumers are not supported.

Category:
JMSClientExceptions

Cause:
The system does not support shared durable connection consumers.

Action:
Do not attempt to create a shared durable connection consumer.

BEA-055196
Shared connection consumers are not supported.

Category:
JMSClientExceptions

Cause:
The system does not support shared connection consumers.

Action:
Do not attempt to create a shared connection consumer.

BEA-055197
Invalid deliveryDelay , must be >= 0.

Category:
JMSClientExceptions

Cause:
The deliveryDelay parameter passed to setDeliveryDelay was invalid.

Action:
Change the code to pass a deliveryDelay parameter that is >= 0 .

BEA-055198
The JMS specification does not permit a message listener to call {0} on its own {1}.

Category:
JMSClientExceptions

Cause:
A message listener attempted to call {0} on its own {1}. This is not permitted by the JMS specification.

Action:
To conform to the JMS specification, change the message listener code so that it does not call {0} on its own {1}. Alternatively enable the connection factory setting AllowCloseInOnMessage to specify that this non-JMS behavior is permitted.

BEA-055199
An injected JMSContext cannot be used when there is neither a transaction nor a valid request scope.

Category:
JMSClientExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The application attempted to use an injected JMSContext when there was neither a Java EE transaction nor a CDI request scope.

Action:
Change the code to ensure that methods on the injected JMSContext are only called when there is a Java EE transaction or a valid CDI request scope. Alternatively, use an application-managed JMSContext (one created explicitly from a Connectionfactory) instead of an injected JMSContext.

BEA-055200
Asynchronous message forward is not currently supported.

Category:
JMSClientExceptions

Cause:
The application called the JMSProducer method setAsync before calling the JMSProducer method forward on the same JMSProducer object.

Action:
Remove the call to the JMSProducer method setAsync and try again. This will perform a synchronmous forward instead.

BEA-055201
An invalid value ({0}) for message priority was specified

Category:
JMSClientExceptions

Cause:
The send method on MessageProducer was called with an invalid priority value. Priority must be a value between 0 and 9.

Action:
Pass a valid priority value. See the JMS API for more information.

BEA-055202
An invalid value ({0}) for delivery mode was specified.

Category:
JMSClientExceptions

Cause:
The send method on MessageProducer was called with invalid delivery mode value. The only valid values are DeliveryMode.NON_PERSISTENT, DeliveryMode.PERSISTENT.

Action:
Pass a valid delivery mode value. See the JMS API for more information.

BEA-055203
The same Message object ({0}) was previously sent asynchronously but is not complete yet.

Category:
JMSClientExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A send method is called for a Message object that was asynchronously sent but is not complete yet.

Action:
Create a new Message object to send or wait for the asynchronous send to complete.

BEA-055204
JMS asynchronous send is not supported in an XA transaction.

Category:
JMSClientExceptions

Cause:
A JMS asynchronous send was used in an XA transaction.

Action:
Do not attempt to use asynchronous send in an XA transaction.

BEA-055205
There is no message body.

Category:
JMSClientExceptions

Cause:
There is no message body in the message.

Action:
Do not attempt to get the message body from a message that has no message body.

BEA-055206
CompletionListener is null.

Category:
JMSClientExceptions

Cause:
A null CompletionListener was passed to the asynchronous send method.

Action:
Do not pass a null CompletionListener to the JMS asynchronous send method.

BEA-055207
The Security Policy setting for JMS Connection Factory ({0}) is ({1}) which is not compatible with a Thread Based InitialContext.

Category:
JMSClientExceptions

Cause:
The Security Policy setting for JMS Connection Factory ({0}) is ({1}) which is not compatible with a Thread Based InitialContext.

Action:
Use an Object Based InitialContext to lookup the connection factory instead of a Thread Based InitialContext, or set a different Security Policy.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-055208
Object based InitialContext does not support to lookup type "{0}".

Category:
JMSClientExceptions

Cause:
Object based InitialContext only support to lookup three types: jndi context, WLJMS CF and WLJMS destinaton.

Action:
Use a WL standard InitialContext to lookup other types.

BEA-055209
Foreign Server is not supported by Object Based InitialContext.

Category:
JMSClientExceptions

Cause:
Foreign Server is not supported by Object Based InitialContext. Looking up the local JNDI name of the Foreign Server is not supported by Object Based InitialContext.

Action:
Do not use Object Based InitialContext to look up the local JNDI name of the Foreign Server.

BEA-055210
Object based InitialContext does not support the "{0}" method.

Category:
JMSClientExceptions

Cause:
Object based InitialContext does not support the "{0}" method.

Action:
Do not call this method with Object Based InitialContext or use a WL standard InitialContext instead.

BEA-055211
Object based InitialContext only support the "{0}" method on server side and install client.

Category:
JMSClientExceptions

Cause:
Object based InitialContext only support the "{0}" method on server side and install client, does not support it on other client.

Action:
Call this method on server side or install client, do not call it on other client.

BEA-080001
Error in dispatcher {0}

Category:
RMI

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A runtime error occurred while dispatching a request to the server.

Action:
If the error is not application related, contact My Oracle Support with the stack trace for further analysis.

BEA-080002
Unexport failed for: {0}.

Category:
RMI

Cause:
The remote object was unexported twice.

Action:
No action is required.

BEA-080003
A RuntimeException was generated by the RMI server: {0} {1}.

Category:
RMI

Cause:
A runtime exception occurred while dispatching the request to the server.

Action:
No action is required.

BEA-080004
An error was generated by the RMI server: {0} {1}.

Category:
RMI

Cause:
A runtime error occurred while dispatching a response to the client.

Action:
The associated stack trace contains information about the error. Check the server logs for more details.

BEA-080005
An exception was generated by the RMI server: {0} {1}.

Category:
RMI

Cause:
The error response could not be sent to the client. The underlying socket caused an IOException while dispatching the error response.

Action:
The associated stack trace contains information about the error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-080006
Failed to associate the transaction context with the response while marshalling an exception to the client: {0}.

Category:
RMI

Cause:
An IOException occurred while associating a transaction context with the response. This happened when marshalling an exception in the response. Most likely, the socket has been torn down or an error occurred in the stream.

Action:
Check the server logs for more details.

BEA-080007
RMI runtime is disabled, since it could not initialize the DGC {0}.

Category:
RMI

Cause:
RMI runtime could not be initialized.

Action:
Restart the server. If the problem continues, contact My Oracle Support with the stack trace information.

BEA-080008
Failed to send error reply to client {0}.

Category:
RMI

Cause:
An exception occurred while dispatching an error response to the client.

Action:
No action is required.

BEA-080009
An error was generated by the RMI server: {0} invoking: {1}.

Category:
RMI

Cause:
A java.lang.Error occurred while invoking method {1} on {0}. A ServerError occurred due to the server side RMI method call.

Action:
Check the nested exception in the ServerError for more details.

BEA-080011
Empty workingSet found while assembling the heartbeat for {0}.

Category:
RMI

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An empty set of references for {0} was found while assembling the deterministic garbage collector (DGC) heartbeats for all remote virtual machines that are referenced from this virtual machine.

Action:
If a java.rmi.NoSuchObjectException occurs, contact My Oracle Support.

BEA-080012
No workingSet found for {0} residing in {1}.

Category:
RMI

Cause:
An empty working set for {0} was found while periodically scanning the list of finalized references and decrementing the count for any reference found. This is related to the deterministic garbage collector (DGC).

Action:
If a java.rmi.NoSuchObjectException occurs, contact My Oracle Support for further analysis of the error.

BEA-080013
Reference for {0} not found in working set.

Category:
RMI

Cause:
Did not find {0} in the working set while attempting to decrement the reference count. This is related to the deterministic garbage collector (DGC).

Action:
If a java.rmi.NoSuchObjectException occurs, contact My Oracle Support for further analysis of the error.

BEA-080015
Could not mark references {0}.

Category:
RMI

Cause:
An exception occurred during the execution of the DGC trigger.

Action:
If a java.rmi.NoSuchObjectException occurs, contact My Oracle Support for further analysis of the error.

BEA-080016
No connection available to: {0}. References to objects hosted by it are in jeopardy.

Category:
RMI

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The client lost connection to the server {0}. If the server does not receive lease renewal messages on the server, RMI runtime removes the remote objects whose leases are not renewed.

Action:
If the server {0} has been shut down or crashed, no action is required. Otherwise, ensure that the network is healthy.

BEA-080017
Failed to renew lease for: {0} objects hosted by: {1}.

Category:
RMI

Cause:
This message is logged only in debug mode.

Action:
No action is required.

BEA-080019
Marked in: {0} milliseconds

Category:
RMI

Cause:
This message is logged only if the LogDGCStatistics debug flag is enabled.

Action:
No action is required.

BEA-080020
An exception occurred in the DGC server sweep {0}.

Category:
RMI

Cause:
A runtime error occurred while the DGC server (host of remote objects) requested a sweep to periodically clean up server references.

Action:
Provide the log files to My Oracle Support for further analysis of the problem.

BEA-080021
Sweep freed: {0} objects in: {1} milliseconds. {2} exported objects remain.

Category:
RMI

Cause:
This message is logged only if the LogDGCStatistics debug flag is enabled.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-080022
Tried to enroll lost reference: {0}.

Category:
RMI

Cause:
This message is logged when an attempt is made to increment the reference count of a lost reference. The reference may have already been released.

Action:
If a java.rmi.NoSuchObjectException occurs, contact My Oracle Support for further analysis of the error.

BEA-080023
Tried to unenroll a lost reference: {0}.

Category:
RMI

Cause:
This message is logged only if the DebugDGCEnrollment flag is enabled for debugging.

Action:
No action is required.

BEA-080024
Tried to renew the lease on the lost reference: {0}.

Category:
RMI

Cause:
This message is logged only if the DebugDGCEnrollment flag is enabled for debugging.

Action:
No action is required.

BEA-080026
Exporting remote object {0} with ID {1}.

Category:
RMI

Cause:
When a remote object is exported into RMI, RMI runtime assigns an object ID to it, thus setting up the environment for remote invocation.

Action:
This is an informational message. No action is required.

BEA-080027
A heartbeat was not sent due to probable client disconnect.

Category:
RMI

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A thin-client was disconnected from the server.

Action:
This is an informational message. No action is required.

BEA-080028
Failover attempt failed: {0} after {1} retries

Category:
RMI

Cause:
The cause was {0}

Action:
Please check the trace message.

BEA-090058
A Security Provider Exception occurred in a non-default AuditProvider {0}

Category:
Security

Cause:
A Security exception occurred during an audit write event.

Action:
Check errors or access permissions for the Auditing provider.

BEA-090059
The "{0}" AccessDecision class encountered an invalid Principal while attempting to check access to a WebLogic resource. Error: {1}

Category:
Security

Cause:
It is possible for this error to occur if a user has been deleted from a security realm while that user is still active.

Action:
If the user was mistakenly removed from the security realm, define them in the security realm again. Otherwise, no action is needed.

BEA-090060
The AccessDecision class "{0}" returned an error: {1}.

Category:
Security

Cause:
There are multiple possible causes.

Action:
Carefully read the returned error to determine if any action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090063
The DeployableRoleMapper "{0}" returned an error: {1}.

Category:
Security

Cause:
There are multiple possible causes.

Action:
Carefully read the returned error to determine if any action is required.

BEA-090064
The DeployableAuthorizer "{0}" returned an error: {1}.

Category:
Security

Cause:
There are multiple possible causes.

Action:
Carefully read the returned error to determine if any action is required.

BEA-090074
Initializing {0} provider using LDIF template file {1}.

Category:
Security

Cause:
Either this is the first time this security provider has been initialized or the marker file indicating initialization (with a .initialized extension) has been removed from the system.

Action:
Look for a matching LoadedLDIFFForProvider message which indicates the successful loading the LDIF information for this security provider.

BEA-090075
The {0} provider has had its LDIF information loaded from: {1}

Category:
Security

Cause:
The provider was requested to import data.

Action:
No action is required.

BEA-090076
A failure occurred attempting to load LDIF for provider {0} from file {1}.

Category:
Security

Cause:
An exception occurred attempting to open a temporary file as part of the load process.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Examine the exception and correct the cause.

BEA-090118
LDIF template file {1} was empty. The WebLogic provider {0} has been bootstrapped but has not been initialized with any LDIF data.

Category:
Security

Cause:
A WebLogic provider LDIF template file may have been overwritten with an empty file.

Action:
If the server boots successfully, no action is needed. If the server does not boot successfully then an attempt should be made to recover non-empty LDIFT template file from the WebLogic Server kit.

BEA-090119
LDIF template file {1} not found. The WebLogic provider {0} has been bootstrapped but has not been initialized with any LDIF data.

Category:
Security

Cause:
A WebLogic provider LDIF template file may have been deleted by mistake.

Action:
If the server boots successfully, no action is needed. If the server does not boot successfully, an attempt should be made to recover the LDIFT template file from the WebLogic Server kit.

BEA-090126
Unable to read a valid version number for property {0} from file {1}. Received exception {2}.

Category:
Security

Cause:
The value for the {0} property may have been corrupted.

Action:
Shutdown the server. Attempt to determine what the proper value for the {0} property should be and edit the file so that it reflects that value. If it is not possible to determine the proper value for the {0} property, edit the file and reset the {0} value to 0. Reboot WebLogic Server.

BEA-090127
Encountered a {2} exception while attempting to read from file {1} for WebLogic {0} provider.

Category:
Security

Cause:
The {1} file may have been deleted while it was being accessed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Shutdown the server. Attempt to restore the file from a backup. If no backup is available,reboot the server. Note that the default WebLogic provider might not be correctly initialized.

BEA-090129
Updating {0} provider to version {2} using LDIF update template file {1}.

Category:
Security

Cause:
This security provider has not yet been updated or the marker file indicating initialization (with a .initialized extension) has been removed.

Action:
Look for a matching LoadedLDIFFForProvider message in the log file which indicates success loading the LDIF information for this security provider.

BEA-090130
Failure {3} while attempting to update the LDIF to version {2} in file {1} for WebLogic {0} provider.

Category:
Security

Cause:
The directory into which the {1} is to be written may not be writable, the file may not be writable, or the file may not be a valid properties file.

Action:
Ensure both the directory and file are writable. If they are writable, restore the file from backup or open the file and see if the properties within it are corrupt and correct accordingly. The version for provider {0} needs to be set to {2} in the file.

BEA-090131
Could not create a {0} JDK keystore instance. Exception: {1}

Category:
Security

Cause:
{0} is not a valid JDK keystore type or the JDK keystore type is not properly configured.

Action:
Verify that the correct keystore type was specified and that the keystore type is correctly specified in the java.security file. Verify that the code for the JDK keystore is in the JDK extensions directory. Reboot the server. after correcting the problem.

BEA-090132
Could not open the keystore file {0} for read access. Exception: {1}

Category:
Security

Cause:
The file does not exist, the file is a directory rather than a regular file or the file cannot be opened for reading.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify that the correct path to the keystore file was specified and that the keystore file exists. Reboot the server after correcting the problem.

BEA-090133
Could not load a {1} keystore from the file {0}. Exception: {2}

Category:
Security

Cause:
There is an I/O or format problem with the keystore data.

Action:
Verify that the path to the keystore, the keystore type, and the password for the keystore were specified correctly. Note that some keystore types (for example, JKS) do not require a password for read-only access. Read the exception text for more help on diagnosing the problem. Reboot the server after correcting the problem.

BEA-090134
Could not load a {1} keystore from the file {0}. Exception: {2}

Category:
Security

Cause:
Some certificates in the keystore could not be loaded.

Action:
Verify that the crypto providers required by the certificates in the keystore are properly configured in the java.security file and that their code is in the JDK extensions directory. Look at the exception text for more information on diagnosing the problem. Reboot the server after correcting the problem.

BEA-090135
Could not load a {1} keystore from the file {0}. Exception: {2}

Category:
Security

Cause:
The algorithm used to check the integrity of the keystore cannot be found.

Action:
Verify that the algorithm used to check the keystore integrity is properly configured in the java.security file and that the code is in the JDK extensions directory. Read the exception text for more information on diagnosing the problem. Reboot the server after correcting the problem.

BEA-090161
A failure occurred attempting to save LDIF for security provider {0} using file {1}.

Category:
Security

Cause:
An exception occurred attempting to open a temporary file as part of the export process.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Examine the exception and correct the cause.

BEA-090162
The {0} provider has had its LDIF information saved in: {1}

Category:
Security

Cause:
The security provider was requested to export data.

Action:
No action is required.

BEA-090163
The {0} provider did not import a duplicate entry: {1}

Category:
Security

Cause:
The security provider already contained the imported data.

Action:
Delete the existing data and import data into the security provider again.

BEA-090234
The Auditing Provider is not initialized.

Category:
Security

Cause:
The WebLogic Auditing provider was not initialized before the writeEvent method was called.

Action:
Ensure that the WebLogic Auditing provider has been initialized before events are written.

BEA-090235
Invalid Audit Severity

Category:
Security

Cause:
The Audit severity value is invalid or not supported.

Action:
Verify the Audit severity value passed to the setAuditSeverity method.

BEA-090236
DefaultAuthenticatorImpl constructor failed: {0}

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An exception was thrown in the constructor of the WebLogic Authentication provider.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090237
Validation of old password failed

Category:
Security

Cause:
The old password was not valid.

Action:
Pass in the correct old password to the changeUserPassword method.

BEA-090239
Identity Assertion type cannot be null

Category:
Security

Cause:
The token type was null.

Action:
The containers should not be passing a null token type. This exception indicates an internal coding error in the server. Contact BEA support.

BEA-090240
Identity Assertion token cannot be null

Category:
Security

Cause:
The identity assertion token was null.

Action:
The containers should not be passing a null token. This exception indicates an internal coding error in the server. Contact BEA support.

BEA-090241
Identity Assertion type of {0} is not a configured active type

Category:
Security

Cause:
The identity assertion token type was not configured in the WebLogic Identity Assertion provider.

Action:
Configure the identity assertion type {0} in the Active Types attribute of the WebLogic Identity Assertion provider.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090248
Unrecognized Callback

Category:
Security

Cause:
Callback type is not supported.

Action:
Verify that the LoginModule for the configured Authentication provider is only passing a NameCallback when calling the handle method.

BEA-090249
Cursor is null

Category:
Security

Cause:
A null cursor is not supported.

Action:
Modify the code to pass a non-null cursor.

BEA-090250
Cursor not found {0}

Category:
Security

Cause:
Cursor was not found in the list of valid cursors.

Action:
Verify that the cursor passed to the method is valid and was returned from a method that creates cursors. Examples of such methods are listUsers, listGroups and listRoles.

BEA-090251
haveCurrent error for cursor name {0}

Category:
Security

Cause:
LDAP exception during haveCurrent method.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090252
advance error for cursor name {0}

Category:
Security

Cause:
an LDAP exception occurred while advancing the list.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090253
close error for cursor name {0}

Category:
Security

Cause:
an LDAP exception occurred while closing this list cursor.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090254
name cannot be null

Category:
Security

Cause:
The name cannot be null in the setUserDescription, setGroupDescription, getUserDescription, or getGroupDescription methods.

Action:
Pass in a non-null name to the method.

BEA-090255
User or Group {0}

Category:
Security

Cause:
The user or group cannot be found.

Action:
Pass in a user or group that exists.

BEA-090256
Error setting description for {0}

Category:
Security

Cause:
an exception occurred while calling to modify the description in the server.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090257
group cannot be null

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The group name cannot be null.

Action:
Pass in a non-null group name to the method.

BEA-090258
max cannot be < 0

Category:
Security

Cause:
The maximumToReturn value cannot be less than zero.

Action:
Pass in a maximumToReturn parameter value that is greater or equal to zero.

BEA-090259
Group {0} can not be found.

Category:
Security

Cause:
Group {0} does not exist in the server.

Action:
Pass in a group that exists.

BEA-090260
Error listing group members for {0}

Category:
Security

Cause:
an exception was thrown while searching for the group members in the store.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090261
wildcard cannot be null

Category:
Security

Cause:
Wildcard parameter is null.

Action:
Pass a non-null wildcard parameter to the method.

BEA-090262
Error listing groups {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
an exception was thrown while searching for the groups in the store.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090263
parent group cannot be null

Category:
Security

Cause:
Parent group name is null.

Action:
Pass a non-null parent group name parameter to this method.

BEA-090264
member cannot be null

Category:
Security

Cause:
Member name is null.

Action:
Pass a non-null member name parameter to this method.

BEA-090265
member cannot be parent group

Category:
Security

Cause:
Member name and parent group name are the same value.

Action:
Change either the member name or parent group name parameters of this method.

BEA-090266
group name cannot be null

Category:
Security

Cause:
Group name cannot be null.

Action:
Pass a non-null group name to the method.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090267
Group {0}

Category:
Security

Cause:
Group {0} already exists in the LDAP server. Users and groups must have unique names.

Action:
Pass in a unique group name.

BEA-090268
Group {0}

Category:
Security

Cause:
User {0} already exists in the LDAP server. Users and groups must have unique names.

Action:
Pass in a unique user name.

BEA-090269
Error adding group {0}

Category:
Security

Cause:
an exception was thrown while adding the group in the store.

Action:
Users and groups must have unique names.

BEA-090270
group cannot be same as member

Category:
Security

Cause:
Member and group names must be unique.

Action:
Pass in a group and member name that are unique.

BEA-090271
Member {0} can not be found.

Category:
Security

Cause:
Member does not exist.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Pass in a member name that exists in the store.

BEA-090272
Error adding member {0} to {1}

Category:
Security

Cause:
an exception was thrown while adding the member to the group in the store.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090273
member cannot be group

Category:
Security

Cause:
Member and group names must be unique.

Action:
Pass in a group and member name that are unique.

BEA-090274
Error removing member {0} from {1}

Category:
Security

Cause:
an exception was thrown when removing the member from the group in the store.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090275
Error removing group {0}

Category:
Security

Cause:
an exception was thrown while removing the group from the store.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090276
Error removing group {0} invalid cursor

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An InvalidCursorException exception was thrown while removing the group from the store.

Action:
This exception indicates an internal coding error in the server. Contact BEA support.

BEA-090277
Error destroying provider:

Category:
Security

Cause:
an LDAP exception was thrown while removing all the users and groups from the LDAP server.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090278
Error listing member groups {0}

Category:
Security

Cause:
an LDAP exception was thrown while listing the member groups in the LDAP server.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090279
Error listing users {0}

Category:
Security

Cause:
an LDAP exception was thrown while listing the users in the LDAP server.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090280
user cannot be null

Category:
Security

Cause:
User name cannot be null.

Action:
Pass a non-null user name to the method.

BEA-090281
user name cannot be null

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The user name cannot be null.

Action:
Pass a non-null user name to the method.

BEA-090282
password cannot be null

Category:
Security

Cause:
The password cannot be null.

Action:
Pass a non-null password to the method.

BEA-090283
User {0}

Category:
Security

Cause:
User {0} already exists in the LDAP server.

Action:
Pass in another user name.

BEA-090284
Group {0}

Category:
Security

Cause:
Group {0} already exists in the LDAP server. Groups and users must have unique names.

Action:
Pass in an user name that is not already an existing group.

BEA-090285
password must be at least {0} characters long

Category:
Security

Cause:
Password is not long enough.

Action:
Enter a password that meets the specified minimum length requirement.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090286
Error adding user {0}

Category:
Security

Cause:
an LDAP exception was thrown while adding the user to the LDAP server.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090287
User {0} can not be found.

Category:
Security

Cause:
User {0} does not exist in the server.

Action:
Pass a user name that exists.

BEA-090288
Invalid password for user {0}

Category:
Security

Cause:
The bind to the LDAP server using this user name and password failed.

Action:
Pass a valid password or use the resetPassword method which does not require the old password.

BEA-090289
Error changing password for {0}

Category:
Security

Cause:
an LDAP exception was thrown while modifying the password in the LDAP server.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090290
Error removing user {0}

Category:
Security

Cause:
an LDAP exception was thrown while removing the user from the server.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090291
{0} search scope ({1}) not recognized

Category:
Security

Cause:
Search scope {1} is not a valid value.

Action:
Change the User Search Scope attribute for the LDAP Authentication provider.

BEA-090293
Error creating provider

Category:
Security

Cause:
An LDAP exception was thrown when checking the LDAP hierarchy in the initialization of the provider.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090294
could not get connection

Category:
Security

Cause:
an LDAP exception was thrown because an LDAP connection could not be obtained from the connection pool.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090295
caught unexpected exception

Category:
Security

Cause:
An unexpected LDAP exception was thrown when calling LDAP methods.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090296
invalid URL {0}

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
an LDAP exception was thrown because of an invalid dynamic group URL.

Action:
Verify the dynamic group definition. Read the exception text for more information on diagnosing the problem.

BEA-090297
No CallbackHandler Specified

Category:
Security

Cause:
The callback handler is null.

Action:
This exception indicates an internal coding error in the server. Contact BEA support.

BEA-090298
No Delegate Specified

Category:
Security

Cause:
The LDAP delegate is null.

Action:
This exception indicates an internal coding error in the server. Contact BEA support.

BEA-090299
Username Not Supplied

Category:
Security

Cause:
The user name returned from the NameCallback cannot be null.

Action:
This exception indicates an internal coding error in the server. Contact BEA support.

BEA-090300
Identity Assertion Failed: User {0} does not exist

Category:
Security

Cause:
User does not exist in the LDAP server.

Action:
Add the user to the LDAP server or configure the Identity Assertion provider to return a user that exists.

BEA-090301
Password Not Supplied

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Password cannot be null.

Action:
This exception indicates an internal coding error in the server. Contact BEA support.

BEA-090302
Authentication Failed: User {0} denied

Category:
Security

Cause:
The username and password could not bind to the LDAP server.

Action:
Verify the username and password.

BEA-090303
Authentication Failed: User {0} {1}

Category:
Security

Cause:
an LDAP exception caused the authentication of the user to fail.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090304
Authentication Failed: User {0} {1}

Category:
Security

Cause:
An unexpected exception caused the authentication of the user to fail.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090305
Authentication Failed Getting Groups for User {0} {1}

Category:
Security

Cause:
A group to which the user belongs was not found.

Action:
Verify the groups to which the user belongs.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090306
Authentication Failed Getting Groups for User {0} {1}

Category:
Security

Cause:
A Invalid Cursor, Invalid Parameter, or LDAP exception was thrown when looking up the groups of which the user is a member.

Action:
Read the exception text in {1} for more information on diagnosing the problem.

BEA-090307
DefaultAuthenticatorImpl constructor failed: {0}

Category:
Security

Cause:
A exception was thrown in the constructor for the WebLogic Authentication provider.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090308
Validation of old password failed

Category:
Security

Cause:
The old password was not valid.

Action:
Verify the old password. Optionally, use the resetPassword method to change the user password.

BEA-090310
Failed to create resource

Category:
Security

Cause:
An EnCreateException was thrown when creating the security policy.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090311
Failed to set resource expression

Category:
Security

Cause:
An EnCreateException was thrown when setting the security policy expression.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090313
policy removal error

Category:
Security

Cause:
A EnRemoveException was thrown during the deletion of security policies for the application.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090314
Entitlement Engine unable to connect to the embedded LDAP server {0}

Category:
Security

Cause:
An exception was thrown when initializing the entitlement engine for the WebLogic Authorization provider.

Action:
Read the exception text in {0} for more information on diagnosing the problem.

BEA-090315
DefaultAuthorizerImpl init failed: {0}

Category:
Security

Cause:
An exception was thrown during the initialization of the WebLogic Authorization provider.

Action:
Read the exception text in {0} for more information on diagnosing the problem.

BEA-090316
null helper

Category:
Security

Cause:
The helper cannot be null.

Action:
This exception indicates an internal coding error in the server. Contact BEA support.

BEA-090317
bug in PredicateArgument

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The arguments for the predicate are invalid.

Action:
Verify the definition of the condition expression of the security policy.

BEA-090318
DefaultRoleMapperImpl init failed: {0}

Category:
Security

Cause:
An exception was thrown in the initialization method of the WebLogic Role Mapping provider.

Action:
Read the exception text in {0} for more information on diagnosing the problem.

BEA-090319
Unknown resource type: {0}

Category:
Security

Cause:
The role id cannot be null.

Action:
This exception indicates an internal coding error in the server. Contact BEA support.

BEA-090320
Failed to create role

Category:
Security

Cause:
An exception was thrown during the createRole method.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090321
Failed to set role expression

Category:
Security

Cause:
An exception was thrown during the setRole method.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090322
role removal error

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
An EnRemoveException was thrown during the delete operation.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090324
DefaultCredentialMapperImpl init failed: {0}

Category:
Security

Cause:
An exception was thrown during the initialization of the WebLogic Credential Mapping provider.

Action:
Read the exception text in {0} for more information on diagnosing the problem.

BEA-090326
DefaultCredentialMapperImpl.listCredentials got LDAP exception

Category:
Security

Cause:
An LDAP exception was thrown while accessing the LDAP server to get the list of credentials for this WebLogic resource.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090327
DefaultCredentialMapperImpl.getCurrentCredentialRemoteUsername failed: No such credentials list cursor available

Category:
Security

Cause:
Cursor is invalid.

Action:
Verify that the cursor was returned from the listCredentials method.

BEA-090329
DefaultCredentialMapperImpl.listMappings got LDAP exception

Category:
Security

Cause:
An LDAP exception was thrown while accessing the LDAP server to get the list of credential mappings for this WebLogic resource.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090330
DefaultCredentialMapperImpl.getCurrentMappingWLSUsername failed: No such resource maps list cursor available

Category:
Security

Cause:
Cursor is invalid.

Action:
Verify that the cursor was returned from the listMappings method.

BEA-090331
DefaultCredentialMapperImpl.getCurrentMappingRemoteUsername failed: No such resource maps list cursor available

Category:
Security

Cause:
Cursor is invalid.

Action:
Verify that the cursor was returned from the listMappings method.

BEA-090332
DefaultCredentialMapperImpl.getRemoteUserName got LDAP exception

Category:
Security

Cause:
An LDAP exception was thrown while accessing the LDAP server to get the credential map or the credential map principal.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090333
DefaultCredentialMapperImpl.getRemotePassword got LDAP exception

Category:
Security

Cause:
An LDAP exception was thrown while accessing the LDAP server to get the password for the credential map.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090334
DefaultCredentialMapperImpl.setUserPasswordCredential got LDAP exception

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
An LDAP exception was thrown while accessing the LDAP server to set the password for the credential map.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090335
DefaultCredentialMapperImpl.setUserPasswordCredentialMapping got LDAP exception

Category:
Security

Cause:
An LDAP exception was thrown while accessing the LDAP server to set the credential resource map.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090336
DefaultCredentialMapperImpl.removeUserPasswordCredential got LDAP exception

Category:
Security

Cause:
An LDAP exception was thrown while accessing the LDAP server to remove the user password credential.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090337
DefaultCredentialMapperImpl.removeUserPasswordCredentialMapping got LDAP exception

Category:
Security

Cause:
An LDAP exception was thrown while accessing the LDAP server to remove the user password credential mapping.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090339
Could not create file output stream {0}

Category:
Security

Cause:
An IO exception was thrown during the create of either the temporary file or the real file for the Audit log.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090367
This method not yet implemented

Category:
Security

Cause:
Method is not implemented and should not be used.

Action:
This exception indicates an internal coding error in the server. Contact BEA support.

BEA-090375
Null TokenType Parameter

Category:
Security

Cause:
The token type is null.

Action:
The containers should not pass a null token types. This exception indicates an internal coding error in the server. Contact BEA support.

BEA-090377
Identity Assertion Failed, {0}

Category:
Security

Cause:
An IdentityAssertion exception was thrown in the assertIdentity or assertChallengeIdentity method of the Identity Assertion provider

Action:
Read the exception text in {0} for more information on diagnosing the problem.

BEA-090380
Identity Assertion Failed, Unsupported Token Type: {0}

Category:
Security

Cause:
Token type is not configured as an active type.

Action:
Define the token type {0} in the Active Types attribute of the configured Identity Assertion provider.

BEA-090393
Security service not yet initialized: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The Security service must be initialized before it can be used.

Action:
This exception indicates an internal coding error in the server. Contact BEA support.

BEA-090442
location null or empty

Category:
Security

Cause:
A keystore filename must not be null or a zero length string.

Action:
Set the keystore location to a valid filename.

BEA-090443
null file

Category:
Security

Cause:
The load and store methods require a non-null filename.

Action:
Pass a valid filename to the keystore load or store method.

BEA-090447
invalid flag value {0}

Category:
Security

Cause:
The value specified for the LoginModule control flag is not supported.

Action:
Pass in a valid value for the LoginModule control flag. Valid values are REQUIRED, OPTIONAL, REQUISITE, or SUFFICIENT.

BEA-090448
Invalid Format: {0}

Category:
Security

Cause:
Import format is either null, zero length, or not supported by this provider.

Action:
Pass in a supported format.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090449
Invalid Constraints

Category:
Security

Cause:
Constraints are not supported.

Action:
Do not pass constraints to the provider.

BEA-090450
Invalid name supplied

Category:
Security

Cause:
The filename, domain name, or security realm name cannot be null.

Action:
Pass a non null filename, domain name, or security realm name.

BEA-090451
Unable to read file: {0}

Category:
Security

Cause:
Import file cannot be read.

Action:
Verify the import filename.

BEA-090453
Import File Error

Category:
Security

Cause:
An IO exception was thrown while importing from the file.

Action:
Verify the import filename. Read the exception text or the associated log message for more information on diagnosing the problem.

BEA-090455
Export File Error

Category:
Security

Cause:
An IO exception was thrown while exporting to the file.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify the export filename. Read the exception text or the associated log message for more information on diagnosing the problem.

BEA-090469
Invalid file format

Category:
Security

Cause:
LDIF template file did not contain any substitution entries and does not have the correct file format.

Action:
Verify that the file specified to the import operation is really a LDIF template file produced by an export operation.

BEA-090473
DefaultAuthorizerImpl search failed: {0}

Category:
Security

Cause:
An exception was thrown trying to access the data store.

Action:
Look at the exception text in {0} for more information on diagnosing the problem.

BEA-090474
Unable to create temporary file: {0}

Category:
Security

Cause:
The java.io.tmpdir system property is not set correctly or the temporary directory is not writeable.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090511
The following exception has occurred:

Category:
Security

Cause:
An error condition has occurred.

Action:
Read the associated exception in the log or in application to determine the problem. In general, a stack trace can be used to debug an existing problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090512
The WebLogic Auditing provider failed to register to listen for AuditorMBean attribute change notifications

Category:
Security

Cause:
The installation of WebLogic Server is corrupt.

Action:
In order for a change in the auditing severity to take effect, the server needs to be rebooted.

BEA-090516
The {0} provider has preexisting LDAP data.

Category:
Security

Cause:
The provider was initialized during a previous boot of the WebLogic Server

Action:
No action necessary.

BEA-090517
Group {0} cannot be added to group {1} since group {0} is already ancestor of group {1}.

Category:
Security

Cause:
Group membership can not be circular..

Action:
Ensure that group membership is not circular. Add this group to a different group.

BEA-090545
DefaultRoleMapperImpl search failed: {0}

Category:
Security

Cause:
An exception was thrown trying to access the data store.

Action:
Look at the exception text in {0} for more information on diagnosing the problem.

BEA-090553
Invalid system property value: {0}={1}

Category:
Security

Cause:
Invalid system property value was passed on the command line.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Make sure the property value is valid and restart the server.

BEA-090555
The DefaultCredentialMapper could not get credentials. The requestor is {0}. The initiator is {1}. The resource is {2}. The exception is {3}.

Category:
Security

Cause:
An unexpected exception occurred when trying to get credentials.

Action:
Read the exception text from the log message for more information on diagnosing the problem.

BEA-090583
The EndCertificateSelector constructor was passed an illegal X509Certificate.

Category:
Security

Cause:
The X509Certificate must not be null.

Action:
Pass a valid X509Certificate to the EndCertificateSelector constructor.

BEA-090584
The IssuerDNSerialNumberSelector constructor was passed an illegal issuer DN.

Category:
Security

Cause:
The issuer DN must not be null or empty.

Action:
Pass a valid issuer DN to the IssuerDNSerialNumberSelector constructor.

BEA-090585
The IssuerDNSerialNumberSelector constructor was passed an illegal serial number.

Category:
Security

Cause:
The serial number must not be null.

Action:
Pass a valid serial number to the IssuerDNSerialNumberSelector constructor.

BEA-090586
The SubjectDNSelector constructor was passed an illegal subject DN.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The subject DN must not be null or empty.

Action:
Pass a valid subject DN to the SubjectDNSelector constructor.

BEA-090587
The SubjectKeyIdentifierSelector constructor was passed an illegal subject key identifier.

Category:
Security

Cause:
The subject key identifier must not be null or empty.

Action:
Pass a valid subject key identifier to the SubjectKeyIdentifierSelector constructor.

BEA-090588
The WLSCertPathBuilderResult constructor was passed an illegal Certpath.

Category:
Security

Cause:
The CertPath must not be null or empty.

Action:
Pass a valid CertPath to the WLSCertPathBuilderResult constructor. It must at least contain the end certificate of the cert chain."

BEA-090593
The realm {0} has an illegal cert path builder configured. To correct the problem, select one of the realm"s cert path providers as the realm"s cert path builder.

Category:
Security

Cause:
The realm {0} has an illegal cert path builder configured.

Action:
To correct the problem, select one of the realm"s cert path providers as the realm"s cert path builder.

BEA-090594
The {0} cert path security provider was passed an illegal CertPathParameters.

Category:
Security

Cause:
The CertPathParameters must be a weblogic.security.spi.CertPathBuilderParametersSpi.

Action:
The {0} cert path security provider must not be called directly by application code.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090595
The {0} cert path security provider was passed an illegal CertPathParameters.

Category:
Security

Cause:
The CertPathParameters must be a weblogic.security.spi.CertPathValidatorParametersSpi.

Action:
The {0} cert path security provider must not be called directly by application code.

BEA-090596
The WebLogicCertPathProvider was passed an unsupported CertPathSelector.

Category:
Security

Cause:
The CertPathSelector must be an EndCertificateSelector.

Action:
Pass an EndCertificateSelector to the WebLogicCertPathProvider.

BEA-090597
The CertificateRegistry was passed an unsupported CertPathSelector.

Category:
Security

Cause:
The CertPathSelector must be an EndCertificateSelector, IssuerDNSerialNumberSelector, SubjectDNSelector or SubjectKeyIdentifierSelector.

Action:
Pass an EndCertificateSelector, IssuerDNSerialNumberSelector, SubjectDNSelector or SubjectKeyIdentifierSelector to the CertificateRegistry.

BEA-090603
The certificate chain is invalid because it could not be completed. The trusted CAs did not include {0}.

Category:
Security

Cause:
The trusted CAs did not include {0}.

Action:
Add {0} to the chain or to the list of the trusted CAs if you want this chain to be validated.

BEA-090604
The certificate chain is invalid because none of its certificates is a trusted CA.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
None of its certificates is a trusted CA.

Action:
Add one of the certificates in the chain to the list of of trusted CAs if you want this chain to be validated.

BEA-090605
The certificate chain is invalid because it contains the certificate {0} is either expired or is not currently valid.

Category:
Security

Cause:
The invalid certificate is {0}.

Action:
If this certificate is a trusted CA, and the certificate authority has issued a replacement certificate with the same subject DN and private key, and you want the certificate chain to be validated, then replace the trusted CA with the updated one. Otherwise, you must obtain a new certificate chain if you want the chain to be validated.

BEA-090606
The certificate chain is invalid because a certificate"s issuer DN "{0}" does not match it"s CA"s subject DN "{1}".

Category:
Security

Cause:
The certificate"s issuer DN is "{0}". The CA"s subject DN is "{1}".

Action:
You must obtain a new certificate chain if you want the chain to be validated.

BEA-090607
The certificate chain is invalid because of an encoding error for certificate {0}.

Category:
Security

Cause:
The invalid certificate is {0}.

Action:
Ensure that the certificate chain only contains certificates using RSA keys and that the JDK is configured to support RSA keys.

BEA-090608
The certificate chain is invalid because a certificate"s signature could not be validated by it"s CA"s public key. The invalid certificate is {0}. The CA is {1}.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Most likely, the wrong CA is in the chain for the certificate. The invalid certificate is {0}. The CA is {1}.

Action:
You must obtain a new certificate chain if you want the chain to be validated.

BEA-090609
The certificate chain is invalid because there is no JDK provider for certificate {0}.

Category:
Security

Cause:
The invalid certificate is {0}.

Action:
Ensure that the certificate chain only contains certificates using RSA keys and that the JDK is configured to support RSA keys.

BEA-090610
The certificate chain is invalid because there is no default JDK provider for certificate {0}.

Category:
Security

Cause:
The invalid certificate is {0}.

Action:
Ensure that the certificate chain only contains certificates using RSA keys and that the JDK is configured to support RSA keys.

BEA-090611
The certificate chain is invalid because a certificate"s signature could not be validated. The invalid certificate is {0}.

Category:
Security

Cause:
Most likely, the certificate has been tampered with. The invalid certificate is {0}.

Action:
You must obtain a new certificate chain if you want the chain to be validated.

BEA-090612
The certificate chain is invalid because it contains a certificate with an unsupported critical extension. The invalid certificate is {0}. The unsupported critical extension"s oid is {1}.

Category:
Security

Cause:
The invalid certificate is {0}. The unsupported critical extension"s oid is {1}.

Action:
You must obtain a new certificate chain if you want the chain to be validated.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090613
The certificate chain is invalid because it is longer than one of it"s CA"s allows. The CA is {0}. The chain length to that CA is {1}. The maximum chain length to that CA is {2}.

Category:
Security

Cause:
The CA is {0}. The chain length to that CA is {1}. The maximum chain length to that CA is {2}.

Action:
You must obtain a new certificate chain if you want the chain to be validated.

BEA-090614
The certificate chain is invalid because it contains a CA without basic constraints. The CA is {0}.

Category:
Security

Cause:
The CA is {0}.

Action:
You must obtain a new certificate chain if you want the chain to be validated.

BEA-090615
A CertPathBuilderParameters or CertPathValidatorParameters object was constructed with a list of trusted CAs that includes a null trusted CA.

Category:
Security

Cause:
A CertPathBuilderParameters or CertPathValidatorParameters object was constructed with a list of trusted CAs that includes a null trusted CA.

Action:
Ensure that the list of trusted CAs passed in does not include a null trusted CA.

BEA-090616
The configured CertPathBuilder provider returned an empty cert path.

Category:
Security

Cause:
The configured CertPathBuilder provider has a bug. It should never return an empty cert path.

Action:
Fix the bug in the configured CertPathBuilder.

BEA-090618
The WLS CertPathValidator was passed a null or empty cert path.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The WLS CertPathValidator was passed a null or empty cert path.

Action:
Pass a cert path containing at least one certificate to the WLS CertPathValidator.

BEA-090620
There is no JDK CertPathBuilder for algorithm {0}.

Category:
Security

Cause:
There is no JDK CertPathBuilder for algorithm {0}.

Action:
This is an internal WebLogic Server error in either the JDK or a WLS CertPathProvider.

BEA-090621
There is no JDK CertPathValidator for algorithm {0}.

Category:
Security

Cause:
There is no JDK CertPathValidator for algorithm {0}.

Action:
This is an internal WebLogic Server error in either the JDK or a WLS CertPathProvider.

BEA-090623
Failed to get the default trusted CAs for this server.

Category:
Security

Cause:
This exception is thrown when an exception occurs when finding this server"s trusted CAs.

Action:
Look at the exception text for more information on diagnosing the problem.

BEA-090624
Failed to create an X509 CertPath from an array of X509Certificates.

Category:
Security

Cause:
Failed to create an X509 CertPath from an array of X509Certificates.

Action:
Look at the exception text for more information on diagnosing the problem.

BEA-090635
No Results

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
There are no policies that match the search criteria.

Action:
No action necessary.

BEA-090636
No Results

Category:
Security

Cause:
There are no roles that match the search criteria.

Action:
No action necessary.

BEA-090637
No role name supplied

Category:
Security

Cause:
The role name is null or contains no data.

Action:
Specify a valid role name.

BEA-090638
No resource data

Category:
Security

Cause:
The resource data parameter was not supplied or is empty.

Action:
Specify valid resource data.

BEA-090639
No resource type

Category:
Security

Cause:
The resource type information was not supplied.

Action:
Specify a valid resource type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090640
No resource identifier

Category:
Security

Cause:
The resource identifier parameter was not supplied or is empty.

Action:
Specify a valid resource identifier.

BEA-090641
No resource keys found

Category:
Security

Cause:
An invalid resource identifier was supplied.

Action:
Specify a valid resource identifier.

BEA-090642
Invalid data type for {0} resource key value

Category:
Security

Cause:
The data type of a resource key value is not valid.

Action:
Specify a valid resource key data type value.

BEA-090643
Invalid resource type: "{0}"

Category:
Security

Cause:
An invalid or unknown resource type was supplied.

Action:
Specify a valid resource type.

BEA-090644
Expected resource type: {0}

Category:
Security

Cause:
An invalid or unknown resource type was supplied.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify a valid resource type was supplied and contact BEA support.

BEA-090645
Expected resource key: {0}

Category:
Security

Cause:
An invalid resource identifier was supplied.

Action:
Specify a valid resource identifier.

BEA-090646
Unknown resource key: {0}

Category:
Security

Cause:
The resource key supplied in the resource data is unknown.

Action:
Specify only resource keys valid for a specific resource type.

BEA-090647
Invalid application name

Category:
Security

Cause:
The application name parameter was empty or contains invalid values.

Action:
Specify a valid application name.

BEA-090648
Invalid component name

Category:
Security

Cause:
The component name parameter was empty or contains invalid values.

Action:
Specify a valid component name.

BEA-090649
Illegal application search name

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The application name was not a legal search string.

Action:
Specify a valid application name search string.

BEA-090650
Illegal component search name

Category:
Security

Cause:
The component name was not a legal search string.

Action:
Specify a valid component name search string.

BEA-090651
No component type

Category:
Security

Cause:
The component type parameter is empty.

Action:
Specify a valid component type of EJB, WebApp, Connector or WebService.

BEA-090652
Invalid component type: "{0}"

Category:
Security

Cause:
The component type parameter specified is not valid.

Action:
Specify a valid component type of EJB, WebApp, Connector or WebService.

BEA-090653
Empty array value found

Category:
Security

Cause:
An empty string was supplied for an array element of the resource key.

Action:
Specify a valid string.

BEA-090654
Unexpected resource identifier data: "{0}"

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
An invalid resource identifier was supplied.

Action:
Specify a valid resource identifier.

BEA-090655
Unexpected resource key array value: "{0}"

Category:
Security

Cause:
An invalid resource identifier was supplied.

Action:
Specify a valid resource identifier.

BEA-090656
Empty {0} resource {1} string

Category:
Security

Cause:
An empty string was supplied for an element of the resource.

Action:
Specify a valid string.

BEA-090657
Empty {0} resource {1} array string

Category:
Security

Cause:
An empty string was supplied for an array element of the resource.

Action:
Specify a valid string.

BEA-090662
The DeployableAuthorizer "{0}" implements the deprecated {1} interface.

Category:
Security

Cause:
At security provider initialization a deprecated security interface was detected.

Action:
No immediate action necessary. However, the security provider should be updated.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090663
The DeployableRoleMapper "{0}" implements the deprecated {1} interface.

Category:
Security

Cause:
At security provider initialization a deprecated security interface was detected.

Action:
No immediate action necessary. However, the security provider should be updated.

BEA-090666
Deploy handle not supplied

Category:
Security

Cause:
The deployment handle is null.

Action:
This exception is an internal WebLogic Server error. Contact BEA support.

BEA-090667
Application information not supplied

Category:
Security

Cause:
The application information is null.

Action:
This exception is an internal WebLogic Server error. Contact BEA support.

BEA-090671
Unable to get password digest for user name {0}

Category:
Security

Cause:
The user does not exist in the WebLogic authentication provider Embedded LDAP server or there is no password information available to calculate a digest.

Action:
Verify that the user exists in the WebLogic authentication provider, the authentication provider has the PasswordDigestEnabled attribute set to true, and the user entry has set the password since the attribute was set to true.

BEA-090683
The CertificateRegistry could not build a certificate path for end certificate {0}. This indicates that either someone is trying to access the server with an untrusted certificate or that the administrator has forgotten to register the certificate in the CertificateRegistry.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The CertificateRegistry does not contain the certificate {0}.

Action:
If you want to trust the end certificate {0}, then register it in the CertificateRegistry.

BEA-090684
The CertificateRegistry could not build a certificate path for the subject DN {0}. This indicates that either someone is trying to access the server with an untrusted subject DN or that the administrator has forgotten to register a certificate with this subject DN in the CertificateRegistry.

Category:
Security

Cause:
The CertificateRegistry does not contain a certificate whose subject DN is {0}.

Action:
If you want to trust the subject DN {0}, then register a certificate with this subject DN in the CertificateRegistry.

BEA-090685
The CertificateRegistry could not build a certificate path for the issuer DN {0} and serial number {1}. This indicates that either someone is trying to access the server with an untrusted issuer DN and serial number or that the administrator has forgotten to register a certificate with this issuer DN and serial number in the CertificateRegistry.

Category:
Security

Cause:
The CertificateRegistry does not contain a certificate whose issuer DN is {0} and whose serial number is {1}.

Action:
If you want to trust the issuer DN {0} and serial number {1}, then register a certificate with this issuer DN and serial number in the CertificateRegistry.

BEA-090686
The CertificateRegistry could not build a certificate path for the subject key identifier {0}. This indicates that either someone is trying to access the server with an untrusted subject key identifier or that the administrator has forgotten to register a certificate with this subject key identifier in the CertificateRegistry.

Category:
Security

Cause:
The CertificateRegistry does not contain a certificate whose subject key identifier is {0}.

Action:
If you want to trust the subject key identifier {0}, then register a certificate with this subject key identifier in the CertificateRegistry.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090687
The CertificateRegistry could not validate a certificate path whose end certificate is {0}. This indicates that either someone is trying to access the server with an untrusted certificate or that the administrator has forgotten to register the certificate in the CertificateRegistry.

Category:
Security

Cause:
The CertificateRegistry does not contain the certificate {0}.

Action:
If you want to trust the end certificate {0}, then register it in the CertificateRegistry.

BEA-090688
The maximum number of concurrent lists has been exceeded. The maximum is {0}. These lists are allocated by listing functions listAliases for the CertificateRegistry. Wait for some of the existing lists to either expire or be closed. Lists automatically expire if they have not been used for {1} milliseconds.

Category:
Security

Cause:
Either the server is under very heavy load, or someone is launching a denial service attack against the server or some application code (e.g. a client) is not closing lists after it finishes using them.

Action:
Wait for some of the existing lists to either time out or be closed.

BEA-090689
The certificate alias is null or empty.

Category:
Security

Cause:
An empty or null certificate alias is not supported.

Action:
Modify the code to pass a non-null and non-empty certificate alias.

BEA-090690
The file name is null or empty.

Category:
Security

Cause:
An empty or null file name is not supported.

Action:
Modify the code to pass a non-null and non-empty file name.

BEA-090691
The certificate alias wildcard is null or empty.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
An empty or null certificate alias wildcard is not supported.

Action:
Modify the code to pass a non-null and non-empty certificate alias wildcard.

BEA-090692
max cannot be < 0

Category:
Security

Cause:
The maximumToReturn value cannot be less than zero.

Action:
Pass in a maximumToReturn parameter value that is greater or equal to zero.

BEA-090693
Certificate alias {0} not found.

Category:
Security

Cause:
The alias cannot be found.

Action:
Pass in a certificate alias that exists.

BEA-090694
The security provider already has a certificate registered under the alias {0}.

Category:
Security

Cause:
Certificate alias {0} already exists in the security provider.

Action:
Pass in another certificate alias.

BEA-090695
Subject DN {0} already registered under the alias {1}

Category:
Security

Cause:
A certificate with subject DN {0} already exists in the security provider under the alias {1}.

Action:
Either remove the previous certificate from the security provider or register a different certificate.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090696
Issuer DN {0} and serial number {1} already registered under the alias {2}

Category:
Security

Cause:
A certificate with issuer DN {0} and serial number {1} already exists in the security provider under the alias {2}.

Action:
Either remove the previous certificate from the security provider or register a different certificate.

BEA-090697
Subject key identifier {0} already registered under the alias {1}

Category:
Security

Cause:
A certificate with subject key identifier {0} already exists in the security provider under the alias {1}.

Action:
Either remove the previous certificate from the security provider or register a different certificate.

BEA-090698
Errors occurred while importing data into this security provider.

Category:
Security

Cause:
Some of the data could not be imported into this security provider.

Action:
The getExceptions method on the ErrorCollectionException thrown by this method may be used to get a list of the errors that occurred.

BEA-090699
Errors occurred while exporting data from this security provider.

Category:
Security

Cause:
Some of the data could not be exported from this security provider.

Action:
The getExceptions method on the ErrorCollectionException thrown by this method may be used to get a list of the errors that occurred.

BEA-090710
Unable to write the file {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Examine the nested exception for more information in diagnosing the problem.

Action:
Verify that the file is not a directory or a read-only file.

BEA-090711
Unable to read the file {0}.

Category:
Security

Cause:
Examine the nested exception for more information in diagnosing the problem.

Action:
Verify that the file exists and is not a directory.

BEA-090712
Unable to read the JKS keystore {0}.

Category:
Security

Cause:
Examine the nested exception for more information in diagnosing the problem.

Action:
Verify that the file is a JKS keystore.

BEA-090713
Unable to read the certificate in the PEM or DER file {0}.

Category:
Security

Cause:
Examine the nested exception for more information in diagnosing the problem.

Action:
Verify that the file is a PEM or DER file containing a single certificate.

BEA-090724
Challenge identity assertion has not completed, subject is not available yet

Category:
Security

Cause:
The method to get the subject was called before the identity assertion has completed.

Action:
Call the hasChallengeIdentityCompleted method before calling the method to get the subject.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090726
Unexpected exception while reading credential attribute: {0}

Category:
Security

Cause:
LDAP connection failure, corrupted LDAP database, or invalid cursor.

Action:
Verify that LDAP is up and running.

BEA-090728
Failed to read credential of type {0} stored under alias {1}

Category:
Security

Cause:
LDAP connection failure, or the database is corrupted.

Action:
Verify that LDAP is up and running.

BEA-090731
Unable to retrieve query

Category:
Security

Cause:
The internal query structure was not able to be retrieved from the connection. This could potentially be caused by a misconfigured DBMS ATN provider, but is more likely caused by an internal coding error in the DBMS ATN provider.

Action:
Review JDBC connection pool configuration, and provider level SQL Query settings. If these appear valid, this exception may indicate an internal coding error in the DBMS ATN provider. Contact BEA support.

BEA-090732
Invalid data source name specified: {0}

Category:
Security

Cause:
The DBMS ATN provider was most likely configured with an invalid data source name

Action:
Review and correct the data source name in the DBMS ATN provider configuration

BEA-090734
The connection pool was not usable

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The DBMS ATN provider or the connection pool it is configured to use may be misconfigured or unavailable.

Action:
Review the JDBC related configuration in the server and the DBMS ATN provider configuration, and test the JDBC connection pool.

BEA-090735
The DBMS connection was not usable

Category:
Security

Cause:
The DBMS ATN provider or the connection pool it is configured to use may be misconfigured or unavailable.

Action:
Review the JDBC related configuration in the server and the DBMS ATN provider configuration, and test the JDBC connection pool.

BEA-090736
An exception occurred while validating the {0} configuration settings

Category:
Security

Cause:
An unexpected exception was thrown while validating configuration settings. This may indicate a configuration problem, or it may be an internal coding error

Action:
Review the exception trace for details on the cause, if the cause and solution are not apparent, contact BEA support.

BEA-090737
An exception occurred while getting connection to validate the configuration settings

Category:
Security

Cause:
An exception was thrown while validating configuration settings. This may indicate a configuration problem, or it may be an internal coding error

Action:
Review the exception trace for details on the cause, if the cause and solution are not apparent, contact BEA support.

BEA-090738
The {0} password hash algorithm is not usable

Category:
Security

Cause:
The password algorithm name was not found to be supported by the JCE crypto configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify the password algorithm is specified correctly, and that the JCE configuration supports the algorithm.

BEA-090739
The SQL statement for {0} does not appear to be correct

Category:
Security

Cause:
The DBMS SQL providers attempt to validate the configured SQL statements are correct. The validation code detected something was wrong with the configured SQL.

Action:
Review and correct the SQL statement.

BEA-090740
An unexpected exception occurred while calling the {0} method of the user defined DBMS sub plugin

Category:
Security

Cause:
The DBMS pluggable runtime providers caught an unexpected exception while calling the user defined sub plugin. The cause likely resides in the user defined sub plugin.

Action:
Review the exception details and the user defined sub plugin code to determine the cause and action.

BEA-090741
A SQLException occurred while calling the {0} method of the user defined DBMS sub plugin

Category:
Security

Cause:
The DBMS pluggable runtime providers caught a SQLException while calling the user defined sub plugin. The cause could be a database connectivity issue, or it could reside in the user defined sub plugin.

Action:
Review the exception details and the user defined sub plugin code to determine the cause and action.

BEA-090742
The DBMS pluggable runtime sub plugin failed to load

Category:
Security

Cause:
The DBMS pluggable runtime provider was not able to load the user defined sub plugin.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the DBMS pluggable runtime provider configuration. Verify the name of the user defined sub plugin class is correct, and that it is present in the server classpath.

BEA-090743
An unexpected exception occurred while loading the {0} sub plugin class

Category:
Security

Cause:
The DBMS pluggable runtime provider was not able to load the user defined sub plugin class and the exception thrown was not expected.

Action:
Review the exception details and the sub plugin configuration.

BEA-090744
The DBMS sub plugin class {0} was not found

Category:
Security

Cause:
The user defined sub plugin class was not found

Action:
Verify the name of the user defined sub plugin class is correct, and that it is present in the server classpath.

BEA-090745
The DBMS sub plugin class {0} was not the correct type

Category:
Security

Cause:
The user defined sub plugin class was not the correct type. Either the wrong class was specified, or the sub plugin was not coded correctly

Action:
Verify the user defined sub plugin class name is correct and that it implements the correct interface.

BEA-090746
The DBMS sub plugin class {0} was not able to be accessed

Category:
Security

Cause:
The user defined sub plugin class was not able to be accessed. Either the wrong class was specified, or the sub plugin was not coded correctly

Action:
Verify the user defined sub plugin class name is correct, that it implements the correct interface, and that the class is publicly accessible.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090747
The DBMS sub plugin class {0} was not able to be instantiated

Category:
Security

Cause:
The user defined sub plugin class was not able to be instantiated. Either the wrong class was specified, or the sub plugin was not coded correctly

Action:
Verify the user defined sub plugin class name is correct, that it implements the correct interface, it is defined as a class, and it is not an abstract class.

BEA-090748
There was a failure closing the DBMS connection

Category:
Security

Cause:
The exception information should be reviewed to determine the cause.

Action:
Review the exception details to determine if action is required.

BEA-090751
Failed to retrieve the prepared statement for {0}

Category:
Security

Cause:
Failed to retrieve the prepared statement for {0}, this is potentially an internal coding error

Action:
Review the JDBC configuration, contact BEA support if the cause is not apparent

BEA-090752
The password type in the DBMS was not a supported type

Category:
Security

Cause:
It is most likely caused by the password field in the DBMS stored as an unexpected type, binary or char data is expected.

Action:
Review the type for the password field in the database to ensure it is either binary or char data

BEA-090753
Hash algorithm {0} was not found

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The JCE configuration is most likely not setup to support the algorithm

Action:
Review the JCE configuration to ensure the hash algorithm is available for use.

BEA-090754
The DBMS authenticator provider login module was not properly initialized

Category:
Security

Cause:
The DBMS authentication provider configuration may be incorrect, or there could be an internal coding error.

Action:
Review the DBMS authentication provider configuration. If no cause is found, contact BEA support.

BEA-090755
A database connection was not available from pool. Try increasing Connection Pool Size or Timeout

Category:
Security

Cause:
The connection pool size or timeout settings may need to be increased

Action:
Review the JDBC connection pool related configuration in the server, and consider increasing the connection pool size or timeout

BEA-090756
The DBMS provider was unable to form a query to access the {0} information

Category:
Security

Cause:
For SQL based DBMS providers configuration is most likely incorrect. For sub pluggable DBMS providers the user defined sub-plugin code could also be the cause.

Action:
Review and correct the DBMS provider configuration. If a sub pluggable provider is being used, also review the user defined sub plugin code.

BEA-090757
The DBMS provider got an exception when formatting the user

Category:
Security

Cause:
If a user defined sub-plugin for formatting the user was supplied, it may have a coding error

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review and correct the user defined sub-plugin user format code.

BEA-090758
The DBMS provider got an exception when formatting the groups

Category:
Security

Cause:
If a user defined sub-plugin for formatting the groups was supplied, it may have a coding error

Action:
Review and correct the user defined sub-plugin group format code.

BEA-090759
A SQLException occurred while retrieving {0} information

Category:
Security

Cause:
A SQLException occurred while retrieving {0} information

Action:
Review the exception details to determine the cause and action.

BEA-090760
The user {0} was not unique in the DBMS

Category:
Security

Cause:
This is caused by multiple records for the username existing in the DBMS

Action:
Review the DBMS records for the username.

BEA-090761
Authentication failed for user {0}

Category:
Security

Cause:
The exception details need to be reviewed to determine the cause

Action:
Review the exception details to determine the cause and action to take.

BEA-090762
Exception occurred in login module

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The exception details need to be reviewed to determine the cause

Action:
Review the exception details to determine the cause and action to take.

BEA-090765
Failed to create policies for application version {0}

Category:
Security

Cause:
An exception was thrown during the application version created method.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090766
Failed to create roles for application version {0}

Category:
Security

Cause:
An exception was thrown during the application version created method.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090767
Failed to create credential mappings for application version {0}

Category:
Security

Cause:
An exception was thrown during the application version created method.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090768
credential mapping removal error

Category:
Security

Cause:
An unexpected exception occurred when trying to remove the credentials for a deleted application.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090769
The Active Directory ATN provider could not access the tokenGroups attribute for userDN {0} with principal {1} to perform group membership lookup.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The tokenGroups attribute was not accessible in the user entry. This is most likely the a problem with the Active Directory schema, or an Active Directory permission problem with the principal that is configured to access Active Directory.

Action:
Have the Active Directory administrator verify that the tokenGroup attribute is present in the Active Directory schema, and that the {1} principal has permission to read the tokenGroups attribute in Active Directory

BEA-090771
The Negotiate Identity Asserter was not configured with enough active types to perform negotiation.

Category:
Security

Cause:
The Negotiate Identity Asserter needs to be configured with all of its supported types specified as active types in order to perform negotiation.

Action:
Update the Negotiate Identity Asserter configuration to add all supported types listed for the provider to be active types.

BEA-090776
Exception when trying to generate a SAML assertion: {0}

Category:
Security

Cause:
An exception during the generation of a SAML assertion.

Action:
Read the exception text from the log message for more information on diagnosing the problem.

BEA-090777
Exception when trying to sign a SAML assertion: {0}

Category:
Security

Cause:
An exception during the signing of a SAML assertion.

Action:
Read the exception text from the log message for more information on diagnosing the problem.

BEA-090781
The SAMLLoginModule expected to receive a SAMLNameCallback and instead received a {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
This likely a configuration problem, if a SAMLIALoginModule is configured without a corresponding SAMLIdentityAsserter being configured.

Action:
Check the configuration of Identity Asserters and Login Modules.

BEA-090784
While Trying to find the groups that {0} belongs to,A Duplicate member {1} was detected.

Category:
Security

Cause:
A duplicate Membership in the groups was detected.

Action:
It might be possible that a cycle exists in the group entries.

BEA-090785
The Negotiate Identity Asserter found no identity to assert and no continuation was indicated.

Category:
Security

Cause:
This likely a configuration problem.

Action:
Check the configuration for the negotiate identity asserter and kerberos.

BEA-090786
The Negotiate Identity Asserter encountered an unexpected error processing a token.

Category:
Security

Cause:
This should not happen. This could be due to an invalid or corrupt SPNEGO token, or possibly some unknown token format similar to SPNEGO.

Action:
This exception indicates an internal coding error in the server. Contact BEA support.

BEA-090787
A Null DataSource name specified

Category:
Security

Cause:
A configuration setting that required a DataSource name was null.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check configuration settings that require DataSource names to verify they are correctly specified.

BEA-090788
"Problem with DataSource/ConnectionPool configuration, verify DataSource name {0} is correct and Pool configurations are correct"

Category:
Security

Cause:
A configuration setting that required a DataSource name was likely incorrect, or the pool settings associated with it are incorrect.

Action:
Check configuration settings to ensure the DataSource name is correct and the associated pool configuration settings are correct

BEA-090789
The DBMS authentication provider encountered an unexpected exception during authentication.

Category:
Security

Cause:
An unexpected exception occurred during authentication.

Action:
Review the exception stack trace. If the cause is not obvious, contact BEA support

BEA-090790
BINARY or VARBINARY Result type is not allowed for this SQL statement {0}

Category:
Security

Cause:
The SQL statement result was a type that is not allowed for that statement

Action:
Review the SQL statement in the configuration to ensure it returns an appropriate type

BEA-090791
Result type is not {0} for SQL statement {1}

Category:
Security

Cause:
The SQL statement requires a result type of {0}

Action:
Review the SQL statement in the configuration to ensure it returns an appropriate type

BEA-090792
Parameter {0} type is not CHAR or VARCHAR for SQL statement {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The SQL statement parameter {0} requires a type of CHAR or VARCHAR

Action:
Review the SQL statement in the configuration to ensure the parameter types are correct

BEA-090793
Unexpected exception caught accepting the kerberos context, verify the JCE configuration is correct in java.security and the sun.security.jgss.SunProvider is configured

Category:
Security

Cause:
The exception stack should be reviewed, but this could be due to the JCE configuration in java.security not having the sun.security.jgss.SunProvider configured

Action:
Verify the JCE configuration is correct. If it is correct, review the exception to determine the cause.

BEA-090794
Password hash algorithm was not specified

Category:
Security

Cause:
The configuration is most likely set with an empty password hash algorithm

Action:
Review the configuration to ensure the hash algorithm is specified correctly.

BEA-090795
No columns in SQL results, need 1 column for SQL statement {0}

Category:
Security

Cause:
The SQL statement requires a result

Action:
Review the SQL statement in the configuration to ensure it returns an appropriate number and type of result

BEA-090796
Number of parameters was expected to be {0} but was {1} for SQL statement {2}

Category:
Security

Cause:
The SQL statement requires a specific number of parameters, and the statement specified had a different number of parameters

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the SQL statement in the configuration to ensure it has the expected number of parameters specified

BEA-090798
Invalid characters found in input {0}

Category:
Security

Cause:
Input was specified that had invalid characters in it

Action:
Review the rejected input to determine what invalid characters were specified and enter the input without them

BEA-090799
PKICredentialMapperImpl init failed: {0}

Category:
Security

Cause:
An exception was thrown during the initialization of the WebLogic PKI Credential Mapping provider.

Action:
Read the exception text in {0} for more information on diagnosing the problem.

BEA-090800
Value for argument {0} for the credential type {1} not found.

Category:
Security

Cause:
Value for {0} for credential type {1} does not exist in the LDAP server.

Action:
Pass a value that exists.

BEA-090801
Value for resource {0}, initiator name {1} representing user name {2} with credential action {3} for the credential type {4} not found.

Category:
Security

Cause:
Value for resource {0}, initiator name {1} representing user name {2} with credential action {3} for the credential type {4} does not exist in the LDAP server.

Action:
Pass the values that exists.

BEA-090802
PKI Credential Mapper has got an LDAP exception.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
An LDAP exception was thrown while accessing the LDAP server to set the Key Pair mapping.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090803
PKI Credential Mapper has got an LDAP exception.

Category:
Security

Cause:
An LDAP exception was thrown while accessing the LDAP server to set the Public Certificate Mapping.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090804
Credential of the type {0} could not be removed.

Category:
Security

Cause:
An LDAP exception was thrown while accessing the LDAP server.

Action:
Check if the LDAP serer is up and running.

BEA-090805
Failed to read credential for Resource {0}, initiator name {1} representing user name {2} with credential action {3} for the credential type {4}.

Category:
Security

Cause:
LDAP connection failure, or the database is corrupted.

Action:
Verify that LDAP is up and running.

BEA-090806
PKI Keystore at location {0} not found .

Category:
Security

Cause:
Keystore configured at location {0} for the PKI Credential Provider not found.

Action:
Please create the keystore that is configured for the PKI Credential Mapper.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090807
PKI Keystore at location {0} of the type {1} and of type {2} and could not be loaded with the password provided.

Category:
Security

Cause:
Either the keystore password provided was not correct or the keystore type and provider not correctly entered.

Action:
Configure the keystore properly.

BEA-090808
The keystore alias {0} provided does not exist in the keystore configured for the provider.

Category:
Security

Cause:
The alias provided does not exist in the keystore configured for the provider.

Action:
Configure the keystore with the alias provided.

BEA-090809
The key pair could not be retrieved from the keystore with the supplied alias {0} and its password.

Category:
Security

Cause:
Either the alias supplied does not represent a key pair or the password provided is incorrect.

Action:
Please configure the keystore with the key pair properly.

BEA-090810
The keystore alias {0} provided does not represent a certificate entry in the keystore.

Category:
Security

Cause:
The alias provided does not represent a certificate entry in the keystore.

Action:
Configure the keystore with the appropriate certificate entry.

BEA-090812
Could not create a {0} keystore instance for provider {1}. Exception: {2}

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
{0} is not a valid keystore type or keystore provider {1} was not properly configured.

Action:
Verify that the correct keystore type was specified and that the keystore provider is correctly specified in the java.security file.

BEA-090813
DefaultCredentialMapperImpl.getCurrentMappingResourceID failed: No such resource maps list cursor available

Category:
Security

Cause:
Cursor is invalid.

Action:
Verify that the cursor was returned from the listMappings method.

BEA-090815
The password provided for the keystore configured for the PKICredential Mapper was null.

Category:
Security

Cause:
The keystore password provided for the PKI Credential Mapper cannot be null.

Action:
Enter a valid password for the keystore configured for the PKI Credential Mapper.

BEA-090816
Error creating security configuration runtime: {0}

Category:
Security

Cause:
During initialization, the security runtime registers with the management infrastructure. If this process fails, a management exception is thrown.

Action:
Read the exception text for more information on diagnosing the problem.

BEA-090817
These configuration changes cannot be activated since the domain does not have a default realm configured.

Category:
Security

Cause:
The "DefaultRealm" is not set for the domain's SecurityConfiguration.

Action:
To correct the problem, set the "DefaultRealm" for the domain's SecurityConfiguration to one of its realms. If it does not have any realms, create and configure one.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090820
The internal variable {0} is null and it should not be.

Category:
Security

Cause:
Unknown.

Action:
This exception is an internal WebLogic Server error. Contact BEA support.

BEA-090821
The configured CertPathBuilder provider returned an unordered CertPath. {0} The CertPath is {1}

Category:
Security

Cause:
The configured CertPathBuilder provider has a bug. It should never return an unordered CertPath.

Action:
Fix the bug in the configured CertPathBuilder.

BEA-090824
Unable to generate SAML Assertion: {0}

Category:
Security

Cause:
The SAML assertion could not be generated due to incorrect SAML configuration or missing/incorrect parameters supplied to the assertion generator.

Action:
Check the SAML configuration.

BEA-090827
LDIF template file {1} was empty. The WebLogic provider {0} has been bootstrapped but has not been initialized with any LDIF data.

Category:
Security

Cause:
A WebLogic provider LDIF template file may have been overwritten with an empty file.

Action:
If the server boots successfully, no action is needed. If the server does not boot successfully then an attempt should be made to recover non-empty LDIFT template file from the WebLogic Server kit.

BEA-090828
Identity Assertion type cannot be null

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The token type was null.

Action:
Null should not be passed as the token type.

BEA-090829
Identity Assertion token cannot be null

Category:
Security

Cause:
The identity assertion token was null.

Action:
Null should not be passed as the token.

BEA-090830
Identity Assertion type of {0} is not a valid token type for the LDAP X509 Identity Assertion provider.

Category:
Security

Cause:
The token type passed in did not match the LDAP X509 Identity Assertion token type.

Action:
Pass in the correct token type for the LDAP X509 Identity Assertion provider.

BEA-090831
Unrecognized Callback

Category:
Security

Cause:
Callback type is not supported.

Action:
Verify that the LoginModule for the configured Authentication provider is only passing a NameCallback when calling the handle method.

BEA-090832
No matching certificate found in the LDAP directory.

Category:
Security

Cause:
No matching certificate were found in the LDAP directory.

Action:
Verify that the appropriate certificates are present in the configured LDAP directory.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090833
No certificates found in the LDAP directory.

Category:
Security

Cause:
No certificates were found in the LDAP directory.

Action:
Verify that the appropriate certificates are present in the configured LDAP directory.

BEA-090834
No LDAP connection could be established.

Category:
Security

Cause:
The connection parameters provided were either not correct or the LDAP was offline.

Action:
Verify that the connection parameters provided are correct and the LDAP server is running.

BEA-090835
Required parameter not supplied when performing the management operation on the PKI Credential Provider.

Category:
Security

Cause:
A required parameter was null.

Action:
Please call the management operations with the appropriate parameters.

BEA-090836
The Keystore provider configured for PKICredential Mapper does not exist at location {0}.

Category:
Security

Cause:
The file {0} does not exist.

Action:
To use the PKICredentialProvider please point to an existing keystore. Reboot the server.

BEA-090837
The configured keystore location for the PKI Credential Mapper is either null or empty.

Category:
Security

Cause:
The PKI Credential provider location value was either set to null or empty.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Set the PKI Credential provider keystore location to a valid keystore location.

BEA-090841
SAMLServlet: Unexpected exception while handling {0} request.

Category:
Security

Cause:
SAML providers not configured correctly, internal server error, or malformed request.

Action:
Check SAML configuration and server status. If configuration is OK and server is operating normally, enable SAML debug logging for more information.

BEA-090842
SAMLServletAuthenticationFilter: Unexpected exception.

Category:
Security

Cause:
SAML providers not configured correctly, internal server error, or malformed request.

Action:
Check SAML configuration and server operation. If problem persists, enable SAML debug logging for more information.

BEA-090843
{0} provider initialization failed: {1} parameter is null.

Category:
Security

Cause:
Internal server error.

Action:
Try restarting server.

BEA-090844
{0} provider initialization failed: Invalid {1} property "{2}" for "{3}".

Category:
Security

Cause:
Incorrect provider configuration.

Action:
Check and update the indicated provider property.

BEA-090845
{0} provider initialization failed: Missing {1} property for "{2}".

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Invalid provider configuration.

Action:
Check and update the indicated provider property.

BEA-090846
{0} provider initialization failed: Invalid {1} attribute "{2}".

Category:
Security

Cause:
Incorrect provider configuration.

Action:
Check and update the indicated provider attribute.

BEA-090847
{0} provider initialization failed: Missing {1} attribute.

Category:
Security

Cause:
Invalid provider configuration.

Action:
Check and update the indicated provider attribute.

BEA-090848
{0} provider initialization failed: Unexpected exception.

Category:
Security

Cause:
Internal server error.

Action:
Check server status.

BEA-090849
{0} provider initialization failed: Exception while initializing XML parsers.

Category:
Security

Cause:
Internal server error.

Action:
Check server.

BEA-090851
The {0} provider is initialized.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
See the message body.

Action:
No action is required.

BEA-090853
SAMLIdentityAsserter initialization failed: Could not instantiate/initialize the used assertion cache class: {0}.

Category:
Security

Cause:
Invalid class name configured, class is not visible to the class loader, or initialization parameters are incorrect..

Action:
Check configuration of class name and initialization parameters. Check that class is installed in a valid location.

BEA-090854
{0} provider initialization failed: Could not retrieve credentials for {1}.

Category:
Security

Cause:
SSL identity not configured for server.

Action:
Check SSL configuration.

BEA-090856
{0} configuration update failed: Provider settings updated while not initialized.

Category:
Security

Cause:
Internal server error.

Action:
Check server.

BEA-090857
{0} provider initialization failed: Could not register MBean update listener.

Category:
Security

Cause:
Internal server error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check server.

BEA-090863
There was an error in the SAML CredentialMapper Cache subsystem. The exception is {0}.

Category:
Security

Cause:
The SAML Cache could have been misconfigured.

Action:
Please check the SAML Cache parameters and restart the server.

BEA-090869
The PolicyConsumer "{0}" returned an error: {1}.

Category:
Security

Cause:
There are multiple possible causes.

Action:
Carefully read the returned error to determine if any action is required.

BEA-090871
The RoleConsumer "{0}" returned an error: {1}.

Category:
Security

Cause:
There are multiple possible causes.

Action:
Carefully read the returned error to determine if any action is required.

BEA-090872
The {0} service can not be found for {1}

Category:
Security

Cause:
A null was returned when doing a service lookup

Action:
Check the configuration to see that the missing service was actually configured.

BEA-090873
Expected a {0} object but did not get one.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Possible configuration problem.

Action:
Check configuration.

BEA-090874
{0} returned a null {1}.

Category:
Security

Cause:
This should never happen.

Action:
Examine the specific objects referenced in the error message to see what may be the cause.

BEA-090875
Null parameter supplied to method {0}

Category:
Security

Cause:
A parameter was not correctly specified

Action:
This is most likely a coding error.

BEA-090876
{0}Consumer not configured

Category:
Security

Cause:
An attempt was made to reference a Consumer but none are configured

Action:
This is most likely a configuration error.

BEA-090878
Unknown token type: {0}

Category:
Security

Cause:
Likely caused by the token type not being properly configured.

Action:
This is most likely a configuration error.

BEA-090879
The certificate for the imported alias {0} is already in registry, certificate not imported

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
None

Action:
No action required.

BEA-090881
Management operation could not be performed

Category:
Security

Cause:
The administration server is not reachable.

Action:
Check that the administration server is running and available on the network.

BEA-090883
Resource name is null or empty.

Category:
Security

Cause:
Resource name should not be null or empty.

Action:
Check that the resource name is not null or empty.

BEA-090884
User name is null or empty.

Category:
Security

Cause:
User name should not be null or empty.

Action:
Check that the User name is not null or empty.

BEA-090885
Remote user name is null or empty.

Category:
Security

Cause:
Remote user name should not be null or empty.

Action:
Check that the Remote user name is not null or empty.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090886
List number should not be negative.

Category:
Security

Cause:
List number should not be negative.

Action:
Check that the list number is not negative.

BEA-090887
Can not find member {0} from group {1}.

Category:
Security

Cause:
Member {0} not exit in group {1}.

Action:
Check the group members.

BEA-090897
A failure occurred attempting to update XACML global policies for security provider {0}.

Category:
Security

Cause:
An exception occurred attempting to update XACML global policies.

Action:
Examine the exception and correct the cause.

BEA-090899
User attribute name cannot be null.

Category:
Security

Cause:
User attribute name is null for the request.

Action:
Please pass in user attribute name which is not null.

BEA-090900
User attribute name is not supported for specified operation.

Category:
Security

Cause:
User attribute name is not supported.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Please pass in user attribute name which is supported. Please refer to documentation for details.

BEA-090901
Invalid group name: {0}. Can not contain {1}.

Category:
Security

Cause:
Improper usage of {1}.

Action:
Never use a group name carrying {1}.

BEA-090902
The certificate chain received from {0} contained a V1 certificate which cannot be a CA.

Category:
Security

Cause:
The certificate chain received by the peer contained a V1 certificate which cannot be a CA. This is rejected by the basic constraints checking for strong and strict and not allowing V1 certificates as CAs, which protects against a specific certificate chain attack on SSL.

Action:
The peer certificate chain needs to be looked at carefully to determine which certificate is not correct. If the certificate chain really is from a valid peer, you should look at updating the peer certificate chain with valid CA certificates. If this is not possible, you can disable the basic constraints checking to allow the certificate chain to be accepted and allows this vulnerability to be exploited.

BEA-090905
Disabling CryptoJ JCE Provider self-integrity check for better startup performance. To enable this check, specify -D{0}=true

Category:
Security

Cause:
CryptoJ JCE Provider self-integrity check incurs some performance penalty at server startup.

Action:
No action needed.

BEA-090906
Changing the default Random Number Generator in RSA CryptoJ from {1} to {2}. To disable this change, specify -D{0}=true

Category:
Security

Cause:
CryptoJ's default RNG ECDRBG causes certain cryptographic operations slower.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action needed.

BEA-090907
Invalid user name: {0}. Can not contain {1}.

Category:
Security

Cause:
Improper usage of {1}.

Action:
Never use a user name carrying {1}.

BEA-090908
Using the default WebLogic SSL Hostname Verifier implementation.

Category:
Security

Cause:
This is an informational message.

Action:
No action is required.

BEA-090909
Using the configured custom SSL Hostname Verifier implementation: {0}.

Category:
Security

Cause:
This is an informational message.

Action:
No action is required.

BEA-090910
Grant statement has invalid syntax: {0}

Category:
Security

Cause:
There is an error in the syntax of the grant statement.

Action:
Verify that the grant statement syntax is correct.

BEA-090911
Permission found in grant statement has invalid syntax: {0}

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
There is an error in the syntax of the permission within the grant statement.

Action:
Verify that the grant statement permission syntax is correct.

BEA-090912
Attempting to check revocation status for certificate with subject: {0}

Category:
Security

Cause:
X.509 certificate revocation checking is enabled.

Action:
No action is required.

BEA-090913
Unknown revocation status not causing failure for certificate with subject: {0}

Category:
Security

Cause:
X.509 certificate revocation checking is enabled, however, certificate revocation status cannot be determined, and is configured not to fail on an unknown status.

Action:
If validation failure is required, configure certificate revocation status to fail on an unknown status. To determine why the status is unknown, enable debug logging.

BEA-090914
Certificate revocation status: {0}

Category:
Security

Cause:
X.509 certificate revocation checking is enabled.

Action:
No action is required.

BEA-090915
Nonce was ignored by the OCSP responder, forcing certificate revocation status to be ignored and considered unknown: {0}.

Category:
Security

Cause:
X.509 certificate revocation checking is enabled, and OCSP is configured with nonces enabled.

Action:
To enable use of the ignored status, configure to disable OCSP nonces.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090916
Unknown revocation status causing failure for certificate with subject: {0}.

Category:
Security

Cause:
X.509 certificate revocation checking is enabled, certificate revocation status cannot be determined, and is configured to fail on an unknown status.

Action:
If validation failure is not required, configure certificate revocation status to not fail on an unknown status. To determine why the status is unknown, enable debug logging.

BEA-090917
Revoked certificate causing validation failure, certificate with subject: {0}.

Category:
Security

Cause:
X.509 certificate revocation checking is enabled, and the checked certificate was reported revoked.

Action:
Contact the certificate presenter (for example, SSL peer) and request that the revoked certificate be updated.

BEA-090918
Non-revoked certificate with subject: {0}.

Category:
Security

Cause:
X.509 certificate revocation checking is enabled, and the checked certificate was reported NOT revoked.

Action:
No action is required.

BEA-090919
The configured SSL minimum protocol version {0} is invalid or not supported. The minimum has been changed to {1}.

Category:
Security

Cause:
The current SSL implementation does not support the configured SSL minimum protocol version.

Action:
No action is required.

BEA-090920
Certicom SSL is available, however JSSE is being used for SSL, since JSSE has been selected by system property {0}, either explicitly or by default.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The system property {0} is selecting JSSE either explicitly or by default.

Action:
To use Certicom for SSL, set the system property {0} to false.

BEA-090921
JSSE has not been selected by system property {0}, however Certicom SSL is not available, so JSSE is being used for SSL.

Category:
Security

Cause:
Certicom SSL is not available, so JSSE is being used for SSL, even though JSSE was not selected.

Action:
To use Certicom for SSL, install Certicom.

BEA-090922
Certicom SSL is available, however JSSE is being used for SSL, since JSSE has been selected by the SSLMBean.JSSEEnabled attribute, either explicitly or by default.

Category:
Security

Cause:
The attribute SSLMBean.JSSEEnabled is selecting JSSE either explicitly or by default.

Action:
To use Certicom for SSL, set the attribute SSLMBean.JSSEEnabled to false.

BEA-090923
JSSE has not been selected by the SSLMBean.JSSEEnabled attribute, however Certicom SSL is not available, so JSSE is being used for SSL.

Category:
Security

Cause:
Certicom SSL is not available, so JSSE is being used for SSL, even though JSSE was not selected.

Action:
To use Certicom for SSL, install Certicom.

BEA-090924
JSSE has been selected by default, since the SSLMBean is not available.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This usually occurs early in server startup, before Management Service runtime access is available.

Action:
No action is required. Eventually the Management Service will start and normal operation will commence.

BEA-090925
JSSE has been selected by default, since the system property {0} has the invalid value "{1}".

Category:
Security

Cause:
The system property {0} was not set to "true" or "false".

Action:
Change the system property {0} value to be either "true" or "false".

BEA-090926
Illegal key store source value [keyStoreType="{0}", source="{1}", exception="{2}", message="{3}"]

Category:
Security

Cause:
The configured key store source value is not valid for the key store type.

Action:
Correct the key store source value, ensuring that the source is appropriate for the key store type. For example, the "jks" key store type requires that the source be a file path to an existing key store file.

BEA-090927
Illegal or unknown key store type value [keyStoreType="{0}", source="{1}"]

Category:
Security

Cause:
The configured key store type value is not recognized.

Action:
Correct the key store type value. For example, the "jks" key store type requires the type value to be "jks".

BEA-090928
Unable to instantiate key store [keyStoreType="{0}", provider="{1}", exception="{2}", message="{3}"]

Category:
Security

Cause:
Key store instantiation failure usually occurs because no appropriate specified or default provider is available. See the exception for details.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify that key store type is correct, and that a supporting Java Cryptography Architecture (JCA) provider is available in the Java Runtime Environment. A "jks" key store provider is usually available by default. An Oracle Key Store Service (type "kss") provider is only available if Oracle Java Required Files (JRF) is installed.

BEA-090929
Unable to load key store [keyStoreType="{0}", source="{1}", exception="{2}", message="{3}"]

Category:
Security

Cause:
A key store could fail to load due to an invalid source or password. Since key store instantiation succeeded, the key store type is valid. See the exception for details.

Action:
Check the configured key store source and password values.

BEA-090930
One of the Custom Identity Key Store attributes is not set on the channel override (NetworkAccessPointMBean). If any of the following attributes are set, then all of these attributes must be set: CustomIdentityKeyStoreFileName, CustomIdentityKeyStoreType, and either CustomIdentityKeyStorePassPhrase or CustomIdentityKeyStorePassPhraseEncrypted.

Category:
Security

Cause:
One of the following Custom Identity Key Store attributes are not set: CustomIdentityKeyStoreFileName, CustomIdentityKeyStoreType, and either CustomIdentityKeyStorePassPhrase or CustomIdentityKeyStorePassPhraseEncrypted.

Action:
Ensure all of the following attributes are set: CustomIdentityKeyStoreFileName, CustomIdentityKeyStoreType, and either CustomIdentityKeyStorePassPhrase or CustomIdentityKeyStorePassPhraseEncrypted.

BEA-090931
When overriding Custom Identity Key Store attributes, ChannelIdentityCustomized must be enabled.

Category:
Security

Cause:
ChannelIdentityCustomized is not enabled, and must be when the following Custom Identity Key Store attributes are set: CustomIdentityKeyStoreFileName, CustomIdentityKeyStoreType, and either CustomIdentityKeyStorePassPhrase or CustomIdentityKeyStorePassPhraseEncrypted.

Action:
Enable ChannelIdentityCustomized.

BEA-090932
When overriding Custom Identity Key Store attributes, CustomPrivateKeyAlias must be set on the channel override (NetworkAccessPointMBean).

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
CustomPrivateKeyAlias is not set on the NetworkAccessPointMBean, and must be when the following Custom Identity Key Store attributes are set: CustomIdentityKeyStoreFileName, CustomIdentityKeyStoreType, and either CustomIdentityKeyStorePassPhrase or CustomIdentityKeyStorePassPhraseEncrypted.

Action:
Set the CustomPrivateKeyAlias attribute on the NetworkAccessPointMBean.

BEA-090933
Unable to obtain private key with alias {2} from {1} keystore file : {0}

Category:
Security

Cause:
Either KeyStoreFileName or KeyStorePassPhrase or KeyStoreAlias or KeyStore private key password is incorrect.

Action:
Verify that the path to the keystore, the keystore type, the password for the keystore, the alias for the keystore, and the password for the private key were specified correctly.

BEA-090934
Loading certificates and private key from {1} keystore file {0} caused an Exception :{2}

Category:
Security

Cause:
Either KeyStoreFileName or KeyStorePassPhrase or KeyStoreAlias or KeyStore private key password is incorrect.

Action:
Verify that the path to the keystore, the keystore type, the password for the keystore, the alias for the keystore, and the password for the private key were specified correctly.

BEA-090935
Could not load a {1} keystore from the file {0}. Exception: {2}

Category:
Security

Cause:
There is an I/O or format problem with the keystore data.

Action:
Verify that the path to the keystore, the keystore type, and the password for the keystore were specified correctly. Note that some keystore types (for example, JKS) do not require a password for read-only access. Read the exception text for more help on diagnosing the problem. Reboot the server after correcting the problem.

BEA-090936
Security restarting security realm: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
This message is for informational purposes.

Action:
Verify that the correct security realm is being restarted.

BEA-090937
Security completed restarting security realm: {0}

Category:
Security

Cause:
This message is for informational purposes.

Action:
Verify that the correct security realm is restarted.

BEA-090938
Authentication failure: The specified user failed to log in.

Category:
Security

Cause:
The specified username, password, or both are incorrect.

Action:
Verify the username and password.

BEA-090939
The JWTToken is invalid.

Category:
Security

Cause:
JWT token could not satisfy the rule.

Action:
See the log for detailed information and take appropriate action.

BEA-090940
JWTIdentityAsserter received unknown token data, data should by byte[].

Category:
Security

Cause:
An invalid JWT token was supplied.

Action:
Supply a valid JWT token.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090941
The JWT token cannot pass the sign validation.

Category:
Security

Cause:
An invalid JWT token was supplied.

Action:
Supply a valid JWT token.

BEA-090942
Partitions require a realm with updated default role mapper and authorizations policies. The realm {0} does not contain the correct default policies. Create a new realm and reapply any custom policies.

Category:
Security

Cause:
Partition support requires updated default role mapping and authorization policies.

Action:
Create a new realm with the same providers as the existing realm. Transfer the custom security policies from the old realm to the new realm and set the partition realm attribute to point to the new realm.

BEA-090943
The provider {1} in realm {0} does not support identity domains via the IdentityDomainAwareProviderMBean interface. If identity domains are configured in the domain, then all role mapper, authorization, credential mapper, and audit providers must support this interface.

Category:
Security

Cause:
The configured providers do not support identity domains.

Action:
Ensure that all configured role mapper, authorization, credential mapper, and audit providers support identity domains. Remove any providers that do not support identity domains.

BEA-090944
Inconsistent security configuration, the provider {1} in security realm {0} does not support identity domains via the IdentityDomainAwareProviderMBean interface. If identity domains are configured in the domain, then all role mapper, authorization, credential mapper, and audit providers must support this interface.

Category:
Security

Cause:
The configured providers do not support identity domains.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that all configured role mapper, authorization, credential mapper, and audit providers support identity domains. Remove any providers that do not support identity domains.

BEA-090945
Security shutting down retired instance of security realm: {0}

Category:
Security

Cause:
This message is for informational purposes.

Action:
No action is required.

BEA-090946
Security pre-initializing using security realm: {0}

Category:
Security

Cause:
This message is for informational purposes.

Action:
Verify that the correct security realm is configured.

BEA-090947
Security post-initializing using security realm: {0}

Category:
Security

Cause:
This message is for informational purposes.

Action:
Verify that the correct security realm is configured.

BEA-090948
Security starting security realm: {0}

Category:
Security

Cause:
This message is for informational purposes.

Action:
Verify that the correct security realm is being restarted.

BEA-090949
Security completed starting security realm: {0}

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This message is for informational purposes.

Action:
Verify that the correct security realm is started.

BEA-090950
The realm "{0}" failed during shut down: {1}.

Category:
Security

Cause:
There are multiple possible causes.

Action:
Carefully read the returned error to determine if any action is required.

BEA-090951
Failed operation using security realm: {0}

Category:
Security

Cause:
There are multiple possible causes.

Action:
Carefully read the returned error to determine if any action is required.

BEA-090952
Provider configured for identity domain(s) "{0}" but login was supplied identity domain {1}

Category:
Security

Cause:
The partition or security configuration may be configured with a different identity domain than the provider.

Action:
None required if the realm handles multiple identity domains. Otherwise, the security configuration may have inconsistent identity domains.

BEA-090953
These configuration changes cannot be activated because the Administrative Identity Domain must be set on the Security Configuration when Identity Domains are in use.

Category:
Security

Cause:
The "Administrative Identity Domain" attribute is not set for the domain's SecurityConfiguration.

Action:
To correct the problem, set the "AdministrativeIdentityDomain" for the domain's SecurityConfiguration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090954
These configuration changes cannot be activated because the Primary Identity Domain must be set on Partition {0} when Identity Domains are in use.

Category:
Security

Cause:
The "Primary Identity Domain" attribute is not set for the specified Partition.

Action:
To correct the problem, set the "PrimaryIdentityDomain" for the specified Partition.

BEA-090955
These configuration changes cannot be activated because there is no authenticator configured to support the "{0}" Identity Domain value.

Category:
Security

Cause:
No authenticator in this realm is configured to support the specified Identity Domain value.

Action:
To correct the problem, configure one of the authenticator providers to support the specified identity domain. This can either be a WebLogic Server provider or a custom provider.

BEA-090956
Both permissions.xml and a deployment descriptor grant were found.

Category:
Security

Cause:
Both permissions.xml and a deployment descriptor grant were used to declare permissions.

Action:
Use either permissions.xml or a deployment descriptor grant to declare permissions for the application. Use only one and remove the other before redeployment.

BEA-090957
One or more of the declared permissions in permissions.xml are not allowed.

Category:
Security

Cause:
The application's permissions.xml file contains one or more permissions which are not allowed.

Action:
Remove the prohibited permissions from the permissions.xml file before redeploying the application.

BEA-090958
Security permissions declared in the "{0}" deployment descriptor are not allowed due to the server''s configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The server is configured to not allow Java security permissions to be declared in the Weblogic deployment descriptors.

Action:
Remove Java security permissions from the deployment descriptor or change the server's security configuration before redeployment.

BEA-090959
Java EE packaged permissions are not allowed due to the server''s configuration.

Category:
Security

Cause:
The server is configured to not allow Java EE packaged permissions in the application.

Action:
Remove permissions.xml or change the server's security configuration before redeployment.

BEA-090960
The serverr''s SSL configuration is not available. There will potentially be SSL handshake failures.

Category:
Security

Cause:
The server has not been able to load its SSL configuration. This usually occurs early in server startup, before Management Service runtime access is available.

Action:
Verify that the Administration Server is running. If the Administration Server non-secure port is disabled, verify that the Managed Server default SSL configuration is sufficient to handshake with the Administration Server over the SSL port.

BEA-090961
These configuration changes cannot be activated because the realm "{0}" already exists.

Category:
Security

Cause:
There is more than one realm named "{0}" configured for the domain's SecurityConfiguration.

Action:
To correct the problem, change the name of each realm configured for the domain's SecurityConfiguration to be a unique name.

BEA-090962
These configuration changes cannot be activated because the realm "{0}" is not valid.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The realm "{0}" is not properly configured for the domain's SecurityConfiguration. See the nested exceptions that accompany this error for details.

Action:
To correct the problem, review and address the nested exceptions that accompany this error.

BEA-090963
The {0} provider imports a modified entry: {1}

Category:
Security

Cause:
The security provider needs to be modified because of the overwrite flag is open.

Action:
Modified the imported data from the existing one.

BEA-090964
The connection to the datasource using "{0}" could not be established due to the following error: {1}.

Category:
Security

Cause:
There are multiple possible causes.

Action:
Read the returned exception to determine if any action is required.

BEA-090965
Unable to create policy with type {0}. Got exception {1}.

Category:
Security

Cause:
An internal WebLogic server error occurred when creating policy type {0}.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-090966
A failure has occurred checking for WebLogic Kernel Permission: {0}

Category:
Security

Cause:
An attempt to perform an action that requires privileges has failed.

Action:
Read the returned exception to determine what action is required.

BEA-090967
LDAP test connection failed: {0} not configured.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The connection parameters provided were incomplete.

Action:
Verify that the connection parameters provided are complete.

BEA-090968
Error processing test connection parameters {0}: {1}

Category:
Security

Cause:
The connection parameters provided were incorrect.

Action:
Verify that the connection parameters provided are correct.

BEA-090969
Identity Assertion type cannot be null

Category:
Security

Cause:
The token type was null.

Action:
Null should not be passed as the token type.

BEA-090970
Identity Assertion token cannot be null

Category:
Security

Cause:
The identity assertion token was null.

Action:
Null should not be passed as the token.

BEA-090971
Identity Assertion type of {0} is not a valid token type for the OpenID Connect Identity Assertion provider.

Category:
Security

Cause:
The token type passed in did not match the OpenID Connect Identity Assertion token type.

Action:
Pass in the correct token type for the OpenID Connect Identity Assertion provider.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090972
Resource type already registered: "{0}"

Category:
Security

Cause:
The supplied resource type has already been registered.

Action:
Specify a valid resource type.

BEA-090973
Ldap request wait exceeds time limit {0} milliseconds, try number count {1}

Category:
Security

Cause:
Ldap request takes unexpected long time.

Action:
None required. Otherwise check if the Ldap authentication provider configuration is optimized or Ldap server issue.

BEA-090974
File does not exist {0}

Category:
Security

Cause:
SerializedSystemIni.dat does not exist in the specified location.

Action:
Create a SerializedSystemIni.dat in the specified location if needed.

BEA-090975
The connection between the WebLogic servers cannot be authorized since the nonce value has expired. Verify that clock skew has not occurred between the servers in the domain.

Category:
Security

Cause:
Clock skew between the two servers may cause the client nonce to be expired when it is validated on the server.

Action:
Verify that the clocks on the servers in the domain are in agreement. Optionally, enable the Network Time Protocol daemon on the servers in the domain.

BEA-090976
Secure Mode is enabled but no auditing provider is configured in realm: {0}.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Secure Mode is enabled but no auditing provider is configured.

Action:
None required otherwise set SecureModeMBean WarnOnAuditing to false to avoid this message.

BEA-090977
Secure Mode is enabled but the Default Auditor logging level does not include WARNING, ERROR, and FAILURE audit records in realm: {0}.

Category:
Security

Cause:
Secure Mode is enabled but the Default Auditor logging level does not include WARNING, ERROR, and FAILURE audit records.

Action:
None required otherwise set SecureModeMBean WarnOnAuditing to false to avoid this message.

BEA-090978
Secure Mode is enabled but user lockout settings are not secure in realm: {0}, i.e. LockoutThreshold should not be greater than 5, LockoutDuration should not be less than 30.

Category:
Security

Cause:
Secure Mode is enabled but user lockout is not enabled or lockout settings are less restrictive than default.

Action:
This is a warning message, no action is required.

BEA-090979
Secure Mode is enabled but unencrypted password is used in command line, i.e. system property weblogic.management.password is set.

Category:
Security

Cause:
Secure Mode is enabled but unencrypted password is used in command line.

Action:
This is a warning message, no action is required.

BEA-090980
Secure Mode is enabled but no password validator is configured in realm: {0}.

Category:
Security

Cause:
Secure Mode is enabled but no password validator is configured.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
This is a warning message, no action is required.

BEA-090981
Secure Mode is enabled but the Security Manager is not enabled.

Category:
Security

Cause:
Secure Mode is enabled but the Security Manager is not enabled.

Action:
None required otherwise set SecureModeMBean WarnOnJavaSecurityManager to false to avoid this message.

BEA-090982
Secure Mode is enabled but PostBind is not enabled for machine : {0} when unix machine is configured and port {1} < 1024 is used.

Category:
Security

Cause:
Secure Mode is enabled but PostBind is not enabled when unix machine is configured and port < 1024 is used.

Action:
This is a warning message, no action is required.

BEA-090983
Secure Mode is enabled but the the administration port is not enabled.

Category:
Security

Cause:
Secure Mode is enabled but the the administration port is not enabled.

Action:
This is a warning message, no action is required.

BEA-090984
Secure Mode is enabled but the fie or directory {0} owner {1} does not match the domain directory owner {2}.

Category:
Security

Cause:
Secure Mode is enabled but the file or directory owner does not match the domain directory owner.

Action:
None required otherwise set SecureModeMBean WarnOnInsecureFileSystem to false to avoid this message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090985
Secure Mode is enabled but the the file or directory {0} is insecure since its permission is not a minimum of umask 027.

Category:
Security

Cause:
Secure Mode is enabled but the the file or directory permission is insecure.

Action:
None required otherwise change the file or directory permission to be a minimum of umask 027, or set SecureModeMBean WarnOnInsecureFileSystem to false to avoid this message.

BEA-090986
Secure Mode requires a realm with updated default authorizations policies. The realm {0} does not contain the correct default policies. Create a new realm and reapply any custom policies.

Category:
Security

Cause:
Secure Mode support requires updated default authorization policies.

Action:
Create a new realm with the same providers as the existing realm. Transfer the custom security policies from the old realm to the new realm and set the realm attribute to point to the new realm.

BEA-090987
SSLv3 is enabled by the system property {0} in secure mode. SSLv3 is vulnerable and should not be enabled.

Category:
Security

Cause:
SSLv3 is enabled by the system property in secure mode.

Action:
Enable a secure TLS version such as TLSv1.2 or turn off warning on insecure SSL configuration in secure mode.

BEA-090988
Basic Constraints extension validation is turned off by the system property {0}=off in secure mode.

Category:
Security

Cause:
Basic Constraints extension validation is turned off by the system property {0}=off in secure mode.

Action:
Turn on Basic Constraints extension validation, {0}=strong or {0}=true or {0}=strict, or turn off warning on insecure SSL configuration in secure mode.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090989
SSL hostname verification is disabled by the system property {0} in secure mode.

Category:
Security

Cause:
SSL hostname verification is disabled by the system property {0} in secure mode.

Action:
Enable SSL host name verification or turn off warning on insecure SSL configuration in secure mode.

BEA-090990
SSL hostname verification is disabled by the SSL configuration of server {0} in secure mode.

Category:
Security

Cause:
SSL hostname verification is disabled by the SSL configuration of server {0} in secure mode.

Action:
Enable SSL host name verification or turn off warning on insecure SSL configuration in secure mode.

BEA-090991
SSL hostname verification is disabled by the SSL configuration of server channel {0} in secure mode.

Category:
Security

Cause:
SSL hostname verification is disabled by the SSL configuration of server channel {0} in secure mode.

Action:
Enable SSL host name verification or turn off warning on insecure SSL configuration in secure mode.

BEA-090992
SSLv3 is enabled as the minimum TLS protocol version by the system property {0} in secure mode.

Category:
Security

Cause:
SSLv3 is enabled as the minimum TLS protocol version by the system property {0} in secure mode.

Action:
Configure a secure TLS version such as TLSv1.2 as the minimum TLS protocol version or turn off warning on insecure SSL configuration in secure mode.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-090993
SSLv3 is enabled as the minimum TLS protocol version by the SSL configuration of server {0} in secure mode.

Category:
Security

Cause:
SSLv3 is enabled as the minimum TLS protocol version by the SSL configuration of server {0} in secure mode.

Action:
Configure a secure TLS version such as TLSv1.2 as the minimum TLS protocol version or turn off warning on insecure SSL configuration in secure mode.

BEA-090994
SSLv3 is enabled as the minimum TLS protocol version by the SSL configuration of server channel {0} in secure mode.

Category:
Security

Cause:
SSLv3 is enabled as the minimum TLS protocol version by the SSL configuration of server channel {0} in secure mode.

Action:
Configure a secure TLS version such as TLSv1.2 as the minimum TLS protocol version or turn off warning on insecure SSL configuration in secure mode.

BEA-090995
Null cipher suites are allowed by the system property {0} in secure mode.

Category:
Security

Cause:
Null cipher suites are allowed by the system property {0} in secure mode.

Action:
Null cipher suites are not secure and should not be allowed or turn off warning on insecure SSL configuration in secure mode.

BEA-090996
Null cipher suites are allowed by the SSL configuration of server {0} in secure mode.

Category:
Security

Cause:
Null cipher suites are allowed by the SSL configuration of server {0} in secure mode.

Action:
Null cipher suites are not secure and should not be allowed or turn off warning on insecure SSL configuration in secure mode.

BEA-090997
Null cipher suites are allowed by the SSL configuration of server channel {0} in secure mode.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Null cipher suites are allowed by the SSL configuration of server channel {0} in secure mode.

Action:
Null cipher suites are not secure and should not be allowed or turn off warning on insecure SSL configuration in secure mode.

BEA-090998
Anonymous cipher suites are allowed by the system property {0} in secure mode.

Category:
Security

Cause:
Anonymous cipher suites are allowed by the system property {0} in secure mode.

Action:
Anonymous cipher suites are not secure and should not be allowed or turn off warning on insecure SSL configuration in secure mode.

BEA-090999
TLS client initiated secure renegotation is enabled by the SSL configuration of server {0} in secure mode.

Category:
Security

Cause:
TLS client initiated secure renegotation is enabled by the SSL configuration of server {0} in secure mode.

Action:
Disable TLS client initiated secure renegotation or turn off warning on insecure SSL configuration in secure mode.

BEA-091000
TLS client initiated secure renegotation is enabled by the SSL configuration of server channel {0} in secure mode.

Category:
Security

Cause:
TLS client initiated secure renegotation is enabled by the SSL configuration of server channel {0} in secure mode.

Action:
Disable TLS client initiated secure renegotation or turn off warning on insecure SSL configuration in secure mode.

BEA-091001
Insecure cipher suites are configured by the SSL configuration of server {0} in secure mode: {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Insecure cipher suites are configured for secure mode.

Action:
Remove the insecure cipher suites {1} or turn off warning on insecure SSL configuration in secure mode.

BEA-091002
Insecure cipher suites are configured by the SSL configuration of server channel {0} in secure mode: {1}.

Category:
Security

Cause:
Insecure cipher suites are configured for secure mode.

Action:
Remove the insecure cipher suites {1} or turn off warning on insecure SSL configuration in secure mode.

BEA-091003
Secure Mode requires that users in the Administrators group do not have obvious user names. Change the user name "{0}" so it is not a commonly used administrator name.

Category:
Security

Cause:
A user that is a member of the Administrators group has an obvious user name.

Action:
Change the user name to non-obvious name.

BEA-091004
Secure Mode requires that the samples are not installed in the WebLogic installation directory.

Category:
Security

Cause:
The WebLogic installation contains the samples directory

Action:
Reinstall WebLogic and do not include the samples when choosing the installation type.

BEA-091005
Boot authentication attempt failed. Retry attempt {0} of {1}

Category:
Security

Cause:
The authentication for the boot user failed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Wait until the server fails to boot and determine if the authentication failure can be corrected. If so, then retry the boot after correcting the authentication failure.

BEA-091006
The WLS SSL-ALPN jars are not found in java.endorsed.dirs directory. The HTTP/2 over SSL (h2) protocol will not be supported.

Category:
Security

Cause:
WLS can't find SSL-ALPN related classes because WLS SSL-ALPN related jars are not found in java.endorsed.dirs directory.

Action:
Check the system property java.endorsed.dirs is configured and make sure WLS SSL-ALPN jars are in the directory.

BEA-091007
The Oracle Identity Cloud Service returned '{0}' 429 status code responses (Too Many Requests) in the last '{1}' seconds.

Category:
Security

Cause:
The Oracle Identity Cloud Service response indicating user has sent too many reqests in a given amount of time.

Action:
No action is required.

BEA-091008
The Oracle Identity Cloud Service returned '{0}' service unavailable or network timeout responses in the last '{1}' seconds.

Category:
Security

Cause:
The Oracle Identity Cloud Service unavailable or timeout caused by network issue or other issues.

Action:
Verify that the network or the Oracle Identity Cloud Service is not experiencing issues.

BEA-096500
Artifact of type SAML2 artifact-04 is not successfully constructed.

Category:
Security

Cause:
The passing parameter {0} was null or its length was not {1}.

Action:
Check the parameters being passed to the SAMLArtifact constructor.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-096501
SAML message returned in samlp:ArtifactResponse is not the right type. It should be of {0} type.

Category:
Security

Cause:
The SAML message that was returned in samlp:ArtifactResponse was not the one that samlp:ArtifactRequest requested.

Action:
Check the remote ARS storage to see if there is a {0} corresponding to the artifact.

BEA-096502
There is no SAML message in returned samlp:ArtifactResponse.

Category:
Security

Cause:
The SAML message may have been deleted because of expiration, or the client has no authority to access it.

Action:
Check the remote ARS storage to see if there is an item corresponding to the artifact.

BEA-096503
The artifact in the HTTP request is null. It should be {0} parameter in the HTTP request.

Category:
Security

Cause:
The artifact in the HTTP request was null. It should be {0} parameter in the HTTP request.

Action:
Check the HTTP request to see if there is a {0} parameter with a non-null value.

BEA-096504
Could not get binding handler of {0} type.

Category:
Security

Cause:
An internal WebLogic Server error occurred while getting the binding handler.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-096505
Could not get SAML response, it should be of {0} type.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The remote service may be down or the message exchange timed out.

Action:
Check the remote service status.

BEA-096506
The SAML response is invalid in the field {0}, expected value is {1}, actual value is {2}.

Category:
Security

Cause:
The SAML response was not the one that the SAML request expected.

Action:
Check the remote service configuration.

BEA-096507
Could not get end point, the entityID is {0}, service type is {1}, end point index is {2}.

Category:
Security

Cause:
The end point was not registered.

Action:
Check the register storage to see if there is such an endpoint.

BEA-096508
Cannot get the key to sign {0}.

Category:
Security

Cause:
There may not be a key to sign {0}.

Action:
Check the local configuration to see if there is a key for signing {0}.

BEA-096509
Cannot get the key to verify the signature of {0}.

Category:
Security

Cause:
There may not be a key to verify the signature of {0}.

Action:
Check the partner registration information to see if there is key for verifying {0}.

BEA-096510
There is no SAML message in the HTTP request, it should be a value of {0} parameter.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
There was no message in the HTTP request with a value of {0}.

Action:
Check the HTTP request to confirm that there is a parameter with a non-null value.

BEA-096511
The certificate chain sent by the SSL server is null or empty.

Category:
Security

Cause:
The remote partner acting as an SSL server did not send a certificate to authenticate itself.

Action:
Check the remote partner to see if it has an SSL certificate to authenticate itself.

BEA-096512
The SSL server cannot be trusted for {0}.

Category:
Security

Cause:
The remote partner acting as an SSL server cannot be trusted.

Action:
Check the SSL certificate that the remote partner uses to authenticate itself.

BEA-096513
Could not get partner, the entityID(or SHA-1 hash value) is {0}.

Category:
Security

Cause:
The partner is not registered.

Action:
Check the register storage to see if there is such a partner.

BEA-096514
Could not get Transport Layer Certificate from partner whose entityId is {0}.

Category:
Security

Cause:
The partner did not register its Transport Layer Certificate information.

Action:
Check the register storage to see if this partner has a Transport Layer Certificate.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-096515
The SSL client is expected to authenticate, but cannot get the key and certificate.

Category:
Security

Cause:
The SSL key and certificate could not be retrieved.

Action:
Check the metadata to see if there is a Transport Layer Certificate and key.

BEA-096516
Could not get SAML signature from the HTTP request, it should be a {0} parameter.

Category:
Security

Cause:
If there is no SAML signature in the HTTP request, there should also be no signature algorithm in the HTTP request.

Action:
Check the HTTP request. The signature and signature algorithm should appear at the same time.

BEA-096517
The SAML message was signed but could not get a signature from it.

Category:
Security

Cause:
The SAML message was signed but there was no signature to retrieve.

Action:
Check the SAML message for the signature.

BEA-096518
The signature is invalid.

Category:
Security

Cause:
The signature was verified but was not valid.

Action:
Provide a valid signature.

BEA-096519
Could not get artifact when storing the SAML message, have no idea whether the SAML message was stored successfully.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
There may have been an error when generating the artifact.

Action:
Check the log files for an error.

BEA-096520
Could not receive a valid SAML request of type "{0}" from HTTP request.

Category:
Security

Cause:
A valid SAML request of type "{0}" was not received from the HTTP request.

Action:
Check whether the configuration of the corresponding partner is correct.

BEA-096521
Could not receive a valid SAML response of type "{0}" from HTTP request.

Category:
Security

Cause:
A valid SAML response of type "{0}" was not retrieved from the HTTP request.

Action:
Check whether the configuration of the corresponding partner is correct.

BEA-096522
Error occurs when signing {0}.

Category:
Security

Cause:
Error occurs when signing {0}.

Action:
Error occurs when signing {0}.

BEA-096523
Authentication failed.

Category:
Security

Cause:
Authentication failed due to an invalid certificate or an invalid username or password.

Action:
Ensure that your certificate or your username and password are correct.

BEA-096524
Invalid Identity Assertion token object for specified token type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
An internal WebLogic server error occurred while determining the token type.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-096525
Signature required but assertion is not signed.

Category:
Security

Cause:
An unsigned SAML assertion was received where the SAML configuration required a signed assertion.

Action:
Check the SAML partner configuration or contact the SAML Identity Provider.

BEA-096526
There must be a subject in assertion.

Category:
Security

Cause:
A SAML assertion was received in which the SAML Subject was not provided.

Action:
Contact the SAML Identity Provider for information on how to correct the problem.

BEA-096527
No SubjectConfirmation in assertion.

Category:
Security

Cause:
A SAML assertion was received in which the SAML Subject Confirmation was not provided.

Action:
Contact the SAML Identity Provider for information on how to correct the problem.

BEA-096528
Unsupported assertion type: {0}.

Category:
Security

Cause:
A SAML assertion was received in which the SAML Subject Confirmation is not supported.

Action:
Contact the SAML Identity Provider for information on how to correct the problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-096529
Signature required but no valid certificate in the specified partner configuration.

Category:
Security

Cause:
A signature was required but the certificate has expired, is not yet valid or is undefined in the specified partner configuration.

Action:
Provide a valid certificate for the partner.

BEA-096530
Cannot get the key to verify the signature.

Category:
Security

Cause:
An improper key was provided.

Action:
Provide a proper key to verify the signature.

BEA-096531
The signature is invalid.

Category:
Security

Cause:
The signature was verified but was not valid.

Action:
Provide a valid signature.

BEA-096532
Invalid version found in the {0} document: {1}.

Category:
Security

Cause:
The sender sent a document that is not version 2.0.

Action:
Fix the SAML sender.

BEA-096533
Certificate in assertion''s keyinfo does not match configured signing certificate.

Category:
Security

Cause:
A SAML assertion was received where the SAML KeyInfo does not match the SAML partner entry.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the SAML partner configuration or contact the SAML Identity Provider.

BEA-096534
No issuer in the assertion.

Category:
Security

Cause:
A SAML assertion was received where the SAML Issuer is not supplied or the SAML Issuer is empty.

Action:
Contact the SAML Identity Provider for information on how to correct the problem.

BEA-096535
The Issuer in {0} is invalid: {1}.

Category:
Security

Cause:
The sender sent an invalid SAML document that contains an invalid Issuer URI.

Action:
Ask the SAML requester to fix this problem.

BEA-096536
Invalid issuer format: {0}.

Category:
Security

Cause:
The sender sent a document that contains an invalid issuer format attribute.

Action:
Ask the SAML requester to send a correct document.

BEA-096537
Assertion is not yet valid ({0} condition).

Category:
Security

Cause:
The received SAML assertion is not yet valid.

Action:
Check the SAML configuration, the system clock or contact the SAML Identity Provider.

BEA-096538
Assertion has expired ({0} condition).

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The received SAML assertion has expired.

Action:
Check the SAML configuration, the system clock or contact the SAML Identity Provider.

BEA-096539
AudienceRestriction condition not satisfied (no matching audience).

Category:
Security

Cause:
The received SAML assertion audience restrictions where not satisfied.

Action:
Check the SAML partner configuration or contact the SAML Identity Provider.

BEA-096540
The assertion: {0} cannot be used again.

Category:
Security

Cause:
The received SAML assertion has already been consumed and cannot be used again.

Action:
Contact the SAML Identity Provider for information on how to correct the problem.

BEA-096541
Web SSO profile must be bearer confirmation method.

Category:
Security

Cause:
A SAML assertion was received where the SAML Subject Confirmation must be of Bearer type.

Action:
Contact the SAML Identity Provider for information on how to correct the problem.

BEA-096542
No NameID in assertion.

Category:
Security

Cause:
A SAML assertion was received in which the SAML Issuer is not supplied or the SAML Issuer is empty.

Action:
Contact the SAML Identity Provider for information on how to correct the problem.

BEA-096543
The partner: {0} does not exist or is disabled.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The partner: {0} does not exist or is disabled.

Action:
Register or enable the specified partner.

BEA-096544
Cannot find identity provider partner, partnerName: {0}, request URI: {1}.

Category:
Security

Cause:
Cannot find identity provider partner, partnerName: {0}, request URI: {1}.

Action:
Check the identity provider partner setting.

BEA-096545
Cannot find single sign-on services for partner: {0}.

Category:
Security

Cause:
No single sign-on services are defined for partner: {0}.

Action:
Define single sign-on services for partner: {0}.

BEA-096546
Cannot get the single sign-on sign key to sign the {0} in the key store.

Category:
Security

Cause:
Either no single sign-on sign key is defined in the local configuration or the key/keystore is invalid.

Action:
Correct the key configuration for SAML services.

BEA-096547
The status code of SAML2 response indicates that the request failed: {0}.

Category:
Security

Cause:
The SAML2 response from the identity provider partner indicates that the request failed.

Action:
Contact the identity provider partner to get the reason.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-096548
Cannot find identity provider partner for issuer URI: {0}.

Category:
Security

Cause:
The identity provider partner for issuer URI: {0} is not defined.

Action:
Define the identity provider partner for issuer URI: {0}.

BEA-096549
Cannot get a valid certificate in partner registry to verify {0} for partner {1}.

Category:
Security

Cause:
The certificate has expired, is not yet valid or is undefined for the specified partner.

Action:
Provide a valid certificate for the partner.

BEA-096550
Failed to create session for identity: {0}.

Category:
Security

Cause:
This usually is caused by one of the LoginSessionListeners failing to create a session.

Action:
Ensure that all the listeners work properly or try to re-install.

BEA-096551
{0} binding of local configuration is not enabled.

Category:
Security

Cause:
The binding: {0} of the local configuration is not enabled.

Action:
Enable the binding: {0} for the local configuration.

BEA-096552
Illegal destination: {0} of assertion response.

Category:
Security

Cause:
The SAML2 response received from the identity provider partner is illegal.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Contact the identity provider partner to ensure that the generated response is correct.

BEA-096554
Cannot find request for InResponseTo: {0} in response.

Category:
Security

Cause:
The SAML2 response received from the identity provider partner is illegal.

Action:
Contact the identity provider partner to ensure that the generated response is correct.

BEA-096555
Attribute: {0} should not be empty.

Category:
Security

Cause:
The SAML2 response received from the identity provider partner is illegal.

Action:
Contact the identity provider partner to ensure that the generated response is correct.

BEA-096556
Attribute: {0} should be omitted.

Category:
Security

Cause:
The SAML2 response received from the identity provider partner is illegal.

Action:
Contact the identity provider partner to ensure that the generated response is correct.

BEA-096557
Illegal confirmation method: {0}.

Category:
Security

Cause:
The SAML2 response received from the identity provider partner is illegal.

Action:
Contact the identity provider partner to ensure that the generated response is correct.

BEA-096558
Illegal Recipient: {0} for the subject confirmation data.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The SAML2 response received from the identity provider partner is illegal.

Action:
Contact the identity provider partner to ensure that the generated response is correct.

BEA-096559
Illegal InResponseTo: {0} for the subject confirmation.

Category:
Security

Cause:
The SAML2 response received from the identity provider partner is illegal.

Action:
Contact the identity provider partner to ensure that the generated response is correct.

BEA-096560
The Issuer element cannot have NameQualifier, SPNameQualifer and SPProviderID.

Category:
Security

Cause:
The SAML requester sent a document that contains an invalid <Issuer>.

Action:
Ask the SAML Requester to fix this.

BEA-096561
Identity provider partner: {0} is not enabled.

Category:
Security

Cause:
The specified identity provider partner is not enabled.

Action:
Enable the identity provider partner.

BEA-096562
Errors occurred when sending {0}.

Category:
Security

Cause:
An internal WebLogic server error occurred when sending A SAML assertion.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-096563
Errors occurred when receiving {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
An internal WebLogic Server error occurred when A SAML assertion was requested.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-096565
Artifact requester authentication failed.

Category:
Security

Cause:
There was an invalid basic auth/certificate.

Action:
Check the log for more details and take appropriate action.

BEA-096566
The SAML2 identity provider service is disabled.

Category:
Security

Cause:
The SAML2 identity provider service is disabled in the local configuration, but a request was sent to this service.

Action:
Enable the identity provider in the local configuration.

BEA-096567
Cannot find service provider partner with the specified URI {0}.

Category:
Security

Cause:
The partner may be misconfigured in the partner registry, or this issuer is not enabled/ configured in the registry.

Action:
Configure the partner correctly in the partner registry, or just ignore it if this issuer should not be served. It could also be errors in the service provider that issues this request.

BEA-096568
The service provider partner {0} is disabled.

Category:
Security

Cause:
The specified service provider partner is disabled in the partner registry.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Enable the partner in the partner registry.

BEA-096569
Cannot authenticate user in passive mode.

Category:
Security

Cause:
The AuthnRequest wants the user to be authenticated in passive mode, but the Identity Provider is not able to do this.

Action:
Ensure that the service provider does not send passive requests, or just ignore this error.

BEA-096570
The user is accessing the login return URL of SAML2 service, however, this user is not authenticated.

Category:
Security

Cause:
A user accidentally accessed this page or bookmarked it, or the login application is behaving incorrectly.

Action:
Fix the login application.

BEA-096571
There is no <AuthnRequest> object in user''s session.

Category:
Security

Cause:
The user's session may have expired. The user must do the single sign-on process from the very beginning. This could also be caused by an incorrect login application.

Action:
Start the single sign-on process from the beginning, or fix the login application.

BEA-096572
The user is accessing the Identity Provider initiator service, but is not authenticated yet.

Category:
Security

Cause:
The user accidentally accessed this page or bookmarked it, or the login application is behaving incorrectly.

Action:
Fix the login application or the page links to this URL.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-096573
The Identity provider-initiated single sign-on requires a parameter {0}, but the request does not have one.

Category:
Security

Cause:
The user or the link did not append the parameter.

Action:
Append the parameter in the request.

BEA-096574
Cannot find partner with name: {0}

Category:
Security

Cause:
The partner with name {0} does not exist in the partner registry.

Action:
Add a partner with the indicated name, or rename a partner to this name.

BEA-096575
The URL for relay state is too long.

Category:
Security

Cause:
The service provider-initiated single sign-on requester sent a request URL longer than 80 bytes.

Action:
If the URL for the service provider is too long, do not send it.

BEA-096576
Received a SAML document that is not a AuthnRequest document, but {0}.

Category:
Security

Cause:
The SAML requester sent an invalid document to the identity provider single sign-on service.

Action:
Ask the requester to send a valid document.

BEA-096577
Failed to receive {0} document from the requester.

Category:
Security

Cause:
Review other messages in the log for the cause.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Fix the error in the document or network.

BEA-096578
Cannot generate assertion for the user.

Category:
Security

Cause:
There may be an error in the credential mapper, or the SAML2 credential mapper is not configured correctly.

Action:
Configure the SAML2 credential mapper correctly.

BEA-096579
Failed to unmarshal the assertion from the credential mapper.

Category:
Security

Cause:
An internal WebLogic Server error occurred during unmarshaling.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-096580
No assertion consumer services configured in the {0} partner.

Category:
Security

Cause:
No assertion consumer services are configured in the partner.

Action:
Configure the ACS service for this partner.

BEA-096581
The destination attribute of <AuthnRequest> does not match local configuration.

Category:
Security

Cause:
Either the request was sent to the wrong place, or the request document is wrong.

Action:
Fix the SAML requester to match the destination attribute.

BEA-096582
<SubjectConfirmation> cannot exist in the <Subject> element of <AuthnRequest>

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The SAML requester sent an <AuthnRequest>, its <subject> contains a <SubjectConfirmation>, which is not allowed by the SAML specification.

Action:
Fix the SAML requester.

BEA-096583
Requested NameId format not supported, only urn:oasis:names:tc:SAML:1.1:nameid-format:unspecified is supported.

Category:
Security

Cause:
The SAML requester sent a request that is not supported yet.

Action:
Fix the SAML requester to send a request without the name id format, or set the format to "unspecified".

BEA-096584
<RequestedAuthnContext> is not currently supported.

Category:
Security

Cause:
The SAML requester sent an invalid <AuthnRequest> document.

Action:
Fix the SAML requester to send a request without <RequestedAuthnContext>.

BEA-096585
The SPNameQualifier is not supported in <AuthnRequest>.

Category:
Security

Cause:
The SAML requester sent a request that is not supported yet.

Action:
Fix the SAML requester to not send such a document.

BEA-096586
Find service provider partner by issuer URI {0} error.

Category:
Security

Cause:
The exception was caused while searching for the service provider partner from the store by the issuer uri.

Action:
Check the store service.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-096587
Find service provider partner by name {0} error.

Category:
Security

Cause:
This exception was caused while searching for the service provider partner from the store by name.

Action:
Check the store service.

BEA-096588
Find identity provider partner by name {0} error.

Category:
Security

Cause:
This exception was caused while searching for the identity provider partner from the store by name.

Action:
Check the store service.

BEA-096589
Find partner by name {0} error.

Category:
Security

Cause:
This exception was caused while searching for the partner from the store by name.

Action:
Check the store service.

BEA-096590
Could not get local entity ID for checking audience in assertion.

Category:
Security

Cause:
The service provider has no entity ID.

Action:
Check the service provider local configuration to see whether it has an entity ID.

BEA-096591
Could not get partner from partner registry by name.

Category:
Security

Cause:
There is no such partner in the partner registry.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the partner registry to see whether this partner exists.

BEA-096592
Partner is not enabled in partner registry.

Category:
Security

Cause:
This partner is in the partner registry, but the partner is not enabled.

Action:
Check the partner registry to see whether the partner is enabled.

BEA-096593
Audience cannot be empty.

Category:
Security

Cause:
The assertion contains an empty audience.

Action:
Check the CredentialMapper.

BEA-096594
Web single sign-on service provider partner entity ID is empty, could not create assertion.

Category:
Security

Cause:
The SAML partner entry does not have an Entity ID or the Entity ID is empty.

Action:
Check and import the SAML service provider metadata file or contact the SAML service provider to obtain the Entity ID.

BEA-096595
Confirmation method should not be empty.

Category:
Security

Cause:
The provider partner has no confirmation method.

Action:
Check the partner information to make sure it has a confirmation method.

BEA-096596
Assertion signing certificate should not be empty while wantAssertionSigned is TRUE.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The provider partner has no assertion signing certificate while wantAssertionSigned is TRUE.

Action:
Check the partner information to make sure it has an assertion signing certificate.

BEA-096597
Artifact POST form should not be empty while isArtifactUsePost is TRUE.

Category:
Security

Cause:
The provider partner has no artifact POST form while isArtifactUsePost is TRUE.

Action:
Check the partner information to make sure it has an artifact POST form.

BEA-096598
Single sign-on signing certificate should not be empty while assertion/artifact request/authn request wants to be signed.

Category:
Security

Cause:
The provider partner has no single sign-on signing certificate while the assertion/artifact request/authn request wants to be signed.

Action:
Check the partner information to make sure it has a single sign-on signing certificate.

BEA-096599
Issuer URI should not be empty.

Category:
Security

Cause:
The provider partner has no issuer URI.

Action:
Check the partner information to make sure it has an issuer URI.

BEA-096600
No SAML2 service entity ID configured.

Category:
Security

Cause:
The SAML2 service entity ID is not configured.

Action:
Configure the SAML2 service entity ID.

BEA-096601
No SAML2 service published site URL configured.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The SAML2 service published site URL is not configured.

Action:
Configure the SAML2 service published site URL.

BEA-096602
No SAML2 service single sign-on signing key alias configured.

Category:
Security

Cause:
The SAML2 service single sign-on signing key alias is not configured.

Action:
Configure a SAML2 service single sign-on signing key alias.

BEA-096603
No SAML2 service single sign-on signing key pass phrase configured.

Category:
Security

Cause:
The SAML2 service single sign-on signing key pass phrase is not configured.

Action:
Configure the SAML2 service single sign-on signing key pass phrase.

BEA-096604
No SAML2 service login return query parameter are configured.

Category:
Security

Cause:
The SAML2 service login return query parameter is not configured.

Action:
Configure the SAML2 service login return query parameter.

BEA-096605
Entity ID should not be empty.

Category:
Security

Cause:
The provider partner has no entity ID.

Action:
Check the partner information to make sure it has an entity ID.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-096606
Name should not be empty.

Category:
Security

Cause:
The provider partner has no name.

Action:
Check the partner information to make sure it has a name.

BEA-096607
Single sign-on services should not be empty.

Category:
Security

Cause:
Provider partner has no single sign-on services.

Action:
Check the partner information to make sure it has single sign-on services.

BEA-096608
Assertion consumer services should not be empty.

Category:
Security

Cause:
The provider partner has no assertion consumer services.

Action:
Check the partner information to make sure it has assertion consumer services.

BEA-096609
Illegal published site url: {0}.

Category:
Security

Cause:
The published site url is illegal.

Action:
Check the partner information to make sure it has a legal published site url.

BEA-096610
Cannot resolve IssuerURI for SAML Assertion.

Category:
Security

Cause:
The system could not resolve the IssuerURI for the SAML Assertion from the context and credential mapper MBean.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the context and credential mapper MBean to make sure that the issuerURI is not empty.

BEA-096611
Cannot get key info for key {0} from key service.

Category:
Security

Cause:
The key info got from key service for key {0} is empty.

Action:
Check the key store service for key {0}.

BEA-096612
Decrypt password {0} error.

Category:
Security

Cause:
The password {0} could not be decrypted, causing an exception.

Action:
Check the key and the password.

BEA-096613
Clearing cache {0}.

Category:
Security

Cause:
The SAML cache is being cleared.

Action:
No action is required.

BEA-096614
Cache {0} cleared.

Category:
Security

Cause:
The SAML cache has been cleared.

Action:
No action is required.

BEA-096615
The SAML credential cache item"s ttl value {0} is smaller than the minimum viable ttl {1} in milliseconds and will not be cached.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The SAML credential cache is unable to retain the item due to the length of the timeout.

Action:
No action is required.

BEA-096616
The value of max to return is negative.

Category:
Security

Cause:
The value of max to return cannot be negative.

Action:
Check the value of max to return and make sure that the value is not negative.

BEA-096617
The value for contact person type is illegal.

Category:
Security

Cause:
The value for the contact person type is not legal. The legal value must be in one of "technical", "support", "administrative", "billing" or "other".

Action:
Choose one of the legal values and try again.

BEA-096618
Invalid keystore configuration.

Category:
Security

Cause:
The keystore configuration is not correct.

Action:
Configure a valid value and try again.

BEA-096619
Key name is null or empty.

Category:
Security

Cause:
The key name is null or empty when updating/retrieving key information.

Action:
Choose a valid key name and try again.

BEA-096620
Invalid key information.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
At least one of key name, alias or passphrase is not correct.

Action:
Choose a valid value and try again.

BEA-096621
SAML2 Service cannot be initialized:{0}

Category:
Security

Cause:
Errors occurred while initializing the SAML2 service.

Action:
Check and change the SAML2 configuration and try again.

BEA-096622
ForceAuthn and IsPassive cannot both be true.

Category:
Security

Cause:
ForceAuthn wants to authenticate the user freshly, but IsPassive requests that the identity provider not do this.

Action:
Change one of the values to false.

BEA-096623
Item has already expired on {0}, it will not be cached.

Category:
Security

Cause:
The configured timeout may be too short.

Action:
Check the timeout configuration.

BEA-096624
The "{1}" parameter passed to "{0}" must not be null.

Category:
Security

Cause:
A null "{1}" parameter was passed to "{0}".

Action:
Ensure that a valid reference is passed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-096625
The parameter MaxCacheSize or timeout must not be a negative number.

Category:
Security

Cause:
The parameter MaxCacheSize or timeout cannot be a negative number.

Action:
Change the MaxCacheSize parameter or timeout to zero or a positive number.

BEA-096626
The partner name cannot be changed at partner update operation.

Category:
Security

Cause:
The user tried to change the read-only partner name.

Action:
Set the partner name back to the original name.

BEA-096627
There is no login URL configured in Identity Provider Site.

Category:
Security

Cause:
No login URL was configured in the Identity Provider Site.

Action:
Configure a valid login URL in SingleSignOnServicesMBean.

BEA-096628
The value configured for NameMapper attribute: {0} is not valid.

Category:
Security

Cause:
The name mapper class {0} is not in the classpath or it does not implement a name mapper interface.

Action:
Ensure that the name mapper class {0} is in the classpath and implements a name mapper interface.

BEA-096629
The confirmation method passed through Context handler: {0} is not valid.

Category:
Security

Cause:
An invalid confirmation method was passed through the Context handler.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Make sure the confirmation method passed through Context handler {0} has a valid value.

BEA-096630
Using expired certificate at alias {0} for signing.

Category:
Security

Cause:
An attempt was made to use an expired certificate at alias {0} for signing, but allow expired cert is false.

Action:
Use a valid certificate for signing.

BEA-096631
Using not yet valid certificate at alias {0} for signing.

Category:
Security

Cause:
A not yet valid certificate was used at alias {0} for signing, but allow expired cert is false.

Action:
Use a valid certificate for signing.

BEA-096632
Binding type {0} is unsupported, endpoint with this binding is filtered out from partner.

Category:
Security

Cause:
The binding type that was used is not supported.

Action:
Use a binding type that is supported.

BEA-096633
The partner metadata file does not contain an XML root element of <EntityDescriptor>.

Category:
Security

Cause:
The partner metadata file content is not supported.

Action:
Update the partner metadata content or obtain a new partner metadata file.

BEA-096634
Cannot get the single sign-on sign certificate to sign the {0} in the key store.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Either no single sign-on sign certificate is defined in the local configuration or the key/keystore is invalid.

Action:
Correct the key configuration for SAML services.

BEA-096635
Error occurs when encrypting {0}.

Category:
Security

Cause:
Error occurs when encrypting {0}.

Action:
Check debug log for specific encryption error on {0}.

BEA-097000
Service info was not found for service to shut it down, {0}

Category:
Engine

Cause:
Service info was not found when shutting down a service.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097001
Configuration problems detected.

Category:
Engine

Cause:
A bad configuration was supplied.

Action:
Check and fix the configuration.

BEA-097002
Configuration canno be modified after the engine has been started.

Category:
Engine

Cause:
This is an internal WebLogic Server error indicating that the service engine configuration was modified after the engine was started.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097004
Engine has already been started.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Engine

Cause:
An attempt was made to start the engine after it had been started.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097005
Unable to find ServiceConfig.

Category:
Engine

Cause:
This is an internal WebLogic Server error indicating that the service engine cannot be configured.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097006
Duplicate service name {0}.

Category:
Engine

Cause:
The service engine was configured with a duplicate service name.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097007
Logger not found.

Category:
Engine

Cause:
The service engine could not find the logger.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097008
An attempt was made to access the ServiceEngine after it had already been shut down.

Category:
Engine

Cause:
This is an internal WebLogic Server error indicating that the service engine was accessed after being shut down.

Action:
Contact My Oracle Support and provide them with the log files.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-097009
Engine already shut down.

Category:
Engine

Cause:
This is an internal WebLogic Server error indicating that the service engine has already been shut down.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097010
Service {0} not found.

Category:
Engine

Cause:
This is an internal WebLogic Server error indicating that the service engine cannot find the service.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097011
Service {0} not exposed.

Category:
Engine

Cause:
This is an internal WebLogic Server error indicating that the service engine looked up a service that it cannot expose.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097012
Service {0} does not implement ServiceLifecycleSpi.

Category:
Engine

Cause:
This is an internal WebLogic Server error indicating that the service engine was configured with a service that it cannot use.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097013
Null service {0} loaded.

Category:
Engine

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is an internal WebLogic Server error indicating that the service engine was configured with a null service.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097014
Classloader not found for service {0}.

Category:
Engine

Cause:
This is an internal WebLogic Server error indicating that the service engine was configured with a service but the service's classloader could not be found.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097015
Failure loading service {0} using class {1}.

Category:
Engine

Cause:
This is an internal WebLogic Server error indicating that the service engine could not load a service.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097016
Service {0} is dependent upon {1} which does not exist.

Category:
Engine

Cause:
This is an internal WebLogic Server error indicating that the service engine could not find a dependent service.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097017
Service name not specified.

Category:
Engine

Cause:
This is an internal WebLogic Server error indicating that the service engine could not find a service.

Action:
Contact My Oracle Support and provide them with the log files.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-097018
Attempt to remove lifecycle impl for {0} when {1} dependencies still exist.

Category:
Engine

Cause:
This is an internal WebLogic Server error indicating that the service engine attempted to remove a service that still has dependencies.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097019
Attempt to remove dependencies for {0} when no dependencies still exist.

Category:
Engine

Cause:
This is an internal WebLogic Server error indicating that the service engine attempted to remove dependencies for a service when no dependencies exist.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097020
Internal consistency failure in {0}

Category:
Engine

Cause:
This is an internal WebLogic Server error.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097021
Manageable Service {0} not found.

Category:
Engine

Cause:
This is an internal WebLogic Server error. An attempt was made to look up a manageable service but it was not found.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097022
Service {0} is not manageable.

Category:
Engine

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is an internal WebLogic Server Error. An attempt was made to look up a manageable service and a service with the requested name was found, but it was not a manageable service.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097500
{0} requires a {1} to be supplied for configuration but it was not supplied.

Category:
Security

Cause:
The configuration supplied to {0} was incorrect.

Action:
Ensure that the configuration supplied for {0} is correct.

BEA-097501
{1} supplied to {0} is missing {2}

Category:
Security

Cause:
The configuration supplied to {0} was incorrect.

Action:
Ensure that the configuration supplied for {0} is correct.

BEA-097502
MaxIdentitiesInCache value for the IdentityCacheService is invalid {0}

Category:
Security

Cause:
The value supplied for MaxIdentitiesInCache for the IdentityCacheService was invalid.

Action:
Change MaxIdentitiesInCache to a valid value.

BEA-097503
The configured CertPathBuilder service returned a non X.509 certificate path.

Category:
Security

Cause:
The CertPathBuilder was configured with an incorrect certificate path for an X.509 certificate.

Action:
Correct the configured CertPathBuilder service.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-097504
AdjudicationService does not have an AdjudicatorV2Name but has multiple AccessDecision providers.

Category:
Security

Cause:
The AdjudicationService has multiple AccessDecision providers, but there are no providers that implement the AdjudicatorV2 interface.

Action:
Configure an adjudicator that implements the AdjudicatorV2 interface.

BEA-097505
None of the configured {0} support JAAS login.

Category:
Security

Cause:
There are no authentication providers configured to support JAAS login.

Action:
Configure at least one authentication provider that supports JAAS login.

BEA-097506
An AuthorizationProvider returned a null AccessDecision.

Category:
Security

Cause:
An AuthorizatonProvider was not able to return an AccessDecision.

Action:
Examine the AuthorizationProvider.

BEA-097507
{0} may only be called if hasChallengeIdentityCompleted returns false.

Category:
Security

Cause:
This is an internal WebLogic Server error.

Action:
Contact My Oracle Support.

BEA-097508
{0} may only be called if hasChallengeIdentityCompleted returns true.

Category:
Security

Cause:
This is an internal WebLogic Server error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Contact My Oracle Support.

BEA-097509
{0} returned a null {1}.

Category:
Security

Cause:
There is a configuration problem because a null object was returned.

Action:
Examine the specific objects referenced in the error message to see what may be the cause.

BEA-097510
Got back a null {0} object.

Category:
Security

Cause:
There is a configuration problem because a null object was returned.

Action:
Examine the specific object referenced in the error message to see what may be the cause.

BEA-097511
Expected a {0} object but did not get one.

Category:
Security

Cause:
There is a configuration problem because an object was expected and a different object was returned.

Action:
Check the configuration.

BEA-097512
Multiple challenges not supported.

Category:
Security

Cause:
An attempt has made to handle multiple challenges with a provider that does not support it.

Action:
Correct the code or configure a ChallengeIdentityAsserter that supports multiple challenges.

BEA-097513
Incorrect Cert Path type, expecting a {0} type.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The wrong type of Cert Path was passed due to incorrect configuration.

Action:
Correct the configured CertPathBuilder service.

BEA-097514
Multiple {0} support the token type {1}.

Category:
Security

Cause:
The configuration is not correct.

Action:
Remove one of the objects supporting this token token type from the configuration.

BEA-097515
Unsupported token type {0}

Category:
Security

Cause:
No objects are configured to support the specified token type.

Action:
Configure an object that supports this token type.

BEA-097516
Unable to validate a non X.509 certificate path.

Category:
Security

Cause:
Not all certificate paths are of type X.509.

Action:
Correct the configured CertPathBuilder service to ensure that all certificate paths are of type X.509.

BEA-097517
A certificate is self signed but it is not the last certificate in the chain, see {0}

Category:
Security

Cause:
There is a certificate chain but one of the certificates is self signed.

Action:
Ensure that the certificate chain is correct.

BEA-097518
Issue DN mismatch error. Issued: {0} does not match issuer: {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
There is an inconsistent certificate chain. The issuer DN of a certificate did not match the subject DN of the next certificate in the chain.

Action:
Ensure that the the certificates in the chain correctly refer to each other.

BEA-097519
Certificate not signed by issuer. Certificate: {0} not signed by issuer: {1}.

Category:
Security

Cause:
There is an inconsistent certificate chain. A certificate was not signed by the next certificate in the chain.

Action:
Ensure that the the certificates in the chain correctly refer to each other.

BEA-097520
Capacity {0} greater than maximum {1}

Category:
Security

Cause:
The specified queue capacity is too large.

Action:
Reduce the specified queue capacity.

BEA-097521
Maximum capacity {0} is greater than the allowed {1}

Category:
Security

Cause:
The specified maximum queue capacity is larger than allowed.

Action:
Reduce the specified maximum capacity.

BEA-097522
Initial specified capacity of {0} is illegal.

Category:
Security

Cause:
The specified capacity is illegal.

Action:
Specify a correct capacity.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-097523
Illegal load factor.

Category:
Security

Cause:
An illegal load factor was specified.

Action:
Specify a load factor greater than 0 and less than 1.

BEA-097524
No appropriate registered configuration to handle the AppConfigurationEntry named: {0}

Category:
Security

Cause:
No appropriate JAASConfiguration has been registered.

Action:
Register the appropriate JAASConfiguration

BEA-097525
Null JAASConfiguration.

Category:
Security

Cause:
An attempt was made to register a null JAASConfiguration.

Action:
Register a non-null JAASConfiguration.

BEA-097526
Duplicate JAASConfiguration.

Category:
Security

Cause:
An attempt was made to register a JAASConfiguration twice.

Action:
Do not attempt to register the JAASConfiguration twice.

BEA-097527
JAASConfiguration not registered.

Category:
Security

Cause:
An attempt was made to unregister a JAASConfiguration that is not registered.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Do not attempt to unregister an unregistered JAASConfiguration.

BEA-097528
A null {0} was specified.

Category:
Security

Cause:
This method cannot accept a null argument.

Action:
Do not pass in a null argument.

BEA-097529
The principal validators {0} and {1} both validate the same principal types.

Category:
Security

Cause:
There can only be one principal validator for each principal type.

Action:
Correct the configuration.

BEA-097530
No {1} found in method {0}

Category:
Security

Cause:
Objects should have been configured but were not.

Action:
Correct the configuration.

BEA-097531
Method {0} was unable to sign a principal.

Category:
Security

Cause:
Something was wrong with the principal or the principal validator was incorrect.

Action:
Correct the configuration.

BEA-097532
Null parameter supplied to method {0}.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A parameter was not correctly specified. This is most likely a coding error.

Action:
Check the code for an incorrectly specified parameter.

BEA-097533
SecurityProvider service class name for {0} is not specified.

Category:
Security

Cause:
The SecurityProviderConfig does not contain a SecurityProvider service class name.

Action:
Examine the specific objects referenced in the error message to see what may be the cause, and take appropriate action.

BEA-097534
Failed to obtain an instance of class {0}.

Category:
Security

Cause:
There is a possible configuration problem. A {0} class name is invalid, or is not in the class path. It does not have a public no argument constructor, or has the constructor which failed to execute.

Action:
Check the configuration.

BEA-097535
The configuration does not define a store, but providers that require a store are in use.

Category:
Security

Cause:
There is no store servoce defined in the configuration.

Action:
Configure a store service.

BEA-097536
The {0} service can not be found for {1}.

Category:
Security

Cause:
A null was returned when doing a service lookup.

Action:
Check the configuration to see if the missing service was actually configured.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-097537
The {2} setting supplied in the {1} configuration to {0} is invalid.

Category:
Security

Cause:
The configuration setting {2} supplied in {1} to {0} is incorrect.

Action:
Ensure that the configuration supplied for {0} is correct.

BEA-097538
The keystore {0} of type {1} could not be accessed.

Category:
Security

Cause:
The keystore {0} of type {1} could not be accessed and the configuration may be incorrect.

Action:
Ensure that the keystore {0} of type {1} can be accessed.

BEA-097539
Connection to the database is currently unavailable.

Category:
Security

Cause:
The database configuration may be incorrect or the database was not available.

Action:
Ensure that the database configuration is correct and that the database is available.

BEA-097540
Property could not be parsed and will be skipped. Format must be name=value. Format found: {0}

Category:
Security

Cause:
The properties configured for the database pool could not be parsed and will be skipped.

Action:
Check the format of the properties supplied to the configuration

BEA-097541
{0} requires a {1}, this was not available.

Category:
Security

Cause:
This may be a coding error or a configuration error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check for configuration errors. If the configuration appears valid, contact My Oracle Support.

BEA-097542
Connection was not found by name {0}.

Category:
Security

Cause:
The named SQL connection was not found.

Action:
Check the log to see whether there is a connection pool checkout failure and determine the cause.

BEA-097543
Store service properties must not be null.

Category:
Security

Cause:
This may be a store service configuration error.

Action:
Check the store service configuration.

BEA-097544
Get a null {0} value in store service properties.

Category:
Security

Cause:
A data store connection was not specified in the store service properties.

Action:
Check the store service configuration.

BEA-097545
The internal state of the token is not consistent, possibly due to a failure during encoding/decoding the token.

Category:
Security

Cause:
This is an internal WebLogic Server error.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097546
Timestamp is not of the correct length: {0}.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The timestamp format was not correct.

Action:
Fix the timestamp format.

BEA-097547
Timestamp contains illegal non-digit characters: {0}.

Category:
Security

Cause:
The timestamp format is not correct.

Action:
Fix the timestamp format.

BEA-097548
Timestamp has invalid timezone designator: {0}.

Category:
Security

Cause:
The timestamp format is not correct.

Action:
Fix the timestamp format.

BEA-097549
Timestamp is missing timezone designator: {0}.

Category:
Security

Cause:
The timestamp format is not correct.

Action:
Fix the timestamp format.

BEA-097550
Month value is out-of-range for given year: {0}.

Category:
Security

Cause:
The timestamp format is not correct.

Action:
Fix the timestamp format.

BEA-097551
Day of month value is out-of-range for given month and year: {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The timestamp format is not correct.

Action:
Fix the timestamp format.

BEA-097552
SPNEGO token trying to be constructed with invalid parsed information.

Category:
Security

Cause:
The parsed information is invalid.

Action:
This is likely an internal WebLogic Server error. If this occurs again, contact My Oracle Support.

BEA-097553
SAMLSourceSite: Error while generating {0}: {1}.

Category:
Security

Cause:
{0} Could not be generated.

Action:
This is likely an internal WebLogic Server error. If this occurs again, contact My Oracle Support.

BEA-097554
Queries that test at least one scope primary key must test all primary keys with a lower index.

Category:
Security

Cause:
Not all primary keys with a lower index were tested.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-097555
This store does not support nested containers (that is, collections of collections).

Category:
Security

Cause:
You are using nested containers for a store that does not support them.

Action:
Contact My Oracle Support and provide them with the log files.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-097556
Primary key field must not be null: {0}.

Category:
Security

Cause:
There was no value found for the primary key.

Action:
Check the query to see if the primary key is not null or empty.

BEA-097558
FederationServicesMBean configuration Protocol Signing Key {0} is invalid.

Category:
Security

Cause:
The FederationServicesMBean Protocol Signing Key was configured with an invalid value.

Action:
Check the key information to see if it is valid.

BEA-097559
FederationServicesMBean configuration SSL Client Key {0} is invalid.

Category:
Security

Cause:
The FederationServicesMBean SSL Client Key was configured with an invalid value.

Action:
Check the key information to see if it is valid.

BEA-097560
Invalid Source Site configuration, {0} must not be null or empty.

Category:
Security

Cause:
The Source Site configuration is missing.

Action:
Check the configuration to see if there is a null or empty field.

BEA-097561
Store service is not initialized properly.

Category:
Security

Cause:
The store service was configured incorrectly.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the Store service configuration.

BEA-097562
Cannot forward to custom post form, please check if the post form configuration is valid.

Category:
Security

Cause:
The post form configuration was invalid.

Action:
Fix the post form configuration.

BEA-097563
Connection was not found by name {0}.

Category:
Security

Cause:
There was a configuration error or an internal WebLogic Server error.

Action:
Ensure that the specified data source is configured. In addition, check the log to see whether there is a connection pool checkout failure and find the cause.

BEA-097564
The JDBC Connection Service initialization failed.

Category:
Security

Cause:
The configuration is incorrect.

Action:
Check that the SQL configuration has been specified properly.

BEA-098500
Decimal is too short.

Category:
Security

Cause:
The value length is less than or equal to 0.

Action:
Pass in a correct value.

BEA-098501
Decimal contains incorrect characters.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The specified decimal value contains incorrect characters.

Action:
Pass in a correct value.

BEA-098502
Hex binary data bad length.

Category:
Security

Cause:
The length of hex binary data is uneven.

Action:
Pass in a correct value.

BEA-098503
Invalid hex digit.

Category:
Security

Cause:
An invalid hexadecimal digit was encountered.

Action:
Pass in a correct value.

BEA-098504
Invalid RFC822 name: {0}

Category:
Security

Cause:
An invalid RFC822 name attribute value was passed.

Action:
Pass in a valid RFC822 name attribute value.

BEA-098505
Illegal X500 value: {0}

Category:
Security

Cause:
An illegal X500 value was passed.

Action:
Pass in a valid X500 name attribute value.

BEA-098506
Not enough BASE64 bytes

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The atom cannot be decoded because not enough bytes were available.

Action:
Correct the BASE64 value.

BEA-098507
Incorrect XPathVersion

Category:
Security

Cause:
An unsupported XPathVersion was specified.

Action:
Use a supported XPathVersion

BEA-098508
Negative month with non-zero year

Category:
Security

Cause:
The month cannot be negative if the year is a non-zero value.

Action:
Correct the month or year value.

BEA-098509
Month and year are zero.

Category:
Security

Cause:
Both the month and the year are zero. At least one of the month and year must be non-zero.

Action:
Correct the month or year value.

BEA-098510
Method {0} had an internal WebLogic Server error.

Category:
Security

Cause:
This is an internal WebLogic Server error

Action:
Contact My Oracle Support and provide them with the log files.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-098511
Illegal explicit to non-explicit time zone comparison

Category:
Security

Cause:
It is illegal to compare time values when one has an explicit time zone and the other does not.

Action:
Correct the time-zone specification mismatch.

BEA-098512
Could not schedule Audit log rotate trigger

Category:
Security

Cause:
There is an issue with the parameters configured on the Audit provider.

Action:
Correct the parameters configured on the Audit provider.

BEA-098513
Service Initialization when getting service with {0} service name.

Category:
Security

Cause:
The service with {0} service name was not correctly initialized in the service engine.

Action:
Correctly initialize the service in the service engine.

BEA-098514
Failed to generate a certificate thumbprint: {0}.

Category:
Security

Cause:
The thumbprint algorithm cannot be found or a certificate encoding error occurred.

Action:
Examine the error message to determine the exact cause and take appropriate action.

BEA-098515
{1} cannot be {2}.

Category:
Security

Cause:
This is most likely a coding error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Pass a valid {1} to the method {0}.

BEA-098516
The CertificateRegistry could not build a certificate path for the thumbprint {0}. This indicates that either someone is trying to access the server with an untrusted thumbprint or that the administrator has forgotten to register a certificate with this thumbprint in the CertificateRegistry.

Category:
Security

Cause:
The CertificateRegistry does not contain a certificate whose thumbprint is {0}.

Action:
If you want to trust the thumbprint {0}, then register a certificate with this thumbprint in the CertificateRegistry.

BEA-098517
Failed to get SAML assertion info: {0}.

Category:
Security

Cause:
A SAML assertion document parsing error occurred.

Action:
Examine the error message to determine the cause and take appropriate action.

BEA-098518
The environment does not support anonymous, please log in.

Category:
Security

Cause:
The method getAnonymousIdentity of IdentityService returned null.

Action:
Check the environment configuration.

BEA-098519
Invalid file store password or the file has been invalidly changed.

Category:
Security

Cause:
The password for the file store is illegal or the file is modified.

Action:
Ensure that the store password is not changed and the file is not modified either.

BEA-098520
Unable to instantiate the CSSDelegate implementation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The CSS Delegate implementation is not in the classpath.

Action:
Check the CSS classpath.

BEA-098521
Invalid principal class name {0} is entered to the PrincipalFactory create() API.

Category:
Security

Cause:
An invalid principal class name was entered to the PrincipalFactory create() API.

Action:
Ensure that the principal class derives from WLSPrincipal.

BEA-098522
Unable to instantiate the principal instance for principal class {0}.

Category:
Security

Cause:
The principal class {0} is not in the classpath.

Action:
Ensure that the class {0} is in the classpath.

BEA-098523
Unable to instantiate the PrincipalConfigurationDelegate instance.

Category:
Security

Cause:
The related class, either WLSPrincipalConfigurationDelegateImpl or OPPrincipalConfigurationDelegateImpl, is not in the classpath.

Action:
Ensure that WLSPrincipalConfigurationDelegateImpl and OPPrincipalConfigurationDelegateImpl are in the classpath.

BEA-099000
Null {0} parameter supplied to method {1}.

Category:
Security

Cause:
A parameter was not correctly specified. This is most likely a coding error.

Action:
Check for a coding error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-099001
Invalid ContextHandler value for {0} type: expect to {1} type.

Category:
Security

Cause:
This most likely was caused by an environment error.

Action:
Check and update the indicated context element.

BEA-099002
Null or empty certificate chain

Category:
Security

Cause:
This was most likely caused by an environment error.

Action:
Check and update the indicated context element.

BEA-099003
SAMLBeanUpdateListener {0}: {1} failed with exception: {2}

Category:
Security

Cause:
This was most likely caused by an environment error.

Action:
Check and update the environment.

BEA-099004
SAMLCreateAssertion: Exception while creating authentication statement.: {0}

Category:
Security

Cause:
This was most likely caused by an environment error.

Action:
Check and update the environment.

BEA-099005
SAMLCreateAssertion: can't map confirmation method

Category:
Security

Cause:
This was most likely caused by an environment error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check and update the environment.

BEA-099006
provider {0}: SAML Key Manage failed to validate key (Assertions signing) configuration in the FederationServicesMBean, key alias: {1}

Category:
Security

Cause:
This was most likely caused by an environment error.

Action:
Check and update the environment.

BEA-099007
Provider {0} not initialized: method {1} could not be called.

Category:
Security

Cause:
An internal WebLogic Server error occurred when the SAML provider was initialized.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-099008
Store service properties must not be null.

Category:
Security

Cause:
This was most likely caused by a configuration error.

Action:
Check the Store service configuration.

BEA-099009
Get a null {0} value in store service properties.

Category:
Security

Cause:
This was most likely caused by a configuration error.

Action:
Check the Store service configuration.

BEA-099010
Unable to derive key.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The input {0} is null or empty.

Action:
Verify that the input parameter {0} is not null or empty.

BEA-099011
Unable to get digest value for a password.

Category:
Security

Cause:
The input {0} is null or empty.

Action:
Verify that the input parameter {0} is not null or empty.

BEA-099012
Unable to create password digest - UTF-8 encoding required but unavailable:{0}.

Category:
Security

Cause:
An internal WebLogic Server error occurred while performing a message digest.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-099013
Invalid token type {0} received by the LDAP X509 certificate identity asserter.

Category:
Security

Cause:
This was likely caused by the provider not being properly configured.

Action:
Check the provider configuration.

BEA-099014
{0}: {1} is null

Category:
Security

Cause:
A parameter was not correctly specified.

Action:
Check for a coding error.

BEA-099015
The format for import or export is invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The format for import or export was invalid.

Action:
Check the string used for import or export.

BEA-099016
Could not get partner by partner id: {0}.

Category:
Security

Cause:
The partner could not be retrieved using the partner id: {0}.

Action:
Check the registry to see if the partner exists.

BEA-099017
Could not add partner with null partner id.

Category:
Security

Cause:
The partner id is null.

Action:
Check the partner information.

BEA-099018
Update business object failed, could not determine the object to update.

Category:
Security

Cause:
The object for updating could not be found.

Action:
Check the registry to find the correct partner for updating.

BEA-099019
Could not parse assertion: {0}.

Category:
Security

Cause:
An assertion was received that could not be properly parsed.

Action:
Check the SAML assertion or contact My Oracle Support.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-099020
Assertion validity check failed: {0}.

Category:
Security

Cause:
An assertion was received that did not pass validation.

Action:
Check the SAML assertion or contact My Oracle Support.

BEA-099021
Signature required but assertion is not signed.

Category:
Security

Cause:
The assertion is not signed.

Action:
Check the SAML assertion.

BEA-099022
Signature is required but no signing certificate alias configured.

Category:
Security

Cause:
No signing certificate alias is configured.

Action:
Check the SAML configuration.

BEA-099023
Unable to find trusted certificate for alias: {0}.

Category:
Security

Cause:
The trusted certificate was not available from the certificate registry.

Action:
Check the SAML configuration.

BEA-099024
Signature verified but no certificate found to check trust.

Category:
Security

Cause:
No certificate was found to check the trust.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the signature for the certificate.

BEA-099025
Certificate in signature does not match configured signing cert.

Category:
Security

Cause:
The certificate in the signature does not match the configured signing cert.

Action:
Check the certificate information in the partner registry.

BEA-099026
Certificate is not trusted.

Category:
Security

Cause:
An assertion was received for which the signing certificate is not trusted.

Action:
Check the SAML configuration and add the certificate to the registry.

BEA-099027
Could not create name mapper: {0}.

Category:
Security

Cause:
An error occurred while creating an instance of the configured SAML name mapper.

Action:
Check the details of the error message to determine the proper handling.

BEA-099028
Mapping name error: {0}.

Category:
Security

Cause:
An error occurred while invoking an instance of the configured SAML name mapper.

Action:
Check the details of the error message to determine the proper handling.

BEA-099029
Mapping group error: {0}.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred while invoking an instance of the configured SAML name mapper.

Action:
Check the details of the error message to determine the proper handling.

BEA-099030
NameMapper returned no username mapping.

Category:
Security

Cause:
An instance of the configured SAML name mapper returned no user or group information.

Action:
Check the SAML assertion or contact My Oracle Support.

BEA-099031
Assertion is invalid before {0}.

Category:
Security

Cause:
The received SAML assertion is not yet valid.

Action:
Check the SAML configuration, the system clock or contact the SAML Identity Provider.

BEA-099032
Assertion is invalid on or after {0}.

Category:
Security

Cause:
The received SAML assertion has expired.

Action:
Check the SAML configuration, the system clock or contact the SAML Identity Provider.

BEA-099033
No matching audience.

Category:
Security

Cause:
The received SAML assertion audience conditions was not satisfied.

Action:
Check the SAML configuration or contact the SAML Identity Provider.

BEA-099034
Unrecognized assertion condition (schema extension).

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The received SAML assertion contained an unknown condition.

Action:
Contact the SAML Identity Provider for information on how to correct the problem.

BEA-099035
No target in context handler.

Category:
Security

Cause:
An internal WebLogic Server error occurred while determining the SAML target.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-099036
Could not map Confirmation Method URN: {0}.

Category:
Security

Cause:
The received SAML assertion contained an unknown confirmation method.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-099037
Could not find asserting party matching assertion and context.

Category:
Security

Cause:
The SAML partner could not be determined from the received SAML assertion.

Action:
Check the SAML assertion or contact My Oracle Support.

BEA-099038
Could not verify signature: {0}.

Category:
Security

Cause:
The signature from the received SAML assertion could not be verified.

Action:
Check the SAML assertion or contact My Oracle Support.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-099039
No issuer URI configured for asserting party.

Category:
Security

Cause:
The SAML asserting party was not configured with an issuer URI.

Action:
Check the SAML configuration.

BEA-099040
Assertion issuer does not match issuer configured for asserting party.

Category:
Security

Cause:
The issuer from the received SAML assertion could not be verified.

Action:
Check the SAML assertion against the SAML configuration.

BEA-099041
Assertion subject confirmation method does not match asserting party configuration.

Category:
Security

Cause:
The subject confirmation from the received SAML assertion could not be verified.

Action:
Check the SAML assertion against the SAML configuration.

BEA-099046
Illegal value for {0}: {1}.

Category:
Security

Cause:
This error has multiple possible causes. When using the PasswordHashUtility, an invalid command line argument was passed. For SAML, it means that there is an invalid SAML provider configuration.

Action:
Check the command line argument for the parameter specified in the message or check the SAML provider configuration.

BEA-099047
Missing parameter {0}.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The SAML provider configuration is invalid.

Action:
Check the SAML provider configuration.

BEA-099048
Invalid {0} value {1} for {2}.

Category:
Security

Cause:
An invalid configuration was supplied for the SAML provider.

Action:
Check the SAML provider configuration based on the configuration parameter from the error message.

BEA-099049
Could not load SAML partner registry schema file {0}.

Category:
Security

Cause:
An internal WebLogic Server error occurred while loading the SAML partner registry.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-099050
Could not generate XML Schema from SAML partner registry schema file: {0}.

Category:
Security

Cause:
An internal WebLogic Server error occurred while loading the SAML partner registry.

Action:
Contact My Oracle Support and provide them with the log files.

BEA-099051
ImportMode = fail, partnerID {0} exists, import operation terminated.

Category:
Security

Cause:
The SAML partner could not be imported because the partner entry already exists.

Action:
Check the SAML configuration or select a different SAML partner import mode.

BEA-099052
Could not locate {0} {1} in the import XML document, import operation abort.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The SAML partner could not be imported because the partner or certificate could not be found.

Action:
Check the SAML partner registry file based on the information from the error message.

BEA-099053
{0} {1} already exists, Import operation fail.

Category:
Security

Cause:
The SAML partner could not be imported because the partner or certificate already exists.

Action:
Check the SAML configuration based on the information from the error message.

BEA-099054
Error getting {0} {1} from registry, Import operation fail.

Category:
Security

Cause:
The SAML partner could not be imported because the partner or certificate could not be located.

Action:
Check the SAML configuration based on the information from the error message.

BEA-099055
Could locate {0} {1} from registry.

Category:
Security

Cause:
The SAML partner could not be imported because the partner or certificate could not be located.

Action:
Check the SAML configuration based on the information from the error message.

BEA-099056
Could not export partner registry data ldift: {0}.

Category:
Security

Cause:
An internal WebLogic Server error occurred while exporting a SAML partner.

Action:
Contact My Oracle Support and provide them with the log files.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-099057
Could not decrypt password: {0}.

Category:
Security

Cause:
The supplied password could not be read.

Action:
Check that the password value is correct or contact My Oracle Support.

BEA-099058
No sender certificate is provided for checking trust.

Category:
Security

Cause:
The received SAML assertion could not be trusted because no certificate was provided.

Action:
Check the SAML configuration, the SSL configuration or contact My Oracle Support.

BEA-099059
There is no {0} in {1}.

Category:
Security

Cause:
The received SAML assertion could not be validated.

Action:
Check the details of the error message to determine the proper handling.

BEA-099060
The URL specified for the data store connection is invalid: {0},please check all host configuration parameters.

Category:
Security

Cause:
This was most likely caused by a configuration error.

Action:
Check all host configuration.

BEA-099061
Hash algorithm {0} was not found

Category:
Security

Cause:
The JCE configuration is most likely not set up to support the algorithm.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the JCE configuration to ensure the hash algorithm is available for use.

BEA-099062
The {0} password hash algorithm is not usable.

Category:
Security

Cause:
The password algorithm name was not found to be supported by the JCE crypto configuration.

Action:
Verify that the password algorithm is specified correctly, and that the JCE configuration supports the algorithm.

BEA-099063
Plaintext password usage was rejected.

Category:
Security

Cause:
Plaintext passwords are configured to not be allowed, but a Plaintext password was either found or was attempted to be saved.

Action:
If the failure occurred during authentication, review the plaintext passwords and correct them. If the failure occurred while changing a password, review the password style settings to ensure that they specify a non-plaintext style.

BEA-099064
Plaintext password is not allowed and unable to parse the stored hashed password.

Category:
Security

Cause:
Plaintext passwords are configured to not be allowed, but the hashed password could not be parsed.

Action:
If the failure occurred during authentication, review the plaintext passwords and correct them. If the failure occurred while changing a password, review the password style settings to ensure that they specify a non-plaintext style.

BEA-099065
Password ("quit" to end)

Category:
Security

Cause:
The password hash utility internally uses this prompt for a password.

Action:
This is the prompt that will be used by the password hash utility.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-099066
Usage: Java com.bea.security.utils.authentication.PasswordHashUtility [-a algorithm] [-s size] password* "algorithm" is the name of the hash algorithm "size" is the length of the salt characters "passwords" are the plain text passwords to be hashed. None for interactive mode.

Category:
Security

Cause:
The is the text the password hash utility displays for usage of the utility.

Action:
This is the usage text that will be used by the password hash utility.

BEA-099067
The minimum length of password must not be greater than the maximum length of password.

Category:
Security

Cause:
System password validation was configured with an invalid password length.

Action:
Change the value for minimum or maximum length of a password.

BEA-099068
The user name cannot be empty.

Category:
Security

Cause:
The user name is null.

Action:
Input correct user name information.

BEA-099069
The password length cannot be less than {0}.

Category:
Security

Cause:
The current password length is less than {0}.

Action:
Change your password, and try again.

BEA-099070
The password length cannot be greater than {0}.

Category:
Security

Cause:
The current password length is greater than {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Change your password, and try again.

BEA-099071
The password cannot contain or be equal to your username.

Category:
Security

Cause:
The password contains or is the same as your username.

Action:
Change your password, and try again.

BEA-099072
The password cannot contain or be equal to the reverse of your username.

Category:
Security

Cause:
The password contains or is equal to the reverse of your username.

Action:
Change your password, and try again.

BEA-099073
The maximum instances of a character in a password cannot be greater than {0}.

Category:
Security

Cause:
The maximum occurrences of a character in the password is greater than what is allowed by the configuration of system password validation.

Action:
Change your password, and try again.

BEA-099074
The maximum repeating consecutive characters in a password cannot be greater than {0}.

Category:
Security

Cause:
The repetition of a character in the password is greater than what is allowed by the configuration of system password validation.

Action:
Reduce the repeating consecutive characters in your password, and try again.

BEA-099075
The number of alphabetic characters in a password cannot be less than {0}.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The number of alphabetic characters in the password is less than what is required by the configuration of system password validation.

Action:
Add more alphabetic characters in your password.

BEA-099076
The number of numeric characters in a password cannot be less than {0}.

Category:
Security

Cause:
The number of numeric characters in the password is less than {0}.

Action:
Add more numeric characters in your password.

BEA-099077
The number of lowercase characters in a password cannot be less than {0}.

Category:
Security

Cause:
The number of lowercase characters in the password is less than {0}.

Action:
Add more lowercase characters in your password.

BEA-099078
The number of uppercase characters in a password cannot be less than {0}.

Category:
Security

Cause:
The number of uppercase characters in the password is less than {0}.

Action:
Add more uppercase characters in your password.

BEA-099079
The number of non-alphanumeric characters in a password cannot be less than {0}.

Category:
Security

Cause:
The number of non-alphanumeric characters in the password is less than {0}.

Action:
Add more non-alphanumeric characters in your password.

BEA-099080
The user password cannot be null.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The user password is null.

Action:
Input your password, and try again.

BEA-099081
Illegal command line.

Category:
Security

Cause:
Command line syntax is not correct.

Action:
Retype the command line and try again.

BEA-099082
Could not configure attribute {0} in MBean {1}.

Category:
Security

Cause:
The method to configure this attribute could not be found or the parameter for this method could not be created.

Action:
Refer to the MBean javadoc to verify whether the MBean attribute name is correct.

BEA-099083
The key {0} in property file is in the wrong format.

Category:
Security

Cause:
The key {0} in property file is in the wrong format.

Action:
Modify the property file and use a valid format for the key.

BEA-099084
Could not create MBean.

Category:
Security

Cause:
The MBean type or MBean class in property file may not be correct.

Action:
Check the MBean type or MBean class in the property file.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-099085
Unknown MBeanResource ActionType {0}.

Category:
Security

Cause:
The MBean resource method that a caller is attempting to access is unknown.

Action:
Modify your entitlement policy and try again.

BEA-099086
Get null or empty encrypted value. An encrypted value must not be null or empty.

Category:
Security

Cause:
The encrypted value is null or empty.

Action:
Check the encrypted value.

BEA-099087
The MaxPasswordLength must not be less than MinAlphabeticCharacters+MinNumericCharacters+MinNonAlphanumericCharacters.

Category:
Security

Cause:
System password validation was configured with an invalid password length.

Action:
Change the system password validation configuration lengths.

BEA-099088
The MaxPasswordLength must not be less than MinLowercaseCharacters+MinUppercaseCharacters+MinNumericCharacters+MinNonAlphanumericCharacters.

Category:
Security

Cause:
System password validation was configured with an invalid password length.

Action:
Change the system password validation configuration lengths.

BEA-099089
The NegotiateCredentialMapper could not get credentials. The requestor is {0}. The initiator is {1}. The resource is {2}. The exception is {3}.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An unexpected exception occurred when trying to get the credentials.

Action:
Read the exception text from the log message for more information on diagnosing the problem.

BEA-099090
The NegotiateCredentialMapper could not get credentials for initiator with String type. The requestor is {0}. The initiator is {1}. The resource is {2}.

Category:
Security

Cause:
The initiator should not be a String while acquiring credentials with NegotiateCredentialMapperProvider.

Action:
Try the getCredentials() method with a Subject as the initiator.

BEA-099091
Illegal parameter type.

Category:
Security

Cause:
An initiator with String type is not supported by NegotaiteCredentialMapper for method getCredential().

Action:
Try the method getCredentials() with Subject as the initiator type.

BEA-099092
Trust group {0} not found.

Category:
Security

Cause:
The group could not be found as the group parameter that was passed to the method is not registered in the security provider.

Action:
Pass in a trust group that exists.

BEA-099093
The security provider already has a trust group registered with {0}.

Category:
Security

Cause:
The trust group {0} already exists in the security provider.

Action:
Pass in another trust group name.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-099094
The trust group is null or empty.

Category:
Security

Cause:
An empty or null trust group was passed but this is not supported.

Action:
Modify the code to pass a non-null and non-empty trust group.

BEA-099095
The trust group wildcard is null or empty.

Category:
Security

Cause:
An empty or null trust group wildcard was passed, but this is not supported.

Action:
Modify the code to pass a non-null and non-empty trust group wildcard.

BEA-099096
An invalid entry {1} found in the group JKS keystore {0}.

Category:
Security

Cause:
Examine the nested exception for more information in diagnosing the problem.

Action:
Verify that the file is a group JKS keystore.

BEA-099097
The group {0} is not in the specified file {1}.

Category:
Security

Cause:
The group is not contained in a group JKS keystore.

Action:
Verify that the group is contained in a group JKS keystore.

BEA-099098
The security provider already has a certificate registered for trust group {0} under the alias {1}.

Category:
Security

Cause:
The certificate alias {0} already exists in the trust group {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Pass in another certificate alias.

BEA-099099
Errors occurred when register certificate into groups {0}, please see nested message for details.

Category:
Security

Cause:
Errors occurred when trying to register certificates into trust groups.

Action:
Remove the trust group from the passed in trust group list.

BEA-099100
The trust group is null or empty.

Category:
Security

Cause:
An empty or null trust group was used, but this is not supported.

Action:
Modify the code to pass a non-null and non-empty trust group.

BEA-099101
The trust group name {0} is reserved for internal use, please choose another trust group name.

Category:
Security

Cause:
The trust group name is reserved.

Action:
Modify the code to pass another trust group name.

BEA-099102
Subject DN {1} already registered under the alias {2} trust group {0}.

Category:
Security

Cause:
A certificate with subject DN {1} already exists in the trust group {0} under the alias {2}.

Action:
Either remove the previous certificate from the trust group {0} or register a different certificate.

BEA-099103
Issuer DN {1} and serial number {2} already registered under the alias {3} in the trust group {0}

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A certificate with issuer DN {1} and serial number {2} already exists in the trust group {0} under the alias {3}.

Action:
Either remove the previous certificate from the trust group {0} or register a different certificate.

BEA-099104
Subject key identifier {1} already registered under the alias {2} in the trust group {0}.

Category:
Security

Cause:
A certificate with subject key identifier {1} already exists in the trust group {0} under the alias {2}.

Action:
Either remove the previous certificate from the security provider or register a different certificate.

BEA-099105
The file path {0} does not exist.

Category:
Security

Cause:
The specified file path does not exist.

Action:
Create the file path {0} or use another existing file path.

BEA-099106
The password is a null or empty string.

Category:
Security

Cause:
The password is a null or empty string.

Action:
Supply a new password which is neither null nor empty.

BEA-099107
The algorithm {0} used to encrypt the file is invalid.

Category:
Security

Cause:
The algorithm {0} used to encrypt the file is invalid.

Action:
Supply a new algorithm.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-099108
Invalid Property file: property "{0}" is required but is not configured.

Category:
Security

Cause:
Invalid Property file: property "{0}" is required but is not configured.

Action:
Add configuration of property "{0}" to your property file.

BEA-099109
Had problem attempting to get CallbackHandler for debugging in {0}: {1}

Category:
Security

Cause:
The system property weblogic.security.DumpContextHandler was set to true, but no CallbackHandler is available to handle the callback.

Action:
If using programmatic authentication, check if the passed CallbackHandler supports handling weblogic.security.auth.callback.ContextHandlerCallback. Otherwise, contact My Oracle Support.

BEA-099110
The value configured for NameMapper attribute: {0} is not valid.

Category:
Security

Cause:
The name mapper class {0} is not in the classpath or it does not implement thename mapper interface.

Action:
Ensure that the name mapper class {0} is in the classpath and implements the name mapper interface.

BEA-099111
The KerberosCredentialMapper could not get credentials. The requestor is {0}. The initiator is {1}. The resource is {2}. The exception is {3}.

Category:
Security

Cause:
An unexpected exception occurred when trying to get the credentials.

Action:
Read the exception text from the log message for more information on diagnosing the problem.

BEA-099112
The KerberosCredentialMapper could not get credentials for initiator with String type. The requestor is {0}. The initiator is {1}. The resource is {2}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The initiator should not be a String while acquiring credentials with KerberosCredentialMapperProvider.

Action:
Try the getCredentials() method with a Subject as the initiator.

BEA-099113
Illegal parameter type.

Category:
Security

Cause:
An initiator with String type is not supported by NegotaiteCredentialMapper for method getCredential().

Action:
Try the method getCredentials() with Subject as the initiator type.

BEA-099114
The MaxPasswordLength must not be less than MinAlphaCharacters+MinNumericOrSpecialCharacters.

Category:
Security

Cause:
The MaxPasswordLength is less than MinAlphaCharacters+MinNumericOrSpecialCharacters.

Action:
Change the value and try again.

BEA-099115
The MaxPasswordLength must not be less than MinLowercaseCharacters+MinUppercaseCharacters+MinNumericOrSpecialCharacters.

Category:
Security

Cause:
The MaxPasswordLength is less than MinLowercaseCharacters+MinUppercaseCharacters+MinNumericOrSpecialCharacters.

Action:
Change the value and try again.

BEA-099116
The number of numeric or special characters in a password cannot be less than {0}.

Category:
Security

Cause:
The number of numeric or special characters in the password is less than {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Add more numeric or special characters into your password.

BEA-099117
The LDAP authentication provider named "{0}" failed to make a connection to LDAP server at {1}://{2}:{3}, the error cause is: {4}.

Category:
Security

Cause:
Exception in making connection to LDAP server by the LDAP authentication provider.

Action:
Check the configured host name and port of the LDAP server for the failed LDAP authentication provider; also check SSL configuration details if SSL is enabled. If the failed provider is not used anymore in the domain, remove it to avoid the warning message. To change the default log interval (600 seconds), use the system property "weblogic.security.providers.authentication.connWarningLogIntervalSeconds". Note: If multiple LDAP providers are configured, the failover mechanism may tolerate failures for some providers.

BEA-099118
The special character "{0}" cannot be the first character of a password.

Category:
Security

Cause:
The special character "{0}" cannot be the first character of a password.

Action:
Change the value and try again.

BEA-099500
Invalid property value: {0}={1}

Category:
Security

Cause:
An exception occurred while processing the value for the specified property.

Action:
Correct the property and restart. This exception should not normally occur as the properties are only used internally.

BEA-099501
Caught exception while evaluating policy expression: {0} associated with: {1}

Category:
Security

Cause:
The evaluate method of the predicate used by the policy failed with a RuntimeException.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that parameters which are passed to the predicates in the expression or context are valid.

BEA-099502
An invalid predicate {0} was retrieved from the database. Ensure that the predicate class is in the server classpath.

Category:
Security

Cause:
The class file belonging to the condition was not in the server classpath.

Action:
Update the classpath and restart the server.

BEA-099503
Evaluation of policy associated with role {0} failed because the policy expression contains unregistered predicate: {1}.

Category:
Security

Cause:
The predicate that is specified in the log message is not registered, or the policy is out of date.

Action:
Register the predicate or remove its reference from the policy.

BEA-099504
Evaluation of policy associated with resource {0} failed because the policy expression contains unregistered predicate: {1}.

Category:
Security

Cause:
The predicate that is specified in the log message is not registered, or the policy is out of date.

Action:
Register the predicate, or remove its reference from the policy.

BEA-100000
Invalid call to the deprecated method {0}.

Category:
HTTP Session

Cause:
The method was deprecated in the latest servlet specification.

Action:
Check the specification for an alternative. If not corrected, unpredictable behavior might occur.

BEA-100005
Could not remove session: "{0}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP Session

Cause:
An unexpected error occurred while removing the session.

Action:
Check the exception text for the exact error message.

BEA-100006
HTTP session file persistence: storing sessions in directory: {0}.

Category:
HTTP Session

Cause:
This is an informational message.

Action:
Ensure that the directory stores the sessions per the PeristentStoreDir session parameter (weblogic.xml).

BEA-100007
Erasing the directory tree for persistent HTTP sessions: {0}.

Category:
HTTP Session

Cause:
The storage directory is being deleted as a result of session invalidation.

Action:
Ensure that deletion is occurring while removing sessions.

BEA-100008
Cannot delete "{0}".

Category:
HTTP Session

Cause:
The storage directory failed to be deleted.

Action:
Ensure that the permissions on this directory are correct and that the file and directory are not in use by another process.

BEA-100011
An error occurred while serializing session data. Deleting this session.

Category:
HTTP Session

Cause:
This might be due to a change in the class definition or serialVersionUID.

Action:
Check the exception text for the exact error message and take appropriate action.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-100013
{0} not invalidated. The session that was serialized into the file system does not exist.

Category:
HTTP Session

Cause:
The session was not found and does not exist.

Action:
This session might have been deleted by a trigger in another server, which is pointing to the same storage location.

BEA-100015
Deleted file-based session persistent store file: {0}.

Category:
HTTP Session

Cause:
This is an informational message indicating that the storage file is being deleted.

Action:
Ensure that the deletion is consistent with the path defined in the PersistentStoreDir (weblogic.xml)

BEA-100016
Session expiration check failed for: {0}. Invalidating the session expiration check.

Category:
HTTP Session

Cause:
An unexpected error occurred while checking the session for expiration.

Action:
The session will be removed from the persistent store. Check the exception text for the exact error message.

BEA-100018
An error occurred while loading the serialized session data for session {0}.

Category:
HTTP Session

Cause:
An unexpected error occurred.

Action:
Check the exception text for the exact error message. The file could be corrupted.

BEA-100019
The file-based persistent session ID: "{0}" was stored in file: "{1}". File exists: {2}.

Category:
HTTP Session

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is an informational message indicating that the session was stored in this path.

Action:
Ensure that the file-based persistent session storage is consistent with the PersistentStoreDir (weblogic.xml).

BEA-100020
Received malformed cookie ID: {0}.

Category:
HTTP Session

Cause:
The cookie could not be parsed properly.

Action:
Check the cookie format and the exception text for the exact problem.

BEA-100022
Session invalidation interval: {0}

Category:
HTTP Session

Cause:
The session invalidation trigger is being created.

Action:
Ensure that the session invalidation interval is consistent with the InvalidationIntervalSecs (weblogic.xml).

BEA-100025
An unexpected error occurred in the HTTP session timeout callback while deleting sessions.

Category:
HTTP Session

Cause:
The invalidation trigger failed unexpectedly while deleting sessions.

Action:
Check the exception message for the probable cause.

BEA-100026
An unexpected error occurred in the HTTP session timeout callback while checking session expiration.

Category:
HTTP Session

Cause:
An unexpected error occurred while checking the sessions for expiration.

Action:
Check the exception text for the exact error message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-100028
The session data could not be deserialized.

Category:
HTTP Session

Cause:
The session data could not be deserialized.

Action:
Ensure that the object being put into the session is serializable and that the non-transient objects it aggregates are also serializable. If any of the non-transient objects in the entire object graph are not serializable, this error message will occur.

BEA-100030
HTTP session expired. Session ID: {0}

Category:
HTTP Session

Cause:
This is an informational message indicating that the session with ID {0} has expired.

Action:
If the session expired sooner than expected, check the SessionTimeout parameter in the weblogic.xml file.

BEA-100031
An error occurred while unregistering the servlet session runtime MBean: {0}.

Category:
HTTP Session

Cause:
This MBean could not be removed.

Action:
Check the exception text for the exact error message.

BEA-100032
An error occurred while creating a servlet session runtime MBean.

Category:
HTTP Session

Cause:
This MBean could not be created.

Action:
Check the exception text for the exact error message.

BEA-100033
The license for replicated sessions is invalid: {0}. Downgrading sessions to memory, which are not replicated.

Category:
HTTP Session

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The license was not valid to support replicated sessions.

Action:
Check the license. An upgrade to a clustering and replication license may be desired. Alternatively, file and JDBC persistence can be used for session store reliability.

BEA-100035
The timer invalidated session ID: {0}, Web application: {1}, because it expired.

Category:
HTTP Session

Cause:
This message was logged by the Web application level timer, which periodically checks the sessions for expiration. The session expired.

Action:
If the session expired too soon, check the SessionTimeout in the weblogic.xml file.

BEA-100038
Unknown persistent type: {0} for Web application: {1}. Valid types are: memory, file, replicated, JDBC, cookie, and replicated_if_clustered.

Category:
HTTP Session

Cause:
The specified persistent store type for this Web application was not recognized.

Action:
Check the PersistentStoreType parameter in the weblogic.xml file. The valid values are: memory, file, replicated, cookie, JDBC, and replicated_if_clustered.

BEA-100039
Replicated HTTP sessions were specified for the Web application: {0}, but clustering was not enabled.

Category:
HTTP Session

Cause:
The session replication mechanism relies on clustering, which was not been configured.

Action:
Set up clustering or change the PersistentStoreType in the weblogic.xml file to either memory, file, JDBC, or cookie.

BEA-100040
The getAttribute(): {0} was a handle. Reconstructing the EJB object.

Category:
HTTP Session

Cause:
This is an informational message indicating that the container is storing only the handle for the EJB object placed into the session.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-100041
The setAttribute(): {0} was an EJB object. Storing the handle into the session.

Category:
HTTP Session

Cause:
The container found an EJB handle stored in the session. It will reconstruct the EJB object before returning it.

Action:
No action is required.

BEA-100042
An error occurred while reconstructing the EJB object: {0}, which was put into the session.

Category:
HTTP Session

Cause:
The container found an EJB handle stored in the session. However, it failed to reconstruct the EJB object using that handle.

Action:
Ensure that the handle is still valid. Check the exception text for the exact error message.

BEA-100043
An error occurred while finding the handle for the EJB object: {0}.

Category:
HTTP Session

Cause:
The container stores only the handle for an EJB object put into the session. However, in this case, it failed to find the handle.

Action:
Check the RemoteException for the exact error message details.

BEA-100044
Found WLCookie cookie {0}={1}.

Category:
HTTP Session

Cause:
The cookie persistence mechanism relies on setting the cookie header.

Action:
No action is required.

BEA-100045
Malformed WLCookie. Value: {0} will be ignored.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP Session

Cause:
The cookie persistence mechanism relies on setting the cookie header.

Action:
The cookie was found to be malformed. Only strings are supported for cookie-based persistence. Ensure that there are no characters in the attribute names and values, which can break the cookie syntax.

BEA-100046
Creating new session with ID: {0} for Web application: {1}.

Category:
HTTP Session

Cause:
A new session was created.

Action:
Ensure that the length is equal to the IDLen parameter in the weblogic.xml file.

BEA-100047
Performing the database operation: {0} with ID: {1} and Web application: {2}.

Category:
HTTP Session

Cause:
This is an informational message for JDBC-based persistence. It is meant for debugging purposes only.

Action:
No action is required.

BEA-100048
Looked up ROID: {0} from host {1}:{2} for ID: {3}.

Category:
HTTP Session

Cause:
The replicated session ID was not found in the current server, perhaps because this server is not the primary or secondary server. Another attempt to retrieve the session from the assigned secondary server will be made if it is alive.

Action:
No action is required.

BEA-100050
The current server is becoming the primary server for replicated session ID: {0}.

Category:
HTTP Session

Cause:
The current server is taking the role of the primary server for the given session.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-100051
The current server is becoming the secondary server for replicated session ID: {0}.

Category:
HTTP Session

Cause:
The current server is taking the role of the secondary server for the given session.

Action:
No action is required.

BEA-100052
Unregistering replicated session ID: {0}.

Category:
HTTP Session

Cause:
The current server will unregister the given session.

Action:
The session was invalidated. No action is required.

BEA-100053
Failed to update the secondary server for HTTP session ID: {0}.

Category:
HTTP Session

Cause:
Failed to update the secondary server for the modification that occurred in the current request.

Action:
Verify that the secondary server is alive, and ensure that the objects put into the session are all serializable. Also, check the exception text for the exact error message.

BEA-100054
Failed to find the secondary server for HTTP session ID: {0}.

Category:
HTTP Session

Cause:
The secondary server could not be found for the replicated session.

Action:
Verify that the clustering is configured properly and that there is more than one server in the cluster.

BEA-100055
The generated session ID: {0} contains a reserved keyword and is regenerating.

Category:
HTTP Session

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
On Windows 32-bit systems, if the session ID contains a reserved keyword, the file-based persistence fails. This is because it relies upon successful creation of subdirectories. The reserved keywords are: "CON", "PRN", "AUX", "NUL" "COM1", "COM2", "COM3", " COM4", "COM5", "COM6", "COM7", " COM8", "COM9", "LPT1", "LPT2", " LPT3", "LPT4", "LPT5", "LPT6", " LPT7", "LPT8", "LPT9", "CLOCK$"

Action:
No action is required. The session ID will be regenerated.

BEA-100056
For {0}: The session with ID: {1} was invalidated before the session creation and registration could complete.

Category:
HTTP Session

Cause:
This is a past-release problem.

Action:
Contact My Oracle Support.

BEA-100057
This server does not have deployment for the Web application with context path: {0}. The callback: {1} failed while replicating the session. Check the configuration; only uniform configurations in a cluster are supported.

Category:
HTTP Session

Cause:
WebLogic Server clustering relies on uniform Web application deployment across the cluster. It seems the Web application was not deployed on all the servers.

Action:
Redeploy the Web application, and ensure that it targets the cluster and all members in the cluster.

BEA-100058
The PersistentStoreType for the Web application with context path: {0} is not replicated. The callback: {1} failed while replicating the session. Check the configuration; only uniform configurations in a cluster are supported.

Category:
HTTP Session

Cause:
WebLogic Server clustering relies on uniform Web application deployment across the cluster. It seems the Web application was not deployed on all the servers with uniform configuration.

Action:
Redeploy the Web application, and ensure that it targets the cluster and all members in the cluster. Also, the PersistentStoreType should be set to "replicated" for all cluster members.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-100059
An unexpected error occurred while cleaning up sessions during undeployment of Web application: {0}.

Category:
HTTP Session

Cause:
The trigger failed to clean up the expired session.

Action:
Check the exception text for the exact error message. When using JDBC-based HTTP session persistence, ensure that the database is set up properly. For file-based persistence, ensure that the permissions on the storage directory are appropriately set.

BEA-100060
An unexpected error occurred while retrieving the session for Web application: {0}.

Category:
HTTP Session

Cause:
The session from persistent store could not be retrieved.

Action:
Check the configuration, and check the exception text for the exact error message. Also, check the WebLogic Server documentation for more details about how to configure session persistence for Web applications.

BEA-100061
Web application: {0} tried to place a non-serializable attribute: {1} into the session: {2}. This attribute will be lost upon redeployment. This message is logged only once per session.

Category:
HTTP Session

Cause:
The session.setAttribute(name, value) was invoked with a non-serializable value for memory-based sessions.

Action:
If the session data should survive redeployment, ensure that all attributes are serializable. Otherwise, the non-serializable data will be lost upon redeployment.

BEA-100062
Web application: {0} tried to place a non-serializable attribute: {1} into the session: {2}. This attribute will be lost upon redeployment or session failover. Also, such attributes will be scoped to the current server only and will not be replicated to the secondary server. This message is logged only once per session.

Category:
HTTP Session

Cause:
The session.setAttribute(name, value) was invoked with a non-serializable value for a replicated session.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
If the session data should survive redeployment and session failovers, ensure that all attributes are serializable. Otherwise, the non-serializable data will be lost upon failover and redeployment.

BEA-100063
Web application: {0} tried to place a non-serializable attribute: {1} into the session: {2}. This attribute will be lost upon redeployment or session failover. Also, such attributes will be scoped to the current server only and will not be persisted to the disk. This message is logged only once per session.

Category:
HTTP Session

Cause:
The session.setAttribute(name, value) was invoked with a non-serializable value for a file-based persistent session.

Action:
If the session data should survive redeployment and session failovers, ensure that all the attributes are serializable. Otherwise, the non-serializable data will be lost upon failover and redeployment.

BEA-100064
Web application: {0} tried to place a non-serializable attribute: {1} into the session: {2}. The attribute will be lost upon redeployment or session failover. Also, such attributes will be scoped to the current server only and will not be persisted to the database. This message is logged only once per session.

Category:
HTTP Session

Cause:
The session.setAttribute(name, value) attribute was invoked with a non-serializable value for a JDBC-based persistent session.

Action:
If the session data should survive redeployment and session failovers, ensure that all the attributes are serializable. Otherwise, the non-serializable data will be lost upon failover and redeployment.

BEA-100065
{0}. Failed to remove attributes for HTTP session ID: {1}.

Category:
HTTP Session

Cause:
An unexpected error occurred during HTTP session invalidation.

Action:
Check the error message for the exact cause.

BEA-100066
Failed to look up the replicated session object for Web application: {0}, session ID: {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP Session

Cause:
The ReplicationManager returned the NotFoundException.

Action:
This happens if the object has been cleaned up underneath or the version number does not match with the secondary object. This should not happen normally. Unwanted failovers at the front end can cause unnecessary session failovers in the back end, which could result in this error in certain situations. Check the error message for more information.

BEA-100067
Failed to look up the secondary information for Web application: {0} session ID: {1}.

Category:
HTTP Session

Cause:
The ReplicationManager returned the NotFoundException. This happens if the object has been cleaned up underneath or the version number does not match with the secondary object. This should not happen normally. Unwanted failovers at the front end can cause unnecessary session failovers in the back end, which could result in this error in certain situations.

Action:
Check the error message for more information.

BEA-100068
Failed to look up the secondary information for Web application: {0} session ID: {1}.

Category:
HTTP Session

Cause:
The ReplicationManager failed to look up the secondary information for a valid session.

Action:
This is an unexpected error. Check the error message for details.

BEA-100069
The getAttribute(): {0} was a HomeHandle, reconstructing the EJBHome.

Category:
HTTP Session

Cause:
This is an informational message indicating that the container is storing only the handle for the EJBHome placed into the session.

Action:
No action is required.

BEA-100070
Error reconstructing the EJBHome put into session for name: {0}

Category:
HTTP Session

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The container found an EJBHome handle stored in the session. However, it failed to reconstruct the EJBHome using that EJBHome handle.

Action:
Ensure that the HomeHandle is still valid. Check the exception text for the exact error message.

BEA-100071
The setAttribute(): {0} was an EJBHome, storing the HomeHandle into the session.

Category:
HTTP Session

Cause:
The container found an EJBHome handle stored in the session. It will reconstruct the EJBHome object before returning.

Action:
No action is required.

BEA-100072
Error in finding the HomeHandle for the EJBHome: {0}.

Category:
HTTP Session

Cause:
The container stores only the handle for an EJBHome put into the session. However, in this case, it failed to find the HomeHandle.

Action:
Check the RemoteException for the exact error message details.

BEA-100073
Exception while serializing session object: {0}.

Category:
HTTP Session

Cause:
The session object failed to serialize.

Action:
Check the exception text for the exact error message details.

BEA-100079
WAN failover configuration missing.

Category:
HTTP Session

Cause:
The JDBCTxDataSource or the backup cluster address was not properly configured.

Action:
Set the JDBCTxDataSource or the backup cluster address to store session state.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-100081
Persistent store settings cannot be changed between versions. The persistent store settings for application {0} is different from the settings for previous versions.

Category:
HTTP Session

Cause:
The persistent store settings of the new version were different from previous versions.

Action:
Ensure that the persistent store settings are not changed when deploying a new version of an application.

BEA-100082
Failed to deploy {0} because the JDBC data source was missing. Target a JDBC data source to the cluster.

Category:
HTTP Session

Cause:
The configuration was incomplete.

Action:
Target a JDBC data source to the cluster. Refer to the cluster documentation for more information.

BEA-100083
The Web application: {0} in application: {1} has its PersistenceStoreType set to: {2} for HTTP sessions. However, the target list does not contain all members of cluster: {3}. Non-homogeneous deployment for replicated sessions is not allowed.

Category:
HTTP Session

Cause:
Non-homogeneous deployment for replicated sessions is not allowed. The target list must be a cluster or a virtual host which is targeted to a cluster.

Action:
Fix the targets for this Web application. Specify a cluster or virtual host as the target.

BEA-100084
The Web application: {0} in application: {1} has its PersistenceStoreType set to: {2} for HTTP sessions. However, the target list contains virtual host: {3}, for which the target list does not contain all members of cluster: {4}. Non-homogeneous deployment for replicated sessions is not allowed.

Category:
HTTP Session

Cause:
Non-homogeneous deployment for replicated sessions is not allowed. The target list must be a cluster or a virtual host which is targeted to a cluster.

Action:
Fix the targets for this Web application.Specify a cluster or virtual host as the target.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-100087
The JDBC session data for session ID: {0} has been modified by another server in the cluster.

Category:
HTTP Session

Cause:
The front-end Web server failed to maintain server affinity.

Action:
Ensure that the front-end Web server or load balancer has been properly configured.

BEA-100089
The session ID: {0} has been accessed from {1}, a server that is neither the primary ({2}) nor the secondary ({3}). The request URL was: {4}

Category:
HTTP Session

Cause:
The most likely cause is a configuration error on a front end hardware loadbalancer or webserver plugin. They should be configured to respect the values of primary/secondary in the cookie (i.e., stickiness), when possible.

Action:
Please ensure that the front end webserver or load-balancer has been properly configured.

BEA-100090
An unexpected error occurred during a batched update of the last accessed time attribute of the updated sessions in application {0}.

Category:
HTTP Session

Cause:
Check the exception message for details.

Action:
Check the exception message for details.

BEA-100094
The session ID: {0} has been accessed from {1}, a server that is not the primary ({2}). The request URL was: {3}.

Category:
HTTP Session

Cause:
The most likely cause is a configuration error on a front-end hardware load balancer or Web server plug-in. These should be configured to respect the values of the primary or secondary in the cookie (for example, stickiness), when possible.

Action:
Ensure that the front-end Web server or load balancer has been properly configured.

BEA-100095
persistent-data-source-jndi-name is required for an async-jdbc session.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP Session

Cause:
persistent-data-source-jndi-name was not used to specify the data source JNDI name for the JDBC connection, but persistent-store-type is async-jdbc.

Action:
Use persistent-data-source-jndi-name to specify the data source JNDI name for the JDBC connection.

BEA-100096
persistent-data-source-jndi-name will take effect and persistent-store-pool will be ignored for async-jdbc session in application {0}.

Category:
HTTP Session

Cause:
This is debug information.

Action:
No action is required.

BEA-100097
The IDLength {0} is too short. It is not secure. WebLogic Server will increase the length to {1}.

Category:
HTTP Session

Cause:
The IDLength of Session Descriptor is smaller than {1}.

Action:
Mofify the Weblgoic deployment descriptor. Ensure that the IDLength of Session Descriptor is equal to or greater than {1}.

BEA-100098
persistent-data-source-jndi-name or persistent-store-pool is required when persistent-store-type is jdbc.

Category:
HTTP Session

Cause:
persistent-data-source-jndi-name or persistent-store-pool was not used to configure the database connection, but persistent-store-type is jdbc.

Action:
Use persistent-data-source-jndi-name or persistent-store-pool to configure the database connection.

BEA-100099
An error occurred while looking up the session with ID:{0} from primary server:{1} and secondary server:{2}.

Category:
HTTP Session

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A RemoteException occurred when looking up the session from the secondary server.

Action:
Check if the secondary server is down. Note that it is not recommended to stop both the primary and secondary server at the same time. Because replication happens lazily, upon request, if the secondary server needs to end, give sufficient time so that the active end users hit their sessions and get replicated.

BEA-100100
Replication services could not be found for remote object {1} in application context {0}.

Category:
HTTP Session

Cause:
This error can occur during clustered application undeployment or redeployment, particularly when the server where it occurs is configured for managed server independent deployment (MSI-D). It is typically transient in those situations, and should only occur during redeployment in those scenarios.

Action:
If the error persists, check the server log files for more details. Contact Oracle support if necessary.

BEA-101002
[{0}] Could not deserialize the context attribute.

Category:
HTTP

Cause:
The classloader changed. When this happens, the old attributes are deserialized using the new classloader.

Action:
Ensure that the attribute class is available to the Web application scope and is serializable.

BEA-101003
[{0}] {1} called with a null document root.

Category:
HTTP

Cause:
The Web application did not initialize correctly.

Action:
Check the log file for error messages about this Web application.

BEA-101005
[{0}] {1} called with unsafe path: "{2}".

Category:
HTTP

Cause:
The virtual path that was passed in points to a resource outside of the Web application scope.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the virtual path being passed to the method and rectify the problem accordingly.

BEA-101008
[{0}] Cannot get InputStream of resource "{1}".

Category:
HTTP

Cause:
The getResourceAsStream() method failed to get an InputSteam for the resource.

Action:
Ensure that the resource exists.

BEA-101017
[{0}] Root cause of ServletException.

Category:
HTTP

Cause:
The Web application container caught an unexpected exception.

Action:
Check the exception for the exact error message.

BEA-101019
[{0}] Servlet failed with an IOException.

Category:
HTTP

Cause:
An unexpected IOException was caught while processing the request.

Action:
Check the exception for the exact error message.

BEA-101020
[{0}] Servlet failed with an Exception

Category:
HTTP

Cause:
An unexpected error occurred.

Action:
Check the exception for the exact error message.

BEA-101024
[{0}] Unsupported error status code for the error-page element in web.xml.

Category:
HTTP

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The format of the error status code was invalid.

Action:
Check the web.xml and fix the error-page element error status code.

BEA-101025
[{0}] Document root is null.

Category:
HTTP

Cause:
This should never happen. The initialization failed.

Action:
Check the log file for error messages during the Web application initialization phase.

BEA-101027
[{0}] Document root: "{1}" does not exist.

Category:
HTTP

Cause:
This is an unexpected error message.

Action:
Ensure that the directory exists.

BEA-101029
[{0}] cannot make temporary directory "{1}". Will not be able to compile JSPs.

Category:
HTTP

Cause:
The creation of the temporary directory failed.

Action:
Check the write permissions.

BEA-101040
[{0}] Error occurred while trying to set "{1}{2}".

Category:
HTTP

Cause:
A NumberFormatException occurred while parsing the value assigned to the reloadCheckSecs parameter in web.xml.

Action:
Ensure that the value was entered correctly.

BEA-101045
[{0}] {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP

Cause:
This is a general purpose error message.

Action:
Check the message for the exact cause and take proper action.

BEA-101046
[{0}] {1}

Category:
HTTP

Cause:
This is a general purpose error message.

Action:
Check the exception for exact cause and take proper action.

BEA-101047
[{0}] {1}

Category:
HTTP

Cause:
This is a general purpose informational message for debug purposes only.

Action:
This is a debug message. No action is required.

BEA-101051
[{0}] started

Category:
HTTP

Cause:
This is an informational message indicating that the Web server has been started.

Action:
This is a debug message. No action is required.

BEA-101052
[{0}] Initialized

Category:
HTTP

Cause:
This is an informational message indicating that the Web server has been initialized.

Action:
This is a debug message. No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-101053
[{0}] Loading Web application: {1}

Category:
HTTP

Cause:
The Web application is being deployed.

Action:
This is a debug message. No action is required.

BEA-101054
[{0}] {1} is the default Web application for {2}.

Category:
HTTP

Cause:
The given Web application is being registered as a default Web application.

Action:
This is a debug message. No action is required.

BEA-101060
[{0}] Loading "{1}" from directory: "{2}"

Category:
HTTP

Cause:
The Web application was deployed using an exploded directory structure.

Action:
This is a debug message. No action is required.

BEA-101061
[{0}] Could not find Web application "{1}".

Category:
HTTP

Cause:
The descriptor for the Web application with the name given could not be loaded.

Action:
Check the error message for details and ensure that the Web application was configured properly.

BEA-101062
[{0}] Error reading Web application "{1}".

Category:
HTTP

Cause:
An IOException occurred while reading the descriptors for the Web application.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the web.xml and weblogic.xml descriptors exist in the right place.

BEA-101064
[{0}] Error parsing descriptor in Web appplication "{1}"

Category:
HTTP

Cause:
An unexpected error occurred while reading the descriptors for the Web application.

Action:
Ensure that web.xml and weblogic.xml exist in the right place

BEA-101066
[{0}] Cannot initialize HTTP URL resources. Could not get JNDI context: {1}.

Category:
HTTP

Cause:
The URL contexts could not be registered because the JNDI context was not found.

Action:
Ensure that the JNDI resources were properly configured.

BEA-101067
[{0}] Disregarding null URL resource value for property {1}

Category:
HTTP

Cause:
The URL for the JNDI resource specified in URLResource was null.

Action:
Correct the configuration (WebServerMBean). The URLs cannot be null.

BEA-101068
[{0}] Could not parse URL resource value {1}.

Category:
HTTP

Cause:
The URL for the JNDI resource specified in the URL resource was malformed.

Action:
Correct the configuration (WebServerMBean). Specify a valid URL.

BEA-101069
[{0}] Could not bind URL {1} to JNDI name {2} error message: {3}.

Category:
HTTP

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The URL failed to bind with the JNDI name.

Action:
Correct the configuration (WebServerMBean).

BEA-101070
[{0}] Bound URL resource "{1}" to JNDI name "{2}".

Category:
HTTP

Cause:
This is an informational message only.

Action:
No action is required.

BEA-101075
[{0}] HttpServer is shutting down.

Category:
HTTP

Cause:
The Web server is shutting down.

Action:
This is a debug message. No action is required.

BEA-101083
Connection failure.

Category:
HTTP

Cause:
The connection failed while writing data into the stream.

Action:
Check the exception for the exact cause and take appropriate action.

BEA-101086
No host in HTTP header. Dispatching to default HTTP server.

Category:
HTTP

Cause:
Host header missing.

Action:
Ensure that the requests are accompanied with a host header in order for virtual hosting to work. Also, proper HTTP redirects must have a host header.

BEA-101087
{0} is not a virtual host. Dispatching to default HTTP server.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP

Cause:
The host header is missing from the HTTP request.

Action:
Make sure the requests are accompanied with a host header in order for Virtual Hosting to work. Also, proper HTTP redirects must have a host header.

BEA-101088
Dispatching request to {0}.

Category:
HTTP

Cause:
Dispatching the request to the Web server (Virtual Host) defined by the host header.

Action:
Check the configuration.

BEA-101093
A problem occurred while dispatching the servlet request.

Category:
HTTP

Cause:
The request could not be dispatched into the execute queue.

Action:
The request could be malformed. Check the exception for the exact cause.

BEA-101095
POST time exceeded the configured MaxPostTimeSecs of {0,number}.

Category:
HTTP

Cause:
The parameter makes sure that a malicious user does not send slow POSTs to cause a denial of service attack.

Action:
If you think the time was too short, try increasing the value of MaxPostTimeSecs using the Administration Console.

BEA-101096
POST size exceeded the MaxPostSize={0,number}.

Category:
HTTP

Cause:
The parameter makes sure that a malicious user does not send huge POSTs to cause a denial of service attack.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
If you think the post size is unreasonable, try increasing MaxPostSize using the Administration Console.

BEA-101100
[{0}] Got bad cookie header: {1} from User-Agent: {2}

Category:
HTTP

Cause:
A cookie was malformed.

Action:
Refer to the cookie specifications for the correct format: http://www.ietf.org/rfc/rfc2965.txt (Oct 2000; Obsoletes: 2109) http://www.ietf.org/rfc/rfc2109.txt (Feb 1997) http://www.ietf.org/rfc/rfc2616.txt (Jun 1999; Obsoletes: 2068) http://www.ietf.org/rfc/rfc2068.txt (Jan 1997)

BEA-101101
[{0}] Unable to create new session.

Category:
HTTP

Cause:
A new session could not be created.

Action:
Ensure that the persistent store has been properly configured.

BEA-101104
Servlet execution in servlet context "{0}" failed, {1}.

Category:
HTTP

Cause:
An unexpected error occurred while serving the request. This is not a simple client connection reset error.

Action:
Check the error message for the exact cause.

BEA-101105
[{0}] error-page location: "{1}" for the error-code: "{2,number}" does not exist. Serving the default error page.

Category:
HTTP

Cause:
The error-page you configured in web.xml does not exist. A configuration error has occurred.

Action:
Correct the web.xml descriptor, or make the resource available.

BEA-101106
[{0}] Could not serve custom error page: "{1}" for the error code: "{2,number}"

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP

Cause:
The error-page configured in web.xml does not exist. A configuration error has occurred.

Action:
Correct the web.xml descriptor or make the resource available.

BEA-101107
[{0}] Problem occurred while serving the error page.

Category:
HTTP

Cause:
The error-page configured in web.xml could not be served.

Action:
Check the configuration in web.xml.

BEA-101108
[{0}] Unsupported encoding: "{1}" specified.

Category:
HTTP

Cause:
The specified encoding is not supported by the underlying virtual machine(VM).

Action:
Ensure that the specified encoding is valid or install the additional encoding classes.

BEA-101122
[{0}] Servlet: "{1}" is permanently unavailable.

Category:
HTTP

Cause:
The Web application is not currently available.

Action:
Ensure that the Web application has been deactivated. Check to see if redeployment is in progress.

BEA-101123
[{0}] Servlet: "{1}" will be unavailable for the next: "{2,number}" seconds.

Category:
HTTP

Cause:
The servlet has been marked as unavailable.

Action:
Make the request again after the specified time.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-101125
[{0}] Error occurred while instantiating servlet: "{1}".

Category:
HTTP

Cause:
The servlet failed to instantiate.

Action:
Ensure that the servlet has been configured properly in web.xml. Also, check the exception for the exact cause.

BEA-101126
[{0}] Error casting servlet: "{1}" to javax.servlet.Servlet

Category:
HTTP

Cause:
The servlet class that has been configured does not implement javax.servlet.Servlet.

Action:
Fix the definition of the class.

BEA-101128
Initializing HTTP services.

Category:
HTTP

Cause:
This is an informational message.

Action:
Ensure that the resources are available now.

BEA-101129
Initializing the Web application container.

Category:
HTTP

Cause:
This is an informational message.

Action:
This is an informational message. No action is required.

BEA-101133
Initializing Web server {0}.

Category:
HTTP

Cause:
The Web server was just initialized.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-101135
{0} is the default Web server.

Category:
HTTP

Cause:
The default Web server name is being logged.

Action:
This is an informational message for debug purposes only. No action is required.

BEA-101136
Registering virtual host: {0}.

Category:
HTTP

Cause:
A Virtual Host (non-default Web server) has been registered.

Action:
This is an informational message for debug purposes only. No action is required.

BEA-101138
{0} One of the getParameter family of methods was called after reading from the ServletInputStream. Not merging post parameters.

Category:
HTTP

Cause:
If the servlet reads the data from the input stream directly, then the request data will not be available for the getParameter family of methods.

Action:
If the code relies on post parameters being available through the getParameter method, fix the code.

BEA-101140
An error occurred while creating servlet {1} (class: {2}, initArgs: {3}) for Web application {0}.

Category:
HTTP

Cause:
The servlet instance failed to initialize.

Action:
Check the configuration and the exception for the exact error message.

BEA-101142
There was an error unregistering servlet runtime {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP

Cause:
The servlet runtime MBean that is used for monitoring could not be destroyed.

Action:
Report this problem to My Oracle Support.

BEA-101143
An error occurred while unregistering Web application component runtime {0}.

Category:
HTTP

Cause:
The Web application runtime MBean that is used for monitoring could not be destroyed.

Action:
Report this problem to My Oracle Support.

BEA-101159
[{0}] Received IllegalAccessException while instantiating servlet: "{1}". Ensure that the servlet implementation is a public class.

Category:
HTTP

Cause:
This occurs if WebLogic Server attempts to instantiate a servlet class that is not declared public.

Action:
Ensure that the servlet implementation is a public class.

BEA-101160
Deployment descriptor is malformed; check against the DTD: {0}.

Category:
HTTP

Cause:
The web.xml file is not in strict conformance to the DTD. There may be deployment problems if this is not corrected.

Action:
Check the web.xml file against the DTD to ensure conformance. Remember that the ordering of elements is important.

BEA-101162
User defined listener {0} failed: {1}.

Category:
HTTP

Cause:
The listener failed while processing the event fired by the container.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the exception for the exact error message and fix the listener code.

BEA-101163
Could not load user defined listener: {0}

Category:
HTTP

Cause:
The listener class could not be loaded or instantiated.

Action:
Check the exception for the exact error message and fix the listener code.

BEA-101164
User defined class {0} is not a listener, as it does not implement the correct interface(s).

Category:
HTTP

Cause:
The class is invalid.

Action:
Fix the listener code to implement the appropriate interfaces.

BEA-101165
Could not load user defined filter in web.xml: {0}.

Category:
HTTP

Cause:
The filter class could not be loaded.

Action:
Check the configuration and ensure that the class is available to the context classloader.

BEA-101168
The security-role-assignment references an invalid security-role: {0}.

Category:
HTTP

Cause:
The security-role-assignment specified in weblogic.xml is not valid.

Action:
Ensure that the role-name defined in web.xml is valid. Also, check the DTD and examples for the correct syntax.

BEA-101169
The servlet {0} is referenced but not defined in web.xml.

Category:
HTTP

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The servlet-mapping element in web.xml refers to a servlet name that was not defined.

Action:
Ensure that the servlet-name that is used for the mapping is defined. Check the DTD for the correct syntax.

BEA-101170
The servlet {0} is referenced in servlet-mapping {1} but not defined in web.xml.

Category:
HTTP

Cause:
The servlet-mapping element in web.xml refers to a servlet name that was not defined.

Action:
Ensure that the servlet-name that is used for the mapping is defined. Check the DTD for the correct syntax.

BEA-101171
The web.xml descriptor has no resource-ref entries for the reference-descriptor defined in weblogic.xml.

Category:
HTTP

Cause:
The resource-ref-name referred to by the reference-descriptor in weblogic.xml should have a corresponding resource-ref-name defined in web.xml.

Action:
Ensure that the resource-ref-name matches a resource-ref-name defined in web.xml.

BEA-101172
The web.xml descriptor has no ejb-ref entries.

Category:
HTTP

Cause:
The ejb-ref-name referred to by the reference-descriptor in weblogic.xml should have a corresponding ejb-ref-name defined in web.xml.

Action:
Ensure that the ejb-ref-name matches a ejb-ref-name defined in web.xml.

BEA-101173
Did not find resource-ref in web.xml matching {0}.

Category:
HTTP

Cause:
The resource-ref-name referred to by the reference-descriptor in weblogic.xml should have a corresponding resource-ref-name defined in web.xml.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the resource-ref-name matches a resource-ref-name defined in web.xml.

BEA-101174
Did not find ejb-ref in web.xml matching {0}.

Category:
HTTP

Cause:
The ejb-ref-name referred to by the reference-descriptor in weblogic.xml should have a corresponding ejb-ref-name defined in web.xml.

Action:
Ensure that the ejb-ref-name matches a ejb-ref-name defined in web.xml.

BEA-101175
[{0}] Exception occurred while closing zip file {1}.

Category:
HTTP

Cause:
A zip file failed to close while undeploying a Web application.

Action:
Report this problem to My Oracle Support.

BEA-101180
The auth-constraint references security-role: {0}, which is not defined in web.xml.

Category:
HTTP

Cause:
The auth-constraint should refer to roles that have been defined in web.xml.

Action:
Add the definition of this role in the security-role element of web.xml.

BEA-101188
A bad exception-type exists in web.xml: {0}.

Category:
HTTP

Cause:
An invalid class can cause this exception while registering the Web application.

Action:
Check the classpath.

BEA-101189
Could not load the url-match-map class defined in weblogic.xml: {0}.

Category:
HTTP

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An invalid classname will cause this exception while registering the Web application.

Action:
Check the classpath.

BEA-101194
The preprocessor {0} is referenced but not defined in weblogic.xml.

Category:
HTTP

Cause:
The preprocessor element is not defined in weblogic.xml.

Action:
Check the weblogic.xml descriptor.

BEA-101196
[{0}]: Error while parsing the Tag Library Descriptor at "{1}".

Category:
HTTP

Cause:
A TLD parsing exception occurred.

Action:
Check the exception for the exact cause.

BEA-101198
Could not deploy role: {0} for Web application: {1} application: {2}.

Category:
HTTP

Cause:
The Web application could not deploy the role defined in web.xml.

Action:
Ensure that security is configured properly in the server. Also, check the stack trace for the exact cause.

BEA-101199
Could not deploy policy for resource: {0}.

Category:
HTTP

Cause:
The Web application failed to deploy the policy for the security-constraint defined in web.xml.

Action:
Ensure that security is configured properly in the server. Also, check the stack trace for the exact cause.

BEA-101200
CacheFilter not caching the response for URI: {0} reason: {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP

Cause:
The CacheFilter does not cache responses unless the status is 200.

Action:
Check the message for information on how to fix the problem.

BEA-101212
{0}:{1} Failure while precompiling JSPs: {2}.

Category:
HTTP

Cause:
The JSPs failed to precompile at startup.

Action:
Check the exception for the exact cause.

BEA-101214
Included resource or file "{0}" not found from requested resource "{1}".

Category:
HTTP

Cause:
The included resource or file is missing.

Action:
Add the missing resource or file.

BEA-101215
Malformed request "{0}". Request parsing failed, Code: {1}

Category:
HTTP

Cause:
The request does not follow the pattern specified by the HTTP 1.0/1.1 specification(s).

Action:
Fix the client that sent the invalid request.

BEA-101216
Servlet: "{0}" failed to preload on startup in Web application: "{1}".

Category:
HTTP

Cause:
The servlet that was marked as load-on-startup failed to preload on startup.

Action:
Check the exception for the exact cause.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-101217
Cannot deploy {0} from {1} on {2}, because there is already a Web application named {3} loaded from {4}, using the context path {5}.

Category:
HTTP

Cause:
The Web application that is being deployed has been assigned a context path that is already in use.

Action:
Choose a different context path.

BEA-101218
An error exists in web.xml for servlet "{0}". Neither servlet-class nor jsp-file is defined.

Category:
HTTP

Cause:
The servlet element should contain either servlet-class or jsp-file. Both are missing.

Action:
Update the web.xml descriptor.

BEA-101220
An error occurred while setting the document root for "{0}" to "{1}".

Category:
HTTP

Cause:
Setting the document root for the Web application failed. The Web application will not be deployed.

Action:
Check the IOException message for exact cause of the problem.

BEA-101221
The url-pattern is empty or null for url-pattern {0} in {1}.

Category:
HTTP

Cause:
Not a valid url-pattern for the servlet.

Action:
If the servlet is intended to be a default servlet, then specify / or /*.

BEA-101223
{0}: The server {1} is temporarily suspended.

Category:
HTTP

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The server has been suspended by the administrator.

Action:
Wait until it comes back up again.

BEA-101226
AuthFilter: {0} invocation failed in: {1} phase for URI: {2}

Category:
HTTP

Cause:
The authentication filter that acts before and after the authentication phase failed to execute.

Action:
Check the exception for the exact cause of the problem.

BEA-101228
Failed to undeploy security policy for resource: {0} while undeploying Web application.

Category:
HTTP

Cause:
The security policy defined in web.xml failed to undeploy upon Web application undeployment.

Action:
Check the exception for the exact cause of the problem.

BEA-101229
Failed to undeploy security policy for resource: {0} while undeploying the Web application.

Category:
HTTP

Cause:
The security role defined in web.xml failed to undeploy upon Web application undeployment.

Action:
Check the exception for the exact cause of the problem.

BEA-101231
The HTTP log file does not use version 1.0 of the Extended Log File format.

Category:
HTTP

Cause:
The ELF headers in the existing log file specify a version other than 1.0.

Action:
Only version 1.0 is supported. Delete the existing log file and start over again.

BEA-101232
An exception occurred while reading headers of HTTP log file.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP

Cause:
An IOException was received while reading the headers.

Action:
Check the exception for the exact cause of the problem.

BEA-101234
Attempting to initialize ExtendedLogFormat application specific header: {0}. However, initialization failed due to an exception.

Category:
HTTP

Cause:
An unexpected error occurred while initializing the log file format.

Action:
Check the exception for the exact error message.

BEA-101235
Attempting to initialize ExtendedLogFormat application specific header: {0}. However, initialization failed because class: {1} is not an instance of weblogic.servlet.logging.CustomELFLogger.

Category:
HTTP

Cause:
An unexpected error occurred while initializing the ExtendedLogFormat.

Action:
Check the exception for the exact error message.

BEA-101236
The format of log field {0} is incorrect.

Category:
HTTP

Cause:
The format of the log field is invalid.

Action:
Check the log field and fix the format.

BEA-101237
HTTP logging has been disabled for the Web server: {0}.

Category:
HTTP

Cause:
This is a debug message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-101242
Failed to roll the HTTP log file for the Web server: {0}.

Category:
HTTP

Cause:
An unexpected error occurred.

Action:
Check the exception message for the exact cause.

BEA-101247
{0}: Public ID references the old version of the Servlet DTD. Change the public ID in web.xml file to "{1}".

Category:
HTTP

Cause:
The public ID in WEB-INF/web.xml references the old version of servlet DTD.

Action:
Generally, this will not cause any problems with the application unless the DTD has changed in a way such that the web.xml cannot be parsed. To avoid the message, change the public ID in the web.xml file to the current version of the servlet DTD.

BEA-101248
[{0}]: Deployment descriptor "{1}" is malformed. Check against the DTD: {4} (line {2}, column {3}).

Category:
HTTP

Cause:
The descriptor file is not in strict conformance to its DTD. There may be deployment problems if this is not corrected.

Action:
Check the descriptor file against the DTD to ensure conformance. Remember that the ordering of elements is important.

BEA-101249
[{0}]: Servlet class {2} for servlet {1} could not be loaded because the requested class was not found in the classpath {3}. {4}.

Category:
HTTP

Cause:
The servlet class was not recognized by the Web application classloader.

Action:
Ensure that the servlet class is available either in WEB-INF/classes or WEB-INF/lib or the system classpath.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-101250
[{0}]: Servlet class {2} for servlet {1} could not be loaded because a class on which it depends was not found in the classpath {3}. {4}.

Category:
HTTP

Cause:
One of the classes the servlet class uses was not recognized by the Web application classloader.

Action:
Make sure the class is available either in WEB-INF/classes or WEB-INF/lib or system classpath.

BEA-101251
[{0}]: Could not load servlet class {2} for servlet {1} because a resource on which it depends was not found in the classpath {3}. {4}.

Category:
HTTP

Cause:
This exception occurs if the Java Virtual Machine (JVM) cannot find an appropriate native-language definition of a method that is declared native.

Action:
This could be due to a problem with path/LD_LIBRARY_PATH. Check if the resource it complains about exists.

BEA-101252
[{0}]: Servlet class {2} for servlet {1} could not be verified. {3}.

Category:
HTTP

Cause:
This exception occurs when the "verifier" detects that a class file, though well formed, contains some sort of internal inconsistency or security problem.

Action:
Verify the servlet class.

BEA-101253
[{0}]: Servlet class {2} for servlet {1} could not be defined. The class file could be corrupt. {3}.

Category:
HTTP

Cause:
This exception occurs when the Java Virtual Machine (JVM) attempts to read a class file and determines that the file is malformed or otherwise cannot be interpreted as a class file.

Action:
Check to see if the class file is corrupt.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-101254
[{0}]: Servlet class {2} for servlet {1} could not be handled by the classloader with classpath {3}. {4}.

Category:
HTTP

Cause:
Subclasses of LinkageError indicate that a class has some dependency on another class; however, the latter class has incompatibly changed after the compilation of the former class.

Action:
Check the class and its dependencies.

BEA-101256
The run-as user: {0} for the servlet: {1} for Web application: {2} could not be resolved to a valid user in the system. Verify that the user exists.

Category:
HTTP

Cause:
The run-as element in weblogic.xml refers to an invalid user.

Action:
Check to see if the user exists.

BEA-101257
Failed to parse the client certificate in header: {0}. Ignoring this certificate.

Category:
HTTP

Cause:
The format of the client certificate was invalid.

Action:
Check the exception for more details.

BEA-101258
Invalid JSP parameter in weblogic.xml with name: {0}.

Category:
HTTP

Cause:
The JSP parameter was not recognized.

Action:
Check the weblogic.xml descriptor and refer to the DTD for the correct syntax and element information.

BEA-101260
The JSP parameter name in weblogic.xml is empty.

Category:
HTTP

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
One of the mandatory elements in weblogic.xml was found to be empty.

Action:
Check the weblogic.xml descriptor.

BEA-101261
Invalid session parameter name in weblogic.xml: {0}.

Category:
HTTP

Cause:
One of the session parameters configured in weblogic.xml was invalid.

Action:
Check the weblogic.xml and correct the session parameter.

BEA-101262
The session parameter name "{0}" in weblogic.xml is deprecated.

Category:
HTTP

Cause:
This parameter has been deprecated.

Action:
See the WebLogic Server documentation for an alternative. This parameter might be removed from future releases.

BEA-101263
The session parameter name in weblogic.xml is empty.

Category:
HTTP

Cause:
The param-name element is a mandatory element.

Action:
Check the weblogic.xml descriptor.

BEA-101264
{0}: CLIENT-CERT-based authentication failed.

Category:
HTTP

Cause:
Authentication failed.

Action:
Either the certificate was missing or the user the certificate resolves to is not a valid user in the system.

BEA-101267
Failed while destroying filter: {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP

Cause:
Destroying the filter on the Web application undeploy failed.

Action:
There might be a problem in the implementation of the destroy method. Check the exception for the exact cause.

BEA-101268
{0}: Failed while destroying servlet: {1}.

Category:
HTTP

Cause:
Destroying a servlet on the Web application undeploy failed.

Action:
There might be a problem in the implementation of the destroy method. Check the exception for the exact cause.

BEA-101271
The url-pattern element is not specified for the web-resource-collection/web-resource-name: {0} in the web.xml descriptor.

Category:
HTTP

Cause:
The url-pattern element is a mandatory element.

Action:
If you want the security constraint to apply for all requests, specify url-pattern=/*.

BEA-101275
Server has detected non-replicated sessions while SUSPENDING. Server will wait for non-replicated sessions to either become invalidated or timed out or will wait until a secondary is chosen using the lazy process (meaning if a session does not have a secondary, the server waits until the next request to create the secondary). The current timeout value is {0} seconds. To terminate non-replicated sessions immediately, use the FORCESHUTDOWN option.

Category:
HTTP

Cause:
During graceful shutdown, the server waits for inflight work to complete. This includes non-replicated sessions.

Action:
No action is required. Use FORCESHUTDOWN to ignore inflight work and force shutdown of the server.

BEA-101276
Web application(s) {1} still have non-replicated sessions after {0} minutes of initiating SUSPEND. Waiting for non-replicated sessions to finish.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP

Cause:
The server is waiting for sessions to finish before gracefully shutting down.

Action:
No action is required. Use FORCESHUTDOWN to ignore inflight work and shutdown the server.

BEA-101277
Web application(s) {0} has {1} non-replicated session(s) respectively.

Category:
HTTP

Cause:
The server has detected non-replicated sessions while gracefully shutting down.

Action:
No action is required. Use FORCESHUTDOWN to ignore inflight work and shut down the server.

BEA-101278
There are no active sessions. The Web service is ready to suspend.

Category:
HTTP

Cause:
All active sessions have completed. The Web service is ready to gracefully shut down.

Action:
No action is required.

BEA-101280
Failed to create WebServerRuntimeMBean for the Web server: {0}.

Category:
HTTP

Cause:
The Web server creates a runtime MBean during the initialization phase for monitoring.

Action:
Check the exception for the exact cause.

BEA-101282
{0}: jspServlet "{1}" defined in weblogic.xml could not be registered. It should be a subclass of javax.servlet.http.HttpServlet.

Category:
HTTP

Cause:
The user-defined class should be a subclass of javax.servlet.http.HttpServlet.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
The jspServlet class must be a subclass of javax.servlet.http.HttpServlet.

BEA-101283
{0}: jspServlet "{1}" defined in weblogic.xml could not be loaded.

Category:
HTTP

Cause:
The user-defined class was unable to load.

Action:
Ensure that the class appears in the webapp-classpath.

BEA-101287
{0}. The servlet: {1} received an exception during servlet destroy. Ensure that the super.init(config) is called in the init() method.

Category:
HTTP

Cause:
This is due to a bug in javax.servlet.GenericServlet.

Action:
Ensure that the super.init(config) is called in the init() method for the servlet.

BEA-101288
Application:{0} WebAppModule: {1} failed to set contextPath: {2}.

Category:
HTTP

Cause:
The set context path call failed for the MBean.

Action:
Check that the context path assigned to this Web application module is valid.

BEA-101291
The webAppModule: {1} in application: {0} is unable to reload classes because it shares a classloader with other modules.

Category:
HTTP

Cause:
An attempt to reload a class was made when the classloader was shared by other modules.

Action:
Ensure that the module has its own classloader or reload all modules that share the classloader at once.

BEA-101292
Validation failed for the descriptor: {0} param: {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP

Cause:
The container found an illegal value assigned to this parameter.

Action:
Check the error message for the exact cause.

BEA-101295
Recompiling JSP [{0}], resource [{1}], because it is stale. It was previously compiled using a different version of WebLogic Server. JSP build version: {2} WebLogic Server build version: {3}.

Category:
HTTP

Cause:
A JSP was compiled using a different version of WebLogic Server or JSPC.

Action:
To precompile JSPs, ensure that you precompile them using the same version, service pack, rolling patches, and temporary-patches in your classpath for WebLogic Server or JSPC. This will ensure the same version string and compatibility at runtime.

BEA-101296
Unable to load the default compiler class "{0}". Using the default javac compiler to compile JSPs.

Category:
HTTP

Cause:
The compiler class was not found and hence could not be loaded.

Action:
Ensure that the class exists in the classpath.

BEA-101297
The value assigned to the container-descriptor parameter: index-directory-sort-by in weblogic.xml is invalid: {0}. The valid values are "NAME", "LAST_MODIFIED", or "SIZE".

Category:
HTTP

Cause:
An invalid value is specified in weblogic.xml for the container-descriptor parameter: index-directory-sort-by.

Action:
Fix the values in the weblogic.xml descriptor. Valid values are "NAME", "LAST_MODIFIED", or "SIZE".

BEA-101299
The servlet-mapping for servlet-name "{0}" will override the default mapping for *.jsp. This can lead to a show code vulnerability.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP

Cause:
The url-pattern *.jsp is being overriden in the web.xml by a user-defined servlet.

Action:
Since the default JSP servlet will be overriden, care must be taken to ensure that JSP source code does not appear directly on the browser.

BEA-101302
Web application: {0}, the {1} role: {2} defined in the descriptor: {3} has not been mapped to a principal name in weblogic.xml. Will use the first principal-name: {4} specified in security-role-assignment as the run-as-identity. The run-as role can be mapped to a principal name in weblogic.xml using either run-as-role-assignment element or the servlet-descriptor/run-as-principal-name.

Category:
HTTP

Cause:
No mapping was found for the run-as role in weblogic.xml.

Action:
Since the server has decided to use the implicit map, ensure that this is the principal-name you intended to use. The run-as role can be mapped to a principal name in weblogic.xml using either the run-as-role-assignment element or the servlet-descriptor/run-as-principal-name.

BEA-101303
Web application: {0}, the {1} role: {2} defined in the descriptor: {3} has not been mapped to a principal name in weblogic.xml. Also there is no security-role-assignment defined for this role. Will use the rolename itself as a principal-name for {1} for the servlet. The run-as role can be mapped to a principal name in weblogic.xml using either the run-as-role-assignment element or the servlet-descriptor/run-as-principal-name.

Category:
HTTP

Cause:
No mapping was found for the run-as role in weblogic.xml.

Action:
Since the server has decided to use the implicit map, ensure that this is the principal-name you intended to use. The run-as role can be mapped to a principal name in weblogic.xml using either the run-as-role-assignment element or the servlet-descriptor/run-as-principal-name.

BEA-101304
Web application: {0}, the {1}: {3} defined in web.xml {2} not been mapped to principals in security-role-assignment in weblogic.xml. Will use the rolename itself as the principal-name.

Category:
HTTP

Cause:
Did not find a mapping for the roles which were supposed to be mapped to a principal in security-role-assignment in weblogic.xml.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Since the server has decided to use the implicit map, ensure that this is the principal-name you intended to use.

BEA-101305
[{0}] Error-page location: "{1}" for the error code: "{2,number}" causes an infinite loop condition as it throws the same code for which it has been mapped.

Category:
HTTP

Cause:
The servlet for the error-page, which maps to the given error code, throws the same error code. This causes an infinite loop condition.

Action:
Fix the error page.

BEA-101306
Could not resolve entity "{0}" for the webapp at: "{1}". Check the DTD reference in the corresponding descriptor (web.xml/weblogic.xml).

Category:
HTTP

Cause:
The descriptor validation failed.

Action:
Check the DTD and ensure that the descriptors comply with that. Check the exception message for more details. Also, ensure that there are no typos in the DOCTYPE header.

BEA-101307
Got an error while resolving entity "{0}" for the Web application at: "{1}". Check the DTD reference in the corresponding descriptor (web.xml/weblogic.xml).

Category:
HTTP

Cause:
The descriptor validation failed.

Action:
Check the DTD and ensure that the descriptors comply with that. Check the exception message for more details. Also, ensure that there are no typos in the DOCTYPE header.

BEA-101310
Web server: {0}, failed to perform batched update for replicated sessions against jndiname: {1} on the secondary server: {2} http-port: {3} https-port: {4}

Category:
HTTP

Cause:
The Remote Management Interface (RMI) call from the trigger, which was intended to periodically update the read-only replicated sessions on the secondary server, failed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the exception for the exact cause.

BEA-101317
The Web application: {0} has specified DIGEST as the auth-method in web.xml, which is not implemented. Will default to BASIC.

Category:
HTTP

Cause:
DIGEST authentication is not yet implemented. The Web application will fallback to BASIC authentication.

Action:
Choose either BASIC, FORM, or CLIENT-CERT.

BEA-101318
The Web application: {0} has specified: {1} as the auth-method in web.xml, which is not valid. Valid values are BASIC (default), FORM, and CLIENT-CERT.

Category:
HTTP

Cause:
An invalid authentication method was specified in web.xml.

Action:
The valid values are BASIC, FORM, and CLIENT-CERT. Fix the web.xml file for the Web application.

BEA-101319
The Web application: {0} has "FORM" based authentication specified but the mandatory element: {1} is left blank.

Category:
HTTP

Cause:
The form-login-page and form-error-page are mandatory elements when auth-method is "FORM."

Action:
Fix the web.xml for the specified Web application.

BEA-101325
The local-path: {1} specified for the virtual-directory-mapping specified in weblogic.xml for the Web application: {0} (docroot={2}), is not valid.

Category:
HTTP

Cause:
A relative path was possibly assigned to the local-path. If so, the container makes the path relative to the document root.

Action:
Ensure that the relative path exists with respect to the document root.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-101326
The element: {1} contains an undefined security-role: {0}

Category:
HTTP

Cause:
The security-role definition is mandatory.

Action:
Ensure that the security role-name is defined in web.xml. Also check the DTD and examples for the correct syntax.

BEA-101327
The element: {0} is not allowed to appear more than once in the descriptor: {1}

Category:
HTTP

Cause:
The parser found more than one occurrence for the element.

Action:
Ensure that than the element appears only once (check the schema).

BEA-101328
{0}: invalid dispatcher: {2} for filter-mapping: {1}

Category:
HTTP

Cause:
An invalid value was found for the filter mapping dispatcher.

Action:
Valid values are: "REQUEST," "FORWARD," "INCLUDE," or "ERROR."

BEA-101331
Cannot deploy {0} from {1} on {2}, because there is already a non-versioned Web application named {3} loaded from {4}, using the context path {5}.

Category:
HTTP

Cause:
The Web application version that is being deployed has been assigned a context path that is already in use by a non-versioned Web application.

Action:
Choose a different context path or undeploy the conflicting Web application.

BEA-101332
Failed to register JACC policy context handlers for the Web application container.

Category:
HTTP

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is an unexpected error.

Action:
See the error message for more information.

BEA-101337
Received a SecurityException during: {0}, for : {1}, Web application: {2}

Category:
HTTP

Cause:
The user does not have enough privileges.

Action:
See the error message for more information.

BEA-101338
The context parameter "weblogic.httpd.defaultServlet" has been deprecated. Instead, use the servletMapping = "/" to define the default servlet.

Category:
HTTP

Cause:
A deprecated context parameter was used.

Action:
The servlet weblogic.servlet.FileServlet is the default servlet. If you want to override the default, define a new servlet-mapping in web.xml with url-pattern = "/".

BEA-101339
The context parameter: {0} has been deprecated. Instead, use the element: {1} in weblogic.xml.

Category:
HTTP

Cause:
A deprecated context parameter was used.

Action:
Replace it with the suggested alternative in weblogic.xml.

BEA-101340
The context parameter "weblogic.httpd.servlet.classpath" has been deprecated. Instead use manifest classpath or WEB-INF/lib or WEB-INF/classes or virtual-directories in weblogic.xml

Category:
HTTP

Cause:
A deprecated context parameter was used.

Action:
There are better ways to extend the classpath exposed to the Web application classloader, including virtual-directories and a manifest classpath.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-101341
{0}: Class file up-to-date for JSP: {1}

Category:
HTTP

Cause:
This message indicates that the class file associated with the JSP is up-to-date.

Action:
No action is required.

BEA-101342
{0}: Error(s) encountered while precompiling JSP {1} {2}

Category:
HTTP

Cause:
The JSP file shown by the error message had errors and could not be precompiled.

Action:
Correct the errors shown by the message so that it gets precompiled without errors.

BEA-101343
{0}: Attempting to precompile {1}, since the class file associated with it was found to be out-of-date.

Category:
HTTP

Cause:
This message indicates that the class file associated with the given JSP was out of date and needs recompilation.

Action:
No action is required.

BEA-101344
{0}: Attempting to precompile {1}, since the class file associated with it was not found in the Web application classpath.

Category:
HTTP

Cause:
This message indicates that the class file associated with the given JSP was not found in the Web application classpath and thus needs to be compiled.

Action:
No action is required.

BEA-101345
A change in value was detected for the "Fields" directive in access.log for webserver: {0}. Rotating the access.log. The value defined for the WebServerMBean will take precedence. Default being "time cs-method cs-uri sc-status". Old value: "{1}" and new value: "{2}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP

Cause:
This message indicates that the value from WebServerMBean.getELFFields() was different that the value in the "Fields" directive on the top of access.log.

Action:
Changing the ELF fields by hand editing access.log is no longer supported. Change the access.log "Fields" using the Administration Console.

BEA-101346
The virtual host name: {0} being used by the Virtual Host: {1} is already in use by: {2}

Category:
HTTP

Cause:
There is duplicate name usage for VirtualHostNames.

Action:
Fix the VirtualHostNames fields for the Virtual Host and choose a unique name.

BEA-101347
The server channel name (NetworkAccessPoint): {0} being used by the Virtual Host: {1} is already in use by: {2}

Category:
HTTP

Cause:
There is uplicate name usage for ServerChannelName for Virtual Hosts.

Action:
Fix the ServerChannelName field for the Virtual Host and choose a unique name.

BEA-101348
The server channel name (NetworkAccessPoint): {0} being used by the Virtual Host: {1} is not defined. This virtual host will not be deployed.

Category:
HTTP

Cause:
The NetworkAccessPoint is not yet defined.

Action:
Choose a different NetworkAccessPoint name or define a new one using the Administration Console.

BEA-101349
Failed to save the WorkContexts into the session or cache for the request: {0}

Category:
HTTP

Cause:
An unexpected exception occurred.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
At the end of the request, the Web application container saves the WorkContexts into the session and the local cache in order to propagate them between successive HTTP requests. Contact My Oracle Support and report this problem.

BEA-101350
Web application(s) {2} of module {1} of application {0} has {3} pending session(s) respectively.

Category:
HTTP

Cause:
The server has detected pending sessions for the Web application module while the application is gracefully transitioning from running to administration mode.

Action:
No action is required. Use the -force option to ignore inflight work and bring the application to administration mode.

BEA-101351
Server has detected pending sessions while gracefully transitioning webapp module {1} of application {0} from running to administration mode. Server will wait for pending sessions to either become invalidated or timed out. The current timeout value is {2} seconds. To terminate sessions immediately, use the -force option.

Category:
HTTP

Cause:
During graceful transition of the application from running to administration mode, the server waits for inflight work to complete. This includes pending sessions.

Action:
No action is required. Use the -force to ignore inflight work and force transition of the application from running to administration mode.

BEA-101352
There are no active sessions. The Web application module {1} of application {0} is ready to go into administration mode.

Category:
HTTP

Cause:
All active sessions have completed. The Web service is ready to gracefully transition to administration mode.

Action:
No action is required.

BEA-101354
Web application(s) {3} of module {1} of application {0} still have pending sessions after {2} minutes of initiating transition from running to administration mode. Waiting for pending sessions to finish.

Category:
HTTP

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The server is waiting for the application sessions to finish before gracefully shutting down.

Action:
No action is required. Use the -force option to ignore inflight work and force transition of the application into administration mode.

BEA-101355
[{0}] Version {2} is specified for Web Services {1}, but versioning of Web Services is not supported.

Category:
HTTP

Cause:
An attempt was made to deploy Web Services with versioning.

Action:
Deploy the Web Services (or the application containing the Web Services) without versioning.

BEA-101356
Web application: {0} failed to load the shared library (fastfile) for using native I/O in the FileServlet, falling back to the standard I/O.

Category:
HTTP

Cause:
An unexpected error occurred while attempting to load the native library (fastfile) for using native I/O in the FileServlet.

Action:
Ensure that the shared library (fastfile) exists in a directory that is in the LD_LIBRARY_PATH or PATH. Also, note that native I/O is supported on Windows, Linux, and Solaris. If problem persists, contact My Oracle Support.

BEA-101357
A force graceful production to administration mode transition was initiated. The Web application module {1} of application {0} is ready to go into administration mode.

Category:
HTTP

Cause:
A force graceful production to administration mode transition was initiated. The Web service is ready to transition to administration mode.

Action:
No action is required.

BEA-101359
The servlet {0} initilization method failed while it was run in the background. The exception was: {1}.

Category:
HTTP

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The servlet initilization method caused an exception.

Action:
The cause of the exception must be corrected and then the application should be redeployed.

BEA-101360
Recompiling JSP [{0}], resource [{1}], because it is stale.

Category:
HTTP

Cause:
The JSP was changed from the last time it was compiled.

Action:
The JSP will be always recompiled if it is different from the last compiled version.

BEA-101361
[{0}] A library reference in weblogic.xml has an illegal Specification-Version: {1}. The Specification-Version must be a valid version string: int(.int)*, int >=0. For example: 2.1.1.

Category:
HTTP

Cause:
The Specification-Version of a library reference in weblogic.xml cannot be parsed.

Action:
Fix the library's Specification-Version in weblogic.xml to conform to the required version string syntax.

BEA-101362
[{0}] could not deserialize the {1} scoped attribute with name: "{2}"

Category:
HTTP

Cause:
Classloader changed. When this happens, the old attributes will be deserialized using the new classloader. The classloader can change either as the result of a dynamic reload of classes (controlled by weblogic.xml parameter "reload-check-secs" or upon across webapp dispatch (include or forward).

Action:
Ensure that the attribute class is available to the Web application scope and that the attribute class and all the references it holds are serializable.

BEA-101363
Application: {0}, Web application: {1} has context-root specified in application.xml: "{2}". The context-root specified in weblogic.xml: "{3}" will be ignored.

Category:
HTTP

Cause:
The context-root specified in application.xml takes higher precedence than the one in weblogic.xml.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
This is an informational message. Ensure that this is what you intended to do.

BEA-101364
{0}:{1} Failure while precompiling JSP: {2}.

Category:
HTTP

Cause:
The JSP failed to precompile on a partial update.

Action:
Check the exception for the exact cause.

BEA-101366
The server could not send the HTTP message during the configured timeout value. The socket has been closed.

Category:
HTTP

Cause:
This is an informational message.

Action:
Bump up the value of CompleteMessageTimeout. The default is 60 seconds. If you have slow clients that cannot complete the messsage transfer and are getting timed out, raise the value.

BEA-101367
An error occurred while extracting archived file for "{0}", located at "{1}".

Category:
HTTP

Cause:
An error occurred while extracting the archived WAR file, due to path length limitations on some OS's.

Action:
Some OS's only allow a certain number of characters in the file name. This limitation can be noticed when extracting an archive in a deeply nested directory. Since the default temporary directory for extracting all archives is relative to the server root directory, it is recommended that one use the system property weblogic.j2ee.application.tmpDir and set it to a shorter file path, or one could ensure that the server is started in a directory with a shorted file path.

BEA-101369
{0}: The encoding jsp-descriptor parameter has been deprecated. Consider declaring the encoding in the jsp-config element (web.xml) or as a page directive (pageEncoding) instead.

Category:
HTTP

Cause:
{0}: The encoding jsp-descriptor parameter has been deprecated.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Consider declaring the encoding in the jsp-config element (web.xml) or as a page directive (pageEncoding) instead.

BEA-101370
There was a failure when merging library descriptors into the application descriptors for application {0}. Ensure that the descriptors are valid. The error is {1}

Category:
HTTP

Cause:
The library or the application descriptors are invalid.

Action:
Fix the descriptors in the application or the library.

BEA-101371
There was a failure when processing annotations for application {0}. Ensure that the annotations are valid. The error is {1}

Category:
HTTP

Cause:
The descriptor has an invalid servlet-class, filter-class, or listener-class.

Action:
Fix the descriptors in the application or the library.

BEA-101372
There was a failure in application {0} when attempting to inject dependencies into {1}. Dependencies will not be injected into this class.

Category:
HTTP

Cause:
The annotations defined in the class may be invalid or the descriptor may have conflicting entries.

Action:
Check the annotations defined in this class. Also, verify that the descriptor has valid entries.

BEA-101373
Reloading classes in application {0} failed due to change of annotations on a refreshed class. Modified or new annotations will not be processed during servlet reload as they involve a non-dynamic change. Redeploy the application for these annotations to be processed.

Category:
HTTP

Cause:
New or modified annotations will not be processed in application {0} due to a servlet refresh.

Action:
Redeploy the application for reloading classes when annotations are modified.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-101374
The Web container failed to look up the transaction associated with the current thread for Web application: ${0}.

Category:
HTTP

Cause:
After the response is sent, the container needs to check if there is any active transaction associated with the thread so that it can abort the transaction. See the exception message for more details.

Action:
See the exception message for more details.

BEA-101375
[{0}]: Error while parsing the JSF Configuration Descriptor at "{1}".

Category:
HTTP

Cause:
A JSF Configuration Descriptor parsing exception occurred.

Action:
Check the exception for the exact cause.

BEA-101376
Unable to purge cache of Bean classes from BeanELResolver, error occurs at "{0}".

Category:
HTTP

Cause:
Unable to get the cache property of BeanELResolver.

Action:
Contact My Oracle Support and report this problem.

BEA-101377
Filtering class loader configuration ignored for web module {1} of application {0}.

Category:
HTTP

Cause:
Filtering class loader configuration is only supported in descriptors at the main level of the deployment (for example, in enterprise applications or standalone web applications). This configuration is not supported in Web modules of an enteprise application.

Action:
Remove the filtering class loader configuration from the deployment descriptor of web module {1} of application {0}.

BEA-101378
The version of OpenJPA shipped with WebLogic Server does not support JPA 2.0. Recompile the application with the JPA 1.0 API JAR available at http://www.jcp.org/en/jsr/summary?id=220.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP

Cause:
The Kodo-OpenJPA persistence provider that ships with WebLogic Server does not support JPA 2.0.

Action:
Recompile the application with the JPA 1.0 API jar available at http://www.jcp.org/en/jsr/summary?id=220 or use TopLink if you wish to use a JPA 2.0 persistence provider.

BEA-101379
Starting with WebLogic Server 10.3.4.0, some methods changed in the OpenJPA interfaces that ship with WebLogic Server. Recompile the application with the OpenJPA JAR in your WebLogic Server installation.

Category:
HTTP

Cause:
Some methods in the OpenJPA interfaces that ship with WebLogic Server have changed.

Action:
Recompile the application with the OpenJPA JAR in your WebLogic Server installation.

BEA-101380
There is more than one Web fragment with the same name: "{0}".

Category:
HTTP

Cause:
There is more than one Web fragment with the same name.

Action:
Change the duplicate Web fragment names to avoid the conflict.

BEA-101381
Both before others and after others found in Web fragment: "{0}".

Category:
HTTP

Cause:
Both before others and after others was found in the Web fragment.

Action:
Ensure that the Others element appears only in before or after.

BEA-101382
WLServlet annotation cannot be used with WebServlet together.

Category:
HTTP

Cause:
WLServlet annotation cannot be used with WebServlet together.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Oracle recommends that you use only servlet 3.0 annotations.

BEA-101383
WLFilter annotation can't be used with WebFilter together

Category:
HTTP

Cause:
WLFilter annotation can't be used with WebFilter together.

Action:
Suggest to use servlet 3.0 annotations only

BEA-101384
{0} annotation is deprecated, please use servlet 3.0 annotation instead. App:{1}, Class:{2}

Category:
HTTP

Cause:
The older WL annotations are deprecated, and replaced by servlet 3.0 annotations, for example WLServlet is replaced by WebServlet, WLFilter is replaced by WebFilter.

Action:
Suggest to use servlet 3.0 annotations instead if WL annotations

BEA-101385
WebListener annotation is used illegally, the class annotated by WebListener must implement listener interface

Category:
HTTP

Cause:
WebListener annotation is used illegally, the class annotated by WebListener must implement listener interface, for example: javax.servlet.ServletContextListener and so on, please check the servlet 3.0 specification.

Action:
The class annotated by WebListener must implement listener interface, for example: javax.servlet.ServletContextListener and so on, suggest to check the servlet 3.0 specification.

BEA-101386
The ServletSecurity Annotation is illegal, the root is {0}

Category:
HTTP

Cause:
The ServletSecurity Annotation is illegal, the root is {0}.

Action:
Suggest not to correct ServletSecurity Annotation accroding to the Servlet 3.0 Specification.

BEA-101387
ServletContext has already been initialized, cannot call method {0} any longer.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP

Cause:
ServletContext has already been initialized, cannot call method {0} any longer.

Action:
Check Servlet 3.0 Specification and the corresponding javadoc.

BEA-101388
The ServletContext was passed to the ServletContextListener.contextInitialized method of a ServletContextListener that was neither declared in web.xml or web-fragment.xml, nor annotated with javax.servlet.annotation.WebListener.

Category:
HTTP

Cause:
The ServletContext was passed to the ServletContextListener.contextInitialized method of a ServletContextListener that was neither declared in web.xml or web-fragment.xml, nor annotated with javax.servlet.annotation.WebListener.

Action:
Check Servlet 3.0 Specification and the corresponding javadoc.

BEA-101389
Cannot add this ServletContextListener

Category:
HTTP

Cause:
Because this ServletContext was passed to the ServletContextListener's contextInitialized() method of a ServletContextListener that was neither declared in web.xml or web-fragment.xml, nor annotated with javax.servlet.annotation.WebListener.

Action:
Check Servlet 3.0 Specification and the corresponding javadoc.

BEA-101390
It is illegal to use both value and urlPatterns attributes together in the same WebServlet/ WebFilter annotation: {0}.

Category:
HTTP

Cause:
As per the Servlet 3.0 specification, section 8.1, both the value attribute and urlPatterns attribute were detected in the identical WebServlet/WebFilter annotation.

Action:
Use either the value attribute or urlPatterns attribute, but not both at the same time in the same annotation.

BEA-101391
Circular references found in web fragments relative ordering.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP

Cause:
Circular references found in web fragments relative ordering.

Action:
Use absolute ordering to overwrite relative ordering or change relative ordering config.

BEA-101392
Glassfish Descriptor element <{0}> was successfully parsed and applied.

Category:
HTTP

Cause:
This is an information message.

Action:
No action is required if the element parsing was successful.

BEA-101393
Glassfish Descriptor element <{0}> is not supported by WebLogic.

Category:
HTTP

Cause:
This is an informational message.

Action:
No action is required. Note that the element is ignored by the descriptor parser.

BEA-101394
The exception "{0}" occurred when processing getParameter or getParameterValues from a multipart value of a ServletRequest.

Category:
HTTP

Cause:
The exception "{0}" occurred when processing getPart or getParts from a ServletRequest.

Action:
Check whether the size of the uploaded file exceeds the size limit. Check that the content of the post-multipart form data is correct.

BEA-101395
Application or module {0} is deployed as a web application.

Category:
HTTP

Cause:
The spplication or module {0} was deployed as a web application because there was no hint (descriptors or classes annotated by component annotations) detected. WebLogic Server deploys applications without deployment descriptors or classes annotated by component annotations as web application.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required if the application is a web application or a web module. Otherwise, add the corresponding deployment descriptors so that WebLogic Server can detect the application type correctly.

BEA-101396
Either the urlPatterns or the value attribute in the WebServlet annotation MUST be present: {0}.

Category:
HTTP

Cause:
As per the Servlet 3.0 specification, section 8.1.1, neither the value attribute nor the urlPatterns attribute was detected in the WebServlet annotation.

Action:
Use either the value attribute or urlPatterns attribute, but not both at a same time in the same annotation.

BEA-101397
The urlPatterns attribute, servletNames attribute, or value attribute of the WebFilter annotation MUST be specified: {0}.

Category:
HTTP

Cause:
As per the Servlet 3.0 specification, section 8.1.2, neither the urlPatterns attribute, servletNames attribute, nor value attribute was detected in the WebFilter annotation.

Action:
Use either the urlPatterns, servletNames, or value attribute in the annotation. Do not use both the urlPatterns and value attributes at a same time in the same annotation.

BEA-101398
Exception : [{0}][{1}] during request upgrade.

Category:
HTTP

Cause:
An error occurred while creating an instance of HttpUpgradeHandler. [{0}][{1}]

Action:
Check whether the Implement of HttpUpgradeHandler exists or the class has been put under the correct classpath.

BEA-101399
The Web application: {0} has specified DIGEST as the auth-method in web.xml, which is not implemented.

Category:
HTTP

Cause:
DIGEST authentication is not yet implemented.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Choose either BASIC, FORM, or CLIENT-CERT.

BEA-101400
The value of {0} attribute {1} can not be serialized and will be removed when reloading the application, the class of the value object is {2}.

Category:
HTTP

Cause:
An exception occurred when serializing the attribute value.

Action:
Either correct the serialization issue of the attribute value class or ignore this warning if it is harmless for application reloading.

BEA-101401
The url-pattern {0} in web application {1} is mapped to multiple Servlets.

Category:
HTTP

Cause:
The effective web.xml, after merging information from fragments and annotations, contains url-patterns that are mapped to multiple servlets.

Action:
Check the web.xml, fragment.xml, and annotations to remove the multiple url-patterns mapping issue of the servlets.

BEA-101402
Cannot get Request or Response when the current state is completed or dispatched.

Category:
HTTP

Cause:
Try to get Request or Response from a completed or dispatched AsyncContext.

Action:
Try to call AsyncContext.getRequest and AsyncContext.getResponse after the asynchronous request is completed or dispatched.

BEA-101403
For security constraint with url-pattern {0} in web application {1}, only the http methods "{2}" are covered.

Category:
HTTP

Cause:
During application deployment, the container must inform the deployer of any uncovered http methods that are present in the application security constraint configuration resulting from the combination of the constraints defined for the application.

Action:
Check the security constraint in the web application. Remove the uncovered http methods.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-101404
For security constraint with url-pattern {0} in web application {1}, the http methods "{2}" are uncovered.

Category:
HTTP

Cause:
During application deployment, the container must inform the deployer of any uncovered HTTP methods that are present in the application security constraint configuration resulting from the combination of the constraints defined for the application.

Action:
Check the security constraint in the web application. Remove the uncovered http omitted methods.

BEA-101405
The preliminary servlet {0} defined in web.xml or web-fragment.xml has not been completed through the ServletContext.addServlet() API by any ServletContextListener or ServletContainerInitializer.

Category:
HTTP

Cause:
The servlet does not have any servlet-class or jsp-file configured in web.xml or web-fragment.xml. Therefore it does not get completed by by ServletContextListener or ServletContainerInitializer with the programmatically servlet adding API of ServletContext.

Action:
Ensure that the servlet is completed in web.xml or web-fragment.xml, or can be completed by ServletContextListener or ServletContainerInitializer with the programmatically servlet adding API of ServletContext.

BEA-101406
Filter Name cannot be a Null or Empty string.

Category:
HTTP

Cause:
The filter name is a Null or Empty string when calling ServletContext.addFilter().

Action:
Check the application. Add a 'not null' string type name for ServletContext.addFilter().

BEA-101407
Servlet Name cannot be a Null or Empty string.

Category:
HTTP

Cause:
The Servlet name is a Null or Empty string when calling ServletContext.addServlet().

Action:
Check the application. Add a 'not null' string type name for ServletContext.addServlet().

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-101408
[{0}] An error occurred while removing WLDFDataAccessRuntimeMBean.

Category:
HTTP

Cause:
The WLDFDataAccessRuntimeMBean associated with Web application {0} could not be removed.

Action:
Check the exception for the exact error message.

BEA-101409
The referenced shared library {0} {1} will be ignored and the {0} library in system class path will be used.

Category:
HTTP

Cause:
Since WebLogic Server 12c, application is unnecessary to reference shared library to use JSF/JSTL feature. Since WebLogic Server 12.2.1, the referenced JSTL 1.2 and JSF 2.x shared library in application will be ignored. The JSF/JSTL shared library in system classpath will be used.

Action:
The JSF 2.x/JSTL 1.2 library-ref in deployment descriptor should be removed.

BEA-101410
Secure mode is enabled in WLS domain, the servlet {0} uses weblogic.servlet.ServletServlet which should not be used in WLS secure mode.

Category:
HTTP

Cause:
The servlet weblogic.servlet.ServletServlet is recommended to be not used in WLS secure mode.

Action:
Please remove weblogic.servlet.ServletServlet and existing mappings in web.xml of your application. Please refer to document *Oracle® Fusion Middleware Securing a Production Environment for Oracle WebLogic Server*, Chapter 3 "Ensuring the Security of Your Production Environment" for more details.

BEA-101411
There's IOException thrown when web application [{0}] sends error response to client. The IOException is {1}

Category:
HTTP

Cause:
An unexpected IOException was thrown when sending error message to client.

Action:
Check the exception for the exact cause of the problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-110000
Transaction log record class name encoding error [{0}]: {1}

Category:
JTA

Cause:
An error occurred while writing a record to the transaction log.

Action:
Check for other log messages that give more information about the failure.

BEA-110001
Transaction log record encoding error [{0}]: {1}

Category:
JTA

Cause:
An error occurred while writing a record to the transaction log. See the reported exception for more details.

Action:
Check for other log messages that give more information about the failure.

BEA-110003
onError() callback exception: {0}

Category:
JTA

Cause:
An error occurred while writing a record to the transaction log.

Action:
Check for other log messages that give more information about the failure.

BEA-110004
Unable to read transaction log record checksum.

Category:
JTA

Cause:
The transaction log file is corrupted, possibly due to a crash or file system error. If this error occurs only once per system reboot, a crash caused the transaction being logged at that time to be rolled back.

Action:
No action is required. Recovery is automatic.

BEA-110005
Transaction log record checksum failure [{0}].

Category:
JTA

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A record in the transaction log file is corrupted, possibly due to a crash or file system error. If this error occurs only once per system re-boot, a crash caused the transaction being logged at that time to be rolled back.

Action:
No action is required. Recovery is automatic.

BEA-110007
Log record class instantiation problem [{0}]: {1}

Category:
JTA

Cause:
An error occurred while reading a record from the transaction log. This may have also occurred due to crash recovery processing of a new transaction log file performed by an older WebLogic Server software version.

Action:
Check for other log messages that give more information about the failure.

BEA-110008
Log record class readExternal problem [{0}]: {1}

Category:
JTA

Cause:
An error occurred while reading externalized state information for a record from the transaction log. This may have also occurred due to crash recovery processing of a new transaction log file performed by an older WebLogic Server software version.

Action:
Check for other log messages that give more information about the failure.

BEA-110011
onRecovery() callback exception: {0}.

Category:
JTA

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-110013
An error occurred while writing transaction log: {0}.

Category:
JTA

Cause:
The file system is full or permission problems exist.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify the transaction log file location and locate any file system problems.

BEA-110015
A version error occurred while reading the transaction log header file.

Category:
JTA

Cause:
File corruption exists. A new transaction log file may have been given to an older version of WebLogic Server.

Action:
The system will automatically create an empty transaction log.

BEA-110020
Error reading transaction log file [{0}]: {1}

Category:
JTA

Cause:
There are file system or permission problems, or possible corruption of the transaction log.

Action:
Verify the transaction log file location and check for file system problems. Crash recovery processing continues as best it can.

BEA-110021
Format error [{0}] occurred while reading transaction log file [{1}]

Category:
JTA

Cause:
The transaction log file was possibly corrupted.

Action:
Contact My Oracle Support.

BEA-110022
Format error [{0}] occurred while reading transaction log file [{1}]: {2}

Category:
JTA

Cause:
The transaction log file is possibly corrupted.

Action:
Contact My Oracle Support.

BEA-110023
Transaction log record checksum failure [{0}]: {1}.

Category:
JTA

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A record in the transaction log file is corrupted, possibly due to a crash or file system error. If this error occurs only once per system reboot, a crash caused the transaction being logged at that time to be rolled back.

Action:
No action is required. Recovery is automatic.

BEA-110026
Missing transaction log file [{0}]

Category:
JTA

Cause:
File system or permission problems exist, or the transaction log might be corrupted. The file might also have been manually deleted.

Action:
Verify the transaction log file location and check for file system problems. Crash recovery processing will continue.

BEA-110028
The transaction manager did not call XA.forget() for transaction [{1}] on resource [{0}], which reported a heuristic decision during commit.

Category:
JTA

Cause:
See the message details for probable cause.

Action:
After correcting any data inconsistencies due to the heuristic outcome, use the resource manager administrative commands to instruct the resource to ignore the transaction.

BEA-110029
The transaction manager did not call XA.forget() for transaction [{1}] on resource [{0}], which reported a heuristic decision during rollback.

Category:
JTA

Cause:
See the message details for the probable cause.

Action:
After correcting any data inconsistencies due to the heuristic outcome, use the resource manager administrative commands to instruct the resource to ignore the transaction.

BEA-110030
XA resource [{0}] has not responded in the last {1} second(s).

Category:
JTA

Cause:
The resource is unavailable (possibly the resource is down, or network problems exist).

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the resource manager and network condition. When the resource is available again, take the following actions to inform the Transaction Manager: For JDBC connection pools, refresh the connection pool. You can also enable the auto-refresh feature of the connection pool to do this automatically. For other third-party XA resources, the resource provider should re-register the resource by calling weblogic.transaction.TransactionManager.unregisterResource(), followed by weblogic.transaction.TransactionManager.registerStaticResource() or weblogic.transaction.TransactionManager.registerDynamicResource().

BEA-110033
Recovered transaction log header file from backup location [{0}].

Category:
JTA

Cause:
This error is probably caused by a crash that occurred when the the transaction log header file was being rewritten.

Action:
No action is required. Recovery is automatic.

BEA-110101
No license exists for two-phase commit (2PC) processing.

Category:
JTA

Cause:
The 2PC license is not present.

Action:
Contact an Oracle sales representative to obtain a 2PC license.

BEA-110102
A transaction with multiple resources was rolled back due to an invalid two-phase commit (2PC) license.

Category:
JTA

Cause:
The 2PC license is not present.

Action:
Contact an Oracle sales representative to obtain a 2PC license.

BEA-110200
User [{0}] is not authorized to invoke startCommit on a transaction branch.

Category:
JTA

Cause:
This might be a symptom of a potential security attack or, alternately, a problem with the "system" security identity of the server.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify that the client software is not directly invoking an internal WebLogic Server system object.

BEA-110201
User [{0}] is not authorized to invoke startRollback on a transaction branch.

Category:
JTA

Cause:
This might be a symptom of a potential security attack or, alternatively, a problem with the "system" security identity of the server.

Action:
Verify that client software is not directly invoking an internal WebLogic system object.

BEA-110202
User [{0}] is not authorized to invoke rollback on a transaction branch.

Category:
JTA

Cause:
This might be a symptom of a potential security attack, or alternately, a problem with the "system" security identity of the server.

Action:
Verify that client software is not directly invoking an internal WebLogic system object.

BEA-110204
XA resource [{0}] returns XAER_RMFAIL and is unavailable.

Category:
JTA

Cause:
The resource is unavailable because is down or network problems exist.

Action:
Check the resource manager and network conditions. When the resource is available again, take the following actions to inform the Transaction Manager: For JDBC connection pools, refresh the connection pool. You can also enable the auto-refresh feature of the connection pool to do this automatically. For other third-party XA resources, the resource provider should re-register the resource by calling weblogic.transaction.TransactionManager.unregisterResource(), followed by weblogic.transaction.TransactionManager.registerStaticResource() or weblogic.transaction.TransactionManager.registerDynamicResource().

BEA-110207
A previously unavailable XA resource [{0}] is now available.

Category:
JTA

Cause:
The previously unavailable resource is now available. It is possible that the resource has recovered from earlier failures or that previous network problems were cleared.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-110208
Unregistration of Transaction Recovery Service for server [{0}] failed.

Category:
JTA

Cause:
An attempt to unregister the Transaction Recovery Service for server [{0}] from the migratable service framework failed.

Action:
Check for other log messages that give more information about the failure.

BEA-110209
Registration of Transaction Recovery Service for server [{0}] failed.

Category:
JTA

Cause:
An attempt to register the Transaction Recovery Service for server [{0}] from the migratable service framework failed.

Action:
Check for other log messages that give more information about the failure.

BEA-110210
Failback of Transaction Recovery Service for server [{0}] failed.

Category:
JTA

Cause:
Transaction recovery actions are performed for the Transaction Recovery Service for server [{0}]. An attempt to failback the Transaction Recovery Service failed.

Action:
Examine the migration errors and perform manual migration of the Transaction Recovery Service back to server [{0}].

BEA-110211
Failback retry of Transaction Recovery Service for server [{0}] failed.

Category:
JTA

Cause:
Transaction recovery actions are performed for the Transaction Recovery Service for server [{0}]. Both the first and second attempt to failback the Transaction Recovery Service failed. JTA is going to give up implicitly failing back the Transaction Recovery Service for server [{0}].

Action:
Examine the migration errors and perform manual migration of the Transaction Recovery Service back to server [{0}].

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-110212
An attempt was made to manually migrate the Transaction Recovery Service of the current server away from the server while it is still active.

Category:
JTA

Cause:
An attempt was made to manually migrate the current Transaction Recovery Service away from the server while it is still active.

Action:
For controlled migration, suspend or shut down the current server first before manually migrating it to a backup server.

BEA-110213
The activation of Transaction Recovery Service for server [{0}] failed.

Category:
JTA

Cause:
The activation of Transaction Recovery Service for server [{0}] failed.

Action:
Examine the error details, correct the error conditions, and perform the necessary manual migration again if possible. If unsuccessful, My Oracle Support.

BEA-110400
An error occurred while unregistering Resource Runtime MBean: {0}

Category:
JTA

Cause:
The MBean may have been unregistered previously or there may be an issue with the JMX Administration Server.

Action:
No action is required.

BEA-110401
Ignoring error in afterCompletion. Object={0}, Exception={1}

Category:
JTA

Cause:
The application-defined javax.transaction.Synchronization callback may have caused an exception.

Action:
No action is required.

BEA-110402
Unknown state in getStatus(): {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JTA

Cause:
The Transaction.getStatus() method was called and the transaction status is not a valid value.

Action:
Check for other log messages that give more information about the failure.

BEA-110403
An unexpected exception occurred while processing a transaction during a transaction manager timer event. Exception={0}.

Category:
JTA

Cause:
Refer to the exception information found in the error message.

Action:
No action is required.

BEA-110405
Resource {0} was not assigned to any of these servers: {1}

Category:
JTA

Cause:
The transaction coordinator maintains information regarding where resources are registered among all the servers that are known to the coordinator. The participating resource may have been unregistered or became unavailable prior to attempting the operation. This condition may also occur if the cache belonging to the coordinator was out of date or has not completed initialization at the time the operation was invoked.

Action:
Verify the state of resource managers participating in the transaction and retry the operation.

BEA-110406
Internal error interpreting heuristic status. Expected={0}, Actual={1}

Category:
JTA

Cause:
The heuristic completion status of a transaction is calculated based on the expected and actual completion states of all participants. The logic to determine the heuristic outcome did not account for the combination of the actual and expected completion states.

Action:
Check for other log messages that give more information about the failure.

BEA-110407
Unknown state in getStatus(): {0}

Category:
JTA

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The Transaction.getStatus() method did not recognize the transaction state as a valid state.

Action:
Check for other log messages that give more information about the failure.

BEA-110408
An attempt to add a duplicate transaction to the transaction manager list was ignored.

Category:
JTA

Cause:
The internal transaction table of the server already contains the transaction instance being added. This event is innocuous.

Action:
Check for other log messages that give more information about the failure.

BEA-110409
Unable to advertise resource {0}: {1}

Category:
JTA

Cause:
A problem may exist with the JNDI provider, or another object is already bound to this context.

Action:
Contact My Oracle Support.

BEA-110410
Unable to create resource runtime MBean for resource {0}: {1}

Category:
JTA

Cause:
There may be a problem with the JMX Administration Server, or another MBean with this name is already registered with the Administration Server.

Action:
Contact My Oracle Support.

BEA-110411
Failed to construct local ServerCoordinatorDescriptor: {0}.

Category:
JTA

Cause:
During server initialization, information about the local server could not be obtained from the local JNDI context.

Action:
Check for other log messages that give more information about the failure.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-110412
{0} completed heuristically: {1}.

Category:
JTA

Cause:
The resource manager may have failed, timed out, or detected locking conflicts that prompted it to commit or roll back work for the transaction branch. If the heuristic error was due to a resource manager failure, the resource may not be able to determine if work for the transaction branch was committed, aborted, or both. In this case, the condition is considered a HAZARD or MIXED heuristic.

Action:
Check the participants of the transaction should be checked for possible data corruption. The resource manager reporting the heuristic may maintain state information related to the updates involved in the heuristic error. If the JTA ForgetHeuristics configuration parameter is set to false, this information may be preserved in the resource manager. This information might be useful in correcting any data inconsistencies.

BEA-110414
Illegal State (expected: Prepared or Committing): {0}

Category:
JTA

Cause:
While attempting to retry the commit phase of a transaction, it was detected that the state of the transaction is not valid. To be in the commit phase, a transaction can only be in the prepared or committing states.

Action:
Check for other log messages that give more information about the failure.

BEA-110415
Illegal state. Proceeding with rollback anyway. {0}

Category:
JTA

Cause:
While attempting to retry the rollback of a prepared transaction, it was detected that the state of the transaction is not valid.

Action:
Check for other log messages that give more information about the failure.

BEA-110419
An attempt was made to add an incompatible object as a transaction property: keys must be strings and values must be serializable.

Category:
JTA

Cause:
An attempt was made to add an incompatible object as a transaction property (the class of the key object must be a string and the class of the value object must be serializable).

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Change the application to assign the transaction property using a String key and a serializable value.

BEA-110420
An attempt was made to add an incompatible object as a local transaction property: keys must be String.

Category:
JTA

Cause:
An attempt was made to add an incompatible object as a local transaction property (the key object must be of the class String).

Action:
Change the application to add the local property with a String key.

BEA-110421
Timer method was called on committed transaction {0}.

Category:
JTA

Cause:
The transaction manager invoked a timer method on a transaction that has already completed. The transaction manager periodically checks for transactions that should be aborted due to timeout. This transaction should have been removed from the internal transaction table.

Action:
Check for other log messages that give more information about the failure. No action required.

BEA-110422
Forcibly aborting a transaction found in an unexpected internal state. Details={0}

Category:
JTA

Cause:
While processing a transaction, the transaction manager detected that the transaction is in an illegal state. The only course of action for the coordinator is to attempt to force a rollback of all participants.

Action:
Check for any data inconsistencies among participating resources. Contact My Oracle Support.

BEA-110423
Abandoning transaction after {0} seconds: {1}

Category:
JTA

Cause:
A resource or participating server may have been unavailable for the duration of the AbandonTimeoutSeconds period.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check participating resources for heuristic completions and correct any data inconsistencies.

BEA-110424
An unexpected exception was caught during begin: {0}

Category:
JTA

Cause:
Check the exception detail portion of the log message.

Action:
Correct the condition described in the exception detail portion of the log message.

BEA-110425
Error advertising TransactionManager object: {0}

Category:
JTA

Cause:
There may be a problem with the JNDI provider or another object is already bound to this context.

Action:
Contact My Oracle Support.

BEA-110426
An error occurred while advertising UserTransaction object: {0}

Category:
JTA

Cause:
There may be a problem with the JNDI provider, or another object is already bound to this context.

Action:
Contact My Oracle Support.

BEA-110427
An error occurred while advertising Coordinator object: {0}

Category:
JTA

Cause:
There may be a problem with the JNDI provider, or another object is already bound to this context.

Action:
Contact My Oracle Support.

BEA-110428
An error occurred while exporting Coordinator object ID: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JTA

Cause:
Another remote object may be bound to this object ID.

Action:
Contact My Oracle Support.

BEA-110429
Error advertising SubCoordinator object: {0}.

Category:
JTA

Cause:
There may be a problem with the JNDI provider, or another object is already bound to this context.

Action:
Contact My Oracle Support.

BEA-110433
Unable to obtain ownership of the transaction log.

Category:
JTA

Cause:
The Transaction Recovery Service associated with the current server is currently owned by other servers.

Action:
Migrate the Transaction Recovery Migratable Service back to the current server before restarting it.

BEA-110442
An administrative request was made to locally roll back the transaction associated with Xid {0}

Category:
JTA

Cause:
The forced local rollback operation was initiated by an administrative application.

Action:
No action is required.

BEA-110443
An administrative request was made to locally commit the transaction associated with Xid {0}

Category:
JTA

Cause:
The forced local commit operation was initiated by an administrative application.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-110444
An administrative request was made to globally commit the transaction associated with Xid {0}.

Category:
JTA

Cause:
A forced global rollback operation was initiated by an administrative application.

Action:
No action is required.

BEA-110445
An administrative request was made to globally commit the transaction associated with Xid {0}.

Category:
JTA

Cause:
A forced global commit operation was initiated by an administrative application.

Action:
No action is required.

BEA-110446
The administrative request to locally roll back the transaction associated with Xid {0} failed because the transaction does not exist.

Category:
JTA

Cause:
The transaction may have completed before the administrative request was made.

Action:
No action is required.

BEA-110447
The administrative request to locally commit the transaction associated with Xid {0} failed because the transaction does not exist.

Category:
JTA

Cause:
The transaction may have completed before the administrative request was made.

Action:
No action is required.

BEA-110448
The administrative request to globally roll back the transaction associated with Xid {0} failed because the transaction does not exist.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JTA

Cause:
The transaction may have completed before the administrative request was made.

Action:
No action is required.

BEA-110449
The administrative request to globally commit the transaction associated with Xid {0} failed because the transaction does not exist

Category:
JTA

Cause:
The transaction may have completed before the administrative request was made.

Action:
No action is required.

BEA-110450
The administrative request to locally roll back the transaction {0} encountered an error {1}.

Category:
JTA

Cause:
Refer to the exception information in the error message.

Action:
Check to see if the transaction still exists. The operation may have resolved the transaction. If the problem persists, contact My Oracle Support.

BEA-110451
The administrative request to globally roll back the transaction {0} encountered an error {1}.

Category:
JTA

Cause:
Refer to the exception information in the error message.

Action:
Check to see if the transaction still exists; the operation may have resolved the transaction. If the problem persists, contact My Oracle Support.

BEA-110452
The administrative request to locally commit the transaction {0} encountered an error {1}.

Category:
JTA

Cause:
Refer to the exception information in the error message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check to see if the transaction still exists. The operation may have resolved the transaction. If the problem persists, contact My Oracle Support.

BEA-110453
The administrative request to globally commit the transaction {0} encountered an error {1}.

Category:
JTA

Cause:
Refer to the exception information in the error message.

Action:
Check to see if the transaction still exists. The operation may have resolved the transaction. If the problem persists, contact My Oracle Support.

BEA-110454
The administrative request to locally roll back the transaction {0} failed because the transaction is in an invalid state. {1}

Category:
JTA

Cause:
The administrative request is invalid.

Action:
Issue a forced commit operation instead to resolve the transaction.

BEA-110455
The administrative request to globally roll back the transaction {0} failed because the transaction is in an invalid state. {1}

Category:
JTA

Cause:
The administrative request is invalid.

Action:
Issue a forced commit operation instead to resolve the transaction.

BEA-110456
The administrative request to locally commit the transaction {0} failed because the transaction is in an invalid state. {1}

Category:
JTA

Cause:
The administrative request is invalid.

Action:
Issue a forced rollback operation instead to resolve the transaction.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-110458
The administrative request to globally roll back the transaction {0} failed, because the coordinator {1} could not be contacted. {2}

Category:
JTA

Cause:
The coordinating server for the transaction is either not running or is unreachable.

Action:
Verify that the coordinating server is available and retry the operation. Alternatively, perform local operations to resolve the transaction.

BEA-110459
The administrative request to globally commit the transaction {0} failed, because the coordinator at {1} could not be contacted. {2}

Category:
JTA

Cause:
The coordinating server for the transaction is either not running or is unreachable.

Action:
Verify that the coordinating server is available and retry the operation. Alternatively, perform local operations to resolve the transaction.

BEA-110460
The administrative request to globally rollback the transaction {0} failed, because the coordinator does not support manual transaction resolution.

Category:
JTA

Cause:
The coordinating server is an older version of WebLogic Server that does not support manual transaction resolution.

Action:
Perform local commit operations on all participants that support manual transaction resolution.

BEA-110462
The administrative request to locally commit the transaction {0} failed, because the transaction has been marked for rollback.

Category:
JTA

Cause:
The transaction has been marked for rollback by an application component.

Action:
Attempt to resolve the transaction by using a forced rollback operation instead.

BEA-110464
The forced commit operation for transaction {0} on resource {1} was not performed, because the resource is busy.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JTA

Cause:
There may be a blocked resource operation for this transaction. The resource may be experiencing problems or it may be slow to respond.

Action:
Attempt to retry the commit operation. The associated resource changes for the transaction may need to be manually resolved using a resource-specific utility.

BEA-110465
The forced rollback operation for transaction {0} on resource {1} was not performed, because the resource is busy

Category:
JTA

Cause:
There may be a blocked resource operation for this transaction. The resource may be experiencing problems or it may be slow to respond.

Action:
Attempt to retry the commit operation. The associated resource changes for the transaction may need to be manually resolved using a resource-specific utility.

BEA-110466
The forced commit operation for transaction {0} on resource {1} was not performed because the resource has already been committed.

Category:
JTA

Cause:
The transaction may have completed before the administrative client invoked the commit operation.

Action:
No action is required. The transaction has been resolved.

BEA-110467
The forced rollback operation for transaction {0} on resource {1} was not performed because the resource has already been rolled back.

Category:
JTA

Cause:
The transaction may have completed before the administrative client invoked the rollback operation.

Action:
No action is required. The transaction has been resolved.

BEA-110468
The forced commit operation for transaction {0} on resource {1} encountered an error. {2}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JTA

Cause:
Refer to the resource exception in the error message and any appropriate resource-specific error logs.

Action:
Determine if administrative operations are required in the resource to resolve the transaction branch.

BEA-110469
The forced rollback operation for transaction {0} on resource {1} encountered an error. {2}

Category:
JTA

Cause:
Refer to the resource exception in the error message and any appropriate resource-specific error logs.

Action:
Determine if administrative operations are required in the resource to resolve the transaction branch.

BEA-110470
User [{0}] is not authorized to invoke a forced global rollback.

Category:
JTA

Cause:
The authenticated principal making the request does not have adequate privileges to perform a forced rollback operation on the transaction.

Action:
Authenticate using an identity with adequate privileges prior to invoking the operation.

BEA-110471
User [{0}] is not authorized to invoke a forced global commit.

Category:
JTA

Cause:
The authenticated principal making the request does not have adequate privileges to perform a forced commit operation on the transaction.

Action:
Authenticate using an identity with adequate privileges prior to invoking the operation.

BEA-110472
User [{0}] is not authorized to invoke a forced local rollback.

Category:
JTA

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The authenticated principal making the request does not have adequate privileges to perform a forced rollback operation on the transaction.

Action:
Authenticate using an identity with adequate privileges prior to invoking the operation.

BEA-110473
User [{0}] is not authorized to invoke a forced local commit.

Category:
JTA

Cause:
The authenticated principal making the request does not have adequate privileges to perform a forced commit operation on the transaction.

Action:
Authenticate using an identity with adequate privileges prior to invoking the operation.

BEA-110474
Unable to advertise non-XA resource {0}: {1}

Category:
JTA

Cause:
There may be a problem with the JNDI provider, or another object is already bound to this context.

Action:
Contact My Oracle Support.

BEA-110475
User [{0}] is not authorized to invoke commit on a non-XA resource transaction branch.

Category:
JTA

Cause:
This might be a symptom of a potential security attack or, alternatively, a problem with the "system" security identity of the server.

Action:
Verify that client software is not directly invoking an internal WebLogic Server system object.

BEA-110476
The server has detected pending transactions during graceful shutdown. The server will wait for the pending transactions to complete before suspending the RMI service. A forced shutdown command can be issued to shut down the server immediately.

Category:
JTA

Cause:
The server has detected pending transactions during graceful shutdown.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required. Use a forced shutdown command to ignore inflight work and shut down the server immediately.

BEA-110477
The unregisterResource operation for resource {0} timed out after {1} seconds.

Category:
JTA

Cause:
It was requested that the specified resource be unregistered from the transaction manager and transactions that refer to the resource still exist on the server.

Action:
Monitor inflight transactions to determine if there are still active transactions that depend on the unregistered resource. Options include using the Administration Console to manually resolve dependent transactions, or the resource may be redeployed for a sufficient period to allow the dependent transactions to complete.

BEA-110478
One-phase transaction [{1}] is in an unknown state for logging resource [{0}]. The transaction operations either all rolled back, or all committed, or are blocked. Transaction detail: [{2}]. Root cause: [{3}].

Category:
JTA

Cause:
If the logging last resource is a database, there are a number of possible root causes. Among them are: the database may have shut down or crashed during the call to local commit, the database connection may have failed, the database local transaction may have timed out, or the database may have detected a potential deadlock condition introduced by application operations within the local commit.

Action:
Examine the exception caused by the LLR resource to determine the root cause of the problem.

BEA-110479
Two-phase transaction [{1}], with logging resource [{0}], is an unknown state. The transaction manager will periodically retry determining the state of the transaction every [{3}] seconds. When the state is determined, the remaining resources in the transaction will be either rolled back or committed accordingly. Transaction detail: [{2}]. Root cause: [{4}].

Category:
JTA

Cause:
If the logging last resource is a database, there are a number of possible root causes. Among them are: the database may have shutdown or crashed during the call to local commit, the database connection may have failed, the database local transaction may have timed out, or the database may have detected a potention dead-lock condition introduced by application operations within the local commit.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Examine the exception caused by the LLR resource to determine the root cause of the problem. Note that no action may be required as the transaction manager will periodically retry the transaction until it can automatically rollback or commit accordingly.

BEA-110480
The transaction manager is completing logging resource [{0}] transaction [{1}]. The transaction, which was previously in an unknown state, is now resolved and in the [{2,choice,0#rollback|1#commit}] state.

Category:
JTA

Cause:
See previous log messages for the same transaction to determine the root cause.

Action:
See previous log messages for the same transaction to determine the root cause.

BEA-110482
A logging last resource (LLR) failed during initialization. The server cannot boot unless all configured LLRs initialize. Failing reason: {0}

Category:
JTA

Cause:
If the logging last resource is a JDBC LLR connection, there are a number of possible root causes. Among them are: the database may have shut down or crashed, the database connection may have failed during boot, or the database connection may have incorrect database permissions.

Action:
Examine the root exception thrown by the LLR to determine the root cause of the problem.

BEA-110483
The JTA health state has changed from {0} to {1}.

Category:
JTA

Cause:
An internal event has caused the JTA health state to transition to the normal state. Refer to previous health log entries for the conditions that have been corrected to trigger the state change.

Action:
No action is required.

BEA-110484
The JTA health state has changed from {0} to {1} with reason codes: {2}.

Category:
JTA

Cause:
Refer to the message body for information regarding the events that caused the health change.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Refer to the message body for the cause of the JTA state change and take the appropriate action to correct the exception condition.

BEA-110485
The JTA health state has changed from {0} to {1} with reason codes: {2}.

Category:
JTA

Cause:
Refer to the message body for information regarding the events that caused the health change.

Action:
Refer to the message body for the cause of the JTA state change and take the appropriate action to correct the exception condition.

BEA-110486
Transaction {0} cannot complete commit processing because resource [{1}] is unavailable. The transaction will be abandoned after {2} seconds unless all resources acknowledge the commit decision.

Category:
JTA

Cause:
The resource may have been undeployed or is unresponsive and declared unavailable.

Action:
Check for related server log messages that may provide additional details regarding the state of the resource. If the resource is undeployed, deploy the resource or the application module if the resource is application scoped. If a problem exists with the resource manager, correct the problem and redeploy the resource.

BEA-110487
Transaction {0} cannot complete rollback processing because the pending resource [{1}] is unavailable. The transaction will be abandoned after {2} seconds unless all resources acknowledge the rollback decision.

Category:
JTA

Cause:
The resource may have been undeployed or is unresponsive and declared unavailable.

Action:
Check for related server log messages that may provide additional detail regarding the state of the resource. If the resource is undeployed, deploy the resource or the application module if the resource is application scoped. If a problem exists with the resource manager, correct the problem and redeploy the resource.

BEA-110488
The LLR resource(s) {0} are not available and may contain transaction commit records required for recovery processing. Recovery of XA resources will not occur until these resources are deployed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JTA

Cause:
Prior to server restart, one or more global transactions were processed that had a LLR participant and may not have completed before the server was restarted. This potentially left a commit record in a LLR resource and prepared resource transaction branches that are awaiting a commit or rollback decision from the coordinator.

Action:
Redeploy the specified LLR resources, wait for all in progress transactions to complete, and shut down the server gracefully.

BEA-110490
User [{0}] is not authorized to invoke Commit on a Coordinator.

Category:
JTA

Cause:
This might be a symptom of a potential security attack, or alternately, a problem with the "system" security identity of the server.

Action:
Verify that the client software is not directly invoking an internal WebLogic Server system object.

BEA-110491
User [{0}] is not authorized to invoke AckPrePrepare on a Coordinator.

Category:
JTA

Cause:
This might be a symptom of a potential security attack or, alternatively, a problem with the "system" security identity of the server.

Action:
Verify that the client software is not directly invoking an internal WebLogic Server system object.

BEA-110492
User [{0}] is not authorized to invoke CheckStatus on a Coordinator.

Category:
JTA

Cause:
This might be a symptom of a potential security attack or, alternatively, a problem with the "system" security identity of the server.

Action:
Verify that the client software is not directly invoking an internal WebLogic Server system object.

BEA-110493
User [{0}] is not authorized to invoke AckCommit on a Coordinator.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JTA

Cause:
This might be a symptom of a potential security attack or, alternatively, a problem with the "system" security identity of the server.

Action:
Verify that the client software is not directly invoking an internal WebLogic Server system object.

BEA-110494
User [{0}] is not authorized to invoke NakCommit on a Coordinator.

Category:
JTA

Cause:
This might be a symptom of a potential security attack or, alternatively, a problem with the "system" security identity of the server.

Action:
Verify that the client software is not directly invoking an internal WebLogic Server system object.

BEA-110495
User [{0}] is not authorized to invoke AckRollback on a Coordinator.

Category:
JTA

Cause:
This might be a symptom of a potential security attack or, alternatively, a problem with the "system" security identity of the server.

Action:
Verify that the client software is not directly invoking an internal WebLogic Server system object.

BEA-110496
User [{0}] is not authorized to invoke NakRollback on a Coordinator.

Category:
JTA

Cause:
This might be a symptom of a potential security attack or, alternatively, a problem with the "system" security identity of the server.

Action:
Verify that the client software is not directly invoking an internal WebLogic Server system object.

BEA-110500
User [{0}] is not authorized to invoke GetSubCoordinatorInfo on a SubCoordinator.

Category:
JTA

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This might be a symptom of a potential security attack or, alternatively, a problem with the "system" security identity of the server.

Action:
Verify that the client software is not directly invoking an internal WebLogic Server system object.

BEA-110501
User [{0}] is not authorized to invoke GetProperties on a SubCoordinator.

Category:
JTA

Cause:
This might be a symptom of a potential security attack or, alternatively, a problem with the "system" security identity of the server.

Action:
Verify that the client software is not directly invoking an internal WebLogic Server system object.

BEA-110502
User [{0}] is not authorized to invoke Recover on a SubCoordinator.

Category:
JTA

Cause:
This might be a symptom of a potential security attack or, alternatively, a problem with the "system" security identity of the server.

Action:
Verify that the client software is not directly invoking an internal WebLogic Server system object.

BEA-110503
The migrator (the Administration Server for manual JTA migration policy or the Singleton Master for automatic JTA migration policy) is not available. Will skip JTA TRS failback because isStrictOwnershipCheck is [false]. This may lead to potencial TLOG corruption if the TRS of {0} has been migrated to a backup server and the backup server is accessing the TLOG of {0}. More safety can be achieved by setting isStrictOwnershipCheck to [true].

Category:
JTA

Cause:
The Administration Server or Singleton Master is not running or cannot be reached.

Action:
Start Administration Server or Singleton Master before starting any Managed Server in the cluster.

BEA-110504
There was an error advertising TransactionSynchronizationRegistry object: {0}.

Category:
JTA

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
There may be a problem with the JNDI provider or another object is already bound to this context.

Action:
Contact My Oracle Support.

BEA-110505
An attempt was made to set an invalid TRANSACTION_COMPLETION_TIMEOUT_SECONDS_PROPERTY_KEY for transaction property: keys must be number and values must be between -1 and max value of integer.

Category:
JTA

Cause:
See the message detail.

Action:
Change the application to assign the proper TRANSACTION_COMPLETION_TIMEOUT_SECONDS_PROPERTY_KEY property value.

BEA-111001
The Transaction Manager is being started in standalone mode and will not be able to participate in distributed transactions.

Category:
JTA

Cause:
There are no suitable RMI or JNDI providers configured.

Action:
Configure the appropriate RMI and JNDI context providers.

BEA-111002
The Transaction Manager is being started in distributed mode.

Category:
JTA

Cause:
The Transaction Manager is in distributed mode and can participate in distributed transactions.

Action:
No action is required.

BEA-111003
An error occurred while creating the transaction log persistent store: {1}.

Category:
JTA

Cause:
Refer to the associated exception for the cause.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-111004
Transaction could not set CoordinatorURL to use AdminChannel downgrading {0}.

Category:
JTA

Cause:
An error occurred while trying to set CoordinatorURL to use AdminChannel.

Action:
Check for other log messages that give more information about the failure.

BEA-111005
An in-progress XA operation for transaction {0} on resource {1} could not complete within {2} seconds, or was interrupted. Allowing subsequent calls to proceed.

Category:
JTA

Cause:
The call to the resource manager may have been affected by a server or network problem and could have been interrupted.

Action:
Verify that the resource manager is functioning properly and is accessible.

BEA-111006
Transaction could not set CoordinatorURL to use SSL URL downgrading {0}

Category:
JTA

Cause:
An error occurred while trying to set CoordinatorURL to use the SSL port.

Action:
Check for other log messages that give more information about the failure.

BEA-111007
The commit operation for one-phase transaction {0} on resource {1} encountered an error. {2}

Category:
JTA

Cause:
Refer to the resource exception in the error message and any appropriate resource-specific error logs.

Action:
Determine if administrative operations are required in the resource to resolve the transaction branch.

BEA-111008
Transaction Log failed during initialization. The server cannot boot unless Transaction Log initialize. Failing reason: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JTA

Cause:
The transaction log may contain transaction records for committed two-phase transactions that have not completed committing all resources involved in the transaction..

Action:
Check for other log messages that give more information about the failure.

BEA-111009
activateDeployments failed during initialization. Failing reason: {0}

Category:
JTA

Cause:
During WLS start up, an exception was caught at activateDeployemts.

Action:
Check for other log messages that give more information about the failure.

BEA-111010
SetPrimaryStore failed. Failing reason: {0}

Category:
JTA

Cause:
An exception was caught at setPrimaryStore.

Action:
Check for other log messages that give more information about the failure.

BEA-111011
A Transaction Log PrimaryStore failed during initialization. The server cannot boot unless configured Transaction Log Primary Store initialize. Failing reason: {0}

Category:
JTA

Cause:
The Transaction Log Primary Store may contain transaction records for committed two-phase transactions that have not completed committing all resources involved in the transaction.

Action:
Examine the root exception thrown by the Transaction Log Primary Store to determine the root cause of the problem.

BEA-111012
SetPrimaryStore close failed when retry. Failing reason: {0}

Category:
JTA

Cause:
An exception was caught at close store in retrying setPrimaryStore .

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check for other log messages that give more information about the failure.

BEA-111013
Recover JDBCStore init store exception: {0}

Category:
JTA

Cause:
An exception occurred when init store.

Action:
Check for other log messages that give more information about the failure.

BEA-111014
There is a naming conflict for resource = [{0}]. This resource is being registered by this server and has already been registered in: [{1}].

Category:
JTA

Cause:
This resource is trying to be registered as a NonXAResource but was already registered as an XAResource.

Action:
Correct the configuration either by making the resource name unique or by making the resource consistently either an XAResource or a NonXAResource.

BEA-111015
The commit operation for transaction {0} timed out after {1} seconds.

Category:
JTA

Cause:
The application may take longer than the time that is specified in timeout-seconds in the JTA parameter before issuing the commit.

Action:
Increase the transaction timeout-seconds in the JTA parameter or tuning application.

BEA-111016
Recovery is not possible as determiner resource can not be obtained {0}.

Category:
JTA

Cause:
Determiner resource may have been removed or is otherwise unobtainable.

Action:
Insure determiner resource can be obtained and has not been removed.

BEA-111017
Encountered an exception while attempting to acquire a transaction manager for transactional annotation interceptors {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JTA

Cause:
Examine the root exception to determine the cause of the problem.

Action:
Take appropriate action based on the cause.

BEA-111018
No ComponentInvocation is present for @Transactional annotation processing. The restriction on use of UserTransaction will not be enforced.

Category:
JTA

Cause:
No ComponentInvocation is present for @Transactional annotation processing.

Action:
No action is required.

BEA-111019
The server has detected pending transactions after graceful shutdown in ClientInitiatexTxShutdownService.stop. Continue to work.

Category:
JTA

Cause:
The server has detected pending transactions after graceful shutdown in ClientInitiatexTxShutdownService.stop. Continue to work.

Action:
No action is required. Use a forced shutdown command to ignore inflight work and shut down the server immediately.

BEA-111020
An issue occurred during cross-site recovery processing: {0}.

Category:
JTA

Cause:
A lease store connection or other failures has occurred.

Action:
Refer to logs for information on the cause of failure.

BEA-111021
The JTA Security Interoperability Mode value "compatibility" is deprecated. Use "default" or "performance" instead.

Category:
JTA

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The domain JTA configuration specifies a value of "compatibility" for Security Interoperability Mode.

Action:
Modify the domain JTA configuration to specify a value of "default" or "performance" for Security Interoperability Mode.

BEA-114089
User [{0}] is not authorized to invoke ackPrepare on a Coordinator.

Category:
JTA

Cause:
This might be a symptom of a potential security attack or, alternatively, a problem with the "system" security identity of the server.

Action:
Verify that the client software is not directly invoking an internal WebLogic Server system object.

BEA-119000
One-phase transaction [{1}] for logging last resource [{0}] is in an unknown state.

Category:
JTAExceptions

Cause:
If the LLR is a database, there are a number of possible root causes. Among them are: the database may have shut down or crashed during the call to local commit, the database connection may have failed, the database local transaction may have timed out, or the database may have detected a potential deadlock condition introduced by application operations within the local commit.

Action:
Examine the root exception generated by the LLR to determine the root cause of the problem.

BEA-119001
Two-phase transaction [{1}] for logging last resource [{0}] is in an unknown state.

Category:
JTAExceptions

Cause:
If the LLR is a database, there are a number of possible root causes. Among them are: the database may have shut down or crashed during the call to local commit, the database connection may have failed, the database local transaction may have timed out, or the database may have detected a potential deadlock condition introduced by application operations within the local commit.

Action:
Examine the root exception generated by the LLR resource to determine the root cause of the problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-119002
A LLR failed during initialization. The server cannot boot unless all configured LLRs initialize. Failing reason: {0}

Category:
JTAExceptions

Cause:
If the LLR is a JDBC LLR connection, there are a number of possible root causes. Among them are: the database may have shut down or crashed, the database connection may have failed during boot, or the database connection may have incorrect database permissions.

Action:
Examine the root exception generated by the LLR resource to determine the root cause of the problem.

BEA-119003
LLR [{0}] failed during initialization, as one of its records is corrupted. Failure reason: {1}

Category:
JTAExceptions

Cause:
The cause is unknown, but could be possible disk corruption.

Action:
Examine the root exception generated by the LLR to determine the root cause of the problem. Possible solutions are: restore LLR resource tables from backup, delete the failing LLR table (which risks producing heuristic hazards), or contact My Oracle Support.

BEA-119004
The user-preferred server of JTAMigratableTargetMBean [{0}] cannot be set to [{1}].

Category:
JTAExceptions

Cause:
The value of the user-preferred server is invalid. It must be [{0}].

Action:
Change the value of the user-preferred server of JTAMigratableTargetMBean [{0}] from [{1}] to [{0}].

BEA-119005
JTA subsystem failed. A forced shutdown of the server was done because the server is in automatic JTA migration mode.

Category:
JTAExceptions

Cause:
The JTA subsystem failed.

Action:
JTA Transaction Recovery Service will be automatically migrated to back up the server.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-119006
A Transaction Log Primary Store failed during initialization. The server cannot boot unless the configured Transaction Log Primary Store initialize. Failing reason: {0}

Category:
JTAExceptions

Cause:
See the message detail.

Action:
Examine the root exception generated by the Transaction Log Primary Store to determine the root cause of the problem.

BEA-130000
Insertion of {0} into XML entity cache rejected. Entity size, {1}, exceeded cache size, {2}.

Category:
XML

Cause:
The cache may be too small or a specific item might be very large. The worst case is that this indicates a denial of service attack.

Action:
No action is required. However, performance will be best if items are cached.

BEA-130001
Entity cache appears to be broken. This impacts the performance of XML parsing.

Category:
XML

Cause:
Unknown

Action:
No action is required. However, performance will increase if items are cached. Also the cache provides a backup in the case of a network failure. While the cache is not operating, this backup is not in effect.

BEA-130002
The entity that was just put in the cache cannot be retrieved: "{0}". Timeout may be too short.

Category:
XML

Cause:
Usually this indicates that the entity timeout was set to a very small value. Otherwise, there is some unknown problem with the cache module itself.

Action:
No action is required, but XML parse performance will be impacted. Also, there is no cached copy to act as a backup in the event of a network failure.

BEA-130003
Could not instantiate the specified factory class. {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
XML

Cause:
The class name of the factory was not correct or it was not in the CLASSPATH.

Action:
Check the CLASSPATH or verify the Administration Console entry or MBean value.

BEA-130006
XML cache warning for registry {0}: entry rejection due to entry being larger than the cache memory size. entry: {1} Entry memory size: {2}

Category:
XML

Cause:
The entry is larger than the cache.

Action:
No action is required unless the item should be cached next time. If so, increase the cache memory size.

BEA-130007
XML cache event: memory purge of {0} entries of combined size {1}. Current memory usage is {2} bytes.

Category:
XML

Cause:
This is an information message.

Action:
No action is required.

BEA-130008
XML cache event: disk purge of {0} entries of combined size {1}. Current disk usage is {2} bytes.

Category:
XML

Cause:
This is an information message.

Action:
No action is required.

BEA-130009
XML cache warning for registry {0}: entry persist attempt rejected due to entry being larger than the cache disk size. Status changed to transient. entry: {1} entry disk size: {2}

Category:
XML

Cause:
The size of the entry on the disk exceeds the allocated disk space.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required. If the entry should be persisted next time, increase the disk size of the cache.

BEA-130010
XML cache event for registry {0}: entry added. entry: {1}, entry memory size: {2}, storage type: {3}, current memory usage (bytes): {4}

Category:
XML

Cause:
This is an information message.

Action:
No action is required.

BEA-130011
XML cache event for registry {0}: entry deleted. entry: {1}, entry memory size: {2}, entry disk size: {3}, current memory usage (bytes): {4}, current disk usage (bytes): {5}

Category:
XML

Cause:
This is an information message.

Action:
No action is required.

BEA-130012
XML cache event for registry {0}: entry persisted. entry: {1}, entry disk size: {2}, current disk usage (bytes): {3}

Category:
XML

Cause:
This is an information message.

Action:
No action is required.

BEA-130013
XML cache event for registry {0}: entry loaded. entry: {1}, entry memory size: {2}, current memory usage (bytes): {3}

Category:
XML

Cause:
This is an information message.

Action:
No action is required.

BEA-130014
XML cache event: statistics checkpointed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
XML

Cause:
This is an information message.

Action:
No action is required.

BEA-130015
XML cache event: cache created. current memory usage (bytes): {0}, current disk usage (bytes): {1}

Category:
XML

Cause:
This is an information message.

Action:
No action is required.

BEA-130016
XML cache event: cache loaded. Current memory usage (bytes): {0}, current disk usage (bytes): {1}

Category:
XML

Cause:
This is an information message.

Action:
No action is required.

BEA-130017
XML cache event: cache closed. current disk usage (bytes): {0}

Category:
XML

Cause:
This is an information message.

Action:
No action is required.

BEA-130018
XML cache error: cache file {0} is corrupted. Creating new cache from scratch.

Category:
XML

Cause:
The cache file was corrupted. This normally does not occur.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
The server should be restarted. If a backup of the cache files exists, restore the cache files, and then restart the server.

BEA-130019
XML cache error for registry {0}: entry file {1} is corrupted. Removing from cache. entry: {2}

Category:
XML

Cause:
The cache file was corrupted. This normally does not occur.

Action:
The server should be restarted. The entry will be re-cached on the next access of the server.

BEA-130020
XML cache error: statistics file {0} is corrupted, reinitializing. Previous statistics are lost.

Category:
XML

Cause:
The cache file was corrupted. This normally does not occur.

Action:
The server should be restarted.

BEA-130021
XML cache error for registry {0}: entry file {1} cannot be written. Status changed to transient. entry: {2}

Category:
XML

Cause:
This is often a file protection issue.

Action:
Determine why the file cannot be saved and make the appropriate adjustments.

BEA-130022
XML cache error: cache file {0} cannot be written.

Category:
XML

Cause:
This is often a file protection issue.

Action:
Determine why the file cannot be saved and make the appropriate adjustments.

BEA-130023
XML cache error: statistics file {0} cannot be written. There are no futher cache statistics for this session.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
XML

Cause:
This is often a file protection issue.

Action:
Determine why the file cannot be saved and make the appropriate adjustments.

BEA-130024
XML cache error for registry {0}: out of memory loading entry. Entry removed from cache. entry: {1}, file: {2}

Category:
XML

Cause:
The entry might be unusually large or perhaps the JVM heap size is too small.

Action:
Check the size of the rejected entry. If entries of that size need to be handled, increase the heap size.

BEA-130025
XML cache error: out of memory loading cache. Cache not opened. file: {0}

Category:
XML

Cause:
The cache file is not large, so memory usage is almost full.

Action:
Increase the JVM heap size.

BEA-130026
XML cache error: out of memory loading statistics. File: {0}

Category:
XML

Cause:
The cache file is not large, so memory usage is almost full.

Action:
Increase the JVM heap size.

BEA-130027
XML cache warning: the requested memory size of the XML cache, {0}, exceeds the available memory, {1}.

Category:
XML

Cause:
Either the provided parameters are not in sync with the usage, or a lot of the available memory is being used.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Reduce the cache size or increase the JVM heap size. If there should be more available memory, determine what is using all of the available memory.

BEA-130028
XML cache warning: the requested memory size of the XML cache, {0}, is a large percentage of the available memory, {1}.

Category:
XML

Cause:
Either the provided parameters are not in sync with the usage, or something is using a lot of the available memory.

Action:
Reduce the cache size or increase the JVM heap size. If there should be more available memory, determine what is using all of the available memory.

BEA-130029
XML cache error: an unexpected error occurred in the XML cache. {0}

Category:
XML

Cause:
The cause is unknown.

Action:
Refer to the associated text at the end of the message and contact My Oracle Support for help resolving the error.

BEA-130030
XML cache error for registry {0}: the file, {1}, representing entry {2} cannot be read.

Category:
XML

Cause:
The file is read-protected.

Action:
Check the access rights of the file and make the appropriate changes.

BEA-130031
XML cache error: the cache file, {0}, cannot be read.

Category:
XML

Cause:
The file is read-protected.

Action:
Check the access rights of the file and make the appropriate changes.

BEA-130032
XML cache error: statistics file {0} cannot be read.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
XML

Cause:
The file is read-protected.

Action:
Check the access rights of the file and make the appropriate changes.

BEA-130033
Parser or DocumentBuilder cannot be created to satisfy the configuration requested. {0}

Category:
XML

Cause:
The configuration was invalid.

Action:
Verify that the factory that creates the parser and the properties or features set on this parser are configured properly.

BEA-130034
Failed to parse the given XML document. {0}

Category:
XML

Cause:
An error occurred in the structure of the XML document.

Action:
Verify the XML syntax of the document.

BEA-130035
Failed to open XML document. {0}

Category:
XML

Cause:
The file does not exist.

Action:
Check the file name, the file location and its associated permissions.

BEA-130036
Initializing XMLRegistry

Category:
XML

Cause:
This is an information message.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-130037
The stack trace associated with message {0} follows:

Category:
XML

Cause:
An error condition was reported.

Action:
No action is required.

BEA-130039
The warning message:

Category:
XML

Cause:
An warning condition was reported.

Action:
No action is required.

BEA-140008
Internal error. Failed to save configuration changes to the configuration repository - {0}.

Category:
Management

Cause:
The config.xml file is either write-protected, or the user that started the server is not authorized to write to this file or directory.

Action:
Ensure that the operating system user who starts the server has authorization to write to the config.xml file and that the config.xml file is not write-protected.

BEA-140013
{0}

Category:
Management

Cause:
This is an informational message.

Action:
No action is required.

BEA-141009
Error occurred in the file distribution servlet while processing the request type "{0}", {1}.

Category:
Management

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
Take action based upon the provided exception details.

BEA-141010
Error occurred in the file distribution servlet and received an unacceptable request of type "{0}".

Category:
Management

Cause:
An invalid request was made to the file distribution servlet.

Action:
This is an internal WebLogic Server error. No action is required.

BEA-141011
The file distribution servlet failed to distribute the security properties file, because the file was not found at the configured location: {0}.

Category:
Management

Cause:
The identified file was not available to the Administration Server.

Action:
Verify the configuration of this file.

BEA-141021
The cluster property {0} was ignored because the server is not part of a cluster.

Category:
Management

Cause:
A non-applicable cluster property was specified at server startup.

Action:
Modify the configuration to identify that this Managed Server is, in fact, a member of a cluster, or eliminate the specification of the cluster property from the start command.

BEA-141023
An error occurred while setting the attribute value in the MBean proxy {0}, method {1} with value {2} ({3}).

Category:
Management

Cause:
An invalid attribute value was specified.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify that the provided attribute value (specified either in the configuration or through a dynamic setting) is correct.

BEA-141051
The operation failed with message: {0}.

Category:
Management

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
Take action based upon the details of the provided error message.

BEA-141052
The auto deployment poller has started.

Category:
Management

Cause:
This is an informational message.

Action:
No action is required.

BEA-141053
The auto deployment poller has not started for the production server.

Category:
Management

Cause:
This is an informational message.

Action:
No action is required.

BEA-141062
The user does not have permission to perform {1} operation on MBean {0}. Method = {3}, attribute = {2}

Category:
Management

Cause:
No access control list (ACL) permissions are defined for the user to complete this operation.

Action:
The system administrator must add ACL permissions in order for the user to perform this operation.

BEA-141063
The user does not have permission to perform {1} operation on MBean {0}. Method: {2}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Management

Cause:
The user has no defined access control list (ACL) to perform this MBean operation.

Action:
The system administrator must define permissions in order for the user to perform this MBean operation.

BEA-141071
The file distribution servlet failed to distribute the embedded LDAP initial replica data file because the file was not found at the configured location: {0}.

Category:
Management

Cause:
This is an internal WebLogic Server error that should not occur during normal operation.

Action:
Contact My Oracle Support.

BEA-141073
Migration task ({0}) - {1}

Category:
Management

Cause:
This is an informational message.

Action:
No action is required.

BEA-141076
No module with URI ({1}) was found in ({0}).

Category:
Management

Cause:
The application is potentially misconfigured relative to this module.

Action:
Verify that the application archive and its descriptors are correctly configured.

BEA-141077
An error occurred during the parsing of descriptors for {0}. Exception {1} occurred.

Category:
Management

Cause:
Refer to the exception details for the exact cause of this parsing error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Take action based upon provided exception details to either correct the identified component or its descriptors.

BEA-141078
A descriptor initialization error occurred for module {0} in EAR file {1}. Creation of the temporary file {2} failed.

Category:
Management

Cause:
The extraction of the EAR file failed due to an I/O error. See the logged for details.

Action:
Ensure that the file referred to in the exception can be created, and there is no directory by the same name.

BEA-141081
The file distribution servlet failed to distribute the embedded LDAP initial replica data file due to the following error: {0}.

Category:
Management

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
Take action based upon the provided exception details.

BEA-141086
An error occurred while setting a value for {0}.

Category:
Management

Cause:
The specified command line property provided an invalid value for attribute {0}.

Action:
Verify that the specified command line property provides a valid attribute value.

BEA-141087
Property: {0} is not a recognized MBean attribute or special property used for management. It is most likely being used by subsystems and will continue to work as expected if it is a supported option.

Category:
Management

Cause:
An unrecognized property has been specified on the start command.

Action:
Eliminate the invalid properties from the start command.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-141089
Starting the server based on the WebLogic Server 6.x configuration directory structure.

Category:
Management

Cause:
The startup directory does not contain the config.xml configuration file. The file was located in the config/domain directory.

Action:
Start the server from the directory that contains the domain configuration file.

BEA-141102
Subject: {0} does not have access to perform {1} actions.

Category:
Management

Cause:
Either the named subject is not allowed to perform this action and is appropriately being denied this access, or the named subject should be allowed to perform this action and the role membership of the subject is not properly configured.

Action:
Contact the system administrator to modify role definitions.

BEA-141107
Version: {0}

Category:
Management

Cause:
This is normal system initialization processing.

Action:
No action is required.

BEA-141124
An invalid system property was specified while booting the server {0}.

Category:
Management

Cause:
The server might have been started using an invalid system property. For example, starting the server using java -D weblogic.Server will generate this exception.

Action:
Correct the invalid system property.

BEA-141126
The configuration file {0} is read-only.

Category:
Management

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This occurs when the write permissions on the file are not set to allow the user that booted the server to write to the config.xml file. Write access is often intentionally denied in production environments.

Action:
In many cases, write access is intentionally denied. In such cases, this is just an informational message. If the file needs to be writable, change the permissions on the file or ask the system administrator to do so.

BEA-141133
The Name attribute cannot be modified after the MBean {0} has been created.

Category:
Management

Cause:
The Name attribute is being modified by a setName operation.

Action:
Specify the name of the MBean during creation.

BEA-141145
An attempt was made to connect to the Administration Server without credentials.

Category:
Management

Cause:
The requirement to supply credentials on all requests was added in version 8.1 of the product. It is most likely that an old version of a utility is being used that is not properly supplying these credentials. It is also possible that this represents an attempt to compromise the server.

Action:
Determine the source of the request. If it is a legitimate request, ensure that updated software is being used which properly supplies the credentials. It is also important to restrict access to the Administration Server. Refer to the WebLogic Server documentation to ensure that all of the proper security precautions have been taken.

BEA-141146
An attempt was made to connect to the Administration Server by the user {0} and a password which does not match.

Category:
Management

Cause:
The requirement to supply credentials on all requests was added in version 8.1 of the product. In this case, the password is not valid for the specified user. This may be the result of supplying an improper user name and password when using the deployment utilities.

Action:
Determine the source of the request. If it is a legitimate request, ensure that updated software which properly supplies the credentials is in use. It is also important to restrict access to the Administration Server. Refer to the WebLogic Server documentation to ensure that all of the proper security precautions have been taken.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-141147
An attempt was made to upload a file to the Administration Server by the unauthorized user {0}.

Category:
Management

Cause:
The requirement to supply credentials on all requests was added in version 8.1 of the product. In this case, the user specified is not configured with the authorization to upload files.

Action:
To enable the user to upload files to the Administration Server, it is necessary that the user be added to the administrator or deployer role. Alternatively, it is possible to authorize a user specifically for "FileUpload". Consult the WebLogic Server documentation for instructions on how to do this.

BEA-141148
An invalid attempt was made to download a {1} resource from the Administration Server by the unauthorized user {0}.

Category:
Management

Cause:
The requirement to supply credentials on all requests was added in version 8.1 of the product. In this case, the credentials of the user that is being used to boot the Managed Server are used to authorize the request. That user is not authorized to access files of the type {1}.

Action:
Ensure that the proper credentials are being used to initiate the connection. In most cases, this involves ensuring that the credentials being used to boot the Managed Server are properly authorized on the Administration Server.

BEA-141149
An invalid attempt was made to connect to the Administration Server with a salt of {0} and a signature of {1}, likely due to private key mismatch or clock skew between servers.

Category:
Management

Cause:
The requirement to supply credentials on all requests was added in version 8.1 of the product. In this case, the password is not valid for the specified user or the nonce has expired. This may be the result of supplying an improper user name and password when using the deployment utilities.

Action:
Determine the source of the request and ensure that the Managed Server and the Administration Server share the same security credential. That credential is stored in the domain configuration and distributed at server startup. In this case, where the Managed Server is booted using a configuration that is different from that of the Administration Server, perhaps in Managed Server independence mode. Refer to the WebLogic Server documentation to ensure that all of the proper security precautions have been taken. Verify that clock skew has not occurred between the servers in the domain.

BEA-141151
The Administration Server could not be reached at {0}.

Category:
Management

Cause:
The Administration Server is not available at the specified URL or the URL is not specified in the correct format, such as http://myhost:7001.

Action:
Ensure that the Administration Server is running at the specified host and port. Check that the URL is specified in the correct format. The URL is specified by the protocol://host:port, for example http://myhost:7001.

BEA-141187
Java system properties are defined as follows: {0}.

Category:
Management

Cause:
This is an informational message.

Action:
No action is required.

BEA-141190
The commit phase of the configuration update failed with an exception.

Category:
Management

Cause:
An exception occurred during the commit of the update.

Action:
Retry the activate. Take action based upon the provided exception details.

BEA-141191
The prepare phase of the configuration update failed with an exception.

Category:
Management

Cause:
An exception occurred during the prepare of the update.

Action:
Ensure that the update is valid. Take action based upon the provided exception details, make any required changes, change the changes, and retry the activate.

BEA-141192
The read of the edit lock file failed with an exception.

Category:
Management

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An exception occurred during the read of the edit lock file.

Action:
Take action based upon the provided exception details. Try to get the edit lock again.

BEA-141193
The write of the edit lock file failed with an exception.

Category:
Management

Cause:
An exception occurred during the write of the edit lock file.

Action:
Take action based upon the provided exception details. Try to get the edit lock again.

BEA-141194
The registration of the configuration subsystem with the deployment subsystem failed with an exception.

Category:
Management

Cause:
An exception occurred during the registration of the configuration subsystem.

Action:
Take action based upon the provided exception details. Restart the server.

BEA-141196
The Managed Server could not update the configuration files during the registration with the deployment service. The update failed due to an exception.

Category:
Management

Cause:
An exception occurred during the update of configuration files.

Action:
Take action based upon the provided exception details, make any required changes, and try to restart the Managed Server.

BEA-141197
The deployment of {0} failed.

Category:
Management

Cause:
An exception occurred during a resource deployment.

Action:
Take action based upon the provided exception details, make any required changes, and try to restart the Managed Server.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-141198
The undeployment of {0} failed.

Category:
Management

Cause:
An exception occurred during a resource undeployment.

Action:
Take action based upon the provided exception details, make any required changes, and try to restart the Managed Server.

BEA-141199
In the compatibility MBean server, the operation {1} on the MBean {0} modified the configuration without starting an edit session and activating the changes.

Category:
Management

Cause:
The impact information was incorrect for the MBean operation.

Action:
Contact My Oracle Support as this is an internal coding error that should not occur.

BEA-141200
Detected a domain that was created from an earlier release of WebLogic Server. The domain will be upgraded to the current {0} release.

Category:
Management

Cause:
This is an informational message.

Action:
No action is required.

BEA-141201
Unable to modify the configuration using the compatibility MBean server, as other changes are pending. Activate the pending changes before modifying the configuration with the compatibility MBean server.

Category:
Management

Cause:
The configuration was not modified because pending changes were present.

Action:
Activate the changes before using the compatibility server.

BEA-141202
The addition of the bean {0} failed during the activate phase because of {1}

Category:
Management

Category:
Management

Cause:
See the exception message for more information on the cause of this error.

Action:
The exception message may have more information about the action to take.

BEA-141219
The removal of the bean {0} failed. The encountered exception was {1}

Category:
Management

Cause:
See the exception message for more information on the cause of this error.

Action:
The exception message may have more information about the action to take.

BEA-141220
A required class was not found while upgrading the domain. This could be possible if the security provider JAR files were not upgraded to conform with WebLogic Server version 9.0. Upgrade these providers using java weblogic.Upgrade -type securityproviders.

Category:
Management

Cause:
The security provider JAR files were not upgraded to conform with new WebLogic Server 9.0 classes.

Action:
Run the upgrade tool to upgrade the provider.

BEA-141221
An error occurred while performing an undo of unactivated changes in the compatibility MBean server: {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Management

Cause:
See the exception message for more information.

Action:
Check the exception message for more detail.

BEA-141223
The server name {0} specified with -Dweblogic.Name does not exist. The configuration includes the following servers {1}.

Category:
Management

Cause:
The -Dweblogic.Name command line property specifies a server that does not exist in the configuration.

Action:
Check the configuration for the list of configured servers.

BEA-141224
The Administration Server is not reachable.

Category:
Management

Cause:
This could be a network issue.

Action:
Check the status of the Administration Server.

BEA-141225
The delete of pending directory file {0} failed.

Category:
Management

Cause:
An error occurred while deleting the file.

Action:
Ensure that no processes have the file open for write.

BEA-141226
An invalid deployment service prepare callback with ID {0} was received.

Category:
Management

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-141227
Making a backup copy of the configuration at {0}.

Category:
Management

Cause:
This happens during certain server lifecycle transitions and during configuration changes.

Action:
No action is required.

BEA-141228
An attempt to back up the configuration to {0} failed with {1}.

Category:
Management

Cause:
See the message text for the exception message.

Action:
Check the exception information included in the message text.

BEA-141229
The upgrade process has been canceled by the user. The server process will not be started.

Category:
Management

Cause:
The server startup cannot proceed without upgrading the domain.

Action:
Upgrade the domain, and then start the server.

BEA-141230
Could not locate the descriptor file for System Resource: {0}.

Category:
Management

Cause:
The descriptor file could not be located in the specified path.

Action:
Ensure that the descriptor file is in the appropriate location.

BEA-141231
Could not register the JSR object: {0}.

Category:
Management

Cause:
There are many possible causes for this warning.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Look at the stack trace and take appropriate action.

BEA-141232
Could not decrypt the {1} attribute value of {2} from the file {0}. The edit session has been canceled. The decryption failed with the exception {3}.

Category:
Management

Cause:
An invalid encrypted value was found in the edit lock file.

Action:
Start a new edit session.

BEA-141233
Could not decrypt the edit lock file {0}. The edit session has been canceled. The decryption failed with the exception {1}.

Category:
Management

Cause:
An exception occurred when decrypting the edit lock file.

Action:
Start a new edit session.

BEA-141234
A rollback of a dynamic change failed. The message for the failure is "{0}". The cause of the exception is "{1}".

Category:
Management

Cause:
See the message body for the cause.

Action:
Look at the possible causes of this error. The cause may give some indication of the possible actions to take.

BEA-141237
Extraneous text found in the config.xml file: {0}.

Category:
Management

Cause:
This is generally caused by mistakes in hand-edited config.xml files. The config.xml file is a valid XML document, however, the extraneous text is not related to any MBean attributes.

Action:
Review the config.xml file for mistakes, such as extra delimeters near the text listed in the error message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-141238
A non-dynamic change has been made which affects the server {0}. This server must be rebooted in order to consume this change.

Category:
Management

Cause:
This happens when one or more of the changes made to the configuration affect non-dynamic settings. When this occurs, the affected Managed Servers are determined, and those servers are not updated when the change is activated. In order to consume the change, these servers must be rebooted.

Action:
Reboot the named server.

BEA-141239
The non-dynamic attribute {1} on {0} has been changed. This may require redeploying or rebooting configured entities.

Category:
Management

Cause:
This happens when one or more of the changes made to the configuration affect non-dynamic settings.

Action:
The required action, if any, will be indicated in a later log message.

BEA-141240
Found a version {0} config.cml file, but expected a version 9 or higher config.xml file. This could happen if an attempt to boot was made from the config directory rather than the domain root.

Category:
Management

Cause:
This could happen if an attempt was made to boot from the config directory rather than the domain root. Otherwise, the configuration could be corrupted.

Action:
Ensure that the config.xml file is not corrupted and that the boot is attempted from the domain root.

BEA-141241
Found a version {0} config.xml file, but expected a pre-version 9 config.xml file. This could happen if an attempt was made to boot from the config directory rather than the domain root.

Category:
Management

Cause:
This could happen if a 9.x config.xml file was put in the top level, rather than in the config directory.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the config.xml file is in the correct location in the domain.

BEA-141242
Invalid configuration version found at {1} version = {0}.

Category:
Management

Cause:
WebLogic Server found a config.xml file with a version that does not match any known version of the product.

Action:
Ensure that the version string in the config.xml file is valid.

BEA-141243
The property {0} in element {1} has been deprecated in version {2} - {3}.

Category:
Management

Cause:
The config.xml file contained elements that have been deprecated.

Action:
Replace or remove the deprecated configuration artifacts.

BEA-141244
Schema validation errors while parsing {0} - {1}.

Category:
Management

Cause:
The WebLogic Server configuration files are defined by a schema. When parsing these files, they are validated against the schema. This warning indicates that there were problems found during validation. The problems may or may not be fatal, depending on the setting of the system property weblogic.configuration.schemaValidationEnabled.

Action:
See the error details for more information on the validation problem.

BEA-141245
Schema validation error in {0}. See the log for details. Schema validation can be disabled by starting the server with the command line option: {1}.

Category:
Management

Cause:
The WebLogic Server configuration files are defined by a schema. When parsing these files, they are validated against the schema. This warning indicates that there were problems found during validation. The problems may or may not be fatal, depending on the setting of the system property weblogic.configuration.schemaValidationEnabled.

Action:
See the error details for more information on the validation problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-141246
The configuration directory {0} does not exist.

Category:
Management

Cause:
The server was booted from a directory that does not contain a configuration directory.

Action:
Ensure that the server is booted from a valid domain directory.

BEA-141247
The configuration directory {0} does not exist, and the Administration Server is not available.

Category:
Management

Cause:
The configuration directory is missing and the Administration Server is not available to download a copy. In this case, the Managed Server cannot boot.

Action:
Ensure that either the server is booted from a valid domain directory or that the Administration Server is available.

BEA-141248
The configuration directory {0} is missing the file {1}.

Category:
Management

Cause:
The server was booted from a directory that does not contain a valid domain configuration.

Action:
Ensure that the server is booted from a valid domain directory.

BEA-141249
The configuration directory {0} is missing the file {1}, and the Administration Server is not available to download it.

Category:
Management

Cause:
The server was booted from a directory that does not contain a valid configuration, and the Administration Server is unavailable to download the current configuration files.

Action:
Ensure that either the server is booted from a valid domain directory or that the Administration Server is available.

BEA-141251
The attribute {1} from the element {0} was introduced in version 9.0.0.0 or later and is not valid in a pre-9.0 config.xml file.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Management

Cause:
An attribute that was introduced in release 9.0 or later was found in a pre-9.0 config.xml file.

Action:
Verify that the upgrade process correctly handles the named elements by reviewing the upgraded configuration files.

BEA-141252
The domain version {0} is greater than the release version {1} of this server.

Category:
Management

Cause:
The DomainVersion in the configuration used by the Administration Server is not compatible with the release version of this Managed Server.

Action:
Update the WebLogic Server installation for this server.

BEA-141253
An error occurred while loading the configuration translator {0} : {1}.

Category:
Management

Cause:
The message includes the specific cause.

Action:
Repair or remove the configuration translator.

BEA-141254
Generating new domain directory in {0}.

Category:
Management

Cause:
There was no domain directory at the specified location. Either a command line option or user input specified creation of the domain, so generation of the domain is commencing.

Action:
No action is required. The domain directory will be generated, and the server will continue to boot normally.

BEA-141255
Domain generation completed in {0} milliseconds.

Category:
Management

Cause:
A new domain has been generated.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required. The server will continue to boot normally.

BEA-141256
A RuntimeException occurred while adding or removing a configuration element: {0}.

Category:
Management

Cause:
See the exception text for details.

Action:
The message includes information on the root cause. Review this message to determine the appropriate action.

BEA-141257
An exception occurred while translating a configuration file: {0}.

Category:
Management

Cause:
See the exception text for details.

Action:
The message includes information on the root cause. Review this message to determine the appropriate action.

BEA-141258
An exception occurred while constructing an ObjectName: {0}.

Category:
Management

Cause:
See the exception text for details.

Action:
The message includes information on the root cause. Review this message to determine the appropriate action.

BEA-141259
An exception occurred while sending a Notification: {0}.

Category:
Management

Cause:
See the exception text for details.

Action:
The message includes information on the root cause. Review this message to determine the appropriate action.

BEA-141260
An exception occurred while removing a Notification: {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Management

Cause:
See the exception text for details.

Action:
The message includes information on the root cause. Review this message to determine the appropriate action.

BEA-141261
An exception occurred while unregistering a Notification: {0}.

Category:
Management

Cause:
See the exception text for details.

Action:
The message includes information on the root cause. Review this message to determine the appropriate action.

BEA-141262
An exception occurred while adding a Filter: {0}.

Category:
Management

Cause:
See the exception text for details.

Action:
The message includes information on the root cause. Review this message to determine the appropriate action.

BEA-141263
An exception occurred in an MBean customizer: {0}.

Category:
Management

Cause:
See the exception text for details.

Action:
The message includes information on the root cause. Review this message to determine the appropriate action.

BEA-141264
An exception occurred in an MBeanProxy: {0}.

Category:
Management

Cause:
See the exception text for details.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
The message includes information on the root cause. Review this message to determine the appropriate action.

BEA-141265
Could not get the configuration lock used to serialize access to the configuration files.

Category:
Management

Cause:
The lock could not be obtained before the specified timeout period had elasped.

Action:
Verify the configuration files and ensure that no server has hung, thereby not releasing the lock.

BEA-141266
Parsing failure in {0}: {1}.

Category:
Management

Cause:
This error occurs when the configuration file has invalid XML syntax or other errors.

Action:
Validate the contents of the configuration file.

BEA-141267
Parsing failure in {0} on line {1}: {2}.

Category:
Management

Cause:
This error occurs when the configuration file has invalid XML syntax or other errors.

Action:
Validate the contents of the configuration file.

BEA-141268
Parsing failure in {0} on line {1}, column {2}: {3}.

Category:
Management

Cause:
This error occurs when the configuration file has invalid XML syntax or other errors.

Action:
Validate the contents of the configuration file.

BEA-141269
The temporary bean tree {0} was allocated for an undo, get, or activate operation, but has not been garbage collected.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Management

Cause:
The temporary bean tree has not been garbage collected.

Action:
Repeat the specified operation and determine if memory usage in the server is increasing.

BEA-141270
Could not get the configuration lock used to serialize access to configuration files. Retrying for another {0} seconds.

Category:
Management

Cause:
Another server was reading or writing to the configuration files, and the lock could not be obtained before the specified timeout period had elasped.

Action:
No action is required. If the configuration subsystem fails to get the lock, and the number of retries is exhausted, a different message with error severity will be displayed.

BEA-141271
An IOException occurred while recording setAttribute {1} on MBean {0}. Exception: {2}.

Category:
Management

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
Take action based upon the provided exception details.

BEA-141272
An IOException occurred while recording invoke {1} on MBean {0}. Exception: {2}.

Category:
Management

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
Take action based upon the provided exception details.

BEA-141273
An upgrade framework class was not found. Exception: {0}. The configuration and upgrade framework component may not have been installed.

Category:
Management

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The configuration and upgrade framwork component may not have been installed.

Action:
Install the Configuration Wizard and pgrade framework component by running the installer again.

BEA-141274
Production mode has been specified at the command line using the the weblogic.ProductionModeEnabled system property. This system property overrides the development mode setting contained in the config.xml file. However, the Administration Console and WLST show the attribute values and defaults that correspond to the development mode specified in the config.xml file.

Category:
Management

Cause:
The command line overrides are not persisted to the config.xml file.

Action:
If the Administration Console or WLST should display production mode defaults for attributes, then enable production mode in the Administration Console or WLST and activate the changes.

BEA-141275
Development mode has been specified at the command line by setting the weblogic.ProductionModeEnabled system property to false. This system property overrides the production mode setting contained in the config.xml file. However, the Administration Console and WLST show the attribute values and defaults that correspond to the production mode specified in the config.xml file.

Category:
Management

Cause:
The command line overrides are not persisted to the config.xml file.

Action:
If the Administration Console or WLST should display development mode defaults for attributes, then enable development mode in the Administration Console or WLST and activate the changes.

BEA-141276
An exception occurred while obtaining the class for interface {0}. The exception is: {1}

Category:
Management

Cause:
A resource or classloader issue caused the class lookup to fail.

Action:
See the underlying exception to troubleshoot further.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-141277
The JMX MBean PlatformMBeanServerUsed attribute is true, but the Platform MBeanServer was created without the hooks for the WebLogic Server security infrastructure. The Platform MBeanServer will not be used and Platform MBeans will not be available using the WebLogic Server Runtime or Domain Runtime MBeanServers. This can occur if Platform MBeanServer system properties or JVM options (-Dcom.sun.management.jmxremote or JRockit -XManagement) were defined. To allow the Platform MBeanServer to be used, either remove the system properties and JVM options or start WebLogic Server with the following system property: -Djavax.management.builder.initial=weblogic.management.jmx.mbeanserver.WLSMBeanServerBuilder To eliminate this log error if Platform MBeans do not need to be available when using WebLogic Server, set the PlatformMBeanUsed attribute in the JMXMBean to false.

Category:
Management

Cause:
A system property was specified that caused the Platform MBeanServer to be created before the WebLogic Server Runtime MBeanServer.

Action:
Remove the system properties or start WebLogic Server with the following system property: -Djavax.management.builder.initial=weblogic.management.jmx.mbeanserver.WLSMBeanServerBuilder.

BEA-141278
Java entropy configuration is: {0}.

Category:
Management

Cause:
This message is informational and is printed every time WebLogic Server starts.

Action:
Change your jave entropy configuration, if needed.

BEA-141279
Detected BLOCKING java entropy configuration. This is the most secure setting, but may cause performance issues on machines with few sources of entropy.

Category:
Management

Cause:
This message is informational and is printed every time WebLogic Server starts.

Action:
Change your jave entropy configuration, if needed.

BEA-141280
Detected NON-BLOCKING java entropy configuration. This setting will provide the best performance on machines with few sources of entropy, but is less secure than a blocking entropy configuration.

Category:
Management

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This message is informational and is printed every time WebLogic Server starts.

Action:
Change your jave entropy configuration, if needed.

BEA-141281
A ForeignJNDIProvider named {0} has two child ForeignJNDILinks named {1} and {2}, which both have the same LocalJNDIName {3}. This duplication of LocalJNDIName is invalid.

Category:
Management

Cause:
Two links cannot share the same LocalJNDIName because it would be unclear as to which remote JNDI name to link to.

Action:
Change the LocalJNDIName of one of the ForeignJNDILinks.

BEA-141282
Server name {0} not found in domain {1}.

Category:
Management

Cause:
A managed server is started with -Dweblogic.Name with a value that is not configured in the domain.

Action:
Specify the correct value of the param -Dweblogic.Name.

BEA-141283
Server name could not be determined.

Category:
Management

Cause:
Either the name is not specified or the specified name does not exist in the config.xml file.

Action:
Specify the correct value of the -Dweblogic.Name parameter.

BEA-141284
A deprecated MBean for {0} has been removed from the current version of WebLogic Server but still exists in an application configuration file.

Category:
Management

Cause:
A deprecated MBean for {0} has been removed from the current version of WebLogic Server but still exists in an application configuration file.

Action:
Update the configuration file to remove the deprecated MBean.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-141285
The network access point property {0} was ignored because the specified network access point name was not found.

Category:
Management

Cause:
The specified network access point does not exist in the configuration.

Action:
Modify the system property, and specify a valid network access point name.

BEA-141286
The creation of the dynamic server failed with an exception.

Category:
Management

Cause:
An exception occurred during the creation of the dynamic server.

Action:
Take action based upon the provided exception details, make any required changes, and retry the operation.

BEA-141287
No matching machines were found based on the MachineNameMatchPrefix property. No machine has been calculated for servers from dynamic servers {0}.

Category:
Management

Cause:
The MachineNameMatchPrefix did not match any of the existing machines in the domain.

Action:
Set the MachineNameMatchPrefix property so it matches the machine names in the domain.

BEA-141288
Unable to obtain file lock but will retry.

Category:
Management

Cause:
This is an informational message only.

Action:
If WebLogic Server fails to start because it was unable to obtain the file lock, then the lock files need to be removed manually before restarting WebLogic Server.

BEA-141289
Upgrade of 8.1 or prior domains is no longer supported. Convert the {1} from version {0} to 10.x format using weblogic.Upgrade.

Category:
Management

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
WebLogic Server found a config.xml file with a version that is no longer supported.

Action:
Upgrade the config.xml file to a newer version using weblogic.Upgrade from a 10.3 or lower version of the product.

BEA-141290
Configuration plug-in not found for component type "{0}" in location "{1}"

Category:
Management

Cause:
The plug-in JAR file was not found.

Action:
Verify the installation to ensure that the plug-in was installed correctly.

BEA-141291
A system component for component type "{0}" was not defined in config.xml. The file "{1}" will not be distributed to the external server.

Category:
Management

Cause:
The system component is not defined in config.xml

Action:
Define the corresponding system component in config.xml.

BEA-141292
A machine was not specified in the system component "{0}" in config.xml. The file "{1}" will not be distributed to the external server.

Category:
Management

Cause:
The machine for the system component is not defined in config.xml

Action:
Define the corresponding machine in the system component in config.xml.

BEA-141293
Bad CAM replication exclusive file {0} : {1}.

Category:
Management

Cause:
See the error message for details.

Action:
Correct the error in the CAM replication exclusive file.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-141294
Found invalid entries in CAM replication exclusive file {0}: {1}.

Category:
Management

Cause:
There are invalid entries in the file.

Action:
Correct the invalid entries in the file.

BEA-141295
Unable to contact Node Manager on "{1}". Activation for system component "{0}" is deferred until "{1}" becomes available.

Category:
Management

Cause:
Contact with Node Manager on "{1}" could not be made.

Action:
No action is required.

BEA-141296
Unable to contact Node Manager on "{1}". Activation for system component "{0}" is deferred until "{1}" becomes available.

Category:
Management

Cause:
Contact with Node Manager on "{1}" could not be made.

Action:
No action is required.

BEA-141297
Could not get the server file lock. Ensure that another server is not running in the same directory. Retrying for another {0} seconds.

Category:
Management

Cause:
Another server is running and still has the server lock.

Action:
Check to see if another server is running.

BEA-141298
Could not register with the Administration Server: {0}

Category:
Management

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A network connection failed or an I/O exception occurred.

Action:
Check the underlying exception and determine why the Managed Server could not connect to the Administration Server.

BEA-141299
An exception occurred during the registration of MBeans in the MBeanServer : {0}.

Category:
Management

Cause:
See the exception text for details.

Action:
The message includes information on the root cause. Review the message to determine the appropriate action.

BEA-141300
The activate changes operation for request "{0}" could not be completed because the activate timed out. Detailed state info is: {1}

Category:
Management

Cause:
The activate changes operation timed out.

Action:
Try increasing the activate changes timeout value. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-141301
Access not allowed for ObjectName: {0}, on action: {1}, target {2} in partition {3}.

Category:
Management

Cause:
The user does not have enough access to the MBean in the partition.

Action:
Check WebLogic Server JMX policies to determine which role is required to access MBeans.

BEA-141302
Access not allowed for Subject: {0}, on resource {1}, action: {2}, target {3}.

Category:
Management

Cause:
The Subject role for the user does not have enough access to the MBean.

Action:
Check WebLogic Server JMX policies to determine which role is required to access MBeans.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-141303
The internal method that you have invoked is not available unless you are running as Kernel. You are running as: {0}

Category:
Management

Cause:
The Subject role for the user does not have enough access to the MBean.

Action:
Check WebLogic Server JMX policies to determine which role is required to access MBeans.

BEA-141304
Access not allowed for Subject roles: {0} on ObjectName {1}: Resource Type: {2}, Action: {3}, Target: {4} in partition {5}

Category:
Management

Cause:
The person with the specified Subject role does not have enough access to the MBean.

Action:
Check WebLogic Server JMX policies to determine which role is required to access MBeans.

BEA-141305
An error occurred while firing an edit DomainMBean reload event: {0}

Category:
Management

Cause:
EditAccess fires an event when the edit DomainMBean is reloaded but one listener throws an exception.

Action:
Check the JMX client.

BEA-141306
JMS configuration error --- {0} ---.If you need to delay fixing this problem, you can force a log message to occur instead of a configuration exception by configuring the "{1}" system property to false. This system property will be removed in a future 12.2.1 stage.

Category:
Management

Cause:
JMS resource MBean validations failed.

Action:
Check the cross MBean relationships of JMS resources.

BEA-141307
Unable to connect to the Administration Server. Waiting {1} second(s) to retry (attempt number {0} of {2}).

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Management

Cause:
The Administration Server is not available.

Action:
Start the Administration Server.

BEA-141308

BEA-141312
Suspended

Category:
Management

Cause:
This message is used only for localization (internationalization) purposes.

Action:
No action is required.

BEA-141313
Automatic resolve operation during startEdit fails. {0}

Category:
Management

Cause:
{0}

Action:
It is recommended to call resolve() manually.

BEA-141314
Use of the GlobalMBeansVisibleToPartitions system property is temporary. It serves only as a transitional aid to the new MBean visibility model. This warning is generated when it is detected that the old MBean visibility model is in use. Switch to the new model by eliminating the use of the -DGlobalMBeansVisibleToPartitions property. This property will be removed prior to August 2015.

Category:
Management

Cause:
The system property -DGlobalMBeansVisibleToPartitions=true was included in the server startup command.

Action:
Remove the system property -DGlobalMBeansVisibleToPartitions=true or use -DGlobalMBeansVisibleToPartitions=false when starting the server.

BEA-141315
Canceling the configuration update failed with an exception. {0}

Category:
Management

Cause:
An exception occurred during an attempt to cancel an update. {0}

Action:
Ensure that the config is valid. Take action based upon the provided exception details, make any required changes, and retry the activate.

BEA-141316
An exception was received during the prepare phase of configuration, the system is attempting to recover. {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Management

Cause:
An exception occurred during an attempt to prepare an update. {0}

Action:
If the system is unable to automatically recover, ensure that the config is valid. Take action based upon the provided exception details, make any required changes, and retry the activate.

BEA-141317
Auto-halting partition "{0}" due to config change; no active targeted admin resource groups

Category:
Management

Cause:
This is an informational message.

Action:
No action is required.

BEA-141318
Auto-booting partition "{0}" due to config change; active targeted admin resource groups

Category:
Management

Cause:
This is an informational message.

Action:
No action is required.

BEA-141319
The file distribution servlet failed to initialize JMX default security policies due to the following error: {0}.

Category:
Management

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
No action is required if REST management support is not required. Otherwise, configure an authorization security provider in the security configuration that implements weblogic.security.spi.PolicyConsumer such as the XACML Authorization provider.

BEA-141320
The JMX invocation timed out for request "{0}" for activate changes operation. Detailed state info is: {1}

Category:
Management

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The JMX invocation timed out for activate changes operation.

Action:
Compare the JMX invocation timeout value and activate timeout values. If using WLST, specify timeout in connect() command. If JMX API is used, specify the value of jmx.remote.x.request.waiting.timeout in the JMX client while creating the JMX connection.

BEA-141321
Property {0} was overrloaded via situational properties to {1}

Category:
Management

Cause:
Situational Properties are in effect. {0} = {1}

Action:
If the property setting is incorrect, update the situational properties file.

BEA-141322
The situational config file has an invalid format, it is being ignored: {0}

Category:
Management

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
Update the situational config file.

BEA-141323
The situational config file has an invalid format, it is being ignored: {0} because {1}

Category:
Management

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
Update the situational config file.

BEA-141324
Unable to obtain file lock {0} due to {1}, but will retry.

Category:
Management

Cause:
This is an informational message only.

Action:
If WebLogic Server fails to start because it was unable to obtain the file lock, then the lock file needs to be removed manually before restarting WebLogic Server.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-141325
There was an exception while acquiring the configuration lock. The exception was {0}

Category:
Management

Cause:
Refer to the exception information for more details as to the probable cause of this error

Action:
The action taken will depend on the exception that was thrown

BEA-141326
There was an exception while releasing the configuration lock. The exception was {0}

Category:
Management

Cause:
Refer to the exception information for more details as to the probable cause of this error

Action:
The action taken will depend on the exception that was thrown

BEA-141327
The SitConfigRequired configuration element is set to true, but no situational config files were found.

Category:
Management

Cause:
No situational config files were found.

Action:
Either change the SitConfigRequired configuration element for the server to false, or ensure that situational config files are present during startup.

BEA-141328
The non-dynamic attribute {1} on {0} was attempted to be changed via a situational configuration file. This change may require redeploying or rebooting configured entities before it takes effect.

Category:
Management

Cause:
This happens when one or more of the changes made to the configuration via situational configuration files affect non-dynamic settings.

Action:
Restart the server or redeploy the entity to ensure the change takes effect.

BEA-141329
Error loading the situational config files: {0}

Category:
Management

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Refer to the embedded error message information for more details as to the probable cause of this error.

Action:
Update the situational config file to correct the error.

BEA-141330
Loading situational config file: {0}

Category:
Management

Cause:
This is an informational message.

Action:
No action is required.

BEA-141331
Canceling Edit Lock without discarding or activating the pending changes. Unactivated changes have been saved to the domain directory.

Category:
Management

Cause:
The user has cancelled the edit lock without either activating or undo the saved pending changes. This is not an error, but unactivated changes will impact later in case one performs WLST offline changes.

Action:
Either activate or undo the unactivated changes.

BEA-149000
Unable to create DeployerRuntimeMBean.

Category:
Deployer

Cause:
This may occur if an error at the JMX level exists.

Action:
Report this problem to My Oracle Support.

BEA-149001
No application named "{0}" exists for operation "{1}".

Category:
Deployer

Cause:
The application name was likely misspelled.

Action:
Verify that the application is correctly named.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-149002
The source file was not provided for activation of application: "{0}".

Category:
Deployer

Cause:
Source files do not exist for the application to be deployed.

Action:
Make source files available for the application to be deployed in the said path.

BEA-149003
Unable to access application source information in "{0}" for application "{1}". The specific error is: {2}.

Category:
Deployer

Cause:
Source files for the application to be deployed are not accessible.

Action:
Ensure that no other process is using the source file(s).

BEA-149004
Failures were detected while initiating {1} task for application "{0}".

Category:
Deployer

Cause:
Task creation can fail for many reasons.

Action:
Check the error message and take appropriate action.

BEA-149011
Some of the targets in the deployment request are not configured in this domain. The named targets are: "{0}".

Category:
Deployer

Cause:
This error occurs when a deployment request is made to a target that is not configured.

Action:
Ensure that the target list in the request is correct.

BEA-149013
Application "{0}" does not define the module, "{1}". {2} are the known valid module(s) for this application.

Category:
Deployer

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Incorrect deployment information was provided in the activate request.

Action:
Ensure that the module information in the request is accurate. If adding modules, ensure that the source file is specified again so that it is reloaded and any new modules are deployed.

BEA-149014
Target "{0}" is not defined.

Category:
Deployer

Cause:
Incorrect deployment information was provided in the activate request.

Action:
Ensure that the target information in the request is accurate.

BEA-149015
Unable to add "{0}" to component "{1}".

Category:
Deployer

Cause:
The component is already targeted to the server, cluster, or virtual host.

Action:
Check the target list.

BEA-149021
Rejecting {2} request for application "{1}". The specified ID, {0}, is already being used.

Category:
Deployer

Cause:
A {1} request included an ID provided by a user that is already assigned to another task.

Action:
Choose a different ID or allow the system to allocate an ID for the request.

BEA-149025
An invalid attempt was made to target a non-Web application component, "{1}", in application "{0}" to a virtual host, "{2}".

Category:
Deployer

Cause:
An invalid attempt was made to target a non-Web application to virtual hosts.

Action:
Correct the target list.

BEA-149026
{2} application {0} on {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Deployer

Cause:
This is an informational message about the task description.

Action:
This is an informational message about the task description.

BEA-149027
Unable to activate the application "{1}" from source "{0}". Reason: {2}

Category:
Deployer

Cause:
The application was improperly defined.

Action:
Define the application properly.

BEA-149028
An invalid path, "{1}", was specified for the application "{0}".

Category:
Deployer

Cause:
The configured path for this application does not exist.

Action:
Provide the application files in the specified location.

BEA-149031
The staging mode of "{0}" is invalid. The legal values are "stage" or "nostage".

Category:
Deployer

Cause:
An invalid staging mode has been specified.

Action:
Specify a valid staging mode for the deployment request.

BEA-149032
An attempt to restart a task has been rejected. The task has already been started.

Category:
Deployer

Cause:
This error results if start is called on a task that has already been started.

Action:
Do not call start on a task that has already been started.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-149033
{2} application {0} on {1}.

Category:
Deployer

Cause:
An application-level deployment notification has been reported.

Action:
No action is required. This is an informational log message.

BEA-149034
An exception occurred for task {0}: {1}.

Category:
Deployer

Cause:
An error occurred while reporting the application status.

Action:
The error may be due to server instability. Check the health of the server.

BEA-149035
Module {0} reported error: {1}.

Category:
Deployer

Cause:
The deployment request failed.

Action:
Check the exception log and take appropriate action.

BEA-149038
Initiating task for {1} : {0}.

Category:
Deployer

Cause:
This is an informational message.

Action:
No action is required.

BEA-149040
An attempt to change the staging mode for the application "{0}" has been rejected.

Category:
Deployer

Cause:
An attempt was made to change the staging mode for the application.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
The staging mode cannot be changed once it is set. Try deploying again without changing the staging mode.

BEA-149045
An attempt to add cluster target "{0}" was rejected, since cluster member "{1}" is also targeted by module "{2}". Targeting to a cluster member results in different behaviors than targeting to the entire cluster.

Category:
Deployer

Cause:
A cluster member is already in the target list of the module.

Action:
Remove the cluster member from the target list, or re-target the cluster member rather than the cluster itself.

BEA-149048
An attempt to add server target "{1}" to module "{2}" has been rejected. This is because its parent cluster, "{0}", is also targeted by the module.

Category:
Deployer

Cause:
The module is already targeted to a cluster that contains the server.

Action:
Remove the cluster from the target list or remove the cluster member from the target list.

BEA-149054
An attempt to add a virtual host target "{0}" to a non-Web application module "{1}" has been rejected.

Category:
Deployer

Cause:
An EJB or connector was attempting to target a virtual host.

Action:
Remove the host from target list.

BEA-149055
Adding server {1} of cluster {0} as a target for module {3}. This module also includes server {2} that belongs to this cluster as one of its additional targets. Having multiple individual servers of a cluster as targets instead of having the entire cluster as the target can result in non-optimal load balancing and scalability. Therefore, this is not usually recommended.

Category:
Deployer

Cause:
The module is already targeted to a different cluster member.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Target the entire cluster to the module.

BEA-149058
Distribute can only have stage as its staging mode. Application "{0}" has {1} as its staging mode.

Category:
Deployer

Cause:
This is an unexpected error.

Action:
Specify a valid staging name.

BEA-149059
Module {1} of application {0} is transitioning from {2} to {3} on server {4}.

Category:
Deployer

Cause:
A module is being deployed.

Action:
No action is required.

BEA-149060
Module {1} of application {0} successfully transitioned from {2} to {3} on server {4}.

Category:
Deployer

Cause:
A module is being deployed.

Action:
No action is required.

BEA-149061
Module {1} of application {0} failed to transition from {2} to {3} on server {4}.

Category:
Deployer

Cause:
An error was encountered during a module deployment.

Action:
Details of the specific failure are documented in the associated log entries. Take appropriate action.

BEA-149062
The task containing ID {0} cannot be canceled, since it has already completed execution.

Category:
Deployer

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt has been made to cancel a deployment task that has completed execution.

Action:
Do not attempt this operation on a completed task.

BEA-149066
Unable to deploy application "{0}", because module "{1}" does not provide a valid URI.

Category:
Deployer

Cause:
The application is incorrectly configured.

Action:
Provide a URI for the module, or remove the application from the configuration.

BEA-149068
This is an unexpected exception.

Category:
Deployer

Cause:
An unexpected exception occurred.

Action:
No action is required.

BEA-149069
Deploying {0} using a deprecated protocol.

Category:
Deployer

Cause:
The application is configured with TwoPhase=false or is not a recognized type of application. For example, an application that is not an EAR file (no application.xml) but has multiple modules will not be deployed with the two-phase protocol.

Action:
No action is required.

BEA-149073
The application "{0}" has no configured modules.

Category:
Deployer

Cause:
The application is improperly configured.

Action:
The application will be marked as undeployable. After resolving configuration issues with the application, the administrator can retry the deployment.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-149074
Successfully completed deployment task: {0}.

Category:
Deployer

Cause:
A deployment operation was requested.

Action:
No action is required.

BEA-149078
Stack trace for message {0}

Category:
Deployer

Cause:
A deployment failure occurred.

Action:
No action is required.

BEA-149080
A partial update of an archived application is not allowed. Application "{0}" cannot be redeployed.

Category:
Deployer

Cause:
There was an attempt to partially redeploy an archived application.

Action:
Try deploying the entire application.

BEA-149081
Cannot {2} application, "{0}", with version "{1}". The application was previously deployed without a version.

Category:
Deployer

Cause:
An attempt was made to {2} a versioned application when it was previously deployed without a version.

Action:
Try {2} without a version.

BEA-149082
Cannot {2} application "{0}" without a version. The application was previously deployed with version "{1}".

Category:
Deployer

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt was made to {2} an application without a version when it was previously deployed with a version.

Action:
Try {2} with a version.

BEA-149083
An attempt was made to activate the application "{0}" when stop was in progress.

Category:
Deployer

Cause:
An attempt was made to activate the application "{0}" when stop was in progress.

Action:
Try to activate the application "{0}" again after the stop is done. If it is a graceful stop, stop the application forcefully to end the graceful stop immediately.

BEA-149085
No application version was specified for application "{0}". The {2} operation will be performed against the currently active version "{1}".

Category:
Deployer

Cause:
No application version was specified for the operation.

Action:
Verify that the currently active version is the desired version for the operation. If not, perform the operation again with the -app_version operation to specify a particular version.

BEA-149086
The application {0} is being retired gracefully.

Category:
Deployer

Cause:
This is an informational message.

Action:
No action is required.

BEA-149087
The application {0} will be retired after {1} seconds.

Category:
Deployer

Cause:
This is an informational message.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-149088
The retirement for application {0}, which was scheduled to happen after {1} seconds, is canceled.

Category:
Deployer

Cause:
This is an informational message.

Action:
No action is required.

BEA-149089
An attempt was made to activate the application "{0}" when retirement was in progress.

Category:
Deployer

Cause:
An attempt was made to activate the application "{0}" when retirement was in progress.

Action:
Try to activate the application "{0}" again after the retirement is done. If it is a graceful retirement, undeploy the application to end the graceful retirement immediately.

BEA-149091
An attempt was made to deploy application "{0}" with specified archive version "{1}". However, the application archive, as specified in the source, has version "{2}".

Category:
Deployer

Cause:
This error occurs when an attempt is made to specify a version that is different from the manifest version of the application archive in the source location.

Action:
Perform the deployment again without specifying the version, or specify version "{2}" instead of "{1}".

BEA-149092
The source is not specified for the deployment operation of application "{0}", and the expected version is "{1}". However, the application archive at the source location for a previous deployment of version "{1}" now has version "{2}".

Category:
Deployer

Cause:
The source is not specified for the deployment operation of application "{0}", and the expected version is either explicitly specified or the currently active version. However, the application archive at the previously configured source location of the expected version has a different manifest version.

Action:
Perform deployment again specifying either the source location or version "{2}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-149093
No version specified for the versioned application named "{0}" for operation {1}, and no active version is available.

Category:
Deployer

Cause:
The version was not specified for the operation when no currently active version was available.

Action:
Specify the version of the application for the operation.

BEA-149095
The application {0} is being retired now.

Category:
Deployer

Cause:
This is an informational message.

Action:
No action is required.

BEA-149096
Operation {1} is deprecated and cannot be applied to versioned application "{0}". Use operation {2} instead.

Category:
Deployer

Cause:
An attempt was made to perform the deprecated operation {1} on a versioned application. Use operation {2} instead.

Action:
Use operation {2} instead.

BEA-149097
The retirement for application "{0}" failed.

Category:
Deployer

Cause:
This may have happened due to a problem with accessing the persistent store.

Action:
Check for other log messages that give more information about the failure.

BEA-149098
An attempt was made to gracefully undeploy the application "{0}" when retirement was in progress.

Category:
Deployer

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt was made to gracefully undeploy the application "{0}" when retirement was in progress.

Action:
To stop the graceful retirement, force the application to undeploy.

BEA-149099
Unexpected errors occurred while sending deployment event {1} on behalf of application "{0}".

Category:
Deployer

Cause:
Deployment event listeners that are registered to receive a deployment event generated unexpected exceptions when processing the deployment event {1} on behalf of application "{0}".

Action:
Report this problem to My Oracle Support.

BEA-149100
Unexpected errors occurred while sending a vetoable deployment event on behalf of application "{0}".

Category:
Deployer

Cause:
Deployment event listeners registered to receive a vetoable deployment event generated unexpected exceptions when processing the deployment event {1} on behalf of application "{0}".

Action:
Report this problem to My Oracle Support.

BEA-149101
Application "{0}" is not deployed on target "{1}". Therefore, it cannot be undeployed or removed. The requested operation {2} is valid only on the deployed targets of the application.

Category:
Deployer

Cause:
Incorrect target information was provided in the {2} operation request.

Action:
Ensure that the target information in the request is accurate.

BEA-149102
Production redeployment is not supported for application "{0}", which is of module type {1}. Production redeployment is supported for the following module types only: {2}. If not attempting to perform production redeployment, try deploying without a version.

Category:
Deployer

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Attempt was made to perform production redeployment for an unsupported module type.

Action:
Ensure that the module type is supported before performing production redeployment. Or, try deploying again without a version.

BEA-149103
An exception occurred while executing task {0} for application "{1}": {2}.

Category:
Deployer

Cause:
An exception occurred while executing the deployment task for the application.

Action:
If it is an application error, correct it if possible. If it is a system error, contact My Oracle Support.

BEA-149104
Update request for "{0}" does not specify any descriptors to be updated

Category:
Deployer

Cause:
The deployment plan does not include any module overrides.

Action:
Ensure that the deployment plan is properly constructed.

BEA-149105
An attempt was made to deploy a library located at "{2}" with name "{0}", which is different from the one specified in the manifest of the library: "{1}".

Category:
Deployer

Cause:
This error occurs when an attempt is made to specify a name that is different from the one in the manifest of the library in the source location.

Action:
Perform deployment again without specifying the name of the library.

BEA-149106
An attempt was made to deploy a library located at "{0}" without specifying a name, and the library does not have "Extension-Name" specified in its manifest.

Category:
Deployer

Cause:
This error occurs when an attempt is made to deploy a library without specifying a name, and the library module does not have "Extension-Name" specified in its manifest.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Perform deployment again specifying the name of the library either during deployment or in the manifest of the library, using the "Extension-Name" attribute.

BEA-149107
An attempt was made to deploy library "{0}" with specified specification version "{1}" and implementation version "{2}". However, the library manifest has specification version "{3}" and implementation version "{4}".

Category:
Deployer

Cause:
This error occurs when an attempt is made to specify a version that is different from the manifest version of the library.

Action:
Perform deployment again without specifying the version or after specifying the same version as specified in the manifest.

BEA-149108
Failures were detected while initiating {0} task.

Category:
Deployer

Cause:
Task creation can fail for many reasons.

Action:
Check the error message and take appropriate action.

BEA-149110
An exception occurred while processing the completion of the task {0}, {1}. The active application version state may not have been updated.

Category:
Deployer

Cause:
The deployment subsystem was unable to complete the persistence of the active application version state.

Action:
Check for other log messages that give more information about the failure.

BEA-149111
Application "{0}" is non-versioned, and an attempt was made to redeploy application "{0}" with the source. Redeploying with the source is only allowed when redeploying a new version of a versioned application. Try redeploying again without specifying the source.

Category:
Deployer

Cause:
An attempt was made to redeploy with the source specified for a non-versioned application "{0}". Redeploy again without specifying the source.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Try redeploying again without specifying the source.

BEA-149112
Application "{0}" is already deployed, and the attempt was made to redeploy application "{0}" again with source. Redeploying with the source is only allowed when redeploying a new version of the application. Try redeploying again without specifying the source or with a new version.

Category:
Deployer

Cause:
An attempt was made to redeploy with the source specified for application "{0}", but application "{0}" was already deployed. Redeploy again without specifying the source or with a new version.

Action:
Try redeploying again without specifying the source or redeploy with a new version.

BEA-149113
Cannot deploy or redeploy application "{0}" because the maximum number of application versions ({2}) for application "{1}" has been exceeded. Currently deployed versions are: "{3}".

Category:
Deployer

Cause:
An attempt was made to deploy or redeploy application "{0}" when the maximum number of application versions ("{2}") for application "{1}" has been exceeded.

Action:
Try undeploying the existing application version(s) before deploying or redeploying the new version(s).

BEA-149114
Cannot deploy or redeploy application "{0}" with version identifier "{1}" because the maximum length of the version identifier ({2}) has been exceeded.

Category:
Deployer

Cause:
An attempt was made to deploy or redeploy application "{0}" with version identifier "{1}" that exceeded the maximum length ({2}).

Action:
Try reducing the version identifier length when deploying or redeploying the application version.

BEA-149115
Cannot deploy or redeploy application "{0}" with invalid version identifier "{1}". Version identifiers may only contain alphanumerics, period, underscore, and hyphen and must be less than 215 characters in length.

Category:
Deployer

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt was made to deploy or redeploy application "{0}" with invalid version identifier "{1}".

Action:
Try changing the version identifier to a valid one when deploying or redeploying the application version. Version identifiers can only consist of alphanumeric, period, underscore, or hyphen characters and must not be "." or "..".

BEA-149116
Cannot obtain the deployment configuration.

Category:
Deployer

Cause:
The deployment configuration could not be obtained.

Action:
Check for other log messages that give more information about the failure.

BEA-149117
{2} library {0} on {1}.

Category:
Deployer

Cause:
This is an informational message about the task description.

Action:
This is an informational message about the task description.

BEA-149118
"{1}" is not targeted to "{0}".

Category:
Deployer

Cause:
An attempt was made to undeploy the application from a target where it is not deployed.

Action:
Correct the target list for the operation.

BEA-149119
Different targets cannot be specified when deploying a new version "{1}" of application "{0}". The targets specified, "{3}", are different from those of the previous version, "{2}".

Category:
Deployer

Cause:
An attempt was made to deploy a new application version with targets that are different from that of the previous version.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Try deploying again without specifying targets, or specify the exact same target as the previous version.

BEA-149120
The plan version "{1}" cannot be specified when deploying a non-versioned application "{0}".

Category:
Deployer

Cause:
An attempt was made to deploy a non-versioned application with a plan version.

Action:
Try deploying again with an application version or without the plan version.

BEA-149121
Rejecting {1} request for application {0} because the deployment service is not started.

Category:
Deployer

Cause:
A deployment operation was attempted when the server was starting or shutting down.

Action:
Perform the deployment operation again after the server has started or before the server has shut down.

BEA-149122
Deployment perations on internal application "{0}" are not permitted;.

Category:
Deployer

Cause:
Deployment operations are not permitted on internal applications.

Action:
Do not attempt any deployment operations on internal applications.

BEA-149123
The application "{0}" currently has security model "{1}", and an attempt was made to redeploy the application again with a different security model "{2}". The specified security model will be ignored for the current deployment operation. To change the security model, undeploy the application and deploy it again with the new security model.

Category:
Deployer

Cause:
An attempt was made to redeploy the same application with a different security model.

Action:
Undeploy the application and deploy it again with the new security model.

BEA-149124
Failures were detected while initiating {1} task for application "{0}". Error is: "{2}"

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Deployer

Cause:
Task creation can fail for many reasons.

Action:
Check the error message and take appropriate action.

BEA-149125
No application version was specified for the {0} operation of application "{1}". The {0} operation will be performed against the retired application version "{2}".

Category:
Deployer

Cause:
This is an informational message only.

Action:
No action is required.

BEA-149126
No application version was specified for the {0} operation of application "{1}". The application version "{2}" will not be removed as its retirement is still in progress. Oracle recommends that the application version "{2}" be undeployed explicitly after the retirement is done. An explicit undeploy of the application version can also be performed before retirement is done; however, exercise caution as this may interrupt inflight work.

Category:
Deployer

Cause:
No application version was specified for the {0} operation of application "{1}".

Action:
No action is required.

BEA-149127
Failures were detected while initiating "{0}" task. Error is: "{1}"

Category:
Deployer

Cause:
Task creation can fail for many reasons.

Action:
Check the error message and take appropriate actions.

BEA-149128
The "{1}" option was specified for the {0} operation of application "{2}". The {0} operation will be performed against the retired application version "{3}".

Category:
Deployer

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is an informational message only.

Action:
No action is required.

BEA-149129
The "{1}" option was specified for the {0} operation of application "{2}". The {0} operation will be performed against the retiring application version "{3}". Note that retirement is still in progress for version "{3}" and any inflight work will be interrupted.

Category:
Deployer

Cause:
This is an informational message only.

Action:
No action is required.

BEA-149130
The "{1}" option was specified for the {0} operation of application "{2}". The {0} operation will be performed against the currently active version "{3}".

Category:
Deployer

Cause:
This is an informational message only.

Action:
No action is required.

BEA-149131
Cannot perform operation {2} because application "{0}" is in state {1}

Category:
Deployer

Cause:
The application is no longer active.

Action:
Ensure that the application is active. Deploy again if needed.

BEA-149132
Split directory application {0} can only be deployed on the Administration Server.

Category:
Deployer

Cause:
An attempt was made to perform the deployment operation on the split directory application on a server other than the Administration Server.

Action:
For split directory application {0}, perform deployment operations on the Administration Server alone.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-149133
Auto-deployed application {0} can only be deployed on the Administration Server.

Category:
Deployer

Cause:
An attempt was made to perform the deployment operation on the auto-deployed application on a server other than the Administration Server.

Action:
For auto-deployed application {0}, perform deployment operations on the Administration Server alone.

BEA-149134
A redeploy was performed without specifying -source for the archived versioned application "{0}". Partial update of an archived application is not allowed. To perform production redeployment of versioned applications, specify -source with the redeploy operation.

Category:
Deployer

Cause:
An attempt was made to partially redeploy an archived application.

Action:
Specify -source for production redeployment, or redeploy the entire application.

BEA-149135
Operation {2} cannot be performed since application "{0}" is not deployed on the target "{1}".

Category:
Deployer

Cause:
Operation {2} could not be performed because the application was not deployed on the provided target.

Action:
Rery with a valid target.

BEA-149137
{0} is an invalid path for partial redeployment. The URI of the file or directory to be redeployed should be relative to {1}, the root of the enterprise application, or to the standalone module being redeployed.

Category:
Deployer

Cause:
The file could not be located in the application.

Action:
Use a valid specification for the file.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-149138
A subset of the originally configured targets for the application "{0}" was specified. This can potentially lead to out-of-sync applications between the different server targets. The targets specified, "{2}", are different from those of the previous version, "{1}".

Category:
Deployer

Cause:
A deployment operation was performed on an existing application with a subset of the originally configured targets.

Action:
If the application content has changed since the last operation, Ensure that all configured targets are updated. To do so, repeat the operation without specifying targets in order to automatically use the configured targets.

BEA-149139
Application "{0}" is targeted to cluster "{1}", and provided the target for {3} operation is "{2}". The {3} operation on a subset of the targeted clustered servers is not supported.

Category:
Deployer

Cause:
The {3} operation was attempted on one or more servers in the targeted cluster.

Action:
Retry with the targeted cluster, or undeploy from the cluster and deploy to the desired individual servers.

BEA-149140
The task cannot be processed further until the current edit session is activated. When this occurs, task processing will continue. The user can exit the deployer tool without affecting the task.

Category:
Deployer

Cause:
The user is the current owner of the domain configuration edit lock.

Action:
Activate (or cancel) the edit session. The user can exit the deployer tool without affecting the task.

BEA-149141
The AppDeploymentMBean already exists for application "{0}".

Category:
Deployer

Cause:
The AppDeploymentMBean already exists for application "{0}".

Action:
Ensure that different applications do not have the same name.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-149142
Cluster target "{0}" is configured with no servers, and therefore configuration is updated.

Category:
Deployer

Cause:
A deployment to a cluster target was attempted, but the cluster contains no servers.

Action:
No action is required.

BEA-149143
Submodule targets in an application must be specified with the correct module name.

Category:
Deployer

Cause:
A submodule target was specified incorrectly.

Action:
Ensure that the submodule target was specified with the correct syntax and with the correct module name.

BEA-149145
Unable to contact "{0}". Deployment is deferred until "{0}" becomes available. WARNING: If this is a redeploy app and contains JSP pages that have been touched, these JSP changes won't be reflected when the server starts unless precompile is set to true in weblogic.xml

Category:
Deployer

Cause:
Contact with "{0}" could not be made. Deployment is deferred until "{0}" becomes available.

Action:
No action is necessary.

BEA-149146
Attempt to reach the Administration Server with alternate URL: "{0}" failed.

Category:
Deployer

Cause:
The attempt to reach the Administration Server with the alternate URL: "{0}" failed.

Action:
See the exception cause and check the preceding conflict start message in the logs. Try to avoid the conflict by following one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149147
Could not reach the Administration Server through any of its URLs: "{0}".

Category:
Deployer

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The Administration Server could not be reached through any of its URLs: "{0}".

Action:
See the exception cause and check the preceding conflict start message in the logs. Try to avoid the conflict by following one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149148
Exception occurred while receiving a message on loopback.

Category:
Deployer

Cause:
An exception occurred while receiving a message on loopback.

Action:
See the exception cause and check the preceding conflict start message in the logs. Try to avoid the conflict by following one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149149
Malformed URL: "{0}".

Category:
Deployer

Cause:
The URL: "{0}" was malformed.

Action:
See the exception cause and check the preceding conflict start message in the logs. Try to avoid the conflict by following one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149150
An IOException occurred while reading the input.

Category:
Deployer

Cause:
An IOException occurred while reading the input.

Action:
See the exception cause and check the preceding conflict start message in the logs. Try to avoid the conflict by following one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149151
Could not find a registered DeploymentReceiver to handle requests for "{0}".

Category:
Deployer

Cause:
A registered DeploymentReceiver could not be found to handle requests for "{0}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the preceding conflict start message in the logs. Try to avoid the conflict by following one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149152
No deployment request for which to set up the context.

Category:
Deployer

Cause:
No deployment request for which to set up the context.

Action:
Check the preceding conflict start message in the logs. Try to avoid the conflict by following one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149153
A "prepare" message was received for ID "{0}" that has already been completed or canceled.

Category:
Deployer

Cause:
A "prepare" message was received for ID "{0}" that has already been completed or canceled.

Action:
Check the preceding conflict start message in the logs. Try to avoid the conflict by following one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149154
A "get deployments response" message was received for ID "{0}" that has no request. It may have already been completed or may have been canceled.

Category:
Deployer

Cause:
A "get deployments response" message was received for ID "{0}" that has no request. It may have already been completed or may have been canceled.

Action:
Check the preceding conflict start message in the logs. Try to avoid the conflict by following one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149155
Received "get deployments response" message "{0}" while already handling one. Ignoring the second request.

Category:
Deployer

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A "get deployments response" message "{0}" was received while another was being handled. The second request was ignored.

Action:
Check the preceding conflict start message in the logs. Try to avoid the conflict by following one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149156
Illegal state for operation start: "{0}".

Category:
Deployer

Cause:
The start operation was called on an application that either had an update pending or was used with the administration mode flag.

Action:
To move the application from active to administration mode, use the stop operation.

BEA-149157
There is nothing to do for task "{0}".

Category:
Deployer

Cause:
There is nothing to do for task "{0}".

Action:
No action is required.

BEA-149158
No application files exist at "{0}".

Category:
Deployer

Cause:
No application files exist at "{0}".

Action:
No action is required.

BEA-149159
There was an attempt to create a staging directory that is null.

Category:
Deployer

Cause:
There was an attempt to create a staging directory that is null.

Action:
Ensure that the staging directory is properly configured. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-149160
There was an attempt to create a staging directory for a null application name.

Category:
Deployer

Cause:
There was an attempt to create a staging directory for a null application name.

Action:
Ensure that the application name is properly configured. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149161
This operation requires that a target be specified.

Category:
Deployer

Cause:
This operation requires that a target be specified.

Action:
Ensure that the deployment request is complete and contains the required targeting information.

BEA-149162
This operation requires that a deployment plan be specified.

Category:
Deployer

Cause:
This operation requires that a deployment plan be specified.

Action:
Ensure that the deployment request is complete and contains the required deployment plan information.

BEA-149163
The domain edit lock is owned by another session in non-exclusive mode. This deployment operation requires exclusive access to the edit lock and therefore cannot proceed. If using "Automatically Aquire Lock and Activate Changes" in the Administration Console, then the lock will expire shortly, so retry this operation.

Category:
Deployer

Cause:
The domain edit lock is owned by another session in non-exclusive mode. This deployment operation requires exclusive access to the edit lock and therefore cannot proceed.

Action:
Ensure that the domain edit lock is available, and try again. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-149164
The domain edit lock is owned by another session in exclusive mode. Therefore, this deployment operation cannot proceed.

Category:
Deployer

Cause:
The domain edit lock is owned by another session in exclusive mode. Therefore, this deployment operation cannot proceed.

Action:
Ensure that the domain edit lock is available, and try again. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149165
Invalid target specified.

Category:
Deployer

Cause:
An invalid target was specified.

Action:
See the exception cause and check the preceding conflict start message in the logs. Try to avoid the conflict by following one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149166
Deployments cannot be triggered through configuration updates and through the Deployment APIs simultaneously.

Category:
Deployer

Cause:
Deployments cannot be triggered through configuration updates and through the Deployment APIs simultaneously.

Action:
Ensure that the domain edit lock is available, and try again. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149167
No action was needed to commit the request for "{0}" on "{1}".

Category:
Deployer

Cause:
No action was needed to commit the request for "{0}" on "{1}".

Action:
No action is required.

BEA-149168
Request "{0}" has already been completed or was canceled.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Deployer

Cause:
The request "{0}" has already been completed or was canceled.

Action:
Check the preceding conflict start message in the logs. Try to avoid the conflict by following one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149169
Requires server restart for completion.

Category:
Deployer

Cause:
In order to complete the action, the server must be restarted.

Action:
Restart the required servers.

BEA-149170
Invalid targeting was specified for this operation. Module and submodule targets cannot both be specified for this type of request.

Category:
Deployer

Cause:
The operation specified both module and submodule targeting, which is invalid for this operation.

Action:
Perform the operation separately for both module and submodule targets.

BEA-149171
Deferred deployment task: {0}

Category:
Deployer

Cause:
A deployment operation was requested with targets that were unreachable.

Action:
No action is required.

BEA-149172
Deployment request {0} is affecting the system resource {1}, which involves a non-dynamic property {2} in {3}. Therefore, a restart of the resource or the appropriate server targets is required for the changes to be active.

Category:
Deployer

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is an informational message indicating that deployment involves a non-dynamic property.

Action:
No action is required.

BEA-149178
Application "{0}" is targeted to cluster "{1}", and the provided target for {3} operation is "{2}". This can potentially lead to client request problems on the cluster.

Category:
Deployer

Cause:
An operation was performed on a subset of a cluster for an application targeted to the cluster.

Action:
Ensure that the cluster properly serves requests by performing operations on the cluster rather then on individual servers within the cluster.

BEA-149181
Deployment service encountered an error while aborting the edit session before start. Initiator for this edit session is "{0}". Error is "{1}".

Category:
Deployer

Cause:
See the reported error.

Action:
Take appropriate action based on the reported error.

BEA-149182
An invalid alternate descriptor was specified for the redeploy operation. Alternate descriptors cannot be changed during a redeploy operation.

Category:
Deployer

Cause:
An invalid alternate descriptor was specified for the redeploy operation. Alternate descriptors cannot be changed during a redeploy operation.

Action:
Repeat the redeploy operation without the alternate descriptor.

BEA-149183
An invalid retiretimeout option was specified for the deploy operation. The retiretimeout option was specified as "{2}" for the initial deployment of application "{0}". Retirement policies must be set during the deploy or redeploy of the next version in order to apply to version "{1}" of "{0}".

Category:
Deployer

Cause:
An invalid retiretimeout option was specified for the deploy operation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Specify the retiretimeout option during the deploy or redeploy of subsequent versions in order for the retirement to occur correctly at that time.

BEA-149184
The application "{0}" was autodeployed and may only be redeployed by touching the REDEPLOY file in the domain autodeploy directory for the respected application.

Category:
Deployer

Cause:
Autodeployed applications cannot be redeployed through tools.

Action:
See the WebLogic Server documentation on autodeployed applications for more information.

BEA-149185
The application "{0}" was autodeployed and may only be deleted by removing the files from the domain autodeploy directory.

Category:
Deployer

Cause:
Autodeployed application cannot be undeployed through tools.

Action:
See the WebLogic Server documentation on autodeployed applications for more information.

BEA-149186
The application "{0}" was autodeployed and cannot be redistributed.

Category:
Deployer

Cause:
Autodeployed application cannot be redistributed.

Action:
See the WebLogic Server documentation on autodeployed applications for more information.

BEA-149187
An unexpected error occurred when specifying configuration information for the application "{0}" due to {1}.

Category:
Deployer

Cause:
Application configuration upgrade requires targeting information.

Action:
Inspect the problematic application parts and deploy the application.

BEA-149188
No application named "{0}" exists for operation {1}. Operation cannot be performed until the server is restarted.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Deployer

Cause:
The application was created after non-dynamic changes were activated. The server needed to be restarted.

Action:
Restart the server and then start the application. In the future, start the application before making non-dynamic changes to the configuration.

BEA-149189
An attempt was made to execute the "{0}" operation on an application named "{1}" that is not currently available. The application may have been created after non-dynamic configuration changes were activated. If so, the operation cannot be performed until the server is restarted so that the application will be available.

Category:
Deployer

Cause:
The application may have been created after non-dynamic changes were activated. The server needed to be restarted.

Action:
Restart the server and then perform the operation on the application.

BEA-149190
Changes are pending from another session whose lock has expired. This deployment operation will not activate changes from another edit session and therefore cannot proceed. Either cancel the edit lock or activate the pending changes using the Administration Console or WLST.

Category:
Deployer

Cause:
Changes were made with an edit session that has now expired.

Action:
Cancel the edit lock or activate the pending changes using the Administration Console or WebLogic Scripting Tool (WLST).

BEA-149191
Operation "{0}" on application "{1}" is initializing on "{2}".

Category:
Deployer

Cause:
This is an informational message indicating deployment status change.

Action:
No action is required.

BEA-149192
Operation "{0}" on application "{1}" is in progress on "{2}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Deployer

Cause:
This is an informational message indicating deployment status change.

Action:
No action is required.

BEA-149193
Operation "{0}" on application "{1}" has failed on "{2}".

Category:
Deployer

Cause:
This is an informational message indicating deployment status change.

Action:
No action is required.

BEA-149194
Operation "{0}" on application "{1}" has succeeded on "{2}".

Category:
Deployer

Cause:
This is an informational message indicating deployment status change.

Action:
No action is required.

BEA-149195
Operation "{0}" on application "{1}" has been deferred since "{2}" is unavailable.

Category:
Deployer

Cause:
This is an informational message indicating deployment status change.

Action:
No action is required.

BEA-149196
Rejecting {1} request for application {0} because {2} request is running for the application.

Category:
Deployer

Cause:
A second operation for an application was requested when an operation for the application was runnning.

Action:
Perform the operation again when the operation that is running is completed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-149197
Cannot perform operation {3} because application "{0}" is in state {1} and "{2}" is running.

Category:
Deployer

Cause:
The application is in the wrong state for the operation.

Action:
Ensure that the application is in the correct state before attempting the operation.

BEA-149198
Cannot rename directory "{0}" to {1}.

Category:
Deployer

Cause:
The rename operation failed since the source directory is not present or there is a privilege issue.

Action:
Check that the source directory is present and has the required permissions.

BEA-149199
Security permissions declared in the "{0}" deployment descriptor are not allowed due to the server''s configuration.

Category:
Deployer

Cause:
The server is configured not to allow Java security permissions to be declared in the Weblogic deployment descriptors.

Action:
Remove Java security permissions from the deployment descriptor before re-deployment.

BEA-149202
Encountered an exception while attempting to commit the {0} task for the application "{1}" on [partition-name: {2}].

Category:
Deployer

Cause:
The cause of this error is likely in the application or the application subsystem for that application type.

Action:
Review the exception and attempt to repair the application level. Then re-initiate the deployment request.

BEA-149205
Failed to initialize the application "{0}" due to error {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Deployer

Cause:
The cause of this error is likely in the application or the application subsystem for that application type.

Action:
Review the exception and attempt to repair the application level. Then reinitiate the deployment request.

BEA-149209
The Slave Deployer is resuming.

Category:
Deployer

Cause:
This is an informational message.

Action:
No action is required.

BEA-149229
Server "{0}" in cluster "{1}" is unable to initialize due to failed deployments.

Category:
Deployer

Cause:
This problem occurred due to failed deployments, which are already logged.

Action:
Correct the deployment problem, and restart the server in the cluster.

BEA-149231
Unable to set the activation state to {1} for the application "{0}".

Category:
Deployer

Cause:
An unexpected error occurred.

Action:
Report this error to My Oracle Support.

BEA-149233
An unexpected error occurred during the deployment process.

Category:
Deployer

Cause:
There was a problem with the internal implementation that was not anticipated.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Report the error and any useful information needed to reproduce the problem to My Oracle Support.

BEA-149239
Application deployment failures were detected during startup of the Administration Server, "{0}", member of cluster "{1}".

Category:
Deployer

Cause:
One or more applications could not be deployed during the startup of the Administration Server.

Action:
Oracle recommends that the Administration Server not be part of a cluster. One response to this warning is to remove it from the cluster and restart the Administration Server. Alternatively, review the Administration Server log to understand why the deployment failed, fix the problem, and redeploy the application.

BEA-149243
The internal application "{0}" could not be deployed. An attempt will be made to retry deploying this application after synchronizing the application files again.

Category:
Deployer

Cause:
It is likely that the internal staged directory was corrupt or there was a failure when deploying the staged application.

Action:
No action is necessary if the retry succeeds. Otherwise, the nature of the failure should provide an indication of the problem and its resolution. If this is not clear, contact My Oracle Support with the relevant logs and configuration files.

BEA-149245
The deployment plan at "{0}" for application "{1}" does not define a valid deployment plan.

Category:
Deployer

Cause:
The application is configured with an incorrect deployment plan document.

Action:
Deploy the application using a valid deployment plan.

BEA-149246
The security realm "{0}" does not support application versioning. Deployment of application "{1}" failed.

Category:
Deployer

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The security realm "{0}" does not support application versioning. The deployment of the application version failed.

Action:
Deploy the application using a security realm that supports application versioning.

BEA-149247
Failed to transition the application "{0}" to running mode due to error {1}

Category:
Deployer

Cause:
The cause of this error is likely in the application or the application subsystem for that application type.

Action:
Review the exception and attempt to repair the application level. Then reinitiate the deployment request.

BEA-149248
Failed to transition the application "{0}" to administration mode due to error {1}.

Category:
Deployer

Cause:
The cause of this error is likely in the application or the application subsystem for that application type.

Action:
Review the exception and attempt to repair the application level. Then reinitiate the deployment request.

BEA-149250
Unable to unprepare the application "{0}".

Category:
Deployer

Cause:
This was an unexpected error.

Action:
Report this error to My Oracle Support.

BEA-149251
Operation {0} failed for application "{1}". Error: {2}

Category:
Deployer

Cause:
See the exception in the message body.

Action:
Typically, no action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-149252
No deployment "{1}" found for operation {0}.

Category:
Deployer

Cause:
See the message body.

Action:
No action is required.

BEA-149256
Failed to find deployment for application "{0}".

Category:
Deployer

Cause:
The cause of this error is likely that the deployment was not properly created, possibly because it may not have proper descriptors.

Action:
Review the exception and attempt to repair the application level. Then reinitiate the deployment request.

BEA-149257
Rejecting the attempt to distribute application or shared library "{0}" while the application is running (in state {1}). This operation is not permitted while the application is running or has pending updates.

Category:
Deployer

Cause:
The application or shared library was not stopped or had pending updates.

Action:
Verify that the application or shared library is stopped or has no pending updates before attempting to distribute it. You may also consider redeploying the application.

BEA-149258
The server failed to completely remove the staged files "{1}" for application "{0}". Check the directory and ensure that no other application is using this directory. This will result in inappropriate results when this server is partitioned and tries to deploy this application.

Category:
Deployer

Cause:
Another application might be using the files under a staging directory.

Action:
Delete the appropriate staged files manually.

BEA-149259
Server "{0}" in cluster "{1}" is being brought up in administration state due to failed deployments.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Deployer

Cause:
This problem occurred due to failed deployments, which are already logged.

Action:
Correct the cause of the deployment errors, redeploy the failed deployments, and resume or restart the server in the cluster.

BEA-149260
A failure occurred during application startup.

Category:
Deployer

Cause:
Check the error stack trace for details of the failure.

Action:
Correct the cause of the application failure, if possible, and redeploy the application or restart the server. If it is an Oracle internal application, report it to My Oracle Support.

BEA-149264
Invalid redeploy attempt on application "{0}". There was an attempt to redeploy the application when the application was not running.

Category:
Deployer

Cause:
The application was stopped.

Action:
Start the application.

BEA-149265
Failure occurred in the execution of deployment request with ID "{0}" for task "{1}" on [partition-name: {2}]. Error is: "{3}"

Category:
Deployer

Cause:
See the reported error in the message body.

Action:
Start the application.

BEA-149266
Illegal state for operation deploy: "{0}".

Category:
Deployer

Cause:
The deploy operation was called on an application that was not new.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify that the specified application name and operation are correct.

BEA-149267
Cancel operation on deployment task "{0}" on server "{1}" failed.

Category:
Deployer

Cause:
See the underlying exception.

Action:
Take action based on the underlying exception.

BEA-149268
Static deployment of non-versioned application "{0}" failed due to a version being defined in its manifest file.

Category:
Deployer

Cause:
The manifest file was modified with a version for a non-versioned application.

Action:
Remove the application and redeploy it with a version.

BEA-149269
Static file redeployment and module level redeployment cannot be in the same deployment task. Check the usage.

Category:
Deployer

Cause:
The server cannot determine which type of redeployment should be processed.

Action:
Correct the deployment option.

BEA-149319
{0}: List of servers being worked upon are {1}.

Category:
Management

Cause:
{0}

Action:
None

BEA-149400
Activating application: {0}

Category:
Application Poller

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is an informational message.

Action:
No action is required.

BEA-149401
Removing application: {0}

Category:
Application Poller

Cause:
This is an informational message.

Action:
No action is required.

BEA-149403
Application {0} deployed from the applications directory has components that are deployed on servers other than the Administration Server. Refresh of static content (such as JSPs and HTML pages) will not be automatically propagated to the Managed Servers. To propagate your changes to the Managed Servers, you must redeploy the application by touching the REDEPLOY file.

Category:
Application Poller

Cause:
This is a warning message only.

Action:
Touch the REDEPLOY file to properly redeploy the application. The REDEPLOY file is located in the same directory as the deployment descriptor. For EAR files, it is located in META-INF/REDEPLOY.

BEA-149407
An error occurred while undeploying application {0} : {1}.

Category:
Application Poller

Cause:
Undeployment can fail for many reasons.

Action:
Review the error message and take corrective action.

BEA-149408
An exception occurred while deploying an application {0}: {1}.

Category:
Application Poller

Cause:
Deployment of an application can fail for many reasons. Refer to the exception details.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the exception. To redeploy the application after correcting the error condition, touch the file called REDEPLOY in the META-INF or WEB-INF directory of the exploded application.

BEA-149409
Caught exception while starting the applications poller on server start {0}.

Category:
Application Poller

Cause:
A misconfigured application may be present in the applications directory.

Action:
Review the exception message in the server log.

BEA-149410
Runtime deployment error while deploying - {0}.

Category:
Application Poller

Cause:
The cause of this error is unknown.

Action:
Refer to the runtime error in the message.

BEA-149411
I/O exception was encountered {0}.

Category:
Application Poller

Cause:
An I/O exception can occur during file read/write while deploying an application.

Action:
Take corrective action based on the exception message details.

BEA-149412
Application "{0}" is being redeployed, because it changed since the previous server run.

Category:
Application Poller

Cause:
This application is deployed using auto-deployment. The application was modified while the server was down, hence it will be redeployed by the auto-deployment poller. Another possible cause is that the internal file used by the poller was removed or moved from disk. In that case, it assumes applications have changed.

Action:
No action is required. This is an informational message to explain why this deployment was redeployed after its deployment at startup.

BEA-149414
Could not create directory for autodeployed applications: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Application Poller

Cause:
This may be an error on the local file system of the Administration Server.

Action:
Correct the error by creating the directory or making sure read/write permissions exist.

BEA-149415
An exception was encountered while migrating application poller applications {0}.

Category:
Application Poller

Cause:
An exception occurred while modifying application's path.

Action:
Report this error to My Oracle Support.

BEA-149416
Application migrated {0} - {1}

Category:
Application Poller

Cause:
This is informational message.

Action:
No action is required.

BEA-149417
Another process is using the file "{0}". The server will attempt to deploy the application once it is unlocked by the other process.

Category:
Application Poller

Cause:
Another process has a lock on the file that is in the hot deploy directory. The application could still be in the process of being copied.

Action:
Ensure that no other process is attempting to lock part or all of this application file. If the copy is ongoing, then no action should be necessary.

BEA-149500
An exception occurred while registering the MBean {0}.

Category:
JMX

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
This is an internal WebLogic Server error and should be reported as a bug to My Oracle Support.

BEA-149501
An exception occurred while registering the MBean {0} at property {1}.

Category:
JMX

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
This is an internal WebLogic Server error and should be reported as a bug to My Oracle Support.

BEA-149502
An exception occurred while unregistering the MBean {0}.

Category:
JMX

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
This is an internal WebLogic Server error and should be reported as a bug to My Oracle Support.

BEA-149503
An exception occurred while unregistering the MBean {0} at property {1}.

Category:
JMX

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
This is an internal WebLogic Server error and should be reported as a bug to My Oracle Support.

BEA-149504
The Administration Server was unable to establish JMX Connectivity with the {0} at the JMX Service URL of {1}.

Category:
JMX

Cause:
This is likely due to a misconfiguration of the Managed Server. Often this is associated with the use of the administration channel.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the Managed Server adminstration ports are properly configured. It may be helpful to review the documentation on the administration channel configuration.

BEA-149505
The Administration Server was unable to establish JMX Connectivity with the {0} at the JMX Service URL of {1}.

Category:
JMX

Cause:
This is likely because the Managed Server is simply not running. It may indicated that the administration channels are not properly configured.

Action:
Ensure that the Managed Server administration ports are properly configured. It may be helpful to review the documentation on the administration channel configuration.

BEA-149506
Established JMX Connectivity with {0} at the JMX Service URL of {1}.

Category:
JMX

Cause:
This is a normal operation.

Action:
No action is required.

BEA-149507
JMX Connectivity has been discontinued with the Managed Server {0}.

Category:
JMX

Cause:
This message is logged whenever a Managed Server is shut down.

Action:
No action is required.

BEA-149508
Unable to establish JMX Connectivity with the Administration Server.

Category:
JMX

Cause:
This may have occurred because the Administration Server is not currently available or it may indicate a misconfiguration of the administrative channels.

Action:
If the Administration Server is currently running, the administrator should consult the documentation on the administration channel configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-149509
Unable to establish JMX connectivity with the Administration Server {0} at {1}.

Category:
JMX

Cause:
This may have occurred because the Administration Server is not currently available or it may indicate a misconfiguration of the administrative channels.

Action:
If the Administration Server is currently running, the administrator should consult the documentation on the administration channel configuration.

BEA-149510
Unable to establish JMX Connectivity with the Administration Server {0} at {1}.

Category:
JMX

Cause:
This may have occurred because the Administration Server is not currently available or it may indicate a misconfiguration of the administrative channels.

Action:
If the Administration Server is currently running, the administrator should consult the documentation on the administration channel configuration.

BEA-149511
Established JMX Connectivity with the Administration Server {0} at {1}.

Category:
JMX

Cause:
This is a normal operation.

Action:
No action is required.

BEA-149512
JMX Connector Server started at {0}.

Category:
JMX

Cause:
This is a normal operation.

Action:
No action is required.

BEA-149513
JMX Connector Server stopped at {0}.

Category:
JMX

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is a normal operation.

Action:
No action is required.

BEA-149515
An error was encountered getting the attribute {1} on the MBean {0} during a call to getAttributes.

Category:
JMX

Cause:
This problem is the result of an internal WebLogic Server error in the WebLogic Server JMX implementation.

Action:
Report this message to My Oracle Support.

BEA-149516
An error was encountered when setting the attribute {1} on the MBean {0} during a call to setAttributes.

Category:
JMX

Cause:
This problem is the result of an internal WebLogic Server error in the WebLogic Server JMX implementation.

Action:
Report this message to My Oracle Support.

BEA-149518
An attempt was made to unregister the {0} WebLogic Server MBean through JMX.

Category:
JMX

Cause:
Avoid using the JMX API to unregister a WebLogic Server MBean.

Action:
Use the WebLogic Server APIs to control the configuration of the server environment.

BEA-149519
The JMX Service URL {1} for Managed Server {0} was malformed.

Category:
JMX

Cause:
The URL used to contact a Managed Server was malformed.

Action:
See the exception included with this message to determine the proper action.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-149520
An attempt was made to register an MBean with ObjectName {0} ObjectName in com.bea domain.

Category:
JMX

Cause:
An attempt was made to register an MBean with the com.bea domain name.

Action:
Register your MBeans with another domain name.

BEA-149521
An exception occurred during the processing of JMX Connectivity with the Administration Server: {0}

Category:
JMX

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
Refer to the embedded exception information for more details and troubleshoot based on that information.

BEA-149522
No credentials were provided.

Category:
JMX

Cause:
Credentials are required when connecting through Remote MAnagement Interface (RMI).

Action:
Retry the connection, supplying a username and password.

BEA-149523
RmiServerManager not found.

Category:
JMX

Cause:
This problem is the result of an internal WebLogic Server error in the WebLogic Server JMX implementation.

Action:
Report this message to My Oracle Support.

BEA-149524
JMX Connector Server started at "{0}".

Category:
JMX

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is a normal operation.

Action:
No action is required.

BEA-149525
JMX Connector Server stopped at "{0}".

Category:
JMX

Cause:
This is a normal operation.

Action:
No action is required.

BEA-149526
Cannot access the attribute "{0}"{ from a partition "{{1}"{ on MBean "{{2}"{ because it is annotated with @ExcludeFromPartition or its interface is annotated with @ExcludeFromPartition.

Category:
JMX

Cause:
An MBean or its attribute is annotated with @ExcludeFromPartition.

Action:
Either do not access the attribute, or remove the @ExcludeFromPartition annotation from the MBean interface or attribute.

BEA-149527
Cannot access the operation "{{0}"{ from a partition "{{1}" on MBean "{2}" because it is annotated with @ExcludeFromPartition or the MBean interface is annotated with @ExcludeFromPartition.

Category:
JMX

Cause:
An attempt was made to access an operation annotated with @ExcludeFromPartition.

Action:
Either do not access the operation, or remove the @ExcludeFromPartition annotation from the operation or MBean interface.

BEA-149528
Cannot get the attribute "{0}" on MBean "{2}" from the partition "{1}". Either the attribute does not exist or the attribute is not visible to the partition.

Category:
JMX

Cause:
The attribute does not exist or the attribute is not visible to the partition.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
If the attribute does not exist in the MBean, either change the MBean interface and its implementation to add the attribute or change to get other existing attributes. If the attribute exists but is not visible to the partition, annotate the attribute with @VisibleToPartitions ALWAYS.

BEA-149529
Cannot set the attribute "{0}" on MBean "{2}" from the partition "{1}". Either the MBean does not contain the attribute or the MBean attribute is not visible to the partition.

Category:
JMX

Cause:
The attribute does not exist or the attribute is not visible to the partition.

Action:
If the attribute does not exist in the MBean, either change the MBean interface and its implementation to add the attribute or change to set other existing attributes. If the attribute exists but is not visible to the partition, annotate the attribute with @VisibleToPartitions ALWAYS.

BEA-149530
Cannot invoke the operation "{0}" on MBean "{2}" from partition "{1}". Either the MBean does not contain the operation or the operation is not visible to the partition.

Category:
JMX

Cause:
The MBean does not contain the operation or the operation is not visible to the partition.

Action:
If the operation does not exist in the MBean, either change the MBean interface and its implementation to add the operation or invoke other existing operations. If the operation exists but is not visible to the partition, annotate the operation with @VisibleToPartitions ALWAYS.

BEA-149531
Cannot find the MBean "{0}" in partition "{1}".

Category:
JMX

Cause:
The MBean is not visible to partitions.

Action:
The MBean is not registered correctly or the MBean needs to be annotated with @VisibleToPartitions ALWAYS.

BEA-149532
The MBean "{0}" contains a different Partition key property value in the ObjectName: found "{1}", should be "{2}".

Category:
JMX

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The MBean ObjectName is not correct.

Action:
Provide an MBean ObjectName that is owned by the current partition.

BEA-149533
Cannot invoke the operation "{0}" on MBean "{2}" from partition "{1}" because one or more of the MBean operation parameters is not visible to partitions: {3}

Category:
JMX

Cause:
The MBean passed in as an operation parameter is not visible to partitions.

Action:
Annotate the MBean passed in as an operation paramter with @VisibleToPartitions ALWAYS.

BEA-149534
An exception occurred while calling queryNames for all mBeans from Managed Server: {0}.

Category:
JMX

Cause:
The size of the result of call queryNames for all mBeans exceeds the configured Maximum Message Size for the Administration Server.

Action:
Increase the Maximum Message Size configured for the Administration Server, or disable the indicated Managed Server notifications by using the property weblogic.management.disableManagedServerNotifications=true.

BEA-149535
JMX Resiliency Activity Server={0} : {1}

Category:
JMX

Cause:
Refer to the embedded info fore more details.

Action:
Refer to the embedded info for more details.

BEA-149536
Received a connect event for a server : {0} to establish JMX Connectivity, which does not exist in the domain configuration. It will be ignored.

Category:
JMX

Cause:
A managed server is RUNNING while it has been deleted from domain configuration in offline mode on admin server machine.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Validate the domain configuration, and shutdown the managed server.

BEA-149601
The deployment framework was unable to resume accepting requests.

Category:
Deployer

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-149603
The deployment framework was unable to cleanly shut down.

Category:
Deployer

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-149605
Failed to create App/Comp MBeans for AppDeploymentMBean {0}. Error - {1}.

Category:
Deployer

Cause:
An error was found in the AppDeploymentMBean.

Action:
Reconfigure the AppDeploymentMBean.

BEA-149606
Failed to configure deployment MBean for {0}.

Category:
Deployer

Cause:
An error was found while configuring a deployment MBean.

Action:
Review the application and reconfigure it.

BEA-149607
Failed to persist state for deployment with name {0}. {1}

Category:
Deployer

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
See the exception for more details on the cause of this problem.

Action:
See the exception. Undeploy and deploy after correcting the problem.

BEA-149608
Unknown type of deployable: "{0}"

Category:
Deployer

Cause:
The type of deployable: "{0}" is unknown.

Action:
See the exception and check for preceding messages in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149609
AppRuntimeStateRuntime only available on the Administration Server.

Category:
Deployer

Cause:
AppRuntimeStateRuntime only available on the Administration Server.

Action:
Ensure that the Administration Server is running and check for preceding messages in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149610
Problems were encountered while creating the persistent store.

Category:
Deployer

Cause:
An exception occurred: {0}

Action:
See the exception and check for preceding messages in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149611
Problems were encountered while creating the persistent store.

Category:
Deployer

Cause:
An exception occurred: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
See the exception and check for preceding messages in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149612
Problems were encountered while saving to the persistent store for "{0}".

Category:
Deployer

Cause:
{1}

Action:
See the exception and check for preceding messages in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149613
Problems were encountered while deleting from the persistent store for "{0}".

Category:
Deployer

Cause:
{1}

Action:
Check for preceding messages in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149614
There were problems during the server disconnect for listener "{0}". {1}

Category:
Deployer

Cause:
{1}

Action:
Check for preceding messages in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149615
Unrecognized type: "{0}".

Category:
Deployer

Cause:
There was an unrecognized type: "{0}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check for preceding messages in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149616
A critical internal application {0} was not deployed. Error: {1}

Category:
Deployer

Cause:
The cause of this error is unknown.

Action:
Check for preceding conflict start message in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-149617
Non-critical internal application {0} was not deployed. Error: {1}

Category:
Deployer

Cause:
An internal application may not have been installed.

Action:
Install the WebLogic Server internal application by running the WebLogic Server installer and choosing the relevant option.

BEA-149618
Unable to deploy an internal management Web application - {0}. Managed Servers may be unable to start.

Category:
Deployer

Cause:
WebLogic Server was unable to find the relevant WAR files in RootDirectory/lib. This might also be an internal failure. See the exception stack trace for more details.

Action:
If you are not running the server from the directory where WebLogic Server was installed, ensure that the value of the provided RootDirectory matches the directory where the WebLogic Server product was installed. Verify that a file with the application name in the log message (with a .war extension) is present in RootDirectory/lib. If not, contact My Oracle Support.

BEA-149619
The deletion of configuration file {0} failed.

Category:
Deployer

Cause:
An error occurred while deleting the file.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that no processes have the file open for write. Ensure that the permissions on the directory allow for delete of this file.

BEA-149621
An error occurred while the Administration Server was performing configuration recovery. Error is : "{0}".

Category:
Deployer

Cause:
See the exception details for the cause.

Action:
Stop the server and do configuration recovery manually.

BEA-149622
Could not get file lock used to serialize access to configuration files due to {0}.

Category:
Deployer

Cause:
The lock could not be obtained before the specified timeout period has elapsed.

Action:
Verify the configuration files and ensure no server has hung, thereby not releasing the lock.

BEA-149623
Unable to create DeploymentManagerMBean.

Category:
Deployer

Cause:
This may occur if an error at the JMX level exists.

Action:
Report this problem to Oracle Customer Support.

BEA-150000
An error occurred while establishing a connection back to the Adminstration Server {0} during startup. Since bootstrap succeeded, check that {0} uniquely identifies the Administration Server.

Category:
Configuration Management

Cause:
An improper Administration Server URL has been specified, or the Administration Server is not available at the specified URL. Commonly this is because the Managed Server shares an adminstration URL with the Administration Server. Another possibility is that the host identified by {0}, or the local host, is not configured properly. For instance, an /etc/hosts or DNS lookup on the hostname results in a loopback address.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify that the URL specified for the Administration Server is valid, unique and that the Administration Server is available and listening at the specified URL. A common problem is that the administration port is enabled and both the Administration Server and Managed Server are running on the same machine. In this instance a different administration port should be selected for the Managed Server. Another possibility is that the host identified by {0}, or the local host, is not configured properly. For instance, an /etc/hosts or DNS lookup on the hostname results in a loopback address.

BEA-150001
An error occurred while connecting to the Administration Server to bootstrap through the URL: {0}, user: {1}.

Category:
Configuration Management

Cause:
The Administration Server might currently be unavailable or the specified URL: {0} or username: {1} might be invalid.

Action:
Confirm that the designated Administration Server is running and that the specified URL: {0} and username: {1} are valid for this configuration.

BEA-150014
The Managed Server Independence feature is disabled for this server ({0}).

Category:
Configuration Management

Cause:
The specified Administration Server is either incorrect or not reachable on the network.

Action:
Ensure that the Administration Server is running and reachable by this server, or set the ManagedServerIndependenceEnabled attribute on this server to true.

BEA-150018
This server is being started in Managed Server independence mode in the absence of the Administration Server.

Category:
Configuration Management

Cause:
The Managed Server was unable to communicate with the Adminstration Server at the provided URL because the specified Administration Server either was not running or was partitioned.

Action:
Restart the Administration Server with Managed Server discovery enabled so that the running Managed Server can synchronize its configuration with the Administration Server and become centrally managed.

BEA-150020
The Managed Server could not reach the Administration Server at {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration Management

Cause:
The Managed Server was given a URL on which the Administration Server could not be contacted.

Action:
Inspect the Administration Server address:port provided to the Managed Server that is being started. This address should be changed to point to the Administration Server rather than resolving locally on the Managed Server.

BEA-150021
The Administration Server failed to authenticate the identity of the user {0} starting the Managed Server. The reason for the error is {1}.

Category:
Configuration Management

Cause:
The username and password combination was not correct.

Action:
Inspect the username and password of the user starting the Managed Server and supply the correct credentials. The username and password are specified on startup with -Dweblogic.management.username and -Dweblogic.management.password command line options to the java weblogic.Server command.

BEA-150024
The server name {0} is being started again as a Managed Server.

Category:
Configuration Management

Cause:
The Administration Server is being started as the Managed Server.

Action:
Specify a different server name to start.

BEA-150026
The server {0} being started is at an invalid release level {1} with respect to the Administration Server {2}. The major version of the Administration Server must be less than or equal to the major version of the Managed Server.

Category:
Configuration Management

Cause:
A Managed Server of a different major release is attempting to start from the Administration Server.

Action:
Point the Managed Server to an Administration Server at the correct release level.

BEA-150027
Server name {0} not found in domain {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration Management

Cause:
A Managed Server is started with -Dweblogic.Name with a value that was not configured in the domain.

Action:
Specify the correct value of the parameter -Dweblogic.Name.

BEA-150028
A security failure or an exception occurred when retrieving the bootstrap information for the Managed Server.

Category:
Configuration Management

Cause:
An invalid username and password might have been supplied while starting the Managed Server.

Action:
Supply the correct credentials. Take corrective action based on the exception details.

BEA-150032
The Managed Server did not provide any version details at initial contact.

Category:
Configuration Management

Cause:
A Managed Server of a different major and minor release is attempting to start from the Administration Server.

Action:
Point the Managed Server to an Administration Server at the correct release level.

BEA-150034
An attempt was made to download the configuration for the server {0} without the required credentials.

Category:
Configuration Management

Cause:
This should not happen during normal operations and may represent an attempt to compromise the server.

Action:
Identify the server from which the connection was made and ensure that the username and password are being properly specified.

BEA-150035
An attempt was made to download the configuration for the server {0} by the user {1} with an invalid password.

Category:
Configuration Management

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This should not happen during normal operations and may represent an attempt to compromise the server.

Action:
Identify the server from which the connection was made and ensure that the username and password are being properly specified.

BEA-150036
An attempt was made to download the configuration for the server {0} by the unauthorized user {1}.

Category:
Configuration Management

Cause:
This should not happen during normal operations and may represent an attempt to compromise the server.

Action:
Identify the server from which the connection was made and ensure that the username and password are being properly specified.

BEA-150038
A configuration file was found in the parent directory {0}, but the root directory is empty.

Category:
Configuration Management

Cause:
This message indicates that a configuration file exists in the parent of the root directory.

Action:
If the specified root directory is not correct, then take appropriate action. Otherwise, this message may be ignored.

BEA-150039
The server name could not be determined.

Category:
Configuration Management

Cause:
The name was not specified or the specified name does not exist in the config.xml file.

Action:
Specify the correct value of the parameter -Dweblogic.Name.

BEA-150041
The server name {0} is unknown to the Administration Server. Check if restart is required.

Category:
Configuration Management

Cause:
The -Dweblogic.Name command line property specifies a server that does not exist in the configuration that is active on the Administration Server. This can occur if the Managed Server

Copyright © 2000, 2026, Oracle and/or its affiliates.

was added to the configuration along with non-dynamic changes that affect the Administration Server. In this case, the Administration Server must be restarted.

Action:
Check to see if the Administration Server is marked as needing a restart. If it is, then restart the Administration Server before trying to start this Managed Server. Check the configuration for the list of configured servers.

BEA-150042
The -Dweblogic.management.server value of {0} does not specify a port that has administrator privileges. Change the startup command to specify a -Dweblogic.management.server value of {1}. This server will remain in Managed Server independence mode until it is started with a port that has administrator privileges.

Category:
Configuration Management

Cause:
The specified Administration Server port does not support the administrator traffic required to allow the Managed Server to communicate with the Administration server.

Action:
Change the -Dweblogic.management.server property to specify a port that has administator privileges.

BEA-150043
Cannot delete server {0} in domain {1} while the server is running. Please shut down the server in order to delete the server.

Category:
Configuration Management

Cause:
An attempt was made to delete a static or dynamic Managed Server while it was still running.

Action:
Shut down the server and retry the change that deleted the server.

BEA-150044
The protection domain of class {1} does not have permission to inject a service from descriptor {0}. The protection domain is {2} and the permission is {3}.

Category:
Configuration Management

Cause:
A service does not have permission to inject a service that was found for it. The creation of the service will fail if no other appropriate service can be found to satisfy the injection point.

Action:
Ensure that the protection domain of the class has rights to the specified permission.

BEA-150045
Edit session name {0} contains illegal character(s) and cannot be used. Choose a different name.

Category:
Configuration Management

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The specified edit session name does not meet the criteria for this component. It contains illegal character(s).

Action:
Choose a different name.

BEA-150046
An edit session named {0} already exists. Choose a different name.

Category:
Configuration Management

Cause:
You attempted to create two edit sessions with the same name.

Action:
Choose a different name.

BEA-150048
Cannot destroy default edit session.

Category:
Configuration Management

Cause:
You attempted to destroy the default edit session.

Action:
Use a named edit session.

BEA-150049
The JMS server named {0} has a temporary template configured. The JMSSystemResourceMBean name of the module containing the temporary template is {1}, and the template name is {2}. However, a JMSSystemResourceMBean of name {1} could not be found. The JMS server {0} will not boot until this problem has been fixed.

Category:
Configuration Management

Cause:
The temporary template for a JMS server must come from a JMSSystemResourceMBean. A common mistake is to put the temporary template into an AppDeployment. However, because the temporary template must be owned by the administrator, all temporary templates must come from JMSSystemResourceMBeans, not AppDeployments.

Action:
Put the temporary template into a JMSSystemResource.

BEA-150050
Cannot destroy DOMAIN partition.

Category:
Configuration Management

Cause:
You attempted to destroy DOMAIN partition. This is not a valid operation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Use a named edit session.

BEA-150051
Cannot remove edit session. This edit session belongs to a different partition.

Category:
Configuration Management

Cause:
Entities from other partitions cannot be operated on in an edit session for a given partition.

Action:
Review the management request.

BEA-150052
Edit session {0} is locked by user {1} and cannot be deleted. Administrator permissions required.

Category:
Configuration Management

Cause:
The edit session is currently being edited.

Action:
Review the management request or use force=true while logged in as an administrator.

BEA-150053
Edit session {0} is locked by user {1} and cannot be deleted. Use destroyEditSession("{0}", force = true) to override.

Category:
Configuration Management

Cause:
The edit session is currently being edited.

Action:
Review management request or use force=true.

BEA-150054
Edit session {0} contains changes pending activation. Destroy edit session command has been aborted. Use destroyEditSession("{0}", force = true) to force the destroy operation.

Category:
Configuration Management

Cause:
The edit session contains changes that are pending activation.

Action:
Review the management request or use force=true.

BEA-150055
Edit session {0} was created by user {1}. Administrator permissions required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration Management

Cause:
The caller is not the creator of the edit session.

Action:
Review the management request or use force=true while logged in as an administrator.

BEA-150056
Edit session {0} was created by user {1}. Destroy edit session command has been aborted. Use destroyEditSession("{0}", force = true) to force the destroy operation.

Category:
Configuration Management

Cause:
The caller is not the creator of the edit session.

Action:
Review the management request or use force=true.

BEA-150057
A failure has occurred during service lookup, bind or unbind from descriptor {0} using permission {1} with: {2}

Category:
Configuration Management

Cause:
The operation being performed does not have permission to lookup, bind or unbind the service descriptor.

Action:
Carefully read the returned error to determine what action is required.

BEA-150058
The Restart In Place setting of Persistent Store "{0}" is configured to True and will be ignored. This setting is ignored when a store is directly targeted to a server within a cluster or is targeted to a migratable target. If a store is targeted to a migratable target, you can tune restart in place on the migratable target itself instead of on the store.

Category:
Configuration Management

Cause:
RestartInPlace is not supported when the store is targeted to a Single Server within a Cluster.

Action:
No action is required.

BEA-150059
RestartInPlace of ReplicatedStore {0} is configured to True, which is invalid and will be ignored, when the store is targeted to a Single Server or its Migration Policy is Off

Category:
Configuration Management

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
ReplicatedStore doesn't support RestartInPlace when the store is targeted to a Single Server or its Migration Policy is Off.

Action:
No action is required.

The ejb-link resolves to an EJB which does not expose interfaces compatible with the ref type.

Action:
Ensure that the target of the ejb-link is correct. If it is, either add component interfaces to this EJB that are compatible with the ref type or change the ref type to be compatible with the interfaces exposed by the target EJB.

BEA-160095
Warning: The {0} "{1}" for EJB "{2}" in the module "{3}" has an invalid {4} element value "{5}". The target bean does not declare that {4} interface. Ensure that the values are correct.

Category:
J2EE

Cause:
The home or component interface name in the ejb-ref or ejb-local-ref does not match the home or component interface name of the target EJB.

Action:
Ensure that the target of the ejb-link is correct. If it is, fix the ejb-ref or ejb-local-ref so that the names of the home and component interfaces match the names of the home and component interfaces of the target EJB.

BEA-160096
Warning: The {0} "{1}" in the module "{2}" has an invalid {3} element value "{4}". The target bean does not declare that {3} interface. Ensure that the values are correct.

Category:
J2EE

Cause:
The home or component interface name in the ejb-ref or ejb-local-ref does not match the home, component or business interface name of the target EJB.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the target of the ejb-link is correct. If it is, fix the ejb-ref or ejb-local-ref so that the names of the home and component interfaces match the names of the home and component interfaces of the target EJB.

BEA-160098
Unable to parse the file "{0}" because it uses an invalid encoding name, "{1}". All deployment descriptors must use an IANA or Java encoding name. Change the encoding of the descriptor to be a supported encoding.

Category:
J2EE

Cause:
The encoding name used by the deployment descriptor is not supported.

Action:
Change the encoding name of the deployment descriptor to an IANA or Java encoding name.

BEA-160100
Could not deploy role: {0} for application: {1}.

Category:
J2EE

Cause:
The application could not deploy the role defined in application.xml.

Action:
Ensure that the security is configured properly in the server. Also, check the stack trace for the exact cause.

BEA-160101
Error: The ejb-link "{0}" declared in the ejb-ref or ejb-local-ref "{1}" in the application module "{2}" could not be resolved. The target EJB for the ejb-ref could not be found. Ensure that the link is correct.

Category:
J2EE

Cause:
The target of the ejb-link could not be found in the application.

Action:
Fix the ejb-link to point to a valid EJB.

BEA-160104
Invalid local reference in application {0}. A local reference from module {1} to {2} is not allowed because the referencing module does not have visibility to the classes of the referenced module.

Category:
J2EE

Cause:
The current module does not have visibility to the classloader of the EJB being referenced.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Look at the classloader organization defined by the classloader-structure element in weblogic-application.xml and ensure that the calling module is either using the same classloader as the module containing the referenced EJB or that the calling module is using a classloader that is an offspring of the classloader of the EJB module.

BEA-160106
ERROR: The source file, "{0}", could not be found.

Category:
J2EE

Cause:
The source file could not be found.

Action:
Ensure that the specified source file exists and try again.

BEA-160108
ERROR: Error accessing input file "{0}": {1}

Category:
J2EE

Cause:
The source file could not be accessed.

Action:
Ensure that the source file is accessible and try again.

BEA-160109
ERROR: Error copying files to the directory "{0}": {1}

Category:
J2EE

Cause:
The compiler was unable to extract the source archive to a directory. This can be caused by a lack of permission to write to the directory or a lack of disk space.

Action:
Ensure that the directory is writable and that there is enough free disk space to extract the archive. Alternatively, manually extract the archive to a directory and specify the directory name as the appc argument instead of the archive.

BEA-160110
ERROR: appc could not create the working directory, "{0}". Ensure that this directory can be created and try again.

Category:
J2EE

Cause:
A directory was specified in the appc command and it could not be created. appc will not be able to finish compiling the application because of this.

Action:
Ensure that the directory can be created and try again.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-160111
ERROR: appc can not write to the working directory, "{0}". Ensure that you have write permission for this directory and try again.

Category:
J2EE

Cause:
The specified directory is not writable.

Action:
Ensure that the directory is writable and try again.

BEA-160112
Error: The directory, "{0}", does not contain a valid module. If the directory represents an EAR file, it must contain a META-INF/application.xml file. If the directory represents an ejb-jar file, it must contain a META-INF/ejb-jar.xml file. If the directory represents a WAR file, it must contain a WEB-INF/web.xml file. Ensure that the source directory is a valid module and try again.

Category:
J2EE

Cause:
The specified directory does not contain a valid module to compile.

Action:
Ensure that the specified source directory contains a valid module and try again.

BEA-160113
Error: The source file, "{0}", is not a valid ejb-jar file. To be valid, it must contain a META-INF/ejb-jar.xml file.

Category:
J2EE

Cause:
The specified source file is not a valid ejb-jar file.

Action:
Ensure that the specified source file is a valid ejb-jar file and try again.

BEA-160114
Error: The source file, "{0}", is not a valid WAR file. To be valid, it must contain a WEB-INF/web.xml file.

Category:
J2EE

Cause:
The specified source file is not a valid WAR file.

Action:
Ensure that the specified source file is a valid WAR file and try again.

BEA-160115
Error: The source file, "{0}", is not a valid EAR file. To be valid, it must contain a META-INF/application.xml file.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
J2EE

Cause:
The specified source file is not a valid EAR file.

Action:
Ensure that the specified source file is a valid EAR file and try again.

BEA-160117
appc is unable to continue processing file "{0}": {1}

Category:
J2EE

Cause:
An error occurred while processing the specified source file.

Action:
Find the cause of the exception and take any necessary steps to remedy it.

BEA-160118
appc is unable to continue processing the file "{0}". The following error occurred while accessing it: {1}

Category:
J2EE

Cause:
An error occurred while processing the specified source file.

Action:
Find the cause of the exception and take any necessary steps to remedy it.

BEA-160119
appc is unable to process the file "{0}". The following error occurred: {1}

Category:
J2EE

Cause:
An error occurred while processing the specified source file.

Action:
Find the cause of the exception and take any necessary steps to remedy it.

BEA-160120
Error: The module, "{0}", is declared either in the application.xml or in the weblogic-application.xml descriptor but cannot be found in the EAR file.

Category:
J2EE

Cause:
The specified module cannot be found in the EAR file.

Action:
Ensure that either the application.xml or the weblogic-application.xml declaration is correct.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-160121
Errors encountered while compiling module "{0}": {1}

Category:
J2EE

Cause:
Errors were encountered while compiling the specified module.

Action:
Investigate the specific errors and take any recommended actions.

BEA-160122
Errors validating EAR file: {0}

Category:
J2EE

Cause:
Errors were encountered while validating the EAR file.

Action:
Investigate the specific errors and take any recommended actions.

BEA-160123
ERROR: Could not create output archive, "{0}", restoring previous archive. The error was: {1}

Category:
J2EE

Cause:
An error occurred while creating the output archive.

Action:
Investigate the specific error and take any necessary actions.

BEA-160124
ERROR: Could not create output archive "{0}". The error was: {1}

Category:
J2EE

Cause:
An error occurred while creating the output archive.

Action:
Investigate the specific error and take any necessary actions.

BEA-160125
ERROR: Could not delete old backup file: {0}.

Category:
J2EE

Cause:
An old backup file could not be removed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Determine why the old backup file could not be deleted and remedy the problem. Manually deleting the old backup file prior to running appc should fix this issue.

BEA-160126
ERROR: Could not create backup file "{0}". The error was: {1}

Category:
J2EE

Cause:
The specified backup file could not be created.

Action:
Determine why the backup file could not be created and remedy the problem. In particular, ensure that you have write permission to the specified file and that the disk is not full.

BEA-160127
ERROR: Could not delete previous archive: {0}

Category:
J2EE

Cause:
The specified archive could not be removed.

Action:
Determine why the archive could not be deleted and remedy the problem. In particular, ensure that you have permission to modify the specified file.

BEA-160128
ERROR: Incorrect appc command. Too many arguments were given. The appc command only takes a single argument, the source file, in addition to the supported options.

Category:
J2EE

Cause:
Too many arguments were specified in the appc command.

Action:
Correct the command and try again.

BEA-160129
ERROR: The alt-dd "{0}", specified for application module "{1}", could not be found. Remove the alt-dd entry from the application.xml descriptor or ensure that it points to a valid deployment descriptor.

Category:
J2EE

Cause:
The specified alt-dd could not be found.

Action:
Remove the invalid alt-dd entry from application.xml or ensure that it points to a valid deployment descriptor.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-160130
ERROR: The application level alt-dd "{0}", specified in the appc command, could not be found. Ensure that the alt-dd points to a valid deployment descriptor or remove it from the command line.

Category:
J2EE

Cause:
The specified alt-dd could not be found.

Action:
Correct or remove the invalid alt-dd setting in the appc command.

BEA-160132
Warning: The {0} "{1}" for EJB "{2}" in the module "{3}" has an ejb-ref-type of {4} but the ejb-link does not resolve to an EJB of that type. Ensure that the ejb-link and ejb-ref-type are correct.

Category:
J2EE

Cause:
The ejb-ref or ejb-local-ref resolves to an EJB of a different type than is declared in the ejb-ref.

Action:
Ensure that the ejb-ref or ejb-local-ref resolves to the correct EJB. Once this is verified, ensure that the ejb-ref-type declared in the ejb-ref corresponds to the type of EJB being referred to.

BEA-160133
Warning: The {0} "{1}" in the module "{2}" has an ejb-ref-type of {3} but the ejb-link does not resolve to an EJB of that type. Ensure that the ejb-link and ejb-ref-type are correct.

Category:
J2EE

Cause:
The ejb-ref or ejb-local-ref resolves to an EJB of a different type than is declared in the ejb-ref.

Action:
Ensure that the ejb-ref or ejb-local-ref resolves to the correct EJB. Once this is verified, ensure that the ejb-ref-type declared in the ejb-ref corresponds to the type of EJB being referred to.

BEA-160134
Error: The EJB with the name "{0}" in ear module "{1}" has an entity-cache-ref with the name "{2}" in its weblogic-ejb-jar.xml descriptor but no application level entity cache with that name is defined in the weblogic-application.xml descriptor for the application.

Category:
J2EE

Cause:
The entity-cache referred to by the EJB could not be found.

Action:
Ensure that the entity-cache-ref is correct in the weblogic-ejb-jar.xml descriptor for the EJB. Also, ensure that an entity-cache with the same name is declared in the weblogic-application.xml descriptor for the application.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-160137
Error: The message-destination-link "{0}" declared in the message-destination-ref "{1}" in the application module "{2}" could not be resolved. The target message-destination for the message-destination-ref could not be found. Ensure that the link is correct.

Category:
J2EE

Cause:
The target of the message-destination-link could not be found in the application.

Action:
Fix the message-destination-link to point to a valid message-destination.

BEA-160138
Could not set active version state for application: {0}.

Category:
J2EE

Cause:
See the message detail.

Action:
Contact My Oracle Support.

BEA-160139
The following library reference has "context-path" set, which has no effect when referencing a {1} library: {0}.

Category:
J2EE

Cause:
The library reference has "context-path" set, but is not referencing a WAR library.

Action:
Remove "context-path" from the library reference.

BEA-160140
Unresolved optional package references (in META-INF/MANIFEST.MF): {0}. Ensure that the referenced optional package has been deployed as a library.

Category:
J2EE

Cause:
One or more MANIFEST.MF files contain references to optional packages (using the Extension-List attribute). One or more of the referenced optional packages are not available.

Action:
Register the required optional packages or remove the reference(s) from the manifest(s).

BEA-160141
Could not initialize the library {0}. Ensure that the deployment unit is a valid library type (WAR, EJB, EAR, plain JAR). {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
J2EE

Cause:
Refer to the exception in the message body.

Action:
Examine the stack trace.

BEA-160142
The library at {0} has an illegal Specification-Version: {1}. The Specification-Version must be a valid version string: int(.int)*, int >=0; for example: 2.1.1

Category:
J2EE

Cause:
The Specification-Version for the library at {0} cannot be parsed.

Action:
Fix the library Specification-Version to conform to the required version string syntax.

BEA-160143
Library {0} has an illegal Specification-Version: {1}. The Specification-Version must be a valid version string: int(.int)*, int >=0. For example: 2.1.1.

Category:
J2EE

Cause:
The library cannot be statically deployed because its MBean has an invalid Specification-Version.

Action:
Undeploy the library and deploy it again with a correct Specification-Version.

BEA-160144
Failed to register library {0}: {1}

Category:
J2EE

Cause:
The error is: {1}

Action:
Examine the error message.

BEA-160145
Failed to deploy library {0}, because of conflicting library Manifest values, and library information registered with the server: {1}. Check the library MANIFEST.MF file and correct version information there to match server settings, or undeploy the misconfigured library.

Category:
J2EE

Cause:
Conflict between library manifest values and library settings in the LibraryMBean.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the library MANIFEST.MF file and correct the version information there to match server settings, or undeploy the misconfigured library.

BEA-160146
Failed to process library at {0}, because of conflicting library manifest values and the library information provided on the appc command line: {1}.

Category:
J2EE

Cause:
There was a conflict between the library manifest values and the library information provided on the appc command line.

Action:
Avoid setting the library name and version information on the appc command line if its already set in the manifest or remove values from the manifest and set them on the appc command line.

BEA-160147
One or more libraries could not be processed. See error above.

Category:
J2EE

Cause:
See error above.

Action:
See error above.

BEA-160148
These libraries were not referenced by the compiled application: {0}.

Category:
J2EE

Cause:
The compiled application did not reference the libraries that were passed to appc.

Action:
These libraries do not need to be passed to appc to compile this particular application.

BEA-160149
Error while processing library references. {0}

Category:
J2EE

Cause:
The application has library references that do not resolve.

Action:
Ensure that the library references are accurate and that the required libraries are available.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-160150
A library reference in weblogic-application.xml has an illegal Specification-Version: {0}. The Specification-Version must be a valid version string: int(.int)*, int >=0; example: 2.1.1

Category:
J2EE

Cause:
The Specification-Version of a library reference in weblogic-application.xml cannot be parsed.

Action:
Fix the library Specification-Version in weblogic-application.xml to conform to the required version string syntax.

BEA-160151
Registered library {0}.

Category:
J2EE

Cause:
Library registration was successful.

Action:
No action is required.

BEA-160152
The library at {0} was not recognized as a valid library type.

Category:
J2EE

Cause:
The library at {0} was not recognized as a valid library type.

Action:
Ensure that the library is one of the supported library types.

BEA-160153
Error while cleaning up library {0}: {1}

Category:
J2EE

Cause:
Error while cleaning up library {0}: {1}

Action:
Examine the stack trace.

BEA-160154
Error while cleaning up library: {0}. {1}

Category:
J2EE

Cause:
Error while cleaning up library: {0}. {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Examine the stack trace.

BEA-160155
Cannot find library at: {0}.

Category:
J2EE

Cause:
{0} is not a file.

Action:
Fix the path to the library.

BEA-160156
Cannot process libdir: {0} is not a directory.

Category:
J2EE

Cause:
{0} is not a directory.

Action:
Fix the path to libdir.

BEA-160157
The referenced library, {0}, is not a supported application library.

Category:
J2EE

Cause:
{0} is not a supported application library.

Action:
Remove the reference to library {0} from weblogic-application.xml.

BEA-160158
Ignoring Extension-List reference {0}, because the manifest does not have an entry for {0}-Extension-Name. The manifest is at {1}/META-INF/MANIFEST.MF

Category:
J2EE

Cause:
A declared Extension-List name does not have the required Extension-Name entry.

Action:
Remove {0} from the Extension-List or add {0}-Extension-Name entry into the manifest.

BEA-160159
Bad optional package reference in manifest at {2}/META-INF/MANIFEST.MF, for optional package with Extension-Name: {0}. Illegal Specification-Version: {1}. The Specification-Version must be a valid version string: int(.int)*, int >=0; example: 2.1.1. Ignoring this Optional Package reference.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
J2EE

Cause:
Cannot parse the Specification-Version of an optional package reference.

Action:
Change the optional package reference Specification-Version to the required version string syntax.

BEA-160161
Error while parsing the application descriptors for {0}: {1}.

Category:
J2EE

Cause:
The cause is {1}

Action:
Examine the error message.

BEA-160162
No META-INF/application.xml was found in the EAR at {0}.

Category:
J2EE

Cause:
The application.xml file could not be found.

Action:
Ensure that the path to the EAR file is correct and add the missing application.xml.

BEA-160163
No modules were found in application.xml for EAR: {0}. Nothing to do.

Category:
J2EE

Cause:
There are no modules in this EAR's application.xml

Action:
Add module entries to the EAR's application.xml.

BEA-160164
Error while importing library {0}: {1}

Category:
J2EE

Cause:
See the exception: {1}.

Action:
Examine the stack trace.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-160165
The EAR library at {0} is organized using the splitdir directory structure. splitdir is not supported for libraries.

Category:
J2EE

Cause:
splitdir is not supported for EAR libraries.

Action:
Archive this library. If a build file was generated using BuildXMLGen, run the EAR target in that file.

BEA-160166
References were found in the deployment plan for module "{0}" with URI, "{1}". The plan was merged.

Category:
J2EE

Cause:
This is an informational message.

Action:
No action is required.

BEA-160167
The module {1} in application {0} uses ejb-links but no EJB modules were found for this application.

Category:
J2EE

Cause:
The ejb-links must correspond to an EJB module deployed within the same application.

Action:
Ensure that the EJB modules to which you intended to link exist and have been configured properly.

BEA-160168
An error occurred while merging descriptors: {0}

Category:
J2EE

Cause:
An error occurred while merging descriptors. Check the stack trace.

Action:
Check the stack trace.

BEA-160169
An error occurred while parsing descriptors: {0}

Category:
J2EE

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred while parsing descriptors.

Action:
Check the stack trace.

BEA-160170
Imported library {0} for Application {1}

Category:
J2EE

Cause:
This is an information message.

Action:
No action is required.

BEA-160171
ERROR: The plan file, "{0}", could not be found.

Category:
J2EE

Cause:
The plan file could not be found.

Action:
Ensure that the specified plan file exists and try again.

BEA-160172
ERROR: To run appc, specify a plan file ending with the suffix .xml.

Category:
J2EE

Cause:
The plan file type is not supported.

Action:
Correct the plan argument and try again.

BEA-160173
ERROR: Error accessing input file "{0}": {1}

Category:
J2EE

Cause:
The plan file could not be accessed.

Action:
Ensure that the plan file is accessible and try again.

BEA-160174
ERROR: Failed to parse deployment plan "{0}": {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
J2EE

Cause:
The plan file could not be parsed.

Action:
Resolve parse errors in the plan and retry.

BEA-160175
ERROR: Could not find JMS module of name "{2}" specified in the resource-link named "{3}" in the "{1}" component named "{0}".

Category:
J2EE

Cause:
The JMS module used in the resource-link cannot be found in the application package.

Action:
Package the missing JMS module as part of this application and retry.

BEA-160176
ERROR: Could not find the JMS resource named "{4}" of type "{5}" inside the JMS module "{2}" that is specified in the resource-link named "{3}" in the "{1}" component named "{0}".

Category:
J2EE

Cause:
The JMS resource used in th resource-link was not found in the application package.

Action:
Create the missing JMS resource in the corresponding JMS module and retry.

BEA-160177
The application at "{0}" was not recognized as a valid application type. If this is an EAR file, please ensure the META-INF/application.xml exists. EJB-JARs should have a META-INF/ejb-jar.xml or corresponding annotations exist. If this is an exploded WAR, the name of directory must be end with ".war". RARs require a META-INF/ra.xml. A JMS deployment should be an XML file whose name ends with "-jms.xml". A JDBC deployment should be an XML file whose name ends with "-jdbc.xml". For other application types, consult the WebLogic Server documentation.

Category:
J2EE

Cause:
The application was not a valid J2EE application.

Action:
Correct the application and try again.

BEA-160180
An error was encountered and ignored while rolling back an update to application {0}. The error was: {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
J2EE

Cause:
See the included error message.

Action:
Correct the application based on the reported error.

BEA-160181
An error was encountered and ignored during undeployment. The error was: {0}

Category:
J2EE

Cause:
See the included error message.

Action:
Correct the application based on the reported error.

BEA-160182
An error was encountered and ignored during transition to administration mode. The error was: {0}

Category:
J2EE

Cause:
See the included error message.

Action:
Correct the application based on the reported error.

BEA-160183
Unable to find the jar-uri: {1} specified for the ApplicationLifecycleListener, Startup, or Shutdown class in the weblogic-application.xml of application: {0}.

Category:
J2EE

Cause:
The JAR URI is incorrect or the file does not exist or cannot be read.

Action:
Correct the application based on the reported error.

BEA-160184
ERROR: Could not find JDBC module of name "{2}" specified in the resource-link named "{3}" in the "{1}" component named "{0}".

Category:
J2EE

Cause:
The JDBC module used in the resource-link was not found in the application package.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Package the missing JDBC module as part of this application and retry.

BEA-160185
ERROR: Could not find the JDBC resource named "{4}" of type "{5}" inside the JDBC module "{2}" that is specified in the resource-link named "{3}" in the "{1}" component named "{0}".

Category:
J2EE

Cause:
The JDBC resource used in the resource-link was not found in the application package.

Action:
Create the missing JDBC resource in the corresponding JDBC module and retry.

BEA-160186
Compiling EAR module "{0}"

Category:
J2EE

Cause:
This is an informational message.

Action:
No action is required.

BEA-160187
weblogic.appc failed to compile the application. Recompile with the -verbose option for more details about the issue.

Category:
J2EE

Cause:
Compilation can fail for many reasons. See the specific error message for details.

Action:
Use the provided error message to track down and fix the problem.

BEA-160188
{0}.

Category:
J2EE

Cause:
The application has library references that do not resolve.

Action:
Ensure that the library references are accurate and that the required libraries are available.

BEA-160189
There are no modules in the application that match URIs: {0}. Note that for Web applications, you should specify the context-root rather than the web-uri.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
J2EE

Cause:
The specified URIs were not found in the running application.

Action:
Specify the correct URIs which are typically found in your application's META-INF/application.xml.

BEA-160191
While upgrading weblogic.xml, the server encountered "{1}" parameter "{0}". This parameter has been deprecated and will be removed

Category:
J2EE

Cause:
This is a deprecated parameter.

Action:
Remove the deprecated parameter from the weblogic.xml deployment descriptor.

BEA-160192
While upgrading weblogic.xml, the server encountered "{1}" parameter "{0}". This parameter is unknown and will be removed

Category:
J2EE

Cause:
The parameter is not defined in the schema.

Action:
Check the weblogic.xml deployment descriptor and remove the parameter.

BEA-160193
Error: The source file, "{0}", is not a valid RAR file. To be valid, it must contain a META-INF/ra.xml file.

Category:
J2EE

Cause:
The specified source file is not a valid RAR file.

Action:
Ensure that the specified source file is a valid RAR file and try again.

BEA-160194
The following modules cannot be started because they are already running: {0}.

Category:
J2EE

Cause:
The specified modules are already running.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Remove the specified modules from the list of modules to partially stop.

BEA-160195
The application version lifecycle event listener {1} is ignored because the application {0} is not versioned.

Category:
J2EE

Cause:
The application is not a versioned application.

Action:
If the application is deployed as a non-versioned application in error, undeploy the current application and deploy it as a versioned application. If the application version lifecycle listener is specified in error, remove it from the application or specify a non-versioned application lifecycle listener.

BEA-160196
Unable to find the jar-uri: {1} specified for the Singleton class in the weblogic-application.xml of application: {0}

Category:
J2EE

Cause:
The JAR URI is incorrect or the file does not exist or cannot be read.

Action:
Correct the application based on the reported error.

BEA-160197
Unable to load descriptor {1} of module {0}. The error is {2}.

Category:
J2EE

Cause:
The descriptor is not valid.

Action:
Correct the descriptor based on the reported error.

BEA-160198
Error: The ejb-ref "{3}" configured via an @EJB annotation in the module "{0}" is linked to the EJB "{1}". However, the EJB "{1}" does not declare the interface "{2}", as specified by the @EJB annotation. Ensure that the ejb-ref is linked to the correct bean and that the target bean declares the interface specified by the ejb-ref.

Category:
J2EE

Cause:
The @EJB has an incorrect beanName (ejb-link) attribute or the target bean must implement the interface declared by the @EJB annotation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the ejb-ref is linked to the correct bean and that the target bean declares the interface specified by the ejb-ref.

BEA-160199
Error resolving ejb-ref "{0}" from module "{1}" of application "{2}". The ejb-ref does not have an ejb-link and the JNDI name of the target Bean has not been specified.

Category:
J2EE

Cause:
Attempts to automatically link the ejb-ref to its target Bean failed because multiple EJBs in the application were found to implement the "{3}" interface, including {4}.

Action:
Specify a qualified ejb-link for this ejb-ref to indicate which EJB is the target of this ejb-ref.

BEA-160200
Error resolving ejb-ref "{0}" from module "{1}" of application "{2}". The ejb-ref does not have an ejb-link and the JNDI name of the target bean has not been specified. Attempts to automatically link the ejb-ref to its target bean failed because no EJBs in the application were found to implement the "{3}" interface. Link or map this ejb-ref to its target EJB and ensure the interfaces declared in the ejb-ref are correct.

Category:
J2EE

Cause:
See the error message for details.

Action:
Link or map this ejb-ref to its target EJB and ensure the interfaces declared in the ejb-ref are correct.

BEA-160201
Error resolving ejb-ref "{0}" from module "{1}" of application "{2}". The ejb-ref specifies an ejb-link but the target bean does not implement the interface "{3}" as specified in the ejb-ref declaration. Ensure that the ejb-link and interface name(s) declared in the ejb-ref are correct.

Category:
J2EE

Cause:
See the error message for details.

Action:
Ensure that the ejb-link and interface name(s) declared in the ejb-ref are correct.

BEA-160202
You have specified a {1} setting in your configuration for persistence unit {0}. This setting will be ignored and all log messages will be sent to the WebLogic Server logging subsystem. Trace-level logging is controlled by the various JPA-specific debug settings in config.xml, or through the WebLogic Server Administration Console.

Category:
J2EE

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Persistence unit configuration specifies logging information, but WebLogic Server will ignore this information.

Action:
Remove the {1} setting from persistence unit {0}.

BEA-160203
You have specified a {1} setting in your configuration for persistence unit {0}. This value will be replaced with {1}.

Category:
J2EE

Cause:
The persistence unit configuration specifies ID information, but WebLogic Server will ignore this information.

Action:
Remove the {1} setting from persistence unit {0}.

BEA-160204
The ApplicationLifecycleListener "{1}" of application "{0}" has a run-as user configured with the principal name "{2}" but a principal of that name could not be found. Ensure that a user with that name exists.

Category:
J2EE

Cause:
The run-as principal configured for this ApplicationLifecycleListener does not exist in the security realm.

Action:
Ensure that the user exists or choose another principal for the run-as configuration.

BEA-160205
The ApplicationLifecycleListener "{1}" of application "{0}" has a run-as user configured with the principal name "{2}" but a principal of that name has higher privileges than the user performing the deployment. As a result, this deployment user cannot perform the current deployment action. Try the deployment action with an administrative privileged user.

Category:
J2EE

Cause:
Higher run-as privileges are needed to deploy an ApplicationLifecycleListener in this situation.

Action:
Try the deployment action with an administrative privileged user.

BEA-160207
Error autowiring ejb-ref "{0}" from module "{1}" of application "{2}". The ejb-ref does not specify an interfaceName but multiple interfaces on the target bean were found. Specify a beanInterface to indicate which EJB is the target for ejb-ref "{0}".

Category:
J2EE

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
There was a problem resolving the target of the specified ejb-ref.

Action:
Specify a beanInterface to indicate which EJB is the target.

BEA-160210
ERROR: The moduleUri, "{0}", could not be found.

Category:
J2EE

Cause:
The moduleUri could not be found.

Action:
Ensure that the specified moduleUri exists and try again.

BEA-160211
Waiting for ExecuteQueue {0} to finish {1} pending requests

Category:
J2EE

Cause:
The server found pending requests in one of the execute queues while suspending. The server will wait for the requests to complete.

Action:
No action is required.

BEA-160212
This is an unexpected exception.

Category:
J2EE

Cause:
See the message detail.

Action:
No action is required.

BEA-160213
This directory contains internal files used by the deployment system. Contents of this directory should never be removed while the corresponding server is running. Removing sub-directories when the server is down will slow down the subsequent deployment of the corresponding applications because these sub-directories need to be created again. The individual sub-directories are removed when the corresponding application is undeployed.

Category:
J2EE

Cause:
See the message detail.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-160214
Output location exists {0}

Category:
J2EE

Cause:
The file pointed to by the output location already exists,

Action:
No action is required.

BEA-160215
ERROR: The moduleUri, "{0}", is not Web module.

Category:
J2EE

Cause:
The moduleUri is not valid Web module.

Action:
Ensure that the specified moduleUri is a valid Web module and try again.

BEA-160216
Unexpected errors occurred while sending deployment event {1} on behalf of application "{0}".

Category:
J2EE

Cause:
The deployment event listener(s) registered to receive deployment event caused unexpected exceptions when processing deployment event {1} on behalf of application "{0}".

Action:
Report this problem to My Oracle Support.

BEA-160217
Unexpected errors occurred while sending a vetoable deployment event on behalf of application "{0}".

Category:
J2EE

Cause:
The deployment event listener(s) registered to receive vetoable deployment events caused unexpected exception(s) when processing deployment event {1} on behalf of application "{0}".

Action:
Report this problem to My Oracle Support.

BEA-160218
Filtering classloader configuration ignored for module {1} of application {0}

Category:
J2EE

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Filtering classloader configuration is only supported in descriptors at the main level of the deployment (for example, in enterprise applications or standalone Web applications). Such configuration is not supported in modules of an enterprise application.

Action:
Remove the filtering classloader configuration from the deployment descriptor of module {1} of application {0}.

BEA-160219
The JPA persistence unit {0} will use the following configured default persistence provider: {1}

Category:
J2EE

Cause:
No provider element was specified in the associated persistence.xml file.

Action:
No action is required unless you want a different JPA provider to be used for the given persistence unit, in which case you can specify the provider in the persistence.xml file or change the default provider for the domain.

BEA-160220
Compilation completed successfully.

Category:
J2EE

Cause:
The compilation task has completed successfully.

Action:
No action is required.

BEA-160221
env-entry for type java.lang.Character had length = 0.

Category:
J2EE

Cause:
See the error message body.

Action:
See the error message body.

BEA-160222
Could not create a new JMS ConnectionFactory for the application: {0}.

Category:
J2EE

Cause:
See the error message body.

Action:
See the error message body.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-160223
The resource-env-ref "{0}" declared in the standard descriptor or annotation has no JNDI name mapped to it. The resource-env-ref must be mapped to a JNDI name using the resource-env-description element of the weblogic proprietary descriptor or corresponding annotation.

Category:
J2EE

Cause:
See the error message body.

Action:
See the error message body.

BEA-160224
Encountered an error cleaning up references for application: ${0} - ${1}

Category:
J2EE

Cause:
See the error message body.

Action:
See the error message body.

BEA-160225
A new JPA API method is being invoked against an older version of the persistence provider, in which the method is not supported yet. Update the application to use a compliant provider, or ensure that the application does not attempt to invoke unsupported methods that are not supported by the current provider.

Category:
J2EE

Cause:
A new JPA API method is being invoked against an older version of the persistence provider, in which the method is not supported yet.

Action:
Update the application to use a compliant provider, or ensure that the application does not attempt to invoke unsupported methods that are not supported by the current provider.

BEA-160226
Ignoring the configuration file [{0}: {1}]. Only applications that use Kodo as the JPA provider can be configured with this file.

Category:
J2EE

Cause:
This file can configure only persistence units that use Kodo.

Action:
Remove the configuration file or specify the information in persistence.xml; otherwise, one or more persistence units in this application use Kodo.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-160227
The persistence unit "{0}" in "{1}" does not use Kodo as a JPA provider. Ignoring the configuration for this persistence unit found in persistence-configuration.xml.

Category:
J2EE

Cause:
The persistence-configuration.xml file cannot configure persistence units that do not use Kodo.

Action:
Remove the persistence unit from the persistence-configuration.xml file or specify in persistence.xml, or otherwise, that the persistence unit uses Kodo.

BEA-160228
AppMerge failed to merge your application. If you are running AppMerge on the command-line, merge again with the -verbose option for more details. See the error message(s) below.

Category:
J2EE

Cause:
AppMerge can fail for many reasons. See the specific error message for details.

Action:
Use the provided error message to track down and fix the problem.

BEA-160229
Ignoring plan file {0} as does not exist.

Category:
J2EE

Cause:
Either the plan specified is not a file or the plan file does not exist.

Action:
Use the provided error message to track down and fix the problem.

BEA-160230
Created working directory: {0}

Category:
J2EE

Cause:
This is an informational message.

Action:
No action is required.

BEA-160231
Unable to identify application type for {0}

Category:
J2EE

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The source file type may not be supported.

Action:
Use the provided error message to track down and fix the problem.

BEA-160232
Unable to identify module type for {0}

Category:
J2EE

Cause:
The module specified in the application descriptor may not be supported.

Action:
Use the provided error message to track down and fix the problem.

BEA-160233
Unable to identify module type {0}

Category:
J2EE

Cause:
A module specified in the application descriptor may not be supported.

Action:
Use the provided error message to track down and fix the problem.

BEA-160238
The message-destination {0} declared in the deployment descriptor or by annotation does not have a corresponding message-destination-descriptor element in the weblogic deployment descriptor or corresponding annotation. Alternatively, mapped-name or lookup-name of message-destination can be specified for the destination.

Category:
J2EE

Cause:
A declared message-destination is not mapped correctly.

Action:
Map the declared message-destination to the actual message destination using the message-destination-descriptor element in the weblogic deployment descriptor, or specify mapped-name or lookup-name of message-destination.

BEA-160239
Conflicting environment entry {0}, name is {1}.

Category:
J2EE

Cause:
Multiple entries have the same environment entry name, but have different values.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that each environment entry has a different environment name, or that entries with the same have identical values.

BEA-160240
The resource-ref "{0}" declared in the standard descriptor or annotation has no JNDI name mapped to it. The resource-ref must be mapped to a JNDI name using the resource-description element of the weblogic proprietary descriptor or corresponding annotation.

Category:
J2EE

Cause:
See the error message for details.

Action:
See the error message for details.

BEA-160241
Error: There are validation errors for environment entries in module {0}. {1}

Category:
J2EE

Cause:
There are validation errors in the environment entries. With an EJB in WAR files, it is possible that names for environment entries may clash. Care must be taken by the deployer or application assembler to avoid these name collisions, as they can cause the application to fail. An environment entry that is declared in the application.xml descriptor must specify a JNDI name in the java:app or java:global namespace.

Action:
Correct the validation errors.

BEA-160242
Warning: Data source definition {0} in interceptor {1} may have been overwritten by EJB component in module {2}, ignored.

Category:
J2EE

Cause:
The EJB component may have overwritten data source definitions in its interceptors. In this case, data source definitions in interceptors will be ignored.

Action:
Please verify the cause above is not an issue for the application.

BEA-160243
A creating StoredProcedureQuery API method is being invoked on a container-managed and transaction-scoped EntityManager outside of a transaction, but the method is not supported yet. Update the application to start a transaction before creating the StoredProcedureQuery objects.

Category:
J2EE

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A creating StoredProcedureQuery API method is being invoked on a container-managed and transaction-scoped EntityManager outside of a transaction, but the method is not supported yet.

Action:
Update the application to start a transaction before creating the StoredProcedureQuery objects.

BEA-160244
An environment entry {0} declared in the application.xml descriptor does not specify a JNDI name in the java:app or java:global namespace.

Category:
J2EE

Cause:
An environment entry declared in the application.xml descriptor must specify a JNDI name in the java:app or java:global namespace.

Action:
Specify a JNDI name in the java:app or java:global namespace.

BEA-160245
It is an error for both the env-entry-value and lookup-name elements to be specified for a given env-entry element {0}.

Category:
J2EE

Cause:
An environment entry declared in the application.xml descriptor specified both the env-entry-value and lookup-name elements.

Action:
Specify either the env-entry-value or lookup-name, but not both.

BEA-160246
Warning: It is an error to request injection of two resources into the same target class {0} and target name {1}.

Category:
J2EE

Cause:
Injection of two resources into the same target was requested.

Action:
Remove one of the targets from the application.

BEA-160247
Warning: Ignore the realm name: {0} in deployment descriptor.

Category:
J2EE

Cause:
The realm name was ingored in the deployment descriptor.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-160248
Unable to parse class file: {0}. {1}

Category:
J2EE

Cause:
This is generally due to a corrupted class file in the application.

Action:
Use an external tool such as JAD to ascertain the validity of the class. It is important to fix any invalid class in order to avoid potentially severe errors later in deployment or at runtime.

BEA-160249
Skipping schema-generation actions for persistence unit {0} by overriding relevant properties because this is only a server startup instead of an application deployment.

Category:
J2EE

Cause:
This is an information message.

Action:
No action is required.

BEA-160250
No ComponentMBeanFactory with the class name {0} was found among the registered DeploymentFactory instances. Creating an instance using reflection.

Category:
J2EE

Cause:
There was no registered DeploymentFactory instance that had the same name as {0}.

Action:
No action is required.

BEA-160251
Failed to create an instance of ComponentMBeanFactory with the class name {0} because of an exception {1}

Category:
J2EE

Cause:
The ComponentMBeanFactory instance could not be located among registered DeploymentFactory instances.

Action:
No action is required.

BEA-160252
The following application inconsistencies must be corrected {0}. Code path: {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
J2EE

Cause:
WebLogic Server detected multiple declarations of the same env-entry.

Action:
Search the application, including any shared library, for the listed env-entry declarations in both the descriptors and code annotations. Make sure that all the declarations are consistent. It is better to declare each env-entry only once to avoid this issue.

BEA-160253
{0}

Category:
J2EE

Cause:
See the message ddetails.

Action:
Consider eliminating redundant declarations of entries to avoid potential conflicts.

BEA-160254
Unable to read from application cache file {0} because of exception {2} with message: {1}

Category:
J2EE

Cause:
The cause of this exception is an underlying Java exception.

Action:
No action is needed, since WebLogic can recover from this failure by constructing these objects again.

BEA-160255
Unable to write to application cache file {0} because of exception message: {1}

Category:
J2EE

Cause:
The cause of this exception is an underlying Java IOException.

Action:
No action is needed, since WebLogic can recover from this failure by constructing these objects again when it need to read from this location.

BEA-160256
Unable to close {1} object stream to application cache file {0} because of exception message: {2}

Category:
J2EE

Cause:
The cause of this exception is an underlying Java IOException.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is needed, since WebLogic can recover from this failure.

BEA-160257
Application with name "{0}" cannot be deployed because the name is already in use in {1} named "{2}".

Category:
J2EE

Cause:
The deployment failed due to another application or library that already exists with the same name in the current deployment scope.

Action:
Retry the deployment with a different application name.

BEA-160258
The multi-version file {0} is expected to be a directory

Category:
J2EE

Cause:

Action:
Correct the file format

BEA-160259
The version directory {0} is expected to be named in a dot-decimal format

Category:
J2EE

Cause:
The name format is incorrect

Action:
Correct the directory name

BEA-160260
No valid version found in multi-version directory {0}

Category:
J2EE

Cause:
No valid version exists in the multi-version directory

Action:
Add a valid version to the directory

BEA-160261
Exception in application {0}, marked to be in MultiVersionFormat. The application is located at {1}. The exception is {2}

Category:
J2EE

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
{2}

Action:
Please correct the underlying problem represented by {2}

BEA-160262
The application version is "{0}"

Category:
J2EE

Cause:
This is an informational message giving the hash version of an application using the appmerge tool

Action:
None

BEA-160263
The files included in the application hash are {0}

Category:
J2EE

Cause:
This is an informational message giving the names of the files included in the version hash in the appmerge tool

Action:
None

BEA-169800
A PooledConnectionFactory object with an invalid external version of {0} was found.

Category:
JMSPool

Cause:
The version of WebLogic Server that stored the PooledConnectionFactory object is not compatible with the version that is retrieving it.

Action:
Contact My Oracle Support.

BEA-169801
The JMS method {0} may not be called inside an EJB or servlet.

Category:
JMSPool

Cause:
The application code has violated the Java EE specifications.

Action:
Change the code to avoid calling the specified method.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-169802
Cannot create a wrapped JMS connection using a username and password when the res-auth element is set to Container.

Category:
JMSPool

Cause:
The application code is not using the Java EE APIs properly.

Action:
Either remove the username and password, or set the res-auth element to Application.

BEA-169803
JNDI lookup of the JMS connection factory {0} failed

Category:
JMSPool

Cause:
The remote JNDI server or JMS server is not available, or the name was incorrectly specified.

Action:
Check that the server is running, and check the name in the deployment descriptor XML files.

BEA-169804
Cannot use a JMS connection factory because the object is of the wrong type.

Category:
JMSPool

Cause:
Either the name of the connection factory in the deployment descriptor XML files is wrong, or the wrong object was bound into JNDI.

Action:
Check the name in the XML files against what is actually registered in JNDI.

BEA-169805
A pooled JMS connection is being closed because an exception was detected on the connection: {0}

Category:
JMSPool

Cause:
The JMS server is unavailable or there is some other problem with it that makes it impossible to send or receive messages.

Action:
Check the configuration parameters for the JMS server, and check that it is available on the network.

BEA-169806
Cannot use a JMS destination because the object is of the wrong type.

Category:
JMSPool

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Change the application to use a valid destination type.

Action:
Change the application to use a valid destination type.

BEA-169807
There was an error while making the initial connection to the JMS resource named {0} from within an EJB or a servlet. The server will attempt the connection again later. The error was {1}

Category:
JMSPool

Cause:
See the error message from the JMS provider.

Action:
No action is required.

BEA-169808
There was an error while making the initial connection to the JMS resource named {0} from the EJB "{1}" inside application "{2}". The server will attempt the connection again later. The error was {3}

Category:
JMSPool

Cause:
See the error message from the JMS provider.

Action:
No action is required.

BEA-169809
An error occurred while registering the JMS connection with JTA.

Category:
JMSPool

Cause:
The JMS connection factory specified does not properly support XA or something is wrong with the transaction system.

Action:
Check the linked exception and verify that the JMS provider properly supports XA.

BEA-169810
An error occurred while committing or rolling back a JTA transaction used for a JMS operation by the Java EE container

Category:
JMSPool

Cause:
There was a problem with the transaction system.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
See the linked exception for more information.

BEA-169811
The JMS object may not be used because it has been closed.

Category:
JMSPool

Cause:
The object has been closed.

Action:
Fix the programming error.

BEA-169812
The pooled JMS session is enlisted in another transaction and may not be used elsewhere.

Category:
JMSPool

Cause:
Check the application code to ensure that a pooled JMS session (retrieved from the JNDI java:comp/env/jms context) is not kept between transactions. It should be closed so that it is returned to the pool.

Action:
Check the application code.

BEA-169813
There was an error while closing a JMS session pool or a pooled JMS connection: {0} The pool or object was forcibly closed.

Category:
JMSPool

Cause:
See the linked exception for more information.

Action:
No action is required.

BEA-169814
The JMS session pool has been disabled.

Category:
JMSPool

Cause:
An administrative action was taken.

Action:
Re-enable the session pool.

BEA-169815
A JMS session pool could not be created because the {0} property was not specified.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSPool

Cause:
A JMS session pool was either created directly by the user or by internal container code that did not properly specify a property.

Action:
Check for other log messages that give more information about the failure.

BEA-169816
The JMS session pool is shutting down.

Category:
JMSPool

Cause:
The pool is being shut down, possibly because of an error.

Action:
Check for other errors that indicate why the pool is being shut down and retry the operation.

BEA-169817
The JMS connection factory resource {0} declared in the EJB "{1}" as part of application "{2}" does not support XA. It cannot be used inside a transaction context.

Category:
JMSPool

Cause:
If the specified JMS connection factory is intended to be used inside a transaction context, then the EJB was configured improperly.

Action:
If the specified JMS connection factory is intended for use inside a transaction context, then the connection factory used by the EJB must be changed so that it supports XA, or the EJB descriptor must be changed to point to a different connection factory. However, if the connection factory will never be used inside a transaction context, then no action is necessary.

BEA-169818
The JMS connection pool named "{0}" has a configured connection factory JNDI name of "{1}". However, an object that is not a javax.jms.ConnectionFactory is bound to that JNDI name. The object bound to that JNDI name has type "{2}".

Category:
JMSPool

Cause:
An object other than a ConnectionFactory is bound to the configured JNDI name of the connection pool.

Action:
Either change the JNDI name of the JMS connection pool property or change the JNDI name of the object that is currently bound into JNDI.

BEA-169819
There was an error with a resource pool used to pool JMS sessions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
JMSPool

Cause:
There is a problem with the resource pool.

Action:
See the linked exception for details.

BEA-169820
A JMS message consumer could not be created using a temporary queue or topic that was created using another connection.

Category:
JMSPool

Cause:
This is an application programming error.

Action:
Change the application code.

BEA-169821
Error creating or instantiating a wrapper for class {0}

Category:
JMSPool

Cause:
There may be an error with the classpath or with the underlying JMS provider's code.

Action:
Check the classpath. If this does not fix the problem, contact My Oracle Support.

BEA-169822
Unable to use a wrapped JMS session in the transaction because two-phase commit is not available.

Category:
JMSPool

Cause:
The JMS connection factory specified does not support two-phase commit.

Action:
For WebLogic Server JMS, two-phase commit may be enabled by setting the "UserTransactionsEnabled" flag on the JMS connection factory. For other JMS providers, you must specify a JMS connection factory that supports XA.

BEA-169823
Failure occured on createQueueConnection. Unexpected return type.

Category:
JMSPool

Cause:
Probable cause is the JMS 1.1 ConnectionFactory with the JMS 1.0.2 createQueueConnection() API. Some JMS providers do not support backward compatibility.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Either change the API call to createConnection() or change the connection factory type to QueueConnectionFactory.

BEA-169824
Failure occured on createTopicConnection. Unexpected return type.

Category:
JMSPool

Cause:
Probable cause is the JMS 1.1 ConnectionFactory with the JMS 1.0.2 createTopicConnection() API. Some JMS providers do not support backward compatibility.

Action:
Either change the API call to createConnection() or change the connection factory type to TopicConnectionFactory.

BEA-169825
Cannot create a wrapped JMSContext using a username and password when the res-auth element is set to Container.

Category:
JMSPool

Cause:
The application code is not using the Java EE APIs properly.

Action:
Either remove the username and password, or set the res-auth element to Application.

BEA-169826
The JMSContext pool named "{0}" has a configured connection factory JNDI name of "{1}". However, an object that is not a javax.jms.ConnectionFactory is bound to that JNDI name. The object bound to that JNDI name has type "{2}".

Category:
JMSPool

Cause:
An object other than a ConnectionFactory is bound to the configured JNDI name of the JMSContext pool.

Action:
Either change the JNDI name of the JMSContext pool property or change the JNDI name of the object that is currently bound into JNDI.

BEA-169827
The resource reference "{0}" of type JMS Connection Factory in application "{1}" does not specify a JNDI name. As of Java EE 7 and WebLogic version 12.2.1, such references return a "java:comp/DefaultJMSConnectionFactory" by default when no Connection Factory with a JNDI name that matches the resource name is found.

Category:
JMSPool

Cause:
See the error message from the JMS provider.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
If the application intends to use a specific JMS Connection Factory, Oracle recommends (a) checking for a misspelling of the resource reference name either in the @Resource annotation or, if there is a deployment descriptor file, in the <resource-ref-name> of the deployment descriptor, and (b) if there is no misspelling, explicitly setting the desired JNDI name using a lookup or mappedName attribute in the descriptor or annotation.

BEA-169828
An invalid value ({0}) for session mode was specified.

Category:
JMSPool

Cause:
An invalid value of the sessionMode parameter was specified when creating a JMSContext. The only valid values are JMSContext.AUTO_ACKNOWLEDGE, JMSContext.CLIENT_ACKNOWLEDGE, JMSContext.DUPS_OK_ACKNOWLEDGE and JMSContext.SESSION_TRANSACTED

Action:
Change the code so that it passes in a valid session mode. See the JMS API for more information.

BEA-169829
JMS 2.0 method "{0}", called on the interface "{1}", is not implemented by this JMS Provider.

Category:
JMSPool

Cause:
JMS 2.0 method "{0}", called on the interface "{1}", is not implemented by this JMS Provider.

Action:
Either use a JMS 1.1 method instead or use a JMS provider that supports JMS 2.0.

BEA-169830
JMS Connection Factory unmapped resource reference mode : {0}

Category:
JMSPool

Cause:
This is an informational message.

Action:
No action is required.

BEA-169831
System property weblogic.jms.JMSConnectionFactoryUnmappedResRefMode has 2 legal values "{0}" and "{1}". The value "{2}" is invalid and will be ignored.

Category:
JMSPool

Cause:
There are two legal values for the weblogic.jms.JMSConnectionFactoryUnmappedResRefMode property.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-169832
The JMS connection factory with JNDI name {0} is object-based-security enabled and is not supported by JMS pools.

Category:
JMSPool

Cause:
The JMS connection factory with JNDI name {0} is object-based-security enabled and is not supported by JMS pools.

Action:
Do not use object-based-security enabled JMS connection factory for JMS pools.

BEA-169833
A foreign server does not support referencing a Connection Factory that enables Object Based Security.

Category:
JMSPool

Cause:
A foreign server does not support referencing a Connection Factory that enables Object Based Security.

Action:
Configure the foreign server to reference a Connection Factory that does not enable Object Based Security.

BEA-170003
The DomainLogfile Handler is unable to open the domain logfile {0}. The domain logfile is disabled.

Category:
Log Management

Cause:
The filepath specified for the domain log is invalid or the server process cannot write to the domain log file.

Action:
Specify a valid filepath for the domain log file.

BEA-170011
The LogBroadcaster on this server failed to broadcast log messages to the Administration Server. The Administration Server may not be running. Message broadcasts to the Administration Server will be disabled.

Category:
Log Management

Cause:
The Managed Server may not be able to reach the Administration Server. One of the possible causes could be that the Administration Server is shut down.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
To fix this problem, inspect the exception stack trace, and correct the problem. If the Administration Server is shut down, restart it to resume normal log broadcasting to the domain.

BEA-170019
The server log file {0} is opened. All server side log events will be written to this file.

Category:
Log Management

Cause:
This message is for informational purposes.

Action:
No action is needed.

BEA-170020
The server log file {0} could not be opened successfully.

Category:
Log Management

Cause:
The filepath configured for the server's log file is not valid.

Action:
Please specify a valid filepath for the server's log file.

BEA-170022
Log4j failed to initialize for {0}. The default JDK Logging implementation will be used.

Category:
Log Management

Cause:
The Log4j libraries may not be in the server CLASSPATH.

Action:
Take corrective action based on the stack trace details.

BEA-170023
The Server Logging is initialized with Java Logging API implementation.

Category:
Log Management

Cause:
This message is for informational purposes.

Action:
No action is needed.

BEA-170024
The Server Logging is initialized with Apache''s Log4j Logging API implementation.

Category:
Log Management

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This message is only for informational purposes.

Action:
No action is needed.

BEA-170025
Initialized Domain Logging. Domain log events will be written to {0}.

Category:
Log Management

Cause:
This message is for informational purposes.

Action:
No action is needed.

BEA-170026
The servlet context logger could not be initialized for servlet context {0} to write to its own log file.

Category:
Log Management

Cause:
There was an I/O error when opening the file for the servlet context log.

Action:
Ensure that the logging configuration for the web application is valid.

BEA-170027
The server has successfully established a connection with the Domain level Diagnostic Service.

Category:
Log Management

Cause:
The server has successfully established contact with the Domain Diagnostic Service.

Action:
No action is needed.

BEA-170028
The remote handler is not available, so the trap notification information can not be sent.

Category:
Log Management

Cause:
The Managed Server may not be able to reach the Administration Server. One of the possible causes could be that the Administration Server is shut down.

Action:
If the Administration Server is shut down, restart it to resume normal communication for the domain.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-170029
The data gathering handler could not be initialized.

Category:
Log Management

Cause:
An error occurred while initializing the data gathering handler.

Action:
Review the nested exception details for the cause.

BEA-170030
There was an error initializing the global Log4j configuration.

Category:
Log Management

Cause:
The error could be due to incorrect configuration parameters in the log4j configuration file.

Action:
Review the nested exception details for the cause.

BEA-170031
The Server Logging bridge has initialized successfully.

Category:
Log Management

Cause:
This message is logged for informational purpose only.

Action:
No action is needed.

BEA-170032
The Server has detected ODL configuration for java.util.logging. The PlatformLoggerLevels attribute configuration on the LogMBean will be ignored.

Category:
Log Management

Cause:
This message is logged for informational purpose only.

Action:
Users should specify the java.util.logging Logger Level configuration with ODL.

BEA-170033
The Server logging bridge could not be registered.

Category:
Log Management

Cause:
See the stack trace for the exact cause of this error, it could be due to misconfiguration or incorrect CLASSPATH being set for the logging APIs.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Take appropriate action based on the error message.

BEA-170034
LogMonitoring Service counted {0} log messages in the last {1} seconds. This exceeds the throttle threshold value of {2}, certain repetitive messages will now be throttled.

Category:
Log Management

Cause:
This message is logged for informational purpose only.

Action:
No action is needed.

BEA-170035
LogMonitoring Service counted {0} log messages in the last {1} seconds which is below the threshold value of {2}. Log messages are not being throttled.

Category:
Log Management

Cause:
This message is logged for informational purpose only.

Action:
No action is needed.

BEA-170036
The Logging monitoring service timer has started to check for logged message counts every {0} seconds.

Category:
Log Management

Cause:
This message is logged for informational purpose only.

Action:
No action is needed.

BEA-170037
The log monitoring service timer has been stopped.

Category:
Log Management

Cause:
This message is logged for informational purpose only.

Action:
No action is needed.

BEA-170038
The log monitoring service is throttling messages with the following Message ID/LoggerName/Message signature and the total count of logged messages over the throttle period is: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Log Management

Cause:
This message is logged for informational purpose only.

Action:
No action is needed.

BEA-170039
The log monitoring service encountered an error when it was trying to reopen the server log file.

Category:
Log Management

Cause:
The cause of the error is included in the error stack trace of the message.

Action:
Please take corrective action based on the error stack trace reported in the log message to resolve the issue.

BEA-170040
The log monitoring service detected missing Server log file and forced log rotation to reopen the server log file.

Category:
Log Management

Cause:
An external process or tool likely deleted the Server's current log file.

Action:
Please take corrective action to find the source of deletion and not delete the active log file being used by the Server.

BEA-171500
The embedded LDAP configuration file: {0} was not found, and the embedded LDAP server has not been started. To resolve the problem, ensure that weblogic.home is defined correctly (it should have a lib subdirectory that contains this file).

Category:
EmbeddedLDAP

Cause:
The embedded LDAP server cannot find the specified file. This file is installed as part of the installation process. Most likely, the default directory is not the server root directory and the lib subdirectory cannot be found.

Action:
Set the default directory to the server root directory, or use the weblogic.EmbeddedLDAPConfigDirectory system property to set the location of the embedded LDAP server configuration files.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-171503
The listen address for the Administration Server is obtained from either the Server MBean, the ServerRuntime MBean, or the URL specified by the weblogic.management.server command line property. None of these returned a listen address.

Category:
EmbeddedLDAP

Cause:
The listen address was null.

Action:
Check if the listen address for the Administration Server is defined in either the Server MBean, the ServerRuntime MBean, or the URL specified by the weblogic.management.server command line property.

BEA-171507
The embedded LDAP replica file: {0} could not be written. The underlying exception was {1}.

Category:
EmbeddedLDAP

Cause:
An exception occurred when saving the replica properties to the replicas file.

Action:
Verify that the file {1} can be written. Read the exception text for more information in diagnosing the problem.

BEA-171512
When attempting to clean up after a failed embedded LDAP replica initialization, the file {0} could not be deleted. The {1} directory and all its files must be deleted manually.

Category:
EmbeddedLDAP

Cause:
It is not always possible to delete files that are open by a process.

Action:
Delete the {1} directory and all its files manually using the appropriate command for the operating system on which WebLogic Server runs.

BEA-171513
Could not schedule the trigger used for embedded LDAP timer activities. The underlying exception was {0}.

Category:
EmbeddedLDAP

Cause:
A TimeTrigger exception occurred when scheduling the trigger.

Action:
See the exception text in {0} for more information on diagnosing the problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-171517
An error occurred while attempting to obtain exclusive access to the embedded LDAP data files directory: {0}. The exception that occurred is {1}.

Category:
EmbeddedLDAP

Cause:
An exclusive lock for the directory {0} could not be obtained because an exception occurred.

Action:
Investigate the associated exception to determine why the exclusive lock failed.

BEA-171518
The following exception has occurred:

Category:
EmbeddedLDAP

Cause:
An error condition has occurred.

Action:
Read the associated exception in the log. In general, a stack trace will help when debugging an existing problem.

BEA-171519
Could not obtain an exclusive lock to the embedded LDAP data files directory: {0} because another WebLogic Server instance is already using this directory. Ensure that the first WebLogic Server instance is completely shut down and restart the server.

Category:
EmbeddedLDAP

Cause:
An exclusive lock for the directory {0} could not be obtained because another WebLogic Server is already using this directory.

Action:
Ensure that the first WebLogic Server instance is shut down and try restarting the server.

BEA-171520
Could not obtain an exclusive lock for directory: {0}. Waiting for {1} seconds and then retrying in case the existing WebLogic Server instance is still shutting down.

Category:
EmbeddedLDAP

Cause:
An exclusive lock for the directory {0} could not be obtained because another WebLogic Server is already using this directory.

Action:
If the server eventually boots, ignore this warning as the lock was obtained. If the server fails to boot, ensure that the first WebLogic Server is shut down and try restarting the server.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-171521
An error occurred while initializing the embedded LDAP server. The exception that occurred is {0}. This may indicate a problem with the data files for the embedded LDAP server. This Managed Server has a replica of the data contained on the master embedded LDAP server in the Administration Server. This replica has been marked invalid and will be refreshed on the next boot of the Managed Server. Try to reboot this server.

Category:
EmbeddedLDAP

Cause:
There may be a problem with either the embedded LDAP server configuration files or the data files.

Action:
Investigate the associated exception to determine why the exception occurred. Try to reboot the server and see if the refresh of the replica data files solves the problem.

BEA-171522
An error occurred while initializing the embedded LDAP server. The exception that occurred is {1}. This may indicate a problem with the data files for the embedded LDAP server. If the problem is with the data files, and it cannot be corrected, backups of previous versions of the data files exist in {0}.

Category:
EmbeddedLDAP

Cause:
There may be a problem with either the embedded LDAP server configuration files or the data files.

Action:
Investigate the associated exception to determine why the exception occurred. Try to reboot the server.

BEA-171523
Embedded LDAP server Credential unavailable: a credential value must be supplied for the embedded LDAP configuration.

Category:
EmbeddedLDAP

Cause:
The Credential attribute is invalid.

Action:
Set the Credential attribute for the embedded LDAP server configuration.

BEA-171524
Cannot determine the listen address for the Administration Server. The Administration Server URI {0}, obtained from either the Server MBean, the ServerRuntime MBean, or the URL specified by the weblogic.management.server command line property, has invalid syntax.

Category:
EmbeddedLDAP

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The Administration Server URI has invalid syntax.

Action:
Ensure that a valid listen address for the Administration Server is defined in either the Server MBean, the ServerRuntime MBean, or the URL specified by the weblogic.management.server command line property.

BEA-171525
Error loading initial replica file. Check the EmbeddedLDAP log for more details.

Category:
EmbeddedLDAP

Cause:
An error occurred during the loading of the initial replica file.

Action:
Check the EmbeddedLDAP log for more details.

BEA-171526
Error loading the initial replica file, attempting to reload.

Category:
EmbeddedLDAP

Cause:
An error occurred during the loading of the initial replica file.

Action:
No action is required. The initial replica file will be loaded again.

BEA-171527
Added all LDAP entries successfully for the initial replica.

Category:
EmbeddedLDAP

Cause:
An error occurred during the initial loading of the replica file.

Action:
No action is required. The reload of the initial replica file was successful.

BEA-171528
Could not mark replica as invalid.

Category:
EmbeddedLDAP

Cause:
The AdminServer was unable to connect to the managed server to mark it as invalid.

Action:
Reboot the managed server so its EmbeddedLDAP can be refreshed from the AdminServer.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-171529
Unable to download the initial replica of security data from the AdminServer. Verify that clock skew has not occurred between the servers in the domain. The underlying exception was {0}

Category:
EmbeddedLDAP

Cause:
The managed server was unable to download the replica file due to an exception.

Action:
Verify that clock skew has not occurred between the servers in the domain. Read the exception text for more information in diagnosing the problem.

BEA-180000
Start parsing the configuration MBean information.

Category:
WTC

Cause:
All other initialization has completed, and this method is now ready to begin reading its own configuration information.

Action:
No action is required.

BEA-180001
WTC finished parsing the configuration MBean information.

Category:
WTC

Cause:
All WTC configuration MBeans were parsed without any problems.

Action:
No action is required.

BEA-180002
Invalid attributes exception occurred while trying to create subcontext: {0}

Category:
WTC

Cause:
An attempt was made to add an attribute set that has been specified incompletely or incorrectly.

Action:
Check for other log messages that give more information about the failure.

BEA-180003
Naming exception error: {0}

Category:
WTC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The specified name could not be resolved.

Action:
Check for other log messages that give more information about the failure.

BEA-180004
Name already bound error: {0}

Category:
WTC

Cause:
The name used by the Tuxedo connection factory or Tuxedo CORBA connection factory already bonded to another object.

Action:
Do not use the same name as the Tuxedo or Tuxedo CORBA connection factory.

BEA-180005
Invalid attributes exception when binding connection factory: {0}

Category:
WTC

Cause:
An attempt was made to add an attribute set that has been specified incompletely or incorrectly.

Action:
Check for other log messages that give more information about the failure.

BEA-180006
Naming exception error: {0}

Category:
WTC

Cause:
The specified name could not be resolved.

Action:
Check for other log messages that give more information about the failure.

BEA-180007
Unable to register the resource with transaction manager: {0}.

Category:
WTC

Cause:
WebLogic Tuxedo Connector (WTC) was not running with the server transaction manager.

Action:
Contact My Oracle Support.

BEA-180008
A transaction identifier exists for a non-existent domain {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
WTC

Cause:
The remote Tuxedo domain involved in the transaction is no longer in the WebLogic Tuxedo Connector (WTC) configuration.

Action:
Manually correct the transaction. If the removal of the remote Tuxedo domain is intentional, temporarily add the remote Tuxedo domain back to the configuration and wait for the transaction to complete. Otherwise, add the Tuxedo domain back to the configuration.

BEA-180009
Could not complete the execution for the MBean named: {0}.

Category:
WTC

Cause:
The definition contains input information that is not consistent with the usage model.

Action:
Check the MBean definition to see if the individual attributes are consistent with the rest of the MBean definitions.

BEA-180010
Could not create a TDMLocalTDomain {0}.

Category:
WTC

Cause:
The AccessPoint attribute definition for the WTCLocalTuxDom MBean was invalid.

Action:
Check the AccessPoint attribute of the WTCLocalTuxDom MBean.

BEA-180011
Could not create a TDMRemoteTDomain {0}.

Category:
WTC

Cause:
The AccessPoint attribute definition for the WTCRemoteTuxDom MBean was invalid.

Action:
Check the AccessPoint attribute of the WTCRemoteTuxDom MBean.

BEA-180012
The LocalTDomain {0} is unknown.

Category:
WTC

Cause:
The LocalAccessPoint attribute for the WTCRemoteTuxDom MBean is not a valid name for a LocalTDomain.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify that the WTCRemoteTuxDom MBean definition has a valid name for the LocalAccessPoint attribute.

BEA-180013
The LocalTDomain {0} is unknown.

Category:
WTC

Cause:
The LocalAccessPoint attribute for the WTCExport MBean is not a valid name for a LocalTDomain.

Action:
Verify that the WTCExport MBean definition has a valid name for the LocalAccessPoint attribute.

BEA-180014
Could not create a TDMExport {0}.

Category:
WTC

Cause:
The ResourceName attribute definition for the WTCExport MBean is invalid or the LocalTDomain is not usable.

Action:
Check the ResourceName attribute of the WTCExport MBean.

BEA-180015
The LocalTDomain {0} is not known.

Category:
WTC

Cause:
The LocalAccessPoint attribute for the WTCImport MBean is not a valid name for a LocalTDomain.

Action:
Confirm that the WTCImport MBean definition has a valid name for the LocalAccessPoint Attribute.

BEA-180016
The RemoteTDomain {0} is unknown.

Category:
WTC

Cause:
The RemoteAccessPointList attribute for the WTCImport MBean does not contain a valid name for a RemoteTDomain.

Action:
Verify that the WTCImport MBean definition has valid names in a comma-separated list defined in the RemoteAccessPointList attribute.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-180017
Could not create a TDMImport {0}.

Category:
WTC

Cause:
The ResourceName attribute definition for the WTCImport MBean is invalid. The LocalTDomain or the RemoteTDomains are not usable.

Action:
Check the ResourceName attribute of the WTCImport MBean.

BEA-180018
Missing {0} Password or PasswordIV information.

Category:
WTC

Cause:
The Password or PasswordIV attribute is not set.

Action:
Verify that the Password and PasswordIV attributes are valid.

BEA-180019
The LocalTDomain {0} is unknown.

Category:
WTC

Cause:
The LocalAccessPoint attribute for the WTCPassword MBean is not a valid name for a LocalTDomain.

Action:
Verify that the WTCPassword MBean definition has a valid name for the LocalAccessPoint attribute.

BEA-180020
The RemoteTDomain {0} is unknown.

Category:
WTC

Cause:
The RemoteAccessPoint attribute for the WTCPassword MBean is not a valid name for a RemoteTDomain.

Action:
Verify that the WTCPassword MBean definition has a valid name for the RemoteAccessPoint attribute.

BEA-180021
Could not create a TDMPasswd {0}.

Category:
WTC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The LocalTDomain or the RemoteTDomain is not usable.

Action:
Check the LocalAccessPoint and RemoteAccessPoint attributes of the WTCPassword MBean.

BEA-180022
Could not set up the field table information for TDMResources: {0}.

Category:
WTC

Cause:
The fully qualified name for any field table may be incorrect or could not be found.

Action:
Check the FldTblClass definitions of the WTCResources MBean and verify that the fully qualified name is correct, that it is consistent with the current CLASSPATH usage, and that the system is able to access it.

BEA-180023
Commit of Xid failed with status {0}.

Category:
WTC

Cause:
The transaction became a heuristic hazard, or the resource manager encountered an error.

Action:
Correct the transaction manually if it became a heuristic hazard, or correct the resource manager problem.

BEA-180024
Unable to reply to unknown transaction with exception: {0}.

Category:
WTC

Cause:
The connection to the remote Tuxedo domain was already terminated or an IOException occurred while writing to the network.

Action:
If the TPException is TPEPROTO, try to reboot the remote Tuxedo domain. If the TPException is TPESYSTEM, check the network connection.

BEA-180025
Unknown field type requested {0}.

Category:
WTC

Cause:
TypedFML32 data is possibly being used instead of TypedFML.

Action:
Verify that the type of input data is correct.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-180026
While trying to use FML data, this Ferror exception occurred: {0}

Category:
WTC

Cause:
The data was not created correctly.

Action:
Check the data that was passed into this method.

BEA-180027
While trying to use FML data, an Unknown exception occurred: {0}

Category:
WTC

Cause:
The data was not created correctly.

Action:
Check the data that was passed into this method.

BEA-180028
Unknown field type requested {0}.

Category:
WTC

Cause:
Possibly, TypedFML data is being used instead of TypedFML32.

Action:
Verify that the type of input data was correct.

BEA-180029
The Ferror exception: {0} occurred. Additional exception information found: {1}.

Category:
WTC

Cause:
The data was not created correctly.

Action:
Check the data that was passed into this method.

BEA-180030
While trying to use FML32 data, an Unknown exception occurred: {0}

Category:
WTC

Cause:
The data was not created correctly.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the data that was passed into this method.

BEA-180031
XML argument is null.

Category:
WTC

Cause:
The argument that was passed in was not initialized.

Action:
Check the XML argument that was passed in.

BEA-180032
The FldTbl[] input argument is null or an empty array.

Category:
WTC

Cause:
The argument that was passed in was not initialized.

Action:
Check the FldTbl[] argument that was passed in.

BEA-180033
TypedFML argument is null.

Category:
WTC

Cause:
The argument that was passed in was not initialized.

Action:
Check the TypedFML argument that was passed in.

BEA-180034
An error occurred while searching {0} for the document root element.

Category:
WTC

Cause:
The input XML string was not formatted correctly.

Action:
Check for other listed errors that should indicate what was unacceptable about the XML input.

BEA-180035
TypedFML32 argument is null.

Category:
WTC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The argument that was passed in was not initialized.

Action:
Check the TypedFML32 argument that was passed in.

BEA-180036
XML input {0} caused the SAX parser exception {1}

Category:
WTC

Cause:
The Document Object Model (DOM) parser did not accept the XML string that it received.

Action:
Check the SAX exception information that was returned and the XML string that was entered.

BEA-180037
XML input {0} caused IOException {1}.

Category:
WTC

Cause:
The XML string was not convertible to an InputSource() class.

Action:
Check the IOException information that was returned and the XML string that was entered.

BEA-180038
XML input {0} caused an unknown exception {1}.

Category:
WTC

Cause:
The XML string was not able to be parsed.

Action:
Check the exception information that was returned and the XML string that was entered.

BEA-180039
The DOM parser returned a null value for input {0}.

Category:
WTC

Cause:
The input may not be a valid XML string.

Action:
Check the string that was passed to the parser.

BEA-180040
Could not obtain a top document element from input {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
WTC

Cause:
The XML input did not have any elements defined.

Action:
Verify that the input string has a proper definition for a root element.

BEA-180041
Could not obtain a tag name for the root element in XML input {0}.

Category:
WTC

Cause:
The XML input does not have a tag name for the root element.

Action:
Verify that the root element has a proper definition.

BEA-180042
Internal TypedFML data is null.

Category:
WTC

Cause:
The internal data that is using the XMLtoFML() API was not initialized.

Action:
Use XMLtoFML to initialize the internal data.

BEA-180043
XML element name is null.

Category:
WTC

Cause:
The XML element information was not properly defined.

Action:
Check the XML element definition.

BEA-180044
XML element value is null for the element name {0}.

Category:
WTC

Cause:
The XML element information was not properly defined.

Action:
Check the XML element definition.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-180045
Internal TypedFML32 data is null.

Category:
WTC

Cause:
The internal data that was using the XMLtoFML32() API was not initialized.

Action:
Use XMLtoFML32 to initialize the internal data.

BEA-180047
The tBridge must have at least one redirect command.

Category:
WTC

Cause:
The tBridge was not configured properly.

Action:
At least one redirect command must be configured in the WTC_CONFIG for the tBridge section.

BEA-180048
The tBridge cannot find the TuxedoConnectionFactory.

Category:
WTC

Cause:
The WebLogic Tuxedo Connector (WTC) was not properly configured.

Action:
Review the WTC documentation and restart the WTC.

BEA-180049
The tBridge cannot locate the WLXT option for translation.

Category:
WTC

Cause:
The WLXT package might not be loaded or might be in the proper CLASSPATH.

Action:
Install the WLXT and properly configure the translator option.

BEA-180050
The tBridge internal FML-to-XML conversion failed.

Category:
WTC

Cause:
The syntax of the incoming message could not be understood.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the message syntax and retry.

BEA-180052
Unable to cancel ON_STARTUP connection retry due to: {0}.

Category:
WTC

Cause:
The timer service object for the ON_STARTUP connection policy could not be deleted during connection termination.

Action:
Contact My Oracle Support.

BEA-180053
Failure occurred during the token creating token: {0}.

Category:
WTC

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-180054
Failure occurred while reading the received domain security token: {0}.

Category:
WTC

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-180055
Received an unexpected token type, error information({0}, {1}, {2}).

Category:
WTC

Cause:
The cause could be that WTC communicates with a newer version of the TDomain protocol or an unknown alien protocol, or a breach of security attempt was detected.

Action:
Verify who is trying to connect to this WTC and determine whether there is a security violation or a need to upgrade WTC to a newer version.

BEA-180056
atntd(1) crypto error: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
WTC

Cause:
There was not enough free memory space to continue.

Action:
Try to force garbage collection, and remove some services to reduce memory usage.

BEA-180057
Invalid return challenge

Category:
WTC

Cause:
This is caused by an incorrect configuration and mismatched password.

Action:
Correct the configuration and the password.

BEA-180058
atntd(3) I/O error: {0}

Category:
WTC

Cause:
This is an internal system error.

Action:
Contact My Oracle Support.

BEA-180059
atntd(2) crypto error: {0}

Category:
WTC

Cause:
There is not enough free memory space to continue.

Action:
Try to force garbage collection, and remove some services to reduce memory usage.

BEA-180063
Invalid handler address length: {0}.

Category:
WTC

Cause:
The client did not talk to a valid listener.

Action:
Check the listener address and correct the configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-180067
WSRPCRQ discriminator {0} is invalid.

Category:
WTC

Cause:
The client is not talking to a valid handler.

Action:
Check the configuration and correct the error.

BEA-180068
Invalid WSRPCRQ type {0}.

Category:
WTC

Cause:
The client is not talking to a valid handler.

Action:
Check the configuration and correct it.

BEA-180069
Unable to read {0}. The following exception occurred: {1}.

Category:
WTC

Cause:
A general I/O exception occurred.

Action:
Read the exception description to determine the actual cause and act accordingly.

BEA-180070
TypeFML32 received a pointer of unknown type {0}. Will replace with null.

Category:
WTC

Cause:
The application was incorrectly written with an unknown data type.

Action:
Correct the data type in the application.

BEA-180071
Invalid typed FML32 field {0}. Equals null.

Category:
WTC

Cause:
The embedded FML32 buffer was incorrectly constructed in the FML32 buffer.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the source of the embedded FML32 buffer, and correct the problem.

BEA-180074
The tpinit buffer was not received.

Category:
WTC

Cause:
The server is likely talking to an invalid handler.

Action:
Check the configuration and correct the problem.

BEA-180075
Invalid receive size {0}

Category:
WTC

Cause:
The remote tuxedo domain gateway is not valid.

Action:
Check the configuration of the remote Tuxedo domain and correct the error.

BEA-180076
Unable to format password. The following exception occurred: {0}.

Category:
WTC

Cause:
An I/O error occurred.

Action:
Check for system memory usage and see if force garbage collection is possible. If the problem persists, contact My Oracle Support.

BEA-180077
Unable to close the domain socket. The following exception occurred: {0}.

Category:
WTC

Cause:
An I/O error occurred while closing the socket.

Action:
Check the network and system environment. If the problem persists, contact My Oracle Support.

BEA-180078
Dropping OWS_AREPLY on ground.

Category:
WTC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The ACALL request already timed out.

Action:
No action is required. This message is informational only.

BEA-180079
rsession.run read_tfmh failed.

Category:
WTC

Cause:
The received message header is not properly formatted or it failed to decompress the data.

Action:
Check the configuration of the remote Tuxedo domain and correct any problem in the configuration. Ensure that a supported version of the remote Tuxedo domain is being used. Also, check the network for possible network dropping of the packet. If the problem persists, contact My Oracle Support.

BEA-180080
rsession.run tmmsg.ws was not provided.

Category:
WTC

Cause:
There is no connection with a valid remote Tuxedo domain.

Action:
Check the remote Tuxedo domain configuration and correct the problem.

BEA-180081
Unexpected close on rsession socket. The following exception occurred: {0}

Category:
WTC

Cause:
An I/O error occurred while reading the message header from the input stream.

Action:
Check the system memory usage and force garbage collection. If the problem persists, contact My Oracle Support.

BEA-180082
Unable to close the WSH socket. The following exception occurred: {0}.

Category:
WTC

Cause:
An I/O error occurred.

Action:
Check the network and system configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-180083
An unknown TCM type was received: {0}.

Category:
WTC

Cause:
WebLogic Tuxedo Connector (WTC) is communicating with an unsupported Tuxedo version.

Action:
Check the configuration and correct the error.

BEA-180084
Unable to write TCM. The following exception occurred: {0}.

Category:
WTC

Cause:
An I/O error occurred.

Action:
Check the system memory usage and force garbage collection.

BEA-180085
Unable to send an unsolicited acknowledgment. The following exception occurred: {0}.

Category:
WTC

Cause:
An I/O error occurred.

Action:
Check the system memory usage.

BEA-180086
Accepted connection from the remote domain {0}.

Category:
WTC

Cause:
The connection request was received from a remote domain.

Action:
No action is required.

BEA-180087
Established a connection to a remote domain {0}.

Category:
WTC

Cause:
The connection request to a remote domain was initiated.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-180088
Error occurred while building {0} message.

Category:
WTC

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-180089
Error occurred while decoding {0} message.

Category:
WTC

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-180090
Remote domain {0} rejected the connection request.

Category:
WTC

Cause:
An error exists in the configuration.

Action:
Check both sides of the configuration, including the password, to see whether a mismatch exists in the configuration.

BEA-180091
Rejected remote domain {0} connection request.

Category:
WTC

Cause:
An error exists in the configuration.

Action:
Check both sides of the configuration, including the password, to see whether a mismatch exists in the configuration.

BEA-180092
Failed security validation with remote domain {0}.

Category:
WTC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error exists in the configuraiton, resulting in unauthorized access.

Action:
Check both sides of the configuration, including the password, to see if a mismatch exists in the configuration.

BEA-180093
Naming exception occurred during the lookup of the administrator name: {0}.

Category:
WTC

Cause:
The specified name could not be resolved.

Action:
Contact My Oracle Support.

BEA-180094
The tBridge failed to initialize the JMS targetName queue.

Category:
WTC

Cause:
The JMS targetName queue does not exist or the JMS server was not running on the system.

Action:
Correct the JMS problem and restart the WebLogic Tuxedo Connector (WTC) tBridge.

BEA-180095
The tBridge could not initialize the JMS sourceName queue.

Category:
WTC

Cause:
The sourceName queue cannot exist in JMS or the JMS server was not started.

Action:
Correct the JMS problem and restart the WebLogic Tuxedo Connector (WTC) tBridge.

BEA-180096
The tBridge could not initialize the wlsErrorDestination JMS queue.

Category:
WTC

Cause:
The JMS wlsErrorDestination queue may not be properly configured in WebLogic Server.

Action:
Correct the JMS problem and restart the WebLogic Tuxedo Connector (WTC) tBridge.

BEA-180097
Due to a translation error, the tBridge has redirected the message to the wlsErrorDestination.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
WTC

Cause:
A translation error was detected from XML-to-FML or from FML-to-XML.

Action:
Correct the message structure and resend the message.

BEA-180098
The tBridge failed to send the message to wlsErrorDestination.

Category:
WTC

Cause:
The JMS wlsErrorDestination could be full or paused.

Action:
Recover the message from the sourceName JMS queue and resend.

BEA-180099
The MinEncryptionBits is greater then the MaxEncryptionBits in {0} domain {1}.

Category:
WTC

Cause:
There is a configuration error.

Action:
Use the WebLogic Server Administration Console to modify the WebLogic Tuxedo Connector (WTC) configuration so that it will use the correct values for the MinEncryptionBits and MaxEncryptionBits.

BEA-180100
Configuration error: {0}

Category:
WTC

Cause:
There is a configuration error.

Action:
Use the WebLogic Server Administration Console to modify the WebLogic Tuxedo Connector (WTC) configuration so that it will use the correct values for the corresponding error.

BEA-180102
Duplicated local domain ID {0} found.

Category:
WTC

Cause:
Two local domains have the same ID.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Use the WebLogic Server Administration Console to modify the WebLogic Tuxedo Connector (WTC) configuration to use a unique ID for the local domain.

BEA-180103
There are two remote domains {0} with the same local domain {1}.

Category:
WTC

Cause:
Two remote domains have the same local domain.

Action:
Use the WebLogic Server Administration Console to modify the WebLogic Tuxedo Connector (WTC) configuration to remove the redundant entry or correct the configuration information.

BEA-180104
Unsupported JMS message type

Category:
WTC

Cause:
A JMS Stream or Mapped message type was sent to the tBridge.

Action:
Correct the JMS message type and resend.

BEA-180105
A message has been dropped.

Category:
WTC

Cause:
The most common cause of this failure is that an unrecognized buffer type has been received by the WTC gateway.

Action:
Modify the application to ensure that unknown buffer types are not sent to the WTC gateway.

BEA-180106
Unable to find a transaction manager. Transaction recovery will not continue.

Category:
WTC

Cause:
A transaction manager could not be found.

Action:
Contact My Oracle Support.

BEA-180107
While attempting to recover transactions, the recover method failed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
WTC

Cause:
The recover method on the WebLogic Server XA sesource generated an exception.

Action:
Contact My Oracle Support.

BEA-180108
WebLogic Server rollback had a failure: {0}.

Category:
WTC

Cause:
The rollback method on the WebLogic Server XA resource generated an exception.

Action:
Contact My Oracle Support.

BEA-180109
Internal FML to XML conversion failed.

Category:
WTC

Cause:
The FML buffer that was received from Tuxedo contained field buffer names that were not provided to WebLogic Tuxedo Connector (WTC). Therefore, the name translation failed.

Action:
Verify that the field tables have been properly transfered as described in the WTC documentation.

BEA-180110
Internal FML32-to-XML conversion failed.

Category:
WTC

Cause:
The FML32 buffer that was received from Tuxedo contained field buffer names that were not provided to the WebLogic Tuxedo Connector (WTC). Therefore, the name translation failed.

Action:
Verify that the field tables have been properly transferred as described in the WTC documentation.

BEA-180111
Internal FML to XML conversion failed.

Category:
WTC

Cause:
The FML buffer that was received from Tuxedo contained field buffer names that were not provided to the WebLogic Tuxedo Connector (WTC). Therefore, the name translation failed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify that the field tables have been properly transferred as described in the WTC documentation.

BEA-180112
Internal FML32 to XML conversion failed.

Category:
WTC

Cause:
The FML32 buffer that was received from Tuxedo contained field buffer names that were not provided to the WebLogic Tuxedo Connector (WTC). Therefore, the name translation failed.

Action:
Verify the field tables have been properly transferred as described in the WTC documentation.

BEA-180115
The tBridge cannot parse the configuration MBeans: {0}.

Category:
WTC

Cause:
The MBeans for the tBridge contain invalid attributes.

Action:
Correct the attribute definitions for the tBridge MBeans.

BEA-180116
The specified field table type {0} is incorrect.

Category:
WTC

Cause:
The WTCStartup.getFldTbls() method was called with an invalid argument.

Action:
Verify that the Type argument for this is either fml16 or fml32.

BEA-180117
The encoding {0} is not supported. JVM default encoding is used.

Category:
WTC

Cause:
Specified encoding name is not supported.

Action:
Correct the encoding name and restart WebLogic Server.

BEA-180118
Failed to find TPUSR file: {0}.

Category:
WTC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The specified file TPUSR file does not exist.

Action:
Correct the configuration by specifying the correct TPUSR file or create it before using the file.

BEA-180119
The specified filename is not a valid file: {0}.

Category:
WTC

Cause:
The WebLogic Tuxedo Connector (WTC) had the incorrect configuration.

Action:
Correct the WTC TPUSR file configuration.

BEA-180120
The file {0} is not readable.

Category:
WTC

Cause:
The user does not have the read permission to read the configured TPUSR file.

Action:
Change the permissions of the TPUSR file.

BEA-180121
Cannot find file {0}.

Category:
WTC

Cause:
The configured WebLogic Tuxedo Connector (WTC) TPUSR file does not exist.

Action:
Correct the WTC TPUSR file configuration or create the file.

BEA-180122
No permission to read the file {0}.

Category:
WTC

Cause:
The user does not have the read permission to read the configured TPUSR file.

Action:
Change the permissions of the TPUSR file.

BEA-180123
File I/O error for file {0}, reason: {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
WTC

Cause:
The file was corrupted or deleted.

Action:
Correct the file corruption or use a new TPUSR file.

BEA-180124
The specified number is not in a valid number format: {0}.

Category:
WTC

Cause:
The configured cache size was not in a valid number format.

Action:
Correct the configuration in the WebLogic Tuxedo Connector (WTC) TpUsrFile.

BEA-180132
Custom AppKey generator class {0} not found.

Category:
WTC

Cause:
The configured custom AppKey class full path name was incorrect.

Action:
Ensure that the configuration is correct and that the custom class exists.

BEA-180133
AppKey plug-in initialization failed. Reason: {0}

Category:
WTC

Cause:
The most likely reason is that the user database was not available or the initialization parameter was incorrect.

Action:
Ensure that the user database is available and that the configuration is correct.

BEA-180134
Create new AppKey class {0} instance failed.

Category:
WTC

Cause:
Either the class is not accessible, there is no permission to create a new instance of this class, or the class is not valid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the class is accessible with the correct permission. Also, the class must be based on the weblogic.wtc.jatmi.AppKey interface.

BEA-180136
The {0} attribute on the {1} MBean is undefined but required.

Category:
WTC

Cause:
The attribute value must be defined, but it was not defined.

Action:
Check that the MBean attribute is set correctly.

BEA-180137
The {0} attribute on the {1} MBean is set incorrectly.

Category:
WTC

Cause:
The attribute was defined improperly.

Action:
Check that the MBean attribute is set correctly.

BEA-180138
The {0} MBean appears to contain previously defined import service information.

Category:
WTC

Cause:
The attributes defined on this MBean have already been used to define and import a service.

Action:
Check that the Resourcename,RemoteAccessPointList, and LocalAccessPoint attributes are not all duplicated in another import MBean.

BEA-180139
A {0} type MBean is not defined, but it is required to be defined.

Category:
WTC

Cause:
An MBean was not defined, but it is required to be defined.

Action:
Check that the MBean type specified is defined in the configuration.

BEA-180141
Message header contains an invalid magic number, connection closed.

Category:
WTC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Either an invalid TDOMAIN protocol data unit was received, or the remote domain gateway did not have network encoding enabled.

Action:
Ensure that the local access point is configured with the correct port number, and that the remote gateway does not have the same MTYPE configured for this TDOMAIN session.

BEA-180142
Local domain {0} in use and cannot be deleted.

Category:
WTC

Cause:
The local domain was in use by another resource.

Action:
Check for remote domains, imported or exported services, or passwords that use this local domain.

BEA-180143
Cannot find local domain {0}.

Category:
WTC

Cause:
The local domain could not be found.

Action:
Check the access point name.

BEA-180144
Duplicate remote domain {0}. Cannot add.

Category:
WTC

Cause:
The access point name was duplicated.

Action:
Check the access points and access point IDs for existing domains.

BEA-180145
Remote domain {0} in use. Cannot delete.

Category:
WTC

Cause:
The remote domain is referenced by another resource or has an active connection.

Action:
Shut down the connection to this remote domain. Check other resources that may reference this domain.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-180146
Remote domain {0} cannot be found.

Category:
WTC

Cause:
The specified remote domain cannot be found.

Action:
Check the access point name for the remote domain.

BEA-180147
Cannot find imported service {0}.

Category:
WTC

Cause:
The specified imported service could not be found.

Action:
Check the name of the imported service.

BEA-180148
Cannot find exported service {0}.

Category:
WTC

Cause:
The specified exported service could not be found.

Action:
Check the name of the exported service.

BEA-180149
Cannot find password entry {0}.

Category:
WTC

Cause:
The specified password entry could not be found.

Action:
Check the local and remote access point names.

BEA-180150
Connection policy for {0} is INCOMING_ONLY.

Category:
WTC

Cause:
The connection policy specified INCOMING_ONLY, so an outbound connection could not be started.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the access point ID for the remote domain.

BEA-180151
Cannot modify resource {0} because it may be in use.

Category:
WTC

Cause:
There is an active connection that may use this resource.

Action:
Stop connections associated with this resource before attempting to delete the resource.

BEA-180152
Registration of notification listeners for the configured MBeans has failed.

Category:
WTC

Cause:
This is an internal system error.

Action:
Contact My Oracle Support.

BEA-180153
No valid host Internet address for WTC remote access point {0}.

Category:
WTC

Cause:
This is a configuration error.

Action:
Correct the WTC remote access point's network address list.

BEA-180154
No valid listening address configured for local access point {0}.

Category:
WTC

Cause:
This is an internal system error.

Action:
Contact My Oracle Support.

BEA-180155
No valid network address for TDomain session ({0}, {1}) to try to connect to.

Category:
WTC

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Either there is a configuration error or the remote access point was not available and cannot be accessed using the configured information.

Action:
Correct the configuration, or boot the remote access point.

BEA-180156
Failed to connect to remote access point(//{0}:{1}), try next address.

Category:
WTC

Cause:
Either a configuration error exists or the remote access point was not available at the address specified.

Action:
No action is required.

BEA-180157
Failed to connect to remote access point(//{0}:{1}), no more address to try.

Category:
WTC

Cause:
Either a configuration error exists or the remote access point was not available at the address specified.

Action:
Correct the configuration or make the remote access point available.

BEA-180158
No more valid network addresses for the local access point {0} to listen.

Category:
WTC

Cause:
There is a configuration error.

Action:
Correct the configuration.

BEA-180159
Failed to listen for local access point {0} on address (//{1}:{2}), try next address.

Category:
WTC

Cause:
Either a configuration error exists or this was intended.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-180160
Failed to create listening endpoint for local access point {0} on address (//{1}:{2}), no more addresses to try.

Category:
WTC

Cause:
There is a configuration error.

Action:
Correct the configuration.

BEA-180161
Failed to find the imported service for QSpace {0}, so the tBridge has redirected the message to the wlsErrorDestination.

Category:
WTC

Cause:
The WebLogic Tuxedo Connector (WTC) import was incorrectly configured.

Action:
Correct the configuration.

BEA-180162
Cannot find imported service {0}, so the tBridge has redirected the message to the wlsErrorDestination.

Category:
WTC

Cause:
There is a configuration error.

Action:
Correct the configuration.

BEA-180163
The received Tuxedo reply uses the unsupported buffer type {0}, so the tBridge has redirected the message to the wlsErrorDestination.

Category:
WTC

Cause:
The Tuxedo server returned a reply with an unsupported buffer type.

Action:
Modify the Tuxedo server to return the reply with a WebLogic Tuxedo Connector (WTC) supported buffer type.

BEA-180164
Failed to send message to JMS, so the tBridge has redirected the message to the WLSErrorDestination.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
WTC

Cause:
The JMS replyQ is configured incorrectly.

Action:
Correct the configuration of the JMS queue to be used for the tBridge reply queue.

BEA-180165
TDomain session ({0}, {1}) disconnected because no keep alive acknowledgement was received.

Category:
WTC

Cause:
A network outage may have occurred.

Action:
Check the network connection between the two gateways to determine if it is connected.

BEA-180166
The remote gateway does not support application level keep alive. This feature is disabled for the TDomain session ({0}, {1}).

Category:
WTC

Cause:
The remote gateway does not support this application level keep alive feature.

Action:
Update the remote gateway to a version of Tuxedo that supports the TDomain application level keep alive feature.

BEA-180167
The imported resource {0} uses a TDomain session ({1}, {2}) that does not exist.

Category:
WTC

Cause:
The imported resource was not configured properly.

Action:
Correct the configuration for the imported service.

BEA-180168
A connection cannot be established between local domain {0} and remote domain {1} due to a problem with the local or remote password used to authenticate the connections between these domains.

Category:
WTC

Cause:
The domain passwords were not configured properly.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Encrypt the correct local and remote passwords for the connection using the weblogic.wtc.gwt.genpasswd utility and use the results to configure a WTCPasswordMBean.

BEA-180169
XA.end() failed: {0}

Category:
WTC

Cause:
The transaction may have been marked as ROLLBACK_ONLY.

Action:
Inspect the application logic to determine the cause of the error.

BEA-180170
Unexpected exception while converting View {0} to XML: {1}

Category:
WTC

Cause:
Refer to the exception details.

Action:
Refer to the exception details.

BEA-180171
SSL null ciphers are not enabled and will be upgraded to the minimum 56 bits.

Category:
WTC

Cause:
The null cipher suites were disabled by SSL configuration.

Action:
This can be ignored because stronger encryption strength is allowed by WTC configuration and is also available by SSL. However, WTC configuration can be corrected to use only 56 bits and stronger cipher suites or SSL null ciphers can be enabled, if desired.

BEA-180172
SSL null ciphers are not enabled.

Category:
WTC

Cause:
The null cipher suites were disabled by SSL configuration.

Action:
Either the SSL null cipher suites must be explicitly enabled, or the WTC configuration must be updated to use stronger encryption cipher suites.

BEA-180173
Invalid private key for identity alias {0} from key store {1}, detected by {2}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
WTC

Cause:
An invalid key store or the private key alias configuration does not exist in the key store, or an incorrect private key store passphrase was configured.

Action:
Correct the key store or private key alias information in the configuration.

BEA-180174
Invalid private key store {0}, detected by {1}

Category:
WTC

Cause:
The private key store configured does not exist or is corrupted.

Action:
Correct the private key store configuration information.

BEA-180175
Invalid trust certificate store {0}, detected by {1}

Category:
WTC

Cause:
The private key store configured does not exist or is corrupted.

Action:
Correct the private key store configuration information.

BEA-180176
An error occurred while retrieving the trusted certificate from trust store {0}, detected by {1}.

Category:
WTC

Cause:
The configured trust certificate was corrupted or an incorrect passphrase was configured.

Action:
Correct the trust certificate store configuration information.

BEA-180177
An error occurred while retrieving trusted certificates from WebLogic Server, detected by {0}.

Category:
WTC

Cause:
The configured trust certificate was corrupted or an incorrect passphrase was configured.

Action:
Correct the trust certificate store configuration information.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-180178
The requested encryption strength of 256 bits of local access point {0} is not supported by LLE. Downgrade to 128 bits.

Category:
WTC

Cause:
The configured encryption strength is not supported by LLE.

Action:
Either change the encryption strength to the LLE supported strength or use SSL for connection privacy. LLE supports 0, 40, 56, and 128 bits encryption strength. SSL supports 0, 56, 128, and 256 bits encryption strength.

BEA-180179
When enabling access point {0} to support SDP, the SSL support setting for this access point was ignored.

Category:
WTC

Cause:
When SDP is configured, SSL is not supported.

Action:
No action is required if SDP support is expected. Otherwise, update the configuration to disable SDP support.

BEA-180180
An error occurred while trying to open class com.oracle.net.Sdp when WTC support for SDP was enabled.

Category:
WTC

Cause:
The current JRE does not support SDP.

Action:
Use the JRockit version of the JRE provided with this release of WebLogic Server.

BEA-190000
Initializing Java EE Connector Service.

Category:
Connector

Cause:
The Java EE Connectoor Services is currently initializing.

Action:
No action required.

BEA-190001
Java EE Connector Service initialized successfully.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Connector

Cause:
The Java EE Connector Service has initialized successfully.

Action:
No action required.

BEA-190004
ConnectionFactory not found for jndiName {0}.

Category:
Connector

Cause:
This warning can occur upon viewing the JNDI tree for the Managed Server on the Administration Console. The other likely cause for this error is that an incorrect JNDI name was specified for the desired resource adapter or that the resource adapter is not deployed.

Action:
Ignore the warning if it occurs while viewing the JNDI tree of a Managed Server. Otherwise, check the deployed connectors in the Administration Console and verify the name that was used to access it.

BEA-190005
An error occurred while creating a connection factory for ManagedConnectionFactory with jndiName {0}.

Category:
Connector

Cause:
The cause is unknown. Consult the resource adapter vendor documentation.

Action:
Examine the exception in the log for more information about how to correct the problem. You may need to refer to the resource adapter vendor documentation to determine an appropriate course of action.

BEA-190008
An error occurred while {2} the connection instance {1} for {0} resource adapter. Exception is: {3}

Category:
Connector

Cause:
This error occurred as the result of an attempt to call cleanup() or destroy() on a resource adapter managed connection. The resource adapter can generate a ResourceException if the operation fails. It can also generate an IllegalStateException if, for example, an attempt was made to clean up a connection when a transaction was in progress. A ResourceAdapterInternalException may be generated if an error condition is detected in the resource adapter.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Examine the log for the exact type of exception that was generated. In the case of an IllegalStateException, report the error to My Oracle Support. In the case of a ResourceAdapterInternalException, report the error to the resource adapter vendor.

BEA-190009
No ConnectionRequestInfo was provided for Application Managed Security Context.

Category:
Connector

Cause:
No ConnectionRequestInfo was provided for Application Managed Security Context.

Action:
No action required.

BEA-190010
Unable to determine resource principal for the container-managed security context.

Category:
Connector

Cause:
Improper security principal map configuration for resource adapter.

Action:
Check the resource adapter configuration.

BEA-190012
Component using JNDIName: {0} has {1} managed security.

Category:
Connector

Cause:
The component with the indicated JNDI name has the indicated managed security type.

Action:
No action required.

BEA-190013
An error occurred while processing context: java:/comp/env/wls-connector-resref.

Category:
Connector

Cause:
This is an internal WebLogic Server error.

Action:
Report this error to My Oracle Support.

BEA-190019
< {0} > An error occurred when opening the log file {1} for the resource adapter.

Category:
Connector

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The log file is either a directory rather than a regular file, or it could not be opened for some other reason.

Action:
Check the log-filename configuration parameter in weblogic-ra.xml.

BEA-190020
< {0} > An error occurred while setting the log file to the resource adapter.

Category:
Connector

Cause:
An error occurred when WebLogic Server called the resource adapter's ManagedConnectionFactory.setLogWriter() method.

Action:
Contact your resource adapter supplier about the ManagedConnectionFactory.setLogWriter() method.

BEA-190023
< {0} > Error invoking the ManagedConnectionFactory "set" method for the configuration property "{1}". Reason: {2}

Category:
Connector

Cause:
The method required for setting the config-property could not be properly invoked.

Action:
Check the config-property of the ra.xml file in the resource adapter and ensure that the indicated property is specified correctly.

BEA-190024
< {0} > Error making initial connections for pool. Reason: {1}

Category:
Connector

Cause:
The backend system to which the resource adapter connects may be down, or the resource adapter may be misconfigured.

Action:
Check the availability of the backend system, then confirm the correct configuration of the resource adapter.

BEA-190032
< {0} > ResourceAllocationException generated by resource adapter on call to ManagedConnectionFactory.createManagedConnection(): "{1} "

Category:
Connector

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The cause should be evident from the exception. One likely cause is a misconfigured weblogic-ra.xml or ra.xml. The property(ies) specifying the connection information may not be correct.

Action:
Check the exception to determine the cause and attempt to remedy the indicated problem. You may need to consult the configuration for the resource adapter or the resource adapter documentation. You might also consult the resource adapter vendor support information or organization.

BEA-190033
< {0} > createManagedConnection returned a null ManagedConnection.

Category:
Connector

Cause:
This generally is a resource adapter error. A resource adapter should never return a null managed connection.

Action:
Check the exception to determine the cause and attempt to remedy the indicated problem. You may need to consult the configuration for the resource adapter or the resource adapter documentation, or consult the resource adapter vendor support information or organization

BEA-190049
The connector service failed to initialize. ServiceMBean initialization error: {0}

Category:
Connector

Cause:
This error should not occur under normal operations. Possible causes of this error could be low memory, file corruption, or machine instability.

Action:
Try rebooting the machine and restarting the server again. If the problem persists, note the error details and contact My Oracle Support.

BEA-190050
An error occurred in the connector service shutdown. Error: {0}

Category:
Connector

Cause:
The error occurred as a result of shutting down a connection pool or unregistering the ServiceMBean.

Action:
Report the error to My Oracle Support.

BEA-190051
An error occurred while shutting down the connection pool with pool name: {0}. Reason: {1}

Category:
Connector

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred while shutting down the connection pool. The error occurred while unregistering the ConnectionPoolRuntimeMBean. pool name:{0}. Reason: {1}

Action:
Report the error to My Oracle Support.

BEA-190052
An error occurred while creating a connection pool Runtime MBean with pool name: {0}. Reason: {1}

Category:
Connector

Cause:
An error occurred while creating a connection pool Runtime MBean. The error occurred while initializing the ConnectionPoolRuntimeMBean. pool name:{0}. Reason: {1}

Action:
Report the error to My Oracle Support.

BEA-190053
An error occurred while creating a resource for a connection pool {0}. Reason: {1}

Category:
Connector

Cause:
Error occurred while instantiating a ConnectionRuntimeMBean for the connection being created. Pool name: {0}. Reason: {1}

Action:
Report the error to My Oracle Support.

BEA-190054
An error occurred while destroying a resource for a connection pool {0}. Reason: {1}

Category:
Connector

Cause:
An error occurred while unregistering a ConnectionRuntimeMBean for the connection being destroyed. Pool name: {0}, Reason: {1}

Action:
Report the error to My Oracle Support.

BEA-190056
An error occurred while reserving a resource from a connection pool {0}. Reason: {1}

Category:
Connector

Cause:
An error occurred while registering an XAResource for the connection being reserved with the transaction manager. Pool name:{0}. Reason: {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Report the error to My Oracle Support.

BEA-190064
Access has been denied to {0}, Application: {1}, Module: {2}, EIS Type: {3}, while reserving a connection.

Category:
Connector

Cause:
The entitlement check did not pass for the connection request to the connection pool with name: {0}.

Action:
Check your entitlement configuration in the Administration Console.

BEA-190075
The resource adapter returned a null connection factory when createConnectionFactory was called for "{0}".

Category:
Connector

Cause:
The resource adapter is not functioning according to the specification.

Action:
Contact the resource adapter vendor.

BEA-190079
The descriptor element {0} has been replaced by {1}.

Category:
Connector

Cause:
A deprecated descriptor element has been detected.

Action:
Convert the old descriptor element to the replacement element.

BEA-190080
An inactive deprecated descriptor element {0} has been detected.

Category:
Connector

Cause:
An inactive deprecated descriptor element has been detected.

Action:
Refer to the connector documentation for more information.

BEA-190081
Testing resource adapter "{0}" for viability of connection proxies.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Connector

Cause:
The indicated resource adapter is currently being tested for viability connection proxies.

Action:
No action required.

BEA-190082
Proxy test passed. WebLogic Server will use connection proxies for resource adapter "{0}".

Category:
Connector

Cause:
The proxy test passed for the incidated resource adapter.

Action:
No action required.

BEA-190084
Unable to complete connection proxy test for "{0}" due to the following exception. WebLogic Server will attempt to use connection proxies for resource adapter "{0}" as usual.

Category:
Connector

Cause:
WebLogic Server attempted to pose as an application component to determine whether a generated proxy class is compatible with a resource adapter (to support late transaction enlistment and leak and idle detection of connections). The connection proxy test failed.

Action:
No action is required.

BEA-190085
The linkref RAR {0} has been marked for late deployment since its base has not been deployed.

Category:
Connector

Cause:
The base RAR that the linkref points to has not been deployed yet.

Action:
Do not use the linkref until its base has been deployed.

BEA-190088
Trying to deploy a connector with a JNDI name that already exists {0}.

Category:
Connector

Cause:
Trying to deploy a connector with a JNDI name that already exists {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Use a unique JNDI name while deploying the connector.

BEA-190089
Unexpected error occurred while processing a resource adapter JAR file.

Category:
Connector

Cause:
The cause is unknown.

Action:
Examine the stack trace for the cause and action.

BEA-190090
Call to implementation of ManagedConnection.getLocalTransaction in resource adapter with jndiName = {1} failed: {0}

Category:
Connector

Cause:
Refer to the error message for more information.

Action:
See the error message for more information. If it is still unclear, contact the resource adapter vendor or My Oracle Support.

BEA-190091
Call to implementation of ManagedConnection.getXAResource in resource adapter with jndiName = {1} failed: {0}

Category:
Connector

Cause:
Refer to the error message for more information.

Action:
Refer to the error message for more information. If still unclear, contact the resource adapter vendor or My Oracle Support.

BEA-190092
An error occurred while reserving a resource from a connection pool {0}. Reason: {1}

Category:
Connector

Cause:
An error occurred while registering a non-XAResource for the connection being reserved with the transaction manager. pool name:{0}. Reason: {1}

Action:
Report this error to My Oracle Support.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-190097
Unable to complete the connection proxy test for "{0}" due to an exception. WebLogic Server will attempt to use connection proxies for resource adapter "{0}" as usual. Exception: {1}

Category:
Connector

Cause:
WebLogic Server attempted to pose as an application component to determine whether a generated proxy class is compatible with a resource adapter (to support late transaction enlistment and leak and idle detection of connections). The connection proxy test failed.

Action:
No action is required.

BEA-190098
Trying to release a resource that has already been released for {0}.

Category:
Connector

Cause:
Trying to release a resource that has already been released for {0}. It is possible that the connection was already released due to an error that occurred with the connection.

Action:
No action is required.

BEA-190099
Attempting to close a connection that has already been closed for {0}.

Category:
Connector

Cause:
An attempt was made to close a connection that has already been closed for {0}.

Action:
No action is required.

BEA-190100
A close() method was not found on the connection handle while testing for the viability for connection proxies : {0}

Category:
Connector

Cause:
A close() method was not found on the connection handle while testing for the viability for connection proxies : {0}. As per the 1.0 specification, a close() method is required on the connection handle.

Action:
Implement a close() method for the connection handle.

BEA-190101
Linkrefs are deprecated for 1.0 resource adapters: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Connector

Cause:
Linkrefs are deprecated for 1.0 resource adapters.

Action:
No action is required.

BEA-190102
Failed to unregister the Diagnostic Image for the Connector Service.

Category:
Connector

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-190103
Failed to register the Diagnostic Image for the Connector Service.

Category:
Connector

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-190104
While configuring an object of type: {0} of Resource Adapter {1}, the following errors/omissions were found: {2}

Category:
Connector

Cause:
Properties have been specified in a resource adapter deployment descriptor which are inconsistent with those defined by the resource adapter code. There may be properties specified in the descriptor that do no exist in the object or are of the wrong type.

Action:
Check that the specified properties are spelled properly. Check with the resource adapter documentation or the vendor to determine whether or not these warnings can be ignored.

BEA-190105
Failed to initialize the AnonymousSubject.

Category:
Connector

Cause:
See the message detail.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check for other log messages that give more information about the failure.

BEA-190106
Failed to find the RuntimeMBean for the module: {0}

Category:
Connector

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-190107
Failed to unregister the RuntimeMBean for the module: {0}

Category:
Connector

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-190108
Failed to initialize the Jndi Subcontexts for the adapter: appId = {0}, {1}

Connector

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-190112
Failed to register the XAResource to be used for recovery: {0}

Category:
Connector

Cause:
See the error description in the message body.

Action:
See the stack trace and report the error to My Oracle Support.

BEA-190113
Failed to Unregister the XAResource used for recovery: {0}

Category:
Connector

Cause:
See the error description in the message body.

Action:
See the stack trace and report the error to My Oracle Support.

BEA-190114
Failed to apply dynamic pool changes: {0}

Category:
Connector

Cause:
See the error description in the message body.

Action:
See the error description in the message body.

BEA-190115
The ManagedConnectionFactory class does not implement the ResourceAdapterAssociation interface: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Connector

Cause:
See the error in the message body for information.

Action:
Please contact the resource adapter vendor and notify them of this error condition.

BEA-190116
An invalid event was triggered on the XAResource used for recovery: {0}

Category:
Connector

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-190117
Invocation of ManagedConnection.cleanup() failed: {0}

Category:
Connector

Cause:
See the error in the message body for information.

Action:
Examine the stack trace and error message for more information.

BEA-190118
ConnectionErrorOccurred event was triggered: {0}

Category:
Connector

Cause:
The adapter has indicated an error occurred on the exception.

Action:
Examine the stack trace and error message for more information.

BEA-190119
Invocation of ManagedConnection.destroy() failed: {0}

Category:
Connector

Cause:
The implementation of the resource adapter's cleanup() method threw an exception.

Action:
Examine the stack trace and error message for more information.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-190120
Invocation of ManagedConnection.getXAResource() returned null.

Category:
Connector

Cause:
The implementation of the resource adapter's getXAResource() returned null.

Action:
Please contact the resource adapter vendor to determine why getXAResource() returned null.

BEA-190121
Failed to dissociate the Connection Handles from a ManagedConnection: Adapter JndiName = {0}, {1}

Category:
Connector

Cause:
See the stack trace for details about the cause of this error.

Action:
Take appropriate action based on the information in the stack trace.

BEA-190122
The resource adapter passed a null ManagedConnection into WebLogic Server''s implementation of ConnectionManager.lazyEnlist().

Category:
Connector

Cause:
The resource adapter's implementation passed a null ManagedConnection into the lazyEnlist() method.

Action:
Please notify the resource adapter's vendor about this error.

BEA-190123
Outbound adapter for jndiName = {0}, is using sharing scope = {1}.

Category:
Connector

Cause:
The outbound adapter with the indicated JNDI name is using the indicated sharing scope.

Action:
No action required.

BEA-190124
Failed to deploy LinkRef Adapter, moduleName = {0}, baseRA = {1}, Exception: {2}

Category:
Connector

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:

BEA-190149
No JNDI Name has been specified for the resource adapter in module {0} of application {1}. Since this is an inbound resource adapter, <jndi-name> must also be specified in weblogic-ra.xml for endpoint activation by a message endpoint MDB to work.

Category:
Connector

Cause:
There is a missing <jndi-name> element in weblogic-ra.xml.

Action:
Specify the <jndi-name> in weblogic-ra.xml that corresponds to the JNDI name expected by the MDB that is using this inbound resource adapter.

BEA-190150
The process of creating the Connector Diagnostic Image has been timed out by the Diagnostic Framework. The resulting image may be incomplete.

Category:
Connector

Cause:
The process of creating the Connector Diagnostic Image has been timed out by the Diagnostic Framework.

Action:
Please investigate the contents of the log and Diagnostic Images for more information.

BEA-190151
Parsing error, buildOutboundResourceAdapter() error in parsing ra.xml. While looking for connectionfactory-interface, failed to find: "{0}"

Category:
Connector

Cause:
There is an error in the XML configuration for this adapter.

Action:
Please contact the vendor to obtain a resource adapter with a valid configuration.

BEA-190152
Failed to create a new ConnectorInboundRuntimeMBeanImpl for "{0}", {1}

Category:
Connector

Cause:
See the error in the logged message for more information.

Action:
See the error in the logged message for more information.

BEA-190153
Failed to close the logging stream for pool: "{0}", {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Connector

Cause:
See the error in the logged message for more information.

Action:
See the error in the logged message for more information.

BEA-190154
Failed to create the logging stream for pool: "{0}", {1}

Category:
Connector

Cause:
See the error in the logged message for more information.

Action:
See the error in the logged message for more information.

BEA-190155
Compliance checking and validation of the resource adapter {0} resulted in the following warnings: {1}

Category:
Connector

Cause:
The specified resource adapter failed to pass compliance and validity checking as indicated by the listed warnings and errors.

Action:
Correct the ra.xml, weblogic-ra.xml or the resource adapter archive.

BEA-190156
There were no compliance or validation errors found in the resource adapter {0}.

Category:
Connector

Cause:
No compliance or validation errors were found in the indicated resource adapter.

Action:
No action required.

BEA-190157
There were {1} critical compliance or validation error(s), {2} non-critical compliance or validation error(s), and {3} warning(s) found in the resource adapter {0}.

Category:
Connector

Cause:
This message is logged to incidate the number of errors and warnings that were found for the indicated resource adapter.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action required.

BEA-190158
This is a link ref resource adapter for {0}. No validation can be done at this time.

Category:
Connector

Cause:
Since there is no ra.xml in this resource adapter, validation of the adapter cannot be performed until it and the base adapter are deployed.

Action:
No action is required.

BEA-190159
Connection Pool {0} has been reset.

Category:
Connector

Cause:
The indicated connection pool was reset.

Action:
No action required.

BEA-190160
Connection pool {0} is in use and cannot be reset. Try forceReset instead.

Category:
Connector

Cause:
Since there are connections reservered from connection pool {0}, reset of the pool cannot be performed.

Action:
Try forceReset instead.

BEA-190161
Failed to extract adapter {0} to server temporary directory due to exception {1}.

Category:
Connector

Cause:
Extraction of the adapter {0} to server temporary directory failed due to the exception.

Action:
Check the permissions on the server temporary directory or check the exception.

BEA-190162
Failed to create server temporary directory {1} while extracting adapter {0}.

Category:
Connector

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Creation of the server temporary directory {1} failed while extracting the adapter {0}.

Action:
Check the permissions on the server temporary directory.

BEA-199000
Only positive values are allowed for initial-capacity unless initial and max capacity are equal.

Category:
Connector

Cause:
Refer to the message body and exception for more information.

Action:
Refer to the message body and exception for more information.

BEA-199001
Zero value for max-capacity is allowed only for link-ref adapters.

Category:
Connector

Cause:
The max-capacity is zero.

Action:
Check the max-capacity and update it.

BEA-199002
Negative values are not allowed for max-capacity.

Category:
Connector

Cause:
The max-capacity is negative.

Action:
Check the max-capacity and update it.

BEA-199003
max-capacity should be greater than or equal to initial-capacity. {0}

Category:
Connector

Cause:
The max-capacity is less than initial-capacity.

Action:
Check the max-capacity and update it.

BEA-199004
Only positive values are allowed for capacity-increment.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Connector

Cause:
The capacity-increment is zero or negative.

Action:
Check the capacity-increment and update it.

BEA-199005
capacity-increment should be less than or equal to (max_capacity-initial_capacity). {0}

Category:
Connector

Cause:
The capacity-increment is greater than max_capacity-initial_capacity.

Action:
Check the capacity-increment and update it.

BEA-199006
Only positive values are allowed for shrink-frequency-seconds.

Category:
Connector

Cause:
The shrink-frequency-seconds is zero or negative.

Action:
Check the shrink-frequency-seconds.

BEA-199007
Only values greater than or equal to 0 are allowed for inactive-connection-timeout-seconds.

Category:
Connector

Cause:
The value of inactive-connection-timeout-seconds must be positive.

Action:
Please check the inactive-connection-timeout-seconds.

BEA-199010
No ra.xml or weblogic-ra.xml has been specified. The RAR is null and there is no alternate descriptor.

Category:
Connector

Cause:
The deployment descriptor for this adapter cannot be found.

Action:
Define the deployment descriptor in ra.xml or weblogic-ra.xml or an annotation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-199011
No ra.xml or weblogic-ra.xml has been specified.

Category:
Connector

Cause:
The deployment descriptor for this adapter could not be found.

Action:
Define the deployment descriptor in ra.xml or weblogic-ra.xml.

BEA-199012
Unable to find the schema.

Category:
Connector

Cause:
The schema could not be found.

Action:
Check the location of the schema for the XML file.

BEA-199013
Application {0} does not have any components in it.

Category:
Connector

Cause:
The application does not contain any components.

Action:
Add components in the application and define them in the deployment descriptor.

BEA-199014
Application {0} is a RAR file, but it contains more than 1 component.

Category:
Connector

Cause:
The application contains multiple adapter components.

Action:
Check the deployment descriptor or the annotation.

BEA-199015
Error occurred while trying to rollback the module: {0}

Category:
Connector

Cause:
The module cannot be rolled back. See the reported error for the cause.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Examine the exception in the log for more information about how to correct the problem.

BEA-199016
Unable to create runtime MBean for connector: Module "{0}", {1}

Category:
Connector

Cause:
The runtime MBean cannot be created. See the reported error for the cause.

Action:
Examine the exception in the log for more information about how to correct the problem.

BEA-199017
Error closing virtual JAR file for {0}, {1}

Category:
Connector

Cause:
The virtual JAR file cannot be closed. See the reported error for the cause.

Action:
Examine the exception in the log for more information about how to correct the problem.

BEA-199018
Error creating virtual JAR file for {0}, {1}

Category:
Connector

Cause:
The virtual JAR file cannot be created. See the reported error for the cause.

Action:
Examine the exception in the log for more information about how to correct the problem.

BEA-199019
Failed to initialize the connector-specific JNDI sub-contexts for the application, {0}, {1}

Category:
Connector

Cause:
The connector-specific JNDI sub-contexts cannot be initialized. See the reported error for the cause.

Action:
Examine the exception in the log for more information about how to correct the problem.

BEA-199020
Failed to prepare changes for dynamic update, {0}, {1}

Category:
Connector

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Changes for dynamic update cannot be prepared. See the reported error for the cause.

Action:
Examine the exception in the log for more information about how to correct the problem.

BEA-199021
JNDI name is null or empty.

Category:
Connector

Cause:
The JNDI name must contain characters that are not spaces.

Action:
Check the JNDI name.

BEA-199022
Unable to get InitialContext while attempting to verify JNDI name of a resource adapter object.

Category:
Connector

Cause:
Failed to create the InitialContext.

Action:
Check the environment properties of the InitialContext.

BEA-199023
ResourceLink is null or empty.

Category:
Connector

Cause:
ResourceLink is null or empty.

Action:
Check the ResourceLink.

BEA-199024
Unable to get InitialContext while attempting to verify resource link of resource adapter.

Category:
Connector

Cause:
The InitialContext cannot be created.

Action:
Check the environment properties of the InitialContext.

BEA-199028
Resource Adapter with JNDIName: {0} already deployed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Connector

Cause:
Multiple apdaters are deployed with the same JNDI name.

Action:
Change the adapter's JNDI name in deployment descriptor.

BEA-199029
Bind operation failed: {0}, {1}

Category:
Connector

Cause:
The JNDI name cannot be bound. See the reported error for the cause.

Action:
Examine the exception in the log for more information about how to correct the problem.

BEA-199031
Failed to unbind the ConnectionFactory, {0}, {1}

Category:
Connector

Cause:
The ConnectionFactory cannot be unbound. See the reported error for the cause.

Action:
Examine the exception in the log for more information about how to correct the problem.

BEA-199032
Unable to getInitialContext() during unbindConnectionFactory, {0}

Category:
Connector

Cause:
The getInitialContext() method cannot be called. See the reported exception for the cause.

Action:
Examine the exception in the log for more information about how to correct the problem.

BEA-199036
ResourceLink: {0} already bound into application-scoped JNDI tree.

Category:
Connector

Cause:
The ResourceLink has been bound into the JNDI tree.

Action:
Change the JNDI name of ResourceLink.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-199037
Unable to bind to the app-scoped jndi tree: {0}#{1} : {2}

Category:
Connector

Cause:
The ResourceLink cannot be bound. See the reported error for the cause.

Action:
Examine the exception in the log for more information about how to correct the problem.

BEA-199038
NamingException while trying to unbind references during unbindAdminObject of resource adapter, {0}

Category:
Connector

Cause:
AdminObjects cannot be unbound. See the reported error for the cause.

Action:
Examine the exception in the log for more information about how to correct the problem.

BEA-199039
Unable to get the connection factory for {0}. Verify that the resource adapter has been deployed.

Category:
Connector

Cause:
The connection factory cannot be found.

Action:
Verify that the resource adapter has been deployed.

Action:
No action is required if this behavior is expected.

BEA-199187
Found {2} constraint violation error(s) for {0} on instance [{1}]: {3}

Category:
Connector

Cause:
Bean Validation failed and got constraint violation errors.

Action:
Check the adapter configuration.

BEA-199188
Bean validation failed when validating for {0} on bean instance [{1}]. Exception: {2}

Category:
Connector

Cause:
Bean validation failed.

Action:
Check the adapter configuration and exception details.

BEA-199189
A long-running work submission has been rejected because the count of current active long-running work requests has reached the MaxConcurrentLongRunningRequests limit {0}.

Category:
Connector

Cause:
A long-running work submission was rejected because the count of current active long-running work requests has reached the MaxConcurrentLongRunningRequests limit {0}.

Action:
Check the adapter configuration and increase MaxConcurrentLongRunningRequests if necessary.

BEA-199190
The max-concurrent-long-running-requests limit was changed from {0} to {1}.

Category:
Connector

Cause:
The configuration was changed or initialized.

Action:
No action is required.

BEA-199191
Warning: Caller application {2} defines a shareable resource reference {1} to outbound connection pool {0}, but the pool does not support share by its design either because its

Copyright © 2000, 2026, Oracle and/or its affiliates.

transaction support level is NOTransaction or the ManagedConnectionFactory class has the @Unshareable annotation. Will treat as unshareable.

Category:
Connector

Cause:
An invalid resource reference definition was made to an unshareable ConnectionFactory.

Action:
Change the SharingScope of the resource reference definition to Unshareable.

BEA-199192
Warning: Caller application {2} defines a resource reference {1} to outbound connection pool {0} without defining SharingScope explicitly. The pool does not support share by its design either because its transaction support level is NOTransaction or the ManagedConnectionFactory class has the @Unshareable annotation. Will treat as unshareable.

Category:
Connector

Cause:
An invalid resource reference definition was made to an unshareable ConnectionFactory.

Action:
Change the SharingScope of the resource reference definition to Unshareable.

BEA-199193
ManagedConnection {0} of connectionInfo {1} in Connection Pool {2} has been destroyed already. Previous destroy stacktrace: {3} New destroy stacktrace: {4}

Category:
Connector

Cause:
The ManagedConnection was destroyed again.

Action:
Check the server log.

BEA-199194
Resource adapter generated unexpected exception during work event notification for event {0}. Ignored. Exception: {1}

Category:
Connector

Cause:
The resource adapter generated an unexpected exception during work event notification.

Action:
Check the work event processing codes of the resource adapter.

BEA-199195
Connector annotation scan: Ignored unexpected error [{2}] when processing annotations on {0} while {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Connector

Cause:
Check the error message and stacktrace to determine the cause.

Action:
Check error message and stacktrace to determine the appropriate action to take.

BEA-199196
Ignore @javax.resource.Connector annotation on class {0} since ResourceAdapter Bean {1} is already specifed in ra.xml.

Category:
Connector

Cause:
ra.xml already specifies the ResourceAdapter bean to use.

Action:
No action is required if this behavior is expected.

BEA-199197
An exception occurred when removing admin object {0}. Exception is: {1}

Category:
Connector

Cause:
This exception occurs as the result of an attempt to unbind the admin object from JNDI.

Action:
Examine the log for the exact exception. Report the error to My Oracle Support.

BEA-199198
An exception occurred when invoking preDestroy on {0}: {1}. Exception is: {1}

Category:
Connector

Cause:
This exception occurs as the result of the CDI container calling the preDestroy method.

Action:
Examine the log for the exact exception. You may need to report the error the resource adapter vendor.

BEA-199199
The work was rejected because it has expired before WorkManager executed it.

Category:
Connector

Cause:
The time value for the startTimeout argument is too short. The WorkManager cannot start the work within the specified time period.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Increase the time value for the startTimeout argument and ensure that it is big enough for WarkManager to start the work.

BEA-199200
Annotation scan/process of the resource adapter {0} resulted in the following {1} warnings: {2}

Category:
Connector

Cause:
The specified resource adapter failed to pass the annotation scan/process as indicated by the listed warnings.

Action:
Check warning messages and fix the annotations that are involved.

BEA-199201
Failed to merge resource adapter {0} when processing annotations due to {1} error(s) found.

Category:
Connector

Cause:
Failed to merge resource adapter {0} when processing annotations due to {1} error(s) found.

Action:
Check the errors and fix them.

BEA-199202
Ignored unexpected exception [{1}] when unregistering runtime mbean {0}.

Category:
Connector

Cause:
Check error message and stack trace to figure out the cause.

Action:
Take appropriate action based on the cause determined from the reported error message and stack trace.

BEA-199211
Compliance checking and validation of the resource adapter {0} resulted in the following non-critical errors: {1}

Category:
Connector

Cause:
The specified resource adapter failed to pass compliance and validity checking as indicated by the listed warnings and errors.

Action:
Correct the ra.xml or weblogic-ra.xml files, or check the resource adapter archive.

BEA-199212
Failed to create connection pool [{0}] due to error: {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Connector

Cause:
Check the reported error message and stack trace to determine the cause.

Action:
Take appropriate action based on the cause determined from the reported error message and stack trace.

BEA-199213
A new error occurred when trying to destroy a connection pool [{0}] that was previously in a failed state : the following new error will be ignored: {1}

Category:
Connector

Cause:
Check the error message and stack trace to determine the cause.

Action:
Take appropriate action based on the cause determined from the reported error message and stack trace.

BEA-199214
The connection pool [{0}] was in a HEALTH_CRITICL state already, therefore this method call is not allowed.

Category:
Connector

Cause:
Check the error message and stack trace to determine the cause.

Action:
Take appropriate action based on the cause determined from the reported error message and stack trace.

BEA-199215
The connection pool [{0}] will move to a HEALTH_CRITICAL state because the adapter is not in deploy-as-a-whole mode. This pool failed due to errors: {1}

Category:
Connector

Cause:
Check the error message and stack trace to determine the cause.

Action:
Take appropriate action based on the cause determined from the reported error message and stack trace.

BEA-199216
An error occurred when performing action {2} on connection pool [{0}]. The following error will be ignored: {1}

Category:
Connector

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Check the error message and stack trace to determine the cause.

Action:
Take appropriate action based on the cause determined from the reported error message and stack trace.

BEA-199217
Connection pool [{0}] has validation errors and cannot be reset. Try to fix all validation errors and then do a dynamic update or redeploy this adapter.

Category:
Connector

Cause:
Check the error message and stack trace to determine the cause.

Action:
Try to fix all validation errors and then do a dynamic update or redeploy this adapter.

BEA-199218
Unable to determine whether properties were changed for Connection pool [{0}]. If there are changed properties, they may be ignored during a dynamic update: {1}

Category:
Connector

Cause:
Check the error message and stack trace to determine the cause.

Action:
Try to fix all validation errors and then do a dynamic update or redeploy this adapter.

BEA-199219
Invalid shrink threshold value {0} specified for the system property weblogic.connector.cmm.shrinkThreshold. Value must be between 0 and 10 (inclusive).

Category:
Connector

Cause:
The value of the system property weblogic.connector.cmm.shrinkThreshold is invalid.

Action:
Check the value of the system property weblogic.connector.cmm.shrinkThreshold. Ensure that it is between 0 and 10 (inclusive). A value of 0 indicates that the connector will not take any action on any memory pressure level.

BEA-199220
Failed to parse the string for UniversalResourceKey: {0}.

Category:
Connector

Cause:
The UniversalResourceKey string representation is incorrect.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Take appropriate action based on the cause determined from the reported error message and stack trace.

BEA-199221
Failed to parse the defining application information for UniversalResourceKey: {0}.

Category:
Connector

Cause:
The UniversalResourceKey string representation is incorrect.

Action:
Take appropriate action based on the cause determined from the reported error message and stack trace.

BEA-199222
The UniversalResourceKey is defined by application information: {1}#{2}#{3}, but its JNDI name {0} has the wrong name space.

Category:
Connector

Cause:
An application-defined resource has an invalid JNDI name.

Action:
Check the name field of @ConnectionFactoryDefinition/@AdministeredObjectDefinition or the equivalent deployment descriptor element. Ensure that it has a valid JNDI name space.

BEA-199223
The name space of a JNDI name {0} does not match its application information: {1}#{2}#{3}

Category:
Connector

Cause:
An application-defined resource has an invalid JNDI name.

Action:
Check the name field of @ConnectionFactoryDefinition/@AdministeredObjectDefinition or the equivalent deployment descriptor element. Ensure that it has a valid JNDI name space.

BEA-199224
JNDI name {0} has prefix of 'java:', but has no defining application information.

Category:
Connector

Cause:
An invalid JNDI name was specified for a resource.

Action:
Check the jndi-name field of the resource and ensure that it has a valid JNDI name.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-199300
Cannot find Connection Definition via interfaceName:{0} from Resource Adapter:{1}. The application information: {2}#{3}#{4} The JNDI name:{5}

Category:
Connector

Cause:
The interfaceName field may be filled incorrectly for the ConnectionFactoryDefinition annotiation or the equivalent deployment descriptor.

Action:
Use the correct interfaceName for the ConnectionFactoryDefinition annotation or the equivalent deployment descriptor.

BEA-199301
Cannot find AdminObject definition in Resource Adapter {0} with className: {1} and interfaceName: {2} The application information: {3}#{4}#{5} The JNDI name:{6}

Category:
Connector

Cause:
Either the className field or the interfaceName field contains an incorrect value.

Action:
Fill the className or interfaceName field or both with the correct value.

BEA-199302
Cannot determine the AdminObject interface from class:{0} from Resource Adapter:{1} The application information: {2}#{3}#{4} The JNDI name:{5}

Category:
Connector

Cause:
1. The interfaceName field has no entry. 2. An incorrect className field was used for AdminObject.

Action:
1. Fill the interfaceName field with a valid value. 2. Fill the className field with the correct value.

BEA-199303
The connector resource {4} is defined in application: {1}#{2}#{3}. The corresponding resource adapter {0} is not globally accessible and is not in the same application with {1}.

Category:
Connector

Cause:
The resource adapter's deployment descriptor is not accessible from the component that defines the connector resource.

Action:
1. Use another resource adapter for the connector resource. 2. Update the resource adapter's deployment descriptor, and ensure that it is accessible from the component that defines the connector resource.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-199304
Failed to export object of class:{0} from Resource Adapter:{1} The application information: {2}#{3}#{4} The JNDI name:{5}

Category:
Connector

Cause:
Check the logs for the cause of this exception.

Action:
Inspect the cause and take appropriate action.

BEA-199305
Duplicated resource definition for Resource Adapter:{0} The application information: {1}#{2}#{3} The JNDI name:{4}

Category:
Connector

Cause:
Check the logs for the cause of this exception.

Action:
Inspect the cause and take appropriate action.

BEA-199306
At least one application-defined resource is found for Resource Adapter:{0} The application information: {1}#{2}#{3} The JNDI name:{4}

Category:
Connector

Cause:
The resource adapter cannot be undeployed when an application-defined resource exists.

Action:
Undeploy the application first.

BEA-199307
Failed to unexport object: {0} which JNDI name is {1}

Category:
Connector

Cause:
Check the logs for the cause of this exception.

Action:
Inspect the cause and take appropriate action.

BEA-199308
Failed to find PartitionRuntimeMBean for the partition {0}.

Category:
Connector

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Check the logs for the cause of this exception.

Action:
Inspect the cause and take appropriate action.

BEA-199309
Unable to register runtime MBean for connector: {0}.

Category:
Connector

Cause:
The runtime MBean cannot be registered. See the reported error for the cause.

Action:
Examine the exception in the log for more information about how to correct the problem.

BEA-199310
Failed to lookup JNDI name: {3}. This resource is defined in application: {0}#{1}#{2}.

Category:
Connector

Cause:
The corresponding resource adapter may not be activated.

Action:
Check the status of the corresponding resource adapter and activate it or take other appropriate action.

BEA-199311
Failed to find Resource Adapter:{0} The application information: {1}#{2}#{3} The JNDI name: {4}

Category:
Connector

Cause:
Check the logs for the cause of this exception.

Action:
Inspect the cause and take appropriate action.

BEA-199312
At least one of the permissions declared in permissions.xml is not allowed.

Category:
Connector

Cause:
Check the permissions.xml configuration for the cause of this exception.

Action:
Inspect the cause and take appropriate action.

BEA-199313
Application classloader is used for loading resource adaptor {1}"s classes in application {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Connector

Cause:
<enable-ee-compliant-classloading-for-embedded-adapters> is set to true.

Action:
No action is required.

BEA-199314
Resource adaptor"s classloader is used for loading resource adaptor {1}"s classes in application {0}. This classloader is the child classloader of the application classloader.

Category:
Connector

Cause:
<enable-ee-compliant-classloading-for-embedded-adapters> is set to false.

Action:
No action is required.

BEA-199315
The <classloader-structure> configuration in application {0}"s weblogic-application.xml is ignored by resource adapter {1} because resource adapter {1}"s <enable-global-access-to-classes> is set to true.

Category:
Connector

Cause:
<enable-global-access-to-classes> is set to true.

Action:
No action is required.

BEA-199316
Failed to destroy pool [{0}] due to error: {1}

Category:
Connector

Cause:
Check the reported error message and stack trace to determine the cause.

Action:
Take appropriate action based on the cause determined from the reported error message and stack trace.

BEA-199317
Failed to create admin object [{0}] due to error: {1}

Category:
Connector

Cause:
Check the reported error message and stack trace to determine the cause.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Take appropriate action based on the cause determined from the reported error message and stack trace.

BEA-199318
It is not supported to access connector resource outside server {0} which defines the resource, current server is {1}.

Category:
Connector

Cause:
Check the reported error message and stack trace to determine the cause.

Action:
Take appropriate action based on the cause determined from the reported error message and stack trace.

BEA-199319
It is not supported to access resource adapter outside partition {0} which defines the resource, current partition is {1}.

Category:
Connector

Cause:
Check the reported error message and stack trace to determine the cause.

Action:
Take appropriate action based on the cause determined from the reported error message and stack trace.

BEA-200000
Failed to initialize the messaging bridge service.

Category:
MessagingBridge

Cause:
Most of the time, this results from configuration errors.

Action:
Check the configuration file and reboot the system.

BEA-200001
The messaging bridge service has successfully shut down.

Category:
MessagingBridge

Cause:
This message indicates that the messaging bridge service has been shut down, either at the request of the administrator or due to errors.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-200002
Failed to deploy the messaging bridge "{0}" because the messaging bridge service is shut down.

Category:
MessagingBridge

Cause:
This message indicates that the messaging bridge service has been shut down, either at the request of the administrator or due to errors.

Action:
Reboot the system.

BEA-200003
Failed to deploy the messaging bridge "{0}" due to error: {1}.

Category:
MessagingBridge

Cause:
This is likely due to configuration errors or an internal WebLogic Server error as indicated in the message body.

Action:
Check the configuration file, and reboot the server.

BEA-200004
The messaging bridge "{0}" has been successfully deployed.

Category:
MessagingBridge

Cause:
This message indicates that the messaging bridge has been successfully deployed.

Action:
No action is required.

BEA-200005
Failed to start messaging bridge "{0}" due to error: {1}

Category:
MessagingBridge

Cause:
This is likely due to configuration errors or an internal WebLogic Server error, as indicated in the message body.

Action:
Check the configuration file, and reboot the server.

BEA-200008
Bridge "{0}" does not have a configured source destination.

Category:
MessagingBridge

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is likely due to configuration errors.

Action:
Update the configuration, and restart the server.

BEA-200009
Bridge "{0}" does not have a configured target destination.

Category:
MessagingBridge

Cause:
This is likely due to configuration errors.

Action:
Update the configuration, and restart the server.

BEA-200011
The bridge "{0}" failed to find the adapter "{1}". The bridge will periodically retry to look up the adapter. If this message stops reappearing, it means that the bridge has finally successfully found the adapter.

Category:
MessagingBridge

Cause:
One of the adapters was not deployed.

Action:
Deploy the required adapters.

BEA-200012
Bridge "{0}" successfully found the adapters that are configured for it.

Category:
MessagingBridge

Cause:
This message indicates that the bridge successfully found the adapters.

Action:
No action is required.

BEA-200013
Invalid properties are defined for the source destination of bridge "{0}".

Category:
MessagingBridge

Cause:
The configuration was invalid.

Action:
Update the configuration, and restart the server.

BEA-200014
Invalid properties are defined for the target destination of bridge "{0}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
MessagingBridge

Cause:
The configuration was invalid.

Action:
Update the configuration, and restart the server.

BEA-200015
An error occurred in bridge "{0}" during the transfer of messages ({1}).

Category:
MessagingBridge

Cause:
An error occurred on one of the bridge destinations.

Action:
Check the system on both the source and target sides, and restart the server.

BEA-200020
Bridge "{0}" is stopped.

Category:
MessagingBridge

Cause:
This message indicates that the messaging bridge has stopped.

Action:
No action is required.

BEA-200021
Bridge "{0}" failed to get one of the adapters from JNDI ({1}).

Category:
MessagingBridge

Cause:
At least one adapter was not deployed when the bridge started. It is also possible that the JNDI names configured in the bridge destinations do not match the ones in the adapter deployment descriptor file.

Action:
Check to see if the adapter(s) required by the source and target destinations are deployed on the server where the bridge is configured. Ensure that the JNDI name in the adapter deployment descriptor file matches the one in the configuration of the bridge destinations. Otherwise, no action is required. The bridge will automatically try again later.

BEA-200022
Bridge "{0}" failed to obtain adapter metadata ({1}).

Category:
MessagingBridge

Cause:
This is an internal WebLogic Server error that should not occur.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-200024
Bridge "{0}" refused to obtain connections and transfer any messages, because it has been stopped, suspended, or is shutting down.

Category:
MessagingBridge

Cause:
The administrator has shut down or stopped the bridge, or the bridge is suspended for migration.

Action:
No action is required.

BEA-200025
Bridge "{0}" failed to start because the quality of service configured ({1}) is unreachable. This is likely due to an invalid configuration or adapter limitations.

Category:
MessagingBridge

Cause:
The configuration does not match the ability of the adapters and underlying systems.

Action:
Change the configuration of the bridge with a reachable quality of service, or turn on the QOSDegrationAllowed boolean.

BEA-200026
Bridge "{0}" encountered problems in one of its adapters or underlying systems. It stopped transferring messages and will try to reconnect to the adapters shortly. (The exception that occurred was {1})

Category:
MessagingBridge

Cause:
There was a problem in receiving or sending messages to one of the sides of the bridge.

Action:
No action is required.

BEA-200027
Bridge "{0}" works in asynchronous mode and has not received messages for the predefined maximum idle time. The connections to the adapters will be interrupted and reestablished.

Category:
MessagingBridge

Cause:
This may occur because the source destination is empty or because the connection to the source was stale and needs to be reestablished.

Action:
Check the source system.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-200028
The bridge "{0}" has started transferring messages.

Category:
MessagingBridge

Cause:
This message indicates that the bridge has just started transferring messages.

Action:
No action is required.

BEA-200030
Bridge "{0}" is configured to work in "{1}" mode, but it is actually working in "{2}" mode.

Category:
MessagingBridge

Cause:
This message reveals what quality of service the bridge is actually providing.

Action:
No action is required.

BEA-200031
Bridge "{0}" is configured to allow degradation of its quality of service in cases where the configured quality of service cannot be reached.

Category:
MessagingBridge

Cause:
This message indicates that the quality of service of this bridge is allowed to be downgraded if the required one is unreachable.

Action:
No action is required.

BEA-200032
Bridge "{0}" is configured to disallow degradation of its quality of service in cases where the configured quality of service is unreachable.

Category:
MessagingBridge

Cause:
This message indicates that the quality of service of the bridge is not allowed to be downgraded.

Action:
No action is required.

BEA-200033
Bridge "{0}" is obtaining connections to the two adapters.

Category:
MessagingBridge

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This message indicates that the messaging bridge is obtaining connections to the two adapters.

Action:
No action is required.

BEA-200034
Bridge "{0}" is shut down.

Category:
MessagingBridge

Cause:
This message indicates that the messaging bridge is shut down.

Action:
No action is required.

BEA-200035
Bridge "{0}" has been started from the stopped mode.

Category:
MessagingBridge

Cause:
This message indicates that the bridge was in stopped mode and has just been restarted.

Action:
No action is required.

BEA-200036
The started attribute of bridge "{0}" has been changed from "{1}" to "{2}".

Category:
MessagingBridge

Cause:
This is due to a configuration change.

Action:
No action is required.

BEA-200037
The "{1}" attribute of bridge "{0}" has been changed from "{2}" to "{3}".

Category:
MessagingBridge

Cause:
This is due to a configuration change.

Action:
No action is required.

BEA-200038
Bridge "{0}" is inactive because it is configured to be stopped.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
MessagingBridge

Cause:
The bridge is configured to be stopped.

Action:
No action is required.

BEA-200039
Bridge "{0}" has the same destination as its source and target.

Category:
MessagingBridge

Cause:
This is due to a configuration error.

Action:
Update the configuration.

BEA-200040
Bridge destination {0}: connection URL cannot be null if the initial context factory is not weblogic.jndi.WLInitialContextFactory.

Category:
MessagingBridge

Cause:
This is due to a configuration error.

Action:
Update the configuration.

BEA-200041
Bridge destination {0}: a bridge destination for JMS must have a connection factory JNDI name and a destination JNDI name configured.

Category:
MessagingBridge

Cause:
This is due to a configuration error.

Action:
Update the configuration.

BEA-200042
Bridge {0} failed to connect to the source destination and will try again in {2} seconds. This could be a temporary condition unless the messages repeat several times. ({1})

Category:
MessagingBridge

Cause:
An error occurred on the source destination of the bridge. The error may occur because the source destination does not exist or has not been active yet.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the source system and its configuration. Ensure that the destination is configured in the system and the system is running.

BEA-200043
Bridge "{0}" failed to connect to the target destination and will try again in {2} seconds. This could be a temporary condition unless the messages repeat several times. ({1})

Category:
MessagingBridge

Cause:
The error occurred on the target destination of the bridge. The error may occur because the target destination does not exist or has not been active yet.

Action:
Check the target system and its configuration. Ensure that the destination is configured in the system and the system is running.

BEA-200044
The following exception has occurred:

Category:
MessagingBridge

Cause:
An error condition has occurred.

Action:
Look for the associated exception in the log or the program to see the results. In general, this stack trace will help in debugging an existing problem.

BEA-200045
Bridge "{0}" failed to start because it has been suspended or is shutting down.

Category:
MessagingBridge

Cause:
The administrator has shut down the bridge, or the bridge is suspended for migration.

Action:
No action is required.

BEA-200046
The "{1}" attribute of bridge "{0}" has been changed from "{2}" to "{3}".

Category:
MessagingBridge

Cause:
This is due to a configuration change.

Action:
No action is required.

BEA-200047
Bridge "{0}" failed to start because its migratable target has not been activated for this server.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
MessagingBridge

Cause:
The bridge is targeted to a migrable target that has not yet been activated on this server.

Action:
No action is required.

BEA-200048
{1} destination "{2}" of bridge "{0}" has a configured adapter JNDI name "{3}", so it will find the internal automatically deployed adapter with JNDI name "{4}". The bridge will ignore an explicitly configured and deployed adapter with adapter JNDI name "{3}". The deployed adapter will be ignored, the bridge does not need to deploy a separate adapter.

Category:
MessagingBridge

Cause:
This is due to a configuration upgrade.

Action:
No action is required.

BEA-200049
{1} destination "{2}" of bridge "{0}" uses a custom adapter JNDI name "{3}" instead of the expected names of eis.jms.WLSConnectionFactoryJNDIXA or eis.jms.WLSConnectionFactoryJNDINOXA.

Category:
MessagingBridge

Cause:
The bridge destination uses a configured adapter JNDI name.

Action:
No action is required.

BEA-200050
The bridge has a configured adapter JNDI name "{1}", so it will find the internal automatically deployed adapter with JNDI name "{2}". The bridge will ignore an explicitly configured and deployed adapter "{0}". The deployed adapter will be ignored.

Category:
MessagingBridge

Cause:
The bridge destination uses a configured adapter.

Action:
No action is required.

BEA-210000
{0}

Category:
COM

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
See the message body.

Action:
Correct the error.

BEA-210001
{0}

Category:
COM

Cause:
See the message body.

Action:
No action is required.

BEA-210003
No network channel is available to handle COM requests.

Category:
COM

Cause:
The server is not configured with at least one non-SSL port.

Action:
Configure a plain text listener port if COM is enabled.

BEA-213500
Partition {0} has ResourceDeploymentPlanPath set to {1} but the zip file from which it is being imported does not have an entry for it.

Category:
Partition Portability

Cause:
While importing the paritition, an attempt was made to import a partition without proper configuration. The element resource-deployment-plan-path points to a plan which is to be used for overwriting resource attributes. As part of exporting a partition, this plan should have been archived as part of the overall partition archive created, but the exported archive is missing the plan.

Action:
Export the partition once again and verify that the exported archive ZIP file contains the file referred to by <resource-deployment-plan-path > in config.xml before importing the partition.

BEA-213501
Could not find partition by name {0} to export in the current domain.

Category:
Partition Portability

Cause:
The partition name that was provided for export does not exist in the domain.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the name of the partition and then run exportPartition again.

BEA-213502
A ResourceGroupTemplate with name {0} already exists.

Category:
Partition Portability

Cause:
This error occurs if importPartition is called with the createNew parameter set to null, and the partition being imported references a ResourceGroupTemplate that has the same name as one of the ResourceGroupTemplates in the domain.

Action:
If you want to use the existing ResourceGroupTemplate, run importPartition again with createNew set to false. If you want to clone the ResourceGroupTemplate with a new name, run importPartition again with createNew set to true.

BEA-213503
Could not delete temporary pending file {0}.

Category:
Partition Portability

Cause:
During import, if the option createNew is set to false, then it is imperative that the files corresponding to the ResourceGroupTemplate copied into the pending directory as part of import be deleted before activate is called.

Action:
Delete the file {0} and run importPartition again.

BEA-213504
The destination for writing imported app {0} already exists at {1}.

Category:
Partition Portability

Cause:
While importing a partition with the application binaries/plan, the destination for writing the binary/plan file in an imported domain file system already has a file with the same name.

Action:
Delete the file in the domain at {1} and run importPartition again.

BEA-213505
Application {0} with staging mode set to {1} does not exist at the specified sourcepath {2}.

Category:
Partition Portability

Cause:
The imported partition references an application that is neither in the exported ZIP file nor at the specified location as specified by the source-path attribute of the app-deployment bean.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check that source-path is correct and run importPartition again after placing the application binary at the specified source-path.

BEA-213506
The application {0} has the stagingMode set to {1} but the exported ZIP file does not have application binaries to import.

Category:
Partition Portability

Cause:
The imported partition references an application that is in {1} staged mode. The exported ZIP file does not, however, contain the application binary.

Action:
Either change the staging mode in the attributes.json file to external_stage/nostage or export again with the application binaries included.

BEA-213507
attributes.json has a reference attribute {0} with its value set to {1}, but this attribute was not found in the imported domain''s configuration.

Category:
Partition Portability

Cause:
A wrong attributes value was specified in the attributes.json file during importPartition.

Action:
Look at config.xml before importing and use the proper attribute values for updating attributes.json before importing the partition.

BEA-213508
The name of the object {0} in partition-config.xml is {1} whereas {2} has the name changed to something else. Therefore it could not be found. Changing names of attributes in {2} is not supported.

Category:
Partition Portability

Cause:
The name of an attribute was changed in {2}.

Action:
Revert the name change in {2} and importPartition again.

BEA-213509
Partition {0} is in an unknown state because of a non-dynamic change that was made which affects {1}. The server must be rebooted in order for the partition to become stable and export Partition to work.

Category:
Partition Portability

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The partition being exported is in an unknown state. A common cause of this is that a non-dynamic configuration change was made to the domain that has deferred the initialization of the partition until the Administration Server is restarted.

Action:
Restart the Administration Server.

BEA-213510
{0} for partition {1} failed.

Category:
Partition Portability

Cause:
TBD

Action:
Look at the stack trace and fix appropriate error.

BEA-213511
{0} for partition {1} succeeded.

Category:
Partition Portability

Cause:
TBD

Action:
TBD

"{0}" does not implement weblogic.deploy.api.spi.WebLogicDConfigBeanRoot, or cannot be instantiated: {1}.

Category:
J2EE Deployment SPI

Cause:
See the message body.

Action:
Check for other log messages that give more information about the failure.

BEA-260052
null DConfigBeanRoot.

Category:
J2EE Deployment SPI

Cause:
An invalid argument was used.

Action:
No action is required.

BEA-260055
Unable to parse deployment plan: "{0}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
J2EE Deployment SPI

Cause:
The document is invalid and could not be read or parsed during a deployment operation.

Action:
No action is required.

BEA-260056
MBean must be for Application or Component: "{0}".

Category:
J2EE Deployment SPI

Cause:
An invalid argument was used.

Action:
No action is required.

BEA-260061
Unable to recognize DDBean with xpath, "{0}".

Category:
J2EE Deployment SPI

Cause:
Unable to restore configuration from an invalid descriptor; an invalid argument was used.

Action:
No action is required.

BEA-260067
Restored configuration for module, {0}

Category:
J2EE Deployment SPI

Cause:
DeploymentConfiguration.restoreDConfigBean was invoked

Action:
No action is required.

BEA-260068
Removed configuration for module, {0}

Category:
J2EE Deployment SPI

Cause:
DeploymentConfiguration.removeDConfigBean was invoked.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-260070
Saved configuration for module, {0}

Category:
J2EE Deployment SPI

Cause:
DeploymentConfiguration.saveDConfigBean was invoked.

Action:
No action is required.

BEA-260071
Restored configuration for application, {0}

Category:
J2EE Deployment SPI

Cause:
DeploymentConfiguration.restore was invoked.

Action:
No action is required.

BEA-260072
Saved configuration for application, {0}

Category:
J2EE Deployment SPI

Cause:
DeploymentConfiguration.save was invoked.

Action:
No action is required.

BEA-260073
Unable to introspect on bean, "{0}".

Category:
J2EE Deployment SPI

Cause:
See the message detail.

Action:
No action is required.

BEA-260078
No DConfigBean is available for invalid module, "{0}": {1}.

Category:
J2EE Deployment SPI

Cause:
Check the error message for the specific problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-260080
Unable to define the application install directory at "{0}". Directory could not be created or is a file.

Category:
J2EE Deployment SPI

Cause:
The directory could not be created or is a file.

Action:
Specify a valid directory.

BEA-260081
The descriptor at "{0}" could not be parsed.

Category:
J2EE Deployment SPI

Cause:
The descriptor contains syntax errors and is invalid.

Action:
No action is required.

BEA-260082
A required descriptor, {0}, for a CMP bean is missing.

Category:
J2EE Deployment SPI

Cause:
A descriptor file is missing.

Action:
Place the necessary descriptor file in the archive file or its external configuration area.

BEA-260083
No plan document at "{0}"

Category:
J2EE Deployment SPI

Cause:
The path for the plan may have been incorrectly specified. If this is the first time the application is being configured; this may not be a problem; the plan will be created.

Action:
Specify the correct plan location as necessary.

BEA-260085
The configuration descriptor for "{0}" already exists ({1}), or was not modified ({2}), and will not be saved.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
J2EE Deployment SPI

Cause:
The descriptors do not need to be saved.

Action:
No action is required.

BEA-260086
The descriptor information at {0} was saved to the configuration area.

Category:
J2EE Deployment SPI

Cause:
The configuration was saved.

Action:
No action is required.

BEA-260087
The descriptor at "{0}" is missing the required {1} element for custom module with URI, "{2}", and provider, "{3}".

Category:
J2EE Deployment SPI

Cause:
The named element is missing from the weblogic-extensions.xml descriptor.

Action:
Correct the errors in the weblogic-extensions.xml descriptor.

BEA-260088
The {1} descriptor at "{0}" is missing.

Category:
J2EE Deployment SPI

Cause:
The referenced JMS/JDBC descriptor is not present in the archive.

Action:
Ensure that all of the descriptors are in place.

BEA-260091
Errors were detected when reading "{0}": {1}

Category:
J2EE Deployment SPI

Cause:
Check the error message to determine the probable cause.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-260094
Registering config module descriptor support with base URI, {0}, and configuration URI, {1}.

Category:
J2EE Deployment SPI

Cause:
The weblogic-extensions descriptor specified custom configuration descriptor support.

Action:
No action is required.

BEA-260095
Unable to create archive for "{0}"

Category:
J2EE Deployment SPI

Cause:
An attempt to name a file with the appropriate extension failed.

Action:
No action is required.

BEA-260096
Unable to determine type of application for "{0}".

Category:
J2EE Deployment SPI

Cause:
The archive does not contain standard descriptors.

Action:
Ensure that the correct file was passed into the deployment operation.

BEA-260097
Unable to understand DDBeanRoot provided by deployer tool: "{0}".

Category:
J2EE Deployment SPI

Cause:
The model API is not providing the expected information

Action:
Resolve API problems in the class that implements javax.enterprise.deploy.model.DDBeanRoot.

BEA-260098
No descriptor type is registered for modules of type, {0}

Category:
J2EE Deployment SPI

Cause:
The module type is not registered with a configurable descriptor.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Register non-standard descriptors using the weblogic-extension.xml descriptor.

BEA-260099
No root element in {0} descriptor, {1} at {2}.

Category:
J2EE Deployment SPI

Cause:
An invalid deployment descriptor was provided for the module.

Action:
Either the wrong descriptor was specified or the module type is incorrect; take the appropriate actions to fix the problem.

BEA-260100
Invalid value for Security Model, {0}; Should be one of {1}.

Category:
J2EE Deployment SPI

Cause:
An unrecognized security model was requested.

Action:
Use a valid security model

BEA-260101
Parameter "{0}" may not be null.

Category:
J2EE Deployment SPI

Cause:
A null parameter was passed to the method.

Action:
Resolve the client programming error.

BEA-260102
Type parameter, "{0}", provided to export method is invalid

Category:
J2EE Deployment SPI

Cause:
An invalid export type parameter was used.

Action:
Use a valid export type.

BEA-260103
The provided bean is not part of this configuration: "{0}".

Category:
J2EE Deployment SPI

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt was made to export bean properties against the wrong DConfigBeanRoot object

Action:
Invoke export on the correct DConfigBeanRoot.

BEA-260104
{0} is not a changable property

Category:
J2EE Deployment SPI

Cause:
One of the properties is not changeable.

Action:
Remove the property that is not changeable from the list.

BEA-260106
Failed to parse descriptor at "{1}" for module "{0}": {2}.

Category:
J2EE Deployment SPI

Cause:
The descriptor is not valid

Action:
Ensure that the application is accessible and contains valid descriptors.

BEA-260107
Failed to write descriptor for module "{0}" configuration: {1}.

Category:
J2EE Deployment SPI

Cause:
Either an I/O error prevented the save operation or the descriptor is missing some required elements.

Action:
Depends on the specific error. See the error message for details.

BEA-260108
Failed to restore descriptors: {0}.

Category:
J2EE Deployment SPI

Cause:
An I/O or parse error prevented the restore operation.

Action:
The course of action depends on the specific error. See the error message for details.

BEA-260109
Failed to write deployment plan: {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
J2EE Deployment SPI

Cause:
Either an I/O error prevented the save operation or the plan is missing some required elements.

Action:
The course of action depends on the specific error; see the error message for details.

BEA-260110
Failed to create configuration for module: {0}

Category:
J2EE Deployment SPI

Cause:
The configuration artifacts for the application could not be processed. This could result from simple access errors, descriptor parsing failures, or basic application architecture problems.

Action:
The course of action depends on the specific error. See the error message for details.

BEA-260111
Errors were detected while attempting to communicate with the Administration Server.

Category:
J2EE Deployment SPI

Cause:
Depends on the specific error. The associated exception will contain the root exception.

Action:
The course of action depends on the specific error. See the exception.

BEA-260112
Unable to determine application name from null or empty TargetModuleID list.

Category:
J2EE Deployment SPI

Cause:
No TargetModuleID objects were provided.

Action:
Resolve the client programming error by providing a list of TargetModuleID objects.

BEA-260113
Plan at "{0}" is a directory. A deployment plan is always an XML document.

Category:
J2EE Deployment SPI

Cause:
Plan at "{0}" is a directory, not an XML document.

Action:
Resolve the client programming error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-260114
Application root at "{0}" is not a directory.

Category:
J2EE Deployment SPI

Cause:
An invalid root directory was specified.

Action:
Resolve the client programming error.

BEA-260115
Must specify application to configure.

Category:
J2EE Deployment SPI

Cause:
No application was specified for the configuration.

Action:
Resolve the client programming error.

BEA-260116
Configuration is not initialized

Category:
J2EE Deployment SPI

Cause:
SessionHelper.initialize() was not yet invoked.

Action:
Resolve the client programming error.

BEA-260117
Unable to load factory, "{0}"

Category:
J2EE Deployment SPI

Cause:
The factory is not in the classpath.

Action:
Ensure that the factory is in the classpath.

BEA-260118
A null target was included in a deployment request.

Category:
J2EE Deployment SPI

Cause:
The target list is invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Resolve the client programming error.

BEA-260119
The path provided, "{0}", does not represent a directory.

Category:
J2EE Deployment SPI

Cause:
The first argument must be a directory.

Action:
Resolve the client programming error.

BEA-260121
Initiating {0} operation for application, {1} [archive: {2}], to {3}.

Category:
J2EE Deployment SPI

Cause:
A deployment operation is starting.

Action:
No action is required.

BEA-260122
Initiating {0} operation for application, {1}, from stream to {2}.

Category:
J2EE Deployment SPI

Cause:
A deployment operation is starting.

Action:
No action is required.

BEA-260123
Unable to determine targets for deployment request on application, {0}

Category:
J2EE Deployment SPI

Cause:
No targets were specified for the new deployment.

Action:
Specify the targets to which you want to deploy the application.

BEA-260124
configured targets

Category:
J2EE Deployment SPI

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
No targets were specified.

Action:
No action is required.

BEA-260125
Errors were detected when attempting to communicate with Administration Server: {0}

Category:
J2EE Deployment SPI

Cause:
Depends on the specific error. The associated exception will contain the root exception.

Action:
The course of action depends on the specific error. See the exception.

BEA-260126
Cannot override plan version, "{0}", with version from options, "{1}".

Category:
J2EE Deployment SPI

Cause:
A plan version was specified in the deployment options, but the plan defines its own version.

Action:
Avoid specifying the plan version.

BEA-260128
Changes not allowed to DTD based descriptors. The attempt to modify property "{0}" in {1} for module "{2}" will be vetoed if possible. The change will not be persisted in either case.

Category:
J2EE Deployment SPI

Cause:
A property in a DTD based descriptor was modified.

Action:
Upgrade the application with schema based descriptors.

BEA-260129
Export not allowed on DTD based descriptors. No properties for the {0} descriptor in module, "{1}", will be exported.

Category:
J2EE Deployment SPI

Cause:
An attempt was made to export a DTD based descriptor.

Action:
Upgrade the application with schema based descriptors.

BEA-260130
Shutting down Deployment Manager connection failed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
J2EE Deployment SPI

Cause:
See the message detail.

Action:
Allocate a new Deployment Manager.

BEA-260131
No URI was provided.

Category:
J2EE Deployment SPI

Cause:
An attempt was made to create a Deployment Manager without providing an appropriate deployer URI.

Action:
Provide an appropriate deployer URI.

BEA-260132
"{0}" is not a child of "{1}".

Category:
J2EE Deployment SPI

Cause:
"{0}" is not a child of "{1}".

Action:
Check for a preceding conflict start message in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-260133
The descriptor at "{0}" could not be parsed due to error: {1}.

Category:
J2EE Deployment SPI

Cause:
The named descriptor is invalid.

Action:
No action is required.

BEA-260134
Unable to identify application for {0} operation.

Category:
J2EE Deployment SPI

Cause:
Insufficient information was provided to identify which application to deploy.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Resolve the client programming error.

BEA-260137
Failures were detected while restoring the original plan file {0}. The current plan may not reflect the accurate state of the application. Either attempt to update the application again with the current plan, or make use of the backup plan "{1}".

Category:
J2EE Deployment SPI

Cause:
Failures were detected while restoring the original plan file {0}. The current plan may not reflect the accurate state of the application.

Action:
Either attempt to update the application again with the current plan or make use of the backup plan "{1}".

BEA-260138
Failures were detected while trying to create a backup plan.xml file at "{1}" {0}.

Category:
J2EE Deployment SPI

Cause:
Failures were detected while trying to create a backup plan.xml file at "{1}" {0}.

Action:
Failures were detected while trying to create a backup plan.xml file at "{1}" {0}.

BEA-260139
Unchanged plan.xml was restored due to problems updating new plan {0}.

Category:
J2EE Deployment SPI

Cause:
Unchanged plan.xml was restored due to problems updating new plan {0}.

Action:
Unchanged plan.xml was restored due to problems updating new plan {0}.

BEA-260140
Unable to remove descriptor bean {0} due to "{1}". The remover should first check to see if the bean is removable in the deployment plan prior to removing it.

Category:
J2EE Deployment SPI

Cause:
Unable to remove descriptor bean {0} due to {1}.

Action:
The remover should first check to see if the bean is removable in the deployment plan prior to removing it.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-260141
An attempt to reinitialize this object by calling either inspect() or initializeConfiguration() was made without first calling close(). This SessionHelper object is stateful and must be properly closed by calling close().

Category:
J2EE Deployment SPI

Cause:
An attempt to reinitialize this object by calling either inspect() or initializeConfiguration() was made without first calling close(). This SessionHelper object is stateful and must be properly closed by calling close().

Action:
Call close() on the SessionHelper instance, and avoid reusing the same instance.

BEA-260142
The descriptor at "{0}" in module "{1}" is not recognized, and could not be parsed.

Category:
J2EE Deployment SPI

Cause:
The descriptor was not recognized and could not be parsed.

Action:
No action is required.

BEA-260143
"{0}" and "{1}" cannot both be specified.

Category:
J2EE Deployment SPI

Cause:
The combination of the two parameters is inconsistent.

Action:
Use only one of the parameters.

BEA-260144
The specified partition "{0}" does not exist in the domain.

Category:
J2EE Deployment SPI

Cause:
A partition needs to exist in the domain before deploying to it.

Action:
Create the specified partition before deploying to it.

BEA-260145
The specified resource group "{0}" does not exist in the specified partition "{1}".

Category:
J2EE Deployment SPI

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A resource group needs to exist before deploying to it.

Action:
Create the specified resource group before deploying to it.

BEA-260146
The specified resource group template "{0}" does not exist in the domain.

Category:
J2EE Deployment SPI

Cause:
A resource group template needs to exist before deploying to it.

Action:
Create the specified resource group template before deploying to it.

BEA-260147
The resource group name cannot be derived in this case. Specify the resource group option along with the partition option.

Category:
J2EE Deployment SPI

Cause:
A resource group option need to be specified with the partition option for the cases where it cannot be derived.

Action:
Specify the resource group option with partition option.

BEA-260148
A resource group template option cannot be specified with a resource group option.

Category:
J2EE Deployment SPI

Cause:
Cannot specify a resource group template option and a resource group option together.

Action:
Either specify a resource group template option or specify a resource group option.

BEA-260149
The specified resource group "{0}" does not exist in the domain.

Category:
J2EE Deployment SPI

Cause:
A resource group needs to exist before deploying to it.

Action:
Create the specified resource group before deploying to it.

BEA-260150
A partition administrator cannot perform deployment operations to a resource group template.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
J2EE Deployment SPI

Cause:
A partition administrator cannot operate on a resource group template.

Action:
Operate on the resource group template as a system administrator.

BEA-260151
Partition administrator from partition {0} cannot perform deployment operations to partition {1}.

Category:
J2EE Deployment SPI

Cause:
A partition administrator is trying to operate someone else' partition.

Action:
A partition administrator should only operate on their own partition.

BEA-260152
"config-root" {0} is not a directory/file.

Category:
J2EE Deployment SPI

Cause:
The "config-root" may not have been set properly.

Action:
Verify that the "config-root" is correct.

BEA-260153
"config-root"should not be empty.

Category:
J2EE Deployment SPI

Cause:
The "config-root" may not have been set properly.

Action:
Verify that the "config-root" is correct/not empty.

BEA-280008
Opening the persistent file store "{0}" for recovery: directory={1} requestedWritePolicy="{2}" fileLockingEnabled={3} driver="{4}".

Category:
Store

Cause:
Informational message.

Action:
No action required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-280009
The persistent file store "{0}" ({1}) has been opened: blockSize={2} actualWritePolicy="{3}" explicitIOEnforced={4} records={5}.

Category:
Store

Cause:
Informational message.

Action:
No action required.

BEA-280012
Recovery is not yet complete.

Category:
Store

Cause:
This was caused by a programming error.

Action:
Check the code and try again.

BEA-280013
The specified store record is longer than the maximum length of {0} bytes.

Category:
Store

Cause:
This was caused by a programming error.

Action:
Either change the code or increase the size of the record.

BEA-280019
There was an error while writing to a storage.

Category:
Store

Cause:
See the detail message for the cause.

Action:
Ensure that the hardware and operating system are functioning properly and that there is enough space available for the storage area.

BEA-280020
There was an error while reading from the storage.

Category:
Store

Cause:
See the detail message for the cause.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the hardware and operating system are functioning properly and that all the storage spaces are available online.

BEA-280021
There was an error while opening the file store file "{0}".

Category:
Store

Cause:
Either the specified file does not exist, the server does not have permissions to open the file, or there is a hardware or operating system problem.

Action:
Ensure that the file exists and that the directory name was specified correctly.

BEA-280024
There was an error while creating a new file named "{0}" for the file store.

Category:
Store

Cause:
See the detail message. The disk may be full, or there may be a hardware or operating system problem.

Action:
Ensure that there is enough disk space and that the hardware and operating system are working properly.

BEA-280026
The primary or cache file "{0}" is not both readable and writeable.

Category:
Store

Cause:
The file permissions are incorrect, or the server is running under the wrong user ID.

Action:
Fix the file permissions or run the server under the correct user ID.

BEA-280029
The store record {0} could not be found.

Category:
Store

Cause:
This is caused by a programming error.

Action:
Ensure that the correct record ID was specified.

BEA-280031
The store named "{0}" has not yet been opened.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Store

Cause:
This is a programming error.

Action:
Fix the code and try again.

BEA-280032
The store suffered a fatal error and it must be reopened.

Category:
Store

Cause:
A fatal error occurred previously.

Action:
Restart the server.

BEA-280035
Unable to access the store directory "{0}".

Category:
Store

Cause:
See the detail message.

Action:
Check that the specified path name is correct, that it exists, and that the directory is readable and writeable by the server's user ID.

BEA-280036
Missing the file store file "{0}" in the directory "{1}".

Category:
Store

Cause:
The file has been accidentially deleted or moved, or the wrong directory name was specified, or the server process does not have permissions to read and write the file.

Action:
Ensure that the directory name is correct and that the server process has permissions to read and write the files. If necessary, create an empty file with the same name.

BEA-280037
The file store has reached the maximum number of {0} files and no more files can be created.

Category:
Store

Cause:
There are too many records in the store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Delete data from the store and try again.

BEA-280038
An error occurred while flushing the contents of a file store file.

Category:
Store

Cause:
See the detail message.

Action:
See the detail message.

BEA-280039
The store handle {0} is not valid.

Category:
Store

Cause:
This is caused by a programming error.

Action:
Fix the code and try again.

BEA-280040
An invalid record was found in the store: Code={0}.

Category:
Store

Cause:
The store has been corrupted, possibly by a hardware or operating system error.

Action:
For File store, Change the DirectIOMode or restore from backup if the problem persists.

BEA-280041
A record was found in the store with an invalid version of {0}

Category:
Store

Cause:
The store may have been used with an incompatible version of WebLogic Server.

Action:
Restore from backup.

BEA-280042
The file store primary or cache file "{0}" cannot be opened because it is actually a directory.

Category:
Store

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A directory was accidentially created in the file store's own main or cache directory, or the specified path is incorrect.

Action:
Check that the file store path is correct.

BEA-280044
The file store directory "{0}" does not exist.

Category:
Store

Cause:
The directory has not yet been created, or its filesystem is not available.

Action:
Check that the directory path has been correctly specified, and create the directory if necessary.

BEA-280045
The file store primary or cache directory "{0}" is not a directory.

Category:
Store

Cause:
The directory has not yet been created, or its filesystem is not available.

Action:
Check that the directory path has been correctly specified, remove any file or directory that already exists in its place, and create the directory if necessary.

BEA-280046
The directory "{0}" is not both readable and writeable.

Category:
Store

Cause:
The file permissions are incorrect, or the server is running under the wrong user ID.

Action:
Fix the file permissions or run the server under the correct user ID.

BEA-280051
The store was not able to create a new record.

Category:
Store

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-280052
The store was not able to read a record.

Category:
Store

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-280055
Invalid name for store write policy: "{0}".

Category:
Store

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-280056
A store error occurred: {0}

Category:
Store

Cause:
See the description of the underlying exception.

Action:
See the description of the underlying exception

BEA-280057
The store named "{0}" is already open.

Category:
Store

Cause:
This is a programming error.

Action:
Fix the code and try again.

BEA-280059
"{0}" is not a valid store connection name.

Category:
Store

Cause:
This is a programming error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Fix the code and try again.

BEA-280060
The store "{0}" encountered a fatal error, and it must be shut down: {1}

Category:
Store

Cause:
There was a serious I/O error, either with file I/O, replicated store IO or the JDBC connection to the database.

Action:
Restart the server.

BEA-280061
The store "{0}" could not be deployed: {1}

Category:
Store

Cause:
See he detail message.

Action:
See the detail message.

BEA-280062
The store "{0}" could not be shut down: {1}

Category:
Store

Cause:
See the detail message.

Action:
See the detail message.

BEA-280063
The "{0}" field value "{1}" in table reference "{2}" (format [[[catalog.]schema.]table) is too long. The database supports a maximum length of "{3}" for this field.

Category:
Store

Cause:
This is a configuration error.

Action:
When configuring a table name, choose a shorter name for the indicated field. Note that JDBC stores automatically append "WLStore" to the table name.

BEA-280064
{0} (server="{1}" store="{2}" table="{3}")

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Store

Cause:
See the exception text, and linked exception (if one exists).

Action:
See the exception text, and linked exception (if one exists).

BEA-280065
{0} (server="{1}" store="{2}" table="{3}"):(Linked Cause, "{4}")

Category:
Store

Cause:
See the exception text and linked exception text.

Action:
See the exception text and linked exception text.

BEA-280066
Empty field value in table reference "{0}" (format [[[catalog.]schema.]table).

Category:
Store

Cause:
This is a configuration error.

Action:
Ensure that the entire table reference is blank, or that the table field is not blank. If there is no schema, make sure there are no periods "." in the table reference. Do not start the table reference with a period ".". Note that JDBC stores automatically append "WLStore" to table references.

BEA-280067
JDBC store "{0}" did not find a database table at "{1}", so it created one using the commands in file "{2}".

Category:
Store

Cause:
The JDBC store did not find its backing table, so it created one.

Action:
No action is required.

BEA-280068
JDBC store failed to initialize. It did not find its database table and failed trying to create a new empty table using the commands in file "{0}".

Category:
Store

Cause:
See the linked exception text and linked exception stack trace.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
See the linked exception text and linked exception stack trace.

BEA-280069
JDBC store failed to initialize. It did not find an already existing database table and failed to create a new empty table because the JDBC driver is unknown and/or unsupported. To force table creation with an unknown and/or unsupported driver, see the JDBC store "CreateTableDDLFile" configuration attribute. Driver information: database product name = "{0}", driver name = "{1}".

Category:
Store

Cause:
See the exception text and exception stack trace.

Action:
See the text exception text and exception stack trace.

BEA-280070
JDBC store failed to initialize. It did not find an already existing database table and failed to create a new empty table because it could not locate the configured DDL file "{0}".

Category:
Store

Cause:
The configured file is located in the server file path.

Action:
For supported databases, consider the option of not configuring a custom DDL file. There is usually no need to configure a custom DDL file unless custom database-specific tuning commands have been added to the file. If a DDL file must be configured (perhaps because it is for an unsupported database), ensure that the configured file is located either in the server file path or server class path.

BEA-280071
JDBC store "{0}" opened table "{1}" and loaded {2,choice,0#0 records|1#1 record|2#{0} records}. For additional JDBC store information, use the diagnostics framework while the JDBC store is open.

Category:
Store

Cause:
A JDBC store booted.

Action:
No action is required.

BEA-280072
JDBC store "{0}" failed to open table "{1}".

Category:
Store

Cause:
See the linked exception.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
See the linked exception.

BEA-280073
The file store "{0}" could not be opened because it contained a file with an invalid version {1}. A file of version {2} was expected.

Category:
Store

Cause:
The file store has not been properly upgraded from a previous version of WebLogic Server, or the file has been corrupted on the disk.

Action:
Ensure that the file store was upgraded using the weblogic.Upgrade tool.

BEA-280074
The store "{0}" encountered an unresolvable failure while processing transaction "{1}". Shut down and restart to resolve this transaction. {2}

Category:
Store

Cause:
There was a serious I/O error, either with file I/O, replicated I/O or the JDBC connection to the database, or an unexpected exception occurred while processing a transaction.

Action:
Restart the server.

BEA-280075
JDBC store "{0}" failed to retain ownership of database table "{1}", either due to database access problems or due to concurrent accessors of the table. See the linked exception for more information.

Category:
Store

Cause:
Some other WebLogic server process or JDBC store has taken over ownership of the database table, or some database access error prevented this JDBC store from renewing ownership of the database table.

Action:
The error message has information to identify potential owners in conflict.

BEA-280076
Database table "{1}" for store "{0}" is currently owned by "{2}". Trying to wait for ownership.

Category:
Store

Cause:
Some other WebLogic Server process or JDBC store has ownership of the database table.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
The warning message has information to identify the current owner of the database table. If the current owner does not yield ownership within some time, this server will not be able to open the JDBC store and will log an error.

BEA-280077
JDBC store "{0}" in this server is not the owner of database table "{1}". Unexpected current owner is "{2}", expected current owner is "{3}".

Category:
Store

Cause:
Some other WebLogic Server process or JDBC store has ownership of the database table.

Action:
The error message has information to identify and resolve the owners in conflict.

BEA-280078
The handle that was passed was created from a different store connection.

Category:
Store

Cause:
This is a programming error.

Action:
Ensure that the correct connection was used.

BEA-280079

BEA-280091
Number of objects contained in the store connection

Category:
Store

Cause:
See the message body.

Action:
No action is required.

BEA-280092
Specified value "{1}" of the property "{0}" is not a valid Integer system property. Using default value "{2}" instead.

Category:
Store

Cause:
See the message body.

Action:
Check the Javadoc for the valid formats of Integer system properties: http://java.sun.com/j2se/1.5.0/docs/api/java/lang/Integer.html#decode(java.lang.String).

BEA-280093
Block size "{1}" specified by the property {0} is outside the valid range from {2} to {3}. Using default value "{2}" instead.

Category:
Store

Cause:
See the message body.

Action:
Refer to the JMS chapter of the Performance and Tuning for Oracle WebLogic Server guide for details of this setting.

BEA-280094
The size "{1}" specified by the property {0} is not power of 2. Rounding down to "{2}" instead.

Category:
Store

Cause:
See the message body.

Action:
Refer to the JMS chapter of the Performance and Tuning for Oracle WebLogic Server guide for details of this setting.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-280095
Opening existing file store "{1}". The block size value specified by the property {0} is ignored because the block size of preexisting files cannot change.

Category:
Store

Cause:
See the message body.

Action:
Refer to the JMS chapter of the Performance and Tuning for Oracle WebLogic Server guide for details of this setting.

BEA-280096
Opening existing store "{2}". The direct IO mode "{1}" specified by the property "{0}" is invalid and will be ignored. Using the default value "{3}"

Category:
Store

Cause:
See the message body.

Action:
Use a valid direct I/O mode. The valid values are: "read-buffered", "single-handle-unbuffered", and "single-handle-buffered".

BEA-280097
A file store failed to open file "{0}" in the Direct-Write read-buffered/write-unbuffered mode and is instead opening the file in a purely unbuffered mode. When there are high request loads, this may reduce file store performance. However, the store is still operating in a transactionally safe synchronous mode.

Category:
Store

Cause:
See the message body.

Action:
To fix this problem, configure a different synchronous write policy, or if using the Direct-Write policy, force the store into read-write-buffered mode using the AvoidDirectIO command line property documented in the store chapter of the Performance and Tuning Guide.

BEA-280101
The persistent file store "{0}" is forced to use buffered I/O because the Operating System or hardware environment does not support unbuffered I/O. The store is still operating in a transactionally safe synchronous mode. See store open log messages for the final write policy.

Category:
Store

Cause:
See the message body.

Action:
See the documentation for store synchronous write policy configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-280102
The perisistent file store "{0}" must reinitialize its cache: recovery may take longer than usual. The signature in the cache file "{2}" for the persistent store file "{1}" could not be verified, or the cache file is missing. Ignore this Warning if this is the first time the store has ever booted. Possible causes include: first boot of store (potentially after using a write policy different from Direct-Write-With-Cache), store migration, unclean shutdown, off-line store compression, and manual removal of cache files.

Category:
Store

Cause:
The cache file is missing, or the signature stored in the cache file does not match the signature of the primary file.

Action:
Make sure that the configuration is correct, do not delete cache files, and ensure a clean shutdown.

BEA-280103
The persistent file store "{0}" will cache in {1}.

Category:
Store

Cause:
This is an informational message.

Action:
No action is required.

BEA-280104
The persistent file store "{0}" will use buffered writes instead of direct IO because the configured block size "{2}" is not a multiple of the environment"s direct IO alignment "{1}". When there are high request loads, this may reduce file store performance. The store is still operating in a transactionally safe synchronous mode.

Category:
Store

Cause:
Direct I/O requires the block size to be a multiple of directIO granularity.

Action:
Reconfigure the store with a block size that is a multiple of the direct I/O alignment for your environment. If the store is not empty and contains useful data, use the store admin compact utility to change block size, otherwise make sure that all storage areas are removed before starting WebLogic Server again.

BEA-280105
The persistent file store "{0}" cannot open file {1}.

Category:
Store

Cause:
An IOException occurred.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-280106
The persistent file store "{0}" cannot memory-map the locked file "{1}" and has to downgrade to explicit buffered IO. For example, in some NFS environments memory-mapping and locking are not compatible. Consider configuring a local cache directory.

Category:
Store

Cause:
See the message body.

Action:
Consult your storage vendor and operating system documentation.

BEA-280107
The store record {0}, connection "{1}", in the store named "{2}" does not exist because it has been deleted.

Category:
Store

Cause:
This was caused by a programming error.

Action:
Ensure that the correct record ID was specified.

BEA-280108
The store record {0}, connection "{1}" already exists in the store named "{2}".

Category:
Store

Cause:
This was caused by a programming error.

Action:
Ensure that the correct record ID was specified.

BEA-280109
The JVM was unable to load the native wlfileio library for the store "{0}". File and paging stores will continue to function correctly. Specifically, file stores that are configured with a transactionally safe synchronous write policy will continue to operate safely and transactionally but may open with a different write-policy. Other store types may not be able to open.

Category:
Store

Cause:
See message body.

Action:
See file store open log messages for the requested and final file store write policies. See the documentation for file store synchronous write policy configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-280110
The "{1}" attribute of Store "{0}" has been changed from "{2}" to "{3}".

Category:
Store

Cause:
This is due to a configuration change.

Action:
No action is required.

BEA-282000
Unsupported class version {0}. Expected a value between {1} and {2} inclusive.

Category:
Messaging

Cause:
While attempting to interoperate between different releases or service packs, an error occurred while attempting to serialize or deserialize an object. The version number of the object was not in the expected range. If {0} is larger than {2}, then it is possible an attempt was made to access a newer version than the current version. Otherwise, a possible attempt has been made to interoperate with an unsupported older version.

Action:
Ensure that the versions of Oracle products that are interoperating are supported. If the versions need to be supported, contact My Oracle Support.

BEA-282001
The messaging kernel {0} is beginning recovery of its persistent state.

Category:
Messaging

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is normal operation.

Action:
No action is required.

BEA-282002
The messaging kernel {0} has recovered {1} persistent messages.

Category:
Messaging

Cause:
This is normal operation.

Action:
No action is required.

BEA-282003
The messaging kernel {0} will use up to {1} bytes of memory before paging begins.

Category:
Messaging

Cause:
This is normal operation.

Action:
No action is required.

BEA-282004
Message redirection has failed in a non-recoverable way for the messaging kernel {0}. Restart the server in order to restart message redirection.

Category:
Messaging

Cause:
See the previous error messages, which should explain the cause.

Action:
Restart the WebLogic Server.

BEA-282005
An error occurred while redirecting a message for the messaging kernel {0}: {1}.

Category:
Messaging

Cause:
See the attached detail message.

Action:
No action is required.

BEA-282006
An error occurred while deleting an expired message for the messaging kernel {0}: {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Messaging

Cause:
See the attached detail message.

Action:
No action is required.

BEA-282007
An error occurred in the transaction prepare phase of a message send operation for the messaging kernel {0}.

Category:
Messaging

Cause:
See the attached stack trace.

Action:
No action is required.

BEA-282008
A message send transaction for the messaging kernel {0} could not be committed because the kernel has been shut down.

Category:
Messaging

Cause:
A server was shut down or a destination was removed while a transaction was in progress.

Action:
No action is required.

BEA-282009
A message receive transaction for the messaging kernel {0} could not be committed because the kernel has been shut down.

Category:
Messaging

Cause:
A server was shut down or a destination was removed while a transaction was in progress.

Action:
No action is required.

BEA-282010
A sequence number update transaction for the messaging kernel {0} could not be committed because the kernel has been shut down.

Category:
Messaging

Cause:
A server was shut down or a destination was removed while a transaction was in progress.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-282011
There was an error making a message visible after a delivery delay: {0}.

Category:
Messaging

Cause:
Most likely, a transient I/O error occurred.

Action:
Consider restarting the server if the error persists. The message will not be lost.

BEA-282012
There was a failure while performing paging I/O.

Category:
Messaging

Cause:
Either a transient I/O error occurred, or the server did not have enough memory to complete the paging I/O request.

Action:
Consider restarting the server if the error persists.

BEA-282013
Skipping unexpected null message encountered on store boot, {0}.

Category:
Messaging

Cause:
Message data corruption has occurred. The corrupted message will be skipped to allow data recovery on other non-corrupted messages.

Action:
Report this issue to My Oracle Support.

BEA-282014
[StoreBootOnError] "{0}" Ignoring 2PC record for sequence={1}, queue={2}, type={3}, id={4}, xid={5}; message reference element cannot be found.

Category:
Messaging

Cause:
Potential message data corruption has occurred. A 2PC record was found in the store without an associated message reference element. The 2PC record will be ignored.

Action:
Contact My Oracle Support.

BEA-282015
"{0}" An error occurred while writing a message to store: info={1}; null message body detected.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Messaging

Cause:
An error was detected while attempting to write a message to the persistent store.

Action:
Contact My Oracle Support.

BEA-282016
A problem occurred while SAF Agent "{0}" recovered SAF messages from its persistent store: data was found in both old (pre-12.2.1.0.0) store connections and in new (12.2.1.x.0) store connections. The old store connections and the data within them are going to be ignored.

Category:
Messaging

Cause:
The SAF agent in question has been upgraded from a pre-12.2.1.0.0 release to an unpatched 12.2.1.x.0 release while it had unprocessed persistent messages, and then upgraded to a patched 12.2.1.x.0 release. As a result, there are pre-12.2.1.0.0 data (which were ignored during the first upgrade), and unpatched 12.2.1.x.0 data in the store.

Action:
Use -Dweblogic.saf.StoreUpgradeMode="OldOnly" to recover only the old messages. Use -Dweblogic.saf.StoreUpgradeMode="IgnoreOld" to suppress this warning message. Or contact My Oracle Support.

BEA-283002
Path Service has been started on server {0} with jndiName {1} with store {2}

Category:
PathService

Cause:
See the message body.

Action:
No action required.

BEA-290001
Error occurred in the deployment service servlet. It received an unacceptable request of type "{0}" with content type "{1}".

Category:
DeploymentService

Cause:
An invalid request was made to the deployment service servlet.

Action:
This is an internal WebLogic Server error. No action is required. If the problem persists, contact My Oracle Support.

BEA-290003
Deployment service servlet encountered an exception while handling request of type "{0}". Exception is: "{1}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
DeploymentService

Cause:
Error occurred while handling the deployment servlet request.

Action:
This is an internal WebLogic Server error. Refer to the exception message and determine if the exception can be corrected. If the problem persists, contact My Oracle Support.

BEA-290006
Deployment service servlet received a request of type "{0}" with no application name.

Category:
DeploymentService

Cause:
An invalid deployment service servlet request was made.

Action:
This is an internal WebLogic Server error. No action is required. If the problem persists, contact My Oracle Support.

BEA-290007
Deployment service servlet unable to find upload directory while handling request of type "{0}" for application "{1}".

Category:
DeploymentService

Cause:
The servlet was unable to find the upload directory.

Action:
This is an internal WebLogic Server error. No action is required. If the problem persists, contact My Oracle Support.

BEA-290008
Deployment service servlet encountered an error while extracting uploaded file to directory "{0}". Exception is: "{1}".

Category:
DeploymentService

Cause:
An exception occurred while extracting the uploaded file.

Action:
This is an internal WebLogic Server error. Refer to the exception message and determine if the exception can be corrected. If the problem persists, contact My Oracle Support.

BEA-290009
Deployment service servlet failed to get initialized due to unavailable security service.

Category:
DeploymentService

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The WebLogic Server security service is not present in the installation files.

Action:
This is an internal WebLogic Server error. No action is required. If the problem persists, contact My Oracle Support.

BEA-290010
Deployment service servlet failed to get initialized due to privileged action violation. Exception is: "{0}".

Category:
DeploymentService

Cause:
An exception occurred while initializing the deployment service servlet.

Action:
This is an internal WebLogic Server error. Refer to the exception message and determine if the exception can be corrected. If the problem persists, contact My Oracle Support.

BEA-290011
Unauthorized request of type "{0}" for user "{1}"

Category:
DeploymentService

Cause:
The user is unauthorized for downloading files.

Action:
Check the user and try again with an authorized user.

BEA-290012
Deployment service servlet received jspRefresh request with no upload file name.

Category:
DeploymentService

Cause:
The request parameter upload file name was null.

Action:
This is an internal WebLogic Server error. No action is required. If the problem persists, contact My Oracle Support.

BEA-290013
No user name or password provided for the request.

Category:
DeploymentService

Cause:
The user name or password in the request were null.

Action:
This is an internal WebLogic Server error. No action is required. If the problem persists, contact My Oracle Support.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-290014
Invalid user name or password.

Category:
DeploymentService

Cause:
The request contained an invalid user name or password.

Action:
Try again with a valid user name and password.

BEA-290015
Domain wide secret mismatch or clock skew between servers

Category:
DeploymentService

Cause:
Thee was an invalid signature between the Administration Server and Managed Servers.

Action:
This is an internal WebLogic Server error. Verify that the Administration Server and Managed Servers have the same SerializedSystemIni.dat file. Verify that clock skew has not occurred between the servers in the domain.

BEA-290016
Access not allowed for server "{0}" on boot.

Category:
DeploymentService

Cause:
The user does not have boot permission for the specified server.

Action:
This is an internal WebLogic Server error. No action is required. If the problem persists, contact My Oracle Support.

BEA-290020
Exceptions encountered while invoking application lifecycle listeners

Category:
DeploymentService

Cause:
A registered lifecycle listener detected an error and generated an exception.

Action:
Refer to the exception message from the lifecycle listener and determine if the error can be corrected.

BEA-290021
{0} does not exist.

Category:
DeploymentService

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The file does not exist on the Administration Server.

Action:
This is an internal WebLogic Server error. No action is required.

BEA-290022
This request needs to be initiated through a start control.

Category:
DeploymentService

Cause:
This is an internal protocol error.

Action:
This is an internal WebLogic Server error. No action is required. If the problem persists, contact My Oracle Support.

BEA-290024
Deployment type {0} has already been registered with the DeploymentService.

Category:
DeploymentService

Cause:
More than one deployment handler was registered for this deployment type.

Action:
This is an internal WebLogic Server error. No action is required. If the problem persists, contact My Oracle Support.

BEA-290025
Cannot call "start()" when DeploymentRequest has already been started.

Category:
DeploymentService

Cause:
The start method was called more than once.

Action:
This is an internal WebLogic Server error. No action is required.

BEA-290026
Request "{0}" is in "{1}" state - request has already been cancelled.

Category:
DeploymentService

Cause:
More than one cancel request was received.

Action:
No action is required.

BEA-290027
Request "{0}" is in "{1}" state - it is too late to attempt cancelling it.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
DeploymentService

Cause:
A cancel request was received while the request was being committed.

Action:
No action is required.

BEA-290028
Deployment "{0}" has been cancelled.

Category:
DeploymentService

Cause:
The request was already cancelled.

Action:
No action is required.

BEA-290029
Deployment "{0}" timed out on Administration Server.

Category:
DeploymentService

Cause:
The request has timed out.

Action:
No action is required.

BEA-290030
No data handler registered for type "{0}".

Category:
DeploymentService

Cause:
A handler was not registered for the specified type.

Action:
This is an internal WebLogic Server error. No action is required.

BEA-290031
No tasks associated with this deployment request that can be cancelled.

Category:
DeploymentService

Cause:
Tasks have already completed.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-290032
Data Transfer Handler exists for handler type: "{0}".

Category:
DeploymentService

Cause:
The handler type is already registered

Action:
This is an internal WebLogic Server error. No action is required.

BEA-290036
Deployment for request id "{0}" is deferred since target "{1}" is disconnected.

Category:
DeploymentService

Cause:
Target server "{1}" is disconnected.

Action:
No action is required. When the server reconnects, the deployment will be performed.

BEA-290039
Unrecognized callback

Category:
DeploymentService

Cause:
The callback was not a supported type.

Action:
This is an internal WebLogic Server error. No action is required. If the problem persists, contact My Oracle Support.

BEA-290040
The cancel call cannot be completed at this point because the deployment request "{0}" has already been partially committed.

Category:
DeploymentService

Cause:
A cancel was requested on a committed deployment task.

Action:
Wait until the deployment task has completed and then perform the necessary actions to restore the application to the desired state.

BEA-290041
Commit failed message received for id: "{0}" that has no request. It may be completed or cancelled. Sending commit succeeded message anyway.

Category:
DeploymentService

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
No corresponding request was found for the commit failure message.

Action:
Check for a preceding conflict start message in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-290042
Received a commit message call without a corresponding request. It may have been completed or cancelled. Sending commit failed message.

Category:
DeploymentService

Cause:
No corresponding request was found for the commit message.

Action:
Check for a preceding conflict start message in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-290043
Cancel failure encountered when attempting to cancel "{0}" due to optimistic concurrency violation.

Category:
DeploymentService

Cause:
A failure occurred during the cancel of the request.

Action:
Wait until the deployment task has completed and then perform the necessary actions to restore the application to the desired state.

BEA-290044
{0} delivery

Category:
DeploymentService

Cause:
This is an informational message.

Action:
No action is required.

BEA-290045
prepare

Category:
DeploymentService

Cause:
Not applicable.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-290046
commit

Category:
DeploymentService

Cause:
Not applicable.

Action:
No action is required.

BEA-290047
cancel

Category:
DeploymentService

Cause:
Not applicable.

Action:
No action is required.

BEA-290048
Request with id "{0}" timed out.

Category:
DeploymentService

Cause:
The request timed out.

Action:
Try increasing the deployment timeout value. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-290049
Deploy failed for id "{0}" since no targets are reachable.

Category:
DeploymentService

Cause:
No targets were reachable.

Action:
Ensure targeted servers are alive and available from the Administration Server.

BEA-290050
Failed to deliver commit message to the following targets "{0}".

Category:
DeploymentService

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An exception occurred while committing the deployment request.

Action:
Ensure that targeted servers are alive and available from the Administration Server. Check for a preceding conflict start message in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-290051
The commit message for the deployment "{0}" could not be completed because the deployment timed out.

Category:
DeploymentService

Cause:
The deployment timed out.

Action:
Try increasing the deployment timeout value. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-290052
{0} timeout

Category:
DeploymentService

Cause:
Not applicable.

Action:
No action is required.

BEA-290053
Request with id "{0}" timed out on the Administration Server.

Category:
DeploymentService

Cause:
The request timed out on the Administration Server.

Action:
Try increasing the deployment timeout value. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-290054
Deployment request "{0}" was explicitely cancelled.

Category:
DeploymentService

Cause:
Not applicable.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-290055
Deployment request "{0}" timed out on the Administration Server during "{1}".

Category:
DeploymentService

Cause:
The deployment request timed out.

Action:
Try increasing the deployment timeout value. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-290056
indeterminate

Category:
DeploymentService

Cause:
Not applicable

Action:
No action is required.

BEA-290057
Invalid DeploymentRequest: the object returned by the DeploymentService has been modified in an incompatible way.

Category:
DeploymentService

Cause:
The deployment request is not of the expected type.

Action:
Check for a preceding conflict start message in the logs. Try to avoid the conflict by taking one of the suggested actions. If the problem persists, contact My Oracle Support and provide the stack trace for further analysis.

BEA-290058
There is no request corresponding to request ID "{0}" currently being processed. The request will be cancelled if it is received in the future.

Category:
DeploymentService

Cause:
The specified request ID is not active.

Action:
Check that your task ID is the task that you would like to cancel.

BEA-290059
Operation "{0}" is not one of the supported types when creating a Change Descriptor.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
DeploymentService

Cause:
An invalid change descriptor type was specified.

Action:
This is an internal WebLogic Server error. If the problem persists, contact My Oracle Support.

BEA-290060
Duplicate registration for "{0}".

Category:
DeploymentService

Cause:
Two different deployment instances were registered for the same type.

Action:
This is an internal WebLogic Server error. If the problem persists, contact My Oracle Support.

BEA-290061
UnrecognizedTypes: "{0}", "{1}"

Category:
DeploymentService

Cause:
A deployment type is invalid.

Action:
This is an internal WebLogic Server error. If the problem persists, contact My Oracle Support.

BEA-290062
The server configuration is out of date with the domain configuration and an attempt to synchronize with the admin server failed in {0} phase. This server needs to be restarted to enable it to synchronize with the domain configuration.

Category:
DeploymentService

Cause:
The server configuration is out of date with the domain configuration and an attempt to synchronize with the admin server failed in {0} phase. This server needs to be restarted to enable it to synchronize with the domain configuration.

Action:
Restart the server and if that does not resolve the problem, contact My Oracle Support and provide the stack trace for further analysis.

BEA-290063
Commit for request "{0}" will not proceed further since its requires restart flag is set.

Category:
DeploymentService

Cause:
The changes in the deployment request require a restart.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Restart either the server or the system resource that is part of the request.

BEA-290064
Deployment service servlet encountered an exception while handling the deployment service message for request id "{0}" from server "{1}". Exception is: "{2}".

Category:
DeploymentService

Cause:
Error occurred while handling the deployment service message request.

Action:
This is an internal WebLogic Server error. Refer to the underlying error message and determine if the error can be corrected. Verify that there are no network connection issues between the administration and managed servers.

BEA-290065
Deployment service servlet encountered an Exception while handling the deployment datatransfer message for request id "{0}" from server "{1}". Exception is: "{2}".

Category:
DeploymentService

Cause:
Error occurred while handling the deployment datatransfer request.

Action:
This is an internal WebLogic Server error. Refer to the underlying error message and determine if the error can be corrected. Verify that there are no network connection issues between the administration and managed servers.

BEA-290066
Error occurred while downloading files from Administration Server for deployment request "{0}". Underlying error is: "{1}"

Category:
DeploymentService

Cause:
The connection used for the file download received an error.

Action:
Refer to the underlying error message and determine if the error can be corrected. Verify that there are no network connection issues between the administration and managed servers.

BEA-290067
Deployment request "{0}" was cancelled because servers: "{1}" were unreachable and the domain has cluster-constraints-enabled is set to true. To deploy to this cluster, either start the unreachable servers or remove the unreachable servers from the cluster, then reattempt the deployment. If this behaviour is not intended, set cluster-constraints-enabled on the domain to false and restart the Administration Server. This allows you to deploy the application only to those servers that can be reached.

Category:
DeploymentService

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Not all the servers in the cluster are running and cluster-constraints-enabled is set to true.

Action:
Start all the servers in the cluster and try deployment again, or if this behaviour is not intended, set cluster-constraints-enabled on the domain to false and restart the Administration Server.

BEA-290068
A deployment service request has been received by this Managed Server that was intended for the Administration Server. The source of the request is "{0}".

Category:
DeploymentService

Cause:
The source Managed Server was started with a URL for the Administration Server that incorrectly identified this server.

Action:
Start the source Managed Server with the correct URL for the Administration Server.

BEA-290069
Commit failed message received for id: "{0}", but exception details cannot be transported. Please look at target server log file for more details.

Category:
DeploymentService

Cause:
The send of the commit message failed.

Action:
Check the exception details in the server log and determine if the failure can be corrected.

BEA-290070
Deployment service servlet encountered an exception while parsing the multipart/form-data request:"{0}". Exception is: "{1}".

Category:
DeploymentService

Cause:
The request is not an RFC 1867-compliant multipart/form-data request.

Action:
This is an internal WebLogic Server error. No action is required.

BEA-290071
Deployment service servlet failed when parsing the request or uploading the file.

Category:
DeploymentService

Cause:
The request is not an RFC 1867-compliant multipart/form-data stream.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
The request should comply with RFC 1867. Verify that the Administration Server and Managed Servers are running versions that interoperate.

BEA-290073
Deployment service servlet received a request of type "{0}" with an invalid application name: "{1}".

Category:
DeploymentService

Cause:
An invalid deployment service servlet request was made.

Action:
Correct the application name and retry the request.

BEA-290074
Deployment service servlet received file download request for file "{0}". The file may exist, but automatic download of this file is not allowed; it must be manually transferred.

Category:
DeploymentService

Cause:
The file to download is a security file or is outside of the domain root directory.

Action:
Enter a valid file name for download.

BEA-290075
Target Server encountered an error in sending "{0}" of id "{1}" with "{2}".

Category:
DeploymentService

Cause:
The deployment message cannot be delivered to the Administration Server.

Action:
This is an internal WebLogic Server error. No action is required.

BEA-290076
Total size of transferred files is "{0}" GB and it exceeded configured limit "{1}" GB.

Category:
DeploymentService

Cause:
Total size of transferred file exceeded the configured limit.

Action:
Delete unwanted files from the directory and try again

BEA-290077
Transfered files and its file size is like as follows.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
DeploymentService

Cause:
Total size of transferred file exceeded the configured limit.

Action:
Delete unwanted files from the directory and try again

BEA-290078
"{0}" : "{1}" GB

Category:
DeploymentService

Cause:
Total size of transferred file exceeded the configured limit.

Action:
Delete unwanted files from the directory and try again

BEA-290079
Deployment service servlet received a request of type "{0}" with an invalid upload path: "{1}".

Category:
DeploymentService

Cause:
An invalid deployment service servlet request was made.

Action:
Correct the upload path and retry the request.

BEA-290080
Deployment service servlet received a request of type "{0}" with no upload path.

Category:
DeploymentService

Cause:
An invalid deployment service servlet request was made.

Action:
This is an internal WebLogic Server error. No action is required. If the problem persists, contact My Oracle Support.

BEA-290081
Deployment service servlet received a request of type "{0}" with an invalid partition name: "{1}".

Category:
DeploymentService

Cause:
An invalid deployment service servlet request was made.

Action:
Correct the partition name and retry the request.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-290082
Deployment service servlet received a request of type "{0}" unable to overwrite existing file: "{1}".

Category:
DeploymentService

Cause:
An invalid deployment service servlet request was made.

Action:
Remove existing user file and retry the request.

BEA-290083
Deployment service servlet received a request of type "{0}" file already exists: "{1}".

Category:
DeploymentService

Cause:
An invalid deployment service servlet request was made.

Action:
Remove existing user file or set overwrite flag and retry the request.

BEA-290084
Can not create upload directory: {0}.

Category:
DeploymentService

Cause:
The upload directory cannot be created.

Action:
Check the file permission on the parent directory.

BEA-290085
The directory for upload is not a directory: {0}.

Category:
DeploymentService

Cause:
The directory for upload is not a directory.

Action:
Check the file path and permission on the directory.

BEA-290086
Upload directory is not writable: {0}.

Category:
DeploymentService

Cause:
Can not write to the upload directory.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the file permission on the directory.

BEA-290087
Data transfer between administration and managed server failed for resource "{0}".

Category:
DeploymentService

Cause:
The named resource was unavailable, the read failed, or communication between administration and managed server failed.

Action:
Inspect the underlying file-system error, correct the problem, and retry.

BEA-300037
The NodeManager at host {0} and port {1} seems to be down. Start the NodeManager and rerun the command.

Category:
NodeManager

Cause:
The NodeManager is not running.

Action:
Start the NodeManager and rerun the command.

BEA-300040
An I/O error occurred while writing a NodeManager status change message.

Category:
NodeManager

Cause:
Possible causes are that the standard output stream has been closed or the NodeManager stopped monitoring.

Action:
If this server requires monitoring, restart the server.

BEA-300043
NodeManager native library not found - server process ID not saved.

Category:
NodeManager

Cause:
The NodeManager native library is not in the library search path or is unavailable on this platform.

Action:
Ensure that the NodeManager native library is available and in the library search path.

BEA-300044
An I/O error occurred while writing the server PID file: "{0}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
NodeManager

Cause:
The server PID file might be write-protected.

Action:
Ensure that the server PID file is not write-protected. In addition, check to see if the parent directory exists (should have been created by the NodeManager server before starting the server).

BEA-300048
Unable to start the server {0} : {1}

Category:
NodeManager

Cause:
The most likely cause is a configuration error in the Shell/SSH/RSH NodeManager configuration.

Action:
Ensure that you can access the remote NodeManager. This may require setting up SSH permissions for the SSH-based NodeManager. In addition, ensure that the default PATH settings for the remote NodeManager are correct. See the NodeManager documentation for more information.

BEA-300049
An I/O error occurred while writing the server URL file: "{0}".

Category:
NodeManager

Cause:
The server URL file might be write-protected.

Action:
Ensure that the server URL file is not write-protected. In addition, check to see if the parent directory exists (it should have been created by the NodeManager server before starting the server).

BEA-300051
An I/O error occurred while updating the startup properties for "{0}". This probably occurred because the NodeManager is unreachable. This could mean that the servers boot.properties or startup.properties file is out of date, and the next time NodeManager attempts to automatically restart the server on a failure, it will use out of date properties. To resolve this issue, either ensure that the NodeManager is able to receive the updates and reset the properties, or restart the server.

Category:
NodeManager

Cause:
An I/O error occurred while updating the startup properties for "{0}". This probably occured because the NodeManager is unreachable.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Either ensure that the NodeManager is able to receive the updates and reset the properties, or restart the server.

BEA-300053
A migratable server was not found to contain any specified IP address in the ServerMBean or custom network channels for migration. No IPs will be passed to NodeManager and no IPs will be migrated. The server may not start without an available address, or may not be accessible throughout migration without a consistent IP. Configure an appropriate floating listen address for the server.

Category:
NodeManager

Cause:
A migratable server was not found to contain any specified IP address in the ServerMBean or custom network channels for migration. No IPs will be passed to NodeManager and no IPs will be migrated. The server may not start without an available address, or may not be accessible throughout migration without a consistent IP.

Action:
Configure an appropriate floating listen address for the server.

BEA-300054
Could not find appropriate IP for ListenAddress "{0}" specified for a migratable server. Reason: "{1}". The NodeManager may not be able to bind the specified address and the server may not start without the available address. Configure an appropriate floating listen address for the server.

Category:
NodeManager

Cause:
No appropriate IP was found for a migratable server's listen address. The NodeManager may not be able to bind the address specified and the server may not start without the available address. Configure an appropriate floating listen address for the server.

Action:
Configure an appropriate floating listen address for the server.

BEA-300055
The NodeManagerMonitor add requires a non-null MachineMBean to monitor the active status of a NodeManager.

Category:
NodeManager

Cause:
See the message body.

Action:
Provide a non-null MachineMBean.

BEA-300056
Could not execute the native output file rotation logic due to "{0}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
NodeManager

Cause:
Could not execute the native output file rotation logic due to "{0}".

Action:
Could not execute the native output file rotation logic due to "{0}".

BEA-300057
Starting server {0} on machine {2} at {1}

Category:
NodeManager

Cause:
Starting server {0} on machine {2} at {1}

Action:
No action is required.

BEA-300058
Starting server {0} on machine at {1}

Category:
NodeManager

Cause:
Starting server {0} on machine at {1}

Action:
No action is required.

BEA-310001
Subsystem {0} in partition {1} has failed. Setting server state to FAILED.

Category:
Health

Cause:
One of the critical subsystems of the server has failed.

Action:
Check the server log to determine the cause of the subsystem failure.

BEA-310002
{0}% of the total memory in the server is free.

Category:
Health

Cause:
The percentage of free memory in the server has changed.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-310003
Free memory in the server is {0} bytes. There is danger of receiving an OutOfMemoryError.

Category:
Health

Cause:
Free memory in the server is very low.

Action:
Analyze heap memory usage for possible memory leak. If no memory leak is found, consider restarting server with a larger maximum heap size.

BEA-310006
Critical subsystem {0} in partition {1} has failed. Setting server state to FAILED. Reason: {2}

Category:
Health

Cause:
One of the critical subsystems of the server has failed.

Action:
Check the server log to determine the cause of the subsystem failure.

BEA-310007
Subsystem {0} in partition {1} has failed because of: {2} However, notification did not occur because {0} was not registered with the HealthMonitorService.

Category:
Health

Cause:
One of the subsystems of the server has failed.

Action:
Check the server log to determine the cause of the subsystem failure. MigratableTargets may need to be manually moved, since the automatic migration subsystem requires HealthMonitor notification to work properly.

BEA-310008
Non-critical subsystem {0} in partition {1} has failed. Reason: {2}

Category:
Health

Cause:
One of the non-critical subsystems of the server has failed.

Action:
Check the server log to determine the cause of the subsystem failure.

BEA-310009
Restart of persistent store {0} and its upper services in partition {1} has failed after {2} restart attempts in {3} seconds. Reason: {4}

Category:
Health

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Restart of persistent store and its upper services has failed.

Action:
Check the server log to determine the cause of the Restart failure.

BEA-310010
Persistent store "{0}" in partition "{1}" is reporting a failure. It will attempt up to {2} restarts with {3} seconds between each attempt.

Category:
Health

Cause:
This is an informational message.

Action:
No action is required.

BEA-310011
Persistent store "{0}" in partition "{1}" and the services that depend on this store have been restarted successfully.

Category:
Health

Cause:
This is an informational message.

Action:
No action is required.

BEA-320000
The Diagnostics subsystem is initializing on Server {0}.

Category:
Diagnostics

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320001
The ServerDebug service initialized successfully.

Category:
Diagnostics

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320002
The Diagnostics subsystem is stopping on Server {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Diagnostics

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320004
The following unexpected exception was thrown: {0}

Category:
Diagnostics

Cause:
An exception was thrown unexpectedly.

Action:
Take appropriate action based on the unexpected exception message.

BEA-320005
Diagnostic monitor of unknown type {1} used in instrumentation scope {0}.

Category:
Diagnostics

Cause:
The Diagnostic Monitor library is probably out of date.

Action:
Update the Diagnostic Monitor library.

BEA-320008
Error occurred while collecting diagnostic metrics:

Category:
Diagnostics

Cause:
An error occurred while constructing a Harvester instance.

Action:
Ensure that all harvester configuration parameters are set appropriately.

BEA-320009
The elapsed time of the last snapshot of diagnostic metrics exceeded the configured sample period by the following number of milliseconds: {0}.

Category:
Diagnostics

Cause:
Harvested MBeans and/or DataSources are taking too long to return sampled attribute values.

Action:
Increase the sample period window.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320010
An error occurred while generating a diagnostic image: {0}

Category:
Diagnostics

Cause:
Permissions were abruptly changed on the zip/directory. The file system does not have sufficient disk space to continue writing the image.

Action:
Allocate sufficient disk space and provide the proper permissions to create the image zip file.

BEA-320011
The following diagnostic image destination directory could not be created: {0}

Category:
Diagnostics

Cause:
You have not given write permissions to the absolute path for the default directory, or you have not allocated sufficient disk space for the directory to be created.

Action:
You must give write permissions to the absolute path for the default directory if no configured destination directory is specified. You must also allocate sufficient disk space for the default directory to be created if no destination directory is specified.

BEA-320012
The following destination directory for diagnostic images could not be read or written to: {0} or there is not enough free space available to create the diagnostic image.

Category:
Diagnostics

Cause:
The directory was not created or directory read and write permissions were not given to the directory.

Action:
Create the destination directory with the appropriate read and write permissions.

BEA-320013
Diagnostic image capture was attempted during a lockout period.

Category:
Diagnostics

Cause:
The ImageManager has locked image captures for a specified number of minutes.

Action:
The lockout period must expire before a new image capture request is accepted.

BEA-320014
Lockout of {0} above allowed maximum lockout minutes for image captures.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Diagnostics

Cause:
The specified a number of minutes exceeds the maximum allowed lockout minutes.

Action:
Specify a lockout period between the minimum and maximum.

BEA-320015
Lockout of {0} below allowed minimum lockout minutes for image captures.

Category:
Diagnostics

Cause:
The specified a number of minutes falls below the minimum allowed lockout minutes.

Action:
Specify a lockout period between the minimum and maximum.

BEA-320016
Creating diagnostic image in {0} with a lockout minute period of {1}.

Category:
Diagnostics

Cause:
A FirstFailure has occurred, a diagnostic image notification handler was configured, or a capture image method was explicitly invoked on ImageManager.

Action:
No action is required. The diagnostic image capture request will be scheduled and executed.

BEA-320018
Instrumentation engine configuration {0} could not be parsed due to: {1}

Category:
Diagnostics

Cause:
The instrumentation engine configuration is possibly malformed.

Action:
Check for other log messages that give more information about the failure.

BEA-320019
Code generator class {1} for standard monitor {0} could not be found.

Category:
Diagnostics

Cause:
The standard monitor code generator was not on the class path.

Action:
Check for other log messages that give more information about the failure.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320020
Code generator {1} for standard monitor {0} could not be instantiated.

Category:
Diagnostics

Cause:
The standard monitor code generator is missing the default constructor.

Action:
Check for other log messages that give more information about the failure.

BEA-320021
The code generator {1} could not be accessed for standard monitor {0}.

Category:
Diagnostics

Cause:
The standard monitor code generator implementation has problems.

Action:
Check for other log messages that give more information about the failure.

BEA-320022
An error was encountered while creating SerialVersionUID for class {0}.

Category:
Diagnostics

Cause:
SerialVersionUID for a class could not be created.

Action:
Check for other log messages that give more information about the failure.

BEA-320023
File {0} does not contain a valid Java class

Category:
Diagnostics

Cause:
The file does not contain a valid Java class.

Action:
Make sure that the file being instrumented is a valid Java class file.

BEA-320024
Class in file {0} could not be instrumented.

Category:
Diagnostics

Cause:
This can happen when the input file or output file cannot be read from or written to.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the file permissions and disk space.

BEA-320025
Input file {0} for instrumentation engine cannot be found.

Category:
Diagnostics

Cause:
The input class file does not exist.

Action:
Provide the correct path to the input class file.

BEA-320026
Monitor {0} could not be found in instrumentation engine configuration.

Category:
Diagnostics

Cause:
The monitor name may be misspelled.

Action:
Specify the correct monitor name on the command line.

BEA-320030
Delegating monitor {1} in scope {0} allows using action of type {2}, which does not exist.

Category:
Diagnostics

Cause:
A delegating monitor was not properly configured in the instrumentation engine configuration.

Action:
Check for other log messages that give more information about the failure.

BEA-320031
An attempt to add a monitor of type {1} to instrumentation scope {0} failed because the monitor already exists in the scope.

Category:
Diagnostics

Cause:
Instrumentation configuration was incorrect.

Action:
Remove multiple monitor entries with same types from the instrumentation scope configuration.

BEA-320032
Attempt to add duplicate action {2} to monitor {1} in scope {0} failed.

Category:
Diagnostics

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Instrumentation scope configuration is incorrect. It has duplicate actions attached to the same monitor.

Action:
Remove duplicate actions attached to the same monitor.

BEA-320033
Attempt to attach incompatible action of type {2} to a delegating monitor of type {1} in scope {0}.

Category:
Diagnostics

Cause:
Instrumentation configuration is incorect.

Action:
Make sure that only compatible actions are used with delegating monitors.

BEA-320034
Instrumentation engine configuration {0} could not be parsed. {1}

Category:
Diagnostics

Cause:
The instrumentation configuration is malformed.

Action:
Check for other log messages that give more information about the failure.

BEA-320035
Instrumentation configuration {0} could not be read.

Category:
Diagnostics

Cause:
The instrumentation configuration is missing or invalid.

Action:
Check for other log messages that give more information about the failure.

BEA-320036
Instrumented method {1}{2} in class {0} exceeds size limit. Original method is preserved.

Category:
Diagnostics

Cause:
The original method is too large to begin with. The class to which it belongs is probably generated by a generator program.

Action:
If possible, split the method into multiple methods. Exclude the class from instrumentation to speed up the instrumentation process.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320037
Class bytes for {0} do not conform to class format.

Category:
Diagnostics

Cause:
The class file is corrupt.

Action:
Make sure that the class file is not corrupt.

BEA-320038
Could not instrument class {0}

Category:
Diagnostics

Cause:
This is a general instrumentation failure.

Action:
Check for other log messages that give more information about the failure.

BEA-320039
Invalid class inclusion pattern(s) for instrumentation engine/scope {0}. Disabling instrumentation in scope {0}.

Category:
Diagnostics

Cause:
Inclusion patterns are malformed.

Action:
Specify inclusion patterns in the correct format.

BEA-320040
Invalid class exclusion pattern(s) for instrumentation engine/scope {0}. Disabling instrumentation in scope {0}.

Category:
Diagnostics

Cause:
One or more exclusion patterns are malformed.

Action:
Specify exclusion patterns in the correct format.

BEA-320041
Invalid lockout minutes {0} specified in image notification. Image capture was not performed.

Category:
Diagnostics

Cause:
The value is invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Recreate the notification with a valid lockout minutes value.

BEA-320042
Invalid diagnostic image location {0} specified in notification, exception message is {1}. Image capture was not performed.

Category:
Diagnostics

Cause:
The value is not a valid directory or file name.

Action:
Recreate the notification with a valid image location. Take appropriate action based on the exception message.

BEA-320043
Image notification was not performed because the image capture was attempted before the lockout time expired. The exception message is {0}

Category:
Diagnostics

Cause:
An image capture was attempted before the lockout period expired.

Action:
Recreate the image notification with a smaller value for lockout minutes. Optionally, use the watch alarm feature to ensure that the notification does not occur again before the lockout period has expired.

BEA-320044
Error occurred while performing a watch notification:

Category:
Diagnostics

Cause:
An error occurred while performing the operations required for the notification.

Action:
Take appropriate action based on the unexpected exception message.

BEA-320047
Mail notification has not been sent due to an error that occurred while creating or sending a mail message:

Category:
Diagnostics

Cause:
An error occurred while performing the mail operations required for the notification.

Action:
Verify the MailSession properties and email destination. Take appropriate action based on the Messaging exception message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320048
JMS notification message has not been sent due to an error that occurred while creating a JMS map message:

Category:
Diagnostics

Cause:
An error occurred while performing the JMS operation.

Action:
Verify the JMS queue and connection factory configuration settings in the JMS notification. Take appropriate action based on the JMS exception message.

BEA-320049
An exception occurred sending JMS notification message. Reinitializing JMS objects and retrying.

Category:
Diagnostics

Cause:
An error occurred while sending the JMS message.

Action:
Look for additional error messages in the log from the reinitialization or resend of the message.

BEA-320052
An error occurred while initializing a SMTP notification:

Category:
Diagnostics

Cause:
The mail session is incorrectly configured or not available.

Action:
Ensure that the mail session JNDI name is correct. Ensure that the mail session MBean properties are valid. Take appropriate action based on the exception message.

BEA-320053
The SNMP Agent is not configured. The trap for the SNMP Watch notification cannot be sent.

Category:
Diagnostics

Cause:
The SNMP Agent is not enabled.

Action:
Enable the SNMP Agent using the console.

BEA-320054
An error occurred while sending an SNMP notification:

Category:
Diagnostics

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An exception occurred in the SNMP Agent when sending the SNMP trap to the configured trap destinations.

Action:
Ensure that the trap destinations are configured correctly. Take appropriate action based on the exception message.

BEA-320055
Could not read or create index on log file {0}.

Category:
Diagnostics

Cause:
The drive may be full or the directory is not writable.

Action:
Check whether the drive is full or the directory is not writable.

BEA-320056
Log index file {0} has an invalid magic number.

Category:
Diagnostics

Cause:
The index file is corrupt or invalid.

Action:
Delete the corrupt index file.

BEA-320057
Log index file {0} contents are inconsistent with its header.

Category:
Diagnostics

Cause:
The index file is corrupt or truncated.

Action:
Delete the index file.

BEA-320058
Could not parse log record: {0}

Category:
Diagnostics

Cause:
The log record is malformed.

Action:
Check for other log messages that give more information about the failure.

BEA-320063
An attempt to add watch {0} failed because the watch has already been defined.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Diagnostics

Cause:
Two different watch definitions have the same name.

Action:
Remove one of the watch entries that has the same name.

BEA-320064
Watch {0} could not be created due to the following unexpected exception: {1}

Category:
Diagnostics

Cause:
An exception occurred unexpectedly.

Action:
Take appropriate action based on the unexpected exception message.

BEA-320066
An attempt to add notification {0} failed because the notification has already been defined.

Category:
Diagnostics

Cause:
Two different notification definitions have the same name.

Action:
Remove one of the notification entries with the same name.

BEA-320068
Watch "{0}" in module "{1}" with severity "{2}" on server "{3}" has triggered at {4}. Notification details: {5}

Category:
Diagnostics

Cause:
A configured watch has evaluated to true and has triggered.

Action:
No action is required.

BEA-320069
Watch {0} contains an invalid notification {1} that is not defined.

Category:
Diagnostics

Cause:
The notification does not exist.

Action:
Define the notification or remove the notification from the watch.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320070
Error occurred while performing notification {1} for watch {0}. Notification may not have completed.

Category:
Diagnostics

Cause:
An exception occurred while performing the notification.

Action:
Validate the definition for the specified watch and notification. Take appropriate action based on the error message.

BEA-320071
Error occurred while creating watch notification {0}. Notifications may not have completed for this watch.

Category:
Diagnostics

Cause:
An exception occurred while creating the watch notification.

Action:
Validate the definition for the specified watch and notification. Take appropriate action based on the error message.

BEA-320073
Error while locating a record for timestamp {0} in the archive

Category:
Diagnostics

Cause:
There is a misconfigured or missing data archive for harvested data.

Action:
Check that the harvested data archive exists.

BEA-320074
Error while executing query.

Category:
Diagnostics

Cause:
A runtime error occurred while executing a query.

Action:
Check for other log messages that give more information about the failure.

BEA-320075
Error while reading a record from the archive

Category:
Diagnostics

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The harvested data archive may be corrupt.

Action:
Reconfigure the harvested data archive.

BEA-320076
Could not initialize index information for harvester data archive.

Category:
Diagnostics

Cause:
The harvested data archive may be corrupt.

Action:
Reconfigure the harvested data archive.

BEA-320077
Initialized the Diagnostic Accessor Service.

Category:
Diagnostics

Cause:
This is a normal operation.

Action:
No action is needed.

BEA-320078
Could not initialize the Diagnostic Accessor Service Runtime during server startup.

Category:
Diagnostics

Cause:
The exception message includes the details about the cause of this problem.

Action:
Take corrective action based on the exception stack trace.

BEA-320079
Watch "{0}" rule expression evaluation failed with an exception. No notifications will be performed for this watch. The exception is:

Category:
Diagnostics

Cause:
An exception occurred during rule evaluation.

Action:
Verify that the rule expression is valid. Take appropriate action based on the exception message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320080
The log type {0} is unknown. Unable to lookup the DiagnosticDataAccessRuntimeMBean instance.

Category:
Diagnostics

Cause:
This message indicates that the logical name that was specified to look up the DiagnosticDataAccessRuntimeMBean is not correct.

Action:
Verify that the log type is valid. Take appropriate action based on the exception message.

BEA-320082
Configuration for diagnostic monitor {0} in instrumentation scope {1} has errors. The exception is:

Category:
Diagnostics

Cause:
An exception occurred while reading the configuration of a diagnostic monitor in a scope.

Action:
Verify that the configuration for the diagnostic monitor is valid.

BEA-320083
Custom diagnostic monitor {0} in instrumentation scope {1} has missing or invalid location attribute.

Category:
Diagnostics

Cause:
There is a missing or invalid value of the "location" attribute of a custom diagnostic monitor.

Action:
Verify that the "location" attribute of the custom monitor has a correct value.

BEA-320084
The user {0} does not have authorization to view the logs.

Category:
Diagnostics

Cause:
A user with insufficient authorization attempted to access the server logs.

Action:
Ensure that the right users are granted access to view the logs.

BEA-320085
The diagnostic data is accessible only through https in Production mode.

Category:
Diagnostics

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt to access the diagnostic data was made over a non-secure protocol in Production mode.

Action:
Ensure that the SSL is enabled in Production mode and that the servlet is accessed only over a secure protocol.

BEA-320086
The monitor type {1} in scope {0} contains unacceptable characters.

Category:
Diagnostics

Cause:
The monitor type contains unacceptable characters. It must start with an alphabetic character, followed by alphanumeric or underscore characters.

Action:
Fix the assigned monitor type, which must start with an alphabetic character, optionally followed by alphanumeric or underscore characters.

BEA-320087
The cursor {0} has timed out and is being removed from the registry of open cursors.

Category:
Diagnostics

Cause:
This message is emitted when a cursor has not been invoked and is being removed to free up the associated resources.

Action:
Ensure that fetch is not called anymore on the closed cursor.

BEA-320088
The cursor with name {0} does not exist.

Category:
Diagnostics

Cause:
The cursor could have timed out or been closed by the user explicitly. Otherwise, or an invalid name has been provided.

Action:
Invoke the fetch method with the name of a valid cursor.

BEA-320091
Attempt to use unknown action {1} in action group {0}

Category:
Diagnostics

Cause:
This is due to an incorrect or incomplete instrumentation engine configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check for other log messages that give more information about the failure.

BEA-320092
Monitor {0} used empty or non-existent action group {1}

Category:
Diagnostics

Cause:
This is due to an incorrect or incomplete instrumentation engine configuration.

Action:
Check for other log messages that give more information about the failure.

BEA-320093
Encountered problem while reading attributes of monitor {0}. Attributes: {1}

Category:
Diagnostics

Cause:
Possibly invalid attribute names were specified with the diagnostic monitor.

Action:
Specify correct attributes for the diagnostic monitor.

BEA-320094
Could not initialize server instrumentation scope.

Category:
Diagnostics

Cause:
Internal error

Action:
Check for other log messages that give more information about the failure.

BEA-320096
Cannot create custom monitor {0} in server instrumentation scope.

Category:
Diagnostics

Cause:
Custom monitors can not be defined in the server instrumentation scope.

Action:
Remove the custom monitor definition from the server instrumentation scope.

BEA-320097
Monitor {0} can be created only in an application instrumentation scope. It cannot be created in server instrumentation scope.

Category:
Diagnostics

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt was made to create a monitor in the server scope, but it can only be created in the application scope.

Action:
Remove the monitor definition from the server instrumentation scope.

BEA-320098
Monitor {0} can be created only in server instrumentation scope. It can not be created in application instrumentation scope {1}.

Category:
Diagnostics

Cause:
An attempt was made to create a monitor in the application scope, but it can only be created in the server scope.

Action:
Remove the monitor definition from the application instrumentation scope.

BEA-320100
Configuration for JDBC-based diagnostic archives is invalid or incomplete. Using file based diagnostic archive.

Category:
Diagnostics

Cause:
The configuration for JDBC-based diagnostic archives is invalid or incomplete.

Action:
Fix the configuration for JDBC-based diagnostic archives.

BEA-320101
Attempt to target more than one WLDFSystemResource to server {0}.

Category:
Diagnostics

Cause:
This error indicates that an invalid targeting was specified for a WLDFSystemResource.

Action:
Ensure that only one WLDFSystemResource is targeted to a server.

BEA-320102
An error occcurred when trying to access the diagnostic data while executing the query expression {0}.

Category:
Diagnostics

Cause:
The query was not specified properly.

Action:
Ensure that the query is valid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320103
An error occurred while creating the DiagnosticDataRuntimeMBean instance with the given logical name {0}.

Category:
Diagnostics

Cause:
The logical name is not a valid parameter or an error occurred while reading the diagnostic data.

Action:
Ensure that the logical name is valid and take corrective action based on the reported error.

BEA-320104
An error occurrred when invoking the log4j operation while activating/deactivating log watch rules.

Category:
Diagnostics

Cause:
The log4j libraries may not be in the CLASSPATH.

Action:
Ensure that the log4j libraries are available when using Log watch rules with Log4j enabled.

BEA-320105
The watch rule expression {0} is not valid.

Category:
Diagnostics

Cause:
The watch rule expression does not conform to the correct syntax.

Action:
Specify a valid watch rule expression.

BEA-320106
The watch notification configuration already contains a notification with the given name {0}.

Category:
Diagnostics

Cause:
The name for the WLDFNotification you are adding is not unique.

Action:
Specify a unique name for the notification.

BEA-320111
The elapsed time since the last Harvester cycle ({0} milliseconds) is unacceptably short. Skipping this cycle in order to smooth out the responses.

Category:
Diagnostics

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The previous Harvesting process consumed a large percentage of the sample period. This can happen for 3 reasons: 1) you requested that a very large amount of data be harvested, 2) the system is consistently slow for some reason, 3) an intermittent service caused the process to slow down temporarily (for example, for garbage collection).

Action:
No action is required. The Harvester will compensate by skipping cycles that occur too soon. If this happens consistently, either because you are harvesting a large amount of data, or the Harvester is running on a slow system, you can either increase the samplePeriod or increase system resources.

BEA-320113
The type {0} is no longer being harvested.

Category:
Diagnostics

Cause:
This is caused by an earlier problem. Sufficient log messages should have been issued at the point of failure to allow the problem to be debugged. Note that the type will remain deleted until the Harvester configuration is reloaded. At that time, if the problem is not yet resolved, this message may be issued again.

Action:
No action is required. Typically, this type of error will cause some of the requested data to not be harvested. It is advisable to fix the issue.

BEA-320114
Initializing the Diagnostics Harvester.

Category:
Diagnostics

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320115
The Harvester is configured to be disabled.

Category:
Diagnostics

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320116
Harvester type {0} is configured to be disabled. No harvesting will occur for this type.

Category:
Diagnostics

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320117
The Harvester is being disabled because there are no valid Harvestable types configured.

Category:
Diagnostics

Cause:
This may occur because you did not provide any type specifications, or, if type specifications were provided, none of the specified types were harvestable.

Action:
No action is required.

BEA-320118
The Harvester timer has been initiated for an interval of {0} milliseconds.

Category:
Diagnostics

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320119
The Harvester is now in a {0} state.

Category:
Diagnostics

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320122
Unable to harvest attribute {0} on item {1} due to errors. This attribute will no longer be harvested.

Category:
Diagnostics

Cause:
The actual problem occurred at a previous point in time. Sufficient messages should have been issued at the point of failure to facilitate debugging the problem.

Action:
No action is required. Typically, this type of error will cause some of the requested data to not be Harvested. It is advisable to fix the issue.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320123
Could not add MBean instance {0} to the harvested instance list for type {1}: {2}.

Category:
Diagnostics

Cause:
The actual problem occurred at a previous point in time. Sufficient messages should have been issued at the point of failure to facilitate debugging the problem.

Action:
No action is required. Typically, this type of error will cause some of the requested data to not be Harvested. It is advisable to fix the issue.

BEA-320124
The harvester has discovered a new instance of harvested type {1} named {0}.

Category:
Diagnostics

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320125
Attention: {0}

Category:
Diagnostics

Cause:
This indicates a system error, not a user error. Further investigation is required to determine the cause.

Action:
In most cases, you should be able to turn on Harvester debug to obtain additional information.

BEA-320126
Reinitializing the Diagnostics Harvester.

Category:
Diagnostics

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320127
An error occurred while generating Image Source {0} as part of the diagnostic image zip file:

Category:
Diagnostics

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An unexpected error occurred while the subsystem was collecting or persisting the diagnostic image source information.

Action:
Take appropriate action based on the unexpected exception message.

BEA-320128
The WLDFResourceBean is not found for the WLDFSystemResource {0}.

Category:
Diagnostics

Cause:
This error is caused by either a deleted or corrupt WLDF descriptor file.

Action:
Ensure that the descriptor file exists for the WLDFSytemResource and that it conforms to the expected schema.

BEA-320129
Instrumentation module {0} created.

Category:
Diagnostics

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320130
Instrumentation module {0} is disabled.

Category:
Diagnostics

Cause:
This instrumentation module for server or application is disabled.

Action:
No action is required.

BEA-320131
Instrumentation module {0} is configured, but disabled because a WLDF system resource is not targeted to the server, or its instrumentation component is not enabled.

Category:
Diagnostics

Cause:
There is no WLDF system resource targeted to the server, or its instrumentation component is disabled.

Action:
Check if there is a WLDF system resource targeted to the server and its instrumentation component is enabled.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320132
Updating classes within scope {0} since its instrumentation configuration has changed.

Category:
Diagnostics

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320133
Could not instantiate one of the known accessors during server startup.

Category:
Diagnostics

Cause:
The exception message includes the details about the cause of this problem.

Action:
Take corrective action based on the exception stack trace.

BEA-320134
An error occurred while creating a domain log handler: {0}.

Category:
Diagnostics

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
Check for other log messages that give more information about the failure.

BEA-320135
JDBC-based {0} archive could not be created. Falling back on persistent store based archive.

Category:
Diagnostics

Cause:
This happens when the JDBC data source to be used with the archive is misconfigured or unavailable, or database tables are not available.

Action:
Ensure that the JDBC data source is correctly configured and available, and that database tables have been created prior to use.

BEA-320136
Class {0} could not be instrumented, due to reason: "{1}".

Category:
Diagnostics

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This can happen because the class may contain constructs that are unsafe to transform, for example, custom attributes.

Action:
Ensure that class does not have custom attributes or other such constructs.

BEA-320137
Invalid class inclusion pattern(s) for instrumentation monitor {1} in scope {0}. Disabling instrumentation in scope {0}.

Category:
Diagnostics

Cause:
There are malformed inclusion patterns in the instrumentation monitor.

Action:
Specify inclusion patterns in the instrumentation monitor using the correct format.

BEA-320138
Invalid class exclusion pattern(s) for instrumentation monitor {1} in scope {0}. Disabling instrumentation in scope {0}.

Category:
Diagnostics

Cause:
There are malformed exclusion patterns in the instrumentation monitor.

Action:
Specify exclusion patterns in the instrumentation monitor using the correct format.

BEA-320139
Archive {0} is not found during a data retirement operation.

Category:
Diagnostics

Cause:
Data retirement may be configured for a custom archive that does not yet exist.

Action:
Ensure that the custom archive is created, or disable or remove this retirement configuration.

BEA-320140
Scheduling data retirement tasks as per configuration.

Category:
Diagnostics

Cause:
This is a normal operation.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320141
An error was encountered while performing age-based data retirement on archive {0}.

Category:
Diagnostics

Cause:
An error was encountered while performing age-based data retirement on the indicated archive.

Action:
Check for other log messages that give more information about the failure.

BEA-320142
An error was encountered while performing size-based data retirement on archive {0}.

Category:
Diagnostics

Cause:
An error was encountered while performing size-based data retirement on the indicated archive.

Action:
Check for other log messages that give more information about the failure.

BEA-320143
Scheduled {0} data retirement tasks as per configuration.

Category:
Diagnostics

Cause:
Finished processing the data retirement configuration.

Action:
No action is required.

BEA-320144
{0} operation started on archive {1}.

Category:
Diagnostics

Cause:
This is a normal operation.

Action:
No action is required.

BEA-320145
{0} operation completed on archive {1}. Retired {2} records in {3} ms.

Category:
Diagnostics

Cause:
This is a normal operation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-320146
Failed to register dye {0} at index {1}.

Category:
Diagnostics

Cause:
A dye with the same name or index already exists.

Action:
Check for other log messages that give more information about the failure.

BEA-320147
Instrumentation system is disabled because the instrumentation library is invalid.

Category:
Diagnostics

Cause:
The instrumentation engine configuration is corrupt or a required DyeInjection monitor cannot be found.

Action:
Check for other log messages that give more information about the failure.

BEA-320148
Required diagnostic monitor {0} is missing from the instrumentation library.

Category:
Diagnostics

Cause:
The instrumentation engine configuration is corrupt.

Action:
Check for other log messages that give more information about the failure.

BEA-320149
The DomainRuntime MBeanServer was not available for harvesting.

Category:
Diagnostics

Cause:
The DomainRuntime MBeanServer could not be loaded by the Harvester.

Action:
Check for other log messages that give more information about the failure.

BEA-320151
The instance name {0} in the Watch configuration {1} is invalid.

Category:
Diagnostics

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The instance name or instance-name pattern was not a valid JMX ObjectName or instance name pattern supported by the WLDF Watch and Notifications framework.

Action:
Check that the instance name is a valid ObjectName, or an instance-name pattern as specified in the WLDF Watch and Notifications framework documentation.

BEA-320152
An unexpected exception occurred while removing the set of watched metrics "{0}" from the harvester: {1}

Category:
Diagnostics

Cause:
An attempt was made to delete a set of watched metrics from the harvester that has already been removed, or one that was never activated within the harvester.

Action:
Check for other log messages that give more information about the failure.

BEA-320153
Instrumentation configuration for application "{0}" has changed. However, it will take effect only after redeploying the application, since hot-swap is not enabled.

Category:
Diagnostics

Cause:
Hot-swap is not enabled.

Action:
Redeploy the application, or restart the server with the diagnostic agent on the command line to enable hot-swap.

BEA-320154
Class redefinition failed after instrumentation configuration was changed for application "{0}" : {1}

Category:
Diagnostics

Cause:
An unexpected exception occurred while redefining classes after the instrumentation configuration was updated.

Action:
Check for other log messages that give more information about the failure.

BEA-320155
Inconsistent instrumentation handling information was specified in the same pointcut definition for {0} : {1} : {2}.

Category:
Diagnostics

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The instrumentation configuration contains a pointcut definition that specifies conflicting information for the method.

Action:
Review the pointcuts that specify the method listed in the error, and verify that there are not multiple definitions for the methods with which they conflict. For example, one indicating an argument is not-sensitive while another indicates it is.

BEA-320156
The renderer class {0} could not be loaded due to {1}, the following renderer will be used instead: {2}.

Category:
Diagnostics

Cause:
The instrumentation configuration specified a renderer class that either was not found, is not accessible, or is not a renderer.

Action:
Verify that the renderer class is correctly specified in the instrumentation configuration and that it is available to the server classloader.

BEA-320157
An error occurred when registering the log4j for data gathering operations.

Category:
Diagnostics

Cause:
The log4j libraries may not be in the CLASSPATH.

Action:
Ensure that the log4j libraries are available when using Log watch rules with Log4j enabled.

BEA-320158
An error was detected while capturing the flight recorder image.

Category:
Diagnostics

Cause:
The specified exception provides details on the error that was encountered.

Action:
Review the provided exception information to determine the cause and action to take.

BEA-320159
An error was detected while initializing the flight recording.

Category:
Diagnostics

Cause:
The specified exception provides details on the error that was encountered.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the provided exception information to determine the cause and action to take.

BEA-320160
The type-based renderer class {0} for type {1} could not be loaded due to {1}, that type-based renderer will not be used.

Category:
Diagnostics

Cause:
The instrumentation configuration specified a type-based renderer class that either was not found, is not accessible, or is not a renderer. It may also be that the type itself was not found or loadable.

Action:
Verify that the type-based renderer class and type class are correctly specified in the instrumentation configuration and that they are available to the server classloader.

BEA-320161
A legacy Spring instrumentation API was called for an unknown method {0}.

Category:
Diagnostics

Cause:
A legacy Spring instrumentation API was called for an unknown method {0}.

Action:
Instrument Spring using the tools in the current release.

BEA-320162
A legacy Spring instrumentation API was called.

Category:
Diagnostics

Cause:
A legacy Spring instrumentation API was called.

Action:
Legacy Spring features should function normally, but you should instrument Spring using the tools in the current release.

BEA-320163
Wildcarded types are not allowed to be marked as being insensitive with %.

Category:
Diagnostics

Cause:
A % character was specified for a wildcarded type, such as an asterisk or ellipses. This is not allowed, as it could lead to inadvertantly exposing a type that should be treated as being sensitive.

Action:
Review the pointcuts that specify the % character to ensure that it is not supplied for any types that are wildcarded using an asterisk or ellipses.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320164
Circular class load detected during stackmap frame computation for {0}.

Category:
Diagnostics

Cause:
An attempt was made to class load the class currently being instrumented. This is not supported.

Action:
Do not instrument the class that encountered the cycle.

BEA-320165
Received an unexpected error dispatching an Instrumentation event for Watch rule processing: {0}

Category:
Diagnostics

Cause:
An exception occurred while dispatching a WLDF Instrumentation event for Watch rule processing.

Action:
Check the server log for details on the error.

BEA-320166
Received an unexpected error dispatching an logging event for Watch rule processing: {0}

Category:
Diagnostics

Cause:
An exception occurred while dispatching a WLDF log event for Watch rule processing.

Action:
Check the server log for details on the error.

BEA-320167
Expected monitors were not instrumented : {0}

Category:
Diagnostics

Cause:
Monitors which were specified as being expected to be instrumented were not instrumented.

Action:
Review the instrumentation configuration and the code being instrumented, and then verify that all dependencies are available in the classpath to allow the instrumentor to walk the class hierarchy for inheritance matches.

BEA-320168
Disabling instrumentation on application "{0}" in partition "{1}" since it may contain shareable classloaders.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Diagnostics

Cause:
The deployment descriptor of this application may have indicated that its classloaders may be shared with applications in other partitions.

Action:
If application instrumentation for this application is needed, remove shareable classloader definitions from the weblogic-application.xml deployment descriptor.

BEA-320169
Activating dynamic debug patch "{0}" at system level.

Category:
Diagnostics

Cause:
Dynamic debug patch is being activated at the system level.

Action:
No action is required.

BEA-320170
Activating dynamic debug patch "{0}" at application "{1}"

Category:
Diagnostics

Cause:
Dynamic debug patch is being activated at the application level.

Action:
No action is required.

BEA-320171
Activating dynamic debug patch "{0}" at module "{2}" in application "{1}"

Category:
Diagnostics

Cause:
Dynamic debug patch is being activated at the indicated module in the indicated application.

Action:
No action is required.

BEA-320172
Activating dynamic debug patch "{0}" at application "{1}" in partition "{2}"

Category:
Diagnostics

Cause:
Dynamic debug patch is being activated at the indicated application in the indicated partition.

Action:
None

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320173
Activating dynamic debug patch "{0}" at module "{2}" in application "{1}" in partition "{3}"

Category:
Diagnostics

Cause:
Dynamic debug patch is being activated at the indicated module in the indicated application in the indicated partition.

Action:
No action is required.

BEA-320174
Successfully activated debug patch "{0}".

Category:
Diagnostics

Cause:
Debug patch was successfully activated.

Action:
No action is required.

BEA-320175
Failed to activate dynamic debug patch "{0}".

Category:
Diagnostics

Cause:
Classes in the dynamic debug patch may be structurally different than the original classes.

Action:
Check whether the class(es) in the dynamic debug patch are structurally different than the original classes.

BEA-320176
Deactivating dynamic debug patch "{0}" at system level.

Category:
Diagnostics

Cause:
Dynamic debug patch is being deactivated at the system level.

Action:
No action is required.

BEA-320177
Deactivating dynamic debug patch "{0}" at application "{1}"

Category:
Diagnostics

Cause:
Dynamic debug patch is being deactivated at the application level.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-320178
Deactivating dynamic debug patch "{0}" at module "{2}" in application "{1}"

Category:
Diagnostics

Cause:
Dynamic debug patch is being deactivated at the indicated module in the indicated application.

Action:
No action is required.

BEA-320179
Deactivating dynamic debug patch "{0}" at application "{1}" in partition "{2}"

Category:
Diagnostics

Cause:
Dynamic debug patch is being disabled at the indicated application in the indicated partition.

Action:
No action is required.

BEA-320180
Deactivating dynamic debug patch "{0}" at module "{2}" in application "{1}" in partition "{3}"

Category:
Diagnostics

Cause:
Dynamic debug patch is being deactivated.

Action:
No action is required.

BEA-320181
Successfully deactivated debug patch "{0}".

Category:
Diagnostics

Cause:
Debug patch was successfully deactivated.

Action:
No action is required.

BEA-320182
Failed to deactivate dynamic debug patch "{0}".

Category:
Diagnostics

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The indicated dynamic debug patch was not deactivated.

Action:
Check for other log messages that give more information about the failure.

BEA-320183
Debug patch "{0}" contains unknown classes: "{1}

Category:
Diagnostics

Cause:
Debug patch contains unknown classes that cannot be found on the classpath.

Action:
Contact the patch producers and have them address this issue.

BEA-320184
Failed to open diagnostic store file {0} due to reason: {1}. Re-trying to open..

Category:
Diagnostics

Cause:
This usually happens when the file is locked at the system level.

Action:
Identify the entity holding the lock and release the lock. This may be a system-dependent operation.

BEA-320185
Failed to open diagnostic store file {0} after {1} attempts. Some diagnostics features will be unavailable.

Category:
Diagnostics

Cause:
This usually happens when the file is locked at the system level.

Action:
Identify the entity holding the lock and release the lock. This may be a system dependent operation.

BEA-320186
Unable to find canonical path to diagnostic store directory {0}

Category:
Diagnostics

Cause:
The specified store directory path is not correct.

Action:
Specify the correct store directory path.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320187
ClassInfo for {0} is not available.

Category:
Diagnostics

Cause:
The ClassInfo for the class was not able to be retrieved or computed.

Action:
Enable instrumentation debug logging to determine the root cause.

BEA-320188
Long RID value with {0} components was created.

Category:
Diagnostics

Cause:
RID values grow during DiagnosticContext propagation, which are outbound calls to other JVMs or when Work is scheduled. Extremely long RID values may be expected but if they are growing rapidly, this may indicate a problem if they are growing unbounded. Note that the first occurrence of this message is reported immediately. After that it is throttled and only reported periodically if further growth is being seen. A corresponding log event is also produced to the FlightRecorder.

Action:
Enable DiagnosticContext debug and review the FlightRecorder data to look for JFRDebugEvents which indicate extreme RID growth and where it is seen. Pay particular attention to the scheduling of work from daemon threads. These can cause RID growth and may require that the daemon thread call DiagnosticContextHelper.handleLocalContextAsNonInheritable() to prevent propagating the Context.

BEA-320189
Log file or rotation directory for accessor {0} changed, but the accessor failed to adapt to the change.

Category:
Diagnostics

Cause:
There may have been an error while refreshing the accessor due to an internal WebLogic error.

Action:
Enable DebugDiagnosticAccessor and DebugDiagnosticArchive and review logs to get more information on the possible cause of the internal WebLogic error leading to this error.

BEA-320190
Failed to close diagnostic store.

Category:
Diagnostics

Cause:
Failed to close diagnostic store, likely to be due to an internal error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review logs to get more information on the possible cause of the internal WebLogic error leading to this error.

BEA-320200
Action {0} of type {1} not valid for current WLDF deployment, ignoring.

Category:
DiagnosticsWatch

Cause:
The action type requested may not be valid for the WLDF deployment; for example, this can happen if the action is deployed on a managed server, but is only valid deployed within the administration server.

Action:
Check the action documentation, and revise the Watch and/or action configuration accordingly.

BEA-320201
An unexpected error occurred while instantiating action {1} for action type {0}: {2}

Category:
DiagnosticsWatch

Cause:
An unexpected error occurred while instantiating the specified action instance.

Action:
Check the error in the server logs and make any necessary configuration changes.

BEA-320202
Map entry string {0} is not valid.

Category:
DiagnosticsWatch

Cause:
A Map object entry in the WLDFActionBean did not have the proper form.

Action:
Fix the entry in the WLDF System Resource descriptor.

BEA-320203
The timeout period of {1} seconds expired for action {0}, canceling the action execution.

Category:
DiagnosticsWatch

Cause:
The action did not complete withing the specified timeout interval.

Action:
Consider increasing the timeout for the action, or see if an error occurred during processing that needs to be addressed.

BEA-320204
Executing action {0} with timeout period {1} seconds.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
DiagnosticsWatch

Cause:
This is an informational message.

Action:
No action required.

BEA-320205
An IOException occurred while communicating with server {0}, unable to query it for instances matching "{1}"

Category:
DiagnosticsWatch

Cause:
A network error occurred while attempting to communicate with server {0}. If the error persists, check the server logs and Node Manager logs.

Action:
Determine the source of the communication error and correct it if possible.

BEA-320206
An error occurred while executing the script action {0}: {1}

Category:
DiagnosticsWatch

Cause:
The configured script was not executed successfully. This may be due to an error in the action configuration or an error that was encountered within the script itself.

Action:
Check the action configuration, and ensure that the script is available and has executable permissions.

BEA-320207
The script action {0} was interrupted during execution, exception: {1}

Category:
DiagnosticsWatch

Cause:
The script action may have timed out, or was abruptly terminated.

Action:
Check the error message for details about what may have caused execution to be interrupted.

BEA-320208
An invalid action configuration type {0} was passed into the ScriptAction service, expected a configuration of type {1}.

Category:
DiagnosticsWatch

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The ScriptAction service is not receiving the expected configuration type. This is likely a product defect and should be reported to My Oracle Support.

Action:
Contact My Oracle Support and provide them with the log file for further analysis.

BEA-320209
The executable path {1} for script action {0} is not valid.

Category:
DiagnosticsWatch

Cause:
The executable path indicated in the script action config is either missing or empty, or the path does not exist.

Action:
Check the action configuration and correct the executable path.

BEA-320210
Script action {0} execution of {1} completed with exit code {2}.

Category:
DiagnosticsWatch

Cause:
This is an informational message.

Action:
No action required.

BEA-320211
Script action {0} starting, stdout redirected to {1}, stderr redirected to {2}.

Category:
DiagnosticsWatch

Cause:
This is an informational message.

Action:
No action required.

BEA-320212
Cancel was requested for script action {0}, destroying the process.

Category:
DiagnosticsWatch

Cause:
The currently executing script action was cancelled externally, either by user request or by the action exceeding the configured timeout.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320213
REST notification {0} could not be delivered successfully to end point {1}. The response code is {2} and the detailed reason is {3}.

Category:
DiagnosticsWatch

Cause:
The REST end point may not be available or the REST notification is not configured correctly.

Action:
Take appropriate action based on the status code and detailed reason reported in the error.

BEA-320214
No action config present in action context.

Category:
DiagnosticsWatch

Cause:
There is likely a misconfiguration in the WLDFSystemResourceMBean associated with the action.

Action:
Check the configuration and resolve any issues.

BEA-320215
Scale down action {0} invoked for cluster {1} with scaling size {2} and timeout period of {3} seconds.

Category:
DiagnosticsWatch

Cause:
This is an informational message.

Action:
No action required.

BEA-320216
Scale down task {0} for cluster {1} complete, status: {2}

Category:
DiagnosticsWatch

Cause:
This is an informational message.

Action:
No action required.

BEA-320217
Invalid configuration {0} of type {1} passed to scale down action, expected an object of type {2}.

Category:
DiagnosticsWatch

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This was caused by an invalid configuration or a software defect.

Action:
Verify the action and policy configuration.

BEA-320218
No scale-up action config present in action context

Category:
DiagnosticsWatch

Cause:
There is likely a misconfiguration in the WLDFSystemResourceMBean associated with the action.

Action:
Check the configuration and resolve any issues.

BEA-320219
Invalid configuration {0} of type {1} passed to scale down action, expected an object of type {2}.

Category:
DiagnosticsWatch

Cause:
This was caused by an invalid configuration or a software defect.

Action:
Verify the action and policy configuration.

BEA-320220
Scale up action {0} invoked for cluster {1} with scaling size {2} and timeout period of {3} seconds.

Category:
DiagnosticsWatch

Cause:
This is an informational message.

Action:
No action required.

BEA-320221
Scale up task {0} for cluster {1} complete, status: {2}

Category:
DiagnosticsWatch

Cause:
The scale up task for the cluster is complete.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320222
Skipping actions processing for policy {0} since processing for a previous invocation is still in progress.

Category:
DiagnosticsWatch

Cause:
A previous invocation of the actions processing was found to be in progress. The new invocation was skipped.

Action:
No action is required.

BEA-320223
Another ThreadDumpAction is already in progress, so skipping execution of action {0}.

Category:
DiagnosticsWatch

Cause:
Another ThreadDumpAction is already in progress.

Action:
No action is required.

BEA-320224
Thread dump created at {0} by thread dump action {1} for policy {2} in diagnostics module {3}.

Category:
DiagnosticsWatch

Cause:
Thread dump is created due to execution of ThreadDumpAction.

Action:
Analyze generated thread dumps.

BEA-320225
Failed to write thread dump file {0}. {1}

Category:
DiagnosticsWatch

Cause:
Failed to write thread dump file due to permission or other file system problem.

Action:
Ensure appropriate permissions and sufficient disk space.

BEA-320226
Waiting for {0} seconds before capturing next thread dump.

Category:
DiagnosticsWatch

Cause:
Wait for configured time between successive thread dump captures.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

BEA-320227
An attempt to capture a heap was made while another capture was already in progress.

Category:
DiagnosticsWatch

Cause:
An attempt to capture a new heap dump was made while another capture was already in progress; only one capture is allowed at a time.

Action:
No action is required.

BEA-320228
Capturing heap heap dump to file {0}, liveSetOnly={1}

Category:
DiagnosticsWatch

Cause:

Action:

BEA-320229
An unexpected exception occurred checking for the availability of the heap dump operation, heap dump action is not available: {0}

Category:
DiagnosticsWatch

Cause:
The HotSpot Diagnostic MBean is not available in the local JVM, therefore the heap dump action will not be available.

Action:
If the heap dump action is required, consider using a version of the Java Virtual Machine that supports the HotSpot Diagnostic MBean.

BEA-320230
Heap dump capture by action {1} for policy {2} in module {3} complete, located at {0}

Category:
DiagnosticsWatch

Cause:

Action:

BEA-320231
HeapDumpAction {0} was deployed on a JVM platform that does not suport it, the action will be disabled

Category:
DiagnosticsWatch

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
HeapDumpAction {0} was deployed on a JVM platform that does not suport it.

Action:
If the action is required, consider using a JVM that supports the HotSpot Diagnostic MBean.

BEA-320232
The JMX Platform MBeanServer can not be found, heap dump actions are not available.

Category:
DiagnosticsWatch

Cause:
The Platform MBeanServer could not be found, check that the JVM supports the HotSpot Diagnostic MXBean.

Action:
If the heap dump action is required, consider using a JVM that supports the HotSpot Diagnostic MXBean.

BEA-320233
The dumpHeap() method could not be found, heap dump actions will not be available for this JVM.

Category:
DiagnosticsWatch

Cause:
The dumpHeap() method could not be found on the Hotspot Diagnostic MBean.

Action:
If the heap dump action is required, consider using a JVM that supports the HotSpot Diagnostic MXBean.

BEA-320234
The Hotspot Diagnostic MBean with ObjectName {0} could not be found, heap dump actions will not be available for this JVM

Category:
DiagnosticsWatch

Cause:
The JVM may not support heap dump operations.

Action:
If the heap dump action is required, consider using a JVM that supports the HotSpot Diagnostic MXBean.

BEA-320235
Caught unexpected error capturing heap dump: {0}

Category:
DiagnosticsWatch

Cause:
An unexpected error occurred while capturing a heap dump.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the exception message in the server logs, contact Oracle Support if the issue can not be corrected.

BEA-320236
Thread dump action {0} canceled

Category:
DiagnosticsWatch

Cause:
Thread dump action was cancelled.

Action:
No action necessary.

BEA-320237
Older dump file {0} removed to make space for new dump file.

Category:
DiagnosticsWatch

Cause:
Limit for number of heap or thread dump files is already reached. Removing older dump files to make space for new dump file.

Action:
No action necessary.

BEA-320238
Unable to execute scale down action {0}, cluster {1} is already at the minimum number of required running servers: {2}.

Category:
DiagnosticsWatch

Cause:

Action:

BEA-320239
Unable to execute scale up action {0}, cluster {1} is already at the maximum allowed number of running servers: {2}.

Category:
DiagnosticsWatch

Cause:

Action:

BEA-320300
The WLS ServerRuntime MBeanServer was not available for harvesting; custom MBean harvesting will not be available.

Category:
DiagnosticsHarvester

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This could be the result of a serious error in the OA&M infrastructure. Check for other error messages in the log in that area.

Action:
Contact My Oracle Support.

BEA-320301
The WLDF Harvester could not activate the Watch and Notifications framework due to an exception: {0}

Category:
DiagnosticsHarvester

Cause:
During server startup, the Watch and Notifications activation is deferred until the WLDF Harvester is fully activated. The deferred activation encountered an unexpected exception, potentially impairing the Watch and Notifications functionality.

Action:
Contact My Oracle Support.

BEA-320303
The namespace {1} for the harvested type specification {0} can not be serviced by a Managed Server instance; it is valid only when targed to an Administration Server.

Category:
DiagnosticsHarvester

Cause:
A harvested type specifying the DomainRuntime namespace was targeted to a Managed Server. A Managed Server can only service the ServerRuntime namespace.

Action:
Correct the namespace declaration of the harvested type, or retarget the WLDF configuration to an Administration Server in order to service this type.

BEA-320304
The following errors were reported during the validation of the metrics for watched values {0}: {1}

Category:
DiagnosticsHarvester

Cause:
Some of the configured harvested types may have errors, resulting in the harvester being unable to process them for collection.

Action:
Correct any issues with the harvested type configuration.

BEA-320305
The instance name {0} is not a valid ObjectName or instance name pattern.

Category:
DiagnosticsHarvester

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The instance name must be a valid JMX ObjectName, or a pattern conforming to the syntax supported by the WebLogic Diagnostics Framework.

Action:
Correct the instance name in the harvested type.

BEA-320400
The log file {0} will be rotated. Reopen the log file if tailing has stopped. This can happen on some platforms, such as Windows.

Category:
LoggingService

Cause:
This event happens whenever the log file is about to be rotated based on either size or time rotation criterion.

Action:
On certain platforms, if some application is tailing the log, the rotation fails. Stop the application tailing and reopen the tail after the rotation is complete.

BEA-320401
The log file has been rotated to {1}. Log messages will continue to be logged in {0}.

Category:
LoggingService

Cause:
This event happens after the log file is rotated based on either size or time rotation criterion.

Action:
No action is required.

BEA-320450
The DebugScope name {0} is not valid.

Category:
DebugModule

Cause:
The DebugScope with the given name is not defined in the ServerDebugMBean interface.

Action:
Configure the debug scope with a valid name.

BEA-320451
An error occurred while applying the DebugScopes configuration.

Category:
DebugModule

Cause:
This may be due to an I/O error while reading the DebugScopes from the disk.

Action:
Take action based on the error stack trace.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320452
An error occurred while adding PropertyChangeListener to bean {0}.

Category:
DebugModule

Cause:
The debug configuration bean does not support PropertyChangeListeners.

Action:
Take action based on the error stack trace.

BEA-320453
An error occurred while removing PropertyChangeListener from bean {0}.

Category:
DebugModule

Cause:
The debug configuration bean does not support PropertyChangeListeners.

Action:
Take action based on the error stack trace.

BEA-320454
An error occurred while initializing Server Debug from older DebugCategory mappings.

Category:
DebugModule

Cause:
The error details are included in the stack trace of the Exception reported.

Action:
Take action based on the error stack trace.

BEA-320500
The built-in WebLogic Diagnostics Framework resource descriptor ${0} for the selected level "{1}" could not be found; setting built-in resource to ${2}.

Category:
DiagnosticsRuntimeControl

Cause:
The WebLogic Diagnostics Framework resource descriptor for the desired built-in monitoring state could not be loaded due to either an issue with the WebLogic Server kit installation or an environmental issue in the domain configuration.

Action:
Contact My Oracle Support.

BEA-320800
Failed to cache the instrumentation engine configuration at {0} with exception {1}

Category:
DiagnosticsInstrumentor

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The destination file may not be writable or some other I/O error occurred.

Action:
Check to see if the destination file is writable.

BEA-320801
Failed to load instrumentation engine configuration {0}.

Category:
DiagnosticsInstrumentor

Cause:
The instrumentation engine configuraion may be missing or corrupt.

Action:
Contact My Oracle Support.

BEA-320802
Missing the name attribute for the instrumentation engine configuration at {0}.

Category:
DiagnosticsInstrumentor

Cause:
The engine configuration does not have the required name attribute.

Action:
Contact My Oracle Support.

BEA-320803
Duplicate instrumentation engine configuration {0} found.

Category:
DiagnosticsInstrumentor

Cause:
A duplicate instrumentation engine configuration was found.

Action:
Contact My Oracle Support.

BEA-320804
Invalid parent "{1}" for instrumentation engine configuration "{0}".

Category:
DiagnosticsInstrumentor

Cause:
The instrumentation engine configuration has an incorrect parent configuration.

Action:
Contact My Oracle Support.

BEA-320805
Required root instrumentation engine configuration was not found.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
DiagnosticsInstrumentor

Cause:
The required root instrumentation engine configuration was not found.

Action:
Contact My Oracle Support.

BEA-320806
Found circular dependency with instrumentation engine configurations: {0}

Category:
DiagnosticsInstrumentor

Cause:
The instrumentation engine configurations are invalid.

Action:
Contact My Oracle Support.

BEA-320807
Parent "{0}" for instrumentation engine configurations {1}.

Category:
DiagnosticsInstrumentor

Cause:
The parent configuration for an instrumentation engine configuration cannot be located.

Action:
Contact My Oracle Support.

BEA-320900
Agent will be unable to proxy for the agents specified due to Proxy initialization error.

Category:
SNMP

Cause:
Refer to exception message for cause of initialization failure.

Action:
Take appropriate action based upon the specified exception message.

BEA-320913
Failed to register Attribute Change listener {0} for MBean type {1} on server {2}.

Category:
SNMP

Cause:
This may be due to a misconfigured SNMPAttributeChange entry specification in config.xml. Please refer to the exception message for more specific cause information.

Action:
Modify configuration of the SNMPAttributeChange entry or take appropriate action based upon the specific exception message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320918
Failed to add NotificationListener to logBroadcaster for SNMPLogFilter {0}.

Category:
SNMP

Cause:
Please refer to the exception message for more specific cause information.

Action:
Take appropriate action based upon the specific exception message.

BEA-320923
Error creating JMX Monitor {0} of type {1} for MBean {2}.

Category:
SNMP

Cause:
This may be due to a misconfigured Monitor entry specification. Please refer to the exception message for more specific cause information.

Action:
Modify the configuration of the SNMPJMXMonitorMBean entry or take appropriate action based upon the specific exception message.

BEA-320925
Failed to send Monitor trap for server {0} for type {1} for object {2}.

Category:
SNMP

Cause:
Please refer to the exception message for more specific cause information.

Action:
Take appropriate action based upon the specific exception message.

BEA-320927
SNMP agent is initializing.

Category:
SNMP

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320928
SNMP Agent initialization failed while accessing server information for the configured Domain.

Category:
SNMP

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Refer to earlier SNMP error log information for specific information on the cause of the problem.

Action:
Take appropriate action based upon the specific exception message.

BEA-320929
SNMP agent initialization completed successfully.

Category:
SNMP

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320930
SNMP Agent Generic coldStart trap sent.

Category:
SNMP

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320931
The SNMP trap version is {0}.

Category:
SNMP

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320937
Exception occurred sending SNMP message, {0}.

Category:
SNMP

Cause:
This is an internal WebLogic Server error that occurred during the sending of an SNMP message using the TCP transport provider.

Action:
Contact My Oracle Support.

BEA-320938
SNMP Agent does not support setting values for MBean attributes through SNMP.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
SNMP

Cause:
You attempted to set an MBean attribute using SNMP.

Action:
Use JMX APIs to update the WLS configuration MBeans.

BEA-320939
An error occurred while adding a row to the SNMP table for MBean {1} of type {0}.

Category:
SNMP

Cause:
This could be due to a row already existing in the SNMP Agent for the MBean or an error condition in the SNMP Agent.

Action:
Take appropriate action based on additional information in the error stack trace.

BEA-320940
An error occurred while deleting the row from the SNMP table for MBean {0}.

Category:
SNMP

Cause:
The specified MBean instance was not registered in SNMP or it could be due to an error condition in the SNMP Agent.

Action:
Take appropriate action based on additional information in the error stack trace.

BEA-320941
An SNMP message was received over the default channel instead of the dedicated SNMP channel.

Category:
SNMP

Cause:
This occurs when a dedicated Network Access Point for SNMP traffic has been configured and activated and an SNMP request is received over the default server channel.

Action:
Direct the SNMP request to the configured channel.

BEA-320942
The specified type name {0} is invalid.

Category:
SNMP

Cause:
The specified name is not recognized as a valid WebLogic Server MBean type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Please specify the correct name for a WebLogic Server Configuration or Runtime MBean type.

BEA-320943
The specified attribute name {1} is not valid for the given type {0}.

Category:
SNMP

Cause:
The specified attribute name that is not valid was specified as part of the configuration.

Action:
Please specify the correct attribute name for the WebLogic Server Configuration or Runtime MBean type.

BEA-320944
The SecurityName attribute is not specified for the SNMPTrapDestination {0}.

Category:
SNMP

Cause:
The SNMP Agent's trap version is set to V3 and the SecurityName is not specified for the given SNMPTrapDestination.

Action:
Please specify the SecurityName attribute for which the SNMP Agent will issue V3 traps.

BEA-320945
The SNMP Agent''s TrapVersion needs to be V2 or higher to be able to send INFORM notifications.

Category:
SNMP

Cause:
The SNMPAgentMBean's SNMPTrapVersion attribute is set to V1.

Action:
Set the SNMPTrapVersion to V2 or higher in the configuration.

BEA-320946
The SNMP Agent {0} is already deployed to server {1}.

Category:
SNMP

Cause:
An attempt was made to target multiple SNMPAgentDeploymentMBeans to the same WebLogic Server instance.

Action:
Ensure that only one SNMPAgentDeploymentMBean is targeted to any Server in the domain.

BEA-320947
The AuthenticationProtocol for SNMP Agent {0} cannot be noAuth when PrivacyProtocol {1} is specified.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
SNMP

Cause:
An invalid combination of authentication and privacy protocols was configured.

Action:
Specify either MD5 or DES as the AuthenticationProtocol in combination with Privacy.

BEA-320948
The SNMPTrapDestinationMBean {0} has a higher SecurityLevel {1} than the SNMPAgent''s SecurityLevel {2}.

Category:
SNMP

Cause:
An invalid combination of authentication and privacy protocols on the SNMPAgentMBean and security level on the SNMPTrapDestinationMBean has been configured.

Action:
Specify the valid security level for the users and the trap destinations.

BEA-320949
SNMPAgent {0} is configured with a security level of {1}; the security level of {3} for proxy {2} must not exceed that of the SNMP agent.

Category:
SNMP

Cause:
A security level on the SNMP proxy was configured that exceeds the security level of the SNMP agent that corresponds to its configured authentication and privacy protocols.

Action:
Configure a level of security on the proxy that is lower than the security level of the SNMP agent. For example, if the SNMP agent is configured with authentication but no privacy, configure the security level of NOAUTH_NOPRIV or AUTH_NOPRIV on the proxy.

BEA-320950
Failed to start the SNMP agent. If it failed to bind to the port, check if the port is available or the process has permission to bind to the port.

Category:
SNMP

Cause:
Binding to specified UDP and agentX ports is a common problem. The ports to which the agent binds may not be available. Also, on UNIX platforms, ports up to 1023 are protected and can be bound only by processes owned by root.

Action:
Check whether the specified ports are available. On UNIX, the default UDP port (161) and master AgentX port (705) are protected to be used by processes owned by root. In that case, either start the server as root, or configure the SNMP agent to use port numbers higher than 1023.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-320951
Failed to initalize the SNMP AgentX master subagent. One possible cause is the failure to bind the Master agentX port. If this is the case, check to see if the specified AgentX port is available, or ensure that the process has permissions to bind to the desired port.

Category:
SNMP

Cause:
A common problem is with binding to the specified agentX port. The port to which the agent binds may not be available. Also, on UNIX platforms, ports up to 1023 are protected and can be bound only by processes owned by root.

Action:
Check whether the specified port is available. On UNIX, the default master AgentX port (705) is protected to be used by processes owned by root. In that case, either start the server as root, or configure the SNMP agent to use port numbers higher than 1023.

BEA-320952
Failed to send the SNMP trap or inform notification for trap OID {2}. Number of send attempts = {0}. Number of errors encountered = {1}. The detailed error message from the SNMP toolkit is {3}.

Category:
SNMP

Cause:
The SNMPTrapDestination(s) could be incorrectly configured or the SNMP Manager might not be running at the configured location.

Action:
Ensure that the SNMP Manager is available at the configured SNMP TrapDestinations.

BEA-320953
The SNMP Agent has been started on port {0}.

Category:
SNMP

Cause:
The SNMP Agent tries to bind to the configured port. If this port is not available due to another SNMP Agent being deployed to the same machine on another WebLogic Server instance then the SNMP Agent tries to find the nearest port and binds to it.

Action:
No action is needed. The port number is also reflected in the UDPListenPort attribute of the SNMPAgentRuntimeMBean interface on this Server.

BEA-320954
The SNMP Agent encountered an error while discovering Extensions {0}.

Category:
SNMP

Cause:
The SNMPAgent Extension provider implementations could not be loaded successfully.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Take corrective action based on the exception details.

BEA-320955
SNMP agent has been shut down.

Category:
SNMP

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-320956
Error registering trap destination {0} for address {1}:{2}.

Category:
SNMP

Cause:
The host name specified in the SNMPTrapDestination configuraiton is not valid.

Action:
Correct the configuration and start the SNMP agent again.

BEA-320957
Community prefix value cannot be empty or "public" or "private"

Category:
SNMP

Cause:
The SNMP agent is enabled and the community prefix attribute is empty or set to either public or private.

Action:
Correct the configuration and start the SNMP agent again.

BEA-340450
Descriptor {1} has no configuration-support in the weblogic-extension.xml file for application module {0}. JSR-88 updates will not be supported.

Category:
CustomModule

Cause:
The configuration-support stanza was missing or has XML errors.

Action:
Correct the weblogic-extension.xml file and redeploy the application.

BEA-340451
URI mismatch for base-URI ({2}) in the weblogic-extension.xml file for descriptor {1} in module {0}. Unpredictable results from JSR-88 updates are likely.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
CustomModule

Cause:
The custom-module URI does not match the configuration-support base-URI.

Action:
Correct the base-URI in the configuration-support stanza of the weblogic-extension.xml file to match the custom-module URI and redeploy the application.

BEA-340452
Prepare to deploy descriptor {1} in application module {0}.

Category:
CustomModule

Cause:
This is normal behavior.

Action:
No action is required.

BEA-340454
Prepare update for descriptor {1} in application module {0}.

Category:
CustomModule

Cause:
This is normal behavior.

Action:
No action is required.

Cause:
The processor type is unknown either due to a typo or the registerProcessorType method did not register the expected processor type first.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420012
The removeProcessor method encountered an input error due to "{0}".

Category:
MIExceptions

Cause:
There was an illegal usage of the removeProcessor API.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420013
The getAssociationHandle method encountered an input error due to "{0}".

Category:
MIExceptions

Cause:
There was an illegal usage of getAssociationHandle API.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420014
The getProcessorHandles method encountered an input error due to "{0}".

Category:
MIExceptions

Cause:
There was an illegal usage of the getProcessorHandles API.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-420015
The getProcessorHandle method encountered an input error due to "{0}".

Category:
MIExceptions

Cause:
There was an illegal usage of the getProcessorHandle API.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420016
The registerInterceptionPointNameDescriptionListener method encountered an input error due to "{0}".

Category:
MIExceptions

Cause:
There was an illegal usage of the registerInterceptionPointNameDescriptionListener API.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420017
The removeAssociation method encountered an input error due to "{0}".

Category:
MIExceptions

Cause:
There was an illegal usage of the removeAssociation API.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420019
The process method encountered a usage error due to "{0}".

Category:
MIExceptions

Cause:
The required processor for the given association was not created at the time. To send a message to a target that has the given association defined, the processor specified in the association needs to be added beforehand.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420020
The process method encountered a usage error due to "{0}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
MIExceptions

Cause:
The processor generated an illegal error.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420021
The process method encountered a usage error due to "{0}".

Category:
MIExceptions

Cause:
The processor generated an illegal runtime exception.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420025
The addAssociation method encountered a usage error due to "{0}".

Category:
MIExceptions

Cause:
The added association already exists.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420026
The unregisterInterceptionPoint method encountered a usage error due to "{0}".

Category:
MIExceptions

Cause:
The interception point has already been removed.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420027
The interception point name argument is invalid due to "{0}".

Category:
MIExceptions

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The interception point name argument is invalid for several possible reasons. For example, the total number of name element differs from what is being registered with the interception service or one name element is invalid by itself.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420028
The removeProcessor method encountered a usage error due to "{0}".

Category:
MIExceptions

Cause:
The processor has been removed.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420029
The registerProcessorType method encountered a usage error due to "{0}".

Category:
MIExceptions

Cause:
The processor factory class cannot be instantiated.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420030
The registerProcessorType method encountered a usage error due to "{0}".

Category:
MIExceptions

Cause:
The processor factory class cannot be instantiated.

Action:
If this is caused by an external application, then fix the related code; otherwise, contact My Oracle Support.

BEA-420031
The process method encountered a usage error due to "{0}".

Category:
MIExceptions

Cause:
The processor is currently processing more intercepted messages than that the association's depth allows.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Increase the depth on the association using the association handle object.

BEA-2004000
An error occurred while loading the Kodo-Oracle message dictionary.

Category:
Kodo Integration

Cause:
This can happen if the Kodo-Oracle message dictionary is not available. This dictionary should be located at {0}.

Action:
Contact My Oracle Support.

BEA-2004001
The Kodo-Oracle message dictionary was not found.

Category:
Kodo Integration

Cause:
This can happen if the Kodo-Oracle message dictionary is not available. This dictionary should be located at {0}.

Action:
Contact My Oracle Support.

BEA-2004003
Kodo localization key {0} has already been registered in the Kodo-Oracle message ID dictionary. Original value: {1}. New value: {2}. New definition from URL: {3}. The original value will be used.

BEA-2012303
The MBeanTypeUtil cannot process an MBean instance due to excp {0} on MBeanServer: {1} and MBean: {2} stack trace: {3} --- Retrying once...

Category:
MBeanTypingUtil

Cause:
The MBeanTypeUtil has failed while trying to access a registered MBean.

Action:
Check for other log messages that give more information about the failure.

BEA-2012304
The MBeanTypeUtil failed for a second time to process an MBean instance due to excp: {0} on MBeanServer: {1} and MBean: {2} stack trace: {3} --- Skipping this MBean...

Category:
MBeanTypingUtil

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The MBeanTypeUtil has failed to access a registered MBean in two tries.

Action:
Check for other log messages that give more information about the failure.

BEA-2012305
The MBeanTypeUtil failed to process two distinct MBeans in a row. The most recent problem was on MBeanServer: {0} and MBean: {1} stack trace: {2} --- No further MBeans will be processed.

Category:
MBeanTypingUtil

Cause:
The MBeanTypeUtil has failed to access two consecutive different MBeans.

Action:
Check for other log messages that give more information about the failure.

BEA-2012306
{1} Unable to process the {2} of MBean: {0} . The managed process might be shutting down. Stack trace: {3}

Category:
MBeanTypingUtil

Cause:
The process is most likely shutting down, so it is safe to ignore this.

Action:
If the process is known to be active, contact My Oracle Support to determine why the MBean cannot be processed. Setting the module debug flag will cause stack traces to be printed.

BEA-2012307
{1} Unable to process the {2} of MBean: {0} . The managed process appears to be shutting down. Stack trace: {3}

Category:
MBeanTypingUtil

Cause:
The process is most likely shutting down, so it is safe to ignore this.

Action:
If the process is known to be active, contact My Oracle Support to determine why the MBean cannot be processed. Setting the module debug flag will cause stack traces to be printed.

BEA-2012308
An uexpected error occurred while scheduling work for MBeanTypeUtil instance {0} with work manager {1}: {2}

Category:
MBeanTypingUtil

Cause:
Possibly no work manager was set, or the work manager was unable to queue the request.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
If the problem persists, contact My Oracle Support.

BEA-2012309
An uexpected error occurred while communicating with the MBeanServer: {0}

Category:
MBeanTypingUtil

Cause:
The MBeanServer or host process may no longer be available. If the MBeanServer is remote, there may be network issues.

Action:
If the problem persists, contact My Oracle Support.

BEA-2012399
The bundle {0} has been successfully stopped.

Category:
MBeanTypingUtil

Cause:
This is a normal operation.

Action:
No action is required.

BEA-2145000
Unable to fire asynchronous listeners. Associated stack trace follows:

Category:
BEA Cache

Cause:
An error condition was reported.

Action:
Check the Work Manager configuration for work scheduling problems.

BEA-2145001
Could not configure cache with write policy of {0} because no store has been configured for the cache.

Category:
BEA Cache

Cause:
The configuration is invalid.

Action:
Either remove the write policy configuration or specify a custom store along with it.

BEA-2150001
Validation of weblogic-pubsub.xml descriptor file failed. The error is {0}

Category:
HTTP Pubsub Server

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
There are errors in the weblogic-pubsub.xml descriptor file.

Action:
Correct the error in weblogic-pubsub.xml according to the schema.

BEA-2150002
No permission on channel operation: User {0} has no permission to create channel {1}

Category:
HTTP Pubsub Server

Cause:
There are not sufficient privileges to create a channel.

Action:
Check the PubSub server configuration security settings.

BEA-2150003
No permission on channel operation: User {0} has no permission to delete channel {1}

Category:
HTTP Pubsub Server

Cause:
There are not sufficient privileges to delete a channel.

Action:
Check the PubSub server configuration security settings.

BEA-2150005
Invalid persistent-client-timeout-secs: {0}.

Category:
HTTP Pubsub Server

Cause:
The persistent-client-timeout-secs must be greater than the timeout-secs.

Action:
Check the persistent-client-timeout in the PubSub server configuration

BEA-2150006
Invalid transport type: {0}

Category:
HTTP Pubsub Server

Cause:
An invalid transport type was configured in the PubSub server configuration.

Action:
Check the PubSub server configuration.

BEA-2150007
Cannot find configuration for referenced message filter {0}; check message-filter in the PubSub server configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
HTTP Pubsub Server

Cause:
There is a mismatch between the message filter name referenced in the channel setting and the message-filter setting.

Action:
Check the PubSub server configuration.

BEA-2150008
There is no message filter configured in the PubSub server configuration, but there is a message filter named {0} referenced in the channel setting.

Category:
HTTP Pubsub Server

Cause:
The channel setting is requesting a message filter but the message filter was not specified in the PubSub server.

Action:
Either specify the message-filter setting or remove the message-filter reference from the channel setting.

BEA-2150009
Invalid message-filter configured: message-filter {0} is configured in PubSub server configuration, but its associated class {1} cannot be initialized correctly.

Category:
HTTP Pubsub Server

Cause:
Class {1} associated with message filter {0} is incorrect.

Action:
Check the message-filter-name and message-filter-class in the PubSub server configuration.

BEA-2150011
Action {1} on channel {0} is not allowed for any client.

Category:
HTTP Pubsub Server

Cause:
The PubSub server configuration constraints do not allow this action on this channel. This is an informational message.

Action:
No action is required.

BEA-2150012
Client {0} is an anonymous user but channel {1} requests login.

Category:
HTTP Pubsub Server

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Login is requested to perform this action. This is an informational message.

Action:
No action is required.

BEA-2150013
Client {0} is not allowed to perform action {2} on channel {1}.

Category:
HTTP Pubsub Server

Cause:
The PubSub server configuration does not allow this action on this channel. This is an informational message.

Action:
No action is required.

BEA-2150014
Client {0} is allowed to perform action {2} on channel {1}

Category:
HTTP Pubsub Server

Cause:
The PubSub server configuration is allowing this action to be performed on this channel. This is an informational message.

Action:
No action is required.

BEA-2150015
Client {0} has no permission to subscribe channel {1}

Category:
HTTP Pubsub Server

Cause:
Client {0} has no permission to subscribe channel {1}, either because the client configuration does not allow the client to access the channel, or the client is anonymous and the channel configuration only allows specific clients to access the channel.

Action:
Check the PubSub server security constraint configuration.

BEA-2150016
Client {0} has no permission to publish on channel {1}

Category:
HTTP Pubsub Server

Cause:
The client is not configured to publish on the channel or the client is anonymous and the channel is configured to only allow access to specific clients.

Action:
Check the PubSub server security constraint configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-2150017
Failed to register MBean for Channel {0}

Category:
HTTP Pubsub Server

Cause:
An exception occurred while registering the ChannelRuntimeMBean.

Action:
Check the stack trace for more detailed information.

BEA-2150018
Failed to unregister MBean for Channel {0}

Category:
HTTP Pubsub Server

Cause:
An exception occurred while unregistering the ChannelRuntimeMBean.

Action:
Check the stack trace for more detailed information.

BEA-2150019
Initialize PubSub server {0}

Category:
HTTP Pubsub Server

Cause:
This is an informational message.

Action:
No action is required.

BEA-2150020
Duplicate initialize PubSub server {0}

Category:
HTTP Pubsub Server

Cause:
There are multiple servlet and servlet-mapping definitions for com.bea.httppubsub.servlet.ControllerServlet in the web.xml file.

Action:
Check the web.xml file.

BEA-2150021
Cannot initialize service channel {0}

Category:
HTTP Pubsub Server

Cause:
An exception occurred when initializing the service channel.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the PubSub server configuration.

BEA-2150024
Unknown meta channel found from Bayeux message: {0}

Category:
HTTP Pubsub Server

Cause:
An incoming message specifies a channel other than /meta/handshake, /meta/connect, /meta/reconnect, /meta/disconnect, /meta/subscribe, or /meta/unsubscribe.

Action:
Check the Bayeux client and the incoming Bayeux message.

BEA-2150025
System property {0} is not set to specify an MBeanManagerFactory implementation.

Category:
HTTP Pubsub Server

Cause:
System property {0} is not set.

Action:
Ensure that runtime MBeans are not necessary; otherwise, set system property {0} to a proper implementation of MBeanManagerFactory.

BEA-2150026
Can not initialize instance of MBeanManagerFactory with class {0}

Category:
HTTP Pubsub Server

Cause:
An exception occurred while initializing MBeanManagerFactory.

Action:
Check the stack trace for more detailed information.

BEA-2150027
Failed to register WebPubSubRuntimeMBean for PubSub server; the ContextPath is {0}

Category:
HTTP Pubsub Server

Cause:
An exception occurred while registering WebPubSubRuntimeMBean.

Action:
Check the stack trace for more detailed information.

BEA-2150028
Failed to unregister WebPubSubRuntimeMBean for PubSub server; the ContextPath is {0}

Category:
HTTP Pubsub Server

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An exception occurred while unregistering WebPubSubRuntimeMBean.

Action:
Check the stack trace for more detailed information.

BEA-2150029
ControllerServlet initialization failed: {0}

Category:
HTTP Pubsub Server

Cause:
An exception occurred when ControllerServlet was initialized.

Action:
Check the exception stack trace for details.

BEA-2150030
Cannot fetch JSON message from incoming request

Category:
HTTP Pubsub Server

Cause:
For long-polling request messages, messages are sent to the server as the body of a POST, encoded either as "application/x-www-form-urlencoded" or as "text/json". If sent as form encoded, the Bayeux messages are sent as the "message" parameter. For callback-polling request messages, messages are sent to the server either using POST requests as per long-polling transport or as the "message" URL parameter of a GET request.

Action:
Check the incoming HTTP request and the Bayeux protocol specification.

BEA-2150031
Cannot load properties from {0} in classpath.

Category:
HTTP Pubsub Server

Cause:
The property file does not exist in the classpath.

Action:
Check the classpath.

BEA-2150032
Cannot find persistent store {0} specified to channel {1}; will use the default store.

Category:
HTTP Pubsub Server

Cause:
The persistent store may not be configured properly.

Action:
Check the configuration of the persistent store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-2150033
Invalid client-timeout-secs: {0}.

Category:
HTTP Pubsub Server

Cause:
Either a negative or a zero value was set for client-timeout-secs.

Action:
Check the PubSub server configuration.

BEA-2150034
Invalid interval-millisecs: {0}.

Category:
HTTP Pubsub Server

Cause:
A negative value was set for interval-millisecs.

Action:
Check the PubSub server configuration.

BEA-2150035
Invalid multi-frame-interval-millisecs: {0}.

Category:
HTTP Pubsub Server

Cause:
A negative value wass set for multi-frame-interval-millisecs.

Action:
Check tue PubSub server configuration.

BEA-2150036
Invalid persistent-client-timeout-secs: {0}.

Category:
HTTP Pubsub Server

Cause:
Either a negative value or zero was set for persistent-client-timeout-secs.

Action:
Check the PubSub server configuration.

BEA-2150037
Invalid max-persistent-message-duration-secs: {0}.

Category:
HTTP Pubsub Server

Cause:
Either a negative value or zero was set for max-persistent-message-duration-secs.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the PubSub server configuration.

BEA-2150038
Initializing channel authorization manager: {0}

Category:
HTTP Pubsub Server

Cause:
This channel authorization manager will be used for authorizing channel actions.

Action:
No action is required.

BEA-2150039
Error initializing channel authorization manager.

Category:
HTTP Pubsub Server

Cause:
The initialization of channel authorization manager failed.

Action:
See the exception stack trace for details.

BEA-2150041
Invalid channel {0}, cause is {1}.

Category:
HTTP Pubsub Server

Cause:
An invalid channel field was found.

Action:
Check the Bayeux client.

BEA-2150042
A role {0} is being deployed implicitly without a pricipal mapping in the corresponding weblogic.xml.

Category:
HTTP Pubsub Server

Cause:
There is no security-role-assignment for role {0}

Action:
Create a security-role-assignment in weblogic.xml for role {0}

BEA-2150043
Security authorization has been disabled for the PubSub server.

Category:
HTTP Pubsub Server

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
PubSub server security has been disabled by an undocumented system property.

Action:
If this property has not been set deliberately, verify all the system properties that begin with com.bea.httppubsub.security.

BEA-2150044
Invalid connection-timeout-secs: {0}.

Category:
HTTP Pubsub Server

Cause:
Either a negative or a zero value was set for connection-timeout-secs.

Action:
Check the PubSub server configuration.

BEA-2150045
Incoming Bayeux message does not contain 'channel' field.

Category:
HTTP Pubsub Server

Cause:
Incoming Bayeux message did not contain the 'channel' field.

Action:
Turn on Bayeux message debug flag to check the Bayeux message sent by the client.

BEA-2150046
Invalid JSON format of a Bayeux message

Category:
HTTP Pubsub Server

Cause:
A Bayeux message could not be recognized by the JSON parser.

Action:
Turn on the Bayeux message debug flag to check the Bayeux message and exception for details.

BEA-2154000
Enabling FastSwap on application "{0}".

Category:
FastSwap

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-2154001
Starting FastSwap operation on application "{0}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
FastSwap

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-2154002
Finished FastSwap operation on application "{0}" with status {1}.

Category:
FastSwap

Cause:
This message is for informational purposes only.

Action:
No action is required.

BEA-2154003
FastSwap operation on application "{0}" failed: {1}.

Category:
FastSwap

Cause:
One or more classes could not be redefined.

Action:
Redeploy the application for updates to classes to take effect.

BEA-2156001
"config-root" {0} is not a directory.

Category:
WebLogicDescriptorWL

Cause:
The "config-root" may not have been set properly.

Action:
Verify that the "config-root" is correct.

BEA-2156002
Attribute "{0}": duration value "{1}" is not valid: {2}

Category:
WebLogicDescriptorWL

Cause:
The provided duration value was not a valid duration lexical representation.

Action:
See the lexical rules for a javax.datatype.Duration, and ensure that the provided duration value is valid according to these rules.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-2156003
Attribute "{0}": logical store name value "{1}" is not valid.

Category:
WebLogicDescriptorWL

Cause:
The provided logical store name value was not a valid name. Logical store names must be valid Java identifiers.

Action:
See the lexical rules for a Java identifier, and ensure that the logical store name follows these rules.

BEA-2156004
Attribute "{0}": JNDI name value "{1}" is not valid.

Category:
WebLogicDescriptorWL

Cause:
The provided JNDI name value was not a valid name. JNDI names must be non-null and non-empty and meet the rules of the J2EE platform's JNDI implementation.

Action:
See the lexical rules for a JNDI name, and ensure that the JNDI name follows these rules.

BEA-2156200
Unable to load descriptor {1} of module {0}. The error is {2}.

Category:
Munger

Cause:
The descriptor is not valid.

Action:
Correct the descriptor.

BEA-2156201
An error occurred while parsing descriptors: {0}.

Category:
Munger

Cause:
Check the stack trace.

Action:
Check the stack trace.

BEA-2156202
References were found in the deployment plan for module "{0}" with URI, "{1}". The plan was merged.

Category:
Munger

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The plan contained variable overrides.

Action:
No action is required. This is an informational message.

BEA-2156203
A version attribute was not found in element "{0}" in the deployment descriptor {1}. A version attribute is required, but this version of the WebLogic Server will assume that the latest version is used. Future versions of WebLogic Server will reject descriptors that do not specify the Java EE version. To eliminate this warning, add an appropriate "version=" to element "{0}" in the deployment descriptor.

Category:
Munger

Cause:
The required version attribute was missing.

Action:
Add the version attribute with the appropriate JEE version value.

BEA-2156204
The root element {0} is missing in the descriptor file {1}.

Category:
Munger

Cause:
The required root element was missing in the descriptor file.

Action:
Add the root element to the descriptor file.

BEA-2156205
Updating the configuration with the deployment plan overrides for module "{0}" with URI, "{1}".

Category:
Munger

Cause:
A deployment plan was specified for the application.

Action:
No action is required. This is an informational message.

BEA-2156206
No module overrides were found in the deployment plan for module "{0}" with URI, "{1}". If overrides were expected for this module, verify the deployment plan.

Category:
Munger

Cause:
The plan contained no matching variable overrides.

Action:
No action is required. This is an informational message. It may be an expected action.

BEA-2156207
The variable assignment from the deployment plan with variable name "{0}" and XPath "{1}" will be included when overriding the deployment configuration.

Category:
Munger

Cause:
The plan contained matching variable overrides.

Action:
No action is required. This is an informational message used to troubleshoot deployment plan overrides.

BEA-2156208
The variable assignment from the deployment plan with variable name "{0}" and XPath "{1}" will be included when overriding the deployment configuration.

Category:
Munger

Cause:
The plan contained matching variable overrides.

Action:
No action is required. This is an informational message used to troubleshoot deployment plan overrides.

BEA-2156209
Applying the overrides from the deployment plan for module "{0}" with URI, "{1}".

Category:
Munger

Cause:
A deployment plan was specified for the application.

Action:
No action is required. This is an informational message.

BEA-2156210
Applying the override for variable "{0}" with XPath "{1}" and operation "{2}".

Category:
Munger

Cause:
A deployment plan was specified for the application.

Action:
No action is required. This is an informational message.

BEA-2156211
After applying the overrides from the deployment plan, the descriptor "{0}" is: "{1}".

Category:
Munger

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A deployment plan was specified for the application. The descriptor was updated.

Action:
No action is required. This is an informational message.

BEA-2156212
An error occurred while parsing the specifed XPath "{0}" : {1}.

Category:
Munger

Cause:
The specified XPath value was invalid.

Action:
Check the associated exception to determine the cause, and correct the XPath value.

BEA-2156213
An error occurred while parsing the specifed XPath "{0}" : {1}.

Category:
Munger

Cause:
The specified XPath value was invalid.

Action:
Check the associated exception to determine the cause, and correct the XPath value.

BEA-2156214
The XPath "{0}" specifies a key selection but the bean "{1}" does not have any keys defined.

Category:
Munger

Cause:
The specified XPath value was invalid because no keys were defined for this element.

Action:
Check the associated schema, and ensure that the element has the corresponding key.

BEA-2156215
Removed the value matched by the deployment plan variable "{0}" with element name "{1}".

Category:
Munger

Cause:
A deployment plan was specified for the application, and an element has been removed.

Action:
No action is required. This is an informational message.

BEA-2156216
The deployment plan operation failed because there was no method named "{0}" on the bean "{1}" corresponding to the element "{2}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Munger

Cause:
A deployment plan operation requires a corresponding destroy, remove, or set method. This method was not present.

Action:
Contact My Oracle Support.

BEA-2156217
An error occurred while performing the plan operation for variable "{0}" with element name "{1}" : {2}.

Category:
Munger

Cause:
An unexpected exception occurred during the deployment plan operation.

Action:
Check the associated exception to determine the cause, and correct the issue.

BEA-2156218
Updated the element matched by the deployment plan variable "{0}" with element name "{1}" to have value "{2}".

Category:
Munger

Cause:
A deployment plan was specified for the application, and a matching element has been updated.

Action:
No action is required. This is an informational message.

BEA-2156219
Created the element matched by the deployment plan variable "{0}" with element name "{1}".

Category:
Munger

Cause:
A deployment plan was specified for the application, and a matching element has been created.

Action:
No action is required. This is an informational message.

BEA-2156220
Created the element matched by the deployment plan variable "{0}" with element name "{1}" to have name "{2}".

Category:
Munger

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A deployment plan was specified for the application, and a matching element has been created.

Action:
No action is required. This is an informational message.

BEA-2156221
The remove operation for the deployment plan variable "{0}" with element name "{1}" specified an array index of "{2}" but the array was smaller, so no elements were removed.

Category:
Munger

Cause:
The specified array index was larger than the size of the array.

Action:
No action is required. This is an informational message.

BEA-2156222
The variable "{0}" specifies a property "{1}" that is a primitive array but no index is specified in the XPath.

Category:
Munger

Cause:
The specified XPath value was invalid since no array index was defined for this element.

Action:
Check the XPath, and specify an index.

BEA-2156223
The variable "{0}" for the add operation does not specify a property in the XPath "{1}". This variable assignment has been ignored.

Category:
Munger

Cause:
The specified XPath value was invalid since no property was specified for the add operation.

Action:
Check the XPath, and specify a property.

BEA-2156224
Added the element matched by the deployment plan variable "{0}" with element name "{1}" with value "{2}".

Category:
Munger

Cause:
A deployment plan was specified for the application, and a matching element has been added.

Action:
No action is required. This is an informational message.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-2156225
The XPath "{0}" contains a trailing invalid "/". It has been ignored. Remove it from the XPath expression.

Category:
Munger

Cause:
The specified XPath value was invalid because it contained a trailing slash.

Action:
Remove the trailing slash.

BEA-2156226
Skipping the override for the deployment plan variable "{0}" and XPath "{1}" since the value is not set in the deployment plan.

Category:
Munger

Cause:
A deployment plan did not contain a value for the variable.

Action:
Add a variable value if one is desired, or remove the variable assignment if it is not needed.

BEA-2156227
The "{0}" deployment descriptor for the "{1}" module is in DTD format. Overrides from the deployment plan will NOT be applied since only deployment descriptors in XML Schema format are supported.

Category:
Munger

Cause:
A deployment descriptor in DTD format exists in the application archive.

Action:
Convert the deployment descriptor to an XML Schema format.

BEA-2156228
Updating the configuration with the resource deployment plan overrides for resource "{0}".

Category:
Munger

Cause:
A resource deployment plan was specified for the application.

Action:
No action is required. This is an informational message.

BEA-2156229
References were found in the resource deployment plan for resource "{0}". The plan was merged.

Category:
Munger

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The plan contained variable overrides.

Action:
No action is required. This is an informational message.

BEA-2156230
No resource overrides were found in the resource deployment plan for resource "{0}". If overrides were expected for this resource, verify the resource deployment plan.

Category:
Munger

Cause:
The plan contained no matching variable overrides.

Action:
No action is required. This is an informational message. It may be an expected action.

BEA-2156231
Applying the overrides from the resource deployment plan for resource "{0}".

Category:
Munger

Cause:
A resource deployment plan was specified for the application.

Action:
No action is required. This is an informational message.

BEA-2156250
The value {1} is illegal for {0}. Legal value for this attribute is >= -1. Although the current release of WebLogic Server is accepting this value, future releases may reject the configuration.

Category:
WebLogicJavaEEDescriptorValidator

Cause:
The current WebLogic Server version accepts this value to support prior releases that allowed arbitrary negative values.

Action:
Fix the configuration to specify a value for this parameter in the valid legal range.

BEA-2156300
Coherence JAR is in the system classpath and there is more than one instance of CoherenceClusterSystemResourceMBean defined using {0}

Category:
CacheProvider

Cause:
Multiple instances of CoherenceClusterSystemResourceMBean were targeted.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
When the Coherence JAR is in the system classpath, only one CoherenceClusterSystemResourceMBean should be targeted to the server.

BEA-2156301
Failed to shut down application {0} due to {1}

Category:
CacheProvider

Cause:
Failed to shut down application {0} due to {1}

Action:
Examine the exception details and take corrective actions.

BEA-2156302
Only one server can be a management proxy in a Coherence cluster. {0} has {1} and {2} set as management proxies

Category:
CacheProvider

Cause:
Only one server can be a management proxy in a Coherence cluster. {0} has {1} and {2} set as management proxies.

Action:
Examine the CoherenceMemberConfig management proxy setting for each server.

BEA-2156303
Invoking {0} on node {1} resulted in {2}.

Category:
CacheProvider

Cause:
See the message body.

Action:
No action is required.

BEA-2156304
MBeanServerConnector not available at: {0}

Category:
CacheProvider

Cause:
See the message body.

Action:
No action is required.

BEA-2156400
The validation.xml file, located at {0}, does not conform to the JSR 303 specifications.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Weblogic-Validation

Cause:
The file does not conform to the JSR 303 specification. This maybe because the file is intended to configure another validation framework or because of a typo in the file.

Action:
JSR 303 specifies the location of the validator descriptor as either WEB-INF for web application or META-INF for all other cases. A validation.xml file at that location should only be used for the purpose of configuring javax.validation. If the purpose of the file is to configure another validation framework, consider using a different name or placing the file in a different location.

BEA-2156401
Invalid URL, {0}, because {1}.

Category:
Weblogic-Validation

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-2156402
Unable to process URL, {0}. Is from jar: {1} resourceDir: {2} resourcePath: {3}.

Category:
Weblogic-Validation

Cause:
See the message detail.

Action:
Check for other log messages that give more information about the failure.

BEA-2156403
Unable to process URL, {0}, because {1}.

Category:
Weblogic-Validation

Cause:
The cause of the error is contained in the error message.

Action:
Carefully examine the error message to determine the cause of the error and determine the best way to fix it.

BEA-2156404
Unable to find a Validation Context. {0}

Category:
Weblogic-Validation

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
See the message body.

Action:
Check for other log messages that give more information about the failure.

BEA-2156405
Unable to read resource, {0}, because {1}

Category:
Weblogic-Validation

Cause:
An IOException has occurred.

Action:
Insure that the resource is available for read.

BEA-2159000
An exception occurred while the listener {1} processed event {0}. The error is {1}.

Category:
InternalEventBus

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
Fix the issue related to the embedded root exception. If the listener associated with the exception is an Oracle class, contact My Oracle Support.

BEA-2159001
An exception occurred while initializing WLS internal event bus {0}. The error is {1}.

Category:
InternalEventBus

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
This is an internal WebLogic Server error and should be reported as a bug to My Oracle Support.

BEA-2159002
An exception occurred while loading the listener class {0}. The error is {1}. This listener will not be registered.

Category:
InternalEventBus

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Fix the issue related to the embedded root exception. If the listener associated with the exception is an Oracle class, contact My Oracle Support.

BEA-2159003
An exception occurred while instantiating an instance of listener class {0}. The error is {1}. This listener will not be registered.

Category:
InternalEventBus

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
Fix the issue related to the embedded root exception. If the listener associated with the exception is an Oracle class, contact My Oracle Support.

BEA-2159004
An exception occurred while registering listeners defined as resources. The error is {1}.

Category:
InternalEventBus

Cause:
Refer to the embedded exception information for more details as to the probable cause of this error.

Action:
Fix the issue related to the embedded root exception. If the listeners associated with the exception are Oracle listeners, contact My Oracle Support.

BEA-2159005
An error occurred while processing the WebLogic internal events "{0}". The error is {1}.

Category:
InternalEventBus

Cause:
See the embedded root exception.

Action:
Fix the issue related to the embedded root exception.

BEA-2159700
{0}

Category:
REST

Cause:
REST logs informational messages about REST usage.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-2159701
{0}

Category:
REST

Cause:
REST has encountered an error that is potentially harmful.

Action:
Review the warning message text to determine the appropriate action.

BEA-2159702
REST encountered the following error: {0}

Category:
REST

Cause:
REST has encountered an error, but may continue to run.

Action:
Review the error message text to determine the appropriate action.

BEA-2159703
REST encountered the following error: {0}

Category:
REST

Cause:
REST has encountered a critical error.

Action:
Review the message text to determine the appropriate action.

BEA-2160000
Context "{0}" is not a web context. Spring runtime MBeans cannot be created.

Category:
WeblogicSpring

Cause:
The WeblogicSpringApplicationListener bean was added to (or registered as a listener on) an ApplicationContext that is not a web application context.

Action:
Use WeblogicSpringApplicationListener only with a WebApplicationContext.

BEA-2160001
WebAppComponentRuntimeMBean not found. Spring runtime MBeans cannot be created.

Category:
WeblogicSpring

Cause:
See the message detail.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check for other log messages that give more information about the failure.

BEA-2160002
"{0}" is not a registered scope name.

Category:
WeblogicSpring

Cause:
The scope name supplied to a runtime mbean operation is not registered.

Action:
Supply a registered scope name to the runtime mbean operation.

BEA-2162200
No Main-Class defined in the manifest file of Java Module: {0}. This module will be treated as a utility JAR and subsequent initialization steps will be skipped.

Category:
Application Client

Cause:
See the message body.

Action:
No action is required unless you believe that this should be a Java client module. In this case, you should specify Main_Class for this module in MANIFEST.MF.

BEA-2162206
Warning: Could not find an entry for javax.transaction.UserTransaction in the root context.

Category:
Application Client

Cause:
There is no entry for javax.transaction.UserTransaction in the root context.

Action:
Contact My Oracle Support.

BEA-2162210
No persistence unit named "{0}" is available in scope.

Category:
Application Client

Cause:
See the message body.

Action:
No action is required.

BEA-2162224
No {0} was specified in your client-jar file: {1}.

Category:
Application Client

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This is a retired message.

Action:
No action is required.

BEA-2162231
Warning: Could not bind java:comp/DefaultJMSConnectionFactory due to the following exception - {0}.

Category:
Application Client

Cause:
Binding java:comp/DefaultJMSConnectionFactory to the application client container failed.

Action:
Contact My Oracle Support.

BEA-2162500
Class, {0}, was compiled with an incompatible version of Java. Ensure that all the classes needed by the application have been compiled with a compatible java version. {1}

Category:
Class Loaders

Cause:
This error occurred while attempting to use a class that was compiled with a java compiler version that is not compatible with the JVM used by the application server.

Action:
Ensure that this and other classes are compiled with a compiler that is compatible with the JVM used by the application server.

BEA-2162501
Class bytes found, but could not define class, {0} due to the following error: {1}

Category:
Class Loaders

Cause:
The cause of this is unknown.

Action:
Contact My Oracle Support for assistance.

BEA-2162502
Ignoring manifest file for classpath entry {0}.

Category:
Class Loaders

Cause:
An error occurred while reading the manifest file for the classpath entry.

Action:
Inspect the exception stack trace and correct the problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-2162503
Not adding pre-processor class {0}.

Category:
Class Loaders

Cause:
The pre-processor class was not found.

Action:
Inspect the exception stack trace and correct the problem.

BEA-2162504
Not adding pre-processor class {0}.

Category:
Class Loaders

Cause:
The pre-processor class could not be intialized.

Action:
Inspect the exception stack trace and correct the problem.

BEA-2162505
Skipping pre-processing using pre-processor {0} with description: {1}

Category:
Class Loaders

Cause:
An error was encountered while pre-processing.

Action:
Inspect the exception stack trace and correct the problem.

BEA-2162506
Ignoring manifest during definition of class {0}.

Category:
Class Loaders

Cause:
An error occurred while reading the manifest for the jar file. The manifest declaration will be ignored during class definition.

Action:
To fix this problem, inspect the exception stack trace, and correct the problem

BEA-2162507
Aborting annotation processing due to a symlink cycle. The following directory has been visited already. Path: {0} Cannonical Path: {1}.

Category:
Class Loaders

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Symlink cycles in a classes directory tree are causing the directory traversal to repeat the traversal of part of the directory tree indefinitely.

Action:
Inspect the classes directory that is related to the reported path for symlink. Ensure that the symlinks do not cause cycling. Differences between the Path and Cannonical Path may suggest where the troublesome symlink lies.

BEA-2162508
corrupted jar found. file:{0} ,md5sum:{1}, lastModified:{2}.

Category:
Class Loaders

Cause:
An error occurred while reading jar file. This means archive corruption.

Action:
To fix this problem, inspect the exception stack trace, and correct the problem

BEA-2162600
Creating ManagedThreadFactory "{2}" (partition="{3}", module="{0}", application="{1}")

Category:
CONCURRENCY

Cause:
The application is being initialized.

Action:
No action is required.

BEA-2162601
Creating ContextService "{2}" (partition="{3}", module="{0}", application="{1}")

Category:
CONCURRENCY

Cause:
The application is being initialized.

Action:
No action is required.

BEA-2162602
{0} is still running, create another timer {1}.

Category:
CONCURRENCY

Cause:
A timer with the same name in ManagedScheduledExecutorService has already been created.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-2162603
The value {1} of parameter {0} is illegal.

Category:
CONCURRENCY

Cause:
The provided parameter value is illegal.

Action:
Provide a valid value.

BEA-2162604
Unable to create runtime MBean for concurrent managed object {0}. {1}

Category:
CONCURRENCY

Cause:
A fatal error occurred while creating the runtime MBeans.

Action:
Contact My Oracle Support and provide them with the server logs.

BEA-2162605
ManagedThreadFactory {0} rejected newThread request as current length reached max capacity {1}, limit type {2}.

Category:
CONCURRENCY

Cause:
A newThread request was rejected as the capacity was reached.

Action:
Configure the MaxConcurrentNewThreads attribute to limit running threads created by ManagedThreadFactory.

BEA-2162606
Managed(Scheduled)ExecutorService {0} rejected newThread request as current length reached max capacity {1}, limit type {2}.

Category:
CONCURRENCY

Cause:
A newThread request was rejected as the capacity was reached.

Action:
Configure the MaxConcurrentLongRunningThreads attribute to limit running threads created by Managed(Scheduled)ExecutorService.

BEA-2162607
Out-of-date thread {1} is still running when ManagedThreadFactory {0} is restarted.

Category:
CONCURRENCY

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A thread was shut down and interrupted when the ManagedThreadFactory was stopped but it was still running when the ManagedThreadFactory was restarted.

Action:
No action is required. The thread will be still running in a shutdown and interrupted state.

BEA-2162608
ManagedTaskListener registered for task {0} throws exception in method {1}: {2}

Category:
CONCURRENCY

Cause:
A user-provided ManagedTaskListener implementation may have a defect.

Action:
Check your ManagedTaskListener implementation.

BEA-2162609
An attempt to process user a transaction failed:{0}

Category:
CONCURRENCY

Cause:
Transaction processing failed.

Action:
No action is required.

BEA-2162610
Creating ManagedExecutorService "{4}" (partition="{0}", module="{2}", application="{1}", workmanager="{3}")

Category:
CONCURRENCY

Cause:
The application is being initialized.

Action:
No action is required.

BEA-2162611
Creating ManagedScheduledExecutorService "{4}" (partition="{0}", module="{2}", application="{1}", workmanager="{3}")

No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-2162612
ManagedThreadFactory {0} rejected newThread request as it is in an illegal state such as stopped.

Category:
CONCURRENCY

Cause:
A newThread request was rejected with an IllegalStateException as the ManagedThreadFactory was in an illegal state such as stopped.

Action:
No action is required.

BEA-2162613
The invocation of method {0} of a proxy object failed because of the exception: {1}.

Category:
CONCURRENCY

Cause:
The invocation of method {0} of proxy object failed because of the exception: {1}.

Action:
No action is required.

BEA-2162614
Workmanager {0} in application {1} could not be found, using default.

Category:
CONCURRENCY

Cause:
The dispatch-policy attribute is not correct.

Action:
Correct the dispatch-policy attribute.

BEA-2162615
Concurrent object {2} in application {0} module {1} could not be found, using default.

Category:
CONCURRENCY

Cause:
The resource-link or mappedName attribute of the resource reference is not correct.

Action:
Correct the resource-link or mappedName attribute of the resource reference.

BEA-2162616
Proxy is created by a different ContextService object.

Category:
CONCURRENCY

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
This occurred while trying to get the execution properties on a contextual object proxy that was created by a different ContextService.

Action:
No action is required.

BEA-2162617
ContextObject is not a valid contextual object proxy created with the createContextualProxy method.

Category:
CONCURRENCY

Cause:
This occurred while trying to get the execution properties on an invalid contextual object proxy by calling the getExecutionProperties() method of ContextService.

Action:
No action is required.

BEA-2162618
The instance parameter of createContextualProxy method cannot be null.

Category:
CONCURRENCY

Cause:
This occurred while trying to create a new contextual object proxy by calling the createContextualProxy method of ContextService but the input object instance was null.

Action:
No action is required.

BEA-2162619
The interfaces parameter of createContextualProxy method cannot be null.

Category:
CONCURRENCY

Cause:
This occurred while trying to create a new contextual object proxy by calling the createContextualProxy method of ContextService but no interface was specified.

Action:
No action is required.

BEA-2162620
Class does not implement at least one of the provided interfaces.

Category:
CONCURRENCY

Cause:
This occurred while trying to create a new contextual object proxy by calling the createContextualProxy method of ContextService, but the instance does not implement at least one of the provided interfaces.

No action is required.

BEA-2162637
Unable to create ConcurrentManagedObjectsRuntimeMBean for partition {0}. {1}

Category:
CONCURRENCY

Cause:
An exception occurred while creating the ConcurrentManagedObjectsRuntimeMBean.

Action:
Contact My Oracle Support and provide them with the server logs.

BEA-2162638
Unable to destroy ConcurrentManagedObjectsRuntimeMBean for partition {0}. {1}

Category:
CONCURRENCY

Cause:
An exception occurred while destroying the ConcurrentManagedObjectsRuntimeMBean.

Action:
Contact My Oracle Support and provide them with the server logs.

BEA-2162639
Context setup failed because {0} is not started.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
CONCURRENCY

Cause:
Context setup failed because {0} is not started.

Action:
Check the state of the corresponding partition, application or module.

BEA-2162640
Unable to create the partition level concurrent manangement object.

Category:
CONCURRENCY

Cause:
The partition level concurrent manangement object could not be created.

Action:
Contact My Oracle Support and provide them with the server logs.

BEA-2162641
Trying to unbind a non-existent {0} factory named {1}: {2}

Category:
CONCURRENCY

Cause:
An attempt was made to unbind a non-existent factory.

Action:
Contact My Oracle Support and provide them with the server logs.

BEA-2162642
Roll back transaction {0} because it was begun but has not been committed by task {1}.

Category:
CONCURRENCY

Cause:
The transaction was not committed by the task after it had begun.

Action:
Contact My Oracle Support and provide them with the server logs.

BEA-2162643
Trigger used for task {0} throws exception in method {1}: {2}

Category:
CONCURRENCY

Cause:
A Trigger implementation may have a defect.

Action:
Check the Trigger implementation.

{0} belonging to ManagedExecutorService {1}, application {2} was released as the ManagedExecutorService was shutting down.

Category:
CONCURRENCY

Cause:
This is an information message.

Action:
No action is required.

BEA-2162645
{0} belonging to ManagedExecutorService {1}, WorkManager {2}, application {3} was released as the WorkManager was shutdown and the task was not submitted by an administrator.

Category:
CONCURRENCY

Cause:
This is an information message.

Action:
No action is required.

BEA-2162646
{0} cannot be used outside of its partition in {1}: {2}

Category:
CONCURRENCY

Cause:
A concurrent managed object was used outside of its partition.

Action:
Check all code that is submitting tasks to the concurrent managed object.

BEA-2162647
Application Level {0} cannot be used outside of its application in {1}: {2}

Category:
CONCURRENCY

Cause:
An application-level concurrent managed object was used outside of its application.

Action:
Check all code that is submitting tasks to the concurrent managed object.

BEA-2162648
{0} rejected the task because the submitting component {1} was not started: {2}

Category:
CONCURRENCY

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A concurrent managed object was used by another component and that component was not started.

Action:
Check the state of the submitting component.

BEA-2162649
{0} rejected createContextualProxy because it was not started.

Category:
CONCURRENCY

Cause:
createContextualProxy was rejected with an IllegalArgument exception as the ContextService was not started.

Action:
Check the state of the ContextService.

BEA-2162650
Context setup failed because the submitting component {0} is not started.

Category:
CONCURRENCY

Cause:
Context setup failed because the submitting component {0} is not started.

Action:
Check the state of the submitting component.

BEA-2162651
{0} belonging to ManagedExecutorService {1}, application {2} was released as the submitting application {3} was shutting down.

Category:

BEA-2162700
{0}: Cluster {1} contains {2} running Managed Servers which meets or exceeds the maximum number of allowed servers ({3}). The cluster will not be scaled up.

Category:
Elasticity

Cause:
The cluster size has already reached the configured Maximum Elastic Cluster Size.

Action:
If possible, for example, if additional capacity exists, increase the Maximum Elastic Cluster Size.

BEA-2162701
{0}: Cluster {1} contains a sufficient number of available Managed Servers. Cluster will be scaled by {2} servers.

Category:
Elasticity

Cause:
See the message body.

Action:
No action required.

BEA-2162702
{0}: Proposed size ({2}) for cluster {1} will exceed the configured maximum size. Limiting cluster size to {3}.

Category:
Elasticity

Cause:
See the message body.

Action:
No action required.

BEA-2162703
{0}: Cluster {1} will be expanded by {2} servers.

Category:
Elasticity

Cause:
See the message body.

Action:
No action required.

BEA-2162704
{0}: Cluster {1} contains only {2} running Managed Servers which is less or equal to the minimum number of servers ({3}). The cluster will not be scaled down.

Category:
Elasticity

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Cluster size has already reached the configured Minimum Elastic Cluster Size.

Action:
No action is required.

BEA-2162705
{0}: Cluster {1} will be scaled down by {2} servers.

Category:
Elasticity

Cause:
This is an informational message.

Action:
No action required.

BEA-2162706
{0}: Cluster {1} has only {2} running servers. The cluster will be scaled down by {3} servers instead of the requested scaling size {4} since the minimum size of the cluster is {5}.

Category:
Elasticity

Cause:
There are fewer running servers than what may be necessary to satisfy the request to shut down the specified number of servers.

Action:
No action required.

BEA-2162707
A suitable Lifecycle Management end point was not found while performing a scaling operation on cluster {0}. The scaling operation will be attempted without Lifecycle Management capabilities.

Category:
Elasticity

Cause:
A suitable Lifecycle Management end point was not found while performing a scaling operation on the cluster.

Action:
No action is required.

BEA-2162708
{0}: Unable to scale cluster {1} by the requested amount of {2}, adjusting scaling request to {3} instances.

Category:
Elasticity

Cause:
The requested capacity likely exceeded the MaxDynamicClusterSize setting for the cluster.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
If necessary, increase the MaxDynamicClusterSize on the DynamicServersMBean for the cluster. This may, however, also require that you provision additional hardware capacity.

BEA-2162709
{0}: Scaling operation failed to start server {2} for cluster {1}.

Category:
Elasticity

Cause:
Server startup failed. Check the server log to determine why the startup failed.

Action:
Determine what caused the startup to fail, and take corrective action.

BEA-2162710
{0}: Cluster {1} scale up, server {2} successfully started.

Category:
Elasticity

Cause:
This is an informational message.

Action:
No action is required.

BEA-2162711
{0}: Scale up work for cluster {1} completed, started {2} new instances.

Category:
Elasticity

Cause:
This is an informational message.

Action:
No action required.

BEA-2162712
{0}: The workflow operation status for the scale-up work was null.

Category:
Elasticity

Cause:
The scale-up work may not be configured correctly, or this could be a product defect.

Action:
Check the server log and contact My Oracle Support if necessary.

BEA-2162713
Current size of dynamic cluster {0} is already at maximum: {1}

Category:
Elasticity

Deployer

Cause:
A resource group needs to exist before deploying to it.

Action:
Create the specified resource group before deploying to it.

BEA-2164003
The specified resource group template "{0}" does not exist in the domain.

Category:
Deployer

Cause:
A resource group template needs to exist before deploying to it.

Action:
Create the specified resource group template before deploying to it.

BEA-2164004
The resource group name cannot be derived in this case. Specify the resource group option along with the partition option.

Category:
Deployer

Cause:
A resource group option must be specified with the partition option in cases where it cannot be derived.

Action:
Specify the resource group option with the partition option.

BEA-2164005
A resource group template option cannot be specified with a resource group option.

Category:
Deployer

Cause:
A resource group template option and resource group option were specified together.

Action:
Either specify the resource group template option or specify the resource group option.

BEA-2164007
The specified resource group "{0}" does not exist in the domain.

Category:
Deployer

Cause:
A resource group needs to exist before you can deploy to it.

Action:
Create the specified resource group before deploying to it.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-2164008
The override of the deployment plan was already removed.

Category:
Deployer

Cause:
The override of the plan cannot be removed because it was already removed.

Action:
No action is required.

BEA-2164009
A resource group template option cannot be specified in a partition context.

Category:
Deployer

Cause:
A partition administrator cannot operate on a resource group template.

Action:
Operate on a resource group template outside of the partition context.

BEA-2164011
A resource group option cannot be specified in this operation.

Category:
Deployer

Cause:
A resource group option was specified but is not supported in this operation.

Action:
Retry the operation without the resource group option.

BEA-2164012
Unable to perform the {1} request for application "{0}". Either the application does not exist, or it is deployed to a resource group template referenced by resource group "{2}".

Category:
Deployer

Cause:
The application name was likely misspelled, or it is deployed to a resource group template but no resourceGroupTemplate option value was provided.

Action:
Verify that the application is correctly named, or provide a resource group template name using the resourceGroupTemplate option if application is deployed to a resource group template, or remove the reference to the resource group template from the resource group.

BEA-2164013
Unable to perform the {1} request for application "{0}". Operation cannot be performed until the server is restarted. Either the application does not exist, or it is deployed to a resource group template referenced by resource group "{2}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Deployer

Cause:
The application name was either misspelled, was created after non-dynamic changes were activated, or it is deployed to a resource group template but no resourceGroupTemplate option value is provided. The server needed to be restarted.

Action:
Verify that the application is correctly named, or provide a resource group template name using the resourceGroupTemplate option if the application is deployed to a resource group template, or remove the reference to the resource group template from the resource group. Then restart the server and start the application. In the future, start the application before making non-dynamic changes to the configuration.

BEA-2164014
The deployment task "{0}" for application "{1}" was canceled.

Category:
Deployer

Cause:
The deployment task was canceled by the adminstrator or due to an error.

Action:
No action is required if the the task was explicitly canceled.

BEA-2164015
Application or library version must be specified during undeployments from a resource group template if more than one version exists.

Category:
Deployer

Cause:
It is not possible to find our the active version given a resource group template because the state of an application is defined in the context of a partition, not by a resource group template alone.

Action:
If the intent it to undeploy the application or library from all partitions that refer to this resource group template, provide version information for this application or library.

BEA-2164016
Cannot start an application which is in a shutdown partition {0} or resource group {1}.

Category:
Deployer

Cause:
An administrator is trying to start an application which is in a shutdown partition or resource group.

Action:
An application will be started when the partition or resource group is started.

BEA-2164017
Implicitly retiring {0} during managed server startup

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Deployer

Cause:
A newer version of the application could have been deployed since this server was last booted

Action:
No action needs to be taken

BEA-2164018
More than one non-retiring app ids found on server startup: {0}

Category:
Deployer

Cause:
The older version might not have been retired yet

Action:
No action needs to be taken

BEA-2164019
More than one retiring app ids found on server startup: {0}

Category:
Deployer

Cause:
A newer version of the application could have been deployed since this server was last booted

Action:
More than one production redeploy might have been performed

BEA-2164020
There is no application named "{0}" in the system. However, there is a pending configuration change which does have an application named "{0}". The user must decide to either delete the pending transaction or commit the pending transaction before the {1} operation can be performed.

Category:
Deployer

Cause:
It is either because the user has started a configuration edit transaction but has not yet committed it yet, or it is possible that an existing edit transaction was underway and the admin server has rebooted. In either case some user must decide to either abandon the existing user transaction or commit the existing user transaction to perform the operation given in the message.

Action:
Some administrative user must decide to either abandon the existing configuration transaction or to commit the existing configuration transaction before issuing this command to the given application.

BEA-2164021
Application {0} is marked for retirement at {1} in future. This app will not be implicitly retired at this time {2}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Deployer

Cause:
The reiterment time is valid but set to some time in the future

Action:
No action needs to be taken

BEA-2164022

The new version of application must have been specified in a the updated deployment-config-overrides.xml

Action:
No action needs to be taken at this time

BEA-2164028
Scheduling retirement for generated version {1} of configured application {0} in {2} seconds

Category:
Deployer

Cause:
The new version of application must have been specified in a the updated deployment-config-overrides.xml. That version must have successfully deployed, so the old version is being retired

Action:
No action needs to be taken at this time

BEA-2164029
Initiating retirement of old generated version {1} of configured application {0}

Category:
Deployer

Cause:
The new version of application must have been specified in a the updated deployment-config-overrides.xml. That version must have successfully deployed, so the old version is being retired

Action:
No action needs to be taken at this time

BEA-2164030
Completed retirement of old generated version {1} of configured application {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Deployer

Cause:
The new version of application must have been specified in a the updated deployment-config-overrides.xml. That version must have successfully deployed, so the old version is being retired

Action:
No action needs to be taken at this time

BEA-2164031
Ignoring a modified deployment-config-overrides.xml because previous processing started at {0} has not completed yet

Category:
Deployer

Cause:
Changes to deployment-config-overrides.xml from a previous poll are still being processed. So the current poll will be ignored

Action:
No action needs to be taken at this time

BEA-2164032
Cancelling {2} for generated version {1} of {0} since MSID infrastructure is being torn down

Category:
Deployer

Cause:
MSID infrastructure is being torn down, most likely due to server shutdown. All in-flight work will be cancelled.

Action:
No action needs to be taken at this time

BEA-2164033
Invalid value of retire-timeout {2} found in deployment-config-overrides.xml for generated version {1} of {0}. This value must be a non-negative integer. This value is being ignored, domain wide default {3} will be used instead

Category:
Deployer

Cause:
Retire timeout configuration cannot be processed if it is not a number, or if it is negative.

Action:
Correct the value of retire-timeout in deployment-config-overrides.xml

BEA-2164034
The processing of the MSID application [{0}] is blocked. Current count of old app version [{1}] reaches the maxiumum number of old app versions [{2}] threshold.

Category:
Deployer

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The current count of old app version reaches max old app versions threshold. Processing of the next MSID application is blocked till the count drops below the threshold.

Action:
You can wait for the count of old app version drops below the threshold, or configure the max-old-app-versions property in DeploymentConfigOverridesMBean to increase the threshold.

BEA-2164035
The processing of the MSID application is unblocked. Current count of old app version [{0}] drops below the maximum number of old app versions [{1}] threshold.

Category:
Deployer

Cause:
The current count of old app version drops below max old app versions threshold. Processing of the next MSID application is now unblocked.

Action:
No action needs to be taken at this time

BEA-2164036
An attempt was made to execute the "{0}" operation on an application named "{1}" that is not currently available. The application may have been created after non-dynamic configuration changes were activated; or this server has gone out-of-sync with the admin server so it is unaware of the application. Allow the "{0}" operation to pass through so it does not affect "{0}" operation performed on other in-sync server instances. Please restart this server at earliest convenience to get things back in sync.

Category:
Deployer

Cause:
The application may have been created after non-dynamic changes were activated, or this server has gone out-of-sync with the admin server so it is unaware of the application.

Action:
Restart the server at earliest convenience to get things back in sync.

No action is required.

BEA-2165018
Resource Consumption Management Notification Withdraw Message: Notification action has been withdrawn because the quota has been reached below the given trigger value.

Category:
RCM

Cause:
This is an informational message for a withdrawal notification action under Resource Consumption Management.

Action:
This is a log message based on a "notify" trigger specified for the resource under Resource Consumption Management. If you want, you can use the WebLogic Diagnostic Framework(WLDF) to define different rules for this notification.

BEA-2165019
"ResourceManagement" is not supported in this JDK. Use Oracle JDK 8u40 or later which supports "ResourceManagement", to use the WebLogic Server "Resource Consumption Management" feature.

Category:
RCM

Cause:
"ResourceManagement" is not supported in the JDK used to start the WebLogic Server.

Action:
Use Oracle JDK 8u40 or later.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-2165020
FairShare was updated to the Resource Consumption Management resource.

Category:
RCM

Cause:
This is an informational message.

Action:
No action is required.

BEA-2165021
"ResourceManagement" is not enabled in this JVM. Enable "ResourceManagement" to use the WebLogic Server "Resource Consumption Management" feature. To enable "ResourceManagement", you must specify the following JVM options in the WebLogic Server instance in which the JVM runs: -XX:+UnlockCommercialFeatures -XX:+ResourceManagement.

Category:
RCM

Cause:
"ResourceManagement" is not enabled in this JVM.

Action:
Enable "ResourceManagement" to use the WebLogic Server "Resource Consumption Management" feature.

BEA-2165022
The process of creating the Resource Consumption Management Diagnostic Image has been timed out by the Diagnostic Framework. The resulting image may be incomplete.

Category:
RCM

Cause:
The process of creating the Resource Consumption Management Diagnostic Image has been timed out by the Diagnostic Framework.

Action:
Investigate the contents of the log and Diagnostic Images for more information.

BEA-2165023
Resource Consumption Management Fail Withdraw Message: Fail action has been withdrawn because the quota dropped below the given trigger value.

Category:
RCM

Cause:
This is an informational message for a withdrawal fail action under Resource Consumption Management.

Action:
This is a log message based on a fail trigger specified for the resource under Resource Consumption Management. If you want, you can use WebLogic Diagnostic Framework(WLDF) to define different rules for this notification.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-2165024
"ResourceManagement" is not supported in this JDK, but found a "Resource Consumption Management" policy configuration in the WebLogic Server for partition "{0}". Use Oracle JDK 8u40 or later which supports "ResourceManagement", to use the WebLogic Server "Resource Consumption Management" feature.

Category:
RCM

Cause:
"ResourceManagement" is not supported in the JDK used to start the WebLogic Server.

Action:
Use Oracle JDK 8u40 or later.

BEA-2165025
"ResourceManagement" is not enabled in this JVM, but found a "Resource Consumption Management" policy configuration in the WebLogic Server for partition "{0}". Enable "ResourceManagement" to use the WebLogic Server "Resource Consumption Management" feature. To enable "ResourceManagement", you must specify the following JVM options in the WebLogic Server instance in which the JVM runs: -XX:+UnlockCommercialFeatures -XX:+ResourceManagement.

Category:
RCM

Cause:
"ResourceManagement" is not enabled in this JVM.

Action:
Enable "ResourceManagement" to use the WebLogic Server "Resource Consumption Management" feature.

BEA-2165026
System Accounting flag is turned on. All resources consumed for performing System work by a Partition are tracked separately and not included in the Partition"s resource consumption values. If there are any Resource Consumption Management Policies(Triggers) configured, they will not be accounting system context based resource consumption. Similarly, Partition Resource Metrics will not include system context based resource consumption.

Category:
RCM

Cause:
This is an informational message.

Action:
When "System Accounting" feature is enabled, Resource Consumption Management policies established for a Partition would not include the resources consumed for a Partition to execute System work. If the Resource Consumption Management policies established for a Partition must track all resources used for a Partition, disable the "System Accounting" feature.

BEA-2165027
"Resource Consumption Management" policy for "Heap Retained" resource is defined in the WebLogic Server for partition "{0}". However "Heap Retained Metric" is not available in WebLogic Server.Resource Consumption Management" policy for "Heap Retained" resource can not be activated if "Heap Retained Metric" is not available. "Heap Retained Metric" is

Copyright © 2000, 2026, Oracle and/or its affiliates.

unavailable if "G1 Garbage Collector" is not enabled in the WebLogic Server JVM. Please enable "G1 Garbage Collector" to use "Heap Retained Metric" in WebLogic Server. To enable "G1 Garbage Collector", you must specify the following JVM options in the WebLogic Server instance in which the JVM runs: -XX:+UseG1GC.

Category:
RCM

Cause:
"Heap Retained Metric" is not available in WebLogic Server but found a "Resource Consumption Management" policy configuration for "Heap Retained" resource in the WebLogic Server for partition "{0}"

Action:
Enable "G1 Garbage Collector", Please specify the following JVM options in the WebLogic Server instance in which the JVM runs: -XX:+UseG1GC.

BEA-2165028
"Heap Retained Metric" is not available in WebLogic Server."Resource Consumption Management" support for "Heap Retained" resource is not available. "Heap Retained" resource is available only with "G1 Garbage Collector".

Category:
RCM

Cause:
"Heap Retained Metric" is not available in WebLogic Server.

Action:
If "Resource Consumption Management" support for "Heap Retained" resource is needed , please enable "G1 Garbage Collector" by specifying the following JVM options in the WebLogic Server instance in which the JVM runs:-XX:+UseG1GC.

BEA-2165029
Resource Consumption Management Restart Message: Given quota has been reached for the partition and a "restart" action has been executed.

Category:
RCM

Cause:
Given quota for the resource under Resource Consumption Management was reached for the partition and a "restart" action was executed. The partition was restarted due to this action.

Action:
No action is required.

BEA-2165030
Resource Consumption Management Restart Message: Partition has been restarted the maximum number of times as a result of resource consumption management "restart" action, in the duration, as specified in the partition config. Partition can not be restarted anymore, and is being shutdown.Partition would have to be started manually.

Category:
RCM

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
There are many attempts to "restart" the partition in configured duration.In order to prevent restart action going in a loop ,a "shutdown" action is executed.

Action:
There are many attempts to "restart" the partition in configured duration. You can reconfigure max-restart-allowed and max-restart-allowed-interval with higher value if this is expected behaviour .

BEA-2165031
Resource Consumption Management : Partition restart is unsuccessful. It failed with an error : {0}

Category:
RCM

Cause:
There was an error while restarting the partition.

Action:
Check the exception for the exact error message.

BEA-2165032
Restart Loop Protection updated for a Resource Consumption Management Resource Manager.

Category:
RCM

Cause:
This is an informational message.

Action:
No action is required.

BEA-2165799
Resource Consumption Management Notification Message: Given quota has been reached for the partition and a "notify" action has been executed.

Category:
RCM

Cause:
Given quota for the resource under Resource Consumption Management was reached for the partition and a "notify" action was executed.

Action:
This is a log message based on a "notify" trigger specified for the resource under Resource Consumption Management. If you want, you can use the WebLogic Diagnostic Framework(WLDF) to define different rules for this notification.

BEA-2165800
Resource Consumption Management Slow Message: Given quota has been reached for the partition and a "slow" action has been executed.

Category:
RCM

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Given quota for the resource under Resource Consumption Management was reached for the partition and a "slow" action was executed.The partition was slowed down due to this action.Once the resource consumption drops below the specified quota, partition would be un-slowed.

Action:
No action is required.

BEA-2165801
Resource Consumption Management Shutdown Message: Given quota has been reached for the partition and a "shutdown" action has been executed.

Category:
RCM

Cause:
Given quota for the resource under Resource Consumption Management was reached for the partition and a "shutdown" action was executed. The partition was stopped due to this action.

Action:
The partition has been stopped. Restart the partition manually. Use the Administration Console or WebLogic Diagnostic Framework(WLST) to start the partition.

BEA-2165802
Resource Consumption Management Fail Message: Given quota has been reached for the partition and a "fail" action has been executed.

Category:
RCM

Cause:
Given quota for the resource under Resource Consumption Management was reached for the partition and a "fail" action was executed. The resource consumption request failed due to this action.

Action:
Reissue the request.

BEA-2165803
Resource Consumption Management Un-slow Message: Slow action is "withdraw" as quota has been reached below the given trigger value.

Category:
RCM

Cause:
Slow action was withdrew as quota reached below the given trigger value for the resource under Resource Consumption Management .

Action:
No action is required.

{0} ERROR INTERNAL incorrect event type in connect release receiver {1} eventType: {2}

Category:
BuzzMessageBus

Cause:
There is an INTERNAL incorrect event type in the connect release receiver.

Action:
Contact My Oracle Support and provide them with the logs.

BEA-2190028
{0} ERROR INTERNAL POTENTIAL RDMA MEMORY LEAK unknown receipt type {1} receiptCookie: {2}

Category:
BuzzMessageBus

Cause:
An unknown receipt type was encountered. This may be due to an RDMA memory leak.

Action:
Contact My Oracle Support and provide them with the logs.

BEA-2190029
{0} ERROR INTERNAL recv exception reading BufferSequenceInputStream {1} bytes: {2}

Category:
BuzzMessageBus

Cause:
An exception occurred while reading BufferSequenceInputStream.

Action:
Contact My Oracle Support and provide them with the logs.

BEA-2190030
{0} ERROR INTERNAL POTENTIAL RDMA MEMORY LEAK forceCloseIdAux message info is null {1} messageId {2}

Category:
BuzzMessageBus

Cause:
INTERNAL MessageInfo is null. This may be due to an RDMA memory leak.

Action:
Contact My Oracle Support and provide them with the logs.

BEA-2190031
{0} ERROR INTERNAL no ConnectionInfo {1}

Category:
BuzzMessageBus

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
No connection info was provided for the endpoint.

Action:
Contact My Oracle Support and provide them with the logs.

BEA-2190032
{0} ERROR INTERNAL no epToMessageMap entry {1}

Category:
BuzzMessageBus

Cause:
The epToMessageMap entry for the endPoint was missing.

Action:
Contact My Oracle Support and provide them with the logs.

BEA-2190033
{0} ERROR INTERNAL recv no subprotocol receiver {1} frameType: {2} flags: {3} subprotocol: {4} messageId: {5}

Category:
BuzzMessageBus

Cause:
No subprotocol receiver was provided for the messageId.

Action:
Contact My Oracle Support and provide them with the logs.

BEA-2190034
{0} ERROR INIT INTERNAL recv connection in wrong state, should be CONNECTED {1} peer: {2}/{3} local: {4}/{5} connectionState: {6}

Category:
BuzzMessageBus

Cause:
An INIT frame was received but the endpoint is in the wrong state.

Action:
Contact My Oracle Support and provide them with the logs.

BEA-2190035
{0} ERROR INTERNAL INIT recv error ConnectionInfo should not be null {1}

Category:
BuzzMessageBus

Cause:
An INTERNAL INIT was received but ConnectionInfo is null.

Action:
Contact My Oracle Support and provide them with the logs.

BEA-2190039
{0} ERROR INTERNAL send existing endPoint to ConnectionInfo during INIT {1}

Category:
BuzzMessageBus

Cause:
An error of type INTERNAL occurred during initialization.

Action:
Contact My Oracle Support and provide them with the logs.

BEA-2190040
{0} ERROR INTERNAL send exception when sending RST {1} subprotocol: {2} messageId: {3} errorCode: {4} extra: {5}

Category:
BuzzMessageBus

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An exception of type INTERNAL occurred when sending RST.

Action:
Contact My Oracle Support and provide them with the logs.

BEA-2190041
{0} ERROR INTERNAL flush receiver threw exception (ignored) subprotocol: {1} subprotocolReceiver: {2}: {3}

Category:
BuzzMessageBus

Cause:
A BuzzSubprotocolReceiver threw an exception in its #flush method (ignored).

Action:
Contact My Oracle Support and provide them with the logs.

BEA-2190042
{0} ERROR close time out extra: waited for {1} {2}

Category:
BuzzMessageBus

Cause:
An internal close timeout occurred.

Action:
Contact My Oracle Support and provide them with the logs.

BEA-2190043
Unexpected DummyBuzzChannel usage by App Container with stack trace: {0}.

Category:
BuzzMessageBus

Cause:
There was an unexpected usage of DummyBuzzChannel by the Application Container.

Action:
Contact My Oracle Support and provide them with the logs.

BEA-2190044
Buzz Message Bus is initialized at {0}.

Category:
BuzzMessageBus

Cause:
This is an informational message.

Action:
No action required.

BEA-2191000
{0} Invalid HTTP header length in Buzz frame: {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
BuzzMessageBusHttp

Cause:
The HTTP header length in the Buzz frame is invalid.

Action:
Contact My Oracle Support and provide them the logs.

BEA-2191001
{0} Incomplete HTTP header in Buzz frame

Category:
BuzzMessageBusHttp

Cause:
The HTTP header in the Buzz frame is incomplete.

Action:
Contact My Oracle Support and provide them the logs.

BEA-2191002
{0} Invalid message type for HTTP BuzzSubprotocolHandler: {1}

Category:
BuzzMessageBusHttp

Cause:
The message type received by the HTTP BuzzSubprotocolHandler is invalid.

Action:
Contact My Oracle Support and provide them the logs.

BEA-2191003
{0} The BuzzSubprotocolRecieverHttpWLSImpl#receipt method should not be invoked. There may be a memory leak: {1}

Category:
BuzzMessageBusHttp

Cause:
The Http BuzzSubprotocolHandler encountered an internal receipt error.

Action:
Contact My Oracle Support and provide them the logs.

BEA-2191004
{0} Internal receive error in Http BuzzSubprotocolHandler: {1}

Category:
BuzzMessageBusHttp

Cause:
The Http BuzzSubprotocolHandler encountered an internal receive error.

Action:
Contact My Oracle Support and provide them the logs.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-2191005
{0} A complete message could not be read on socket: '{1}', in the configured timeout period of '{2}' secs.

Category:
BuzzMessageBusHttp

Cause:
A complete HTTP message could not be read on the socket within the configured timeout.

Action:
Contact My Oracle Support and provide them the logs.

BEA-2191006
{0} BuzzSubprotocolRecieverHttpWLSImpl#closeYourId({1}) should not be invoked because WLS/Buzz/HTTP does not initiate messages.

Category:
BuzzMessageBusHttp

Cause:
BuzzSubprotocolRecieverHttpWLSImpl#closeYourId was invoked.

Action:
Contact My Oracle Support and provide them the logs.

BEA-2192000
Workflow {0} failed in step <{1}> during {2} operation without a specified reason. Requested resolution is {3}

Category:
MgmtOrchestration

Cause:
{0}

Action:
Workflow failures are handled according to their failure plan. Check the log messages or the workflow results for additional details.

BEA-2192001
Workflow {0} failed in step <{1}> during {2} operation. Requested resolution is {3}. Reason: {4}

Category:
MgmtOrchestration

Cause:
{0} - {2}

Action:
Workflow failures are handled according to their failure plan. Check the log messages or the workflow results for additional details.

BEA-2192002
Workflow {0} - the saved workflow is corrupted, there are missing work units.

Category:
MgmtOrchestration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The workflow could not be loaded properly from persistent storage.

Action:
Review the server configuration or create a new workflow.

BEA-2192003
Workflow {0} - the saved workflow is corrupted, checksum errors were detected.

Category:
MgmtOrchestration

Cause:
The workflow could not be loaded properly from persistent storage.

Action:
Review the server configuration or create a new workflow.

BEA-2192004
Workflow {0} Running: {1} / {2}

Category:
MgmtOrchestration

Cause:
This is an informational message.

Action:
No action is required.

BEA-2192005
Workflow {0} finished successfully. {1} steps completed.

Category:
MgmtOrchestration

Cause:
This is an informational message.

Action:
No action is required.

BEA-2192006
Workflow {0} failed and the revert process has been initiated.

Category:
MgmtOrchestration

Cause:
See getError for details of the failure.

Action:
Allow the workflow to revert automatically, then diagnose the failure with the information reported by getError before attempting the process again.

BEA-2192007
Workflow {0} failed and the revert process was not initiated. The failure was: {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
MgmtOrchestration

Cause:
See getError for details of the failure.

Action:
Diagnose the failure with the information reported by getError and address it.

BEA-2192008
Workflow {0} failed, the revert process was initiated and completed successfully. The failure that triggered the revert process was: {1}

Category:
MgmtOrchestration

Cause:
See getError for details of the failure.

Action:
Diagnose the failure with the informatipn reported by getError and address it. Then try running the procedure again.

BEA-2192009
Workflow {0} failed, the revert process was initiated, but it failed as well. The failure that triggered the revert process was: {1}

Category:
MgmtOrchestration

Cause:
See getError for details of the cause.

Action:
Review the cause details from getError and address the reported issue. The partial completion of this operation may have left affected targets in an inconsistent state.

BEA-2192010
Workflow {0} was canceled.

Category:
MgmtOrchestration

Cause:
This is an informational message.

Action:
No action is required.

BEA-2192011
Workflow {0} cannot create directory to store workflow: {0}

Category:
MgmtOrchestration

Cause:
The requested directory could not be created.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the parent directory is writable and the hard drive has sufficient free space.

BEA-2192012
Workflow {0} could not delete a file during the workflow storage cleaning process. {1}

Category:
MgmtOrchestration

Cause:
{1}

Action:
Unlock the file and check the user's privileges.

BEA-2192013
Workflow {0} - found unexpected or invalid structures in the storage directory:{1}

Category:
MgmtOrchestration

Cause:
This is usually caused by external changes to the directory contents.

Action:
Create a new workflow for this procedure.

BEA-2192014
Workflow {0} could not move the temporary workflow file ({0}) to the permanent destination ({1}).

Category:
MgmtOrchestration

Cause:
The cause is unknown.

Action:
Ensure that the parent directory is writable and that the temporary workflow file is writable. You will likely need to start a new workflow for this procedure.

BEA-2192015
Workflow {0} is starting the revert process.

Category:
MgmtOrchestration

Cause:
There was a previously reported error with the workflow and the revert process is starting.

Action:
No action is required.

BEA-2192016
Workflow {0} is already completed and cannot be started again.

Category:
MgmtOrchestration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
You attempted to start a completed workflow.

Action:
To run the process again, start a new workflow.

BEA-2192017
Workflow {0} is already running.

Category:
MgmtOrchestration

Cause:
You attempted to start a running workflow.

Action:
No action is required.

BEA-2192018
Could not delete a file or directory: {0}

Category:
MgmtOrchestration

Cause:
Either the file is locked or the user has insufficient privileges.

Action:
Unlock the file and check the user's privileges.

BEA-2192019
Workflow {0} is not running, so it cannot be canceled.

Category:
MgmtOrchestration

Cause:
Only a running workflow can be canceled.

Action:
No action is required.

BEA-2192034

Action:
No action required.

BEA-2192036
{0} {1} {2}-{3} (duration: {4}) - ERROR Unknown error

Category:
MgmtOrchestration

Cause:
See the message body.

Action:
No action required.

BEA-2192037
Failure performing {1} of {0}

Category:
MgmtOrchestration

Cause:
See the cause of the exception.

Action:
Workflow failures are handled according to their failure plan. Check the log messages or the workflow results for additional details.

BEA-2192038
Workflow {0} was never executed. Cannot revert.

Category:
MgmtOrchestration

Cause:
You attempted to revert a new workflow.

Action:
This operation is valid only for stopped workflows, not for completed but already executed workflows, for example, failed workflows.

BEA-2192039
Service is blocked. It was used too early or was not used on the Administration Server.

Category:
MgmtOrchestration

Cause:
The server is not in a state where the orchestration framework can act.

Action:
Check the status of the Administration Server.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BEA-2192040
Workflow instance {0} is running. Cannot delete.

Category:
MgmtOrchestration

Cause:
A running workflow instance cannot be deleted.

Action:
Wait for the workflow to complete.

BEA-2192041
It is not possible to execute the workflow instance in its current state.

Category:
MgmtOrchestration

Cause:
The current state of the workflow is not compatible with this operation.

Action:
Check the state of the workflow instance.

BEA-2192042
It is not possible to revert the workflow instance in its current state.

Category:
MgmtOrchestration

Cause:
The current state of the workflow is not compatible with this operation.

Action:
Check the state of the workflow instance.

BEA-2192043
Cannot execute the workflow instance. Not all required shared state objects are defined. ({0})

Category:
MgmtOrchestration

Cause:
The workflow instance cannot be constructed because of missing shared state objects.

Action:
Ensure that you have defined all necessary attributes.

BEA-2192044
Failure performing {1} of {0}, caused by {2}

Category:
MgmtOrchestration

Cause:
See the cause of the exception.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Workflow failures are handled according to their failure plan. Check the log messages or the workflow results for additional details.

BEA-2192045
Debug Message: {0}

Category:
MgmtOrchestration

Cause:
Used for capturing debug information during testing.

Action:
No action is required.

BEA-2192046
Workflow {0} failed in step <{1}> during {2} operation. Requested resolution is {3}. Reason: {4}

Category:
MgmtOrchestration

Cause:
{0} - {2}

Action:
Workflow failures are handled according to their failure plan. Check the log messages or the workflow results for additional details.

BEA-2192047
Workflow {0} failed to store step <{1}> during {2} operation. Reason: {4}

Category:
MgmtOrchestration

Cause:
{0} - {2}

Action:
Workflow failures are handled according to their failure plan. Check the log messages or the workflow results for additional details.

BEA-2192048
Unable to load stored progress object of type: {0} from {1} due to {2}.

Category:
MgmtOrchestration

Cause:
{0} - {2}

Action:
Check that the file store is still valid and that the workflow information is not lost.

BEA-2192049
Unable to initialize progress object from persistence: {0} due to {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
MgmtOrchestration

Cause:
{0} - {1}

Action:
Check that the file store is still valid and that the workflow information is not lost.

BEA-2192050
Error initializing progress for workflow {0} from path {1}, due to {2}.

Category:
MgmtOrchestration

Cause:
{2}

Action:
Check that the file store is still valid and that the workflow information is not lost.

BEA-2192051

CoherenceIntegration

Cause:
The Coherence cluster service failed to start or failed to join cluster due to {0} using {1}.

Action:
Review the Coherence configuration for the cause of the exception.

BEA-2194508
Coherence configuration failed due to {0} using {1}.

Category:
CoherenceIntegration

Cause:
The Coherence configuration failed due to {0} using {1}.

Action:
Review the Coherence configuration for the cause of the exception.

BEA-2194509
The WeblogicCoherenceBean and CoherenceClusterParamsBean are not defined for the CoherenceClusterSystemResourceMBean {0}.

Category:
CoherenceIntegration

Cause:
The CohererenceClusterSystemResourceBean {0} needs to have an association with valid WeblogicCoherence and CoherenceCluster Beans.

Action:
Create a CoherenceClusterSystemResource MBean with the required associations.

BEA-2194510
While configuring the Coherence Cluster Service, the Server MBean or Server CoherenceMemberConfig MBean or both were not defined.

Category:
CoherenceIntegration

Cause:
The Server MBean or Server CoherenceMemberConfig MBean or both were not defined and thus will not be used when configuring the Coherence Cluster Service.

Action:
No action is required.

BEA-2194511
Server {0} is configured with 'localhost' as the Unicast Listen Address which is an error in Coherence Production mode. A generated Coherence WKA list will not operate correctly across multiple machines.

Category:
CoherenceIntegration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Server {0} is configured with 'localhost' as the Unicast Listen Address resulting in an error when Coherence is in Production mode. When using Coherence WKA and not explicitly defining a WKA list, the configuration may not operate correctly across multiple machines.

Action:
Explicitly define a Well Known Address (WKA) list for the Coherence cluster.

BEA-2194512
While undeploying a GAR, the deployment module received an exception when closing files {0}.

Category:
CoherenceIntegration

Cause:
While undeploying a GAR, one or more files could not be closed due to {0}.

Action:
Review the exception and determine if there any file system issues for the referenced files.

BEA-2194513
Deployed an application ({0}) with Coherence*Web as session persistence type without a CoherenceClusterSystemResourceMBean definition on this server. Typically, a Coherence cluster must be created for this scenario to work properly.

Category:
CoherenceIntegration

Cause:
Deployed an application ({0}) with Coherence*Web as session persistence type without a CoherenceClusterSystemResourceMBean definition on this server.

Action:
Create a CoherenceClusterSystemResourceMBean appropriately and associate it with the server, or the cluster of which this server is a member. Only in some special cases, for example using Coherence Extend with TCMP disabled, a Coherence cluster may not be associated with a managed server.

Category:
DomainToPartition

Cause:
TBD

Action:
TBD

BEA-2194822
The imported zip file does not contain the application/library source at "{0}".

Category:
DomainToPartition

Cause:

Action:

BEA-2194823
The destination for writing the imported plan for application "{0}" already exists at {1}.

Category:
DomainToPartition

Cause:

Action:

BEA-2194824
Import of "{1}" of type "{0}" is excluded in the json file, an excluded resource won't be available in the partition.

Category:
DomainToPartition

Cause:
The resource is excluded in the json file generated by Domain To Partition Conversion Tool, before importing to the partition.

Action:
Manually configure the resource appropriately.

BEA-2194825
Partition "{0}" already contains a default target with the name "{1}".

Category:
DomainToPartition

Cause:

Action:

BEA-2194826
Cannot find/set JDBCStore "{0}" to JMS Server "{1}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
DomainToPartition

Cause:

Action:

BEA-2194827
Removing the target "{1}" from the subdeployment "{0}", to retain the first target for the subdeployment.

Category:
DomainToPartition

Cause:

Action:

BEA-2194828
Modifying the distribution policy to 'Singleton' and the migration policy to 'Always' of the persistent store "{0}" referenced by the Path Service "{1}".

Category:
DomainToPartition

Cause:

Action:

BEA-2194829
Path Service "{0}" in the source domain was pointing to default store. So creating a file store with the name "{1}" under Resource Group / Resource Group Template "{2}" as a path service without a valid store is not supported in a partitioned environment.

Category:

Category:
DomainToPartition

Cause:

Action:

BEA-2194833
Error creating the JDBC Store "{0}", cannot find and set JDBC SystemResource "{1}"

Category:
DomainToPartition

Cause:

Action:

BEA-2194834
The JDBC Store "{0}" in the source domain does not have an associated JDBC System Resource. So this JDBC Store won't be created in the target domain partition. Any reference to this JDBC Store by a JMS Server or a SAF Agent or a Path Service will result in a validation exception due to unresolved reference in the configuration (config.xml).

Category:
DomainToPartition

Cause:

Action:

BEA-2194835
The Uniform Distributed Topic "{0}" in JMS Module "{1}" is configured to use the forwarding policy 'Replicated'(the default). This configuration is not supported when importing this domain to a partition, so the forwarding policy will be changed to 'Partitioned'.

Category:
DomainToPartition

Cause:

Action:

BEA-2194836
The subdeployment "{0}" in JMS Module "{1}" is targeted to "{2}" of type "{3}". This configuration is not supported. Subdeployments when not targeted to a JMS Server or a SAF Agent, will be left untargeted and any resources that reference that subdeployment will not be deployed.

Category:
DomainToPartition

Cause:

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:

BEA-2194837
The subdeployment "{0}" in JMS Module "{1}" is targeted to "{2}" of type "{3}" and "{2}" is associated with a specific server in cluster "{4}" via a target of "{5}" of type "{6}". Partition scoped JMS destinations do not support targeting a particular Server or Migratable Target, so, after import, this subdeployment will be targeted to a JMS Server or a SAF Agent with an effective target of a Cluster, the destination runtime will therefore be hosted on a single random server in the cluster, or across all members of the cluster depending on its distribution policy and the server hosting the destination may change after failures or restarts.

Category:
DomainToPartition

Cause:

Action:

BEA-2194838
The subdeployment "{0}" in JMS module "{1}" does not have any valid target. After import, any JMS destination that refer this subdeployment will not be deployed.

BRW-15000
Internal error in Query Builder error handler

Category:
Other

Cause:
Error handler could not be started.

Action:
Contact support.

BRW-15001
{1}

Category:
Other

Cause:
Message not found

Action:
Check Query Builder directory in Oracle Home for message file.

BRW-15002
Out of memory!

Category:
Other

Cause:
Out of memory.

Action:
Save documents and restart Query Builder.

BRW-15003
Invalid file name: {1}

Category:
Other

Cause:
User entered an invalid file name (for example, too many characters).

Action:
Enter a new, valid file name.

BRW-15004
Internal error ({1}:{2})

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Internal Error Occurred -- Query Builder is in an unreliable state.

Action:
Contact support.

BRW-15005
No file name specified

Category:
Other

Cause:
User did not enter a filename in the Export Data Dialog.

Action:
Enter a filename.

BRW-15006
Unable to DESCRIBE data table

Category:
Data

Cause:
Internal message.

Action:
Contact support.

BRW-15007
SQL statement is too complex to display.

Category:
Other

Cause:
Exceeded the edit buffer size on MSWINDOWS.

Action:
Exclude some columns from the query to reduce the SQL statement size.

BRW-15009
Insufficient privileges to login through Query Builder

Category:
Other

Cause:
Connect privileges are disabled in the SYSTEM.BROWSER_PROFILE table.

Action:
Contact your DBA.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15010
Insufficient privileges to edit schema through Query Builder

Category:
Other

Cause:
Schema Editing privileges are not enabled in the SYSTEM.BROWSER_PROFILE table.

Action:
Contact your DBA.

BRW-15011
Insufficient privileges to edit data through Query Builder

Category:
Data

Cause:
Data Editing privileges are not enabled in the SYSTEM.BROWSER_PROFILE table.

Action:
Contact your DBA.

BRW-15012
Cannot edit schema with DICTIONARY=ENDUSER command-line option

Category:
Other

Cause:
Query Builder cannot invoke the Schema Builder when DICTIONARY=ENDUSER.

Action:
Run Query Builder with the DICTIONARY=NATIVE command line option.

BRW-15013
Insufficient privileges to edit End User Layer through Query Builder

Category:
Other

Cause:
Meta-data Editing privileges are not enabled in the SYSTEM.BROWSER_PROFILE table.

Action:
Contact your DBA.

BRW-15025
Unable to load list of database roles

Category:
Other

Cause:
Schema internal error in loading list of database roles.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Contact support if this is not expected.

BRW-15065
Syntax error

Category:
Other

Cause:
User typed a formula incorrectly.

Action:
Re-type the expression.

BRW-15066
Expression is too complex

Category:
Other

Cause:
Expression is too complex.

Action:
Simplify the expression.

BRW-15068
Invalid function: {1}

Category:
Other

Cause:
User entered an invalid function name.

Action:
Specify a valid function.

BRW-15069
Invalid column: {1}

Category:
Other

Cause:
User entered an invalid column name.

Action:
Enter a valid column name.

BRW-15070
Invalid table: {1}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
User entered an invalid table name.

Action:
Enter a valid table name.

BRW-15071
Invalid owner: {1}

Category:
Other

Cause:
User entered an invalid user or business area name.

Action:
Enter a valid user or business area name.

BRW-15072
Invalid condition

Category:
Other

Cause:
User entered an invalid condition.

Action:
Delete the condition and enter a valid condition.

BRW-15073
Invalid expression

Category:
Other

Cause:
User entered an invalid expression (usually blank).

Action:
Enter a valid expression.

BRW-15074
Invalid use of reserved word {1}

Category:
Other

Cause:
User used a reserved word as an identifier.

Action:
Identifiers cannot be reserved words. Refer to the help or documentation for details.

BRW-15075
Invalid number of arguments to function {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
User entered too few or too many arguments for the given function.

Action:
Enter the appropriate arguments. Refer to the help or documentation for details.

BRW-15077
Ambiguous name: {1}

Category:
Other

Cause:
User entered an ambiguous column name.

Action:
Enter a specific column name, include any qualifiers.

BRW-15078
Redefinition of name: {1}

Category:
Other

Cause:
User redefined a column or data table using a name that already exists.

Action:
Define the column or table using a new name.

BRW-15079
No columns selected in query

Category:
Other

Cause:
Query was either built or entered with no displayed columns.

Action:
Select columns before re-executing the query.

BRW-15080
No tables specified in query

Category:
Other

Cause:
User entered a query without specifying any tables.

Action:
Select tables before re-executing the query.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15081
START WITH requires CONNECT BY

Category:
Other

Cause:
SQL statement contained a START WITH clause without a CONNECT BY clause.

Action:
Specify a CONNECT BY clause if using START WITH.

BRW-15082
PRIOR requires CONNECT BY

Category:
Other

Cause:
SQL statement contained a PRIOR clause without a CONNECT BY clause.

Action:
Specify a CONNECT BY clause if using PRIOR.

BRW-15083
Bad argument type to function {1}

Category:
Other

Cause:
User entered the wrong argument type for the function.

Action:
Enter the correct argument type.

BRW-15084
Unterminated comment

Category:
Other

Cause:
Buffer being read in has an unterminated C-type comment in it.

Action:
Edit the file (see that it terminates correctly), and reopen from Query Builder.

BRW-15085
Circular reference detected in defined column

Category:
Other

Cause:
Modification of a defined column has led to a circular reference.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Redefine the column so that it does not refer to itself in its own definition.

BRW-15086
Arguments to a correlated subquery function must be columns

Category:
Other

Cause:
A complex argument was given, such as avg (sal, deptno*2).

Action:
Specify only valid columns, not expressions, in the subquery.

BRW-15087
Invalid location: {1}

Category:
Other

Cause:
User entered an invalid database location for a table.

Action:
Enter a valid database location.

BRW-15088
Ambiguous table: {1}

Category:
Other

Cause:
User entered an ambiguous data table name (more than one table uses this name).

Action:
User must further qualify the data table. Refer to the help or

BRW-15089
Only one PRIOR operator allowed on an expression

Category:
Other

Cause:
User typed 2 or more PRIOR clauses in an expression.

Action:
Remove one of the PRIOR clauses.

BRW-15090
The name {1} is already in use

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
User entered a name that was already being used.

Action:
Enter a new name.

BRW-15091
Invalid name: {1}

Category:
Other

Cause:
User entered an invalid name (with spaces or unprintable chars).

Action:
Enter a new name.

BRW-15092
Bad usage of outer relationship

Category:
Other

Cause:
User specified an outer relationship on a non-column element.

Action:
Outer relationships are only valid for columns.

BRW-15093
Invalid number of elements in corresponding record

Category:
Other

Cause:
User entered two records with different numbers of elements.

Action:
Reenter the condition.

BRW-15094
Group function is nested too deeply

Category:
Other

Cause:
User entered a double(triple) aggregate condition(expression).

Action:
Simplify aggregate condition/expression.

BRW-15096
Table name conflicts with {1}, renamed to {2}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
When opening a query, a table alias name conflicts with a new column.

Action:

BRW-15097
Name conflicts with {1}, renamed to {2}

Category:
Other

Cause:
When loading a saved query, an alias name conflicts with a new column.

Action:

BRW-15098
Duplicate table {1} in FROM clause

Category:
Other

Cause:
Data table appears more than once in FROM clause (without an alias).

Action:
Remove the duplicate data tables in the FROM clause.

BRW-15099
Subquery returns incorrect number of values

Category:
Other

Cause:
Subquery returns either too many or too few values.

Action:
Reenter condition.

BRW-15100
Correlated expressions are not allowed here

Category:
Other

Cause:
User entered a correlated expression outside a condition.

Action:
Reenter the condition/expression.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15101
Table alias cannot be reused in the same FROM clause: {1}

Category:
Other

Cause:
User tried to use an alias in the same FROM clause it was defined in.

Action:
Remove the reference to the alias.

BRW-15102
Too many elements in record

Category:
Other

Cause:
User entered a record with more than 254 elements.

Action:
Reduce the number of elements--split the condition into an OR.

BRW-15103
Unnamed SELECT statement in FROM clause

Category:
Other

Cause:
SQL contained a query in the FROM clause without name.

Action:
Add the query name and reparse.

BRW-15110
Invalid number or precision exceeded: {1}

Category:
Other

Cause:
Non-numeric input or the number exceeded this column's precision.

Action:
Re-enter a valid number and precision.

BRW-15111
Invalid date: {1}

Category:
Other

Cause:
Could not format using the columns format mask or either default mask.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Re-enter a valid format mask.

BRW-15112
Entry exceeds the size limit for this column: {1}

Category:
Other

Cause:
User entered a string longer than the limit for this column.

Action:
Enter a shorter string.

BRW-15113
Not all parameters have been specified

Category:
Other

Cause:
User attempted to execute a query without defining all parameters

Action:
Specify parameters or exclude parameterized expressions and retry.

BRW-15114
Parameters can only be constant expressions

Category:
Other

Cause:
User attempted to enter a parameter value that depended on a column value.

Action:
Specify a valid parameter, one that does not depend on the value in a column.

BRW-15115
Bad usage of parameter {1}

Category:
Other

Cause:
User entered a parameter name for a column or table.

Action:
Specify a valid parameter.

BRW-15116
Invalid parameter name {1}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
User entered an invalid parameter name.

Action:
Specify a valid parameter name.

BRW-15117
Invalid parameter {1}

Category:
Other

Cause:
User entered an invalid parameter.

Action:
Specify valid parameter.

BRW-15128
Parser internal error: {1}

Category:
Other

Cause:
Internal error in the parser/scanner.

Action:
Contact support.

BRW-15129
Defined column {1} cannot be used in correlated subquery function

Category:
Other

Cause:
Use of derived columns (DQ4) in correlated subquery.

Action:
Remove that argument from the correlated subquery.

BRW-15130
Query execution failed

Category:
Other

Cause:
Database access error.

Action:
Check database error and rerun query.

BRW-15131
Invalid relational operator

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
User applied an invalid operator to a condition.

Action:
Enter a valid operator.

BRW-15132
FROM clause was not found where expected

Category:
Other

Cause:
Encountered no FROM clause or GROUP/HAVING clause before a FROM clause.

Action:
Edit SQL statement.

BRW-15133
FROM clause was found without corresponding SELECT clause

Category:
Other

Cause:
Encountered FROM clause before SELECT clause.

Action:
Edit SQL statement.

BRW-15135
Condition cannot be changed

Category:
Other

Cause:
user attempted to change the top condition in Schema Builder.

Action:
Perform the operation on the children conditions.

BRW-15136
SQL contains set operators

Category:
Other

Cause:
Set operations are not supported.

Action:
Run the query in SQLPlus.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15137
Unable to generate names for complex expressions

Category:
Other

Cause:
Encountered expressions without names when opening a SQL file.

Action:
Define Names for columns in the .sql file.

BRW-15138
CONNECT BY clause existed, and was ignored

Category:
Other

Cause:
Connect By is not supported at this (top) level.

Action:
Run the query in SQLPlus, if results of CONNECT BY were desired.

BRW-15139
Cannot ungroup condition

Category:
Other

Cause:
Attempt to ungroup top condition.

Action:
This operation is not supported.

BRW-15141
Query table cannot contain parameters

Category:
Other

Cause:
Encountered one or more parameters when creating a view.

Action:
Exclude parameters from query or ignore.

BRW-15142
Two or more columns have the same name: {1}

Category:
Other

Cause:
Encountered duplicate column names when creating view.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Use the Define command to rename duplicate columns.

BRW-15143
{1} is already a display column

Category:
Other

Cause:
User tried to specify a duplicate display column.

Action:
If duplicate column is desired, define a new name for it and re-display it.

BRW-15144
{1} is already a sort column

Category:
Other

Cause:
User tried to specify a duplicate sort column.

Action:
If duplicate column is desired, define a new name for it and re-sort.

BRW-15145
{1} is already a group column

Category:
Other

Cause:
user tried to specify a duplicate group column.

Action:
If duplicate column is desired, define a new name for it and re-group.

BRW-15146
Internal error in opening query

Category:
Other

Cause:
Internal error in opening query.

Action:
Contact support.

BRW-15147
Internal error in saving query

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Internal error in saving query.

Action:
Contact support.

BRW-15148
Relationship must be between compatible data types/size

Category:
Data

Cause:
User tried to relate two columns with incompatible data types.

Action:
Relate only compatible datatypes. Refer to the help or documentation for details.

BRW-15150
Cannot define a self-relationship

Category:
Other

Cause:
User tried to define a relationship within a data table.

Action:
Alias the data table and then define the relationship.

BRW-15151
User-defined relationship already exists

Category:
Other

Cause:
User tried to define a relationship that already exists.

Action:
No action required.

BRW-15152
Illegal column in defined relationship

Category:
Other

Cause:
User specified an illegal expression when defining a relationship.

Action:
Retype in a new column.

BRW-15153
Table alias name cannot end with _A<number>

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Illegal alias name.

Action:
Input a new name that does not end with _A<number>.

BRW-15154
Cannot remove database relationship

Category:
Other

Cause:
User tried to remove data dictionary relationship.

Action:
Only user-defined relationships can be deleted.

BRW-15155
The following documents may have been affected:{1}

Category:
Other

Cause:
A saved query was being used as a data table in other query documents.

Action:
If you change or delete this query, you will affect these other queries.

BRW-15156
Cannot include table with the same name as the query

Category:
Other

Cause:
User attempted to include data table D in query document D.

Action:
Rename the query before including this table.

BRW-15157
Cannot sort, group, or break on LONG columns

Category:
Other

Cause:
Trying to sort, group or break on LONG column type.

Action:
Cancel the operation. Oracle does not support this.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15158
Cannot sort, group, or break on RAW columns

Category:
Other

Cause:
Trying to sort, group or break on RAW column type.

Action:
Cancel the operation. Oracle does not support this.

BRW-15159
Cannot display LONG columns from remote databases

Category:
Other

Cause:
Trying to include LONG column type from remote database data table.

Action:
Cancel the operation. Oracle does not support this.

BRW-15160
Maximum number ({1}) of columns exceeded

Category:
Other

Cause:
User exceeded maximum number of display/group/sort columns supported.

Action:
Delete some unwanted columns, then re-include what you need.

BRW-15161
Error in opening {1} display column(s)

Category:
Other

Cause:
Unable to open DISPLAY column because database has changed since save.

Action:
This column may have changed or no longer exist in the database.

BRW-15162
Error in opening {1} sort column(s)

Category:
Other

Cause:
Unable to open SORT column because database has changed since save.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
This column may have changed or no longer exist in the database.

BRW-15163
Error in opening {1} group column(s)

Category:
Other

Cause:
Unable to open GROUP column because database has changed since save.

Action:
This column may have changed or no longer exist in the database.

BRW-15164
Error in opening {1} break column(s)

Category:
Other

Cause:
Unable to open BREAK column because database has changed since save.

Action:
This column may have changed or no longer exist in the database.

BRW-15165
Maximum number ({1}) of break columns exceeded

Category:
Other

Cause:
User exceeded the maximum number of break columns supported.

Action:
Delete some unwanted break columns, then re-include what you need.

BRW-15166
Error in opening {1} condition(s)

Category:
Other

Cause:
Unable to open conditions because database has changed since save.

Action:
Tables or columns used in this condition may no longer exist in the database.

BRW-15167
Alias must be {1} bytes or less: {2}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
alias name too long.

Action:
Try typing in an alias less than or equal to 30 bytes long.

BRW-15168
Cannot group on aggregate expression

Category:
Other

Cause:
Tried to group on an aggregate expression.

Action:
Group on another expression.

BRW-15169
{1} has already been included as a break column

Category:
Other

Cause:
User tried to specify a duplicate break column.

Action:
If duplicate column is desired, define a new name for it and re-break.

BRW-15170
Invalid Constraint for table {1}

Category:
Other

Cause:
User entered an invalid constraint for the selected table.

Action:
Reenter constraint.

BRW-15171
Invalid Constraint for table column {1}

Category:
Other

Cause:
User entered an invalid constraint for the selected column.

Action:
Reenter constraint.

BRW-15172
Subqueries are not allowed in Constraints

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
User entered an invalid constraint.

Action:
Reenter constraint.

BRW-15173
Aggregate conditions are not allowed in Constraints

Category:
Other

Cause:
User entered an invalid constraint.

Action:
Reenter constraint.

BRW-15174
Constraints can only be on one table

Category:
Other

Cause:
User entered an invalid constraint.

Action:
Reenter constraint.

BRW-15175
Table not loaded because all columns are hidden

Category:
Other

Cause:
All columns are hidden. At least one column needs to be displayed.

Action:
Use the Browser Administrator Utility to display hidden columns.

BRW-15188
Query returns 1 row

Category:
Other

Cause:
Status message for 1-row Query Count.

Action:
No action required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15189
Query returns {1} rows

Category:
Other

Cause:
Status message for n-row Query Count.

Action:
No action required.

BRW-15190
Unable to count without executing; Query returns <= {1} row(s)

Category:
Other

Cause:
Status message for n-row Query Count Distinct.

Action:
No action required.

BRW-15192
Illegal format '{1}' for column '{2}'

Category:
Other

Cause:
User typed an unrecognizable format for a display column.

Action:
Try another format.

BRW-15193
Illegal format

Category:
Other

Cause:
User typed an unrecognizable format for a display column

Action:
Try another format.

BRW-15195
Incompatible column type in relationship: {1}

Category:
Other

Cause:
Trying to create illegal relationship.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Column types are incompatible. Refer to the help or documentation for details.

BRW-15196
Error in opening {1} table(s)

Category:
Other

Cause:
Unable to open data tables because database was modified or object does not exist.

Action:
Check your connect string (or contact your DBA).

BRW-15197
Error in restoring position for {1} column(s)

Category:
Other

Cause:
Unable to reposition column because database was modified or object does not exist.

Action:
Check your connect string (or contact your DBA).

BRW-15198
Error in restoring join: {1}

Category:
Other

Cause:
Unable to restore link during open because database was modified or object does not exist.

Action:
Check your connect string (or contact your DBA).

BRW-15199
Error in restoring inclusion state for join: {1}

Category:
Other

Cause:
Unable to set the inclusion state during open because database was modified or object does not exist.

Action:
Check your connect string (or contact your DBA).

BRW-15200
Error in restoring outer join state for join: {1}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Unable to set the outer join during open because database was modified or object does not exist.

Action:
Check your connect string (or contact your DBA).

BRW-15258
Invalid document name: {1}

Category:
Other

Cause:
User entered an invalid document name.

Action:
Enter a valid document name.

BRW-15259
Document exceeds 64K size limit

Category:
Other

Cause:
User attempted to save/open a document larger than 64K.

Action:
Reduce size of document.

BRW-15260
Document {1} does not exist

Category:
Other

Cause:
User specified a nonexistent document.

Action:
Specify another document.

BRW-15261
Document {1} already exists

Category:
Other

Cause:
User tried to save under the name of an existing document.

Action:
Specify another document name or delete the existing document.

BRW-15262
Multiple documents named {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Multiple documents with same name exist.

Action:
Delete all but one.

BRW-15263
Database object {1} already exists

Category:
Other

Cause:
User tried to save under the name of an existing object.

Action:
Specify another document name.

BRW-15264
Table {1} does not exist

Category:
Other

Cause:
Data Table view corresponding to a saved document has been removed.

Action:
Re-save the document (it no longer exists as a query view).

BRW-15265
Table {1} has been removed or modified

Category:
Other

Cause:
Data Table view corresponding to a saved document has been modified.

Action:
Re-save the document.

BRW-15266
File {1} does not exist

Category:
Other

Cause:
User specified a nonexistent file.

Action:
Specify another file.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15267
File {1} already exists

Category:
Other

Cause:
User tried to save under the name of an existing file.

Action:
Specify another file name.

BRW-15268
Unable to open file {1}

Category:
Other

Cause:
I/O core was unable to open a file.

Action:
Specify another file.

BRW-15269
Unable to lock file {1}

Category:
Other

Cause:
I/O core was unable to lock a file.

Action:
Specify another file.

BRW-15270
Error reading file {1}

Category:
Other

Cause:
Operating system error or file was not of the correct format.

Action:
Specify another file.

BRW-15271
Error writing file {1}

Category:
Other

Cause:
Operating system error or I/O core error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Retry operation.

BRW-15272
Obsolete Query Builder document {1}

Category:
Other

Cause:
User attempted to open an old unsupported document.

Action:
Specify another document.

BRW-15273
File {1} is not a Query Builder file

Category:
Other

Cause:
User attempted to open a non-Browser file.

Action:
Specify another file to open.

BRW-15274
File {1} is not a valid SQL file

Category:
Other

Cause:
User attempted to import an invalid SQL file.

Action:
Specify another file to import.

BRW-15275
No data to export or print

Category:
Data

Cause:
User attempted to export or print a query (or region) with no data.

Action:
Specify another region; execute query; change query.

BRW-15277
Unable to overwrite current table {1}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Error in trying to delete/rename old data table in save.

Action:
Fix problem with data table and re-save.

BRW-15278
Document saved, but view {1} could not be created

Category:
Other

Cause:
The query is not a valid view. It has been saved, but not as a database view.

Action:
Redefine query as a valid view, or ignore (query will be saved, but not as a view).

BRW-15279
'{1}' is not a recognized SQL literal

Category:
Other

Cause:
User attempted to import a non-SQLPlus file.

Action:
Specify another file to import.

BRW-15320
Internal I/O core error ({1}, line {2})

Category:
Other

Cause:
Internal State is invalid.

Action:
Contact support.

BRW-15321
Resource not found ({1}).

Category:
Other

Cause:
Resource names do not match Browser code (or file is corrupted).

Action:
Get a correct version of the Browser resource file.

BRW-15322
Resource file not found.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
directory structure incorrect, or file is missing for some reason.

Action:
Locate the resource file (check NLS_LANG file name).

BRW-15323
Query already open in current application ({1})

Category:
Other

Cause:
User attempted to open multiple queries with the same name.

Action:
Specify another file.

BRW-15324
Unable to start up windowing system

Category:
Other

Cause:
Incorrect/missing environment variables (for example, DISPLAY, APIPATH).

Action:
All required environment variables must be set correctly.

BRW-15337
Maximum columns in index is {1}

Category:
Other

Cause:
Maximum columns in index reached.

Action:
Create/modify index with less columns.

BRW-15338
Cannot remove/modify index used to enforce unique/primary key

Category:
Other

Cause:
User tried to remove/modify the index used to enforce unique/primary key.

Action:
First remove/modify primary key or unique key.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15339
Cannot create, modify, or remove index on synonyms

Category:
Other

Cause:
User tried to create, modify, or remove the index for a synonym

Action:
Create, modify, or remove index from base table instead.

BRW-15340
Cannot modify constraints for a synonym.

Category:
Other

Cause:
Modifying constraints of a synonym is not allowed.

Action:
Modify constraint of base data table instead.

BRW-15341
Base table can only be modified after committing duplicated table

Category:
Other

Cause:
User tried to modify a base data table that has been duplicated.

Action:
Commit the duplicated table first.

BRW-15342
Unable to find snapshot information

Category:
Other

Cause:
This database does not support snapshots (or database error).

Action:
Check that you have a snapshot dictionary table.

BRW-15343
Insufficient privileges to use DICTIONARY=NATIVE

Category:
Other

Cause:
You do not have access privileges to use the NATIVE dictionary.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Use DICTIONARY=ENDUSER instead. This can be specified on the command line.

BRW-15344
Insufficient privileges to use DICTIONARY=ENDUSER

Category:
Other

Cause:
You do not have access privileges to use the ENDUSER dictionary

Action:
Use DICTIONARY=NATIVE instead. This can be specified on the command line.

BRW-15345
Cannot load MVIEW$_ or SNAP$_ tables. Load snapshot instead.

Category:
Other

Cause:
Trying to import sql which uses MVIEW$_ or SNAP$_ of snapshot.

Action:
Load the snapshot itself instead.

BRW-15346
Cannot REVOKE privileges you did not grant

Category:
Other

Cause:
User trying to revoke privileges that he/she did not grant.

Action:
The user who grants the privileges should revoke those privileges.

BRW-15347
Cannot grant EXECUTE privilege on tables

Category:
Other

Cause:
Trying to grant EXECUTE privilege on tables.

Action:
EXECUTE privilege is only allowed on packages.

BRW-15348
ALTER, INDEX, REFERENCES, or EXECUTE privileges not allowed on views

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Trying to grant ALTER, INDEX, REFERENCES, or EXECUTE on views.

Action:
This is not allowed.

BRW-15349
Only SELECT privilege is allowed on snapshots

Category:
Other

Cause:
SELECT privilege is only allowed for snapshots.

Action:
Grant only SELECT privilege on snapshots.

BRW-15350
No privileges is allowed for synonyms

Category:
Other

Cause:
Trying to grant privileges on synonyms.

Action:
This is not allowed.

BRW-15351
Insufficient privileges. Operation denied.

Category:
Other

Cause:
User try to perform an operation without sufficient privileges.

Action:
Try again after obtaining proper privileges from your DBA.

BRW-15352
Cannot remove existing table columns

Category:
Other

Cause:
Trying to remove an existing table column.

Action:
This operation is not supported by the database.

BRW-15354
Cannot rename existing table columns

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Trying to rename an existing data table column.

Action:
This action is not supported by the database.

BRW-15355
Cannot change indexed column datatype to LONG

Category:
Other

Cause:
Trying to change an indexed column type to a LONG datatype.

Action:
This action is not supported by the database.

BRW-15356
Removed tables cause referenced synonyms to be removed

Category:
Other

Cause:
User removed some data tables that have synonyms refer to them.

Action:
None. This is a warning that synonyms are removed automatically.

BRW-15357
Error in removing constraint {1}

Category:
Other

Cause:
Error in removing constraint.

Action:
Try again.

BRW-15358
Error in enabling/disabling constraints for {1}

Category:
Other

Cause:
Error in enabling/disabling constraints.

Action:
Try again.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15359
Cannot disable a key referred by a newly created FOREIGN key

Category:
Other

Cause:
Trying to disable a primary or unique key that a foreign key depends upon.

Action:
Commit the foreign key first, then disable.

BRW-15360
Foreign key refers to disabled PRIMARY/UNIQUE key {1}

Category:
Other

Cause:
Foreign key refers to a disabled primary key.

Action:
Enable primary key for the foreign key to be created successfully.

BRW-15361
Error in creating PRIMARY/UNIQUE constraints for {1}

Category:
Other

Cause:
Error in creating PRIMARY/UNIQUE constraints.

Action:
Try again.

BRW-15362
Error in creating FOREIGN constraints for {1}

Category:
Other

Cause:
Error in creating FOREIGN constraints.

Action:
Try again.

BRW-15363
Error in creating CHECK constraints for {1}

Category:
Other

Cause:
Error in creating CHECK constraints.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Try again.

BRW-15364
Length of VARCHAR2 column must be between {1} and {2}

Category:
Other

Cause:
Illegal range for length of VARCHAR2 column.

Action:
Specify a legal length parameter.

BRW-15365
Non-unique INDEX column cannot have PRIMARY/UNIQUE constraint

Category:
Other

Cause:
User tried to create PRIMARY/UNIQUE constraints on a non-unique index.

Action:
Remove the index, and recreate as a unique index.

BRW-15366
PRIMARY/UNIQUE column cannot have non-unique index

Category:
Other

Cause:
Trying to create a non-unique index with PRIMARY/UNIQUE columns.

Action:
Set the index to UNIQUE. Remove and recreate.

BRW-15367
Cannot rename snapshots

Category:
Other

Cause:
User tried to rename a snapshot

Action:
This is not allowed.

BRW-15368
Error in altering snapshot {1}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Internal error.

Action:
Try again.

BRW-15369
Error in creating snapshot {1}

Category:
Other

Cause:
Internal error.

Action:
Try again.

BRW-15370
Cannot add columns to a table duplicated with data

Category:
Data

Cause:
Trying to add columns to an uncommitted data table (duplicated with data).

Action:
Commit first, then add columns

BRW-15371
Comment too long (max {1} bytes)

Category:
Other

Cause:
The comment specified for the data table or column is too long.

Action:
Shorten the comment.

BRW-15372
Cannot set comment for synonym

Category:
Other

Cause:
User tried to create a comment for a synonym.

Action:
Create the comment on the table or view instead.

BRW-15373
Cannot create primary, unique, foreign key, or index on LONG columns

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
These operations cannot be performed on LONG columns.

Action:
Do not attempt to perform this operation.

BRW-15374
Cannot remove tables that are referenced

Category:
Other

Cause:
User tried to remove a table with primary or unique keys that are referenced.

Action:
Remove referencing table first.

BRW-15375
Cannot create index through database link

Category:
Other

Cause:
User tried to create an index through a database link.

Action:
Login directly then create index.

BRW-15376
Cannot create constraint through database link

Category:
Other

Cause:
User tried to create a constraint through a database link.

Action:
Login directly then create constraint.

BRW-15377
Create or remove constraint is only for table

Category:
Other

Cause:
User tried to create or remove a constraint on non-table database object.

Action:
This action is not supported.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15378
Table already removed. Create/remove on constraint ignored

Category:
Other

Cause:
User tried to create or remove a constraint on an already removed table.

Action:
Revert table before further modifying it.

BRW-15379
Primary or unique already exists

Category:
Other

Cause:
Duplicate primary or unique key.

Action:
No action required.

BRW-15380
Foreign key must reference primary or unique key

Category:
Other

Cause:
The specified foreign key does not reference a primary or unique key.

Action:
Make sure the foreign key references a primary or unique key.

BRW-15381
Number of columns mismatch between foreign and primary/unique key

Category:
Other

Cause:
The foreign key does not match the number of columns in the primary or unique key.

Action:
Make sure the number of columns are the same.

BRW-15382
Foreign key already exists

Category:
Other

Cause:
Foreign key already exists.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action required.

BRW-15383
A table can only have one primary key

Category:
Other

Cause:
User tried to specify more than one primary key per table.

Action:
Remove the old primary key and recreate it.

BRW-15384
Cannot remove or modify a keys referenced by foreign keys

Category:
Other

Cause:
Primary or unique key is referenced by foreign keys.

Action:
Remove foreign keys first then remove primary/unique keys.

BRW-15385
Cannot duplicate view from PUBLIC database link as a view

Category:
Other

Cause:
Unable to read SQL statement (LONG column) from PUBLIC database link.

Action:
This action is not supported.

BRW-15386
Circular reference detected in synonym {1}

Category:
Other

Cause:
The synonym has a circular reference in the data dictionary.

Action:
Do not include the particular synonym.

BRW-15387
Login failed

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database or SQLNet error occurred.

Action:
Check the login information and try again.

BRW-15388
Unable to load database relationships

Category:
Other

Cause:
Schema internal error in loading database relationships.

Action:
Contact support if this is not expected.

BRW-15389
Unable to load list of accessible owners

Category:
Other

Cause:
Schema internal error in loading list of accessible owners.

Action:
Contact support if this is not expected.

BRW-15390
Unable to load list of accessible tables

Category:
Other

Cause:
Schema internal error in loading list of data tables.

Action:
Contact support if this is not expected.

BRW-15391
Unable to load table

Category:
Other

Cause:
Schema internal error in loading data table.

Action:
Contact support if this is not expected.

BRW-15392
Unable to load table

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Schema internal error in loading table.

Action:
Contact support if this is not expected.

BRW-15393
Unable to load synonym

Category:
Other

Cause:
Schema internal error in loading synonym.

Action:
Contact support if this is not expected.

BRW-15394
Unable to load query

Category:
Other

Cause:
Schema internal error in loading query.

Action:
Contact support if this is not expected.

BRW-15395
Unable to load table column information

Category:
Other

Cause:
Schema internal error in loading column information.

Action:
Contact support if this is not expected.

BRW-15396
Unable to load synonym column information

Category:
Other

Cause:
Schema internal error in loading synonym column information.

Action:
Contact support if this is not expected.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15397
Unable to load constraints

Category:
Other

Cause:
Schema internal error in loading constraints.

Action:
Contact support if this is not expected.

BRW-15398
Unable to find primary key information

Category:
Other

Cause:
Schema internal error in finding primary keys.

Action:
Contact support if this is not expected.

BRW-15399
Unable to find foreign key information

Category:
Other

Cause:
Schema internal error in finding foreign keys.

Action:
Contact support if this is not expected.

BRW-15400
Unable to load table and column comments

Category:
Other

Cause:
Schema internal error in getting comments.

Action:
Contact support if this is not expected.

BRW-15401
Error in loading database link {1}

Category:
Other

Cause:
Schema internal error in loading database link.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Refer to accompanying error messages for more information.

BRW-15402
Error in loading owner {1}

Category:
Other

Cause:
Schema internal error in loading database link.

Action:
Refer to accompanying error messages for more information.

BRW-15403
Error in loading table {1}

Category:
Other

Cause:
Schema internal error in loading data table.

Action:
Refer to accompanying error messages for more information.

BRW-15404
Error in loading primary key constraint for {1} ({2})

Category:
Other

Cause:
Schema internal error in loading primary constraint.

Action:
Refer to accompanying error messages for more information.

BRW-15405
Error in loading foreign key constraint {1}

Category:
Other

Cause:
Schema internal error in loading foreign constraint.

Action:
Refer to accompanying error messages for more information.

BRW-15406
Error in loading synonym {1}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Schema internal error in loading primary constraint.

Action:
Refer to accompanying error messages for more information.

BRW-15407
Table referred to by synonym {1} no longer exists

Category:
Other

Cause:
User tried to create a synonym for a nonexistent data table.

Action:
Recreate the synonym.

BRW-15408
Error in loading column information for {1}

Category:
Other

Cause:
Oracle error or the data table has been removed.

Action:
Recreate the data table.

BRW-15409
Error in loading constraint information for {1} ({2})

Category:
Other

Cause:
Oracle error.

Action:
Try it again.

BRW-15410
Table that foreign key {1} ({2}) refers to is inaccessible

Category:
Other

Cause:
The table that the foreign key refers to is inaccessible.

Action:
Grant the table to the current user.

BRW-15411
Logout failed

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Internal error in logging out.

Action:
Exit or close the document.

BRW-15412
Table of query {1} was modified. Query loaded as view.

Category:
Other

Cause:
The view that the query depends on has been modified after the last save.

Action:
Open the query and save it again to use it as a data table.

BRW-15413
Table of query {1} was removed. Query will not be loaded.

Category:
Other

Cause:
The view that the query depends on has been removed.

Action:
Open the query, and save it again to use it as a data table.

BRW-15414
Table {1} no longer exists

Category:
Other

Cause:
This data table no longer exists in the database.

Action:
Contact system administrator if you need this table.

BRW-15415
Maximum number (254) of table columns exceeded

Category:
Other

Cause:
User tried to load a data table that has more than 254 columns.

Action:
Contact system administrator.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15416
Maximum number (8192) of tables per user exceeded

Category:
Other

Cause:
User owns too many data tables.

Action:
Contact system administrator.

BRW-15417
Maximum number (1024) of owners and databases exceeded

Category:
Other

Cause:
User tried to load too many user, owner, and database links.

Action:
Contact system administrator.

BRW-15418
Unable to find database link information

Category:
Other

Cause:
This database does not support database link, or database error.

Action:
Try again later if this is unexpected.

BRW-15419
Unable to find synonym information

Category:
Other

Cause:
This database does not support synonyms, or database error.

Action:
Try again later if this is unexpected.

BRW-15420
Unable to find constraint information

Category:
Other

Cause:
This database does not support constraints, or database error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Try again later if this is unexpected.

BRW-15421
Unable to find table comment table

Category:
Other

Cause:
This database does not support comments on table, or database error.

Action:
Try again later if this is unexpected.

BRW-15422
Unable to find table Column comments table

Category:
Other

Cause:
This database does not support comments on column, or database error.

Action:
Try again later if this is unexpected.

BRW-15423
Synonym to SEQUENCE is not currently supported

Category:
Other

Cause:
User tried to load a synonym that refers to a sequence.

Action:
This action is not supported.

BRW-15424
Maximum number of login attempts (3) exceeded

Category:
Other

Cause:
User tried to login too many times.

Action:
Contact system administrator for correct username, password, and connect strings.

BRW-15425
End User Layer dictionary not installed

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The End User Layer meta-data dictionary was not found.

Action:
Install the End User Layer dictionary or run with DICTIONARY=NATIVE option.

BRW-15430
Index information not loaded

Category:
Other

Cause:
Cannot find index table.

Action:
This is a non-Oracle database; try an ODBC driver.

BRW-15433
Create snapshot with only {1} maximum columns.

Category:
Other

Cause:
User tried to create more than the maximum number of allowed columns in a snapshot.

Action:
Create fewer columns.

BRW-15434
Maximum columns in table is {1}

Category:
Other

Cause:
User tried to create more than the maximum number of allowed columns in a table.

Action:
Create fewer columns.

BRW-15435
DBA privilege is needed to perform this operation

Category:
Other

Cause:
Need DBA privileges.

Action:
Ask your system administrator to grant you DBA privilege.

BRW-15437
Index already exists

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
User tried to create an index that is the same as an already existing index.

Action:
No action required.

BRW-15438
Index must be on columns from the same table

Category:
Other

Cause:
user tried to create an index on columns from different tables.

Action:
Create the index on columns from the same table.

BRW-15439
Cannot create new tables through database links

Category:
Other

Cause:
User tried to create data tables through database links.

Action:
This operation is not allowed. Login directly then create.

BRW-15440
New columns cannot be created through database links

Category:
Other

Cause:
User tried to create columns through database links.

Action:
This operation is not allowed. Login directly and create.

BRW-15441
User has no CREATE INDEX privilege

Category:
Other

Cause:
User tried to create an index on data table without proper privileges

Action:
Obtain CREATE INDEX privilege on this data table.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15444
Adding columns is only supported for tables

Category:
Other

Cause:
User tried to add columns to a view, snapshot, synonym, or query.

Action:
This operation is not allowed.

BRW-15445
Cannot remove columns of synonyms, duplicated views or snapshots

Category:
Other

Cause:
User tried to remove columns from a view, snapshot, synonym, or query.

Action:
This operation is not allowed.

BRW-15446
Unable to copy constraints for {1}

Category:
Other

Cause:
Error duplicating constraints.

Action:
No action required.

BRW-15447
Cannot remove Query. Use File Delete... from Query window

Category:
Other

Cause:
User tried to remove a query.

Action:
This is not legal from the Schema Builder. Use the Query window instead.

BRW-15448
Cannot copy Query. Use File Save As... from Query window

Category:
Other

Cause:
User tried to copy a query.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
This is not legal from the Schema Builder. Use the Query window instead.

BRW-15449
Cannot copy with data from table with only LONG columns

Category:
Data

Cause:
User tried to copy a table with a LONG column.

Action:
Database does not support this.

BRW-15450
Operation not allowed on removed table

Category:
Other

Cause:
User tried to do something to a removed data table.

Action:
Undo the remove first.

BRW-15451
Operation not allowed on removed column

Category:
Other

Cause:
User tried to do something to a removed column.

Action:
Undo the remove first.

BRW-15452
Cannot rename another owner's table

Category:
Other

Cause:
User tried to set the name of a granted data table.

Action:
This is not allowed. Ask the owner to do it for you.

BRW-15453
Cannot rename table at database link

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
User tried to set the name on a data table at a database link.

Action:
Ask the owner to do this for you.

BRW-15454
Renaming columns is only supported on table and view columns

Category:
Other

Cause:
User tried to set column name for a snapshot, synonym, or query.

Action:
This is not allowed.

BRW-15455
Setting column type is only supported on table columns

Category:
Other

Cause:
User tried to set column type for a view, snapshot, synonym, or query.

Action:
This is not allowed.

BRW-15456
Cannot change column type of an existing column

Category:
Other

Cause:
User tried to change column type of an existing column.

Action:
This is not allowed.

BRW-15457
Default values are allowed only on table columns

Category:
Other

Cause:
User tried to set default for a synonym, snapshot, view, or query.

Action:
This is not allowed.

BRW-15458
Setting length is supported only on table columns

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
User tried to set length for a synonym, snapshot, view, or query.

Action:
This is not allowed.

BRW-15459
Cannot set length for DATE, LONG, or ROWID datatypes

Category:
Other

Cause:
User tried to set the length for DATE, LONG, or ROWID datatypes.

Action:
This is not allowed.

BRW-15460
Setting scale is allowed only on table columns

Category:
Other

Cause:
User tried to set scale for synonym, snapshot, view, or query columns.

Action:
This is not allowed.

BRW-15461
Cannot set scale for DATE, LONG, or ROWID datatypes

Category:
Other

Cause:
User tried to set scale for DATE, LONG, or ROWID columns.

Action:
This is not allowed.

BRW-15462
Setting precision is allowed only on table columns

Category:
Other

Cause:
User tried to set precision for synonym, snapshot, view, or query columns.

BRW-15523
Mismatched parentheses in '{1}' command

Category:
Other

Cause:
User entered mismatched parentheses in the command line.

Action:
Correct mismatched parentheses.

BRW-15530
Cannot edit a deleted row

Category:
Other

Cause:
User tried to edit a row which is marked for deletion.

Action:
Undelete the row first.

BRW-15531
Row has been deleted from the database

Category:
Other

Cause:
Another user deleted this row since you last ran the query.

Action:
Contact support. This should never happen.

BRW-15532
Row has been modified by another user. Requery.

Category:
Other

Cause:
Another user updated this row since you last ran the query.

Action:
Try again.

BRW-15533
Row is currently locked by another user.

Category:
Other

Cause:
Someone else is editing this row.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Try again later.

BRW-15539
Error in inserting {1} row(s)

Category:
Other

Cause:
One or more rows in input file failed on insert.

Action:
Modify input file or ignore.

BRW-15540
Operation not allowed on data of this type

Category:
Data

Cause:
User tried to edit a cell with data of an uneditable type.

Action:
Unknown.

BRW-15541
Too many edited rows. Please select Commit

Category:
Other

Cause:
Too many pending INSERTS, UPDATES or DELETES in a document.

Action:
Select Commit or Revert.

BRW-15545
Error in reading QXF file. Parsing halted.

Operator unspecified in relationship block.

Category:
Other

Cause:
Operator unspecified in relationship block in QXF File.

Action:
Specify an operator field within the block.

BRW-15548
Error: Argument missing in {1} of relationship block.

Category:
Other

Cause:
No argument in a column field in a relationship block. No argument in the CONDITION_TEXT field within condition block.

Action:
Specify the column name in that field. Specify the CONDITION_TEXT field.

BRW-15550
Illegal INCLUSION_ORDER value ({1}) in expression {2}.

Category:
Other

Cause:
Illegal INCLUSION_ORDER value in expression.

Action:
Correct INCLUSION_ORDER value.

BRW-15551
Expression {1} included but INCLUSION_ORDER unspecified.

Category:
Other

Cause:
The INCLUSION_ORDER unspecified for an included expression block.

Action:
Specify the INCLUSION_ORDER field.

BRW-15552
Expression {1} not included but INCLUSION_ORDER is non-null

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Expression is not included (INCLUDED = FALSE) but INCLUSION_ORDER is non-null.

Action:
Correct the values in these fields.

BRW-15553
Error: Empty TEXT string in expression {1}.

Category:
Other

Cause:
The TEXT string is unspecified within a QXF expression block.

Action:
Specify the TEXT string.

BRW-15554
Error: SORT_PRIORITY unspecified for sorted expression {1}.

Category:
Other

Cause:
SORT_PRIORITY unspecified for sorted expression.

Action:
Specify the SORT_PRIORITY.

BRW-15555
Illegal INCLUSION_ORDER value for field {1}in table {2}.

Category:
Other

Cause:
Illegal INCLUSION_ORDER value for field.

Action:
Correct the INCLUSION_ORDER value.

BRW-15556
Field {1} in table {2} included but INCLUSION_ORDER is null.

Category:
Other

Cause:
Field is included (INCLUDED = FALSE) but INCLUSION_ORDER is unspecified.

Action:
Correct the values in these fields.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15557
Field {1} (table {2}) excluded but INCLUSION_ORDER exists.

Category:
Other

Cause:
The field in specified data table is not included but the INCLUSION_ORDER is non-null.

Action:
Correct the values in these fields.

BRW-15558
SORT_PRIORITY unspecified for sorted field {1} in table {2}.

Category:
Other

Cause:
SORT_PRIORITY unspecified for a sorted field.

Action:
Specify the SORT_PRIORITY for that field.

BRW-15559
Error: Illegal value ({1}) for INCLUSION_ORDER in table {2}.

Category:
Other

Cause:
A negative value in inclusion order.

Action:
Correct that value.

BRW-15560
Table {1} included but INCLUSION_ORDER unspecified.

Category:
Other

Cause:
Data Table included (INCLUDED = TRUE) but INCLUSION_ORDER is unspecified.

Action:
Correct the values in these fields.

BRW-15561
Table {1} is excluded but INCLUSION_ORDER is non-null.

Category:
Other

Cause:
Data Table not included (INCLUDED = FALSE) but INCLUSION_ORDER is non-null.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the values in these fields.

BRW-15562
Error: There should be no more than one main condition block.

Category:
Other

Cause:
There are more than one main (root) condition blocks.

Action:
Eliminate some condition blocks, or use a conjunction.

BRW-15563
Error: QXF file version 1.0 expected.

Category:
Other

Cause:
Illegal version number specified in VERSION field.

Action:
Modify the version.

BRW-15564
Parse Error: Line {1}: Invalid font style {2}.

BRW-15911
Time period {1} already exists

Category:
Other

Cause:
Time period name must be unique.

Action:
Create time period under a different name.

BRW-15912
Illegal display width value.

Category:
Other

Cause:
Illegal display width value.

Action:
Re-enter a legal value.

BRW-15913
{1} key text cannot be empty.

Category:
Other

Cause:
Foreign or Primary Key text is empty.

Action:
Enter text for primary or foreign key.

BRW-15914
Relationship name cannot be empty.

Category:
Other

Cause:
Relationship name is null.

Action:
Enter relationship name.

BRW-15924
Business area name cannot be empty

Category:
Other

Cause:
Business area name is empty or contains only spaces.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Enter a new name.

BRW-15925
Table {1} has already been imported as {2}

Category:
Other

Cause:
Table can only be imported once with a given name.

Action:
Import table under a different name.

BRW-15926
Business area {1} already exists

Category:
Other

Cause:
Business area name must be unique.

Action:
Create business area under a different name.

BRW-15927
Business area {1} already contains a table named {2}

Category:
Other

Cause:
Table name must be unique within a business area.

Action:
Rename/reimport table and add to business area.

BRW-15928
Business area name too long (Max {1} bytes)

Category:
Other

Cause:
Business area name too long.

Action:
Shorten the name and try again.

BRW-15929
Business area description too long (Max {1} bytes)

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Business area description too long.

Action:
Shorten the description and try again.

BRW-15930
Error committing table {1}

Category:
Other

Cause:
Error occurred while committing table.

Action:
Try again.

BRW-15931
Error committing business area {1}

Category:
Other

Cause:
Error occurred while committing business area.

Action:
Try again.

BRW-15932
Error committing time period {1}

Category:
Other

Cause:
Error occurred while committing time period.

Action:
Try again.

BRW-15933
Error committing relationship {1}

Category:
Other

Cause:
Error occurred while committing relationship

Action:
Try again.

BRW-15937
Error generating SQL for table {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Error occurred while generating SQL for a table.

Action:
Try again.

BRW-15938
Error generating SQL for business area {1}

Category:
Other

Cause:
Error occurred while generating SQL for a business area.

Action:
Try again.

BRW-15939
Error generating SQL for time period {1}

Category:
Other

Cause:
Error occurred while generating SQL for a time period.

Action:
Try again.

BRW-15940
Error generating SQL for relationship {1}

Category:
Other

Cause:
Error occurred while generating SQL for relationship.

Action:
Try again.

BRW-15950
No Query Builder tables--Database open/save is disabled

Category:
Other

Cause:
There is no Query Builder system query table in the database.

Action:
Create a system query table (run the Query Builder install script).

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-15951
Product user profile information not loaded

Category:
Other

Cause:
Cannot load the user profile table.

Action:
Ask system administrator to create one.

BRW-15952
User privilege table not loaded

Category:
Other

Cause:
Missing USER_USERS table (Non Oracle or oracle V7 database).

Action:
None available.

BRW-15953
Table privilege table not loaded

Category:
Other

Cause:
Cannot find Privilege table.

Action:
Non-Oracle database or Oracle V7 database.

BRW-15954
Oracle Query Builder 2.5 tables are missing or not installed properly

Category:
Other

Cause:
No BROWSER_DOCS_SQL table.

Action:
Re-install Query Builder 2.5 tables.

BRW-15955
Query returned zero rows

Category:
Other

Cause:
Query returned no rows.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Modify the query so that it requests data that exists in the database.

BRW-16000
Document saved using End User Layer, not Native dictionary. Continue?

Category:
Other

Cause:
User tried to open in Native mode a document saved using the End User Layer.

Action:
Run with DICTIONARY=ENDUSER or End User Layer objects will be inaccessible.

BRW-16001
Document saved using Native dictionary, not End User Layer. Continue?

Category:
Other

Cause:
User tried to open in ENDUSER mode a document saved using the Native dictionary.

Action:
Run with DICTIONARY=NATIVE or some database objects may be inaccessible.

BRW-16250
Document already exists. Do you want to overwrite?

Category:
Other

Cause:
User tried to Save As over an existing document.

Action:
User may overwrite or cancel.

BRW-16251
Table has been modified. Continue?

Category:
Other

Cause:
View was removed and recreated; may be inconsistent with document.

Action:
Either continue or abort save.

BRW-16500
Memory not available for local sort. Re-execute?

Category:
Memory

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
All rows not yet fetched for local sort.

Action:
Re-execute query now or later.

BRW-16503
Data not available for local sort. Re-execute?

Category:
Data

Cause:
All rows not yet fetched for local sort.

Action:
Re-execute query now or later.

BRW-16504
Data not available for local break. Re-execute?

Category:
Data

Cause:
All rows not yet fetched for local break.

Action:
Re-execute query now or later.

BRW-16525
Query may require a Cartesian product. Continue?

Category:
Other

Cause:
Query combines results of unrelated tables.

Action:
Ignore message or relate tables before executing. Refer to help or documentation for details.

BRW-16531
Redefine parameter {1}?

Category:
Other

Cause:
User entered previously deleted parameter in expression or condition.

Action:
Press OK if this is what you intended.

BRW-16532
Parameter {1} does not exist. Define?

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
User entered new parameter in expression or condition.

Action:
Press OK if this is what you intended.

BRW-16549
Revert will undo all changes on these tables. Revert anyway?

Category:
Other

Cause:
Confirmation before reverting data tables.

Action:
Select OK to revert all selected data tables, Cancel to cancel the operation.

BRW-16550
Table %s has primary/unique keys that are referenced. Remove?

Category:
Other

Cause:
Table contains constraints.

Action:
Select OK to remove the data table, Cancel to cancel the operation.

BRW-16551
Column has primary/unique keys or indexes. Remove anyway?

Category:
Other

Cause:
Column is used by constraints or indexes.

Action:
Select OK to remove the column, Cancel to cancel the operation.

BRW-16552
Disable all constraints?

Category:
Other

Cause:
Message to confirm that all constraints should be disabled.

Action:
User may confirm or cancel.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-16553
Enable all constraints?

Category:
Other

Cause:
Message to confirm that all constraints should be enabled.

Action:
User may confirm or cancel.

BRW-16575
There are uncommitted edits which will be lost. Commit?

Category:
Other

Cause:
User has tried to exit the Data Editor without committing changes.

Action:
Select Commit or lose changes.

BRW-16576
Defined Column, Summary or Break values may not be current. Re-execute?

Category:
Other

Cause:
Values edited while displaying breaks, summaries, or defined columns.

Action:
Execute query to update values.

BRW-16620
Save changes to query document '%s'?

Category:
Other

Cause:
Message to prompt user to save changes when closing/quitting.

Action:
User may save or abort changes, or cancel.

BRW-16621
Revert to previously saved version of document '%s'?

Category:
Other

Cause:
Message to prompt user to revert to older document version.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
User may continue or cancel operation.

BRW-16622
File %s already exists. Do you want to overwrite?

Category:
Other

Cause:
Message for overwrite alert in export data.

Action:
User may overwrite file or cancel.

BRW-16623
There is no data available for this operation.

Category:
Data

Cause:
Alert message if number of rows or columns available to print is zero.

Action:
User should try re-executing the query, or include some columns.

BRW-16624
Query definition has changed. Data may not be current. Continue?

Category:
Data

Cause:
Query document has changed since last execute.

Action:
Either re-execute the query, continue export, or cancel.

BRW-16625
The printer does not support all fonts needed. Substitute fonts?

Category:
Other

Cause:
The font or some style or weight does not exist for the selected printer.

Action:
User may continue with font substitution or cancel.

BRW-16626
Not enough memory for Print Preview.

Category:
Memory

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Unable to create bitmap for print preview.

Action:
No action required.

BRW-16627
There is no data available for this operation. Execute query?

Category:
Data

Cause:
Alert message if export data called with empty worksheet.

Action:
User should try executing the query or cancel.

BRW-16628
Unable to get printer device. Printing will be unavailable. Continue?

Category:
Other

Cause:
Error creating a toolkit printer surface with uiprc().

Action:
User may continue with no printing or cancel.

BRW-16629
Do you want to update the container before exiting?

Category:
Other

Cause:
Message to prompt user to save changes when closing/quitting OLE doc.

Action:
User may save or abort changes, or cancel.

BRW-16632
No SQL is available because no columns were selected. Quit?

Category:
Other

Cause:
Message to alert user that so sql statement was created.

Action:
User may exit or continue in query builder.

BRW-16650
The printer does not support all fonts needed. Substitute fonts?

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The font or some style or weight does not exist for the selected printer.

Action:
User may continue with font substitution or cancel.

BRW-16651
No printer has been chosen. Use Default?

Category:
Other

Cause:
The user has not explicitly named a printer to use.

Action:
User may continue with the system default printer or cancel.

BRW-16652
Margins for this document are too wide and must be reset.

Category:
Other

Cause:
The user has set the margins to be too large leaving no content.

Action:
User must reset the margins.

BRW-16653
No printer has been chosen. Use Default?

Category:
Other

Cause:
The user has not explicitly named a printer to use.

Action:
User may continue with the system default printer or cancel.

BRW-16654
No pages printed.

Category:
Other

Cause:
User has set copies to 0 or the start/end page outside the range.

Action:
Reset page range.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-16660
Query definition has changed. Data may not be current. Re-execute?

Category:
Data

Cause:
Query document has changed since last DDE update.

Action:
Re-execute the query before DDE update, or update without executing.

BRW-16661
Commit changes to %s?

Category:
Other

Cause:
Message to prompt user to commit changes when closing Schema Builder.

Action:
User may commit or abort changes, or cancel.

BRW-16767
Abandon current parameter settings and cancel query?

Category:
Other

Cause:
In parameters dialog, ask user before cancelling settings.

Action:
User may continue the cancel or return to the dialog.

BRW-16776
Apply settings before closing dialog?

Category:
Other

Cause:
Asks user if settings changes should be committed before close.

Action:
User may apply the changes or exit without committing those changes.

BRW-16780
Cannot paste condition on LONG column.

Category:
Other

Cause:
Cannot paste a condition on a long column from the find dialog.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
This action is not supported.

BRW-16807
Accept the definition for the new business area?

Category:
Other

Cause:
Business Area Define - validate Complete NEW business area

Action:
Accept or cancel

BRW-16808
Cancel the incomplete definition for the new business area?

Category:
Other

Cause:
Business Area Define - validate Incomplete NEW business area

Action:
Confirm or cancel

BRW-16809
Accept the modified business area definition?

Category:
Other

Cause:
Business Area Define - validate MODified business area

Action:
Confirm or cancel

BRW-16810
Accept the definition for the new column?

Category:
Other

Cause:
Data Table Expressions - validate Complete NEW expression

Action:
Confirm or cancel

BRW-16811
Cancel the incomplete definition for the new column?

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Data Table Expressions - validate Incomplete NEW expression

Action:
Confirm or cancel

BRW-16812
Accept the modified column definition?

Category:
Other

Cause:
Data Table Expressions - validate MODified expression

Action:
Confirm or cancel

BRW-16813
Accept the definition for the new relationship?

Category:
Other

Cause:
Data Table Relationships - validate Complete NEW relationship

Action:
Confirm or cancel

BRW-16816
Accept the changes to the column's format options?

Category:
Other

Cause:
Data Table Format - validate MODified format options

Action:
Confirm or cancel

BRW-16817
Commit changes?

Category:
Other

Cause:
User tries to quit with uncommitted changes

Action:
Confirm or cancel

BRW-16833
Rollback all changes?

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Confirmation before rollback

Action:
OK to rollback all changes. Cancel to cancel operation.

BRW-16837
Business area description cannot be empty.

Category:
Other

Cause:
Business area description is null.

Action:
Enter a description.

BRW-16840
Business area name cannot be empty.

Category:
Other

Cause:
Business area name is null.

Action:
enter a name

BRW-16841
Time period definition is incomplete.

Category:
Other

Cause:
Some time period attributes have not been specified.

Action:
Complete the time period definition.

BRW-16852
User is already imported. Reimport?

Category:
Other

Cause:
User has already been imported.

Action:
Confirm or cancel reimport.

Copyright © 2000, 2026, Oracle and/or its affiliates.

BRW-16961
Document '%s' has unsaved publishers.

Category:
Other

Cause:
Message (1 of 2) to prompt user to save changes on close/quit.

Action:
User may save or abort changes, or cancel.

BRW-16962
They will be lost unless the document is saved.

Category:
Other

Cause:
Message (2 of 2) to prompt user to save changes on close/quit

Action:
User may save or abort changes, or cancel.

BRW-16965
Memory is low. Close open documents or restart with more memory.

Category:
Memory

Cause:
Low memory (<1MB)

Action:
Close extra documents, restart with more memory

BRW-16966
Out of memory. Restart application with a larger memory size.

Category:
Memory

Cause:
No memory

Action:
Close extra documents, restart with more memory

BRW-16967
This application requires System 7.0 or higher.

Category:
Other

Cause:
Operating System version is lower than 7.0

CAPTURE-10000 to CAPTURE-10165

CAPTURE-10000
Initializing Capture

Category:
Other

Cause:
The capture application is starting.

Action:
No action required.

CAPTURE-10001
Error creating Batch Item

Category:
Other

Cause:
The user tried adding an item to the batch.

Action:
Make sure there is no problem accessing the database.

CAPTURE-10002
Error committing documents

Category:
Other

Cause:
There was a problem updating the commited column of the document record.

Action:
Make sure the database is accessible and that the user has proper permission to the database tables.

CAPTURE-10003
Error creating workspace

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CAPTURE-10004
Error updating workspace

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10005
Error deleting workspace

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10006
Error loading workspaces

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10007
Error creating index definition

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10008
Error loading index definitions

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10009
Error updating index definition

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10010
Error deleting index definition

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10011
Error locating capture object

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10012
Error locating capture object children

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CAPTURE-10013
Error loading capture objects

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10014
Error creating batch

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10015
Error updating batch

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10016
The batch lock is no longer valid

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10017
Error deleting batch

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10018
Error finding batch by id

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10019
Error finding batch item by id

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10020
Error loading batches

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10021
Error loading batches by user and workstation

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CAPTURE-10022
Error loading batches by user

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10023
Error loading locked batches by user

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10024
Error loading locked batches by workstation

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10025
Error loading locked batches by user and workstation

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10026
Error loading batch items

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10027
Error deleting batch item

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10028
The batch is already locked by ?1 on workstation ?2

Category:
Other

Cause:
The batch is locked by another user

Action:
The batch must be unlocked before it can be locked by somone else

CAPTURE-10029
Error locking batch

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10030
The specified batch has not been persisted or has been deleted by another user.

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CAPTURE-10031
Error unlocking batch

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10032
Error creating batch name

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10033
Error creating document

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10034
Error creating db return field

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10035
Error creating db search field

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10036
Error creating db search profile

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10037
Error loading documents

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10038
Error deleting document

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10039
Error loading documents

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CAPTURE-10040
Error linking item to document

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10041
Error unlinking item from document

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10042
Error locating datasource

Category:
Other

Cause:
The data source could not be found

Action:
Ensure the database connection is configured properly and the database is accessible

CAPTURE-10043
Error generating batch id

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10044
Error creating log record

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10045
Error updating capture object

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10046
Error saving database search profile

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10047
Error deleting object child entities

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10048
Error deleting capture object entity

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10049
Error loading search profile

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10050
Error loading search profiles

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10051
Error deleting search profile

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10052
Error loading search fields

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10053
Error loading return fields

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10054
Error deleting return field

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10055
Error deleting search field

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10056
Error saving search field

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10057
Error saving return field

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CAPTURE-10058
Error loading database schemas

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10059
Error loading database table fields

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10060
Error loading database tables

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10061
Error executing database lookup

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10062
Error saving document

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10063
Error testing lock

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10064
Error creating extension profile

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10065
Error loading extension profiles

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10066
Error updating extension profile

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CAPTURE-10067
Error deleting extension profile

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10068
Error searching for extension profile

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10069
Error getting batch number

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10070
Error requesting session information

Category:
Other

Cause:
Application configuration error

Action:
The application configuration is invalid or incomplete. Ensure the application is properly configured

CAPTURE-10071
Error moving document pages

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10072
Error splitting document

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10073
Error deleting document pages

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10074
Error creating documents

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10075
Error deleting documents

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CAPTURE-10076
Error inserting into documents

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10077
Error searching database

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10078
Error creating bundle entity

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10079
Error loading installed bundles

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10080
Error loading installed bundles by name and version

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10081
Error deleting bundle

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10082
Error updating bundle

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10083
Error during bundle lookup

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10084
Error finding bundle by interface name

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CAPTURE-10085
Error scanning for bundles

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10086
Error creating script

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10087
Error loading scripts for product

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10088
Error updating script

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10089
Error deleting script

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10090
Error loading script

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10091
Error loading picklist source

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10092
Error loading picklist link profiles

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10093
Error updating picklist source

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CAPTURE-10094
Error creating picklist source

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10095
Error deleting picklist source

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10096
Error loading picklist drivers

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10097
Error finding picklist source

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10098
Error loading picklists

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10099
Error creating picklist

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10100
Error updating picklist

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10101
Error deleting picklist

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10102
Error creating picklist item

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CAPTURE-10103
Error loading picklist items

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10104
Error updating picklist items

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10105
Error deleting picklist item

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10106
Error creating picklist link profile

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10107
Error loading picklist profile links

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10108
Error updating picklist link profile

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10109
Error deleting picklist link profile

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10110
Error deleting profile links

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10111
Error linking item to list

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CAPTURE-10112
Error unlinking item from list

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10113
Error finding item link

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10114
Error creating Commit Profile

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10115
Error loading Commit Profiles

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10116
Error updating Commit Profile

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10117
Error deleting Commit Profile

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10118
Error deleting batch statuses for workspace

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10119
Error deleting index definitions for workspace

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10120
Error deleting batch status from workspace

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CAPTURE-10121
A JMS Error has occurred

Category:
Other

Cause:
Diskspace capacity may have been reached.

Action:
Check the disk space capacity and increase as needed.

CAPTURE-10122
Error creating commit profile

Category:
Other

Cause:
The required batch processor could not be created.

Action:
Contact the system administrator.

CAPTURE-10123
Failed to load document types

Category:
Other

Cause:
Database connectivity failure.

Action:
Contact the system administrator.

CAPTURE-10124
The commit driver's configuration is invalid

Category:
Other

Cause:
The commit driver configuration has missing or invalid information

Action:
Verify the configuration settings in the Workspace Management Console.

CAPTURE-10126
Unknown commit error

Category:
Other

Cause:
An unexpected excption was encountered processing the document. This is usually caused by an unhandled exception in the commit driver or export driver.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify the configuration settings in the Workspace Management Console.

CAPTURE-10127
The import processor context must contain a valid DocumentEntity reference

Category:
Other

Cause:
The Import Job may not be properly configured.

Action:
Verify the configuration settings in the Workspace Management Console.

CAPTURE-10128
The import source file is null in the Import Context

Category:
Other

Cause:
The data being imported could not be found.

Action:
Ensure that the Import Processor has privileges to the source file

CAPTURE-10129
The HA token was not found in the import processor context

Category:
Other

Cause:
The Import Processor Context HA Token was missing.

Action:
Ensure that the database server is running.

CAPTURE-10130
The specified workspace could not be found

Category:
Other

Cause:
The Import Processor Context HA Token was missing.

Action:
Ensure that the database server is running.

CAPTURE-10131
Batch [{0}] was successfully locked by user [{1}] batch id is [{2}]

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The batch was successfully locked by a user.

Action:
No action required.

CAPTURE-10132
Failed to deliver email

Category:
Other

Cause:
Unable to send email.

Action:
Use the Enterprise Manager to ensure that the Email server settings are correct.

CAPTURE-10133
Error copying workspace

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10134
Commit profile [{0}] does not specifiy a commit driver.

Category:
Other

Cause:
Commit profile configuration problem

Action:
Ensure the specified commit profile has a commit driver specified.

CAPTURE-10135
Commit profile [{0}] does not specifiy an export driver.

Category:
Other

Cause:
Commit profile configuration problem

Action:
Ensure the specified commit profile has an export driver specified.

CAPTURE-10136
Commit profile [{0}] specifies a commit driver that could not be found on the system.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The commit driver specified in the commit profile could not be found.

Action:
Ensure the specified commit driver is properly installed or edit the commit profile and select a different commit driver.

CAPTURE-10137
Commit profile [{0}] specifies an export driver that could not be found on the system

Category:
Other

Cause:
The export driver specified in the commit profile could not be found.

Action:
Ensure the specified export driver is properly installed or edit the commit profile and select a different export driver.

CAPTURE-10138
Unable to create the export directory.

Category:
Other

Cause:
The export driver specified in the commit profile could not be found.

Action:
Ensure the specified export driver is properly installed or edit the commit profile and select a different export driver.

CAPTURE-10139
The following required fields do not have values: [{0}]

Category:
Other

Cause:
Document is missing one or more required fields.

Action:
Ensure all required fields are indexed.

CAPTURE-10140
The batch was routed to a processing job that could not be found

Category:
Other

Cause:
The batch was routed to a job that was not found. The job may have been deleted.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the specified job exists.

CAPTURE-10141
The batch was routed to a processing job that is currently offline

Category:
Other

Cause:
The batch was routed to a job that is in an offline state.

Action:
The job needs to be put in an online state by someone with the required permissions

CAPTURE-10142
A workspace by the specified name already exists.

Category:
Other

Cause:
The user tried to create a workspace using a name that already exists.

Action:
The user should try again using a unique name.

CAPTURE-10143
Error loading locked batches for the specified workspace id

Category:
Other

Cause:
An invalid workspace id was specified or the specified workspace id does not exist.

Action:
Ensure a valid workspace id was specified.

CAPTURE-10144
Method access violation. User {0} attempted to invoke a method they are not authorized to access.

Category:
Other

Cause:
An invocation was made on a method to which the subject was not permitted access.

Action:
Ensure the subject is a member of a secuirity role with permission to invoke the method.

CAPTURE-10145
Unable to send a broadcast email. The SMTP Server connection information is incomplete.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The SMTP server connection information is incomplete

Action:
Use Fusion Middleware Control to configure the SMTP Connection information.

CAPTURE-10146
Document contains no pages.

Category:
Other

Cause:
The document contains no pages

Action:
Review the batch in the capture client and check the system logs for more information.

CAPTURE-10148
Generic commit error.

Category:
Other

Cause:
An error occurred during commit process.

Action:
Check previous log entries for error detail.

CAPTURE-10149
Error duplicating documents.

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database..

CAPTURE-10150
Document Id does not exist.

Category:
Other

Cause:
A document ID was specified but was not found in the database. The document may have been deleted.

Action:
Ensure that the specified document ID exists.

CAPTURE-10151
Index Field [{0}] of Document [{1}] was assigned invalid value [{2}]

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
An attempt was made to save a document containing an invalid field value. The field may have contained an unprintable character.

Action:
Ensure that only valid printable characters are assigned to document index fields.

CAPTURE-10152
Error loading Import Processor HA Tokens.

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10153
Error loading document type attachment types

Category:
Other

Cause:
Database connectivity failure.

Action:
Contact the system administrator.

CAPTURE-10154
The following required attachment types were not found :[{0}]

Category:
Other

Cause:
Document is missing one or more required attachment types.

Action:
Ensure all required attachment types are provided.

CAPTURE-10155
The source document ID was not found.

Category:
Other

Cause:
The source document ID was not found.

Action:
Ensure document id exists in database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CAPTURE-10156
An invalid document break point was specified.

Category:
Other

Cause:
An invalid document break point was specified.

Action:
Ensure valid document break point is specified.

CAPTURE-10157
Parent document not found.

Category:
Other

Cause:
Parent document not found.

Action:
Ensure parent document exists.

CAPTURE-10158
The specified database search field is not valid.

Category:
Other

Cause:
The specified database search field is not valid.

Action:
Ensure database search field is valid..

CAPTURE-10159
The specified database search profile is not valid

Category:
Other

Cause:
The specified database search profile is not valid.

Action:
Ensure database search profile is valid.

CAPTURE-10160
The specified workspace is not valid

Category:
Other

Cause:
The specified workspace is not valid

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure workspace is valid.

CAPTURE-10161
The specified source could not be found.

Category:
Other

Cause:
The specified source could not be found.

Action:
Ensure choice list source is valid.

CAPTURE-10162
The source does not specify a valid picklist driver.

Category:
Other

Cause:
The source does not specify a valid picklist driver.

Action:
Ensure choice list driver is valid.

CAPTURE-10163
The driver specified in the source could not be found.

Category:
Other

Cause:
The driver specified in the source could not be found.

Action:
Ensure choice list driver is valid.

CAPTURE-10164
Error copying document pages.

Category:
Other

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

CAPTURE-10165
The specified source could not be found.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Database connectivity issue.

Action:
Ensure the database is accessible and the specified user has the necessary permissions to the database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Configuration

Cause:
The "JMS" configuration in your domain is invalid.

Action:
Correct the configuration.

CFGFWK-40320
Invalid "Security" configuration.

Category:
Configuration

Cause:
The "Security" configuration in your domain is invalid.

Action:
Correct the configuration.

CFGFWK-40321
Configuration port conflict.

Category:
Configuration

Cause:
Duplicate Server listen ports exist in your domain configuration: {0}

Action:
Change conflicting ports.

CFGFWK-40322
External port conflict.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Server listen ports in your domain configuration conflict with ports in use by active processes on this host: {0}

Action:
Change conflicting ports.

CFGFWK-40323
Invalid configuration.

Category:
Configuration

Cause:
A section of configuration in your domain is invalid.

Action:
Correct the configuration.

CFGFWK-40324
Invalid "JMS" configuration.

Category:
Configuration

Cause:
JMSDestination's JNDI names are not unique in same target.

Action:
Correct the configuration.

CFGFWK-40325
Invalid "JDBC" configuration.

Category:
Configuration

Cause:
JDBC JNDI names are not unique in the same target.

Action:
Correct the configuration.

CFGFWK-40326
Invalid coherence server address.

Category:
Configuration

Cause:
At least one server in a Coherence cluster should have non localhost address.

Action:
Enter a non localhost listen address for at least one Coherence server.

CFGFWK-40327
Non supported configuration for restricted mode exists.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Non supported configuration for restricted mode like config mapping exists.

Action:
Restricted templates should not include non supported configuration.

CFGFWK-40865
The text in the file has changed.

Category:
Configuration

Cause:
This file has been modified in the editor, discard changes?

Action:
Confirm to discard the changes.

CFGFWK-40866
Discard previous changes.

Category:
Configuration

Cause:
Discard previously saved changes?

Action:
Confirm to discard changes.

CFGFWK-40867
Discard the changes.

Category:
Configuration

Cause:
Edited file has been modified, discard changes?

Action:
Confirm to discard changes.

CFGFWK-40868
No system component instance

Category:
Configuration

Cause:
You have not created any system component.

Action:
Create a system component.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-40891
A Custom directory doesn't contain valid JDK.

Category:
Configuration

Cause:
Unable to determine if the specified directory contains a valid JDK.

Action:
Specify a directory with valid JDK.

CFGFWK-40893
Invalid JDK Version.

Category:
Configuration

Cause:
The selected JDK version doesn't match the jdk version pattern.

Action:
Select a different JDK.

CFGFWK-40894
Invalid minimum JDK Version.

Category:
Configuration

Cause:
The recommended minimum JDK version doesn't match the JDK version pattern.

Action:
Enter a valid JDK directory.

CFGFWK-40895
Invalid JDK Version.

Category:
Configuration

Cause:
The selected JDK version is lower than recommended minimum version.

Action:
Enter a valid JDK directory.

CFGFWK-40896
Use of production mode instead of secure

Category:
Configuration

Cause:
Oracle recommends that you select the Secure option for Production mode.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Please check the secure mode to have a secure domain in the Production environment.

CFGFWK-40905
Template exists.

Category:
Configuration

Cause:
A template already exists in that location. Do you want to overwrite it?

Action:
Select the desired answer.

CFGFWK-40906
Node Manager configuration will be skipped.

Category:
Configuration

Cause:
Oracle recommends using per domain Node Manager configuration. Current selection will cause the configuration of Node Manager for the domain to be skipped.

Action:
Continue configuration to skip the current node manager configuration.

CFGFWK-40915
JMS system resource selected for conversion to a UDD

Category:
Configuration

Cause:
At least one JMS system resource has been selected for conversion to a Uniform Distributed Destination (UDD). This conversion will take place only if the JMS system resource is assigned to a cluster.

Action:
Warning message. No action required.

CFGFWK-40930
Oracle Home not set

Category:
Configuration

Cause:
Oracle Home is not set for the current configuration.

Action:
Set Oracle Home.

CFGFWK-40931
No domain information.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Unable to obtain information pertaining to current domain.

Action:
Provide domain information.

CFGFWK-40950
Reconfiguration template was not available for custom template, and original not found; start scripts may be incomplete

Category:
Configuration

Cause:
The custom template at {0} had no corresponding reconfiguration template, and the original template could not be found.

Action:
Check start scripts and manually edit to add contributions from the custom template.

CFGFWK-40951
An application or library was not relocated to the new MW home.

Category:
Configuration

Cause:
Custom Applications were left in the original MW home and must be fixed manually: {0}

Action:
Correct source path of the applications to refer to the new installation.

CFGFWK-42001
Configuration conflicts detected.

Category:
Configuration

Cause:
Duplicate elements were found in configuration: {0}

Action:
No action required. Elements from an incoming template will be discarded.

CFGFWK-42057
No templates installed.

Category:
Configuration

Cause:
Installation contains no standard templates.

Action:
Check installation or use custom template if available.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-42061
Configuration component conflict detected.

Category:
Configuration

Cause:
The selected template contains a component already defined in the existing domain.

Action:
Indicate how to resolve this conflict.

CFGFWK-42062
Unable to select template.

Category:
Configuration

Cause:
The {0} template could not be selected because of the following: {1}.

Action:
Fix the problems which prevented template selection, then try again.

CFGFWK-42063
Unable to unselect template.

Category:
Configuration

Cause:
The {0} template could not be unselected because of the following: {1}.

Action:
Fix the problems which prevented template unselected, then try again.

CFGFWK-42064
Hidden selected templates.

Category:
Configuration

Cause:
One or more of the templates you selected are no longer visible in the list of Available Templates. To see all the templates you selected, select All Templates from the Template Categories menu.

Action:
Select "All Templates" from the Template Categories menu.

CFGFWK-42065
Missing driver classes.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The driver classes listed below were not found in the product installation: {0} A test will not be performed for any database connections using these drivers.

Action:
Provide driver class.

CFGFWK-42066
Missing driver class.

Category:
Configuration

Cause:
The driver class listed below was not found in the product installation: {0} A test will not be performed for any database connections using this driver.

Action:
Provide driver class.

CFGFWK-42067
The JDBC configuration test did not fully complete or completed with errors.

Category:
Configuration

Cause:
See "Connection Result Log" for details

Action:
You can click "Next" to bypass the testing or go back to the previous panels to fix the problems. If Data Guard is used, the check is expected to fail for standby addresses, and the warning can be ignored.

CFGFWK-42068
The schema component data are not bound or the binding operation is unsuccessful with errors.

Category:
Configuration

Cause:
Error message: {0}.

Action:
Enter the correct database connection parameters.

CFGFWK-60001
User name contains unsupported characters.

Category:
Configuration

Cause:
The user name contains commas, tabs, spaces, or any of the following characters: <>#|&?(){}

Action:
Remove unsupported characters.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-60005
Invalid password.

Category:
Configuration

Cause:
WebLogic domain requires the password to be minimum 8 characters

Action:
Provide valid password.

CFGFWK-60052
Class name contains spaces.

Category:
Configuration

Cause:
Space characters are not allowed.

Action:
Correct the class name.

CFGFWK-60055
Duplicated value.

Category:
Configuration

Cause:
The property "{0}" value is duplicated.

Action:
Remove the duplicates.

CFGFWK-60058
Invalid class name.

Category:
Configuration

Cause:
The class name must have the format "xxx.xxx.xxx.xxx".

Action:
Correct the class name.

CFGFWK-60062
Additional address disallowed.

Category:
Configuration

Cause:
Invalid {0} of {1} "{2}". If "All Local Addresses" is selected, no additional address should be provided.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Remove additional address.

CFGFWK-60063
No listen address is provided.

Category:
Configuration

Cause:
Invalid {0} of {1} "{2}". The list of address is empty.

Action:
Provide at least one address.

CFGFWK-60064
Mismatched passwords.

Category:
Configuration

Cause:
The confirmation password does not match the entered password.

Action:
Correct the password.

CFGFWK-60150
Servers port conflict.

Category:
Configuration

Cause:
The server "{0}" has the same combination of listen address and port as server "{1}".

Action:
Select different port value.

CFGFWK-60151
SSL port conflict.

Category:
Configuration

Cause:
The server "{0}" has the same combination of listen address and SSL port as server "{1}".

Action:
Select different SSL port value.

CFGFWK-60152
Admin port conflict.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The server "{0}" has the same combination of listen address and port as admin server.

Action:
Select a different port.

CFGFWK-60153
Admin SSL port conflict.

Category:
Configuration

Cause:
The server "{0}" has the same combination of listen address and SSL port as admin server.

Action:
Select a different port.

CFGFWK-60154
Server port conflict.

Category:
Configuration

Cause:
The server "{0}" has the same port and SSL port.

Action:
Set one of the ports to a different value.

CFGFWK-60155
Empty Listen Port.

Category:
Configuration

Cause:
Server "{0}" Listen Port is empty.

Action:
Set Listen Port.

CFGFWK-60156
IP v6 address in a wrong format.

Category:
Configuration

Cause:
The IP address must have the proper v6 format like "xxxx:xxxx:xxxx:xxxx:xxxx:xxxx:xxxx:xxxx" or "xxxx:xxxx:xxxx:xxx:xxx.xxx.xxx.xxx" or other supported format.

Action:
Correct the IP address.

CFGFWK-60157
IP address in a wrong format.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
The IP address must have the format "xxx.xxx.xxx.xxx".

Action:
Correct the IP address.

CFGFWK-60158
Invalid IP address segment.

Category:
Configuration

Cause:
Each segment of the IP address must contain an integer in the range of 0 to 255.

Action:
Correct the IP address.

CFGFWK-60159
Invalid IP address segment.

Category:
Configuration

Cause:
Each segment of the IP address must contain an integer in the range of 0 to 255.

Action:
Correct the IP address.

CFGFWK-60160
Multicast IP address out of range.

Category:
Configuration

Cause:
The IP multicast address must be in the range of 224.0.0.1 to 239.255.255.255.

Action:
Correct the IP address.

CFGFWK-60161
Invalid host name.

Category:
Configuration

Cause:
The host name does not allow leading or trailing dot (.).

Action:
Correct the host name.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-60162
Invalid host name.

Category:
Configuration

Cause:
The host name does not allow multiple dots (.).

Action:
Correct the host name.

CFGFWK-60163
Invalid host name.

Category:
Configuration

Cause:
No member of the hostname may begin or end with a dash (-).

Action:
Correct the host name.

CFGFWK-60164
Invalid host name.

Category:
Configuration

Cause:
The entered value is not a valid hostname. Please use only alphanumeric characters and dot (.) and dash (-).

Action:
Correct the host name.

CFGFWK-60165
Invalid Host Address.

Category:
Configuration

Cause:
Host address allows only digits.

Action:
Correct the host address.

CFGFWK-60166
Invalid address format.

Category:
Configuration

Cause:
Each entry must be expressed as <hostname> or <hostname>:<port>.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the hostname and port format.

CFGFWK-60167
Invalid port.

Category:
Configuration

Cause:
The port number must be an integer.

Action:
Correct the port.

CFGFWK-60168
Invalid port.

Category:
Configuration

Cause:
The port number must be an integer in the range of 1 to 65535.

Action:
Correct the port.

CFGFWK-60169
Conflicting multicast ports.

Category:
Configuration

Cause:
The cluster has the same combination of multicast address and port as other cluster.

Action:
Change address or port for one of the clusters.

CFGFWK-60170
Invalid multicast port.

Category:
Configuration

Cause:
Multicast port cannot be empty.

Action:
Provide valid port value.

CFGFWK-60171
Conflicting machine definitions.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The machine "{0}" has the same combination of listen address and port as other machine "{1}".

Action:
Change one of machine definitions.

CFGFWK-60172
Invalid listen port.

Category:
Configuration

Cause:
Listen port cannot be empty.

Action:
Provide valid port value.

CFGFWK-60173
Port conflict.

Category:
Configuration

Cause:
The admin server listen address "{0}" and port "{1,number,#}" conflicts with ports in use by existing processes on current host.

Action:
Select a different port.

CFGFWK-60174
SSL port conflict.

Category:
Configuration

Cause:
The admin server SSL listen address "{0}" and port "{1,number,#}" conflicts with ports in use by existing processes on current host.

Action:
Select a different port.

CFGFWK-60175
Empty SSL Listen Port.

Category:
Configuration

Cause:
Server "{0}" SSL Listen Port is empty.

Action:
Set SSL Listen Port.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-60176
Invalid IP address segment.

Category:
Configuration

Cause:
Invalid {0} of {1} "{2}". Please enter a valid hostname or IP address. Note that if you are entering a IP address, Each segment of the IP address must contain an integer in the range of 0 to 255.

Action:
Correct the IP address.

CFGFWK-60177
System component type is not specified.

Category:
Configuration

Cause:
System component type can not be empty.

Action:
Enter a valid system component type.

CFGFWK-60178
Only system component types "{0}" are supported.

Category:
Configuration

Cause:
Only system component types "{0}" are supported.

Action:
Enter a valid system component type.

CFGFWK-60179
Invalid OHS instance name "{0}".

Category:
Configuration

Cause:
The following OHS instance names are not valid, regardless of lower or upper case: "mbeans", "domain_bak", "instances", "AdminServer", "AdminServerTag".

Action:
Enter a valid OHS instance name.

CFGFWK-60180
Invalid OHS instance name "{0}".

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
OHS instance names must begin with an alphabetic character, contain only alpha-numerics, underscores, and hyphens, and be no more than 30 characters long.

Action:
Enter a valid OHS instance name.

CFGFWK-60181
Conflicting machine definition.

Category:
Configuration

Cause:
The machine "{0}" has the same combination of listen address and port as other server "{1}".

Action:
Change machine definitions.

CFGFWK-60182
Conflicting server definition.

Category:
Configuration

Cause:
The server "{0}" has the same combination of listen address and port as machine "{1}".

Action:
Change server definition.

CFGFWK-60200
Invalid targeting for distributed destination.

Category:
Configuration

Cause:
The targets of the distributed destination should cover all the servers that host the members.

Action:
Include the missing servers.

CFGFWK-60201
The distributed topic is not deployed.

Category:
Configuration

Cause:
The distributed topic "{0}" that distributed topic member "{1}" belongs to is not deployed.

Action:
Deploy the distributed topic.

CFGFWK-60202
The JMS server is not deployed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
The JMS Server "{0}" that topic "{1}" belongs to is not deployed.

Action:
Deploy the JMS server.

CFGFWK-60203
The distributed queue is not deployed.

Category:
Configuration

Cause:
The distributed queue "{0}" that distributed queue member "{1}" belongs to is not deployed.

Action:
Deploy distributed queue.

CFGFWK-60204
The JMS server is not deployed

Category:
Configuration

Cause:
The JMS Server "{0}" that queue "{1}" belongs to is not deployed.

Action:
Deploy the JMS server.

CFGFWK-60205
Empty group with Admin role.

Category:
Configuration

Cause:
Group(s) assigned to "Admin" role must contain at least one user.

Action:
Add user to group.

CFGFWK-60206
Unassigned Admin role.

Category:
Configuration

Cause:
Admin role must be assigned at least one group or one user.

Action:
Assign Admin role to a group or a user.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-60209
JDBCConnectionPool undeployment failure.

Category:
Configuration

Cause:
The JDBCConnectionPool "{0}" could not be undeployed from target "{1}", because it is used by the JMSJDBCStore "{2}", which is used by the deployed JMSServer "{3}".

Action:
Switch JMSJDBCStore to use a different JDBCConnectionPool.

CFGFWK-60250
Duplicate JNDI name.

Category:
Configuration

Cause:
The JNDI name is duplicated in JMS server "{0}"

Action:
Choose a different JNDI name.

CFGFWK-60300
Domain name missing.

Category:
Configuration

Cause:
Domain name is not specified.

Action:
Specify the domain name.

CFGFWK-60301
Domain name conflict.

Category:
Configuration

Cause:
The name of the WebLogic domain and the server and cluster names within it must be unique. A server or cluster already exists with the WebLogic domain name you specified.

Action:
Change the name of the domain, conflicting server or cluster.

CFGFWK-60302
Domain already exists.

Category:
Configuration

Cause:
A domain already exists at the specified location.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Change the domain location.

CFGFWK-60303
Domain directory is not empty.

Category:
Configuration

Cause:
The domain directory "{0}" you specified contains files. You may only create a domain in an empty directory.

Action:
Pick a different domain location.

CFGFWK-60304
Applications directory is not empty.

Category:
Configuration

Cause:
The applications directory "{0}" that you specified contains files. Applications may only be written to an empty directory.

Action:
Pick a different directory.

CFGFWK-60305
Invalid domain name.

Category:
Configuration

Cause:
The specified domain name is invalid. It must include only alphanumeric characters, hyphens ('-') or underscore characters ('_') and contain at least one letter but must not start with a number.

Action:
Correct the domain name.

CFGFWK-60306
Domain location contains spaces.

Category:
Configuration

Cause:
The domain location contains spaces.

Action:
Remove space characters.

CFGFWK-60307
Domain location is missing.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
The domain location is not be specified.

Action:
Specify the domain location.

CFGFWK-60308
Domain location not writable.

Category:
Configuration

Cause:
The domain location does not have write permission.

Action:
Correct permissions or select different domain location.

CFGFWK-60309
Applications location contains spaces.

Category:
Configuration

Cause:
The applications location contains spaces.

Action:
Remove space characters.

CFGFWK-60310
Applications location missing.

Category:
Configuration

Cause:
The applications location is not specified.

Action:
Specify applications location.

CFGFWK-60311
Applications location not writable.

Category:
Configuration

Cause:
The applications location does not have write permission.

Action:
Correct permissions or select different location.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-60312
Template name missing.

Category:
Configuration

Cause:
Template name is not specified.

Action:
Specify the template name.

CFGFWK-60313
Invalid template name.

Category:
Configuration

Cause:
The specified template name is invalid. It must include only alphanumeric characters, hyphens ('-') or underscore characters ('_') and contain at least one letter or digit.

Action:
Correct the template name.

CFGFWK-60314
Template location contains spaces.

Category:
Configuration

Cause:
The template location contains spaces.

Action:
Remove space characters.

CFGFWK-60315
Template location missing.

Category:
Configuration

Cause:
The template location is not specified.

Action:
Specify template location.

CFGFWK-60316
Template location not writable.

Category:
Configuration

Cause:
The template location does not have write permission.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct permissions or select different location.

CFGFWK-60317
The name of the domain, server or cluster names must be unique.

Category:
Configuration

Cause:
A domain or cluster already exists with the Server name.

Action:
Change the name of the domain, conflicting server or cluster.

CFGFWK-60324
Location is not a directory.

Category:
Configuration

Cause:
The given location is not a directory.

Action:
Provide a valid location.

CFGFWK-60325
Invalid location.

Category:
Configuration

Cause:
The directory location is invalid.

Action:
Provide a valid location.

CFGFWK-60326
Invalid directory location.

Category:
Configuration

Cause:
The specified directory location is invalid. It must include only alphanumeric characters, hyphens ('-') or underscore characters ('_') and contain at least one letter or digit.

Action:
Correct the location.

CFGFWK-60327
Location is missing.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Location is not provided.

Action:
Specify the location.

CFGFWK-60328
Invalid applications directory.

Category:
Configuration

Cause:
The applications location is not a directory.

Action:
Provide a valid directory.

CFGFWK-60329
Missing KeyStore password.

Category:
Configuration

Cause:
The following templates require entry of a KeyStore password:

Action:
Set password for affected templates.

CFGFWK-60330
KeyStore information missing.

Category:
Configuration

Cause:
Some of the added template require KeyStore information.

Action:
Use the storeKeyStorePassword(template_location, password) command for each template listed above to enter required KeyStore passwords. The command must be entered after adding templates and before updating the domain.

CFGFWK-60331
The domain location path is not absolute.

Category:
Configuration

Cause:
The path of the domain location field is not absolute.

Action:
Correct path or select different location.

CFGFWK-60332
The application location path is not absolute.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
The path of the application location field is not absolute.

Action:
Correct path or select different location.

CFGFWK-60333
Node Manager location contains spaces.

Category:
Configuration

Cause:
The Node Manager location contains spaces.

Action:
Remove space characters.

CFGFWK-60334
Node Manager location is missing.

Category:
Configuration

Cause:
The Node Manager location is not be specified.

Action:
Specify the Node Manager location.

CFGFWK-60335
The Node Manager location path is not absolute.

Category:
Configuration

Cause:
The path of the Node Manager location field is not absolute.

Action:
Correct path or select different location.

CFGFWK-60336
Location is not a directory.

Category:
Configuration

Cause:
The given location is not a directory.

Action:
Provide a valid location.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-60337
Node Manager location not writable.

Category:
Configuration

Cause:
The Node Manager location does not have write permission.

Action:
Correct permissions or select different domain location.

CFGFWK-60338
Non supported distributed topic exists.

Category:
Configuration

Cause:
As part of JMS expansion JMS topics were converted to replicated distributed topics (RDTs) to preserve backward compatible behavior. The JMSServers targeted to dynamic clusters do not currently support RDT topics. The support is only available for partition distributed topics (PDT). Because PTD behavior is different from RTD an explicit property needs to be passed to the process to indicate that the conversion is intentional. Use system property "-Dcie.jms.internal.temp.expansion.use.pdt=true" to generate partitioned distributed topic.

Action:
Use system property "-Dcie.jms.internal.temp.expansion.use.pdt=true" to generate partitioned distributed topic as default is replicated distributed topic.

CFGFWK-60339
Machine and Node Manager is not configured.

Category:
Configuration

Cause:
An attempt was made to set the migration-policy of Persistent Store to "On-Failure" or "Alwyas". Before automatic migration of any kind can be used, the MigrationBasis must be set in the ClusterMBean. If database is chosen as MigrationBasis, then DataSourceForAutomaticMigration must be set as well.When consensus leasing is chosen as MigrationBasis, all servers that belong to the cluster must have a machine set and nodemanager configured for that machine.

Action:
Set machine and configure nodemanager for that machine.

CFGFWK-60340
A cluster member is being individually targeted via VirtualTarget.

Category:
Configuration

Cause:
A Managed server cannot be a member of cluster and individually targeted using VirtualTarget. The following VirtualTargets cannot be targeted individually {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
The clustered Managed server VirtualTarget should not be used for targeting.

CFGFWK-60341
Calculated Machine Names or Machine and Node Manager is not configured.

Category:
Configuration

Cause:
Some Oracle Fusion Middleware Products require calculated machine names to be selected and Machine and Node Manager to be configured unless Front-End Host is used.

Action:
Set calculated machine names attribute, machines and configure nodemanager for that machine.

CFGFWK-60450
Attempt to delete admin user.

Category:
Configuration

Cause:
The default admin user could not be deleted.

Action:
Operation aborted. No further actions required.

CFGFWK-60451
Attempt to add restricted groups.

Category:
Configuration

Cause:
Cannot add built-in groups "everyone" or "users".

Action:
Operation aborted. No further actions required.

CFGFWK-60452
Missing roles.

Category:
Configuration

Cause:
Built-in roles "Admin" and "Anonymous" must be provided.

Action:
Provide required roles.

CFGFWK-60453
Password too short.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The supplied user password for "{0}" is too short.

Action:
Provide valid password.

CFGFWK-60454
Password too short.

Category:
Configuration

Cause:
The supplied user password for "{0}" is too short.

Action:
Provide valid password.

CFGFWK-60455
Invalid password.

Category:
Configuration

Cause:
The password must be at least 8 alphanumeric characters with at least one number or special character.

Action:
Correct the password.

CFGFWK-60456
Invalid or missing credentials configuration.

Category:
Configuration

Cause:
The credentials configuration in your domain is invalid.

Action:
Correct the configuration.

CFGFWK-60457
Invalid or missing keystore configuration.

Category:
Configuration

Cause:
The keystore configuration in your domain is invalid.

Action:
Correct the configuration.

CFGFWK-60458
Invalid private key password.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
The password must be the same, used to create a private key.

Action:
Correct the private key password.

CFGFWK-60550
Script execution aborted.

Category:
Configuration

Cause:
Encountered error: "{0}". Error is logged to "{1}".

Action:
See log for details.

CFGFWK-60600
Missing domain security.

Category:
Configuration

Cause:
Before booting this domain, it is necessary to run the SQL file located at {0} in order to initialize a domain security admin user in the database.

Action:
Execute the SQL file.

CFGFWK-60707
Template already selected.

Category:
Configuration

Cause:
The template "{0}" is already selected.

Action:
No action required. The template is ignored.

CFGFWK-60708
Template not found.

Category:
Configuration

Cause:
Found no templates with {0} name and {1} version

Action:
Select a different template.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-60709
Multiple matching templates.

Category:
Configuration

Cause:
Found {2} templates with {0} name and {1} version.

Action:
Possibly corrupted installation. Check installation for correctness.

CFGFWK-60710
Template not selected.

Category:
Configuration

Cause:
No templates were selected!

Action:
Select templates to load.

CFGFWK-60711
Template loading failed.

Category:
Configuration

Cause:
Unable to load template with {0} name and {1} version: {2}.

Action:
Check the logs for more information.

CFGFWK-60712
Template loading failed.

Category:
Configuration

Cause:
Unable to load template from [{0}].

Action:
Provide valid path.

CFGFWK-60713
Command execution failed.

Category:
Configuration

Cause:
Attempt to execute command "{0}" in invalid state: {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the logs for more information.

CFGFWK-60714
Method not present.

Category:
Configuration

Cause:
The method "{0}" is not available.

Action:
Provide valid method.

CFGFWK-60716
The domain contains online pending unactivated changes, offline changes will be ignored on activation of pending changes.

Category:
Configuration

Cause:
The domain contains online pending unactivated changes.

Action:
Activate or undo the pending changes before upgrading domain using WLST offline script.

CFGFWK-60717
No supported Database for datasource or schema component

Category:
Configuration

Cause:
When merging database.xml in templates, there was no common database type that supported all of the usages of the datasource or schema component {0}.

Action:
Remove conflicting templates from list of selected templates being added to the domain.

CFGFWK-60718
Datasource does not use a database supported by the existing configuration

Category:
Configuration

Cause:
One of the templates added to the domain does not support the configured database type used by the datasource or component {0}.

Action:
Remove conflicting templates from list of selected templates being added to the domain, or migrate the datasource to a database that supports the required extension.

CFGFWK-60800
Bad Template

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
There is a problem with the template

Action:
Correct the template

CFGFWK-60806
Error when generating log file

Category:
Configuration

Cause:
The Configuration Wizard was unable to generate the log file located at

Action:
Check the log file.

CFGFWK-60808
Unsupported Domain

Category:
Configuration

Cause:
Only domains associated with Oracle Home {0} are eligible for update..

Action:
Select a domain from the currently active middleware home.

CFGFWK-60816
Unsupported Template

Category:
Configuration

Cause:
The template {0} is not supported in the current environment as it was created without the presence of application server.

Action:
Select a template created from the environment without the presence of an application server

CFGFWK-60817
Unsupported Template

Category:
Configuration

Cause:
The template {0} is not supported in the current environment which requires the presence of an application server.

Action:
Select a template created from the environment containing an application server

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-60818
Unsupported Domain

Category:
Configuration

Cause:
The domain {0} is not supported in the current environment as it was created without the presence of application server.

Action:
Select a domain created without the presence of application server

CFGFWK-60819
Unsupported Domain

Category:
Configuration

Cause:
The domain {0} is not supported in the current environment which requires the presence of an application server.

Action:
Select a domain created from the environment containing an application server

CFGFWK-60820
Unsupported Domain

Category:
Configuration

Cause:
This domain is a managed domain. It has been scaled out from the original domain.

Action:
Select a domain which is a compatible with this environment.

CFGFWK-60825
Error in HTTP proxy Application

Category:
Configuration

Cause:
Unable to create HTTP proxy application(s)

Action:
Check the configuration.

CFGFWK-60826
Existing Proxy

Category:
Configuration

Cause:
You have chosen a managed server {0} which is already a proxy for a cluster.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
It is recommended that a managed server only proxy a single cluster.

CFGFWK-60827
Invalid Host name or IP address for managed Server

Category:
Configuration

Cause:
The managed server {0} chosen as a HTTP proxy for the cluster has an invalid Host name or IP address.

Action:
The managed server should have a valid host name or an IP address.

CFGFWK-60828
Invalid Host name for Server

Category:
Configuration

Cause:
The server {0}, which is assigned to the cluster {1} has an invalid Host name or IP address.

Action:
The Listen Address for all servers in a cluster with an HTTP proxy should be a valid host name or an IP address.

CFGFWK-60829
Invalid managed Server

Category:
Configuration

Cause:
The managed server with the server Name {0} chosen as a HTTP proxy for a cluster does not exist.

Action:
The managed server should exist and be valid.

CFGFWK-60830
No file to load.

Category:
Configuration

Cause:
There must be files to load.

Action:
Provide file to load.

CFGFWK-60831
No file selected.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
You must select a file first.

Action:
Select a file.

CFGFWK-60834
Invalid URL.

Category:
Configuration

Cause:
The URL entered may not end with forward slash ("/").

Action:
Modify the URL.

CFGFWK-60835
Invalid URL.

Category:
Configuration

Cause:
The URL entered was malformed: {0}

Action:
Modify the URL.

CFGFWK-60837
Test failed.

Category:
Configuration

Cause:
Test Failed!

Action:
Check the log.

CFGFWK-60838
Error in connection.

Category:
Configuration

Cause:
Error getting connection information!

Action:
Check the log.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-60839
Failed to load database.

Category:
Configuration

Cause:
Database Load Failed!

Action:
Check the log.

CFGFWK-60840
Error in PointBase server startup.

Category:
Configuration

Cause:
Error encountered starting PointBase server or the server process was killed!

Action:
Check the log.

CFGFWK-60841
Log path.

Category:
Configuration

Cause:
For possible information regarding the error check the log located at:

Action:
Check the log.

CFGFWK-60842
Error in stopping PointBase server.

Category:
Configuration

Cause:
Error encountered stopping the PointBase server! Check log file:

Action:
Check the log.

CFGFWK-60843
Error in writing log file.

Category:
Configuration

Cause:
Error Writing Log File:

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the log.

CFGFWK-60855
Invalid Template Name.

Category:
Configuration

Cause:
The Template Name is blank.

Action:
Enter a valid Template Name.

CFGFWK-60856
Invalid Template Version.

Category:
Configuration

Cause:
The Template Version is blank.

Action:
Enter a valid Template Version.

CFGFWK-60857
Invalid Template Version Number.

Category:
Configuration

Cause:
The Template Version Number is invalid. It should be in the format N.N.N.N.N or N.N.N.N where N is a whole number.

Action:
Enter a valid Template Version Number.

CFGFWK-60865
Can not edit the file.

Category:
Configuration

Cause:
This file type is not editable

Action:
Provide writable permission to file.

CFGFWK-60870
Invalid start or end character for path.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Path cannot start or end with a path separator.

Action:
Remove the path separator at the start or end

CFGFWK-60875
Invalid selection for removal

Category:
Configuration

Cause:
The selected directory is a representation of a location that will be selected by the user when using this configuration and cannot be removed.

Action:
Select another file or directory to remove

CFGFWK-60876
Invalid selection for removal

Category:
Configuration

Cause:
You cannot remove the files in red or their parent directories because they comprise this configuration's applications.

Action:
Select another file or directory to remove

CFGFWK-60877
No file selected to be removed

Category:
Configuration

Cause:
You must first select a file to remove.

Action:
Select a file to be removed

CFGFWK-60878
Not selected Source file or directory

Category:
Configuration

Cause:
You must select a source file or directory on the left

Action:
Select a valid source file or directory

CFGFWK-60879
Invalid destination location

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
You must select a destination location on the right

Action:
Select a destination location

CFGFWK-60880
Invalid selection

Category:
Configuration

Cause:
The selected directory is a representation of a location that will be selected by the user when using this configuration and files cannot be added.

Action:
Select another destination file or directory

CFGFWK-60881
Invalid selection

Category:
Configuration

Cause:
The selected file cannot be added to your domain directory because it is a reserved file. This usually means that the file will be auto-generated by the configuration wizard and does not need to be added.

Action:
Select a different file or directory

CFGFWK-60882
Error reading template location.

Category:
Configuration

Cause:
The template location {0} cannot be read due to an unexpected I/O error.

Action:
Verify template location is a valid one.

CFGFWK-60885
Error preparing the template

Category:
Configuration

Cause:
Error encountered preparing template from jar

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the jar file.

CFGFWK-60891
A Custom directory doesn't contain valid JDK.

Category:
Configuration

Cause:
Unable to determine if the specified directory contains a valid JDK. Do you want to proceed?

Action:
Specify a directory with valid JDK.

CFGFWK-60892
Invalid directory location

Category:
Configuration

Cause:
The specified directory does not exist.

Action:
Enter a valid JDK directory.

CFGFWK-60900
No file selected

Category:
Configuration

Cause:
No file was selected to be moved up

Action:
Select a file to be moved up

CFGFWK-60901
No file selected

Category:
Configuration

Cause:
No file was selected to be moved down

Action:
Select a file to be moved down

CFGFWK-60905
Password mismatch.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Password does not match.

Action:
Correct the password.

CFGFWK-60906
Empty field.

Category:
Configuration

Cause:
The field {0} cannot be empty.

Action:
Provide field value.

CFGFWK-60907
Invalid field value.

Category:
Configuration

Cause:
The field {0} must be an integer.

Action:
Provide integer value.

CFGFWK-60908
Empty password field.

Category:
Configuration

Cause:
The password/confirm password field is empty.

Action:
Provide value for password/confirm password field.

CFGFWK-60909
Password does not match.

Category:
Configuration

Cause:
The password entered should match the confirm password field.

Action:
Correct the password.

CFGFWK-60915
Invalid custom directory.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
A Custom directory is not empty.

Action:
Specify a valid directory.

CFGFWK-60916
Invalid node manager home

Category:
Configuration

Cause:
The node manager home is not a directory.

Action:
Specify a valid directory.

CFGFWK-60918
Invalid user name

Category:
Configuration

Cause:
The user name can not be empty.

Action:
Specify a valid user name.

CFGFWK-60919
Invalid SSL Listen Port.

Category:
Configuration

Cause:
SSL Listen Port of Server "{2}" is empty.

Action:
Provide SSL Listen Port value.

CFGFWK-60920
The name of the domain, server or cluster names must be unique.

Category:
Configuration

Cause:
A domain or server already exists with the Cluster name "{2}".

Action:
Change the name of the domain, conflicting server or cluster.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-60921
The name of the domain, server or cluster names must be unique.

Category:
Configuration

Cause:
A domain or cluster already exists with the Server name "{2}".

Action:
Change the name of the domain, conflicting server or cluster.

CFGFWK-60922
Invalid port value.

Category:
Configuration

Cause:
The listen port value {3,number,#} of {1} "{2}" is out of range. It must be between 1 and 65535.

Action:
Enter a valid port value.

CFGFWK-60923
Invalid port value.

Category:
Configuration

Cause:
The SSL listen port value {3,number,#} of Server "{2}" is out of range. It must be between 1 and 65535.

Action:
Enter a valid port value.

CFGFWK-60924
Invalid value of "{0}" property.

Category:
Configuration

Cause:
Property "{0}" of {1} "{2}" is invalid. The name must not be null or empty and may not contain any : , = * ? % / _cloned.

Action:
Provide valid property value.

CFGFWK-60925
Invalid port value.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The Coherence listen port value {1,number,#} of cluster "{0}" is out of range. It must be between 0 and 65535.

Action:
Enter a valid port value.

CFGFWK-60926
Invalid port value.

Category:
Configuration

Cause:
The listen port value {3,number,#} of node manager for machine "{2}" is out of range. It must be between 1 and 65534.

Action:
Enter a valid port value.

CFGFWK-60927
Invalid port value.

Category:
Configuration

Cause:
The Coherence listen port value {1,number,#} of cluster "{0}" is invalid. It must be between 0 and 65535.

Action:
Enter a valid port value.

CFGFWK-60928
Invalid existing node manager home directory.

Category:
Configuration

Cause:
Existing node manager home directory does not exist or is not accessible.

Action:
Specify a valid directory or check permissions if it is not accessible.

CFGFWK-60929
Invalid port value.

Category:
Configuration

Cause:
The listen port value {3,number,#} of {1} "{2}" is out of range. It must be between 1 and 65535.

Action:
Enter a valid port value.

CFGFWK-60930
Failed to select template. Please run with logging turned on.

Category:
Configuration

Cause:
There may be issues with the template(s) and/or with the template location(s).

Action:
Fix template(s) and/or provide correct template location(s).

CFGFWK-60931
Failed to process database information.

Category:
Configuration

Cause:
Failed to process database information.

Action:
Fix db info in the template(s).

CFGFWK-60932
Invalid listen port.

Category:
Configuration

Cause:
Port number must be between 1 and 65535, and different from SSL listen port and Coherence port.

Action:
Fix the listen port.

CFGFWK-60933
Invalid ssl port.

Category:
Configuration

Cause:
Port number must be between 1 and 65535, and different from listen port and Coherence port.

Action:
Fix the ssl port.

CFGFWK-60934
Invalid coherence port.

Category:
Configuration

Cause:
Port number must be between 1 and 65535, and different from listen port and SSL listen port.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Fix the Coherence port.

CFGFWK-60935
Failed to select template.

Category:
Configuration

Cause:
Please see the log file {0} for details.

Action:
Fix template(s) and/or its location in the configuration file. Also check the validity of the configuration xml file.

CFGFWK-60950
Required template not found in new installation directory

Category:
Configuration

Cause:
A template that was required for the reconfiguration could not be found in the upgraded MiddleWare home: {0}

Action:
Refer to upgrade documentation for information about installation and product migration.

CFGFWK-60951
Failed to load reconfiguration template

Category:
Configuration

Cause:
The reconfiguration template {0} failed to load due to invalid meta-data

Action:
Correct the template.

CFGFWK-60952
Failed to load replacement template

Category:
Configuration

Cause:
Unable to load the template {0}

Action:
Correct the template

CFGFWK-60953
An application or library was not relocated to the new MW home.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error in the reconfiguration templates resulted in the following deployments being left in the original MW home: {0}

Action:
Correct the reconfiguration templates

CFGFWK-60954
A reconfiguration template cannot be the replacement for another reconfiguration template

Category:
Configuration

Cause:
The reconfiguration template {0} specified another reconfiguration template {1} as its replacement. The replacement must be either an extension or domain template.

Action:
Correct the reconfiguration template

CFGFWK-60955
Unable to locate the WebLogic Server component.

Category:
Configuration

Cause:
The domain did not contain component references corresponding to known WebLogic Server components

Action:
None; the domain cannot be reconfigured

CFGFWK-60956
Unable to locate the certifiate.

Category:
Configuration

Cause:
The certificate does not exist at given location {0}.

Action:
Browse or provide the proper certificate location

Cause:
Property "{0}" of {1} is invalid. {0} must start with /

Action:
Provide valid property value.

CFGFWK-62010
Invalid value of "{0}" property.

Category:
Configuration

Cause:
Port values for "{2}" of {1} is invalid. Either Explicit Port or Port Offset must to be set to a non zero value or an unique URI Prefix must be specified.

Action:
Provide valid property value.

CFGFWK-62011
Invalid value of "{0}" property.

Category:
Configuration

Cause:
Port values for "{2}" of {1} is invalid. Cannot set both Explicit Port and Port Offset.

Action:
Provide valid property value.

CFGFWK-62012
Invalid server name prefix.

Category:
Configuration

Cause:
Server name prefix cannot be empty.

Action:
Provide server name prefix value.

CFGFWK-62013
Server template cannot be 'unspecified'.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Server template cannot be 'unspecified' if cluster is dynamic.

Action:
Choose a server template.

CFGFWK-62014
Same server template cannot be associated with different clusters.

Category:
Configuration

Cause:
Same server template cannot be associated with different clusters.

Action:
Choose a different server template.

CFGFWK-64001
Property value is not part of enumerated values.

Category:
Configuration

Cause:
According to the XML schema, the value for property {0} of {1} must be one of the following: {3}.

Action:
Use one of the valid values.

CFGFWK-64002
Invalid property value.

Category:
Configuration

Cause:
The value "{3}" for property "{0}" of {1} {2} did not pass XML schema validation: {4}.

Action:
Provide valid value.

CFGFWK-64009
The "{0}" property is missing.

Category:
Configuration

Cause:
"{0}" is empty. It must be set on the {1} objects. The name must not be null or empty.

Action:
Provide a name.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-64010
Invalid property value.

Category:
Configuration

Cause:
Property "{0}" of {1} "{2}" is invalid.

Action:
Provide valid property value.

CFGFWK-64012
Invalid property value.

Category:
Configuration

Cause:
Property "{0}" of {1} "{2}" is invalid. Space characters are not allowed.

Action:
Provide valid property value.

CFGFWK-64013
Internal representation conversion error.

Category:
Configuration

Cause:
The string cannot be converted.

Action:
Check the logs for more information.

CFGFWK-64014
The required property is missing.

Category:
Configuration

Cause:
Invalid property "{0}" of {1}: value "{2}" is invalid. The property value is required.

Action:
Provide property value.

CFGFWK-64015
Duplicated property.

Category:
Configuration

Cause:
Invalid property "{0}" of {1}: value "{2}" is invalid. The property value is duplicated.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the property value.

CFGFWK-64016
Attempt to set disabled property.

Category:
Configuration

Cause:
The property "{0}" is disabled on type {1}.

Action:
Internal error. No user actions available.

CFGFWK-64017
Attempt to set unsupported property.

Category:
Configuration

Cause:
The property "{0}" is not supported on type {1}.

Action:
Internal error. No user actions available.

CFGFWK-64018
Mismatched password values.

Category:
Configuration

Cause:
The password value does not match the confirmation password.

Action:
Correct password values.

CFGFWK-64019
The "{0}" property is missing.

Category:
Configuration

Cause:
"{0}" is empty. It must be set on the {1} objects. The name must not be null or empty and should contain valid characters only.

Action:
Provide a name.

CFGFWK-64020
The file "{0}" does not exist or is not a file.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
"{0}" does not exist or is not a file.

Action:
Provide a file name.

CFGFWK-64021
Fatal internal error.

Category:
Configuration

Cause:
An unexpected internal condition was detected: {0}. The wizard cannot continue.

Action:
Check the logs for more information.

CFGFWK-64022
Unspecified error.

Category:
Configuration

Cause:
One of the subsystems generated an error: {0}

Action:
Check error text for more information.

CFGFWK-64023
The file "{0}" does not have permission to read.

Category:
Configuration

Cause:
"{0}" does not have permission to read.

Action:
Provide a read permission.

CFGFWK-64024
The file "{0}" does not have permission to write.

Category:
Configuration

Cause:
"{0}" does not have permission to write.

Action:
Provide a write permission.

CFGFWK-64025
Maximum number of entries reached.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-64030
The target file must be specified.

Category:
Configuration

Cause:
The target file must be specified.

Action:
Provide a target file.

CFGFWK-64031
The service-id and service-type both are required for the service type "NEW".

Category:
Configuration

Cause:
The service-id and service-type both are required for the service type "NEW".

Action:
Provide a service-id and service-type.

CFGFWK-64032
The output-date-target element must be specified.

Category:
Configuration

Cause:
The output-date-target element must be specified.

Action:
Provide a output-date-target element.

CFGFWK-64033
The invalid input-data-src type specified.

Category:
Configuration

Cause:
The invalid input-data-src type specified.

Action:
Provide a valid input-data-src type.

CFGFWK-64034
The target xpath for a token bind or target-key for an xml bind is not applicable.

Category:
Configuration

Cause:
The target xpath for a token bind or target-key for an xml bind is not applicable.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Provide a target-key for a token bind or target-xpath for an xml bind.

CFGFWK-64035
Multiple assignment to target.

Category:
Configuration

Cause:
The {0} "{1}" could not be assigned to the target "{2}" since each target can have only one {0} assigned.

Action:
Change the assignment.

CFGFWK-64036
The invalid app-svc-name "{0}" is defined.

Category:
Configuration

Cause:
The invalid app-svc-name "{0}" is defined.

Action:
Provide a valid app-svc-name.

CFGFWK-64037
The invalid FEHost Address type "{0}" is defined.

Category:
Configuration

Cause:
The invalid FEHost Address type "{0}" is defined.

Action:
Provide a valid FEHost Address type.

CFGFWK-64038
The app-svc-name "{0}" must have target.

Category:
Configuration

Cause:
The app-svc-name "{0}" must have target.

Action:
Provide a valid target.

CFGFWK-64039
Unsupported property.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The property "{0}" is not supported on type {1}.

Action:
Internal error. No user actions available.

CFGFWK-64040
Invalid template location.

Category:
Configuration

Cause:
Specified template does not exist or is not a file: "{0}".

Action:
Provide a valid template location.

CFGFWK-64041
Invalid template.

Category:
Configuration

Cause:
Template "{0}" is not a valid jar file.

Action:
Provide a valid template location.

CFGFWK-64042
Invalid template.

Category:
Configuration

Cause:
Template "{0}" does not contain template-info.xml.

Action:
Provide a valid template location.

CFGFWK-64043
Invalid template.

Category:
Configuration

Cause:
template-info.xml could not be parsed: {0}

Action:
Provide a valid template location.

Configuration

Cause:
XML schema validation failed for template-info.xml: {0}

Action:
Provide a valid template location.

CFGFWK-64045
Unable to save template-info.

Category:
Configuration

Cause:
Encountered error while saving template-info.xml: {0}

Action:
Check generated exception for details.

CFGFWK-64050
Invalid location

Category:
Configuration

Cause:
No template was selected

Action:
Select a valid template

CFGFWK-64051
Invalid location.

Category:
Configuration

Cause:
The selected location does not contain WebLogic domain.

Action:
Select a valid domain.

CFGFWK-64052
Invalid configuration

Category:
Configuration

Cause:
This is not a valid configuration! Correct the following error in config.xml: {0}

Action:
Correct config.xml

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-64053
Domain loading error.

Category:
Configuration

Cause:
The Configuration Wizard encountered problems attempting to load the domain you selected: {0}.

Action:
Select a different domain.

CFGFWK-64054
Unsupported domain.

Category:
Configuration

Cause:
The domain in this directory is not a supported version.

Action:
Select a different domain.

CFGFWK-64055
Invalid template extension.

Category:
Configuration

Cause:
Template destination is not having a valid extension.

Action:
Correct the template destination extension to .jar.

CFGFWK-64056
Error adding templates.

Category:
Configuration

Cause:
The Configuration Wizard encountered problems attempting to add templates you selected: {0}.

Action:
Verify template integrity or select different templates.

CFGFWK-64058
Incompatible templates.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Some of the extension templates you have selected are incompatible with each other due to conflicting application and/or service names: {0}

Action:
Modify template selection.

CFGFWK-64059
Unsatisfied conditions.

Category:
Configuration

Cause:
The template you selected cannot be applied because the following conditions have not been satisfied: {0}

Action:
Select "Yes" to override these conditions (Not Recommended).

CFGFWK-64062
Invalid template.

Category:
Configuration

Cause:
Domain template "{0}" could not be loaded: {1}

Action:
Select a valid domain template

CFGFWK-64063
Missing config.xml in template

Category:
Configuration

Cause:
The config.xml is invalid or missing in the template selected

Action:
Select a valid template

CFGFWK-64064
No domain template in selection.

Category:
Configuration

Cause:
Selection must contain at least one domain template. Currently selected templates are defined as extension templates and do not express a dependency on a domain template.

Action:
Include domain template into your selection.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-64065
No templates added.

Category:
Configuration

Cause:
At least one template needs to be added to configuration.

Action:
Add a template.

CFGFWK-64066
Template location is missing.

Category:
Configuration

Cause:
Template location is not provided.

Action:
Specify template location.

CFGFWK-64067
Invalid template.

Category:
Configuration

Cause:
Only Oracle product templates from the Oracle Home already associated with this domain are eligible for selection.

Action:
Select a template associated with the current Oracle Home.

CFGFWK-64069
Missing template prerequisites.

Category:
Configuration

Cause:
The following prerequisites could not be satisfied: {0}

Action:
Verify that prerequisite templates are present or change your selection.

CFGFWK-64070
Template conflict.

Category:
Configuration

Cause:
The following templates are both prerequisites and conflicts for the current selection: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Selection is reverted. No further actions required.

CFGFWK-64071
Template conflict.

Category:
Configuration

Cause:
The selection conflicts with templates already present in the domain: {0}

Action:
Selection is reverted. No further actions required.

CFGFWK-64072
Ambiguous prerequisite.

Category:
Configuration

Cause:
There are multiple matches for one of the prerequisites specified by a template. Resolve the ambiguity by preselecting one of the choices before attempting selection: {0}

Action:
Select the desired prerequisite.

CFGFWK-64073
Non-selectable template.

Category:
Configuration

Cause:
The template is not selectable in the current mode.

Action:
Selection is reverted. No further actions required.

CFGFWK-64074
Missing template.

Category:
Configuration

Cause:
The template is not available.

Action:
Selection is reverted. No further actions required.

CFGFWK-64075
Template is configured.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The template was previously configured.

Action:
Selection is reverted. No further actions required.

CFGFWK-64076
Template already selected.

Configuration

Cause:
The template is already selected.

Action:
Selection is reverted. No further actions required.

CFGFWK-64077
Template already unselected.

Category:
Configuration

Cause:
The template is already unselected.

Action:
Selection is reverted. No further actions required.

CFGFWK-64078
Template selection error.

Category:
Configuration

Cause:
Encountered error during selection operation: {0}

Action:
Selection is reverted. No further actions required.

CFGFWK-64079
Template conflict.

Category:
Configuration

Cause:
The selection requires templates which conflicts with the current domain: {0}

Action:
Selection is reverted. No further actions required.

CFGFWK-64080
Invalid template config-groups.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
The Template {0} with version {1} and template location {2} contains config-groups with app-svcs names {3} which are not present in the configuration.

Action:
remove invalid app-svcs names from config-groups.

CFGFWK-64085
Directory not selected.

Category:
Configuration

Cause:
A directory was not set.

Action:
Select a valid directory.

CFGFWK-64086
'Extension Template' as a source not allowed.

Category:
Configuration

Cause:
Selection of an 'Extension Template' as source for 'Domain Template' creation is not supported.

Action:
Select a valid source.

CFGFWK-64087
Invalid source type.

Category:
Configuration

Cause:
Selection of an Oracle product 'Extension Template' as a source is not allowed.

Action:
Select a valid source.

CFGFWK-64100
Invalid help topic.

Category:
Configuration

Cause:
No such help topic exists.

Action:
Provide valid help topic.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CFGFWK-64101
Help is not configured

Category:
Configuration

Cause:
No Help configuration found.

Action:
Configure help.

CFGFWK-64102
Invalid help type.

Category:
Configuration

Cause:
Help type not supported.

Action:
Provide the valid help type.

CFGFWK-64103
Failed to load help.

Category:
Configuration

Cause:
Errors occurred while loading Help.

Action:
Check the logs for more information.

CFGFWK-64104
Low console width.

Category:
Configuration

Cause:
Value of console width is too low!

Action:
Increase the console width.

CFGFWK-64200
No common database driver.

Category:
Configuration

Cause:
The selected data sources do not share any common database drivers. The wizard will deselect data sources to allow selection of compatible drivers.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action required.

CFGFWK-64201
No common database driver.

Category:
Configuration

Cause:
The selected component schemas do not share any common database drivers. The wizard will deselect component schemas to allow selection of compatible drivers.

Action:
No action required.

CFGFWK-64204
Validation errors.

Category:
Configuration

Cause:
Some more validation errors occurred.

Action:
Correct validation errors.

CFGFWK-64205
Unspecified property.

Category:
Configuration

Cause:
The {0} must be specified.

Action:
Specify the property.

CFGFWK-64206
Unspecified properties.

Category:
Configuration

Cause:
The following must be specified: {0}

Action:
Provide missing properties.

CFGFWK-64207
Mismatched passwords.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The {0} and {1} do not match.

Action:
Correct the password.

CHGHOST-20200 to CHGHOST-20219

CHGHOST-20200
The argument is invalid.

Category:
CHGHOST Configuration

Cause:
The argument {0} was not supported by chghost script.

Action:
Provide a valid argument. Use the "-help" option for more information about chghost script arguments.

CHGHOST-20201
The value for the argument is missing.

Category:
CHGHOST Configuration

Cause:
The argument {0} was provided, but its value was not provided.

Action:
Provide the corresponding value.

CHGHOST-20202
Log level is invalid

Category:
CHGHOST Configuration

Cause:
Invalid log level {0}. It was set via {1} for system property {2}.

Action:
Set a valid log level. Supported log levels are {0}.

CHGHOST-20203
The input validation failed for argument walletDir.

Category:
CHGHOST Configuration

Cause:
The wallet directory was not provided.

Action:
Make sure that the correct values are provided.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CHGHOST-20204
The database connection failed for the datasource.

Category:
CHGHOST Configuration

Cause:
Possible causes of failure for the datasource:{0} 1. Datasource {0} is not correct. 2. One or more connection parameters in DB url {1} are not proper.

Action:
Make sure that the database host is correct and database is cloned properly.

CHGHOST-20205
The database url is empty.

Category:
CHGHOST Configuration

Cause:
Possible causes of failure for the target DB_HOST : {0} 1. Datasource {1} is not correct. 2. Schema or User {2} is not proper.

Action:
Make sure that the database host is correct and database is cloned properly.

CHGHOST-20206
The input validation failed for argument chgHostInputFile.

Category:
CHGHOST Configuration

Cause:
File did not exist.

Action:
Make sure that the correct values are provided.

CHGHOST-20207
Host mappling entries are missing in chghost input File.

Category:
CHGHOST Configuration

Cause:
Both SERVER_HOST and DB_HOST entires were missing

Action:
Provide value for host mapping in chghost input File.

CHGHOST-20208
Domain home was invalid.

Category:
CHGHOST Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Provided domain home {0} was different from the domain home {1} , found from its internal configuration files.

Action:
Provide valid Domain home.

CHGHOST-20209
Java Home associated with domain home was invalid.

Category:
CHGHOST Configuration

Cause:
There were two possible causes for invalid java home {0} : 1. The directory did not exist. 2. The directory did not have correct binaries.

Action:
Make sure that the Java Home is valid.

CHGHOST-20210
Oracle Home did not have supported binaries.

Category:
CHGHOST Configuration

Cause:
The root causes were :{1}.

Action:
Make sure that the Oracle Home has correct binaries.

CHGHOST Configuration

Cause:
There are three possible causes for an invalid wallet directory {0}. 1. It was not a directory. 2. The directory was empty. 3. The directory did not have valid .sso file.

Action:
Provide a valid wallet directory.

Copyright © 2000, 2026, Oracle and/or its affiliates.

CHGHOST-20213
The system temporary directory is inaccessible.

Category:
CHGHOST Configuration

Cause:
The system temporary directory {0} did not have write permission.

Action:
Make sure that system temporary directory has write permission.

CHGHOST-20214
The domain home validation failed.

Category:
CHGHOST Configuration

Cause:
The following file {0} did not exist under domain home.

Action:
Provide a valid domain location.

CHGHOST-20215
Invalid domain home location.

Category:
CHGHOST Configuration

Cause:
Path {0} was not absolute or an empty directory.

Action:
Provide a valid absolute path.

CHGHOST-20216
Invalid domain home location.

Category:
CHGHOST Configuration

Cause:
Path {0} was not readable.

Action:
Provide a valid absolute path.

CHGHOST-20217
Invalid server host.

Category:
CHGHOST Configuration

Cause:
Server host {0} was not valid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Provide a valid server host.

CHGHOST-20218
Server ports validation failed.

Category:
CHGHOST Configuration

Cause:
The port {0} was used for multiple servers.

Action:
Provide different free ports for servers.

CHGHOST-20219
Server port validation failed.

Category:
CHGHOST Configuration

Cause:
Specified port {0} for server {1} was not free.

Action:
Provide valid free port.

Copyright © 2000, 2026, Oracle and/or its affiliates.

7

DVT-02012 to DVT-26021

DVT-02012
Column {0} exceeds boundary {1}.

Category:
Programmatic

Cause:
The specified column number was greater than the total number of columns.

Action:
Get the total number of columns, by calling the getColumnCount method of the graph or of the column header in the pivot table. Then specify a column that does not exceed the total number of columns.

DVT-02013
Row {0} exceeds boundary {1}.

Category:
Programmatic

Cause:
The specified row number was greater than the total number of rows.

Action:
Get the total number of rows, by calling the getRowCount method of the graph or of the column header in the pivot table. Then specify a row that does not exceed the total number of rows.

DVT-02015
Slice {0} exceeds boundary {1}.

Category:
Programmatic

Cause:
The specified slice number was greater than the total number of slices.

Action:
Specify a slice that does not exceed the total number of slices.

DVT-02016
Layer {0} exceeds boundary {1}.

Category:
Programmatic

Cause:
The specified layer was greater than the total number of layers that are available on the given edge.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Specify a layer that does not exceed the total number of layers.

DVT-02017
Series {0} exceeds boundary {1}.

Category:
Programmatic

Cause:
The specified series was greater than the total series that is available in the graph.

Action:
Specify a zero-based series index that does not exceed the total series. The Graph.getDisplaySeries method should provide the number of series that are displayed in the graph. Or, if Graph.isDataRowShownAsASeries returns true, then Graph.getRowCount returns the number of series that can be displayed. If Graph.isDataRowShownAsASeries returns false, then Graph.getColumnCount returns the total number of series that can be displayed.

DVT-02018
Edge {0} exceeds boundary {1}.

Category:
Programmatic

Cause:
The specified edge was greater than the total number of edges that are available on the given edge. Valid edges for methods that require an edge are: DataDirector.COLUMN_EDGE, DataDirector.ROW_EDGE, and DataDirector.PAGE_EDGE.

Action:
Specify a valid edge constant.

DVT-02019
Current DataSource does not support required type: {0}.{1}.

Category:
Programmatic

Cause:
The DataSource did not support the required type of data in its DataMap. For example, the view requested DataMap.DATA_GROUPSORT information, and the DataSource that the view uses did not supply group sort information.

Action:
Request support for the required data types in the DataSource, or use a different DataSource.

DVT-02020
DTD file cannot be found.

Category:
Programmatic

Cause:
The specified DTD could not be found. The XML parser needed the DTD in order to validate XML files.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the specified DTD file exists, or disable XML validation. DTDs for Data Visualization components are in their respective packages. To turn off validation, call Dataview.setXMLValidated(false);.

DVT-03000
No Mergeable object is provided.

Category:
Programmatic

Cause:
No default Mergeable object was provided to resolve rules.

Action:
Provide at least one default Mergeable object, so that rules can be resolved. For more information about Mergeable objects, see the Javadoc for the oracle.dss.rules.Mergeable interface.

DVT-03001
attempt to call merge(Mergeable) on an incompatible Mergeable class

Category:
Programmatic

Cause:
An attempt was made to merge incompatible Mergeable classes. Only Mergeable objects of the same class can be merged. For example, ViewStyle objects can be merged, but a ViewStyle cannot be merged with a ViewFormat.

Action:
Merge two classes that are compatible. For more information, see the Javadoc for the oracle.dss.rules.RuleBundle class.

DVT-06000
unexpected data error from Pivot Table data model

Category:
Data

Cause:
An unexpected exception was thrown by the Pivot Table's data model.

Action:
Log a bug against the application. Verify that the Pivot Table's data model is configured properly.

DVT-06001
no Converter for data type {0} during Pivot Table text formatting

Category:
Configuration

Cause:
The application could not create a Converter for a specific data type. The most likely reason was that a Converter was not registered for that data type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Log a bug against the application. Verify that the application can create a default Converter for all data types rendered by the Pivot Table.

DVT-07001
cannot create Graph image

Category:
Programmatic

Cause:
Under heavy loads, there was not enough memory to create the BufferedImage, or the Graphics instance from the BufferedImage. Therefore, the generated image file is empty.

Action:
Reduce the memory load; for example, reduce the image size or allocate more memory to the JVM.

DVT-08000
unexpected data error from Data Model

Category:
Data

Cause:
An invalid operation was performed by Data Model.

Action:
Log a bug against the application. Verify that the Data model is configured properly.

DVT-22004
cannot create Gauge image

Category:
Programmatic

Cause:
Under heavy loads, there was not enough memory to create the BufferedImage, or the Graphics instance from the BufferedImage. Therefore, the generated image file is empty.

Action:
Reduce the memory load; for example, reduce the image size or allocate more memory to the JVM.

DVT-23000
End date cannot be earlier than start date.

Category:
Programmatic

Cause:
The end date specified for the Gantt chart was earlier than the specified start date.

Action:
Specify a correct start date and end date for the Gantt chart.

DVT-23001
The time unit in the major axis must be greater than the time unit in the minor axis.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
The time unit specified in the major axis was not greater than the time unit specified in the minor axis. For example, if "days" was specified as the time unit for the minor axis, then the time unit specified in the major time axis must be greater than "days", such as "months", and not anything less, such as "hours".

Action:
Ensure that the time unit in the major axis is greater than the time unit in the minor axis.

DVT-23002
An invalid time scale is specified.

Category:
Programmatic

Cause:
The specified time scale in the major or minor axis was not recognized.

Action:
Specify a valid time scale for the axis.

DVT-23003
End date of a task cannot be earlier than its start date. Start date: {0}, End date: {1}

Category:
Data

Cause:
The end date specified for the task was earlier than its start date.

Action:
Check the data to ensure that the start date and end date are loaded correctly.

DVT-23004
No tooltip keys or labels are specified.

Category:
Programmatic

Cause:
No tooltip keys or labels were specified in the Gantt tag.

Action:
Specify keys and labels for the tooltip to ensure that the tooltip is not empty.

DVT-23005
No legend keys or labels are specified.

Category:
Programmatic

Cause:
No legend keys or labels were specified in the Gantt tag.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Specify keys and labels for the legend to ensure that the legend is not empty.

DVT-23006
The number of tooltip keys does not match the number of tooltip labels.

Category:
Programmatic

Cause:
The number of tooltip keys did not match the number of tooltip labels specified in the Gantt tag.

Action:
Ensure that the number of tooltip keys specified in the Gantt tag (tooltipKeys attribute) matches the tooltip labels specified in the Gantt tag (tooltipLabels attribute).

DVT-23007
The number of legend keys does not match the number of legend labels.

Category:
Programmatic

Cause:
The number of legend keys did not match the number of legend labels specified in the Gantt tag.

Action:
Ensure that the number of legend keys specified in the Gantt tag (legendKeys attribute) matches the legend labels specified in the Gantt tag (legendKeyLabels attribute).

DVT-23008
The start date of the task is out of range. Value: {0}

Category:
Data

Cause:
The start and end date of a task was outside of the time range specified for the Gantt chart.

Action:
No action necessary, if it is okay not to show the task. Otherwise, verify data is correct or specify a wider time range for the Gantt chart (using the startTime and endTime attributes)

DVT-23009
cannot find format for type {0}; skipping task: {1}

Category:
Programmatic

Cause:
No format for type {0} was registered.

Action:
Register a TaskbarFormat with the TaskbarFormatManager for the type indicated.

DVT-23010
The specified day of the week is invalid. Value: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
The day of the week specified was not recognized.

Action:
Specify a value for the day of the week that is one of these seven constants from the java.util.Calendar class: Calendar.SUNDAY, Calendar.MONDAY, Calendar.TUESDAY, Calendar.WEDNESDAY, Calendar.THURSDAY, Calendar.FRIDAY, Calendar.SATURDAY.

DVT-23011
The value specified for alignment is invalid. Task ID: {0}

Category:
Programmatic

Cause:
The alignment value specified for the label or icon was invalid.

Action:
Specify a value for alignment that is one of these three constants from the oracle.adf.view.faces.bi.component.gantt.GanttConstants class: GanttConstants.LEFT, GanttConstants.RIGHT, GanttConstants.INSIDE.

DVT-23012
GanttDropTarget can only be attached to a Gantt component.

Category:
Programmatic

Cause:
The GanttDropTarget tag was added as a child of a non-Gantt component.

Action:
Ensure that the GanttDropTarget tag is a child tag of either a Project Gantt or Scheduling Gantt component.

DVT-23013
The start date of a task is null.

Category:
Data

Cause:
The start date of a task was null.

Action:
Check the data to ensure that the start date is not null.

DVT-23014
The task ID is null.

Category:
Data

Cause:
The task ID or split task ID was null.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the data to ensure that the task ID or split task ID is not null.

DVT-23015
The next date cannot be earlier than the previous date.

Category:
Programmatic

Cause:
The next date returned by custom timescale was earlier than the previous date.

Action:
Specify a correct next date.

DVT-23016
The value supplied for the attribute is returning a wrong type.

Category:
Data

Cause:
The value supplied for the attribute is returning a wrong type.

Action:
Chech the attribute and modify to return correct type.

DVT-23017
The taskID is not unique in the resource. resourceID: {0}, taskID: {1}

Category:
Data

Cause:
The taskID is not unique in the resource.

Action:
Check the data to ensure that the task ID is unique.

DVT-26000
unable to find connection in {0}

Category:
Programmatic

Cause:
Either the map configuration was not valid, or connection information was missing.

Action:
Check the map configuration file.

DVT-26001
theme \"{0}\" cannot be displayed: missing value property

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The value attribute of the theme was null.

Action:
Check the value attribute of the theme.

DVT-26002
theme \"{0}\" cannot be displayed: invalid row key at row {1}

Category:
Programmatic

Cause:
The specified row either did not have a row key, or the row id in the row key was null.

Action:
Check the key and row id for the specified row.

DVT-26004
theme \"{0}\" cannot be displayed: row {1} with id={2} does not have a data value

Category:
Programmatic

Cause:
The specified row did not have a data value.

Action:
Check the data value for the specified row.

DVT-26005
theme \"{0}\" cannot be displayed: row {1} with id={2} does not have a location value

Category:
Programmatic

Cause:
The specified row did not have a location value.

Action:
Check the location value for the specified row.

DVT-26006
Labels for one or more rows of theme \"{0}\" are missing.

Category:
Programmatic

Cause:
Some rows in the theme did not have a location label.

Action:
Check the location labels in the theme.

DVT-26008
Theme \"{0}\" does not have any data.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
The specified theme did not return any rows.

Action:
Check whether the specified theme is correctly returning no data.

DVT-26009
unable to geocode data at row {0} of theme \"{1}\": {2}

Category:
Data

Cause:
The specified data could not be geocoded.

Action:
Change the location value for the specified row.

DVT-26010
The mouse click behavior of {0} is to render a popup, but there is no popup facet in the map.

Category:
Data

Cause:
The map had no popup facet, but the leftClickBehavior property was specified to render a popup.

Action:
Check whether the mouse click behavior is correct.

DVT-26011
The right-click behavior of {0} is to render a popup, but there is no popup facet in the map.

Category:
Data

Cause:
The map had no popup facet, but the rightClickBehavior property was specified to render a popup.

Action:
Check whether the right-click behavior is correct.

DVT-26012
The number of labels specified in legendLabels does not match the number of buckets. Legend labels: {0}, Buckets: {1}

Category:
Data

Cause:
The number of legend labels and buckets did not match.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the number of legend labels.

DVT-26013
unable to geocode the theme data: no Geocoder URL specified in {0}

Category:
Programmatic

Cause:
Either the map configuration was not valid, or connection information for the Geocoder was missing.

Action:
Check the map configuration file.

DVT-26014
unable to show all theme data for theme \"{0}\": multiple data values for {1} are specified but only the first data value is shown

Category:
Programmatic

Cause:
Duplicate location data values were found.

Action:
Check the data for duplicate location values.

DVT-26015
theme \"{0}\" cannot be displayed: no longitude data at row {1}

Category:
Programmatic

Cause:
The specified row did not have a longitude value.

Action:
Check the longitude for the specified row.

DVT-26016
theme {0} cannot be displayed: no latitude data at row {1}

Category:
Programmatic

Cause:
The specified row did not have a latitude value.

Action:
Check the latitude for the specified row.

DVT-26017
unable to connect to MapViewer at {0}

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A MapViewer server was not found at the specified map URL.

Action:
Check whether the connection URL is correct and the MapViewer servlet can accept new requests.

DVT-26018
unable to connect to Geocoder at {0}

Category:
Programmatic

Cause:
The component was unable to connect to the Geocoder at the specified URL.

Action:
Check whether the connection URL is correct and the Geocoder can accept new requests.

DVT-26019
unable to find a map of id {0} for mapToolbar {1}

Category:
Programmatic

Cause:
The mapId attribute of the specified mapToolbar was not correct.

Action:
Check the mapId attribute of the specified mapToolbar.

DVT-26020
A map tag cannot have more than one mapOverview tag.

Category:
Programmatic

Cause:
There were more than one mapOverview tags in the map tag.

Action:
Remove any extra mapOverview tags.

DVT-26021
A map tag cannot have more than one mapLegend tag.

Category:
Programmatic

Cause:
There were more than one mapLegend tags in the map tag.

Action:
Remove any extra mapLegend tags.

Copyright © 2000, 2026, Oracle and/or its affiliates.

8

EM-00251 to EM-02674

EM-00251
No connection to the WebLogic managed server {0}.

Category:
Enterprise Manager

Cause:
The WebLogic managed server was down.

Action:
Verify that the managed server is up and running.

EM-00252
Error in accessing proxy MBean for this system component in WebLogic managed server {0}

Category:
Enterprise Manager

Cause:
Component was down

Action:
Start the component, or verify that the component has been deployed on the managed server.

EM-00268
Error in querying ports configuration for system component {0}

Category:
Enterprise Manager

Cause:
Component was down

Action:
Start the component.

EM-00301
Error in fetching data from target application.

Category:
Enterprise Manager

Cause:
Target application is down.

Action:
Ensure target application is running.

EM-00302
Error fetching data from target server in the Oracle WebLogic Server domain.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Enterprise Manager

Cause:
The target WebLogic server is down.

Action:
Make sure the target server is up and running.

EM-00303
Error in discovering web service endpoints for target application.

Category:
Enterprise Manager

Cause:
Target application is down.

Action:
Ensure target application is running.

EM-00351
Unable to connect to Oracle WSM Policy Manager.

Category:
Enterprise Manager

Cause:
The Oracle WSM Policy Manager was down or not accessible.

Action:
Make sure Oracle WSM Policy Manager (wsm-pm application) is up and accessible. Also, ensure you have right roles to access the Service.

EM-00426
Unable to save changes to registered service

Category:
Enterprise Manager

Cause:
The service repository is unavailable.

Action:
Ensure that the service repository is up and running.

EM-00428
Unable to delete registered service

Category:
Enterprise Manager

Cause:
The service is no longer valid.

Action:
Ensure that the service is valid and is registered. Make sure the endpoint and WSDL for the service are accessible.

Copyright © 2000, 2026, Oracle and/or its affiliates.

EM-00430
Unable to register service due to duplicate service name

Category:
Enterprise Manager

Cause:
The service name is already registered.

Action:
Ensure that the service name is unique.

EM-00432
Invalid WSIL URL

Category:
Enterprise Manager

Cause:
The WSIL URL is invalid. The URL is unreachable or doesn't contain a valid WSIL.

Action:
Ensure that the WSIL URL is valid and available.

EM-00434
Invalid WSIL File

Category:
Enterprise Manager

Cause:
The WSIL file is invalid. The file is not a valid WSIL document.

Action:
Ensure that the uploaded file is a valid WSIL document.

EM-00440
Service repository operation failed

Category:
Enterprise Manager

Cause:
Service repository is unavailable.

Action:
Ensure that the service repository is up and running.

EM-00451
Failed to access WSDL

Category:
Enterprise Manager

Cause:
Invalid WSDL location or WSDL is not accessible

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Make sure you provide a valid WSDL location. If the location is valid, make sure it is accessible. Also, make sure you have proper privileges to access the WSDL with username and password.

EM-00452
Failed to parse WSDL file

Category:
Enterprise Manager

Cause:
Invalid WSDL content

Action:
Ensure that the WSDL is syntactically and semantically correct.

EM-00453
Failed to invoke operation

Category:
Enterprise Manager

Cause:
Invalid input arguments

Action:
Make sure you provide the required input argument values, and that the values are the proper type (for example, integer, string, and so on).

EM-00454
Failed to invoke operation

Category:
Enterprise Manager

Cause:
Unable to read SOAP action for selected operation

Action:
Make sure right SOAP Action value is set.

EM-00455
Failed to change view from 'XML View' to 'Tree View'

Category:
Enterprise Manager

Cause:
Invalid payload contents in XML format

Action:
Make sure you provide a valid payload to parse and check if any required tag is missing or broken.

EM-00456
Failed to change view from 'XML View' to 'Tree View'

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Enterprise Manager

Cause:
Invalid input argument

Action:
Make sure you provide the required input argument values, and that the values are the proper type (for example, integer, string, and so on).

EM-00457
Failed to load key aliases from the keystore

Category:
Enterprise Manager

Cause:
Invalid keystore information

Action:
Make sure you provide a valid keystore location and password.

EM-00458
Failed to get compatible client policies from the WSDL

Category:
Enterprise Manager

Cause:
The WSDL is not accessible or you do not have the privilege to get policies.

Action:
Make sure you have the privilege to get the client policies.

EM-00459
Failed to update the URL with the server IP address.

Category:
Enterprise Manager

Cause:
The IP address of the server is not available due to database connection failure or missing target information.

Action:
Make sure you have the target discovered successfully with the server IP address.

EM-00501
TopLink Sessions were not found

Category:
Enterprise Manager

Cause:
TopLink MBeans were not found

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the application has been accessed to register the MBeans. Make sure that "-Declipselink.register.dev.mbean=true" and "-Declipselink.register.run.mbean=true" are part of $JAVA_OPTIONS

EM-00601
Error in getting WSDL for Web service client.

Category:
Enterprise Manager

Cause:
Target web service application is down.

Action:
Ensure target web service application is running.

EM-00602
Error in attaching/detaching policies.

Category:
Enterprise Manager

Cause:
Target application or Oracle WSM Policy Manager is down.

Action:
Ensure target application and Oracle WSM Policy Manager is running.

EM-00603
Error in getting policy subject from target application.

Category:
Enterprise Manager

Cause:
Target web service application is down.

Action:
Ensure target Web service application is running.

EM-01052
Error in querying OPSS application policy MBean object name.

Category:
Enterprise Manager

Cause:
The WebLogic managed server was down.

Action:
Verify that the managed server is up and running.

EM-01053
Application stripe entry {0} does not exist in policy store.

Category:
Enterprise Manager

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Application stripe ID used to access policies from policy store did not have any data.

Action:
Check the application stripe ID data provided in configuring Fusion MiddleWare control application deployment wizard security task.

EM-01055
Error in querying OPSS system policy MBean object name.

Category:
Enterprise Manager

Cause:
The WebLogic managed server was down.

Action:
Verify that the managed server is up and running.

EM-01061
Error in querying OPSS credential store MBean object name.

Category:
Enterprise Manager

Cause:
The WebLogic managed server was down.

Action:
Verify that the managed server is up and running.

EM-01321
Cannot obtain application information

Category:
Enterprise Manager

Cause:
The application is not active

Action:
Make sure that the application is active or running

EM-01322
Cannot obtain MDS information for selected application

Category:
Enterprise Manager

Cause:
MDS is not properly configured for the application

Action:
Make sure that MDS config mbean is accessible on the mbean server. If it is not, verify that appropriate MDS configuration file (web.xml) contains ADFConfigRuntimeLifeCycleCallBack listener to register MDS config mbean and MDS is configured properly in adf-config.xml.

Copyright © 2000, 2026, Oracle and/or its affiliates.

EM-01323
Error while performing MDS runtime (import, export or purge) operation

Category:
Enterprise Manager

Cause:
MDS runtime mbean is not found on runtime mbean server

Action:
Make sure that the MDS runtime mbean is accessible on runtime mbean server. If it is not, verify that appropriate MDS configuration file (weblogic-application.xml) contains WLLifecycleListener listener to register MDS runtime mbean.

EM-01324
Error while retrieving data from page cache

Category:
Enterprise Manager

Cause:
JavaBean stored in the session has expired or was destroyed

Action:
Start a fresh session by logging into EM again.

EM-01325
Cannot obtain MDS target repository information

Category:
Enterprise Manager

Cause:
MDS target repository is not configured

Action:
Verify the MDS configuration by checking the contents of the configuration files (for example, adf-config.xml and mds-config.xml).

EM-02006
Error retrieving Configuration MBeans for ADFConnectionMBeans {0}.

Category:
Enterprise Manager

Cause:
The ADF Connection and Configuration MBean is not available or accessible.

Action:
Configuration options currently unavailable. The application might be down, did not start properly, or is incorrectly packaged. Check the log files for further details.

EM-02056
Error getting DAD MBean.

Category:
Enterprise Manager

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The DAD MBean is not available or accessible.

Action:
Configuration options currently unavailable. The application might be down, did not start-up properly, or is incorrectly packaged. Check the log files for further detail.

EM-02057
Error getting Cache MBean Object Name.

Category:
Enterprise Manager

Cause:
The Cache MBean is not available or accessible.

Action:
Configuration options currently unavailable. The application might be down, did not start-up properly, or is incorrectly packaged. Check the log files for further detail.

EM-02058
Error getting Middle Tier MBean Object Name.

Category:
Enterprise Manager

Cause:
The Middle Tier MBean is not available or accessible.

Action:
Configuration options currently unavailable. The application might be down, did not start-up properly, or is incorrectly packaged. Check the log files for further detail.

EM-02063
Error getting Portal site URL.

Category:
Enterprise Manager

Cause:
Wiring MBean Could not connect to the Portal repository.

Action:
The Portal Database maybe down or the Portal DAD has incorrect username, password or connect string information. Check the log files for further detail.

EM-02201
Error connecting to the Domain Runtime MBean Server.

Category:
Enterprise Manager

Cause:
The admin server is not working properly.

Action:
Ensure the target admin server is running properly.

Copyright © 2000, 2026, Oracle and/or its affiliates.

EM-02202
Error getting the list of folders from the credential store.

Category:
Enterprise Manager

Cause:
There are issues with the JPS credential store MBean.

Action:
Ensure the JPS credential store MBean is registered and working properly through the System MBean Browser.

EM-02203
Error obtaining the UMS server information.

Category:
Enterprise Manager

Cause:
The UMS server is down, or not started properly, or not deployed on the target.

Action:
Ensure the UMS server is running properly.

EM-02251
Error connecting to Forms Config MBeans

Category:
Enterprise Manager

Cause:
The managed server that hosts the Forms application was down, or the Forms application was down or not deployed on this server.

Action:
Depending on the specific cause, start the managed server if it is down, start the Forms application if it is down, or deploy the Forms application on this domain if haven't been deployed already.

EM-02652
error while initializing data for the BI Instance {0}

Category:
Enterprise Manager

Cause:
The server for Fusion Middleware Control failed to correctly communicate with the server for the BI Instance.

Action:
Ensure that the server for the BI Instance is running.

EM-02653
error while initializing data for the BI Instance {0}

Category:
Enterprise Manager

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The server for Fusion Middleware Control failed to correctly communicate with the server for the BI Instance.

Action:
Ensure that the server for the BI Instance is running.

EM-02658
The {1} operation can not be performed on the {0} component.

Category:
Enterprise Manager

Cause:
The specified Oracle Business Intelligence component failed to respond to the operation.

Action:
See the log files for the Oracle Business Intelligence component to determine the cause of the error.

EM-02668
The configuration for BI Instance can not be locked.

Category:
Enterprise Manager

Cause:
The BI Instance was already locked by another user.

Action:
Determine which user has locked the BI Instance and request that it be released.

EM-02669
The changes to the BI Instance can not be committed.

Category:
Enterprise Manager

Cause:
The BI Instance failed to commit all recent changes.

Action:
See the log files for the BI Instance to determine the cause of the error.

EM-02670
The changes to the BI Instance can not be reverted.

Category:
Enterprise Manager

Cause:
The BI Instance failed to revert all recent changes.

Action:
See the log files for the BI Instance to determine the cause of the error.

EM-02672
The BI Instance can not be started.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Enterprise Manager

Cause:
The BI Instance could not respond correctly to the start command.

Action:
See the log files for the BI Instance to determine the cause of the error.

EM-02673
The BI Instance can not be stopped.

Category:
Enterprise Manager

Cause:
The BI Instance could not respond correctly to the stop command.

Action:
See the log files for the BI Instance to determine the cause of the error.

EM-02674
The BI Instance can not be restarted.

Category:
Enterprise Manager

Cause:
The BI Instance could not respond correctly to the restart command.

Action:
See the log files for the BI Instance to determine the cause of the error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

9

ESS-00001 to ESS-09422

ESS-00001
Internal error. {0}

Category:
Other

Cause:
Internal error occurred.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-00002
Constraint error for property {0} with value {1}.

Category:
Other

Cause:
An attempt was made to create an object that already exists. An attempt was made to change the value of an object thatis read-only.

Action:
Specifiy an identifier for the object that is not currently in use. Retry the operation without changing the value of the object.

ESS-00003
Failed to find resource {0}. {1}

Category:
Other

Cause:
A JNDI lookup of the given resource failed.

Action:
Ensure the resource is deployed properly and is available via jndi lookup.

ESS-00004
Incorrect timestamp format: {0}. {1}

Category:
Programmatic

Cause:
An invalid value was specified for a timestamp.

Action:
Specify a correct value for the parameter.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-00005
SQL bind operation not supported for parameter data type: {0}

Category:
Programmatic

Cause:
A value being used for an SQL bind parameter has a data type that is not suitable for the SQL Statement.

Action:
Specify a parameter value having an appropriate data type.

ESS-00006
Enterprise Scheduler configuration is not initialized.

Category:
Programmatic

Cause:
An operation attempted to access Enterprise Scheduler configuration information before the configuration was initialized.

Action:
Re-try the operation at a later time.

ESS-00007
Operation intended for group, {0}. Configured group is {1}.

Category:
Other

Cause:
An Enterprise Scheduler instance received an event, message, or other data that was intended for an instance of a different group.

Action:
Contact Oracle Support Services.

ESS-00100
Install plan is not present for application {0}.

Category:
Installation

Cause:
The install plan is not present for the application being deployed.

Action:
Contact Oracle Support Services.

ESS-00101
Global data source, {0}, could not be created.

Category:
Installation

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The global data source could not be created.

Action:
Check the underlying cause for details.

ESS-00102
Dependent component, {0}, has not been deployed.

Category:
Installation

Cause:
A dependent component of this component has not been deployed. An error may have occurred when deploying dependent component.

Action:
Check log for errors in deploying dependent component.

ESS-00103
Error finding application {0}.

Category:
Installation

Cause:
An error occurred while attempting to find the specified application.

Action:
Perform the action specified in the chained exception.

ESS-00104
Cannot find object {0} for archive {1}.

Category:
Other

Cause:
The attempt to access the specified object failed.

Action:
None

ESS-00120
Invalid value for dispatcher poll interval.

Category:
Other

Cause:
Attempted to configure an invalid value for the dispatcher minimum or maximum poll interval.

Action:
Retry the operation with a non-negative numeric value.

ESS-00121
Dispatcher poll interval minimum value cannot exceed maximum value.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Attempted to configure a value for the dispatcher minimum poll interval that is greater than the maximum value. Attempted to configure a value for the dispatcher maximum poll interval that is less than the minimum value.

Action:
Retry the operation with a value that is less than or equal to the maximum value. Retry the operation with a value that is equal to or greater than the minimum value.

ESS-00122
Invalid value for processor threads.

Category:
Other

Cause:
Attempted to configure an invalid value for the processor maximum threads.

Action:
Retry the operation with a non-negative numeric value.

ESS-00123
Invalid value for processor starvation threshold.

Category:
Other

Cause:
Attempted to configure an invalid value for the processor starvation threshold.

Action:
Retry the operation with a non-negative numeric value.

ESS-00124
Unable to validate metadata for work assignment {0}.

Category:
Other

Cause:
Attempted to add or remove bindings for an work assignment.

Action:
Retry the operation with a valid work assignment name.

ESS-00500
Failed to create metadata service handle.

Category:
Other

Cause:
An error occurred while starting a Metadata session.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
See the base exception for details.

ESS-00501
Failed to close metadata service handle.

Category:
Other

Cause:
An error occurred while closing a Metadata session.

Action:
See the base exception for details.

ESS-00502
The metadata object type must be specified

Category:
Other

Cause:
The metadata type was not specified when creating the metadata object

Action:
Specify a valid value for the metadata object type

ESS-00503
MetadataServiceHandle is null.

Category:
Programmatic

Cause:
The ESS metadata service handle is null.

Action:
Specify a valid ESS metadata service handle.

ESS-00800
Error attempting notification for SQL job request {0}.

Category:
Other

Cause:
Failed to create notification that SQL job executable completed.

Action:
Review the log file to determine the nature of the problem.

ESS-01000
Failed to open runtime service. {0}

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred opening the RuntimeService handle

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01001
Failed to close runtime service handle. {0}

Category:
Programmatic

Cause:
An error occurred closing the RuntimeService handle

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01002
Illegal attempt to validate request, {0}, when current state, {1}, is not PENDING_VALIDATION.

Category:
Other

Cause:
A request is in an illegal state for validation.

Action:
None

ESS-01003
Illegal operation for an unvalidated request {0}.

Category:
Programmatic

Cause:
The operation is not supported for an unvalidated request.

Action:
Do not attempt this operation unless the request is validated.

ESS-01004
Illegal attempt to set state of request, {0}, to VALIDATION_FAILED when current state, {1}, is not PENDING_VALIDATION.

Category:
Other

Cause:
An internal error occurred.

Action:
None

ESS-01005
Parameter {0} does not exist for request {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
The given parameter name does not exist for this request.

Action:
Specify an existing parameter.

ESS-01006
RuntimeServiceHandle is marked for rollback only.

Category:
Programmatic

Cause:
The ESS runtime service handle has been marked for rollback only.

Action:
Close the ESS runtime service session. Another session may be created for further operations.

ESS-01007
RuntimeServiceHandle is null.

Category:
Programmatic

Cause:
The ESS runtime service handle is null.

Action:
Specify a valid ESS runtime service handle.

ESS-01008
Value for parameter, {0}, has an invalid data type: {1}.

Category:
Programmatic

Cause:
The value for a parameter has an unsupported data type.

Action:
Specify a value which has a supported data type for the parameter.

ESS-01009
Value for parameter, {0}, is not valid.

Category:
Programmatic

Cause:
The value for a parameter is not valid.

Action:
Specify a valid value for the parameter.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-01010
Value for parameter, {0}, must not be null.

Category:
Programmatic

Cause:
The given parameter does not support a null value, or empty string for string parameter.

Action:
Specify a non-null value for the parameter.

ESS-01011
Parameter, {0}, is required but was not specified.

Category:
Programmatic

Cause:
The given parameter is required but was not specified.

Action:
Specify the required parameter.

ESS-01012
Request {0} not found.

Category:
Programmatic

Cause:
A request that was the target of a RuntimeService operation was not found in the runtime store.

Action:
Specify a valid request identifier.

ESS-01013
Failed to lock request {0}. Request not found.

Category:
Programmatic

Cause:
Attemped to lock a request that was not found in the runtime store.

Action:
Specify a valid request identifier.

ESS-01014
Error occurred attempting to lock request {0}.

Category:
Other

Cause:
An error occurred attempting to lock a request in the runtime store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01015
Failed to generate a request identifier.

Category:
Other

Cause:
An error occurred attempting to generate a new request identifier.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01016
Failed to generate a request handle.

Category:
Other

Cause:
An error occurred attempting to generate a new request handle.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01017
Error attempting to access information for request {0}.

Category:
Other

Cause:
An error occurred attempting to access information for a request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01018
Error attempting to update information for request {0}.

Category:
Other

Cause:
An error occurred attempting to update information for a request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01019
Request {0} is not in {1} state. Current state is {2}.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An operation was attempted when the request was not in an expected state.

Action:
Retry the operation when the request is the correct state.

ESS-01021
Failed to create DMS context for new request.

Category:
Programmatic

Cause:
Failed to create a DMS context for a new request.

Action:
Review any linked exceptions to identify the root cause of the error.

ESS-01022
Error occurred retrieving summary data. {0}

Category:
Other

Cause:
An error occurred attempting to retrieve request or application summary information.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01023
Parameter {0} for request {1} is read-only.

Category:
Programmatic

Cause:
Attempted to modify the value for a request parameter that is read-only.

Action:
None

ESS-01024
This operation is illegal for this request. {0}

Category:
Programmatic

Cause:
The invoked operation is not legal for this request.

Action:
None

ESS-01025
The request does not have a schedule. {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
This operation can only be applied to a request with a schedule.

Action:
None

ESS-01026
Schedule for request {0} cannot be changed when in state {1}

Category:
Programmatic

Cause:
The schedule for this request cannot be replaced in the current state.

Action:
None

ESS-01027
Failed to convert schedule to string

Category:
Programmatic

Cause:
The schedule cannot be converted to a string.

Action:
None

ESS-01028
Request submission or validation failed. {0}

Category:
Programmatic

Cause:
An error occurred during request submission or validation.

Action:
None

ESS-01029
Failed to create child request for parent request {0}.

Category:
Programmatic

Cause:
An error occurred while attempting to create a child request for a parent that was submitted with a Schedule or Trigger.

Action:
None

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-01030
Failed to create JobSet step request for parent request {0}, step {1}.

Category:
Programmatic

Cause:
An error occurred while attempting to create a request for a JobSet step.

Action:
None

ESS-01031
Application {0} was not found.

Category:
Programmatic

Cause:
Attempted to submit a request for an application associated with a logical name but no such application was found.

Action:
Deploy the application

ESS-01032
Application {0} was found in more than one process group.

Category:
Programmatic

Cause:
Attempted to submit a request for an application that is deployed to multiple process groups. Unable to determine correct group to use.

Action:
Application should be deployed to only one group.

ESS-01033
Application {0} was not found for process group {1}.

Category:
Programmatic

Cause:
Attempted to submit a request for an application that is deployed to multiple process groups. Unable to determine correct group to use.

Action:
Application should be deployed to only one group.

ESS-01034
Unable to determine the deployed application name for logical application {0}.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Unable to determine the name of the deployed application for the specified logical name.

Action:
Check for deployment errors.

ESS-01035
Unable to determine a logical application name for new request.

Category:
Programmatic

Cause:
Unable to determine the logical application that should be used for a submitted request.

Action:
Specify a value for the SystemProperty.EFFECTIVE_APPLICATION parameter in the metatadata for the JobDefinition or JobSet.

ESS-01036
Unable to determine a process group for new request.

Category:
Programmatic

Cause:
Unable to determine the process group that should be used for a submitted request.

Action:
None

ESS-01037
Job definition is required for a non-Adhoc request submission.

Category:
Programmatic

Cause:
A submit operation was attempted for a non-adhoc job but no metadata id for a JobDefinition or JobSet was given.

Action:
Retry the submit operation and specify a job defintion.

ESS-01038
Read-Only violation for request parameter {0}.

Category:
Programmatic

Cause:
The given parameter is marked as read-only and was specified as a request parameter.

Action:
Retry the operation without the parameter.

ESS-01039
Parameter, {0}, is not allowed in request submission parameters.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
The given parameter is not allowed to be included as a request parameter for a submit operation. Usually such paramters can be set only via a metadata parameter.

Action:
Retry the operation without the given parameter.

ESS-01040
Invalid parameter {0}. Scoped parameters are only supported for JobSet.

Category:
Programmatic

Cause:
A scoped parameter was included in the request parameters specified for the request submisssion of a JobDefinition. Scoped parameters are supported only for a JobSet.

Action:
Retry the submit operation without the scoped parameter.

ESS-01041
Parameter, {0}, is not allowed as a scoped request parameter for JobSet step {1}.

Category:
Programmatic

Cause:
The request parameters for a JobSet submission include a scoped parameter that is not allowed to be specified as a scoped parameter for a JobSet step.

Action:
Retry the submit operation without the scoped parameter.

ESS-01042
Metadata type, {0}, is not supported for a sub-request.Only JobDefinition is supported.

Category:
Programmatic

Cause:
Attempted to submit a sub-request for an unsupported definition type. Subrequest supported only for a JobDefinition.

Action:
Retry the operation using a valid defintion type.

ESS-01043
Failed to get XML for an adhoc Schedule.

Category:
Programmatic

Cause:
Error occurred creating XML representation of an adhoc Schedule.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Fix the adhoc Schedule and retry the operation.

ESS-01046
Start time must be before the end time.

Category:
Programmatic

Cause:
Attempted to submit a request where the start time is after the end time.

Action:
Retry the operation with valid start and end times.

ESS-01047
End time must be after the current time.

Category:
Programmatic

Cause:
Attempted to submit a request where the end time is before the current time.

Action:
Retry the operation with value end time.

ESS-01048
Schedule has expired and no executions are possible.

Category:
Programmatic

Cause:
Attempted to submit a request with a Schedule that has expired.

Action:
Retry the operation with a different Schedule.

ESS-01049
No executions are possible before the given end date.

Category:
Programmatic

Cause:
Attempted to submit a request with a Schedule for which there no executions prior to the end date.

Action:
Retry the operation with a different Schedule.

ESS-01050
One or more requests are currently pending for definition: {0}

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The SystemProperty.ALLOW_MULT_PENDING property is disabled for the request being submitted. Execution is already pending for one or more requests with the same job definition.

Action:
None

ESS-01051
Incompatible with parent request {0} due to Incompatibility definition: {1}

Category:
Programmatic

Cause:
Attempted to submit a sub-request that is incompatible with its parent request due to an Incompatibility definition

Action:
None

ESS-01052
Request handle is not valid for the current execution context of parent request {0}.

Category:
Programmatic

Cause:
The SystemProperty.ALLOW_MULT_PENDING property is disabled for the request being submitted. Execution is already pending for one or more requests with the same job definition.

Action:
None

ESS-01053
Cannot cancel request {0}. Current state is {1}.

Category:
Programmatic

Cause:
Attempted to cancel a request whose current state does not allow the operation to be performed.

Action:
None

ESS-01054
Cannot hold request {0}. Current state is {1}.

Category:
Programmatic

Cause:
Attempted to hold a request whose current state does not allow the operation to be performed.

Action:
None

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-01055
Cannot release request {0}. Current state is {1}.

Category:
Programmatic

Cause:
Attempted to release a request whose current state does not allow the operation to be performed.

Action:
None

ESS-01056
Cannot delete request {0}. Current state is {1}, process phase is {2}.

Category:
Programmatic

Cause:
Attempted to delete a request whose current state or process phase does not allow the operation to be performed.

Action:
Retry the operation at a later time.

ESS-01057
Cannot purge request {0}. Current state is {1}, process phase is {2}.

Category:
Programmatic

Cause:
Attempted to purge a request whose current state or process phase does not allow the operation to be performed.

Action:
Retry the operation at a later time.

ESS-01058
Cannot change priority for request {0}. Current state is {1}.

Category:
Programmatic

Cause:
Attempted to change the priority for a request whose current state does not allow the operation to be performed.

Action:
None

ESS-01059
Delete failed for request {0}. This operation is not supported for a sub-request or JobSet step.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Attempted to perform a delete operation on a child request. Only an absolute parent or instance parent can be the target of a delete operation.

Action:
None

ESS-01060
Purge failed for request {0}. This operation not supported for a sub-request or JobSet step.

Category:
Programmatic

Cause:
Attempted to perform a purge operation on a child request. Only an absolute parent or instance parent can be the target of a purge operation.

Action:
None

ESS-01061
Failed to purge request {0}.

Category:
Programmatic

Cause:
An error occurred attempting to purge a request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01062
Invalid priority value. Valid range is {0} to {1}.

Category:
Programmatic

Cause:
An invalid value for request priority is specified.

Action:
Specify a value in the indicated range.

ESS-01063
Failed to retrieve Schedule for request {0}.

Category:
Programmatic

Cause:
Failed to retrieve the Schedule associated with the given request.

Action:
None

ESS-01065
Cannot recover request {0} with incomplete child requests.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
An attempt was made to manually recover a request with at least one child not in ProcessPhase.Complete.

Action:
Wait for the incomplete child to complete or recover.

ESS-01066
Request state {0} not allowed for manual recovery. State should be canceling or terminal. {1}

Category:
Programmatic

Cause:
An attempt was made to manually recover a request that was in an illegal state.

Action:
Cancel the request.

ESS-01067
Error occurred mapping Filter to CompositeData.

Category:
Programmatic

Cause:
Error occurred mapping Filter to CompositeData.

Action:
Correct the invalid CompositeData instance.

ESS-01068
Unexpected type, {0}, for Filter value {1}.

Category:
Programmatic

Cause:
Unexpected Filter type for Filter value.

Action:
Correct the invalid Filter type.

ESS-01069
Invalid Null input for a Filter {0}.

Category:
Programmatic

Cause:
Unexpected null input for a filter.

Action:
Provider a non null value.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-01070
Cannot change start time or end time for request of type {0}

Category:
Programmatic

Cause:
The start and end times cannot be updated for a request this type.

Action:
None

ESS-01071
Schedule for request {0} cannot be for a retry attempt

Category:
Programmatic

Cause:
The schedule for this request cannot be replaced during a retry.

Action:
None

ESS-01072
Metadata schedule and adhoc schedule were specified. Only one schedule can be used.

Category:
Programmatic

Cause:
A metadata schedule and an adhoc schedule were specified for an operation. Only one schedule should be specified.

Action:
Retry the operation with only one schedule

ESS-01073
Failed to open runtime service: {0}. {1}

Category:
Programmatic

Cause:
An error occurred opening the RuntimeService handle

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01074
Failed to open runtime service due to resource error. {0}

Category:
Programmatic

Cause:
A resource error occurred opening the RuntimeService handle.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01075
Cannot delete execution group, {0}, because active instances exist.

Category:
Programmatic

Cause:
A execution group must not be deleted when active instances exist in its cluster.

Action:
Use only when the cluster associated with the execution group no longer exists.

ESS-01076
Execution group {0} is already being deleted.

Category:
Programmatic

Cause:
The execution group is already being deleted.

Action:
Wait for first deletion to complete.

ESS-01077
Failed to get async request information for message {0}.

Category:
Other

Cause:
Failed to retrieve information for web service asynchronous callback.

Action:
Check the logs.

ESS-01078
Request {0} is required to be asynchronous for this operation.

Category:
Other

Cause:
This operation cannot be executed on a synchronous request.

Action:
Do not invoke the operation on this request.

ESS-01079
Error attempting to access request information.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred attempting to access request information.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01080
Failed to persist request information.

Category:
Other

Cause:
An error occurred attempting to persist request information to the runtime store.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01081
Failed to persist request parameter {0}, scope {1}.

Category:
Other

Cause:
An error occurred attempting to store a request parameter.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01082
Failed to persist read-only constraint for parameter {0}.

Category:
Other

Cause:
An error occurred attempting to store parameter read-only constraint.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01083
Error attempting to retrieve parameters for request {0}.

Category:
Other

Cause:
An error occurred attempting to retrieve request parameters.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01084
Error attempting to update parameter, {0}, for request {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
An error occurred attempting to update a request parameter.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01085
Failed to add parameter {0}, scope {1}, for request {2}.

Category:
Other

Cause:
An error occurred attempting to add a request parameter.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01086
Operation not supported for scoped parameter, {0}.

Category:
Programmatic

Cause:
A scoped parameter was specified for an operation that is not supported for scoped parameter.

Action:
None

ESS-01087
Failed to convert Document to byte sequence.

Category:
Other

Cause:
An error occurred converting a Document to byte sequence.

Action:
None

ESS-01088
Failed to convert byte sequence to Document.

Category:
Other

Cause:
An error occurred converting a byte sequence to a Document.

Action:
None

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-01089
Failed to get storable value for parameter, {0}.

Category:
Other

Cause:
An error occurred converting a parameter value to its stored representation.

Action:
None

ESS-01090
Failed to get typed value for parameter, {0}, data type, {1}.

Category:
Other

Cause:
An error occurred converting a parameter value from its stored representation to a typed value.

Action:
None

ESS-01091
Unable to obtain incompatibility value for property, {0}.

Category:
Programmatic

Cause:
Unable to materialize an incompatibility value for the specified property.

Action:
Review the causeBy exception chain to determine the specific failure.

ESS-01092
Incompatibility conflict detected between request {0} and parent request {1} for incompatibility {2}.

Category:
Other

Cause:
Incompatibility conflict detected between a JobSet step request and a JobSet request of its parent chain. An incompatibility lock for that incompatibility will not be acquired for the step request.

Action:
None

ESS-01093
Number of acquired request incompatibilities ({0}) does not match number of incompatibility locks ({1}) for request {2}.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Runtime service system failure.

Action:
Review the log file for underlying causes.

ESS-01094
Error attempting to process getCompletionStatus call since another getCompletionStatus call with message id {0} is pending for reply.

Category:
Other

Cause:
An error occured attempting to process getCompletionStatus call since another getCompletionStatus call with messageid {0} is pending for reply.

Action:
Attach different ws message id or wait for the previous call finished before submit getCompletionStatus call.

ESS-01095
Unable to find ess hosting app with logical application name {0}.

Category:
Programmatic

Cause:
Unable to find ess hosting app with logical application name {0}.

Action:
Specify a correct parameter of application or deploy the ess hosting app with expected logical application name.

ESS-01096
Query result handle is null.

Category:
Programmatic

Cause:
The value of the query result handle argument is null.

Action:
Specify an argument value that is not null.

ESS-01097
Request, {0}, is not of expected type, {1}.

Category:
Programmatic

Cause:
The request was found in ESS runtime storage but was not of the expected execution type.

Action:
Specify a request identifier for a request of the correct execution type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-01098
No request is found for id {0} {1}

Category:
Programmatic

Cause:
A request was not found in ESS runtime storage corresponding to the indicated request identifier.

Action:
Specify a request identifier for an existing request.

ESS-01099
An error occurred invoking the RuntimeService MBean. {0}

Category:
Programmatic

Cause:
An error occurred invoking the RuntimeService MBean.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01100
Error retrieving details about Oracle Scheduler job {0} for request {1}.

Category:
Programmatic

Cause:
An error occurred while trying to retrieve details about the Oracle Scheduler job associated with an ESS request identifier.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01101
Error retrieving the OUTPUT_LIST for parallel children of request {0}.

Category:
Programmatic

Cause:
An error occurred while trying to retrieve the OUTPUT_LIST for parallel child requests for an ESS request identifier.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01102
Failed to register application, {0}, with instance {1}. {2}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Application registration failed with ESS.

Action:
Contact Oracle Support Services.

ESS-01103
Failed to unregister all applications for instance {0}. {1}

Category:
Other

Cause:
Application deregistration failed with ESS.

Action:
Contact Oracle Support Services.

ESS-01104
Failed to unregister application, {0}, for instance {1}. {2}

Category:
Other

Cause:
Application deregistration failed with ESS.

Action:
Contact Oracle Support Services.

ESS-01105
Failed to check in instance {0}. {1}

Category:
Other

Cause:
Registration update of ESS instance failed.

Action:
Check that database is running and data source is correct.

ESS-01106
Failed to clear checkin entry for instance {0}. {1}

Category:
Other

Cause:
Unregistration of ESS instance failed.

Action:
Check that database is running and data source is correct.

ESS-01107
Failed to remove timed out instance registrations. {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Unregistration of ESS timed-out instances failed.

Action:
Check that database is running and data source is correct.

ESS-01108
Failed to fetch elements from wait queue. {0}.

Category:
Other

Cause:
An error occurred attempting to fetch elements from the wait queue.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01109
Failed to access wait queue element for request {0}. {1}

Category:
Other

Cause:
An error occurred attempting to access a wait queue element.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01110
Failed to lock wait queue element for request {0}. {1}

Category:
Other

Cause:
Failed to obtain a lock on the wait queue element for a request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01111
Failed to insert wait queue element for request {0}. {1}

Category:
Other

Cause:
An error occurred while attempting to add an element to the wait queue.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-01112
Failed to delete wait queue element for request {0}. {1}

Category:
Other

Cause:
An error occurred while attempting to remove an element from the wait queue.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01113
Failed to hold wait queue element for request {0}. {1}

Category:
Other

Cause:
An error occurred attempting to hold the wait queue element for a request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01114
Failed to release wait queue element for request {0}. {1}

Category:
Other

Cause:
An error occurred attempting to release the wait queue element for a request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01115
Failed to undefer wait queue element for request {0}. {1}

Category:
Other

Cause:
An error occurred attempting to undefer the wait queue element for a request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01116
Query field name, {0}, is not a valid name.

Category:
Programmatic

Cause:
A query filter was specified with an unknown query field.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Remove that query field from the filter, or specify a known name for the query field.

ESS-01117
Value for query field, {0}, has an unsupported data type: {1}

Category:
Programmatic

Cause:
A query filter was specified in which the value for a query field has an unsupported data type.

Action:
Specify a query value whose data type is a supported type.

ESS-01118
Query field, {0}, has a null value which is not supported for the {1} operator.

Category:
Programmatic

Cause:
A query filter was specified with a field that has a null value and a comparator that does not support a null value. A null query value requires an EQUALS or NOT_EQUALS comparator.

Action:
Specify a non-null value for that query field, or specify an EQUALS or NOT_EQUALS comparator.

ESS-01119
Query field, {0}, has a value with a data type, {1}, that is not supported for the {2} comparator.

Category:
Programmatic

Cause:
A query filter was specified with a field that has a value whose data type is not supported for the specified comparator.

Action:
Specify a query value whose data type is supported by the comparator being used.

ESS-01120
Query field, {0}, does not support the {1} comparator.

Category:
Programmatic

Cause:
A query filter was specified with a field that does not support the specified comparator.

Action:
Specify a comparator that is supported by that query field.

ESS-01121
Failed to retrieve field {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
A failure occurred while retrieving the specified field.

Action:
Check that database is running and data source is correct.

ESS-01122
Error attempting to access information for incompatibility {0} for request {1}.

Category:
Programmatic

Cause:
An error occurred attempting to access request incompatibility information.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01123
Error attempting to update information for incompatibility {0} for request {1}.

Category:
Programmatic

Cause:
An error occurred attempting to update request incompatibility information.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01124
Error attempting to add information for incompatibility {0} for request {1}.

Category:
Programmatic

Cause:
An error occurred attempting to add request incompatibility information.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01125
Size of request parameter {0} used for incompatibility {1} is too large.

Category:
Programmatic

Cause:
The value for a request parameter that would be used for an Incompatibility is too large.

Action:
Use a smaller value for the parameter value.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-01126
Application {0} is active in more than one group.

Category:
Programmatic

Cause:
An application with the same name is already a member of another ESS group.

Action:
Redeploy the current application with a unique deployment name.

ESS-01127
Application {0} is not active in any ESS instance.

Category:
Programmatic

Cause:
The application could not be found in the current ESS group.

Action:
Ensure the application is deployed and running in the correct ESS group.

ESS-01128
Application with deployed name {0} exists with multiple logical names.

Category:
Programmatic

Cause:
An application with the same deployment name but different logical name is already a member of this ESS group.

Action:
Redploy this application with a unique deployment name. If this application is the same application as the conflicting app, then change the logical name to match.

ESS-01129
Application with logical name {0} was not found.

Category:
Programmatic

Cause:
The application is not a member of this ESS group.

Action:
Ensure the application is deployed and running in the correct ESS group.

ESS-01130
Application with logical name {0} exists with multiple deployed names.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An application with the same logical name but different deployment name is already a member of this ESS group.

Action:
Redploy this application with a unique logical application name. If this application is the same application as the conflicting app, then change the deployment name to match.

ESS-01131
Application with deployed name {0} was not found.

Category:
Programmatic

Cause:
The application is not a member of this ESS group.

Action:
Ensure the application is deployed and running in the correct ESS group.

ESS-01132
Unable to access processor bindings. {0}

Category:
Other

Cause:
Processor bindings in the runtime store could not be accessed.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01133
Processor binding {0} could not be found.

Category:
Other

Cause:
Processor binding could not be found.

Action:
Check that you specified the correct binding name.

ESS-01134
Processor binding {0} already exists.

Category:
Other

Cause:
Processor binding already exists.

Action:
Change the name of the binding.

ESS-01135
Unable to notify server of processor bindings change. {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Unable to notify server of bindings change.

Action:
Check that database is running and data source is correct.

ESS-01136
Unable to access processor bindings change notification. {0}

Category:
Other

Cause:
Unable to access bindings change notification.

Action:
Check that database is running and data source is correct.

ESS-01137
Unable to notify server to refresh selector. {0}

Category:
Other

Cause:
Unable to notify server to refresh selector.

Action:
Check that database is running and data source is correct.

ESS-01138
Unable to access refresh selector notification. {0}

Category:
Other

Cause:
Unable to access refresh selector notification.

Action:
Check that database is running and data source is correct.

ESS-01139
Value, {1}, for query field, {0}, is invalid.

Category:
Programmatic

Cause:
A query filter was specified in which the value for a query field was invalid.

Action:
Specify a valid query value.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-01140
Error accessing async throttle information for ({0}, {1}). {2}

Category:
Other

Cause:
An error occurred while accessing runtime async throttle information.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01141
Async throttle already exists for Workshift = {0}. {1}

Category:
Other

Cause:
The throttle is already configured for the Workshift.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01142
Async throttle not found for Workshift = {0}.

Category:
Other

Cause:
The throttle was not found for the Workshift.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01143
Failed to process filter {0}.

Category:
Programmatic

Cause:
Filter evaluation failed.

Action:
Correct the invalid Filter.

ESS-01144
Failed to retrieve timed out instance registrations. {0}

Category:
Other

Cause:
Query of ESS timed out registrationsinstance failed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check that database is running and data source is correct.

ESS-01145
Failed to lock instance {0}. {1}

Category:
Other

Cause:
Locking the ESS instance registration failed.

Action:
Check that database is running and data source is correct.

ESS-01146
Error accessing runtime async throttle information. {0}

Category:
Other

Cause:
An error occurred while accessing the throttle configuration.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01147
Failed to get DiagnosticState for instance {0}. {1}

Category:
Other

Cause:
Failed to get DiagnosticState for the instance.

Action:
None

ESS-01148
Failed to clear registrations for execution group {0}, isolation group {1}. {2}

Category:
Other

Cause:
Failed to clear registrations for execution group.

Action:
None. Registrations will be automatically retried

ESS-01149
Error accessing unthrottled work assignments ({0}). {1}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred while accessing the unthrottled work assignments.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01150
Unable to delete workshift with outstanding async workers: {0}

Category:
Other

Cause:
A workshift that has outstanding async workers not be deleted.

Action:
Wait until all async workers have completed and then delete the workshift.

ESS-01151
Error accessing async limit information for workshift = {0}. {1}

Category:
Other

Cause:
An error occurred while accessing runtime async limit information.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01152
Error accessing async allocation information for work assignment = {0}. {2}

Category:
Other

Cause:
An error occurred accessing runtime async allocation information.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01153
Failed to add incompatibility lock {0}.

Category:
Programmatic

Cause:
An error occurred attempting to add incompatibility lock information.

Action:
Review the causeBy exception chain to determine the specific failure.

ESS-01154
Failed to delete incompatibility lock {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
An error occurred attempting to delete incompatibility lock information.

Action:
Review the causeBy exception chain to determine the specific failure.

ESS-01155
Failed to lock incompatibility lock {0}.

Category:
Programmatic

Cause:
An error occurred attempting to delete incompatibility lock information.

Action:
Review the causeBy exception chain to determine the specific failure.

ESS-01156
Failed to update reference count for incompatibility lock {0}.

Category:
Programmatic

Cause:
An error occurred attempting to delete incompatibility lock information.

Action:
Review the causeBy exception chain to determine the specific failure.

ESS-01157
Failed to retrieve incompatibility locks for request {0}.

Category:
Programmatic

Cause:
An error occurred attempting to retrieve incompatibility locks held by a request.

Action:
Review the causeBy exception chain to determine the specific failure.

ESS-01158
Failed to lock incompatibility locks for request {0}.

Category:
Programmatic

Cause:
An error occurred attempting to lock any incompatibility locks held by a request.

Action:
Review the causeBy exception chain to determine the specific failure.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-01159
Failed to retrieve request incompatibility for request {0}.

Category:
Programmatic

Cause:
An error occurred attempting to retrieve request incompatibility information.

Action:
Review the causeBy exception chain to determine the specific failure.

ESS-01160
Failed to lock request incompatibility for request {0}.

Category:
Programmatic

Cause:
An error occurred attempting to lock request incompatibility information.

Action:
Review the causeBy exception chain to determine the specific failure.

ESS-01161
Failed to retrieve request incompatibility.

Category:
Programmatic

Cause:
An error occurred attempting to retrieve request incompatibility information.

Action:
Review the causeBy exception chain to determine the specific failure.

ESS-01162
Failed to lock request incompatibility.

Category:
Programmatic

Cause:
An error occurred attempting to lock request incompatibility information.

Action:
Review the causeBy exception chain to determine the specific failure.

ESS-01163
Failed to add reference for incompatibility {0}, job definition {1}, request {2}.

Category:
Programmatic

Cause:
An error occurred attempting to add job incompatibility reference.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the causeBy exception chain to determine the specific failure.

ESS-01164
Reference already exists for incompatibility {0}, job definition {1}, request {2}.

Category:
Programmatic

Cause:
Job incompatibility reference already exists.

Action:
None

ESS-01165
Failed to retrieve incompatibility metadata from runtime store for job definition {0}, request {1}.

Category:
Programmatic

Cause:
An error occurred attempting to retrieve incompatibility metadata from runtime store for a job definition.

Action:
Review the causeBy exception chain to determine the specific failure.

ESS-01166
Query for application registration information failed.

Category:
Other

Cause:
An error occurred while querying the application registration table.

Action:
Contact Oracle Support Services

ESS-01167
Failed to cache metadata in runtime store for request {0}, metadata {1}.

Category:
Other

Cause:
An error occurred while saving metadata in the ESS runtime store.

Action:
Review the log file to determine the nature of the problem.

ESS-01168
Binding mode conflict for {0}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Binding mode conflict. Work assignment may be bound in either standard or exclusive mode, but not in both modes on two different servers in the same processing group.

Action:
Use the correct binding mode.

ESS-01169
Workshift does not exist {0}

Category:
Other

Cause:
The workshift does not exist.

Action:
Ensure you are using the correct workshift name, and that the workshift exists.

ESS-01170
Failed to retrieve runtime store information.

Category:
Other

Cause:
An error occurred attempting to retrieve runtime store information.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01171
Runtime store compatibility information is not available.

Category:
Other

Cause:
Unable to retrieve Enterprise Scheduler Service runtime store compatibility information.

Action:
Contact Oracle Support Services.

ESS-01172
Runtime store compatibility check failed; mid-tier check version: {0}, runtime store version: {1}, schema name: {2}

Category:
Other

Cause:
The Enterprise Scheduler Service mid-tier is not compatible with the database runtime store.

Action:
Upgrade database schema or mid-tier to be compatible

ESS-01173
Runtime store status check failed; runtime store status: {0}, schema name: {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The Enterprise Scheduler Service runtime store is not valid.

Action:
Contact Oracle Support Services.

ESS-01174
Runtime store compatibility check failed; mid-tier check version: {0}, runtime store version: {1}, schema name: {2}. Check disabled, allowing operation to continue.

Category:
Other

Cause:
The Enterprise Scheduler Service mid-tier is not compatible with the database runtime store.

Action:
Upgrade database schema or mid-tier to be compatible.

ESS-01175
Runtime store status check failed; runtime store status: {0}, schema name: {1}. Check disabled, allowing operation to continue.

Category:
Other

Cause:
The Enterprise Scheduler Service runtime store is not valid.

Action:
Contact Oracle Support Services.

ESS-01176
Triggers are not supported.

Category:
Programmatic

Cause:
A trigger was specified to the metadata service or when submitting a request.

Action:
Do not create triggers and specify a null value for any trigger parameter.

ESS-01177
Failed to delete job incompatibility references for request {0} from runtime store.

Category:
Programmatic

Cause:
An error occurred attempting to remove job incompatibility references.

Action:
Review the causeBy exception chain to determine the specific failure.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-01178
Query for server coordination information failed.

Category:
Other

Cause:
An error occurred while querying the server coordination table.

Action:
Check that database is running and data source is correct.

ESS-01179
Schedule includes explicit times that are before the start time.

Category:
Programmatic

Cause:
Attempted to submit a reuqest with Adhoc schedule that contains time that are before the current time.

Action:
Retry the operation after modifying the times in Adhoc Schedule.

ESS-01180
Unable to determine database type.

Category:
Other

Cause:
Unable to determine the database type being used for the runtime store.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01181
Failed to delete information for request {0}.

Category:
Other

Cause:
An error occurred attempting to remove request information from the runtime store.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01182
Failed to update wait queue element for request {0}.

Category:
Other

Cause:
An error occurred attempting to update the wait queue element for a request.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01183
Wait queue operation failed.

Category:
Other

Cause:
An error occurred attempting a wait queue operation.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01184
Update of server coordination information failed.

Category:
Other

Cause:
An error occurred attempting to update the server coordination table.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01185
Failed to get async request information for request {0}.

Category:
Other

Cause:
Failed to retrieve information for web service asynchronous callback.

Action:
Check the logs.

ESS-01186
Failed to update async request information for message {0}.

Category:
Other

Cause:
Failed to update information for web service asynchronous callback.

Action:
Check the logs.

ESS-01187
Failed to add or modify attribute {0} of namespace {1} for request {2}.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred attempting to modify request attribute information.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01188
Failed to access attribute {0} of namespace {1} for request {2}.

Category:
Other

Cause:
An error occurred attempting to access request attribute information.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01189
Failed to delete attribute {0} of namespace {1} for request {2}.

Category:
Other

Cause:
An error occurred attempting to remove request attribute information.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01190
Value for attribute {0} of namespace {1} has an invalid data type: {2}.

Category:
Other

Cause:
The value for a request attribute has an unsupported data type.

Action:
Specify a value which has a supported data type for the attribute.

ESS-01191
Failed to get storable value for attribute {0} of namespace {1}.

Category:
Other

Cause:
An error occurred converting a request attribute value to its stored representation.

Action:
None

ESS-01192
Failed to get typed value for attribute {0} of namespace {1} for data type {2}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
An error occurred converting a request attribute value from its stored representation to a typed value.

Action:
None

ESS-01193
Value for attribute {0} of namespace {1} has data type {2} instead of the expected data type {3}

Category:
Other

Cause:
Data type for request attribute value does not match the type already estabished for that attribute.

Action:
None

ESS-01194
An unknown or unsupported request detail type was specified: {0}.

Category:
Other

Cause:
An unknown or unsupported request detail type was specified.

Action:
Provide a valid request detail type.

ESS-01195
Error attempting to access parameter, {0}, for request {1}.

Category:
Other

Cause:
An error occurred attempting to access request parameter information.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01196
Unable to get the current time from the database.

Category:
Programmatic

Cause:
Unable to get the current time from the database.

Action:
Review the log file for possible underlying causes.

ESS-01307
Invalid write to output content for request {0}, content name {1}.

Category:
Other

Cause:
Invalid write to content due to incorrect content type.

Action:
Ensure the type of data you are writing is compatible with the content type.

ESS-01308
The content does not exist for request {0}, content name {1}.

Category:
Other

Cause:
The content does not exist for the request.

Action:
Ensure you are using the correct content name.

ESS-01309
Invalid content handle.

Category:
Other

Cause:
The content handle is invalid.

Action:
Re-open the content and use the valid handle.

ESS-01310
The file does not exist for request {0}, file name {1}.

Category:
Other

Cause:
The file does not exist for the request.

Action:
Ensure you are using the correct file name.

ESS-01312
Failed to close the output file for request {0}, file name {1}. {2}.

Category:
Other

Cause:
Failed to close the output file for the request.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the log file for runtime cause.

ESS-01313
Invalid directory for request {0}, directory {1}.

Category:
Other

Cause:
The directory is invalid for the request.

Action:
Ensure you are using the correct file name.

ESS-01314
Incompatible content operation for request {0}, content name {1}.

Category:
Other

Cause:
The operation is incompatible with the existing content type.

Action:
It is not allowed to export output content that was not imported. Updating existing output content using the API requires using the same content type.

ESS-01315
Error creating directory for request {0}, directory {1}.

Category:
Other

Cause:
Failed to create the request directory.

Action:
Ensure that RequestFileDirectory is configured correctly for the application and that the directory is writeable.

ESS-01316
Error exporting output content for request {0}, status {1}.

Category:
Other

Cause:
Failed to export output content to the request output directory.

Action:
Ensure that RequestFileDirectory is configured correctly for the application and that the directory is writeable. Check the log for errors.

ESS-01317
Error importing output content for request {0}, status {1}, directory {2}. {3}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Failed to import output files from the request output directory.

Action:
Check the log for errors.

ESS-01318
Failed to import the log for request {0}, log file {1}. {2}.

Category:
Other

Cause:
Failed to import the request log.

Action:
Review the log file for runtime cause.

ESS-01319
Invalid content handle mode for request {0}, content {1}.

Category:
Other

Cause:
The content handle is opened in the wrong mode for the operation being performed. The content must be opened in read for fetching and write for importing.

Action:
Re-open the content in the correct mode for the operation being performed.

ESS-01320
Invalid RequestFileDirectory {0} for application {1}.

Category:
Other

Cause:
The application has an invalid RequestFileDirectory configured.

Action:
Configure a valid RequestFileDirectory for the application.

ESS-01321
Error deleting files for request {0}, directory {1}.

Category:
Other

Cause:
Failed to delete files from the request work directory.

Action:
Manually delete the files from the file system.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-01322
Error preserving log or output files for request {0}. {1}

Category:
Other

Cause:
Failed to preserve log or output files from the request work directory. This may be due to a problem with the directory or a previous version of the output file may already exist.

Action:
No action. The files have been removed.

ESS-01323
Invalid content open options for request {0} content category {1}, content name {2}.

Category:
Other

Cause:
The content open options are invalid.

Action:
Ensure that the content open options contain a single operation, and if applicable, options that are consistent with that operation.

ESS-01500
Dispatcher cannot be started while in {0} state.

Category:
Other

Cause:
Attempted to start the dispatcher when it is in a state for which the operation is not allowed.

Action:
Retry the operation when the dispatcher state is STOPPED.

ESS-01501
Dispatcher cannot be stopped while in {0} state.

Category:
Other

Cause:
Attempted to stop the dispatcher when it is in a state for which the operation is not allowed.

Action:
Retry the operation when the dispatcher state is STARTING or RUNNING.

ESS-01502
Processor cannot be started while in {0} state.

Category:
Other

Cause:
Attempted to start the processor when it is in a state for which the operation is not allowed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Retry the operation when the processor state is STOPPED.

ESS-01503
Processor cannot be stopped while in {0} state.

Category:
Other

Cause:
Attempted to stop the processor when it is in a state for which the operation is not allowed.

Action:
Retry the operation when the processor state is STARTING or RUNNING.

ESS-01504
Cannot add endpoint {0} for application {1} because endpoint {2} already exists for application {3}.

Category:
Deployment

Cause:
The endpoint to add conflicts with an already existing endpoint.

Action:
Modify the endpoint name.

ESS-01505
Failed to retrieve information for request {0}.

Category:
Other

Cause:
Failed to retrieve runtime information for a request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01506
Unable to create diagnostic incident. {0}

Category:
Other

Cause:
Failed to create diagnostic incident.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01507
Unable to register diagnostic dumps or rules. {0}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Failed to register diagnostic dumps or rules.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01508
Unable to unregister diagnostic dumps or rules. {0}

Category:
Other

Cause:
Failed to unregister diagnostic dumps or rules.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01509
Unable to create the diagnostic dump {0}. {1}

Category:
Other

Cause:
Failed to create the diagnostic dump.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01601
JobSet request {0} completed with an invalid final state {1}.

Category:
Other

Cause:
A JobSet request has been marked as completed, but has an unexpected final state.

Action:
Review the log file for errors pertaining to the request.

ESS-01602
First step is not defined in serial JobSet: {0}.

Category:
Other

Cause:
Cannot process a JobSet request due to invalid JobSet definition. The first step of a serial JobSet is not defined.

Action:
None

ESS-01603
Error dispatching subrequests for parent request {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
An error occurred while attempting to dispatch subrequests for a parent request in PAUSED state.

Action:
Review the log file to determine the nature of the problem.

ESS-01604
Failed to create {0} work unit for request {1}.

Category:
Other

Cause:
Unable to create the specified work unit for a request.

Action:
Review the log file to determine the nature of the problem.

ESS-01605
Failed to create event, {0}, for request {1}.

Category:
Other

Cause:
An error occurred while attempting to create an event for a request.

Action:
Review the log file to determine the nature of the problem.

ESS-01606
Failed to mark request {0} as completed.

Category:
Other

Cause:
An error prevented the request from being marked completed

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01607
Request {0} cannot be marked complete. State is {1}, process phase is {2}.

Category:
Other

Cause:
The request state and/or process phase prevents a request from being completed.

Action:
None

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-01608
Error occurred while processing request {0} by request dispatcher.

Category:
Other

Cause:
Failed to perform dispatch proccessing for the specified request.

Action:
Review the log file to determine the nature of the problem.

ESS-01700
Unrecognized request type : {0}.

Category:
Programmatic

Cause:
The job type used for the request is not supported.

Action:
Correct the job type definition.

ESS-01701
Unable to instantiate executable wrapper for execution type {0}.

Category:
Installation

Cause:
Unable to instantiate wrapper class used to process the request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01702
Unable to instantiate pre-process callback handler for request {0} using class name, {1}.

Category:
Programmatic

Cause:
Failed to instantiate an object for the pre-process callback handler class associated with a request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01703
Unable to instantiate post-process callback handler for request {0} using class name, {1}.

Category:
Programmatic

Cause:
Failed to instantiate an object for the post-process callback handler class associated with a request.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01704
Error occurred at initiate stage during execution of request {0}. {1}

Category:
Programmatic

Cause:
An error occurred during the initiate stage of a request execution.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01705
Error occurred at finalize stage during execution of request {0}. {1}

Category:
Programmatic

Cause:
An error occurred during the finalize stage of a request execution.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01706
Invalid execution result code, {0}, for request {1}.

Category:
Programmatic

Cause:
A REQUEST_FINALIZATION event contained an unknown result code.

Action:
This indicates an internal error. Contact Oracle Support Services.

ESS-01707
Unable to instantiate Executable for Java request {0} using class name, {1}.

Category:
Programmatic

Cause:
Failed to instantiate Executable object for a Java request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01708
Database job for request {0} ended with error: {1}.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Execution of a SQL request has ended with a error.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01709
Database job for request {0} ended with warning: {1}.

Category:
Programmatic

Cause:
Execution of a SQL request has ended with a warning.

Action:
None.

ESS-01710
Database job for request {0} was cancelled.

Category:
Programmatic

Cause:
Execution of a SQL request has been cancelled.

Action:
None.

ESS-01711
Database job for request {0} was paused. Paused state value: {1}.

Category:
Programmatic

Cause:
Execution of a SQL job request has been paused to allow one or more sub-requests to execute.

Action:
None. The execution of the paused request will be resumed once the sub-requests have completed.

ESS-01712
Failed to create database job for request {0}.

Category:
Other

Cause:
An error occurred trying to create an Oracle Scheduler job used to execute a SQL job request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01713
Error cancelling database job for request {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
An error occurred during post-execution clean tasks for an Oracle Scheduler job used to execute a SQL job request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01714
Database job for request {0} ended with business error: {1}.

Category:
Programmatic

Cause:
Execution of a SQL request has ended with a biz error.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01715
Failed to create database job for request {0} using Oracle Scheduler job class {1}.

Category:
Other

Cause:
An error occurred trying to create an Oracle Scheduler job used to execute a SQL job request with the given Oracle Scheduler job class.

Action:
Verify the EXECUTE privilege on the Oracle Scheduler job class has been granted to the ESS schema user. Review the log file for attached exceptions to determine the nature of the problem.

ESS-01716
Unable to process JobSet request {0}. JobSet definition has no steps: {1}

Category:
Programmatic

Cause:
The JobSet definition associated with a JobSet request has no steps.

Action:
Review the metadata of the JobSet definition for the specified metadata id.

ESS-01900
Error constructing ESS command {0}. {1}

Category:
Other

Cause:
An error is present in the command format.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Contact Oracle Support Services.

ESS-01901
Unsupported value, {0}, for attribute {1}.

Category:
Programmatic

Cause:
An unknown value was specified for a parameter.

Action:
Specify a valid attribute value.

ESS-01903
Unknown command type {0}. {1}

Category:
Other

Cause:
An unknown command type was submitted.

Action:
None

ESS-01904
Document is not valid for work {0}.

Category:
Other

Cause:
The command document is invalid for this Enterprise Scheduler server

Action:
None. The command will be deferred.

ESS-01905
Attribute {0} value {1} from command document does not match value {2} from command creation.

Category:
Other

Cause:
The internal command state is inconsistent for the given attribute.

Action:
Contact administrator.

ESS-01906
Error retrieving available command work.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Error occurred while retrieving command work to process.

Action:
Review the log file for runtime cause.

ESS-01907
Failed to access command work {0}.

Category:
Other

Cause:
Error occurred attempting to access command work.

Action:
Review the log file for runtime cause.

ESS-01908
Failed to update command work {0}.

Category:
Other

Cause:
Error occurred attempting to update command work.

Action:
Review the log file for runtime cause.

ESS-01909
Failed to delete command work {0}.

Category:
Other

Cause:
Error occurred attempting to delete command work.

Action:
Review the log file for runtime cause.

ESS-01910
Failed to delete command work for request {0}.

Category:
Other

Cause:
Error occurred attempting to delete command work for a request.

Action:
Review the log file for runtime cause.

ESS-01970
Error during request purge processing.

Category:
Other

Cause:
An error was encountered during purge of request data.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01971
Error while purging request data from table {0} for request {1}.

Category:
Other

Cause:
An error was encountered during purge of request data from the specified table.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01972
Error during request purge processing for session {0}.

Category:
Other

Cause:
An error was encountered during purge of request data.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01973
Error while purging request data from table {0} for session {1}.

Category:
Other

Cause:
An error was encountered during purge of request data from the specified table.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01974
Error while purging request data from table {0} for request {1}, session {2}.

Category:
Other

Cause:
An error was encountered during purge of request data from the specified table.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01980
Batch delete initialization failed.

Category:
Other

Cause:
An error occurred during initialization of batch delete support.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01981
Failed to delete request {0}. Reason: {1}

Category:
Other

Cause:
An error occurred attempting to delete a request.

Action:
None

ESS-01982
Insufficient privileges to delete request {0}.

Category:
Other

Cause:
Execution user of a batch delete job does not have sufficient privileges to delete the request.

Action:
Batch delete job should be submitted only by ESS administrator

ESS-01983
Error determining requests for batch delete.

Category:
Other

Cause:
An error occurred attempting to determine requests to delete.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01984
Error occurred while executing batch delete request {0}. Cause: {1}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred during request execution.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01985
Execution of request {0} was cancelled.

Category:
Other

Cause:
Request execution was canceled.

Action:
None

ESS-01987
Runtime store error during batch delete.

Category:
Other

Cause:
Runtime store error occurred during batch delete operation.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01988
Failed to lock request for batch delete.

Category:
Other

Cause:
Unable to lock one or more requests during batch delete operation

Action:
None

ESS-01989
Batch delete request {0} failed to delete request {1}. Reason: {2}

Category:
Other

Cause:
Batch delete job failed to delete the specified request.

Action:
Review log file to determine the reason.

ESS-01995
Failed to create delete session.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Failed to initialize delete session used for request data delete or purge.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01996
Failed to lock delete session table.

Category:
Other

Cause:
Failed to lock delete session table used for request data delete or purge.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01997
Failed to access delete session information.

Category:
Other

Cause:
Failed to access delete session information used for request data delete or purge.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-01998
Runtime store operation failed for delete session {0}.

Category:
Other

Cause:
Runtime store error occurred during delete session operation.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-02001
User {0} does not have execute permission on metadata object {1}. Request {2} execution is aborted.

Category:
Other

Cause:
User {0} does not have execute permission on metadata object {1}. Request {2} execution is aborted.

Action:
Check the policy assignment..

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-02002
User {0} does not have sufficient privilege to perform operation {1}.

Category:
Other

Cause:
User {0} does not have sufficient privilege to perform operation {1}.

Action:
Grant the policy to the user {0}..

ESS-02003
User {0} does not have sufficient privilege to perform operation {1} on request {2}.

Category:
Other

Cause:
User {0} does not have sufficient privilege to perform operation {1} on request {2}.

Action:
Grant the policy to the user {0}..

ESS-02004
User or appid {0} is not a valid entry in the identity store.

Category:
Other

Cause:
{0} can not be authenticated.

Action:
Check the user settting.

ESS-02005
User {0} does not have {1} privilege on metadata object {2}. Request {3} validation failed.

Category:
Other

Cause:
User {0} does not have {1} privilege on metadata object {2}. Request {3} validation failed.

Action:
Check the policy assignment..

ESS-02006
User {0} does not have sufficient privilege to perform operation {1} on job set {2}, failed steps are {3}.

Category:
Other

Cause:
User {0} does not have sufficient privilege to perform operation {1} on jobset {2}, failed steps are {3}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Grant the policy to the user {0}..

ESS-02007
User or appid {0} that job {1} runs as is not a valid entry in the identity store.

Category:
Other

Cause:
The user or appid {0} is not a valid identity or can not be authenticated.

Action:
Check your metadata definition.

ESS-02008
Invalid value {0} specified for FADataSecurityPolicyOverrides property in ess-config. Continuing permission checks using default FND policy.

Category:
Other

Cause:
Invalid value specified for FADataSecurityPolicyOverrides property in ess-config

Action:
Use a supported value.

ESS-02200
Mismatched request handles for request {0}.

Category:
Other

Cause:
The request may have been retried.

Action:
Update with request execution context from new execution if desired.

ESS-02220
Failed to deliver web service callback for message {0} for request {1}.

Category:
Other

Cause:
The web service asynchronous callback message could not be delivered.

Action:
The action may be retried. Check the log files.

ESS-02221
Invalid web service request message {0} for getCompletionStatus operation.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The web service request to getCompletionStatus was invalid.

Action:
Check the attached exceptions and fix the web service request.

ESS-03000
Metadata name cannot contain character '/'

Category:
Other

Cause:
Invalid metdata type name

Action:
Provide a valid metadata name

ESS-03001
Both explicit date and recurrence cannot be null.

Category:
Other

Cause:
Both explicit date and recurrence cannot be null.

Action:
Provide explicit date or recurrence.

ESS-03002
ExclusionDefinition must contain at least one exclusion

Category:
Other

Cause:
ExclusionDefinition is empty

Action:
Include atleast one exclusion in ExclusionDefinition.

ESS-03003
Incompatibility already has an entity for job definition:{0}

Category:
Other

Cause:
Incompatibility already has the corresponding job definition.

Action:
Don't add the job definition to the Incompatibility.

ESS-03004
Incompatibility defined for a single entity must be self-incompatible on that entity.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Incompatibility defined for a single entity must be self-incompatible on that entity

Action:
A valid incompatibility definition must have at least two entities or one self-incompatible entity

ESS-03005
Identifier not specified for incompatibility entity.

Category:
Other

Cause:
Identifier not specified for incompatibility entity.

Action:
Specify identifier for incompatibility entity.

ESS-03006
Property not specified for an entity of a {0} incompatibility

Category:
Other

Cause:
Property not specified for Incompatibility entity.

Action:
Specify property for Incompatibility entity.

ESS-03007
Property {0} is defined as read-only in the JobType definition.

Category:
Other

Cause:
Read-only property is defined in JobType definition

Action:
Make sure that no read-only property is specified for Jobtype Definition.

ESS-03008
Unable to convert steps to XML Document

Category:
Other

Cause:
Conversion of JobSet's JobSetStep objects to an XML Document failed

Action:
Internal error

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-03009
Failed to validate Jobset/JobsetSteps document against the schema :{0}

Category:
Other

Cause:
Failed to validate Jobset/JobsetSteps document against the schema

Action:
Internal error

ESS-03010
Unable to convert XML steps to objects

Category:
Other

Cause:
Unable to convert XML steps to objects

Action:
Internal error

ESS-03011
First step must be defined for serial job set.

Category:
Other

Cause:
Jobset has steps, but the first step is not defined.

Action:
First step must be defined for serial jobset.

ESS-03012
First step id does not specify a defined step:{0}

Category:
Other

Cause:
First step id of Jobset does not specify a defined step

Action:
First step must be a defined one for serial jobset.

ESS-03013
Invalid link step id for {0}

Category:
Other

Cause:
Invalid link step id

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check that step links are valid step ids..

ESS-03014
Jobset has no steps.

Category:
Other

Cause:
Jobset has no steps

Action:
Ensure Jobset have steps

ESS-03015
Invalid Serial JobSet:loops are not allowed. See step {0}

Category:
Other

Cause:
Invalid Serial JobSet:loops are not allowed

Action:
Avoid loops in serial Jobset

ESS-03016
Step already exists:{0}

Category:
Other

Cause:
Step already exists in Jobset

Action:
Avoid adding duplicate step

ESS-03017
Can''t define Procedure Name, or CmdLine for a Java JobType definition

Category:
Other

Cause:
Cannot define Procedure Name, or CmdLine for a Java JobType definition

Action:
Java job type cannot have properties of SQL or PROCESS Job Type.

ESS-03018
Can''t define Class Name, CmdLine, or for a SQL JobType definition

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Cannot define Class Name, CmdLine for a SQL JobType definition

Action:
Procedure name can be defined for SQL JobType.

ESS-03019
Can''t define Class Name or Procedure name for a Binary JobType definition

Category:
Other

Cause:
Cannot define Class Name or Procedure name for a Process JobType definition

Action:
CmdLine supported for Process JobType.

ESS-03020
Both FREQUENCY and ICAL Expression cannot be null

Category:
Other

Cause:
Both FREQUENCY and ICAL Expression cannot be null

Action:
Specify either Frequency or Ical expression.

ESS-03021
Cannot have start date after end date

Category:
Other

Cause:
Cannot have start date after end date

Action:
Correct the start or end date

ESS-03022
Cannot specify Recurrence Fields WEEK_OF_MONTH without DAY_OF_WEEK

Category:
Other

Cause:
Cannot specify recurrence fields WEEK_OF_MONTH without DAY_OF_WEEK

Action:
Given weeks of month, days of week is must.

ESS-03023
Cannot specify MONTH_OF_YEAR for MONTHLY frequency. MONTH_OF_YEAR can be specified for YEARLY frequency.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Cannot specify recurrence fields MONTH_OF_YEAR for MONTHLY frequency.

Action:
Month of year can be specified for yearly frequency.

ESS-03024
Cannot specify MONTH_OF_YEAR, WEEK_OF_MONTH or DAY_OF_MONTH for WEEKLY frequency

Category:
Other

Cause:
Cannot specify recurrence fields MONTH_OF_YEAR, WEEK_OF_MONTH or DAY_OF_MONTH for WEEKLY frequency

Action:
Other fields cannot have bigger scope then frequency

ESS-03025
Only TIME_OF_DAY field can be specified with DAILY frequency

Category:
Other

Cause:
Only time of day field can be specified with daily frequency.

Action:
Only time of day field can be specified with daily frequency.

ESS-03026
RecurrenceFields cannot be specified with 'HOURLY', 'MINUTELY' or 'SECONDLY' frequency

Category:
Other

Cause:
Recurrence fields cannot be specified with HOURLY, MINUTELY or SECONDLY frequency

Action:
Recurrence fields cannot be specified with HOURLY, MINUTELY or SECONDLY frequency

ESS-03027
RecurrenceFields have invalid Month, Date combinations.

Category:
Other

Cause:
Recurrence fields have invalid Month, Date combinations.

Action:
Specify correct month, date combinations.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-03028
RecurrenceSet can"t have more than {0} recurrences

Category:
Other

Cause:
RecurrenceSet cannot have more than 5 recurrences

Action:
Reduce the number of recurrences

ESS-03029
Event filters should have no more than one operator

Category:
Other

Cause:
Event filters have more than one operator.

Action:
Correct Event filters to have no more than one operator.

ESS-03030
{0} and {1} are the only supported fields for event filters

Category:
Other

Cause:
EventType and EventName are the only supported fields for event filters.

Action:
EventType and EventName are the only supported fields for event filters.

ESS-03031
Work Assignment must specify at least one Workshift

Category:
Other

Cause:
Work Assignment has no Workshift.

Action:
Work Assignment must specify at least one Workshift.

ESS-03033
Illegal value provided for Actions in parameter

Category:
Other

Cause:
Illegal value provided for Metadata permission actions in parameter.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Illegal value provided for Metadata permission actions in parameter.

ESS-03034
MetadataPermissionStrings parameter cannot be null.

Category:
Other

Cause:
MetadataPermissionStrings parameter cannot be null or empty.

Action:
Specify non-empty metadata permission strings

ESS-03035
Actions parameter cannot be null.

Category:
Other

Cause:
Actions parameter cannot be null or empty.

Action:
Actions parameter cannot be null or empty.

ESS-03036
Failed to commit changes and close service handle. Referential Integrity violation detected. Referencing objects exist for the object(s) being deleted.

Category:
Other

Cause:
Deletion of object not possible as it is referenced by some other object

Action:
Check the dependent objects before deletion.

ESS-03037
Invalid options due to missing operation: {0}

Category:
Other

Cause:
Invalid options.

Action:
Provide valid options.

ESS-03038
Invalid options for Read operation: {0}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Invalid options for Read operation.

Action:
Specify correct options for read operation.

ESS-03039
Invalid options for Write operation: {0}

Category:
Other

Cause:
Invalid options for Write operation.

Action:
Specify correct options for write operation.

ESS-03040
Invalid options for Import operation: {0}

Category:
Other

Cause:
Invalid options for Import operation.

Action:
Specify correct options for import operation

ESS-03041
Invalid options for Log content: {0}

Category:
Other

Cause:
Invalid options for Log content.

Action:
Specify correct options for log content.

ESS-03042
Definition is required

Category:
Other

Cause:
Job or jobset definition Id is missing

Action:
Job or jobset definition Id is required

ESS-03043
Incompatibility definition, {0}, from runtime store is {1} incompatibility type. Expected type is {2}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Incompatibility type mismatch between metadata store and runtime store for the request

Action:
There should be no mismatch. Internal error

ESS-03044
Incompatibility definition, {0},from runtime store does not contain an entity for {1}

Category:
Other

Cause:
Incompatibility definition from runtime store does not contain an entity for Job/Jobset

Action:
Entity must be present in Incompatibility definition. Internal error.

ESS-03045
Map parameter cannot be null.

Category:
Other

Cause:
Config properties map is null

Action:
Config properties map cannot be null

ESS-03046
Application parameter cannot be null.

Category:
Other

Cause:
Application parameter provided to fetch config properties is null

Action:
Provide non null application name.

ESS-03047
PropertyType enum cannot be null.

Category:
Other

Cause:
PropertyType enum is null.

Action:
PropertyType enum cannot be null.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-03048
PropertyName parameter cannot be null.

Category:
Other

Cause:
PropertyName parameter is null.

Action:
PropertyName parameter cannot be null.

ESS-03049
PropertyValue parameter cannot be null.

Category:
Other

Cause:
PropertyValue parameter is null.

Action:
PropertyValue parameter cannot be null.

ESS-03050
Trigger definition cannot be null.

Category:
Other

Cause:
Trigger definition is null.

Action:
Trigger definition cannot be null.

ESS-03051
No specialization in configured bindings for {0}

Category:
Other

Cause:
No specialization in configured bindings.

Action:
Specify specialization in configured bindings.

ESS-03052
{0} is not bound on this instance

Category:
Other

Cause:
Work Assignment not bound on this instance.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Work Assignment not bound on this instance.

ESS-03053
Request parameters cannot be null.

Category:
Other

Cause:
Request parameters are null.

Action:
Request parameters cannot be null.

ESS-03054
Illegal value provided for Actions in parameter.

Category:
Other

Cause:
Illegal value provided for Actions in parameter.

Action:
Provide proper values for Actions in parameter.

ESS-03055
Invalid binding mode: name={0},exclusiveMode={1}

Category:
Other

Cause:
Invalid binding mode.

Action:
Invalid binding mode.

ESS-03056
Filter parameters with DATETIME datatype are not supported

Category:
Other

Cause:
Filter parameters with DATETIME datatype are not supported.

Action:
DATETIME datatype cannot be used with Filter parameters

ESS-03058
Value of deltaStart or deltaEnd cannot be negative

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Value of deltaStart or deltaEnd is negative.

Action:
Value of deltaStart or deltaEnd cannot be negative

ESS-03059
Datatype is not supported for a parameter value:{0}

Category:
Other

Cause:
Unsupported datatype for parameter.

Action:
Unsupported datatype for parameter.

ESS-03060
Failed to convert parameter value to data type:{0}

Category:
Other

Cause:
Failed to convert parameter value to data type.

Action:
Failed to convert parameter value to data type.

ESS-03061
Value of parameter {0} has data type {1} instead of the expected data type {2}

Category:
Other

Cause:
Parameter value datatype mismatch.

Action:
Parameter value datatype mismatch.

ESS-03062
Step must be JobDefinition or JobSet

Category:
Other

Cause:
Invalid step type.

Action:
Step must be JobDefinition or JobSet.

ESS-03063
Unknown data type for parameter {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Unknown datatype for parameter.

Action:
Unknown datatype for parameter.

ESS-03064
Operation not supported for scoped parameter {0}

Category:
Other

Cause:
Operation not supported for scoped parameter.

Action:
Operation not supported for scoped parameter.

ESS-03065
RecurrenceSet must contain at least one recurrence

Category:
Other

Cause:
RecurrenceSet is empty.

Action:
RecurrenceSet must contain atleast one recurrence.

ESS-03066
Unable to delete workshift {0} that is referenced by a work assignment.

Category:
Other

Cause:
Wokshift deletion failed as it is referenced by a work assignment

Action:
Ensure that workshift is not referenced in a work assignment before deletion

ESS-03067
Unable to delete schedule {0} that is referenced by a workshift.

Category:
Other

Cause:
Schedule deletion failed as it is referenced by a work shift

Action:
Ensure that schedule is not referenced by a work shift before deletion

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-05000
Error occurred. {0}

Category:
Other

Cause:
Enterprise Scheduler Service encountered an error.

Action:
Review the log file for indications of the problem.

ESS-05010
Request {0} not found.

Category:
Other

Cause:
Request with the given request id can not be found in the database.

Action:
None

ESS-05011
Request {0} set to {1} state.

Category:
Other

Cause:

Action:

ESS-05012
Request {0} set to {2} state. Previous state was {1}.

Category:
Other

Cause:

Action:

ESS-05013
