Request {0}. Process phase {1} not in valid phases {2}.

Category:
Other

Cause:
The process phase of the request is inconsistent with its current status.

Action:
None

ESS-05015
Oracle Enterprise Scheduler. Release Version: {0}, Build: {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Information about release version and build label of Oracle Enterprise Scheduler.

Action:
No action is necessary.

ESS-05016
Oracle Enterprise Scheduler runtime store. Schema Name: {0}, Version: {1}, Status: {2}

Category:
Other

Cause:
Information about the runtime store used by Oracle Enterprise Scheduler.

Action:
No action is necessary.

ESS-05021
Failed to begin transaction.

Category:
Other

Cause:
Being of a user transaction failed.

Action:
Review the log file for runtime cause.

ESS-05022
Failed to commit transaction.

Category:
Other

Cause:
Failed to commit the transaction.

Action:
Review the log file for runtime cause.

ESS-05023
Failed to rollback transaction.

Category:
Other

Cause:
Failed to rollback the transaction.

Action:
Review the log file for runtime cause.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-05024
Failed to set transaction timeout.

Category:
Other

Cause:
Failed to set transaction timeout.

Action:
Review the log file for runtime cause.

ESS-05025
Error in transaction processing. The transaction is eligible to be retried.

Category:
Other

Cause:
A recoverable SQL error was encountered

Action:
None

ESS-05038
Failed to find JNDI resource for {0}.

Category:
Configuration

Cause:
Failed to perform a JNDI lookup for a given resource name.

Action:
Verify the configuration for the resource.

ESS-05039
Error occurred closing JNDI naming context.

Category:
Other

Cause:
An error occurred while trying to close a JNDI naming context.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-05043
Failed to commit SQL transaction.

Category:
Other

Cause:
An error occurred trying to commit database transaction.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-05044
Failed to rollback SQL transaction.

Category:
Other

Cause:
An error occurred trying to rollback database transaction.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-05045
Error using SQL ResultSet. {0}

Category:
Other

Cause:
An error occurred while using an SQL ResultSet.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-05046
Failed to close an SQL ResultSet.

Category:
Other

Cause:
An error occurred trying to close an SQL ResultSet.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-05047
Failed to close an SQL Statement.

Category:
Other

Cause:
An error occurred trying to close an SQL Statement.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-05048
Failed to obtain a database connection.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred trying to obtain a database connection.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-05049
Failed to close a database connection.

Category:
Other

Cause:
An error occurred trying to close a database connection.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-05053
Failed to map object of type {0} to CompositeData.

Category:
Other

Cause:
An error occurred converting an ESS object to a javax.management.openmbean.CompositeData object

Action:
Contact Oracle Support Services

ESS-05054
Failed to map CompositeData object to {0}.

Category:
Other

Cause:
An error occurred converting a javax.management.openmbean.CompositeData object to an ESS object

Action:
Contact Oracle Support Services

ESS-05055
Illegal state transition from {0} to {1} for request {2}.

Category:
Other

Cause:
An update event's timing may have tried to change the state after the request has begun a transition to a terminal state.

Action:
This warning can be ignored.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-05100
Operator {1} is invalid with query field {0}. Valid operators are: {2}.

Category:
Other

Cause:
Operator is invalid for the given query field.

Action:
Use a valid operator.

ESS-05101
Comparator {1} is invalid with query field {0}. Valid comparators are: {2}.

Category:
Other

Cause:
Comparator is invalid for the given query field.

Action:
Use a valid comparator.

ESS-05102
Value of type {1} is invalid with query field {0}. Valid value types are: {2}.

Category:
Other

Cause:
Value type is invalid for the given query field.

Action:
Use a valid value type.

ESS-05103
Value of type null is invalid with query field {0}.

Category:
Other

Cause:
Null value type is invalid for the given query field.

Action:
Use a valid non-null value type.

ESS-05104
Failed to check in {0} work unit {1} for request {2}. {3}

Category:
Other

Cause:
The work unit for the given request could not be checked in or deleted.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
The work unit operation should be automatically retried, so no action is necessary.

ESS-05105
Metadata of type {0} cannot be customized. Only metadata of the following types can be customized: {1}.

Category:
Other

Cause:
An invalid metadata type was provided.

Action:
Provide a valid customizable metadata type.

ESS-05106
Property {0} cannot be assigned a value of type {1}. Values for property {0} can only have the following types: {2}.

Category:
Other

Cause:
The data type of the provided property is not valid.

Action:
Provide a value with the correct data type.

ESS-05107
An error occurred while parsing the metadata object id string: {0}

Category:
Other

Cause:
An error occurred while parsing a metadata object id string.

Action:
See base exception for detailed underlying cause.

ESS-05108
The user provided metadata type of {0} does not match the metadata type of {1} in the metadata object id string

Category:
Other

Cause:
The metadata type specified by the user does not match the metadata type specified by the metadata object id string.

Action:
Check the metadata repository to ensure the metadata is correct or specify the correct type and try again.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-05109
While performing a metadata query, the following problem was detected with one of the query results: {1} The query will continue but exclude the piece of metadata with name {0}. This may affect the expected query results.

Category:
Other

Cause:
A problem occurred while processing a result of the metadata query.

Action:
Check the piece of metadata causing the problem for any issues and check the health of the metadata respository.

ESS-05110
An error occurred while retrieving the metadata object with name {0} of type {1}.

Category:
Other

Cause:
A problem occurred while retrieving a piece of metadata.

Action:
See the base exception for the cause then check the piece of metadata causing the problem for any issues and check the health of the metadata respository.

ESS-05111
Bulk metadata customization input file {0} does not exist or is not readable.

Category:
Other

Cause:
Invalid XML input file specified for bulk customization.

Action:
Provide the correct input XML file for bulk customization.

ESS-05112
Bulk metadata customization output file {0} is not writable.

Category:
Other

Cause:
Invalid XML output file specified for bulk customization.

Action:
Provide the correct output XML file absolute pathname.

ESS-05113
Argument type is not supported: {0}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The type of argument is unsupported.

Action:
Use a supported argument type.

ESS-05114
Failed to check in {0} work unit {1}. {2}

Category:
Other

Cause:
The work unit could not be checked in or deleted.

Action:
The work unit operation should be automatically retried, so no action is necessary.

ESS-05202
ESS connections.xml {0} property lookup returns null. Please verify adf-domain-config for ESS is set up and configured.

Category:
Other

Cause:
ESS connections.xml property lookup returns NULL.

Action:
Verify adf-domain-config for ESS is set up and configured.

ESS-05203
ESS connections.xml {0} property lookup returns Unresolved EL Expression. Please verify adf-domain-config for ESS is set up and configured.

Category:
Other

Cause:
ESS connections.xml property lookup returns Unresolved EL Expression.

Action:
Verify adf-domain-config for ESS is set up and configured.

ESS-05204
NamingException looking up EssConnection {0}.

Category:
Other

Cause:
NamingException looking up EssConnection.

Action:
Review the log file for attached exceptions to determine the cause.

ESS-05205
Error reading EssConnection Tokens from adf-domain-config.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Error reading EssConnection Tokens from adf-domain-config.

Action:
Review the log file for attached exceptions to determine the cause.

ESS-05206
Error writing EssConnection Tokens to adf-domain-config.

Category:
Other

Cause:
Error writing EssConnection Tokens to adf-domain-config.

Action:
Review the log file for attached exceptions to determine the cause.

ESS-05490
Service MBeans registration failed.

Category:
Other

Cause:
Service MBeans registration failed.

Action:
Review the log file for underlying causes.

ESS-05700
Failed to obtain a metadata service instance. {0}

Category:
Other

Cause:
Failed to obtain a metadata service instance.

Action:
Review the log file for underlying causes.

ESS-05704
An error occurred invoking the MetadataService MBean. {0}

Category:
Programmatic

Cause:
An error occurred invoking the RuntimeService MBean.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-05705
Failed to save the {0} with name {1} in application {2}.

Category:
Programmatic

Cause:
Failed to save the metadata object.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-05706
{0} with name {1} does not exist in application {2}.

Category:
Programmatic

Cause:
Unable to find the metadata object.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-05707
{0} with name {1} already exists in application {2}.

Category:
Programmatic

Cause:
The metadata object already exists.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-05708
Failed to delete the {0} with name {1} in application {2}.

Category:
Programmatic

Cause:
Unable to delete the metadata object

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-05709
Metadata parameter {0} starts with {1} which is a reserved parameter keyword.

Category:
Programmatic

Cause:
A property defined by the metadata object contains a reserved keyword.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Remove the reserved keyword from the property name.

ESS-05710
A validation error occurred while validating JobSet step {0}.

Category:
Programmatic

Cause:
A JobSet step failed validation.

Action:
See the base validation exception for the original validation error.

ESS-05711
A null value cannot be used when querying the {0} field.

Category:
Other

Cause:
A value of null was used as the query value.

Action:
Provide a non-null argument.

ESS-05712
The metadata object with id {0} cannot be deleted because it belongs to one of the following restricted packages: {1}. However, metadata in the custom namespace, {2}, can be deleted.

Category:
Programmatic

Cause:
The metadata object to be deleted resides in a read-only package.

Action:
This metadata object cannot be deleted by end users.

ESS-05713
The metadata object with id {0} cannot be updated because it belongs to one of the following restricted packages: {1}. However, metadata in the customer namespace, {2}, can be updated.

Category:
Programmatic

Cause:
The metadata object to be updated resides in a read-only package.

Action:
This metadata object cannot be updated by end users.

ESS-05714
The metadata object with id {0} cannot be customized. Only metadata in the following packages can be customized: {1}. However, metadata in the customer namespace, {2}, cannot be customized.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
The metadata object to be customized does not reside in a package that allows customization.

Action:
This metadata object cannot be customized by end users.

ESS-05715
Metadata parameter {0} cannot have value {1} because {1} is a reserved value.

Category:
Programmatic

Cause:
The value of a property defined by the metadata object contains a reserved keyword.

Action:
Change the value of the property.

ESS-05716
Metadata parameter {0} cannot have an empty or null value.

Category:
Programmatic

Cause:
The value of a property defined by the metadata object was empty or null.

Action:
Change the value of the property.

ESS-06000
Failed to obtain a runtime service instance. {0}

Category:
Other

Cause:
Failed to obtain a runtime service instance.

Action:
Review log file for underlying cause.

ESS-06002
Failed to close runtime service handle. {0}

Category:
Other

Cause:
Failed to close runtime service handle.

Action:
Review the log file for underlying causes.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-06003
Runtime service system failure. {0}

Category:
Other

Cause:
Runtime service system failure.

Action:
Review the log file for underlying causes.

ESS-06100
No request found for the given id {0}.

Category:
Programmatic

Cause:
A request was not found in ESS runtime storage corresponding to the indicated request identifier.

Action:
Specify a request identifier for an existing request.

ESS-06102
An error occurred invoking the RuntimeService MBean.

Category:
Other

Cause:
An error occurred invoking the RuntimeService MBean.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06500
Starting ESS resource adapter.

Category:
Other

Cause:

Action:

ESS-06501
Stopping ESS resource adapter.

Category:
Other

Cause:

Action:

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-06502
Endpoint activation for {0}.

Category:
Other

Cause:

Action:

ESS-06503
Endpoint deactivation for {0}.

Category:
Other

Cause:

Action:

ESS-06510
Registering application, {0}, via ClassLoader: {1}

Category:
Other

Cause:

Action:

ESS-06511
Registered application: {0} adfConfigUrl: {1} connUrl: {2}

Category:
Other

Cause:

Action:

ESS-06512
Removed registered configuration for application {0}.

Category:
Other

Cause:

Action:

ESS-06514
Application {0} is already registered.

Category:
Other

Cause:

Action:

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-06515
The logical name of this application, {0}, is already in use by the following deployed applications (possibly in different domains): {1}.

Category:
Other

Cause:
The logical name of this application is already in use by other applications using a different deployed name as this application.

Action:
If this is the same application as one of the above applications then its deployed name should be changed to match. Otherwise, select a unique logical name for this application.

ESS-06516
The deployed name of this application, {0}, is already in use by the following logical applications (possibly in different domains): {1}.

Category:
Other

Cause:
The deployed name of the application is already in use by other applications using a different logical name as this application.

Action:
If this is the same application as one of the above applications then its logical name should be changed to match. Otherwise, select a unique deployed name for this application.

ESS-06517
Logical application name {0} is a reserved keyword.

Category:
Other

Cause:
The specified logical application name is a reserved keyword.

Action:
Change the name of the logical application.

ESS-06521
Failed to start request dispatcher.

Category:
Other

Cause:
An error occurred while trying to start the request dispatcher.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06522
Failed to start request processor.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
An error occurred while trying to start the request processor.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06523
Failed to start system event service.

Category:
Other

Cause:
An error occurred while trying to start the system event service.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06524
Failed to start application event service.

Category:
Other

Cause:
An error occurred while trying to start the application event service.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06525
Failed to start heartbeat monitor.

Category:
Other

Cause:
An error occurred while trying to start the heartbeat monitor.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06526
Failed to update configuration information.

Category:
Other

Cause:
An error occurred while trying to update configuration information.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-06527
Failed to start deferred monitor.

Category:
Other

Cause:
An error occurred while trying to start the deferred monitor.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06528
Failed to start work unit worker.

Category:
Other

Cause:
An error occurred while trying to start the work unit worker.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06529
Failed to start change event service.

Category:
Other

Cause:
An error occurred while trying to start the change event service.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06530
Dispatcher cannot be started when it is in the {0} state.

Category:
Other

Cause:
Dispatcher cannot be started when it is in the specified state.

Action:
Start the dispatcher when it is in STOPPED state.

ESS-06531
Dispatcher cannot be stopped when it is in the {0} state.

Category:
Other

Cause:
Dispatcher cannot be stopped when it is in the specified state.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Stop the dispatcher when it is in STARTING or RUNNING state.

ESS-06532
Processor cannot be started when it is in the {0} state.

Category:
Other

Cause:
Processor cannot be started when it is in the specified state.

Action:
Start the processor when it is in STOPPED state.

ESS-06533
Processor cannot be stopped when it is in the {0} state.

Category:
Other

Cause:
Processor cannot be stopped when it is in the specified state.

Action:
Stop the processor when it is in STARTING or RUNNING state.

ESS-06534
{0} is an unversioned ESS hosting application. Unversioned hosting applications are deprecated and will not be supported in subsequent releases. Some features are only supported for versioned applications.

Category:
Other

Cause:
The ESS hosting application does is not versioned.

Action:
Make the application versioned or expect certain features not to work.

ESS-06538
No endpoint is available for {0}.

Category:
Other

Cause:
An application using the specified endpoint application name is not deployed.

Action:
Review the log file for underlying causes.

ESS-06539
Could not create endpoint for {0}.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred creating an application endpoint.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06540
Failed to get an endpoint to run dispatcher for application {0}.

Category:
Other

Cause:
Dispatch monitor was unable to obtain an application endpoint. This may happen when the system is busy and does not necessary indicate a problem.

Action:
Review the log file for indications of a problem if this persists.

ESS-06541
Error during dispatch for application {0}.

Category:
Other

Cause:
Error during dispatch for application.

Action:
Review the log for underlying causes.

ESS-06542
Error getting applications to dispatch.

Category:
Other

Cause:
Error getting applications for dispatch.

Action:
Review the log for underlying causes.

ESS-06543
Failed to deactivate endpoint for application {0}.

Category:
Other

Cause:
An error occurred while removing an application endpoint.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06557
Failed to start heartbeat worker {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
ESS heart beat monitor failed to start due to a system failure.

Action:
Check the causeBy clause of this exception to find more details.

ESS-06558
Failed to get an endpoint to run a heartbeat for application {0}.

Category:
Other

Cause:
Heartbeat monitor was unable to obtain an application endpoint. This may happen when the system is busy and does not necessary indicate a problem.

Action:
Review the log file for indications of a problem if this persists.

ESS-06560
Error encountered by event worker.

Category:
Other

Cause:
Error encountered by event worker.

Action:
Review the log for underlying causes.

ESS-06570
Failed to get metadata for work assignment {0}.

Category:
Other

Cause:
Unable to retrieve work assignment metadata when analyzing work assignment bindings. The work assignment is ignored.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06571
Failed to get workshift metadata ({0}) for work assignment {1}.

Category:
Other

Cause:
Unable to retrieve workshift metadata when analyzing a work assignment binding. The work assignment processing will ignore the workshift.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06572
Failed to get schedule metadata ({0}) for work assignment {1}.

Category:
Other

Cause:
Unable to retrieve schedule metadata when analyzing a work assignment binding. The work assignment processing will ignore the workshift associated with the schedule.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06573
Failed to start work assignment {0}.

Category:
Other

Cause:
Unable to start the first worker for the work assignment. The start will be retried in a short time.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06574
Failed to start starvation thread for work assignment {0}.

Category:
Other

Cause:
Unable to start the starvation worker for the work assignment. The work assignment will be activated without the starvation worker.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06575
Skipping inactive work assignment {0}.

Category:
Other

Cause:
The work assignment is defined as inactive and is being skipped.

Action:
If the work assignment should be active, change it to active and reload work assignment metadata.

ESS-06576
Binding default work assignment.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The default work assignment is being bound because no user-defined work assignments were bound.

Action:
No action is necessary.

ESS-06577
Skipping inactive workshift {0} for work assignment {1}.

Category:
Other

Cause:
The workshift is being skipped because it is inactive. It may have an allocation of 0 or a duration of 0.

Action:
No action is necessary.

ESS-06578
Started work assignment {0}.

Category:
Other

Cause:
Started the work assignment.

Action:
No action is necessary.

ESS-06579
Stopped work assignment {0}.

Category:
Other

Cause:
Stopped the work assignment.

Action:
No action is necessary.

ESS-06580
Skipping invalid work assignment {0}.

Category:
Other

Cause:
The work assignment is being ignored because it is invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the work assignment and correct the problem. Ensure the work assignment has at least one workshift defined.

ESS-06581
Skipping invalid work assignment binding {0}.

Category:
Other

Cause:
The work assignment is being ignored because the binding is invalid.

Action:
Check the work assignment binding mode and correct the problem.

ESS-06582
Skipping completed work assignment {0}.

Category:
Other

Cause:
The work assignment has completed and will never again become active. It is being skipped.

Action:
If the work assignment should not be completed, check the workshift schedules to ensure they are correct and reload work assignment metadata.

ESS-06583
Cannot delete bound work assignment {0}.

Category:
Other

Cause:
A work assignment that is bound may not be deleted.

Action:
Unbind the work assignment and then delete it.

ESS-06584
Reloading metadata for work assignment {0}.

Category:
Other

Cause:
Reloaded the work assignment metadata.

Action:
No action is necessary.

ESS-06585
Unable to bind work assignment {0} due to invalid workshift {1}.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
In order to bind a work assignment, each of its workshifts must have an allocation of at least one. If the workshift has a schedule, the schedule must be unexpired, and the workshift duration must be > 0.

Action:
Fix the workshift and try again to bind the work assignment.

ESS-06586
Work assignment must include at least one workshift to be bound, {0}.

Category:
Other

Cause:
To be bound, a work assignment must have at least one workshift and be active.

Action:
Fix the work assignment and try again to bind it.

ESS-06587
Invalid update of a bound work assignment {0}.

Category:
Other

Cause:
A work assignment that is bound must have at least one workshift.

Action:
Add at least one workshift to the work assignment and retry the update.

ESS-06588
Failed to bind the ESS internal work assignment. {0}.

Category:
Other

Cause:
Unable to bind the ESS internal work assignment. The server will be started without the binding, and the default work assignment will be used.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06589
Binding the ESS internal work assignment.

Category:
Other

Cause:
The ESS internal work assignment is being bound for a new server.

Action:
No action is necessary.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-06590
Error encountered by the worker for work assignment {0}.

Category:
Other

Cause:
Error encountered by worker for work assignment.

Action:
Review the log file for underlying causes.

ESS-06592
Error while processing request {0} for application {1}.

Category:
Other

Cause:
Error while processing request for application

Action:
Review the log file for underlying causes.

ESS-06593
Required property, {0}, is not present in message received for work assignment {1}.

Category:
Other

Cause:
Required property is not present in message received for work assignment.

Action:
Add the required request property for work assignment.

ESS-06594
Failed to schedule additional work for work assignment {0}. {1}

Category:
Other

Cause:
Setting Quiesce state to specified quiesce state.

Action:
No action is necessary.

ESS-06755
ESS instance is in an incompatible state and cannot transition to {0}.

Category:
Other

Cause:
ESS instance is in an incompatible state and cannot transition to specified quiesce state.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06756
QuiesceESS operation invoked with the following arguments:

Category:
Other

Cause:
QuiesceESS operation invoked with specified args.

Action:
No action is necessary.

ESS-06757
QuiesceESS operation invoked with invalid arguments, ignoring specified quiesce operation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
QuiesceESS operation invoked with invalid argumentss.

Action:
Check quiesceESS operations arguments and correct them.

ESS-06758
Forced UnQuiesce done, as Non-idempotent quiesce operation invoked, with instance in {0} state.

Category:
Other

Cause:
Forced UnQuiesce done, as Non-idempotent quiesce operation invoked, with an active quiesce state.

Action:
No action is necessary.

ESS-06759
Non-idempotent scheduled operation invoked resulting in Quiesce schedule override.

Category:
Other

Cause:
Non-idempotent scheduled operation invoked resulting in Quiesce schedule override.

Action:
No action is necessary.

ESS-06760
UnQuiesceESS operation transitioning instance from {0} state to POST_QUIESCE state.

Category:
Other

Cause:
UnQuiesce operation transitioning instance from specified Quiesce state to POST_QUIESCE state.

Action:
No action is necessary.

ESS-06761
Runtime service exception retrieving request details in Quiesce state.

Category:
Other

Cause:
Runtime service exception encountered retrieving request details in Quiesce state.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06762
Runtime service exception querying for running {0} jobs in Quiesce state.

Category:
Other

Cause:
Runtime service exception querying for running jobs in Quiesce state.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06763
Error retrieving persisted quiesce state or schedule for this instance.

Category:
Other

Cause:
Error retrieving persisted quiesce state or schedule for this instance.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06764
Error persisting quiesce state or schedule for this instance.

Category:
Other

Cause:
Error persisting quiesce state or schedule for this instance.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06765
Error terminating running job for request {0} in second stage of quiesce state.

Category:
Other

Cause:
Error terminating running job in second stage of quiesce state.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06800
Error handling {0} event for request {1} by request dispatcher.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:

ESS-06805
Request {0} is in illegal state {1} ({2}). Skipping processing and deleting from wait queue.

Category:
Other

Cause:
Request is in illegal state. Skipping processing and deleting from wait queue.

Action:
Review the log for underlying causes.

ESS-06806
Request {0} not found in runtime store. Skipping processing and deleting from wait queue.

Category:
Other

Cause:
Request not found in runtime store. Skipping processing and deleting from wait queue.

Action:
No Action is necessary.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-06807
Error occurred while dispatching requests.

Category:
Other

Cause:
An error occurred while attempting to dispatch one or more requests.

Action:
Review the log file to determine the nature of the problem.

ESS-06816
Error processing request {0} by request dispatcher.

Category:
Other

Cause:
An error occurred during the request dispatching process for the given request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06817
No subrequests exist for paused request {0}. Request execution will be resumed.

Category:
Other

Cause:
No sub-requests are active for this paused request.

Action:
None

ESS-06820
Failed to retrieve Schedule for request {1}.

Category:
Other

Cause:
Failed to retrieve Schedule needed to determine the next schedule execution time.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06821
Failed to update error information for request {0}. {1}

Category:
Other

Cause:
Failed to update the error information for a request.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the log file for to determine the nature of the problem.

ESS-06830
Error occurred processing post-execution work for request {0}. WorkId: {1}

Category:
Other

Cause:
An error occurred while processing a post-execution work unit.

Action:
Review the log file to determine the nature of the problem.

ESS-06831
Cannot process post-execution work for request {0}. State is {1}, process phase is {2}. WorkId: {3}

Category:
Other

Cause:
The request state and/or process phase prevents a post-execution work unit for a request from being processed. The work will be discarded.

Action:
None

ESS-06832
Failed to publish the metadata change event for {0}, appName={1}. {2}

Category:
Other

Cause:
Failed to publish the change event for the metadata change notification.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06833
Unrecognized metadata change type {0}, appName={1}, metaId={2}, origServer={3}

Category:
Other

Cause:
Unrecognized metadata change type in metadata change event.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06834
Ignoring change event as metadata cannot be found: {0}, appName={1}. {2}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Received metadata change event and metadata does not exist; it may have been deleted since the change happened.

Action:
Review the log file for attached exceptions to determine the nature of the problem, if any.

ESS-06835
Performing automatic refresh of metadata for request {0}, metadata {1}.

Category:
Other

Cause:
Metadata used by the request has changed and is being automatically refreshed.

Action:
No action is required.

ESS-06836
Changes to metadata prevent automatic refresh for request {0}, metadata {1}.

Category:
Other

Cause:
Metadata used by the request has changed but cannot be refreshed because the changes are not allowed for automatic refresh.

Action:
No action is required. For automatic refresh, only customizable parameters may have been changed.

ESS-06837
Unable to refresh job metadata at this time for request {0}.

Category:
Other

Cause:
Temporarily unable to refresh changed metadata for the request.

Action:
No action is required. The request may be refreshed in the future.

ESS-06838
Unable to access metadata in runtime store for request {0}, metadata {1}.

Category:
Other

Cause:
Unable to access cached metadata for the request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ESS-06839
Metadata already exists in runtime store for request {0}, metadata {1}.

Category:
Other

Cause:
The metadata already exists in the cache in the runtime store for the request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06840
Failed to insert metadata change notification for application {0}, change type {1}, metadata id {2}.

Category:
Other

Cause:
Failed to add the metadata change notification to the runtime store.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06841
Failed to insert metadata change notification for application {0}, change type {1}, metadata id {2}.

Category:
Other

Cause:
Failed to add the metadata change notification to the runtime store.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06842
Unable to access metadata change notifications.

Category:
Other

Cause:
Unable to access metadata change notifications.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-06843
Unable to determine the logical application name for deployed application "{0}".

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Unable to determine the logical application that should be used for a metadata change notification.

Action:
Review the log file for information to determine the nature of the problem, and ensure the logical application name is defined.

ESS-06844
Failed to remove parameter {0} for request {1}.

Category:
Other

Cause:
Unable to remove the parameter for the request during a metadata refresh.

Action:
Review the log file for information to determine the nature of the problem.

ESS-06845
Failed to remove the read-only constraint for parameter {0}, request {1}.

Category:
Other

Cause:
Unable to remove the read-only constraint for the request parameter during a metadata refresh.

Action:
Review the log file for information to determine the nature of the problem.

ESS-06846
Parameter "{0}" is now read only for request {1}. Previous update is discarded.

Category:
Other

Cause:
Due to a metadata refresh, the parameter is now read-only. The parameter had been updated previously, and that update has been discarded.

Action:
No action is required.

ESS-06847
Failed to remove runtime metadata for request {0}.

Category:
Other

Cause:
Unable to remove cached runtime metadata for the request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the log file for underlying causes.

ESS-07005
Execution cancelled for request {0}. Reason: {1}

Category:
Other

Cause:
The job execution has been cancelled.

Action:
Check the cause for the exception. If the cause is not given, you can adjust logging level to fine and retry it.

ESS-07006
Failed to cancel request {0}.

Category:
Other

Cause:
Failed to cancel request.

Action:
Review the log file for underlying causes.

ESS-07012
Invalid action ({0}) returned from pre-process callout for request {1}. Setting to {2} state.

Category:
Other

Cause:
Invalid action returned from pre-process callout for the request.

Action:
Review the log for underlying causes.

ESS-07013
Invalid action ({0}) returned from post-process callout for request {1}. Setting to {2} state.

Category:
Other

Cause:
Invalid action returned from pre-process callout for the request.

Action:
Review the log for underlying causes.

ESS-07014
Delaying processing of request {0} by {1} minutes.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The pre-process callback return value indicated that request processing should be delayed.

Action:
No action required. The request will be retried after the delay.

ESS-07015
Error occurred during cleanup of database job for request {0}.

Category:
Other

Cause:
An error occurred while performing post-execution clean tasks for an Oracle Scheduler job used to execute a SQL job request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-07016
Failed processing update event for request {0}.

Category:
Other

Cause:
An error occurred processing an update event.

Action:
Contact Oracle Support Services

ESS-07017
Cannot process update event for request {0} in state {1}.

Category:
Other

Cause:
The current work unit is for an older request execution attempt

Action:
None

ESS-07033
Job logic indicated a system error occurred while executing an asynchronous java job for request {0}. Job error is: {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The job indicated that an error occurred

Action:
Examine the innermost exception, if present, for the cause

ESS-07034
Job logic indicated a business error occurred while executing an asynchronous java job for request {0}. Job error is: {1}.

Category:
Other

Cause:
The job indicated that a business error occurred

Action:
Examine the innermost exception, if present, for the cause

ESS-07035
Job logic indicated a warning occurred while executing an asynchronous java job for request {0}. Job warning is: {1}.

Category:
Other

Cause:
The job indicated that a warning occurred

Action:
Examine the innermost exception, if present, for the cause

ESS-07036
There was a system error while processing request {0} from which it cannot be recovered. Please check the server logs. (Process phase = {1}).

Category:
Other

Cause:
The request needed to be recovered because of a system error, but cannot be recovered safely

Action:
None

ESS-07037
Error performing substitutions for request {0}

Category:
Other

Cause:
An error occurred while performing substitution in a request parameter or other user input. This may be for process type job command line or environment variable.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-07038
Failed to initialize job context extensions for request {0} at stage {1}

Category:
Other

Cause:
An error occurred while initializing job context extensions.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-07039
Failed to cleanup job context for request {0} at stage {1}

Category:
Other

Cause:
An error occurred while cleaning job context extensions.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-07040
Failed to terminate job context for request {0}

Category:
Other

Cause:
An error occurred while terminating job context extensions.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-07041
Failed to retrieve alternate environment for application {0}

Category:
Other

Cause:
An error occurred while retrieving alternate application environment properties.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-07042
Expected class {0} not available for request mode {1}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error instantiating an extensions class.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-07043
Failed to get platform request file directory for request {0}

Category:
Other

Cause:
An error occurred discovering the platform request file directory.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-07044
Failed to instantiate EJB job request {0}

Category:
Other

Cause:
Failed to instantiate RemoteExecutable object for a EJB request.

Action:
Make sure the bean implements RemoteExecutable and the parameters JNDI_MAPPED_NAME, JNDI_PROVIDER_URL are specified in job definition.

ESS-07045
Failed to execute EJB job request {0}. Reason: {1}

Category:
Other

Cause:
Failed to execute RemoteExecutable object for a EJB request.

Action:
Review the log file for attached exceptions to determine the nature of the problem.

ESS-07046
Failed to cancel EJB job request {0}

Category:
Other

Cause:
Failed to cancel RemoteCancellableExecutable object for a EJB request.

Action:
Review the log file for attached exceptions to determine the nature of the problem. Make sure the EJB implement RemoteCancellableExecutable interface.

ESS-07047
Metadata parameter {0} not specified in job definition for request {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Validation failed for EJB request. One or more mandatory parameters of EJB job not set.

Action:
Make sure the mandatory parameters are specified in job definition.

ESS-07048
Error while retrieving credentials for CSF Key {0} while processing request {1}.

Category:
Other

Cause:
Error while retrieving CSF credentials. The configuration is either null or invalid.

Action:
Make sure the CSF configuration is proper.

ESS-07049
Error while retrieving Ess Configuration for application {0} while processing request {1}.

Category:
Other

Cause:
Error while retrieving values of EssConfiguration . The configuration is either null or invalid.

Action:
Make sure the configuration is proper.

ESS-07050
Refreshing runtime incompatibilities for request {0}.

Cause:
An error occurred retrieving cross component wiring information from the runtime store.

Action:
None.

ESS-07577
Error deleting all entries in wirings table.

Category:
Other

Cause:
An error occurred deleting cross component wiring information from the runtime store.

Action:
None.

ESS-07578
Failed to register listener for CCW configuration.

Category:
Other

Cause:
The cross component wiring configuration listener could not be registered.

Action:
Review the log file for the cause.

ESS-07579
Failed to unregister listener for CCW configuration.

Category:
Other

Cause:
The cross component wiring configuration listener could not be registered.

Action:
Review the log file for the cause.

ESS-07580
Cross component wiring configuration listener failed to process document change event.

Category:
Other

Cause:
An error occurred processing the notification from the ESS CCW configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the log file for the cause.

ESS-07581
Failed to delete wirings for URNs {0} from group {1}.

Category:
Other

Cause:
An error occurred deleting cross component wiring information from the runtime store.

Action:
None.

ESS-07582
A logical cluster name must be specified for cross-component wiring enabled jobs. Parameter {0} for request {1} has substitution prefix WIRING.

Category:
Other

Cause:
The WIRING substitution prefix was used for a job without a logical cluster name.

Action:
Either specify a logical cluster name for the job or explicitly specify the property value.

ESS-07614
null

Category:
Programmatic

Cause:
Ranks are applicable only for requests of state WAIT and READY.

Action:
Specify a request in WAIT or READY state.

ESS-07701
{0} property must be positive and not null for request {1}.

Category:
Other

Cause:
Processed count or failed count property is negetive or null.

Action:
Provide valid values for Processed count or failed count property.

ESS-07702
{0} property must not be null or empty for request {1}.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Job Monitoring property is empty or null.

Action:
Provide valid values for Job monitoring property.

ESS-07703
Number of counters are limited to 5 per job for request {0}

Category:
Other

Cause:
Number of counters are limited to 5 per job.

Action:
Provide valid Counter number between 1 to 5.

ESS-07704
Counters have not been initialized for counter number {0} for request {1}.

Category:
Other

Cause:
Job Monitoring counter property are not initialized.

Action:
Job Monitoring counter property should be initialized before updating them.

ESS-07705
Counter name property can be initialized only once and have already been initialized with different value for counter number {0} for request {1}.

Category:
Other

Cause:
Counter Name property is already initialized with a different value.

Action:
Provide a valid counter name property.

ESS-07706
Total count property is not valid for counter number {0} for request {1}.

Category:
Other

Cause:
Total count property is not valid.

Action:
Provide a valid value for Total count.

ESS-07707
RuntimeService is null.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The ESS runtime service is null.

Action:
Provide a valid ESS runtime service.

ESS-07708
An unknown or unsupported state is specified: {0}.

Category:
Other

Cause:
An unknown or unsupported state is specified.

Action:
Provide a valid supported state.

ESS-07709
Job Monitoring counters cannot be initialized or updated as request {0} is already in {1} state.

Category:
Other

Cause:
Job Monitoring counter property cannot be initialized or updated as request has been cancelled.

Action:
Job Monitoring status updates not permitted when job has been cancelled.

ESS-07710
Total count property can not be updated. It has already been initialized for counter number {0} for request {1}.

Category:
Other

Cause:
Total count property is already initialized.

Action:
Total count property can't be updated once initialized.

ESS-07711
Job Monitoring message string is either with invalid format or counter information for request {0}. String Format: apiName=xxxx,counterNumber=xxxx,counterName=xxxx,totalCount=xxxx,processedCount=xxxx,failedCount=xxxx,counterKey=xxxx,enableJobCancelDetection=xxxx, where xxxx represents counter information.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Job monitor message string is either with invalid format or counter information. Format: apiName=xxxx,counterNumber=xxxx,counterName=xxxx,totalCount=xxxx,processedCount=xxxx,failedCount=xxxx, where xxxx represents counter information.

Action:
Correct the invalid job monitor message string.

ESS-07712
Job monitoring counter property {0} is not supported for this operation.

Category:
Other

Cause:
Job Monitoring Counter property is not supported for this operation.

Action:
Provide valid Job Monitoring counter property..

ESS-07713
A resource bundle is already registered and cannot be updated or reset for the request {0}.

Category:
Other

Cause:
A resource bundle is already registered for the request and cannot be updated or reset.

Action:
Resource bundle MUST be the same which is registered with this request.

ESS-08000
The value of filter is null.

ESS-09003
Failed to instantiate the translation service factory implementation {0}.

Category:
Programmatic

Cause:
Error while instantiating an instance of translation service factory.

Action:
Check the log to find exception details.

ESS-09004
Failed to retrieve a valid instance of underlying oracle.javatools ResourceBundleManager. Design time metadata translation is not supported.

Category:
Programmatic

Cause:
Error while instantiating an instance of oracle.javatools.resourcebundle.ResourceBundleManager.

Action:
None

ESS-09005
Encountered MDS exception while performing MDS operations.

Category:
Programmatic

Cause:
Encountered MDS exception.

Action:
Check the exception for details.

ESS-09400
Encountered an execution context exception.

Category:
Programmatic

Cause:
Encountered exception while invoking DMS execution context API(s).

Action:
Check exception stack trace for details.

ESS-09402
Failed to compile recurrence expression.

Category:
Programmatic

Cause:
Failed to compile recurrence expression

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the invalid recurrence expression.

ESS-09403
Schedule list limit must be a non-negative integer.

Category:
Programmatic

Cause:
Schedule List limit is invalid.

Action:
List limit must be a non-negative integer.

ESS-09404
Schedule list begin date cannot be null.

Category:
Programmatic

Cause:
Invalid Null Schedule Begin date.

Action:
Provide a non-null begin date for the schedule.

ESS-09405
Schedule begin date can not be after end date.

Category:
Programmatic

Cause:
Begin Date for the schedule is after the end date.

Action:
Correct the invalid begin date or end date.

ESS-09406
Parsing exception. Only one day type recurrence field may be specified.

Category:
Programmatic

Cause:
More than one of BYDAY, BYMONTHDAY, BYYEARDAY was specified

Action:
Correct the invalid recurrence.

ESS-09407
Parsing exception. An occurrence by week number can only be used with a yearly frequency.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A BYWEEKNO clause was specified with a frequency other than YEARLY

Action:
Correct the invalid recurrence.

ESS-09408
Parsing exception. An occurrence by week number cannot be used with an occurrence by month.

Category:
Programmatic

Cause:
More than one of BYWEEKNO, BYMONTH was specified

Action:
Correct the invalid recurrence.

ESS-09409
Parsing exception. Recurrence expression with {0} clause is not supported.

Category:
Programmatic

Cause:
One of the recurrence rule BYSETPOS, UNTIL, COUNT, WKST was specified

Action:
Correct the unsupported Recurrence Expression.

ESS-09410
Parsing exception. Value for {0} clause is out of range.

Category:
Programmatic

Cause:
Out of range value for recurrence rule was specified

Action:
Correct the invalid recurrence.

ESS-09411
Parsing exception. {0} clause is redundant in the recurrence expression.

Category:
Programmatic

Cause:
Redundant recurrence rule was specified

Action:
Correct the invalid recurrence.

ESS-09412
Recurrence expression is not valid. Please verify clauses and that each clause, including the last one, is followed by a semicolon.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
Invalid recurrence expression was specified.

Action:
Correct the invalid recurrence and verify that it should be followed by a semicolon at the end of the expression.

ESS-09420
Property {0} is not set for request {1}.

Category:
Programmatic

Cause:
A system property that should have been set has not been set.

Action:
Contact Oracle Support Services.

ESS-09421
Request {0} is not eligible to be manually recovered until {1}.

Category:
Programmatic

Cause:
The request is not yet eligible to be recovered.

Action:
Wait until the prescribed time to attempt this operation.

ESS-09422
A hard cancel must be attempted on PL/SQL request {0} before a force cancel is allowed.

Category:
Programmatic

Cause:
A hard cancel of this request must be attempted before trying a force cancel.

Action:
Cancel the request using the old-style hard cancel.

FRC-60003
error reading ORACLE_HOME registry file {0}

Category:
Configuration

Cause:
An error occurred while reading the ORACLE_HOME registry file.

Action:
Do one of the following: \n1. Make sure that the ORACLE_HOME registry file exists. \n2. If the ORACLE_HOME registry file is accidentally deleted or modified then reinstall ORACLE_HOME.

FRC-60004
I/O error reading CA preferences file {0}

Category:
Configuration

Cause:
An I/O error occurred while reading the CA preferences file.

Action:
Examine the stack trace that accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRC-60101
error converting the configuration object to the relevant CompositeType

Category:
Configuration

Cause:
Failed to convert the configuration object to the relevant CompositeType.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRC-60102
error converting the configuration object to the relevant CompositeData

Category:
Configuration

Cause:
Failed to convert the configuration object to the relevant CompositeData.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRC-60103
error registering child config mbean for the application section {0}

Category:
Configuration

Cause:
Failed to register the child config mbean for the given application section.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it.

FRC-60104
error deregistering child config mbean for the application section {0}

Category:
Configuration

Cause:
Failed to deregister the child config mbean for the given application section.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it.

FRC-60105
error deleting application section {0}

Category:
Configuration

Cause:
An attempt was made to delete the default application section or a section that does not exist.

Action:
Choose the correct section name.

FRC-60106
error creating application section {0}

Category:
Configuration

Cause:
An attempt was made to create an application section that already exists or has an invalid section name.

Action:
Choose an alternative name for the section.

FRC-60107
error duplicating application section {0} to {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Failed to duplicate an application section because of one of the following reasons:\n 1. An attempt was made to duplicate an invalid application section.\n 2. An attempt was made to create an application section that already exists.

Action:
Do one of the following:\n 1. Choose a correct section name for the duplicated application section.\n 2. Choose an alternative name for the newly created application section.

FRC-60108
error processing configuration, invalid entry at line:{0}

Category:
Configuration

Cause:
An unexpected error occurred while persisting the configuration.

Action:
Fix the configuration and submit it again.

FRM-41480 to FRM-99999

FRM-41480
error in FSCRATCHPAD.EXPAND_TEMPLATE: syntax error in URI template {0} at offset {1} [characters]

Category:
Data

Cause:
The URI template specified by the 'uri_template' parameter passed to FSCRATCHPAD.EXPAND_TEMPLATE was not syntactically correct [RFC 6570, level 4].

Action:
Correct the URI template.

FRM-41484
error in FSCRATCHPAD.EXPAND_TEMPLATE: ''parameters'' contains an element of unexpected type; its JSON pointer is {0}

Category:
Data

Cause:
The values of the children of the JSON object specified by the 'parameters' parameter passed to FSCRATCHPAD.EXPAND_TEMPLATE must be strings, arrays of strings, or objects whose child values are strings or arrays of strings. A violation of this constraint was detected.

Action:
Correct the offending element.

FRM-41486
error in FSCRATCHPAD.EXPAND_TEMPLATE: ''parameters'' contains an element with an object key containing an invalid %-encoding; the element''s JSON pointer is {0}

Category:
Data

Cause:
A child element of the JSON object specified by the 'parameters' parameter passed to FSCRATCHPAD.EXPAND_TEMPLATE corresponded to a variable in a '+' or '#' expression in the URI template specified by the 'uri_template' parameter, and the object key of the child element or an element within it contained an invalid sequence of 3-byte %-encodings. Each %-encoding must consist of '%' followed by 2 hex digits, and the sequence of bytes denoted by the %-encodings must be a valid AL32UTF8 representation of a Unicode character.

Action:
Correct the offending element.

FRM-41487
error in FSCRATCHPAD.EXPAND_TEMPLATE: ''parameters'' contains a STRING element with a value containing an invalid %-encoding; the element''s JSON pointer is {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
A child element of the JSON object specified by the 'parameters' parameter passed to FSCRATCHPAD.EXPAND_TEMPLATE corresponded to a variable in a '+' or '#' expression in the URI template specified by the 'uri_template' parameter, and the value of the child element or an element within it contained an invalid sequence of 3-byte %-encodings. Each %-encoding must consist of '%' followed by 2 hex digits, and the sequence of bytes denoted by the %-encodings must be a valid AL32UTF8 representation of a Unicode character.

Action:
Correct the offending element.

FRM-41492
error in runtime process: FSCRATCHPAD contents or FJSON string value not a valid base64 encoding: invalid byte detected at offset {0} [bytes]

Category:
Data

Cause:
'base64_decode := true' was specified for FSCRATCHPAD.TO_FILE or FJSON.STRING_VALUE_TO_FILE, but the scratchpad contents (up to the string specified by the 'stop_at' parameter, if specified) or the JSON string value did not constitute a valid base64 encoding. A valid base64 encoding must contain only white space [blank, tab, carriage return, or line feed] or base64 alphabet characters ['A'-'Z', 'a'-'z', '0'-'9', '+', '/', or '=']. '=' characters are not required, but if present, they must occur only at the end, and they must ensure that the total number of base64 alphabet characters is a multiple of 4. If the invalid base64 encoding was obtained from a string element retrieved from a REST endpoint, a subsequent FRM-41592 provides the offending string element's JSON pointer.

Action:
Correct application logic that populates the scratchpad.

FRM-41493
error in runtime process: FSCRATCHPAD contents or FJSON string value could not be written to {0}

Category:
Files

Cause:
FSCRATCHPAD.TO_FILE or FJSON.STRING_VALUE_TO_FILE was unable to successfully write the contents to the location specified by the 'file_name' parameter.

Action:
Verify that the file name is spelled correctly and that the application has permission to write a file to the specified directory, and that the specified directory has adequate space.

FRM-41494
error in runtime process: could not find file {0} for FSCRATCHPAD or FJSON package

Category:
Files

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The 'file_name' parameter passed to FSCRATCHPAD.APPEND_FILE or FJSON.NEW_STRING_FROM_FILE specified a file that could not be found.

Action:
Verify that the file name is spelled correctly and that the application has permission to read the file.

FRM-41495
error in runtime process: error reading file {0} for FSCRATCHPAD or FJSON package

Category:
Files

Cause:
The 'file_name' parameter passed to FSCRATCHPAD.APPEND_FILE or FJSON.NEW_STRING_FROM_FILE specified a file that could not be read successfully.

Action:
Verify that the file name is spelled correctly and that the application has permission to read the file.

FRM-41516
loop in JSON parse tree

Category:
Data

Cause:
Application design error. An attempt to produce a JSON pointer for a diagnostic message detected a loop in the JSON parse tree [so it wasn't really a tree at all]: the root of the JSON parse tree was encountered while traversing its descendent elements. The production of the JSON pointer was aborted and the memory it consumed was released. The JSON pointer is shown as '?' in the diagnostic message. This condition was caused by an earlier call to FJSON.ADD, FJSON.SET, or FJSON.PUT that added a child element C to an array or object A, where C was equal to A or was an ancestor of A.

Action:
Correct the application logic.

FRM-41530
error in runtime process: {0} was passed an unexpected retrieved {1} {2}; its JSON pointer was {3}

Category:
Data

Cause:
Application design error. An FJSON.ELEMENT_T value retrieved from a REST endpoint was passed as the first parameter to a function or procedure in the FJSON package or as the second parameter to the POPULATE_GROUP_FROM_JSON procedure, and specified an element whose element type is not supported by the specified function or procedure. An FJSON.CONTENT exception was raised (except for POPULATE_GROUP_FROM_JSON). Additional information was written to ODL, starting with FRM-41539.

Action:
Correct the application logic.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-41531
error in runtime process: unexpected retrieved {0} element found by {1}, which was passed a {2} whose JSON pointer was {3}, and a {4} whose value was {5}

Category:
Data

Cause:
Application design error. An FJSON.FIND_x or FJSON.GET_x function produced an element of an unexpected type that was retrieved from a REST endpoint. An FJSON.CONTENT exception was raised. Additional information was written to ODL, starting with FRM-41539.

Action:
Correct the application logic.

FRM-41532
error in runtime process: no element found where expected by {0}, which was passed a retrieved {1} whose JSON pointer was {2}, and a {3} whose value was {4}

Category:
Data

Cause:
Application design error. An FJSON.FIND_ARRAY, FJSON.FIND_OBJECT, FJSON.GET_ARRAY, or FJSON.GET_OBJECT function produced no element, and the FJSON.ELEMENT_T value passed as the first parameter to the function was retrieved from a REST endpoint. An FJSON.CONTENT exception was raised. Additional information was written to ODL, starting with FRM-41539.

Action:
Correct the application logic.

FRM-41533
error in runtime process: {0} was passed a {1} that contained an unexpected {2} element whose JSON pointer was {3}

Category:
Data

Cause:
Application design error. One of the following occurred:\n1. The JSON array passed as the first parameter to the FJSON.JOIN function contained an element that was not a JSON string.\n2. The JSON array or JSON object passed as the second parameter to the POPULATE_GROUP_FROM_JSON function contained an initial element that was a JSON object, but also contained an element that was not a JSON object.\n3. The JSON array or JSON object passed as the second parameter to the POPULATE_GROUP_FROM_JSON function contained an initial element that was a JSON array or scalar element, but also contained an element that was a JSON object.\n4. The JSON array or JSON object passed as the second parameter to the POPULATE_GROUP_FROM_JSON function contained a scalar element, or a JSON array or JSON object that in turn contained a scalar element, and the type of the scalar element did not match the corresponding record group column. [DATE columns are a special case: if a null epoch_unit was passed to POPULATE_GROUP_FROM_JSON, the corresponding scalar element must be a JSON string (representing an ISO 8601 date/time string); otherwise, it must be a JSON number (representing "epoch": seconds since 1970-01-01).]\nIn case 1, an FJSON.CONTENT exception was raised.\nIf the offending element was retrieved from a REST endpoint, additional information was written to ODL, starting with FRM-41539.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the application logic.

FRM-41534
error in runtime process: {0} was passed a {1} that contained a {2} element whose JSON pointer was {3}. The element was expected to represent a date, but an ORA-0{4} exception was encountered when the conversion to date was attempted.

Category:
Data

Cause:
Application design error. The JSON array or JSON object passed as the second parameter to the POPULATE_GROUP_FROM_JSON function contained a scalar element, or a JSON array or JSON object that in turn contained a scalar element, and the corresponding record group column was of type DATE. Either a null epoch_unit was passed to POPULATE_GROUP_FROM_JSON and the scalar element was a JSON string which was not in valid ISO 8601 format, or a non-null epoch_unit was specified and the scalar element was a JSON number which was not a valid epoch. If the exception was not ORA-06502 and the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable is set to 2 or more, the offending value is displayed [FRM-41537]. If the offending element was retrieved from a REST endpoint, additional information was written to ODL, starting with FRM-41539.

Action:
Correct the application logic.

FRM-41535
error in runtime process: {0} was passed a {1} that contained a STRING element whose value was unexpectedly too large. The full JSON pointer was {2}

Category:
Data

Cause:
Application design error. The JSON array or JSON object passed as the second parameter to the POPULATE_GROUP_FROM_JSON function contained a JSON string element, or a JSON array or JSON object that in turn contained a JSON string element, and the value of the string element exceeded 32767 bytes. If the offending element was retrieved from a REST endpoint, additional information was written to ODL, starting with FRM-41539.

Action:
Correct the application logic.

FRM-41536
error in runtime process: {0} was passed a {1} that contained an element whose object key was unexpectedly too large, or was not (when expected) a valid number. The full JSON pointer was {2}

Category:
Data

Cause:
Application design error. A JSON object was passed as the second parameter to the POPULATE_GROUP_FROM_JSON function. It contained an element whose object key exceeded 32767 bytes or, in the case where the first record group column was of type NUMBER, could not be converted to a number. If the offending element was retrieved from a REST endpoint, additional information was written to ODL, starting with FRM-41539.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the application logic.

FRM-41537
The value which could not be converted was {0}

Category:
Data

Cause:
This message follows FRM-41534 and displays the offending value if the exception was not ORA-06502 and the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable is set to 2 or more.

Action:
No action is required.

FRM-41539
The unexpected JSON content was produced by a {0} request to the URL generated from the URI template {1}

Category:
Data

Cause:
This message provides additional information about unexpected JSON content in the JSON text response from a REST endpoint. It may be followed by a dump of the request and the response [FRM-41690 and FRM-41691], depending on the value of the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable.

Action:
No action is required.

FRM-41540
error in runtime process: unexpected content detected in JSON document: {0}

Category:
Data

Cause:
The application called the FJSON.UNEXPECTED_CONTENT procedure with a null target element, presumably because its logic detected unexpected content of some sort. An FJSON.CONTENT exception was raised.

Action:
Try to determine what is producing the unexpected JSON content, e.g. by contacting the owner of the REST service from which the JSON document was retrieved. Correct application logic if necessary.

FRM-41541
error in runtime process: unexpected content detected in JSON document at {0}: {1}

Category:
Data

Cause:
The application called the FJSON.UNEXPECTED_CONTENT procedure with a non-null target element, presumably because its logic detected unexpected content of some sort. An

Copyright © 2000, 2026, Oracle and/or its affiliates.

FJSON.CONTENT exception was raised. If the offending element was retrieved from a REST endpoint, additional information was written to ODL, starting with FRM-41539.

Action:
Try to determine what is producing the unexpected JSON content, e.g. by contacting the owner of the REST service from which the JSON document was retrieved. Correct application logic if necessary.

FRM-41549
error in runtime process: unexpected scalar conversion exception ORA-0{0} encountered while processing JSON document

Category:
Data

Cause:
The application called the FJSON.ANALYZE_EXCEPTION procedure within a PL/SQL exception block, and it tentatively determined that the exception could plausibly have been produced by a PL/SQL assignment from a scalar derived from a REST endpoint response, to a PL/SQL variable (or an assignment from that variable to another using a conversion function such as TO_DATE). An FJSON.CONTENT exception was raised. Additional information was written to ODL, starting with FRM-41550 or FRM-41551.

Action:
Try to determine what is causing the scalar conversion exception. It could be due to an application design error unrelated to the REST service; if so, correct the application logic. Otherwise, try to determine what is producing the unexpected JSON content, e.g. by contacting the owner of the REST service from which the JSON document was retrieved. Correct application logic if necessary.

FRM-41550
The last scalar-producing FJSON function executed prior to calling FJSON.ANALYZE_EXCEPTION was FJSON.{0}, with a {1} whose JSON pointer was {2}, and with a {3} whose value was {4}

Category:
Data

Cause:
This message follows FRM-41549 in the case where the last scalar-producing FJSON function was a "composite" function: get_string_value, get_number_value, get_boolean_value, find_string_value, find_number_value, find_boolean_value, or find_object_key. It specifies the arguments passed to the function: target object or array, and object key or array position.

Action:
No action is required.

FRM-41551
The last scalar-producing FJSON function executed prior to calling FJSON.ANALYZE_EXCEPTION was FJSON.{0}, with a {1} whose JSON pointer was {2}

Category:
Data

Cause:
This message follows FRM-41549 in the case where the last scalar-producing FJSON function was not a composite function. It specifies the JSON element passed to the function.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

FRM-41552
The returned value was null, because no element was found.

Category:
Data

Cause:
This message follows FRM-41550 if the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable is set to 1 or more and the composite scalar-producing FJSON function found no element.

Action:
No action is required.

FRM-41553
The returned value was null, obtained from a {0} element.

Category:
Data

Cause:
This message follows FRM-41550 or FRM-41551 if the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable is set to 1 or more and the scalar-producing FJSON function found or was passed a NULL element or a STRING element whose value was the empty string.

Action:
No action is required.

FRM-41554
The returned value was {0}

Category:
Data

Cause:
This message follows FRM-41550 or FRM-41551 if the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable is set to 2 or more and the scalar-producing FJSON function found or was passed a BOOLEAN element, a NUMBER element, or a STRING element whose value was non-empty and whose AL32UTF8 representation did not exceed 4095 bytes.

Action:
No action is required.

FRM-41555
The returned value was a non-null VARCHAR2 containing {0} characters and {1} bytes (in the NLS_LANG charset: {2}).

Category:
Data

Cause:
This message follows FRM-41550 or FRM-41551 if the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable is set to 1 and the scalar-

Copyright © 2000, 2026, Oracle and/or its affiliates.

producing FJSON function found or was passed a STRING element whose value was non-empty, or if FORMS_HTTP_DIAGNOSTIC_LEVEL is set to 2 or more and the scalar-producing FJSON function found or was passed a STRING element whose AL32UTF8 representation exceeded 4095 bytes.

Action:
No action is required.

FRM-41556
The returned value was a non-null NUMBER{0} (when rounded to an integer).

Category:
Data

Cause:
This message follows FRM-41550 or FRM-41551 if the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable is set to 1 and the scalar-producing FJSON function found or was passed a NUMBER element. It indicates whether the value was zero, positive, or negative, and whether it would fit in a PLS_INTEGER.

Action:
No action is required.

FRM-41557
The returned value was a non-null BOOLEAN.

Category:
Data

Cause:
This message follows FRM-41550 or FRM-41551 if the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable is set to 1 and the scalar-producing FJSON function found or was passed a BOOLEAN element.

Action:
No action is required.

FRM-41560
error in runtime process: syntax error in retrieved JSON text at offset {0} [bytes]

Category:
Data

Cause:
A parse of the JSON text response from a REST endpoint encountered a violation of RFC 7159. The parse was aborted, and the memory that had already been allocated for the parse tree was made available for subsequent JSON parse tree operations. An FJSON.PARSE_FAILURE exception was raised. Additional information was written to ODL, starting with FRM-41569.

Action:
Try to determine why the erroneous JSON text is being returned, e.g. by contacting the owner of the REST service.

FRM-41561
error in runtime process: oversize object key in retrieved JSON text, ending at offset {0} [bytes]

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
A parse of the JSON text response from a REST endpoint encountered an oversize object key in an object member definition. By default, Oracle Forms does not support object keys whose AL32UTF8 representation exceeds 32767 bytes. [Larger keys cannot be used in PL/SQL VARCHAR2 variables.] The parse was aborted, and the memory that had already been allocated for the parse tree was made available for subsequent JSON parse tree operations. An FJSON.PARSE_FAILURE exception was raised. Additional information was written to ODL, starting with FRM-41569.

Action:

FRM-41562
error in runtime process: oversize array or object in retrieved JSON text, detected at offset {0} [bytes]

Category:
Data

Cause:
A parse of the JSON text response from a REST endpoint encountered an array or object which contained 2G elements or more. The parse was aborted, and the memory that had already been allocated for the parse tree was made available for subsequent JSON parse tree operations. An FJSON.PARSE_FAILURE exception was raised. Additional information was written to ODL, starting with FRM-41569.

Action:
Try to determine why the oversize array or object is being returned, e.g. by contacting the owner of the REST service.

FRM-41569
The JSON text which could not be parsed was produced by a {0} request to the URL generated from the URI template {1}

Category:
Data

Cause:
This message provides additional information about a parse error in the JSON text response from a REST endpoint. It may be followed by a dump of the request and the response [FRM-41690 and FRM-41691], depending on the value of the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable.

Action:
No action is required.

FRM-41570
error in runtime process: JSON parse memory limit exceeded

Category:
Memory

Cause:
A parse of the JSON text response from a REST endpoint required more memory than the JSON parse memory limit (4Gb or the limit specified by the

Copyright © 2000, 2026, Oracle and/or its affiliates.

FORMS_JSON_PARSE_MEMORY_LIMIT environment variable). The parse was aborted, and the memory that had already been allocated for the parse tree was made available for subsequent JSON parse tree operations. An FJSON.PARSE_ALLOCATION exception was raised.

Action:
Modify the selection criteria specified in the request to the REST endpoint, so as to limit the size of the response, or increase the value of the FORMS_JSON_PARSE_MEMORY_LIMIT environment variable.

FRM-41571
error in runtime process: JSON new memory limit exceeded

Category:
Memory

Cause:
An attempt to programmatically create a JSON element (using e.g. FJSON.CLONE or an FJSON.NEW_x function) would have caused the memory consumed by all programmatically created JSON elements to exceed the new memory limit (4Gb or the limit specified by the FORMS_JSON_NEW_MEMORY_LIMIT environment variable). An FJSON.GLOBAL_ALLOCATION exception was raised.

Action:
Revise application logic so as to programmatically create fewer JSON elements, or increase the value of the FORMS_JSON_NEW_MEMORY_LIMIT environment variable.

FRM-41572
error in runtime process: JSON memory allocation failed

Category:
Memory

Cause:
An operation to create, update, or generate a JSON parse tree was unable to allocate adequate memory. An FJSON.GLOBAL_ALLOCATION exception was raised..

Action:
Modify the selection criteria specified in the request to the REST endpoint, so as to limit the size of the response, or revise application logic so as to programmatically create fewer JSON elements.

FRM-41573
error in runtime process: JSON parse trees require excessive memory for element values

Category:
Memory

Cause:
This error arises only if both the following occur:\n1. The FORMS_JSON_KEY_LENGTH_BITS environment variable [which defaults to 15, limiting object keys to 32767 bytes] was set to a value N in the range 16..30 [the maximum allowed].\n2. The total number of bytes required for all strings, numbers, and hash arrays for all elements in all JSON parse trees exceeded 2 raised to the power of 64-N.\nIf this error occurred, then an FJSON.GLOBAL_ALLOCATION exception was raised.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Modify the selection criteria specified in the request to the REST endpoint, so as to limit the size of the response, or revise application logic so as to programmatically create fewer JSON elements.

FRM-41574
error in runtime process: too many elements in JSON parse trees

Category:
Memory

Cause:
An operation to create or update a JSON parse tree would have caused the total number of elements in all JSON parse trees to equal or exceed 4G. An FJSON.GLOBAL_ALLOCATION exception was raised.

Action:
Modify the selection criteria specified in the request to the REST endpoint, so as to limit the size of the response, or revise application logic so as to programmatically create fewer JSON elements.

FRM-41580
error in runtime process: invalid $ref string {0} in element at {1}: syntax error at offset {2} [characters]

Category:
Data

Cause:
The element passed to FJSON.RESOLVE$REF specified a $ref string which was not a syntactically valid URI.

Action:
Contact the provider of the service which produced the document containing the invalid JSON reference.

FRM-41581
error in runtime process: loop or overflow in recursive JSON references: {0}

Category:
Data

Cause:
The element passed to FJSON.RESOLVE$REF specified a $ref string which resolved to another $ref element, which in turn resolved to yet another $ref element, and so forth. The chain of recursive references, shown in the diagnostic message, contained a loop or more than 16 entries.

Action:
Contact the provider of the service which produced the document containing the invalid JSON reference.

FRM-41582
error in runtime process: $ref string {0} in element at {1} specifies a document which cannot be loaded: the $ref string itself resides in a document which was not loaded from a URL

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:

Action:
Correct application logic. In general, $ref strings should not be placed in programmatically constructed documents.

FRM-41583
error in runtime process: $ref string {0} in element at {1} specifies a document which could not be loaded and parsed: an error occurred on the internal call to FHTTP.ISSUE_REQUEST

Category:
Data

Cause:
Self-explanatory

Action:
Examine the error messages that were produced for the internal call to FHTTP.ISSUE_REQUEST.

FRM-41584
error in runtime process: JSON pointer {0} could not be evaluated against document {1}: syntax error at offset {2} [characters]

Category:
Data

Cause:
Either (1) an invalid JSON pointer was passed to FJSON.EVALUATE_POINTER, or (2) the element passed to an invocation of FJSON.RESOLVE$REF specified a $ref string whose fragment [the portion after the '#'] was not a valid JSON pointer. The JSON pointer did not begin with '/' or contained an invalid escape sequence ['~' not followed by '0' or '1'].

Action:
In case (1), correct the application logic. In case (2), contact the provider of the service which produced the document containing the invalid JSON reference.

FRM-41585
error in runtime process: JSON pointer {0} could not be evaluated against document {1}: element specified by portion preceding '/' at offset {2} [characters] is not an object or array

Category:
Data

Cause:
Either (1) an invalid JSON pointer was passed to FJSON.EVALUATE_POINTER, or (2) the element passed to an invocation of FJSON.RESOLVE$REF specified a $ref string whose fragment [the portion after the '#'] was not a valid JSON pointer. The JSON pointer contained a '/' at the specified offset, but the portion of the specified JSON pointer preceding that '/' specified a scalar JSON element.

Action:
In case (1), correct the application logic. In case (2), contact the provider of the service which produced the document containing the invalid JSON reference.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-41586
error in runtime process: JSON pointer {0} could not be evaluated against document {1}: key specified after "/" at offset {2} [characters] does not exist in the object specified by portion preceding the "/"

Category:
Data

Cause:
Either (1) an invalid JSON pointer was passed to FJSON.EVALUATE_POINTER, or (2) the element passed to an invocation of FJSON.RESOLVE$REF specified a $ref string whose fragment [the portion after the '#'] was not a valid JSON pointer. The JSON pointer contained a '/' at the specified offset, and the portion of the specified JSON pointer preceding that '/' specified an object, but that object did not contain the key specified after the '/'.

Action:
In case (1), correct the application logic. In case (2), contact the provider of the service which produced the document containing the invalid JSON reference.

FRM-41587
error in runtime process: JSON pointer {0} could not be evaluated against document {1}: invalid array index specified after "/" at offset {2} [characters]

Category:
Data

Cause:
Either (1) an invalid JSON pointer was passed to FJSON.EVALUATE_POINTER, or (2) the element passed to an invocation of FJSON.RESOLVE$REF specified a $ref string whose fragment [the portion after the '#'] was not a valid JSON pointer. The JSON pointer contained a '/' at the specified offset, and the portion of the specified JSON pointer preceding that '/' specified an array, but the array index specified after the '/' was not a valid nonnegative decimal number.

Action:
In case (1), correct the application logic. In case (2), contact the provider of the service which produced the document containing the invalid JSON reference.

FRM-41588
error in runtime process: JSON pointer {0} could not be evaluated against document {1}: array index specified after "/" at offset {2} [characters] does not fall within the array specified by portion preceding the "/"

Category:
Data

Cause:
Either (1) an invalid JSON pointer was passed to FJSON.EVALUATE_POINTER, or (2) the element passed to an invocation of FJSON.RESOLVE$REF specified a $ref string whose fragment [the portion after the '#'] was not a valid JSON pointer. The JSON pointer contained a '/' at the specified offset, and the portion of the specified JSON pointer preceding that '/' specified an array, but that array did not contain the element specified by the 0-relative index after the '/'.

Action:
In case (1), correct the application logic. In case (2), contact the provider of the service which produced the document containing the invalid JSON reference.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-41592
The invalid base64 encoding was obtained from a STRING element whose JSON pointer was {0}

Category:
Data

Cause:
This message provides additional information about an invalid base64 encoding [reported in a preceding FRM-41492] in the JSON text response from a REST endpoint. It may be followed by a dump of the request and the response [FRM-41690 and FRM-41691], depending on the value of the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable.

Action:
No action is required.

FRM-41610
error in FHTTP.ISSUE_REQUEST: the {0} method sent to the URL generated from the URI template {1}{2} was rejected.

Category:
Requests/Responses

Cause:
The method specified by the 'method' parameter passed to FHTTP.ISSUE_REQUEST was rejected. This can happen if a security manager is set and the method is 'TRACE', but the 'allowHttpTrace' NetPermission is not granted.

Action:
Determine whether the conditions above apply. If not, and the problem persists, contact Oracle Support Services.

FRM-41620
error in FHTTP.ISSUE_REQUEST: server URL could not be obtained due to invalid ''server_url_or_id'' parameter {0}.

Category:
Data

Cause:
The 'server_url_or_id' parameter passed to FHTTP.ISSUE_REQUEST must begin with 'http:', 'https:', 'ws:', or 'wss:', or else must contain only alphanumeric characters and '_', '.', '-'.

Action:
Correct the 'server_url_or_id' parameter.

FRM-41621
error in FHTTP.ISSUE_REQUEST: server URL could not be obtained due to invalid config section name {0}

Category:
Data

Cause:
If a non-null 'server_url_or_id' parameter is passed to FHTTP.ISSUE_REQUEST, and it does not begin with 'http:', 'https:', 'ws:', or 'wss:', the config section name specified as the config

Copyright © 2000, 2026, Oracle and/or its affiliates.

parameter in the frmservlet URL used to launch the Forms application must contain only alphanumeric characters and '_', '.', '-'.

Action:
Specify a config section with a valid name in the frmservlet URL used to launch the Forms application.

FRM-41622
error in FHTTP.ISSUE_REQUEST: server URL could not be obtained due to missing credential for {0}

Category:
Configuration

Cause:
If a non-null 'server_url_or_id' parameter is passed to FHTTP.ISSUE_REQUEST, and it does not begin with 'http:', 'https:', 'ws:', or 'wss:', the Oracle Platform Security Services Credential Store must contain a generic credential for the server. The credential key must be of the form <config_section_name>=<credential_id>.

Action:
Use Fusion Middleware Control to add the generic credential. The value must be a well-formed URL which specifies a scheme of 'http', 'https', 'ws', or 'wss'.

FRM-41623
error in FHTTP.ISSUE_REQUEST: the server URL {1} specified by the credential for {0} was rejected.

Category:
Configuration

Cause:
If a non-null 'server_url_or_id' parameter is passed to FHTTP.ISSUE_REQUEST, and it does not begin with 'http:', 'https:', 'ws:', or 'wss:', the Oracle Platform Security Services Credential Store must contain a generic credential for the server. The credential key must be of the form <config_section_name>=<credential_id>. The value must be a string that's a well-formed URL which specifies a scheme of 'http', 'https', 'ws', or 'wss'.

Action:
Use Fusion Middleware Control to correct the generic credential.

FRM-41624
error in FHTTP.ISSUE_REQUEST: the server URL {1} was rejected.

Category:
Configuration

Cause:
The 'server_url_or_id' parameter passed to FHTTP.ISSUE_REQUEST began with 'http:', 'https:', 'ws:', or 'wss:', but it was not a well-formed URL.

Action:

FRM-41630
error in FHTTP.ISSUE_REQUEST: syntax error in URI template {0} at offset {1} [characters]

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The URI template specified by the 'uri_template' parameter passed to FHTTP.ISSUE_REQUEST was not syntactically correct [RFC 6570, level 4].

Action:
Correct the URI template.

FRM-41633
error in FHTTP.ISSUE_REQUEST: the URL generated from the URI template {0}{1} for a {2} request was rejected.

Category:
Data

Cause:
The URL generated from the 'uri_template' and 'url_parameters' parameters passed to FHTTP.ISSUE_REQUEST was malformed or, if the 'server_url_or_id' parameter was null or not specified, did not specify a scheme of 'http', 'https', 'ws', or 'wss'.

Action:
Correct the 'uri_template' and/or 'url_parameters' parameters.

FRM-41640
error in FHTTP.ISSUE_REQUEST: "url_parameters" contains an unexpected {0} element; its JSON pointer is {1}

Category:
Data

Cause:
The values of the children of the JSON object specified by the 'url_parameters' parameter passed to FHTTP.ISSUE_REQUEST must be strings, arrays of strings, or objects whose child values are strings or arrays of strings. A violation of this constraint was detected.

Action:
Correct the offending element.

FRM-41642
error in FHTTP.ISSUE_REQUEST: "url_parameters" contains an element with an object key containing an invalid %-encoding; the element"s JSON pointer is {0}

Category:
Data

Cause:
A child element of the JSON object specified by the 'url_parameters' parameter passed to FHTTP.ISSUE_REQUEST corresponded to a variable in a '+' or '#' expression in the URI template specified by the 'uri_template' parameter, and the object key of the child element or an element within it contained an invalid sequence of 3-byte %-encodings. Each %-encoding must consist of '%' followed by 2 hex digits, and the sequence of bytes denoted by the %-encodings must be a valid AL32UTF8 representation of a Unicode character.

Action:
Correct the offending element.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-41643
error in FHTTP.ISSUE_REQUEST: "url_parameters" contains a STRING element with a value containing an invalid %-encoding; the element"s JSON pointer is {0}

Category:
Data

Cause:
A child element of the JSON object specified by the 'url_parameters' parameter passed to FHTTP.ISSUE_REQUEST corresponded to a variable in a '+' or '#' expression in the URI template specified by the 'uri_template' parameter, and the value of the child element or an element within it contained an invalid sequence of 3-byte %-encodings. Each %-encoding must consist of '%' followed by 2 hex digits, and the sequence of bytes denoted by the %-encodings must be a valid AL32UTF8 representation of a Unicode character.

Action:
Correct the offending element.

FRM-41650
error in FHTTP.ISSUE_REQUEST: "request_headers" contains an unexpected {0} element; its JSON pointer is {1}

Category:
Data

Cause:
The values of the children of the JSON object specified by the 'request_headers' parameter passed to FHTTP.ISSUE_REQUEST must be strings. A violation of this constraint was detected.

Action:
Correct the offending element.

FRM-41652
error in FHTTP.ISSUE_REQUEST: "request_headers" contains an element whose object key is not a valid HTTP header name: invalid character found at offset {0} [characters]; the element"s JSON pointer is {1}

Category:
Data

Cause:
The object key of a child of the JSON object specified by the 'request_headers' parameter passed to FHTTP.ISSUE_REQUEST did not conform to the syntax for a header name specified by RFC 7230: an invalid character was found. Characters in header values must be visible USASCII characters [0x21-0x7f], and must not be any of: '"', '(', ')', ',', '/', ':', ';', '<', '=', '>', '?', '@', '[', '', ']', '{', '}'.

Action:
Correct the offending element.

FRM-41653
error in FHTTP.ISSUE_REQUEST: "request_headers" contains an element whose value is not a valid HTTP header value: invalid character found at offset {0} [characters]; the element"s JSON pointer is {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
The value of a child of the JSON object specified by the 'request_headers' parameter passed to FHTTP.ISSUE_REQUEST did not conform to the syntax for a header value specified by RFC 7230: an invalid character was found. Characters in header values must be visible, or space, or horizontal tab. If the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable is set to 3 or 4, the invalid value is displayed in a subsequent FRM-41654 message.

Action:
Correct the offending element.

FRM-41654
The invalid header value is {0}

Category:
Data

Cause:
This message follows FRM-41653 if the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable is set to 3 or 4.

Action:
No action is required.

FRM-41660
error in FHTTP.ISSUE_REQUEST: a {0} request to the URL generated from the URI template {1}{2} encountered an error communicating with the external service.

Category:
Network

Cause:
The request issued by FHTTP.ISSUE_REQUEST encountered an IOException while attempting to communicate with the external service. A subsequent FRM-41692 message indicates where the stack trace for the IOException was written.

Action:
Inspect the stack trace in the response identified by message FRM-41692 in ODL. If the stack trace does not indicate how to fix the problem, and the problem persists, contact the owner of the external service.

FRM-41661
error in FHTTP.ISSUE_REQUEST: a {0} request to the URL generated from the URI template {1}{2} received unexpected response status code {3}.

Category:
Requests/Responses

Cause:
The request issued by FHTTP.ISSUE_REQUEST received a response status code that was not specified in the 'accept' parameter and was not one of the status codes that are always accepted, namely 200, and [for all methods except TRACE] 204, and [for PUT and POST] 201 and 205. A subsequent FRM-41691 message indicates where the body of the response was written.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
If the status code is a legitimate response from the accessed external service, include it in the 'accept' parameter, and add appropriate logic to handle it. Otherwise, inspect the diagnostic information in the response identified by message FRM-41691 in ODL.

FRM-41671
error in FHTTP.ISSUE_REQUEST: the runtime process encountered a memory allocation failure while attempting to process a {0} request to the URL generated from the URI template {1}{2}

Category:

Cause:
FHTTP.ISSUE_REQUEST was unable to allocate adequate memory in the runtime process.

Action:
Specify fewer or smaller request headers or a smaller request body, or modify the selection criteria specified in the request to the external service, so as to limit the size of the response.

FRM-41672
error in FHTTP.ISSUE_REQUEST: WebLogic was unable to create a thread to process a request to an external service.

Category:
Threads

Cause:
The number of active threads created by the WebLogic server exceeded the limit specified by the <max-concurrent-new-threads> element in weblogic-application.xml, weblogic.xml, or config.xml, as described in 'Configuring Concurrent Managed Objects' in 'Oracle Fusion Middleware Administering Server Environments for Oracle WebLogic Server'. The Forms application was terminated.

Action:
Increase the limit or run the Forms application when the system is less heavily loaded.

FRM-41673
error in FHTTP.ISSUE_REQUEST: the JVM encountered an OutOfMemoryError while attempting to process a {0} request to the URL generated from the URI template {1}{2}

Category:
Memory

Cause:
FHTTP.ISSUE_REQUEST was unable to allocate adequate memory in the JVM that's issuing the request.

Action:
Specify fewer or smaller request headers or a smaller request body, or modify the selection criteria specified in the request to the external service, so as to limit the size of the response.

FRM-41674
error in Dynamic Monitoring Service (DMS): WebLogic was unable to create a thread to remove unused DMS objects.

Category:
Threads

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The number of active threads created by the WebLogic server exceeded the limit specified by the <max-concurrent-new-threads> element in weblogic-application.xml, weblogic.xml, or config.xml, as described in 'Configuring Concurrent Managed Objects' in 'Oracle Fusion Middleware Administering Server Environments for Oracle WebLogic Server'.

Action:
No action is necessary if this happens very rarely. Increase the limit if this happens frequently.

FRM-41675
error in Forms prestart processing: WebLogic was unable to create a thread to fill the pool of prestarted Forms runtime processes.

Category:
Threads

Cause:
The number of active threads created by the Weblogic server exceeded the limit specified by the <max-concurrent-new-threads> element in weblogic-application.xml, weblogic.xml, or config.xml, as described in 'Configuring Concurrent Managed Objects' in 'Oracle Fusion Middleware Administering Server Environments for Oracle WebLogic Server'.

Action:
No action is necessary if this happens very rarely. Increase the limit if this happens frequently.

FRM-41690
The reconstructed request line, request headers, and request body (if any) have been written to {0}

Category:
Requests/Responses

Cause:
This message follows FRM-41539, FRM-41569, FRM-41592, and various error messages written by FHTTP.ISSUE_REQUEST, if the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable is set to 3 or 4.

Action:
No action is required.

FRM-41691
The reconstructed response status line, response headers, and response body (if any) have been written to {0}

Category:
Requests/Responses

Cause:
This message follows FRM-41539 and FRM-41569, if the FORMS_HTTP_DIAGNOSTIC_LEVEL environment variable is set to 4, and various error messages written by FHTTP.ISSUE_REQUEST.

Action:
No action is required.

FRM-41692
The stack trace for the communication error has been written to {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Network

Cause:
This message follows FRM-41660 and FRM-41760.

Action:
No action is required.

FRM-41700
error encrypting credentials for an external service

Category:
Configuration

Cause:
An unexpected error occurred while encrypting credentials for an external service.

Action:
If the problem persists, contact Oracle Support Services.

FRM-41701
error decrypting credentials for an external service

Category:
Configuration

Cause:
An unexpected error occurred while decrypting credentials for an external service.

Action:
If the problem persists, contact Oracle Support Services.

FRM-41712
error in FHTTP.ISSUE_REQUEST: token {0} [{1}] missing from "authorization_info"

Category:
Data

Cause:
The 'authorization_info' parameter passed to FHTTP.ISSUE_REQUEST (consisting of tokens separated by unit separator characters [u001f]) does not contain the token that was expected at the specified index [1-relative].

Action:
Correct the 'authorization_info' parameter.

FRM-41713
error in FHTTP.ISSUE_REQUEST: invalid value {0} for token {1} [{2}] in "authorization_info"

Category:
Data

Cause:
The 'authorization_info' parameter passed to FHTTP.ISSUE_REQUEST (consisting of tokens separated by unit separator characters [u001f]) contains an invalid token at the specified index [1-relative]. In particular, token 1 [credential_id] must contain only alphanumeric characters and '_', '.', '-'.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the 'authorization_info' parameter.

FRM-41714
error in FHTTP.ISSUE_REQUEST: logon dialog potentially required for an authorization that was not the last authorization in "authorization_info"

Category:
Data

Cause:
The 'authorization_info' parameter passed to FHTTP.ISSUE_REQUEST (consisting of tokens separated by unit separator characters [u001f]) contained multiple authorizations. One of them was of type Basic Authentication or OAuth2 Password. Such an authorization must be the last of the multiple authorizations.

Action:
Correct the 'authorization_info' parameter.

FRM-41715
error in FHTTP.ISSUE_REQUEST: username {0} specified for basic authentication in "authorization_info" contains a colon

Category:
Data

Cause:
The 'authorization_info' parameter passed to FHTTP.ISSUE_REQUEST (consisting of tokens separated by unit separator characters [u001f]) specified basic authentication as the authorization (or one of the authorizations). The username specified in token 3 [1-relative] contained a colon, which is not allowed for basic authentication.

Action:
Correct the 'authorization_info' parameter.

FRM-41721
error in FHTTP.ISSUE_REQUEST: authorization failed due to invalid config section name {0}

Category:
Data

Cause:
Authorization for HTTP requests to external services requires that the config section name specified as the config parameter in the frmservlet URL used to launch the Forms application contain only alphanumeric characters and '_', '.', '-'.

Action:
Specify a config section with a valid name in the frmservlet URL used to launch the Forms application.

FRM-41722
error in FHTTP.ISSUE_REQUEST: authorization failed due to missing credential for {0}

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
API Key and OAuth2 authorizations for HTTP requests to external services require that the Oracle Platform Security Services Credential Store contain a generic credential for the external service. The credential key must be of the form <config_section_name>=<credential_id>.

Action:
Use Fusion Middleware Control to add the generic credential. The value must be the key for API Key authorizations, and <client_id><LF><client_password> or <client_id><LF><client_secret> for OAuth2 authorizations. For OAuth2 Password authorizations, <LF><username><LF><password> may optionally be appended to the value. <LF> is the line-feed character [0x0a]. It may optionally be preceded by a carriage-return character [0x0d].

FRM-41723
error in FHTTP.ISSUE_REQUEST: authorization failed due to invalid credential for {0}

Category:
Configuration

Cause:
API Key and OAuth2 authorizations for HTTP requests to external services require that the Oracle Platform Security Services Credential Store contain a valid generic credential for the external service. A generic credential is allowed (but not required) for Basic Authentication authorizations. The credential key must be of the form <config_section_name>=<credential_id>. The value must be a string of the form <username>:<password> for basic authentication, and <client_id><LF><client_password> or <client_id><LF><client_secret> for OAuth2 authorization. For OAuth2 Password authorizations, <LF><username><LF><password> may optionally be appended to the value. <LF> is the line-feed character [0x0a]. It may optionally be preceded by a carriage-return character [0x0d].

Action:
Use Fusion Middleware Control to correct the generic credential.

FRM-41724
error in FHTTP.ISSUE_REQUEST: authorization failed due to rejected credential for {0}

Category:
Configuration

Cause:
The Oracle Platform Security Services Credential Store contained a generic credential value of the form <username>:<password> for a Basic Authentication authorization, or a generic credential value of the form <client_id><LF><client_password_or_secret><LF><username><LF><password> for an OAuth2 Password authorization, but the username and password were rejected by the external service.

Action:
Determine the correct username and password, and use Fusion Middleware Control to correct the generic credential.

FRM-41725
error in FHTTP.ISSUE_REQUEST: authorization failed due to invalid SSO user credential for {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
In SSO mode, OAuth2 authorization information may be stored in a password credential for the SSO user in the Oracle Platform Security Services Credential Store, and reused for that user in subsequent Forms application sessions. However, when the stored information was subsequently retrieved, it was found to be in an incorrect format.

Action:
If the problem persists, contact Oracle Support Services. As a temporary workaround, you could use Fusion Middleware Control to remove the password credential, or you could disable SSO mode.

FRM-41760
error in FHTTP.ISSUE_REQUEST: OAuth2 authorization failed for client {0} because the request to the token endpoint URL {1} encountered an error communicating with the token endpoint.

Category:
Network

Cause:
The request presented to the OAuth2 Token URL specified for OAuth2 authorization [as token 5 of the 'authorization_info' parameter] encountered an IOException while attempting to communicate with the token endpoint. A subsequent FRM-41692 message indicates where the stack trace for the IOException was written.

Action:
Inspect the stack trace in the response identified by message FRM-41692 in ODL. If the stack trace does not indicate how to fix the problem, and the problem persists, contact the owner of the external service.

FRM-41761
error in FHTTP.ISSUE_REQUEST: OAuth2 authorization failed for client {0} because the request to the token endpoint URL {1} received unexpected response status code {2}. Details: {3}

Category:
Requests/Responses

Cause:
The request presented to the OAuth2 Token URL specified for OAuth2 authorization [as token 5 of the 'authorization_info' parameter] received a response status code other than 200. If the request specified a scope, [scope=<requested_permissions>] will appear in the error message immediately following the token endpoint URL.

Action:
Refer to the details that appear at the end of the message.

FRM-41762
error in FHTTP.ISSUE_REQUEST: OAuth2 authorization failed for client {0} because the token endpoint URL {1} response {2} contained a syntax error or deviated from OAuth2 protocol at offset {3} [characters].

Category:
Requests/Responses

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The request presented to the OAuth2 Token URL specified for OAuth2 authorization [as token 5 of the 'authorization_info' parameter] received a response containing a violation of the syntax prescribed by RFC 8259 [JSON] and RFC 6749 [OAuth2].

Action:
Try to determine why the erroneous response is being returned, e.g. by contacting the owner of the external service.

FRM-41763
error in FHTTP.ISSUE_REQUEST: OAuth2 authorization failed for client {0} because the token endpoint URL {1} response specified the unsupported token_type {2}.

Category:
Requests/Responses

Cause:
The request presented to the OAuth2 Token URL specified for OAuth2 authorization [as token 5 of the 'authorization_info' parameter] received a response that specified an unsupported token_type. Currently, only "bearer" is supported.

Action:
Redesign the Forms application.

FRM-41764
error in FHTTP.ISSUE_REQUEST: OAuth2 authorization failed for client {0} because the request to the token endpoint URL {1} requested scope={2}, but the response granted only scope={3}.

Category:
Requests/Responses

Cause:
The request presented to the OAuth2 Token URL specified for OAuth2 authorization [as token 5 of the 'authorization_info' parameter] received a response that did not grant all requested permissions.

Action:
If the requested operation does not actually require all the requested permissions, remove the unneeded ones. Otherwise, contact the owner of the external service and/or redesign the Forms application.

FRM-41765
error in FHTTP.ISSUE_REQUEST: OAuth2 authorization failed for client {0} because an Access Token Location of "Form Parameter" was specified, but request content-type was not "application/x-www-form-urlencoded".

Category:
Data

Cause:
The Access Token Location specified for OAuth2 authorization [as token 4 of the 'authorization_info' parameter] was 'Form Parameter', but the request content-type header was missing or specified a media type other than 'application/x-www-form-urlencoded'.

Action:
Correct the Access Token Location or the request content-type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-41766
error in FHTTP.ISSUE_REQUEST: OAuth2 authorization failed for client {0} because the token endpoint URL {1} response did not specify an access token.

Category:
Requests/Responses

Cause:
The request presented to the OAuth2 Token URL specified for OAuth2 authorization [as token 5 of the 'authorization_info' parameter] received a response which did not contain an access token.

Action:
Try to determine why the erroneous response is being returned, e.g. by contacting the owner of the external service.

FRM-41769
error in FHTTP.ISSUE_REQUEST: OAuth2 authorization failed for client {0} because the OAuth2 Token URL {1} was rejected.

Category:
Data

Cause:
The OAuth2 Token URL specified for OAuth2 authorization [as token 5 of the 'authorization_info' parameter] was malformed or did not specify a scheme of 'http', 'https', 'ws', or 'wss'.

Action:
Correct the OAuth2 Token URL.

FRM-41770
error in FHTTP.ISSUE_REQUEST: OAuth2 authorization failed for client {0} because the attempt to redirect to the authorization endpoint URL {1} encountered an error.

Category:
Network

Cause:
A browser was launched to communicate with the OAuth2 authorization server at the OAuth2 Authorization URL specified for OAuth2 authorization [as token 7 of the 'authorization_info' parameter], but the attempt to redirect the browser response to that URL encountered an IOException. A subsequent FRM-41692 message indicates where the stack trace for the IOException was written.

Action:
Inspect the stack trace in the response identified by message FRM-41692 in ODL. If the stack trace does not indicate how to fix the problem, and the problem persists, contact the owner of the external service.

FRM-41771
error in FHTTP.ISSUE_REQUEST: OAuth2 authorization failed for client {0} because the request to the authorization endpoint URL {1} produced an error. Details: {2}

Category:
Requests/Responses

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The request presented to the OAuth2 Authorization URL specified for OAuth2 authorization [as token 7 of the 'authorization_info' parameter] generated a response that indicated an error. If the request specified a scope, [scope=<requested_permissions>] will appear in the error message immediately following the authorization endpoint URL.

Action:
Refer to the details that appear at the end of the message.

FRM-41774
error in FHTTP.ISSUE_REQUEST: OAuth2 authorization failed for client {0} because the request to the authorization endpoint URL {1} requested scope={2}, but only scope={3} was granted.

Category:
Requests/Responses

Cause:
A scope was specified in the request presented to the OAuth2 Authorization URL specified for OAuth2 authorization [as token 7 of the 'authorization_info' parameter], but the subsequent response from the token endpoint did not grant all requested permissions.

Action:
If the requested operation does not actually require all the requested permissions, remove the unneeded ones. Otherwise, contact the owner of the external service and/or redesign the Forms application.

FRM-41779
error in FHTTP.ISSUE_REQUEST: OAuth2 authorization failed for client {0} because the OAuth2 Authorization URL {1} was rejected.

Category:
Data

Cause:
The OAuth2 Authorization URL specified for OAuth2 authorization [as token 7 of the 'authorization_info' parameter] was malformed or did not specify a scheme of 'http', 'https', 'ws', or 'wss'.

Action:
Correct the OAuth2 Authorization URL.

FRM-41838
runtime process: unable to open temporary record buffer file

Category:
Files

Cause:
The runtime process was unable to open the file used as the temporary record buffer. A preceding FRM-91180 or FRM-91181 error message provides more detail. (FRM-91181 will occur if the error was on the first write attempt).

Action:
Refer to error message FRM-91180 and FRM-91181.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-41839
runtime process: disk I/O error on temporary record buffer file

Category:
Files

Cause:
An I/O error occurred while the runtime process was attempting to read or write a record to the temporary record buffer file. A preceding FRM-91181 or FRM-91182 error message provides more detail.

Action:
Refer to error message FRM-91181 and FRM-91182.

FRM-60000
fatal error configuring Forms component

Category:
Configuration

Cause:
Forms component provisioning failed.

Action:
Examine the stack trace that accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60001
fatal error removing Forms component

Category:
Configuration

Cause:
Forms component deprovisioning failed.

Action:
Examine the stack trace that accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60002
error reading Forms component registration document {0}

Category:
Configuration

Cause:
An error occurred while reading the Forms component registration document.

Action:
Do one of the following: \n1. Make sure that the registration document is valid. \n2. If the registration document is accidentally deleted or modified then reinstall ORACLE_HOME.

FRM-60003
error reading ORACLE_HOME registry file {0}

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred while reading the ORACLE_HOME registry file.

Action:
Do one of the following: \n1. Make sure that the ORACLE_HOME registry file exists. \n2. If ORACLE_HOME registry file is accidentally deleted or modified then reinstall ORACLE_HOME.

FRM-60004
error obtaining text contents of the configuration file {0}

Category:
Configuration

Cause:
Failed to read the text contents of the configuration file.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it.

FRM-60005
Directory {0} exists; renaming it to {1}

Category:
Configuration

Cause:
The subdirectory under the Oracle Instance directory already exists and the provisioning process renamed the existing subdirectory.

Action:
No action is required.

FRM-60006
error obtaining the managed server URL

Category:
Configuration

Cause:
Failed to obtain the managed server URL during Windows application deployment.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60007
error creating Windows shortcuts

Category:
Configuration

Cause:
Failed to create Windows shortcuts during configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60008
error creating Forms instance {0}

Category:
Configuration

Cause:
Failed to create Forms instance.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60009
error updating Forms instance {0}

Category:
Configuration

Cause:
Failed to update Forms instance.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60010
error deleting Forms instance {0}

Category:
Configuration

Cause:
Failed to update Forms instance.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60011
error creating non-managed instance configuration

Category:
Configuration

Cause:
Failed to create Forms instance non-managed configuration.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60012
error updating/deleting instance: invalid Forms instance contents {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Failed to update Forms instance.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60013
error adding missing non-managed instance configuration

Category:
Configuration

Cause:
Failed to add missing Forms instance non-managed configuration.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60101
error registering Forms J2EE application MBeans during the application startup

Category:
Configuration

Cause:
An error occurred while registering the Forms J2EE application runtime MBean or custom configuration files MBeans.

Action:
Examine the stack trace that accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60102
error deregistering Forms J2EE application MBeans during the application shutdown

Category:
Configuration

Cause:
An error occurred while deregistering the Forms J2EE application runtime MBean or custom configuration files MBeans.

Action:
Examine the stack trace that accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60104
error reading the Forms System component instance

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred while reading the Forms system component instance information.

Action:
Do one of the following:\n1. If there are multiple Forms system component instance on the same Weblogic machine, make sure that you have followed the steps in the Forms deployment guide.\n2. Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-60114
error reading default configuration path

Category:
Configuration

Cause:
An error occurred while obtaining the default configuration location.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-60201
error initializing identity store

Category:
Configuration

Cause:
An error occurred while reading the identity store configuration file.

Action:
Examine the stack trace that accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60202
Forms J2EE application {0} is already registered with Oracle Internet Directory host {1} under the container {2}. Deregistering it.

Category:
Configuration

Cause:
An attempt was made to re-create an existing Forms J2EE application footprint in Oracle Internet Directory. This may occur when the same Forms J2EE application is redeployed to the domain.

Action:
No action is required.

FRM-60203
error associating Forms application with Oracle Internet Directory host {0}

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The Forms application footprint in Oracle Internet Directory failed to be created due to one of the following causes:\n 1. Oracle Internet Directory was not accessible.\n 2. The Forms J2EE application footprint password failed to be seeded in Oracle Platform Security Services on the mid-tier.\n 3. An I/O error occurred during storing of Oracle Internet Directory information from the Forms Oracle Internet Directory properties file.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60205
error disassociating Forms application with Oracle Internet Directory host {0}

Category:
Configuration

Cause:
Failed to remove the Forms J2EE application footprint from Oracle Internet Directory due to one of the following causes:\n 1. Oracle Internet Directory was not accessible.\n 2. An error status was returned while deregistering the Forms J2EE application footprint with Oracle Internet Directory.\n 3. Failed to fetch the Forms J2EE application footprint password from Oracle Platform Security Services on the mid-tier.\n 4. An I/O error occurred while cleaning Oracle Internet Directory information from the Forms Oracle Internet Directory properties file.

Action:
Do one of the following:\n 1. Examine the stack trace which accompanies this message, look for status of the IM tier and resolve the issue.\n 2. If using Fusion Middleware Control, make sure that information passed to deregister the Forms J2EE application with Oracle Internet Directory host is valid.\n 3. If the problem persists, contact Oracle Support Services.

FRM-60207
error storing credentials to Oracle Platform Security Services

Category:
Configuration

Cause:
An error occurred while storing the credentials to Oracle Platform Security Services.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60208
error deleting credentials from Oracle Platform Security Services

Category:
Configuration

Cause:
An error occurred while deleting the credentials from Oracle Platform Security Services.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-60209
error obtaining credentials from Oracle Platform Security Services

Category:
Configuration

Cause:
An error occurred while reading the credentials from Oracle Platform Security Services.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60210
error obtaining MBean Server connection

Category:
Configuration

Cause:
An error occurred while connecting to the MBean Server.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60211
error migrating Resource Access Descriptor

Category:
Configuration

Cause:
An error occurred migrating Resource Access Descriptor to Oracle Platform Security Services.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60212
Resource Access Descriptor migration process interrupted

Category:
Configuration

Cause:
A running Resource Access Descriptor migration process was interrupted.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60213
error recording the Resource Access Descriptor migration result

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred while recording the Resource Access Descriptor migration results.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60214
Forms Resource Access Descriptor migration thread awaken

Category:
Configuration

Cause:

Action:

FRM-60215
error reading the Resource Access Descriptor migration results

Category:
Configuration

Cause:
An error occurred while reading the Resource Access Descriptor migration results.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60216
error starting Forms Resource access migration to Oracle Platform Security Services

Category:
Configuration

Cause:
The Forms Resource Access Descriptor migration to Oracle Platform Security Services failed to start because the previous migration process is still running.

Action:
Wait for the exiting migration process to complete before running migration again.

FRM-60217
invalid Single Sign-on user

Category:
Configuration

Cause:
The user passed an invalid Single Sign-on user name to create a Resource Access Descriptor.

Action:
Provide a valid existing Single Sign-on user name and run the request again.

FRM-60218
error connecting to LDAP server

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
An error occurred while connecting the LDAP server due to one of the following causes: \n1. Invalid connection credentials were entered. \n2. Invalid hostname, port information was entered.\n3. LDAP server is down.

Action:
Examine the cause, and take the appropriate remedial action.

FRM-60220
error initializing the Forms Identity store

Category:
Configuration

Cause:
An error occurred while initializing the Forms Identity store.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60221
error obtaining the Forms identity store access

Category:
Configuration

Cause:
An error occurred while obtaining the Forms Identity store.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60222
error creating the FormsREST OPSS credential store map

Category:
Configuration

Cause:
An error occurred while creating FormsREST OPSS credential map.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60223
error accessing Forms local credential store

Category:
Configuration

Cause:
An error occurred while accessing Forms local credential store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60224
error writing to the Forms local credential store

Category:
Configuration

Cause:
An error occurred writing to the Forms local credential store.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60225
error reading user from the Forms local credential store

Category:
Configuration

Cause:
An error occurred reading user from the Forms local credential store.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60226
error decrypting credential in Forms local credential store

Category:
Configuration

Cause:
An error occurred decrypting credential in Forms local credential store.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60227
error reading credential from the Forms local credential store

Category:
Configuration

Cause:
An error occurred reading credential from the Forms local credential store.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60228
error reading credential comments from the Forms local credential store

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
An error occurred reading credential comments from the Forms local credential store.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60229
error updating credential to the Forms local credential store

Category:
Configuration

Cause:
An error occurred updating credential to the Forms local credential store.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60230
error storing credential to the Forms local credential store

Category:
Configuration

Cause:
An error occurred storing credential to the Forms local credential store.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60231
error updating credential: invalid key {0} passed

Category:
Configuration

Cause:
An error occurred updating credential to the Forms local credential store because an invalid key passed.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60232
error updating credential: invalid map {0} passed

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred updating credential to the Forms local credential store because an invalid map passed.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60233
error encrypting credential in Forms local credential store

Category:
Configuration

Cause:
An error occurred encrypting credential in Forms local credential store.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60234
error initializing Forms local credential store

Category:
Configuration

Cause:
An error occurred initializing Forms local credential store.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60235
error deleting credential from the Forms local credential store

Category:
Configuration

Cause:
An error occurred deleting credential from the Forms local credential store.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60236
error deleting credential: invalid map {0} passed

Category:
Configuration

Cause:
An error occurred deleting credential to the Forms local credential store because an invalid map passed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60237
error accessing RADs in the Forms local credential store

Category:
Configuration

Cause:
An error occurred accessing RADs in the Forms local credential store.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60238
error deleting RADs in the Forms local credential store

Category:
Configuration

Cause:
An error occurred deleting RADs in the Forms local credential store.

Action
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60249
error creating Resource Access Descriptor for Forms application {0}: Resource Access Descriptor already exists

Category:
Configuration

Cause:
An error occurred while creating the Resource Access Descriptor because it already exists.

Action:
Edit the existing Resource Access Descriptor rather than adding it.

FRM-60250
error creating Resource Access Descriptor for Forms application {0}

Category:
Configuration

Cause:
An error occurred while creating the Resource Access Descriptor.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60251
error updating Resource Access Descriptor for Forms application {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
An error occurred while updating the Resource Access Descriptor.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60252
error deleting Resource Access Descriptor for Forms application {0}

Category:
Configuration

Cause:
An error occurred while deleting the Resource Access Descriptor.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60253
error reading Resource Access Descriptor for Forms application {0}

Category:
Configuration

Cause:
An error occurred while reading the Resource Access Descriptor.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60254
error obtaining Resource Access Descriptor

Category:
Configuration

Cause:
An error occurred while obtaining the Resource Access Descriptor.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60255
error stashing Single Single-on user information in the Forms session

Category:
Configuration

Cause:
An error occurred while stashing Single Sign-on user information in the Forms session.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60256
permission error reading the Resource Access Descriptor from Oracle Internet Directory

Category:
Configuration

Cause:
Single Sign-on user does not have the right permission to read the Resource Access Descriptor.

Action:
No action is required.

FRM-60257
error reading Forms application {0}, Resource Access Descriptor for Single Sign-on User {1} from Oracle Internet Directory

Category:
Configuration

Cause:
An error occurred while obtaining the Forms application Resource Access Descritor from Oracle Internet Directory.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60258
error reading Forms application Resource Access Descriptor from Oracle Internet Directory

Category:
Configuration

Cause:
An error occurred while obtaining the Forms application Resource Access Descritor from Oracle Internet Directory.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60259
error processing line {0}: invalid syntax

Category:
Configuration

Cause:
An error occurred while processing the indicated line

Action:
Fix the entry and upload RADs again

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-60260
error processing line {0}: invalid set of parameters

Category:
Configuration

Cause:
An error occurred while processing the indicated entry

Action:
Fix the number of parameters at the indicated line

FRM-60261
error processing line {0}: invalid application name

Category:
Configuration

Cause:
An error occurred while processing the indicated entry

Action:
Add the missing application name and upload RADs again

FRM-60262
error processing line {0}: duplicate entry

Category:
Configuration

Cause:
An error occurred while processing the indicated entry

Action:
Delete the duplicate entry at the indicated line and upload RADs again

FRM-60263
error processing line {0}: missing Single Sign-on Username

Category:
Configuration

Cause:
An error occurred while processing the indicated entry

Action:
Add the Single Sign-on Username at the indicated line and upload RADs again

FRM-60264
error processing line {0}: invalid groupRad parameter value

Category:
Configuration

Cause:
An error occurred while processing the indicated entry

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Fix the isGroupRad parameter value at the indicated line and upload RADs again

FRM-60265
error processing line {0}: missing dbUser parameter value

Category:
Configuration

Cause:
An error occurred while processing the indicated entry

Action:
Fix the dbUser parameter value at the indicated line and upload RADs again

FRM-60266
error processing line {0}: missing dbPassword parameter value

Category:
Configuration

Cause:
An error occurred while processing the indicated entry

Action:
Fix the dbPassword parameter value at the indicated line and upload RADs again

FRM-60301
invalid character in the file name argument {0}

Category:
Configuration

Cause:
An error occurred due to an invalid character in the file name.

Action:
Remove the invalid character from the file name and execute the operation again.

FRM-60302
error duplicating the configuration file {0} to {1}

Category:
Configuration

Cause:
An error occurred duplicating the configuration file due to one of the following causes: \n1. MBean registration failed. \n2. Failure to create a new file on the file system.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60303
error duplicating the configuration file {0}: invalid document type {1}

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Invalid document type argument passed to operation.

Action:
Invoke the 'duplicate file' operation only on the supported valid document types (Type_default.env).

FRM-60304
error duplicating configuration file {0}: invalid argument {1} are passed to 'duplicate file' operation

Category:
Configuration

Cause:
The file the user tried to create already exists.

Action:
Pass a different file name for the new file that has to be created.

FRM-60305
error deleting the configuration file {0}

Category:
Configuration

Cause:
An error occurred deleting the configuration file due to one of the following causes: \n1. MBean deregistration failed. \n2. Failure to delete the file from the file system.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60306
error deleting the configuration file {0}: invalid document type {1}

Category:
Configuration

Cause:
An invalid document type argument was passed to the operation.

Action:
Invoke the 'duplicate file' operation only on the supported valid document types (Type_default.env).

FRM-60307
error converting the configuration object to the relevant CompositeType

Category:
Configuration

Cause:
Failed to convert the configuration object to the relevant CompositeType.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60308
error converting the configuration object to the relevant CompositeData

Category:
Configuration

Cause:
Failed to convert the configuration object to the relevant CompositeData.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it. If the problem persists, contact Oracle Support Services.

FRM-60309
error registering child config MBean for the application section {0}

Category:
Configuration

Cause:
Failed to register the child config MBean for the given application section.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it.

FRM-60310
error deregistering child config MBean for the application section {0}

Category:
Configuration

Cause:
Failed to deregister the child config MBean for the given application section.

Action:
Examine the stack trace which accompanies this message for the possible cause of failures and correct it.

FRM-60311
error deleting application section {0}

Category:
Configuration

Cause:
An attempt was made to delete the default application section or a section that does not exist.

Action:
Choose the correct section name.

FRM-60312
error creating application section {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
An attempt was made to create an application section that already exists or has an invalid section name.

Action:
Choose an alternative name for the section.

FRM-60313
error duplicating application section {0} to {1}

Category:
Configuration

Cause:
Failed to duplicate an application section because of one of the following reasons:\n 1. An attempt was made to duplicate an invalid application section.\n 2. An attempt was made to create an application section that already exists.

Action:
Do one of the following:\n 1. Choose a correct section name for the duplicated application section.\n 2. Choose an alternative name for the newly created application section.

FRM-60314
error encrypting userid for forms application {0}

Category:
Configuration

Cause:
An unexpected error occurred while encrypting the userid parameter value.

Action:
If the problem persists, contact Oracle Support Services.

FRM-60315
error decrypting userid for forms application {0}

Category:
Configuration

Cause:
An unexpected error occurred while decrupting the the userid parameter value.

Action:
If the problem persists, contact Oracle Support Services.

FRM-60316
error encrypting forms userid

Category:
Configuration

Cause:
An unexpected error occurred while encrypting the userid parameter value.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
If the problem persists, contact Oracle Support Services.

FRM-60317
error creating formsapp keystore

Category:
Configuration

Cause:
An unexpected error occurred while creating the formsapp keystore

Action:
If the problem persists, contact Oracle Support Services.

FRM-60318
error processing configuration, invalid entry at line:{0}

Category:
Configuration

Cause:
An unexpected error occurred while persisting the configuration.

Action:
Fix the configuration and submit it again.

FRM-91108
internal error in runtime process: unable to initialize PL/SQL

Category:
Process

Cause:
An unexpected error occurred while the runtime process was attempting to initialize PL/SQL.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91109
internal error in runtime process: application startup failure

Category:
Process

Cause:
An unexpected error occurred while the runtime process was attempting to start the Toolkit component.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91111
internal error in runtime process: window system startup failure

Category:
Process

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An unexpected error occurred while the runtime process was attempting to start the window system.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91112
internal error in runtime process: resource manager startup failure

Category:
Process

Cause:
An unexpected error occurred while the runtime process was attempting to start the Toolkit Resource Manager.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91116
internal error in runtime process: Oracle*Image startup failure

Category:
Process

Cause:
An unexpected error occurred while the runtime process was attempting to start Oracle*Image.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91119
internal error in runtime process: Oracle*VGS startup failure

Category:
Process

Cause:
An unexpected error occurred while the runtime process was attempting to start Oracle*VGS.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91124
fatal error in runtime process: {0} specified for FORMS_DECIMAL_PREFIX. Should be zero or the empty string

Category:
Configuration

Cause:
An invalid value was specified for the environment variable FORMS_DECIMAL_PREFIX.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Do one of the following: \n1. Specify FORMS_DECIMAL_PREFIX as '0' to force a zero before a leading decimal point in any number displayed without a format mask in the application. \n2. Specify FORMS_DECIMAL_PREFIX as '' (the empty string).

FRM-91126
fatal error in runtime process: invalid value {0} specified for environment variable {1}

Category:
Configuration

Cause:
An invalid environment variable value was specified. An example would be an invalid timezone for an environment variable that specifies a timezone.

Action:
Correct the environment variable value.

FRM-91127
runtime process: invalid directory name specified for environment variable {0}

Category:
Configuration

Cause:
An invalid value was specified for an environment variable that represents the name of a directory. Specifically, the value is too long: either it is itself longer than a system-imposed maximum, or a subdirectory name that Forms needs to construct would be longer than the system-imposed maximum. Execution of the runtime process might have been terminated, or it might have continued. In the latter case, the functionality that required this environment variable was disabled.

Action:
If this error message appears for DOMAIN_HOME or FORMS_INSTANCE_NAME, and the problem persists, contact Oracle Support Services. Otherwise, correct the environment variable value.

FRM-91128
runtime process warning: invalid value {0} specified for environment variable {1}; using default {2}

Category:
Configuration

Cause:
An invalid environment variable value was specified. The indicated default value was used, and processing continued.

Action:
Correct the environment variable value.

FRM-91129
runtime process: no value specified for required environment variable {0}

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A required environment variable was not set or was set to the empty string. Execution of the runtime process might have been terminated, or it might have continued. In the latter case, the functionality that required this environment variable was disabled.

Action:
If this error message appears for DOMAIN_HOME or FORMS_INSTANCE_NAME, and the problem persists, contact Oracle Support Services. Otherwise, set the environment variable to a non-empty value.

FRM-91132
fatal error in runtime process: invalid data in timezone file {0}

Category:
Configuration

Cause:
The timezone file (specified by the environment variable FORMS_TZFILE) was found to contain invalid data.

Action:
Correct the FORMS_TZFILE environment variable value. It should specify $ORACLE_HOME/oracore/zoneinfo/timezone.dat or $ORACLE_HOME/oracore/zoneinfo/timezlrg.dat.

FRM-91134
fatal error in runtime process: NLS_LANG specifies unsupported character set

Category:
Configuration

Cause:
The NLS_LANG environment variable specified a character set which is not ASCII-based, e.g. fixed-width Unicode or an EBCDIC-based character set.

Action:
Correct the NLS_LANG environment variable value.

FRM-91135
fatal error in runtime process: message file {0} is missing

Category:
Configuration

Cause:
The specified message file was not found.

Action:
Verify that the file has not been moved or deleted. If necessary, reinstall it.

FRM-91137
runtime process: unable to open log file {0}

Category:
Configuration

Cause:
An invalid name was specified for a log file or a trace file. The name might be too long, or it might specify a non-existent or read-only directory. In the former case, the error message

Copyright © 2000, 2026, Oracle and/or its affiliates.

shows the name truncated at the maximum allowable length, followed by 3 dots. Execution of the runtime process might have been terminated, or it might have continued. In the latter case, messages that subsequently would have been written to the file were silently discarded.

Action:
Correct the environment variable used to specify the directory (e.g. FORMS_TRACE_DIR), and/or the file name proper (which might have been specified e.g. by the value of the 'log' configuration parameter). If no environment variable or configuration parameter was set to specify the directory or the file name proper, and the problem persists, contact Oracle Support Services.

FRM-91138
runtime process: unable to create log file {0}

Category:
Configuration

Cause:
An attempt to open, write, or close a log file failed.

Action:
Verify that the directory specified for the log file has appropriate write privileges and adequate disk space.

FRM-91143
internal error in runtime process: unable to create runform global context

Category:
Process

Cause:
An unexpected error occurred while the runtime process was attempting to create the runform global context.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91144
internal error in runtime process: unable to parse user name

Category:
Process

Cause:
An unexpected error occurred while the runtime process was attempting to parse the user name.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91145
fatal error in runtime process: missing serverArgs parameter

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
If this error occurred when using the Forms Servlet, both the serverArgs configuration parameter and the serverArgs applet parameter (either of which can represent the command-line arguments that are passed to the frmweb executable) were either missing or had a blank value. If this error occurred for static HTML (HTML that's not generated by the Forms Servlet), the serverArgs applet parameter was either missing or had a blank value.

Action:
If this error occurred for static HTML, add a serverArgs parameter to the applet. Otherwise, ensure that the Forms Servlet configuration file or the base HTML files correctly define a serverArgs parameter. [Note that the base HTML files that are shipped with the produce omit the serverArgs parameter, but the shipped Forms Servlet configuration file specifies a non-blank value.]

FRM-91150
internal error in runtime process: unable to initialize Oracore program manager

Category:
Process

Cause:
An unexpected error occurred while the runtime process was attempting to initialize the Oracore program manager.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91151
internal error in runtime process: unable to initialize Oracle NLS

Category:
Process

Cause:
An unexpected error occurred while the runtime process was attempting to initialize Oracle NLS.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91152
internal error in runtime process: unable to set environment variable {0}

Category:
Process

Cause:
An unexpected error occurred while the runtime process was attempting to set an environment variable to a new value.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91153
internal error in runtime process: unable to initialize Common Area component

Category:
Process

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An unexpected error occurred while the runtime process was attempting to initialize the Common Area component.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91154
internal error in runtime process: unable to initialize Oracore date component

Category:
Process

Cause:
An unexpected error occurred while the runtime process was attempting to initialize the Oracore date component.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91157
internal error in runtime process: unable to redirect stderr to stdout

Category:
Process

Cause:
An unexpected error occurred while the runtime process was attempting to redirect stderr to stdout. This error should never occur at a customer site.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91160
BI Publisher integration error: {0}

Category:
Configuration

Cause:
The runtime process attempted to communicate with BI Publisher but an exception occurred. Some more information about the specific exception is included in this message, which may help to resolve the problem.

Action:
Attempt to use the information provided to resolve the problem. If the problem persists, contact Oracle Support Services.

FRM-91170
runtime process: JVM exiting with code {0}

Category:
Process

Cause:
The runtime process had started a JVM (in order to run Oracle Reports or the Forms debugger, or to update a password in Oracle Internet Directory). That JVM started exiting.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

FRM-91171
runtime process: JVM aborting

Category:
Process

Cause:
The runtime process had started a JVM (in order to run Oracle Reports or the Forms debugger, or to update a password in Oracle Internet Directory). That JVM started aborting.

Action:
No action is required. However, if there appear to be problems running Oracle Reports or the Forms debugger, or updating a password in Oracle Internet Directory, this message may help to indicate the cause.

FRM-91180
fatal error in runtime process: error {0} ({1}) attempting to open temporary record buffer file

Category:
Files

Cause:
An attempt to open the temporary record buffer file encountered the indicated error. Both the error number (errno on Unix and GetLastError() on Windows) and the corresponding error string are given. The runtime process was terminated.

Action:
Examine the error string, and take appropriate remedial action. Verify that the file system or directory in which the file resides exists and that the runtime process has permissions to read and write to the file system or directory.

FRM-91181
runtime process: error {0} ({1}) attempting to write {2} bytes to offset {3} of temporary record buffer file {4}

Category:
Files

Cause:
The specified 'write' operation to the temporary record buffer file encountered the indicated error. Both the error number (errno on Unix and GetLastError() on Windows) and the corresponding error string are given. Execution continued, for the moment at least; however, an error other than "out of space" is likely to cause subsequent termination of the runtime process (message FRM-91195).

Action:
Examine the error string, and take appropriate remedial action. Verify that the file system or directory in which the file resides exists, and that the runtime process has permissions to read and write to the file system or directory, and that the file system contains sufficient space.

FRM-91182
runtime process: error {0} ({1}) attempting to read {2} bytes from offset {3} of temporary record buffer file {4}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Files

Cause:
The specified 'read' operation to the temporary record buffer file encountered the indicated error. Both the error number (errno on Unix and GetLastError() on Windows) and the corresponding error string are given. Execution continued, for the moment at least; however, the error is likely to cause subsequent termination of the runtime process (message FRM-91195).

Action:
Examine the error string, and take appropriate remedial action.

FRM-91183
runtime process: error {0} ({1}) attempting to allocate {2} bytes at offset {3} of temporary record buffer file {4}

Category:
Files

Cause:
The specified 'allocate' operation ('fallocate' on Linux and 'posix_fallocate' on other Unix platforms) to the temporary record buffer file encountered the indicated error. Both the error number (errno) and the corresponding error string are given. Execution continued, for the moment at least; however, an error other than "out of space" is likely to cause subsequent termination of the runtime process (message FRM-91195).

Action:
Examine the error string, and take appropriate remedial action. Verify that the file system or directory in which the file resides exists, and that the runtime process has permissions to read and write to the file system or directory, and that the file system contains sufficient space.

FRM-91184
runtime process: error {0} ({1}) attempting to truncate or extend temporary record buffer file {2} to {3} bytes

Category:
Files

Cause:
The specified 'ftruncate' operation to the temporary record buffer file encountered the indicated error. Both the error number (errno) and the corresponding error string are given. Execution continued, for the moment at least; however, an error other than "out of space" is likely to cause subsequent termination of the runtime process (message FRM-91195).

Action:
Examine the error string, and take appropriate remedial action. Verify that the file system or directory in which the file resides exists, and that the runtime process has permissions to read and write to the file system or directory, and that the file system contains sufficient space.

FRM-91185
runtime process: error {0} ({1}) attempting to close temporary record buffer file {2}

Category:
Files

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt to close the temporary record buffer file encountered the indicated error. Both the error number (errno on Unix and GetLastError() on Windows) and the corresponding error string are given. Execution continued; however, it's possible that the temporary record buffer file was not deleted properly.

Action:
Examine the error string, and take appropriate remedial action.

FRM-91190
fatal error in runtime process: unable to allocate {0} bytes of memory

Category:
Memory

Cause:
A critical memory allocation request failed. This may indicate insufficient swap space. Execution of the runtime process was terminated.

Action:
Increase the size of the swap space, or rerun the application when the system is less heavily loaded.

FRM-91191
runtime process: unable to allocate {0} bytes of memory; attempting to continue execution

Category:
Memory

Cause:
A memory allocation request failed. This may indicate insufficient swap space. Execution continued, but the current operation (e.g. the loading of a form) failed. And a subsequent critical memory allocation may have failed, thereby terminating the runtime process.

Action:
Increase the size of the swap space, or rerun the application when the system is less heavily loaded.

FRM-91192
fatal error in runtime process: unable to memory-map {0} bytes of memory

Category:
Memory

Cause:
A memory-map request failed. This probably indicates insufficient swap space. Execution of the runtime process was terminated.

Action:
Increase the size of the swap space, or rerun the application when the system is less heavily loaded.

FRM-91193
runtime process: unable to memory-map {0} bytes of memory; attempting to continue execution

Category:
Memory

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A memory-map request failed. This probably indicates insufficient swap space. Execution continued, but the current operation (e.g. the loading of a form) failed. And a subsequent critical memory allocation may have failed, thereby terminating the runtime process.

Action:
Increase the size of the swap space, or rerun the application when the system is less heavily loaded.

FRM-91194
fatal error in runtime process: unable to allocate memory for critical record manager operation

Category:
Memory

Cause:
A memory allocation failure (reported in a preceding FRM-91191 message) occurred while attempting a record manager operation, and the operation was subsequently deemed critical. Execution of the runtime process was terminated.

Action:
Increase the size of the swap space, or rerun the application when the system is less heavily loaded.

FRM-91195
fatal error in runtime process: cannot recover from disk I/O error on temporary record buffer file

Category:
Files

Cause:
A disk I/O error on the temporary record buffer file (reported in a preceding FRM-41839 message and in a FRM-91181 or FRM-91182 message preceding that) caused a critical operation to fail. Execution of the runtime process was terminated. Note that an "out of space" error on a write is *not* fatal.

Action:
Examine the preceding FRM-91181 or FRM-91182 message.

FRM-91196
fatal error in runtime process: unable to memory-map {0} bytes of memory backed by a file

Category:
Memory

Cause:
A memory-map request backed by a file failed. This probably indicates insufficient space in the file system (e.g. /tmp). Execution of the runtime process was terminated.

Action:
Increase the size of the file system, or rerun the application when the system is less heavily loaded.

FRM-91197
runtime process: unable to memory-map {0} bytes of memory backed by a file; attempting to continue execution

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Memory

Cause:
A memory-map request backed by a file failed. This probably indicates insufficient space in the file system (e.g. /tmp). Execution continued, but the current operation (e.g. the loading of a form) failed. And a subsequent critical memory allocation may have failed, thereby terminating the runtime process.

Action:
Increase the size of the file system, or rerun the application when the system is less heavily loaded.

FRM-91199
internal error in runtime process: assertion failure: file {0}, line {1}

Category:
Process

Cause:
An assertion failed in code that the runtime process was executing.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91200
fatal error in runtime process: error reading HTTP header

Category:
Network

Cause:
A fatal error occurred while attempting to read an HTTP header.

Action:
Check for problems on the network that connects the Forms Java Client with the Forms Listener Servlet and the runtime process.

FRM-91210
fatal error in runtime process: error reading HTTP data

Category:
Network

Cause:
A fatal error occurred while attempting to read HTTP data.

Action:
Check for problems on the network that connects the Forms Java Client with the Forms Listener Servlet and the runtime process.

FRM-91220
fatal error in runtime process: error writing HTTP data

Category:
Network

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A fatal error occurred while attempting to write HTTP data.

Action:
Check for problems on the network that connects the Forms Java Client with the Forms Listener Servlet and the runtime process.

FRM-91230
fatal error in runtime process: timeout on connection to Java client

Category:
Network

Cause:
The runtime process was waiting for a message from the Java client, but none appeared within the timeout interval. (This interval defaults to 15 minutes, but can be overridden by the FORMS_TIMEOUT environment variable.)

Action:
Check for problems on the network that connects the Forms Java Client with the Forms Listener Servlet and the runtime process. Also check to see if the Forms applet on the Java client experienced a fatal error.

FRM-91260
internal error in runtime process: unable to initialize the Winsock DLL

Category:
Process

Cause:
An unexpected error occurred while the runtime process was attempting to initialize the Winsock DLL.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91270
runtime process unable to allocate socket for protocol {0}: {1}

Category:
Process

Cause:
The runtime process was unable to allocate a socket for the indicated protocol (IPv4 or IPv6). The error message from the operating system is displayed.\n NOTE: If this error was detected for an IPv4 socket, the runtime process continued execution (and subsequently attempted to configure an IPv6 socket). If this error was detected for an IPv6 socket and an IPv4 socket was not successfully configured, then the runtime process was terminated.

Action:
If the error message from the operating system indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-91272
runtime process unable to set close-on-exec on socket for protocol {0}: {1}

Category:
Process

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The runtime process was unable to configure the socket that it allocated for the indicated protocol (IPv4 or IPv6), to set close-on-exec. The error message from the operating system is displayed. The runtime process attempted to continue execution.

Action:
If the error message from the operating system indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-91273
runtime process unable to enable local address reuse on socket for protocol {0}: {1}

Category:
Process

Cause:
The runtime process was unable to configure the socket that it allocated for the indicated protocol (IPv4 or IPv6), to enable local address reuse. The error message from the operating system is displayed.\n NOTE: If this error was detected for an IPv4 socket, the runtime process continued execution (and subsequently attempted to configure an IPv6 socket). If this error was detected for an IPv6 socket and an IPv4 socket was not successfully configured, then the runtime process was terminated.

Action:
If the error message from the operating system indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-91274
runtime process unable to translate hostname ({0}) to an address for protocol {1}: {2}

Category:
Process

Cause:
The runtime process was unable to configure the socket that it allocated for the indicated protocol (IPv4 or IPv6) correctly, because the hostname could not be translated to an address. The error message from the operating system is displayed.\n NOTE: If this error was detected for an IPv4 socket, the runtime process continued execution (and subsequently attempted to configure an IPv6 socket). If this error was detected for an IPv6 socket and an IPv4 socket was not successfully configured, then the runtime process was terminated.

Action:
If the error message from the operating system indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-91275
runtime process unable to bind socket address for port {0} to socket for protocol {1}: {2}

Category:
Process

Cause:
The runtime process was unable to configure the socket that it allocated for the indicated protocol (IPv4 or IPv6), to bind the socket address for the indicated port to it. The error message from the operating system is displayed.\n NOTE: If this error was detected for an IPv4 socket, the runtime process continued execution (and subsequently attempted to

Copyright © 2000, 2026, Oracle and/or its affiliates.

configure an IPv6 socket). If this error was detected for an IPv6 socket and an IPv4 socket was not successfully configured, then the runtime process was terminated.

Action:
If the error message from the operating system indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-91276
runtime process unable to obtain port number of socket for protocol {0}: {1}

Category:
Process

Cause:
The runtime process was unable to obtain the port number of the socket that it allocated for the indicated protocol (IPv4 or IPv6). The error message from the operating system is displayed. This error should never occur at a customer site.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91277
internal error in runtime process: unable to write port and process ID information to stderr

Category:
Process

Cause:
An unexpected error occurred while the runtime process was attempting to write port and process ID information to standard error. This error should never occur at a customer site.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91278
runtime process unable to listen for connections on socket for protocol {0}: {1}

Category:
Process

Cause:
The runtime process was unable to configure the socket that it allocated for the indicated protocol (IPv4 or IPv6), to listen for connections. The error message from the operating system is displayed.\n NOTE: If this error was detected for an IPv4 socket, the runtime process continued execution (and subsequently attempted to configure an IPv6 socket). If this error was detected for an IPv6 socket and an IPv4 socket was not successfully configured, then the runtime process was terminated.

Action:
If the error message from the operating system indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-91279
runtime process unable to restrict IPv6 socket to IPv6 only: {0}

Category:
Process

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The runtime process was unable to configure the socket that it allocated for IPv6, to restrict its use to IPv6 only (as opposed both IPv6 and IPv4). The error message from the operating system is displayed. The runtime process attempted to continue execution, but a subsequent attempt to bind the socket might fail with the error "address already in use".

Action:
If the error message from the operating system indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-91280
runtime process unable to set non-blocking I/O on socket for protocol {0}: {1}

Category:
Process

Cause:
The runtime process was unable to set non-blocking I/O on the socket that it allocated for the indicated protocol (IPv4 or IPv6). The error message from the operating system is displayed. The runtime process attempted to continue execution.

Action:
If the error message from the operating system indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-91292
internal error in runtime process: invalid initial message from Java client

Category:
Process

Cause:
The initial message from the Java client to the runtime process was not in the expected format.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91293
internal error in runtime process: invalid initial message from servlet

Category:
Process

Cause:
The initial message from the servlet to the runtime process was not in the expected format.

Action:
If the problem persists, contact Oracle Support Services.

FRM-91299
fatal error in runtime process: unable to create a connection to the Java client

Category:
Process

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An unexpected error occurred while the runtime process was attempting to create a connection to the Java client. Usually, a previous message provides more detail.

Action:
If a previous error message indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-91930
message from Forms application: {0}

Category:
Other

Cause:
The Forms application called the MESSAGE built-in with an option of ODL_DEBUG.

Action:
Respond as directed by the application developer.

FRM-91934
message from Forms application: {0}

Category:
Other

Cause:
The Forms application called the MESSAGE built-in with an option of ODL_NOTIFICATION.

Action:
Respond as directed by the application developer.

FRM-91935
message from Forms application: {0}

Category:
Other

Cause:
The Forms application called the MESSAGE built-in with an option of ODL_WARNING.

Action:
Respond as directed by the application developer.

FRM-91936
message from Forms application: {0}

Category:
Other

Cause:
The Forms application called the MESSAGE built-in with an option of ODL_ERROR.

Action:
Respond as directed by the application developer.

FRM-91940
module {0} loaded by Forms runtime process

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The Forms application caused the specified module to be opened.

Action:
No action is required.

FRM-91990
runtime process: A maximum of {0}K bytes were simultaneously allocated for archived record data.

Category:
Performance

Cause:
The runtime process allocated the indicated amount of memory without reserving swap space or /tmp file space. The memory will be included in many reports of memory usage (such as the output of the Linux pmap command), but it will not consume system resources (real memory or disk) until it is actually used for archived record data. (See FRM-91992).

Action:
No action is required.

FRM-91991
runtime process: A maximum of {0}K bytes were simultaneously allocated and reserved for archived record data.

Category:
Performance

Cause:
The runtime process allocated the indicated amount of memory, and reserved swap space or /tmp file space for it.

Action:
No action is required. However, if the number reported by this message is significantly larger than the number reported by FRM-91992 and you are using mapped-memory archiving (FORMS_RECMGR_ARCHIVE unset, or set to MAP_SWAP or MAP_TMPFILE), you may want to reduce the value of FORMS_RECMGR_BLOCK_SIZE (which defaults to 64K when memory is being reserved, but can be set as low as 32K). Better yet, don't reserve memory that's allocated for archived record data, if possible. (This can be accomplished in most Unix installations, by setting FORMS_RECMGR_RESERVE_SPACE to '0').

FRM-91992
runtime process: A maximum of {0}K bytes were simultaneously in use for archived record data.

Category:
Performance

Cause:
The runtime process used the indicated amount of memory for archived record data. Specifically, at time of maximum usage, it (the runtime process) had written data into the pages of memory, and the data was still needed at that point (because there was a possibility that the record might subsequently need to be activated). Note that when

Copyright © 2000, 2026, Oracle and/or its affiliates.

FORMS_RECMGR_ARCHIVE has been set to WRITE_TMPFILE, the runtime process has no way of notifying the file system when it no longer needs a page, and so the file system may retain an unneeded page in a real-memory buffer for a while. Thus, in this case the number reported by this message should be viewed as lower bound.

Action:
No action is required. However, the numbers reported by this message for various applications may help to determine an appropriate value for FORMS_RECMGR_ARCHIVE_THRESHOLD.

FRM-91994
runtime process: When total memory in use for archived record data was at its maximum, record groups required {0}K bytes for archived record data, plus approximately {1}K additional bytes for active record data and record anchors. If FORMS_RECMGR_USED_FOR_RECGRPS were set to FALSE, a total of approximately {2}K bytes would instead have been required.

Category:
Performance

Cause:
At the point in time when total memory in use for archived record data was at its maximum (as reported by FRM-91992), the runtime process used the sum of the first two amounts for all data and anchors for all records in record groups, but would instead have used the third amount if FORMS_RECMGR_USED_FOR_RECGRPS had been set to FALSE.

Action:
No action is required. However, the numbers reported by this message for various applications may help to determine the appropriate value for FORMS_RECMGR_USED_FOR_RECGRPS. [Bear in mind that TRUE (the default) requires more CPU than FALSE.]

FRM-91995
runtime process: The record manager is currently consuming the following for {0}: {1}

Category:
Performance

Cause:
The Forms application issued a call to the GET_RECMGR_STATS built-in, which then issued this message. The parameter {1} in this message is a formatted report of the amount of various types of memory currently being consumed for record data of the type indicated by the parameter {0} in this message (which corresponds to the argument passed to GET_RECMGR_STATS: all_record_data, archived_record_data, active_record_data, or record_anchors). The formatted report lists Kbytes of memory for the following 6 types of memory: MALLOCED, MAPPED, MAPPED_IN_USE, MAPPED_RESERVED, WRITTEN, WRITTEN_IN_USE.

Action:
No action is required.

FRM-93100
Initializing the Forms Servlet. Initialization parameters are:{0}

Category:
Configuration

Cause:
The Forms Servlet was being initialized.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

FRM-93110
No Forms Servlet configuration file is specified.

Category:
Configuration

Cause:
The configFileName initialization parameter was not specified.

Action:
Specify the full name in the servlet parameter configFileName, the system property oracle.forms.configFileName, or the servlet context parameter configFileName.

FRM-93111
Cannot find Forms Servlet configuration file {0}.

Category:
Configuration

Cause:
The Forms Servlet configuration file (specified by the configFileName initialization parameter) was not found.

Action:
Verify that the configFileName initialization parameter specifies the correct value. (The value is taken from the servlet parameter configFileName, the system property oracle.forms.configFileName, or the servlet context parameter configFileName.) Create the file if necessary.

FRM-93112
error reading Forms Servlet configuration file {0}

Category:
Files

Cause:
An I/O error occurred while reading the specified file.

Action:
If the error persists, determine if the file has been damaged. Re-create the file if necessary.

FRM-93113
syntax error at line {0} in configuration file {1}: invalid section name "{2}"

Category:
Configuration

Cause:
The specified configuration file contained an invalid section name.

Action:
Provide a valid section name.

FRM-93114
Forms Servlet configuration file {0} contains invalid data.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
A syntax error was detected while parsing the specified file.

Action:
A preceding FRM-93113 or FRM-93142 error message will provide more information. Take the action indicated for the FRM-93113 or FRM-93142 message.

FRM-93115
error reading ORACLE_HOME registry file

Category:
Configuration

Cause:
An error occurred while reading the ORACLE_HOME registry file.

Action:
Do one of the following:\n1. Make sure that the ORACLE_HOME registry file exists.\n2. If ORACLE_HOME registry file is accidentally deleted or modified then reinstall ORACLE_HOME.

FRM-93121
Cannot find environment variable configuration file {0}.

Category:
Configuration

Cause:
One of the following occurred. (The first is by far the most likely.) Note that an envFile parameter may specify a relative path; if it was not found in the current directory, Forms will search for it in the directory that contains the Forms Servlet configuration file. \n1. The envFile configuration parameter for this application specified a nonexistent file. A preceding FRM-93141 error message provides details. \n2. The envFile configuration parameter for this application specified a file that existed when the Forms Servlet extracted the parameter, but the file subsequently disappeared. \n3. No envFile configuration parameter that would apply to this application was specified, and the envFile servlet parameter specified a nonexistent file.

Action:
Take action depending on the cause. \n1. Take action indicated for the preceding FRM-93141 error message. \n2. Re-create the file, or correct the envFile configuration parameter. \n3. Verify that the envFile servlet parameter specifies the correct value. Create the file if necessary.

FRM-93122
error reading environment variable configuration file {0}

Category:
Files

Cause:
An I/O error occurred while reading the specified file.

Action:
If the error persists, determine if the file has been damaged. Re-create the file if necessary.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-93124
Environment variable configuration file {0} contains invalid data.

Category:
Configuration

Cause:
The specified configuration file contained an invalid section name.

Action:
Provide a valid section name.

FRM-93128
invalid value {0} specified for environment variable FORMS_HTTP_PROXY_PORT or FORMS_HTTPS_PROXY_PORT; proxy host ignored.

Category:
Configuration

Cause:
This error is typically detected when attempting to access an external service (e.g. a REST service). An invalid environment variable value (non-numeric, < 0, or > 65535) was specified for FORMS_HTTP_PROXY_PORT or FORMS_HTTPS_PROXY_PORT. The value that was specified for FORMS_HTTP_PROXY_HOST or FORMS_HTTPS_PROXY_HOST was ignored, and processing continued. However, in the absence of a proxy, the attempt to access the external service may fail.

Action:
Correct the environment variable value.

FRM-93130
No base HTML file is specified.

Category:
Configuration

Cause:
Java Web Start was not enabled, but the basehtml configuration parameter was not specified, nor was the basehtmljpi configuration parameter, where relevant. (See Oracle Fusion Middleware Forms Services Deployment Guide for details about which configuration parameter is appropriate.) The FRM-93140 error message provides details about which configuration sections were searched. (Note that the error message will always refer to the basehtml configuration parameter, not the basehtmljpi configuration parameter.)

Action:
Specify the appropriate configuration parameter.

FRM-93131
Cannot find base HTML file {0}.

Category:
Configuration

Cause:
Java Web Start was not enabled, but the specified base HTML file was not found. This file is typically specified by the basehtml configuration parameter, but in certain cases may be specified by the basehtmljpi configuration parameter. The FRM-93141 error message provides

Copyright © 2000, 2026, Oracle and/or its affiliates.

details. Note that the parameter may specify a relative path; if the file is not found in the current directory, Forms will search for the file in the directory that contains the Forms Servlet configuration file.

Action:
Verify that the parameter specifies the correct file. Create the file if necessary.

FRM-93132
error reading base HTML or JNLP file {0}

Category:
Files

Cause:
An I/O error occurred while reading the specified file.

Action:
If the error persists, determine if the file has been damaged. Re-create the file if necessary.

FRM-93134
No base JNLP file is specified.

Category:
Configuration

Cause:
Java Web Start was enabled or a JNLP file was embedded in the HTML file, but the basejnlp configuration parameter was not specified. The FRM-93140 error message provides details about which configuration sections were searched.

Action:
Specify the basejnlp configuration parameter.

FRM-93135
Cannot find base JNLP file {0}.

Category:
Configuration

Cause:
Java Web Start was enabled or a JNLP file was embedded in the HTML file, but the specified base JNLP file was not found. This file is specified by the basejnlp configuration parameter. The FRM-93141 error message provides details. Note that the parameter may specify a relative path; if the file is not found in the current directory, Forms will search for the file in the directory that contains the Forms Servlet configuration file.

Action:
Verify that the basejnlp parameter specifies the correct file. Create the file if necessary.

FRM-93136
no base TXT file specified for Oracle Forms Standalone Application

Category:
Configuration

Cause:
The baseSAAfile configuration parameter was not specified.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Specify the baseSAAfile configuration parameter.

FRM-93140
Section [{0}] of Forms Servlet configuration file {1} does not specify (or inherit) a value for the required parameter {2}.

Category:
Configuration

Cause:
A required configuration parameter was not specified in the indicated configuration section or in a parent section.

Action:
Specify the parameter value in the indicated section, or in a parent section. (See Oracle Fusion Middleware Forms Services Deployment Guide for details about what values are expected.)

FRM-93141
Section [{0}] of Forms Servlet configuration file {1} specifies the nonexistent file {2} for parameter {3}.

Category:
Configuration

Cause:
A configuration parameter in the indicated configuration section specified the name of a nonexistent file.

Action:
Verify that the parameter specifies the correct file. Create the file if necessary.

FRM-93142
Section [{0}] of Forms Servlet configuration file {1} specifies the invalid value "{2}" for parameter {3}.

Category:
Configuration

Cause:
An invalid configuration parameter value was specified in the indicated configuration section. Note that invalid values for certain crucial parameters (such as HTMLdelimiter) will cause a subsequent error, FRM-93114.

Action:
Correct the parameter value. (See Oracle Fusion Middleware Forms Services Deployment Guide for details about what values are expected.)

FRM-93143
Oracle Forms Standalone Launcher checksum failed.

Category:
Configuration

Cause:
The checksum received from the client did not match the Oracle Forms Standalone Launcher jar.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Contact your system administrator or get the latest Oracle Forms Standalone Launcher file.

FRM-93144
error while generating checksum of Oracle Forms Standalone Launcher file

Category:
Configuration

Cause:
An I/O error occurred while generating the checksum.

Action:
Check if Oracle Forms Standalone Launcher file exists.

FRM-93153
New connections to this Forms Servlet are not being allowed. Attempting to redirect connection attempt to {0}.

Category:
Configuration

Cause:
The allowNewConnections configuration parameter was false, and a value was specified for the connectionDisallowedURL configuration parameter. Redirection will be attempted to that URL.

Action:
No action is required.

FRM-93154
The Forms Servlet is not allowing new connections.

Category:
Configuration

Cause:
The allowNewConnections configuration parameter was false, and either no value was specified for the connectionDisallowedURL configuration parameter, or else redirection to the specified URL failed.

Action:
If a value is specified for the connectionDisallowedURL configuration parameter (as indicated in error message FRM-93153), check to see if the specified URL is malformed; if so, correct the URL. Otherwise, no action is required.

FRM-93156
The Forms Servlet is unable to contact the Forms Load Balancing Server at {0}:{1}.

Category:
Configuration

Cause:
The Forms Servlet was unable to contact the indicated Forms Load Balancing Server, and the MetricsServerErrorURL configuration parameter was not specified.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Do one or both of the following. \n1. Determine why the server is unavailable, and correct the condition. \n2. Specify a value for the MetricsServerErrorURL parameter in the Forms Servlet configuration file.

FRM-93160
unexpected error while obtaining the JVM pid

Category:
Process

Cause:
An Exception was encountered while obtaining the JVM process ID.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93162
unexpected error loading native library {0}

Category:
Process

Cause:
An Exception was encountered while loading native library.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93176
Command "{0}" is using default ORACLE_HOME setting: {1}.

Category:
Configuration

Cause:
A test command has retrieved the specified value for the ORACLE_HOME environment variable, from the environment variable configuration file specified by the envFile parameter in the default section of the Forms Servlet configuration file.

Action:
No action is required.

FRM-93180
Initializing ListenerServlet. Initialization parameters are: {0}

Category:
Configuration

Cause:
The Forms Listener Servlet was being initialized.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-93196
Process list file {0} does not exist or is not writable; process list disabled.

Category:
Configuration

Cause:
When a runtime process was started or stopped, an attempt was made to write an updated list of runtime processes to the specified file, but it did not exist or was not writable. Note that the name of the process list file is obtained from the em_process_file parameter in the URL, the Forms Servlet configuration file, or the environment variable configuration file.

Action:
Verify that the em_process_file parameter specifies the correct file. If necessary, create the file or make it writable, or both.

FRM-93197
unexpected error while obtaining the application name from JRF

Category:
Configuration

Cause:
An Exception was encountered while obtaining the application name from JRF.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93198
unexpected error while obtaining the cluster name from JRF

Category:
Configuration

Cause:
An Exception was encountered while obtaining the cluster name from JRF.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93211
error decoding query string using {0} encoding. Spaces generated from "+" in the value of otherparams may be converted to "%20".

Category:
Configuration

Cause:
There was a mismatch between the way that the browser encoded multibyte characters and the way that the Forms Servlet decoded them. This could indicate an invalid value for the defaultcharset parameter in the configuration file, or possibly a problem in either the browser or Oracle software.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
If the site uses the otherparams parameter in any URLs, verify that the defaultcharset parameter in the configuration file is correct; if the defaultcharset parameter is correct, contact Oracle Support Services. Otherwise, no action is required.

FRM-93214
internal buffer ({0} bytes) not big enough to read request content ({1} bytes)

Category:
Requests/Responses

Cause:
An internal buffer was not big enough to read the content of a request from the Java client. The FRM-93214 error message provides supplemental detail for the FRM-93218 error message.

Action:
If the problem persists, contact Oracle Support Services.

FRM-93217
unable to read whole request from client: expected {0}, got {1}

Category:
Requests/Responses

Cause:
A fatal error occurred while reading the content of a request from the Java client. The FRM-93217 error message provides supplemental detail for the FRM-93218 error message.

Action:
Check for problems on the network that connects the Forms Java Client with the Forms Listener Servlet.

FRM-93218
fatal error reading client request content

Category:
Requests/Responses

Cause:
A fatal error occurred while attempting to read the content of a request from the Java client. A preceding FRM-93214 or FRM-93217 error message might provide more detail.

Action:
Check for problems on the network that connects the Forms Java Client with the Forms Listener Servlet.

FRM-93226
fatal error redirecting response to {0}

Category
Requests/Responses

Cause:
A fatal error occurred while redirecting a response. A subsequent FRM-93227 will display the stack trace

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check for problems on the network that connects the Forms Java Client with the Forms Listener Servlet.

FRM-93227
stack trace for preceding FRM-93226:

Category
Requests/Responses

Cause:
This message displays the stack trace associated with the preceding FRM-93226 message.

Action:
Check for problems on the network that connects the Forms Java Client with the Forms Listener Servlet.

FRM-93228
fatal error writing response to client

Category:
Requests/Responses

Cause:
A fatal error occurred while writing a response to the Forms Java client.

Action:
Check for problems on the network that connects the Forms Java Client with the Forms Listener Servlet.

FRM-93240
Multiple Forms applications cannot share an HTTP session.

Category:
Session

Cause:
A Forms application was launched in such a way that it attempted to share an HTTP session with an already running Forms application. This might result from one of the following:\n1. The user selected File, then New, then Browser Window (or Ctrl+N) in Internet Explorer while the servlet session was being tracked using cookies (that is, session cookies were enabled). In this case Forms does not support creating a new session for the second window.\n2. An application attempted to launch multiple Forms applications, and session cookies were enabled in the Forms application.\n3. An application attempted to launch multiple Forms applications using POST, cookies were disabled in the Forms application, and the launching application specified the same cookie name as did the Forms application.

Action:
Take action depending on the cause.\n1. No action is required.\n2. Disable session cookies in the Forms application.\n3. Change the cookie name in the launching application or the Forms application. This can be accomplished via <cookie-name> under <session-descriptor> in the weblogic.xml deployment descriptor.

FRM-93245
HTTP session not found on target server; possible load balancer configuration issue.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Session

Cause:
A GET request to the Forms Servlet or Forms Listener Servlet that was not for SSO Web Start specified a session ID (e.g. jsessionid) in a cookie or the URL, but no matching HTTP session was found on the server machine to which the request was directed. This might result from one of the following:\n1. A load balancer was not correctly configured to support sticky sessions.\n2. (1) cookies were disabled in weblogic.xml, (2) an intermediate agent timed out while an Oracle Forms Standalone application was waiting for an end user to do SSO login or to submit a Resource Access Descriptor (RAD) during SSO authentication, and (3) the preserveHttpSessionId configuration parameter was not set to true.

Action:
Take action depending on the cause.\n1. Verify that the load balancer is correctly configured to support session stickiness.\n2. Try reducing the value specified for the ssoSaaWaitInterval configuration parameter. [It defaults to 25 seconds.] Note that setting the preserveHttpSessionId configuration parameter to true will produce the more illuminating FRM-93248 in this case [i.e. when conditions (1) and (2) are true].

FRM-93248
connection to the server apparently closed after a request had executed for {0,number,#0.000} seconds, probably due to an intermediate agent timing out

Category:
Configuration

Cause:
This message may appear in the terminal window from which a Standalone application was launched. The Oracle Forms Standalone Launcher was waiting for SSO authentication to complete. When the wait exceeds the interval specified by the ssoSaaWaitInterval configuration parameter, the original request returns and the Standalone Launcher issues a new request, repeating until SSO authentication is complete. However, it appears that one of those requests failed, probably due to a timeout in an intermediate agent, which in turn caused the connection to the server to be closed.

Action:
Reduce the value specified for the ssoSaaWaitInterval configuration parameter. [It defaults to 25 seconds.]

FRM-93249
launch of browser window to be used for SSO authentication of an Oracle Forms Standalone application timed out after {0} seconds

Category:
Configuration

Cause:
This message will appear in the terminal window from which the Standalone application was launched. One of the following occurred:\n1. The browser was not launched at all, probably because java.awt.Desktop is not supported on the current platform. This message will be preceded by an FRM-92493 error message.\n2. The browser was launched, but the request generated by its initial URL did not specify a valid HTTP session, probably because a load balancer did not direct the request to the correct server. An FRM-93245 error message will appear on the launched browser window.\n3. A slow network or an overloaded client machine prevented the browser launch from completing within the indicated time interval (specified by

Copyright © 2000, 2026, Oracle and/or its affiliates.

the ssoSaaBrowserLaunchTimeout configuration parameter). The time interval is measured from the initial invocation of frmsal.jar that launched the application.

Action:
Take action depending on the cause.\n1. Launch the Standalone application on a platform which supports java.awt.Desktop.\n2. Verify that the load balancer is correctly configured to support session stickiness.\n3. Increase the value specified by ssoSaaBrowserLaunchTimeout configuration parameter.

FRM-93250
Forms session started.

Category:
Session

Cause:
This message was generated on the initial request from the browser to the Forms Servlet, before an HTTP session was created.

Action:
No action is required.

FRM-93251
Runtime session started for client {0} (IP address {1}).

Category:
Session

Cause:
This message was generated when the runtime process was created (typically just after the HTTP session was created). If performance monitoring was requested, it started at this point.

Action:
No action is required.

FRM-93252
Forms session ended.

Category:
Session

Cause:
This message was generated when the runtime process was terminated. If performance monitoring was requested, it stopped at this point.

Action:
No action is required.

FRM-93301
Fatal authentication error: Unable to connect to Oracle Internet Directory.

Category:
Security

Cause:
A NamingException occurred while attempting to connect to Oracle Internet Directory.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify that the Oracle Internet Directory is up.

FRM-93302
error running Forms in SSO mode.

Category:
Security

Cause:
The OHS instance front-ending Forms managed server is not configured to run with Webgate.

Action:
Configure OHS with the Webgate access client. Refer to the Forms documentation.

FRM-93304
No resource information found for key {0}.

Category:
Security

Cause:
No resource information was found for the specified key in Oracle Internet Directory. This message might be followed by error message FRM-93330 or FRM-93318.

Action:
If a subsequent error message appears, take the action indicated for that error. Otherwise, no action is required.

FRM-93306
Encountered {0} while attempting to retrieve database credentials from Oracle Internet Directory.

Category:
Security

Cause:
A UtilException was encountered while attempting to retrieve database credentials from Oracle Internet Directory. This message might be followed by error message FRM-93330, FRM-93316, or FRM-93318.

Action:
If a subsequent error message appears, take the action indicated for that error. Otherwise, no action is required.

FRM-93308
Unable to get the User Distinguished Name (DN) for the User or the Subscriber

Category:
Security

Cause:
An Exception occurred while attempting to get the User Distinguished Name for the Oracle Access Manager user from Oracle Internet Directory

Action:
Verify that the Oracle Internet Directory is Up.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-93310
Encountered {0} while attempting to decode headers from mod_osso.

Category:
Security

Cause:
An Exception was encountered while attempting to decode headers from mod_osso.

Action:
If a subsequent error message appears, take the action indicated for that error. Otherwise, no action is required.

FRM-93316
Encountered {0} while attempting to obtain user credentials. Redirecting to Delegated Administration Services.

Category:
Security

Cause:
A NoPermissionException occurred while attempting to obtain credentials. The user will be redirected to Delegated Administration Services.

Action:
If a subsequent error message appears, take the action indicated for that error. Otherwise, no action is required.

FRM-93318
Encountered {0} while attempting to obtain user credentials. Redirecting to Delegated Administration Services or to the SSO error URL.

Category:
Security

Cause:
A NamingException that is not a NoPermissionException occurred while attempting to obtain user credentials.

Action:
If a subsequent error message appears, take the action indicated for that error. Otherwise, no action is required.

FRM-93320
unable to obtain application entity credential from Oracle Platform Security Services

Category:
Security

Cause:
The Forms servlet could not retrieve application credential from Oracle Platform Security Services to connect to OID. One of the following was true: \n1. The Forms application did not have privileges to connect to Oracle Platform Security Services. \n2. Oracle Platform Security Services alias and key values were invalid.

Action:
Check whether credentials exist and are valid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-93322
unable to obtain user credentials; redirecting to Resource Access Descriptor servlet

Category:
Security

Cause:
User credentials were not obtained, and either the symptom was a NoPermissionException, or the ssoDynamicResourceCreate configuration parameter was true.

Action:
No action is required.

FRM-93324
Encountered {0} while attempting to obtain the Delegated Administration Services URL.

Category:
Security

Cause:
A UtilException was encountered while attempting to obtain the Delegated Administration Services URL.

Action:
Verify that Delegated Administration Services is up.

FRM-93326
Delegated Administration Services URL generated: {0}

Category:
Security

Cause:
The Forms application was running in SSO mode, the user did not have proper credentials configured in Oracle Internet Directory, and redirection to Delegated Administration Services was requested. This message provides the URL for Delegated Administration Services.

Action:
No action is required.

FRM-93328
User credentials not obtained; redirecting to the SSO error URL.

Category:
Security

Cause:
User credentials were not obtained. The error was not due to a NoPermissionException. The ssoDynamicResourceCreate configuration parameter was not true. If the ssoErrorURL configuration parameter was not defined, this message will be followed by error message FRM-93140, which will provide details.

Action:
No action is required.

FRM-93330
Fatal authentication error: User does not have proper credentials configured.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The user did not have proper credentials configured in the Identity Store (Oracle Internet Directory or Oracle Platform Security Services), and one of the following was true: \n1. The ssoDynamicResourceCreate configuration parameter was true, or the user did not have the necessary permissions to access Oracle Internet Directory.\n2. The ssoDynamicResourceCreate configuration parameter was not true and the ssoErrorURL configuration parameter was not defined.

Action:
Add the user credentials to the Identity Store (Oracle Internet Directory or Oracle Platform Security Services), if appropriate. Alternatively, define the ssoErrorURL configuration parameter.

FRM-93331
Fatal authentication error: Invalid Single Sign-On User.

Category:
Security

Cause:
There was a failure to obtain the Single Sign-On user information after authentication.

Action:
Re-login using SSO credentials. If the problem persists, contact Oracle Support Services.

FRM-93340
Session requires SSO user authentication.

Category:
Security

Cause:
The session was not SSO-authenticated or had expired.

Action:
No action is required.

FRM-93350
failure in SSO user validation

Category:
Security

Cause:
The Forms Listener Servlet decoded a request's SSO headers, but the values did not match the values from the Forms Servlet. The user was prompted to log in again.

Action:
No action is required.

FRM-93360
This session is in SSO mode.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The ssoMode parameter was specified as true in the base configuration file, and the servlet supported authentication.

Action:
No action is required.

FRM-93362
unable to update password in Oracle Internet Directory

Category:
Security

Cause:
The user did not have proper credentials configured in Oracle Internet Directory to update entries.

Action:
Check with the Oracle Internet Directory administrator to see if the user has permissions to update entries in Oracle Internet Directory.

FRM-93364
Cannot dynamically create resource in Oracle Internet Directory: URL specifies invalid value "{0}" for the config parameter.

Category:
Security

Cause:
The Forms application was running in SSO mode, the user did not have proper credentials configured in Oracle Internet Directory, and SSO dynamic resource creation was enabled. However, dynamic resource creation requires a valid configuration section in the base configuration file, but the user specified a nonexistent configuration section.

Action:
No action is required.

FRM-93365
error running Forms in SSO mode

Category:
Files

Cause:
Forms is not configured to run in SSO mode.

Action:
Configure Forms to run in SSO mode.

FRM-93366
error creating Forms application's Resource Access Descriptor in Oracle Internet Directory.

Category:
Security

Cause:
The Forms application failed to dynamically create a Resource Access Descriptor (RAD) in Oracle Internet Directory.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93367
invalid parameters {0} passed to the Forms Rad Servlet

Category:
Security

Cause:
Invalid parameters were passed to the Forms Rad Servlet.

Action:
If the problem persists, contact Oracle Support Services.

FRM-93368
Forms Rad Servlet is in an invalid state.

Category:
Security

Cause:
Invalid Http session detected in the Forms Rad Servlet. This should never happen.

Action:
If the problem persists, contact Oracle Support Services.

FRM-93369
Direct user access of Forms RadServlet is not allowed.

Category:
Security

Cause:
User tried to access the Forms RadServlet directly.

Action:
No action is required.

FRM-93370
error reading the Resouce Access Descriptor for update

Category:
Security

Cause:
Forms Rad Servlet failed to read the Resouce Access Descriptor to update it due to an internal error.

Action:
If the problem persists, contact Oracle Support Services.

FRM-93371
error closing connection with Oracle Internet Directory

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Forms encountered an error closing connection with Oracle Internet Directory.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93380
unexpected error while attempting to redirect to Oracle Access Manager or the Forms Rad servlet

Category:
Security

Cause:
An IOException or ServletException was encountered while attempting to do a sendRedirect or forward to Oracle Access Manager or the Forms Rad servlet.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93382
Oracle Access Manager login processing for an Oracle Forms Standalone application timed out after {0} seconds

Category:
Configuration

Cause:
This message will appear in the terminal window from which the Standalone application was launched. The user did not complete Oracle Access Manager login within the indicated time interval (specified by the ssoSaaBrowserPageTimeout configuration parameter). The time interval is measured from when the page was displayed.

Action:
Increase the time interval specified by ssoSaaBrowserPageTimeout configuration parameter if it is deemed inadequate.

FRM-93383
Resource Access Descriptor processing for an Oracle Forms Standalone application timed out after {0} seconds

Category:
Configuration

Cause:
This message will appear in the terminal window from which the Standalone application was launched. The user did not press Submit or Cancel in the Resource Access Descriptor page within the indicated time interval (specified by the ssoSaaBrowserPageTimeout configuration parameter). The time interval is measured from when the page was displayed.

Action:
Increase the time interval specified by ssoSaaBrowserPageTimeout configuration parameter if it is deemed inadequate.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-93410
unexpected error while prestarting runtime processes

Category:
Process

Cause:
An unchecked Exception or Error was encountered while prestarting runtime processes. The prestarting of runtime processes might not have occurred at all, or it might have been partially completed.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93412
There are {0} prestarted runtime processes in the runtime process pool for configuration section [{1}].

Category:
Process

Cause:
During runtime process pool initialization, the indicated number of runtime processes were prestarted for the indicated configuration section, because the configuration section specified a value of true for the prestartRuntimes parameter. (The number of runtime processes is derived from the prestartInit parameter.)

Action:
No action is required.

FRM-93421
starting the timer for the runtime process pool for configuration section [{0}]

Category:
Process

Cause:
During runtime process pool initialization, a timer task was started for the indicated configuration section, because the configuration section specified a positive value for the prestartTimeOut parameter.

Action:
No action is required.

FRM-93423
adding {0} runtime processes to the runtime process pool for configuration section [{1}] because the pool has gone below the minimum

Category:
Process

Cause:
A prestarted runtime process was removed from the runtime process pool for the indicated configuration section, in order to start a new Forms application. This caused the number of prestarted runtime processes to fall below the value specified by the prestartMin parameter.

Copyright © 2000, 2026, Oracle and/or its affiliates.

As a result, the indicated number of prestarted runtime processes (derived from the prestartIncrement parameter) were added to the pool.

Action:
No action is required.

FRM-93424
removing the prestarted runtime processes for configuration section [{0}]

Category:
Process

Cause:
The servlet was being shut down, or the prestarting of runtime processes timed out (as indicated by message FRM-93425). As a result, prestarted processes were removed from the pool.

Action:
No action is required.

FRM-93425
The prestarting of runtime processes for configuration section [{0}] has timed out.

Category:
Process

Cause:
The thread that was filling the runtime process pool for the indicated configuration section timed out, after running for the number of minutes specified by the prestartTimeOut parameter for the indicated configuration section. Any prestarted processes in the pool were subsequently removed.

Action:
Determine why prestarting was taking an unexpectedly long time, or increase the value of the prestartTimeOut parameter.

FRM-93426
The prestarting of runtime processes for configuration section [{0}] is terminated.

Category:
Process

Cause:
A concurrent process removed the indicated configuration section's entry in the PoolManager while its runtime process pool was being filled. Any prestarted processes in the pool were subsequently removed.

Action:
No action is required.

FRM-93430
scheduling prestart event: {0}.

Category:
Process

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A scheduled prestart timer event was processed, resulting in the prestart of one or more Forms runtime processes.

Action:
No action is required.

FRM-93431
unexpected error while prestarting Forms runtime processes for the pre-start event: {0}

Category:
Process

Cause:
An Exception was encountered while prestarting Forms runtime processes for a scheduled prestart event.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93432
error adding notification listener to the Timer MBean

Category:
Process

Cause:
An Exception was encountered while adding notification listener to the Timer MBean.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93433
schedules restored from prestart archive file

Category:
Process

Cause:
Notifications were added to the prestart Timer MBean from the prestart archive file.

Action:
No action is required

FRM-93434
error restoring schedule {0} from the prestart archive file

Category:
Process

Cause:
An Exception was encountered while restoring a schedule from the prestart archive file.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-93435
error restoring schedules from the prestart archive file

Category:
Process

Cause:
An Exception was encountered while restoring the schedules from the prestart archive file.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93436
schedules are written to the prestart archive file

Category:
Process

Cause:
Schedules from the prestart Timer MBean were dumped to the prestart archive file before the Forms application was shutdown.

Action:
No action is required

FRM-93437
error writing schedules to the prestart archive file

Category:
Process

Cause:
An Exception was encountered while writing schedules to the prestart archive file.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93438
error prestarting Forms runtime processes for the event: {0}

Category:
Process

Cause:
The scheduled Forms runtime processes could not be prestarted because of an invalid entry in the notification event from the prestart Timer MBean.

Action:
No action is required.

FRM-93439
scheduled prestart event not processed for configuration section [{0}]

Category:
Process

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The prestart scheduling event was not processed because the prestartRuntimes parameter is not set in formsweb.cfg.

Action:
Enable the prestartRuntimes parameter in formsweb.cfg.

FRM-93500
unexpected error while attempting to create the runtime process

Category:
Process

Cause:
An unchecked Exception or Error was encountered while attempting to create the runtime process. Typically, a runtime process creation error would cause a more specific message.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93520
Runtime process not created: Maximum permissible number of runtime processes is exceeded.

Category:
Configuration

Cause:
The maxRuntimeProcesses configuration parameter specified a positive decimal number, and there appeared to be that many runtime processes already executing.

Action:
No action is required.

FRM-93530
unable to switch to working directory {0}

Category:
Configuration

Cause:
The specified file did not exist or was not a directory. Note that the name of the working directory is obtained from one of the following: \n1. The workingDirectory parameter in the Forms Servlet configuration file. \n2. The workingDirectory servlet parameter. \n3. <oracle_home>/forms, where <oracle_home> is derived from the ORACLE_HOME parameter in the environment variable configuration file. \n4. <oracle_home>/forms, where <oracle_home> is derived from the ORACLE_HOME environment variable.

Action:
For cases 1 and 2, verify that the workingDirectory parameter specifies the correct directory. For cases 3 and 4, verify that the ORACLE_HOME parameter or environment variable specifies the correct directory. If necessary, create the directory.

FRM-93531
cannot create runtime process: unable to switch to working directory

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Refer to error message FRM-93530 (which always precedes this message). The FRM-93530 message provides the name of the directory.

Action:
Refer to error message FRM-93530.

FRM-93534
unable to execute startup command {0}

Category:
Process

Cause:
The specified command (which was intended to start the runtime process) threw an Exception. The command was retried with <oracle_home>/bin prefixed, but that too threw an Exception. A stack trace accompanies the following FRM-93535 error message. This error should never occur at a customer site. Note that <oracle_home> is derived from one of the following:\n1. The ORACLE_HOME parameter in the environment variable configuration file.\n2. The ORACLE_HOME environment variable.

Action:
Contact Oracle Support Services.

FRM-93535
cannot create runtime process: unable to execute startup command

Category:
Process

Cause:
Refer to error message FRM-93534 (which always precedes this message). The FRM-93534 error message specifies the command. This error should never occur at a customer site.

Action:
Contact Oracle Support Services.

FRM-93536
cannot create runtime process: unable to create temporary logging file

Category:
Files

Cause:
An IOException occurred while trying to create a temporary logging file to capture the standard output and standard error streams of the newly created runtime process.

Action:
Verify that the Forms Listener Servlet has the necessary permissions and disk space to create a temporary file.

FRM-93543
cannot connect to runtime process: unable to get I/O streams from newly created runtime process

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Process

Cause:
The Forms Listener Servlet encountered an Exception when attempting to obtain a BufferedInputStream for the standard output or standard error streams produced by the newly created runtime process. This error should never occur at a customer site.

Action:
Contact Oracle Support Services.

FRM-93546
external message from runtime process: {0}

Category:
Process

Cause:
The runtime process wrote the specified message to stderr or stdout, but the message does not appear to have been written by the frmweb exeutable. It typically will be an O/S message identifying an error that occurred while attempting to load the executable. In such a case, this message will be followed immediately by FRM-93552.

Action:
Examine the external message. If it identifies a fatal error, correct it, if possible. If the problem persists, contact Oracle Support Services.

FRM-93548
Runtime process ID is {0}.

Category:
Process

Cause:
The newly created runtime process sent its process ID back to the Forms Listener Servlet.

Action:
No action is required.

FRM-93550
cannot connect to runtime process: no response from newly created runtime process

Category:
Process

Cause:
The Forms Listener Servlet waited several times (for a total of roughly 4 minutes) for the initial response from the newly created runtime process, but no response arrived.

Action:
If the problem persists, contact Oracle Support Services.

FRM-93552
cannot connect to runtime process: Newly created runtime process has terminated abnormally.

Category:
Process

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The Forms Listener Servlet created the runtime process, but the process terminated abnormally. The preceding error message provides more detail.

Action:
Take the action indicated for the preceding error message.

FRM-93553
cannot connect to runtime process: unable to establish a socket connection to newly created runtime process

Category:
Process

Cause:
The Forms Listener Servlet created the runtime process, but was unable to establish a socket connection to the process.

Action:
If the problem persists, contact Oracle Support Services.

FRM-93558
cannot connect to runtime process: error reading data from newly created runtime process

Category:
Process

Cause:
The Forms Listener Servlet encountered an IOException while attempting to receive data from the newly created runtime process.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93566
unexpected error while attempting to stop runtime process

Category:
Process

Cause:
An unchecked Exception or Error was encountered while attempting to stop the runtime process. Processing continued. However, the runtime process might have been left in existence (thereby consuming resources), and messages from the runtime process might not have been written to the Oracle Diagnostic Log.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93572
error reading messages from runtime process

Category:
Files

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An I/O error occurred while reading the temporary file to which messages from the runtime process were written. Processing continued. However, messages from the runtime process were not written to the Oracle Diagnostic Log.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93574
Application server does not support Oracle character set {0}.

Category:
Configuration

Cause:
The runtime process used the specified Oracle character set when it wrote messages for the Oracle Diagnostic Log, but the application server did not support that character set. Processing continued, using the ISO-8859-1 Java character set. However, some multibyte characters (those in variable arguments) in messages from the runtime process might have been displayed incorrectly in the Oracle Diagnostic Log.

Action:
Verify that the environment variable configuration file specifies the correct value for NLS_LANG (specifically, the correct character set). If the problem persists, contact Oracle Support Services.

FRM-93600
unexpected error while attempting to communicate with the client or the runtime process

Category:
Process

Cause:
An unchecked Exception or Error was encountered while attempting to communicate with the client or the runtime process. Typically, a communication error would cause a more specific message.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93614
invalid or absent Content-Length from runtime process

Category:
Process

Cause:
This message provides more detail for the following FRM-93618 error message.

Action:
Refer to error message FRM-93618.

FRM-93618
fatal error reading data from runtime process

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Process

Cause:
The runtime process was still running, but the Forms Listener Servlet encountered an IOException while attempting to receive data from the process. A preceding message might provide more detail. The accompanying stack trace represents the state of the process when the previous detail message was logged.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93624
internal buffer ({0} bytes) not big enough to hold header ({1} bytes) for message from servlet to runtime process

Category:
Requests/Responses

Cause:
An internal buffer was not big enough to hold the header for a message from the servlet to the runtime process. The FRM-93624 error message provides supplemental detail for the FRM-93628 error message.

Action:
If the problem persists, contact Oracle Support Services.

FRM-93625
internal buffer ({0} bytes) not big enough to generate initial message from servlet to runtime process

Category:
Requests/Responses

Cause:
An internal buffer was not big enough to generate the initial message from the servlet to the runtime process. The FRM-93625 error message provides supplemental detail for the FRM-93628 error message.

Action:
If the problem persists, contact Oracle Support Services.

FRM-93628
fatal error writing data to runtime process

Category:
Process

Cause:
The runtime process was still running, but the Forms Listener Servlet encountered a fatal error while attempting to write data to the process. A preceding FRM-93624 or FRM-93625 error message might provide more detail.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-93652
The runtime process has terminated abnormally.

Category:
Process

Cause:
The Forms Listener Servlet attempted to communicate with the runtime process, but the process had terminated prematurely. The preceding error message provides more detail.

Action:
Take the action indicated for the preceding error message.

FRM-93654
Runtime process {0} is terminating due to external action.

Category:
Process

Cause:
The runtime process was running on a UNIX platform, and received a signal 9 (SIGKILL) or 15 (SIGTERM), or the runtime process was running on a Windows platform, and exited with exit code 1. Presumably the runtime process was terminated explicitly, either via the Enterprise Manager, or via a 'kill' command (UNIX) or the task manager (Windows). As a result, the runtime process terminated abnormally. This message provides more detail for a following FRM-93552 or FRM-93652 error message.

Action:
No action is required.

FRM-93656
Runtime process {0} is terminating due to signal {1}.

Category:
Process

Cause:
The runtime process was running on a UNIX platform, and received a signal other than 9 (SIGKILL) or 15 (SIGTERM). The signal caused the runtime process to terminate abnormally. This message provides more detail for a following FRM-93552 or FRM-93652 error message. If the FORMS_CATCHTERM environment variable was not set to a value that is equivalent to FALSE, there will typically be a stack trace. If the FORMS_C_STACK_TRACE_TO_FILE environment variable was set to a value that is equivalent to FALSE, the stack trace will accompany this message; otherwise, the stack trace will appear in a file named frmweb_dump_<pid> in the Forms trace directory, where <pid> is the process ID. If the FORMS_CATCHTERM environment variable was set to a value that is equivalent to FALSE, there may be a core file that contains a stack trace.

Action:
Examine the stack trace for the runtime process. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93657
Runtime process {0} is terminating due to exception {1}.

Category:
Process

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The runtime process was running on a Windows platform, and encountered an exception (which is displayed as 8 hexadecimal digits in the error message, in some cases followed by a descriptive phrase). The exception caused the runtime process to terminate abnormally. This message provides more detail for a following FRM-93552 or FRM-93652 error message. If the FORMS_CATCHTERM environment variable was not set to a value that is equivalent to FALSE, there will typically be a stack trace. If the FORMS_C_STACK_TRACE_TO_FILE environment variable was set to a value that is equivalent to FALSE, the stack trace will accompany this message; otherwise, the stack trace will appear in a file named frmweb_dump_<pid> in the Forms trace directory, where <pid> is the process ID.

Action:
Examine the stack trace for the runtime process. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93658
Stack trace for runtime process {0} is being written to file {1}.

Category:
Process

Cause:
The runtime process encountered a signal or an exception (identified by the preceding "FRM-93656" or "FRM-93657" message), and the FORMS_C_STACK_TRACE_TO_FILE environment variable was not set to a value that is equivalent to FALSE.

Action:
No action is required.

FRM-93659
Stack trace for runtime process {0} cannot be written to file {1}.

Category:
Process

Cause:
The runtime process encountered a signal or an exception (identified by the preceding "FRM-93656" or "FRM-93657" message), and the FORMS_C_STACK_TRACE_TO_FILE environment variable was not set to a value that is equivalent to FALSE. However, the stack trace file could not be created.

Action:
Ensure that the FORMS_TRACE_DIR environment variable (if set) and the ORACLE_INSTANCE environment variable each specify a valid directory with write permissions and adequate space.

FRM-93660
unable to get the hostname, using localhost instead of hostname in the Forms DMS table

Category:
Process

Cause:
The runtime process was unable to read the hostname from the server.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93661
error writing JVM Controller pid file

Category:
Process

Cause:
The runtime process was unable to write the JVM Controller pid file to the disk.

Action:
Ensure that ORACLE_INSTANCE/FRComponent/frcommon/tools/jvm/proc directory exists, the user running Weblogic server has write permissions to write to it and there is adequate disk space.

FRM-93662
error initializing OPMN metrics collection

Category:
Process

Cause:
The runtime process was unable to initialize OPMN metrics collection.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93700
Request duration is {0} seconds. Request size is {1} bytes; response size is {2} bytes.

Category:
Performance

Cause:
Performance monitoring at the request level was requested.

Action:
No action is required.

FRM-93710
Total duration of network exchanges is {0}. Total number of network exchanges is {1} ({2} long ones over {3} sec). Average time for one network exchange (excluding long ones) is {4}. Total number of bytes sent is {5}. Total number of bytes received is {6}.

Category:
Performance

Cause:
Performance monitoring at the session level was requested.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-93840
Proctest: Warning: nProcs configuration parameter is nonnumeric - using 1.

Category:
Configuration

Cause:
A nonnumeric value was specifed for the nProcs parameter in the base configuration file. The value will default to 1.

Action:
Correct the nProcs configuration parameter.

FRM-93841
Proctest: Process test starting with {0} processes.

Category:
Process

Cause:
The Proctest command started.

Action:
No action is required.

FRM-93842
Proctest: Creating process {0}.

Category:
Process

Cause:
The Proctest command started creating a runtime process.

Action:
No action is required.

FRM-93843
Proctest: Failure to create process {0} - aborting test.

Category:
Process

Cause:
An Exception occurred while attempting to create a runtime process. The preceding error message identifies the problem, and includes a stack trace.

Action:
Refer to the preceding error message.

FRM-93844
Proctest: Connecting to process {0}.

Category:
Process

Cause:
The Proctest command started connecting to a newly created runtime process.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
No action is required.

FRM-93845
Proctest: Failure to connect to process {0} - aborting test.

Category:
Process

Cause:
An Exception occurred while attempting to connect to a newly created runtime process. The preceding error message identifies the problem, and includes a stack trace.

Action:
Refer to the preceding error message.

FRM-93846
Proctest: unexpected error in process test

Category:
Process

Cause:
This message precedes error message FRM-93843 or FRM-93845 if the problem was an Error or an unchecked Exception that was not caught by Forms code. A stack trace is included.

Action:
Examine the stack trace that accompanies this message. If the stack trace indicates a possible cause, correct it. If the problem persists, contact Oracle Support Services.

FRM-93847
Proctest: Number of processes started and connected to is {0}.

Category:
Process

Cause:
The Proctest command created the requested number of runtime processes, and successfully connected to them.

Action:
No action is required.

FRM-93848
Proctest: Stopping the {0} runtime processes.

Category:
Process

Cause:
The Proctest command reached the point in its processing where it was about to stop the runtime processes that it had previously created.

Action:
No action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

FRM-93849
Proctest: Process test complete.

Action:
Please retry.

GGSTU-60009
Unable to take backup of the file

Category:
Deployment

Cause:
Error in the taking backup of prm or obey file.

Action:
Please start/stop jagent process and redeploy.

GGSTU-60010
Unable to deploy Oracle Data Pump Initial Load

Category:
Deployment

Cause:
Selected Database is not Oracle.

Action:
Please use Oracle Database.

GGSTU-60050
Rest Service failure. Unable to open connection to REST service

Category:
Deployment

Cause:
Failure in connecting to REST service.

Action:
Please check to see REST service is up. Check to see if the URL used to connect to REST service is correct.

GGSTU-60051
Rest Service failure. Unable to get status

Category:
Deployment

Cause:
Error in parsing of status response received from REST service.

Action:
Please check to see REST service is up and sending correct format response for status.

GGSTU-60052
Rest Service failure. Unable to get monitorying data.

Category:
Deployment

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Error in parsing of Monitoring data response received from REST service.

Action:
Please check to see REST service is up and sending correct format response for monitoring.

GGSTU-60053
Unable to synchronize profile

Category:
Deployment

Cause:
Error while synchronizing profiles with solution.

Action:
Please refresh Project navigator and try again.

GGSTU-60054
Unable to create diroby directory in OGG Instance.

Category:
Deployment

Cause:
Error while creating diroby directory in OGG Instance.

Action:
Please update installed Jagent or create diroby directory manaully.

GGSTU-60200
Unable to start/stop process.

Category:
UI

Cause:
Error in starting or stoping process.

Action:
Please check if the JAgent service is up and running.

GGSTU-60201
Unable to create deployment archive.

Category:
UI

Cause:
Error in creating deployment archive.

Action:
Critical error UI after creation of deployment archive failed.

GGSTU-60202
Unable to do online deployment.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
UI

Cause:
Error in executing job of online deployment.

Action:
Critical error UI after job of online deployment failed.

GGSTU-60203
Unable to create deployment agent dialog box.

Category:
UI

Cause:
Error in showing dialog box for deployment agent.

Action:

GGSTU-60250
Framework error in opening a CEF editor.

Category:
UI

Cause:
Error in initializing the UI for a CEF editor.

Action:
Critical error in UI module in opening a CEF editor.

GGSTU-60251
Framework error in closing a CEF editor.

Category:
UI

Cause:
Error in closure of the UI for a CEF editor.

Action:
Critical error in UI module in closing a CEF editor.

GGSTU-60300
Error while adding a page to the panel for the Initial load wizard.

Category:
WIZARD

Cause:
Exception while adding page to the Initial load panel wizard.

Action:
Page addition to Initial load wizard failed. Check to see if the Initial load is configured properly.

GGSTU-60301
Error while adding a page to the panel for the Instance assignment wizard.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
WIZARD

Cause:
Exception while adding page to the Instance assignment wizard.

Action:
Page addition to Instance Assignemnt wizard failed. Check to see if the Instances are configured properly.

GGSTU-60302
Error while adding a page to the panel for the Data Server assignment wizard.

Category:
WIZARD

Cause:
Exception while adding page to the Data Server assignment wizard.

Action:
Page addition to Data Server Assignemnt wizard failed. Check to see if the Data Servers are configured properly.

GGSTU-61000
Addin failed to initialize.

Category:
UI

Cause:
Exception while trying to initialize the Studio addin.

Action:
The addin failed. Try to restart the application.

GGSTU-61001
Exception while checking if CEF node can be duplicated

Category:
UI

Cause:
Exception while trying to check if the CEF node can be duplicated.

Action:

GGSTU-61002
Exception while handling duplicate CEF node event.

Category:
UI

Cause:
Exception while trying to process the duplicate CEF node event.

Action:

Copyright © 2000, 2026, Oracle and/or its affiliates.

GGSTU-61003
Exception while handling repository export event.

Category:
UI

Cause:
Exception while trying to process the repository export event.

Action:

GGSTU-61004
Exception while handling repository import event.

Category:
UI

Cause:
Exception while trying to process the repository import event.

Action:

GGSTU-61100
Overall exception in loading metadata for OGG Studio.

Category:
UI

Cause:
Generic Exception in loading metadata.

Action:
Overall failure of loading metadata. Please check for other error codes for specific action.

GGSTU-61101
Exception in loading resource bundle of metadata for OGG Studio.

Category:
UI

Cause:
Error during loading resource bundle for meta data.

Action:
Please check and see if the resource bundle for meta data is present in correct location.

GGSTU-61102
Exception in parsing the metadata xml for OGG Studio.

Category:
UI

Cause:
Error during parking the meta data file.

Action:
Please check and see if the format of meta data file is correct. Check for any missing tags etc.

Copyright © 2000, 2026, Oracle and/or its affiliates.

GGSTU-61103
Exception in reading the metadata properties file for OGG Studio.

Category:
UI

Cause:
Error during reading the meta data properties file.

Action:
Please check and see if the meta data properties file is present at the correct location. Also check if the directory has correct permissions.

GGSTU-61104
Exception in reading and parsing the metadata xml file for OGG Studio.

Category:
UI

Cause:
Error during reading and parsing the meta data xml file.

Action:
Please check and see if the meta data xml file is present at the correct location. Also check if the directory has correct permissions. Also check for any missing tags in the xml file.

GGSTU-64000
Connection context creation failure. Unable to get OGG Resources connection context.

Category:
Resources

Cause:
Error while getting OGG Resources Connection context

Action:
Please make sure connection context configuration is correct

GGSTU-64001
Unable to destroy adf connection context.

Category:
Resources

Cause:
Error while destroying adf connection context.

Action:
Please make sure connection context exists and the user has permissions to destroy the context.

GGSTU-64002
JNDI Context creation failure. Unalbe to create jndi context.

Category:
Resources

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Error while creating jndi context.

Action:
Please make sure JNDI configuration is correct.

GGSTU-64003
ADF Config creation failure. Unable to create adf config files.

Category:
Resources

Cause:
Error while creating adf config files.

Action:
Please make sure PROVIDER URL is correctly configured.

GGSTU-64004
Unable to create adf connection context document

Category:
Resources

Cause:
Error while creating adf connection context document.

Action:
Please make sure ADF connection context is configured correctly.

GGSTU-64005
JNDI Context initialization failure. Unable to initialize JNDI context factory.

Category:
Resources

Cause:
Error while initializing jndi context.

Action:
Please make sure JNDI is correctly configured.

GGSTU-64006
Resource save failure. Unable to save resource in adf config.

Category:
Resources

Cause:
Error while saving resource in adf config.

Action:
Kindly retry by using a different resource name. Also, make sure all the resource parameters are correct.

GGSTU-64007
Resource persist failure. Unable to save/persist resource in repository.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Resources

Cause:
Error while saving resource in repository

Action:
Please try to use a different resource name. Also, make sure that the parameters of resource are correct.

GGSTU-64008
Resource already exists in repository.

Category:
Resources

Cause:
Resource already exists in repository.

Action:
Please use a different resource name.

GGSTU-64009
Resource not found error. Unable to find the specified resource

Category:
Resources

Cause:
Error while retrieving the resource.

Action:
Please use a resource that exists in repository.

GGSTU-64010
Resource Modification failure. Not able to modify/update the specified resource.

Category:
Resources

Cause:
Error while updating the resource.

Action:
Please retry with different properties of resource. Some of the values modifed might be incorrect.

GGSTU-64011
Resource deletion failure. Not able to delete the specified resource.

Category:
Resources

Cause:
Error while deleting resource

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Please make sure this resource is not used by some other object. Kindly delete any association of this resource with others before trying again.

GGSTU-64012
Unable to load adf context document.

Category:
Resources

Cause:
Error while loading adf context document

Action:
Please make sure the adf configuration is correctly configured.

GGSTU-64013
Unable to copy mapping group to global resource library

Category:
Resources

Cause:
Error while copying mapping group to Global Resource Library

Action:
Please make sure that a resource with same name does not currenlty exist. Kindly retry.

GGSTU-64014
OGG Instance name must have text; it must not be empty or blank.

Category:
Resources

Cause:
Error while creating resource

Action:
Please make sure this Instance name is provided in Name field

GGSTU-64015
Unable to find if the data server is assigned to any solution. Data server cannot be renamed.

Category:
Resources

Cause:
Error while trying to find if the data server is assigned to any solution.

Action:
Please create another data server connection with the desired name.

Other

Cause:
The given audit level(filter preset) is invalid.

Action:
Give a valid audit level(filter preset) like Low,Medium,None,Custom.

IAU-01024
Max Dir Size should be atleast double that of min File Size and min File Size should be 4K

Category:
Other

Cause:
Error in setting the maximum directory size or file size for audit logs.

Action:
Give a valid value for maximum directory and file size.

IAU-01025
Unknown componentType {0} at character position:{1}

Category:
Other

Cause:
The component type given in custom event expression is invalid.

Action:
Enter valid component type. listAuditEvents() command gives a list of component types.

IAU-01026
Invalid Event Name: {0}

Category:
Other

Cause:
The event name in custom event expression is invalid.

Action:
Enter valid event name. listAuditEvents() command gives a list of all the events for a given component.

Copyright © 2000, 2026, Oracle and/or its affiliates.

IAU-01027
Invalid component Type: {0}

Category:
Other

Cause:
The component type given in custom event expression is invalid.

Action:
Give valid component type.listAuditEvents() command gives a list of component types.

IAU-01028
Can't read components_dir {0}

Category:
Other

Cause:
Install is possibly corrupted.

Action:
Check your install and contact Oracle Customer Support.

IAU-01029
User {0} not found

Category:
Other

Cause:
The user to be removed is not in the list of special users(users to always audit).

Action:
Check for the list of special users(users to always audit)already present using getAuditPolicy() command.

IAU-01030
Unknown construct . expecting eventName at character position:{0}

Category:
Other

Cause:
Invalid syntax in custom event expression.

Action:
Event name is expected at that position.

IAU-01031
Unknown event {0} at character position:{1}

Category:
Other

Cause:
Invalid event in custom event expression.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Enter a valid event name. listAuditEvents() command gives a list of all the events for a given component.

IAU-01032
Expecting SUCCESSESONLY or FAILURESONLY after the dot at charcter position:{0}

Category:
Other

Cause:
Invalid syntax in custom event expression.

Action:
The events name should be qualified with either SUCCESSONLY or FAILURESONLY after the dot.

IAU-01033
Unknown construct . expecting componentType at character position {0}

Category:
Other

Cause:
componentType is expected at that position.

Action:
Enter valid component type.listAuditEvents() command gives a list of component types.

IAU-01034
Component type {0} is repeated at character position:{1}

Category:
Other

Cause:
Invalid syntax in custom event expression.

Action:
Specify a component exactly once giving the list of all events to be added or removed.

IAU-01035
Missing character after backslash at character position:{0}

Category:
Other

Cause:
The string at the specified position is invalid.

Action:
Remove the trailing backslash.

IAU-01036
Unterminated quoted string at character position:{0}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
No matching end quote in the string.

Action:
Check the specified string and add the matching end quote.

IAU-01037
custom events can only be specified for custom filter preset

Category:
Other

Cause:
Custom events are added when the audit level(filter preset) is not Custom.

Action:
Change the audit level(filter preset) to Custom.

IAU-01038
Unexpected token {0} found at character position {1}

Category:
Other

Cause:
Invalid syntax in custom events expression.

Action:
Check the custom events expression given.

IAU-01039
Unfinished string that started at position {0}

Category:
Other

Cause:
Custom event expression string is not terminated.

Action:
Check the string and terminate it.

IAU-01040
Unrecognized token at position {0}

Category:
Other

Cause:
Invalid syntax in custom events expression.

Action:
Check for the syntax of custom events expression.

IAU-01041
Expecting RHS for the boolean operator {0} at position {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Invalid syntax in custom event expression.

Action:
Give a RHS value for the boolean operator to evaluate.

IAU-01042
Unexpected token {0} found. Expecting -and or -or or ')' at position {1}

Category:
Other

Cause:
Invalid syntax in custom events expression.

Action:
Check for the syntax of custom events expression.

IAU-01043
Expecting ')' corresponding to '(' at {0}

Category:
Other

Cause:
There is no matching end brace in custom events expression string.

Action:
Check the expression and add a closing brace at the end to match with the beginning brace.

IAU-01044
Expecting a relation expression at position {0}

Category:
Other

Cause:
Invalid syntax in custom events expression.

Action:
Check for the syntax of custom events expression.

IAU-01045
Operator {0} is not applicable for an attribute of type {1} at position {2}

Category:
Other

Cause:
Invalid operator given for an attribute in custom events expression.

Action:
Use an operator that is allowed to be used with the attribute.

Copyright © 2000, 2026, Oracle and/or its affiliates.

IAU-01046
Invalid boolean operator {0}

Category:
Other

Cause:
Invalid syntax in custom events expression.

Action:
Give a valid boolean operator.

IAU-01047
Attribute {0} needs a string at position {1}

Category:
Other

Cause:
The value given for the attribute is not a string.

Action:
Give a string value in double quotes.

IAU-01048
Attribute {0} needs a boolean at position {1}

Category:
Other

Cause:
The value given for the attribute in custom events expression is of a different type.

Action:
Give a boolean value(true or false) for this attribute.

IAU-01049
Attribute {0} needs a number at position {1}

Category:
Other

Cause:
The value given for the attribute in custom events expression is of a different type.

Action:
Give a number value for this attribute.

IAU-01050
Attribute {0} needs a date at position {1}

Category:
Other

Cause:
The value given for the attribute in custom events expression is of a different type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Give a date value for this attribute.

IAU-01051
Cannot parse {0} into a date. Error {1} at {2}

Category:
Other

Cause:
Date value entered is invalid.

Action:
Give a valid date value.

IAU-01052
Unparseable date {0} at position {1}

Category:
Other

Cause:
Date value entered is invalid.

Action:
Give a valid date value.

IAU-01053
Unparseable time {0} at position {1}

Category:
Other

Cause:
Invalid time given in the custom events expression.

Action:
Enter valid time format.

IAU-01054
Error in expression: unknown operator

Category:
Other

Cause:
Invalid operator given in a custom events expression.

Action:
Give a valid operator.

IAU-01055
Expecting a Boolean value for attrib:{0}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The value given for the attribute in custom events expression is of a different type.

Action:
Give a boolean value for the attribute.

IAU-01056
Expecting a Number value for attrib:{0}

Category:
Other

Cause:
The value given for the attribute in custom events expression is of a different type.

Action:
Give a number value for the attribute.

IAU-01057
No relational expressions allowed for Binary operator

Category:
Other

Cause:
Binary attribute is present in the custom events expression.

Action:
Remove binary attribute from the custom events expression.

IAU-01058
Expecting a Date value for attrib:{0}

Category:
Other

Cause:
A non-date value is given to the date attribute.

Action:
Give a date value for the attribute.

IAU-01059
trailing backslash in special users

Category:
Other

Cause:
Invalid special users(Users to always audit) string.

Action:
Remove the trailing back slash in special users(Users to always audit)string.

IAU-01060
Invalid config file

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Config file given in importAuditConfig() command is possibly corrupted.

Action:
Contact Oracle Customer Support.

IAU-1061
Dynamic audit store is not configured

Category:
Other

Cause:
The setup is not configured to use Audit Store

Action:
Read the documentation and configure audit store

IAU-01062
Audit Registration Service is not available

Category:
Other

Cause:
Component audit registration failed

Action:
There could be something wrong with the component audit event definition. Check the diagnostic logs for more information

IAU-1063
Either a component event definition file or the compoentType has not been provided

Category:
Other

Cause:
Component event definition file is missing or the compoentType has not been provided

Action:
Provide a componentType and the component event definition file

IAU-1064
AuditLoader Configuration Initialized with Unsupported Timezone {0}. Defaulting to UTC

Category:
Other

Cause:
Unsupported timezone property value is used

Action:
Use a supported timezone value. Supported values are local and utc

Copyright © 2000, 2026, Oracle and/or its affiliates.

IAU-1065
Event(s) {0} exists in audit policy for component type {1}

Category:
Other

Cause:
Events being added already exists in the Custom Event list for the component

Action:
Remove duplicate events from the events that are being added to the Custom event list

IAU-1066
Event(s) {0} not found in audit policy for component type {1}

Category:
Other

Cause:
Events being removed do not exist in the Custom Event list for the component

Action:
Do not try to remove events that do not exist in the Custom Event list

IAU-1067
ComponentType should not be passed in for System Components

Category:
Other

Cause:
Passing in the componentType as one of the params for audit WLST commands is not supported for system components

Action:
Do not pass in the componentType for non JEE/JSE components

IAU-1068
Problem retrieving System Component Attributes from audit store

Category:
Other

Cause:
There is something wrong with the audit store

Action:
Check the diagnostic logs for more information

IAU-1069
Environment variables COMMON_COMPONENTS_HOME or {0} or {1} is not set to read Events

Category:
Other

Cause:
Environment variable COMMON_COMPONENTS_HOME is not set

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Set the value for COMMON_COMPONENTS_HOME

IAU-1070
Cannot start the audit loader thread. Error in executor service retrieval

Category:
Other

Cause:
Executor service retrieval failed

Action:
Check the diagnostic logs for more information

IAU-1071
Cannot change the repository type from DB to File. Valid value for switchToDB switch is true

Category:
Other

Cause:
The value for switchToDB in setAuditRepository WLST command was set to false

Action:
We cannot change the repositoryType from Db to File

IAU-1072
Cannot change the interval value to {0}, Valid value for interval switch is positive numeric

Category:
Other

Cause:
The interval value for audit loader is not valid

Action:
Pass in a valid value for audit loader interval

IAU-1073
Cannot change the timezone value to {0}, Valid value for timezone switch is local or utc

Category:
Other

Cause:
The timezone value is invalid.

Action:
Give a valid timezone value

IAU-1074
Audit Repository Information updated

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The audit config has been updated with the audit repository information

Action:
None

IAU-1075
Operation is not supported. componentType needs to be passed in

Category:
Other

Cause:
The operation failed because the componentType was not provided

Action:
Provide the componentType

IAU-1076
Cannot create IAU Audit DB View. Invalid View Type {0}

Category:
Other

Cause:
Invalid view type has been provided

Action:
Provide a valid view type for creating the IAU Audit DB view

IAU-1077
Cannot create Indexable IAU Audit DB View. No indexable used attributes found in definition for componentType {0}

Category:
Other

Cause:
Indexable attributes not found in component audit definition

Action:
Provide indexable attributes in component audit definition

IAU-1078
Cannot create Indexable IAU Audit DB View. No mappings found for NS {0}

Category:
Other

Cause:
No attribute data mappings found for component

Action:
Check if the component audit registration was successful in the diagnostic logs

IAU-1079
There is no data mapping for the component type passed {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Component audit registration could have been unsuccessful

Action:
Check the diagnostic logs for more information

IAU-1080
Audit Store passed is null

Category:
Other

Cause:
Audit Store failure

Action:
Check the diagnostic logs for more information

IAU-1081
Audit Data DB Type {0} is not supported for {1} IAU view

Category:
Other

Cause:
Some other DB type other than Oracle was provided

Action:
Provide Oracle as the DB type

IAU-1082
Couldn't retrieve connected user from datasource. Grants may fail

Category:
Other

Cause:
Database access failed

Action:
Check the diagnostic logs for more information

IAU-1083
Couldn't create Indexable IAU Audit DB View for component {0}

Category:
Other

Cause:
Failure during the creation of Indexable Audit Database view

Action:
Check the diagnostic logs for more information

Copyright © 2000, 2026, Oracle and/or its affiliates.

IAU-1084
No Definitions found for component {0} in audit store

Category:
Other

Cause:
Component is not registered in the audit store

Action:
Register the component in audit store

IAU-1085
Successfully Created IAU View {1} for component {0}

Category:
Other

Cause:
IAU view has been created for the component

Action:
None

IAU-1086
Could not Create IAU View for component {0}

Category:
Other

Cause:
Creation of audit view failed for component

Action:
Check if view creation is disabled or if there is some issue with the indexable/simple view creation. Check diagnostic logs for more information

IAU-1087
Couldn't generate SQL. Only Oracle Database is supported for Indexable IAU view

Category:
Other

Cause:
Generation of indexable view creation script failed

Action:
Check if the appropriate DB type is passed in. Only Oracle database is supported

IAU-05011
Audit Loader initialization failed. The Audit loader is disabled. Caught Exception {0}

Category:
Other

Cause:
An error prevented the Audit Loader from starting.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the diagnostic logs and contact Oracle Customer Support.

IAU-05042
Error in reading component definition from {0}

Category:
Other

Cause:
Install might be corrupted.

Action:
Check the install and contact Oracle Customer Support.

IAU-05043
Cannot create directory for saving AuditLoader state {0}

Category:
Other

Cause:
OS error in creating directory.

Action:
Check file permissions and disk space.

IAU-05044
Cannot save AuditLoader state to file {0}

Category:
Other

Cause:
OS error in writing to state file.

Action:
Check file permissions and disk space.

IAU-05045
Cannot read AuditLoader state from file {0}

Category:
Other

Cause:
OS error in reading state file.

Action:
Check file permissions or the file is possibly corrupted.

IAU-05046
Stopping AuditLoader, caught exception: {0}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error prevented Audit Loader from continuing.

Action:
Check the diagnostic logs and contact Oracle Customer Support.

IAU-05047
Problem in transferring audit record from file:{0} position:{1} will retry in next cycle. caught exception {2}

Category:
Other

Cause:
The database containing Audit store is probably down.

Action:
Check the database availability. Restart the database if required.

IAU-05048
Problem in transferring audit record to Repository {0}. Please verify your Repository Configuration

Category:
Other

Cause:
The database configuration is invalid or the database is down.

Action:
Check Audit Store configuration and bring up the database if it is down.

IAU-5049
Unable to create Data Source for connection string {0} and DB user {1}

Category:
Other

Cause:
Creation of data source failed. The connection string or the DB user value could be wrong.

Action:
Check if the connection string and DB user values are correct

IAU-5050
Unable to close data source

Category:
Other

Cause:
Failed to close data source

Action:
Check diagnostic logs for more information

IAU-5051
Unable to get a database connection with connect string {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Failed to get database connection. The connection string used to connect to the database could be wrong.

Action:
Check if the connection string value is correct

IAU-5052
JNDI resource does not exist for JNDI name {0}

Category:
Other

Cause:
There is no corresponding JNDI resource for the JNDI name specified

Action:
Check if the JNDI resource exists or the correct JNDI name was used

IAU-5053
Unable to get a connection from the data source for JNDI name {0}

Category:
Other

Cause:
Database access failed

Action:
Check if the datasource for the JNDI name exists and if the correct JNDI name is used

IAU-5054
Problem in getting Audit Service, caught exception: {0}

Category:
Other

Cause:
Error in getting the audit service.

Action:
Check the diagnostic logs for more information

IAU-5055
Properties {0}, {1} and {2} should be defined in the audit service properties

Category:
Other

Cause:
Required properties do not have values set

Action:
Set valid property values for required properties

Copyright © 2000, 2026, Oracle and/or its affiliates.

IAU-5056
Unable to determine the audit log directory. Either the audit service property {0} or system properties {1}, {2} have not been provided

Category:
Other

Cause:
Audit log directory location has not been set

Action:
Set the audit log directory value for the audit.logDirectory service property or use the system property to set the audit log directory. Refer to the OPSS Audit section in Oracle documentation

IAU-5057
Cannot create state file for saving AuditLoader state. Base directory is not set.

Category:
Other

Cause:
Audit log directory location has not been set

Action:
Set the audit log directory value for the audit.logDirectory service property or use the system property to set the audit log directory. Refer to Oracle documentation for more information

IAU-06001
Error in reading audit configuration file from {0}.

Category:
Other

Cause:
Install might be corrupted.

Action:
Check the install and contact Oracle Customer Support.

IAU-06002
Invalid {0} directory: {1}.

Category:
Other

Cause:
Invalid directory path.

Action:
Check that the directory path is valid and the directory is writable.

IAU-06003
Cannot create directory: {0}.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Unable to create directory.

Action:
Check the directory path is valid and the directory is writable.

IAU-06004
Cannot write to {0}: {1}.

Category:
Other

Cause:
Unable to create directory.

Action:
Check the directory path is valid and the directory is writable.

IAU-06005
Denied access to log directory: {0}.

Category:
Other

Cause:
Unable to read/write from/to directory

Action:
Check the directory path is valid and the directory is writable.

IAU-06006
Error in parsing audit component events definition from {0}.

Category:
Other

Cause:
Audit configuration file is possibly corrupted.

Action:
Check the diagnostic logs and contact Oracle Customer Support.

IAU-06007
Failed while reloading audit configuration.

Category:
Other

Cause:
Audit configuration file is possibly corrupted.

Action:
Check the diagnostic logs and contact Oracle Customer Support.

IAU-06008
Error while evaluating event auditability.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Audit configuration file is possibly corrupted.

Action:
Check the diagnostic logs and contact Oracle Customer Support.

IAU-06009
Failed to log audit event.

Category:
Other

Cause:
Error in loading audit configuration or writing to audit logs.

Action:
Check the diagnostic logs and contact Oracle Customer Support.

IAU-6010
"Error while reading release version from audit log file {0} : {1}

Category:
Other

Cause:
Audit log file is not present

Action:
Check the diagnostic logs for more information

IAU-6011
Failed to log busstop header

Category:
Other

Cause:
OS error while writing to the audit log file

Action:
Check file permissions and disk space. Also, check the diagnostic logs for more information

IAU-6012
Unable to determine the audit log directory. No log directory specified

Category:
Other

Cause:
Audit log directory location is not set

Action:
Check the diagnostic logs for more infomation

Copyright © 2000, 2026, Oracle and/or its affiliates.

IAU-6013
Error in audit channel for component {0}. Cannot write audit records. Check if audit log directory is set.

Category:
Other

Cause:
Audit log directory location is not set

Action:
Check the diagnostic logs for more infomation

IAU-6014
Duplicated audit entry : {0} exists in componentType {1}

Category:
Other

Cause:
Duplicate entry in component audit definition

Action:
Remove the duplicate entry from the component audit definition

IAU-62003
parsing of component_events.xml file failed

Category:
Other

Cause:
Install is possibly corrupted.

Action:
Check the install. Contact Oracle Customer Support if needed.

IAU-62004
parsing of auditconfig.xml file failed

Category:
Other

Cause:
Install is possibly corrupted.

Action:
Check the install. Contact Oracle Customer Support if needed.

IAU-62005
parsing of generic_events.xml file failed

Category:
Other

Cause:
Install is possibly corrupted.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the install. Contact Oracle Customer Support if needed.

IAU-62006
ORACLE_HOME environment variable not set

Category:
Other

Cause:
The environment variable ORACLE_HOME was not set.

Action:
Set the ORACLE_HOME environment variable.

IAU-62007
COMPONENT_CONFIG_PATH environment variable not set

Category:
Other

Cause:
The environment variable COMPONENT_CONFIG_PATH was not set.

Action:
Set the COMPONENT_CONFIG_PATH to point to the location of the auditconfig.xml file.

IAU-62008
ORACLE_INSTANCE environment variable not set

Category:
Other

Cause:
The environment variable ORACLE_INSTANCE was not set.

Action:
Set the ORACLE_INSTANCE environment variable.

IAU-62009
COMPONENT_NAME environment variable not set

Category:
Other

Cause:
The COMPONENT_NAME environment variable was neither set nor was the component_events.xml file present in the expected default location.

Action:
Check if the component_events.xml file is present in the expected default location or set the COMPONENT_NAME environment variable to point to the correct component name.

IAU-62010
COMPONENT_TYPE environment variable was not set

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The COMPONENT_TYPE environment variable was neither set nor was the component_events.xml file present in the expected default location.

Action:
Check if the component_events.xml file is present in the expected default location or set the COMPONENT_TYPE environment variable to point to the correct component type.

IAU-62012
audit event creation failed

Category:
Other

Cause:
The creation of the audit event failed.

Action:
Contact Oracle Customer Support.

IAU-62015
audit custom expression parsing failed

Category:
Other

Cause:
Parsing of the custom expression had failed.

Action:
Check if the custom expression used in the audit configuration is valid.

IAU-62016
audit log file creation failed

Category:
Other

Cause:
OS error in creating the file.

Action:
Check file permissions and disk space.

IAU-62018
timestamp error

Category:
Other

Cause:
There was a problem with getting the current date and time.

Action:
Check the diagnostic logs and contact Oracle Customer Support.

IAU-62019
audit enabled check failed

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Invalid values assgined to audit event attributes.

Action:
Check the diagnostic logs and contact Oracle Customer Support.

IAU-62021
busstop open failed

Category:
Other

Cause:
OS error in creating or opening the bus-stop file.

Action:
Check the file permissions and disk space.

IAU-62023
audit config reload failed

Category:
Other

Cause:
There was a problem in reloading the audit config data that has been modified.

Action:
Check the diagnostic logs and contact Oracle Customer Support.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Installation

Cause:
Not a valid checkpoint file for the current release/version.

Action:
Delete the invalid checkpoint file

INST-01026
Response File parse error at Line no: {0} - {1}

Category:
Installation

Cause:
The response file may be corrupted or has errors

Action:
Correct the errors in the response file and try the install operation again.\nCheck if you have missed specifying square brackets around the section names

INST-01027
Section name cannot be empty and should be enclosed in square brackets.

Category:
Installation

Cause:
The Response File is not a valid response file. The Section Name is not specified or is not specified properly.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
The Response Files are organized into 4 sections namely ENGINE, GENERIC, SYSTEM AND APPLICATIONS. \nEach Section Should be enclosed in square brackets and appropriate entries should be specified under them (Example: [Generic]). Check the Section Names.

INST-01028
Error: No Section defined.

Category:
Installation

Cause:
The Response File does not have any valid sections specified. The Response File is organized into 4 sections namely ENGINE, GENERIC, SYSTEM and APPLICATIONS.\nAll Section Names are specified within square brackets.

Action:
Verify the Specified Response Files for valid Section Names and Syntaxes

INST-01029
Response File Parse Error : No Equal Symbol "=" was found

Category:
Installation

Cause:
The Format of specifying the value for a variable inside the response file is as VARIABLE_NAME=VALUE. The Equal Symbol "=" was missed

Action:
Correct the Response File to specify the value for a variable as VARIABLE_NAME=VALUE. Insert the Equal Symbol "=" in appropriate position to correct the same

INST-01030
Response File Parse Error

Category:
Installation

Cause:
The Variable {0} was not Found in the Response File

Action:
Specify the Variable in the Response File. The Syntax of specifying a variable is as VARIABLE_NAME=VALUE

INST-01031
Response File Parse Warning. No value found. Ignoring.

Category:
Installation

Cause:
The Variable {0} was found in the Response File with no value assigned to it and hence it was ignored while the Response File was Parsed.

Action:
Specify the corresponding value.

Installation

Cause:
An unexpected error occurred while obtaining default port file location

Action:
Provide a valid value

INST-07062
Error in connecting to the Database

Category:
Installation

Cause:
An unexpected error occurred while trying to connect to the Database

Action:
Check the values. Make sure the Database is up and running and connect string, user name and password are correct. Enter a valid user name with DBA privileges

INST-07063
Error in connecting to the Database. Connect String is missing

Category:
Installation

Cause:
Connect string is missing

Action:
Provide a valid value for Connection String

INST-07064
Error in connecting to the Database

Category:
Installation

Cause:
Unable to connect to the Database with the given credentials

Action:
Check the values. Make sure the Database is up and running and connect string, user name and password are correct. Enter a valid user name with DBA privileges

INST-07065
Error in validating Database details

Category:
Installation

Cause:
An unexpected error occurred while trying to connect to the Database

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Try again and check the values. Make sure the Database is up and running and connect string, user name and password are correct. Enter a valid user name with DBA privileges

INST-07066
Error in validating Database details. Schema Type is missing

Category:
Installation

Cause:
Schema type is missing

Action:
Provide a valid value for Schema Type

INST-07067
Error in validating Database details. Schema name is missing

Category:
Installation

Cause:
Schema is missing

Action:
Provide a valid value for Schema Name

INST-07068
Error in validating Database details. Invalid Schema

Category:
Installation

Cause:
Specified {0} schema does not exist in the given Database

Action:
Check the schema name and the Database credentials

INST-07069
Validation of {0} location failed. Existing Oracle home

Category:
Installation

Cause:
Validation of {0} location failed. The location specified is an existing Oracle home

Action:
Provide an empty or nonexistent directory location

INST-07072
Error in validating Oracle home location

Category:
Installation

Copyright © 2000, 2026, Oracle and/or its affiliates.

The Oracle home location specified is an existing Oracle home

Action:
Provide an empty or nonexistent directory location

INST-07073
Error in validating Oracle home location

Category:
Installation

Cause:
The Oracle home location specified is not a valid {0} home location

Action:
Provide an empty or nonexistent directory location or a valid {0} home location

INST-07074
Error in validating Database details. Null Value

Category:
Installation

Cause:
User name is missing

Action:
Provide a valid user name with DBA privileges

INST-07075
Error in validating Database details. Invalid user

Category:
Installation

Cause:
User does not have DBA privileges

Action:
Provide a user with DBA privileges

INST-07076
Error in validating Database details

Category:
Installation

Cause:
An unexpected error occurred while trying to connect to the Database

Action:
Try again and check the values. Make sure the Database is up and running and connect string, user name and password are correct. Enter a valid user name with DBA privileges

INST-07077
Error in validating Oracle home and Oracle Instance home

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Installation

Cause:
Oracle home is inside the Oracle Instance home

Action:
Enter a different location

INST-07078
Error in validating LDAP credentials

Category:
Installation

Cause:
An unexpected error occurred while validating LDAP credentials

Action:
Provide a valid value

INST-07079
Error in validating LDAP credentials

Category:
Installation

Cause:
Could not connect to LDAP with the given credentials.

Action:
Verify the credentials. Make sure that hostname, port and password are correct

INST-07080
Error in validating available disk space

Category:
Installation

Cause:
Space required is missing or not a valid value

Action:
Provide a valid value

INST-07081
Error in validating available disk space

Category:
Installation

Cause:
Insufficient space to install the selected components

Action:
Specify a different Oracle Home or increase disk space.

The login module with the name {0} was already present.

Action:
Ensure the login module name is correct.

JPS-00014
The login module with {0} is missing.

Category:
Configuration

Cause:
The login module with the name {0} did not exist.

Action:
Ensure the login module name is correct.

JPS-00015
All available service instance names are already in use.

Category:
Configuration

Cause:
All service instance names were in use.

Action:
Remove unwanted service instances from jps-config.xml.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-00016
All available service provider names are already in use.

Category:
Configuration

Cause:
All service provider names were in use.

Action:
Remove unwanted service providers form jps-config.xml.

JPS-00017
The LDAP type is invalid.

Category:
Configuration

Cause:
An invalid LDAP type was specified.

Action:
Provide a valid LDAP type. Valid types are XML, OID, ACTIVE_DIRECTORY, IPLANET, OUD and OVD. See the documentation for details.

JPS-00018
The keystore path {0} is null or invalid.

Category:
Configuration

Cause:
Keystore path was null.

Action:
Provide a valid keystore path.

JPS-00019
The key type {0} is not supported.

Category:
Configuration

Cause:
Invalid key type was provided.

Action:
Provide a valid key type.

JPS-00020
LDAP URL {0} is null or invalid.

Category:
Configuration

Cause:
Invalid or null LDAP URL was provided.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Provide a valid LDAP URL.

JPS-00021
An Object named {0} does not exist.

Category:
Configuration

Cause:
Object with the name {0} did not exist.

Action:
Verify that the object name is valid and exists.

JPS-00022
Callback handler missing for this login module request.

Category:
Requests/Responses

Cause:
The callback handler was null.

Action:
Provide an appropriate callback handler to invoke this login module.

JPS-00023
The callback used for this operation has no HTTP request value.

Category:
Requests/Responses

Cause:
The callback did not have a request method.

Action:
Verify that the callback is initialized with the correct HTTP request value.

JPS-00024
The callback used for this operation has no digest response object value.

Category:
Requests/Responses

Cause:
The callback did not have any digest response object.

Action:
Verify that the callback is initialized with the correct digest response value.

JPS-00025
The {0} subscriber {1} from the HTTP header is different from the subscriber configured by the identity store as {2}.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Found a subscriber mismatch.

Action:
Check the identity store subscriber configuration.

JPS-00026
The value "{0}" is invalid for {1}.

Category:
Requests/Responses

Cause:
An invalid value was provided for this application.

Action:
Provide the correct value for the application.

JPS-00027
There was an internal error: {0}

Category:
Requests/Responses

Cause:
Internal system error was found.

Action:
See the log files or contact the system administrator.

JPS-00028
The property runas.mode is deprecated and supported only for backward compatibility.

Category:
Requests/Responses

Cause:
The property runas.mode has been deprecated.

Action:
Use instead the oracle.security.jps.jaas.mode property in jps-config.xml.

JPS-00029
The audit service initialization failed for the application {0}. Reason {1}.

Category:
Configuration

Cause:
Audit service failed.

Action:
Check the audit service configuration in jps-config.xml.

JPS-00030
Cannot complete exist operation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Could not find entity.

Action:
Verify that the entity exist.

JPS-00031
Cannot load the required class {0}. Reason {1}.

Category:
Upgrade

Cause:
Could not load a class.

Action:
Ensure the class is in the class path.

JPS-00032
The migration cannot write directly to the specified LDAP identity store; specify an alternate LDIF file to create.

Category:
Upgrade

Cause:
Could not perform a direct LDAP write operation.

Action:
See the log files for details.

JPS-00033
The direct policy store should be XML-based, and it can be specified as an XML file or as an input stream.

Category:
Upgrade

Cause:
The policy store specification was invalid.

Action:
Check the policy store specification.

JPS-00034
Cannot find the application context.

Category:
Session

Cause:
A context was not available for the application.

Action:
Check the jps-config.xml configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-00035
The WSS digest value {0} is invalid.

Category:
Requests/Responses

Cause:
Found missing WSS digest value in callback.

Action:
Verify that the callback has a valid WSS digest value.

JPS-00036
The WSS digest nonce {0} is invalid.

Category:
Requests/Responses

Cause:
Found missing WSS digest nonce in callback.

Action:
Verify that the callback has a valid WSS digest nonce.

JPS-00037
The WSS digest created {0} is invalid.

Category:
Requests/Responses

Cause:
Found missing WSS digest created in callback.

Action:
Verify that the callback has a valid WSS digest created.

JPS-00038
Cannot create or retrieve a ContextFactory.

Category:
Other

Cause:
Cannot retrieve or create a JPS ContextFactory.

Action:
Check jps-config.xml for correctness.

JPS-00039
The service instance with provider {0} and name {1} is missing.

Category:
Configuration

Cause:
A service instance configuration was missing.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the service instance configuration.

JPS-00040
The JPS audit component events file {0} is missing or invalid.

Category:
Other

Cause:
Cannot find the audit component events file.

Action:
Make sure the audit component events file is available and valid.

JPS-00041
Cannot load the JpsAdminService class.

Category:
Other

Cause:
The class JpsAdminService or a dependent class could not be loaded.

Action:
Review the cause to resolve the error.

JPS-00042
The LDAP connection pool provider {0} is not valid; the supported providers are JNDI or IDM. If unspecified, it defaults to UCP/JNDI provider.

Category:
Configuration

Cause:
The connection.pool.provider.type property value was invalid.

Action:
Configure a supported connection.pool.provider.type value, or use the default provider by not setting the connection.pool.provider.type property.

JPS-00043
Cannot establish an LDAP connection after {0} attempts.

Category:
Requests/Responses

Cause:
The connection could not be established.

Action:
Check the LDAP configuration.

JPS-00044
The LDAP URL format must be ldap://<host>:<port> or ldaps://<host>:<port>; but found {0}.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Invalid LDAP URL format was found.

Action:
The format of the LDAP URL must be ldap://<host>:<port> or ldaps://<host>:<port> format.

JPS-00045
The LDAP principal {0} is invalid.

Category:
Configuration

Cause:
The LDAP principal was invalid.

Action:
Provide a correct value for principal.

JPS-00046
The LDAP credential is invalid.

Category:
Configuration

Cause:
The LDAP credential was invalid.

Action:
Provide the correct credential value.

JPS-00047
The Subject parameter cannot be null.

Category:
Programmatic

Cause:
The supplied parameter was null.

Action:
Check the Subject parameter supplied in the method call.

JPS-00048
Principals are missing in the Subject.

Category:
Programmatic

Cause:
No principals were not found in the Subject.

Action:
Verify that the supplied Subject contains principals.

JPS-00049
The authenticated user principal is missing in the Subject.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
Authenticated user principal was not found in the Subject.

Action:
Verify that the supplied Subject contains an authenticated user principal.

JPS-00050
Invalid Subject parameter supplied.

Category:
Programmatic

Cause:
The Subject contained an anonymous user principal and an authenticated user principal.

Action:
Ensure that the Subject does not contain the anonymous user principal.

JPS-00051
The oracle.security.jps.config property not set.

Category:
Upgrade

Cause:
The oracle.security.jps.config property was not set.

Action:
Set the oracle.security.jps.config property to an appropriate value.

JPS-00052
Failed to Refresh Audit Service with new configuration.

Category:
Configuration

Cause:
Failed to reload the audit configuration.

Action:
Check the audit configuration file to see if the lastest changes are valid.

JPS-00053
Component events file is missing for {0} at {1}.

Category:
Configuration

Cause:
The component events file for the given component type was missing.

Action:
Verify that the properties set for the component files are correct in jps-config.xml.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-00054
Failed to create the auditor for {0}.

Category:
Configuration

Cause:
Failed to create the auditor object.

Action:
Ensure that the component events file is not missing or corrupt and check the log files additional errors.

JPS-00055
Bootstrap credential store service is not initialized for the service configurator.

Category:
Programmatic

Cause:
The bootstrap credetial store service was not initialised.

Action:
Make sure the bootstrap credetial store service is initialized before any other services.

JPS-00056
Failed to create identity store service instance {0}. Reason: {1}.

Category:
Configuration

Cause:
Failed to create identity store service instance {0}. Cause: {1}.

Action:
Check the log files to resolve the error.

JPS-00057
Failed to set OutputProperty for indent or XML encoding. Reason {0}.

Category:
Configuration

Cause:
Failed to setOutputProperty for indent or XML encoding. Cause: {0}

Action:
Check the XML Transformer implementation.

JPS-00058
Failed to set XML output encoding to UTF-8 in OutputStreamWriter. Reason {0}.

Category:
Configuration

Cause:
Failed to set XML output encoding to UTF-8 in OutputStreamWriter. Cause: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the JDK OutputStreamWriter supported encodings.

JPS-00059
The specified enterprise identity is null or invalid.

Category:
Configuration

Cause:
An enterprise identity provided was null or invalid

Action:
Provide a valid enterprise identity value.

JPS-00060
The specified enterprise identity {0} is not found in identity store.

Category:
Configuration

Cause:
The specified enterprise identity {0} was not found in the identity store.

Action:
Provide a valid enterprise identity value.

JPS-00061
No platform specific factory is found to create the platform principals. Check errors in the log files.

Category:
Configuration

Cause:
No platform specific factory was found to create platform principals.

Action:
Check the log files for the errors.

JPS-00062
No identity store associated with policy store found.

Category:
Configuration

Cause:
No identity store associate with policy store found

Action:
Contact system administrator

JPS-00063
Jps servlet filter creation failed. Reason: {0}.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Jps Servlet Filter creation failed

Action:
Contact system administrator

JPS-00064
Jps ejb interceptor creation failed. Reason: {0}.

Category:
Configuration

Cause:
Jps EJB Interceptor creation failed

Action:
Contact system administrator

JPS-00065
Jps platform factory creation failed. Reason: {0}.

Category:
Configuration

Cause:
Jps Platform Factory creation failed

Action:
Contact system administrator

JPS-00066
Jps property value retrieval failed. Reason: {0}.

Category:
Configuration

Cause:
Jps property value retrieval failed

Action:
Check the property values in jps configuration files

JPS-00068
Ldap security checking failed. The LDAP url should start with ldaps and oracle.ldap.wltloc system property should be set. Reason : {0}.

Category:
Security

Cause:
Is LDAP secure failed

Action:
Contact system administrator

JPS-00069
Ldap credential store provider missing.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
LDAP credential provider missed

Action:
Ensure ldap credential store provider is configured

JPS-00070
Ldap policy store provider missing.

Category:
Security

Cause:
LDAP policy store provider missing

Action:
Ensure ldap policy store is configured

JPS-00071
Ldap bootstrap credential retrieval failed. Reason:{0}.

Category:
Security

Cause:
Retrieval of bootstrap credential failed

Action:
Check the credential store configuration for credential types, maps and key

JPS-00072
Policy schema upgrade not required. Store Schema version {0} is compatible to the seed schema version {1}

Category:
Configuration

Cause:
Comparison of policy schema version in the store against to seed schema version.

Action:
No action required

JPS-00073
Policy store schema version not found

Category:
Configuration

Cause:
Trying to determine version of the policy schema in the store

Action:
Contact Oracle Support Services.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-00074
Policy store schema version {0} is less than the latest schema version {1}, upgrade the Policy store schema to latest version.

Category:
Configuration

Cause:
Comparison of the Policy schema version in the store against the schema to seed

Action:
No action required

JPS-00075
Unable to query Policy store schema version under "{0}", Cause {1}

Category:
Configuration

Cause:
Query of Policy schema from the store failed

Action:
Confirm the Policy store schema containers are present in the store

JPS-00076
Policy schema version set to {0}

Category:
Configuration

Cause:
Version of the policy schema has been set in the store

Action:
No action required

JPS-00077
Setting version of policy schema in the store failed. Cause {0}

Category:
Configuration

Cause:
Unexpected error occurred while setting the version of the Policy schema in the store

Action:
Confirm the container is present in the store and caller has sufficient privileges to perform this operation

JPS-00078
Credential store schema upgrade not required. Store Schema version {0} is compatible to the seed schema version {1}

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Comparison of Credential schema version in the store against the seed schema version.

Action:
No action required

JPS-00079
Credential store schema version not found

Category:
Configuration

Cause:
Check if the DN exists, or if the Credential Store schema version attribute is present at the specificied location

Action:
Contact Oracle Support Services.

JPS-00080
Credential store schema version {0} is less than the latest schema version {1}, upgrade the Credential store schema to latest version.

Category:
Configuration

Cause:
Comparison of the Credential schema version in the store against the schema to seed

Action:
No action required

JPS-00081
Unable to query Credential store schema version under "{0}", Cause {1}

Category:
Configuration

Cause:
Query of Credential schema from store store failed

Action:
Confirm the Credential store schema container in the store is present

JPS-00082
Credential schema version set to {0}

Category:
Configuration

Cause:
Version of the credential schema has been set in the store

Action:
No action required

JPS-00083
Setting version of credential schema in the store failed. Cause {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Unexpected error occurred while setting the version of the credential schema in the store

Action:
Confirm the container is present in the store and caller has sufficient privileges to perform this operation

JPS-00084
IOException raised from FileLocker {0}.

Category:
Other

Cause:
Closing IO objects in FileLocker

Action:
Check the file system for access privileges and disk space availability.

JPS-00085
OID version is unavailable.

Category:
Other

Cause:
OID version is unavalable

Action:
Check the ldap url against the server type passed.

JPS-00086
Error while encoding search string: {0} to UTF-8 encoding

Category:
Other

Cause:
Unable to encode user string to UTF-8 encoding

Action:
Check the search string.

JPS-00087
The subject parameter is null.

Category:
Security

Cause:
The subject parameter is null

Action:
Make sure the subject parameter is not null

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-00088
The user name parameter is null.

Category:
Security

Cause:
The user name parameter is null

Action:
Make sure the user name parameter is not null

JPS-00089
The subject from the current AccessControlContext is null.

Category:
Security

Cause:
No subject is associated with the current AccessControlContext.

Action:
Ensure that the subject is associated with the current AccessControlContext.

JPS-00090
Failed to create policy store service instance {0}. Cause: {1}.

Category:
Configuration

Cause:
Failed to create policy store service instance {0}. Cause: {1}.

Action:
Check the log files to resolve the error.

JPS-00091

Cause:
Client name is too long when calling opssRestClient to register a client.

Action:
Make client name shorter

JPS-00270
Datasource ID {0} from tenant context {1} conflicts with tenant context {2}.

Category:
Other

Cause:
Datasource ID from DataSourceCallback handler conflicts with existing tenant.

Action:
Make client name shorter

JPS-00271
Exception occurs during JpsStartup start. Reason {0}. Will retry {1} time(s) in next {2} seconds.

Category:
Other

Cause:
Exception occurs during JpsStartup start, will retry

Action:
Check cause of failure

JPS-00272
Exception occurs during JPS API "{0}" called. Reason {1}. Will retry {2} time(s) in next {3} seconds.

Category:
Other

Cause:
Exception occurs during JPS API call, will retry

Action:
Check cause of failure

JPS-00273
Tenant context activated - {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Requests/Responses

Cause:
The tenant context activated.

Action:
No actions are required.

JPS-00274
Tenant context {0} activation failed. Error: {1}.

Category:
Requests/Responses

Cause:
The tenant context activation failed.

Action:
No actions are required.

JPS-00648
Operation is not supported - unable to set key entry for non-existent stripe and keystore.

Category:
Compliance

Cause:
Combining certs from two truststores into a single truststore failed

Action:
Look at the logs for any exceptions that could have caused this failure

JPS-00649
********** * Demonstration CA was found in use in this environment. * * This deployment may be vulnerable to security attacks. * * Replace the Demonstration CA with a custom CA immediately. *
****

Category:
Compliance

Cause:
Demonstration CA was found in use in a production environment.

Action:
Refer documentation to switch to a custom CA.

JPS-00650
Virtual KSS URI to aggregate multiple keystores already exists

Category:
Compliance

Cause:
The virtual KSS URI passed in already exists

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Use a different virtual KSS URI

JPS-00651
Aggregation of multiple keystores pointed by virtual URI failed

Category:
Compliance

Cause:
Aggregation of Keystores pointed to by virtual URI failed

Action:
Check if the source Keystores pointed to by virtual URI are valid

JPS-00652
Cannot set or save entries in virtual keystore

Category:
Compliance

Cause:
This credential expired on {0}.

Action:
Create a new credential.

JPS-01007
The credential with map {0} and key {1} already exists.

Category:
Requests/Responses

Cause:
This credential already existed.

Action:
Use a credential with different map name or key.

JPS-01008
The credential map name {0} already exists.

Category:
Requests/Responses

Cause:
This credential map name already existed.

Action:
Use a different map name.

JPS-01009
The credential with map {0} and key {1} does not exist.

Category:
Requests/Responses

Cause:
This credential did not exist.

Action:
Check the credential map name and key.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-01010
The credential map {0} does not exist.

Category:
Requests/Responses

Cause:
This credential map name did not exist.

Action:
Check the credential map name.

JPS-01011
The credential store location property {0} is not configured, or the configured value {1} is invalid.

Category:
Configuration

Cause:
The credential store location was not specified.

Action:
Check the value of the location attribute.

JPS-01012
The credential property {0} is invalid or not defined.

Category:
Requests/Responses

Cause:
The credential property {0} was invalid or not defined.

Action:
Check the configuration of this property.

JPS-01013
The credential store DN {0} is missing in the store; the target DN must be pre-configured.

Category:
Requests/Responses

Cause:
The expected credential store DN {0} was missing.

Action:
Configure this DN during the bootstrap process.

JPS-01014
The credential {0} is invalid.

Category:
Requests/Responses

Cause:
This credential was invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Use only a supported credential type. The supported types are password or generic.

JPS-01015
Cannot retrieve credential {0}.

Category:
Requests/Responses

Cause:
This credential was invalid.

Action:
Use only a supported credential type. The supported types are password or generic.

JPS-01016
A password credential is expected; instead found {0} for alias {1} and key {2} at location {3}.

Category:
Other

Cause:
Wrong credential type was found.

Action:
Use the password credential type. Expecting password credential but found {0} for alias {1} and key {2} at location {3}.

JPS-01017
A generic credential is expected; instead found {0}.

Category:
Other

Cause:
Wrong credential type was found.

Action:
Use the generic credential type. Expecting generic credential but found {0}.

JPS-01018
A password credential is missing in the credential store.

Category:
Session

Cause:
The password credential was not found in the credential store.

Action:
Ensure that the credential is present in the credential store.

JPS-01019
The credential store {0} has been moved or deleted.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The specified credential store did not exist.

Action:
Ensure that the credential store location is valid.

JPS-01020
Cannot create store {0}.

Category:
Configuration

Cause:
Could not create the credential store.

Action:
Verify the store location, that sufficient permissions are in place, and that sufficient disk space is available.

JPS-01021
The generic credential {0} is not serializable.

Category:
Requests/Responses

Cause:
This generic credential was not serializable.

Action:
Make this credential serializable.

JPS-01022
The expiration time {0} is invalid: the expiration time must be later than the creation time.

Category:
Requests/Responses

Cause:
Invalid credential expiration time.

Action:
Set the expiration time to a time later than the credential creation time.

Cause:
No password was specified in the custom callback.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the password for decrypting customer encryption key is provided.

JPS-01068
Missing callback handler to provide context information

Category:
Security

Cause:
No custom callback to provide context information specified.

Action:
Ensure that a callback handler is specified.

JPS-01500
The anonymous service configuration is missing.

Category:
Configuration

Cause:
The anonymous service configuration was missing in jps-config.xml.

Action:
Configure the anonymous service in jps-config.xml.

JPS-01501
The anonymous identity store provider instance {0} is not found.

Category:
Configuration

Cause:
The anonymous identity store provider configuration was invalid.

Action:
Check the anonymous identity store provider configuration in jps-config.xml.

JPS-01502
The LDAP identity store provider instance {0} is not found.

Category:
Configuration

Cause:
Invalid or missing LDAP identity store provider configuration.

Action:
Check LDAP identity store provider configuration in jps-config.xml.

JPS-01503
The XML identity store provider instance {0} is not found.

Category:
Requests/Responses

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Invalid or missing XML identity store provider configuration.

Action:
Check the XML identity store provider configuration in jps-config.xml.

JPS-01504
The secret store provider for provider {0} and instance {1} does not exist.

Category:
Requests/Responses

Cause:
The credential provider was missing.

Action:
Check the configuration of the credential store provider in jps-config.xml.

JPS-01505
The key store provider {0} is missing or not configured.

Category:
Configuration

Cause:
The keystore provider configuration was missing in jps-config.xml.

Action:
Configure a keystore provider in jps-config.xml.

JPS-01506
Invalid context name.

Category:
Configuration

Cause:
Invalid context name found.

Action:
Check the configurations of contexts in jps-config.xml.

JPS-01507
Invalid login module name.

Category:
Configuration

Cause:
Invalid login module name found.

Action:
Check the login module configurations in jps-config.xml.

JPS-01508
Invalid login module descriptor.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Invalid login module descriptor found.

Action:
Check the login module instance configurations in jps-config.xml.

JPS-01509
Invalid login module class name.

Category:
Configuration

Cause:
Invalid login module class name found.

Action:
Check the loginModuleClassName property in the login module instance configuration in jps-config.xml.

JPS-01510
Invalid login module entries.

Category:
Configuration

Cause:
Invalid login module entries found.

Action:
The expected login module to be invoked is not present or misconfigured. Check the login module instance configurations in jps-config.xml.

JPS-01511
Invalid login module entry.

Category:
Configuration

Cause:
The login module entries were not valid in the jps-config.xml file.

Action:
Correct the login module entries in service instances and service providers.

JPS-01512
Missing login module entry.

Category:
Configuration

Cause:
The login module entries were missing in the jps-config.xml file.

Action:
Add the appropriate login module entries in service instances and service providers.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-01513
The configuration of the JAAS login provider {0} and the service instance {1} are missing.

Category:
Configuration

Cause:
The login module provider was missing.

Action:
Ensure that a login module provider is configured in the jps-config.xml.

JPS-01514
The default context is missing in jps-config.xml.

Category:
Configuration

Cause:
Default context was missing in jps-config.xml.

Action:
Add a default context to jps-config.xml.

JPS-01515
A context named anonymous is missing in jps-config.xml.

Category:
Configuration

Cause:
Context named anonymous was missing in jps-config.xml.

Action:
Add a context named anonymous in jps-config.xml file with an anonymous service instance reference.

JPS-01516
The default credential store service is missing in default jps-config.xml.

Category:
Other

Cause:
The default credential store service was missing in the default context in jps-config.xml.

Action:
There must be at least one credential store service configured in the default context.

JPS-01517
The generic identity store provider is missing.

Category:
Configuration

Cause:
Invalid or missing generic identity store provider configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the generic identity store provider configuration in jps-config.xml.

JPS-01518
The anonymous service is not available in the application context.

Category:
Session

Cause:
The anonymous service was not available in context.

Action:
Check the context in jps-config.xml.

JPS-01519
The default context configuration is missing in jps-config.xml.

Category:
Session

Cause:
The default context configuration was not available in jps-config.xml.

Action:
Ensure that the default context is present in jps-config.xml.

JPS-01520
Cannot initialize identity store, cause: {0}.

Category:
Configuration

Cause:
Could not initialize identity store.

Action:
Correct the identity store configuration.

JPS-01521
Identity store file path is invalid.

Category:
Configuration

Cause:
Identity store file path was invalid or null.

Action:
Ensure that the path configured with the property ADF_IM_FILE_PATH is valid.

JPS-01522
The Jps configuration is invalid.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
JPS configuration was null or invalid.

Action:
Verify configuration in jps-config.xml.

JPS-01523
The service instance {0} is invalid or not configured in jps-config.xml.

Category:
Configuration

Cause:
A service instance configuration was not valid.

Action:
Verify that the instance is correctly configured in jps-config.xml.

JPS-01524
The service instance {0} is invalid or not configured in jps-config.xml.

Category:
Configuration

Cause:
A service provider configuration was invalid.

Action:
Veirfy that the provider is correctly configured in jps-config.xml.

JPS-01525
The identity store service is not properly configured.

Category:
Configuration

Cause:
Found invalid identity store service configuration in jps-config.xml.

Action:
Ensure a valid identity store configuration in jps-config.xml.

JPS-01526
Configured identity store, user manager, or role manager is invalid. The error is {0}.

Category:
Configuration

Cause:
Found null value for configured identity store, user manager, or role manager.

Action:
Correct the identity store configuration.

JPS-01527
The identity store factory name is not configured.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Could not find identity store factory name.

Action:
Use the property ADF_IM_FACTORY_CLASS to specify the factory class.

JPS-01528
Idm identity store is invalid.

Category:
Configuration

Cause:
The identity store was not configured correctly.

Action:
Correct the configuration of the identity store in jps-config.xml.

JPS-01529
The context {0} contains multiple services of type {1}.

Category:
Configuration

Cause:
The context {0} contains multiple services of type {0}.

Action:
Check jps-config.xml for correctness.

JPS-01530
The anonymous service is already configured in the context {0}.

Category:
Configuration

Cause:
The anonymous service is already configured in the context {0}.

Action:
Check jps-config.xml for correctness.

JPS-01531
Configuration location {0} is a directory. File name expected.

Category:
Configuration

Cause:
Configuration location {0} is a directory. File name expected.

Action:
Provide a valid configuration file location, including a file name.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-01532
The service instance location {0} is invalid or not configured in jps-config.xml.

Category:
Configuration

Cause:
A service instance configuration was invalid.

Action:
Verify that the location of the instance is correctly configured in jps-config.xml.

JPS-01533
Failed to create service instance {0} for application {1}.

Category:
Configuration

Cause:
Failed to create service instance {0} for application {1}.

Action:
Check the log files to resolve the error.

JPS-01534
Failed to get identity store configuration.

Category:
Security

Cause:
Failed to get identity store configuration.

Action:
Ensure the configuration is available.

JPS-01535
Failed to get configuration name {0}.

Category:
Configuration

Cause:
Failed to get configuration name {0}.

Action:
Check the log files to resolve the error.

JPS-01536
Failed to evaluate XML expression on Object {0}.

Category:
Configuration

Cause:
Failed to evaluate XML expression on Object {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the log files to resolve the error.

JPS-01537
Failed to handle config location {0}. Reason {1}.

Category:
Security

Cause:

Action:

JPS-01538
The default policy provider was not found.

Category:
Security

Cause:
The default policy provider was not found.

Action:
Ensure policy provider configuration is correct.

JPS-01539
The Ovd IGF service provider instance {0} is not found.

Category:
Configuration

Cause:
Invalid or missing Ovd IGF service provider configuration.

Action:
Check Ovd IGF service provider configuration in jps-config.xml.

JPS-01543
The value of {0} is invalid. It must be an integer.

Category:
Configuration

Cause:
attribute.expire.time.seconds is not an integer.

Action:
Ensure attribute.expire.time.seconds is a valid integer.

JPS-01544
The provided configuration file path {0} is invalid or null.

Category:
Configuration

Cause:
The provided configuration file path {0} is invalid or null.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Provide a valid configuration file path.

JPS-01545
Back up of JPS Config file {0} done.

Category:
Configuration

Cause:
Back up of JPS Config file {0} done.

Action:
No action required

JPS-02000
The authentication of user {0} succeeded.

Category:
Requests/Responses

Cause:

Action:

JPS-02001
The authentication of user {0} failed. Reason: {1}

Category:
Requests/Responses

Cause:
User authentication failed.

Action:
Ensure the user exists in the identity store. Check the user credentials that are being sent for authentication.

JPS-02003
Authentication failed.

Category:
Requests/Responses

Cause:
Could not authenticate user.

Action:
Ensure that authentication uses valid user name and password.

JPS-02004
Cannot authenticate user {0}.

Category:
Security

Cause:
Could not authenticate user.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the credentials provided for authentication are correct.

JPS-02005
Cannot login user {0} because {1}. Check the log files for more details.

Category:
Requests/Responses

Cause:
Encountered an error while authenticating user.

Action:
Contact the domain administrator.

JPS-02008
Authenticated role name is invalid: property {0} is invalid or not configured.

Category:
Configuration

Cause:
Found invalid or undefined authentication role name property.

Action:
Ensure that authentication role name properties are valid in jps-config.xml.

JPS-02009
SAML trusted assertion issuer is not configured: property set {0} is not configured.

Category:
Configuration

Cause:
Could not find configuration for SAML trusted assertion issuer.

Action:
Set the property saml.trusted.issuers in jps-config.xml.

JPS-02010
Cannot verify SAML assertion.

Category:
Requests/Responses

Cause:
Found invalid assertion; SAML trusted assertion issuer was not configured.

Action:
Check assertion and set the property saml.trusted.issuers in jps-config.xml.

JPS-02011
SAML assertion is missing name identifier.

Category:
Requests/Responses

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Found invalid assertion: name identifier was missing.

Action:
Ensure the use of a valid assertion.

JPS-02012
SAML assertion subject name is invalid.

Category:
Requests/Responses

Cause:
Found invalid assertion: subject name was null.

Action:
Ensure the use of a valid assertion.

JPS-02013
SAML assertion issuer name is invalid.

Category:
Requests/Responses

Cause:
Found invalid assertion: issuer name was invalid.

Action:
Ensure the use of a valid assertion.

JPS-02014
SAML assertion is invalid.

Category:
Requests/Responses

Cause:
Found invalid assertion.

Action:
Ensure the use of a valid assertion.

JPS-02015
SAML assertion has missing subject.

Category:
Requests/Responses

Cause:
Found invalid assertion: subject statement was missing.

Action:
Ensure the use of a valid assertion.

JPS-02016
SAML assertion is missing conditions.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Requests/Responses

Cause:
Found invalid assertion: condition statement was missing.

Action:
Ensure the use of a valid assertion.

JPS-02017
Found invalid condition "not before" in SAML assertion. Current Time:{0}, {1} milli seconds, {2} Time:{3}.

Category:
Requests/Responses

Cause:
Found invalid condition "not before" in SAML assertion. Current Time:{0}, {1} milli seconds, {2} Time:{3}.

Action:
Verify that the condition "not before" in the SAML assertion is set to a date earlier than or equal to today's date.

JPS-02018
Found invalid condition "on or after" in SAML assertion. Current Time:{0}, {1} milli seconds, {2} Time:{3}.

Category:
Requests/Responses

Cause:
Found invalid condition "on or after" in SAML assertion. Current Time:{0}, {1} milli seconds, {2} Time:{3}.

Action:
Verify that the condition "on or after" in the SAML assertion is set to a valid date.

JPS-02019
SAML assertion is missing assertion issuers signature.

Category:
Requests/Responses

Cause:
Found invalid assertion: assertion issuers signature was missing.

Action:
Ensure the use of a valid assertion.

JPS-02020
Signature for SAML assertion issuer is invalid.

Category:
Configuration

Cause:
Found invalid signature in SAML assertion issuer.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure the use of a valid assertion.

JPS-02021
Signature certificate (X509 Data) for SAML assertion issuer is invalid.

Category:
Configuration

Cause:
Found invalid signature certificate (X509 Data) in SAML assertion.

Action:
Ensure the use of a valid assertion.

JPS-02022
Cannot verify signature for SAML assertion.

Category:
Configuration

Cause:
Failed to verify issuers signature in assertion.

Action:
Check the assertion and set the property saml.trusted.issuers in jps-config.xml.

JPS-02023
Cannot verify SAML assertion signature certificate path.

Category:
Configuration

Cause:
Found invalid assertion signature.

Action:
Check the assertion and set the property saml.trusted.issuers in jps-config.xml.

JPS-02024
Cannot retrieve trusted CA policy for issuer {0}.

Category:
Configuration

Cause:
Found invalid assertion.

Action:
Check the assertion and set the property saml.trusted.issuers in jps-config.xml.

JPS-02025
Cannot modify read-only Subject.

Category:
Requests/Responses

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Could not modify a read-only subject.

Action:
Ensure the program logic is correct and that the program does not attempt to modify a read-only subject.

JPS-02026
X509 certificate is invalid.

Category:
Other

Cause:
The X509 certificate passed to the callback handler was null or invalid.

Action:
Ensure that the callback handler uses a valid X509 certificate.

JPS-02027
The property set {0} is missing in jps-config.xml.

Category:
Configuration

Cause:
Could not find property set in jps-config.xml.

Action:
Configure the property set in jps-config.xml.

JPS-02028
The extended property set {0} is missing in jps-config.xml.

Category:
Configuration

Cause:
Could not find extended property set in jps-config.xml.

Action:
Configure the extended property set in jps-config.xml.

JPS-02029
The default realm is not configured in identity store service {0}.

Category:
Configuration

Cause:
Could not find the default realm in the identity store service.

Action:
Configure the default realm property in the identity store service.

JPS-02030
The default realm configured in identity store service {0} is empty or null.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Found null default realm configured in identity store service.

Action:
Configure the default realm property in the identity store service.

JPS-02031
The invalid realm name property {0} is configured in identity store service {1}.

Category:
Configuration

Cause:
Found invalid realm name property in identity store service.

Action:
Configure the correct realm name property in the identity store service.

JPS-02032
The duplicate realm name {0} is configured in identity store service {1}.

Category:
Configuration

Cause:
Found duplicate realm in identity store service.

Action:
Remove duplicate realm configuration from the identity store service.

JPS-02033
The realm name {0} passed for authentication is invalid. Was expecting {1}, but found {0}.

Category:
Configuration

Cause:
Found invalid realm name {0}. Was expecting {1}, but found {0}.

Action:
Check the realm name passed to the authentication of user name.

JPS-02034
Realm name is missing in user name for authentication in multi-realm configuration.

Category:
Configuration

Cause:
The realm name was not supplied for authentication of multi-realm configuration.

Action:
Ensure that the realm name value is passed in the user name when authenticating a multi-realm configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-02035
Cannot properly initialize the Kerberos authenticator.

Category:
Requests/Responses

Cause:
Could not initialize the Kerberos authenticator.

Action:
Check the log files for errors and contact the domain administrator.

JPS-02036
Browser does not support Kerberos authentication.

Category:
Requests/Responses

Cause:
Could not find support for Kerberos authentication, or it was not configured correctly.

Action:
Verify that the browser is set to allow Kerberos authentication.

JPS-02037
The SAML assertion issuer {0} certificate is missing from the keystore.

Category:
Configuration

Cause:
Could not find SAML assertion certificate in keystore.

Action:
Store the SAML assertion issuer's certificate in the keystore, and configure the trustpoint alias in JpsSAMLLoginModuule.

JPS-02038
The SAML assertion {0} is missing a signature.

Category:
Requests/Responses

Cause:
Could not find expected signature in assertion.

Action:
Check that the assertion sent has a valid signature.

JPS-02039
Cannot assert certificate. Reason {0}.

Category:
Requests/Responses

Cause:
Found invalid certificate, or could not find corresponding user in identity store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Make sure that the assertion is valid.

JPS-02040
Both user identity and token were provided for assertion. Either user identity or token should be provided, not both.

Category:
Other

Cause:
Both user identity and token were provided for assertion.

Action:
Provide either user identity or a token for assertion, not both.

JPS-02041
Asserter class was configured as {0}, but does not implement {1}.

Category:
Other

Cause:
Assertor class was configured as {0}, but does not implement {1}.

Action:
Provide an Assertor that implements {1}.

JPS-02042
Token assertion failed.

Category:
Other

Cause:
Token assertion failed.

Action:
Check detailed logs for more information.

JPS-02043
User name cannot be null or empty.

Category:
Requests/Responses

Cause:
User name cannot be null or empty.

Action:
Check that the user name is not null or empty.

JPS-02044
Found invalid attesting entity in SAML assertion. Attesting entity: {0}.

Category:
Requests/Responses

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Found invalid attesting entity in SAML assertion. Attesting entity: {0}.

Action:
Check that the attesting entity for the SAML assertion is valid.

JPS-02045
Audience URI for SAML assertion is invalid.

Category:
Requests/Responses

Cause:
SAML assertion audience URI is invalid.

Action:
Check that the audience URI for the SAML assertion is valid.

JPS-02046
Cannot get the user name from SAML assertion name identifier: {0}.

Category:
Requests/Responses

Cause:
Cannot get the user name from SAML assertion name identifier: {0}.

Action:
Check that the name identifier for the SAML assertion is valid.

JPS-02047
SAMLNameIdentifierMapper class was configured as {0}, but does not implement oracle.security.jps.internal.jaas.module.saml.SAMLNameIdentifierMapper.

Category:
Other

Cause:
SAMLNameIdentifierMapper class was configured as {0}, but does not implement oracle.security.jps.internal.jaas.module.saml.SAMLNameIdentifierMapper.

Action:
Provide an SAMLNameIdentifierMapper that implements oracle.security.jps.internal.jaas.module.saml.SAMLNameIdentifierMapper.

JPS-02048
Incorrect password was provided.

Category:
Requests/Responses

Cause:
Incorrect password was provided.

Action:
Ensure that authentication uses correct password.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-02049
Null or empty password was provided.

Category:
Requests/Responses

Cause:
Null or empty password was provided.

Action:
Ensure that authentication uses correct password.

JPS-02050
Signature verification failed. Principal: {0}

Category:
Security

Cause:
Signature verification failed.

Action:
This error is unlikely to occur. Contact technical support when necessary.

JPS-02051
No auth module to validate request: auth context ID "{0}" of application context "{1}".

Category:
Security

Cause:
Server auth context did not have auth module to validate request.

Action:
Ensure that the server auth module is properly configured and bound for use by applications.

JPS-02052
No auth module to secure response: auth context ID "{0}" of application context "{1}".

Category:
Security

Cause:
Server auth context did not have auth module to secure response.

Action:
Ensure that the server auth module is properly configured and bound for use by applications.

JPS-02053
No auth module to validate response: auth context ID "{0}" of application context "{1}".

Category:
Security

Cause:
Client auth context did not have auth module to validate response.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the client auth module is properly configured and bound for use by applications.

JPS-02054
No auth module to secure request: auth context ID "{0}" of application context "{1}".

Category:
Security

Cause:
Client auth context did not have auth module to secure request.

Action:
Ensure that the client auth module is properly configured and bound for use by applications.

JPS-02055
Cannot instantiate auth module class "{0}" for application context "{1}", cause: {2}.

Category:
Security

Cause:
Could not load the auth module.

Action:
Ensure that the module class name is correctly supplied and the class is in the class path.

JPS-02056
The auth module must support message type: {0}.

Category:
Security

Cause:
Auth module did not support the required message type.

Action:
Ensure that the class correctly implements the required auth module interfaces.

JPS-02057
The message layer "{0}" is not supported.

Category:
Requests/Responses

Cause:
The specified message layer was not supported.

Action:
Provide a valid message layer.

JPS-02058
Null callback handler is not supported.

Category:
Requests/Responses

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The specified callback handler was null.

Action:
Supply a non-null callback handler.

JPS-02059
The default auth provider "{0}" for layer "{1}" is not configured.

Category:
Configuration

Cause:
The default auth provider was not configured.

Action:
Ensure that the provider is configured in jps-config.xml.

JPS-02060
The auth module "{0}" is missing.

Category:
Configuration

Cause:
The specified auth module did not exist.

Action:
Configure the auth module in jps-config.xml.

JPS-02061
No auth module configured for provider "{0}".

Category:
Configuration

Cause:
No auth module configured for the specified provider.

Action:
Configure an auth module for the provider in jps-config.xml.

JPS-02062
Cannot determine the JDK vendor. Defaults to Oracle JDK Kerberos Login Module.

Category:
Configuration

Cause:
Cannot determine the JDK vendor. Defaults to Oracle JDK Kerberos Login Module.

Action:
See error message.

JPS-02063
Failed to create Kerberos Login Module instance "{0}". Reason: {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Requests/Responses

Cause:
Failed to create Kerberos Login Module instance "{0}". Reason: {1}.

Action:
Ensure that the Login Module class name is correctly supplied and the class is in the class path.

JPS-02064
Cannot retrieve value for key {0}. Expecting key type {1}, found {2}.

Category:
Configuration

Cause:
Found invalid object type in role mapping map for key {0}. Expecting {1}, Found {2}.

Action:
Check the role mapping values passed in the callback.

JPS-02066
Cannot map default service role

Category:
Configuration

Cause:
default service roles are missing in the role mapping provided.

Action:
Check the role mapping values passed in the callback. Default service role should be provided if mapping of roles is enabled but mapping is not provided

JPS-02500
The principal name is invalid.

Category:
Requests/Responses

Cause:
Found null principal name.

Action:
Check the principal name.

JPS-02501
The principal type {0} is invalid.

Category:
Requests/Responses

Cause:
Found invalid principal type.

Action:
Check the principal type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-02502
The password {0} is invalid.

Category:
Data

Cause:
Found invalid password.

Action:
Check the password passed to create user account.

JPS-02503
The user name {0} is invalid.

Category:
Data

Cause:
Found invalid user name.

Action:
Ensure that the user name used to create, fetch, or remove the account is valid.

JPS-02504
The user range starting at {0} and ending at {1} is not a valid range.

Category:
Data

Cause:
The user range was invalid.

Action:
Check the start and end range. The start range cannot be less than 0, and the end range cannot be less than start range.

JPS-02505
The group {0} is invalid.

Category:
Data

Cause:
Group name was invalid.

Action:
Check the group name that is being sent for creating/fetching/removing group.

JPS-02506
The group range starting at {0} and ending at {1} is not valid range.

Category:
Data

Cause:
The JPSUserManager.getGroups() method was invoked with invalid start or end range.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the start and end range. The start range cannot be less than 0, and the end range cannot be less than start range.

JPS-02507
The anonymous user is not found.

Category:
Session

Cause:
The anonymous user was not found.

Action:
Ensure that a valid anonymous user is configured.

JPS-02508
The anonymous user name is invalid; property {0} is invalid or not defined.

Category:
Configuration

Cause:
The anonymous.user.name property was not configured in the anonymous service configuration.

Action:
Configure the anonymous.user.name property to a valid user name in the identity store while configuring the Anonymous Service.

JPS-02509
The user {0} already exists in the store; choose a different user name.

Category:
Requests/Responses

Cause:
The specified user name already existed in the store.

Action:
Provide a different user name.

JPS-02510
The group {0} already exists in the store; choose a different group name.

Category:
Requests/Responses

Cause:
The specified group name already existed in the store.

Action:
Provide a different group name.

JPS-02511
The role for group {0} is invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Requests/Responses

Cause:
Found null role in group.

Action:
Check the group's name.

JPS-02512
Cannot create a new user {0}.

Category:
Configuration

Cause:
Could not create user.

Action:
Ensure that the user name is valid and distinct from any other existing user name.

JPS-02513
Cannot drop user {0}.

Category:
Configuration

Cause:
Could not drop the user.

Action:
Ensure this user already exists.

JPS-02514
Cannot retrieve user profile.

Category:
Configuration

Cause:
Could not get profile for user.

Action:
Ensure that the user exists.

JPS-02515
Cannot update user profile.

Category:
Configuration

Cause:
Could not set profile for user.

Action:
Ensure that the user exists.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-02516
Cannot retrieve role profile.

Category:
Configuration

Cause:
Could not get role profile.

Action:
Ensure that the role exists.

JPS-02517
Cannot update role profile.

Category:
Configuration

Cause:
Could not set role profile.

Action:
Ensure that the role exists.

JPS-02518
Cannot create role {0}.

Category:
Security

Cause:
Could not create role.

Action:
Ensure that the role exists.

JPS-02519
Cannot drop role {0}.

Category:
Configuration

Cause:
Could not drop role.

Action:
Ensure that the role exists.

JPS-02520
Cannot grant role to the principal.

Category:
Configuration

Cause:
Could not grant permission to role.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the permission is set for the role.

JPS-02521
Cannot revoke role from principal.

Category:
Configuration

Cause:
Could not revoke role.

Action:
Check that the correct permission to revoke the role is set.

JPS-02522
Cannot add user to role owners.

Category:
Configuration

Cause:
Could not add owner to role.

Action:
Check log files and correct the appropriate configuration.

JPS-02523
Cannot remove user from role owners.

Category:
Configuration

Cause:
Could not remove owner from role.

Action:
Check log files and correct the appropriate configuration.

JPS-02524
Cannot retrieve role owners.

Category:
Configuration

Cause:
Could not get role owners.

Action:
Check log files and correct the appropriate configuration.

JPS-02525
Cannot retrieve role grantees.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Could not get role grantees.

Action:
Check log files and correct the appropriate configuration.

JPS-02526
Cannot retrieve the roles granted to principal.

Category:
Configuration

Cause:
Could not get granted roles.

Action:
Check log files and correct the appropriate configuration.

JPS-02527
Cannot close identity store.

Category:
Configuration

Cause:
Could not close identity store.

Action:
Check log files and correct the appropriate configuration.

JPS-02528
Cannot obtain a handle for role manager MBean.

Category:
Configuration

Cause:
Could not get role manager object name.

Action:
Check log files and correct the appropriate configuration.

JPS-02529
Cannot obtain a handle for user manager MBean.

Category:
Configuration

Cause:
Could not get user manager object name.

Action:
Check log files and correct the appropriate configuration.

JPS-02530
Cannot get a list of searchable attributes.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Could not get searchable attributes.

Action:
Check log files and correct the appropriate configuration.

JPS-02531
Cannot get list of user property names.

Category:
Configuration

Cause:
Could not get user property names.

Action:
Check log files and correct the appropriate configuration.

JPS-02532
Cannot parse principals of role.

Category:
Configuration

Cause:
Could not parse role principals.

Action:
Check log files and correct the appropriate configuration.

JPS-02533
Cannot parse principals of user.

Category:
Configuration

Cause:
Could not parse user principals.

Action:
Check log files and correct the appropriate configuration.

JPS-02534
Cannot find role {0}.

Category:
Configuration

Cause:
Could not completer search role operation.

Action:
Correct the role name and, if necessary, contact the domain administrator.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-02535
Cannot complete search for roles.

Category:
Configuration

Cause:
Could not complete search for multiple roles.

Action:
Correct role names and, if necessary, contact the domain administrator.

JPS-02536
Cannot complete search for user {0}.

Category:
Configuration

Cause:
Could not completer user search.

Action:
Correct user name and, if necessary, contact the domain administrator.

JPS-02537
Cannot complete search for users.

Category:
Configuration

Cause:
Could not complete search for multiple users.

Action:
Correct user names and, if necessary, contact the domain administrator.

JPS-02538
Cannot complete search operation.

Category:
Configuration

Cause:
Failed to complete search.

Action:
Correct the search query.

JPS-02539
Cannot change password of user {0}.

Category:
Configuration

Cause:
Could not change password.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Contact the domain administrator.

JPS-02540
User {0} not found in the identity store.

Category:
Configuration

Cause:
User {0} not found in the identity store.

Action:
Ensure user is valid.

JPS-02541
Identity store has an invalid configured subscriber name.

Category:
Configuration

Cause:
Found invalid subscriber name.

Action:
Correct the configuration of property subscriber.name.

JPS-02542
unknown identity store service type {0}.

Category:
Configuration

Cause:
Found unknown identity store service type {0}.

Action:
Correct the identity store configuration.

JPS-02543
Search type {0} is invalid.

Category:
Other

Cause:
Found invalid search type {0}.

Action:
Correct the type passed for the search.

JPS-02544
Operation type {0} is invalid.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Found invalid operation type {0}.

Action:
Correct the type passed for the operation.

JPS-02545
Search filter type {0} is invalid.

Category:
Other

Cause:
Found invalid search filter type {0}.

Action:
Correct the type passed for the search filter.

JPS-02546
Scope type is invalid {0}.

Category:
Other

Cause:
Found invalid scope type {0}.

Action:
Correct the type passed for the scope.

JPS-02547
Cannot create realm {0}.

Category:
Requests/Responses

Cause:
Could not created realm.

Action:
Check log files for error details.

JPS-02548
Cannot delete realm {0}.

Category:
Requests/Responses

Cause:
Could not delete realm.

Action:
Check log files for error details.

JPS-02549
A realm with the specified name already exists.

JPS-02554
Cannot add a duplicate member.

Category:
Requests/Responses

Cause:
Attempted to add already present member.

Action:
Correct the member's name.

JPS-02555
Cannot complete identity store operation. The error is {0}.

Category:
Requests/Responses

Cause:
Could not perform identity store operation.

Action:
Check error log files for details.

JPS-02556
Run into error {0} while using identity store.

Category:
Requests/Responses

Cause:
Run into an internal identity store error.

Action:
Check error log files for details.

JPS-02557
The group {0} is invalid.

Category:
Requests/Responses

Cause:
Found null or invalid group.

Action:
Correct the group's name.

JPS-02558
Operation isOwnedBy failed.

Category:
Configuration

Cause:
Could not perform operation isOwnedBy.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the owner's name.

JPS-02559
Operation isManagedBy failed.

Category:
Configuration

Cause:
Could not perform operation isManagedBy.

Action:
Correct the name.

JPS-02560
Cannot update role.

Category:
Configuration

Cause:
Could not update role.

Action:
Verify that the role name is correct and, if necessary, contact the domain administrator.

JPS-02561
The realm entry {0} is missing in the identity store XML file.

Category:
Configuration

Cause:
Could not find realm entry {0} in XML-based identity store.

Action:
Ensure that the realm name is present in the XML-based identity store.

JPS-02562
Identity store entry is missing in the identity store XML file.

Category:
Configuration

Cause:
Could not find identity store entry in XML-based identity store.

Action:
Ensure that entry is present in the XML-based identity store.

JPS-02563
Length of the name attribute should be more than {0}.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Found attribute name with less than {0} characters.

Action:
Ensure that the length of the attribute name is at least the minimum length.

JPS-02564
Length of the name attribute should be less than {0}.

Category:
Configuration

Cause:
Found attribute name with more than {0} characters.

Action:
Ensure that the length of the attribute name is at most the maximum length.

JPS-02565
Name attribute contains invalid characters.

Category:
Configuration

Cause:
Found invalid characters in attribute name.

Action:
Ensure that attribute names have characters in the following sets only: [a-z], [A-Z], [0-9], ['.', '-', '_'].

JPS-02566
The identity store config property {0} with value {1} is invalid.

Category:
Configuration

Cause:
Found invalid identity store configuration property.

Action:
Correct the configuration of the identity store property.

JPS-02567
The credential with map {0} and key {1} does not exist.

Category:
Configuration

Cause:
Could not find credential with map and key names provided.

Action:
Ensure that a credential with given map and key is present in the credential store.

JPS-02568
The password credential with map {0} and key {1} is invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Found invalid user name or password.

Action:
Ensure that the user name and password in the credential store are correct.

JPS-02569
Cannot find the XML file {0}.

Category:
Configuration

Cause:
Could not find XML file for XML-based identity store {0}.

Action:
Check the path of the XML file specified for the identity store.

JPS-02570
XML file is unspecified.

Category:
Configuration

Cause:
Could not determine XML file.

Action:
Specify the XML file for the XML-based repository.

JPS-02571
The algorithm {0} to encode passwords is not supported.

Category:
Configuration

Cause:
Found invalid password encoding algorithm.

Action:
Specify a valid algorithm for password encoding.

JPS-02572
Caller does not have IdentityAssertion permission to execute this operation. Reason {0}.

Category:
Requests/Responses

Cause:
Caller did not have IdentityAssertion permission.

Action:
Make sure the caller has IdentityAssertion permission to execute this operation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-02573
Cannot grant a role to itself.

Category:
Configuration

Cause:
Attempted to grant a role to itself.

Action:
Verify that no role is being granted to itself.

JPS-02574
Cannot delete default realm.

Category:
Requests/Responses

Cause:
Could not delete default realm.

Action:
The default realm cannot be deleted: assign another realm as the default realm before deleting this one.

JPS-02575
A user with the specified name does not exist.

Category:
Requests/Responses

Cause:
Could not find user with the specified name.

Action:
Check the user name.

JPS-02576
A role with the specified name already exists.

Category:
Requests/Responses

Cause:
Role with the specified name already existed.

Action:
Use a different role name.

JPS-02577
A role with the specified name does not exist.

Category:
Requests/Responses

Cause:
Could not find role with the specified name.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the role name.

JPS-02578
The principal type {0} is invalid for the identity store type {1}.

Category:
Requests/Responses

Cause:
Found unsupported principal type {0} for identity store type {1}.

Action:
Verify that principals have supported types.

JPS-02579
Identity store type for application {0} is null or empty.

Category:
Requests/Responses

Cause:
Found null identity store type configured in identity store.

Action:
Pass one of the following identity store types: XML, OID, ACTIVE_DIRECTORY, IPLANET, EDIRECTORY, OPEN_LDAP, COREID, OVD, OUD, or CUSTOM.

JPS-02580
Cannot grant role {0} to {1} because it would lead to a cyclic dependency.

Category:
Requests/Responses

Cause:
Could not grant role {0} to {1}, because it would lead to a cyclic dependency.

Action:
Revoke the grant which would create the cyclic dependency, and try again.

JPS-02582
LDAP user or group search base is invalid.

Category:
Requests/Responses

Cause:
Found invalid LDAP user or group search base.

Action:
Check that the user and group search base properties are valid.

JPS-02583
JPS principal "{0}" with identity store type "{1}" cannot be created.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
JPS principal "{0}" with identity store type "{1}" cannot be created.

Action:
Ensure the principal value is valid.

JPS-02584
JPS user name "{0}", principal type "{1}" with identity store type "{2}" cannot be created.

Category:
Security

Cause:
JPS user name "{0}", principal type "{1}" with identity store type "{2}" cannot be created.

Action:
Ensure the user value is valid.

JPS-02585
JPS enterprise role name "{0}", principal type "{1}" with identity store type "{2}" cannot be created.

Category:
Security

Cause:
JPS enterprise role name "{0}", principal type "{1}" with identity store type "{2}" cannot be created.

Action:
Ensure the enterprise role value is valid.

JPS-02586
JPS application role name "{0}", principal type "{1}" cannot be created.

Category:
Security

Cause:
JPS application role name "{0}", principal type "{1}" cannot be created.

Action:
Ensure the application role value is valid.

JPS-02587
Principal class "{0}", name "{1}" cannot be created.

Category:
Security

Cause:
Principal class "{0}", name "{1}" cannot be created.

Action:
Ensure the principal value is valid.

JPS-02588
Enterprise user principal "{0}" cannot be created. Reason: {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Enterprise user principal "{0}" cannot be created.

Action:
Ensure the user principal value is valid.

JPS-02589
Enterprise role principal "{0}" cannot be created. Reason: {1}.

Category:
Security

Cause:
Enterprise role principal "{0}" cannot be created.

Action:
Ensure the role principal value is valid.

JPS-02590
Token type {0} cannot be supported. Supported types are: {1}.

Category:
Configuration

Cause:
Token type {0} cannot be supported. Supported types are: {1}.

Action:
Use the Supported types.

JPS-02591
Guid {0} is assigned to principal {1}.

Category:
Security

Cause:
Guid {0} is assigned to principal {1}.

Action:
Check log for more details.

JPS-02592
Failed to push ldap config data to libOvd for service instance "{0}" in JPS context "{1}", cause: {2}

Category:
Security

Cause:
Failed to push ldap config data to libOvd for service instance "{0}" in JPS context "{1}", cause: {2}

Action:
Check libOvd log for more details.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-02593
Failed to get IGF UserManager or RoleManager instance from IGF API, cause: {0}

Category:
Security

Cause:
Failed to get IGF UserManager or RoleManager instance from IGF API, cause: {0}

Action:
Check IGF API or libOvd log for more details.

JPS-02594
The service instance "{0}" in JPS context "{1}" has no LDAP instance configured

Category:
Security

Cause:
The service instance "{0}" in JPS context "{1}" has no LDAP instance configured

Action:
Check jps-config.xml to make sure the IGF service has either the IDStore instance defined, or use the WlsLdapIdStoreConfigProvider to get LDAP config from WLS Authentication providers.

JPS-02595
The IGFService specified ldap "{0}" is not defined in the JPS service instances

Category:
Security

Cause:
The IGFService specified ldap "{0}" is not defined in the JPS service instances

Action:
Check jps-config.xml to make sure the specified ldap is defined as a JPS service instance.

JPS-02596
The provider class type for the specified ldap instance "{0}" is configured as "{1}", which not the expected type of "oracle.security.jps.internal.idstore.ldap.LdapIdentityStoreProvider"

Category:
Security

Cause:
The provider class type for the specified ldap instance "{0}" is configured as "{1}", which not the expected type of "oracle.security.jps.internal.idstore.ldap.LdapIdentityStoreProvider"

Action:
Check jps-config.xml to make sure the provider type class for ldap instance is "oracle.security.jps.internal.idstore.ldap.LdapIdentityStoreProvider".

JPS-02597
You configured a custom Authentication Provider or WLS generic LDAPAuthenticator, which the libOvd can not recognize. Supply the idstore.type property in jps-config.xml file, or use a specific WLS LDAP Authentication provider that matches your LDAP server instead of a generic one.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
You configured a custom Authentication Provider or WLS generic LDAPAuthenticator, which is a custom type and not supported by libOvd

Action:
The "idstore.type" property must be specified in jps-config.xml file as specific type such as OID, OVD etc. Alternatively, select a specific WLS LDAP Authentication provider that matches your LDAP server.

JPS-02598
Pushed ldap name and types info to libOvd. Ldaps : {0}.

Category:
Security

Cause:
libOvd is enabled so Ldap configuration info is passed to libOvd

Action:
No action required

JPS-02599
The configured Identity Store provider "{0}" is not supported by IDM IdentityDirectory

Category:
Security

Cause:
The configured Identity Store provider "{0}" is not supported by IDM IdentityDirectory

Action:
Use supported Identity Store provider for the IdentiyStoreService

JPS-02600
libOvd required system parameter of "common.components.home" is not supplied in the JVM command line

Category:
Security

Cause:
libOvd required system parameter of "common.components.home" is not supplied in the JVM command line

Action:
Supply the system flag of "-Dcommon.components.home" and point it to the oracle_common folder

JPS-02601
Failed to get Ovd virtualization service for service instance "{0}" in JPS context "{1}", cause: {2}

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Failed to get Ovd virtualization service for service instance "{0}" in JPS context "{1}", cause: {2}

Action:
Check Ovd log for more details.

JPS-03000
Cannot instantiate permission class "{0}", target "{1}", or actions "{2}" as defined in the application policy context "{3}". Cause {4}

Category:
Security

Cause:
Could not load a permission class.

Action:
Ensure that the class name is correct and available in the current class loader.

JPS-03001
Cannot instantiate permission class "{0}", target "{1}", or actions "{2}" as defined in the system policy context. Cause {3}

Category:
Security

Cause:
Could not load a class.

Action:
Ensure that the class name is correct and is available in the current class loader.

JPS-03004
Cannot log check authorization event to the audit service.

Category:
Security

Cause:
Could not log check authorization events to the audit service.

Action:
Ensure that auditing is configured correctly in your environment and application.

JPS-03005
LDAP policy store contains invalid configuration parameters.

Category:
Security

Cause:
Found invalid parameters in LDAP policy store configuration.

Action:
Check the configuration of the LDAP policy store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-03006
The name "{0}" of application role "{1}" is missing or invalid.

Category:
Security

Cause:
Found missing or invalid name in application role.

Action:
The internal identifier generated by the policy store seems malformed, due to an internal policy store error; contact Oracle Support Services.

JPS-03007
Authorization check permission succeeded.

Category:
Security

Cause:

Action:

JPS-03008
Authorization check permission failed.

Category:
Security

Cause:
Current Subject or source code did not have required permissions

Action:
Provide the required permissions.

JPS-03009
Executing privileged action in {0} mode as subject {1}.

Category:
Security

Cause:

Action:

JPS-03010
Policy store cleanup thread started.

Category:
Security

Cause:

Action:

JPS-03011
Policy store cleanup thread stopped.

Security

Cause:

Action:

JPS-03012
Error occurred when computing application roles in application context {0} for subject {1}. Exception: {2}

Category:
Security

Cause:
Error occurred when computing application roles in application context {0} for subject {1}. Exception: {2}

Action:
Refer to the base exception in logs to resolve the issue.

JPS-03013
Unsupported API method call.

Category:
Security

Cause:
Unsupported API method call.

Action:
Check the policy provider.

JPS-03014
Failed to distribute policy by timer.

Category:
Configuration

Cause:
Failed to distribute policy by timer.

Action:
Check the log for more details or contact the administator.

JPS-03015
Resource-Actions "{0}" will be skipped in bulk authorization evaluation for Application: "{1}".

Category:
Configuration

Cause:
Application name not set in the resource-actions.

Action:
Set the Application name in the resource-actions

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-03016
Resource-Actions "{0}" will be skipped in bulk authorization. Reason: "{1}"

Category:
Configuration

Cause:
Failed to convert the Resource-Actions into a Permission instance.

Action:
Check the logs for more information to resolve the error.

JPS-03017
Failed to compute Application roles for Subject "{0}". Reason "{1}"

Category:
Configuration

Cause:
Unable to get the ApplicationRoles granted to a principal.

Action:
Check the logs for more information to resolve the error.

JPS-03018
The authorization result is ignoring policies from application {0} as the application is not available

Category:
Configuration

Cause:
The application is not available at runtime, or the application is not defined in the policystore.

Action:
Check if the application is provisioned in the policystore.

JPS-03019
Policy evaluation in the application {0} failed. Reason: {1}

Category:
Configuration

Cause:
Error occurred while evaluating policies.

Action:
Refer to the logs to rectify the problem.

JPS-03020
Policy evaluation in the system policy failed. Reason: {0}

Category:
Configuration

Cause:
Error occurred while evaluating system policies.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Refer to the logs to rectify the problem.

JPS-03021
Admin Policy evaluation in the application {0} failed. Reason: {1}

Category:
Configuration

Cause:
Error occurred while evaluating administrative policies.

Action:
Refer to the logs to rectify the problem.

JPS-03022
Failed to initialize PolicyStore for Discovery mode. Reason: {0}

Category:
Configuration

Cause:
Failed to initialize PolicyStore for Discovery mode. Reason: {0}

Action:
Refer to the logs to rectify the problem.

JPS-03023
Discovered policy directory either not exist or can not write, isExist={0},isDirectory={1},canWrite={2}

Category:
Configuration

Cause:
Discovered policy directory either not exist or can not write, isExist={0},isDirectory={1},canWrite={2}

Action:
Make sure directory for writing discovered policy exist, is directory and can write.

JPS-03024
Failed to write policy information during discovery. Reason: {0}

Category:
Configuration

Cause:
Failed to dump policy objects in discovery mode. Reason: {0}

Action:
Refer to the logs to rectify the problem.

JPS-03025
Input permission is null when getPermissions is called for application name= {0}

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Input permission is null when getPermissions is called. application name= {0}

Action:
Refer to the logs to rectify the problem.

JPS-03026
PDPService and PolicyStore Service instance not found in default context. Reason: {0}

Category:
Configuration

Cause:
PolicyStore service instance and PDPService service instance not found in the default JpsContext in an uncontrolled mode.

Action:
Configure a PDPService service instance in the default JpsContext, or if running in an uncontroled mode, a PolicyStore Service.

JPS-03027
PDPService service instance failed during initialization due to lack of grant. If you are seeing this error after a new installation, make sure you have updated weblogic.policy as installation step suggested

Category:
Configuration

Cause:
PDPService service instance failed during initialization because of lack of grant.

Action:
check codebase grant like weblogic.policy to see if proper grant set for all codebase of PDP service.

JPS-03028
Unable to convert to a permission entry to resource-actions entry. Reason: {0}

Category:
Configuration

Cause:
Unable to convert to a permission entry to resource-actions entry.

Action:
Check the logs for more information to resolve the error.

JPS-03029
Unable to Notify to external Application:{0} Refresh Event. Reason {1}

Category:
Configuration

Cause:
Unable to Notify to external Appliacation Refresh Event.

Action:
Check the logs for more information to resolve the error.

Catch exception in PDP registration, will retry later.

Category:
Configuration

Cause:
Catch exception in PDP registration, retry later.

Action:
check the exception details and retry

JPS-03031
Catch InterruptedException in PDP registration. Registration failed.

Category:
Configuration

Cause:
Catch InterruptedException in PDP registration. Registration failed

Action:
check the exception details and retry

JPS-03032
Can not access PD server web service during PDP registration, will retry later.

Category:
Configuration

Cause:
PD Server web service not available, retry later.

Action:
wait retry to access to PD Server web service

JPS-03033
Can not access PD client web service during PDP registration, will retry later.

Category:
Configuration

Cause:
PD client web service not available, retry later.

Action:
wait retry to access to PD client web service

JPS-03034
Policystore is not ready on admin server during PDP registration, will retry later.

Category:
Configuration

Cause:
Policystore isn't available from admin server, retry later.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
wait retry accessing policystore

JPS-03035
PDP registration succeeded.

Category:
Configuration

Cause:

Action:

JPS-03036
No PDP Service is found in JPS Context {1}

Category:
Configuration

Cause:
PDPService service instance is not found in JPS Context.

Action:
Configure a PDPService service instance in JPS Context

JPS-03037
Exception happened during PDP initialization.

Category:
Configuration

Cause:
Exception happened during PDP Initialization

Action:
check the exception details and retry

JPS-03038
Unable to find PolicyStore or Schema Version. Check farm name and root name of policystore service instance in OPSS configuration file.

Category:
Configuration

Cause:
Unable to find PolicyStore or Schema Version.

Action:
Check farm name and root name of policystore service instance in OPSS configuration file

JPS-03039
Exception {0} happened during Policystore agent processing message {1}, the message will be ignored.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Found that list of principals in the grantee for the grant contains duplicate

Action:
Correct the list of principals in the grantee.

JPS-04004
Duplicate permission present "{0}" in a grant request.

Category:
Security

Cause:
Found that list of permissions in the grant contains duplicate.

Action:
Correct the list of permissions in the grant.

JPS-04005
More than one result found for given Application Name:{0}, Query:{1}, Actual results:{2}.

Category:
Security

Cause:
More than one results found for application name.

Action:
Refer to the log files for details and correct the error.

JPS-04006
No results found for given Application Name:{0}, DN: {1}, Query: {2}.

Category:
Security

Cause:
No results found for application name.

Action:
Refer to the log files for details and correct the error.

JPS-04021
Application Policy "{0}" already exists.

Category:
Security

Cause:
Encountered two application policy contexts with identical names.

Action:
Modify an application policy context to have a distinct name.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-04022
Cannot create application policy context "{0}".

Category:
Security

Cause:
Failed to complete persist operation while creating an application policy.

Action:
Refer to the base exception in log files and correct the error.

JPS-04026
Application policy "{0}" does not exist.

Category:
Security

Cause:
Could not find a policy context with the provided name.

Action:
Verify that a context with the provided name exists.

JPS-04027
Role with name "{0}" does not exist.

Category:
Configuration

Cause:
Could not find a role with name {0}.

Action:
Verify that a role with the provided name exists.

JPS-04028
Application with name "{0}" does not exist.

Category:
Configuration

Cause:
Could not find application with name {0}.

Action:
Verify that an application with the provided name exists.

JPS-04029
Cannot create principal with class name "{0}".

Category:
Configuration

Cause:
Could not create principal with class name {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify that the provided class name is valid.

JPS-04030
Cannot delete application policy context "{0}".

Category:
Security

Cause:
Failed to complete persist operation while deleting an application policy.

Action:
Refer to the base exception in log files and correct the error.

JPS-04031
Parameter "{0}" is null or empty.

Category:
Security

Cause:
Supplied parameter {0} was null or empty.

Action:
Verify that the supplied parameter is non-null. If it is of type String, ensure that its length is positive.

JPS-04032
Parameter "{0}" supplied is not the instance of "{1}".

Category:
Security

Cause:
Parameter {0} supplied is not the instance of {1}.

Action:
Ensure parameter is of correct datatype.

JPS-04033
Parameter "{0}" supplied is not of the type "{1}" (as expected).

Category:
Security

Cause:
Parameter {0} supplied is not of the type {1} (as expected).

Action:
Ensure parameter is of correct datatype.

JPS-04034
Failed to modify properties for Application "{0}".

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Cannot modify application policy.

Action:
Check the logs for errors.

JPS-04035
AttributeName {0} supplied should start with alphabet or an underscore. Name cannot contain characters other than alphanumeric and/or underscores.

Category:
Security

Cause:
AttributeName {0} supplied should start with alphabet or an underscore. Name cannot contain characters contain other than alphanumeric and/or underscores.

Action:
Ensure attribute name is of correct datatype.

JPS-04036
Function Name {0} supplied should start with alphabet or an underscore. Name cannot contain characters other than alphanumeric and/or underscores.

Category:
Security

Cause:
Function Name {0} supplied should start with alphabet or an underscore. Name cannot contain characters contain other than alphanumeric and/or underscores.

Action:
Ensure function name is of correct datatype.

JPS-04037
Name "{0}" starts or ends with whitespace.

Category:
Security

Cause:
Object name should not start with or end with whitespace.

Action:
Ensure object name has no whitespace in the beginning and end.

JPS-04038
Object name only contains whitespace.

Category:
Security

Cause:
Object name should not only contain whitespace.

Action:
Ensure object name doesn't only contain whitespace.

Application Role "{0}" already exists.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Encountered two roles with identical names.

Action:
Modify a role to have a distinct name.

JPS-04101
Cannot create application role "{0}".

Category:
Security

Cause:
Failed to complete persist operation while creating an application role.

Action:
Refer to the base exception in logs to resolve the issue.

JPS-04102
Cannot create application role. Cause: Invalid Argument -- Multiple role categories supplied for single application role

Category:
Security

Cause:
Persist operation failed because more than one role category supplied for create role

Action:
Ensure supplied parameters are correct.

JPS-04110
Cannot delete application role "{0}". Cause: Application role not found.

Category:
Security

Cause:
Could not find an application role in the application policy.

Action:
Check the name of the application role.

JPS-04111
Cannot delete application role "{0}".

Category:
Security

Cause:
Could not remove application role from policy store.

Action:
Refer to the base exception in log files and correct the error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-04112
Cannot delete application role "{0}".

Category:
Security

Cause:
Could not remove application role "{0}" because it may be in use; this role is a member of one or more other application roles (nested role hierarchy).

Action:
Flatten the nested role hierarchy, and then remove the desired role. Alternatively, remove the application role using the option force set to true.

JPS-04113
Cannot delete application role "{0}".

Category:
Security

Cause:
Could not remove application role "{0}" because it may be in use, or contains enterprise groups or enterprise users.

Action:
Remove the enterprise groups and enterprise users from the application role, or remove the application role using the option force set to true.

JPS-04114
Cannot delete application role "{0}".

Category:
Security

Cause:
Could not remove application role "{0}" because it may be in use; this role has one or more permissions granted to it.

Action:
Revoke the permission(s) from the application role, and then remove the role. Alternatively, remove the application role using the option force set to true.

JPS-04120
Cannot add principal to application role.

Category:
Security

Cause:
Encountered an internal policy store error.

Action:
Refer to the base exception in log files and correct the error.

JPS-04121
Cannot add principal to application role "{0}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Could not find application role in the application policy context.

Action:
Ensure the application role is present in the application policy.

JPS-04122
Cannot add principal to application role; principal(s) "{0}" is already a member of application role "{1}".

Category:
Security

Cause:
Found that principal {0} is already a member of the application role {1}.

Action:
Correct the principal name.

JPS-04123
Cannot add principal to the application role.

Category:
Security

Cause:
Attempted to insert an application role as a member of itself.

Action:
Correct the application role principal name. The containment in the role hierarchy must be cycle-free.

JPS-04124
The application role {0} added to {1} has no GUID defined.

Category:
Requests/Responses

Cause:
The application role {0} added to {1} has no GUID defined.

Action:
Ensure the application role has GUID before adding it as a member of an application role.

JPS-04125
Application Role {0} granted to role category {1} cannot be found in application {2}

Category:
Security

Cause:
Application Role {0} granted to role category {1} cannot be found in application {2}

Action:
Ensure application role exists before assigning it to a role category

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-04130
Cannot remove principal from application role.

Category:
Security

Cause:
Encountered an internal policy store error.

Action:
Refer to the base exception in log files and correct the error.

JPS-04131
Cannot remove principal from application role; cannot find application role "{0}" in application policy context.

Category:
Security

Cause:
Could not find the specified application role in the application policy context.

Action:
Correct the application role name.

JPS-04132
Cannot remove principal from application role; principal "{0}" is not member of application role "{1}".

Category:
Security

Cause:
See error message.

Action:
Correct the principal role name.

JPS-04135
Resource name not specified in application {0}.

Category:

Supply a valid role attribute name.

JPS-04143
Cannot find application role "{0}".

Category:
Security

Cause:
Could not find application role in the application policy context.

Action:
Supply the name of an existing application role name.

JPS-04144
Cannot get granted application role for principal "{0}".

Category:
Security

Cause:
Encountered an internal policy store error.

Action:
Refer to the base exception in log files and correct the error.

JPS-04145
Cannot get all application roles for application "{0}".

Category:
Security

Cause:
Encountered an internal policy store error.

Action:
Refer to the base exception in log files and correct the error.

JPS-04146
Cannot complete application role search because search role attribute name is null.

Category:
Security

Cause:
Could not complete the search because the role attribute name was NULL.

Action:
Provide a non-null role attribute name.

JPS-04147
Cannot get members of application role "{0}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Could not find application role in the application policy context.

Action:
Supply the name of an existing application role name.

JPS-04148
Exception when converting "{0}" to number, msg is "{1}".

Category:
Security

Cause:
Exception when converting {0} to number, msg is {1}

Action:
Only number is allowed

JPS-04150
Cannot alter application role {0} since multiple entries found for the application name:{1} query: {2} and actual result is {3}.

Category:
Security

Cause:
Encountered the policy store error {0}.

Action:
Check the error details to resolve the issue.

JPS-04151
Cannot alter application role.

Category:
Security

Cause:
Could not find application role {0} in the application policy context.

Action:
Provide an existing application role name.

JPS-04153
In Domain {0}, Application {1} is not present.

Category:
Security

Cause:
Application not found in the policystore

Action:
Check the name of the application in the policystore.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-04154
Refresh of application policy failed. Reason {0}

Category:
Security

Cause:
Refresh of application policy failed.

Check the application policy setup and the provider setup

JPS-04155
Scanning of application policy failed. Reason {0}

Category:
Security

Cause:
Scan of application policy failed.

Action:
Check the application policy setup and the provider setup

JPS-04156
RoleCategory modification attribute "{0}" is invalid.

Category:
Security

Cause:
Invalid RoleCategory modify attribute

Action:
Check whether the attribute you are trying to modify is valid or not.

JPS-04157
RoleCategory "{0}" already exists.

Category:
Security

Cause:
The role category already exists.

Action:
Supply a different role category name.

JPS-04158
RoleCategory {0} does not exist

Category:
Security

Cause:
The role category does not exist.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Supply a different role category name.

JPS-04159
Role category search value: {0}, is invalid for matcher type: {1}

Category:
Security

Cause:
The role category search query has invalid parameter value

Action:
Modify the search query and supply correct parameter value.

JPS-04160
Cannot find PermissionSet {0} in policy store.

Category:
Security

Cause:
Could not find PermissionSet in policy store.

Action:
Provide the name of a valid PermissionSet.

JPS-04161
Search for PermissionSet {0} by name yielded more than one result.

Category:
Security

Cause:
Found a duplicate PermissionSet name in search context.

Action:
Ensure that all PermissionSet names in the current search context are distinct.

JPS-04162
PermissionSet "{0}" already exists in policy store.

Category:
Security

Cause:
Permission Set already exists.

Action:
Create a PermissionSet with a different name.

JPS-04163
PermissionSet {0} cannot have empty ResourceActions.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
PermissionSet {0} has empty ResourceActions.

Action:
Ensure PermissionSet has ResourceActions.

JPS-04164
MemberResource {0} of type {1} not found in application {1}.

Category:
Security

Cause:
MemberResource {0} of type {1} not found in application {1}.

Action:
Ensure the Resource exists in the PolicyStore.

JPS-04165
ResourceType {0} referenced by MemberResource {1} not found in application {2}.

Category:
Security

Cause:
ResourceType {0} referenced by MemberResource {1} not found in application {2}.

Action:
Ensure the ResourceType exists in the PolicyStore.

JPS-04166
MemberResource {0} of type {1} does not have actions defined.

Category:
Security

Cause:
MemberResource {0} of type {1} does not have actions defined.

Action:
Ensure the MemberResource has valid actions.

JPS-04167
MemberResource {0} of type {1} has actions defined.

Category:
Security

Cause:
MemberResource {0} of type {1} has actions defined.

Action:
Ensure the MemberResource does not have actions.

JPS-04168
PermissionSet {0} cannot be created without ResourceActions.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
PermissionSet {0} cannot be created without ResourceActions.

Action:
Create a PermissionSet with ResourceActions.

JPS-04169
ResourceAction {0} used to modify PermissionSet {1} has invalid actions for ResourceType {2}.

Category:
Security

Cause:
ResourceAction {0} used to modify PermissionSet {1} has invalid actions for ResourceType {2}.

Action:
Modify PermissionSet using a ResourceAction that has valid actions.

JPS-04173
The resource type {0} is not found in store

Category:
Configuration

Cause:
Unsupported Resource Type {0}.

Action:
Check Resource Type.

JPS-04179
The resource type reference for resource {0} is not found in the application {1}. Hence using the first occurrence

Category:
Security

Cause:
The resource type reference for resource {0} is not found in the application {1}. Hence using the first occurrence.

Action:
Ensure the ResourceType reference exists for every resource.

JPS-04190
Cannot find resource.

Category:
Security

Cause:
Could not find resource in the resource store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Modify your search query.

JPS-04191
Cannot find unregistered resource finder for resource type "{0}".

Category:
Security

Cause:
Could not find a registered resource finder for the resource type.

Action:
Provide a resource finder implementation for the resource type, and register it with JPS.

JPS-04192
Cannot load resource finder with provider name "{0}".

Category:
Security

Cause:
Found an incorrect implementation: argumentless public constructor is missing.

Action:
Revisit the implementation to provide an argumentless public constructor.

JPS-04193
Cannot load resource finder with provider name "{0}" and class "{1}".

Category:
Security

Cause:
Could not load resource finder class: error encountered while reading a registered class file for resource finder.

Action:
Check the configuration of the class property in jps-config.xml.

JPS-04194
Cannot initialize resource finder with provider name "{0}" and class name "{1}".

Category:
Security

Cause:
Found an error while initializing a registered class for resource finder.

Action:
Check the configuration of the class property in jps-config.xml.

JPS-04195
Cannot load the resource finder with provider "{0}".

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Found an error in external resource finder configuration: a required property was missing.

Action:
Check the configuration of the class property in jps-config.xml.

JPS-04198
Resource {0} in application {1} has a non existent resource type {2}. Ignoring this resource.

Category:
Security

Cause:
Resource {0} in application {1} has a non existent resource type {2}. Ignoring this resource.

Action:
Ensure the ResourceType exists for every resource.

JPS-04200
Cannot grant policy due to a policy store internal error.

Category:
Security

Cause:
Encountered a policy store error.

Action:
Check the error details to resolve the issue.

JPS-04201
Cannot grant permission(s). Grant already exists for grantee {0}.

Category:
Security

Cause:
Permissions already granted to grantee.

Action:
Grant a different set of permissions.

JPS-04202
Cannot revoke policy.

Category:
Security

Cause:
Encountered an internal policy store error while revoking a policy.

Action:
Refer to the base exception in log files and correct the error.

JPS-04203
Cannot revoke permission.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Found that a permission has not been granted.

Action:
Provide the appropriate permission to the grantee.

JPS-04204
Cannot revoke permissions.

Category:
Security

Cause:
Found that permissions have not been granted.

Action:
Provide the appropriate permissions to the grantee.

JPS-04205
Cannot revoke permissions.

Category:
Security

Cause:
Found that permissions have not been granted to principals.

Action:
Provide the appropriate permissions to principals.

JPS-04206
Cannot revoke permissions.

Category:
Security

Cause:
Found that permissions have not been granted to code source.

Action:
Correct the code source grantee.

JPS-04207
Matching Grantee not found: {0}.

Category:
Security

Cause:
Found that permissions have not been granted to principals or code source.

Action:
Correct the list of principals and code source in the grantee, or revoke permissions granted to this grantee.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-04208
Cannot modify policy due to a policy store internal error.

Category:
Security

Cause:
Encountered an internal policy store error while modifying the policy store.

Action:
Refer to the base exception in log files and correct the error.

JPS-04209
Cannot modify property {0}.

Category:
Security

Cause:
Could not modify a property.

Action:
Supply the name of a property that can be modified.

JPS-04210
Modification code {0} is invalid.

Category:
Security

Cause:
Found an unsupported modification code.

Action:
Ensure that the modification code is ADD, REMOVE, or REPLACE.

JPS-04211
Cannot query, update, or delete Object with type "{0}" and name "{1}".

Category:
Security

Cause:
Attempted to query, update, or delete an invalid policy store object.

Action:
Ensure that the object to be queried, updated, or deleted belongs to the appropriate policy domain

JPS-04212
PermissionSet "{0}" is in use, cannot delete.

Category:
Security

Cause:
Permission set already existed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Permission set with the same name cannot be created. Use different name.

JPS-04213
Cannot modify a grant with an empty permission entry.

Category:
Security

Cause:
Encountered empty permission entry list while modifying a grant

Action:
Pass a non empty permission entry list while modifying a grant

JPS-04216
Cannot grant/revoke permissions because type "{0} " is not known.

Category:
Security

Cause:
Resource type validation for Permission set failed

Action:
Check whether the grant's permission's resourcetype is provisioned in the policystore.

JPS-04217
Grant/revoke failed for grantee "{0}", permission class "{1}", resource name "{2}", permission actions "{3}", resource type "{4}". Reason: permission actions is not a subset of resource type actions " {5}".

Category:
Security

Cause:
Resource type validation for Permission set failed

Action:
Check whether the actions in the Permission are valid actions for the resource type provisioned in the policy store.

JPS-04218
Grant/revoke failed for grantee "{0}", permission class "{1}", resource Name "{2}", permission actions "{3}", resource type "{4}". Reason: permission class is not equal to resource type matcher class " {5}".

Category:
Security

Cause:
Resource type validation for Permission set failed

Action:
Check whether the matcher class in the Permission is valid for the resource type provisioned in the policy store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-04219
The action {0} is invalid for resource type {1}.

Category:
Requests/Responses

Cause:
The action {0} is invalid for resource type {1}.

Action:
Check the ResourceActionsEntry parameter.

JPS-04220
Cannot search because the search query "{0}" was empty (has no child query).

Category:
Requests/Responses

Cause:
The search query {0} was empty (has no child query).

Action:
Provide a non-empty search query in.

JPS-04221
Cannot search because the grant search query "{0}" has illegal object type for search property "{1}".

Category:
Security

Cause:
The grant search query {0} has wrong object type in search value for search property {1}.

Action:
Provide an object type corresponding to the search property.

JPS-04222
Cannot search because the search query was null for "{0}" .

Category:
Requests/Responses

Cause:
The search query was null for {0} .

Action:
Provide a non-null search query .

JPS-04223
Access to tenant system policy is not allowed.

Category:
Security

Cause:
Access to tenant system policy is not allowed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Access global system policy instead.

JPS-04227
The object name "{0}" is invalid.

Category:
Requests/Responses

Cause:
The object name {0} is invalid.

Action:
Pass a correct object name in.

JPS-04300
Cannot save policy.

Category:
Security

Cause:
Could not save policy. Cause {0}.

Action:
Check the log files and resolve the error.

JPS-04301
Cannot read from policy store. Reason is {0}, {1}

Category:
Security

Cause:
Could not read from the policy store.

Action:
Check the log files and resolve the error.

JPS-04302
Cannot read from policy store.

Category:
Configuration

Cause:
Could not find the location property {1} in instance {0}.

Action:
Ensure the location is set to a valid policy store file.

JPS-04303
Cannot read from policy store.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Could not find value for system property '{0}' or for location property '{2}' in instance '{1}'.

Action:
Ensure the location is set to a valid policy store file.

JPS-04304
Policy store instance descriptor {0}, location value {1} is ignored.

Category:
Configuration

Cause:
Could not find value for the system property '{0}', which overrides the descriptor property {1} in the policy store service instance.

Action:
Unset the system property so that the location is picked up from configuration in jps-config.xml.

JPS-04305
Could not determine the work folder for controlled and mixed mode PD.

Category:
Configuration

Cause:
Could not determine the work folder for controlled and mixed mode PD.

Action:
Ensure system property "oracle.security.jps.config" or "domain.home" is set and jps-config.xml is present under ${domain.home}/config/fmwconfig.

JPS-04410
Cannot create JACC module policy context "{0}" for application {1}.

Category:
Security

Cause:
Could not create application policy because found two application module contexts with identical names.

Action:
Ensure that all application module context names are distinct.

JPS-04411
Cannot create application "{0}" JACC module policy context "{1}".

Category:
Security

Cause:
Could not create application module policy; persist operation failed.

Action:
Refer to the base exception in log files and correct the error.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-04412
Cannot delete JACC module "{0}".

Category:
Security

Cause:
Could not find JACC policy context to delete.

Action:
Check the JACC policy context name.

JPS-04413
Cannot delete JACC module policy context "{0}".

Category:
Security

Cause:
Could not delete JACC policy; persist operation failed.

Action:
Refer to the base exception in log files and correct the error.

JPS-04420
Application policy context name is missing from application role {0}.

Category:
Security

Cause:
Could not find application policy context in the application role principal.

Action:
Ensure that the application role principal has an application context.

JPS-04421
Administrator role name is invalid.

Category:
Security

Cause:
Found an invalid administrator role name.

Action:
Correct the name of the administrator role.

JPS-04422
Policy is malformed.

Category:
Security

Cause:
Found system policy that granted permissions to application role(s).

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Grants to application roles are not allowed in a system policy. Remove such grants.

JPS-04423
Application role name "{0}" is invalid.

Category:
Security

Cause:
Found invalid application role name {0}.

Action:
Verify that the application role name conforms with the role name syntax.

JPS-04502

JPS-04515
Usage arguments:

Category:
Requests/Responses

Cause:
Defines the keytool usage.

Action:
See error message.

JPS-04516
No key type for algorithm.

Category:
Configuration

Cause:
The algorithm key type was not specified.

Action:
Configure the algorithm key type.

JPS-04517
Key does not match any known algorithm.

Category:
Configuration

Cause:
The given key did not match the corresponding algorithm.

Action:
Reconfigure the algorithm key type.

JPS-04518
The number of JSSO cookies is zero or invalid.

Category:
Requests/Responses

Cause:
Could not find JSSO cookie in header.

Action:
Login again or contact the system administrator.

JPS-04519
The number of Oracle Access Manager cookies is zero or invalid.

Category:
Requests/Responses

Cause:
Could not find Oracle Access Manager cookie in header.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Login again or contact the system administrator.

JPS-04520
Token type is invalid: expected type is COOKIE_TOKEN, but found {0}.

Category:
Configuration

Cause:
The token type configured was invalid: it should be COOKIE_TOKEN.

Action:
Reconfigure the token type to a valid value.

JPS-04521
The JSSO property {0} is not set.

Category:
Configuration

Cause:
JSSO property was not correctly configured.

Action:
Reconfigure the property to a correct value.

JPS-04522
The authentication type {0} is invalid.

Category:
Configuration

Cause:
JSSO did not support this authentication type.

Action:
Reconfigure the type to a supported type.

JPS-04523
Token is no longer valid.

Category:
Requests/Responses

Cause:
The incoming token was no longer valid.

Action:
Login again.

JPS-04524
Cannot create token from JSSO cookie.

Category:
Requests/Responses

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Could not create token from the JSSO cookie; cookie may have expired.

Action:
Login again.

JPS-04525
The number of cookies is zero or the invalid number {0}.

Category:
Requests/Responses

Cause:
Could not find at least one cookie in the request.

Action:
Login again.

JPS-04526
Token has invalid version number.

Category:
Requests/Responses

Cause:
Token had invalid version number.

Action:
Login again.

JPS-04527
Token has an invalid format.

Category:
Requests/Responses

Cause:
Token was corrupted or had invalid format.

Action:
Login again.

JPS-04528
An error occurred while encoding JSSO token.

Category:
Configuration

Cause:
Could not encode JSSO token.

Action:
Specify a valid, supported encoding.

JPS-04529
Cannot verify signature in the JSSO token.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Requests/Responses

Cause:
Could not verify signature: the token was tampered with, or the signature algorithm was invalid.

Action:
Specify a supported signature algorithm.

JPS-04530
Algorithm is unsupported.

Category:
Configuration

Cause:
Specified algorithm was unsupported.

Action:
Check documentation for the list of supported algorithms.

JPS-04531
Error creating cipher.

Category:
Configuration

Cause:
Could not create cipher.

Action:
Check documentation for the list of supported cipher algorithms.

JPS-04532
JSSO logout URL is not configured.

Category:
Configuration

Cause:
The logout URL was not configured or invalid.

Action:
Check the logout URL configuration properties, and reconfigure it to a valid URL.

JPS-04533
JSSO has encountered an unexpected error.

Category:
Requests/Responses

Cause:
An internal error occurred.

Action:
Contact the system administrator.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-04534
JSSO symmetric key is missing.

Category:
Configuration

Cause:
The symmetric key configuration was missing.

Action:
Ensure that the properties "custom.sso.cred.key" and "custom.sso.cred.alias" are configured in the service instance, and that the symmetric key is present in the credential store.

JPS-04535
Identity name is invalid.

Category:
Configuration

Cause:
User identity was invalid or missing.

Action:
Provide a valid user identity.

JPS-04536
The token name {0} is missing in request object.

Category:
Configuration

Cause:
Token name was missing in the request object.

Action:
Ensure that the token name is present in the request object.

JPS-04537
No token name is specified for token collector {0}.

Category:
Configuration

Cause:
Token collector was invalid or missing.

Action:
Configure a valid token collector with the property "idm.token.collector.class".

JPS-04538
The request object class is invalid.

Category:
Configuration

Cause:
The request object class was invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the request object is valid.

JPS-04539
Token collector is not properly initialized.

Category:
Configuration

Cause:
Could not initialize the token collector.

Action:
Ensure that the token collector is correctly configured and initialized.

JPS-04540
The token asserter is not properly initialized.

Category:
Configuration

Cause:
Could not initialize the token asserter.

Action:
Ensure that the token asserter is correctly configured and initialized.

JPS-04541
Cannot find authenticated identity.

Category:
Configuration

Cause:
Authentication failed.

Action:
Provide a valid identity.

JPS-04542
The token collector class {0} is not properly configured in the configuration file.

Category:
Configuration

Cause:
Token collector class was missing.

Action:
Configure a valid token collector class with the property "idm.token.collector.class".

JPS-04543
No login module is configured for application.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Could not find configured login module.

Action:
Configure a login module in jps-config.xml.

JPS-04544
The subject of the identity is invalid.

Category:
Configuration

Cause:
Subject was missing.

Action:
Ensure that the valid Subject is present.

JPS-04545
Cannot verify the Subject {0}.

Category:
Configuration

Cause:
Could not verify Subject.

Action:
Check the user credentials.

JPS-04546
The configuration (idm.subject.loginmodule.disabled=true) specifies that the Subject is populated by the token asserter.

Category:
Configuration

Cause:
Could not find Subject asserter.

Action:
Configure an asserter to use a login module that returns a valid Subject.

JPS-04547
The token type {0} is not properly configured in the configuration file.

Category:
Configuration

Cause:
Could not find token type configuration.

Action:
Configure a token type in the service instance with the property "idm.token.type property".

JPS-04548
The token asserter class {0} is not properly configured in the configuration file.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Could not find token asserter class configuration.

Action:
Configure a token asseter class in the service instance with the property "idm.token.asserter.class".

JPS-04549
Token is no longer valid.

Category:
Configuration

Cause:
Found invalid or expired token.

Action:
Check that the token is valid and has not expired.

JPS-04550
Token type is invalid: expected type is HEADER_TOKEN, but found {0}.

Category:
Configuration

Cause:
Token type was invalid: it should be HEADER_TOKEN.

Action:
Reconfigure the token type to a valid type.

JPS-04551
The number of OSSO headers is zero or an invalid number.

Category:
Requests/Responses

Cause:
Could not find OSSO header in HTTP request.

Action:
Login again, or contact the system administrator.

JPS-04552
The required Oracle Access Manager property {0} is missing or invalid.

Category:
Configuration

Cause:
A required Oracle Access Manager property was missing or invalid.

Action:
Configure the property "access.sdk.install.path" in the service instance in jps-config.xml.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-04553
The user identity {0} for Oracle Access Manager is invalid.

Category:
Requests/Responses

Cause:
The user identity for Oracle Access Manager was invalid.

Action:
Login again.

JPS-04554
The user password for Oracle Access Manager is invalid.

Category:
Requests/Responses

Cause:
The user password for Oracle Access Manager was invalid.

Action:
Login again.

JPS-04555
The user {0} is not logged in to Oracle Access Manager. The error is {1}.

Category:
Requests/Responses

Cause:
The user was not logged in Oracle Access Manager.

Action:
Login again.

JPS-04556
The user {0} is not authorized to access a resource type authentication in Oracle Access Manager.

Category:
Requests/Responses

Cause:
The user was not logged in Oracle Access Manager.

Action:
Login again.

JPS-04557
Invalid parameter {0} supplied. Cannot be null or empty.

Category:
Requests/Responses

Cause:
Invalid parameter {0} supplied. Cannot be null or empty.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure the parameter is not null or empty.

JPS-04558
The SSO service is not properly configured: {0}.

Category:
Configuration

Cause:
The SSO service is not properly configured: {0}.

Action:
Check the SSO Service configuration.

JPS-04559
Failed to create the {0} token. Cause: {1}.

Category:
Requests/Responses

Cause:
Failed to create the {0} token. Cause: {1}.

Action:
Re-login.

JPS-04560
SSO provider cannot initiate SSO process: {0}.

Category:
Requests/Responses

Cause:
SSO provider cannot initiate SSO process: {0}.

Action:
Check the SSO Service configuration.

JPS-04561
Invalid parameter {0} supplied. Cannot be null.

Category:
Requests/Responses

Cause:
Invalid parameter {0} supplied. Cannot be null.

Action:
Ensure the parameter is not null.

JPS-04601
Cannot obtain audit service for policy store.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Could not query audit service about audit logging level for policy store messages.

Action:
Ensure that auditing is configured correctly.

JPS-04602
Cannot log policy management event to the audit service.

Category:
Security

Cause:
Could not log policy management audit messages to the audit service.

Action:
Ensure that auditing is configured correctly in your environment and application.

JPS-05500
Cannot create the user manager MBean.

Category:
Configuration

Cause:
Could not create the user manager MBean.

Action:
Check errors in log files and contact the domain administrator.

JPS-05501
Cannot create the role manager MBean.

Category:
Configuration

Cause:
Could not create the role manager MBean.

Action:
Check the log files for errors and contact domain administrator.

JPS-05502
Cannot create the identity store MBean.

Category:
Configuration

Cause:
Could not create the identity store MBean.

Action:
Check log files and contact the domain administrator.

JPS-05513
Failed to determine realms to migrate file {0}. Reason {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
Failed determine realms to migrate file {0}. Reason {1}.

Action:
Check log files and try again.

JPS-05521
Invalid jaas.login.controlFlag {0} found for {1} service instance. Valid values should be {2}.

Category:
Requests/Responses

Cause:
Invalid jaas.login.controlFlag {0} found for {1} service instance. Valid values should be {2}.

Action:
Use a valid value.

JPS-05542
Bootstrap credential store context missing

Action:
Contact system administrator

JPS-05659
location attribute missing from bootstrap credential store service {0}

Category:
Compliance

Cause:
Could not find location attribute of bootstrap credential store service

Action:
Contact system administrator

JPS-06000
The source context {0} is missing in jps configuration file.

Category:
Configuration

Cause:
While migrating a security store, found that the context, specified as source {0}, did not exist in jps-config.xml.

Action:
Provide a context for source that is present in jps-config.xml.

JPS-06001
The destination context {0} is missing in jps configuration file.

Category:
Configuration

Cause:
While migration of a security store, found that the context, specified as destination {0}, did not exist in jps-config.xml.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Provide a context for destination that is present in jps-config.xml.

JPS-06002
Cannot clean the destination credential store. Reason {0}.

Category:
Upgrade

Cause:
A codebase grant was found without the required permissions.

Action:
Set the right permissions to the codebase grant.

JPS-06003
Cannot migrate credential folder/key {0}/{1}.Reason {2}.

Category:
Upgrade

Cause:
Cannot migrate this credential.

Action:
Verify that the credential is correctly specified.

JPS-06004
Cannot migrate an unknown user. Reason {0}.

Category:
Upgrade

Cause:
Cannot migrate this user.

Action:
Verify that the user is correctly specified.

JPS-06005
Cannot get password of user {0}. Reason {1}.

Category:
Upgrade

Cause:
Cannot get this user password.

Action:
Verify that the password is correctly specified.

JPS-06006
Cannot migrate user {0}. Reason {1}.

Category:
Upgrade

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Cannot migrate this user name.

Action:
Verify that the user name is correctly specified.

JPS-06007
Cannot migrate an unknown role. Reason {0}.

Category:
Upgrade

Cause:
Cannot migrate this role.

Action:
Verify that the role is correctly specified.

JPS-06008
Cannot migrate role {0}. Reason {1}.

Category:
Upgrade

Cause:
Cannot migrate this role name.

Action:
Verify that the role name is correctly specified.

JPS-06009
Cannot migrate any member of role {0}. Reason {1}.

Category:
Upgrade

Cause:
Cannot migrate members.

Action:
Verify that the members are correctly specified.

JPS-06010
Cannot migrate an unknown member of role {0}. Reason {1}.

Category:
Upgrade

Cause:
Cannot migrate this member.

Action:
Verify that the member is correctly specified.

Verify that the member name is correctly specified.

JPS-06012
Cannot migrate a global grant. Reason {0}.

Category:
Upgrade

Cause:
Could not migrate a global grant. Reason {0}.

Action:
Verify that the grant is correctly specified.

JPS-06013
Cannot migrate an application grant. Reason {0}.

Category:
Upgrade

Cause:
Could not migrate an application grant. Reason {0}.

Action:
Verify that the application grant is correctly specified.

JPS-06014
Cannot migrate an indirect password for {0}. Reason {1}.

Category:
Upgrade

Cause:
Could not migrate an indirect password due to an exception.

Action:
Verify that the indirect password is correctly specified.

JPS-06015
Cannot migrate an indirect password for {0} because the specified realm is null.

Category:
Upgrade

Cause:
Could not migrate an indirect password because the given realm was null.

Action:
Provide a non-null realm.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-06016
Cannot migrate an indirect password for {0} because the specified user name is null.

Category:
Upgrade

Cause:
Could not migrate an indirect password because the given user name was null.

Action:
Provide a non-null user name.

JPS-06017
Cannot migrate an indirect password for {0} because the specified realm does not exist.

Category:
Upgrade

Cause:
Could not migrate an indirect password because the input realm does not exist.

Action:
Provide an existing realm.

JPS-06018
Cannot migrate an indirect password for {0} because the specified user does not exist.

Category:
Upgrade

Cause:
Could not migrate an indirect password because the input user does not exist.

Action:
Provide an existing user.

JPS-06019
The identity store associated with context {0} is missing in jps-config.xml.

Category:
Configuration

Cause:
While migration of a policy store, found that the context, specified as containing the associated identity store {0}, did not exist in jps-config.xml.

Action:
Provide a context to associate identity store that is present in jps-config.xml.

JPS-06020
The principal class {0} specified in the source policy store cannot be loaded. Reason {1}.

Category:
Upgrade

Cause:
Could not load a class. Reason {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure the class is in the class path.

JPS-06021
Cannot migrate the credentials in the folder {0}. Reason: {1}.

Category:
Upgrade

Cause:
Cannot migrate the credentials in this folder.

Action:
Check the folder in the source credential store.

JPS-06022
Cannot determine the folder to be migrated.

Category:
Upgrade

Cause:
The credential store has more than one folder and the folder to be migrated was not defined.

Action:
Specify the folder to be migrated.

JPS-06023
The input file {0} specified for migration or upgrade is not valid.

Category:
Upgrade

Cause:
The file {0} was non-readable, empty, or did not exist.

Action:
Provide a valid file.

JPS-06024
Cannot initialize the destination identity store.

Category:
Upgrade

Cause:
One or more required configuration properties were not be properly defined.

Action:
Check the configuration of the destination identity store.

JPS-06025
There are undefined credential properties for the destination identity store.

Category:
Upgrade

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
One or more required configuration properties for credentials were not defined.

Action:
Check the configuration of the destination identity store.

JPS-06026
Cannot get credentials for the destination identity store from the domain credential store.

Category:
Upgrade

Cause:
Credentials were not found in the domain credential store.

Action:
Ensure that the domain credential store has the appropriate credentials.

JPS-06027
Cannot migrate the specified realm.

Category:
Upgrade

Cause:
The specified realm was not found in the source store.

Action:
Specify a valid realm name.

JPS-06028
The required identity store property {0} required for migration is undefined.

Category:
Other

Cause:
A property required for migration was not configured in the identity store.

Action:
Specify the missing configuration property.

JPS-06029
JAZN properties cannot be read from config file {0}.

Category:
Upgrade

Cause:
JAZN properties could not be read from config file {0}.

Action:
Check the configuration file and try again.

JPS-06030
The required JAZN property {0} could not be read.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Upgrade

Cause:
A required JAZN property {0} could not be read.

Action:
Check the configuration file and try again.

JPS-06031
No application is configured in the source policy store.

Category:
Upgrade

Cause:
No application was configured in the source policy store.

Action:
Check the source policy store.

JPS-06032
Unable to determine the application policy to migrate.

Category:
Upgrade

Cause:
More than one application was configured in the source policy store.

Action:
Check the source policy store.

JPS-06033
The source credential store contains no credentials.

Category:
Requests/Responses

Cause:
The requested credential was not found in the credential store.

Action:
Ensure that the credential store has the requested credential.

JPS-06034
The folder {0} is missing in the credential store.

Category:
Requests/Responses

Cause:
The requested map name was not found in the credential store.

Action:
Ensure that the credential store contains the requested map name.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-06035
The destination file {0} already exists; the existing LDIF file will not be appended or overwritten.

Category:
Requests/Responses

Cause:
The destination file is already present.

Action:
Delete the destination file, or provide the name of a non-existing file.

JPS-06036
Cannot determine the default realm to migrate file {0}. Reason {1}.

Category:
Programmatic

Cause:
An internal error occurred while determining the default realm.

Action:
Check log files and try again.

JPS-06037
Cannot initialize the source credential store.

Category:
Upgrade

Cause:
The configuration for the credential store was invalid.

Action:
Verify that the credential store configuration is correct and try again.

JPS-06038
Cannot initialize the destination credential store.

Category:
Upgrade

Cause:
The configuration for the credential store was invalid.

Action:
Verify that the credential store configuration is correct and try again.

JPS-06039
Cannot migrate property {0} of user {1}. Reason {2}.

Category:
Upgrade

Cause:
Cannot migrate property {0} for user {1}. Reason {2}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the log files and retry migrating.

JPS-06040
Cannot migrate property {0} of role {1}. Reason {2}.

Category:
Upgrade

Cause:
Cannot migrate property {0} for role {1}. Reason {2}.

Action:
Check the log files and retry migrating.

JPS-06041
The switch or keyword " {0} " is not applicable to " {1} = {2} ".

Category:
Requests/Responses

Cause:
One or more optional switches or keywords were invalid.

Action:
Refer to the command documentation for the correct usage.

JPS-06042
Invalid scope for migration.

Category:
Requests/Responses

Cause:
Value of scope keyword was invalid.

Action:
Enter only one of the defined values/alias of scope as a value for the keyword scope.

JPS-06043
The source application is undefined but required to migrate application-specific policies.

Category:
Requests/Responses

Cause:
Optional keyword srcApp was not defined.

Action:
Specify, in the parameter srcApp, the value of the application whose policies are to be migrated.

JPS-06044
Cannot create the temporary file {0}.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Could not write the XML file.

Action:
Check permissions or disk space in the java.io.tmpdir directory.

JPS-06045
Cannot parse the file {0}.

Category:
Programmatic

Cause:
Could not parse the XML file.

Action:
Check that the file is present in the java.io.tmpdir directory, and that it contains well-formed XML.

JPS-06046
Cannot delete the file {0}.

Category:
Programmatic

Cause:
The temp file could not be deleted.

Action:
Check that the file is not being accessed by other applications.

JPS-06047
Cannot migrate user credentials of user {0}.

Category:
Configuration

Cause:
The source identity store was configured not to give cleartext password.

Action:
Configure the source identity store to obfuscate password.

JPS-06048
Null values passed in for username or application stripes.

Category:
Programmatic

Cause:
The user name or the application stripe was null.

Action:
The user name must not be null. The list of application names must be null if only global policies are to be extracted.

JPS-06049
Application list is empty. Only global policies will be extracted.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
The list of applications was empty.

Action:
Only global policies are collected.

JPS-06050
file {0} was not found

Category:
Programmatic

Cause:
The xml file was not found.

Action:
Check if the file is present in the java.io.tmpdir directory.

JPS-06051
Processing of privilege roles is supported only when migrating an XML Policy store to an LDAP Policy Store.

Category:
Upgrade

Cause:
Processing of privilege roles was supported only when migrating an XML policy store to an LDAP policy store.

Action:
Make sure that the source store is XML-based and the destination store is LDAP-based.

JPS-06052
Error while processing a PermissionSet grant.

Category:
Upgrade

Cause:
Error encountered while processing permissionSet grant.

Action:
Check log files for details.

JPS-06053
Processing privilege roles failed. Cause {0}

Category:
Upgrade

Cause:
The processing of privilege roles failed.

Action:
Check log files for detials.

Error in creating resourceTypes in destination store. Cause {0}

Category:
Upgrade

Cause:
Error encountered while creating resourceTypes in destination store.

Action:
Check log files for detials.

JPS-06055
Location of the ldif file containing resourceType definitions cannot be null.

Category:
Upgrade

Cause:
Location of the LDIF file containing resourceType definitions was null or not found.

Action:
Provide the absolute path for the resource file.

JPS-06056
Error while reading resource type file {0}.

Category:
Upgrade

Cause:
Error encountered while reading the resource type file {0}.

Action:
Ensure that the file exists and that it has the expected format.

JPS-06057
Resource type name or matcher class cannot be null.

Category:
Upgrade

Cause:
Resource type name or matcher class was null.

Action:
Provide a valid name and matcher class for the resource type.

JPS-06058
Permission class {0} with more than one matching resource type found.

Category:
Upgrade

Cause:
Permission class had more than one matching resource type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the a permission class has just one matching resource type.

JPS-06059
A grant entry containing {0} as one of principals has multiple principal entries. This entry cannot be processed.

Category:
Upgrade

Cause:
A grant for a privilege role had multiple principals.

Action:
Ensure that the privilege role grant has a single principal.

JPS-06060
The resource type definition file is missing.

Category:
Upgrade

Cause:
The resource type definition file was not found.

Action:
Provide the absolute path location for the resource definition file in LDIF format when using the option procPrivOption.

JPS-06061
The switch or keyword " {0} " is not defined for " {1} = {2} ".

Category:
Requests/Responses

Cause:
One or more optional switches or keywords were invalid.

Action:
Refer to the command documentation for the correct usage.

JPS-06062
Application role {0} corresponding to a member application role not defined.

Category:
Upgrade

Cause:
Application role not defined.

Action:
Check logs for detials.

JPS-06063
No Matching resource type definition found for permission class {0}.

Category:
Upgrade

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Permission class representing resource granted to a privilleged role does not have corresponding resource type definition.

Action:
Make sure a permission class has one matching resource type.

JPS-06064
Error getting the application role {0} from the source policy store

Category:
Upgrade

Cause:
The application role was either not present or defined multiple times.

Action:
Check the source policy store and make sure that the application role is uniquely defined.

Cause:
Either or both of stripe name and keystore format is null or empty string.

Action:
Ensure that stripe name and keystore format are both non-empty string.

JPS-06636
Application stripe {0} does not exist in keystore.

Category:
Compliance

Cause:
Given application stripe doesn't exist in keystore.

Action:
Provide name of an application stripe that is already existing in keystore.

JPS-06637
Trusted certificate with Subject DN {0} is missing from trust store of keystore.

Category:
Compliance

Cause:
A trusted certificate is missing from trust store of keystore.

Action:
Ensure that the trusted certificate is present in trust store of keystore.

JPS-06638
KeyStore Entry required were not given.

Category:
Configuration

Cause:
KeyStore Entry required were not given.

Action:
Provide KeyStore Entry as input.

JPS-06639
The following aliases were encountered in the keystore: {0}

Category:
Compliance

Cause:

Action:

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-06640
Empty alias specified for importing wallet keystore, so skipping import

Category:
Configuration

Cause:
Key aliases of wallet keystore to import should not be empty string.

Action:
Ensure that key aliases of wallet keystore to import are not empty string.

JPS-06641
Invalid keySize format : {0}

Category:
Compliance

Cause:
Cannot set key entry for non-existent stripe and keystore

Action:
This operation is not supported

JPS-06642
Can not determine the JAVA/JRE home,so could not find the cacerts file.

Category:
Compliance

Cause:
Neither environnment variable JAVA_HOME nor system property java.home is specified.

Action:
Ensure that either environnment variable JAVA_HOME or system property java.home is specified.

JPS-06643
JDK cacerts file {0} in use.

Category:
Compliance

Cause:

Action:

JPS-06644
Failed to import JDK cacerts to system/publiccacerts.

Category:
Compliance

Cause:
Importing JDK CA cert failed.

Action:
check log for more details.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-06645
JDK cacerts {0} does not exist.

Category:
Compliance

Cause:
JDK cacerts file {0} does not exist.

Action:
Check the location of JDK cacerts files.

JPS-06646
Private or Secret key found in Trust Store

Category:
Compliance

Cause:

Action:

JPS-06647
Aggregation of two trust stores failed

Category:
Compliance

Cause:
There is a private or secret key entry in the truststore

Action:
Remove the private or secret key entries from the truststore

JPS-06655
The keysize for algorithm {0} can not be less than {1}, but {2} is being used .

Category:
Compliance

Cause:
Keysize is not allowed for specific algorithm

Action:
Use a higher key size for this algorithm.

JPS-06656
Using algorithm {0} is not permitted.

Category:
Compliance

Cause:
The algorithm is not allowed.

Action:
Use a stronger algorithm.

Cause:
Configuration type used by Trust Service

Action:
None

JPS-07536
Token credential missing

Category:
Security

Cause:
Token signing or validation credential missing.

Action:
Provide correct credential.

JPS-07537
Token signature missing

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Token signature missing.

Action:
Check the token for integrity.

JPS-07538
The input token is not specified

Category:
Security

Cause:
Input token not provided.

Action:
Check if the token has been provided.

JPS-07539
Token signing method is not specified

Category:
Security

Cause:
Token signing algorithm parameter missing.

Action:
Check the token signing algorithm parameter.

JPS-07540
Token signing method is invalid

Category:
Security

Cause:
Token signing algorithm parameter invalid

Action:
Check the specified token signing algorithm.

JPS-07541
Token signing private key is not specified

Category:
Security

Cause:
Token signing private key missing.

Action:
Check the token signing private key parameter.

JPS-07542
Token signing certificate is not specified

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Token signing certificate missing.

Action:
Check the token signing certificate parameter.

JPS-07543
Token signing credential is not specified

Category:
Security

Cause:
Token signing credential missing.

Action:
Check the token signing credential parameter.

JPS-07544
The specified token type is invalid

Category:
Security

Cause:
The token type is not supported.

Action:
Check the token type parameter.

JPS-07545
Invalid TokenContext class

Category:
Security

Cause:
Internal Error. The correct TokenContext class is not created.

Action:
Provide the correct TokenProvider class in trust configurations.

JPS-07546
Token cannot be issued for virtual or anonymous user

Category:
Security

Cause:
Trust token cannot be issued for anonymous or virtual users

Action:
Ensure usage of Trust service is limited to users present in configured identity store.

File {0} is cannot be found. Check if the specified file is expected in the specified location.

Category:
Configuration

Cause:
File {0} cannot be found.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check if the specified file exists and accessible in the specified location.

JPS-09601
The value "{0}" is invalid for {1}.

Category:
Configuration

Cause:
An invalid value was provided for this configuration.

Action:
Provide the correct value.

JPS-09602
Fail to find default JPS Context in {0}.

Category:
Configuration

Cause:
Fail to find default JPS Context in the jps-config.xml.

Action:
Check content of jps-config.xml.

JPS-09603
SecurityContext.getSharedSecretStore and getSharedSecretStorePassword return inconsistent values.

Category:
Configuration

Cause:
SecurityContext.getSharedSecretStore and getSharedSecretStorePassword return inconsistent values.

Action:
Both shared secret store name and password are required for configuring a domain with shared database security store.

JPS-09604
JDBC Information {0} is missing for configuring security store to database.

Category:
Configuration

Cause:
JDBC Information is missing for configuring security store to database.

Action:
Check if all required jdbc information is supplied.

JPS-09605
Fail to find JPS Context with id {0} in {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Fail to find the specific JPS Context in the jps-config.xml.

Action:
Check content of jps-config.xml.

JPS-09606
Error encountered while importing encryption key in shared database security store.

Category:
Configuration

Cause:
Error encoutered while seeding encryption key in shared database security store.

Action:
Check if encryption key is exported and imported properly.

JPS-09607
OpssSecurityConfiguration is in invalid state.

Category:
Configuration

Cause:
OpssSecurityConfiguration is in invalid state, it has not been initialized properly

Action:
If creating expanded domain, check if database is up and all the required datasource information are provided.

JPS-09608
OpssSecurityConfiguration is in invalid state, start method is not invoked prior to other methods.

Category:
Configuration

Cause:
OpssSecurityConfiguration is in invalid state - start() method is not invoked by CIE prior to other methods

Action:
Check if CIE is invoking OpssSecurityConfiguration in proper order.

JPS-09609
Failed to initialize OPSS security context based on SecurityContext object from CIE.

Category:
Configuration

Cause:
Failed to initialize OPSS security context based on SecurityConext object passed from CIE.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The resource type has existed.

Action:
Make sure the resource type does not exist.

JPS-10253
The super resource type {0} does not exist.

Category:
Security

Cause:
The resource type is referring an invalid super resource type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Make sure the super resource type exist.

JPS-10254
The resource type {0} should not have its own matcher since it has super type.

Category:
Security

Cause:
The resource type has both its own matching algorithm and super type.

Action:
Remove matching algorithm if the resource type should have super type. Otherwise, remove super type.

JPS-10255
Resource type search context should not be null.

Category:
Security

Cause:
The resource type context could not be gotten.

Action:
Make sure the application policy is available.

JPS-10256
Could not get an available data manager.

Category:
Security

Cause:
The data manager is invalid.

Action:
Make sure policy store and related configuration are correct.

JPS-10257
The modification operator {0} is invalid.

Category:
Security

Cause:
The operator in ModificationItem is invalid.

Action:
Make sure the operation is one of DirContext.ADD_ATTRIBUTE, DirContext.REPLACE_ATTRIBUTE and DirContext.REMOVE_ATTRIBUTE.

JPS-10258
The property name {0} is unknown.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The attribute ID in ModificationItem is undefined.

Action:
Make sure the attribute ID is a valid one.

JPS-10259
The name of resource type could not be modified.

Category:
Security

Cause:
Resource type name could not be modified.

Action:
Do not put resource type name in ModificationItem.

JPS-10260
The super type of resource type could not be modified.

Category:
Security

Cause:
The super type of resource type could not be modified.

Action:
Do not put super type in ModificationItem.

JPS-10261
The matching algorithm of resource type could not be modified.

Category:
Security

Cause:
The matching algorithm of resource type could not be modified.

Action:
Do not put matching algorithm in ModificationItem

JPS-10262
The action delimiter of resource type could not be modified.

Category:
Security

Cause:
The action delimiter of resource type could not be modified.

Action:
Do not put action delimiter in ModificationItem.

JPS-10263
The operation REPLACE_ATTRIBUTE could not be used to the allowed actions of resource type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The operation REPLACE_ATTRIBUTE could not be used to the allowed actions of resource type.

Action:
Use REMOVE_ATTRIBUTE and ADD_ATTRIBUTE in ModificationItem.

JPS-10264
The property {0} of resource type is single, could not have more than one value.

Category:
Security

Cause:
The property could not have more than one value.

Action:
First remove the existing value before adding new one.

JPS-10265
Could not add or replace the property {0} since there is no value provided.

Category:
Security

Cause:
There is no value provided when trying to add or replace an property.

Action:
Provide the new value.

JPS-10266
The value data type of property {0} should be String.

Category:
Security

Cause:
The value data type of property is not String.

Action:
Use a String object as value.

JPS-10267
The resource type {0} does not exist.

Category:
Security

Cause:
The resource type does not exist.

Action:
Make sure the resource type exist.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-10268
The resource type {0} is in use, could not be deleted.

Category:
Security

Cause:
The resource type could not be deleted without cascade since it is in use.

Action:
Cascade delete it or first remove all referring objects.

JPS-10269
The operation REPLACE_ATTRIBUTE could not be used to the resource type attribute

Category:
Security

Cause:
The operation REPLACE_ATTRIBUTE could not be used to the resource type attribute

Action:
Use REMOVE_ATTRIBUTE and ADD_ATTRIBUTE in ModificationItem.

JPS-10270
The resource type attribute {0} is used in policy(-ies) and can not be deleted.

Category:
Security

Cause:
The resource type attribute being deleted was used in one or morepolicies and could not be deleted.

Action:
Before deleting the resource attribute, make sure it is not used.

JPS-10271
The resource matcher class of resource type {0} could not be modified to {1}.

Category:
Security

Cause:
The resource type matcher class was changed while modifying.

Action:
Keep matcher class unchanged.

JPS-10272
Permission Class not found in the classpath: {0}

Category:
Security

Cause:
The permission class was not found in the class path.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Make sure that the permission class is part of the class path for the program.

JPS-10273
Permission class expected to be either oracle.security.jps.ResourcePermission or extending oracle.security.jps.AbstractTypedPermission but found {0} Resource Type: {1} is sharing permission class with Resource Type: {2}

Category:
Security

Cause:
The Permission class is not either ResourcePermission or Abstracted Permission

Action:
The Permission class for the resource type must be a Resource permission

JPS-10274
Permission should be associated with a Resource Type. Permission Name: {0}

Category:
Security

Cause:
The permission should have a resource type associated with it

Action:
Make sure that the permission has a resource type associated with it

JPS-10275
Resource Type Matcher Class and Permissions do not match. {0} and {1} do not match

Category:
Security

Cause:
Resource Type Matcher Class and Permissions do not match.

Action:
Make sure that the Matcher Class and Permissions match.

JPS-10276
Cannot determine the Resource Type from the permission {0}

Category:
Security

Cause:
Cannot determine the Resource Type from the permission.

Action:
Make sure that there is a resource type associated with the permission class

JPS-10277
Allowed attributes can not be modified.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Allowed attributes can not be modified.

Action:
Make sure not modifying allowed attributes

JPS-10278
Requested modification to the resource type {0} is not allowed.

Category:
Security

Cause:
Requested modification to the resource type is not allowed.

Action:
Make sure not to make certain type of changes to the resource type when it is used by resources

JPS-10279
The custom resource matcher class of resource type {0} could not be modified to {1}.

Category:
Security

Cause:
The custom resource matcher class was changed while modifying the resource type.

Action:
Keep custom resource matcher class unchanged.

JPS-10280
The resource attribute {0} does not exist in the resource type {1}.

Category:
Security

Cause:
The resource attribute does not exist in the resource type.

Action:
Check all the valid resource attributes in the resource type.

JPS-10400
Resource reference should not be null.

Category:
Security

Cause:
The parameter resource reference is null.

Action:
Use a valid object.

JPS-10401
The resource reference is invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The current resource reference is invalid.

Action:
Use a valid resource reference.

JPS-10402
The resource {0} does not exist.

Category:
Security

Cause:
The resource does not exist.

Action:
Make sure the resource exist.

JPS-10403
Could not get an available data manager.

Category:
Security

Cause:
The data manager is invalid.

Action:
Make sure policy store and related configuration are correct.

JPS-10404
The resource type {0} does not exist.

Category:
Security

Cause:
The resource type does not exist.

Action:
Make sure the resource type exist.

JPS-10405
The resource "{0}" with type "{1}" already exists in current application policy.

Category:
Security

Cause:
The resource to be created has existed.

Action:
Make sure the resource does not exist.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-10406
The modification operator {0} is invalid.

Category:
Security

Cause:
The operator in ModificationItem is invalid.

Action:
Make sure the operation is one of DirContext.ADD_ATTRIBUTE, DirContext.REPLACE_ATTRIBUTE and DirContext.REMOVE_ATTRIBUTE.

JPS-10407
The property name {0} is unknown.

Category:
Security

Cause:
The attribute ID in ModificationItem is undefined.

Action:
Make sure the attribute ID is a valid one.

JPS-10408
The name and type of resource could not be modified.

Category:
Security

Cause:
The name and type of resource could not be modified.

Action:
Do not put resource name and type in ModificationItem.

JPS-10409
The property {0} of resource is single, could not have more than one value.

Category:
Security

Cause:
The property could not have more than one value.

Action:
First remove the existing value before adding new one.

JPS-10410
Could not add or replace the property {0} since there is no value provided.

Category:
Security

Cause:
There is no value provided when trying to add or replace an property.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Provide the new value.

JPS-10411
The resource {0} is in use, could not be deleted.

Category:
Security

Cause:
The resource could not be deleted without cascade since it is in use.

Action:
Cascade delete it or first remove all referring objects.

JPS-10412
The resource attribute {0} already exists in the current entry.

Category:
Security

Cause:
The resource attribute could not be added since it already exists.

Action:
Remove duplicate resource attributes.

JPS-10413
The resource action {0} already exists in the current entry.

Category:
Security

Cause:
The resource action could not be added since it already exists.

Action:
Remove duplicate resource actions

JPS-10414
The resource attribute {0} could not be deleted since it does not exist.

Category:
Security

Cause:
The resource attribute could not be deleted since it does not exist.

Action:
Check if the resource attribute exists.

JPS-10415
The resource action {0} could not be deleted since it does not exist.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The resource action could not be deleted since it does not exist.

Action:
Check if the resource action exists

JPS-10416
Resource {0} does not belong to the context.

Category:
Security

Cause:
The resource does not belong to current context

Action:
Pass in correct resource.

JPS-10417
Resource query across different resource type is not allowed.

Category:
Security

Cause:
Resource query across different resource type is not allowed

Action:
Pass in correct query parameter.

JPS-10418
Cannot delete a resource that has one more child resources.

Category:
Security

Cause:
Can not detele a resource that has one or more child resources

Action:
Delete all child resources and then try again.

JPS-10419
Resource hierarchy type change is not allowed.

Category:
Security

Cause:
Resource hierarchy type change is not allowed.

Action:
Check the resource hierarchy type

JPS-10420
Resource name must begin with the resource name delimiter.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Resource name must begin with the resource name delimiter

Action:
Add resource name delimiter in the begining of the resource name.

JPS-10421
The given all action key word exists in actions.

Category:
Security

Cause:
The given all action value already exists

Action:
Check the input all action value and check for duplicate values.

JPS-10422
The resource attribute {0} is used in policy(-ies) and can not be deleted.

Category:
Security

Cause:
The resource attribute is used in policy(-ies) and can not be deleted.

Action:
Before deleting the resource attribute, make sure it is not used.

JPS-10423
The action {0} is used by the {1} and can not be deleted.

Category:
Security

Cause:
The action is used by the permissionSet/permission and can not be deleted.

Action:
Check if the action is used in any PermissionSet/Permission before deleting.

JPS-10424
The resourceType {0} of hierarchy type is invalid as its parent is null.

Category:
Security

Cause:
The heirarical resourcetype's parent is null.

Action:
Make sure to provide a valid name for the heirarical resourcetype

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-10425
The resource attribute {0} contains duplicate value {1}.

Category:
Security

Cause:
The resource attribute already contains this value.

Action:
Remove duplicate resource attributes values.

JPS-10426
Cannot set all actions keyword for resource type with non-null matcher class.

Category:
Security

Cause:
All actions keyword cannot be set to resource type with matcher class

Action:
Do not set all actions keyword for a resource type with a matcher class.

JPS-10427
The resource name expression "{0}" is not a valid Java regular expression.

Category:
Security

Cause:
Regular expression provided for resource name expression is invalid.

Action:
Check that the resource name expression is a valid Java regular expression.

JPS-10428
The resource {0} of type {1} does not exist.

Category:
Security

Cause:
The resource of the resource type does not exist.

Action:
Make sure the resource of the resource type exists.

JPS-10429
The value data type of property {0} should be String and not {1}.

Category:
Security

Cause:
The value data type of property is not String.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Use a String object as value.

JPS-10430
The Resource name {0} has an invalid format

Category:
Security

Cause:
Too many delimiters in the resurce name

Action:
Limit the number of delimiters in the beginning and middle of resource name to one.

JPS-10431
Wrong isSingle property for the attribute {0}; expected {1}, but {2}.

Category:
Security

Cause:
Wrong isSingle property of resource attribute

Action:
Ensure isSingle property of the attribute in resource is the same as the definiton in resource type

JPS-10432
Wrong DataType property for the attribute {0}; expected {1}, but {2}.

Category:
Security

Cause:
Wrong DataType property of resource attribute

Action:
Ensure DataType property of the attribute on resource is the same as the definition in resource type

JPS-10451
Permission set {0} does not belong to the context.

Category:
Security

Cause:
The permission set does not belong to current context

Action:
Pass in correct permission set.

JPS-10452
Permission set {0} has ResourceActionsEntry with null ResourceEntry and null ResourceNameExpression.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Both ResourceEntry and Resource name expression of ResourceActionsEntry is null

Action:
Pass in correct ResourceActionsEntry.

JPS-10454
No resources or actions have been identified by the permission set.

Category:
Security

Cause:
No resources or actions have been identified by the permissionset.

Action:
Ensure that the permission set is created with valid resource actions.

JPS-10455
Type of the resource does not define matcher java permission class.

Category:
Security

Cause:
Resource is not protected by a Java Permission.

Action:
Ensure that the permission set is created with valid resource object.

JPS-10456
ResourceExpression and ResourceAction cannot be specified at the same time.

Category:
Security

Cause:
ResourceExpression and ResourceAction cannot be specified at the same time.

Action:
PermissionSet ResourceAction should contain either Resource expression or ResoruceEntry.

JPS-10457
Not able to perform operation due to invalid parameter. Cause: "{0}".

Category:
Security

Cause:
Not able to perform operation due to invalid parameter. Cause: {0}.

Action:
Ensure that the operation is called with valid parameters.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-10458
ResourceExpression and ResourceAction cannot be null at the same time.

Category:
Security

Cause:
ResourceExpression and ResourceAction cannot be null at the same time.

Action:
PermissionSet ResourceAction should contain either Resource expression or ResoruceEntry.

JPS-10459
The modified permission set {0} contains resources of multiple resource types. It is not permitted as there is policy(-ies) that references that permission set and uses resource attributes.

Category:
Security

Cause:
The modified permission set contained resources of multiple resource types. It was not permitted if there was a policy that referenced that permission set and used resource attributes.

Action:
Fix the permission set or modify the policy(-ies).

JPS-10460
The permission set search query {0} is not supported

Category:
Security

Cause:
The permission set search query is not supported.

Action:
Use supported query scenario.

JPS-10463
Requested actions: " {0} " are not a subset of valid actions: " {1}" for the given resource: " {2} " and type: " {3} ".

Category:
Security

Cause:
Invalid resource actions for the given resource.

Action:
Ensure that the actions in the resource-actions are a valid subset of the actions defined by the resource type.

JPS-10464
Error occurred while getting the permission set entry for permission set search query {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Error occured while getting the permission set entry for permission set search query.

Action:
See the log files for more details.

JPS-10465
Permission set {0} has ResourceActionsEntry with null expression in ResourceNameExpression.

Category:
Security

Cause:
Expression in ResourceNameExpression of ResourceActionsEntry is null

Action:
Pass in correct ResourceActionsEntry with non-null Resource name expression.

JPS-10466
Resource {0} has no Resource Actions, but Resource Type {1} has resource actions.

Category:
Security

Cause:
Empty resource actions for the given Resource, but Resource type has actions.

Action:
Ensure that the actions in the resource-actions are not null or empty since the resource type has actions.

JPS-10467
Permission set {0} has ResourceActionsEntry with null expression in ResourceNameExpression.

Category:
Security

Cause:
Expression in ResourceNameExpression of ResourceActionsEntry is null

Action:
Pass in correct ResourceActionsEntry with non-null Resource name expression.

JPS-10468
Duplicate permission " {0} " in policy store.

Category:
Security

Cause:
Duplicate permission in policy store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the policy store and ensure that there is no duplicate permission.

JPS-10469
Cannot remove all the ResourceActionsEntrys in PermissionSet.

Category:
Security

Cause:
Try to remove all the ResourceActionsEntrys in existing PermissionSet.

Action:
Check the updated resource actions, make sure PermissionSet does not have up empty resource actions.

JPS-10470
The resource type name "{0}", does not match the resourceType in the encoded target name: "{1}". Permission class is "{2}"

Category:
Security

Cause:
Invalid resource type in permission target.

Action:
Refer to the log files for details.

JPS-10471
Resource type is missing in the target name: "{0}", for permission: "{1}"

Category:
Security

Cause:
Resource type missing in permission target.

Action:
Refer to the log files for details.

JPS-10472
Target "{0}" is missing the prefix "=resourceName=". Unable to determine the resource name for permission: "{1}"

Category:
Security

Cause:
Target name missing in permission target.

Action:
Refer to the log files for details.

JPS-10473
The target name "{0}" is invalid. Should start with "{1}"

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Target name encoding is not correct.

Action:
Refer to the log files for details.

JPS-10474
The parameter: "{0}", value: "{1}" cannot be null

Category:
Security

Cause:
Permission target is null.

Action:
Refer to the log files for details.

JPS-10475
The permission actions: "{0}" are not a subset of valid actions defined in resource type: "{1}"

Category:
Security

Cause:
Permission actions do not match with valid resource type actions.

Action:
Refer to the log files for details.

JPS-10476
The resource name can not be null

Category:
Security

Cause:
Invalid resource name in permission target.

Action:
Refer to the log files for details.

JPS-10500
The target policy, {0}, does not exist.

Category:
Security

Cause:
The policy object does not exist.

Action:
Check if the target policy exists.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-10501
Policy query contains unrecognizable information.

Category:
Security

Cause:
Policy query contains unrecognizable information.

Action:
Check the policy query object.

JPS-10502
Policy rule information is missing.

Category:
Security

Cause:
Policy rule information is missing.

Action:
Check if policy rule information exists in policy repository.

JPS-10503
Obligation information is missing.

Category:
Security

Cause:
Obligation information is missing.

Action:
Check if obligation information exists in policy repository.

JPS-10504
Permission set information is missing.

Category:
Security

Cause:
Permission set information is missing.

Action:
Check if permission set information exists in policy repository.

JPS-10505
Grantee information is missing.

Category:
Security

Cause:
Grantee information is missing.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check if grantee information exists in policy repository.

JPS-10506
The policy rule, {0}, does not exist.

Category:
Security

Cause:
The policy rule does not exist.

Action:
Check the policy rule name passed in.

JPS-10507
The condition string is in wrong format, {0}.

Category:
Security

Cause:
Condition string is in wrong format.

Action:
Check condition string in policy repository.

JPS-10508
Policy condition contains an unknown function, {0}.

Category:
Security

Cause:
Policy condition contains an unknown function.

Action:
Check condition string in policy repository.

JPS-10509
Policy condition parsing error.

Category:
Security

Cause:
Policy condition parsing error.

Action:
Check condition string in policy repository.

JPS-10510
The expression, {0}, is unknown.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The policy expression is unknown.

Action:
Check condition string in policy repository.

JPS-10511
The data type, {0}, is unknown.

Category:
Security

Cause:
The data type is unknown

Action:
Check condition string in policy repository.

JPS-10512
A ResourceActionsEntry should contain either resource entry or resource name expression.

Category:
Security

Cause:
The ResourceActionsEntry object does not contain resource infomation.

Action:
Check ResourceActionsEntry passed in.

JPS-10513
The search value type {0} is not supported for {1}.

Category:
Security

Cause:
Query criteria type does not support.

Action:
Pass in a correct query value.

JPS-10514
Cannot add PermissionSet to PolicyEntry if it has ResourceType.

Category:
Security

Cause:
Resource type is already defined in PolicyEntry.

Action:
clear resource type of PolicyEntry before adding PermissionSetEntry.

JPS-10515
Cannot set ResourceType to PolicyEntry if it has PermissionSet.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Permission Set is already defined in PolicyEntry.

Action:
clear Permission Set of PolicyEntry before setting Resource Type.

JPS-10516
Cannot add Rule if there is rule already in PolicyEntry

Category:
Security

Cause:
Add rule to policy when the policy already has rule.

Action:
Delete existing rule before adding new rule to policy.

JPS-10517
Delete rule not existing in PolicyEntry

Category:
Security

Cause:
rule does not belong to the PolicyEntry.

Action:
Check the rule before deleting rule from PolicyEntry.

JPS-10518
Delete permission set not existing in PolicyEntry

Category:
Security

Cause:
permission set does not belong to the PolicyEntry.

Action:
Check the permission set before deleting permission set from PolicyEntry.

JPS-10519
Delete obligation not existing in PolicyEntry

Category:
Security

Cause:
obligation does not belong to the PolicyEntry.

Action:
Check the obligation before deleting obligation from PolicyEntry.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-10520
Delete Principal not existing in PolicyEntry

Category:
Security

Cause:
principal does not belong to the PolicyEntry.

Action:
Check the principal before deleting principal from PolicyEntry.

JPS-10521
The obligation {0} already exists.

Category:
Security

Cause:
The obligation already exists in the policy entry.

Action:
Check ObligationEntry passed in.

JPS-10522
The parameters passed in is invalid, we expect {0}, but {1} is passed in.

Category:
Security

Cause:
The parameter passed in the function is not valid.

Action:
Pass in correct parameters.

JPS-10523
The function return type is invalid, we expect OpssBoolean, but {0} is passed in.

Category:
Security

Cause:
The return type of the function is not valid.

Action:
Pass in a function with OpssBoolean return type.

JPS-10524
The query with search property {0}, comparator type {1} and matcher {2} is not supported.

Category:
Security

Cause:
Such query is not supported.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Pass in a supported query value.

JPS-10525
The attribute assignment {0} could not be added since it already exists.

Category:
Security

Cause:
The attribute assignment could not be added since it already exists.

Action:
Remove duplicate attribute assignments.

JPS-10526
The permission set {0} could not be added since it already exists.

Category:
Security

Cause:
The permission set could not be added since it already exists.

Action:
Remove duplicate permission sets.

JPS-10527
The principal {0} could not be added since it already exists.

Category:
Security

Cause:
The principal could not be added since it already exists.

Action:
Remove duplicate principals.

JPS-10528
The Policy {0} referenced multiple resource types and resource attribute is used in policy condition or obligation.

Category:
Security

Cause:
Policies that used resource attributes in their conditions or obligations could not refrence one or more permission sets that contain resources of multiple types.

Action:
Split the policy to reference only one resource type in each policy.

JPS-10529
The resource attribute {0} used in policy condition or obligation is invalid resource attribute of type {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The resource attribute used in policy condition was invalid for the referenced resource type

Action:
Fix the policy condition to use only valid attributes for the given resource type.

JPS-10530
Cannot create a policy {0} with AdminRole(s) {1}.

Category:
Security

Cause:
Cannot create a policy with AdminRoleEntry(s).

Action:
Remove the AdminRole principals from the principal list.

JPS-10531
Cannot grant permission to AdminRole(s) {0}.

Category:
Security

Cause:
Cannot grant permission to AdminRoleEntry(s).

Action:
Remove the AdminRole principals from the principal list.

JPS-10532
Cannot grant AdminRole {0} to another AdminRole {1}.

Category:
Security

Cause:
Cannot grant AdminRole to another AdminRole.

Action:
Change to grant AdminRole to either enterprise role or user.

JPS-10533
Cannot revoke AdminRole {0} from another AdminRole {1}.

Action:
Remove the AdminRole principals from the principal list.

JPS-10539
Basic policy cannot have {0} information.

Category:
Security

Cause:
Basic policy cannot have {0} information.

Action:
Remove the information from basic policy.

JPS-10540
Basic policy cannot have ResourceActionsEntry without ResourceEntry.

Category:
Security

Cause:
Basic policy cannot have ResourceActionsEntry without ResourceEntry.

Action:
Use ResourceActionsEntry with ResourceEntry for basic policy.

JPS-10541
Basic policy cannot use Resource {0} without Resource Matcher Class.

Category:
Security

Cause:
Basic policy cannot use Resource {0} without Resource Matcher Class.

Action:
Use Resource with Resource Matcher Class for basic policy.

JPS-10542
Default TransformerFactory cannot be located.

Category:
Security

Cause:
The TransformerFactory cannot be loaded

Action:
Check the environment

JPS-10543
Failed to retrieve Transformer.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The TransformerFactory cannot generate a Transformer.

Action:
Check the environment

JPS-10544
The policy "{0}" already exists.

Category:
Security

Cause:
The role policy object exists.

Action:
Create a role policy with a different name.

JPS-10545
The application role {0} could not be added since it already exists.

Category:
Security

Cause:
The application role could not be added since it already exists.

Action:
Remove duplicate application role.

JPS-10546
The resource {0}, {1} could not be added since it already exists.

Category:
Security

Cause:
The resource could not be added since it already exists.

Action:
Remove duplicate resource.

JPS-10547
The resource name expression {0}, {1} could not be added since it already exists.

Category:
Security

Cause:
The resource name expression could not be added since it already exists.

Action:
Remove duplicate resource name expression.

JPS-10548
The policy rule {0} already exists.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
The policy rule already exists.

Action:
Create policy rule with different name.

JPS-10549
The policy rule {0} is in use, could not be deleted.

Category:
Security

Cause:
The policy rule could not be deleted without cascade since it is in use.

Action:
Cascade delete it or first remove all referring objects.

JPS-10550
Attribute "{0}" already exists

Category:
Security

Cause:
Cannot have two attributes with the same name.

Action:
Provide a new name to the attribute.

JPS-10551
Attribute {0} does not exist

Category:
Security

Cause:
Attribute not found.

Action:
Check the attribute name.

JPS-10552
Attribute {0} is used.

Category:
Security

Cause:
Attribute is already used.

Action:
Remove the objects which use this attribute.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-10553
Attribute {0} does not belong to current application.

Category:
Security

Cause:
Attribute does not belong to current application policy.

Action:
Modify the attribute with extension manager from correct application policy.

JPS-10554
The name of Attribute in policy repository is missing

Category:
Security

Cause:
Attribute in policy store has no name.

Action:
Check the underline policy repository.

JPS-10555
The type of Attribute in policy repository is missing

Category:
Security

Cause:
Attribute in policy store has no type.

Action:
Check the underline policy repository.

JPS-10556
The category of Attribute in policy repository is missing

Category:
Security

Cause:
Attribute in policy store has no category.

Action:
Check the underline policy repository.

JPS-10557
Cannot overwrite a built-in attribute, {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
A jpsContext with the specified contextId does not exists in the system.

Action:
Check jps-config.xml of the domain.

JPS-12005
A ContextConfiguration with "{0}" "{1}" already exists in the system.

Category:
Data

Cause:
A ContextConfiguration with the specified name already exists.

Action:
Use another unique name.

JPS-12006
No Registered ContextConfiguration with "{0}" "{1}" exists in the system.

Category:
Data

Cause:
The specified configuration profile is not registered with configuration service.

Action:
Check the name, or try listing the registered profiles.

JPS-12007
Cannot delete ContextConfiguration "{0}" in "{1}" state.

Category:
Data

Cause:
A ContextConfiguration in ACTIVE state cannot be deleted.

Action:
DeActivate the context and then try deleting it.

JPS-12008
Cannot DeActivate ContextConfiguration "{0}" as it is in state "{1}".

Category:
Data

Cause:
A ContextConfiguration ACTIVE state (only) can be DeActivated. DeActivation from other states is illegal.

Action:
Make sure the context configuration is ACTIVE and then try deactivating it.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-12009
Cannot Activate ContextConfiguration "{0}" as it is in state "{1}".

Category:
Data

Cause:
A ContextConfiguration must be in COMPLETE or INACTIVE state for Activation to succeed.

Action:
Check to make sure the state of the Context is COMPLETE or INACTIVE.

JPS-12010
Cannot Update ContextConfiguration "{0}" as it is in state "{1}".

Category:
Data

Cause:
A ContextConfiguration must be in CREATED or INACTIVE state before it can be UPDATED.

Action:
Check to make sure the state of the Context is CREATED or INACTIVE. A configuration in COMPLETE or ACTIVE states cannot be updated

JPS-12011
OPSS Runtime Cannot fetch Configuration for context "{0}", The context does not exist or is not in ACTIVE state.

Category:
Data

Cause:
OPSS Runtime failed to fetch the Configuration for the context. Either the context does not exist or is not in ACTIVE state. The Runtime can only view ContextConfigurations in ACTIVE state

Action:
Check to make sure the Context exists and is in ACTIVE state.

JPS-12012
Cannot initialize Configuration Store : One of DataSource/JDBC-URL/FilePath for MetaDataStore should be Configured in the Configuration Service Descriptor.

Category:
Configuration

Cause:
The configuration serviceInstance descriptor does not seem to contain a property for DataSource/JDBC-URL/FilePath for connecting to the Configuration Store.

Action:
Check MultiTenancy enablement steps/scripts.

JPS-12013
File based Configuration Store should be used only for Development and not in Production.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
File based Configuration Store should be used only for Testing and not in Production.

Action:
Nothing to do if this is a Test Environment, else check Multi-Tenancy enablement steps.

JPS-12014
Map/Key name(s) for Credential required to bind to MetaDataStore with JDBC-URL not configured in the Configuration Service.

Category:
Configuration

Cause:
A Password Credential is required when JDBC-URL is used to connect to the Configuration Store.

Action:
Check to see that the Configuration serviceInstance descriptor contains properties for the Map and Key name of the credential.

JPS-12015
Property JPS_CONFIG_PATH not set for use by PersistenceManager.

Category:
Process

Cause:
Internal Error/Bug: The Configuration Management Service is expected to set a property JPS.CONFIGSERVICE.PATH for use by the PersistenceManager.

Action:
Report Bug on Oracle OPSS with relevant logs.

JPS-12016
Internal Error: Unable to locate ContextConfiguration named "{0}" in the Configuration Profile "{1}".

Category:
Process

Cause:
Internal Error/Bug: The Configuration Service is in a state where it thinks the specified contextId should exist under the specified profileId, but the persisted information in the store does not match the expectation.

Action:
Report Bug on Oracle OPSS with relevant logs.

JPS-12017
Invalid Xpath expression , specified XPath "{0}" does not evaluate to a "{1}".

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The XPath expression specified in Customization spec does not point to the intended element in the Configuration Profile document.

Action:
Check the XPath expression against the structure of the configuration Profile being referenced..

JPS-12018
Invalid Location Override in Global Scope. Location Override can be specified for ServiceInstances only.

Category:
Data

Cause:
The Location Override in Customization spec is only applicable to a serviceInstance attribute and cannot be applied to an element in Global Scope.

Action:
Check the XPath expression.

JPS-12019
Cannot apply "{0}" overrides on element of type "{1}", expected an element of type "{2}", check the Element XPath specified in the customization.

Category:
Data

Cause:
The XPath expression specified in Customization spec does not point to the intended element in the Configuration Profile document.

Action:
Check the XPath expression against the structure of the configuration Profile being referenced..

JPS-12020
Cannot modify values of existing ExtendedProperty elements during customization.

Category:
Data

Cause:
Cannot modify values of existing ExtendedProperty elements during customization.

Action:
This is an Unsupported Customization spec, change the customization instructions supplied to the Configuration Management Service.

JPS-12021
Cannot create ContextConfiguration "{0}", No such profile "{1}" exists in the system.

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Cannot create ContextConfiguration as the referenced Configuration Profile does not seem to exist.

Action:
Check the name of the specified profile.

JPS-12022
MetaDataObject "{0}" not found. Ensure ContextConfiguration "{1}" exists or first create it.

Category:
Configuration

Cause:
The PersistenceManager is unable to find the MetaDataObject corresponding to the specified contextId.

Action:
Check the name of the context or make sure it is registered with the Configuration Service.

JPS-12023
Mutable MetadataObject "{0}" cannot be obtained from MetadataStore specified since there are pending writes to other MetadataStores. Do flushChanges/cancelChanges on MDSSession to proceed.

Category:
Process

Cause:
Internal Error/Bug : The persistence manager is in a state where it is trying to perform multiple updates to the profile document concurrently.

Action:
Report a Bug on Oracle OPSS with relevant logs.

JPS-12024
A profile with name "{0}" already exists.

Category:
Data

Cause:
A configuration profile with the given name already exists.

Action:
Try using a unique profileId.

JPS-12025
Cannot Delete Profile "{0}" ,Named ContextConfigurations exist under the profile.

Category:
Data

Cause:
A configuration profile which has named ContextConfiguration's referencing it cannot be deleted.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Try deleting the ContextConfiguration's before attempting to delete the profile.

JPS-12026
No such ContextConfiguration "{0}" exists in the system.

Category:
Data

Cause:
The specified ContextConfiguration is not registered with the Configuration Service.

Action:
Check the name or try listing the registered ContextConfigurations.

JPS-12027
Required PasswordCredential at Map = "{0}",Key = "{1}" was not found in Specified Bootstrap CredentialStore.

Category:
Configuration

Cause:
A required PasswordCredential does not exist at the specified map, and key in the supplied bootstrap credential store.

Action:
Check the bootstrap credential store.

JPS-12028
Malformed jps-config.xml : stale service instance reference "{0}" from JpsContext.

Category:
Configuration

Cause:
The PersistenceManager found a STALE <serviceInstanceRef> that does not exist in the jps-config.xml.

Action:
Check the jps-config.xml of the Profile or the Out-of-the-Box jps-config.xml as appropriate.

JPS-12029
Cannot set Name for ContextConfiguration "{0}" in state "{1}", deactivate it first.

Category:
Data

Cause:
Cannot set contextName for a ContextConfiguration in ACTIVE.

Action:
DeActivate it first and then set a Name for it.

JPS-12030
Cannot setContextName, ConfigurationContext "{0}" is already Named "{1}", unset the Name first.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
A ContextConfiguration that is already has a Name cannot be Named again.

Action:
Unset the current Name first and then set a new Name for it.

JPS-12031
Cannot unset Name for ContextConfiguration "{0}" in state "{1}", deactivate it first.

Category:
Data

Cause:
Cannot unset the contextName for a ContextConfiguration in ACTIVE state.

Action:
DeActivate the Context first and then unset the contextName.

JPS-12032
Error in initializing JAXBContext.

Category:
Configuration

Cause:
Internal Error: JAXB context initialization in PersistenceManager Failed.

Action:
Report a Bug on Oracle OPSS with relevant logs.

JPS-12033
Invalid profile jps-config.xml document, does not contain a required element "{0}".

Category:
Configuration

Cause:
Internal Error: the profile document does not contain a mandatory element.

Action:
Check the jps-config.xml that was used as a Configuration Profile.

JPS-12034
MDSPersistenceManager Cannot handle Persistence of Element "{0}".

Category:
Configuration

Cause:
Unsupported operation : The persistence manager configured with the Configuration Service does not handle persistence of the specified element.

Action:
Report a Bug on Oracle OPSS with relevant logs.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-12035
Cannot setContextName for ConfigurationContext "{0}" to Name "{1}", as the Name is already assigned to "{2}".

Category:
Data

Cause:
Names used for ContextConfiguration must be unique, an attempt is being made to set the same Name for more than one ContextConfiguration.

Action:
Use a different unique Name.

JPS-12036
ContextConfiguration "{0}" does not have any name set for it, Naming a ContextConfiguration is mandatory before its configuration STATE can be set to COMPLETE.

Category:
Data

Cause:
An attempt is being made to set the STATE of an Un-Named ContextConfiguraton to COMPLETE.

Action:
Use the setContextName(contextId) method to set a Name.

JPS-12037
Service configuration update done for Configurator.

Category:
Data

Cause:
Service configuration update done for Configurator.

Action:
No action required.

JPS-12038
Failed to check if audit is enabled.

Category:
Configuration

Cause:
Configuration management events logging was not enabled.

Action:
Check the audit configuration to ensure auditing enabled.

JPS-12039
Failed to log audit record.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Configuration management audit event logging failed.

Action:
Contact the administrator.

JPS-12040
Missing Property set props.db.1.

Category:
Configuration

Cause:
No Prorperty Set props.db.1 in jps-config.xml

Action:
Check the jps-config.xml.

JPS-12100
The expiry time should be in format {0}

Category:
Configuration

Cause:
Invalid input

Action:
Correct the input.

JPS-12101
The filter value is {0} invalid

Category:
Configuration

Cause:
Invalid input

Action:
Correct the input.

JPS-12102
One of the attributes {0} is undefined

Category:
Configuration

Cause:
Invalid input

Action:
Correct the input.

JPS-12103
Parameter {0} is missing

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Missing Parameter

Action:
Correct the input.

JPS-12104
Alias {0} did not exist or point to a key

Category:
Configuration

Cause:
Alias did not exist or point to a key

Action:
Correct the input Alias.

JPS-12105
Tenant with id {0} does not exist.

Category:
Configuration

Cause:
Tenant does not exist

Action:
Correct the tenant id.

JPS-12106
The param {0} is invalid - null or empty.

Category:
Configuration

Cause:
Tenant config parameter passed to the API is invalid

Action:
Make sure all parameters are valid

JPS-12107
The param {0} was supplied a restricted value {1}.

Category:
Configuration

Cause:
Tenant config parameter value passed to the API is restricted

Action:
Make sure no restricted values are used

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-12109
It is invalid that both of "{0}" and "{1}" are null or empty.

Category:
Configuration

Cause:
Invalid input

Action:
Correct the input, make sure at least one of them is not null or empty

JPS-12110
It is invalid that both of "{0}" and "{1}" have value.

Category:
Configuration

Cause:
Invalid input

Action:
Correct the input, make sure only one of them is not null or empty

JPS-12111
It is invalid that "{0}" is less than "{1}".

Category:
Configuration

Cause:
Invalid input

Action:
Correct the input, make sure the data is reasonable

JPS-12112
It is invalid that "{0}" is less than or equal to "{1}".

Category:
Configuration

Cause:
Invalid input

Action:
Correct the input, make sure the data is reasonable

JPS-12113
Property "{0}" cannot be updated/modified.

Category:
Configuration

Cause:
Unmodifiable property

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the input, make sure the data is reasonable

JPS-12114
Cannot specifify resource name delimiter for non-hierachical resource type

Category:
Configuration

Cause:
Invalid input

Action:
Correct the input, make sure the data is reasonable

JPS-12115
"{0}" is an invalid resource name delimiter character. Valid characters are [/ \ $ # : ; , ! . - _ @ |]

Category:
Configuration

Cause:
Invalid input

Action:
Correct the input, make sure the data is reasonable

JPS-12116
For the attribute "{0}", "{1}" is not a valid value.

Category:
Configuration

Cause:
Invalid input

Action:
Correct the input, make sure the data is reasonable

JPS-12117
Cannot set multiple values to a single value attribute "{0}".

Category:
Configuration

Cause:
Set multi values to a single value attribute

Action:
Correct the input, make sure the data is reasonable

JPS-20000
GlobalPolicy can not be created by MAPI methods

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
GlobalPolicy can not be created by MAPI methods.

Action:
Set up policy store using reassociation or upgrading

JPS-20001
GlobalPolicy can not be deleted by MAPI methods.

Category:
Programmatic

Cause:
GlobalPolicy can not be deleted by MAPI methods.

Action:
GlobalPolicy is a built-in stripe, can not be deleted

JPS-20002
GlobalPolicy can not be returned from the method.

Category:
Programmatic

Cause:
GlobalPolicy can not be returned from the method.

Action:
Gets GlobalPolicy from the method getGlobalPolicy

JPS-20003
Cannot add global role to application role

Category:
Security

Cause:
Attempted to add a global role {0} to members of an application role or grant a global role {0} to an applicaton role

Action:
Do not add a global role to members of an application role and do not grant a global role to an application role.

JPS-20004
Principals can not contain global role.

Category:
Security

Cause:
Principals contain global role {0}

Action:
Remove global role from principals.

JPS-20005
Cannot delete global role "{0}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Global role "{0}" is referenced in a Policy defined in an Application.

Action:
Make sure the global role is not referenced in any application policy,then remove it.

JPS-20006
Authorization policy is not supported in global policy.

Category:
Security

Cause:
Authorization policy is not supported in global policy.

Action:
Do not create authorization policies in global policy.

JPS-20007
Permission grant is not supported in global policy

Category:
Security

Cause:
Permission grant is not supported in global policy.

Action:
Do not grant permissions in global policy

JPS-20008
{0} : {1} in global policy which are referenced in application have been changed but not distributed

Category:
Security

Cause:
{0} : {1} in global policy which are referenced in application have been changed but not distributed.

Action:
Distribute global policy firstly

JPS-20010
Attribute name {0} already exist in {1}.

Category:
Programmatic

Cause:
Attribute name {0} already exist in {1}

Action:
Choose another name

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-20011
Function name {0} already exist in {1}.

Category:
Programmatic

Cause:
Function name {0} already exist in {1}

Action:
Choose another name

JPS-20012
Global attribute {0} is used in application {1}.

Category:
Programmatic

Cause:
Global attribute {0} is used in application policy {1}

Action:
Make sure the global attribute is not used in any applications including global policy

JPS-20013
Global function {0} is used in application {1}.

Category:
Programmatic

Cause:
Global function {0} is used in application policy {1}

Action:
Make sure the global function is not used in any applications including global policy

JPS-20014
Policy domain is not supported in global policy

Category:
Security

Cause:
Policy domain is not supported in global policy.

Action:
Do not use policy domain in global policy

JPS-20020
Resource type name {0} already exists in application {1}.

Category:
Programmatic

Cause:
Resource type name {0} already exists in application {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Choose another name

JPS-20021
Global resource type {0} is used in application {1}.

Category:
Programmatic

Cause:
Resource type {0} is used in application {1}

Action:
Make sure global resource type is not used in any application

JPS-20022
Global policy can not be unbound from SM

Category:
Programmatic

Cause:
Global policy can not be unbound from SM

Action:
Do not unbind global policy from SM

JPS-20050
Combining algorithm {0} not found.

Category:
Programmatic

Cause:
Combining algorithm not found.

Action:
Make sure the used combining algorithm exists.

JPS-20051
Exception in converting execution frequency {0}, message is {1}

Category:
Programmatic

Cause:
Exception in converting value of algorithm execution frequency.

Action:
Make sure the execution frequency is valid.

JPS-20052
Exception in converting algorithm usage {0}, message is {1}

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Exception in converting value of algorithm usage.

Action:
Make sure the usage is valid.

JPS-20053
A combining algorithm must be provided if policy is using more than one rule.

Category:
Programmatic

Cause:
Policy uses multiple rules, but no combining algorithm provided.

Action:
Provide a combining algorithm.

JPS-20054
A acl match type must be provided if policy is a RAS one.

Category:
Programmatic

Cause:
RAS policy has no acl match type to be provided.

Action:
Provide a ACL Match Type.

JPS-20055
A list of RAS policy rule must be provided if policy is a RAS one.

Category:
Programmatic

Cause:
RAS policy has no policy rule to be provided.

Action:
Provide policy rule(s).

JPS-20056
A list of RAS resource must be provided if policy is a RAS one.

Category:
Programmatic

Cause:
RAS policy has no resource to be provided.

Action:
Provide resource(s).

JPS-20060
Number of input parameters to the function and provided value types for them are not of same size.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
Number of input parameters to the function and provided value types for them are not of same size.

Action:
Parameter value types, if provided, must be provided for all input parameters

JPS-20061
Value collection added to expression is null.

Category:
Programmatic

Cause:
Value collection added to expression is null.

Action:
Provide a non-nulll collection of values to expression.

JPS-20062
Value collection passed to input parameter when a single object is expected.

Category:
Programmatic

Cause:
Value collection passed to input parameter when a single object is expected.

Action:
Provide a single object as input parameter.

JPS-20063
Wrong type of collection passed as input parameter; expected type is {0}, provided {1}.

Category:
Programmatic

Cause:
Wrong type of collection passed as input parameter; expected type is {0}, provided {1}.

Action:
Provide correct type of collection as function input parameter.

JPS-20064
Function {0} is unknown.

Category:
Programmatic

Cause:
Function {0} is unknown.

Action:
Provide correct function.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-20070
In mixed mode, PDP configuration id could not be null

Category:
Programmatic

Cause:
PDP configuration id is missing.

Action:
Specify the PDP configuration id

JPS-20100
Rules {0} for policy {1} is in use by other policies. It will not be deleted.

Category:
Security

Cause:
Rule {0} of policy {1} is shared by other policies.

Action:
Provide correct Rule.

JPS-20101
Policy {0} is referred by one or more policy sets. It can not be deleted if cascading is set to false.

Category:
Security

Cause:
Policy {0} is referred by other policie sets.

Action:
Either use cascading delete or remove references from policy sets.

JPS-20102
Rule {0} used in policy is not sharable. The policy will not be created or updated.

Category:
Security

Cause:
Rule {0} used in policy is not sharable.

Action:
Provide correct Rule.

JPS-20103
Policy can not have both private rules and sharable rules.

Category:
Security

Cause:
Policy can not have both private rules and sharable rules.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Provide correct Rule.

JPS-20104
Exclusive rule {0} can not be deleted explicitly.

Category:
Security

Cause:
Exclusive rule {0} can not be deleted explicitly.

Action:
Delete the referred policy.

JPS-20105
The permission {0} has no target name.

Category:
Programmatic

Cause:
Permission has no target name.

Action:
Make sure the usage is valid.If not revoke the permission.

JPS-20200
Adding attributes to data security resource type {0} is not allowed.

Category:
Security

Cause:
Attributes present in Data Security Resource Type.

Action:
Remove Attributes present in Data Security Resource Type.

JPS-20201
Adding matcher class to data security resource type {0} is not allowed.

Category:
Security

Cause:
Matcher Class present in Data Security Resource Type.

Action:
Remove Matcher Class present in Data Security Resource Type.

JPS-20202
Hierarchical data security resource type {0} is not allowed.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Data Security Resource Type is Hierarchial.

Action:
Change Data Security Resource Type to Flat. It cannot be Hierarchial.

JPS-20203
Adding both actions and action collection references to data security resource type {0} is not allowed.

Category:
Security

Cause:
Both Actions and Action Collection References are added to Data Security Resource Type.

Action:
Add either Actions or Action Collection References to Data Security Resource Type.

JPS-20204
Adding null data security information object to data security resource type {0} is not allowed.

Category:
Security

Cause:
Null data security information object found for data security resource type.

Action:
Add data security information object to data security resource type.

JPS-20205
Data source name is required for a data security resource type {0}.

Category:
Security

Cause:
Data security information object found for data security resource type has no data source name.

Action:
Provide valid data source name for data security information object for data security resource type.

JPS-20206
Invalid value for data source type of data security resource type {0}.

Category:
Security

Cause:
Data security information object found for data security resource type has invalid data source type.

Action:
Data Security information object found for data security resource type has invalid data source type

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-20207
Constraint required for data security resource type {0} as data source type is virtual.

Category:
Security

Cause:
Virtual data source type requires data source constraint to be present.

Action:
Provide valid data source constraint for virtual data source.

JPS-20208
Actions List cannot contain actions that are inherited by default for resource type {0}.

Category:
Security

Cause:
Actions list in resource type contains default inherited data security actions.

Action:
Remove default data security actions from data security resource type.

JPS-20209
Duplicate column definition (same column names) not allowed in data source of resource type {0}.

Category:
Security

Cause:
Duplicate column definition (same names) in secured data source in resource type.

Action:
Remove duplicate column definition from secured data source.

JPS-20210
Action collection reference name {1} referred in resource type {0} not found in policy store.

Category:
Security

Cause:
Action collection reference in resource type not found in the policy store.

Action:
Either create action collection in store or remove the reference from resource type.

JPS-20220
Data Security Resource Type should be present for Data Security Resource {0}.

Category:
Security

Cause:
No RAS resource type present for RAS resource OR is not of type RAS resource type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Add RAS resource type for RAS resource.

JPS-20221
For data security resource {0} SQL predicate or XML expression is required.

Category:
Security

Cause:
Both SQL predicate and XML expression missing in data security resource.

Action:
Add either SQL Predicate or XML expression to data security resource.

JPS-20240
Multiple rules not allowed for triton policy {0}.

Category:
Security

Cause:
Multiple rules in triton data security policy.

Action:
Add only one rule to triton data security policy.

JPS-20241
Data security policy {0} has invalid type {1} and category {2}.

Category:
Security

Cause:
Invalid policy category and type combination.

Action:
Provide valid policy category and type combination.

JPS-20242
RAS policy only takes resources with same resource type.

Category:
Security

Cause:
RAS Policy have resources with different resource types.

Action:
Provide resources just with same resource type for RAS policy.

JPS-20243
For RASParameterValue, only EXACT matcher is supported.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Search RAS Policy by RASParameterValue ONLY support MATCHER.EXACT.

Action:
Use MATCHER.EXACT for search by RASParameterValue.

JPS-20244
For RASParameterValue, only EQUALITY comparator is supported.

Category:
Security

Cause:
Search RAS Policy by RASParameterValue ONLY support COMPARATOR.EQUALITY.

Action:
Use COMPARATOR.EQUALITY for search by RASParameterValue.

JPS-20260
RAS Resource type name referred in RAS policy set {0} is Null.

Category:
Security

Cause:
RAS resource type reference in RAS policy set is Null.

Action:
Either create given resource type in store beforehand or use an existing one.

JPS-20261
Data security policy set {0} has invalid type {1} and category {2}.

Category:
Security

Cause:
Invalid policy set category and type combination.

Action:
Provide valid policy set category and type combination.

JPS-20262
Policy set {0} is an ACL protecting an Attribute Collection and cannot be deleted.

Category:
Security

Cause:
Attempt to delete ACL that is protecting an Attribute Collection.

Action:
Check that the ACL is not protecting any Attribute Collection.

JPS-20263
RAS Policy set only takes policies whose ras resources are of same ras resource type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
RAS policy set only takes policies whose ras resources are of same ras resource type.

Action:
Use ras policies with same ras resource type for ras policy set.

JPS-20264
The length of RAS {0} name plus the length of RAS application name can not exceed 29.

Category:
Security

Cause:
The length of RAS artifact name plus the length of ras application name exceeds 29.

Action:
Shorten the RAS artifact name

JPS-20265
The name of RAS {0} is allowed to consist of only alphanumeric characters and the special characters $, _, and #, and MUST begin with a letter.

Category:
Security

Cause:
The RAS artifact name is allowed to consist of only alphanumeric characters and the special characters $, _, and #, and MUST begin with a letter.

Action:
Change the RAS artifact name

JPS-20300
The action or implied action "{0}" already exists in action collection "{1}" or its parent(s).

Category:
Security

Cause:
Duplicate action or implied action found in action collection or one of its parents.

Action:
Verify the action and implied action lists of this action collection and its parents.

JPS-20301
The action collection "{0}" is already referenced in action collection "{1}" or its parent(s).

Category:
Security

Cause:
Duplicate action collection reference found in action collection or one of its parents.

Action:
Verify the action collection reference lists of this action collection and its parents.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-20302
The action collection "{0}" already exists in application policy "{1}".

Category:
Security

Cause:
Action collection already exists in the application.

Action:
Verify the action collection in the application or try modify operation.

JPS-20303
The action collection "{0}" was not found in application policy "{1}".

Category:
Security

Cause:
Action collection not found in application.

Action:
Verify the action collection is present in the application.

JPS-20304
The action collection "{0}" is in use by another policy object.

Category:
Security

Cause:
Action collection is in use by another policy object.

Action:
Verify the usages of the action collection.

JPS-20305
Create, modify & delete operations are not permitted on built-in action collection "{0}".

Category:
Security

Cause:
The action collection being deleted, created or modified is built-in in the database.

Action:
Use a different name for the action collection.

JPS-20306
Action {0} referred in implied action {1} is not defined in action collection {2} or any of its parents.

Category:
Security

Cause:
The mapping specified for given implied action is not found in action collection or its parents.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the implied actions mappings.

JPS-20307
The action or implied action "{0}" already exists in implied action "{1}".

Category:
Security

Cause:
The mapping specified for given implied action contains duplicate actions.

Action:
Check the implied actions mappings.

JPS-20308
The implied action "{0}" refers to itself.

Category:
Security

Cause:
The mapping specified for given implied action contains reference to itself.

Action:
Check the implied actions mappings.

JPS-20320
"{0}" is not a RAS target database.

Category:
Security

Cause:
The SM is not a RAS target database.

Action:
make sure the name corresponds to a RAS target database

JPS-20321
"{0}" is not a RAS application.

Category:
Security

Cause:
The application is not a RAS application.

Action:
make sure the name corresponds to a RAS application

JPS-20322
"{0}" is not found or it is not a RAS target database.

Category:
Security

Cause:
RAS target database not found

Action:
make sure the name corresponds to a RAS target database

JPS-20350
All of handlerSchemaName, handlerPackageName and handlerFunctionName must be present or must be null in an attribute collection.

Category:
Security

Cause:
Atleast one of schema name, package name or function name of handler function is null.

Action:
Verify the schema name, package name and function name of handler function.

JPS-20351
The attribute "{0}" already exists in attribute collection "{1}".

Category:
Security

Cause:
Duplicate attribute found in attribute collection.

Action:
Verify the attribute list of this attribute collection and its parents.

JPS-20352
Attributes in attribute collection must be of category DYNAMIC.

Category:
Security

Cause:
Category of added attribute was wrong.

Action:
Verify the added attribute is of category DYNAMIC.

JPS-20353
The attribute collection "{0}" already exists in application policy "{1}".

Category:
Security

Cause:
Attribute collection already exists in the application.

Action:
Verify the attribute collection in the application or try modify operation.

JPS-20354
The attribute collection "{0}" was not found in application policy "{1}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Attribute collection not found in application.

Action:
Verify the attribute collection is present in the application.

JPS-20355
Attributes in attribute collection must be single-valued.

Category:
Security

Cause:
Multi-valued attributes not supported.

Action:
Verify the added attribute(s) are all single-valued.

JPS-20356
The ACE(Policy Rule) "{0}" is not present in the application.

Category:
Security

Cause:
ACE(policy rule) protecting Attribute collection not found in application.

Action:
Verify the ACE(Policy Rule) is present in the application.

JPS-20357
The attributes in an attribute collection "{0}" is null or empty.

Category:
Security

Cause:
RASAttribute list is null or empty

Action:
Make sure RASAttribute list is not null or empty.

JPS-20400
The definition for attribute "{0}" exists in the application policy with wrong category. Expected: {1}, Found: {2}

Category:
Security

Cause:
Attribute definition exists in application with different category than expected.

Action:
Verify the attribute definition in the application.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-20401
The definition for attribute "{0}" exists in the application policy with wrong type. Expected: {1}, Found: {2}

Category:
Security

Cause:
Attribute definition exists in application with different type than expected.

Action:
Verify the attribute definition in the application.

JPS-20403
Attribute designator functionality is not supported for this schema version.

Category:
Security

Cause:
Attribute designator functionality is not supported for this schema version.

Action:
Don't use designator functionality or upgrade to newer version.

JPS-20411
Invalid match function. Match function for a constraint must take two input parameters, provided function requires {0} input parameters.

Category:
Security

Cause:
Match function for constraint does not take 2 input parameters.

Action:
Provide a corret match function for constraint.

JPS-20412
Invalid match function. Both input parameters to a match function must be of same data type; provided function takes input parameters of type {0} and {1}.

Category:
Security

Cause:
Match function for constraint musts take two input parameters of same data type.

Action:
Provide a correct match function for constraint.

JPS-20413
Invalid match function. First parameter for a match function must be a single value.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Match function for a constraint cannot take bag or set of values.

Action:
Provide a correct match function for constraint.

JPS-20414
Mismatch of attribute category in constraint. Expected {0}, actual {1}.

Category:
Security

Cause:
Category of attribute provided to the constraint must either be dynamic or match the constraint type.

Action:
Provide attribute with correct category type to the constraint.

JPS-20415
The data type {0} of attribute "{1}" does not match data type {2} of function second parameter passed to AttributeValueAssertion.

Category:
Security

Cause:
Attribute data type and expected function parameter data type are different.

Action:
Verify the data type of attribute entry passed to AttributeValueAssertion.

JPS-20416
Data type of value and expected input parameter type of function provided for attribute value assertion does not match. Expected type {0}, provided {1}

Category:
Security

Cause:
Data type of value and expected input parameter type of function provided for attribute value assertion does not match.

Action:
Provide value with correct data type to the constraint.

JPS-20417
Constraints are only supported for TargetEntry and SimpleTargetEntry

Category:
Security

Cause:
Constraints are supported only for TargetEntry and SimpleTargetEntry.

Action:
If a constraint must be used, add it using a TargetEntry or SimpleTargetEntry.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-20420
Function Element is not supported as return type of a function.

Category:
Security

Cause:
Function Element is not supported as return type of a function.

Action:
Provide some other return type.

JPS-20421
Data type for a Function Element input parameter must be OpssString.

Category:
Security

Cause:
Data type for a Function Element input parameter must be OpssString.

Action:
Provide correct data type.

JPS-20422
Function Element not supported for this version of policystore.

Category:
Security

Cause:
Function element not supported for this schema version.

Action:
Don't use function element or upgrade.

JPS-20423
AttributeAssignment can not be defined using a Function Element.

Category:
Security

Cause:
Attribute assignment cannot be defined using a function element.

Action:
Don't use function element.

JPS-20500
Quoted name for {0}, must be terminated by double-quote (").

Category:
Security

Cause:
Quoted id for triton entity needs to be terminated with double-quote(").

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify the id provided.

JPS-20501
Length of {0} name must be between 1 and 30 characters (excluding the quotes ("), in case of quoted identifier), but was {1}

Category:
Security

Cause:
Id for triton entity has invalid length.

Action:
Verify the id provided.

JPS-20502
Quoted name for {0} contains invalid character "{1}" at position {2}. Quoted names must not contain null character(\0) or double-quote(") within the name

Category:
Security

Cause:
Quoted id for triton entity has invalid character.

Action:
Verify the id provided.

JPS-20503
Unquoted name for {0} contains invalid character "{1}" at position {2}. Unquoted names must begin with an alphabet. They may contain a letter, digit, underscore(_), dollar($), hash(#), or dot(.) symbols at other positions.

Category:
Security

Cause:
Unquoted id for triton entity has invalid character.

Action:
Verify the id provided.

JPS-20504
The name "{0}" is an implicit object name in the database and cannot be used as a name for {1}.

Category:
Security

Cause:
Id provided for triton entity is an implicit object name in the database.

Action:
Verify the id provided.

JPS-20505
The value "{0}" is of an unsupported type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Security

Cause:
Parameter value is using an invalid type.

Action:
Verify the parameter value provided.

JPS-20521
A simple target must have at least one resource action entry or permission set reference.

Category:
Security

Cause:
A simple target must have at least one resource action entry or permission set reference.

Action:
Provide resource actions or permission sets.

JPS-20600
MetaData-Provisioned is true, but no meta data found in policy object {0}.

Category:
Programmatic

Cause:
MetaData-Provisioned is true, but no meta data found in policy object {0}.

Action:
Check the policy store, make sure it is in an consistent state.

JPS-20601
Provided version "{0}" is invalid. Only alphabetic characters, digits, underscores, and dots are allowed.

Category:
Programmatic

Cause:
Provided version {0} is invalid. Only alphabetic characters, digits, underscores, and dots are allowed.

Action:
Provide a valid version.

JPS-20602
Provided meta data {0} is invalid. Reason: {1}

Category:
Programmatic

Cause:
Provided meta data {0} is invalid. Reason: {1}.

Action:
Provide a valid meta data.

Copyright © 2000, 2026, Oracle and/or its affiliates.

JPS-90600
Security Module with the configuration id {0} already exists.

Category:
Security

Cause:
Security Module with the configuration id {0} already exists.

Action:
Provide a unique configuration id.

JPS-90601
Failed to create Security Module with the configuration id {0}, with error {1}

Category:
Security

Cause:
Failed to create Security Module with the configuration id {0}, with error {1}

Action:
Check error message for further details.

JPS-90602
Security Module with the configuration id {0} not found.

Category:
Security

Cause:
Security Module with the configuration id {0} not found.

Action:
Make sure the configuration id is valid.

JPS-90603
AuditService is improperly configured.

Category:
Security

Cause:
Audit Service is not initializable.

Action:
Configure an audit server for audit trails

JPS-90604
Security Module with the configuration id {0} successfully created.

Category:
Security

Cause:
Security Module with the configuration id {0} successfully created.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Audit message, no action required

JPS-90605
Security Module with the configuration id {0} successfully modified.

Category:
Security

Cause:
Security Module with the configuration id {0} successfully modified.

Action:
Audit message, no action required

JPS-90606
Security Module with the configuration id {0} successfully deleted.

Category:
Security

Cause:
Security Module with the configuration id {0} successfully deleted.

Action:
Audit message, no action required

JPS-90607
Security Module with the configuration id {0} successfully retrieved.

Category:
Security

Cause:
Security Module with the configuration id {0} successfully retrieved.

Action:
Audit message, no action required

JPS-90608
Failed to modify Security Module with the configuration id {0}, with error {1}

Category:
Security

Cause:
Failed to modify PIP with the configuration id {0}, with error {1}

Action:
Check error message for further details.

JPS-90620
PIP with the configuration id {0} already exists.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
PIP with the configuration id/name {0} already exists.

Action:
Provide a unique configuration id/name.

JPS-90621
Failed to create PIP with the configuration id {0}, with error {1}

Category:
Security

Cause:
Failed to create PIP with the configuration id {0}, with error {1}

Action:
Check error message for further details.

JPS-90622
PIP with the configuration id {0} not found.

Category:
Security

Cause:
PIP with the configuration id/name {0} not found.

Action:
Make sure the configuration id/name is valid.

JPS-90623
PIP with the configuration id {0} successfully created.

MDS-00001 to MDS-92010

MDS-00001
exception in Metadata Services layer

Category:
Programmatic

Cause:
An exception occurred in the Metadata Services layer.

Action:
Details are usually given in the cause exception. Look for messages describing the cause exception and take the appropriate action.

MDS-00002
unexpected internal error

Category:
Programmatic

Cause:
An unexpected internal error occurred.

Action:
Contact Oracle Support Services.

MDS-00003
error connecting to the database

Category:
Configuration

Cause:
A database connection to the metadata repository could not be established.

Action:
Contact the database administrator or system administrator to get the problem resolved.

MDS-00005
unable to find XML element or text "{0}"

Category:
Programmatic

Cause:
The XML element with the given local name or the text node containing the given data could not be located by traversing through the document while applying customizations to a metadata object. The internal in-memory MDocument structure may be corrupted.

Action:
Retry the operation. Contact Oracle Support Services if the problem persists.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-00008
Attribute "{0}" is not allowed for element {1} namespace {2} in metadata object {3}.

Category:
Programmatic

Cause:
An attempt was made to add an attribute to an element that does not conform to the element"s schema definition.

Action:
If the Bean API is being used, then determine if the beans need to be regenerated. Otherwise, inspect the element definition for valid attributes.

MDS-00010
DuplicateRefException. In document {0} there are multiple elements with the same ID {1}.

Category:
Programmatic

Cause:
Either an element was being added with an ID that already existed within the document, or a pre-existing document had multiple elements with the same ID.

Action:
Change the ID of the elements so that there is no ID duplication.

MDS-00011
unable to create configuration object or MDSInstance due to invalid configuration information: {0}

Category:
Configuration

Cause:
The MDS configuration was invalid.

Action:
Refer to the MDS specification and correct the configuration.

MDS-00012
invalid value "{0}" for attribute {1} (type = "{2}") in metadata object {3}

Category:
Data

Cause:
The value provided for the named attribute was invalid. For example, this error could occur if a named JNDI connection name is incorrect.

Action:
Provide a valid attribute value.

MDS-00013
no metadata found for metadata object "{0}"

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
MDS was unable to locate the given metadata object.

Action:
Confirm the name and location of the metadata object, its existence in the configured metadata stores, and that it is in an accessible namespace.

MDS-00015
Translation ignored in document "{0}": element with localRef "{1}" not found

Category:
Data

Cause:
A translation could not be applied because the underlying element to be translated was not found.

Action:
If the element is expected, check the base document and any customizations to locate it.

MDS-00016
Ignoring customization for instruction type "{0}" in metadata object "{1}" for customization layer "{2}"/"{3}": not finding element with local reference "{4}"

Category:
Data

Cause:
A customization was not applied because the underlying element to be customized was not found.

Action:
If the element is expected, examine the base document and any customizations to locate the element.

MDS-00017
Customization instruction generated for "{0}" uses local reference(s) : "{1}" which is not upgrade safe.

Category:
Data

Cause:
The customization instruction contained a local reference that was not deemed safe for an upgrade operation.

Action:
Ensure that the local reference used in the customization instruction would be safe during an upgrade operation.

MDS-00018
Fixed customization for instruction type "{0}" in metadata object "{1}" for customization layer "{2}"/"{3}": not able to find the referenced element with local reference "{4}", inserted the customized element at the best possible location.

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A customization was fixed because the referenced element was not found.

Action:
Correct the customized element's position if needed.

MDS-00019
Customization document contains an invalid instruction "{0}".

Category:
Data

Cause:
A customization document that was being applied contained an unrecognized instruction.

Action:
Retry the operation. If necessary, either remove the customization document, or edit it to correct or remove the offending instruction.

MDS-00020
Layer value "{0}" contains an invalid character.

Category:
Data

Cause:
Using a layer value that has an invalid character.

Action:
Layer value should conform to MDS naming standards.

MDS-00029
Invalid namespace: The namespace "{0}" has not been registered with the MetadataManager.

Category:
Configuration

Cause:
An attempt was made to access a document in an unknown location or namespace.

Action:
Ensure that the namespace reported is registered in the MDS configuration.

MDS-00032
cannot parse the input file: {0}

Category:
Data

Cause:
An exception occurred while parsing the file.

Action:
Record the accompanying error and contact the developers of the application.

MDS-00033
cannot load the input file: {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Files

Cause:
An exception occurred while loading the file.

Action:
Record the accompanying error and contact the developers of the application.

MDS-00034
cannot write to the output file: {0}

Category:
Files

Cause:
An attempt to write to the output file failed.

Action:
Record the accompanying error and contact the developers of the application.

MDS-00035
cannot load the class: {0}.

Category:
Configuration

Cause:
The class file could not be loaded.

Action:
Ensure the class is available on the classpath so that it can be loaded by the application.

MDS-00036
cannot instantiate the class: {0}

Category:
Configuration

Cause:
An exception occurred while instantiating a class.

Action:
Record the accompanying error and contact the developers of the application.

MDS-00037
cannot access the class: {0}

Category:
Configuration

Cause:
An attempt was made to access an inaccessible class file.

Action:
Record any accompanying errors and contact the developers of the application.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-00039
error while attempting to parse the document {0} using SAX.

Category:
Data

Cause:
A SAX parsing exception occurred while trying to parse a document.

Action:
Record the accompanying error and contact the developers of the application.

MDS-00040
There are no namespaces registered.

Category:
Configuration

Cause:
The operation attempted requires at least one registered namespace.

Action:
Correct the MDS configuration to include the required namespace schemas.

MDS-00041
invalid classpath entry "{0}"

Category:
Configuration

Cause:
An entry on the application's classpath did not exist or was invalid.

Action:
Correct the application's classpath to remove the invalid entry.

MDS-00042
Classpath "{0}" does not contain any valid directories or jar files.

Category:
Configuration

Cause:
The application's classpath contained no valid entries.

Action:
Correct the application's classpath.

MDS-00043
A name pattern mapping for path {0} already exists.

Category:
Configuration

Cause:
The MDS configuration had duplicate namespace mappings.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
The MDS configuration must be corrected to remove the duplicate namespace mappings.

MDS-00044
Metadata for MetadataObject with name {0} already exists in the configured store.

Category:
Configuration

Cause:
An attempt was made to create a new Metadata Object. However an object with the same MDSReference already existed.

Action:
The name or location of one of the objects must be changed.

MDS-00047
Use the flushChanges method on the MDSSession to commit the changes.

Category:
Programmatic

Cause:
Commit was disabled in the PTransaction that was being used.

Action:
Use the flushChanges method on the MDSSession to commit the changes.

MDS-00054
The file to be loaded {0} does not exist.

Category:
Configuration

Cause:
An attempt was made to load a persistent document using a URL but the underlying document was not found in the store.

Action:
Check that the document name is correct and that the store is correctly configured.

MDS-00058
Invalid Metadata Path: Metadata Path cannot be null.

Category:
Configuration

Cause:
The path used to create a FileMetadataStore was empty. It must point to a directory.

Action:
Correct the metadata store definition in the application configuration to specify a metadata path.

MDS-00068
Element with local name = {0}, namespace = {1} is not expected under Parent Element = {2} in document location = {3}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
While parsing a document, a request was made to locate a type definition whose usage is either not defined or is not expected for the parent element within the schema definition.

Action:
Check the xml source and any customizations to be applied and ensure that the element with the given namespace is defined and in the correct location as specified by the schema definition.

MDS-00084
Parameter {0} is invalid.

Category:
Programmatic

Cause:
The supplied parameter was not of the expected type.

Action:
Ensure the parameter is of the expected type.

MDS-00085
Parameter {0} is missing.

Category:
Programmatic

Cause:
The named parameter was not supplied.

Action:
Ensure that the named parameter is supplied. If transferring documents ensure a parameter file name is supplied.

MDS-00089
Parameter {0} must have a value.

Category:
Programmatic

Cause:
A required parameter was null.

Action:
Ensure that the indicated parameter is not null when the method is called.

MDS-00090
Error in JNDI lookup operation on MDSInstance name {0}, JNDI name {1}: object found {2} is an instance of class {3} classloader {4}, expected an instance of class {5} classloader {6}.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An object of an unexpected type was found, and it was bound to the JNDI context as the MDSInstance.

Action:
Make sure no user-written code is binding anything to the same JNDI name. If the error occurs again try restarting the application. If the error still occurs, contact Oracle Support Services.

MDS-00091
Unable to customize {0}, empty or null value for tip customization layer {1}

Category:
Configuration

Cause:
The customization layer configured as the tip, has a null or empty value.

Action:
Ensure that a valid value is supplied for the tip customization layer.

MDS-00092
DuplicateNodeException. The same bean instance {0} already exists in document {1}.

Category:
Programmatic

Cause:
An element was being added that already exists as the same bean instance within the document.

Action:
Either create a new bean instance or remove the duplicate before attempting to insert in the document.

MDS-00093
List of values provided for customization layer {0} was empty or null.

Category:
Programmatic

Cause:
The list of customization layer values was either empty or null.

Action:
Ensure that a valid list of layer values for the customization layer is provided.

MDS-00094
List of CustLayerUsage objects provided was empty or null.

Category:
Programmatic

Cause:
The list of CustLayerUsage objects was either empty or null.

Action:
Ensure that a valid list of CustLayerUsage objects is provided.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-00095
The support to transfer customization documents based on the CustConfig and excluding customization documents of specific customization layers is not yet available.

Category:
Programmatic

Cause:
CustOption is created to transfer customization documents based on the CustConfig and to exclude customization documents of specific customization layers which is not yet supported in MDS Transfer.

Action:
Ensure CustOption is not created to use CustConfig and to exclude customization documents of specific customization layers.

MDS-00111
The value of the property {0} for the component {1} must be set to the default value.

Category:
Data

Cause:
The indicated component property did not have a default value.

Action:
Ensure the component property is given a default value.

MDS-00153
invalid value for indicator

Category:
Data

Cause:
The production of merged XML failed.

Action:
Verify the validity of XML documents and any schemas. If necessary forward these on to Oracle Support Services with the exception message and stack trace.

MDS-00154
The ContentHandler {0} does not implement org.xml.sax.ext.LexicalHandler.

Category:
Programmatic

Cause:
MergedXML was passed a ContentHandler that does not implement org.xml.sax.ext.LexicalHandler.

Action:
Use a ContentHandler that implements org.xml.sax.ext.LexicalHandler.

MDS-00155
unable to create a JSP file for document {0}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Files

Cause:
Oracle MDS was unable to create a JSP source document.

Action:
Examine the MDS base document, as well as any customizations and translations. If necessary, forward these to Oracle Support Services.

MDS-00156
unable to create a JSP output directory {0}

Category:
Files

Cause:
MDS-JSP integration failed because a problem was encountered while creating a directory.

Action:
Verify that you have permission to create this directory.

MDS-00157
unable to write to JSP file {0}

Category:
Files

Cause:
MDS-JSP integration failed because a problem was encountered while trying to write to a file.

Action:
Verify that you have permission to create this file.

MDS-00158
invalid directory: {0}

Category:
Files

Cause:
MDS-JSP integration failed. An attempt was made to write to an invalid directory.

Action:
Verify the value of the invalid directory.

MDS-00159
Invalid value "{0}" for {1} attribute (type = "{2}") in document {3}.

Category:
Programmatic

Cause:
An attempt was made to read or write an invalid attribute value.

Action:
Double-check the value and attribute type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-00160
no local name has been specified for a resource

Category:
Programmatic

Cause:
An attempt was made to create a resource without giving it a name.

Action:
Verify that the resource that was created is given a local name.

MDS-00161
no local name has been specified

Category:
Programmatic

Cause:
An attempt was made to create a resource without giving it a local name.

Action:
Verify that the resource that was created is given a local name.

MDS-00162
invalid attribute value

Category:
Programmatic

Cause:
An attempt was made to give to an invalid value to an attribute.

Action:
Verify that the attribute has a valid value.

MDS-00163
property value missing from element

Category:
Programmatic

Cause:
An element was missing a property value.

Action:
Ensure that each parameter used to create the element has a property value.

MDS-00164
There is a concurrent "{1}" operation on the document "{0}".

Category:
Data

Cause:
The document on which modification was being attempted had been updated by another user after it was retrieved.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Retrieve the document again.

MDS-00165
metadata Object "{0}" has changed

Category:
Data

Cause:
The creation, updating, or renaming of a metadata object failed due to conflicting changes made by another user.

Action:
Retrieve the document containing the metadata object again.

MDS-00166
unable to locate the unique identifier, {0}:{1}, that has been configured for the element {2}

Category:
Programmatic

Cause:
The element that required a unique identifier was created without one.

Action:
Add a unique identifier attribute to the element.

MDS-00167
Invalid local name for mapping "{0}" - an empty string is not allowed.

Category:
Programmatic

Cause:
A local name was given a null or empty value.

Action:
Supply a valid local name.

MDS-00168
MDS object {0} is being used after it or its MDSInstance or PManager has been released.

Category:
Session

Cause:
An MDS object was used after it or its MDSInstance or PManager had been released

Action:
Create a new MDSInstance and re-create the MDS object.

MDS-00169
The MDS instance is not ready for use because metadata deployment is in progress (status is "{0}"). Deployment messages so far are: "{1}".

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The MDS instance cannot be used until metadata deployment has finished.

Action:
Try again later after metadata deployment has completed.

MDS-00170
The MDS instance is not usable because metadata deployment failed with status "{0}".

Category:
Configuration

Cause:
Metadata deployment failed with the given status.

Action:
Please fix the error and redeploy the application's metadata using the importMAR operation on MDS Application Runtime MBean. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00171
Document "{0}" already has unsaved updates on another instance of this metadata object in this session.

Category:
Data

Cause:
An attempt was made to update metadata using more than one instance of the same metadata object at the same time in the same session.

Action:
Save the changes on the metadata object that already has updates before attempting to update it via another metadata object, or make further modifications on the metadata object on which updates have already been made.

MDS-00172
The value "{0}" of local unique attribute {1} on the {2} element that is being inserted or updated in document {3}, is already used by a sibling element.

Category:
Data

Cause:
An attempt was made to have two local unique attributes with the same value on elements that share the same parent.

Action:
Use a different value for the local unique attribute on the element that is being inserted or updated.

MDS-00173
Attribute {0} of element {1} in document {2} has a null value.

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The value of the named attribute was null.

Action:
Provide a non-null value for the attribute or remove the attribute.

MDS-00174
A tenant scoped MDSInstance {0} is being requested with a null TenantId.

Category:
Session

Cause:
A tenant scoped MDSInstance was requested passing null for TenantId.

Action:
Supply a non null TenantId or request an unscoped MDSInstance.

MDS-00176
The operation on MDSInstance {0} cannot be performed as it is not tenant scoped.

Category:
Session

Cause:
The operation performed on the MDSInstance was invalid with a TenantId because it was not a tenant scoped MDSInstance.

Action:
Perform the operation on an MDSInstance initialized for multitenant operation.

MDS-00177
The operation on resource {0} cannot be performed as it is not configured to be owned by the current tenant scope.

Category:
Session

Cause:
The operation performed was illegal as the resource being created, updated or deleted has global scope and the current scope is tenant or the resource has tenant scope and the current tenant is global.

Action:
Check that the configuration of the namespaces and CustomizationClasses is correct and that the correct customization class list is being used.

MDS-00178
Multitenant MDSInstance {0} cannot be returned as a non-multitenant MDSInstance was requested with the current persistence configuration.

Category:
Session

Cause:
The configuration at the time the MDSInstance was requested did not match with the configuration when it was originally created.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Request an MDSInstance appropriate to the configuration.

MDS-00179
The requested MDSInstance {0} cannot be returned for TenantId {1} as it was originally created with multitenant enabled = {2}.

Category:
Session

Cause:
The configuration at the time the MDSInstance was requested did not match with the configuration when it was originally created.

Action:
Request an MDSInstance appropriate to the original configuration.

MDS-00180
Only a single tenant cache configuration is allowed.

Category:
Session

Cause:
The number of TenantCacheConfigs was not 1.

Action:
Pass a single tenant cache configuration object. Although the constructor for the TenantCacheConfigs class takes an array this is reserved for future use.

MDS-00181
Only a single tenant document cache configuration is allowed.

Category:
Session

Cause:
The number of TenantDocumentCacheConfigs was not 1.

Action:
Pass a single tenant document cache configuration object. Although the constructor for the TenantDocumentCacheConfigs class takes an array this is reserved for future use.

MDS-00182
Tenant cache configuration information cannot be requested for the global tenant.

Category:
Session

Cause:
Tenant cache configuration information was being requested for the global tenant.

Action:
Do not request the tenant cache configuration for the global tenant - use getCacheConfig directly from MDSConfig

MDS-00183
Tenant document cache configuration information cannot be requested for the global tenant.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Session

Cause:
Multitenant document cache information was being requested for the global tenant.

Action:
Do not request the tenant document cache configuration for the global tenant - use getDocumentCacheConfig from NamespaceConfig

MDS-00184
The relationship from {0} to {1} is invalid because the latter is configured as a global resource and cannot be referenced from a tenant resource because the corresponding relationship is defined with cascade delete enabled.

Category:
Session

Cause:
Relationships with cascade delete enabled were spanning tenant boundaries.

Action:
Reconfigure the relationship with cascade delete disabled or ensure the parent reference is within the same tenant scope.

MDS-00185
The relationship from {0} to {1} is invalid because the latter is configured as a global resource and cannot be referenced from a tenant resource because the corresponding relationship is defined with enforced integrity.

Category:
Session

Cause:
Relationships with defined referential integrity were spanning tenant boundaries.

Action:
Reconfigure the relationship without referential integrity or ensure the parent reference is within the same tenant scope.

MDS-00186
A {0} element is already present in the parent {1} element in document {2}, but with the QNameLUID identification mechanism only one is allowed.

Category:
Data

Cause:
An attempt was made to have two or more elements with same QName under same parent while QNameLUID identification mechanism is used.

Action:
Remove duplicate instances of elements with same QName

MDS-00187
The existing {0} element in the parent {1} element in document {2} is automatically removed, and new customized {0} element of "{3}"/"{4}" customization layer is inserted since with the QNameLUID identification mechanism, only one is allowed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
An attempt was made to have two or more elements with same QName under same parent while QNameLUID identification mechanism is used.

Action:
Removed duplicate instances of elements with same QName

MDS-00188
The relationship from {0} to {1} is invalid because the latter is configured as a tenant resource and cannot be referenced from a global resource.

Category:
Session

Cause:
An attempt was made to reference a tenant resource from a global resource.

Action:
Ensure all references from global resources are also global.

MDS-00189
The existing {0} element with unique id {1} in the parent {2} element in document {3} is automatically removed, and new customized {0} element with unique id {1} of "{4}"/"{5}" customization layer is inserted since {0} element is type-annotated to overwrite duplicates.

Category:
Data

Cause:
An attempt was made to have two or more elements with same QName under same parent having the same unique ID value while overwriteDuplicate mechanism is used.

Action:
Removed duplicate instances of elements with same QName having the same unique ID value

MDS-00190
A call to {0} on the current MDSSession does not specify the correct transaction key

Category:
Session

Cause:
The current MDS Session was created using a transaction key and the subsequent operation was either being attempted passing no key or a different one from that originally used.

Action:
If the MDS Session is created using a transaction key, then use the MDSSession API's that take a transaction key and use the same key.

MDS-00191
An exception occurred in PChangeListener {0}

Category:
Session

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The MetadataStoreCommunicator was attempting to notify the listener when an exception occurred.

Action:
Check the HandlePChanges method of the listener.

MDS-00192
Validation of {0} caused a NullPointerException: check there is an MDS bean object set on the MDS bean MO

Category:
Data

Cause:
This error most typically occurs when a Bean MO has been created but no bean object has been set on it.

Action:
Check that an MDS bean is set on this MO. Failing that, examine the stack for clues for alternative causes.

MDS-00193
Document with the MDSReference {0} contains an ID attribute with an invalid value: {1}

Category:
Data

Cause:
The value of the ID attribute is invalid according to the schema definition.

Action:
Ensure that the ID conforms to the schema definition .

MDS-00194
Auditing is disabled for component {0}.

Category:
Configuration

Cause:
There was an error registering the audit event definition(s) for the component.

Action:
Ensure that the audit event definitions for the component are valid and that the audit service is functional.

MDS-00195
The custom audit event of type "{0}" that was associated with "{1}" is not audited because the MDS object was unmodified since the last time the changes in the MDSSession were committed.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
MDS object associated with the event was unmodified since the last time the changes in the MDSSession were committed. A custom audit event is discarded if the associated MDSObject is not modified.

Action:
No action required.

MDS-00196
The MDSSession referenced by the audit component "{0}" is invalid.

Category:
Programmatic

Cause:
The MDS audit support instance is being used even after the MDSSession that was used to created it is no longer referenced.

Action:
Fetch the audit support instance from the MDSSession and retry the operation.

MDS-00197
An internal error occurred when processing MetadataObject {0} with document {1}.

Category:
Session

Cause:
An error occurred in the LayeredCache processing.

Action:
Check for log messages. If the problem persists, clear the MDS cache and contact Oracle Support Services.

MDS-00198
The requested object is deleted in the current PTransaction

Category:
Data

Cause:
The requested document was deleted in an earlier part of the PTransaction and not replaced.

Action:
Review whether the document needed to be deleted or replace with a new version.

MDS-00199
The requested object is deleted in the current MDSSession

Category:
Data

Cause:
The requested document was deleted in an earlier part of the MDSSession and not replaced.

Action:
Review whether the document needed to be deleted or replace with a new version.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-00200
Reference not found in Document

Category:
Data

Cause:
Unable to locate the reference within the named Metadata Object.

Action:
Check that the reference is correct.

MDS-00201
PDocument not found in MetadataStore : {0}

Category:
Data

Cause:
The requested persistence document was not found in the given MetadataStore.

Action:
Check that the requested name is correct and that the store is mapped to the namespace correctly .

MDS-00202
The Document was not found on the classpath

Category:
Data

Cause:
The requested document was not found on the classpath.

Action:
Check that the document is available on the classpath as a resource .

MDS-00203
An error occurred while attempting to process Element "{0}" from customization document {1} because the change conflicts with information in the base document or changes made by a prior customization

Category:
Data

Cause:
An error occurred during parsing of a customization - see cause.

Action:
Check for any conflicts between the customization and recent changes to the base document or other customizations being applied.

MDS-00204
Remove customization fails on element with local reference "{0}" in document "{1}"

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt to remove a customization from an element has failed.

Action:
Reproduce the customization document without the desired customization.

MDS-00205
Unexpected error in ChangeEventParseEngine

Category:
Programmatic

Cause:
An error in the ChangeEventParseEngine.

Action:
Check for log messages. If the problem persists, contact Oracle Support Services.

MDS-00206
Unexpected error while collecting ElementTipCustInfo for a customized element

Category:
Programmatic

Cause:
An error occurred while gathering ElementTipCustInfo for a customized element.

Action:
Check for log messages. If the problem persists, contact Oracle Support Services.

MDS-00207
Cached Object {0} was removed from the MDS cache by thread {1} while being read. Retrying the read.

Category:
Session

Cause:
An object being accessed by MDS was removed from the cache before it could be used to return the requested data.

Action:
The notification can occur if there are concurrent updates to objects cached by MDS. If the notification persists review the MDS cache configuration.

MDS-00208
Root node deleted but not replaced.

Category:
Programmatic

Cause:
The root node of an XML document was deleted, but no replacement node was inserted.

Action:
Insert a replacement root node after deleting the root node.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-00209
Exception adding logging data: " {0}".

Category:
Programmatic

Cause:
An exception was raised in the MDS diagnostic log processing.

Action:
Examine logs for the full exception stack and underlying cause.

MDS-00210
The TenantId supplied {0} does not match the current tenant context: {1}.

Category:
Session

Cause:
A TenantId was supplied to MDS that does not match the TenantId provided by the context.

Action:
Remove the TenantId from the deprecated API or correct the TenantId supplied.

MDS-00211
Action is not allowed on a tenant-specific MetadataStoreCommunicator.

Category:
Programmatic

Cause:
An attempt was made to invoke a method that is not allowed on a non-global tenant

Action:
This change has to be made in a global tenant context.

MDS-00212
Unable to execute a task in the DOMAIN partition in application {0} because the application in the DOMAIN partition is not currently in RUNNING state, or this is a Java SE application that has not initialized MDS in the DOMAIN context.

Category:
Session

Cause:
A task runner was required but unable to be found.

Action:
Ensure that the MDS application lifecycle listener is configured, or that MDS is initialized in the global tenant context before running in any other tenant context.

MDS-00213
It was not possible to lock the cached RootNode with root key {0}.

Category:
Session

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred in the LayeredCache processing due to cache contention on a specific object.

Action:
Check for log messages. If the problem persists, clear the MDS cache and contact Oracle Support Services.

MDS-00214
Error encountered while processing root node replacement customization instruction in tip customization layer document.

Category:
Programmatic

Cause:
The customization instructions in tip customization document might be corrupted.

Action:
Check for log messages. If the problem persists, contact Oracle Support Services.

MDS-00215
TenantId is not supported. Please use equivalent ServiceId api.

Category:
Programmatic

Cause:
An attempt was made to invoke MDS deprecated APIs with TenantId.

Action:
Replace TenantId based API with ServiceId based API.

MDS-00216
Notification Manager for MDSInstance {0} was unable to get an application scoped executor for dispatching events in the application context - using a global executor instead.

Category:
Session

Cause:
An attempt was made to get an application scoped executor outside of an application.

Action:
Check if the request should be running within the scope of an application.

MDS-00217
Notification Manager for MDSInstance {0} was unable to get an application scoped contextual proxy for dispatching global events in the tenant context - using a global contextual proxy instead.

Category:
Session

Cause:
An attempt was made to get an application scoped contextual proxy outside of an application.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check if the request should be running within the scope of an application.

MDS-00218
Cannot create ServiceId with null Service UUID.

Category:
Configuration

Cause:
An attempt was made to create an MDS ServiceId with a null value.

Action:
Check lifecycle-config.xml and ensure that each 'service' element contains an 'id' attribute defined with a UUID value.

MDS-00219
Invalid resource passed to MDSFaceletsHelper: {0}.

Category:
Programmatic

Cause:
An invalid resource was passed to MDSFaceletsHelper.

Action:
Check exception message. Consider enabling oracle.mds.jrf logging for additional diagnostics.

MDS-00220
Document {0} to be loaded does not exist for label {1}.

Category:
Configuration

Cause:
An attempt was made to load a persistent document using a URL but the underlying document was not found in the DB MetadataStore.

Action:
Check that the document name is correct and that the DB MetadataStore and Label are correctly configured.

MDS-00221
Specified label {0} does not exist in {1} store.

Category:
Configuration

Cause:
The specified label did not exist in the metadata store.

Action:
Verify that the label name is correct and that the label exists in the metadata store, and then retry the operation.

MDS-00222
Invalid value "{0}" for {1} attribute (type = "{2}").

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
An attempt was made to read or write an invalid attribute value.

Action:
Double-check the value and attribute type.

MDS-00223
Unable to retrieve pinned Customization Class value from Unified Sandbox For CustomizationClass : {0} with Name {1}.

Category:
Runtime

Cause:
An attempt was made to read a customization value with AutoMergeOverrideValue.PINNED, but no value was retreived from the Unified Sandbox.

Action:
Ensure Unified Sandbox is able to return a pinned value for this Customization Class.

MDS-00224
Customization of {0} Location: {1} is not permitted due to a package level restriction in the cust-restriction-library-config element of the mds-library-config.xml at jar/zip level.

Category:
Runtime

Cause:
A jar level restriction on customization has been specified for objects in this package in the cust-restriction-library-config element of the mds-library-config.xml file.

Action:
Check if customization of this object should be allowed and correct the entries in cust-restriction-library-config at the jar/zip level.

MDS-00225
Updating immutable StreamedObject "{0}" is not allowed.

Category:
Programmatic

Cause:
The StreamedObject being updated was immutable.

Action:
Ensure that the StreamedObject to be updated is mutable.

MDS-00226
Unable to determine the MDSContext while processing cached MDS content : {0}

Category:
Runtime

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt was made to access an MDSContext but an MDSContext is not presently available to this thread.

Action:
Check for logged diagnostic messages, clear the MDS cache and if the problem persists contact Oracle Support Services.

MDS-00227
Failure in MDS Java Flight Recorder integration processing.

Category:
Configuration

Cause:
A failure occurred in MDS JFR integration processing.

Action:
Examine the exception for clues. Check the JVM FlightRecorder options.

MDS-00228
No MOParseListener instance provided to MOParseListenersBuilder to build MOParseListeners instance.

Category:
Programmatic

Cause:
An attempt was made to build MOParseListeners instance using MOParseListenersBuilder without providing any instances of MOParseListener.

Action:
Provide at least one instance of MOParseListener before building MOParseListeners instance using MOParseListenersBuilder.

MDS-00229
DuplicateRefException occurred while attempting to process prior customization layer.

Category:
Data

Cause:
There exists two or more elements with same id value in base document and/or prior customization layers.

Action:
Fix elements with duplicate id value in prior customization layers before processing tip customization layer.

MDS-00230
Unexpected metadata object parse error.

Category:
Programmatic

Cause:
An unexpected metadata object parse error occurred.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check DupIdInsertResolver instance usage.

MDS-00231
ReplaceProcessingOption NOT a valid available ProcessingOption.

Category:
Data

Cause:
An attempt was made to use DupIdElementsFilter.REPLACE_PO to fetch collection of DupIdElementInfo instances while ReplaceProcessingOption is NOT a valid available ProcessingOption.

Action:
Ensure to use DupIdElementsFilter associated to valid available ProcessingOption.

MDS-00232
Selected resolution is NOT amongst one of the available ProcessingOptions.

Category:
Data

Cause:
An attempt was made to use a resolution which is NOT amongst one of the available ProcessingOptions.

Action:
Ensure to use resolution which is amongst one of the available ProcessingOptions.

MDS-00233
Selected resolution is NOT amongst one of the available CustApplyOptions.

Category:
Data

Cause:
An attempt was made to use a resolution which is NOT amongst one of the available CustApplyOptions.

Action:
Ensure to use resolution which is amongst one of the available CustApplyOptions.

MDS-00234
RestrictedSession in CustClassContext should not be null

Category:
Data

Cause:
An attempt was made to create an instance of CustClassContext without specifying a value for RestrictedSession.

Action:
Ensure a non null value is provided to CustClassContext.Builder.withRestrictedSession.

MDS-00235
MOReference {0} and MetadataObject {1} are not consistent.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
An attempt was made to create a CustClassContext with both a MetadataObject and an MOReference which did not relate to the same MetadataObject.

Action:
Ensure that MetadataObject and MOReference are consistent.

MDS-00236
Customization of {0} is not allowed because it is not explicitly allowed by any extended metadata entry, file type or package restriction.

Category:
Configuration

Cause:
An attempt was made to customize a StreamedObject that was not customizable.

Action:
If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: An extended metadata file, the FileTypeConfig or MDSLibraryConfig. Also check the customization policy for the MDS session in use and the customization configuration.

MDS-00237
Timed out trying to obtain a lock on the cache.

Category:
Session

Cause:
It was not possible to obtain a lock on a WeakCache after waiting 30 seconds.

Action:
Consider using a diagnostic tool such as jconsole to identify the thread that is not relinquishing this lock.

MDS-00238
Document {0} is not configured as a customizable StreamedObject.

Category:
Configuration

Cause:
The Streamed Object requested has not been configured for customization.

Action:
Ensure customization-type attribute in cust-config is set to FULL_REPLACE and that the content-type is BINARY_STREAM.

MDS-00239
Layer-specific retrieval on immutable StreamedObject "{0}" is not allowed.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The StreamedObject on which a LSOLayerRetrieval method was called is immutable.

Action:
Ensure that the StreamedObject is mutable before calling LSOLayerRetrieval methods.

MDS-00240
A rest request to update a resource requires If-Match.

Category:
Session

Cause:
A rest request to update a resource was issued without specifying an ETag in the If-Match Header.

Action:
Reissue the request with a valid If-Match Content header.

MDS-00241
A rest request to update a resource specified an out of date ETag.

Category:
Session

Cause:
A rest request to update a resource specified an out of date ETag in the If-Match content Header, possibly due to the resource having been updated by another session.

Action:
Re-request the resource to obtain an up to date Etag and reissue the update.

MDS-00242
A rest request to update a resource occurred outside a unified sandbox.

Category:
Session

Cause:
The MDSSession obtained from the ADFContext was not running within a unified sandbox.

Action:
Session options on the ADFContext should use a unified sandbox.

MDS-00243
The document {0} is not within the current unified sandbox.

Category:
Session

Cause:
The document's namespace is not configured to be contained within the active unified sandbox.

Action:
Verify that the document should be updateable and amend the unified sandbox configuration accordingly.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-00244
There is no current ADFContext.

Category:
Session

Cause:
The operation requires that an ADFContext be present on the current thread.

Action:
Verify that the ADFContext is configured correctly.

MDS-00245
A Customization already exists for {0} for the current layer

Category:
Session

Cause:
An attempt was made to create a new customization when one already exists.

Action:
GET the existing customization and modify via PUT.

MDS-00246
A Customization does not exist for {0} for the current layer

Category:
Session

Cause:
An attempt was made to get an existing custimization which does not exist.

Action:
Check the naming of your resource and retry the operation.

MDS-00247
No tip customization layer defined while retrieving details for {0}

Category:
Session

Cause:
Customization Layers have not been defined on the current MDSSession.

Action:
Check the customization config for your environment.

MDS-00248
No support to object-merge VBCS base document.

Category:
Data

Cause:
VBCS base document requires object-merge.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Remove conflicting VBCS base document available in sandbox and retry sandbox refresh operation.

MDS-00249
No support to object-merge VBCS base document and/or its associated non-tip layer extensions.

Category:
Data

Cause:
VBCS base document or its associated non-tip layer extensions requires object-merge.

Action:
Remove conflicting VBCS base document and/or its associated non-tip layer extensions available in sandbox and retry sandbox refresh operation.

MDS-00500
No metadata store is configured to save the document {0}.

Category:
Configuration

Cause:
An attempt was made to save a document, when no writable store was configured.

Action:
Provide a writable metadata store to save the document.

MDS-00501
Document {0} cannot be deleted because no metadata store is configured.

Category:
Configuration

Cause:
An attempt to delete a document failed because there was no writable store configured.

Action:
To delete the document, provide a writable metadata store.

MDS-00503
The metadata path "{0}" does not contain any valid directories.

Category:
Data

Cause:
Either the metadata path was empty or directories on the metadata path did not exist.

Action:
Ensure that the metadata path is not empty and that the directories on the metadata path exist.

MDS-00504
failure to create document {0} because metadata store "{1}" is read-only

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
An attempt to create a document on a read-only metadata store failed.

Action:
To create the document, provide a writable metadata store.

MDS-00505
failure to save document {0} because metadata store "{1}" is read-only

Category:
Data

Cause:
An attempt to save a document to a read-only metadata store failed.

Action:
To save the document, provide a writable metadata store.

MDS-00506
failure to get child resources of package {0} because package does not exist in metadata store

Category:
Data

Cause:
Child resources for the package were not found because specified package did not exist in the metadata store.

Action:
Verify that the package exists in the metadata store, and then retry the operation.

MDS-00507
failure to delete document {0} because metadata store "{1}" is read-only

Category:
Data

Cause:
An attempt to delete a document from a read-only metadata store failed.

Action:
To delete the document, provide a writable metadata store and retry the operation.

MDS-00508
There is no content to be read for {0}.

Category:
Data

Cause:
An attempt was made to read empty metadata.

Action:
Verify that the metadata has valid content, and then retry the operation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-00509
failure to delete document {0} with file {1}

Category:
Data

Cause:
An error occurred while the document was being deleted.

Action:
Verify that the document exists and then retry the operation, or provide a document that exists in the store.

MDS-00510
failure to read document {0} because it is not found in the metadata path "{1}"

Category:
Data

Cause:
The document to be read was not found.

Action:
Verify that the metadata path is correct and that the document exists in the metadata path.

MDS-00511
failure to create document {0} at file {1}

Category:
Files

Cause:
An error occurred while creating the document in the file store.

Action:
Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00512
failure to create document {0} because file {1} already exists

Category:
Files

Cause:
An attempt was made to create a file that already existed in the metadata store.

Action:
Provide a different name for the file to be created, or delete the existing file first, and then retry the operation.

MDS-00513
failure to create package {0} because directory {1} already exists

Category:
Files

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt to create a package failed because a directory by the same name already existed.

Action:
Provide a different name for the package to be created and retry the operation.

MDS-00514
failure to save document {0} to file {1}

Category:
Files

Cause:
An error occurred while saving the document to a file.

Action:
Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00515
failure to create document {0} in the metadata repository

Category:
Data

Cause:
An error occurred while the document was being created in the metadata repository.

Action:
Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00516
failure to create document {0} because it already exists in the metadata repository

Category:
Data

Cause:
An error occurred while the document was being created in the metadata repository because the document already existed.

Action:
Provide a different name or delete the existing document first, and then retry the operation.

MDS-00517
failure to create package {0} because it already exists in the metadata repository

Category:
Data

Cause:
An error occurred while the package was being created in the metadata repository because the package already existed.

Action:
Provide a different package name or delete the existing package first, and then retry the operation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-00518
failure to create package {0} in the metadata repository

Category:
Data

Cause:
An error occurred while the package was being created in the metadata repository.

Action:
Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00519
failure to delete document {0} from the metadata repository

Category:
Data

Cause:
An error occurred while the document was being deleted from the metadata repository.

Action:
Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00520
failure to read document {0} because it is not in the metadata repository

Category:
Data

Cause:
The document was not read because it did not exist in the metadata repository.

Action:
Verify that the document name is correct and that it exists in the metadata repository, and then retry the operation.

MDS-00521
error while reading document {0} from metadata repository

Category:
Data

Cause:
An error occurred while the document was being read from the metadata repository.

Action:
Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00522
failure to save document {0} to the metadata repository

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred while the document was being saved to the metadata repository.

Action:
Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00526
failure to generate SAX parsing events for document {0}

Category:
Programmatic

Cause:
An error occurred while parsing the XML document.

Action:
Verify that the XML document is well-formed. Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00531
failure to write to "{0}" because output to "{1}:" protocol is not supported

Category:
Programmatic

Cause:
An attempt to write modified metadata to a URL failed because the protocol is not supported.

Action:
Retry writing modified metadata to a supported protocol.

MDS-00533
Exception: {3} Attribute "{0}" with an invalid MDS reference "{1}" in document "{2}" is not stored as a typed dependency in the database repository.

Category:
Data

Cause:
An error occurred while adding a typed dependency from the specified attribute.

Action:
Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00534
Exception: {3} Sub-object {0} in document {2} has invalid value "{1}" for unique identifier; typed dependencies from this sub-object are not stored in the database repository.

Category:
Programmatic

Cause:
An error occurred because the component had an invalid ID.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Provide the correct ID value for the application metadata. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00535
cannot change TypeManager associated with a PManager after it is initialized

Category:
Programmatic

Cause:
An attempt was made to associate TypeManager with PManager after it was initialized.

Action:
Contact Oracle Support Services.

MDS-00536
cannot change FileTypeManager associated with a PManager after it is initialized

Category:
Programmatic

Cause:
An attempt was made to associate FileTypeManager with PManager after it was initialized.

Action:
Contact Oracle Support Services.

MDS-00537
unable to rename {0} to {1}

Category:
Data

Cause:
An error occurred during a rename operation.

Action:
Retry the rename operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00538
failure to rename document {0} because metadata store "{1}" is read-only

Category:
Data

Cause:
An error occurred during rename operation because the metadata store was configured as read-only.

Action:
To rename a document, provide a store that can be written to, that is not read-only.

MDS-00539
A document can be renamed only within its source store. The new name {1} in this rename operation does not map to the same store as the old name {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
An error occurred during a rename operation. An invalid new name for the rename operation caused the renamed document to be stored in another metadata store.

Action:
Provide a new, valid document name that maps to the same metadata store that contains the original document.

MDS-00541
SAX events cannot be generated for non-XML document {0}.

Category:
Programmatic

Cause:
An attempt was made to generate SAX events for non-XML documents.

Action:
Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00547
The read operation is not supported for packages from Web content from the servlet context.

Category:
Programmatic

Cause:
A read operation was attempted for packages from Web content, which is not supported.

Action:
The read operation is not supported, therefore no action is required.

MDS-00550
Updates across multiple stores are not allowed in the same transaction.

Category:
Programmatic

Cause:
An attempt was made to perform updates across multiple stores in the same transaction.

Action:
Verify that the document is being saved to the same store on which it exists.

MDS-00551
failure to delete package {0} because it is not empty

Category:
Data

Cause:
An attempt was made to delete a package that was not empty.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Delete the contents of the package to be deleted first, and then retry the operation.

MDS-00552
failure to delete package {0} with directory {1}

Category:
Files

Cause:
An error occurred while deleting the directory for the package.

Action:
Ensure no files from the directory are opened in other applications and retry the operation. Also, refer to the error messages in the application logs for more information on the actual reason for failure.

MDS-00554
Package {0} cannot be found in the specified store.

Category:
Programmatic

Cause:
The requested operation was not completed because the package name that was supplied was invalid.

Action:
Provide a valid package name and retry the operation.

MDS-00555
The partitionName {0} is invalid.

Category:
Programmatic

Cause:
The requested operation was not completed because the partition name that was supplied was invalid.

Action:
Provide a valid partition name and retry the operation.

MDS-00557
Resource {0} is already locked or is being modified.

Category:
Session

Cause:
An attempt was made to modify a document that was already being modified by another user.

Action:
Retry modifying the document after the lock is released by the other users. Also, refer to the error messages in the application logs for more information on the actual reason for failure.

MDS-00558
The partitionName {0} is not available.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
No partition with that name existed.

Action:
Provide a partition name that exists.

MDS-00559
A partition with name {0} already exists.

Category:
Programmatic

Cause:
The name provided for creating a new partition was already in use by another partition.

Action:
Provide a different name for the new partition.

MDS-00560
The MDS repository is incompatible with the archive. The repository version is {0} whereas archive version is {1}.

Category:
Upgrade

Cause:
The MDS repository was not compatible with the archive provided.

Action:
Upgrade the target MDS repository or use a compatible archive for the operation.

MDS-00561
The create operation is not supported for metadata stores of type "{0}".

Category:
Configuration

Cause:
An attempt was made to create a new document or package in a read-only metadata store.

Action:
Reconfigure the application to use a writable metadata store.

MDS-00562
The delete operation is not supported for metadata stores of type "{0}".

Category:
Configuration

Cause:
An attempt was made to delete a document from a read-only metadata store.

Action:
Reconfigure the application to use a writable metadata store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-00563
The save operation is not supported for metadata stores of type "{0}".

Category:
Configuration

Cause:
An attempt was made to save a document to a read-only metadata store.

Action:
Reconfigure the application to use a writable metadata store.

MDS-00564
GUID feature is not supported for metadata stores of type "{0}".

Category:
Configuration

Cause:
An attempt was made to get a document by GUID from a metadata store that does not support GUIDs.

Action:
Reconfigure the application to use a metadata store that supports GUIDs, such as DBMetadataStore.

MDS-00565
The rename operation is not supported for metadata stores of type "{0}".

Category:
Configuration

Cause:
An attempt was made to rename a document or package in a read-only store.

Action:
Reconfigure the application to use a writable metadata store.

MDS-00566
The DOM content is NULL for {0}.

Category:
Data

Cause:
DOM document content provided was null.

Action:
Provide valid DOM content and retry the operation.

MDS-00567
The metadata changes for document "{0}" cannot be written in the underlying store because read-only mode is enabled in the configuration.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt to change metadata was made while changes were disabled for maintenance operations.

Action:
Reconfigure the application to not specify read-only mode in the configuration and use a writable metadata store to persist metadata changes.

MDS-00568
MetadataStore initialization failure because "{0}" is invalid

Category:
Files

Cause:
The URL store mapping was invalid.

Action:
Provide a valid URL store mapping.

MDS-00569
unable to read document {0} from "{1}"

Category:
Data

Cause:
There was an error reading the document from the configured metadata store.

Action:
Retry the operation. If the problem persists, verify that the document exists in the configured metadata store.

MDS-00570
The name or content exceeds the MDS repository schema size for {0}.

Category:
Data

Cause:
The metadata name or the content exceeded the schema size.

Action:
Reduce the length of the metadata name or content, and then retry the operation. Refer to the documentation for the allowed sizes for names and content.

MDS-00571
The bean content is NULL for {0}.

Category:
Data

Cause:
The bean content was null.

Action:
Provide valid bean content, and then retry the operation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-00572
failure to get the ConnectionManager because the DBContext is null

Category:
Programmatic

Cause:
The DBContext value is null. Also, using any MetadataStore, PManager, or MDSInstance that has already been released might lead to this error.

Action:
Do not use any metadata store, PManager, or MDSInstance that is already released.

MDS-00573
The metadata store is already associated with a PManager.

Category:
Programmatic

Cause:
The PConfig provided for creating the PManager or MDSInstance was already used by another PManager or MDSInstance.

Action:
Provide a new PConfig when creating the PManager or MDSInstance.

MDS-00574
The document {0} does not exist in the configured metadata store.

Category:
Data

Cause:
The document being locked did not exist in the configured metadata store.

Action:
Ensure that the document to be locked exists, and that the name of the document is correct.

MDS-00575
failure to acquire write lock for {0}

Category:
Data

Cause:
An attempt to acquire a write lock for a document failed.

Action:
Refer to the cause exception message in application logs for details on the actual cause of the failure.

MDS-00576
failure to process {0} because metadata store "{1}" is read-only

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt was made to modify metadata in a read-only metadata store.

Action:
Provide a writable metadata store to allow modification of the document.

MDS-00577
Could not acquire read/write lock for {0} within the default waiting time interval

Category:
Files

Cause:
Read/Write lock could not be obtained for a file within the waiting time interval.

Action:
Try the operation again after some time.

MDS-00578
Failed to process document {0} due to a critical error writing to the repository

Category:
Configuration

Cause:
A critical error occurred while the metadata document was being written to the repository.

Action:
Contact the application administrator with cause exception message details to resolve the repository error.

MDS-00579
The document {0} does not have version {1} in the repository.

Category:
Data

Cause:
Specified version does not exist for the document.

Action:
Provide an existing version for the document.

MDS-00580
operation failed for {0} because no metadata-store was defined in the configuration for metadata-store-usage {0}.

Category:
Configuration

Cause:
incomplete configuration, no metadata-store was defined for the metadata-store-usage

Action:
Define the metadataStore for the empty metadata-store-usage.

MDS-00581
error deleting partition {0} in file repository {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
The directory represented by the file repository or partition is read only.

Action:
Verify that the metadata path to the repository and partition exist and are writable.

MDS-00582
The MetadataStore {0} is writable but does override getMetadataStoreCommunicator() method.

Category:
Programmatic

Cause:
Configuration used a MetadataStore that was writable but not supporting MetadataStoreCommunicator interface.

Action:
Override getMetadataStoreCommunicator() in the MetadataStore class to return an appropriate MetadataStoreCommunicator instance.

MDS-00583
Could not release read/write lock for {0} because the lock was not found.

Category:
Files

Cause:
Read/Write lock could not be released because it was already removed from the lock cache.

Action:
Contact Oracle Support Services.

MDS-00584
The MDS repository's database platform is different that of the archive. The repository's database platform is {1} whereas the archive's platform is {0}.

Category:
Data

Cause:
The MDS repository platform was not compatible with the archive provided.

Action:
Use a platform compatible archive for the operation.

MDS-00585
Failure to create deployment lineage because metadata store "{0}" is read-only

Category:
Configuration

Cause:
An attempt was made to create deployment lineage in a read-only metadata store. Deployment lineage in repository represents Application name and MAR module name.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Configure a metadata store that supports deployment management, typically a DBMetadataStore.

MDS-00586
ArchiveMetadataStore is restricted to be used with MDS Transfer operation only. Reading or writing files in ArchiveMetadataStore is not supported outside of transfer.

Category:
Configuration

Cause:
An attempt was made to read or write files in ArchiveMetadataStore outside of transfer.

Action:
ArchiveMetadataStore is not supported outside of transfer. Either use this ArchiveMetadataStore for MDS transfer operation or use some other MetadataStore to store your files.

MDS-00588
Cannot replace the original archive file {0} with the final archive file {1} because the final archive file could not be renamed to {0}.

Category:
Data

Cause:
The final archive file could not be renamed to the original archive file name.

Action:
Look at the cause exception for more details and take corresponding actions.

MDS-00589
Error occurred while creating the final archive file {0}.

Category:
Data

Cause:
Some exception occurred while creating the final archive.

Action:
Look at the cause exception for more details and take corresponding actions.

MDS-00590
Error occurred while opening or closing the input/output stream for archive file {0}.

Category:
Data

Cause:
Some exception occurred while opening or closing the input/output stream for archive file.

Action:
Look at the cause exception for more details and take corresponding actions.

MDS-00591
"{0}" operation is not supported in ArchiveMetadataStore.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
An unsupported operation has been attempted in ArchiveMetadataStore.

Action:
Look at the ArchiveMetadataStore javadoc for supported operations.

MDS-00592
Error occurred while initializing FileMetadataStore connection for the temporary directory.

Category:
Data

Cause:
An error occurred while initializing the FileMetadataStore connection for the temporary directory.

Action:
Look at the cause exception for more details and take corresponding actions.

MDS-00593
Unable to read the file {0} from archive {1}.

Category:
Data

Cause:
Some I/O Exception occurred while reading the given file from archive.

Action:
Look at the cause exception for more details and take corresponding actions.

MDS-00594
Unable to write the file {0} to archive {1}.

Category:
Data

Cause:
Some I/O Exception occurred while writing the given file to archive.

Action:
Look at the cause exception for more details and take corresponding actions.

MDS-00595
The parent directory {0} given in archive file path does not exist. Cannot create ArchiveMetadataStore for the archive file {1}.

Category:
Data

Cause:
The parent directory mentioned in archive file path does not exist.

Action:
Provide valid parent directory in archive file path to create ArchiveMetadataStore.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-00596
Failure to read document {0} because it is not found in "{1}"

Category:
Data

Cause:
The document to be read was not found.

Action:
Verify that the document exists in the ArchiveMetadataStore before reading the document.

MDS-00597
Failure to open the archive file {0}. Cannot create ArchiveMetadataStore for the archive file {0}.

Category:
Data

Cause:
Could not open the given archive file.

Action:
Try creating ArchiveMetadata store with a valid archive file.

MDS-00598
Cannot create an intermediary archive during export to the archive file {0}.

Category:
Data

Cause:
Either the intermediary archive file could not be created in the default temporary-file directory or an I/O error occurred.

Action:
Look at the cause exception for more details and take action accordingly.

MDS-00599
Cannot obtain a connection to the Archive Metadata Store for archive file {0}.

Category:
Programmatic

Cause:
There was a problem obtaining a connection to the Archive Metadata Store.

Action:
Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00601
The XLIFF document has invalid target language {0}.

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The target language specified was either null or empty.

Action:
Specify a valid target language and retry the operation.

MDS-00703
The name {0} is not a valid name under package {1} because {2} resource not considered child of the package.

Category:
Data

Cause:
A specified child resource was not a child of the package.

Action:
Specify a valid child resource name, and then retry the operation.

MDS-00704
invalid value {0} for property {1} on component {2}

Category:
Configuration

Cause:
An invalid property value was provided.

Action:
Provide a valid property value and retry.

MDS-00771
A component with {0} "{1}" already exists.

Category:
Data

Cause:
The specified component already existed.

Action:
Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-00907
unable to save document "{0}" because either a document or package of the same name already exists

Category:
Data

Cause:
A document or package with the same name already existed in the repository, perhaps because it was just created by another user.

Action:
Retry the operation. If necessary, choose another name for the object being saved.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-00908
unable to create package "{0}" because a document or package of the same name already exists

Category:
Data

Cause:
A document or package with the same name already existed in the repository, perhaps because it was just created by another user.

Action:
Retry the operation. If necessary choose another name for the object being saved.

MDS-00910
unable to save the document because of corrupt MDS database sequences or other internal errors.

Category:
Data

Cause:
The database sequence used for generating the unique document ID was corrupt or some other internal errors caused violation of unique constraints.

Action:
Retry the operation after deploying metadata to another MDS database repository partition. If that still fails, contact Oracle Support Services.

MDS-00911
Document with name "{0}" and version {1} [Low CN={2}, High CN={3}] does not exist in the repository.

Category:
Data

Cause:
The document was not found in the MDS repository.

Action:
Specify a correct name for the document and retry the operation. Check if the document is deleted by another user.

MDS-00912
MDS repository is incompatible with the middle tier. Repository version "{0}" is older than minimum repository version "{1}" required.

Category:
Upgrade

Cause:
The MDS repository was older than minimum version required by the middle tier.

Action:
Upgrade the MDS repository to the required version.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-00913
MDS repository is incompatible with the middle tier. MDS version "{0}" is older than minimum MDS version "{1}".

Category:
Upgrade

Cause:
The MDS version was older than the minimum required version for using the MDS repository.

Action:
Upgrade the MDS library to the required version.

MDS-00914
unable to save document "{0}" because either an already deleted document or package with conflicting name or type already exists

Category:
Data

Cause:
A document or package with the same name or a parent package of incorrect type already existed in the repository as a deleted version.

Action:
Delete the conflicting resource from repository or check if the new resource is invalid. If necessary, choose another name for the object being saved.

MDS-00915
MDS repository is incompatible with the middle tier for dumping or restoring metadata.

Category:
Upgrade

Cause:
The MDS repository was older than minimum version required by the middle tier to dump or restore metadata.

Action:
Retry the operation after upgrading the MDS repository to newer version or use compatible middle tier to perform the operation.

MDS-00916
MetadataStore configured for {0} does not support deployment management.

Category:
Configuration

Cause:
The metadata store configured for the resource did not support deployment management.

Action:
Deployment management is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.

MDS-00918
Connection details for the MDS repository are incomplete. The values for "{0}" are invalid

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
The MDS repository connection details were invalid or missing.

Action:
Specify correct values for the MDS repository details in the configuration and retry the operation.

MDS-00919
Internal error: The database context for this repository appears to be corrupt.

Category:
Configuration

Cause:
The database context was invalid.

Action:
Verify that the repository details are correct in the configuration.

MDS-00922
The ConnectionManager "{0}" cannot be instantiated.

Category:
Configuration

Cause:
There was an error instantiating the ConnnectionManager class

Action:
Contact Oracle Support Services.

MDS-00923
Unable to create sandbox "{0}"

Category:
Data

Cause:
An error occurred during creation of sandbox.

Action:
Look in the error message log for the exact reason for the failure.

MDS-00928
Invalid document reference, package "cust" should appear before package "trans" in the names of customization translation documents.

Category:
Data

Cause:
An internal MDS document (one in package mdssys) was found with an invalid name, or an attempt was made to create a name object with such an invalid name.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Avoid using package or document names containing path element "mdssys" which is reserved for internal MDS use. If necessary, remove such invalid documents from the metadata store.

MDS-00929
unable to look up name "{0}" in JNDI context

Category:
Configuration

Cause:
The implementation class to use for initial context was not found.

Action:
Verify that environment properties are configured using system properties or application resources files.

MDS-00930
The JNDI location details for the registered datasource are incomplete.

Category:
Configuration

Cause:
JNDI location details were found to be incomplete.

Action:
Provide complete JNDI location information in the configuration.

MDS-00931
The database version is {0}.{1}, but MDS requires at least {2}.{3}.

Category:
Upgrade

Cause:
The database version is older than the minimum database version required for hosting MDS repository.

Action:
Upgrade the database to the minimum required version. Contact the database administrator for assistance.

MDS-00932
unknown database vendor {0}

Category:
Installation

Cause:
The database vendor could not be identified.

Action:
Verify that the MDS repository is hosted on supported database vendors.

MDS-00933
cannot create data source using URL "{0}"

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
An error occurred while creating the data source using the specified URL.

Action:
Verify that the URL specified is correct and retry the operation.

MDS-00934
XDB is not supported on database platform {0}.

Category:
Programmatic

Cause:
An attempt was made to store XML metadata in a non-XDB database.

Action:
Verify that the correct MDS repository is being used.

MDS-00935
Unable to complete operation even after maximum connection retries ({0}).

Category:
High Availability

Cause:
An error occurred while performing operation.

Action:
Ensure that the database is running. Retry the operation later.

MDS-00936
Fast Connection Failover is not supported on the underlying database connection ({0}).

Category:
High Availability

Cause:
The underlying database connection did not support fast connection failover, and retry-connection was set to true in either the config file, or programmatically.

Action:
Either stop and then restart the database connection and configure it to allow fast connection failover, or do not attempt to set retry-connection to true.

MDS-00937
A local transaction operation like commit or rollback cannot be used in a global transaction on connection "{0}".

Category:
Configuration

Cause:
The database connection was configured for global transactions, but MDS was not configured to support global transactions.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Reconfigure the database connection to use local transactions. Change "tx-level" attribute on the MDS datasource to "local".

MDS-00938
Unable to get an ADF library class loader

Category:
Data

Cause:
MDS expects to retrieve a resource from an ADF library, but is unable to obtain an ADF library classloader.

Action:
Consider whether the resource should be repackaged in an ADF library rather than an ordinary jar.

MDS-01059
document with the name {0} missing in the source metadata store

Category:
Data

Cause:
The document to be transferred did not exist in the source metadata store.

Action:
Verify that the document name is correct, and that it exists in the source metadata store.

MDS-01061
Listener {0} cannot be instantiated.

Category:
Configuration

Cause:
The listener class did not exist.

Action:
Verify that the name of the listener class is correct. Ensure that the class is available on the class path.

MDS-01104
finding no documents for processing that match the pattern provided

Category:
Data

Cause:
No documents were found on the source metadata store that matched the pattern provided, or that matched the document name.

Action:
Provide another pattern or document name, or provide another metadata store in which to look for the documents.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-01105
invalid label {0}

Category:
Data

Cause:
The label specified for the source metadata store did not exist.

Action:
Verify that the label name is correct, or provide a label that exists in the source metadata store.

MDS-01106
The TransferTypeRestriction {0} cannot be associated with given TransferType {1}.

Category:
Programmatic

Cause:
The given TransferTypeRestriction cannot be associated with the specified TransferType.

Action:
Ensure that given TransferTypeRestriction is valid for the specified TransferType.

MDS-01107
Post transfer label cannot be created in target store.

Category:
Data

Cause:
Post transfer label cannot be created in the target store. Examine the cause exception messages to find the root cause of it.

Action:
Examine any accompanying messages to decide if further action is required.

MDS-01108
TransferType cannot be null for ExtendedTransferType.

Category:
Data

Cause:
TransferType provided to create ExtendedTransferType was null.

Action:
Provide valid TransferType to create ExtendedTransferType.

MDS-01109
The target archive configured in ArchiveMetadataStore already exists. Cannot export the documents into an existing archive file.

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The target archive already exists. Exporting the documents into an existing archive is not allowed.

Action:
Export the documents into a non existing archive file.

MDS-01110
Sandbox export operation allowed only from a database metadata store to an archive metadata store.

Category:
Configuration

Cause:
Either source metadata store is not a database or the target metadata store is not an archive in sandbox export operation.

Action:
Configure source metadata store to be a database and target metadata store to be an archive in sandbox export operation.

MDS-01111
Sandbox import operation allowed only from Archive Metadata Store to a Database Metadata store.

Category:
Configuration

Cause:
Either source metadata store is not an archive metadata store or the target metadata store is not a database in sandbox import operation.

Action:
Configure source metadata store to be an archive metadata store and target metadata store to be a database in sandbox import operation.

MDS-01112
Transfer unit list in a Sandbox export/import operation should have at least one transfer unit.

Category:
Data

Cause:
Transfer unit list in Sandbox export/import operation empty.

Action:
Ensure that there is at least one transfer unit to be transferred in sandbox export/import operation.

MDS-01113
Sandbox metadata file required for import to a new sandbox operation.

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Sandbox metadata file missing in source Archive metadata store in import to a new sandbox operation.

Action:
Import to a new sandbox only from an archive store whose contents were exported from a sandbox and contain sandbox metadata document.

MDS-01114
Sandbox with same name as the one imported in a sandbox import operation exists on the target metadata store.

Category:
Programmatic

Cause:
Sandbox with same name already exists on the target metadata store and the flag to force creation of sandbox is not set to true.

Action:
Pass true for forceSBCreation to TransferParams.createForSandboxImport() or destroy sandbox already existing with same name on the target metadata store in sandbox import operation.

MDS-01115
Source sandbox in a sandbox export operation does not contain metadata.

Category:
Programmatic

Cause:
Source sandbox in export operation was not created with metadata.

Action:
Export from a Sandbox that was created with metadata.

MDS-01116
Existing target sandbox in import operation does not contain metadata.

Category:
Programmatic

Cause:
Target sandbox in an import into an existing sandbox operation was not created with metadata.

Action:
Import into an existing sandbox that was created with metadata.

MDS-01117
Sandbox archive imported into an existing sandbox.

Category:
Programmatic

Cause:
The archive imported into an existing sandbox contains sandbox metadata.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Import only regular archives(that do not contain sandbox metadata) into an existing sandbox.

MDS-01118
Sandbox export operation not supported because the source MDS database repository is of older version that does not support this feature.

Category:
Configuration

Cause:
Sandbox metadata is needed to transfer documents from sandbox. Source store being used does not support storing metadata for sandbox.

Action:
Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.

MDS-01119
Sandbox import operation not supported because the target MDS database repository is of older version that does not support this feature.

Category:
Configuration

Cause:
Sandbox metadata is needed to transfer documents from sandbox. But target store being used does not support storing metadata for sandbox.

Action:
Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.

MDS-01120
Sandbox transfer unit list creation not supported because the source MDS database repository is of older version that does not support this feature.

Category:
Configuration

Cause:
Sandbox metadata is needed to transfer documents from sandbox. Source store being used does not support storing metadata for sandbox.

Action:
Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.

MDS-01121
Document "mds-transfer-config.xml" cannot be read by MDSTransfer.

Category:
Data

Cause:
The /meta-inf/mds-transfer-config.xml document cannot be read from source store. Refer to cause exception for more information on the actual reason for failure.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Look for messages that describe the cause exception, and then take the appropriate action.

MDS-01122
Metadata Object Name "{0}" specified in the mds-transfer-config.xml to preserve user updated documents in target repository is not a valid metadata object name.

Category:
Data

Cause:
Metadata object name specified in /meta-inf/mds-transfer-config.xml to preserve user updated documents in target repository is not a valid metadata object name.

Action:
Make sure the document name specified in mds-transfer-config.xml is a valid metadata object name but not a special document name.

MDS-01123
The metadata path "{0}" specified in the mds-transfer-config.xml to preserve user updated documents in target repository is not a valid metadata path.

Category:
Data

Cause:
The metadata path specified in /meta-inf/mds-transfer-config.xml to preserve the user updated documents in target repository is not a valid metadata path.

Action:
Make sure the metadata path specified in mds-transfer-config.xml is a valid metadata path.

MDS-01150
Reference is null or empty.

Category:
Programmatic

Cause:
A reference value was null or empty.

Action:
Use a valid reference value that is not empty or null.

MDS-01151
Id/LocationPath reference is null or missing.

Category:
Programmatic

Cause:
An Id/LocationPath reference value was null or empty.

Action:
Use a valid Id/LocationPath reference value that is not empty or null.

MDS-01153
invalid LocationPath expression "{0}"

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
The LocationPath expression was invalid.

Action:
Use a valid LocationPath format. The LocationPath expression should follow the format "/text()" or "/text()[x]", where 'x' is the index of "text block".

MDS-01154
invalid LocationPath expression "{0}"

Category:
Programmatic

Cause:
The node index in the LocationPath expression was invalid.

Action:
Change the node index in the LocationPath expression to a number greater than or equal to 1.

MDS-01158
Expecting a base document. Reference "{0}" is a special document.

Category:
Programmatic

Cause:
A base document was expected, but the reference was a special document.

Action:
Use a valid base document.

MDS-01159
Expecting absolute document reference. Reference "{0}" has local element reference portion.

Category:
Programmatic

Cause:
The supplied reference was not the expected type.

Action:
Ensure the reference is of the expected type.

MDS-01160
Expecting absolute document reference. Reference "{0}" is a relative reference to the document.

Category:
Programmatic

Cause:
The supplied reference was not the expected type.

Action:
Ensure the reference is of the expected type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-01161
Reference "{0}" has an invalid character "{1}".

Category:
Programmatic

Cause:
The supplied reference did not follow the MDS naming standard.

Action:
Use valid characters for the reference.

MDS-01162
Reference "{0}" has an invalid XML attribute character.

Category:
Programmatic

Cause:
The supplied reference did not follow the MDS naming standard.

Action:
Use valid characters for the reference.

MDS-01163
invalid reference "{0}"

Category:
Programmatic

Cause:
The supplied reference did not follow the MDS naming standard.

Action:
Ensure that the reference follows the MDS naming standard.

MDS-01164
invalid reference "{0}" for a translation document

Category:
Programmatic

Cause:
The supplied reference did not have the expected document extension (.xlf).

Action:
Use the correct extension, .xlf, for the translation document.

MDS-01165
invalid reference "{0}" for a customization document

Category:
Programmatic

Cause:
The supplied reference did not have the expected document extension (.xml or .lso).

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Use the correct extension for the customization document, .xml for MetadataObject or .lso for StreamedObject.

MDS-01166
invalid reference "{0}" for a metadata extension document

Category:
Programmatic

Cause:
The supplied reference did not have the expected document extension (.rdf).

Action:
Use the correct extension, .rdf, for the metadata extension document.

MDS-01167
There is no namespace declaration for the prefix "{1}" used in LocationPath expression "{0}".

Category:
Programmatic

Cause:
The LocationPath expression was incomplete.

Action:
Use a valid LocationPath format.

MDS-01168
Partition name "{0}" starts or ends with character "{1}". Partition name cannot contain leading or trailing spaces, ".", "-"

Category:
Configuration

Cause:
The supplied partition name contained leading or trailing spaces, ".", "-".

Action:
Ensure that the partition name follows the MDS naming standard for partitions.

MDS-01169
Partition name "{0}" has an invalid character "{1}".

Category:
Configuration

Cause:
The supplied partition name did not follow the MDS naming standard.

Action:
Use valid characters for the partition name.

MDS-01170
Partition name is null or empty.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Partition name value was null or empty.

Action:
Use a valid partition name that is not empty or null.

MDS-01171
The ID prefix generated by concatenating the layer name "{0}" and layer value "{1}" is not a valid MDS ID.

Category:
Programmatic

Cause:
The ID prefix generated by concatenating the layer name with layer value did not follow the MDS ID naming standard.

Action:
Ensure that the ID prefix generated by concatenating the layer name with layer value follows the MDS ID naming standard.

MDS-01200
This operation is not supported.

Category:
Programmatic

Cause:
An MDS query operation was attempted, but this particular operation is not supported.

Action:
Note the stack backtrace and context of the operation, and contact Oracle Support Services.

MDS-01201
An invalid parameter cannot be used when constructing a query condition.

Category:
Programmatic

Cause:
An invalid parameter was passed to the class ConditionFactory.

Action:
Note the stack backtrace and context of the operation, and contact Oracle Support Services.

MDS-01205
A SQL error is occurring when performing the query: "{0}" with binds {1}.

Category:
Programmatic

Cause:
An MDS query on a database store led to a SQL error.

Action:
Note the stack backtrace and context of the operation, including the reported SQL query and error, and contact Oracle Support Services.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-01206
The array size for the query must be greater than zero.

Category:
Programmatic

Cause:
An MDS query specified a fetch unit size that was not positive.

Action:
Note the stack backtrace and context of the operation and contact Oracle Support Services.

MDS-01207
The namespace mapping for the prefix "{0}" specified in the location path, is missing.

Category:
Configuration

Cause:
During XPath evaluation, the namespace prefix was used, but the prefix was not mapped to a namespace.

Action:
Note the stack backtrace and context of the operation and contact Oracle Support Services.

MDS-01208
MDS query condition produces more than {0} characters of SQL where clause.

Category:
Programmatic

Cause:
An MDS query condition was so large that it would produce a very large SQL statement.

Action:
Note the stack backtrace and context of the operation, and contact Oracle Support Services.

MDS-01209
The exclusion CustLayerFilter for layer {0} cannot contain another exclusion CustLayerFilter.

Category:
Programmatic

Cause:
An exclusion CustLayerFilter is nested in another exclusion CustLayterFilter.

Action:
Do not include an exclusion CustLayerFilter inside another exclusion CustLayerFitler.

MDS-01250
The file path "{0}" does not exist.

Category:
Files

Cause:
An invalid path was provided.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Retry the operation with a valid file path.

MDS-01251
The parameter file {0} has no namespace on the document element.

Category:
Data

Cause:
A namespace was missing from the parameter file provided.

Action:
Provide a parameter file with valid namespace information.

MDS-01252
The parameter file {0} must have either {1} or {2} definition.

Category:
Data

Cause:
No source stores or target stores information were provided in the parameter file.

Action:
Check the parameter file to have source and target store information and retry.

MDS-01253
The parameter file {0} must not have both {1} and {2} definitions.

Category:
Data

Cause:
An attempt was made to transfer from source directory to target directory. Both source and target as directories is not supported.

Action:
Provide correct source and target definition. Either source or target should be a metadata store.

MDS-01254
The parameter file {0} contains same store definition for sourceStore and targetStore.

Category:
Data

Cause:
An attempt was made to transfer from and to the same store. The definition for sourceStore cannot be the same as the definition for targetStore.

Action:
Provide correct source and target information. Change either source or target store definition.

MDS-01255
The property {0} has not been supplied.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
The required property was missing from the parameter file.

Action:
Check the parameter file and supply the required property. Refer to the MDS documentation for the correct syntax. A sample parameter file is also part of documentation.

MDS-01258
The value {0} for property {1} is invalid.

Category:
Data

Cause:
An invalid property value was provided in the parameter file.

Action:
Provide a valid property value. Refer to the MDS documentation for the correct syntax. A sample parameter file is also part of documentation.

MDS-01259
The metadata store "{0}" cannot be instantiated.

Category:
Data

Cause:
An error occurred during the instantiation of the class for the metadata store.

Action:
Verify that correct values are provided in the parameter file. Refer to the error messages in application logs that describe the cause exception for more information on the actual reason for failure.

MDS-01260
failure to process command-line arguments

Category:
Data

Cause:
Invalid command-line parameters were provided.

Action:
Provide valid command-line parameters, and retry the operation. Refer to the MDS documentation for syntax of the tool parameters, or run the tool without parameters in order to get the Help message.

MDS-01262
failure of transfer operation on a read-only target metadata store

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The target metadata store used for transfer was read-only, for example a classpath store.

Action:
Provide a writable target metadata store.

MDS-01263
operation failure on the resource {0} because source metadata store is read-only

Category:
Configuration

Cause:
An attempt was made to delete, create, update or get a mutable metadata object from a read-only source metadata store.

Action:
Provide a writable source metadata store.

MDS-01264
The given element must contain either "customization" or "translation" configuration.

Category:
Configuration

Cause:
A customization or a translation configuration was missing for an element.

Action:
Examine the transfer parameter file for valid MDS configuration.

MDS-01265
Invalid parameter file {0}. Reason: <{1}:{2}> {3}

Category:
Files

Cause:
Parameter file provided was not valid.

Action:
Provide a valid parameter file. Refer to the MDS documentation for the correct syntax. A sample parameter file is also part of documentation. Refer to sample parameter for correct syntax.

MDS-01266
The associated customization document is missing for a given customization class {0} for the given document name {1}.

Category:
Data

Cause:
The associated customization document for the given customization class did not exist.

Action:
If the associated customization document was to be transferred, verify that it exists. Otherwise, no action is required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-01267
The associated translation document is not found for a given locale {0} for the given document name {1}.

Category:
Data

Cause:
Associated translation document did not exist for the given locale.

Action:
If the associated translation document was expected to be transferred, verify if it exists, otherwise, no action required.

MDS-01268
The associated extended metadata document for the given document name {0} is missing.

Category:
Data

Cause:
No associated extended metadata document for the given document name existed.

Action:
If the document was to be transferred, verify that the document exists. Otherwise, no action is required.

MDS-01270
Opening and closing parentheses do not match.

Category:
Configuration

Cause:
Either an opening or closing parentheses was missing.

Action:
Check and correct the namespace mappings provided. Each opening parentheses should have an equivalent closing parentheses and vice versa.

MDS-01271
Cannot get the dependency registry

Category:
Configuration

Cause:
An error occurred while getting the dependency registry.

Action:
Retry the operation. If the problem persists, look for messages that describe the cause exception for more information on the actual reason for failure.

MDS-01272
unable to read mds-webapp-config.xml file

Category:
Files

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The mds-webapp-config.xml file was invalid.

Action:
Confirm that the mds-webapp-config.xml file for the application is well formed, and valid.

MDS-01273
The operation on the resource {0} failed because source metadata store mapped to the namespace {1} is read only.

Category:
Configuration

Cause:
An attempt was made to delete, create, update or get a mutable metadata object from a readonly source metadata store.

Action:
Provide a writable source metadata store.

MDS-01301
Element "{1}", namespace "{0}" is not a valid child under parent "{3}", namespace "{2}".

Category:
Programmatic

Cause:
An attempt was made to add, insert or replace a child element of the wrong type.

Action:
Check the schema definition and ensure that the child element is the correct type.

MDS-01302
failure to load schema file "{0}"

Category:
Data

Cause:
An exception occurred in the XMLEF layer during processing of the schema definitions.

Action:
Look for messages that describe the cause exception, and then take the appropriate action.

MDS-01303
failure to register grammar from schema file "{0}"

Category:
Data

Cause:
An exception occurred in the XMLEF layer during addition of schema definitions.

Action:
Look for messages that describe the cause exception, and then take the appropriate action.

MDS-01305
failure to locate schema file "{0}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
The schema definition file was not found.

Action:
Verify that the schema file name is correct, and that it is in the correct location.

MDS-01306
Grammar from a Web application can be added only once.

Category:
Configuration

Cause:
There were multiple method calls to add grammar from a web application.

Action:
Verify that a grammar definition has already been added for the given MDSInstance and ServletContext. If it has then remove the calls to add it multiple times.

MDS-01307
no schema files for processing

Category:
Programmatic

Cause:
No schema files were found against which beans can be generated.

Action:
Pass an existing schema file to the bean generator.

MDS-01308
Event "{0}" is not supported.

Category:
Programmatic

Cause:
An attempt was made to use event types that are not supported for the selected content model.

Action:
Use only the event types that are allowed for the selected content model.

MDS-01309
ContentModelPipeline is empty.

Category:
Programmatic

Cause:
The contentModelPipeline contained an empty or null builder list.

Action:
A list of one or more valid builders must be available in the ContentModelPipeline.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-01310
Invalid ContentModelPipeline. Missing {0}.

Category:
Programmatic

Cause:
The expected builder was not available in builder list of the ContentModelPipeline.

Action:
Valid builders must be supplied to the ContentModelPipeline.

MDS-01311
The DOM tree does not support the DOM event model.

Category:
Programmatic

Cause:
This DOM Document did not implement EventTarget interface.

Action:
Verify whether the Oracle XML Developer's Kit is used.

MDS-01312
Change-list transaction state is invalid.

Category:
Programmatic

Cause:
The current change-list transaction state is invalid for the customization operation performed.

Action:
Ensure Change-list to be in valid transaction state to perform the necessary customization operation.

MDS-01313
The argument for document cannot be null.

Category:
Data

Cause:
The argument for DocumentName was null.

Action:
Provide a valid DocumentName.

MDS-01314
TypeAnnotationProvider cannot be null.

Category:
Data

Cause:
The argument for TypeAnnotationProvider was null.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Provide a valid TypeAnnotationProvider.

MDS-01316
Support for XPath is not implemented yet.

Category:
Configuration

Cause:
Support for XPath has not been implemented yet.

Action:
Provide a valid Configurable ID.

MDS-01319
JAXP support is not available. Falling back to using Oracle XML Developer's Kit for parsing the document {0}.

Category:
Configuration

Cause:
JAXP support was not available.

Action:
None.

MDS-01320
Modifying the prefix declaration for {0} from "{1}" to "{2}" in document {3} through customizations is not supported.

Category:
Programmatic

Cause:
An attempt was made to change an existing prefix declaration.

Action:
Avoid attempts to change existing prefix declarations.

MDS-01321
Node type should be one of ImmutableModelNode.ELEMENT or ImmutableModelNode.TEXT or ImmutableModelNode.CDATA.

Category:
Data

Cause:
The node was not of the type ImmutableModelNode.ELEMENT or ImmutableModelNode.TEXT or ImmutableModelNode.CDATA.

Action:
Ensure the node type is one of the following types: ImmutableModelNode.ELEMENT or ImmutableModelNode.TEXT or ImmutableModelNode.CDATA.

MDS-01322
Value "{0}" does not satisfy "{1}" type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
The data type conversion failed.

Action:
Verify that the expected XSD built-in simple data type and the passed-in string value are convertible.

MDS-01323
Value "{0}" has an incorrect number of characters for a base64Binary.

Category:
Data

Cause:
The value did not represent a valid Base64Binary.

Action:
Verify that the input value is valid.

MDS-01324
Unknown XML schema built-in type "{0}"

Category:
Data

Cause:
An attempt was made to use an unknown XML schema built-in type.

Action:
Use only valid XML schema built-in types.

MDS-01325
unable to load type definition "{0}"

Category:
Configuration

Cause:
Could not load this type definition because the specified location did not exist.

Action:
Ensure that the specified location for the type definition exists.

MDS-01326
Loading of type definition from element "{0}" is not supported.

Category:
Configuration

Cause:
An attempt was made to load a type definition from the specified element that is not supported in the MDS configuration.

Action:
Examine the schema definition to ensure that the entry specified in type definition is correct.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-01327
unable to load data from "{0}" into {1}

Category:
Configuration

Cause:
An error occurred while loading the content of this configuration element.

Action:
Examine the schema definition to ensure that the content of this configuration element is correct.

MDS-01328
unable to load element "{0}" into {1}

Category:
Configuration

Cause:
An error occurred while loading this configuration element.

Action:
Examine the schema definition to ensure this configuration element is correctly specified in the MDS configuration.

MDS-01329
unable to load element "{0}"

Category:
Configuration

Cause:
An error occurred while loading this configuration element.

Action:
Examine the schema definition to ensure this configuration element is correctly specified in the MDS configuration.

MDS-01330
unable to load MDS configuration document

Category:
Files

Cause:
An I/O or parsing error occurred while loading the MDS configuration document.

Action:
Verify that the URL is correct, and ensure that the document contains valid MDS configuration information.

MDS-01331
unable to load MDS configuration document "{0}"

Category:
Files

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred in loading the content of MDS configuration document.

Action:
Verify that the URL is correct, and ensure that the document contains valid MDS configuration information.

MDS-01332
Class {0} is not a subclass or implementation of {1}.

Category:
Configuration

Cause:
The class specified in the configuration information did not extend the required class, or implement the required interface.

Action:
Ensure that the class specified in the configuration information extends the correct class, or implements the correct interface.

MDS-01333
missing element "{0}"

Category:
Configuration

Cause:
This element was missing from the MDS configuration information.

Action:
Ensure that the element is specified in the configuration information.

MDS-01334
missing element "{0}" in document "{1}"

Category:
Configuration

Cause:
This element was missing from the MDS configuration information.

Action:
Ensure that this element is specified in the configuration document.

MDS-01335
namespace "{0}" mapped to metadata-store-usage "{1}" but its definition was not found in MDS configuration.

Category:
Configuration

Cause:
Metadata-store-usage element that was referenced by a namespace not found in MDS configuration.

Action:
Ensure that this element is specified in MDS configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-01336
No XML element is provided to create {0}.

Category:
Configuration

Cause:
A null XML element was passed to the constructor of this configuration object.

Action:
Ensure that a valid XML element is provided to create a new instance of this configuration.

MDS-01337
No URL is provided to create {0}.

Category:
Configuration

Cause:
A null URL was passed to the constructor of this configuration object.

Action:
Ensure that a valid URL is provided to create a new instance of this configuration.

MDS-01340
More than one metadata store can be resolved for the namespace "{0}".

Category:
Configuration

Cause:
There were multiple namespace to metadata store mappings in the persistence configuration that satisfied the request for the metadata store of a given namespace.

Action:
Correct the namespace mapping in persistence configuration to ensure that the namespace is mapped to only one metadata store.

MDS-01341
Namespace mapping for "{0}" is overridden by namespace mapping for "{1}"; and they conflict.

Category:
Configuration

Cause:
A conflicting mapping to this namespace has already been defined in the persistence configuration.

Action:
Correct persistence configuration to ensure that there is no conflicting mapping to this namespace.

MDS-01342
No metadata store is mapped to the namespace "{0}".

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
No namespace mapping could be found in the persistence configuration for the specified namespace.

Action:
Ensure that a correct namespace is passed into the method concerned, or alter the application configuration to define the specified namespace.

MDS-01343
There is a duplicate file extension mapping for "{0}".

Category:
Configuration

Cause:
A mapping to this file extension has already been defined in the file type configuration.

Action:
Remove the duplicate file extension mapping from the file type configuration.

MDS-01344
cannot create {0} due to null parameter

Category:
Configuration

Cause:
A null parameter was passed to the constructor of this configuration object.

Action:
Ensure that a valid parameter is provided to create a new instance of this configuration.

MDS-01346
The given namespace path "{0}" is not a valid path.

Category:
Configuration

Cause:
An invalid path was provided to create a namespace.

Action:
Ensure that a valid path is provided to create a namespace.

MDS-01347
Base restriction is supported only for classpath store or servlet context store: namespace "{0}" mapped to "{1}".

Category:
Configuration

Cause:
The base restriction was specified for a metadata store other than the classpath metadata store and servlet context store.

Action:
Correct the namespace mapping in the configuration to ensure that the base restriction is specified only for the classpath store or servlet context store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-01348
unable to save configuration document to "{0}"

Category:
Files

Cause:
An I/O error occurred while writing the configuration to a file.

Action:
Check the file system and ensure that the file location is writable.

MDS-01349
unable to read existing configuration document "{0}" to be updated

Category:
Files

Cause:
An I/O or parsing error occurred while reading the configuration file.

Action:
Ensure that the configuration file does exist and has valid contents.

MDS-01350
Adding namespace "{0}" mapped to "{1}" conflicts with existing namespace "{2}" mapped to "{3}".

Category:
Configuration

Cause:
An attempt was made to add a new namespace that conflicted with an existing namespace because it mapped to a different repository.

Action:
Ensure that the new namespace does not map to a different repository if the new namespace is a super-namespace or sub-namespace of existing namespaces.

MDS-01351
Adding namespace "{0}" with "{1}" restriction conflicts with existing namespace "{2}" with "{3}" restriction.

Category:
Configuration

Cause:
An attempt was made to add a new namespace that conflicted with an existing namespace in the namespace restriction.

Action:
Ensure that the new namespace does not conflict with existing namespaces in the namespace restriction if the new namespace is a super-namespace or sub-namespace of existing namespaces.

MDS-01352
Customization configuration with granular mapping "{0}" is unsupported; only the slash, "/", is allowed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
An attempt was made to add an invalid namespace mapping of the customization configuration. Only one namespace to customization class list mapping is currently allowed, and that namespace has to be a slash (/).

Action:
Ensure that only the slash (/) is specified in the namespace mapping of the customization configuration.

MDS-01353
unable to retrieve customization layer values from "{0}"

Category:
Files

Cause:
An I/O or parsing error occurred while reading the specified file to retrieve customization layer values.

Action:
Ensure that the file does exist and has valid contents.

MDS-01355
Both TypeConfig parameters contain Grammar Providers. Only one Grammar Provider is allowed.

Category:
Configuration

Cause:
A Grammar Provider was specified in multiple type configuration sources.

Action:
Ensure that only one Grammar Provider is specified in the type Configuration.

MDS-01356
Both TypeConfig parameters contain Metadata Providers. Only one Metadata Provider is allowed.

Category:
Configuration

Cause:
A Metadata Provider was specified in multiple type configuration sources.

Action:
Ensure that only one Metadata Provider is specified in the type Configuration.

MDS-01357
MDS configuration is not compatible with JAXB 1.0.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
JAXB 1.0 jar file (xml.jar) was found on the classpath before any JAXB 2.0 jar files.

Action:
Ensure that JAXB 2.0 jar files appear on the classpath before JAXB 1.0 jar file (xml.jar).

MDS-01358
Invalid MDS configuration. Configuring multiple metadata stores as the default repository for customizations.

Category:
Configuration

Cause:
Multiple metadata stores were configured as the default repository for customizations in the MDS configuration.

Action:
Ensure that only a single metadata store is configured as the default repository for customizations.

MDS-01359
The namespace used (http://xmlns.oracle.com/mds/config_10_1_3_001) in the configuration document is deprecated. Update the configuration document to use "http://xmlns.oracle.com/mds/config" as the namespace.

Category:
Configuration

Cause:
The namespace used (http://xmlns.oracle.com/mds/config_10_1_3_001) in the configuration document is deprecated.

Action:
Update the configuration document to use "http://xmlns.oracle.com/mds/config" as the namespace.

MDS-01360
Invalid MDS configuration. The attribute file-type-extension on the file-type element is missing for file type configuration.

Category:
Configuration

Cause:
The attribute file-type-extension was not specified on the file-type element for file type configuration.

Action:
Ensure that a valid file-type-extension attribute is specified for every file-type element.

MDS-01361
cannot add XSD grammar

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt was made to add XSD grammar made by passing in a SchemaGrammarProvider.

Action:
Ensure that the grammar provider is obtained using oracle.jdeveloper.webapp.runtime.WebAppDesignContext.

MDS-01362
Failed to auto-purge MDS repository: "{0}".

Category:
Other

Cause:
MetadataStore was scheduled for auto-purge after the MDSInstance was released

Action:
Try later and contact support if persists.

MDS-01363
Failed to lookup datasource with JNDI name "{0}" configured for the DBMetadataStore, defaulting to use ClassPathMetadataStore.

Category:
Configuration

Cause:
Application was configured with DBMetadataStore using JNDI datasource and JNDI lookup failed when running outside application server.

Action:
No action required if defaulting to ClasspathMetadataStore is acceptable. Otherwise, use appropriate configuration such as FileMetadataStore.

MDS-01364
Namespace mapping for "{0}" is overlapping with namespace mapping for "{1}"; the first mapping is redundant.

Category:
Configuration

Cause:
Redundant namespace mappings defined in the persistence configuration.

Action:
Correct persistence configuration to ensure that there is no overlapping redundant mapping.

MDS-01365
Multiple metadata stores found with deploy-target attribute set to true, only one allowed per configuration.

Category:
Configuration

Cause:
Multiple metadata stores were configured as the deployment target.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that only a single metadata store is configured for deployment.

MDS-01366
Cannot find a metadata store with deploy-target attribute set to true

Category:
Configuration

Cause:
A single metadata store must be configured as a deploy target. None was found.

Action:
Ensure that a single metadata store is configured for deployment.

MDS-01367
Failed to create {0}. Invalid MDS configuration specified in: "{1}"

Category:
Configuration

Cause:
Declarative MDS configuration is invalid.

Action:
Specify correct mds configuration information and try creating the configuration again.

MDS-01368
Variable "{0}" used in configuration document is not defined either as system property or as environment variable.

Category:
Configuration

Cause:
This variable was not defined.

Action:
Ensure that this variable is defined before loading the configuration.

MDS-01369
Variable declaration in "{0}" in configuration document is incorrect.

Category:
Configuration

Cause:
Variable did not either start with "${" or it did not end with "}".

Action:
Ensure that the configuration variable is correctly declared in the form ${var}.

MDS-01370
MetadataStore configuration for metadata-store-usage "{0}" is invalid.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
MetadataStore class or some of its properties were not valid.

Action:
Ensure that the MetadataStore class exists and all required properties are valid. See message of the cause exception for more information on the actual reason for failure.

MDS-01371
ADF security is not configured in "{0}", password cannot be securely processed.

Category:
Configuration

Cause:
ADF security configuration was not found in the config file.

Action:
Set the password using JDeveloper to ensure required configuration is generated.

MDS-01373
unable to retrieve password.

Category:
Configuration

Cause:
unable to retrieve the password due to exception in security layer.

Action:
See message of the cause exception for more information on the actual reason for failure.

MDS-01374
unable to save password.

Category:
Configuration

Cause:
unable to save the password due to exception in security layer.

Action:
See message of the cause exception for more information on the actual reason for failure.

MDS-01375
No password defined for DBMetadataStore in configuration file or in the wallet file.

Category:
Configuration

Cause:
DBMetadataStore uses JDBC based configuration but no password specified.

Action:
Set the password for the DBMetadataStore using JDeveloper.

MDS-01376
Unable to get database connection from data source "{1}" configured with JNDI name "{0}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Failed to retrieve a database connection from the data source either because the data source is not configured correctly or the database details are not correct.

Action:
Test the data source to check if it is correctly configured and if the database can be accessed. See message of the cause exception for more information on the actual reason for failure.

MDS-01377
Unable to get database connection from data source configured with JNDI name "{0}".

Category:
Configuration

Cause:
Failed to retrieve a database connection from the data source either because the data source is not configured correctly or the database details are not correct.

Action:
Test the data source to check if it is correctly configured and if the database can be accessed. See message of the cause exception for more information on the actual reason for failure.

MDS-01378
metadata-store-usage attribute should not be set on namespace "{0}" defined in mds-config.xml.

Category:
Configuration

Cause:
metadata-store-usage attribute was set on the specified namespace in mds-component-config, but this namespace is always assumed to map to deploy-target metadata store.

Action:
Ensure that the metadata-store-usage attribute is removed on specified namespace in mds-config.xml.

MDS-01379
Tenant scope "{0}" is not valid for namespace "{1}" with namespace restriction "{2}".

Category:
Configuration

Cause:
Tenant scope configured for the namespace is not supported with the configured namespace restriction.

Action:
Resolve the conflict between tenant scope and namespace-restriction in the application configuration.

MDS-01380
Tenant scoped base metadata in package "{0}" can not have global customization layer "{1}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Tenant scope GLOBAL on the specified customization layer conflicts with tenant scope TENANT on the base namespace.

Action:
Resolve the conflicts between the tenant scope on the base namespace and that on the customization layer.

MDS-01381
Customization layer "{0}" has been configured more than once with the same tenant scope.

Category:
Configuration

Cause:
Duplicate configuration for the same customization layer was found.

Action:
Remove the duplicate customization layer configuration from adf-config.xml of the application or component config (mds-config.xml) on classpath.

MDS-01382
Customization layer "{0}" has been configured more than once with conflicting tenant scopes.

Category:
Configuration

Cause:
Conflicting tenant scope configurations was found for the same customization layer.

Action:
Remove the incorrect customization layer configuration from adf-config.xml of the application or component config (mds-config.xml) on classpath.

MDS-01383
Sandbox name should be provided for registering a sandbox change listener.

Category:
Configuration

Cause:
No sandbox name was provided for registering the sandbox change listener.

Action:
Provide a valid sandbox name when registering the sandbox change listener.

MDS-01384
Sandbox change listener is not found when registering the lifecycle listener for sandbox {0}.

Category:
Configuration

Cause:
The SendboxChangeListener being registered was null.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Provide a valid sandbox change listener when registering the lifecycle listener for the sandbox.

MDS-01385
Tenant scope "{0}" as base tenant scope is not valid for namespace "{1}".

Category:
Configuration

Cause:
The specified tenant scope type could not be configured as base tenant scope for the namespace.

Action:
Use the correct base tenant scope parameter to create the namespace.

MDS-01386
Multitenant application can not be configured with metadata store "{0}" that does not support multitenancy.

Category:
Configuration

Cause:
A metadata store that does not support multitenancy was configured for a multitenant enabled application.

Action:
Configure a metadata store such as DBMetadataStore that supports multitenancy.

MDS-01387
Tenant with id "{0}" is not allowed to change the autopurge settings; only the global admin can change this configuration.

Category:
Configuration

Cause:
A tenant cannot change the autopurge configuration..

Action:
Only a global admin can change the autopurge configuration.

MDS-01388
Unable to set cache size to {0} KiloBytes.

Category:
Programmatic

Cause:
The cache size requested was invalid either because it was negative or it was too large for the Java Object Cache.

Action:
Check that the specified size is >0 and within the limit for the cache implementation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-01389
content-type cannot be specified for content-config mapping [File extension={0}, Path to match={1}] since isStreamed is set to true.

Category:
Configuration

Cause:
Conflicting settings between content-type and isStreamed were found in content-config.

Action:
Change content-options to use content-type without causing conflict.

MDS-01390
An audit event name for component "{0}" is not specified.

Category:
Configuration

Cause:
An audit event was defined, but a name for the event was not specified.

Action:
Give the audit event a valid name.

MDS-01391
"{0}" is not a valid audit event name.

Category:
Configuration

Cause:
An invalid audit event name was found. An audit event name should start with a letter and contain only letters and digits.

Action:
Specify a valid name for the audit event.

MDS-01392
Conflicting definitions were found for the audit event with name "{0}" and audit-component "{1}".

Category:
Configuration

Cause:
Conflicting audit event definitions were found in audit-component element.

Action:
Remove or modify one of the conflicting audit events.

MDS-01393
Multiple audit events named "{0}" are defined for component "{1}".

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Duplicate audit events were found in audit-component element.

Action:
Remove or modify one of the duplicate audit events.

MDS-01394
The repository-name property element is not specified for a metadata-store element that does not have the class-name property.

Category:
Configuration

Cause:
The repository-name property element was not specified for a metadata-store element. It is required when the class-name property is not specified on the metadata-store element to support look up of the repository details.

Action:
Specify the repository name in a child property element of the metadata-store element or specify the class-name property for the metadata-store element in the configuration file.

MDS-01395
Unable to look up the details of the specified repository {0} for the metadata-store configuration.

Category:
Configuration

Cause:
The specified repository was not registered in the domain or the repository was not configured properly.

Action:
Ensure that the specified repository for the metadata-store is configured and registered properly in the domain.

MDS-01396
metadata-store-usage attribute is not set on namespace "{0}" defined in mds-config.xml.

Category:
Configuration

Cause:
metadata-store-usage attribute was missing on the specified namespace in mds-component-config.

Action:
Ensure that the metadata-store-usage attribute is set on the specified namespace in mds-config.xml.

MDS-01397
Multiple audit events with display name "{0}" are defined for component "{1}".

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
More than one audit event was found with the same display name in audit-component element.

Action:
Ensure that the display names are unique for all audit events of a component.

MDS-01398
Namespace "{0}" is mapped to both metadata store "{1}" and metadata store "{2}".

Category:
Configuration

Cause:
There were multiple metadata stores mapped to a given namespace in the persistence configuration.

Action:
Correct the namespace mapping in persistence configuration to ensure that the namespace is mapped to only one metadata store.

MDS-01399
A DBMetadataStore store is being registered with a PManager with multitenant enabled set to {1} but an equal store is already registered with a PManager with multitenant enabled set to {0}.

Category:
Configuration

Cause:
The DBMetadataStore store being registered cannot be used for both multitenant and non multitenant operations at the same time.

Action:
Ensure that the same physical store is not used for both multitenant and non multitenant operations.

MDS-01400
Read-only extended metadata resource "{0}" is not writable.

Category:
Programmatic

Cause:
An attempt was made to update a read-only extended metadata resource.

Action:
Ensure that the metadata object is mutable before getting the extended metadata.

MDS-01401
Updating a node in one document "{1}" using a node from a different document "{0}" is not allowed.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The node being added or inserted was from a different metadata object. They must be from the same base document.

Action:
Ensure that the node being inserted is from the correct metadata object.

MDS-01402
Updating immutable MetadataObject "{0}" is not allowed.

Category:
Programmatic

Cause:
The MetadataObject being updated was immutable.

Action:
Ensure that the MetadataObject to be updated is mutable.

MDS-01403
Updating a mutable MElement in MetadataObject "{0}" using an immutable MElement: "{1}" is not allowed.

Category:
Programmatic

Cause:
An attempt was made to update a mutable MElement using an immutable MElement.

Action:
Verify that the child MElement being used for the update is mutable.

MDS-01404
Customization to replace root node of {0} is not allowed.

Category:
Programmatic

Cause:
An attempt was made to replace the root node as part of a customization.

Action:
Replace the root node in the base document, or modify the existing root node instead.

MDS-01450
missing GUID

Category:
Programmatic

Cause:
The application removed an object's GUID while editing its XML metadata content.

Action:
Fix the application so it does not tamper with MDS GUIDs.

MDS-01451
GUIDs do not match.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
The application altered an object's GUID while editing its XML metadata content.

Action:
Fix the application so it does not tamper with MDS GUIDs.

MDS-01452
GUID is null.

Category:
Programmatic

Cause:
An attempt was made to retrieve a metadata object or document by GUID, but the given GUID was null.

Action:
Fix the application so it passes a valid GUID to the method in question.

MDS-01455
multiple GUIDs on metadata object {0}

Category:
Programmatic

Cause:
The application set multiple GUID values while editing an object's XML metadata content.

Action:
Fix the application so it does not tamper with MDS GUIDs.

MDS-01456
invalid GUID on metadata object {0}

Category:
Programmatic

Cause:
The application set an object's GUID to an invalid value while editing its XML metadata content.

Action:
Fix the application so it does not tamper with MDS GUIDs.

MDS-01457
GUID feature not available

Category:
Programmatic

Cause:
The application attempted to retrieve an object by GUID from a metadata store that does not yet support this.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Fix the application so it does not attempt this, or configure the application to use a different type of metadata store.

MDS-01458
GUID must not be present.

Category:
Programmatic

Cause:
The application set an object's GUID value while editing its XML metadata content.

Action:
Fix the application so it does not tamper with MDS GUIDs.

MDS-01460
GUIDs on DOM Document do not match.

Category:
Programmatic

Cause:
The application set an object's GUID to a different value while editing its XML metadata content.

Action:
Fix the application so it does not tamper with MDS GUIDs.

MDS-01461
unable to create document {0} in the metadata repository; a document with the same name or GUID already exists

Category:
Data

Cause:
An attempt was made to import or create a document with a name or GUID that is already used by an existing document.

Action:
Delete the document in the MDS repository prior to import or creation.

MDS-01462
GUID feature is not supported in the classpath store.

Category:
Programmatic

Cause:
The application attempted to retrieve an object by GUID from the classpath metadata store that does not support this.

Action:
Fix the application so it does not attempt retrieval by GUID, or configure the application to use a different type of metadata store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-01464
unable to save GUIDRegister {0}

Category:
Files

Cause:
The GUID register (GUID index files) could not be written.

Action:
Verify that the application has write permission for the given file, and that the disk is not full.

MDS-01465
unable to remove node {0} from the GUIDRegister

Category:
Data

Cause:
The given node was not removed from the GUID register, possibly because it was not found.

Action:
Delete the GUID register files, restart the application and try the operation again. If that fails, contact Oracle Support Services.

MDS-01466
unable to create GUIDRegister directory {0}

Category:
Files

Cause:
The owning directories for the GUID register (GUID index files) were not created.

Action:
Verify that you have permission to create the parent directories for the given file name.

MDS-01468
A different GUID is already registered for document {0}.

Category:
Data

Cause:
The GUID register has become corrupted.

Action:
Delete the GUID register files and restart the application (the files will then be re-created).

MDS-01469
unable to remove old GUIDRegister store path {0}

Category:
Files

Cause:
Old GUID register files were not deleted.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify that you have permission to delete these files.

MDS-01470
more than one GUID is registered for document {0}

Category:
Data

Cause:
The GUID register has become corrupted.

Action:
Delete the GUID register files and restart the application (the files will then be re-created).

MDS-01471
more than one document is registered for GUID {0}

Category:
Data

Cause:
The GUID register has become corrupted.

Action:
Delete the GUID register files and restart the application (the files will then be re-created).

MDS-01472
GUID is missing in file {0}

Category:
Data

Cause:
No GUID was found in the given file but the metadata object type definition indicated there should be one.

Action:
Re-create the metadata object or correct its type definition not to require a GUID.

MDS-01500
The MDSObject {0} is an XML document and cannot be loaded using StreamedObject API.

Category:
Programmatic

Cause:
An attempt was made to load an XML document via StreamedObject API.

Action:
Retry the operation using MetadataObject API or use a non-XML document.

MDS-01501
The MDSObject {0} is not an XML document and cannot be loaded from MetadataObject API.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt was made to load a streamed object (non-XML document) using MetadataObject API.

Action:
Retry the operation using StreamedObject API or use a document containing valid XML.

MDS-01502
The MDSObject "{0}" is an XML document and cannot be saved using StreamedObject API.

Category:
Programmatic

Cause:
An attempt was made to save an XML document using StreamedObject API.

Action:
Retry the operation using MetadataObject API.

MDS-01503
The content of StreamedObject {0} cannot be read.

Category:
Data

Cause:
An attempt to read the StreamedObject content failed.

Action:
Look at the error message and exception stack in the application logs to determine the reason for the failure.

MDS-01504
The document {0} is either registered as a streamed file type or is a non-XML file extension and cannot be created using MetadataObject API.

Category:
Programmatic

Cause:
An attempt was made to create an MDSObject named with a streamed object (non-XML) extension using MetadataObject API.

Action:
Retry the operation using StreamedObject API.

MDS-01600
The Dependency Analyzer requires a DependencyFilter.

Category:
Programmatic

Cause:
Either no filter was supplied, or the filter supplied was null.

Action:
Supply a non-null filter.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-01601
The relationship role name {0} is a duplicate.

Category:
Programmatic

Cause:
A role name defined in a relationship had already been used.

Action:
Ensure that the toParentRole and toChildRole in a relationship have not already been used by another relationship.

MDS-01602
cannot locate the element type {0} in namespace {1} defined for the relationship

Category:
Programmatic

Cause:
The element type did not exist in the given namespace.

Action:
Ensure that the element type exists in the given namespace.

MDS-01604
The relationship from {0} to {1} is invalid because the latter is not a valid MDS reference.

Category:
Programmatic

Cause:
An invalid MDS reference was specified as the parent.

Action:
Ensure the parent reference is a valid MDS reference.

MDS-01605
The relationship from {0} to {1} is invalid because the latter does not exist.

Category:
Programmatic

Cause:
No parent element was found matching the MDS reference supplied.

Action:
Ensure that the parent reference in the relationship points to an existing element.

MDS-01606
The relationship from {0} to {1} is invalid because the latter is of incorrect type.

Category:
Programmatic

Cause:
The child element referenced a parent of the wrong type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that the parent type matches the one stipulated in the relationship definition.

MDS-01607
The relationship from {0} to {1} is invalid because type information is not available for the latter.

Category:
Configuration

Cause:
No type definition could be found for the parent.

Action:
Ensure that the parent type information is available.

MDS-01608
The relationship from {0} to {1} is invalid because the latter maps to a different store.

Category:
Configuration

Cause:
The parent and child objects in the relationship have been mapped to different stores.

Action:
Ensure that the parent maps to the same store as the child object.

MDS-01609
The document {0} contains relationships that do not conform to the relationship definition.

Category:
Programmatic

Cause:
Constraints in this document's relationship definitions were violated.

Action:
Ensure that the relationships conform to the constraints in the relationship definition.

MDS-01610
Some of the changes in the MDS session are not valid.

Category:
Data

Cause:
A change was made in the MDS session that was not valid.

Action:
Check the changes made and ensure each of them is valid.

MDS-01611
not saving changes in MDS session because some changes are not valid

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A change made in the MDS session was not valid.

Action:
Check all the changes made and ensure that all changes are valid.

MDS-01612
The object {0} cannot be deleted because it is referenced by {1}.

Category:
Programmatic

Cause:
An attempt was made to delete an element that was being referenced by a child object.

Action:
Remove the child reference to this object so the object can be deleted.

MDS-01613
The object {0} cannot be deleted because of relationship integrity constraints.

Category:
Programmatic

Cause:
An attempt was made to delete an object that was still being referenced.

Action:
Remove the child references to the metadataObject so that it can be deleted.

MDS-01614
Rename is not allowed because integrity checking is not turned on in the object {1} in MetadataObject {0}.

Category:
Configuration

Cause:
Integrity checking was switched off so it was not possible to check whether the rename would have broken any relationship integrity constraints.

Action:
Ensure that integrity checking is turned on.

MDS-01615
failure to rename {0} because there is no reference attribute in MetadataObject {1}, element {2}

Category:
Data

Cause:
A child object could not reference the renamed object as its current reference was invalid.

Action:
Confirm that all the references in the child object are valid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-01620
The untyped dependency with the following registration details cannot be inserted: {0}, {1}, {2}, {3}.

Category:
Data

Cause:
The dependency could not be registered in the database repository due to a SQL exception.

Action:
Correct the cause of the SQL exception and retry the untyped dependency registration.

MDS-01621
The untyped dependency information for {0} could not be removed.

Category:
Data

Cause:
An attempt to remove untyped dependency information failed either because the document was invalid or there was a SQL exception.

Action:
Verify that the document and its dependencies are valid, or correct the cause of any SQL exceptions.

MDS-01622
There is no analyzer to unregister.

Category:
Configuration

Cause:
No analyzers were supplied to be unregistered.

Action:
Supply the DependencyAnalyzer to be unregistered.

MDS-01630
invalid operation in a customized context on an element that could participate in a relationship: {0}

Category:
Programmatic

Cause:
Within a customized context there was an attempt to insert an element without first deleting it as part of a composite move.

Action:
Within the customized context, do not attempt inserts on elements without first deleting them as part of a composite move.

MDS-01631
In a customized context, an element that could participate in a relationship as a child cannot be modified. The reference is {0} on {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
Within a customized context, an attribute being customized could have been a parent reference within a relationship.

Action:
Do not attempt to modify or remove an attribute that could be a parent reference within a relationship.

MDS-01633
In a customized context, an element that could participate in a relationship cannot be deleted: {0}.

Category:
Programmatic

Cause:
Within a customized context an attempt was made to delete an element that could participate in a relationship.

Action:
Do not attempt to delete an entity while in a customized context.

MDS-01634
In {0}, a {1} element that participates in a relationship lacks a configurable ID.

Category:
Programmatic

Cause:
An operation was attempted on a participant in a relationship that lacked a configurable ID.

Action:
Add a configurable ID to the element on which it is missing. If necessary, refer to the element's schema definition to identify the configurable ID attribute.

MDS-01635
Skipping the relationship validation for {0} in the metadata object {1} because the element contains an invalid MDS reference.

Category:
Programmatic

Cause:
Validation of the object's relationships was not performed because the element contained an invalid MDS reference.

Action:
Correct the MDS references in the MetadataObject specified.

MDS-01700
MElementBeanImpl._setSimpleChild cannot be called on a non-simpleType element: name={0}, namespace{1}

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An attempt was made to set a bean element to a simple type, but the definition in the schema was not a simple type. The generated beans may not have matched the registered schema.

Action:
Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

MDS-01701
Cannot set the value on an element that is not based on a simpleType: name={0}, namespace={1}

Category:
Configuration

Cause:
An attempt was made to set an element to a simple type, but the definition in the schema was not a simple type.

Action:
Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

MDS-01702
The method getBean() is not valid for metadata object {0} - it is allowed on only bean metadata objects.

Category:
Configuration

Cause:
An attempt was made to access the metadata object using the bean API but the metadata object was not a bean metadata object. The schema for the root element may not have been registered with MDS, or the beans were not available on the classpath.

Action:
Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

MDS-01703
error unmarshalling bean element: name={0}, namespace={1} in metadata object {2} - no object factory can be found or jaxb.properties cannot be found

Category:
Configuration

Cause:
An element was found in the metadata object that did not have a corresponding bean class. The schema for the element may not have been registered with MDS, or the beans were not available on the classpath.

Action:
Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-01705
error unmarshalling bean element: name={0}, namespace={1} in metadata object {2} - object factory class {3} does not have the expected unmarshal() method

Category:
Data

Cause:
The bean object factory found for the element did not appear to have been generated by the MDS bean generation tool.

Action:
Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

MDS-01706
error unmarshalling bean element: name={0}, namespace={1} in metadata object {2} - object factory class {3} failure in unmarshal() method

Category:
Programmatic

Cause:
An unexpected exception occurred while creating a bean object for the element.

Action:
Contact the developers of the application, providing the cause exception.

MDS-01707
Error generating relationship method {0} for relationship defined on attribute {1}: incorrect parentType definition

Category:
Programmatic

Cause:
There was an error in the relationship definition.

Action:
Check the parentType definition on the relationship

MDS-01708
No schema definition found in namespace "{0}" for element of type "{1}". {2} will not be retrievable as an MDS Bean MO.

Category:
Configuration

Cause:
The schema for the generated MDS bean is not found.

Action:
Add the schema for this namespace and element type to the type definitions for the MDSInstance.

MDS-01800
Sandbox is not supported for {0} configured on {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
An underlying metadata store did not support the sandbox feature.

Action:
Provide a metadata store that supports sandbox feature.

MDS-01801
Document name {0} should not refer to the raw sandbox resource name.

Category:
Programmatic

Cause:
A resource name pointed directly to a resource in the sandbox component.

Action:
Provide a logical document name to resolve the issue.

MDS-01802
A sandbox by name {0} already exists in the {1} store.

Category:
Configuration

Cause:
A sandbox with the same name already existed in the store.

Action:
Use a different name or destroy the existing sandbox before reusing the same name.

MDS-01803
Sandbox Persistence manager cannot be constructed using an instance of SandboxPManager.

Category:
Programmatic

Cause:
An attempt was made to construct an instance of sandbox persistence manager using an instance of SandboxPManager.

Action:
Contact Oracle Support Services.

MDS-01804
Sandbox {0} configured with {1} namespace, {2} store and {3} label from mainline is not compatible with {4} label created on {5} namespace.

Category:
Programmatic

Cause:
A label was used that is different from the mainline label associated with the sandbox.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Use a label that is compatible with the sandbox and retry the operation.

MDS-01805
Sandbox {0} missing in {1}.

Category:
Data

Cause:
The specified sandbox was not found in the underlying metadata store.

Action:
Provide the name of an existing sandbox, or create a new sandbox if necessary.

MDS-01806
failure to remove {0} from {1}, because it is not a valid document in the sandbox

Category:
Data

Cause:
The specified document to be removed was not found in the sandbox.

Action:
Verify that the document exists in the sandbox.

MDS-01807
failure to delete sandbox {0}

Category:
Programmatic

Cause:
An error occurred while deleting the sandbox.

Action:
Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-01808
SandboxUsage with the sandbox name set to {0} does not return any namespaces.

Category:
Programmatic

Cause:
No namespaces were found on the SandboxUsage.

Action:
Configure the SandboxUsage with namespaces that are associated with the sandbox.

MDS-01809
failure to list sandboxes matching {0}

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error occurred while listing or querying the sandboxes.

Action:
Look for error messages to determine the actual cause of the failure.

MDS-01810
failure to refresh sandboxes to target label {0}

Category:
Programmatic

Cause:
Target label is older than the current source label.

Action:
Specify a target label which is later than current label.

MDS-01811
failure to list sandboxes matching customization for {0}, layer: {1}, value: {2}

Category:
Programmatic

Cause:
An error occurred while listing or querying the sandboxes.

Action:
Look for error messages to determine the actual cause of the failure.

MDS-01812
sandbox name {0} exceeds the maximum limit of {1} characters

Category:
Programmatic

Cause:
Sandbox name is more than the supported size.

Action:
Use a shorter sandbox name.

MDS-01813
sandbox metadata for {0} cannot be saved because it is being updated by another user.

Category:
Programmatic

Cause:
More than one user is updating the sandbox metadata at the same time.

Action:
Get the sandbox metadata again and retry saving after making the changes.

MDS-01814
sandbox metadata for {0} cannot be changed because it is read only.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
Sandbox metadata is read only and cannot be updated

Action:
To update get an instance of sandbox and then get the sandbox metadata from the instance

MDS-01815
store configured for sandbox {0} does not support sandbox metadata.

Category:
Programmatic

Cause:
Sandbox metadata is not supported on the repository.

Action:
Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later to use this feature.

MDS-01816
{0} is not a valid name for a sandbox.

Category:
Programmatic

Cause:
The specified sandbox name is either an MDS reserved package part name or contains invalid characters.

Action:
Ensure that the specified sandbox name is neither an MDS reserved package part name nor does it contain invalid characters as per the MDS Resource name specification.

MDS-01817
sandbox {0} is either active or published to mainline. The undo/finalize operation cannot continue.

Category:
Programmatic

Cause:
The sandbox is either applied or is in the active state.

Action:
Check that the sandbox is in the intermediary state

MDS-01818
sandbox {0} is either being refreshed or applied and is in intermediary state. No further updates except sandbox finalize/undo operation are allowed.

Category:
Programmatic

Cause:
The sandbox is in intermediary state and no further updates can be done to the sandbox.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
The only allowed operations in the intermediary state are: finalize and undo.

MDS-01819
Lock on sandbox {0} cannot be taken. A concurrent management operation may be in progress.

Category:
Programmatic

Cause:
A management operation on the sandbox is in progress and has locked the sandbox.

Action:
Retry the operation after a while.

MDS-01820
Metadata for sandbox {0} is not available. The sandbox management operation cannot proceed without sandbox metadata.

Category:
Programmatic

Cause:
Sandbox was created without metadata.

Action:
Use the management APIs that are available for sandboxes without metadata.

MDS-01821
Lifecycle change notifications for the sandbox {0} cannot be sent out because the change type is not defined.

Category:
Other

Cause:
The sandbox lifecycle change does not have a valid change type.

Action:
Contact Oracle Support Services.

MDS-01900
None of the configured metadata stores support versioning.

Category:
Configuration

Cause:
The underlying metadata store did not support versioning.

Action:
Configure a metadata store that supports versioning, and retry the operation.

MDS-01901
specifying multiple labels for a namespace not allowed

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Multiple labels were provided for a namespace that pointed to a metadata store.

Action:
Provide a single label to map to a namespace and retry the operation.

MDS-01902
Label or namespace is invalid.

Category:
Programmatic

Cause:
Either the namespace or the label was invalid.

Action:
Verify that the namespace and the label are correct, and retry the operation.

MDS-01903
Specified label {0} does not exist for {1} namespace.

Category:
Configuration

Cause:
The specified label did not exist in the metadata store mapped to the namespace.

Action:
Verify that the label name is correct and that the label exists, and then retry the operation.

MDS-01906
A label with same name {0} already exists.

Category:
Programmatic

Cause:
An attempt was made to create a label that already existed.

Action:
Create a label with a different name, and then retry the operation.

MDS-01907
The label {1} is already configured for the store "{0}", so the same store cannot be configured with another label "{2}".

Category:
Configuration

Cause:
An attempt was made to map a label for a store when a label-to-store mapping already existed for that store.

Action:
De-associate the existing label mapped to the store first, and then retry the operation.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-01908
failure to delete versions of the document {0}

Category:
Programmatic

Cause:
An error had occurred while versions were being deleted.

Action:
Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-01909
No namespaces are specified for creating label {0}.

Category:
Programmatic

Cause:
No namespace information was found for creating a label.

Action:
Provide a namespace for creating a label, and retry the operation.

MDS-01910
The namespace {0} is already registered with the label {1}, so the super/sub namespace {2} cannot be assigned with the label {3}.

Category:
Programmatic

Cause:
An attempt was made to associate multiple labels with a namespace, or an attempt was made to associate multiple namespaces with a single label.

Action:
Associate a single label with a single namespace, and retry the operation.

MDS-01911
failure of the metadata purge operation for the requested repository partition

Category:
Programmatic

Cause:
An error occurred during a purge operation.

Action:
Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-01912
MetadataStore configured for {0} does not support versioning.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The metadata store configured for the resource did not support versioning.

Action:
Configure a metadata store that supports versioning or verify that the resource name is correct.

MDS-01913
A deployment lineage with same application name "{0}" and deployment module name "{1}" already exists.

Category:
Programmatic

Cause:
An attempt was made to create a lineage that already existed.

Action:
Create a lineage with a different application or MAR name, and then retry the operation.

MDS-01914
The application name and deployment module name cannot be null to create DeploymentInfo.

Category:
Programmatic

Cause:
An attempt was made to create DeploymentInfo with null values.

Action:
Make sure that the values for application name and deployment module name are non-null.

MDS-02001
Absolute path as metadata-path for the file metadata-store configuration is not supported for SaaS deployment.

Category:
Configuration

Cause:
Configuring an absolute directory in SaaS Multitenant application will violate metadata isolation across tenants.

Action:
Ensure that relative path specified as metadata-path for the file metadata-store.

MDS-02002
RelativeToLocation for the file metadata-store configuration is not supported for SaaS deployment.

Category:
Configuration

Cause:
Configuring an absolute directory in SaaS Multitenant application will violate metadata isolation across tenants.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that relative path is specified as metadata-path for the Metadata Store and RelativeToLocation is null

MDS-02003
Package name {0} in cust-restriction-config in {1} is invalid.

Category:
Configuration

Cause:
An invalid package name was encountered whilst loading the component configuration.

Action:
Ensure that a valid package name is specified

MDS-02004
Cannot configure [Path to match={0}] as Layered Stream Objects since path's content-type is not BINARY_STREAM.

Category:
Configuration

Cause:
customization-type attribute in cust-config can be set to FULL_REPLACE only when content-config configures the path as BINARY_STREAM.

Action:
Change content-type to use BINARY_STREAM or remove customization-type configuration.

MDS-02005
Cannot configure [Path to match={0}] as Layered Stream Objects since path is configured for stream storage in content-config using isStreamed option.

Category:
Configuration

Cause:
cust-type is not supported with isStreamed as isStreamed attribute is deprecated.

Action:
Remove isStreamed and configure content-type to use BINARY_STREAM or remove cust-type configuration.

MDS-02006
streamBuilder class not specified for path {0}.

Category:
Configuration

Cause:
The streamBuilder class cannot be null if customization-type is configured as 'extension'.

Action:
Ensure that the streamBuilder class is supplied when configuring customization-type as 'extension'.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-02007
streamBuilder can only be specified with customization-type 'extension' for path {0}.

Category:
Configuration

Cause:
streamBuilder is only valid for 'extension' customization-type.

Action:
Ensure that the streamBuilder class is only supplied when configuring customization-type as 'extension'.

MDS-02024
Setting or modifying the unique (or locally unique) identifier "{0}" of an existing element with localRef "{1}" through customizations is not supported.

Category:
Programmatic

Cause:
An attempt was made to customize unique (or locally unique) identifier.

Action:
Remove any customization that is attempting to modify the unique (or locally unique) identifier of an XML element.

MDS-02025
The requested change is incompatible with changes already pending on the MDS session.

Category:
Programmatic

Cause:
An attempt was made to perform a change operation on the MDS session which would update the same MetadataObject part as another change operation that has been done. For example, if you change a customization of a metadata object then attempt to delete all of its customizations, the latter operation will fail because it conflicts with the former. You must save the former change first before doing the second.

Action:
Save the changes that have already been made on the session (by calling flushChanges), then retry the failed operation.

MDS-02100
Illegal permission target: "{0}" - must begin with {1}.

Category:
Programmatic

Cause:
An attempt was made to create an MDS permission class with an incorrect syntax.

Action:
Permission classes are usually created internally by MDS but may be created by the application directly. Contact the developers of the application to confirm that this is not an application error and if not contact Oracle Support Services.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-02101
Illegal permission action: "{0}" - unknown action.

Category:
Programmatic

Cause:
An attempt was made to create an MDS permission class with an incorrect syntax.

Action:
Permission classes are usually created internally by MDS but may be created by the application directly. Contact the developers of the application to confirm that this is not an application error and if not contact Oracle Support Services.

MDS-02102
Illegal permission action: "{0}" - customize action takes 0 or 2 parameters.

Category:
Programmatic

Cause:
An attempt was made to create an MDS permission class with an incorrect syntax.

Action:
Permission classes are usually created internally by MDS but may be created by the application directly. Contact the developers of the application to confirm that this is not an application error and if not contact Oracle Support Services.

MDS-02201
type validation failure for the metadata object "{0}"

Category:
Programmatic

Cause:
The content of the metadata object was not valid against the registered XSDs.

Action:
Ensure that the metadata object content is valid with respect to the registered XSDs.

MDS-02202
Content of the metadata object "{0}" is not valid.

Category:
Programmatic

Cause:
The content was not valid either with respect to the registered XSDs or with the registered relationships.

Action:
Check the content of the metadata object and correct the content as necessary to make it valid.

MDS-02203
type validation error for the metadata object "{0}" at the node "{1}": {2}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
A validation error occurred at the specified node.

Action:
Check the content at the specified node for compliance with registered XSDs and relationships.

MDS-02204
type validation warning for the metadata object "{0}" at the node "{1}": {2}

Category:
Programmatic

Cause:
A validation warning occurred at the specified node.

Action:
Check the content at the specified node for compliance with registered XSDs.

MDS-02301
The rename unit is invalid because either "{0}" or "{1}" is reused in the rename plan.

Category:
Programmatic

Cause:
The resource name provided in the rename plan was used more than once.

Action:
Provide distinct names for source and target names while renaming.

MDS-02302
subobjects "{1}" not found in metadata object "{0}"

Category:
Programmatic

Cause:
The specified subobjects were not found in the metadata object.

Action:
Look in the error message log for details.

MDS-02303
The given rename plan syntax is invalid

Category:
Configuration

Cause:
The rename plan syntax specified was invalid.

Action:
Look in the error message log for details.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-02304
RenameOperation failed for StreamedObject "{0}" because subobjects were specified for this streamed object.

Category:
Programmatic

Cause:
Streamed objects do not support subobjects.

Action:
Remove the RenameObject that contains reference to the streamed object and subobject references from the RenamPlan.

MDS-02401
The operation {0} on the {1} node is not allowed.

Category:
Configuration

Cause:
An attempt was made to customize a node that was not customizable.

Action:
If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

MDS-02402
The type definition for {1} does not allow customization of {0}.

Category:
Configuration

Cause:
An attempt was made to customize a node that was not customizable.

Action:
If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file, tag library definition file, or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

MDS-02404
The subelement {1} in the MDX document does not allow customization of {0}.

Category:
Configuration

Cause:
An attempt was made to customize a node that was not customizable.

Action:
Check the customization restriction information which can be located in the schema definition, standalone xml file or an extended metadata file. Also check the customization policy for the MDSSession in use and the customization configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-02405
The attribute {2} in element {1} in the MDX document does not allow customization of {0}.

Category:
Configuration

Cause:
An attempt was made to customize a node that was not customizable.

Action:
If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

MDS-02406
Customization of {0} is not allowed because it is not explicitly allowed by any type definition nor any extended metadata entry.

Category:
Configuration

Cause:
An attempt was made to customize a node that was not customizable.

Action:
If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

MDS-02407
Customization of {0} is not allowed because the local reference was not found in the document.

Category:
Programmatic

Cause:
An enquiry about the customizability of a node supplied a local reference that wasn't found in the document.

Action:
Ensure that the local reference applies to the document.

MDS-02408
The operation {0} on the {1} node is not allowed because the metadata object reference was not found in the change event.

Category:
Programmatic

Cause:
A document change is not allowed because the metadata object reference was null.

Action:
Ensure that the change document exists.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-02500
Cannot find a valid MDSSession object for accessing the MDS document using ORAMDS URL

Category:
Programmatic

Cause:
A valid MDSSession object was not set before accessing the document using the "oramds:///" protocol.

Action:
Use the MDSURLHelper.setMDSSession() method to set a valid MDSSession object before accessing MDS documents using the oramds protocol.

MDS-02501
cannot load the ORAMDS URL "{0}" because MDS session could not be created or resolved

Category:
Programmatic

Cause:
An error occurred while creating or resolving an MDS session object.

Action:
Look for messages describing the cause exception in the error message log for more information on the actual reason for failure.

MDS-02600
configuration migration failure because the configuration document contains more than one mds-config element

Category:
Programmatic

Cause:
The given configuration document contained more than one mds-config element.

Action:
Correct the configuration document to contain a single mds-config element.

MDS-02601
configuration migration failure because it contains more than one persistence-config element

Category:
Programmatic

Cause:
The configuration document contained more than one persistence-config element.

Action:
Correct the configuration document to contain a valid persistence-config element.

MDS-02602
configuration migration failure because it contains more than one metadata-stores element

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The configuration document contained more than one metadata-stores element

Action:
Correct the configuration document to be a valid 10.1.3 configuration document.

MDS-02603
configuration migration failure because it contains an invalid metadata-store element

Category:
Programmatic

Cause:
The configuration document contained an invalid metadata-store element.

Action:
Correct the configuration document to be a valid 10.1.3 configuration document.

MDS-02700
The resource "{0}" cannot be updated by tenant "{1}".

Category:
Programmatic

Cause:
The given resource could not be updated by the current tenant because it was not available in current tenant's scope.

Action:
Verify that the resource is being updated in the same scope of the tenant who updates the resource.

MDS-02702
Tenant scoped PManager instance cannot be created for tenant {0} because given PManager instance does not have multitenancy enabled.

Category:
Configuration

Cause:
The PManager instance used here did not have multitenancy enabled but an attempt was made to create tenant scoped PManager instance.

Action:
Verify that the PManager instance being passed has multitenancy support enabled.

MDS-02703
Tenant scoped PManager cannot be created for tenant "null".

Category:
Configuration

Cause:
The PManager instance used here had multitenancy support enabled but an attempt was made to create tenant scoped PManager instance with "null" tenant.

Action:
Create scoped PManager instance for valid tenant id.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-02704
Cannot create tenant scoped PManager instance using another tenant scoped PManager instance.

Category:
Programmatic

Cause:
An attempt was made to create tenant scoped PManager using another scoped PManager instance.

Action:
Create a tenant scoped PManager using an unscoped PManager instance.

MDS-02705
Cannot create PContext using an unscoped PManager instance.

Category:
Programmatic

Cause:
Creating PContext using an unscoped PManager instance was not allowed.

Action:
Use PManager instance that is scoped for a tenant to create PContext.

MDS-02706
Cannot create PTransaction using an unscoped PManager instance.

Category:
Programmatic

Cause:
Creating PTransaction using an unscoped PManager instance was not allowed.

Action:
Use PManager instance that is scoped for a tenant to create PTransaction.

MDS-02707
PContext with tenant id {0} cannot be used in scoped PManager with tenant id {1}.

Category:
Programmatic

Cause:
Tenant id attached to PContext and the tenant id of tenant scoped PManager to which it was passed did not match.

Action:
Create PContext from the tenant scoped PManager to which it is passed.

MDS-02708
PManager instance is being used after it has been released.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
PManager instance was being used after it had been released.

Action:
Create a new PManager.

MDS-02709
Configuration change operation "{0}" on scoped PManager is not allowed for the tenant {1}. Only global tenant is allowed to change the configuration settings in PManager.

Category:
Programmatic

Cause:
A non global tenant attempted to change configurations in scoped PManager.

Action:
Use global tenant scoped PManager to change the configuration settings.

MDS-02710
Operation "{0}" is not allowed in unscoped PManager.

Category:
Programmatic

Cause:
A tenant aware operation was invoked in an unscoped PManager instance.

Action:
Use a global or tenant scoped PManager to do the operation.

MDS-02711
No tenant operations are allowed on MetadataStoreConnection not associated with any tenant id.

Category:
Programmatic

Cause:
A tenant aware operation was invoked in MetadataStoreConnection to database store which did not have any tenant id attached.

Action:
Create a new MetadataStoreConnection with a valid tenant id.

MDS-02712
The operation {0} is not allowed in this MetadataStoreConnection to database store because the MetadataStoreConnection is not attached to any tenant id.

Category:
Programmatic

Cause:
A tenant aware operation was invoked in MetadataStoreConnection to database store which did not have any tenant id attached.

Action:
Create a new MetadataStoreConnection with a valid tenant id.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-02713
PContext associated with tenant {0} cannot be used with MetadataStoreConnection associated with different tenant {1}. Operation {2} failure.

Category:
Programmatic

Cause:
The tenant id attached to PContext and MetadataStoreConnection did not match.

Action:
Use PContext with same tenant id as the one attached to metadata store connection.

MDS-02714
Creating metadata store connection for tenant {0} is not allowed in non multitenant application.

Category:
Programmatic

Cause:
An attempt was made to create metadata store connection for non global tenant in non multitenant application.

Action:
Use global tenant id to create metadata store connection.

MDS-02715
No tenant scoped PManager instances can be created on already released PManager instance.

Category:
Programmatic

Cause:
An attempt was made to create a tenant scoped PManager instance on already released PManager instance.

Action:
Create new PManager instance using a PConfig then try creating scoped PManager instance.

MDS-02720
Cannot rename the document {0} to {1} as the new tenant scope does not match the original tenant scope.

Category:
Programmatic

Cause:
The new name for the document was configured to a different tenant scope to the old document name.

Action:
Provide a new valid document name that maps to the same tenant scope as the original document.

MDS-02721
PResource {0} for tenant {1} cannot be used with MetadataStoreConnection that is associated with different tenant {2}. Operation {3} failure.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
The tenant ids of the PResource and the MetadataStoreConnection did not match.

Action:
Use PResource with same tenant id of the one attached to metadata store connection.

MDS-02722
Mar Lineage can be created by global tenant only. Creating MAR lineage is not supported for tenant {0}.

Category:
Programmatic

Cause:
A non-global tenant attempted to create MAR lineage which is not supported. MAR lineage creation is allowed only for global tenant currently.

Action:
Create MAR lineage from global tenant context.

MDS-02723
Operation "{0}" is not supported in Sandbox currently.

Category:
Programmatic

Cause:
Unsupported operation was invoked in Sandbox instance.

Action:
This operation is not supported in Sandbox currently.

MDS-02724
The ResourceName that is attached to tenant scope {0} is not allowed in SandboxPTransaction that is attached to the different tenant scope {1}. Operation {2} failure.

Category:
Programmatic

Cause:
Tenant scope for ResourceName and SandboxPTransaction did not match.

Action:
Use ResourceName with same tenant scope of the one attached to SandboxPTransaction.

MDS-02725
The Label {0} that is attached to tenant {1} is not allowed in MetadataStoreConnection that is attached to different tenant {2}. Operation {3} failure.

Category:
Programmatic

Cause:
Tenant id for Label and MetadataStoreConnection did not match.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Use label with same tenant id of the one attached to MetadataStoreConnection.

MDS-02726
The tenant {0} that is attached to PDocument {1} is not allowed in SandboxPTransaction that is attached to different tenant {2}. Operation {3} failure.

Category:
Programmatic

Cause:
Tenant id for PDocument and SandboxPTransaction did not match.

Action:
Use PDocument with same tenant id of the one attached to SandboxTransaction.

MDS-02727
The tenant {0} that is attached to Label {1} is not allowed in SandboxPTransaction that is attached to different tenant {2}. Operation {3} failure.

Category:
Programmatic

Cause:
Tenant id for Label and SandboxPTransaction did not match.

Action:
Use label with same tenant id of the one attached to SandboxPTransaction.

MDS-02728
The tenant {0} that is attached to {1} {2} is not allowed in Sandbox that is attached to different tenant {3}. Operation {4} failure.

Category:
Programmatic

Cause:
Tenant id attached and Sandbox did not match.

Action:
Use tenant id same as the one attached to Sandbox.

MDS-02729
The tenant scope {0} that is attached to {1} is not allowed in Sandbox that is attached to the different tenant scope {2}. Operation {3} failure.

Category:
Programmatic

Cause:
Tenant scope attached and Sandbox did not match.

Action:
Use tenant scope same as the one attached to Sandbox.

MDS-02730
Error in deprovisioning the tenant {0}. Unable to delete the resources in {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Tenant resources might be on read-only store.

Action:
Verify that tenant resources exist on a writable store.

MDS-02731
Tenant specific operations cannot be done in multitenant disabled environment for tenant {0}.

Category:
Programmatic

Cause:
An attempt was made to do tenant specific operations in Multitenant disabled environment.

Action:
Enable the multitenant feature.

MDS-02732
TenantId cannot be created for the value "{0}".

Category:
Programmatic

Cause:
TenantId could not be created with negative values or a value with more than 18 digits.

Action:
Use positive values with max of 18 digits in decimal format to create a valid TenantId object.

MDS-02733
Rename across multiple tenant stripes is not supported on this store.

Category:
Programmatic

Cause:
The store does not support writing to multiple tenant stripes or multitenancy is not enabled.

Action:
Enable the multitenant feature.

MDS-02734
Unable to get TenantInfo for TenantId "{0}" from tenant management system.

Category:
Configuration

Cause:
Tenant is not yet provisioned or was deprovisioned from the POD.

Action:
Check tenant provisioning system to ensure tenant is provisioned.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-02735
Label "{0}" cannot be deleted since it is attached to sandbox(es): "{1}".

Category:
Programmatic

Cause:
An attempt was made to delete a label that is attached to active sandbox(es).

Action:
Make sure that there are no sandboxes attached to label to be deleted. Refer to FMW Enterprise Manager MDS repository home page to check labels that are attached to a sandbox.

MDS-02736
Failed to update purge configuration value for tenant {0}.

Category:
Programmatic

Cause:
An error occurred while updating purge configuration.

Action:
Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-02737
Prevented potential duplicate tip version for document "{0}". Original request was to update document with PATH_DOC_ID={1}, PATH_VERSION={2} and PATH_LOW_CN={3}, updated latest tip version having PATH_DOC_ID={4}, PATH_VERSION={5} PATH_LOW_CN={6} to avoid duplicate tip version.

Category:
Programmatic

Cause:
MDS detected code flow which could have lead to duplicate tip issue.

Action:
Previous tip document is replaced forcefully with new content, validate content of the document.

MDS-02738
Database based metadata repository initialization failure because of invalid MDS database schema at "[{0}]".

Category:
Configuration

Cause:
Configured Database details refer to invalid or non-MDS schema.

Action:
Configure a valid MDS database schema created using Repository Creation Utility

MDS-02739
MDS Partition with ID {0} does not exist in the database repository

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
This could be caused by deleting the partition while still being used by application.

Action:
Ensure partition is deleted only when not in use. To resolve the current issue, restart the application or server.

MDS-02740
MDS repository version for tenant "{0}" is not same as Global MDS repository version. Repository version for tenant is "{1}" whereas GLOBAL repository version is "{2}".

Category:
Configuration

Cause:
MDS Repository version for Tenant is not same as Global MDS repository version

Action:
Upgrade the MDS repository to the required version so that Global and Tenant repository versions are same.

MDS-02741
The metadata changes cannot be written to underlying store because read-only mode is enabled in the configuration.

Category:
Configuration

Cause:
An attempt to change metadata was made while changes were disabled for maintenance operations.

Action:
Reconfigure the application to not specify read-only mode in the configuration and use a writable metadata store to persist metadata changes.

MDS-02742
Instance of {0} is being used after it has been released.

Category:
Programmatic

Cause:
Instance of a MDS object was used after it was released.

Action:
Create a new instance.

MDS-02743
Error deleting partition {0} in repository {1}.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The directory or partition doesn't exist.

Action:
Verify that the metadata path or partition for the repository exists.

MDS-02744
Failed to delete directory {0}.

Category:
Programmatic

Cause:
The specified directory was invalid, read only or was in use and could not be deleted.

Action:
Check exception message in logs for the exception stack and underlying cause.

MDS-02745
Unable to get database connection from data source "{0}" for store id "{1}".

Category:
Configuration

Cause:
Failed to retrieve a database connection from the data source either because the data source is not configured correctly or the database details are not correct.

Action:
Check if the data source is configured correctly and the database is accessible. See message of the cause exception for more information on the actual reason for failure.

MDS-02746
Invalid store id.

Category:
Programmatic

Cause:
Store id is null or empty.

Action:
Provide a valid store id.

MDS-02747
Invalid data source.

Category:
Programmatic

Cause:
Data source cannot be null.

Action:
Provide a valid data source.

MDS-02800
The label "{0}" cannot be provided as null for label based transfer.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
The label was provided as null for label based transfer.

Action:
Provide valid label name for label based transfer.

MDS-02801
Document {0} with scope {1} cannot be transferred by tenant {2}.

Category:
Programmatic

Cause:
The given document could not be transferred from source store by current tenant because the document was not in the scope of current tenant.

Action:
Ensure that document being transferred mapped to current tenant scope.

MDS-02802
Transfer is not supported for multitenant MDSInstance with file store.

Category:
Configuration

Cause:
Either source or target MDSInstance has multitenancy enabled and configured with file store.

Action:
Use a non multitanant MDSInstance with file store.

MDS-02803
List of patterns to select the MOs are either empty or null.

Category:
Programmatic

Cause:
List of MOPatterns are empty or null.

Action:
Ensure that valid list of MOPatterns are provided.

MDS-02804
Layer name "{0}" configured in CustLayerFilter to remove customizations, contains patterns.

Category:
Programmatic

Cause:
Layer name contains patterns.

Action:
Ensure that layer name doesn't contain any patterns.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-02805
Import Metadata With Exact Copy is allowed only from archive.

Category:
Configuration

Cause:
Source MetadataStore was not not archive.

Action:
Use an archive as source store.

MDS-02806
Source archive is invalid because it is missing the export criteria metadata file.

Category:
Configuration

Cause:
MetadataFile containing the export criteria was missing in the source archive

Action:
Import from an archive which has metadata file.

MDS-02807
Import Metadata With Exact Copy is allowed only to Database repository

Category:
Configuration

Cause:
Target MetadataStore was not Database repository

Action:
Use Database repository as target for import.

MDS-02808
Category with which Export Criteria is written in the archive file is different from the one which is used to get ExportCriteriaReader

Category:
Configuration

Cause:
Wrong category was used to get Export Criteria Reader.

Action:
Use right category..

MDS-02809
Import Metadata With Exact copy operation is not supported when export criteria used to generate source archive contains fromLabel or toLabel conditions.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Export parameters fromLabel or toLabel were specified to generate archive that was acting as source for Import Metadata With Exact Copy Operation.

Action:
Use an archive MetadataStore that was exported without fromLabel or toLabel specified.

MDS-02810
Transfer operation with TransferType "{0}" has been aborted and rolled back because too many documents failed.

Category:
Other

Cause:
Operation failed for high number of documents.

Action:
Check the server logs to identify root cause, rerun the operation after correcting the issue in the system environment.

MDS-02811
Wrong TransferType {0} is passed in for Sandbox {1}

Category:
Configuration

Cause:
TransferType and TransferParams which is created for Sandbox transfer doesn't match.

Action:
Supply the right TransferType.

MDS-02812
Parameter {0} has null values in it.

Category:
Programmatic

Cause:
Parameter contains null values.

Action:
Ensure that the indicated parameter does not contain null values when the method is called.

MDS-02813
Parameter TransferOptions must be set when transferBaseDocument is set to false.

Category:
Programmatic

Cause:
Filtering out base documents is supported only when TransferOptions is set.

Action:
Ensure that TransferOptions is set when transferBaseDocument is set to false.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-02814
Parallel Transfer of chunk {0} performed by thread {1} failed.

Category:
Other

Cause:
Error occured while transferring the chunk.

Action:
Check the server logs to identify root cause, rerun the operation after correcting the issue in the system environment.

MDS-02815
Parallel Transfer of one or more chunks timedout. Please retry transfer.

Category:
Other

Cause:
Timeout occured while transferring the chunk.

Action:
Check the server logs to identify root cause, rerun the operation after correcting the issue in the system environment.

MDS-05786
Unable to deploy the metadata archive: {0}.

Category:
Configuration

Cause:
Metadata archive (MAR) is corrupt.

Action:
Validate that the metadata archive (MAR) is valid and readable.

MDS-05787
Partition name is not specified in adf-config.xml file.

Category:
Configuration

Cause:
A property with name partition-name was not found as a child of the metadata-store element.

Action:
Specify the target partition as a child property of the metadata-store element in adf-config.xml.

MDS-05788
Unable to find the JNDI datasource in the file adf-config.xml.

Category:
Configuration

Cause:
A property with name jndi-datasource was not found as a child of the metadata-store element.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Specify the JNDI datasource a child property of the metadata-store element in adf-config.xml.

MDS-05789
Unable to deploy the metadata archive.

Category:
Configuration

Cause:
Metadata archive (MAR) was not found.

Action:
Ensure that the metadata archive (MAR) is packaged with the application.

MDS-05790
The metadata store definition is either missing or incorrectly specified in the application configuration.

Category:
Configuration

Cause:
The metadata store definition is either missing or incorrectly configured in the file adf-config.xml.

Action:
Ensure that the metadata store definition is present and contains the correct repository configuration

MDS-05791
An error occurred during the deployment of the metadata archive (MAR) {0}.

Category:
Configuration

Cause:
Details are usually given in the cause exception. Look for messages describing the cause exception and take the appropriate action.

Action:
Ensure that the metadata store configuration is correct.

MDS-05792
Unable to load MDS configuration from "{0}"

Category:
Configuration

Cause:
The MDS configuration is either not defined or incorrect.

Action:
Ensure that the MDS configuration is correctly defined.

MDS-05793
Metadata path {2} for partition {1} of MDS file repository {0} specified in adf-config.xml is either invalid or unreachable.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
The metadata path named in the error message for the MDS file repository partition cited in the error message was either invalid or unreachable.

Action:
Ensure that the MDS file repository named in the error message is registered and that the metadata partition cited in the error message is configured with a valid metadata path in adf-config.xml.

MDS-05794
Unable to load MDS persistence configuration from "{0}"

Category:
Configuration

Cause:
The MDS persistence configuration is either not defined or incorrect.

Action:
Ensure that the MDS persistence configuration is correctly defined.

MDS-05795
Invalid value "{0}" specified in the content-config of the application's configuration

Category:
Configuration

Cause:
Only restriction type CUSTOMIZATIONS is supported in content-config.

Action:
Ensure that the MDS persistence configuration is correctly defined.

MDS-10001
Error:

Category:
Data

Cause:
An error occurred. Details are usually given in the accompanying messages.

Action:
Look for messages describing the cause and take the appropriate action.

MDS-10003
The specified {0} argument is null or empty.

Category:
Programmatic

Cause:
A required program argument was null or empty.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Record any accompanying exception messages and contact Oracle Support Services.

MDS-10009
The transfer of the document {0} is not successful.

Category:
Data

Cause:
Document transfer failed

Action:
Examine any accompanying messages to decide if further action is required.

MDS-10010
Deleting the document {0} is not successful.

Category:
Data

Cause:
Document deletion failed

Action:
Examine any accompanying messages to decide if further action is required.

MDS-10011
The operation on {0} has been rolled back. Total number of documents failed during the operation is {1}.

Category:
Data

Cause:
The transfer was rolled back

Action:
Examine any accompanying messages to decide if further action is required.

MDS-10012
The operation has failed.

Category:
Data

Cause:
The operation has failed.

Action:
Examine any accompanying messages to decide if further action is required.

MDS-10013
{0} operation started.

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Transfer started.

Action:
Transfer started, no action required.

MDS-10014
{0} is completed. Total number of documents successfully processed : {1}, total number of documents failed : {2}.

Category:
Data

Cause:
Transfer complete.

Action:
Check any accompanying messages to decide if any action is required.

MDS-10015
Failure occurred while committing the {0} operation. The operation has been rolled back.

Category:
Data

Cause:
Failure occurred while committing the operation.

Action:
Examine any accompanying messages to decide if further action is required.

MDS-10016
The operation on {0} has been rolled back. The post transfer label {1} could not be created.

Category:
Data

Cause:
Failure occurred when creating the post transfer label.

Action:
Examine any accompanying messages to decide if further action is required.

MDS-10017
The target store does not support deployment management. Given application name "{0}" and deployment module name "{1}" could not be persisted as deployment information in store.

Category:
Data

Cause:
The target store does not support deployment management.

Action:
No action required. The documents will be transferred without the deployment information attached. If you want to store deployment information as well, configure a metadata store that supports deployment management, typically a DB store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-10018
The transfer restriction {0} is not supported in target store. All the documents will be transferred to target store.

Category:
Data

Cause:
Given transfer restriction is not supported in target store.

Action:
No action required. The given restriction will not be applied to the transfer, all the documents will be transferred to target store.

MDS-10019
The deployment information for application name "{0}" and module name "{1}" ignored since transfer operation is of type "{2}".

Category:
Data

Cause:
The deployment information will not be processed in transfer operation type other than "Deployment".

Action:
No action required. Given deployment information will not be processed in the current transfer operation.

MDS-10020
Querying checksum data from target repository to avoid transferring unchanged documents.

Category:
Data

Cause:
To apply transfer restriction CHANGED, transfer queries the target repository to check whether documents being transferred already exist with same content.

Action:
No action required.

MDS-10022
Query to get the checksum of the documents from target repository completed successfully.

Category:
Data

Cause:
To apply transfer restriction CHANGED, transfer queries the target repository to check whether documents being transferred already exist with same content.

Action:
No action required.

MDS-10023
No valid exclusion rules are specified in mds-transfer-config.xml to preserve documents in target store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
No valid namespaces or metadata object names specified in /meta-inf/mds-transfer-config.xml to preserve the documents in target store.

Action:
No action required.

MDS-10024
Preparing the list of documents to be excluded during transfer as per the configuration given in mds-transfer-config.xml.

Category:
Data

Cause:
To preserve the documents in target store as specified in the given /meta-inf/mds-transfer-config.xml, MDSTransfer prepares the list of documents to be excluded by looking at source and target stores.

Action:
No action required.

MDS-10025
Following metadata paths are configured in mds-transfer-config.xml to preserve existing documents under this metadata path in target repository. Configured metadata paths are as follows {0}:

Category:
Other

Cause:
Some metadata paths are configured in mds-transfer-config.xml to preserve existing documents in target repository.

Action:
No action required.

MDS-10026
Following Metadata object names are configured in mds-transfer-config.xml to preserve existing metadata objects with same name in target repository. Configured metadata object names are {0}:

Category:
Other

Cause:
Some metadata object names are configured in mds-transfer-config.xml to preserve existing documents in target repository.

Action:
No action required.

MDS-10027
To preserve documents in target store, the following documents from source store are marked as excluded by transfer {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
To preserve documents in target store, some documents from source store are marked as excluded by transfer.

Action:
No action required.

MDS-10030
Sandbox {0} created as part of Import operation is not destroyed after import failed.

Category:
Other

Cause:
A Critical Write error on database side has occurred. Look for specific exception in the log file.

Action:
Destroy unused sandbox from metadata repository. Contact application administrator for assistance.

MDS-10031
Value provided in {0} in CustLayerUsage or CustLayerFilter is not properly encoded.Passed in value will considered as it is without interpreting intended encoded value

Category:
Data

Cause:
Passed in value is not proper hexadecimal encoded value

Action:
No action required.

MDS-10032
Transfer operation with transfer type {0} ignoring document {1} because MDSInstance {2} reported it as not existing.

Category:
Programmatic

Cause:
MDSTransfer is configured to ignore such document.

Action:
No action required.

MDS-10033
Transfer operation with transfer type {0} has been rolled back because {1} documents failed with exceptions.

Category:
Other

Cause:
Operation failed for large number of documents due to exceptions.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the server logs to identify root cause, rerun the operation after correcting the issue in the system environment.

MDS-10034
Polling for store {0} failed - {1}. Polling will retry when the polling interval has elapsed.

Category:
Other

Cause:
The polling query was unable to run. If this is a temporary condition, polling should recover automatically once the error condition is resolved.

Action:
Polling will be retried. If problem persists enable tracing for oracle.mds.dbstore to get full stack trace and check datasources.

MDS-10035
Parallel transfer requested but not feasible, configure oracle.mds.transfer logger to FINEST to get more details.

Category:
Other

Cause:
Parallel transfer not supported for given transfer invocation.

Action:
Configure oracle.mds.transfer logger to FINEST to get more details.

MDS-11001
The type information for "{0}" is not obtainable though the document exists in the MetadataStore.

Category:
Data

Cause:
Could not get type information for a document, a possibly non-wellformed XML document.

Action:
Examine the document

MDS-11002
The type information for "{0}" is not obtainable because of exception "{1}"

Category:
Data

Cause:
Failed to get type information because an exception was raised.

Action:
Examine the exception and the document.

MDS-11003
Failed to force timestamp advance on file {0}: original timestamp = {1}, new timestamp = {2}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
Failed to advance the timestamp on a file which is being saved.

Action:
Examine the file and its permissions.

MDS-11006
Directory {0} does not exist.

Category:
Files

Cause:
The value of a name condition package did not have a corresponding file system directory.

Action:
Check if the directory was expected and determine why it is not present.

MDS-11007
Skipping directory {0} because {1} does not match the condition.

Category:
Programmatic

Cause:
The query considered the given directory, but it could only contain documents that would not match the query.

Action:
If you expected results from the directory, check that the query is correctly specified.

MDS-11008
Skipping directory {0} because it is a filestore root.

Category:
Files

Cause:
The query considered the directory, but it was another root path of the metadata store. This can arise when file store configuration includes multiple root paths and one of these is contained in another.

Action:
If you expected results from the directory, check that the file store is configured correctly.

MDS-11009
Skipping directory {0} because {1} is not a valid package name.

Category:
Programmatic

Cause:
The query skipped the directory because the corresponding package name is invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
If you expected results from the directory, check the directory name for validity.

MDS-11010
Document cache {0} exceeds its maximum number of entries {1}, so the cache is cleared.

Category:
Configuration

Cause:
The document cache exceeded its defined maximum size so it was cleared. If memory allows, the cache should be large enough for all documents for optimum performance but this is not required.

Action:
Edit the adf-config.xml file and increase the size of the document cache.

MDS-11011
Attempting to get failover connection to retry the operation because the database connection failed.

Category:
Configuration

Cause:
The connection to the database failed.

Action:
No action is required. The database is configured with FCF so failover will be attempted.

MDS-11012
Cache collision has been detected when adding key {0}, label set {1}, sandbox name {2}, scope {3}.

Category:
Programmatic

Cause:
The described document was being added to the cache, but it was already present. This can be caused by an incorrect miss in the preceding lookup, or very rarely by the document having been just inserted by another thread.

Action:
If this occurs frequently, contact Oracle Support Services.

MDS-11013
Cannot store the object of type {0} in the Java Object Cache because the cache or cache region is full

Category:
Configuration

Cause:
A CacheFullException or RegionFullException was reported when attempting to store an object in the Java Object Cache.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Consider increasing the size of the configured MDS Cache by modifying the cache-config entry in adf-config.xml.

MDS-11014
Purge-Repos Diagnostics [auto-purge, partition-name, partition-id, tenant-id, #versions purged]: [{0}, {1}, {2}, {3}, {4}].

Category:
Other

Cause:
An auto-purge occurred on a metadata-store.

Action:
No action required.

MDS-11016
MDS JSP Integration has been configured in Developer Mode to allow changes to files to be detected. Do not use this mode for production or performance testing.

Category:
Configuration

Cause:
Developer Mode is configured as a servlet initialization parameter either explicitly or because the application is being run within JDeveloper.

Action:
No action required.

MDS-11017
Started creating the final archive file at {0}.

Category:
Other

Cause:
ArchiveMetadataStore has started to create final archive file with all the changes done on the archive file so far.

Action:
No action required.

MDS-11018
The final archive file has been created successfully. The archive file is available at {0}.

Category:
Other

Cause:
ArchiveMetadataStore has created final archive file with all the changes done on the archive file so far.

Action:
No action required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-11019
The default CharSet {0} is not a unicode character set. File names with non-ASCII characters may not operate as expected. Check locale settings.

Category:
Configuration

Cause:
The Java default CharSet is used to convert file names to and from Java Strings. When this CharSet is a non-unicode character encoding, filenames that contain non-ASCII characters may not be correctly mapped to Java characters.

Action:
Check the locale environment variable settings for the process that is running the JVM that MDS is running in to ensure that a UTF encoding is being used. For example, the LC_ALL and LANG settings may be relevant.

MDS-11020
Cannot delete the intermediary archive file {0}.

Category:
Other

Cause:
The intermediary archive file could not be deleted.

Action:
Try deleting the file outside of MDS.

MDS-11023
MDS Remote Notifications: Coherence is not configured to use unicast and no cluster name is specified so remote notification is not enabled.

Category:
Configuration

Cause:
MDS remote notification only works if the Coherence configuration specifies unicast or a cluster name.

Action:
Unicast can be set by either specifying a unicast-listener in your Coherence cluster-config or by system property tangosol.coherence.wk. A cluster-name can be set either as part of a member-identity in your cluster-config or by system property tangosol.coherence.cluster.

MDS-11026
Ignoring the duplicate MDS component configuration file URL "{0}" found on the classpath.

Category:
Configuration

Cause:
A duplicate URL for an MDS component configuration file was found on the classpath.

Action:
No action required.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-11027
Some metadata is configured to be stored as xml-stream. However it will be ignored because no metadata store configured for this application supports storing metadata in that form.

Category:
Configuration

Cause:
xml-stream content type was configured for some metadata content, but no metadataStore supports the feature.

Action:
No action required if not using xml-stream content type is acceptable. Otherwise, to enhance MDS repository performance, ensure that the metadata store supports xml-stream feature.

MDS-11028
Some metadata is configured to be stored as xml-stream. However it will be ignored because the corresponding metadata store, with class name: {0}, repository name: {1}, partition name: {2}, does not support storing metadata in that form.

Category:
Configuration

Cause:
xml-stream content type was configured for some metadata content, but the metadata store did not support the feature.

Action:
No action required if not using xml-stream content type is acceptable. Otherwise, to enhance MDS repository performance, ensure that the metadata store supports xml-stream feature.

MDS-11029
MetadataStore configuration for metadata-store-usage "{0}" is invalid. However the MetadataStore is ignored because it is not referenced by any namespace mapping.

Category:
Configuration

Cause:
MetadataStore class or some of its properties were not valid.

Action:
Ensure that the MetadataStore class exists and all required properties are valid.

MDS-11030
Failed to get schema version from registry for repository "{0}" because of exception: {1}

Category:
Configuration

Cause:
Either the DataSource definition for the repository is no longer valid or the MDS schema is not created using RCU.

Action:
Ensure the DataSource connection is valid or the schema is created using RCU.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-11032
Registered grammar using remote schema "{0}". In design time (JDev) environment, it is recommended to use local resources.

Category:
Configuration

Cause:
Remote schema was referred with http URI. In design time environment, recommendation is to use local resources.

Action:
Replace it with local copy of schema.

MDS-11033
Duplicate mappings between namespace "{0}" and metadata store "{1}" are found in the persistence configuration.

Category:
Configuration

Cause:
There were more than one namespace to metadata store mappings for a given namespace in the persistence configuration.

Action:
Correct the namespace mapping in persistence configuration to ensure that the namespace is mapped to only one metadata store.

MDS-11034
The name {0} derived from JNDI will be registered as an MDS repository instead of the DataSource with the same name.

Category:
Configuration

Cause:
A JDBC DataSource and a JNDI have conflict in naming a MDS repository in the domain. MDS repository names must be unique within a domain.

Action:
Find out which application is referencing the repository and the JNDI name. Resolve the naming conflict by removing the DataSource with same name only if it is unused.

MDS-11100
MetadataObject.getBaseMO() found a mismatched CacheAccess in the cache. [refNoGUID={0}, guidRef={1}, mdxLookupKey={2}, isLabelledRead={3}, baseDocLabel={4}, setSandboxName={5}, cacheAccess={6}, doc={7}, name={8}, GUID={9}].

Category:
Other

Cause:
CacheAcces does not match the the given MOReference/Guid combination. The metadata object will not be cached.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the MOName and guid are correct and there are no duplicate Guids in the metadata store.

MDS-11101
MetadataObject.getBaseMO() recursing too deep. [refNoGUID={0}, guidRef={1}, mdxLookupKey={2}, isLabelledRead={3}, baseDocLabel={4}, setSandboxName={5}, cacheAccess={6}, doc={7}].

Category:
Other

Cause:
CacheAcces does not match the the given MOReference/Guid combination. The metadata object will not be cached.

Action:
Check the data in the metadata store to determine the cause.

MDS-11102
The MDS session was created by the ADF framework with a transaction key for its "single flush" feature, and the call to {0} is restricted to that framework. This call does not use that transaction key and although working now, will fail with an exception in future. To find the originator of the call, set the log level for logger "oracle.mds.transkey" to FINEST. Note that the ADF framework manages the MDS session created for the request so an explicit call to {0} should be removed.

Category:
Other

Cause:
A call was made to a restricted method on the MDS session and that call should be removed as it is liable to fail in later releases.

Action:
Identify the caller and ensure that the call to this method is removed.

MDS-11103
Failed to register dump classes.

Category:
Other

Cause:
Failed to register dump classes with DFW.

Action:
Contact Oracle Support Services.

MDS-11104
Content config mapping with path {0} contains reserved keyword "mdssys/cust/", use restrictionType="CUSTOMIZATIONS" instead.

Category:
Configuration

Cause:
The path of the content config mapping contains reserved keyword "mdssys/cust/".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Change the content config mapping to use restrictionType="CUSTOMIZATIONS"

MDS-11107
Unable to read "{0}" property value : "{1}". Cause : {2}

Category:
Configuration

Cause:
The property value contains invalid characters.

Action:
Correct the property value and retry.

MDS-11108
Invalid value supplied in "{0}" property value : "{1}".

Category:
Configuration

Cause:
The property value contains values that reduce the cache size to less than the minimum allowed.

Action:
Ensure the property values do not reduce the cache size to less than the minimum allowed.

MDS-11109
Successfully read property "{0}"="{1}" and generated "{2}".

Category:
Configuration

Cause:
Cache weightings successfully read.

Action:
No action required if the generated values are correct.

MDS-11110
customization-type will be ignored for mapping [Path to match={1}] because content-type is not configured in content-config.

Category:
Configuration

Cause:
content-type configuration is missing for mapping [Path to match={1}].

Action:
content-type must be configured as BINARY_STREAM (along with customization-type as FULL_REPLACE) for storing customizations as Layered Stream Object.

MDS-11111
Both ContentConfig and FileTypeConfig are configuring Content Type for file extension {0}, ContentType {1} from ContentConfig will override ContentType {2} from FileTypeConfig for path {3}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
ContentType configured in both Content Config and FileTypeConfig.

Action:
Correct the configuration to avoid the conflict.

MDS-90013
The metadata partition with name "{0}" does not exist in the metadata repository "{1}".

Category:
Topology

Cause:
The metadata partition with the specified name was not found in the metadata repository.

Action:
Create a metadata partition with the specified name in the metadata repository before trying this operation.

MDS-90014
cannot update the metadata because the application is read-only

Category:
Topology

Cause:
No metadata update was made because the ReadOnlyMode attribute was enabled.

Action:
Disable the ReadOnlyMode attribute of the target application configuration.

MDS-90015
The metadata repository with name "{0}" does not exist.

Category:
Topology

Cause:
The metadata repository with the specified name was not found.

Action:
Verify that the repository name is spelled correctly. If the repository does not exist, create one with the specified name and try again.

MDS-90016
There are no applications deployed to partition "{0}".

Category:
Topology

Cause:
An attempt was made to perform this operation on a partition that is not associated with a deployed application.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Specify a partition that is associated with a deployed application.

MDS-90017
The application to be used for this operation is not specified.

Category:
Topology

Cause:
Could not determine which application configuration to use for this operation since there is more than one application deployed to partition "{0}".

Action:
Specify an application that is deployed to partition "{0}" to be used for this operation.

MDS-90018
Application "{1}" is not deployed to partition "{0}".

Category:
Topology

Cause:
The specified application was not deployed to the specified partition.

Action:
Specify an application that is deployed to the partition.

MDS-90019
cannot set the user property on the driver: {0}

Category:
Topology

Cause:
A problem occurred while setting the user property on the driver.

Action:
Ensure that the database server is running properly.

MDS-90020
Metadata store cannot be assigned to server "{0}".

Category:
Topology

Cause:
A problem occurred while assigning resource to the server.

Action:
Ensure that the server is running properly.

MDS-90021
Metadata path {0} is invalid.

Category:
Topology

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The path used to create a FileMetadataStore was invalid. It must point to a directory.

Action:
Correct the metadata path.

MDS-90022
The host name of the database repository cannot be empty.

Category:
Topology

Cause:
The host name of the database repository was empty or null.

Action:
Use a valid host name.

MDS-90023
The database name of the database repository cannot be empty.

Category:
Topology

Cause:
The database name of the database repository was empty or null.

Action:
Use a valid database name.

MDS-90024
The user name of the database repository cannot be empty.

Category:
Topology

Cause:
The user name of the database repository was empty or null.

Action:
Use a valid user name.

MDS-90025
The password of the database repository cannot be empty.

Category:
Topology

Cause:
The password of the database repository was empty or null.

Action:
Use a valid password.

MDS-90026
The server name cannot be empty.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Topology

Cause:
The server name was empty or null.

Action:
Use a valid server name.

MDS-90027
cannot find server "{1}" to register the metadata repository "{0}"

Category:
Topology

Cause:
The server name was invalid.

Action:
Use a valid server name.

MDS-90028
Metadata repository with name "{0}" already exists.

Category:
Topology

Cause:
Metadata repository with the specified name already exists.

Action:
Verify that the repository name is spelled correctly. If the repository already exists, create one with a different name and try again.

MDS-90029
The metadata db repository with name "{0}" does not exist.

Category:
Topology

Cause:
The metadata db repository with the specified name was not found.

Action:
Verify that the db repository name is spelled correctly.

MDS-90030
The metadata file repository with name "{0}" does not exist.

Category:
Topology

Cause:
The metadata file repository with the specified name was not found.

Action:
Verify that the file repository name is spelled correctly.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-90031
The JDBC resource of metadata db repository "{0}" cannot be found.

Category:
Topology

Cause:
The JDBC resource was not found.

Action:
Verify that the metadata db repository is set up correctly.

MDS-90032
The metadata store of metadata file repository "{0}" cannot be found.

Category:
Topology

Cause:
The metadata store was not found.

Action:
Verify that the metadata file repository is set up correctly.

MDS-90033
unknown DB vendor code: "{0}"

Category:
Topology

Cause:
The DB vendor code is invalid.

Action:
Use a valid DB vendor code, such as 0 (ORACLE), 1 (MSSQL), or 2 (IBMDB2).

MDS-90034
The source directory or archive "{0}" for importing metadata is invalid.

Category:
Topology

Cause:
The directory or archive location used to import metadata was invalid. It must point to a valid, existing directory or archive.

Action:
Correct the source directory or archive location.

MDS-90035
The target directory or archive "{0}" for exporting metadata is invalid.

Category:
Topology

Cause:
The directory or archive location used to export metadata was invalid. It must point to a valid location.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the target directory or archive file location.

MDS-90036
The application does not have a valid MAR file path.

Category:
Topology

Cause:
The MAR path used to import MAR was invalid. It must point to a valid, existing MAR file.

Action:
Make sure the MAR file exists and is located in the correct directory of the application.

MDS-90037
The archive "{0}" does not contain valid contents.

Category:
Topology

Cause:
The archive used to import metadata was invalid. It must be to a valid, existing zip or jar file.

Action:
Make sure the archive is valid.

MDS-90038
The database authentication alias "{0}" already exists. To reuse the same authentication alias, try the operation again without specifying user and password.

Category:
Topology

Cause:
An attempt was made to configure a database authentication alias that already existed in Websphere server.

Action:
Delete the existing authentication alias and try again, or specify a new authentication alias, or reuse the existing authentication alias by not specifying user and password.

MDS-90039
The database authentication alias "{0}" cannot be found. To create the authentication alias, try the operation again with user and password specified.

Category:
Topology

Cause:
An attempt was made to use a database authentication alias that was not configured in Websphere server.

Action:
Make sure the specified database authentication alias is properly configured in Websphere server, or automatically create the authentication alias by specifying user and password.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-90040
failed to connect to database

Category:
Topology

Cause:
An error occurred when trying to connect to database.

Action:
Make sure the database connection details are correct. Look at the cause exception for more details.

MDS-90041
Customization layer values are not supported for "excludeCustFor" parameter.

Category:
Topology

Cause:
One or more customization layer values was specified for "excludeCustFor" parameter.

Action:
Make sure there are no customization layer values specified for "excludeCustFor" parameter.

MDS-90042
"{0}" is not a valid tenant name.

Category:
Configuration

Cause:
The specified tenant was not provisioned in the specified partition and repository.

Action:
Specify a valid tenant name.

MDS-90043
This operation cannot be performed by the tenant named "{0}". It can only be invoked by the "{1}" tenant.

Category:
Configuration

Cause:
The specified tenant was not provisioned in the partition and repository provided.

Action:
Execute this operation as GLOBAL tenant.

MDS-90044
This operation cannot be performed because the WebLogic edit session has been locked by a different user.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The WebLogic edit session has been locked by a different user.

Action:
Retry the operation after the edit session lock is released.

MDS-90045
MDS dump operation "{0}" failed.

Category:
Data

Cause:
Exception occurred during the execution of the command.

Action:
Provide the required parameters for the command.

MDS-90046
MDS Application runtime MBean for application "{0}" running in server "{1}" is not available. "{2}" operation failure.

Category:
Configuration

Cause:
MDS Application runtime MBean was not available in the server.

Action:
Ensure the MDS Application runtime MBean for the application is available in the server. Ensure application name is correct.

MDS-90047
The target archive name "{0}" is invalid. It must point to a local file name with a valid archive extension.

Category:
Data

Cause:
The archive location used for mds dump operation was invalid.

Action:
Ensure target archive name is a valid local file name with valid archive extension.

MDS-90048
The dump argument "{0}" is invalid. It cannot be an empty string.

Category:
Data

Cause:
A request to execute dump was made with an invalid argument.

Action:
Ensure valid values are given for the dump arguments.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-90049
Exclusion of documents during exportMetadata is not supported for seeded documents.

Category:
Data

Cause:
It was invalid to specify excludeDocs while not setting excludeSeededDos to true.

Action:
Either set excludeSeededDocs to true, or unspecify excludeDocs.

MDS-90050
ExportParameters can not be null for {0} operation.

Category:
Data

Cause:
ExportParameters with null value was not allowed.

Action:
Specify a valid ExportParameters argument.

MDS-90051
ImportParameters can not be null for {0} operation.

Category:
Data

Cause:
ImportParameters with null value was not allowed.

Action:
Specify a valid ImportParameters argument.

MDS-90052
Cannot deregister metadata repository "{0}" because it is based on a JNDI name of a consolidated data source.

Category:
Data

Cause:
The deregistration of a metadata repository that is based on a JNDI name of a consolidated data source is not allowed.

Action:
Perform deregistration operation on a metadata repository that is based on a non-consolidated data source only.

MDS-90053
Import Metadata With Exact copy operation is not supported when export operation used to generate source archive uses programmatic TransferListener.

Category:
Data

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Export parameter transferListener was specified to generate archive that was acting as source for Import Metadata With Exact Copy Operation.

Action:
Use an archive MetadataStore that was exported without programmatic TransferListener specified.

MDS-90054
The resource group "{0}" cannot not be found in "{1}" partition.

Category:
Data

Cause:
The specified resource group was not found in the current domain partition.

Action:
Verify that the specified resource group is defined in the current domain partition.

MDS-90055
The resource group must be specified to register a metadata repository at "{0}" partition.

Category:
Data

Cause:
The resource group was not specified to register a metadata repository at partition scope.

Action:
Specify a resource group for registering a metadata repository at the domain partition containing that resource group.

MDS-90056
{0} can not be null for {1} operation.

Category:
Data

Cause:
Null value was not allowed.

Action:
Specify a valid argument.

MDS-90057
The document name used in exportDocVersions operation is invalid.

Category:
Data

Cause:
Document pattern or empty document name was used.

Action:
Use the exact full document path.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-90058
{0} operation is not permitted in Weblogic domain configured with consolidate schema or datasource.

Category:
Configuration

Cause:
It was unneccesary to register or deregister a metadata DB repository in consolidate Weblogic domain.

Action:
Use pre-configured metadata DB repository.

MDS-90059
A Metadata Archive (MAR) with the name {0} was found either packaged with the EAR or in directories listed in {1}.

Category:
Configuration

Cause:
Metadata Archive (MAR) names must be unique. Two or more metadata archives were found with the same name.

Action:
Use pre-configured metadata DB repository.

MDS-90060
A required JRF patch to support MSI-D was not applied in this env.

Category:
Other

Cause:
A JRF patch to enhance support for WebLogic Server MSI-D feature is missing in this env.

Action:
Apply the JRF Patch corresponding to the WLS MSI-D feature.

MDS-90061
The path denoted by "{0}" does not represent a Metadata Archive (MAR).

Category:
Other

Cause:
The path to a Metadata Archive (MAR) must represent a file with a "mar" extension.

Action:
Ensure that the Metadata Archive (MAR) path refers to a file with a "mar" extension in the application's EAR file.

MDS-90143
"{0}" is not a valid component name.

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The specified component name is invalid.

Action:
Specify a valid audit component name that uses only letters.

MDS-90144
Error registering audit event definitions for component "{0}".

Category:
Configuration

Cause:
The audit event definitions could not be registered.

Action:
Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-90145
Error occurred when raising audit event "{0}" for component "{1}".

Category:
Configuration

Cause:
The audit event was not registered or an unknown error occurred in the auditing system.

Action:
Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-90146
Error occurred when checking if "{0}" is auditable.

Category:
Configuration

Cause:
An unknown error occurred when checking if auditing is enabled for the component "{0}".

Action:
Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-90147
Error occurred when checking if the component "{0}" is auditable.

Category:
Configuration

Cause:
An unknown error occurred when checking if auditing is enabled for the event "{1}" defined for the component "{0}".

Action:
Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-90148
The custom audit event of type "{0}" was not audited because the event was not auditable according to the current audit policy.

Category:
Programmatic

Cause:
The custom audit event was either undefined in the audit configuration or it was not auditable according to the audit policy in effect.

Action:
Check the audit policy in effect.

MDS-90149
The custom audit event of type "{0}" was not audited because the MDSSession was not associated with a sandbox.

Category:
Programmatic

Cause:
The custom audit event was not audited because the current MDSSession was not associated with a Sandbox.

Action:
Use this API only when the custom audit event is intended to be raised in a sandbox context.

MDS-90243
Content auto merge failed for MO part "{0}" with change type "{1}" because its type is not registered for auto merge.

Category:
Programmatic

Cause:
The specified MOType is not registered for auto merge functionality.

Action:
Register the MOType for auto merge functionality.

MDS-90244
Content auto merge failed for MO part "{0}" with change type "{1}" because its base document is not accessible for read from any configured metadata stores.

Category:
Programmatic

Cause:
Base document is not accessible for read.

Action:
Make sure base document is available for read through any of configured metadata stores.

MDS-90245
Content auto merge failed for MO part "{0}" with change type "{1}" because both base and customization MOParts have conflicts and base MOPart is not a stub.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
Base MOPart is not a stub document.

Action:
This is unsupported case. Contact Oracle Support Services.

MDS-90246
Content auto merge failed for MO part "{0}" with change type "{1}" because mainline contains conflicting change type "{2}" for the same MOPart.

Category:
Programmatic

Cause:
There were conflicting changes for MetadataObject between sandbox and mainline and cannot be resolved by content auto merge.

Action:
Contact Application Administrator to resolve these conflicts manually or perform the changes again in a new sandbox.

MDS-90247
Content auto merge failed for MOPart "{0}" with change type "{1}", because conflicts identified for metadata object include changes for non tip or non configured customization layer "{2}".

Category:
Programmatic

Cause:
Conflicts detected for given metadata object include changes for non tip or non configured customization layer.

Action:
This is unsupported case. Contact Oracle Support Services.

MDS-90248
Content auto merge failed for MetadataObject "{0}".

Category:
Programmatic

Cause:
Content auto merge failed for specified MO.

Action:
Please check each MOPart exception for detailed reasons.

MDS-90249
Content auto merge failed for MetadataObject "{0}", because the MO constitutes more than one customization MOPart for the customization layer "{2}".

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Customization layer yields multiple layer values.

Action:
This is unsupported case. Contact Oracle Support Services.

MDS-90251
Conflict resolution hook annotation is missing for MOType {0}.

Category:
Configuration

Cause:
Conflict resolution policy was set to "callback" for the document type but associated Conflict resolution hook annotation configuration is missing.

Action:
Record the accompanying error and contact the developers of the application.

MDS-90252
Conflict resolution policy is either found missing or it's value is not set to "callback" for MOType {0}

Category:
Configuration

Cause:
Conflict resolution hook annotation was found in document type but conflict resolution policy configuration was either not supplied or the value was not set to "callback".

Action:
Record the accompanying error and contact the developers of the application.

MDS-90253
AutoMergePluginContext is null for AutoMergePlugin class {0}

Category:
Programmatic

Cause:
AutoMergePluginContext was found as null in AutoMergePlugin instance.

Action:
Record the accompanying error and contact the developers of the application.

MDS-90254
Unable to get AutoMergePlugin for MOType "{0}", Parameter AutoMergePluginContext must have a value.

Category:
Programmatic

Cause:
Parameter AutoMergePluginContext was null.

Action:
Record the accompanying error and contact the developers of the application.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-90255
Conflict resolution hook class "{0}" cannot be instantiated for MOType "{1}"

Category:
Configuration

Cause:
An exception occurred while instantiating conflict resolution hook class.

Action:
Record the accompanying error and contact the developers of the application.

MDS-90256
Unable to get AutoMergePlugin instance from AutoMergePluginFactory for MOType "{0}".

Category:
Programmatic

Cause:
AutoMergePluginFactory returned null for AutoMergePlugin.

Action:
Record the accompanying error and contact the developers of the application.

MDS-90257
Unable to get AutoMergePluginFactory instance from ConflictResolutionHook for MOType "{0}".

Category:
Programmatic

Cause:
ConflictResolutionHook returned null for AutoMergePluginFactory.

Action:
Record the accompanying error and contact the developers of the application.

MDS-90258
Conflict resolution hook class "{0}" cannot be instantiated to get merge handler for MOType "{1}"

Category:
Configuration

Cause:
An exception occurred while instantiating conflict resolution hook class to get merge handler.

Action:
Record the accompanying error and contact the developers of the application.

MDS-90259
Unable to get MergeHandler instance from MergeHandlerFactory for MOType "{0}".

Category:
Programmatic

Cause:
MergeHandlerFactory returned null for MergeHandler.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Record the accompanying error and contact the developers of the application.

MDS-90260
Unable to get MergeHandlerFactory instance from ConflictResolutionHook for MOType "{0}".

Category:
Programmatic

Cause:
MergeHandlerFactory returned null for MergeHandlerFactory.

Action:
Record the accompanying error and contact the developers of the application.

MDS-90343
Sandbox "{0}" Apply operation failed for MO part "{1}" since conflict were identified with mainline changes for MO Part "{2}" that violates the relationship and dependency constraints.

Category:
Programmatic

Cause:
Sandbox changes violate some dependency constraints with mainline changes.

Action:
Contact Application Administrator to resolve these conflicts manually or perform the changes again in a new sandbox.

MDS-90344
Sandbox "{0}" apply operation with content auto merge failed.

Category:
Programmatic

Cause:
Sandbox apply operation with auto merge failed.

Action:
Please check each MO exception for detailed reasons.

MDS-90345
Failure to get conflicts for sandbox

Category:
Programmatic

Cause:
Target label is older than the sandbox mainline label.

Action:
Specify a target label which is later than current label.

MDS-90346
Invalid SandboxUsage. The sandbox name "{0}" in sandboxUsage does not match with Sandbox instance being operated upon.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
Wrong sandbox name used while retrieving MDSSession for conflict resolution.

Action:
Use right SandboxUsage that was used earlier for making the sandbox changes.

MDS-90347
Retry refresh operation on Sandbox "{0}" failed as it detected some unexpected mainline changes on MDSSession which is intended for conflict resolution, for following documents : {1}

Category:
Programmatic

Cause:
Unexpected mainline changes detected on MDSSession that was retrieved for conflict resolution during sandbox refresh operation.

Action:
Cancel mainline document changes from the MDSSession and retry the refresh operation.

MDS-90348
This operation cannot continue as Refresh is in progress for Sandbox {0}.

Category:
Programmatic

Cause:
Some other refresh operation might be in progress.

Action:
Cancel or End the in-progress refresh before trying this operation.

MDS-90349
This operation cannot continue as Refresh operation is either not initiated OR already ended for Sandbox {0}.

Category:
Programmatic

Cause:
Sandbox beginRefresh() hasn't been called.

Action:
Invoke the beginRefresh() first before this operation.

MDS-90350
This operation cannot continue as in progress refresh transaction is not yet completed for Sandbox {0}.

Category:
Programmatic

Cause:
Sandbox refresh operation hasn't ended using endRefresh() call.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Invoke the endRefresh() before trying this operation.

MDS-90351
Tip customization layer name and value are not defined for refresh operations for Sandbox {0}.

Category:
Programmatic

Cause:
Tip customization layer name and value are not defined.

Action:
Define tip customization layer name and value to perform sandbox refresh.

MDS-90352
Refresh operation cannot be ended since there are pending conflicts to resolve for Sandbox {0}.

Category:
Programmatic

Cause:
There are pending conflicts to resolve.

Action:
Resolve the pending conflicts and try the operation again.

MDS-90353
Sandbox name is null or empty.

Category:
Programmatic

Cause:
Sandbox name was null or empty.

Action:
Use a valid sandbox name that is not empty or null.

MDS-90500
Count of unresolved merge conflict(s) - {0}

Category:
Data

Cause:
One or more unresolved merge conflict(s) exists.

Action:
For more details, use getUnresolvedMergeConflicts() method on MOPartChangeContentAutoMergeException instance.

MDS-90501
Unexpected content auto-merge error

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
An unexpected content auto-merge error occurred.

Action:
Please resolve the conflict before attempting auto-merge operation again.

MDS-90502
Invalid input documents for content auto-merge operation.

Category:
Data

Cause:
Invalid documents are provided to perform content auto-merge operation.

Action:
Provide valid documents.

MDS-90503
Limited support available for XSD content auto-merge operation.

Category:
Programmatic

Cause:
Unable to auto-merge changes being made by the request or by another user done to XSD metadata object.

Action:
Please resolve the conflict before attempting auto-merge operation again.

MDS-90504
No support to auto-merge updates done to elements with brittle local reference.

Category:
Data

Cause:
Updates done on elements with brittle local reference.

Action:
Resolve the conflict before attempting auto-merge operation again.

MDS-90505
Auto-merge synchronous XML tree walk failure occurred while handling following merge conflict - * {0}

Category:
Data

Cause:
An error occurred in the MDSDocumentAutoMergePlugin.

Action:
Check for log messages. If the problem persists, contact Oracle Support Services.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-90506
No support to auto-merge move operation

Category:
Data

Cause:
Encountered move operation while performing content auto-merge operation.

Action:
Resolve the conflict before attempting auto-merge operation again.

MDS-90507
Type annotation "automerge" for child-list order preference on element with local reference "{0}" in metadata object "{1}" does not have valid value. Valid values are "childListOrderNotImportant" and "childListOrderImportant"

Category:
Data

Cause:
Child-list of the underlying element was modified as part of content auto-merge operation.

Action:
Provide valid value for "automerge" type-annotation. Valid values are "childListOrderNotImportant" and "childListOrderImportant".

MDS-90508
Type annotation automergeChildListOrderDefault set on element definition of root element in metadata object "{0}" does not have valid value. Valid values are "childListOrderNotImportant" and "childListOrderImportant".

Category:
Data

Cause:
Invalid value provided for automergeChildListOrderDefault type-annotation.

Action:
Provide valid value for automergeChildListOrderDefault type-annotation. Valid values are "childListOrderNotImportant" and "childListOrderImportant".

MDS-90540
Unable to automerge changes done to attribute on element "{0}" with local reference "{1}" since attribute "{2}" is inserted with different values "{3}" in the current transaction and "{4}" in another transaction.

Category:
Data

Cause:
Encountered element attribute automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-90541
Unable to automerge changes done to attribute on element "{0}" with local reference "{1}" since attribute "{2}" is updated with different values "{3}" in the current transaction and "{4}" in another transaction.

Category:
Data

Cause:
Encountered element attribute automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90542
Unable to automerge changes done to attribute on element "{0}" with local reference "{1}" since attribute "{2}" is deleted in the current transaction but updated with value "{3}" in another transaction.

Category:
Data

Cause:
Encountered element attribute automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90543
Unable to automerge changes done to attribute on element "{0}" with local reference "{1}" since attribute "{2}" is updated with value "{3}" in the current transaction but deleted in another transaction.

Category:
Data

Cause:
Encountered element attribute automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90550
Unable to automerge changes done to text content of element "{0}" with local reference "{1}" since its text content is inserted with different values "{2}" in the current transaction and "{3}" in another transaction.

Category:
Data

Cause:
Encountered text content element automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-90551
Unable to automerge changes done to text content of element "{0}" with local reference "{1}" since its text content is updated with different values "{2}" in the current transaction and "{3}" in another transaction.

Category:
Data

Cause:
Encountered text content element automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90552
Unable to automerge changes done to text content of element "{0}" with local reference "{1}" since its text content is deleted in the current transaction but updated with value "{2}" in another transaction.

Category:
Data

Cause:
Encountered text content element automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90553
Unable to automerge changes done to text content of element "{0}" with local reference "{1}" since its text content is updated with value "{2}" in the current transaction but deleted in another transaction.

Category:
Data

Cause:
Encountered text content element automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90560
Unable to automerge insertion of element "{0}" with local reference "{1}" under parent element "{2}" with local reference "{3}" since its fragment contents differ in the current transaction and in another transaction.

Category:
Data

Cause:
Encountered element insertion automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-90561
Unable to automerge insertion of merge-unit "{0}" with local reference "{1}" under parent element "{2}" with local reference "{3}" since its fragment contents differ in the current transaction and in another transaction.

Category:
Data

Cause:
Encountered merge-unit insertion automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90562
Unable to automerge updates done to element "{0}" with local reference "{1}" under parent element "{2}" with local reference "{3}" since its fragment contents differ in the current transaction and in another transaction.

Category:
Data

Cause:
Encountered element update automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90563
Unable to automerge updates done to merge-unit "{0}" with local reference "{1}" under parent element "{2}" with local reference "{3}" since its fragment contents differ in the current transaction and in another transaction.

Category:
Data

Cause:
Encountered merge-unit update automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90564
Unable to automerge changes done to element "{0}" with local reference "{1}" under parent element "{2}" with local reference "{3}" since it is deleted in the current transaction but its fragment contents are updated in another transaction.

Category:
Data

Cause:
Encountered element automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-90565
Unable to automerge changes done to merge-unit "{0}" with local reference "{1}" under parent element "{2}" with local reference "{3}" since it is deleted in the current transaction but its fragment contents are updated in another transaction.

Category:
Data

Cause:
Encountered merge-unit automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90566
Unable to automerge changes done to element "{0}" with local reference "{1}" under parent element "{2}" with local reference "{3}" since its fragment contents are updated in the current transaction but this element is deleted in another transaction.

Category:
Data

Cause:
Encountered element automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90567
Unable to automerge changes done to merge-unit "{0}" with local reference "{1}" under parent element "{2}" with local reference "{3}" since its fragment contents are updated in the current transaction but this merge-unit is deleted in another transaction.

Category:
Data

Cause:
Encountered merge-unit automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90568
Unable to automerge changes done to element "{0}" with local reference "{1}" since it is deleted in the current transaction but moved under a different parent in another transaction.

Category:
Data

Cause:
Encountered element automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90569
Unable to automerge insertion of element with local reference "{0}" in the current transaction since it is inserted under a different parent in another transaction.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Data

Cause:
Encountered element automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90570
Unable to automerge insertion of root element "{0}" with local reference "{1}" since its fragment contents differ in the current transaction and in another transaction.

Category:
Data

Cause:
Encountered element insertion automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90571
Unable to automerge insertion of root merge-unit "{0}" with local reference "{1}" since its fragment contents differ in the current transaction and in another transaction.

Category:
Data

Cause:
Encountered merge-unit insertion automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90572
Unable to automerge updates done to root element "{0}" with local reference "{1}" since its fragment contents differ in the current transaction and in another transaction.

Category:
Data

Cause:
Encountered element update automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90573
Unable to automerge updates done to root merge-unit "{0}" with local reference "{1}" since its fragment contents differ in the current transaction and in another transaction.

Category:
Data

Cause:
Encountered merge-unit update automerge conflict while performing content automerge.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90574
Unable to automerge changes done to element "{0}" with local reference "{1}" since it is moved under a different parent in the current transaction but deleted in another transaction.

Category:
Data

Cause:
Encountered element automerge conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-90590
Unable to automerge updates done to element "{0}" with local reference "{1}" since its child order differs between the current transaction and another transaction.

Category:
Data

Cause:
Encountered child order conflict while performing content automerge.

Action:
Resolve the conflict before attempting automerge operation again.

MDS-91001
MDS domain runtime MBean is not available. "{0}" operation failure.

Category:
Configuration

Cause:
MDS domain runtime MBean was not available in the server.

Action:
Ensure the MDS domain runtime MBean is available in the server.

MDS-91002
MDS Application runtime MBean for "{0}" is not available. "{1}" operation failure.

Category:
Configuration

Cause:
MDS Application runtime MBean was not available in the server.

Action:
Ensure the MDS Application runtime MBean for the application is available in the server.

MDS-91003
Multiple MDSAppRuntimeMBean exist for "{0}". To execute the command, parameter "applicationVersion" is required. "{1}" operation failure.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Configuration

Cause:
Multiple MDSAppRuntimeMBean for the application were found in the server.

Action:
Provide the 'applicationVersion' parameter.

MDS-91004
MDS domain runtime MBean commands can be executed only from the Admin server. "{0}" operation failure.

Category:
Configuration

Cause:
WLST was not connected to the Admin server.

Action:
Connect to an Admin server before executing the command.

MDS-91005
No connection to a "{0}" server exists. The operation "{1}" can be executed only in the online mode.

Category:
Configuration

Cause:
Command was executed in the offline mode.

Action:
Ensure WLST is connected to the server.

MDS-91006
Expecting a "{0}" for parameter "{1}" but encountering "{2}". "{3}" operation failure.

Category:
Data

Cause:
Parameter type passed to the command was not correct.

Action:
Ensure the correct type of parameters are passed to the command.

MDS-91007
dbVendor should be one of ORACLE, MSSQL, IBMDB2, or MYSQL. "{0}" operation failure.

Category:
Data

Cause:
dbVendor value was not correct.

Action:
Ensure the dbVendor value is one of ORACLE, MSSQL, IBMDB2, or MYSQL.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-91008
The "{0}" parameter is required. Provide a valid value and retry the operation.

Category:
Data

Cause:
Required parameter for the command was not given.

Action:
Provide the required parameters for the command.

MDS-91009
Operation "{0}" failure.

Category:
Data

Cause:
Exception occurred during the execution of the command.

Action:
Provide the required parameters for the command.

MDS-91010
The "adf-config" element is not available in the given archive file. "{0}" operation failure.

Category:
Configuration

Cause:
The "adf-config" element is not available in the given archive file.

Action:
Ensure the "adf-config" element is available in the adf-config.xml of the given archive file.

MDS-91011
No "mds-config" element exists in the adf-config.xml of the given archive. "{0}" operation failure.

Category:
Configuration

Cause:
No mds-config element existed in the adf-config.xml file of the archive file.

Action:
Ensure the "mds-config" element is available in the adf-config.xml file.

MDS-91012
Metadata repository connection type value should be either "File" or "DB". "{0}" operation failure.

Category:
Data

Cause:
Metadata repository connection type value is not correct.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure the metadata repository connection type value is either 'File' or 'DB'.

MDS-91013
For the metadata repository''s DB connection type, JNDI location is a required parameter. "{0}" operation failure.

Category:
Data

Cause:
JNDI location not provided for DB connection type.

Action:
Provide the JNDI location string while updating the repository connection to DB.

MDS-91014
For the metadata repository''s File connection type, path location is a required parameter. "{0}" operation failure.

Category:
Data

Cause:
The path value was not provided for File connection type.

Action:
Provide the path location string while updating the repository connection to File.

MDS-91015
All parameters are required to update shared metadata repository configuration in adf-config.xml. At present, source archive has no connection details for the namespace "{0}". "{1}" operation failure.

Category:
Data

Cause:
Complete connection information was not provided to set the shared repository for the given namespace.

Action:
Provide complete connection information in case the adf-config.xml file does not have any metadata repository connection information for the given namespace already.

MDS-91016
All parameters are required to define new application metadata repository configuration in adf-config.xml. The source archive configuration does not contain any application metadata repository at present. "{0}" operation failure.

Category:
Data

Cause:
Complete connection information was not provided to set the application target repository.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Provide complete connection information in case the adf-config.xml does not have any metadata repository connection information for the application target repository already.

MDS-91017
The given namespace "{0}" to set the shared repository is not valid. Ensure that the namespace is available in the adf-config.xml file and it is not a sub-namespace of any other namespace. "{1}" operation failure.

Category:
Data

Cause:
The namespace provided to set the shared repository details is not valid.

Action:
Ensure that the namespace is available in the adf-config.xml file and it is not a subnamespace of any other namespace in that file.

MDS-91018
No namespaces are mapped to any shared repository in the source archive adf-config.xml configuration file. Shared repository details cannot be set. "{0}" operation failure.

Category:
Configuration

Cause:
No namespaces were mapped to any shared repository in the source archive adf-config.xml configuration file.

Action:
To set the shared repository connections, ensure at least one namespace is mapped to shared repository in the source archive adf-config.xml file.

MDS-91019
Multiple MDSAppRuntimeMBean exist for application "{0}". Ensure that the "application" "node" and "server" parameters are correct. "{1}" operation failure.

Category:
Configuration

Cause:
Multiple MDSAppRuntimeMBean for the application were found in the server.

Action:
Ensure that the "application" "node" and "server" parameters are correct.

MDS-91020
MDS Application runtime MBean for "{0}" is not available in server "{2}". Ensure server name and application name are correct. "{1}" operation failure.

Category:
Configuration

Cause:
MDS Application runtime MBean was not available in the server.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure the MDS Application runtime MBean for the application is available in the server. Ensure the server name and the application name are correct.

MDS-91021
Multiple MDSAppRuntimeMBean exist for "{0}" in server "{2}". To execute the command, parameter "applicationVersion" is required. "{1}" operation failure.

Category:
Configuration

Cause:
Multiple MDSAppRuntimeMBean for the application were found in the server.

Action:
Provide the 'applicationVersion' parameter.

MDS-91022
Parameter "{0}" cannot be an empty string. "{1}" operation failure.

Category:
Data

Cause:
The parameter is not allowed to be an empty string.

Action:
Ensure the parameter has a correct value.

MDS-91023
Parameter "{0}" contains at least one empty element. "{1}" operation failure.

Category:
Data

Cause:
The parameter is not allowed to contain one or more empty elements.

Action:
Ensure every element specified in the parameter is correct.

MDS-91024
Parameters "{0}" and "{1}" cannot be specified at the same time.

Category:
Data

Cause:
The two parameters are not allowed to be specified at the same time.

Action:
Remove one of the parameters.

MDS-92000
Oracle Metadata Services schema upgrade is invalid.

Category:
Upgrade

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Specified Metadata Services schema was updated but is invalid.

Action:
Restore the Metadata Services schema from a backup and retry. Check the error messages in log file. Correct the problem before running the Assistant again.

MDS-92001
The upgrade is not supported from Oracle Metadata Services schema version of {0}.

Category:
Upgrade

Cause:
An unsupported base schema version was being upgraded.

Action:
Refer to the Oracle Metadata Services Upgrade Guide for supported versions to upgrade.

MDS-92002
Error in upgrading Oracle Metadata Services schema.

Category:
Upgrade

Cause:
An unexpected error occurred during Oracle Metadata Services schema upgrade.

Action:
Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.

MDS-92003
Error occurred while verifying the character set in target Metadata Services schema

Category:
Upgrade

Cause:
A SQL error occurred while verifying the character set in target Metadata Services schema.

Action:
Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.

MDS-92004
Error occurred while closing the resources during Metadata Services schema upgrade

Category:
Upgrade

Cause:
A SQL error occurred while closing the resources during Metadata Services schema upgrade.

Action:
Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.

Copyright © 2000, 2026, Oracle and/or its affiliates.

MDS-92005
Error occurred while closing Metadata Services schema upgrade log files.

Category:
Upgrade

Cause:
An unexpected error occurred while closing Metadata Services schema upgrade log files.

Action:
Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.

MDS-92006
Oracle Metadata Service schema status is invalid.

Category:
Upgrade

Cause:
Specified Oracle Metadata Services database schema was invalid.

Action:
Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.

MDS-92007
Error occurred while verifying the user privileges in target Metadata Services schema

Category:
Upgrade

Cause:
A SQL error occurred while verifying the user privileges in target Metadata Services schema.

Action:
Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.

MDS-92008
The logon DBA user does not have sufficient privileges to upgrade the target Metadata Services schema user

Category:
Upgrade

Cause:
The logon DBA user needs to have grant execute privilege on specific DBMS packages to other users for upgrading the schema user privileges in target Metadata Services schema.

Action:
Logon as SYSDBA or other DBA users with sufficient privileges to grant execute on DBMS packages to other users and run the Assistant again.

MDS-92009
Oracle Metadata Services schema is not enabled for EBR.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Upgrade

Cause:
Specified Oracle Metadata Services database schema was not enabled for EBR.

Action:
Specify an Oracle Metadata Service schema that is enabled for EBR or Specify an upgrade for Oracle database type.

MDS-92010
Unable to continue due to an unexpected error

Category:
Upgrade

Cause:
An unexpected error occurred.

Action:
See the secondary error message for additional details.

NG-1010 to NG-2170

NG-1010
The archive location must be provided using the -archiveLoc option

Category:
Configuration

Cause:
The archive location option (-archiveLoc) was not provided.

Action:
include the -archiveLoc option during the execution.

NG-1020
The archive location must specify a file that does not exist but {0} already exists

Category:
Configuration

Cause:
The Archive jar that will be created, already exists and cannot be override.

Action:
Change the name of the archive jar or delete/move the file that already exists.

NG-1030
The Oracle Home location {0} does not exist

Category:
Configuration

Cause:
The ORACLE_HOME variable contains a location that does not exist.

Action:
Change the ORACLE_HOME variable to a valid location that exist.

NG-1040
Disk space insufficient

Category:
Memory

Cause:
The location provided to create the archive jar does not have enough disk space to create the file.

Action:
Release some disk space or change the location.

Copyright © 2000, 2026, Oracle and/or its affiliates.

NG-1050
{0} cannot be accessed for write

Category:
Files

Cause:
When appending each file to the archive jar, the permissions file is being generated and the file is not accessible during that process.

Action:
Verify that the location provided has write permissions to create the archive.

NG-1060
Could not create the {0} file

Category:
Files

Cause:
The properties file cannot be written into the temporary location

Action:
Verify that the location provided has write permissions to create the properties file.

NG-1070
{0} could not be append to jar

Category:
Files

Cause:
When appending each installed OUI file to the archive jar one file was not able to be appended.

Action:
Verify that the location provided has write permissions to create the archive.

NG-1080
Manifest could not be created in {0}

Category:
Files

Cause:
To make the jar executable, a manifest is required to be append into the archive, if the Manifest creation was not possible will throw this message.

Action:
Verify that the location provided has write permissions to create the archive.

NG-1090
Manifest could not be append to jar

Category:
Files

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Appending the temporary manifest into the archive jar will throw an error if the jar is not accesible.

Action:
Verify that the location provided has write permissions to create the archive.

NG-1100
Clone permissions file could not be append to jar

Category:
Files

Cause:
Appending the temporary permissions file into the archive jar will throw an error if the jar is not accesible.

Action:
Verify that the location provided has write permissions to create the archive.

NG-1110
Unable to append executable classes to {0}

Category:
Files

Cause:
Appending the required executable classes into the archive jar will throw an error if the jar is not accesible.

Action:
Verify that the location provided has write permissions to create the archive.

NG-1120
Clone main class file could not be append to jar

Category:
Files

Cause:
Appending the main class into the archive jar will throw an error if the jar is not accesible.

Action:
Verify that the location provided has write permissions to create the archive.

NG-1130
Could not retrieve top level products from {0}

Category:
Files

Cause:
When using the option -includeDirs if one of the directories does not exists will send this message.

Action:
Verify that all the directories provided for option -includeDirs exist.

Copyright © 2000, 2026, Oracle and/or its affiliates.

NG-1140
Unable to append files in directory {0} to jar {1}

Category:
Files

Cause:
If while appending files into the archive jar there was a problem reading the directory will throw this message.

Action:
Read the exception thrown for more details.

NG-1150
Could not process elements in directory {0} while appending to jar {1}

Category:
Files

Cause:
If while appending files into the archive jar there was a problem will throw this message.

Action:
Read the exception thrown for more details.

NG-1160
The archive location cannot be created inside the Oracle Home

Category:
Files

Cause:
The location where the archive will be created should not be inside the oracle home that will be clone.

Action:
Change the location of the archive to a place outside of the Oracle Home.

NG-2010
Oracle home is required

Category:
Configuration

Cause:
When the mandatory ORACLE_HOME variable was not provided.

Action:
Provide mandatory ORACLE_HOME variable.

NG-2015
Oracle home is already registered in the inventory

Category:
Configuration

Cause:
The mandatory ORACLE_HOME variable provided is already registered in inventory.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
The Oracle Home provided should be change to a new one that is not registered in the inventory.

NG-2020
The output Oracle Home should be an empty directory

Category:
Configuration

Cause:
The mandatory ORACLE_HOME variable should be an empty directory not an already existing Oracle Home.

Action:
Change The Oracle Home provided to an empty location.

NG-2030
The output Oracle Home should be an absolute path

Category:
Configuration

Cause:
The mandatory ORACLE_HOME variable should specified as an absolute path.

Action:
Change ORACLE_HOME to an absolute path.

NG-2040
Archive location must be specified

Category:
Configuration

Cause:
The mandatory -archiveLoc option was not provided.

Action:
During the execution include the option -archiveLoc with the path to the archive file.

NG-2050
Problem loading archiveLoc {0}

Category:
Files

Cause:
The archive jar cannot be open for extraction.

Action:
Read the exception thrown for more details.

NG-2060
Problem creating required directories {0}

Category:
Files

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
When there is a problem creating the path in the provided ORACLE_HOME directory.

Action:
Verify that the location provided for extraction has write permissions.

NG-2070
The package to extract should have an extension .jar

Category:
Configuration

Cause:
When the -archiveLoc does not end with ".jar" extension.

Action:
Change the option -archiveLoc to use a proper ".jar" file.

NG-2080
Problem opening archiveLoc {0}

Category:
Files

Cause:
If the extraction jar does not have permissions to be opened.

Action:
Read the exception thrown for more details.

NG-2090
Problem during extraction {0}

Category:
Files

Cause:
When one of the jar entries cannot be extracted into the Oracle Home.

Action:
Verify that the location provided for extraction has write permissions.

NG-2100
Problem loading next jar {0}

Category:
Files

Cause:
When the archive is created using the -maxArchiveSize option will create multiple jars, if one of the jar files does not have the permissions to open it will fail.

Action:
Change all the jar permissions so they can be extrated. Check the thrown exception to check which files need to be changed.

NG-2110
Disk space insufficient

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Memory

Cause:
The location provided to create the Oracle Home does not have enough disk space to extract the files.

Action:
Release some disk space or change the location where the Oracle Home will be extracted.

NG-2120
Incompatible java version

Category:
Other

Cause:
The JAVA version required in the original Oracle Home is not compatible with the java version in the system where will be extracted.

Action:
Verify the Java version used during the creation of the archive inside the jar MANIFEST and use that version for extraction.

NG-2130
Problem extracting permissions file {0}

Category:
Files

Cause:
There is a permissions file in the archive to set the permissions as in the original Oracle Home, this will fail if there is a problem while updating those permissions.

Action:
Verify if you have permissions in the folder where the Oracle Home will be extracted to change the permissions of the files.

NG-2140
Failure to execute prerequisites phase. Review options -prereqConfigLoc and -entryPoint

Category:
Process

Cause:
When the process of prerequisites was not able to complete correctly.

Action:
Verify the log and check you are in compliance with all the prerequisites for the extracted Oracle Home

NG-2150
There was an error while parsing the command line, please check log for more details

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The parameters provided for applyCloneArchive are incorrect. Please validate the options for applyCloneArchive.

Action:
Execute the jar with -help options and validate that all the options are valid.

NG-2160
Prerequisites file is missing

Category:
Configuration

Cause:
The -prereqConfigLoc provided is pointing to an incorrect prerequisite location.

Action:
Validate the -prereqConfigLoc contains the prerequisite files to validate during the Oracle Home creation.

NG-2170
There was an error during prerequisites initialization {0}

Category:
Process

Cause:
While preparing the arguments to create the prereq process there was an error in the arguments.

Action:
Read the exception thrown for more details.

Copyright © 2000, 2026, Oracle and/or its affiliates.

20

OAM-00001 to OAM-36105

OAM-00001
Cannot parse the session token.

Category:
Other

Cause:
The session token appears to be invalid.

Action:
For more details, start logging at the FINE level.

OAM-00002
Error occurred while handling the request.

Category:
Other

Cause:
An internal error occurred.

Action:
For more details, start logging at the FINE level.

OAM-00003
Request-Response handler configuration is incomplete.

Category:
Other

Cause:
A request handler mapping was missing.

Action:
Add the missing handler mapping to the configuration.

OAM-00004
Cannot initialize the Diagnostic Engine.

Category:
Other

Cause:

Action:

OAM-00005
Cannot locate the custom login page.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The custom login page was not found.

Action:
Verify the configuration.

OAM-00006
Cannot locate the configuration of the custom login page.

Category:
Other

Cause:
The custom custom login page was not specified in the configuration.

Action:
Add the custom login page location to the configuration.

OAM-00007
Cannot edit the custom login page

Category:
Other

Cause:
The file permissions of the custom login page do not allow write access.

Action:
Change the file permissions to allow write access.

OAM-00008
Cannot close the custom login page

Category:
Other

Cause:
The source code of the custom login page does not support closing of the login page.

Action:
Check the custom login page source code.

OAM-00009
Unable to parse the redirection URL

Category:
Other

Cause:
An error occurred while parsing the redirect URL due to bad encoding or invalid format.

Action:
For more details, start logging at the FINE level.

Copyright © 2000, 2026, Oracle and/or its affiliates.

OAM-000010
Cannot add query params to map for logout redirection

Category:
Other

Cause:
URLDecoder throwing UnsupportedEncodingException

Action:
Check the AMLogoutResponseHandler - getQueryMap method code.

OAM-000011
Cannot parse the request token sent from client with User Agent {0} and IP Address {1}.

Category:
Other

Cause:
The request token appears to be invalid.

Action:
For more details, start logging at the FINE level.

OAM-000012
Cannot construct the request token.

Category:
Other

Cause:
Could not create OAM request token.

Action:
For more details, start logging at the FINE level.

OAM-000013
Cannot construct OAM session token.

Category:
Other

Cause:
Could not create SSO Session token.

Action:
For more details, start logging at the FINE level.

OAM-000014
{0} set in {1} must be an integer greater-than or equal to zero.

Category:
Other

Cause:
SwitchGetToPostLimit was set incorrectly for the authentications scheme.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Correct the SwitchGetToPostLimit challenge parameter within the authentication scheme.

OAM-02001
Retrieve SSO session operation failed.

Category:
Other

Cause:
Cannot retrieve the SSO session from the request context. Session might have expired.

Action:
For more details, start logging at the FINE level.

OAM-02002
Error while processing the submitted credentials.

Category:
Other

Cause:
An internal error occurred.

Action:
For more details, start logging at the FINE level.

OAM-02003
Error while processing credential collection.

Category:
Other

Cause:
An internal error occurred.

Action:
Check the authentication scheme configuration.

OAM-02004
Error while processing authorization request.

Category:
Other

Cause:
An internal error occurred.

Action:
For more details, start logging at the FINE level.

OAM-02005
Error while parsing the SSO session token.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Error while parsing the SSO session token. Wrong session token format.

Action:
Retry. If the error persists verify the key roll-over configuration.

OAM-02006
Insufficient authentication level to access the resource.

Category:
Other

Cause:
An insufficient authentication level was used to access the resource.

Action:
Step up the authentication level by re-authenticating to the required level.

OAM-02007
Insufficient privileges. Authorization Denied.

Category:
Other

Cause:
Insufficient privileges.

Action:
Check the authorization permissions.

OAM-02008
Password expired. Authentication failed.

Category:
Other

Cause:
Insufficient privileges.

Action:
Check the authorization permissions.

OAM-02009
Password reset required. Authentication failed.

Category:
Other

Cause:
Insufficient privileges.

Action:
Check the authorization permissions.

OAM-02010
User account is locked. Authentication failed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Insufficient privileges.

Action:
Check the authorization permissions.

OAM-02011
No user account found. Authentication failed.

Category:
Other

Cause:
Insufficient privileges.

Action:
Check the authorization permissions.

OAM-02012
No user name password combination found. Authentication failed.

Category:
Other

Cause:
Insufficient privileges.

Action:
Check the authorization permissions.

OAM-02013
Password Policy action not supported by the client. Authentication failed.

Category:
Other

Cause:
Insufficient privileges.

Action:
Check the authorization permissions.

OAM-02052
SME Adapter initialization Failed.

Category:
Other

Cause:
SME adapter initialization failed.

Action:
Verify the SME configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

OAM-02053
Component {1} initialization Failed.

Category:
Other

Cause:
Component initialization failed.

Action:
Verify the server configuration.

OAM-02054
SSO session creation failed.

Category:
Other

Cause:
Session Management Engine error.

Action:
Check Session Management Engine error logs.

OAM-02055
Retrieve SSO session operation failed.

Category:
Other

Cause:
Session might be expired.

Action:
If the problem persists contact the administrator.

OAM-02056
An error occurred while parsing the server token.

Category:
Other

Cause:
TPE token parsing failed.

Action:
check Token Processing Engine logs.

OAM-02057
Wrong Flow Controller configuration for {1}

Category:
Other

Cause:
Wrong Flow controller configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check flow controller class name and configuration.

OAM-02058
Event Flow goes in infinite loop.

Category:
Other

Cause:
Wrong configuration or too many allowed login attempts.

Action:
Check event flow configuration and login attempt configuration.

OAM-02059
Flow Controller Cannot handle Event

Category:
Other

Cause:
Wrong Flow controller configuration

Action:
Check error log more details.

OAM-02060
Flow Controller :{0} Cannot handle Event :{1}

Category:
Other

Cause:
Wrong Flow controller configuration

Action:
Check event to flow controller mapping.

OAM-02061
Event Handler error.

Category:
Other

Cause:
Wrong event handler configuration

Action:
Check error log more details.

OAM-02062
Event Handler cannot handle the event.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Wrong event handler configuration

Action:
Check event to event handler controller mapping.

OAM-04011
Message sent on outbound channel to OAM 10g Access server. Message {0}, Host : {1} Port : {2}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
A message was sent to an OAM 10g server.

Action:

OAM-04012
Outbound connection closed.

Category:
Other

Cause:
A connection with an OAM 10g server was closed.

Action:

OAM-04013
Unexpected message received from client. Message {0}

Category:
Other

Cause:
An unexpected message was received when a simple mode handshake message from the client was expected.

Action:
Check the NAP mode configuration of the WebGate and the Server.

OAM-04014
Malformed message received from client. Details {0}

Category:
Other

Cause:
The length of message received from client was less than 0.

Action:
Restart the WebGate if the message is being received repeatedly.

OAM-04015
Outbound connection to Access Server not found.

Category:
Other

Cause:
An internal error occurred.

Action:
For more details, start logging at the FINE level.

OAM-04016
Session ID is missing in AmResponse

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The session ID was not present in the OAM token.

Action:
Retry the request.

OAM-04017
OAM proxy end point activation failed. Exception:

Category:
Other

Cause:
The specified listening port is not available, or is aldready being used.

Action:
Restart the server or contact the system administrator.

OAM-04018
Required configuration parameter missing. Required {0}

Category:
Other

Cause:
The required configuration parameters were missing.

Action:
Verify the configuration.

OAM-04019
Work manager JNDI lookup failed. Exception:

Category:
Other

Cause:
An internal error occurred.

Action:
For more details, start logging at the FINE level.

OAM-04020
Exception encountered while processing the request message:

Category:
Other

Cause:
An internal error occurred.

Action:
For more details, start logging at the FINE level.

Copyright © 2000, 2026, Oracle and/or its affiliates.

OAM-04021
NMP initialization failed.

Category:
Other

Cause:
The NAP handshake with the client failed or an unsupported application was trying to connect to the OAM proxy.

Action:
Verify the client version.

OAM-04022
SSL configuration is not specified for SIMPLE or CERT mode

Category:
Other

Cause:
The SSL configuration was required but not supplied for the SIMPLE or CERT mode.

Action:
Verify the SSL Configuration and rerun the operation.

OAM-04023
SSL handshake failed. Exception:

Category:
Other

Cause:
The NAP handshake with a client was not successful.

Action:
Check the client configuration.

OAM-04024
Exception in outbound message processing. Cause {0} . Message details {1}

Category:
Other

Cause:
An internal error occurred.

Action:
For more details, start logging at the FINE level.

OAM-04025
Error in connecting to Access server. {0}

Category:
Other

Cause:
An internal error occurred.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
For more details, start logging at the FINE level.

OAM-04026
Error in NAP handshake with AAA server {0}

Category:
Other

Cause:
An internal error occurred.

Action:
For more details, start logging at the FINE level.

OAM-04027
Cannot create Executor instance

Category:
Other

Cause:
An internal error occurred.

Action:
For more details, start logging at the FINE level.

OAM-04028
Outbound Resource Adapter initialization error. {0}

Category:
Other

Cause:
An internal error occurred.

Action:
For more details, start logging at the FINE level.

OAM-04029
Error in generating AMEvent. Details {0}

Category:
Other

Cause:
An internal error occurred.

Action:
For more details, start logging at the FINE level.

OAM-04030
Partner lookup failed. Partner id {0}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The retrieval of partner metadata during client authentication was not successful.

Action:
Check if the partner is registered with the Access Server.

OAM-04031
NAP version mismatch during the NAP handshake. Client Message {0}

Category:
Other

Cause:
An unsupported NAP version was sent by the client.

Action:
Check the client configuration and version. Older clients may need to be upgraded.

OAM-04032
PAT API error. Details {0}

Category:
Other

Cause:
An internal error occurred.

Action:
For more details, start logging at the FINE level.

OAM-04033
Error in retrieving secret information. {0} {1}

Category:
Other

Cause:
An internal error occurred.

Action:
For more details, start logging at the FINE level.

OAM-04034
Token Cache Enabled.

Category:
Other

Cause:
Information message indicating that the token cache is enabled.

Action:

OAM-04035
Error while reading token cache size from configuration.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The cache configuration was invalid.

Action:
Fix cache configuration and rerun the operation.

OAM-04036
Channel security mode is different as specified in configuration {0}

Category:
Other

Cause:
The agent tried to communicate in a mode different from its configuration.

Action:
Check the agent mode. This may be a security issue if the configuration mode of agent is correct.

OAM-04037
Exception encountered while processing the HTTP message in OAM proxy:

Category:
Other

Cause:
An internal error occurred.

Action:
For more details, start logging at the FINE level.

OAM-04038
OAM proxy configuration parameter SSOOnlyMode is set to true. OAM proxy will skip authorization.

Category:
Other

Cause:
OAM proxy configuration parameter SSOOnlyMode is set to true.

Action:

OAM-04039
Agent {0} not privileged to invoke OPCODE {1}

Category:
Other

Cause:
Agent is not privileged to invoke the operation.

Action:
Check the agent configuration.

OAM-04040
Target Resource is not as expected. Target Resource {0} WebGate resource {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Target resource is not as expected. This issue may occur in session scope operations.

Action:
Runtime check failure. Check server logs.

OAM-04041
Failed to retrieve valid session from OAM Identity Assertion. Assertion {0}

Category:
Other

Cause:
Either invalid assertion was specified or session corresponding to assertion is invalid.

Action:
Please see logs for more details.

OAM-04042
Failed to check token issuance policy. Resource: {0}. Requestor: {1}

Category:
Other

Cause:
Evaluation of Token Issuance Policy failed.

Action:
Check Token Issuance Policy.

OAM-04043
Request is not processed. Access management service is disabled.

Category:
Other

Cause:
Access management service is not enabled on server.

Action:
Enable the access management service. Set oam proxy global parameter "10gCompatibleGetHostIdentifiersSupport" to true.

OAM-06001
Cannot parse the session token.

Category:
Other

Cause:
The session token is invalid or the wrong decryption key is present in the configuration.

Action:
Verify the key roll-over configuration.

Copyright © 2000, 2026, Oracle and/or its affiliates.

OAM-10001
Cannot load the configuration file.

Category:
Other

Cause:
The configuration file location was invalid.

Action:
Verify the location of the configuration file.

OAM-10002
Cannot initialize the PAT Adapter.

Category:
Other

Cause:
The PAT configuration was invalid.

Action:
Verify the PAT configuration.

OAM-10003
Cannot initialize the Cache Handlers.

Category:
Other

Cause:
The request cache handler configuration was invalid.

Action:
Verify the request cache handler configuration.

OAM-10004
Cannot initialize the Controller.

Category:
Other

Cause:
The configuration for Controller events was invalid.

Action:
Verify the Controller configuration.

OAM-10005
Cannot initialize the Controller.

Category:
Other

Cause:
The configuration for the Flow controllerd was invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify the Controller configuration.

OAM-10006
Cannot initialize the Controller.

Category:
Other

Cause:
The configuration for the Flow Mapping was invalid.

Action:
Verify the Controller configuration.

OAM-10007
Cannot initialize the Controller.

Category:
Other

Cause:
The configuration for the Event Handlers was invalid.

Action:
Verify the Controller configuration.

OAM-10008
Cannot initialize the Controller.

Category:
Other

Cause:
The configuration for the Event UI was invalid.

Action:
Verify the Controller configuration.

OAM-10009
Cannot initialize the Controller.

Category:
Other

Cause:
The Event Handler configuration was invalid.

Action:
Verify the Controller configuration.

OAM-10010
Cannot initialize the Controller.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The Event Factory configuration was invalid.

Action:
Verify the Controller configuration.

OAM-10011
An invalid Cookie Domain

Category:
Other

Cause:
The cookie domain was invalid.

Action:
Verify the configuration file.

OAM-10012
Cannot load audit configuration.

Category:
Other

Cause:
The audit configuration was invalid.

Action:
Verify the audit configuration.

OAM-10013
Cannot load audit configuration.

Category:
Other

Cause:
Mismatch between logger and resource configuration.

Action:
Verify the audit configuration.

OAM-10014
Invalid done URL specified during logout - {0}.

Category:
Other

Cause:
Done URL specified during logout is not in proper URL format.

Action:
Verify the done URL.

OAM-10015
Cache Info :: operation="{0}" paramName="{1}", paramDetail="{2}".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Displayed when the cache is operating.

Action:
None.

OAM-10016
Cache entry expired.

Category:
Other

Cause:
Displayed on expiry of the cached element.

Action:
None.

OAM-10017
Cannot intialize the server key.

Category:
Other

Cause:
Unable to retrieve server key from configuration.

Action:
Verify the configuration.

OAM-10018
No credcollect req resp handler specified

Category:
Other

Cause:
No credcollect req resp handler specified

Action:
Verify configuration cred collect req resp handler

OAM-12001
Cannot load audit configuration.

Category:
Other

Cause:
The specified configuration file does not exist, or the audit configuration is invalid.

Action:
Check the server error logs.

Copyright © 2000, 2026, Oracle and/or its affiliates.

OAM-12002
User name value specified for special user is invalid.

Category:
Other

Cause:
The input value format is invalid, or exceeds 30 characters.

Action:
Correct the input value.

OAM-12003
Maximum directory size specified is invalid.

Category:
Other

Cause:
The input value format is invalid, is less than 1 or exceeds 1024.

Action:
Correct the input value.

OAM-12004
Maximum file size specified is invalid.

Category:
Other

Cause:
The input value format is invalid, is less than 1 or exceeds 1024.

Action:
Correct the input value.

OAM-12005
Map of audit events is invalid.

Category:
Other

Cause:
The audit event configuration is missing, or invalid.

Action:
Verify the configuration.

OAM-12006
Invalid path for audit event definitions file.

Category:
Other

Cause:
The audit event definitions file location is incorrect.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify the configuration.

OAM-12007
Invalid path for audit bustop directory.

Category:
Other

Cause:
The audit bustop location is missing, or invalid.

Action:
Verify the configuration.

OAM-12501
Getting ServerTokenMapper for: {0}.

ODI-1200
Session start failure: the request is incorrectly formed.

Category:
Other

Cause:
A malformed request was sent to the agent.

Action:
Verify the request format and parameters sent to the agent.

ODI-1201
Session start failure on agent {0}: JDBC connection error occurs while connecting to the master repository.

Category:
Other

Cause:
An incorrect connection was used for the master repository database, or repository database was down.

Action:
Verify the master repository connection information and the status of the master repository database.

ODI-1202
Session start failure on agent {0}: data source for master repository does not contain a master repository.

Category:
Other

Cause:
The master repository connection information pointed to a database schema that did not contain a master repository.

Action:
Verify the master repository connection information.

ODI-1203
Session start failure on agent {0}: the master repository is in an invalid state.

Category:
Other

Cause:
The master repository was in a state that did not allow connections. This is the case if an upgrade was being performed.

Action:
Verify the state of the master repository.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-1204
Session start failure on agent {0}: the master repository version {1} is not compatible with the agent version {2}.

Category:
Other

Cause:
The master repository was upgraded but not this agent, or the agent was upgraded but not the master repository.

Action:
Upgrade the master repository version or the agent version.

ODI-1205
Session start failure on agent {0}: an authentication error occurred while connecting to the master repository.

Category:
Other

Cause:
An incorrect ODI user or password was specified for this master repository.

Action:
Verify the ODI user and password used for connecting.

ODI-1206
Session start failure on agent {0}: the agent is not defined in the topology for master repository.

Category:
Other

Cause:
The session was not found in the master repository.

Action:
Verify that a session with this ID exists in the repository.

ODI-1207
Session start failure on agent {0}: JDBC connection error occurs while connecting to the work repository {1}.

Category:
Other

Cause:
An incorrect connection was used for the work repository database, or repository database was down.

Action:
Verify the work repository connection information and the status of the work repository database.

ODI-1208
Session start failure on agent {0}: database schema {1} does not contain a work repository.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The work repository connection information pointed to a database schema that did not contain a work repository.

Action:
Verify the work repository connection information.

ODI-1209
Session start failure on agent {0}: work repository {1} is in an invalid state.

Category:
Other

Cause:
The work repository was in a state that did not allow connections. This is the case if an upgrade was being performed.

Action:
Verify the state of the work repository.

ODI-1210
Session start failure on agent {0}: work repository {1} version {2} is not compatible with the agent version {3}.

Category:
Other

Cause:
The work repository was upgraded but not this agent, or the agent was upgraded but not the work repository.

Action:
Upgrade the work repository version or the agent version.

ODI-1211
Session start failure on agent {0}: work repository {1} is not bound to the master repository.

Category:
Other

Cause:
The work repository specified in the request was not found in the list of work repositories attached to this master.

Action:
Verify that work repository name matches an existing one.

ODI-1212
Session preparation failure: scenario {0} does not exist in work repository {1}.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The session request was received, but the agent was unable to find the named scenario in the work repository.

Action:
Verify that the scenario name matches an existing scenario name in the work repository.

ODI-1213
Session preparation failure: scenario {0} version {1} does not exist in work repository {2}.

Category:
Other

Cause:
The session request was received, and the scenario existed in the work repository, but not with the specified version.

Action:
Ensure that the scenario version matches an existing scenario version in the work repository.

ODI-1214
Session preparation failure: context {0} does not exist in the master repository.

Category:
Other

Cause:
The session request was received, but the agent was unable to find the context in the master repository.

Action:
Ensure that the context matches an existing context code in the Topology.

ODI-1215
Session preparation failure: privileges are insufficient to run scenario {0}.{1} in repository {2}.

Category:
Other

Cause:
User privileges were not sufficient for running this scenario in this repository.

Action:
Ensure that the user has sufficient privileges for this task.

ODI-1216
Session preparation failure: insufficient privileges to use Context {0} ({1}).

Category:
Other

Cause:
User privileges were not sufficient for using this context.

Action:
Ensure that the user has sufficient privileges for this task.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-1217
Session {0} ({1}) fails with return code {2}.

Category:
Other

Cause:
The session finished in an error state.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1218
Session preparation failure: database error occurs while connecting to the master repository.

Category:
Other

Cause:
The agent received a database error from the master repository while creating the session.

Action:
Verify the state of the master repository database.

ODI-1219
Session preparation failure: database error while connecting to work repository {0}.

Category:
Other

Cause:
The agent received a database error from the work repository while creating the session.

Action:
Verify the state of the work repository database.

ODI-1220
Session preparation failure: an unexpected exception occurred.

Category:
Other

Cause:
The remote agent faced an unexpected error while attempting to create the session.

Action:
Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode).

ODI-1221
Unable to restart session {0}: session is not found in work repository {1}.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The session to restart did not exist in the repository. This session may have been deleted, or an incorrect session ID or work repository was supplied.

Action:
Verify that a session with this ID exists in the repository.

ODI-1222
Session start failure on agent {0}: logical schema {1} cannot be found in the master repository.

Category:
Other

Cause:
The object to be executed referred to a logical schema not present in the master repository.

Action:
Ensure that the logical schema configuration exists in your master repository.

ODI-1223
Database error while connecting to the master repository.

Category:
Other

Cause:
The connection for the master repository database was incorrect, or the repository database was down.

Action:
Verify the master repository connection information and the status of the master repository database.

ODI-1224
Database error while connecting to work repository {0}

Category:
Other

Cause:
The connection for the work repository database was incorrect, or the repository database was down.

Action:
Verify the work repository connection information and the status of the master repository database.

ODI-1225
An unexpected exception occurred.

Category:
Other

Cause:
The agent faced an unexpected exception.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode).

ODI-1226
Step {0} fails after {1} attempt(s).

Category:
Other

Cause:
This is an execution warning. The session step failed to execute after the maximum number of retries. If step failure was not handled in the package design, the session finished in an error state.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1227
Task {0} fails on the source connection {1}.

Category:
Other

Cause:
This is an execution warning. The command on the source for this task finished with an error.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1228
Task {0} fails on the target connection {1}.

Category:
Other

Cause:
This is an execution warning. The command on the target for this task finished with an error.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1229
An error occurred while performing a {0} operation on model code {1}.

Category:
Other

Cause:
This is an execution warning. The operation specified failed on the model.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1231
An error occurred while performing a {0} operation on datastore {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
This is an execution warning. The operation specified failed on the datastore.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1232
Procedure {0} execution fails.

Category:
Other

Cause:
This is an execution warning. The procedure execution failed.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1233
Error while evaluating variable the following expression: {0} {1} {2}

Category:
Other

Cause:
This is an execution warning. The variable evaluation failed.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1235
Error while incrementing variable {0} to value {1}

Category:
Other

Cause:
This is an execution warning. The variable increment failed.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1236
Error while refreshing variable {0}.

Category:
Other

Cause:
This is an execution warning. The variable refresh failed.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-1237
Error while setting variable {0} to value {1}.

Category:
Other

Cause:
This is an execution warning. The set variable operation failed.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1238
Flow {0} fails because the maximum number of allowed errors ({1} rows) is exceeded during the flow check. This flow loads target table {2}.

Category:
Other

Cause:
This is an execution warning. The interface failed because the number of errors detected in the flow exceeded the value defined in the interface.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer. Review the erroneous records for this interface in the error table.

ODI-1239
Flow {0} fails because the maximum percentage of allowed errors ({1} %) is exceeded during the flow check. This flow loads target table {2}.

Category:
Other

Cause:
This is an execution warning. The interface failed because the percentage of errors detected in the flow exceeded the value defined in the interface.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer. Review the erroneous records for this interface in the error table.

ODI-1240
Flow {0} fails while performing a {1} operation. This flow loads target table {2}.

Category:
Other

Cause:
This is an execution warning. The interface failed because one of the statements returned an error return code.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1241
Oracle Data Integrator tool execution fails.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
This is an execution warning. The tool execution failed.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1242
Operating system command execution fails.

Category:
Other

Cause:
This is an execution warning. Execution of the operating system command failed.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1243
Session {0} ({1}) fails because work repository {2} went down.

Category:
Other

Cause:
Work repository database went down while session was being executed.

Action:
Verify the state of the work repository database. The session must be restarted.

ODI-1244
Session {0} {1} was prepared successfully but fails because work repository {2} went down before execution could begin.

Category:
Other

Cause:
Work repository database went down while session was starting its execution.

Action:
Verify the state of the work repository database. The session must be restarted.

ODI-1245
Session preparation failure: work repository {0} went down during session preparation.

Category:
Other

Cause:
Work repository went down while session was being prepared.

Action:
Verify the state of the work repository database. The session must be restarted.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-1246
The Logical Schema has not been set for {0}.

Category:
Other

Cause:
Because the logical schema had not been set, the object could not be executed.

Action:
Verify the object that you are trying to execute, and set the logical schema for this object.

ODI-1247
Session {0} {1} was prepared successfully but fails because master repository went down before execution could begin.

Category:
Other

Cause:
Master repository database went down while session was starting its execution.

Action:
Verify the state of the master repository database. The session must be restarted.

ODI-1248
Session preparation failure by Agent {0}: master repository went down during session preparation.

Category:
Other

Cause:
Master repository went down while session was being prepared.

Action:
Verify the state of the master repository database. The session must be restarted.

ODI-1249
Session {0} ({1}) fails because master repository went down.

Category:
Other

Cause:
Master repository database went down while session was being executed.

Action:
Verify the state of the master repository database. The session must be restarted.

ODI-1250
Session {0} ({1}) could not be stopped by Agent {2} because session {0} {1} already completed execution.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The session has already completed and cannot be stopped.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1251
Session ({0}) could not be stopped by Agent {1} because session ({0}) was not found in work repository {2}.

Category:
Other

Cause:
The session was not found in the work repository.

Action:
Verify that a session with this ID exists in the repository.

ODI-1252
Session ({0}) could not be stopped by Agent {1}: insufficient privileges to access session.

Category:
Other

Cause:
User privileges were not sufficient for accessing this session in this agent.

Action:
Ensure that the user has sufficient privileges for this task.

ODI-1253
Session {0} ({1}) could not be stopped by Agent {2}: an unknown error occurred.

Category:
Other

Cause:
An unexpected Exception occurred.

Action:
Verify your Agent configuration and make sure other operations on Agent are working correctly.

ODI-1254
Session {0} ({1}) could not be stopped by Agent {2}: a JDBC error occurred on work repository {3}.

Category:
Other

Cause:
The agent had incorrect connection for the work repository database, or repository database was down.

Action:
Verify the work repository connection information and the status of the work repository database.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-1255
Session {0} ({1}) could not be stopped by Agent {2}: insufficient privileges to stop the session.

Category:
Other

Cause:
User privileges were not sufficient for stopping this session in this agent.

Action:
Ensure that the user has sufficient privileges for this task.

ODI-1256
Session {0} ({1}) stopped (Normal) by user {2}.

Category:
Other

Cause:
Session was stopped by the user.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1257
Session {0} ({1}) stopped (Immediate) by user {2}.

Category:
Other

Cause:
Session was stopped by the user.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1258
Session {0} ({1}) stopped (Abort) by user {2}.

Category:
Other

Cause:
Session was aborted by the user.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1259
Session Task {0} stopped (Normal) by user {1}.

Category:
Other

Cause:
Task was stopped by the user.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the task execution details in the Operator Navigator or Repository Explorer.

ODI-1260
Session Task {0} stopped (Immediate) by user {1}.

Category:
Other

Cause:
Task was stopped by the user.

Action:
Review the task execution details in the Operator Navigator or Repository Explorer.

ODI-1261
Session Task {0} stopped (Abort) by user {1}.

Category:
Other

Cause:
Task was aborted by the user.

Action:
Review the task execution details in the Operator Navigator or Repository Explorer.

ODI-1262
Session {0} ({1}) could not be stopped by Agent {2}: a JDBC error occurred on master repository.

Category:
Other

Cause:
The agent had incorrect connection for the master repository database, or repository database was down.

Action:
Verify the master repository connection information and the status of the master repository database.

ODI-1263
Step {0} stopped (Normal) by user {1}.

Category:
Other

Cause:
Step was stopped by the user.

Action:
Review the step execution details in the Operator Navigator or Repository Explorer.

ODI-1264
Step {0} stopped (Immediate) by user {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Step was stopped by the user.

Action:
Review the step execution details in the Operator Navigator or Repository Explorer.

ODI-1265
Step {0} stopped (Abort) by user {1}.

Category:
Other

Cause:
Step was aborted by the user.

Action:
Review the step execution details in the Operator Navigator or Repository Explorer.

ODI-1266
Agent {0} detected Session as stale session and set to error status.

Category:
Other

Cause:
The agent detected a stale session and the session status was set to error status.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1267
Session ({0}) could not be stopped by Agent {1} because stop type {2} provided in the request is an invalid stop type.

Category:
Other

Cause:
The agent attempted to stop a session with an invalid stop type.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1268
Agent {0} does not support stopping asynchronous child sessions.

Category:
Other

Cause:
The agent attempted to stop an asynchronous child session and this is not supported.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-1269
Session {0} ({1}) could not be stopped by Agent {2}: session is being run by another Agent with the same name.

Category:
Other

Cause:
The agent attempted to stop a session that is being run by a different agent.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1270
Session {0} ({1}) could not be stopped by Agent {2}: session {0} ({1}) is being run by {3} Agent which is not a listener Agent.

Category:
Other

Cause:
The agent attempted to stop a session that is being run by the internal agent and this is not supported.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1271
The asynchronous jndi name cannot be null for asynchronous jobs. The ESS job status cannot be updated.

Category:
Other

Cause:
The agent attempted to set the status of the asynchronous ESS job and its jndi name was not set.

Action:
Review the jndi name supplied to the Enterprise Scheduler job.

ODI-1272
The Logical Schema has not been set on {0} for {1}.

Category:
Other

Cause:
The logical schema for this object has not been set.

Action:
Verify that the logical schema has been set in the Topology.

ODI-1273
The selected technology {0} is not supported on source for {1}.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The selected technology is not supported for this object.

Action:
Verify that the object has a valid technology.

ODI-1274
Agent Exception

Category:
Other

Cause:
An error was detected by the agent when performing an operation.

Action:
Review the underlying exception for more details.

ODI-1275
An error occurred while performing a {0} operation on submodel step {1} of the model code {2}.

Category:
Other

Cause:
This is an execution warning. The operation specified failed on the submodel operation.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1276
An error occurred while executing the OnConnect command on JDBC connection created for data server {0} with transaction label {1}.

Category:
Other

Cause:
An error was occurred while executing the OnConnect command on the JDBC connection created to the data server.

Action:
Review the underlying exception and update the OnConnect command definition configured for the data server.

ODI-1277
An error occurred while executing the OnDisconnect command on JDBC connection created for data server {0} with transaction label {1}.

Category:
Other

Cause:
An error was occurred while executing the OnDisconnect command on the JDBC connection created to the data server.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the underlying exception and update the OnDisconnect command definition configured for the data server.

ODI-1278
Load plan instance {0}, run {1} does not exist in work repository {2}.

Category:
Other

Cause:
The Load Plan Instance run does not exist in the repository. This Load Plan Instance run may have been deleted, or an incorrect instance ID/run number or work repository was supplied.

Action:
Verify that a load plan instance run with this instance ID and run number exists in the repository.

ODI-1279
The Source Logical Schema {0} and Context {1} of the task {2} are not mapped to any Physical Schema.

Category:
Other

Cause:
The Logical Schema to Physical Schema Mapping is not defined for the Context used.

Action:
For the Context used define the Logical Schema to Physical Schema Mapping in the Topology.

ODI-1280
The Target Logical Schema {0} and Context {1} of the task {2} are not mapped to any Physical Schema.

Category:
Other

Cause:
The Logical Schema to Physical Schema Mapping is not defined for the Context used.

Action:
For the Context used define the Logical Schema to Physical Schema Mapping in the Topology.

ODI-1281
Source Technology {0} of task {1} is not of JDBC Type. When both Source and Target commands are specified, the Source Technology should be of JDBC type.

Category:
Other

Cause:
When Source and Target commands are specified, the Source Technology should always be of JDBC type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Make Sure that you modify your Procedure or KM to either use a JDBC Source Technology or edit your step to use only the Target command.

ODI-1282
Invalid log level {0} is specified. A valid log level value is between {1} and {2}.

Category:
Other

Cause:
Invalid log level specified for scenario/session invocation or for session restart.

Action:
Please specify a valid log level.

ODI-1283
Owb preparation failure: Owb object {0} of type {1} in location {2} does not exist in Owb repository {3}.

Category:
Other

Cause:
The session request was received, but the agent was unable to find the named Owb object in the Owb repository.

Action:
Verify that the Owb object name matches an existing Owb object in the location in the Owb repository.

ODI-1284
Session {0} ({1}) with Owb audit Id {2} fails.

Category:
Other

Cause:
The session finished in an error state.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1285
Session {0} ({1}) Retreival of audit for auditId {2} failed in the {3} phase {4}. Please use OWB Design Client or Browser for further information.

Category:
Other

Cause:
An error was raised during the retreival of the Owb audit data.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-1286
Session {0} ({1}) could not find Owb job for this session.

Category:
Other

Cause:
The session being aborted is not an Owb Job.

Action:
Review the session being aborted in the Operator Navigator or Repository Explorer.

ODI-1287
Session {0} ({1}) with Owb audit Id {2} is in an invalid state to be aborted.

Category:
Other

Cause:
The session being aborted is not in a state that can be aborted.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

ODI-1288
Session {0} ({1}) with Owb audit Id {2} abort fails.

Category:
Other

Cause:
The session abort finished in an error state.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

ODI-1289
Agent {0} detected Session as stale session and set to error status. Please use OWB Design Client or Browser for further information.

Category:
Other

Cause:
The agent detected a stale OWB session and the session status was set to error status.

Action:
Review the session execution details in the OWB Design Client or Browser.

ODI-1290
Session {0} ({1}) Loading of audit for auditId {2} failed in the {3} phase {4}.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An error was raised during the loading of the Owb audit data.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

ODI-1291
Workspace {0} cannot be resolved to a physical workspace using context {1}.

Category:
Other

Cause:
The context does not contain a mapping for the logical workspace.

Action:
Review the mappings defined in the context.

ODI-1292
An execution context cannot be determined for this job.

Category:
Other

Cause:
An execution context cannot be determined for this job.

Action:
Use the Context to provide an explicit context for this execution.

ODI-1293
Exception occurred during spawning of ECID to child session.

Category:
Other

Cause:
Spawning of ECID from parent session to child session failed.

Action:
Review the exception raised to get more detail.

ODI-1294
Unwrapping of a wrapped ECID [{0}] failed.

Category:
Other

Cause:
Unwrapping of ECID failed.

Action:
Review the exception raised and the format of wrapped ECID to get more detail on unwrap failure

ODI-1295
Cleanup of Session {0} ({1}) raised the following {2} messages: {3}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Messages were raised during the Cleanup phase.

Action:
Review the messages raised during the Cleanup and you may need to perform some manual cleanup.

ODI-1296
The Cleanup Tool encountered the following {0} nested errors when executing the Cleanup tasks: {1}

Category:
Other

Cause:
Messages were raised during the Cleanup tool execution.

Action:
Review the messages raised during the Cleanup and you may need to perform some manual cleanup.

ODI-1297
Parallel task "{0}" failed; {1} child task(s) in error; Failed child tasks: {2}

Category:
Other

Cause:
null

Action:
null

ODI-1298
Serial task "{0}" failed because child task "{1}" is in error.

Category:
Other

Cause:
null

Action:
null

ODI-1299
A task "{0}" from one of the parallel branches has failed. Hence aborting the current branch

Category:
Other

Cause:
null

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
null

ODI-1300
ASYNC_JNDI_NAME cannot be null for async job.

Category:
Other

Cause:

Action:

ODI-1301
Unable to submit Job Definition: {0}

Category:
Other

Cause:

Action:

ODI-1302
Logical Agent {0} must be mapped to a Physical Agent in the ContextCode {1}

Category:
Other

Cause:

Action:

ODI-1303
RuntimeSessionfactory must not be null.

Category:
Other

Cause:

Action:

ODI-1304
Unable to find request for ID {0}

Category:
Other

Cause:

Action:

ODI-1305
jobDefinitionId must not be null

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:

Action:

ODI-1306
scheduleDefinitionId must not be null

Category:
Other

Cause:

Action:

ODI-1307
ContextCode is null, cannot lookup physical agent

Category:
Other

Cause:

Action:

ODI-1308
SchedulingService object was created without an EntityManager, cannot lookup physical agent

Category:
Other

Cause:

Action:

ODI-1309
Unable to find logical agent : {0}.

Category:
Other

Cause:

Action:

ODI-1310
Unable to find context : {0}.

Category:
Other

Cause:

Action:

ODI-1311
JobDefinition with name {0} already exists.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
JobDefinition already exists.

Action:
Check JobDefinition name.

ODI-1312
Schedule with name {0} already exists.

Category:
Other

Cause:
Schedule already exists.

Action:
Check Schedule name.

ODI-1313
Unable to find job definition for ID {0}.

Category:
Other

Cause:
Wrong ID.

Action:
Check ID.

ODI-1314
Unable to find job definition with name {0}.

Category:
Other

Cause:
Wrong name.

Action:
Check name.

ODI-1315
Unable to update job definition.

Category:
Other

Cause:
Exception during updating.

Action:
Check cause exception details.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-1316
Unable to remove job request.

Category:
Other

Cause:
Exception was thrown.

Action:
Check cause exception details.

ODI-1317
Unable to find scheduler definition with name {0}.

Category:
Other

Cause:
Wrong name.

Action:
Check name.

ODI-1318
jobDefnition is required to have a not null ID.

Category:
Programmatic

Cause:
Metadata Object ID is null.

Action:
Check job definition.

ODI-1319
Error while refreshing variable {0}. Null/Empty refresh query is provided.

Category:
Other

Cause:
This is an execution warning. The variable refresh failed.

Action:
Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-1320
Session start/restart failure on agent {0}: the session {1} is not in status WAITING, ERROR or WARNING

Category:
Other

Cause:
The session cannot be started/restarted because it is not in status WAITING, ERROR or WARNING

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify that a session with this ID exists in the repository and status WAITING, ERROR or WARNING.

ODI-1350
Credential map key "{0}" not found in credential map "{1}".

Category:
Other

Cause:

Action:

ODI-1351
An unexpected error was thrown during execution of the scenario "{0} - {1}"

Category:
Other

Cause:

Action:

ODI-1352
An unexpected error was thrown during job execution

Category:
Other

Cause:

Action:

ODI-1353
RequestId={0} Scenario={1} : Agent URL must be specified. The Job Definition must include the LocalAgent or the job submission must include a physical agent url ({2}) parameter.

Category:
Other

Cause:

Action:

ODI-1354
Load plan must be asynchronous

Category:
Other

Cause:

Action:

ODI-1355
username "{0}" from credential map "{1}" does not match currentSubjectName "{2}"

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:

Action:

ODI-1356
Credential map key parameter "{0}" not found.

Category:
Other

Cause:

Action:

ODI-1357
Error resolving ADF connection for connectionId="{0}".

Category:
Other

Cause:

Action:

ODI-1400
Agent {0} start failure: JDBC connection error occurs while connecting to the master repository.

Category:
Other

Cause:
The master repository information was incorrect, or the repository database was down.

Action:
Verify the master repository connection information and the status of the master repository database.

ODI-1401
Agent {0} start failure: data source for master repository did not contain a master repository.

Category:
Other

Cause:
The master repository connection information pointed to a database schema that did not contain a master repository.

Action:
Verify the master repository connection information.

ODI-1402
Agent {0} start failure: the master repository is in an invalid state.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The master repository was in a state that did not allow connections. This is the case when an upgrade is being performed.

Action:
Verify the state of the master repository.

ODI-1403
Agent {0} start failure: the master repository version {1} is not compatible with the agent version {2}.

Category:
Other

Cause:
The master repository was upgraded but not this agent, or the agent was upgraded but not the master repository.

Action:
Upgrade the master repository version or the agent version.

ODI-1404
Agent {0} start failure: an authentication error occurred while connecting to the master repository.

Category:
Other

Cause:
An incorrect ODI user or password was specified for this master repository.

Action:
Verify the ODI user and password used for connecting.

ODI-1405
Agent {0} start failure: the agent is not defined in the topology for master repository.

Category:
Other

Cause:
This agent was not declared in the topology.

Action:
Add this physical agent in the list of agents in the ODI topology.

ODI-1406
Agent {0} started with warning: JDBC connection error occurs while connecting to the work repository {1}.

Category:
Other

Cause:
The work repository information was incorrect, or the repository database was down.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify the work repository connection information and the status of the work repository database.

ODI-1407
Agent {0} started with warning: connection details of {1} do not contain a work repository.

Category:
Other

Cause:
The work repository connection information pointed to a database schema that did not contain a work repository.

Action:
Review the work repository connection information and revise it as necessary.

ODI-1408
Agent {0} started with warning: work repository {1} is in an invalid state.

Category:
Other

Cause:
The work repository was in a state that did not allow connections. This is the case when an upgrade is being performed.

Action:
Verify the state of the work repository.

ODI-1409
Agent {0} started with warning: work repository {1} version {2} is not compatible with the agent version {3}.

Category:
Other

Cause:
The work repository was upgraded but not this agent, or the agent was upgraded but not the work repository.

Action:
Upgrade the work repository version or the agent version.

ODI-1410
Agent {0} started with warning: work repository {1} is not bound to the master repository.

Category:
Other

Cause:
The work repository specified in the request was not found in the list of work repositories attached to this master.

Action:
Ensure that work repository name matches an existing one.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-1411
Agent {0} started with warning: a database error occurs while cleansing stale sessions.

Category:
Other

Cause:
The agent encountered a database error while attempting to close stale sessions.

Action:
Review the status of the sessions for this agent, and manually remove the stale sessions.

ODI-1412
Agent {0} started with warning: an unexpected error occurs while cleaning stale sessions.

Category:
Other

Cause:
The agent encountered an unexpected error while attempting to close stale sessions.

Action:
Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode). Verify the status of the sessions for this agent, and manually remove the stale sessions.

ODI-1413
Request is incorrectly formed.

Category:
Other

Cause:
A malformed request was sent to the agent.

Action:
Review the request format and parameters sent to the agent.

ODI-1414
Error connecting to agent {0}: a JDBC error occurs while connecting to the master repository.

Category:
Other

Cause:
The remote agent had incorrect connection for the master repository database, or repository database was down.

Action:
Verify the master repository connection information and the status of the master repository database.

ODI-1415
Error connecting to agent {0}: data source for master repository did not contain a master repository.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The master repository connection information for the remote agent pointed to a database schema that did not contain a master repository.

Action:
Review the master repository connection information and revise it as necessary.

ODI-1416
Error connecting to agent {0}: the master repository is in an invalid state.

Category:
Other

Cause:
The master repository was in a state that did not allow connections from the remote agent. This is the case when an upgrade is being performed.

Action:
Verify the state of the master repository.

ODI-1417
Error connecting to agent {0}: the master repository version {1} is not compatible with the agent version {2}.

Category:
Other

Cause:
The master repository was upgraded but not the remote agent, or the remote agent was upgraded but not the master repository.

Action:
Upgrade the master repository version or the agent version.

ODI-1418
Error connecting to agent {0}: an authentication error occurs while connecting to the master repository.

Category:
Other

Cause:
An incorrect ODI user or password was specified for this master repository.

Action:
Verify the ODI user and password used for connecting.

ODI-1419
Warning connecting to Agent {0}: JDBC connection error occurs while connecting to the work repository {1}.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The remote agent had incorrect connection for the work repository database, or the repository database was down.

Action:
Verify the work repository connection information and the status of the work repository database.

ODI-1420
Warning connecting to Agent {0}: connection details of {1} do not contain a work repository.

Category:
Other

Cause:
The work repository connection information for the remote agent pointed to a database schema that did not contain a work repository.

Action:
Verify the work repository connection information.

ODI-1421
Warning connecting to Agent {0}: work repository {1} is in an invalid state.

Category:
Other

Cause:
The work repository was in a state that did not allow connections from the remote agent. This is the case when an upgrade is being performed.

Action:
Verify the state of the work repository.

ODI-1422
Warning connecting to Agent {0}: work repository {1} version {2} is not compatible with the agent version {3}.

Category:
Other

Cause:
The work repository was upgraded but not the remote agent, or the remote agent was upgraded but not the work repository.

Action:
Upgrade the work repository version or the agent version.

ODI-1423
Warning connecting to Agent {0}: work repository {1} is not bound to the master repository.

Category:
Other

Cause:
The work repository specified in the request was not found in the list of work repositories attached to the master.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify that work repository name matches an existing one.

ODI-1424
Agent host or port cannot be reached using {0}.

Category:
Other

Cause:
Incorrect host or port information was provided, or the agent was not started on the remote host.

Action:
Correct the host or port information or start the agent.

ODI-1425
Agent application cannot be reached using {0}.

Category:
Other

Cause:
An incorrect application name was provided for this agent, or the agent application was not started on the host.

Action:
Correct the application name used in the URL or verify the agent status.

ODI-1426
Agent {0} is not defined in the topology for the master repository.

Category:
Other

Cause:
This agent was not declared in the topology.

Action:
Add this physical agent to the list of agents in the ODI topology.

ODI-1427
invalid parameters

Category:
Other

Cause:
Invalid parameters were supplied in the request.

Action:
Check the parameters that were supplied as part of the request. Ensure that parameter names and cases are correct.

ODI-1428
internal error

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
An agent internal error occurred.

Action:
Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode).

ODI-1429
The user {0} is not authorized to perform request {1} on Agent {2}.

Category:
Other

Cause:
The user had insufficient privileges for performing this request against the remote agent.

Action:
Amend the user privileges.

ODI-1430
Agent {0} cannot clean the stale sessions in work repository {1} due to a database error.

Category:
Other

Cause:
The remote agent faced a database error while attempting to close stale sessions.

Action:
Examine the status of the sessions for this agent, and manually remove the stale sessions.

ODI-1431
Agent {0} cannot clean the stale sessions in work repository {1} because the work repository {1} is still down.

Category:
Other

Cause:
The remote agent was not able to connect to the work repository while attempting to close stale sessions.

Action:
Determine the status of the repository. Once this repository is running, manually remove the stale sessions.

ODI-1432
Agent {0} cannot clean the stale sessions in work repository {1} due to an unexpected error.

Category:
Other

Cause:
The remote agent faced an unexpected error while attempting to close stale sessions.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode). Determine the status of the sessions for this agent, and manually remove the stale sessions.

ODI-1433
The Internal agent does not support cleaning stale sessions from multiple work repositories.

Category:
Other

Cause:
Empty string value was passed for the work repository name in the Clean Stale Sessions request sent to the Internal Agent.

Action:
Specify a non-empty valid work repository name in the Clean Stale Sessions request sent to the Internal Agent. If you want to clean the stale sessions across the work repositories, perform this operation on a Remote physical Agent.

ODI-1434
Agent {0} start failure: error while trying to use JMX Port {1}.

Category:
Other

Cause:
JMX Registry was unable to use the given port.

Action:
Specify a different port by using the command-line parameter JMXPORT.

ODI-1435
Storage space for the IDs of some object types is low in Repository {0}. When no storage space is available, it will not be possible to create obects of these types. Consider creating a new repository for the following object types (Object Type: Number Remaining) {1}.

Category:
Other

Cause:
Storage space was low for some IDs in this repository.

Action:
Consider creating a new repository.

ODI-1436
Error retrieving ID statistics for repository {0}.

Category:
Other

Cause:
The ID statistics for this repository could not be verified.

Action:
Verify the statistics for this repository manually.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-1437
Error retrieving information from the credential store map.

Category:
Other

Cause:
Could not retrieve information from the credential store map.

Action:
Verify that the credentials have been entered correctly into the credential store map.

ODI-1438
Agent {0} cannot be stopped by user {1}: a JDBC error occurred on master repository {2}.

Category:
Other

Cause:
Some SQL Exception occurred on the Master Repository.

Action:
Verify that other operations on the Agent are working correctly.

ODI-1439
Agent {0} cannot be stopped by user {1}: a JDBC error occurred on work repository {2}.

Category:
Other

Cause:
Some SQL Exception occurred on the Work Repository.

Action:
Verify that other operations on the Agent are working correctly.

ODI-1440
Agent {0} cannot be stopped by user {1}: an unknown error occurred.

Category:
Other

Cause:
An unexpected Exception occurred.

Action:
Verify your Agent configuration and make sure other operations on Agent are working correctly.

ODI-1441
Unable to connect to the master repository at JBDC URL={0} with USER={1}.

Category:
Other

Cause:
An SQLException occurred while creating connection to the master repository with the given parameters.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Verify your Agent configuration and make sure the master repository connection parameters are correct.

ODI-1442
Unable to load JBDC Driver {0} configured for master repository connection.

Category:
Other

Cause:
ClassNotFoundException occurred while loading the driver class.

Action:
Verify your Agent configuration and make sure the driver specified for master repository connection is correct and the corresponding jar is present under driver folder.

ODI-1443
Error while starting agent : {0}

Category:
Other

Cause:
Error occurred while starting the embedded web container.

Action:
Verify your Agent configuration and make sure that the specified ports are available.

ODI-1444
The master repository signature specified by the client {0} does not match the master repository signature of the agent {1}.

Category:
Other

Cause:
The client and the agent are not using the same master repository

Action:
Verify the client and the agent are using the same master repository. Verify that the client is calling the correct agent.

ODI-1445
Invalid HTTP/S URL retrieved from the JRF utility : {0}

Category:
Other

Cause:
JRF utility has returned an invalid HTTP/S URL for the agent.

Action:
Verify if ODI agent's dependent modules are successfully deployed on the container.

ODI-1446
Agent {0} is already running on port {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
This agent is already running.

Action:
Stop the agent before attempting to start it.

ODI-1447
Agent {0} failed to start. {1}.

Category:
Other

Cause:
The agent failed to start.

Action:
See the nodemanager and agent log for further information.

ODI-1448
Failed to execute command {1} for agent {0}.

Category:
Other

Cause:
A command failed to execute on the agent.

Action:
Review the agent log for further information.

ODI-1449
Injection risk detected for command {0}. Command not executed.

Category:
Other

Cause:
The command was not executed because it contained characters that pose an injection risk.

Action:
Adjust the command to eliminate characters that pose an injection risk.

ODI-1450
ODI does not support soft restart.

Category:
Other

Cause:
The process management softRestart method was invoked, but it is not supported.

Action:
Do not invoke the softRestart method.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-1451
Using localhost for hostname because of {0} when trying to get hostname.

Category:
Other

Cause:
An exception was thrown while trying to get the actual host name for the local host.

Action:
No action is required as the exception is caught and the host name is defaulted to localhost.

ODI-1452
Agent {0} cannot be started, {1} is already in use by another agent.

Category:
Other

Cause:
An attempt was made to restart the agent, but it is currently in use.

Action:
Wait for other dependent agents to complete before restarting this agent.

ODI-1453
Agent {0} cannot be started, {1} is already in use by another process.

Category:
Other

Cause:
An attempt was made to restart the agent, but it is currently in use.

Action:
Wait for dependent processes to complete before restarting this agent.

ODI-1454
Agent {0} cannot be started at {1}. Unexpected http response = {2}.

Category:
Other

Cause:
The agent cannot be started. It is possible that another processes is already running on the agent port.

Action:
Review the http response to determine the process running on the agent port.

ODI-1455
System componenent creation failed: instanceName={0}, cause={1}

Category:
Other

Cause:
An exception prevented the ODI component from being created.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Review the exception to determine the cause.

ODI-1456
getServerConfiguration() failed. domainDir={0}, dirPath={1}, instanceName={2}, cause={3}

Category:
Other

Cause:
An exception was thrown while setting the ODI configuration parameters.

Action:
Review the exception text at the end of the message to determine the cause.

ODI-1457
getDBConfiguration() failed. domainDir={0}, dirPath={1}, datasourceName={2}, cause={3}

Category:
Other

Cause:
An exception was thrown while setting the ODI database configuration parameters.

Action:
Review the exception text at the end of the message to determine the cause.

ODI-1458
ODI configuration files found, but a corresponding instance is not configured. dirPath={0}. Cause={1}

Category:
Other

Cause:
An exception was thrown while retrieving database configuration parameters from a file.

Action:
Review the exception text at the end of the message to determine the file name and exception cause.

ODI-1459
Failed to retrieve master repository name and timestamp for agent {0}. Using the values from instance.properties. Cause={1}

Category:
Other

Cause:
An exception was thrown while attempting to read metadata for the master repository.

Action:
Review the exception text at the end of the message to determine the cause.

ODI-1460
Unable to insert into table {0} for concurrent execution control. Exceptions due to competing insertions can happen and are handled to continue execution. Other exceptions likely indicate a runtime problem. Error message: {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
An exception was raised when inserting a record into the concurrent execution control table.

Action:
Exceptions due to competing insertions can happen and are handled to continue execution. Other exceptions likely indicate a runtime problem.

ODI-1461
{0} job status has changed unexpectedly from {1} to {2} while waiting for its turn to run under concurrent execution control.

Category:
Other

Cause:
The status of a job was likely changed outside of the control of the runtime agent while the job was waiting for its turn to run under concurrent execution control by the agent.

Action:
The job may have been changed outside of the agent, and the agent skipped the job execution. Start the job again if it was not executed.

ODI-1462
{0} job [{1}] should be the last one in the following waiting {0} list: {2}

Category:
Other

Cause:
The job may have been changed or deleted outside of the runtime agent while the job was waiting for its turn to run under concurrent execution control by the agent.

Action:
The job may have been changed or deleted outside of the agent, and the agent skipped the job execution. Start the job again if it was not executed.

ODI-1463
{0} job [{1}] blocked by the following {0} job(s) due to potential concurrent execution condition: {2}{3}

Category:
Other

Cause:
The job was under concurrent execution control with Raise Error violation behavior, and there were existing runnable and/or waiting jobs submitted ahead of the job.

Action:
Start the job when other concurrently running and waiting jobs are completed, or change the job's violation behavior to Wait To Execute before starting the job.

ODI-1464
There is no Hadoop Dataserver selected for PigDataServer- {0} from topology.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Repository Error.

Action:
Verify the dataservers in topology and associate a Hadoop dataserver to Pig dataserver when in Mapreduce mode .

ODI-1465
Error while trying to read values of DataServer- {0} from topology.

Category:
Other

Cause:
Repository Error.

Action:
Verify the dataservers in topology and if needed, associate a Hadoop dataserver to Pig dataserver when in Mapreduce mode.

ODI-1466
Error occurred previewing file on agent {0}

Category:
Other

Cause:
Error previewing file on the agent

Action:
Verify that file configuration is valid. Verify that file is available

ODI-1467
Error occurred trying to find URL of ODI scripting JAR {0}

Category:
Other

Cause:
Error getting the URL of ODI scripting language JAR

Action:
Verify that the path is valid

ODI-1500
SQL Exception when accessing work repository {0} while executing load plan instance {1} - {2}

Category:
Other

Cause:
A SQLException was thrown when trying to update the work repository

Action:
The same set of updates will be attempted later, potentially from a different agent

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-1501
Cannot find variable "{0}" in the definition of load plan instance {1}.

Category:
Other

Cause:
The start/restart load plan request contained startup values for variables that are not defined in the load plan

Action:
User error or problem in the IDE invocation code

ODI-1502
Load plan instance {0} is in an inconsistent state: {1}

Category:
Other

Cause:
Indicates a problem in the ODI code, like a wrapped IllegalStateException

Action:
null

ODI-1503
Load plan logs for instance {0}, run {1} are corrupted: {2}

Category:
Other

Cause:
Indicates a problem in the ODI code, it is a wrapped IllegalStateException

Action:
null

ODI-1504
Trying to update variables during execution of step "{0}" (load plan instance {1}, run {2}), as part of the exception handler for step "{3}", but variable updates during exception handlers are not supported.

Category:
Other

Cause:
null

Action:
null

ODI-1505
Current value "{0}" of variable "{1}" (while evaluating When clause "{2}") is not a valid value of type {3} (load plan instance {4}, run {5}).

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
null

Action:
null

ODI-1506
"Comparison value of step "{2}" ("{0}") is not a valid value of type {3} (load plan instance {4}, variable tested "{1}").

Category:
Other

Cause:
null

Action:
null

ODI-1507
Load Plan Instance restart called for instance {0}, but no previous runs were found.

Category:
Other

Cause:
null

Action:
null

ODI-1508
Load Plan Instance start called for instance {0}, but previous runs have been found.

Category:
Other

Cause:
null

Action:
null

ODI-1509
Load Plan Instance {0} cannot be restarted because the previous run ({1}) status "{2}" is not in "{3}" status.

Category:
Other

Cause:
null

Action:
null

ODI-1510
The same load plan instance {0} simultaneously started by two agents.

Copyright © 2000, 2026, Oracle and/or its affiliates.

The execution of the script failed. {0}

Category:
Other

Cause:
The execution of the script failed in the BSF Engine.

Action:
null

ODI-1591
The ODI agent name {0} specified in the client request does not match with the ODI agent {1} serving the request.

Category:
Other

Cause:
The client and the agent are not using the same physical agent name.

Action:
Verify the client and the agent are using the same agent name. Verify that the client is calling the correct agent.

ODI-1592
Error occurred testing connection to dataserver with agent {0}

Category:
Other

Cause:
Dataserver connection test failed on the agent

Action:
Verify that dataserver connection configuration is valid. Verify that dataserver is available

ODI-1593
The following bind parameters ({0}) in the task command {1} are not bound to any value. All the bind parameters should be bound for the command to be successful.

Category:
Other

Cause:
Either the source command is not providing values for some of the bind parameters in target command or the Odi Variables and/or Odi Sequence meta-data is not generated for the Scenario.

Action:
Verify that either the source command is correct or the Odi Variables and/or Odi Sequences meta-data is generated in the Scenario.

ODI-1594
The connection to the data server {0} failed.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The data server might be down or the data server connectivity settings are not correct.

Action:
Verify that you are able to test the data server using the Studio successfully.

ODI-1595
The command script failed with trace {0}.

Category:
Other

Cause:
There was a failure in the Ftp or Sftp command script.

Action:
Verify the trace and resolve the error in the command script passed to the tool.

ODI-1596
Failed to execute the pig script.

Category:
Other

Cause:
There was a failure in executing Pig script.

Action:
Verify the trace and resolve the error in the command script passed.

ODI-1597
The submitted pig script is empty.

Category:
Other

Cause:
The command did not contain or generate any pig script.

Action:
Verify the trace and resolve the error in the code generation.

ODI-1598
Failed to call method {0}.

Category:
Other

Cause:
Invocation Error.

Action:
Verify the trace and resolve the error in the runtime pig engine.

ODI-1616
DESCRIPTION Starts an agent. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX agent.(cmd|sh) -NAME=<agent name> [-PORT=<port>] [-PROTOCOL=<protocol>] [-JMXPORT=<jmxport>] [-ODI_CONNECTION_RETRY_COUNT=<nn>] [-ODI_CONNECTION_RETRY_DELAY=<nn>] PORT represents the listening port. It should match the port value specified against the physical agent defined in Topology. PROTOCOL represents the listening protocol, HTTP or HTTPS. Its default value is HTTP. NAME represents the name of this physical agent. It should match the name of a physical agent defined in Topology. User must have created an agent with this name using configuration wizard. JMXPORT represents the JMX port used for JMX notifications etc. Its default value is calculated as PORT + 1000, or 20810 if the calculated value is greater than 65535 ODI_CONNECTION_RETRY_COUNT represents the number of times a connection to the ODI Repository will be retried. Its default value is 10 ODI_CONNECTION_RETRY_DELAY represents the number of milliseconds between connection retries to the ODI Repository. Its default value is 7000

DwgBeanWrapper can only wrap DwgObjects

Category:
Other

Cause:
DwgBeanWrapper can only wrap DwgObjects

Action:
Choose correct type of objects.

ODI-10031
Object {0}: {1} is locked by user {2}

Category:
Other

Cause:
Object was locked by another user.

Action:
Wait until object is unlocked.

ODI-10032
You cannot import this object ({0}). A referenced object ({1}) does not exist in the repository.

Category:
Other

Cause:
A referenced object does not exist in the repository.

Action:
Check import file.

ODI-10033
You cannot delete this object because it is locked by another user ({0}).

Category:
Other

Cause:
This object was locked by another user.

Action:
Wait until object is unlocked.

ODI-10034
The technology hosting your master repository does not support Versioning.

Category:
Other

Cause:
The technology did not support versioning.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Choose another repository or technology.

ODI-10035
{0} : "{1}" (with global id: {5} and internal id: {6}) violates alternate key constraint {2} {3} for values {4}

Category:
Other

Cause:
Object violated alternate key constraint.

Action:
Check object properties and constraint's values.

ODI-10036
Importing object {0} : {1} (with global id: {2} and internal id: {3}) failed.

Category:
Other

Cause:
Import failed.

Action:
Check import file and try again.

ODI-10037
Import-replace for this node is supported for action groups only. The import file is invalid.

Category:
Other

Cause:
Import-replace for this node was supported for action groups only.

Action:
Check import file.

ODI-10038
The interface you are trying to use ({0}) is related to a logical schema ({1}) that no longer exists.

Category:
Other

Cause:
Logical schema was not found.

Action:
Check interface.

ODI-10039
Bad ID for an object representer

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Bad ID for an object representer

Action:
Check object`s ID.

ODI-10040
Cannot create directory

Category:
File

Cause:
Directory could not be created.

Action:
Check directory path/name.

ODI-10041
Oracle Data Integrator Remote Object (SnpRemoteObject) must inherit from SnpsFunction.

Category:
Other

Cause:
Oracle Data Integrator Remote Object (SnpRemoteObject) did not inherit from SnpsFunction.

Action:
Use SnpsFunction as parent.

ODI-10042
SnpsQuery must be connected prior to execution

Category:
Other

Cause:
SnpsQuery was not connected.

Action:
Set a connection.

ODI-10043
Security token is a mandatory parameter

Category:
Security

Cause:
Security token was not specified.

Action:
Check security parameters.

ODI-10044
Unable to save the interface. Maximum number of source datastores exceeded.

ODI-10049
Missing parameter

Category:
Other

Cause:
Parameter was missing.

Action:
Check all parameters.

ODI-10050
Missing parameter at: {0} SQL: {1}

Category:
Other

Cause:
Parameter was missing.

Action:
Check all parameters.

ODI-10051
Some objects cannot be exported because they do not exist in the repository: {0} {1}

Category:
Other

Cause:
Objects did not exist in the repository.

Action:
Check objects state.

ODI-10052
A problem occurred in your repository.

Category:
Other

Cause:
A problem occurred in your repository.

Action:
Contact Oracle Support Services.

ODI-10053
Problem retrieving JCOFunction object. {0}

Category:
Other

Cause:
Problem occurred retrieving JCOFunction object.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check JCO Function object.

ODI-10054
Unable to find the XML file corresponding to your technology.

Category:
Other

Cause:
XML file corresponding to your technology was not found.

Action:
Check technology and/or XML file for the technology.

ODI-10055
This ID is already in use in the repository

Category:
Other

Cause:
This ID was already in use in the repository.

Action:
Change ID.

ODI-10056
This repository ID already exists. This repository cannot be created.

Category:
Other

Cause:
Repository ID already existed.

Action:
Change repository ID.

ODI-10057
Unrecognized export type.

Category:
Other

Cause:
Export type was unrecognized.

Action:
Check export type.

ODI-10058
You are trying to import objects from a master repository of an older version into {0} version. This action is forbidden. Master repositories must be upgraded using the upgrade assistant, not using the export/import facility.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
You tried to import objects from a master repository of an older version.

Action:
Master repositories must be upgraded using the upgrade assistant, not using the export/import facility.

ODI-10059
Repository is null

Category:
Other

Cause:
Repository was null.

Action:
Check repository.

ODI-10060
Saputil is mandatory.

Category:
Other

Cause:
Saputil was mandatory.

Action:
Check Saputil

ODI-10061
Empty XML Character Set

Category:
Other

Cause:
XML Character Set was empty.

Action:
Fill XML Character Set.

ODI-10062
Unable to find license key {0}. An exception {1} occurred with message: {2}

Category:
Other

Cause:
An exception occurred.

Action:
Check license key.

ODI-10063
Unable to check the license key. An exception {0} occurred with message: {1}

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
An exception occurred.

Action:
Check license key.

ODI-10064
The interface must have a JMS datastore as a source or target. Another license is required otherwise.

Category:
Other

Cause:
The interface must have a JMS datastore as a source or target.

Action:
Check datastore type and/or license.

ODI-10065
You license does not include these features. Please contact your reseller.

Category:
Other

Cause:
You license does not include these features.

Action:
Please contact your reseller.

ODI-10066
The interface is using a Datastore defined in Model "{0}" which is linked to a logical schema "{1}" that no longer exists.

Category:
Other

Cause:
Logical schema was not found.

Action:
Correct interface.

ODI-10067
Target file already exists.

Category:
File

Cause:
Target file already existed.

Action:
Choose another target file name.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-10068
SnpsConnection: Current Isolation level: {0}. The new Isolation level: {1}, not supported

Category:
Other

Cause:
Isolation level not supported.

Action:
Check isolation level.

ODI-10069
Unsupported XML Character Set: {0}

Category:
Other

Cause:
Unsupported XML Character Set.

Action:
Check XML charset.

ODI-10070
Cannot delete this object. It is being edited or viewed

Category:
Other

Cause:
Object was being edited or viewed.

Action:
Stop edit or view object and try again.

ODI-10071
Cannot delete this object

Category:
Other

Cause:
Could not delete this object.

Action:
Check object state.

ODI-10073
A repository already exists on this data server

Category:
Other

Cause:
A repository already existed on this data server.

Category:
Other

Cause:
Alias does not exit.

Action:
Check alias name ant try again.

ODI-10104
File {0} is not a Smart Export file and cannot be imported by Smart Import.

Category:
Other

Cause:
Smart Export file not specified for Smart Import.

Action:
Specify a Smart Export file for importing via Smart Import.

ODI-10105
Smart Import file name cannot be null.

Category:
Other

Cause:
Smart Export file name not specified for Smart Import.

Action:
Specify a Smart Export file for importing via Smart Import.

ODI-10106
Smart Import response file name cannot be null.

Category:
Other

Cause:
Smart import response file name not specified for Smart Import.

Action:
Specify a Smart Import response file.

ODI-10107
Smart Import file {0} not found.

Category:
Other

Cause:
File does not exist.

Action:
Specify an existing Smart Export file for importing via Smart Import.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-10108
Smart Import response file {0} not found.

Category:
Other

Cause:
Response file does not exist.

Action:
Specify an existing Smart Import response file.

ODI-10109
File {0} is not a valid Smart Import Response file.

Category:
Other

Cause:
File is not a valid Smart Import response.

Action:
Specify an existing Smart Import response file.

ODI-10110
{0} with the same {1} exists.

Category:
Other

Cause:
An object with the same alternative key value(s) exists.

Action:
Change the alternative key value to be unique.

ODI-10111
{0} <{1}> referenced by {2} <{3}> is missing.

Category:
Other

Cause:
A referenced object does not exist.

Action:
Either import the missing object or change to reference a different object.

ODI-10112
Project code will be changed from <{0}> to <{1}>.

Category:
Other

Cause:
The import will make a change to an existing project code.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Determine whether the change to project code is desired or not.

ODI-10113
{0} with {1} <{2}> does not exist.

Category:
Other

Cause:
A referenced object does not exist.

Action:
Either import the missing object or change to reference a different object.

ODI-10114
{0} with {1} id <{2}> does not exist.

Category:
Other

Cause:
A referenced object does not exist.

Action:
Either import the missing object or change to reference a different object.

ODI-10115
{0} with the same name <{1}> already exists.

Category:
Other

Cause:
A different object with the same name already exists.

Action:
Either change the name of the object being imported or use match by name to match to the already existing object with the same name.

ODI-10116
Model code will be changed from <{0}> to <{1}>.

Category:
Other

Cause:
The import will make a change to an existing model code.

Action:
Determine whether the change to model code is desired or not.

ODI-10117
Sub-model code will be changed from <{0}> to <{1}>.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The import will make a change to an existing sub-model code.

Action:
Determine whether the change to sub-model code is desired or not.

ODI-10118
A different Physical Schema is already set as the default physical schema for the same data server.

Category:
Other

Cause:

Action:

ODI-10119
A different Context is already set as the default Context.

Category:
Other

Cause:

Action:

ODI-10120
Context code will be changed from <{0}> to <{1}>.

Category:
Other

Cause:
The import will make a change to an existing context code.

Action:
Determine whether the change to context code is desired or not.

ODI-10121
Logical schema name will be changed from <{0}> to <{1}>.

Category:
Other

Cause:
The import will make a change to an existing logical schema name.

Action:
Determine whether the change to logical schema name is desired or not.

ODI-10122
Logical agent name will be changed from <{0}> to <{1}>.

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The import will make a change to an existing logical agent name.

Action:
Determine whether the change to logical agent name is desired or not.

ODI-10123
{0} with {1} <{2}> and {3} <{4}> does not exist.

Category:
Other

Cause:
A referenced object does not exist.

Action:
Either import the missing object or change to reference a different object.

ODI-10124
Smart import of file {0} cannot be run due to unfixed critical issues.

Category:
Other

Cause:
Critical issues exist for objects in the Smart Import.

Action:
A fix must be provided for all critical issues before the Smart Import can be run.

ODI-10125
Smart Export file name cannot be null.

Category:
Other

Cause:
Smart Export file name not specified for Smart Export.

Action:
Specify a Smart Export file via Smart Export.

ODI-10126
File {0} already exists.

Category:
Other

Cause:
The file already exists.

Action:
Specify another file name.

ODI-10127
Column position {0} is being used by another object <{1}>.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The position value is already in use.

Action:
Specify a unique position value.

ODI-10128
Multiple primary keys found. Only one primary key can be defined per datastore.

Category:
Other

Cause:
Multiple primary keys defined.

Action:
Delete or match primary keys so that only one is defined.

ODI-10129
Object with id {0} and type {1} is not a smart exportable object.

Category:
Other

Cause:
Smart Export does not support the type of object specified.

Action:
Do not export this object.

ODI-10130
Smart Import Response file {0} is not valid for Smart Export file {1}.

Category:
Other

Cause:
Smart Import Response file was not generated for the Smart Export file being imported.

Action:
Specify a Smart Import response file that belongs to the Smart Export file being imported.

ODI-10131
Entity of type {0} cannot be merged.

Category:
Programmatic

Cause:
Wrong entity type.

Action:
Check entity type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-10132
Entity of type {0} cannot be removed.

Category:
Programmatic

Cause:
Wrong entity type.

Action:
Check entity type.

ODI-10133
Cannot create a transaction against the extended persistent context [{0}].

Category:
Programmatic

Cause:
Another persistence context is already bound to the current thread.

Action:
Unbound persistence context from current thread.

ODI-10134
You do not have READ permission on at least one object from the collection/list.

Category:
Security

Cause:
Insufficient level of permissions.

Action:
Check your permissions

ODI-10135
Max value ({1}) reached for sequence {0} and reset is not allowed.

Category:
Other

Cause:
Reset is not allowed.

Action:
Check configuration of sequence behaviour.

ODI-10136
Illegal transaction state: transaction synchronization is active but entity manager is not synchronized within the transaction.

Category:
Programmatic

Cause:
Entity manager is not synchronized within the transaction.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Synchronize entity manager and try again.

ODI-10137
Your program needs to set authentication first.

Category:
Security

Cause:
There is no authentication set.

Action:
Set authentication via odiInstance.getSecurityManager().setGlobalAuthentication(.) or odiInstance.getSecurityManager().setCurrentThreadAuthentication(.), see the SecurityManager API for more detail.

ODI-10138
Unable to create DwgConnectConnection to {0} repository.

Category:
Other

Cause:
Exception during connection.

Action:
Check repository configuration.

ODI-10139
{0} must not be null or empty.

Category:
Configuration

Cause:
Parameter is null or empty.

Action:
Check parameter name.

ODI-10140
{0} must be greater or equal 0.

Category:
Configuration

Cause:
Parameter is negative.

Action:
Check parameter value.

ODI-10141
Unable to create datasource provider from class [{0}].

Category:
Configuration

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Exception during creation.

Action:
Check configuration.

ODI-10142
Active transaction is required to use the method {0} on the TransactionalOdiEntityManager.

Category:
Programmatic

Cause:
Transaction is not active.

Action:
Check transaction state.

ODI-10143
Error while accessing the {0} repository.

Category:
Network

Cause:
Network problems.

Action:
Check the network connection and the database status.

ODI-10144
OdiInstance is closed.

Category:
Other

Cause:
OdiInstance is closed.

Action:
Check OdiInstance status.

ODI-10145
Limited persistence support.

Category:
Other

Cause:
Limited persistence support.

Action:
Check OdiInstance configuration.

ODI-10146
Cannot create JDBC DataSource for this type of DataServer.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
Invalid connection provider.

Action:
Check connection provider.

ODI-10147
Repository type mismatches.

Category:
Configuration

Cause:
Wrong repository type.

Action:
Check repository type.

ODI-10148
Repository is in error install/upgrade state and needs to be repaired. Connection has been disabled.

Category:
Configuration

Cause:
Repository install/upgrade did not complete successfully.

Action:
Check install/upgrade log files and/or ODI user documentation for information on reparation process.

ODI-10149
Local Repository table is empty.

Category:
Configuration

Cause:
Local Repository table is empty.

Action:
Check repository configuration.

ODI-10150
Work repository with ID {0} is not bound to master: Definition in master ID:{0}, Name:{1}, Timestamp:{2} Definition in work ID:{3}, Name:{4}, Timestamp:{5}.

Category:
Configuration

Cause:
Work repository with ID is not bound to master repository.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check work and master repositories configuration.

ODI-10151
Unable to get ID for entity {0}.

Category:
Security

Cause:
Wrong entity ID.

Action:
Check entity properties.

ODI-10152
I_OBJECTS for entity class {0} is not found.

Category:
Programmatic

Cause:
Entity type is not mapped to I_OBJECTS.

Action:
Check entity class.

ODI-10153
{0} is denied.

Category:
Security

Cause:
Insufficient level of permissions.

Action:
Check permissions.

ODI-10154
{0} is denied for {1}.

Category:
Security

Cause:
Insufficient level of permissions.

Action:
Check permissions.

ODI-10155
You do not have {0} permission on at least one object from the collection/list.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Insufficient level of permissions.

Action:
Check permissions.

ODI-10156
Impossible to connect to JPS MBean Server.

Category:
Configuration

Cause:
Exception during connection.

Action:
Check configuration.

ODI-10157
{0}: must call preWebLogic() before postWebLogic().

Category:
Programmatic

Cause:
Wrong API usage.

Action:
Call preWebLogic() before postWebLogic().

ODI-10158
The credential with map name {0} and key {1} already exists.

Category:
Programmatic

Cause:
Wrong credential.

Action:
Check credential configuration.

ODI-10159
The user {0} has not required CONNECT profile.

Category:
Security

Cause:
The user has not required profile.

Action:
Grant the user CONNECT profile first.

ODI-10160
Unable to load user.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Exception during user loading.

Action:
Check repository connection.

ODI-10161
Trying to create authentication with Subject parameter which should be applicable when OPSS authentication is used, but ODI shows it is using ODI internal authentication.

Category:
Programmatic

Cause:
ODI internal authentication is used instead of OPSS authentication.

Action:
Check authentication type.

ODI-10162
This OPSS user "{0}" is not registered to Oracle Data Integrator.

Category:
Configuration

Cause:
The user is not registered to ODI.

Action:
Check user name.

ODI-10163
This OPSS user "{0}" has different GUID than the one found in Oracle Data Integrator repository.

Category:
Security

Cause:
OPSS user differs from ODI user in GUID.

Action:
Check user GUID.

ODI-10164
Only supervisor user can invoke this API.

Cannot access a closed IOdiEntityManager.

Category:
Programmatic

Cause:
IOdiEntityManager has been closed.

Action:
Check IOdiEntityManager state.

ODI-10210
File {0} does not contain any objects to be imported by Smart Import.

Category:
Other

Cause:
Smart Export file specified for Smart Import is empty.

Action:
Specify a Smart Export file with objects for importing via Smart Import.

ODI-10211
Unsupported Java Character Set: {0}

Category:
Other

Cause:
Unsupported Java Character Set.

Action:
Check Java charset.

ODI-10212
Parent object {0}: "{1}" already has child {2}: "{3}". Technical details: {2} : "{3}" (with global id: {7} and internal id: {8}) violates alternate key constraint {4} {5} for values {6}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Object violated alternate key constraint.

Action:
Check object properties and constraint's values.

ODI-10213
Fixed format file field {0} (starts at {1} ends at {2}) has a file position that overlaps with the file position of field {3} (starts at {4} ends at {5}).

Category:
Other

Cause:
Two fields from a fixed format file have overlapping file positions.

Action:
Modify the file positions or remove a field if the overlapping file positions are not correct.

ODI-10214
Fixed format file fields {0} (starts at {1} ends at {2}) and {3} (starts at {4} ends at {5}) have unused file positions between them.

Category:
Other

Cause:
Two fields from a fixed format file have unused file positions between them.

Action:
Modify the file positions if having unused file positions is not correct.

ODI-10215
It is forbidden to import a log into a repository using any other import mode except "Synonym Mode Insert".

Category:
Other

Cause:
Import mode is not "Synonym Mode Insert".

Action:
Correct import mode.

ODI-10216
Upgrade key cannot be null when importing objects from before ODI 12C.

Category:
Other

Cause:
Upgrade key is not set for import that must upgrade objects to have global ids.

Action:
Specify the upgrade key to be used.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-10217
Permission check failed for instance object {0}.

Category:
Other

Cause:
Permission check failed for instance object.

Action:
Need to grant initial permission for creator on object.

ODI-10218
Invalid WAS_HOME ("{0}") set or WebSphere library jar ({1}) not found under WAS_HOME/plugins.

Category:
Other

Cause:
Wrong WAS_HOME set (or) WebSphere libraries (com.ibm.ws.admin.core.jar, com.ibm.ws.admin.services.jar, com.ibm.ws.runtime.jar) are moved

Action:
Check that the environment-variable WAS_HOME is set properly to point to WebSphere Application Server root. Also, ensure the libraries exist under WAS_HOME/plugins.

ODI-10219
ODI Library for WebSphere access ({0}) not found.

Category:
Other

Cause:
Library could be moved / deleted

Action:
Check that the specified library present

ODI-10220
ODI was unable to find the technology "{0}".

Category:
Other

Cause:
Missing technology.

Action:
Check that this technology is defined in the repository. .

ODI-10221
It is taken {0} second to synchronize Snp_Ent_Principal table content.

Category:

ODI-10222
The compatible Mapping/ReusableMapping {0} can only be modified by 11g SDK.

Category:
Other

Cause:
An attempt was made to modify compatible Mapping using 12c SDK.

Action:
Modify compatible Mapping using 11g Interface SDK.

ODI-10223
A non-legacy compatible import source cannot be imported into a legacy compatible repository.

Category:
Other

Cause:
An attempt was made to import a non-legacy compatible import source into a legacy compatible repository.

Action:
Import a legacy compatible import source or make repository not legacy compatible.

ODI-10224
You are not authorized to create new user.

Category:
Security

Cause:
Only SUPERVISOR could create users.

Action:
Check permissions.

ODI-10225
Invalid wallet password: A valid password must have a minimum length of eight characters and contain alphabetic characters combined with numbers or special characters.

Category:
Security

Cause:
Invalid wallet password.

Action:
Please choose a valid wallet password accordingly.

ODI-10226
Wallet already exists.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Try to create a wallet which already exists.

Action:
Please stop creating a wallet. Instead use the existing one.

ODI-10227
Wallet new password is same as old password.

Category:
Security

Cause:
You provide a new wallet password which is the same as the old one.

Action:
Please choose different wallet password than the old one.

ODI-10228
Repository with id "{0}" or with name "{1}" has been already used in your master repository.

Category:
Configuration

Cause:
Master repository has already work repository with the same name or id.

Action:
Check your master repository and work repository.

ODI-10229
Repository with id "{0}" has been already used in your master repository.

Category:
Configuration

Cause:
Master repository has already work repository with the same id.

Action:
Check your master repository and work repository.

ODI-10230
Repository with name "{0}" has been already used in your master repository.

Category:
Configuration

Cause:
Master repository has already work repository with the same name.

Action:
Check your master repository and work repository.

ODI-10231
Interface {0} cannot be imported because source temporary interface / mapping {1} is not found.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
An attempt was made to import an interface with a source temporary interface / mapping that cannot be found in the import source or target repository.

Action:
Import the missing source temporary interface / mapping.

ODI-10232
The password violates the following rule: "New password must be different from old one". Select another password.

Category:
Security

Cause:
Weak password

Action:
Check password policy and correct password.

ODI-10234
Object cannot be imported since it contains non XML files

Category:
Other

Cause:
ZipFolder to be imported should not contain non XML files

Action:
Check ZipFolder to be imported

ODI-10235
No Importable files found

Category:
Other

Cause:
None of XML files imported from ZipFolder

Action:
Check XML files to be imported from Zip Folder

ODI-10236
Object must be replaced with an object of same KM type

Category:
Other

Cause:
KM of different type to the existing KM was selected for import replace.

Action:
Import Replace KM with existing KM type

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-10237
Object not replaced

Category:
Other

Cause:
A KM was selected for the Import Replace with a different type to the current KM.

Action:
Select a KM of the same type for import replace.

ODI-10238
Object must be replaced with an object of same type

Category:
Other

Cause:
Different ODI object is used to Import Replace KM

Action:
Import Replace KM with Same type

Cannot import an export file with parents using regular import and INSERT_UPATE mode. Use smart import instead.

Category:
Other

Cause:
An attempt was made to import an export file created with parent objects using regular import and INSERT_UPATE mode. This would cause all other objects under the parent objects and not in the import file to be deleted.

Action:
Use smart import to import an export file created with parent objects when INSERT_UPDATE functionality is needed.

ODI-10244
Cannot import {0} {1} (with global id: {2} and internal id: {3}) because referenced {4} with global id {5} does not exist.

Category:
Other

Cause:
The referenced object for a foreign key cannot be found in order to set the reference and a missing reference cannot be created.

Action:
Import the missing referenced object before importing the referencing object.

ODI-10245
Cannot import {0} {1} (with global id: {2} and internal id: {3}) belonging to {4} {5} (with global id: {6} and internal id: {7}) because its referenced object is not found in the target repository.

Category:
Other

Cause:
The object was imported in a SYNONYM UPDATE mode and the referenced object was not found in the repository.

Action:
Change the import mode to INSERT_UPDATE or import the file twice first in INSERT MODE and then in UPDATE mode.

ODI-10246
No Exportable objects found in the repository.

Category:
Other

Cause:
No objects are present in the repository for export

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Create repository objects

ODI-10247
Specified project {0} does not exist in the repository.

Category:
Other

Cause:
The repository did not contain the specified project.

Action:
Choose another project or create the project with the specified name.

ODI-10248
{0} : Not an ODI special driver.

Category:
Other

Cause:
Invalid Special driver.

Action:
Check that this technology is part of the special driver list.

ODI-13000
Invalid Directory Path specified - {0}

Category:
Other

Cause:
Invalid directory path. Either the path does not exist or is not a directory

Action:
Provide valid directory path

log_bin_trust_function_creators value is not 'ON'

Action:
Refer to the certification matrix for supported DB init parameters.

ODI-14128
The selected Oracle database is a multitenant container database (CDB). Connecting to a multitenant container database (CDB) is not supported. Instead, connect to a valid pluggble database (PDB).

Category:
Other

Cause:
Database version is not supported

Action:
Refer to the certification matrix for supported DB versions.

ODI-14129
The selected Oracle Database 12c instance is not certified with this version of Oracle Fusion Middleware. Oracle Fusion Middleware 12c requires Oracle Database 12c (12.1.0.1) or higher. For a list of certified databases, refer to the Supported System Configurations information on the Oracle Technology Network

Category:
Other

Cause:
Database version is not supported

Action:
Refer to the certification matrix for supported DB versions.

ODI-14130
The selected Oracle Database 11g Release 1 or Oracle Database 10g instance is not certified with this version of Oracle Fusion Middleware. Oracle Fusion Middleware 12c requires Oracle Database 10g (10.2.0.4) or higher or Oracle Database 11g Release 1 (11.1.0.7) or higher. For the latest list of certified databases, refer to the Supported System Configurations information on the Oracle Technology Network.

Category:
Other

Cause:
Database version is not supported

Action:
Refer to the certification matrix for supported DB versions.

ODI-14131
The database you are connecting is not a supported version. Enter Database with version equal to or higher than 2008 R2. Refer to the certification matrix for supported DB versions.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
Database version is not supported

Action:
Refer to the certification matrix for supported DB versions.

ODI-14132
The selected IBM DB2 instance is not certified with this version of Oracle Fusion Middleware. Oracle Fusion Middleware 12c requires IBM DB2 9.7 or higher in 9 series and IBM DB2 10.1 FP2 or higher in 10 series. For a list of certified databases, refer to the Supported System Configurations information on the Oracle Technology Network.

Category:
Other

Cause:
Database version is not supported

Action:
Refer to the certification matrix for supported DB versions.

ODI-14133
User should have sysdba or dba privilages.

Category:
Other

Cause:
User does not have sysdba or dba privilages

Action:
Grant user sysdba or dba privilages.

ODI-14134
The selected Oracle database is not configured to use the AL32UTF8 character set. Oracle strongly recommends using the AL32UTF8 character set for databases that support Oracle Fusion Middleware.

Category:
Other

Cause:
The database you are connecting is with non-AL32UTF8 character set

Action:
Use AL32UTF8 as the database character set.

Cause:
Database validation failed

Action:
Refer to the certification matrix for supported DB versions.

ODI-14138
Could not perform validation of the database.Please check the database user privileges.

Category:
Other

Cause:
Database validation failed

Action:
Check if database user has sufficient privileges or required table/view/file exist .

ODI-14139
Encryption Standard is not set in Master Repository.

Category:
Security

Cause:
Master Repository configured with invalid or no Encryption Standard.

Action:
Set the Encryption Standard to be used in the Master Repository, with valid value for algorithm ('AES') and key-length ('128' / '256').

ODI-14140
Master key data is not set in Master Repository

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Master Repository does not have the master key data.

Action:
Set the Master key data to be used in the Master Repository.

ODI-14141
The provided key is not matching the key-specification. Key must : be of length 8-100, contain at least one alphabet (lower/uppercase), contain at least one numeric-digit (or) a special-character from: [@ # $ % + / =].

Category:
Security

Cause:
The provided key is not matching the key-specification.

Action:
Provide key that matches the key-specification

ODI-14142
The Security Policy currently in force, does not allow the use of AES-256.

Category:
Security

Cause:
The Security Policy in force does not allow using AES-256 Encryption Standard.

Action:
To use AES-256, please replace the security policy files in JRE_HOME/lib/security, with Unlimited Strength Policy Files available at Java SE downloads at http://www.oracle.com/technetwork/java. Refer Java SE documentation for more information.

ODI-14143
Encryption Standard persisted in master repository is not AES-128 or AES-256.

Category:
Security

Cause:
The Encryption Standard configured in the repository is not supported.

Action:
Edit the master repository configuration to set the Encryption Standard as AES-128 or AES-256.

ODI-14144

The repository is for {0} so you cannot connect to this repository from {1}.

Category:
Security

Cause:
Repository is not valid for the invoking application.

Action:
Connect to this repository use the proper application.

ODI-14174
You are using Oracle Golden Gate Studio which only supports internal authentication mode. But the repositgory is in external authentication mode which cannot be used for Oracle Golden Gate Studio.

Category:
Security

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The repository is in external authentication mode and it is not valid for Oracle Golden Gate Studio since Oracel Golden Gate Studio only supports internal authentication mode. One possibility could be that this repository is for Oracle Data Integrator.

Action:
Connect to a different repository.

ODI-14175
Cannot delete this user since it is the last supervisor user.

Category:
Security

Cause:
You are trying to delete the last supervisor user which cannot deleted.

Action:
Create another user and make it supervisor user and then you can delete this supervisor user.

ODI-14176
Password cannot be empty for accessing the MBean Server, which is used for External Password Storage.

Category:
Security

Cause:
Password is empty for the accessing the MBean Server.

Action:
Provide MBean server password.

ODI-14177
The external user: {0} does not exist in ODI repository and also has no ODI role granted. The GUID of the user : {1}

Category:
Security

Cause:
The specified external user does not exists in ODI repository and has no ODI role granted.

Action:
Add the external user in ODI repository or grant required ODI roles to the user.

ODI-14178
Schema name and Catalog name is not unique for the dataserver {0}

Category:
Other

Cause:
Duplicate physical schema. Physical Schema with the same schema name and catalog name already exists for this dataserver.

Action:
Choose another schema name and/or catalog name.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-14179
For security reasons, you cannot use odiRef.getJDBCConnection("WORKREP"), since your Work Repository and Master Repository use the same database schema. Please contact your Oracle Data Integrator Administrator to grant you <Create JDBC Connection> permission on Master Repository object from Oracle Data Integrator Studio Security Explorer and try again. Please note that the <Create JDBC Connection> permission is located under Master Repository object in the Objects section from Security Explorer. You can give the permission to a user, say User1, by 1) drag and drop it to the user User1 2) then mark the newly granted permission as Generic Privilege: the newly granted permission <Create JDBC Connection> will be under the tree node User1/Objects/Master Repository, open the editor of the granted permission and select the check box named <Generic Privilege>.

Category:
Other

Cause:
The Work Repository and Master Repository use same database schema and you do not have the required permission granted.

Action:
Please contact your Oracle Data Integrator Administrator to grant you <Create JDBC Connection> permission on Master Repository object from Oracle Data Integrator Studio Security Explorer and try again. Or you also can re-create your Master and Work repositories in different database schema. Please note that the <Create JDBC Connection> permission is located under Master Repository object in the Objects section from Security Explorer. You can give the permission to a user, say User1, by 1) drag and drop it to the user User1 2) then mark the newly granted permission as Generic Privilege: the newly granted permission <Create JDBC Connection> will be under the tree node User1/Objects/Master Repository, open the editor of the permission and select the check box named <Generic Privilege>.

ODI-15005
The datatype "{0}" does not exist in technology: {1}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
The datatype for a column is not supported by the technology.

Action:
Change the datatype or the technology of the execution location.

ODI-15006
The source datatype is null for the column: {0}, and the technology: {1}

Category:
Programmatic

Cause:
The datatype for a column is null for the technology.

Action:
Change the datatype or the technology of the execution location.

ODI-15007
Syntax not set for 'Create Table' for the datatype: {0} for the technology: {1}.

Category:
Programmatic

Cause:
The execution location technology does not have any "Create Table" syntax set up.

Action:
Edit the technology definition and add "Create Table" syntax.

ODI-15009
No text for the 'Writable Datatype Syntax' for the datatype: {0} in technology: {1}

Category:
Programmatic

Cause:
The datatype does not have a "Writable Datatype Syntax" property value set up for the execution location technology.

Action:
Edit the datatype in the technology to add a "Writable Datatype Syntax".

ODI-15010
No conversion for the datatype {0}, for the source technology {1} and for the target technology {2}

Category:
Programmatic

Cause:
No conversion is defined for the source technology datatype to the target technology datatype.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Edit the source or target technology datatype to add a conversion from the source to the target datatype.

ODI-15011
The variable does not exist in the database.

Category:
Programmatic

Cause:
A variable is being referenced but it does not exist in the repository.

Action:
Create the variable in the repository.

ODI-15012
Sequence does not exist in database

Category:
Programmatic

Cause:
A sequence is referenced but does not exist in the repository.

Action:
Create the sequence in the repository.

ODI-15013
The table {0} has fatal errors.

Category:
Programmatic

Cause:
The table cannot be processed.

Action:
Check the table for inconsistencies.

ODI-15014
The referenced text does not exist in the database.

Category:
Programmatic

Cause:
The text reference in the expression does not exist in the repository.

Action:
Repository corruption has occurred, contact Oracle support.

ODI-15015
Too much recursion in this text resolution.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The expression text references other text recursively too many times.

Action:
Review the expression and try to simplify.

ODI-15016
Commands Undefined.

Category:
Programmatic

Cause:
KM is missing a block of lines.

Action:
Check the KM.

ODI-15017
Table not selected (null).

Category:
Programmatic

Cause:
Target table not found.

Action:
Check interface for consistency.

ODI-15018
CKM not selected.

Category:
Programmatic

Cause:
The CKM is not selected for the object.

Action:
Select a CKM.

ODI-15019
Missing context

Category:
Programmatic

Cause:
The context object cannot be found.

Action:
Check the context selection.

ODI-15020
No JKM available

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
JKM has not been set or is not found.

Action:
Set a valid JKM for the interface.

ODI-15021
Journalizing requires a Primary Key on the Table:

Category:
Programmatic

Cause:
Journalizing is enabled, but the target table has no primary key.

Action:
Add a primary key to the target table.

ODI-15022
No RKM Set.

Category:
Programmatic

Cause:
RKM has not been set or is not found.

Action:
Set a valid RKM for the object.

ODI-15023
Cannot perform standard reverse. Choose customized reverse and set RKM.

Category:
Programmatic

Cause:
Standard reverse engineering is not supported for this object.

Action:
Select customized reverse engineering for the object and select an RKM.

ODI-15025
The interface clause text does not exist.

Category:
Programmatic

Cause:
The interface clause refers to text that does not exist.

Action:
Check interface clauses for (join, filter, etc.) for consistency.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-15026
Interface clauses are missing.

Category:
Programmatic

Cause:
The code generator cannot find the clause collection for the interface.

Action:
Check the interface for consistency.

ODI-15027
Interface source tables are missing.

Category:
Programmatic

Cause:
The code generator cannot find the source table collection for the interface.

Action:
Check the interface for consistency.

ODI-15028
Interface result collection is null.

Category:
Programmatic

Cause:
Interface generation method buildSqlCauses as been called with a null results parameter.

Action:
Ensure that a non null Map is passed for the result parameter.

ODI-15029
Interface error clause collection is missing.

Category:
Programmatic

Cause:
Interface generation method buildSqlCauses as been called with a null error clauses parameter.

Action:
Ensure that a non null collection is passed for the error clauses parameter.

ODI-15030
Interface is missing the integration work table collection.

Category:
Programmatic

Cause:
Interface generation method buildSqlCauses as been called with a null work table collection parameter.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that a non null collection is passed for the work table parameter.

ODI-15031
Technology not selected.

Category:
Programmatic

Cause:
No technology is selected for the interface target execution location.

Action:
Check the technology selection for the interface target.

ODI-15032
Unknown object in interface source table collection

Category:
Programmatic

Cause:
Interface generation method buildSqlCauses as been called with a source table collection having a non table item.

Action:
Ensure that only table type items are included in the source table collection.

ODI-15033
The expression: {0} does not have an associated column.

Category:
Programmatic

Cause:
The expression should represent a column, but no column is found for the name.

Action:
Fix the expression.

ODI-15034
A scenario with the same name and the same number already exists. Please select other values.

Category:
Programmatic

Cause:
Cannot create a duplicate scenario with the same name and version number as an existing scenario.

Action:
Give the scenario a different name or version.

ODI-15036
Scenario''s name and/or number are missing.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
A scenario must have a name and version, but the name or version is missing.

Action:
Set values for name and version for the scenario.

ODI-15037
The interface {0} has fatal errors.

Category:
Programmatic

Cause:
The interface has fatal errors.

Action:
Check and fix interface issues.

ODI-15038
The scenario name substitution pattern {0} is not supported. Please check the user parameter for the scenario naming convention.

Category:
Programmatic

Cause:
Invalid substitution pattern used for scenario name.

Action:
Change the substitution pattern.

ODI-15039
The interface {0} use native sequence. Native sequence are not allowed for Derived Table (sub select statement)

Category:
Programmatic

Cause:
Native sequence was used in a sub-select or derived interface.

Action:
Remove the native sequence usage.

ODI-15040
Errors detected when building SQL clauses.

Category:
Programmatic

Cause:
An error occurred when generating code for the SQL clauses.

Action:
Fix the interface clauses.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-15041
An aggregation function may not be used in a join condition. Please use a separate interface for the aggregation and join the result in this interface.

Category:
Programmatic

Cause:
An aggregation function was used inside a join condition expression.

Action:
Change the join condition to remove the aggregation function.

ODI-15042
Unable to regenerate this scenario. It references an package that does not exist.

Category:
Programmatic

Cause:
The scenario must reference a package, but it doesn't.

Action:
Delete the scenario and create a new one.

ODI-15043
Unable to regenerate this scenario from a Runtime repository.

Category:
Programmatic

Cause:
The scenario must cannot be regenerated from the runtime repository.

Action:
Delete the scenario and create a new one.

ODI-15044
Invalid pScenSource type when calling SnpGeneratorSQLCIT.mainGenScenSourceScenario

Category:
Programmatic

Cause:
The scenario generator has been invoked with an invalid scenario source.

Action:
Ensure that only valid scenario source types are used to generate a scenario.

ODI-15045
Invalid value for KM type.

Category:
Programmatic

Cause:
An invalid value was specified for the KM type.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Specify a valid value.

ODI-15046
The column cache is null during code generation.

Category:
Programmatic

Cause:
The getSnpCol method has been invoked while the SnpColCache member is null;

Action:
Ensure that SnpGeneratorSQLCIT has been properly initialized before invoking getSnpCol.

ODI-15047
The getSnpCol method has been invoked with a null column ID during code generation.

Category:
Programmatic

Cause:
The getSnpCol method has been invoked with a null column ID.

Action:
Ensure that getSnpCol is only called with valid column ID values.

ODI-15050
Flow Control not possible if no key is declared in your target datastore

Category:
Programmatic

Cause:
Flow control is enabled for the interface, but the target datastore has no primary key defined.

Action:
Define a primary key for the target datastore object, and re-add the target datastore.

ODI-15051
Missing mapping instance for interface.

Category:
Programmatic

Cause:
The target column does not have any mapping.

Action:
Add a mapping expression for the target column.

ODI-15052
The interface is missing a dataset.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
There is no dataset for the interface source.

Action:
Check the interface for consistency.

ODI-15054
Scenario generation error: Cannot regenerate the scenario. The physical mapping design used to generated the scenario is not found.

Category:
Programmatic

Cause:
The physical mapping design used to generated the scenario is not found.

Action:
Choose to create or replace the scenario.

ODI-15055
Character "]" missing in: {0}.

Category:
Programmatic

Cause:
A bracketed tag inside a KM line is missing a closing bracket ("]") character.

Action:
Fix the KM line.

ODI-15057
Non-ordered outer join not supported for technology.

Category:
Programmatic

Cause:
Non-ordered outer join syntax disabled for technology.

Action:
Correct join.

ODI-15058
Variable scenario generation error: Logical schema is required.

Category:
Programmatic

Cause:
Variable scenario cannot be generated if logical schema is not set.

Action:
Set the logical schema.

ODI-15059
I_TXT is mandatory.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
A call was made to SnpTxtCachedHashMap.getInstance, but the pITxt parameter was null.

Action:
Contact Oracle support.

ODI-15060
The JKM line {0} uses an unsupported execution channel: {1}

Category:
Programmatic

Cause:
A line in the JKM uses an execution channel that is not supported.

Action:
Change the line in the JKM to use a supported channel.

ODI-15061
The JKM line {0} uses an unsupported commit type: {1}

Category:
Programmatic

Cause:
A line in the JKM uses a commit type that is not supported.

Action:
Change the line in the JKM to use a supported commit type.

ODI-15062
Invalid commit type: {0}

Category:
Programmatic

Cause:
An invalid commit type was passed to SnpServiceGenerator.convertCommitType

Action:
Contact Oracle support

ODI-15063
The alternate key {0} is not unique.

Category:
Programmatic

Cause:
An alternate key defined by the repository is found to be non-unique.

Action:
Check the data or the alternate key definitions.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-15064
The primary key {0} is not unique.

Category:
Programmatic

Cause:
A primary key defined by the repository is found to be non-unique.

Action:
Check the data or primary key definitions.

ODI-15065
Join error ({0}) between the table {1} and the table {2}.

Category:
Programmatic

Cause:
A foreign key relationship is not found.

Action:
A foreign key relationship between 2 tables defined in the repository is not valid.

ODI-15066
The column {0} cannot be null.

Category:
Programmatic

Cause:
The column is marked in the repository as not nullable.

Action:
Check the data, or change the not null value.

ODI-15067
The datatype value "{0}" is incorrect.

Category:
Programmatic

Cause:
An invalid datatype has been found.

Action:
The repository table contains an invalid datatype.

ODI-15068
Unknown flexfield code {0}.

Category:
Programmatic

Cause:
An undefined flex field code is being referenced

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Check the flex field references in the KM, and the flex field definitions

ODI-15069
{0} Is not valid without session context.

Category:
Programmatic

Cause:
A current session context does not exist.

Action:
Check session definition.

ODI-15070
Unable to find method object: PythonInterpreter.initialize(Properties, Properties, String[]) method

Category:
Other

Cause:
The python method used by the script is not found.

Action:
Check the KM step.

ODI-15071
Error occurred

Category:
Other

Cause:
An exception was thrown while executing a python script in the KM step.

Action:
Check the cause.

ODI-15072
There is no PK constraint

Category:
Programmatic

Cause:
There is a call to "getPK" in the KM, but no PK is found.

Action:
Check the KM and the PK definitions.

ODI-15073
There is no index

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
There is a call to "getIndex" in the KM, but no index is found.

Action:
Check the KM and the index definitions.

ODI-15076
no dataset

Category:
Programmatic

Cause:
A KM line is calling "getDataSet", but no data set is found.

Action:
Check the KM or the DataSet definitions.

ODI-15077
No Current Model Set

Category:
Programmatic

Cause:
There is a call to "getModel" in the KM, but no model is found.

Action:
Check the KM and the model definitions.

ODI-15078
There is no Not Null column

Category:
Programmatic

Cause:
There is a call to "getNotNullCol" in the KM, but no not null column is found.

Action:
Check the KM and the not null column definitions.

ODI-15079
There is no current Pop.

Category:
Programmatic

Cause:
There is a call to "getPop" in the KM, but no interface is found.

Action:
Check the KM and the interface definitions.

ODI-15080
There is no Step

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
There is a call to "getStep" in the KM, but no step is found.

Action:
Check the KM and the step definitions.

ODI-15081
There is no Target Table

Category:
Programmatic

Cause:
There is a call to "getTargetTable" in the KM, but no target table is found.

Action:
Check the KM and the interface target table definitions.

ODI-15083
Multiple Primary Keys have been detected for {0} .

Category:
Programmatic

Cause:
A repository table can only have one primary key defined, but multiple primary keys are defined.

Action:
Edit the table's primary key definitions and remove all but one.

ODI-15084
There is no session

Category:
Programmatic

Cause:
There is a call to "getSession" in the KM, but no session is found.

Action:
Check the KM and the session definitions.

ODI-15085
The value : "({0})" is unknown.

Category:
Programmatic

Cause:
A KM line has a templated call which contains an unknown bracketed property.

Action:
Fix the KM.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-15086
There is no Temporary Index

Category:
Programmatic

Cause:
There is a call to "getTemporaryIndex" in the KM, but no temporary index is found.

Action:
Check the KM and the temporary index definitions.

ODI-15087
There is no current execution context defined.

Category:
Programmatic

Cause:
There is a call to "getContext" in the KM, but no context is found.

Action:
Check the KM and the context definitions.

ODI-15088
Not in designer mode

Category:
Programmatic

Cause:
A KM line has a call to access design information, but the interpretation location is not set to designer.

Action:
Make sure that the interpretation location is set to designer when this line is executed.

ODI-15089
asked '({0})' and available value are between 0 and ({1}).

Category:
Programmatic

Cause:
A KM line is calling "getDataSet", but the specified index is out of range.

Action:
Fix the KM or the DataSet definitions.

ODI-15090
Table "{0}" not found on model "{1}", schema "{2}"

Category:
Programmatic

Cause:
Attempt to initialize data services from a table that cannot be found

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Change data services reference or make sure that table exists

ODI-15091
Impossible to connect to JPS MBean Server

Category:
Other

Cause:
Cannot connect to JPS MBean server.

Action:
Internal Error.

ODI-15092
Unable to generate data service - the column {0} does not exist in the database.

Category:
Programmatic

Cause:
A data service references a column that does not exist

Action:
Fix the data service reference or make sure that the column exists

ODI-15093
Unable to regenerate this scenario. It references a null package.

Category:
Programmatic

Cause:
The scenario must reference a package, but the package is null.

Action:
Delete the scenario and create a new one.

ODI-15094
You must give a name for the published entity for each datastore.

Category:
Other

Cause:
A web services data store does not have a name.

Action:
Give the data store a name.

ODI-15095
Invalid entity for datastore: {0}

Category:
Other

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
A web services data store has an invalid entity.

Action:
Associate the data store with a valid entity.

ODI-15096
Property name must not be null.

Category:
Programmatic

Cause:
The KM line is calling "isColAttrChanged", but the property value is null.

Action:
Internal error, contact Oracle support.

ODI-15097
Unknown value {0} for property

Category:
Programmatic

Cause:
The KM line is making a templated call, but the property value is unknown.

Action:
Fix the KM.

ODI-15098
You must define a data source for the model.

Category:
Other

Cause:
The model used by a web service does not have any data source.

Action:
Define a data source for the model.

ODI-15099
You must specify a JKM for the model.

Category:
Other

Cause:
The model used by a web service does not have an associated JKM.

Action:
Define a JKM for the model.

ODI-15100
You must define a Java package for the model.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
The model used by a web service does not have an associated Java package.

Action:
Define a Java package for the model.

ODI-15101
Invalid Java package format: {0}

Category:
Other

Cause:
The Java package associated with a model has an invalid package format.

Action:
Correct the package format for the model.

ODI-15102
You must specify an XML namespace for the model.

Category:
Other

Cause:

Action:

ODI-15103
Invalid namespace: {0}

Category:
Other

Cause:
A model namespace used by a web service is invalid.

Action:
Correct the namespace for the model.

ODI-15104
You must specify an SKM for the model.

Category:
Other

Cause:
A model used by a web service does not have an associated SKM.

Action:
Add an SKM to the model.

ODI-15105
You must specify which schema the model will be deployed to.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Other

Cause:
No web service deployment schema is specified for the model.

Action:
Specify a schema to which the model will be deployed.

ODI-15106
You must specify a name for the Data Service for the model.

Category:
Other

Cause:
The data service for the model does not have a name.

Action:
Set a valid name for the data service.

ODI-15107
Invalid model code: {0}. It should follow the Java identifiers naming conventions.

Category:
Other

Cause:
The web service model name does not follow the standard Java identifier naming convention.

Action:
Set a valid name for the model.

ODI-15108
Invalid model Data Service name: {0}. It should follow the Java identifiers naming conventions.

Category:
Other

Cause:
The web service model Data Service name does not follow the standard Java identifier naming convention.

Action:
Set a valid name for the model Data Service.

ODI-15109
Invalid web service name for datastore: {0}

Category:
Other

Cause:
The web service model data store has an invalid name.

Action:
Set a valid name for the model data store.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-15110
SKM is empty

Category:
Other

Cause:
The web service SKM has no valid lines.

Action:
Add some lines to the SKM.

ODI-15111
Problem during deployment

Category:
Deployment

Cause:
Internal error.

Action:
Contact Oracle support.

ODI-15113
Reverse table {0} for model {1} already exists.

Category:
Other

Cause:
An attempt was made to reverse engineer a table, but it already exists in the model.

Action:
Move or rename the data store in the model, or skip reverse engineering for the table.

ODI-15116
There is not enough data in the target file to proceed with the reverse-engineering. Please make sure the file has at least one non-empty line and number of rows to skip is correct.

Category:
Other

Cause:
An attempt was made to reverse engineer a target file that is empty, or the number of skipped rows is larger than the number of rows in the file.

Action:
Set the number of skipped lines to a lower value, or add some data to the file.

ODI-15117
Not allowed (OLD and NEW are involved)

Category:
Programmatic

Cause:
The KM line is calling "getColumn", but the ADH action origin is not "NEW" or "OLD".

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Change the ADH action origin.

ODI-15118
Invalid FTP URL

Category:
Network

Cause:
The URL given for a web services FTP connection is not correct.

Action:
Check the URL for the FTP connection.

ODI-15119
Column {0} has no Java datatype.

Category:
Programmatic

Cause:
During RDB model validation, no java data type was found for a column.

Action:
Check the model and ensure that a data type has been specified.

ODI-15120
Column {0} has no String datatype.

Category:
Programmatic

Cause:
During RDB model validation, no string data type was found for a column.

Action:
Check the model and ensure that a data type has been specified.

ODI-15121
Selector must be not null

Category:
Programmatic

Cause:
The ADH selector value must not be null when "getColumn" is called from the KM line.

Action:
Change the ADH selector value.

ODI-15122
Exception getPKColList

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
An exception was found when calling "getPKColList" during KM execution.

Action:
Fix the KM or the PK definitions.

ODI-15123
There is no AK constraint

Category:
Programmatic

Cause:
There is a call to "getAK" in the KM, but no AK is found.

Action:
Check the KM and the AK definitions.

ODI-15124
Unable to regenerate the following scenario:

Category:
Programmatic

Cause:
Cannot regenerate the scenario.

Action:
Delete the scenario and create a new one.

ODI-15125
Missing DataSet.

Category:
Programmatic

Cause:
The interface is missing a dataset.

Action:
Check interface for consistency.

ODI-15126
The sub-model must be set.

Category:
Programmatic

Cause:
The sub-model is not set for the source or target.

Action:
Check the interface for consistency.

ODI-15127
There is no CK constraint

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
There is a call to "getCK" in the KM, but no CK is found.

Action:
Check the KM and the CK definitions.

ODI-15128
There is no FK constraint

Category:
Programmatic

Cause:
There is a call to "getFK" in the KM, but no FK is found.

Action:
Check the KM and the FK definitions.

ODI-15129
Selector value must be 'OLD' or 'NEW'

Category:
Programmatic

Cause:
The ADH selector value must be 'OLD' or 'NEW' when "getColumn" is called from the KM line.

Action:
Change the ADH selector value.

ODI-15130
Unknown object in interface source table list

Category:
Programmatic

Cause:
An invalid object was found in the SrcTableList member while processing getSrcTablesList.

Action:
Ensure the SrcTableList is only populated with type SnpTable or SnpSourceTab.

ODI-15131
You must define the name of each web service to be generated for each datastore.

Category:
Other

Cause:
A web service associated with a data store has no name.

Action:
Give a name to the web service.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-15132
Exception getPK

Category:
Programmatic

Cause:
An exception was found when calling "getPK" during KM execution.

Action:
Fix the KM or the PK definitions.

ODI-15135
There is no current index.

Category:
Other

Cause:
The current index can not be found for the property name.

Action:
Check the reference.

ODI-15141
Repository is not a development work repository

Category:
Programmatic

Cause:
When getting a connection used to execute the KM, it was determined that the provided connection information does not point to a development work repository

Action:
Fix the connection information

ODI-15142
[PROPERTY: {0} not found.]

Category:
Programmatic

Cause:
The bracketed property in the KM line (e.g. "[COL_NAME]") is not found.

Action:
Fix the KM line to specify a correct property name.

ODI-15143
Invalid isolation level : {0}

Category:
Programmatic

Cause:
An invalid isolation level value was passed to SnpServiceGenerator.convertIsolationLevel

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Contact Oracle support

ODI-15144
KM not encrypted since it is empty.

Category:
Other

Cause:
KM was not encrypted since it is empty.

Action:
Skip encryption.

ODI-15146
Data Type can't be null

Category:
Programmatic

Cause:
null DataType passed.

Action:
Pass non null DataType.

ODI-15147
The changes on this target column will be lost since it is not saved (it has no mapping text)

Category:
Interface Issue

Cause:
Target column will not be saved.

Action:
Enter mapping text if the column requires to be saved.

ODI-15148
The target datastore is not on the Oracle Technology: this interface cannot be used with the platform compiler

Category:
Interface Issue

Cause:
Target datastore is not on Oracle.

Action:
Move target datastore to an Oracle schema.

ODI-15149
The staging area is not on the Oracle Technology: this interface cannot be used with the platform compiler

Category:
Interface Issue

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Staging Area is not on Oracle.

Action:
Move Staging Area to an Oracle schema.

ODI-15150
The source datastore is not on the Oracle Technology: this interface cannot be used with the platform compiler

Category:
Interface Issue

Cause:
Source DataStore not on Oracle.

Action:
Use only DataStores located on an Oracle technology.

ODI-15151
Non ordered outer joins cannot be used with the platform compiler

Category:
Interface Issue

Cause:
An outer join is not ordered.

Action:
Make the join ordered.

ODI-15152
Unhandled Action {0}

Category:
Programmatic

Cause:
This shouldn't happen. Programmer added an action in the enum and forgot to add it in switch.

Action:
Add action in switch.

ODI-15153
The column is already the first column and cannot be moved up

Category:
Programmatic

Cause:
Column already first and cannot be moved up.

Action:
Do not try to move first column up.

ODI-15154
The column is already the last column and cannot be moved down

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
Column already last and cannot be moved down.

Action:
Do not try to move last column down.

ODI-15155
Cannot move a target column to a position that is 0 or negative: {0}

Category:
Programmatic

Cause:
Trying to move a column beyond the boundaries of column positions.

Action:
Use a value between 1 and the number of columns.

ODI-15156
Cannot move a target column to a position beyond the size of the column list: {0} is greater than {1}

Category:
Programmatic

Cause:
Trying to move a column beyond the boundaries of column positions.

Action:
Use a value between 1 and the number of columns.

ODI-15157
Cannot remove the only dataset of interface {0}

Category:
Programmatic

Cause:
Trying to remove the last dataset of an interface is not permitted.

Action:
Make sure there are more than one dataset in the interface before deleting it.

ODI-15159
Cannot move target columns on a non temporary DataStore.

Category:
Programmatic

Cause:
Trying to move columns on a non temporary DataStore.

Action:
Make sure that the target DataStore is temporary before attempting to move target columns.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-15160
Native Sequences may not be supported by the target technology after transforming with the Platform Compiler

Category:
Programmatic

Cause:
Using Native Sequence and Platform Compiler Enabled User Param Set

Action:
Make sure that all target technologies will support native sequences

ODI-15162
The interface {0} use native sequence. Native sequence are not allowed for Derived Table (sub select statement)

Category:
Programmatic

Cause:
Using native sequence in derived sub interface

Action:
Make sure that none sub interface using native sequence

ODI-15200
Tried to retrieve an int with an {0} object

Category:
Programmatic

Cause:
Attempted to read the column from RDB as an integer, but the column type is not integer

Action:
Internal Error: contact Oracle support

ODI-15201
Tried to retrieve a short with an {0} object

Category:
Programmatic

Cause:
Attempted to read the column from RDB as a short type, but the column type is not short

Action:
Internal Error: contact Oracle support

ODI-15202
This resultset accepts only FETCHFORWARD requests

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
Attempted to set the fetch direction to something other than FETCH_FORWARD for a RDB result set read

Action:
Internal Error: contact Oracle support

ODI-15203
This function is unsupported: the software you are using might not be compatible with this driver.

Category:
Programmatic

Cause:
A jdbc call was made that is not supported by the currently loaded jdbc driver for RDB

Action:
Internal Error: contact Oracle support

ODI-15204
The {0} call is not implemented in this result set class.

Category:
Programmatic

Cause:
A result set call was made that is not implemented by the ODI RDB result set class

Action:
Internal Error: contact Oracle support

ODI-15205
The call is not supported in this result set class.

Category:
Programmatic

Cause:
A result set call was made that is not supported by the ODI RDB result set class

Action:
Internal Error: contact Oracle support

ODI-15206
Unmanaged numeric type {0}

Category:
Programmatic

Cause:
The RDB inserter class was passed a data value of a numeric type that is not handled

Action:
Internal Error: contact Oracle support

ODI-15207
Strange: a PK has multiple lines

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
When selecting a parent row based on a primary key, multiple rows were returned

Action:
Internal Error: contact Oracle support

ODI-15208
The PK column of the root table has an unknown type: {0}

Category:
Programmatic

Cause:
When unloading data from the RDB, the PK column of the parent table has an unknown type

Action:
Internal Error: contact Oracle support

ODI-15209
Unsupported technology (Driver: {0}, Url: {1})

Category:
Programmatic

Cause:
The jdbc driver is not supported by the ODI RDB

Action:
Internal Error: contact Oracle support

ODI-15210
Unsupported technology: HSQL cannot create FKs after the tables have been created

Category:
Programmatic

Cause:
The Hypersonic SQL engine cannot create FK after the table is already created

Action:
Internal Error: contact Oracle support

ODI-15211
Unsupported technology: HSQL cannot create PKs after the tables have been created

Category:
Programmatic

Cause:
The Hypersonic SQL engine cannot create PK after the table is already created

Action:
Internal Error: contact Oracle support

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-15212
Datatype NULL (0) unsupported

Category:
Programmatic

Cause:
The Hypersonic SQL engine does not support the null datatype

Action:
Internal Error: contact Oracle support

ODI-15213
JDBC Datatype '{0}' unsupported

Category:
Programmatic

Cause:
The Hypersonic SQL engine does not support the datatype

Action:
Internal Error: contact Oracle support

ODI-15214
JDBC Datatype '{0}' with length parameter unsupported

Category:
Programmatic

Cause:
The Hypersonic SQL engine does not support the datatype with length

Action:
Internal Error: contact Oracle support

ODI-15215
JDBC Datatype '{0}' with length and scale parameters unsupported

Category:
Programmatic

Cause:
The Hypersonic SQL engine does not support the datatype with scale

Action:

Category:
Programmatic

Cause:
Transactions are not supported on Oozie Engine.

Action:
Please refer to documentation on Oozie Engine Execution.

ODI-15500
Column {0} is executed on the target

Category:
Programmatic

Cause:
Possible Cause

Action:
Suggested Action

ODI-15501
Cannot attach a data store to a target mapping because column {0} is not found.

Category:
Programmatic

Cause:
The specified target column was not found.

Action:
Verify that the correct column has been specified.

ODI-15502
Target mapping not found for column {0}

Category:
Programmatic

Cause:
The specified column is not mapped.

Action:
Map the specified column.

ODI-15503
Cannot set the attached datastore because the mapping is not executed on the SOURCE

Category:
Programmatic

Cause:
The mapping has been configured for execution on the target.

Action:
Configure the mapping for execution on the source.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-15504
Unknown indicator type: {0}

Category:
Programmatic

Cause:
An invalid indicator type has been specified.

Action:
Specify one of the following indicator types from the IndicatorType enumeration: CHECK_NOT_NULL, INSERT, UPDATE, or UPDATE_KEY.

ODI-15505
Invalid UD number: {0}

Category:
Programmatic

Cause:
An invalid UD number has been specified.

Action:
Specify a UD number 1 to 10.

ODI-15506
The specified target column was not found: {0}

Category:
Programmatic

Cause:
The specified target column was not found when attempting to remove a column from a temporary data store.

Action:
Only remove columns which exist in the temporary target datastore.

ODI-15507
Column {0} may not be removed. It is used in other mappings, join clauses, or filter clauses

Category:
Programmatic

Cause:
The specified target column is used in other mappings, filters, or joins. This dependency prevents removal of the column.

Action:
Only remove a column after mapping, filter, or join dependencies have been removed.

ODI-15508
Column {0} may not be removed because it is referenced in interface {1}.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The specified target column is referenced in a filter or join clause in another interface. This dependency prevents removal of the column.

Action:
Only remove a column after other references have been removed.

ODI-15509
The specified target column was not found: {0}

Category:
Programmatic

Cause:
The specified target column was not found.

Action:
Verify the column name.

ODI-15510
A column was not found while updating the key

Category:
Programmatic

Cause:
The update key contains a column that does not exist.

Action:
Check the columns of the update key.

ODI-15511
The join must be attached to the datastore to expand a lookup.

Category:
Programmatic

Cause:
The join is not attached to a datastore, so a valid lookup does not exist.

Action:
Only use the lookup expansion, with a pCreateLookup parameter value of false, on valid lookups.

ODI-15512
Cannot transform a normal datastore into a normal lookup.

Category:
Programmatic

Cause:
The data store is already a non-lookup data store.

Action:
Do not use this transformation on a non-lookup data store. If the datastore and join are non-lookup, use a pCreateLookup parameter value of true to create a lookup from a normal join and normal datastore.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-15513
Cannot transform a normal, non-lookup join into a normal join.

Category:
Programmatic

Cause:
The join is already a normal join, not a lookup join, so expansion to a normal, non-lookup join is not possible.

Action:
Do not use this transformation on a normal join. If the datastore and join are non-lookup, use a pCreateLookup parameter value of true to create a lookup from a normal join and normal datastore.

ODI-15514
Cannot transform a lookup datastore into a lookup.

Category:
Programmatic

Cause:
The data store is already designated as a lookup, so transforming to a lookup is not possible.

Action:
Do not use this transformation on a lookup. If the datastore and join are designated for lookup, use a pCreateLookup parameter value of false to expand a lookup to a normal join and normal datastore.

ODI-15515
Cannot transform a lookup join into a lookup.

Category:
Programmatic

Cause:
The join is already designated as a lookup, so transforming to a lookup is not possible.

Action:
Do not use this transformation on a lookup. If the datastore and join are designated for lookup, use a pCreateLookup parameter value of false to expand a lookup to a normal join and normal datastore.

ODI-15516
The join must be attached to the datastore to make a lookup.

Category:
Programmatic

Cause:
The join is not properly attached to data sources, so transforming to a lookup is not possible.

Action:
Designate data sources for the join.

ODI-15517
Cannot add a column with the same name as an existing target column: {0}.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
The column being added already exists.

Action:
Add a column with a unique name.

ODI-15518
A dataset is already assigned the order: {0}.

Category:
Programmatic

Cause:
Another dataset has already been assigned the order that is being set.

Action:
Assign a unique order to the dataset.

ODI-15519
The target datastore cannot be changed. Interface {0} is used in interface(s) {1} as a source datastore.

Category:
Programmatic

Cause:
The interface is used as a source datastore of another interface, so the target datastore cannot be changed.

Action:
Create a separate interface to avoid the source datastore dependency in the other interface.

ODI-15520
Temporary interface from another project is not allowed.

Category:
Programmatic

Cause:
The interface is used as a source datastore of another interface, so the target datastore cannot be changed.

Action:
Create a separate interface to avoid the source datastore dependency in the other interface.

ODI-15521
A source datastore with alias {0} already exists.

Category:
Programmatic

Cause:
The datastore alias has already been used.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Specify a unique alias.

ODI-15522
Cannot transform a join into a CrossJoin or natural join if it does not have both attached datastores set.

Category:
Programmatic

Cause:
The join does not have datastores attached yet.

Action:
Attach both join datastores before transforming to a cross join.

ODI-15523
LKM {0} not accepted for source set {1}

Category:
Programmatic

Cause:
The LKM is not compatible with the source set technology or multi-connection setting.

Action:
Select an LKM which matches the source set technology and multi-connection setting.

ODI-15524
LKM {0} not accepted for staging area to target

Category:
Programmatic

Cause:
The LKM is not compatible with the staging area technology or multi-connection setting.

Action:
Select an LKM which matches the staging technology and multi-connection setting.

ODI-15525
CKM {0} not accepted for target technology

Category:
Programmatic

Cause:
The CKM is not compatible with the target technology.

Action:
Select a CKM which matches the target technology.

ODI-15526
IKM {0} not accepted for staging and target technology

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The IKM is not compatible with the staging or target technologies or multi-connection setting.

Action:
Select an IKM which matches the staging and target technologies and multi-connection setting.

ODI-15527
IKM {0} not accepted for target technology

Category:
Programmatic

Cause:
The IKM is not compatible with the target technology or multi-connection setting.

Action:
Select an IKM which matches the target technology and multi-connection setting.

ODI-15528
Mapping expression cannot be set because the target column {0} was not found.

Category:
Programmatic

Cause:
The column was not found when setting the expression for a mapping.

Action:
Specify a valid column for the expression.

ODI-15529
Action was not reversible.

Category:
Programmatic

Cause:
The actions causing an impact are not reversible.

Action:
Avoid the sequence of actions causing the impact.

ODI-15530
The interface does not have a source set.

Category:
Programmatic

Cause:
The interface does not have a source set.

Action:
Add a source set to the interface.

ODI-15531
The execution location parameter for the computeExpression method is invalid.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
The execution location parameter for the computeExpression method is invalid.

Action:
Specify an execution location parameter of ExecutionLocation.SOURCE, ExecutionLocation.WORK, or ExecutionLocation.TARGET.

ODI-15532
The pExecutableTextHolder parameter for the getLogicalSchemaForTextHolder method does not have a valid execution location.

Category:
Programmatic

Cause:
The pExecutableTextHolder parameter for the getLogicalSchemaForTextHolder method does not have a valid execution location.

Action:
Specify an execution location parameter of ExecutionLocation.SOURCE, ExecutionLocation.WORK, or ExecutionLocation.TARGET.

ODI-15533
The physical schema could not be mapped from logical schema {0} and context {1}.

Category:
Programmatic

Cause:
The getPhysicalSchema method failed to map and logical schema and context to a physical schema.

Action:
Ensure that logical to physical schema mappings are created or check the logical schema and context parameters.

ODI-15534
Sub interface must not be null.

Category:
Programmatic

Cause:
The pSubInterface parameter passed to the checkSubInterfaceValid method is null.

Action:
A non-null sub interface parameter is required for the checkSubInterfaceValid method.

ODI-15535
The technology {0} of the source temporary interface {1} used as a derived table does not support derived tables.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The pSubInterface parameter passed to the checkSubInterfaceValid method is null.

Action:
A non-null sub interface parameter is required for the checkSubInterfaceValid method.

ODI-15536
Source temporary interface {0} cannot be used as a derived table. Its source datastore {1} defined in logical schema {2} has no associated physical schema in the optimization context {3}.

Category:
Programmatic

Cause:
The temporary interface cannot be used because a physical schema has not been mapped to the logical schema for the source.

Action:
Create a mapping between the logical schema, context, and physical schema for the source data store.

ODI-15537
Source temporary interface {0} cannot be used as a derived table. The logical schema of the target datastore {1} has no associated physical schema in context {2}.

Category:
Programmatic

Cause:
The temporary interface cannot be used because a physical schema has not been mapped to the logical schema for the target.

Action:
Create a mapping between the logical schema, context, and physical schema for the target data store.

ODI-15538
Source temporary interface {0} cannot be used as a derived table. The logical schema of the staging area {1} has no associated physical schema in the optimization context {2}.

Category:
Programmatic

Cause:
The temporary interface cannot be used because a physical schema has not been mapped to the logical schema for the staging area.

Action:
Create a mapping between the logical schema, context, and physical schema.

ODI-15539
Source temporary interface {0} cannot be used as a derived table. Source datastore {1} is not on the same data server as the target.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The temporary interface cannot be used because the source data store is not on the same data server as the target.

Action:
Ensure that the source and target datastores are on the same data server.

ODI-15540
Source temporary interface {0} cannot be used as a derived table. Staging area and target datastores are not in the same data server. You may have forced the target context to a different context than the optimization context.

Category:
Programmatic

Cause:
The temporary interface cannot be used because the staging data store is not on the same data server as the target.

Action:
Ensure that the staging and target datastores are on the same data server.

ODI-15541
Source temporary interface {0} uses a journalized datastore and cannot be used as a derived table.

Category:
Programmatic

Cause:
The temporary interface cannot be used because it uses a journalized datastore.

Action:
Use only non journalized data stores in temporary interfaces.

ODI-15542
Source temporary interface {0} cannot be used as a derived table. All source datastores of this interface should be in the same data server as the target and should not be journalized.

Category:
Programmatic

Cause:
The temporary interface cannot be used because it uses a journalized datastore.

Action:
Use only non journalized data stores in temporary interfaces.

ODI-15543
Another interface with the same name already exists in this folder. Please choose a unique interface name.

Category:
Programmatic

Cause:
Another interface with the same name already exists in this folder.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Specify a unique interface name.

ODI-15544
The interface must have a name.

Category:
Programmatic

Cause:
The interface does not have a name.

Action:
Specify a unique interface name.

ODI-15545
Temporary target datastore has no name.

Category:
Programmatic

Cause:
The temporary target datastore has no name

Action:
Specify a unique datastore name.

ODI-15546
The interface must have a logical schema.

Category:
Programmatic

Cause:
The interface does not have a logical schema.

Action:
Specify a logical schema for the interface.

ODI-15547
Could not fix a missing reference correctly.

Category:
Programmatic

Cause:
The interface is missing one or more references.

Action:
Recheck target expressions for proper source references.

ODI-15548
The source datastore has already been set.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
The source datastore has already been set.

Action:
Only invoke setSourceDataStore once.

ODI-15549
Cannot set the source filter because the source datastore is not set.

Category:
Programmatic

Cause:
The source datastore has not been set prior to setting the filter.

Action:
Set the source datastore prior to setting the filter.

ODI-15550
The target datastore has already been set.

Category:
Programmatic

Cause:
The source datastore has already been set.

Action:
Only invoke setSourceDataStore once.

ODI-15552
A source filter requires a source datastore.

Category:
Programmatic

Cause:
The interface cannot be saved because it contains a filter without a source datastore.

Action:
Create a source datastore before creating a source filter.

ODI-15553
The target datastore must be set.

Category:
Programmatic

Cause:
The target datastore for the interface has not been set.

Action:
Set the target datastore before saving the interface.

ODI-15554
An LKM must be set on the source set.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
A loading knowledge module has not been assigned to the source set.

Action:
Set the LKM for the source set before saving the interface.

ODI-15555
Target IKM must be set on the target table.

Category:
Programmatic

Cause:
An integration knowledge module has not been assigned to the target table.

Action:
Set the IKM for the target before saving the interface.

ODI-15556
Unknown generic clause type: {0}

Category:
Programmatic

Cause:
An unknown generic clause class was passed to the createSnpPopClauseFromGenericClause method.

Action:
Pass only generic clause classes for join or filter.

ODI-15557
Unknown execution location type: {0}

Category:
Programmatic

Cause:
An unknown execution location enumeration was passed to the getStringExeDbFromExecutionLocation method.

Action:
Pass only location enumerations of ExecutionLocation.SOURCE, ExecutionLocation.WORK, ExecutionLocation.TARGET.

ODI-15558
There is a conflict between physical schemas

Category:
Programmatic

Cause:
There is a conflict between the various physical schemas used to obtain the data, such as multiple data stores in the same source set connected using different physical schemas.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
Ensure that physical schemas of a source set have consistent connection information.

ODI-15559
Unsupported component: {0}

Category:
Programmatic

Cause:
An unsupported component was passed as a parameter to createDataAccessinfo.

Action:
For the pInterfaceSubComponents parameter, supported components are SourceDataStore, ISourceColumn, TargetMapping, and GenericClause.

ODI-15560
Fatal interface condition: {0}

Category:
Programmatic

Cause:
A fatal issue was discovered while saving or verifying an interface.

Action:
Correct the interface issue before saving it.

ODI-15561
Could not find column {0} which choosing a mapping.

Category:
Programmatic

Cause:
The MappingChooserFirst.chooseMapping method was called with an column name that does not exist.

Action:
Check the column name passed to chooseMapping.

ODI-15562
Source sets cannot be computed because one execution area doesn't have a physical schema. Check the errors on the interface.

Category:
Programmatic

Cause:
Source sets cannot be computed because one execution area doesn't have a physical schema.

Action:
Check the errors on the interface.

ODI-15563
Source sets cannot be computed because the staging area is not properly defined. Check your target datastore and the staging area's physical schema in the Definition tab.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
Source sets cannot be computed because the staging area is not properly defined.

Action:
Check your target datastore and the staging area's physical schema in the Definition tab.

ODI-15564
There should be one source set on the interface.

Category:
Programmatic

Cause:
The interface has more than one source set.

Action:
Ensure that only one source set is defined.

ODI-15565
Column {0} not found while setting the update key.

Category:
Programmatic

Cause:
A column specified for the update key does not exist.

Action:
Recheck the column names used to define the update key.

ODI-15566
No target column was found while setting the target data store.

Category:
Programmatic

Cause:
No target column was found while setting the target data store.

Action:
Define columns before setting the target datastore.

ODI-15567
Target column {0} was not found.

Category:
Programmatic

Cause:
No specified target column was not found in the target data store.

Action:
Check the column name parameter in the RealBasicInterfaceCreationHelper.getTargetColumn method call.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-15568
Column {0} not found on datastore {1}.

Category:
Programmatic

Cause:
A referenced column was not found in a source data store.

Action:
Check the source datastore columns and references for a mismatch.

ODI-15570
Cannot add a datastore of type {0} as source.

Category:
Programmatic

Cause:
An invalid datastore type has been specified.

Action:
Specify a datastore of type TargetDataStore, SourceDataStore, or OdiDataStore.

ODI-15571
Unexpected join type {0}

Category:
Programmatic

Cause:
An invalid join type has been specified when setting join properties.

Action:
Specify a join type of INNER, CROSS, or NATURAL.

ODI-15572
Unexpected join state.

Category:
Programmatic

Cause:
An invalid join state has been reached. The expected join type is CROSS or NATURAL.

Action:
Review the error details for further information.v

ODI-15573
Failed to create an interface helper instance.

Category:
Programmatic

Cause:
A general exception was encountered while constructing an interface helper.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Action:
This is an internal error with no recommended user action.

ODI-15574
General exception encountered in the interface helper while preparing to persist.

Category:
Programmatic

Cause:
General exception encountered in the interface helper while preparing to persist.

Action:
This is an internal error with no recommended user action.

ODI-15575
Two journalized datastores have been found. There should be only one.

Category:
Programmatic

Cause:
Two journalized datastores have been found. There should be only one.

Action:
Remove jounalizing from one or more datastores.

ODI-15576
Two journalized filters have been found. There should be only one.

Category:
Programmatic

Cause:
Two journalized filters have been found. There should be only one.

Action:
Remove jounalizing from one or more datastores.

ODI-15577
Unmanaged type: {0}

Category:
Programmatic

Cause:
An invalid element type was passed to the prepareSQLStatement method.

Action:
Pass only valid element types such as GenericClause, SourceDataStore, TargetDataStore, ISourceColumn, TargetMapping, SourceSet, DataSet, or TargetColumn.

ODI-15578
No interface was found in the elements.

Category:
Programmatic

Copyright © 2000, 2026, Oracle and/or its affiliates.

Cause:
No interface could be traced to the elements passed to the prepareSQLStatement method.

Action:
Create an interface.

ODI-15579
No dataset was found in the elements.

Category:
Programmatic

Cause:
No data set could be traced to the elements passed to the prepareSQLStatement method.

Action:
Ensure that a dataset has been created first.

ODI-15580
The target is a temporary table.

Category:
Programmatic

Cause:
The target datastore is a temporary target.

Action:
Use a non-temporary target.

ODI-15581
Cannot build the query because the ordered joins are not correct.

Category:
Programmatic

Cause:
The SQL clause cannot be generated because the ordered joins are not correct.

Action:
Ensure that all joins are correct.

ODI-15582
This operation is not supported on joined file datastores.

Category:
Programmatic

Cause:
Multiple source datastores were found.

Action:
Use only a single source datastore.

ODI-15583
This operation is not supported on multiple file datastores.

Copyright © 2000, 2026, Oracle and/or its affiliates.

Category:
Programmatic

Cause:
More than one source datastore was found.

Action:
Use only a single source datastore.

ODI-15584
Elements are from different interfaces.

Category:
Programmatic

Cause:
The components passed to prepareSQLStatement are from different interfaces.

Action:
Only pass components from the same interface when preparing an SQL statement.

ODI-15585
Elements are from different datasets.

Category:
Programmatic

Cause:
The components passed to prepareSQLStatement are from different data sets.

Action:
Only pass components from the same data set when preparing an SQL statement.

ODI-15586
Unsupported component: {0}

Category:
Programmatic

Cause:
An invalid component type was passed to connectionForData.

Action:
Only pass components of type SourceDataStore, ISourceColumn, TargetMapping, TargetColumn, GenericClause, or TargetDataStore.

ODI-15587
Journalization filter not found for the journalized table.

Category:
Programmatic

Cause:
The journalized table does not have a filter.

Action:
Define a journalizing filter for the table.

Copyright © 2000, 2026, Oracle and/or its affiliates.

ODI-15588
The SQL join clause is not valid for a cross join.

Category:
Programmatic

Cause:
