## Install the Hardware

For detailed information, see the *Oracle ZFS Storage Appliance Installation Guide* available from <https://docs.oracle.com/en/storage>.

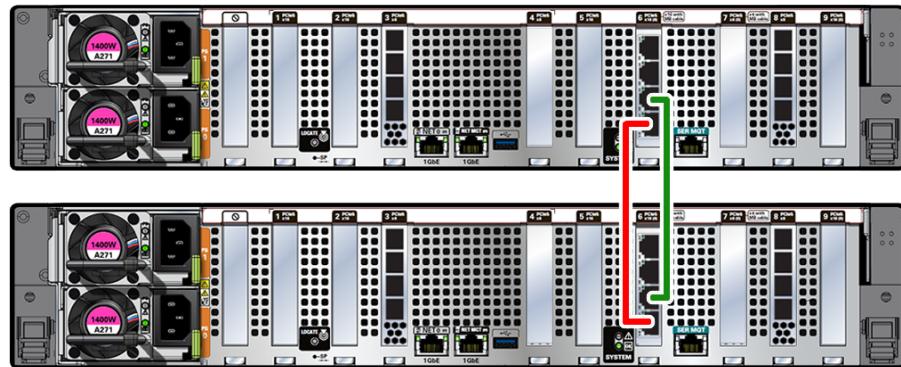

## Connect System Cables

For detailed information, see the *Oracle ZFS Storage Appliance Installation Guide* available from <https://docs.oracle.com/en/storage>. If you have clustered controllers, connect the cables to both controllers. Do not connect power cables to the controllers or disk shelves until instructed to do so in "Power On and Configure the System."

## Connect Clustered Controllers

If you have clustered controllers, connect the two controllers together. For detailed information, see the *Oracle ZFS Storage Appliance Cabling Guide* available from <https://docs.oracle.com/en/storage>.

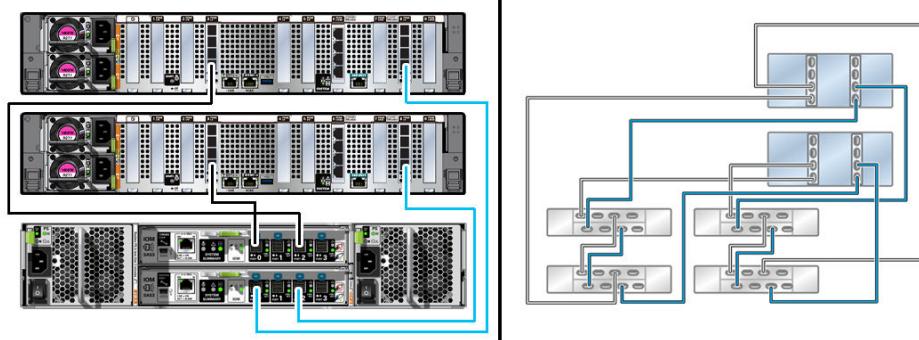

## Connect Disk Shelves

The following illustration shows clustered controllers connected to an Oracle Storage Drive Enclosure DE3-24P (left panel), and connected to four Oracle Storage Drive Enclosure DE3-24x disk shelves (right panel). For additional configuration options, see *Oracle ZFS Storage Appliance Cabling Guide* available from <https://docs.oracle.com/en/storage>. Do not connect power cables to disk shelves or controllers until instructed to do so in "Power On and Configure the System."

**⚠ Caution:**

Use **active optical cables (AOCs)** to connect Oracle ZFS Storage ZS11-2 external SAS-3 HBAs to Oracle Storage Drive Enclosure DE3-24x and DE3-12C disk shelves. Use copper cables to connect disk shelves to each other.

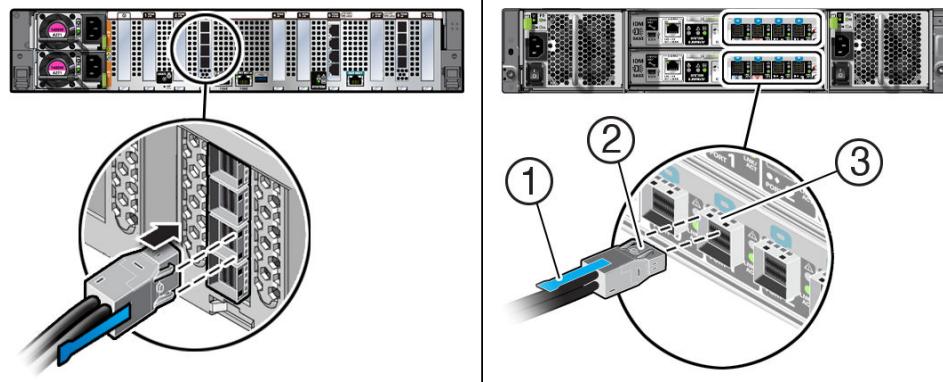

**⚠ Caution:**

Attaching a SAS cable in the wrong orientation at the controller HBA or the disk shelf I/O Module damages the port connector, and the system will not function properly.

The following procedure connects an AOC cable to the controller and to an Oracle Storage Drive Enclosure DE3-24P disk shelf. For additional information, see *Oracle ZFS Storage Appliance Cabling Guide* available from <https://docs.oracle.com/en/storage>.

1. Facing the controller HBA, position the cable's release tab to the right (left panel) for the controller end, and to the top for the disk shelf end (#1 in right panel).
2. Insert the cable connectors into the appropriate ports, aligning the cable connector latches (#2 in right panel) with the port latch receiver holes (#3 in right panel). Ensure the latches engage with the receiver holes.

## Power On and Configure the System

Required information: Network host name and port of your serial connection, or network management port DHCP-assigned address. Connect disk shelf power cables, power on disk shelves, connect controller power cables, power on controllers, and configure the system as described in the *Oracle ZFS Storage Appliance Installation Guide* available from <https://docs.oracle.com/en/storage>.

## Perform Initial Configuration

For detailed information, see the *Oracle ZFS Storage Appliance Installation Guide* available from <https://docs.oracle.com/en/storage>, including properly configuring management interfaces and updating controller software.

## Product Documentation Library

Documentation and resources for this product and related products are available in the storage section of the Oracle Help Center, located at <https://docs.oracle.com/en/storage>.

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program web site at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

## Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.
