Action: Specify a domain which has clusters  
Level: 1  
Type: ERROR  
Impact: Installation
INST-07303: Error in validating Domain
   Cause: Specified domain cannot be used for Extend Domain configuration
   Action: Specify a domain which has at least one component not configured

   Level: 1
   Type: ERROR
   Impact: Installation

INST-07304: Validation of User Name failed. Invalid User Name
   Cause: The user name entered is not valid
   Action: Provide a valid user name

   Level: 1
   Type: ERROR
   Impact: Installation

INST-07305: Validation of password value failed. Invalid password
   Cause: The password entered is not valid
   Action: Provide a valid password

   Level: 1
   Type: ERROR
   Impact: Installation

INST-07306: Error in validating Database details. RAC Dabase is not supported
   Cause: RAC Database is not supported for {0}
   Action: {0}

   Level: 1
   Type: ERROR
   Impact: Installation

INST-07307: Error in validating Oracle home location
   Cause: Oracle home location specified is not inside Middleware home location. Provide a valid location for Oracle home.
   Action: 

   Level: 1
   Type: ERROR
   Impact: Installation

INST-07308: Oracle Universal Content Management is already installed and configured at location {0}
   Cause: Oracle Universal Content Management is already installed and configured at location {0}
   Action: Either select not to configure again or uninstall Oracle Universal Content Management and then try to reconfigure

   Level: 1
   Type: ERROR
Impact: Installation

INST-07309: Error in validating master repository details
Cause: Specified Master Repository credentials are not valid.
Action: Verify the values. Make sure the Master Database is up and running and connect string, user name, password, ODI supervisor username and ODI supervisor password are correct.

Level: 1
Type: ERROR
Impact: Installation

INST-07310: Error in validating database details
Cause: Specified connect string is not in a valid format
Action: Provide the value in the following format. Format: hostname:port:servicename

Level: 1
Type: ERROR
Impact: Installation

INST-07311: Error in validating database details
Cause: Specified connect string is not in a valid format
Action: Provide the value in the following format. Format: hostname:port:sid

Level: 1
Type: ERROR
Impact: Installation

INST-07312: Error in validating database details
Cause: Specified connect string is not in a valid format
Action: Provide the value in the following format. Format: hostname:port:servicename, For Real Application Cluster Database hostname1:port1^hostname2:port2@servicename

Level: 1
Type: ERROR
Impact: Installation

INST-07313: Error in validating database details
Cause: Specified connect string is not in a valid format
Action: Provide the value in the following format. Format: hostname:port:sid, For a Real Application Cluster Database, use hostname1:port1^hostname2:port2@servicename

Level: 1
Type: ERROR
Impact: Installation

INST-07314: Error in validating port file
Cause: Port [0] is not valid
Action: Provide a valid port number (a number between {0})

Level: 1
Type: ERROR
Impact: Installation

INST-07315: Error in validating port value
Cause: An unexpected error occurred while validating port value
Action: Provide a valid value

Level: 1
Type: ERROR
Impact: Installation

INST-07316: Error in validating port file
Cause: Port {0} is not free or not valid
Action: Ensure that the port (a number between 1024 - 65535) is free and it is not used by any other Oracle home. If ports are specified using a file, check if proper values are given for key.

Level: 1
Type: ERROR
Impact: Installation

INST-07317: Validation of {0} location failed. Directory does not exist.
Cause: Validation of {0} location failed. The location specified does not exist.
Action: Enter a valid existing directory

Level: 1
Type: ERROR
Impact: Installation

INST-07318: Validation of {0} location failed. Directory is empty.
Cause: Validation of {0} location failed. The location specified is empty.
Action: Enter a nonempty directory

Level: 1
Type: ERROR
Impact: Installation

INST-07404: Error in validating Oracle home
Cause: Specified Oracle home value is null
Action: Specify the correct Oracle home name

Level: 1
Type: ERROR
Impact: Installation

INST-07405: Error in validating Oracle home
Cause: The specified Oracle home does not match with the Domain Oracle home
- **Action**: Specify Oracle home name same as that of the Domain Oracle home
  - **Level**: 1
  - **Type**: ERROR
  - **Impact**: Installation

INST-07406: **Error in validating [0] home location**
- **Cause**: Specified [0] home location is either not valid or is empty
- **Action**: Enter a valid [0] home location
  - **Level**: 1
  - **Type**: ERROR
  - **Impact**: Installation

INST-07407: **Error in detecting machine platform or JVM bits.**
- **Cause**: Unable to detect machine platform or JVM bits.
- **Action**: Make sure machine platform and JVM are supported.
  - **Level**: 1
  - **Type**: ERROR
  - **Impact**: Installation

INST-07408: **Cannot install or configure the product on a 32-bit JVM on a 64-bit machine.**
- **Cause**: Unable to install or configure the product on a 32-bit JVM on a 64-bit machine.
- **Action**: Make sure to install and configure the product in supported modes.
  - **Level**: 1
  - **Type**: ERROR
  - **Impact**: Installation

INST-07409: **Error in validating instance name**
- **Cause**: Unexpected error in validating instance name
- **Action**: Make sure entered values are correct
  - **Level**: 1
  - **Type**: ERROR
  - **Impact**: Installation

INST-07410: **Error in validating instance name**
- **Cause**: Specified instance name is not valid, a windows service with the specified instance name already exists
- **Action**: Provide a different instance name
  - **Level**: 1
  - **Type**: ERROR
  - **Impact**: Installation

INST-07411: **Error in validating oracle home**
- **Cause**: Provide valid value for Oracle Home Directory.
Action:

Level: 1
Type: ERROR
Impact: Installation

INST-07412: Error in validating oracle home
Cause: Oracle Home Directory name cannot be oracle_common.
Action: Provide a different value for Oracle Home Directory.

Level: 1
Type: ERROR
Impact: Installation

INST-07413: Error in validating oracle home
Cause: Unexpected error in validating Oracle Home Directory
Action: Make sure entered values are correct

Level: 1
Type: ERROR
Impact: Installation

INST-07414: Error in validating [0]
Cause: Specified [0] is not valid
Action: Provide a valid value [0]

Level: 1
Type: ERROR
Impact: Installation

INST-07415: Error in validating Home Type
Cause: Home Type Specified is not Correct
Action: Provide a valid Home Type

Level: 1
Type: ERROR
Impact: Installation

INST-07416: Error in validating [0]
Cause: An unexpected error occurred while validating [0]
Action: Provide a valid value

Level: 1
Type: ERROR
Impact: Installation

INST-07417: Error in validating the [0]
Cause: [0] has not been installed in the specified [1]. Provide a different Location
Action: Provide a different [0]
Level: 1
Type: ERROR
Impact: Installation

INST-07420: Error in validating oracle home
Cause: Oracle Home Directory name cannot be {0}.
Action: Provide a different value for Oracle Home Directory.

Level: 1
Type: ERROR
Impact: Installation

INST-07421: Error in executing the software update flow
Cause: An error occurred while validating the values for software updates
Action: Make sure entered values are correct

Level: 1
Type: ERROR
Impact: Installation

INST-07422: Error in validating library
Cause: The library {0} does not exists in the provided location
Action: Make sure the library {0} exists in the provided location

Level: 1
Type: ERROR
Impact: Installation

INST-07423: Error in validating library
Cause: The library {0} does not exists in the provided location
Action: Make sure the library {0} exists in the provided location

Level: 1
Type: ERROR
Impact: Installation

INST-07424: Error in validating library
Cause: The version of library at the provided location is not as expected
Action: Make sure the version of library at the provided location is correct

Level: 1
Type: ERROR
Impact: Installation

INST-07425: Error in verifying version of Application Server
Cause: Could not access versionInfo script under the Application Server Directory provided
Action: Make sure the Application Server directory has versionInfo script under bin folder
Level: 1
Type: ERROR
Impact: Installation

INST-07426: Error in verifying version of Application Server
Cause: The version of Application Server is not valid
Action: Make sure the version of Application Server is at least [0]

Level: 1
Type: ERROR
Impact: Installation

INST-07427: Error in verifying Application Server
Cause: The Application Server Directory does not refer to WebSphere Application Server
Action: Provide the directory location of WebSphere Application Server

Level: 1
Type: ERROR
Impact: Installation

INST-07428: Error in verifying version of Application Server
Cause: The version of Application Server is not supported
Action: The Application Server version detected is [0]. Please refer to the certification document and provide an Application Server Location corresponding to a certified version of the Application Server.

Level: 1
Type: ERROR
Impact: Installation

INST-07440: Error in validating Application Server Type
Cause: Validation of Application Server Type failed. Supported Application Server Types are WLS and WAS.
Action: Specify a valid Application Server Type. Supported Application Server Types are WLS and WAS.

Level: 1
Type: ERROR
Impact: Installation

INST-07441: Error in validating Application Server Type
Cause: Validation of Application Server Type failed. Specified Application Server Type does not match with the Application Server detected in the Middleware home.
Action: Specify a valid Application Server Type.

Level: 1
Type: ERROR
Impact: Installation
INST-07509: Error in validating master repository details
  *Cause*: Specified Master Repository schema details are not valid.
  *Action*: Verify the values. Make sure the Master Database schema version is correct and master repository is created with appropriate Repository Creation Utility.
  
  *Level*: 1
  *Type*: ERROR
  *Impact*: Installation

INST-07519: {0} found in Oracle home
  *Cause*: This Oracle home already contains a version of {0}.
  *Action*: If you are updating an existing installation to the latest version, use the Install Software - Do Not Configure option on the Select Installation Type screen.
  
  *Level*: 1
  *Type*: ERROR
  *Impact*: Installation

INST-07520: Error in validating {0} home location
  *Cause*: Enter a valid value for {0} home location
  *Action:*
  
  *Level*: 1
  *Type*: ERROR
  *Impact*: Installation

INST-07521: Error in validating {0} home location
  *Cause*: Specified {0} home location does not exist
  *Action*: Provide an existing {0} home location
  
  *Level*: 1
  *Type*: ERROR
  *Impact*: Installation

INST-07522: Error in validating {0} home location
  *Cause*: Specified {0} home location does not have read/write permissions
  *Action*: Provide read/write permissions for the {0} home location
  
  *Level*: 1
  *Type*: ERROR
  *Impact*: Installation

INST-07523: Error in validating {0} home location
  *Cause*: Specified {0} home location is either not valid or empty
  *Action*: Enter a valid {0} home location
  
  *Level*: 1
  *Type*: ERROR
  *Impact*: Installation
INST-07524: Error in validating {0} home location
   Cause: Specified {0} home location is not a valid location
   Action: Enter a valid {0} home location
   Level: 1
   Type: ERROR
   Impact: Installation

INST-07525: Error in validating {0} home location
   Cause: An unexpected error occurred during the validation of {0} home location
   Action: Check the values
   Level: 1
   Type: ERROR
   Impact: Installation

INST-07526: Error in validating {0} home location
   Cause: Specified {0} home location is not a valid location
   Action: Enter a valid {0} home location
   Level: 1
   Type: ERROR
   Impact: Installation

INST-07527: Error in validating Middleware home location
   Cause: Specified Oracle Middleware home location does not have appropriate version of WebLogic server
   Action: Provide a Oracle Middleware home location which contains WebLogic server with a supported version
   Level: 1
   Type: ERROR
   Impact: Installation

INST-07528: Validation of {0} location failed. Directory does not exist.
   Cause: Validation of {0} location failed. The location specified does not exist.
   Action: Enter a valid existing directory
   Level: 1
   Type: ERROR
   Impact: Installation

INST-07529: Error in validating Farm Name
   Cause: Farm Name cannot be {0}.
   Action: Enter a different Farm Name.
   Level: 1
   Type: ERROR
   Impact: Installation
INST-07530: Patchset component found in Oracle home
Cause: This Patchset has already been applied to the Oracle home
Action: Specify an Oracle home where the patchset has not already been applied.

Level: 1
Type: ERROR
Impact: Installation

INST-07531: Error in validating contents of Oracle home
Cause: The Oracle home provided does not contain {0}.
Action: In order to patch your existing version please provide an Oracle home that contains the product mentioned above. If you choose to continue, only the oracle_common directory and any components that both products have in common will be patched.

Level: 1
Type: ERROR
Impact: Installation

INST-07532: Error in validating contents of Oracle home
Cause: The Oracle home provided does not contain {0}.
Action: In order to patch your existing version please provide an Oracle home that contains the product mentioned above. If you choose to continue, only the oracle_common directory and any components that both products have in common will be patched.

Level: 1
Type: ERROR
Impact: Installation

INST-07533: Error in validating Middleware home location
Cause: Middleware home location specified is missing.
Action: Provide a valid Middleware home location

Level: 1
Type: ERROR
Impact: Installation

INST-07534: Error in validating Oracle home location
Cause: Oracle home location specified is not inside Middleware home location. Provide a directory name only for Oracle home.
Action: Provide a different Oracle home location which is inside Middleware home.

Level: 1
Type: ERROR
Impact: Installation

INST-07535: Error in obtaining hostname
Cause: An unexpected error occurred while retrieving hostname
Action: Provide a valid value
Level: 1
Type: ERROR
Impact: Installation

INST-07536: Error in validating Oracle home location
Cause: Middleware home location specified does not have the required Oracle homes installed in it. The Oracle homes for the following components are not installed: {0}.
Action: Provide a different Middleware home location or install the required Oracle Products and try the install again.

Level: 1
Type: ERROR
Impact: Installation

INST-07537: The weblogic server processes are still running.
Cause: Unable to install while the weblogic processes are running.
Action: Make sure that the node manager and the weblogic servers are shutdown before the installation.

Level: 1
Type: ERROR
Impact: Installation

INST-07538: The OPMN processes are still running.
Cause: Unable to install while the OPMN processes are running.
Action: Make sure that opmnctl stopall is run before the installation.

Level: 1
Type: ERROR
Impact: Installation

INST-07539: {0} found in Oracle home
Cause: This Oracle home already contains a version of {0} which cannot be updated by this installation
Action: Specify either a new Oracle Home Directory or an Oracle Home which can be updated by this installer.

Level: 1
Type: ERROR
Impact: Installation

INST-07540: Error in validating Middleware home location
Cause: Patch {0} is not available in the Middleware home.
Action: Enter a valid Middleware home location

Level: 1
Type: ERROR
Impact: Installation

INST-07541: Error in validating Middleware home location
Cause: Patches [0] are not available in the Middleware home.
Action: Enter a valid Middleware home location
Level: 1
Type: ERROR
Impact: Installation

INST-08001: Validation of Middleware home location failed. Directory path invalid
Cause: Validation of Middleware home location failed. The location specified contains missing, mandatory directories
Action: Make sure that Oracle/Middleware is in the path
Level: 1
Type: ERROR
Impact: Installation

INST-08002: SSO Registration Failed.
Cause: IP Adress of this machine cannot be obtained.
Action: Check the network configuration of this machine
Level: 1
Type: ERROR
Impact: Installation

INST-08003: Internal Error: SSO Registration Failed.
Cause: There was an error while modifying the Oracle HTTP Server’s configuration file.
Action: Provide the following files to Oracle Support : “[0]” ”[1]”
Level: 1
Type: INTERNAL_ERROR
Impact: Installation

Cause: An unexpected error occurred while trying to create Web Cache component
Action: Provide the following files to Oracle Support : “[0]” ”[1]”
Level: 1
Type: INTERNAL_ERROR
Impact: Installation

Cause: An unexpected error occurred while trying to create Oracle HTTP Server component.
Action: Provide the following files to Oracle Support : “[0]” ”[1]”
Level: 1
Type: INTERNAL_ERROR
Impact: Installation
   Cause: An exception occurred while trying to start OPMN
   Action: Provide the following files to Oracle Support: "[0]""[1]"
   Level: 1
   Type: INTERNAL_ERROR
   Impact: Installation

INST-08007: Internal Error: Reload OPMN failed.
   Cause: An exception occurred while trying to reload OPMN.
   Action: Provide the following files to Oracle Support: "[0]""[1]"
   Level: 1
   Type: INTERNAL_ERROR
   Impact: Installation

INST-08008: Internal Error: Creation of ReportsServer Component failed.
   Cause: An exception occurred while creating the ReportsServer Component
   Action: Provide the following files to Oracle Support: "[0]""[1]"
   Level: 1
   Type: INTERNAL_ERROR
   Impact: Installation

   Cause: An exception occurred while creating the ReportsTools Component
   Action: Provide the following files to Oracle Support: "[0]""[1]"
   Level: 1
   Type: INTERNAL_ERROR
   Impact: Installation

INST-08010: An error occurred while registering the schema: [0] with the WebLogic Server.
   Cause: Registering Schema failed with the exception: [0]
   Action: Check if the Database: [0] is up and running.
   Level: 1
   Type: ERROR
   Impact: Installation

   Cause: An exception occurred while creating the Forms System Component
   Action: Provide the following files to Oracle Support: "[0]""[1]"
   Level: 1
   Type: INTERNAL_ERROR
   Impact: Installation

Cause: An exception occurred while creating the FRSystemComponent
Action: Provide the following files to Oracle Support: "[0]""[1]"

Level: 1
Type: INTERNAL_ERROR
Impact: Installation

Cause: An exception occurred while creating the Discoverer System Component
Action: Provide the following files to Oracle Support: "[0]""[1]"

Level: 1
Type: INTERNAL_ERROR
Impact: Installation

INST-08026: Upgrading the existing Oracle Home is not supported in "Install & Configure" Installation
Cause: "Install & Configure" Option does not support an upgrade on existing Oracle Home
Action: Select "Install Software - Do Not Configure" Option to upgrade an existing Oracle Home or Select a different Oracle Home

Level: 1
Type: ERROR
Impact: Installation

INST-08100: Error in validating component details
Cause: Selected components to upgrade do not match with the component list in existing Oracle Home
Action: The applications [0] selection status in Select Applications screen do not match the components in Oracle Home, please go back and select/deselect appropriate applications.

Level: 1
Type: ERROR
Impact: Installation

INST-08101: Error in validating component details
Cause: Error fetching input parameter
Action: Please provide correct input parameter

Level: 1
Type: ERROR
Impact: Installation

INST-10101: Error in validating [0] Base Image Location
Cause: [0] Base Image Location is null or blank.
Action: Provide a valid [0] Base Image Location

Level: 1
Type: ERROR
Impact: Installation

INST-10102: Error in validating {0} Base Image Location
Cause: The {0} Base Image Location provided is not existing or not a valid file
Action: Provide a valid {0} Base Image Location

Level: 1
Type: ERROR
Impact: Installation

INST-10103: Error in validating the {0} Base Image Location for Assembly Builder
Cause: An unexpected error occurred while validating the {0} Base Image Location for Assembly Builder
Action: Check the values

Level: 1
Type: ERROR
Impact: Installation

INST-10104: Error in validating {0} Base Image Location
Cause: The {0} Base Image File name must be {1}
Action: Provide a valid {0} Base Image Location

Level: 1
Type: ERROR
Impact: Installation

INST-10105: Error in validating {0} Base Image Virtual Machine configuration file Location
Cause: The {0} Base Image Virtual Machine configuration File (vm.cfg) is not existing
Action: The vm.cfg file must be present in same directory as the Base Image ({1}), provide a valid {0} Base Image Location

Level: 1
Type: ERROR
Impact: Installation

INST-10106: Error in validating Keystore
Cause: An unexpected error occurred while validating the {0} Keystore for Assembly Builder
Action: Check the values

Level: 1
Type: ERROR
Impact: Installation

INST-10107: The Keystore path must not be null or blank
Cause: The Keystore path must not be null or blank
Action: Provide a valid Keystore path

INST-01000 to INST-11502 47-105
Level: 1
Type: ERROR
Impact: Installation

INST-10108: The Keystore password must not be null or blank
   Cause: The Keystore password must not be null or blank
   Action: Provide a valid Keystore password

Level: 1
Type: ERROR
Impact: Installation

INST-10109: Invalid keystore.
   Cause: Failed to validate the Keystore.
   Action: Provide a valid Keystore

Level: 1
Type: ERROR
Impact: Installation

INST-10110: The Key password must not be null or blank
   Cause: The Key password must not be null or blank
   Action: Provide a valid Key password

Level: 1
Type: ERROR
Impact: Installation

INST-10111: The Key alias must not be null or blank
   Cause: The Key alias must not be null or blank
   Action: Provide a valid Key alias

Level: 1
Type: ERROR
Impact: Installation

INST-10112: Invalid key alias
   Cause: Invalid key alias and password combination.
   Action: Provide a valid Key alias and password combination

Level: 1
Type: ERROR
Impact: Installation

INST-10113: Error in validating Component Version
   Cause: Component Version is null or blank.
   Action: Provide a valid Component Version.

Level: 1
Type: ERROR
Impact: Installation

INST-10114: Error in validating Component List
  Cause: Component List is null or blank.
  Action: Provide a valid Component List.

  Level: 1
  Type: ERROR
  Impact: Installation

INST-10115: Error in validating Oracle Home
  Cause: Oracle Home is null or blank.
  Action: Provide a valid Oracle Home.

  Level: 1
  Type: ERROR
  Impact: Installation

INST-10116: Installation of Studio and Deploer detected in the selected Oracle Home. Installing into an existing Oracle Home is done to either reinstall binaries or to upgrade an Oracle Home from one release to another
  Cause: Installation of Studio and Deploer detected in the selected Oracle Home.
  Action: Installing into an existing Oracle Home is done to either reinstall binaries or to upgrade an Oracle Home from one release to another.

  Level: 1
  Type: ERROR
  Impact: Installation

INST-10117: Error in validating the installed component in {0} Oracle Home
  Cause: An unexpected error occurred while validating the installed component in {0} Oracle Home.
  Action: An unexpected error occurred while validating the installed component in {0} Oracle Home.

  Level: 1
  Type: ERROR
  Impact: Installation

INST-11502: OEPE version isn"t the correct OEPE for this version of OSB. Expected 1.8, found {0}
  Cause: OEPE version isn’t the correct OEPE for this version of OSB. Expected 1.8, found {0}
  Action: Enter a valid OEPE home location

  Level: 1
  Type: ERROR
  Impact: Installation
IRM-00001: The class \{0\} cannot be found and cannot be unmarshalled by JAXB.
  
  **Cause:** A class was specified in XML that could not be found.
  
  **Action:** Verify that the class is available and on the class path.

  **Level:** 1
  
  **Type:** WARNING
  
  **Impact:** Data

IRM-00002: The value \{0\} is not a valid UUID format and cannot be unmarshalled by JAXB.

  **Cause:** A UUID was specified in XML that could not be parsed.
  
  **Action:** Verify the format of the UUID.

  **Level:** 1
  
  **Type:** WARNING
  
  **Impact:** Data

IRM-00003: Creating a field value resulted in an exception.

  **Cause:** Creating a field value resulted in an exception.
  
  **Action:** Review the exception cause for further information.

  **Level:** 1
  
  **Type:** WARNING
  
  **Impact:** data

IRM-00501: The offline store cannot be accessed. It will be recreated.

  **Cause:** The offline store is not from this instance.
  
  **Action:** This is a notification and no action is required.

  **Level:** 16
  
  **Type:** NOTIFICATION
  
  **Impact:** data

IRM-01001: The context identified with UUID \{0\} does not exist.

  **Cause:** A context was specified that does not exist.
  
  **Action:** Ensure that the context UUID value corresponds to a context stored in the server and retry the operation.
IRM-01002: The test content identified by the name {0} does not exist.
Cause: Test content was specified that does not exist.
Action: Each piece of test content is identified by an unique name. Ensure that the provided test content name is correct.

IRM-01003: There has been an error using a cryptography algorithm.
Cause: An error was encountered while using a cryptography algorithm.
Action: Most cryptography exceptions are caused by an exception from the cryptography algorithm implementation. Refer to the exception cause to further diagnose the error. Typical examples of a cryptography exception include attempting to generate a key for a key size that is not supported, or a failure to decrypt due to corrupt data.

IRM-01004: Unknown or unsupported cryptography schema {0}.
Cause: The cryptographic schema is not known to the system.
Action: Ensure that the provided cryptographic schema identity value is supported by the system.

IRM-01005: The cryptography schema \"{0}\" is unsupported on this platform or configuration.
Cause: An operation was attempted that would have caused a mix of FIPS and non-FIPS key sets to be present in the system.
Action: When a key set is created, the cryptography schema details are recorded with the key set. The server is unable to deliver a mix of FIPS and non-FIPS key sets to the desktop. Ensure that the cryptography schema used is compatible with the cryptography schemas already in use by the system.

IRM-01006: The key set identified with UUID {0} already exists.
Cause: A key set was specified that already exists.
Action: Generate a new UUID for the key set and retry the operation.
IRM-01007: The key set identified with UUID {0} does not exist.
Cause: A key set was specified that does not exist.
Action: Ensure that the key set specified exists and retry the operation.

IRM-01008: The {0} wrapping key algorithm is not supported.
Cause: An unsupported key type was supplied for the wrapping key.
Action: Ensure that the wrapping key stored in the key store uses a supported algorithm. The supported key types are AES, DESede, and RSA.

IRM-01010: An exception occurred parsing sealed content: {0}.
Cause: Sealed content was provided that has been corrupted.
Action: Obtain a non-corrupted copy of the sealed content. The exception reason will provide more details of what part of the sealed content is corrupt.

IRM-01011: The sealing process requires non-empty content.
Cause: Content was provided for sealing that was empty.
Action: Provide non-empty data to the sealing operation.

IRM-01012: There has been an error using the key store.
Cause: An error was reported loading or accessing a key store.
Action: Examine the exception cause to diagnose the problem further. Typical reasons for this exception include the key store file not being in the configured location and incorrect passwords.

IRM-01013: The key {0} does not exist in the key store {1}. 
Cause: A key alias was provided that identified a key that does not exist in the key store.
Action: Use tools such as keytool to ensure that the contents of the key store include the key with the specified key alias.
Level: 16
Type: TRACE
Impact: Programmatic

IRM-01014: The MIME type {0} is syntactically invalid.
Cause: A MIME type was specified that is syntactically invalid.
Action: Correct the MIME type value. The MIME type should consist of a type and subtype (for example, text/plain).
Level: 16
Type: TRACE
Impact: Data

IRM-01015: Unknown content type/format.
Cause: The content format could not be determined as the content-type HTTP header was missing.
Action: Ensure the web service correctly specifies the content type in the HTTP response.
Level: 16
Type: TRACE
Impact: Programmatic

IRM-01016: Unsupported content type: {0}.
Cause: An unsupported content type was provided for sealing.
Action: None. Sealing cannot be performed on a format that is not supported.
Level: 16
Type: TRACE
Impact: Programmatic

IRM-01017: Group accounts are not supported. The group {0} cannot be used in this context.
Cause: A group account was provided to an operation that does not support the use of group accounts.
Action: Specify a user and retry the operation.
Level: 16
Type: TRACE
Impact: Programmatic

IRM-01018: An error has occurred accessing user or group information.
Cause: An internal exception occurred when accessing the user and group repository (for example LDAP).
Action: Refer to the exception cause to further diagnose the error.
Level: 1
Type: WARNING
Impact: Data

IRM-01019: The account identified by {0} is unknown.
Cause: An unknown account was specified.
Action: Correct the account UUID or name and retry the operation.

Level: 16
Type: TRACE
Impact: Data

IRM-01020: The classification is unknown to the system. The classification may have been deleted, may have never existed, or the classification details may be incorrect.
Cause: The classification is unknown to the system. The classification may have been deleted, may have never existed, or the classification details may be incorrect.
Action: Correct the classification details and retry the operation.

Level: 16
Type: TRACE
Impact: Data

IRM-01021: The classification system {0} is not supported.
Cause: A classification system was specified that the server does not support.
Action: Check with the server administrator and ensure that the classification system is supported.

Level: 16
Type: TRACE
Impact: Data

IRM-01022: The configuration setting {0} is not specified, is invalid, or cannot be read.
Cause: A required configuration setting is missing from the configuration, is invalid, or could not be read.
Action: Correct the configuration settings.

Level: 1
Type: ERROR
Impact: Configuration

IRM-01023: The desktop is repudiated.
Cause: A user’s desktop software has been repudiated and can no longer contact the server.
Action: Ensure that the client has the appropriate software installed.

Level: 16
Type: NOTIFICATION
Impact: Security
IRM-01024: The feature with id {0} is not present in the list of available features.
  Cause: A feature was specified that is not present in the list of available features.
  Action: Correct the feature id and retry the operation.

  Level: 32
  Type: TRACE
  Impact: Programmatic

IRM-01025: Licenses are available, but are on the following device(s): {0}.
  Cause: A license was requested but all licenses available were in use on other devices.
  Action: Check in licenses from the listed devices and retry opening content. If licenses must be used on multiple devices at the same time increase the server device count configuration setting.

  Level: 1
  Type: TRACE
  Impact: Other

IRM-01026: An exception occurred processing a desktop SOAP message: {0}.
  Cause: An error occurred while processing a desktop SOAP request or response message.
  Action: Review the reason property of the exception for further details. This exception typically means that a corrupt or incorrect message was sent to the server.

  Level: 1
  Type: ERROR
  Impact: Security

IRM-01027: Unsupported protocol version {0}. The required protocol version is {1}.
  Cause: A desktop protocol version was provided that the server does not support.
  Action: Use a lower protocol version and retry the request. The valid range of protocol versions will be specified in the exception details.

  Level: 16
  Type: NOTIFICATION
  Impact: Requests/Responses

IRM-01028: A new version ({0}) of the desktop is available.
  Cause: An upgrade was available for a client's desktop software.
  Action: Upgrade the desktop software on the client.

  Level: 1
  Type: TRACE
  Impact: Requests/Responses

IRM-01029: The account "{0}" has already been assigned an administrator role.
  Cause: An account could not be assigned the administrator role because it is already assigned.
  Action: No action is required.
Level: 32
Type: TRACE
Impact: Programmatic
IRM-01030: The account "{0}" has already been assigned the role "{1}".
Cause: An account could not be assigned the specified role because it is already assigned.
Action: No action is required.

Level: 16
Type: TRACE
Impact: Programmatic
IRM-01031: The account "{0}" has already been assigned an inspector role.
Cause: An account could not be assigned the inspector role because it is already assigned.
Action: No action is required.

Level: 16
Type: TRACE
Impact: Programmatic
IRM-01032: The account "{0}" has already been assigned a manager role.
Cause: An account could not be assigned the manager role because it is already assigned.
Action: No action is required.

Level: 16
Type: TRACE
Impact: Programmatic
IRM-01033: The specified accounts cannot be removed as this action would remove all administrators.
Cause: The specified accounts could not be removed because there must be at least one administrator for a Domain.
Action: Ensure that an administrator will remain following the request and then retry the operation.

Level: 16
Type: TRACE
Impact: Programmatic
IRM-01034: The context "{0}" cannot be deleted as there are rights assigned within this context.
Cause: A context could not be deleted because there are rights assigned with the context.
Action: Remove all rights assigned with the context and retry the operation.

Level: 16
Type: TRACE
**Impact:** Programmatic

**IRM-01035: The context template "{0}" cannot be deleted.**

*Cause:* A context template could not be deleted because there are context instances that refer to it.

*Action:* Remove all context instances that refer to the template and retry the operation.

*Level:* 16  
*Type:* TRACE  
*Impact:* Programmatic

**IRM-01036: The document role "{0}" cannot be deleted as there are rights assigned to this role.**

*Cause:* A document role could not be deleted because there are rights assigned to the role.

*Action:* Remove all rights assigned to the role and retry the operation.

*Level:* 16  
*Type:* TRACE  
*Impact:* Programmatic

**IRM-01037: The specified accounts cannot be removed as this action would remove all managers.**

*Cause:* An account could not be removed because there must be at least one manager for a Domain.

*Action:* Ensure that a manager will remain following the request and then retry the operation.

*Level:* 16  
*Type:* TRACE  
*Impact:* Programmatic

**IRM-01038: A context with "{0}" already exists.**

*Cause:* A context instance UUID was specified that already exists.

*Action:* Use a different context UUID.

*Level:* 16  
*Type:* TRACE  
*Impact:* Programmatic

**IRM-01039: The context template "{0}" already exists.**

*Cause:* A context template UUID was specified that already exists.

*Action:* Use a different context template UUID. A context template UUID must be unique within the same domain.

*Level:* 16  
*Type:* TRACE  
*Impact:* Programmatic

**IRM-01040: The document role "{0}" already exists.**
IRM-01041: The domain "{0}" already exists.
  Cause: A domain UUID was specified that already exists.
  Action: Use a different UUID.
  Level: 16
  Type: TRACE
  Impact: Programmatic

IRM-01042: There are no domains created in the system.
  Cause: No domains were available in the system.
  Action: Create at least one domain in the system.
  Level: 16
  Type: TRACE
  Impact: Programmatic

IRM-01043: The context template "{0}" is inactive and cannot be used to create contexts.
  Cause: An inactive context template was specified.
  Action: Activate the context template and retry the operation.
  Level: 16
  Type: TRACE
  Impact: Programmatic

IRM-01044: The role "{0}" cannot be used with template "{1}" as their domains do not match.
  Cause: An attempt was made to add a role to a template that does not belong to the same domain.
  Action: Specify a role from the same domain as the template.
  Level: 16
  Type: TRACE
  Impact: Programmatic

IRM-01045: The "{0}" role must have at least one primary feature.
  Cause: A specified document role did not have a primary feature.
  Action: Add at least one primary feature to the role.
  Level: 16
  Type: TRACE
Impact: Programmatic

IRM-01046: The "\{0\}" role must have a refresh period greater that one minute.
Cause: A document role specified an invalid time period.
Action: Provide a refresh period greater than one minute.
Level: 16
Type: TRACE
Impact: Programmatic

IRM-01047: The context template with UUID "\{0\}" on domain "\{1\}" does not exist.
Cause: An unknown context template was specified.
Action: Correct the context template UUID and retry the operation.
Level: 16
Type: TRACE
Impact: Programmatic

IRM-01048: The right with UUID "\{0\}" does not exist.
Cause: An unknown right was specified.
Action: Ensure that the UUID corresponds to a right.
Level: 16
Type: TRACE
Impact: Programmatic

IRM-01049: The document role with UUID "\{0\}" on domain "\{1\}" does not exist.
Cause: An unknown document role was specified.
Action: Ensure that the UUID corresponds to a document role.
Level: 16
Type: TRACE
Impact: Programmatic

IRM-01050: The domain with UUID "\{0\}" does not exist.
Cause: An unknown domain was specified.
Action: Ensure that the UUID corresponds to a domain.
Level: 16
Type: TRACE
Impact: Programmatic

IRM-01051: The context "\{1\}" does not support role "\{0\}".
Cause: A role was assigned to an account which was not supported by the context.
Action: Add the role to the related context template.
Level: 16
Type: TRACE
Impact: Programmatic
IRM-01052: A dynamic class contains either two stubs or head slices. The duplicate slice class is {0}.
   **Cause:** A dynamic class contained either more than one stub slice or more than one head slice.
   **Action:** Alter the dynamic class configuration such that it has at most one stub and one head slice.

   **Level:** 1  
   **Type:** WARNING  
   **Impact:** Programmatic

IRM-01053: The dynamic class {0} [{1}] does not contain any implementation slices.
   **Cause:** A dynamic class did not contain any implementation slices.
   **Action:** Alter the dynamic class configuration such that it has at least one implementation slice.

   **Level:** 1  
   **Type:** WARNING  
   **Impact:** Programmatic

IRM-01054: An error occurred during injection of the {1} on class {0}.
   **Cause:** Injected data was provided for a dynamic class and an error occurred injecting that data.
   **Action:** Ensure that the injected data is valid for the dynamic class.

   **Level:** 1  
   **Type:** WARNING  
   **Impact:** Programmatic

IRM-01055: Injection data cannot be found for the mandatory injected field {1} on class {0}.
   **Cause:** Injected data was not provided for a dynamic class that required it.
   **Action:** Ensure that all mandatory injected data is provided for the dynamic class.

   **Level:** 1  
   **Type:** WARNING  
   **Impact:** Programmatic

IRM-01056: The class {0} cannot be used as a slice.
   **Cause:** A dynamic class contained a class that could not be used as a slice.
   **Action:** Ensure that the class is derived from the appropriate slice class.

   **Level:** 1  
   **Type:** WARNING  
   **Impact:** Programmatic

IRM-01057: The method {1} is not a supported method on the {0} class.
   **Cause:** A slice class provided a list of implemented methods that contained a method not supported by the slice class.
   **Action:** Ensure that all implemented methods in the definition are supported by the slice class.
Level: 1
Type: WARNING
Impact: Programmatic
IRM-01058: The class {0} must implement all the slice methods.
Cause: A dynamic class definition included a stub class that did not implement all of the methods available.
Action: Correct the definition of the stub class.

Level: 1
Type: WARNING
Impact: Programmatic
IRM-01059: The slice purpose annotation on class {0} is not specified.
Cause: A slice class did not specify its purpose using the aspect annotation.
Action: Add an appropriate aspect annotation to the slice class implementation.

Level: 1
Type: WARNING
Impact: Programmatic
IRM-01060: The dynamic class definition file {1} for {0} cannot be loaded.
Cause: The definition for a dynamic class could not be found.
Action: Correct the resource path specified for the dynamic class.

Level: 1
Type: WARNING
Impact: Programmatic
IRM-01061: Not authorized to perform this operation.
Cause: A sealed content operation was attempted which was not authorized.
Action: Ensure that the authenticated user has the appropriate license to perform the sealing, resealing, peeking, or unsealing operation. Check that the classification key set is valid. Check the classification URL is correct. Check that the licenses are not checked out to a different device.

Level: 1
Type: NOTIFICATION
Impact: Security
IRM-01062: A duplicate {0} element is supplied where a duplicate is not allowed or expected.
Cause: A duplicate element was provided where a duplicate is not allowed/expected.
Action: Ensure that the input data does not contain duplicates.

Level: 16
Type: TRACE
Impact: Programmatic
IRM-01063: The parameter {1} passed into {0} has an illegal value.
**Cause:** An illegal value was passed as a method argument.

**Action:** Correct the invalid value and retry the operation.

**Level:** 16
**Type:** TRACE
**Impact:** Programmatic

**IRM-01064:** The {0} {1} property cannot exceed {4} characters in length. The invalid value provided was {2}, which has {3} characters.

**Cause:** A value was used as a property which exceeded the maximum permitted length.

**Action:** Correct the invalid property and retry the operation.

**Level:** 16
**Type:** TRACE
**Impact:** Programmatic

**IRM-01065:** The {0} {1} property has an illegal value.

**Cause:** An illegal value was specified for a property.

**Action:** Correct the invalid value and retry the operation.

**Level:** 16
**Type:** TRACE
**Impact:** Programmatic

**IRM-01066:** The {0} {1} is immutable and cannot be modified.

**Cause:** An attempt was made to alter a property that is read-only or immutable.

**Action:** Make a copy of the property to make changes.

**Level:** 16
**Type:** TRACE
**Impact:** Programmatic

**IRM-01067:** An unexpected error has occurred. If this exception does not include details of the cause, then examine the diagnostic logs for more details.

**Cause:** An unexpected error occurred.

**Action:** Review the exception cause for further details.

**Level:** 1
**Type:** WARNING
**Impact:** Other

**IRM-01068:** The parameter {1} passed into {0} is mandatory.

**Cause:** A mandatory argument was not specified.

**Action:** Provide the value and retry the operation.

**Level:** 16
**Type:** TRACE
**Impact:** Programmatic
IRM-01069: The {0} {1} property is mandatory.
   Cause: A mandatory property was not specified.
   Action: Provide the value and retry the operation.
   Level: 16
   Type: TRACE
   Impact: Programmatic

IRM-01070: The enumeration value {0} is unsupported in this context.
   Cause: An unsupported enumeration value was provided.
   Action: Correct the value and retry the operation.
   Level: 16
   Type: TRACE
   Impact: Programmatic

IRM-01071: A response could not be found for method {0} on class %Class%.
   Cause: A method invocation required a fixed response and one could not be found.
   Action: Correct the fixed responses provided to the response slice.
   Level: 1
   Type: TRACE
   Impact: Programmatic

IRM-01072: The transaction has been rolled back. If this exception does not include details of the cause then examine the diagnostic logs for more details.
   Cause: A transaction commit failed.
   Action: Review the exception cause for further information.
   Level: 1
   Type: TRACE
   Impact: Data

IRM-01073: The response or method {0} is unsupported by class {1}.
   Cause: A response or the method provided to a response slice is not supported.
   Action: Correct the fixed responses provided to the response slice.
   Level: 1
   Type: TRACE
   Impact: Programmatic

IRM-01074: The web service endpoint address for the service {0} is missing.
   Cause: A web service endpoint address was not specified.
   Action: Provide the endpoint address for the endpoint.
   Level: 1
   Type: WARNING
   Impact: Configuration
IRM-01075: The credentials for the web service could not be determined.
   Cause: Web service credentials were not provided.
   Action: Provide the credentials in the IRM credential store using the web service
           address as the key.
   Level: 1
   Type: WARNING
   Impact: Configuration

IRM-01076: Status page redirected to URI.
   Cause: A status page request has been redirected to another system.
   Action: This is not an error and no action is required by the system administrator.
   Level: 16
   Type: TRACE
   Impact: Requests/Responses

IRM-01076: The item constraints for role "{0}" cannot be altered as the role has
           been assigned to a user or group.
   Cause: An attempt has been made to alter the role item constraints for a role that
           has been assigned to a user or group.
   Action: Unassign the users and groups that are using the role.
   Level: 16
   Type: TRACE
   Impact: Programmatic

IRM-01077: The encrypted content block size must be a direct multiple of the cipher
           block size. The cipher block size is {0}, but the encrypted content block size has
           been set as {1}.
   Cause: An illegal encrypted content block size was provided during sealing.
   Action: Use a block size that is a direct multiple of the cipher block size. Block
           sizes are typically multiples of 16.
   Level: 32
   Type: TRACE
   Impact: Programmatic

IRM-01078: The public header cannot exceed {1} bytes in length. The current public
           header when written as XML has a length of {0} bytes. Reduce the amount of
           data provided in the custom data or classification cookie.
   Cause: A public header exceeded the maximum length.
   Action: Reduce the amount of data provided in the classification labels or custom
           data.
   Level: 16
   Type: TRACE
   Impact: Programmatic

IRM-01079: The parameter {1} passed into {0} cannot exceed {4} characters in length.
           The invalid value provided was {2} which has {3} characters.
**Cause:** A value was passed as a method argument which exceeded the permitted length.

**Action:** Correct the invalid value and retry the operation.

**Level:** 16

**Type:** TRACE

**Impact:** Programmatic

**IRM-01080:** Licenses are available, but they cannot be used for the following reasons: {0}.

**Cause:** A license was available to the user but could not be used for the specified classification.

**Action:** Check the exception for the list of licenses and associated availability status. The availability will provide the reason why the license cannot be used. For example, the license may not support the requested feature or the license may have time constraints that disallow use of the license at the time of the license request.

**Level:** 1

**Type:** TRACE

**Impact:** Other

**IRM-01081:** A wrapping key {1} bits in size is insufficient to wrap a {0} bit key.

**Cause:** A wrapping key could not be used to wrap a key as it was of insufficient size.

**Action:** Increase the size of the wrapping key used or reduce the size of the key being wrapped.

**Level:** 1

**Type:** ERROR

**Impact:** Security

**IRM-01081:** The expected size of the unsealed content was {0} bytes in length. The actual number of bytes read from the input stream was {1}.

**Cause:** The unsealed content size does not match the amount of data read from a stream.

**Action:** Ensure the unsealed content size matches the amount of data provided in the input stream.

**Level:** 16

   Impact: Programmatic

J2EE JMX-46002: It is not possible to stop a state-manageable instance while it is being started.
   Cause: A resource that was being started was asked to stop.
   Action: Wait until the resource is fully started before attempting to stop it.

   Level: 1
   Type: WARNING
   Impact: Programmatic

J2EE JMX-46003: A state-manageable object is not stopped. The reason is "{}".
   Cause: A resource could not be stopped.
   Action: Correct the root cause cited in the generated message.

   Level: 1
   Type: ERROR
   Impact: Programmatic

J2EE JMX-46004: The Notifications and Notification annotations cannot be used together.
   Cause: An MBean interface was annotated with both the @Notification and @Notifications annotations.
**Action:** Use either @Notification or @Notifications to annotate the MBean interface, but not both.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic  

**J2EE JMX-46005:** The Notifications and Notification annotations cannot be used on both the management and implementation classes.  
**Cause:** The @Notification or @Notifications annotation was used on both the MBean interface and MBean implementation class. Only the MBean interface should be annotated with @Notification or @Notifications.  
**Action:** Remove the conflicting annotation from the implementation class.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic  

**J2EE JMX-46006:** Could not find MBean operation "{0}" for MBean registered under "{1}" and implemented by "{2}"  
**Cause:** Operation signature might not match  
**Action:** Verify operation signature against MBean metadata or MBean implementation class

**Level:** 1  
**Type:** WARNING  
**Impact:** Programmatic  

**J2EE JMX-46007:** Error getting MBeanServer for Config MBean "{0}" implemented by "{1}"  
**Cause:** Internal error.  
**Action:** No action is required. The default MBeanServer association will be used.

**Level:** 1  
**Type:** WARNING  
**Impact:** Programmatic  

**J2EE JMX-46008:** Error initializing the JMX Framework SPI "{0}"  
**Cause:** Internal error. See nested exception.  
**Action:** Based on nested exception root cause.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic  

**J2EE JMX-46009:** Error loading the JMX Framework SPI "{0}"  
**Cause:** Internal error. See nested exception.  
**Action:** Based on nested exception root cause.

**Level:** 1  
**Type:** ERROR
Impact: Programmatic

J2EE JMX-46010: JMX Portable Framework initialized with platform SPI "[0]"
Cause: The message is informational only.
Action: No action is required.
Level: 1
Type: TRACE
Impact: Programmatic

J2EE JMX-46011: The @Inject annotation can be used only on a method that exposes a single parameter whose type is the type of the resource to be injected.
Cause: The JMX MBean @Inject annotation was used on a method that did not have a single parameter with the proper type.
Action: Change the associated MBean method to have a single parameter with the proper type or replace the @Inject annotation.
Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46012: Error registering MBean whose ObjectName is "[0]" and implementation class is "[1]"
Cause: See nested exception.
Action: Based on nested exception root cause.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46013: The [0] argument cannot be null.
Cause: An argument was passed a null value, which is invalid. The name of the argument is specified as part of the generated message.
Action: Change the argument value to be a valid non-null value.
Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46014: A notification listener for MBean "[0]" cannot be added.
Cause: The MBean did not declare that it sends notifications.
Action: Change the MBean code to declare that it sends notifications or remove the code that attempts to register a notification listener for the MBean.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46015: The resource with key "[0]" and bundle "[1]" declared in the Description annotation on attribute "[2]" of MBean "[3]" cannot be found.
**Cause:** The resource defined by the Description annotation that was associated with an MBean attribute was missing. The generated message specified the MBean, attribute, resource key and resource bundle.

**Action:** Ensure that the Description annotation includes the correct resourceBundleBaseName key and that the default resource bundle exists.

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**J2EE JMX-46016: The resource with key "{}" and bundle "{}" declared in the Description annotation on operation "{}" of MBean "{}" cannot be found.**

**Cause:** The resource defined by a Description annotation that was associated with an MBean operation was missing. The generated message specified the MBean, operation, resource key and resource bundle.

**Action:** Ensure that the Description annotation includes the correct resourceBundleBaseName key and that the default resource bundle exists.

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**J2EE JMX-46017: The resource with key "{}" and bundle "{}" declared in the Description annotation on parameter "{}" of operation "{}" of MBean "{}" cannot be found.**

**Cause:** The resource defined by a Description annotation that was associated with an MBean operation parameter was missing. The generated message specified the MBean, operation, parameter name, resource key and resource bundle.

**Action:** Ensure that the Description annotation includes the correct resourceBundleBaseName and that the default resource bundle exists.

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**J2EE JMX-46018: The resource with key "{}" and bundle "{}" declared in the Description annotation on MBean "{}" cannot be found.**

**Cause:** The resource defined by a Description annotation that was associated with an MBean interface was missing. The generated message specified the MBean, resource key and resource bundle.

**Action:** Ensure that the Description annotation includes the correct resourceBundleBaseName key and that the default resource bundle exists.

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**J2EE JMX-46019: The resource with key "{}" and bundle "{}" declared in the Description annotation on feature "{}" of MBean "{}" cannot be found.**

**Cause:** A resource that was defined in one of the MBean descriptors properties (descriptionResourceKey or descriptionResourceBundleBaseName) was missing. The generated message specified the MBean, resource key and resource bundle.
Action: Add the resource or change the MBean descriptor property.

Level: 1
Type: WARNING
Impact: Configuration

J2EE JMX-46020: No PersistenceManager is declared for MBean "[0]".
Cause: The PersistenceManagers were missing.
Action: When PMCompositeConfigMBeanSupport is used, specify a shared PersistenceManager or specify individual PersistenceManagers for the two config files (use injection-name 'file1' and 'file2' in mbeans.xml).

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46021: The Persistable for MBean "[0]" is not defined.
Cause: The expected Persistable for the MBean was missing.
Action: Provide the Persistable for the MBean.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46022: A resource bundle name must be specified in order to use message localization methods.
Cause: The resource bundle name was missing.
Action: Define the resource bundle name.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46023: A shared PersistenceManager and an individual PersistenceManager cannot both be declared for MBean "[0]".
Cause: Both a shared and an individual PersistenceManager were declared for the MBean.
Action: When PMCompositeConfigMBeanSupport is used, specify either one shared persistence manager with no injection name, or two persistence managers with injection names "file1" and "file2", in mbeans.xml.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46024: At least one configuration object used by MBean "[0]" for type "[1]" is not registered.
Cause: At least one of the configuration objects used by a Composite ConfigMBean was not registered.
Action: Register the appropriate configuration object.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46025: The type "[1]" used for MBean "{0}" is not valid for either configuration object "{2}" or "{3}".
Cause: The type used for a configuration object for the MBean was not valid.
Action: Use the correct type for the configuration object.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46026: The configuration file with injection name "{1}" for MBean "{0}" cannot be found.
Cause: The configuration file is missing or the injection name is incorrect.
Action: Verify that the injection name and the configuration file path are properly specified.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46027: The configuration at URI "{0}" cannot be loaded.
Cause: The value for location in the configuration file was invalid.
Action: Verify that the value of location in the configuration file is properly specified.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46028: MBean "{0}" cannot be registered,
Cause: An MBean was already registered with the same name. It should have been removed when the application was either stopped or undeployed.
Action: Examine and correct the errors that resulted when the application was stopped or undeployed, and repeat the stop or undeployment operation.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46029: The configuration file "{0}" for MBean "{1}" cannot be found.
Cause: The value for location in the configuration file was invalid.
Action: Verify that the value of location in the configuration file is properly specified.

Level: 1
Type: WARNING
Impact: Programmatic
J2EE JMX-46030: failure to register MBean "(0)" during application initialization.
  Cause: Registering the MBean during application initialization caused an error.
  Action: Use the information from the exception stack trace to determine the cause of the error.
  Level: 1
  Type: WARNING
  Impact: Programmatic

J2EE JMX-46031: failure to unregister MBean "(0)" during application shutdown.
  Cause: Unregistering the MBean during application shutdown caused an error.
  Action: Use the information from the exception stack trace to determine the cause of the error.
  Level: 1
  Type: WARNING
  Impact: Programmatic

J2EE JMX-46032: The RequiredApplicationPermission or RequiredSystemPermission annotation is incorrect.
  Cause: The RequiredApplicationPermission or RequiredSystemPermission annotation did not specify a nonempty action array.
  Action: Specify a nonempty action array.
  Level: 1
  Type: WARNING
  Impact: Programmatic

J2EE JMX-46033: The Description annotation on method "(0)" of class "(1)" is incorrect.
  Cause: The Description annotation resourceKey was null.
  Action: Ensure that the resourceKey for the Description annotation is not null for the method cited in the error message.
  Level: 1
  Type: WARNING
  Impact: Programmatic

J2EE JMX-46034: No annotation should be put on attribute mutator parameter "(0)".
  Cause: The mutator parameter for an attribute has an annotation.
  Action: Remove all annotation from the attribute's mutator parameter.
  Level: 1
  Type: WARNING
  Impact: Programmatic

J2EE JMX-46035: The Description annotations on the mutator and accessor of attribute "(0)" are in conflict.
  Cause: Both the mutator and the accessor were annotated. Ideally, only the mutator should be annotated. The message key and the message bundle were not identical on both the mutator and the accessor, and must be if both are annotated.
Action: Either remove the annotation on the accessor or ensure that the message key and the message bundle are identical on both the accessor and the mutator.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46036: OpenType ":0" cannot be converted to a Class</? instance.
Causes: The OpenType was not an instance of Class or ParameterizedType or GenericArrayType, and it must be.
Action: Ensure that the OpenType is an instance of Class or ParameterizedType or GenericArrayType.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46037: The class "[0]" cannot be converted to OpenType.
Cause: The custom type was wrong.
Action: Use a custom type that can be converted to OpenType.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46038: There is an OpenType conversion error "[0]."
Cause: An OpenType conversion resulted in an error.
Action: See the information cited within the error message for details about the error.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46039: The ModelMBeanInfo for class "[0]" does not have a Descriptor.
Cause: The ModelMBeanInfo did not have a Descriptor.
Action: Add a Descriptor to the ModelMBeanInfo.

Level: 1
Type: NOTIFICATION
Impact: Programmatic

J2EE JMX-46040: A key for the resource bundle "[0]" cannot be null.
Cause: The key for the message was null.
Action: Provide a resource bundle key that is not null.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46041: The resource for bundle "[0]" with key "[1]" cannot be found.
Cause: There was no resource found in the resource bundle for the given key.
Action: Add the key to the resource bundle.

Level: 1
Type: WARNING
Impact: Programmatic

**J2EE JMX-46042: The resource in bundle "{0}" for key "{1}" is not a String.**

Cause: The resource found for the given key was not a String.
Action: Ensure that the resource is a String.

Level: 1
Type: WARNING
Impact: Programmatic

**J2EE JMX-46043: The JMX Config Session instance passed to the Config MBean Factory is null.**

Cause: The JMX Config Session instance passed to the Config MBean Factory was null.
Action: Associate the MBean creation with a valid JMX Config Session instance.

Level: 1
Type: ERROR
Impact: Programmatic

**J2EE JMX-46044: Resource bundle "{0}" cannot be found.**

Cause: The resource bundle was missing.
Action: Provide the resource bundle.

Level: 1
Type: WARNING
Impact: Programmatic

**J2EE JMX-46045: An error occurred while processing MBeanInfo for MBean "{0}".**

Cause: The MBeanInfo was not correct.
Action: Use the error information to correct the MBeanInfo.

Level: 1
Type: ERROR
Impact: Programmatic

**J2EE JMX-46046: The ConfigMBean PersistenceManager is not of type DualDataSourcePersistenceManager.**

Cause: The PersistenceManager was not of type DualDataSourcePersistenceManager.
Action: Correct the type of the PersistenceManager.

Level: 1
Type: ERROR
Impact: Programmatic
J2EE JMX-46047: The method "{0}" required by DualDataSourcePersistenceManager cannot be found.
Cause: The required method was missing.
Action: Add the method to the MBean.
Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46200: federation error: "{0}"
Cause: A federation operation resulted in an error from the federated target.
Action: See the remote exception cited within the error message for details on the error.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46201: The federation namespace "{0}" cannot be found.
Cause: A Namespace that did not exist was specified during a federation operation.
Action: Use a valid federated namespace name.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46202: The domain of ObjectName "{0}" does not start with "{1}".
Cause: An improper domain was used during federation ObjectName processing.
Action: Use the expected federation domain: oracle.as.jmx.federation
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46203: federation namespace handler registration error: "{0}".
Cause: An error occurred while registering a new federation namespace handler.
Action: See the base exception information cited within the error message for details on the error.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46204: namespace handler unregistration error: "{0}".
Cause: An error occurred while unregistering a federation namespace handler.
Action: See the base exception information cited within the error message for details on the error.
Level: 1
Type: WARNING
Impact: Programmatic

**J2EE JMX-46005: error closing connection for "\{0\}"; "\{1\}".**
Cause: An error occurred while closing a federation JMX connector.
Action: See the base exception information cited within the error message for details on the error.

Level: 1
Type: WARNING
Impact: Programmatic

**J2EE JMX-46206: The "\{0\}" parameter cannot be null.**
Cause: A required method parameter was null.
Action: Provide a non-null parameter to the method.

Level: 1
Type: WARNING
Impact: Programmatic

**J2EE JMX-46207: Removing the federation namespace from "\{0\}" results in an invalid ObjectName.**
Cause: Removing the federation prefix resulted in an invalid ObjectName.
Action: Correct the specified ObjectName.

Level: 1
Type: WARNING
Impact: Programmatic

**J2EE JMX-46208: A federated object is not serializable.**
Cause: A nonserializable object was encountered during federation serialization.
Action: Make the object serializable.

Level: 1
Type: WARNING
Impact: Programmatic

**J2EE JMX-46209: A federated object is not serializable because a class cannot be found: "\{0\}".**
Cause: A class needed by federation serialization cannot be found.
Action: Verify that the class can be found using the class path.

Level: 1
Type: WARNING
Impact: Programmatic

**J2EE JMX-46210: The object that is being federated is not serializable: "\{0\}".**
Cause: A nonserializable object was encountered during federation serialization.
Action: Make the object serializable.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46211: The FederationMBeanServerImpl constructor is being called incorrectly.
Cause: The constructor for FederationMBeanServerImpl was called more than once, which is not allowed.
Action: Call the constructor for FederationMBeanServerImpl only once.
Level: 1

Type: WARNING
Impact: Programmatic

J2EE JMX-46212: The operation "(0)" is not supported for namespace "(1)".
Cause: The operation that was invoked is not supported by the namespace.
Action: Change the calling code so that the operation is not invoked.
Level: 1

Type: WARNING
Impact: Programmatic

J2EE JMX-46213: The remote namespace handler constructor is being called incorrectly.
Cause: The connection information for the remote MBean server was not correct.
Action: Correct the connection information.
Level: 1

Type: WARNING
Impact: Programmatic

J2EE JMX-46214: Namespace "(0)" cannot be found.
Cause: A namespace that did not exist was specified during a federation operation.
Action: Use a valid federated namespace name.
Level: 1

Type: WARNING
Impact: Programmatic

J2EE JMX-46215: ObjectName "(0)" is invalid.
Cause: An ObjectName was created with an invalid constructor argument.
Action: Correct the ObjectName constructor argument.
Level: 1

Type: WARNING
Impact: Programmatic

J2EE JMX-46216: Error unregistering MBean whose ObjectName is "(0)" and implementation class is "(1)"
Cause: See nested exception.
Action: Based on nested exception root cause.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46218: An error occurred while persisting the state for the Config MBean registered under "[0]" and implemented by "[1]"
Cause: See associated exception
Action: Fix issue described by the associated exception

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46219: No registered mapper can convert: "[0]" to an Open MBean Type
Cause: Needed mapper could not be found
Action: Add the required mapper

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46220: Cannot map nongeneric collections to Open MBean Type: "[0]"
Cause: Cannot map nongeneric collections to Open MBean Type
Action: Fix collection type

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46221: JMXFrameworkStateFactory is not initialized.
JMXStateFactoryImpl.init() should have been called prior to calling this method
Cause: JMXFrameworkStateFactory in not initialized.
Action: JMXStateFactoryImpl.init() should have been called prior to calling this method.

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46222: No such property "[0]" in "[1]"
Cause: Attempted to set a nonexistent property.
Action: Check the name of the property begin set.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46223: Failed to set property "[0]" to value "[1]".
Cause: Could not set the given property.
Action: Check the exception.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46224: No setter for property.
Cause: Could not find the necessary setter method.
Action: Add the needed setter method.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46225: #params for setter != 1.
Cause: Invalid number of parameter for setter method.
Action: Correct the parameter list of the setter call.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46226: Conversion to type "[0]" failed.
Cause: Type conversion failed.
Action: Check the exception.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46227: Cannot find the Config MBeans declaration file [0] in the application.
Cause: The required META-INF/mbeans.xml file is missing from the application.
Action: Add the META-INF/mbeans.xml in the application.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46228: Error processing MBeans associated with mbeans.xml located at: "[0]"
Cause: Format issue, or missing class
Action: Check the exception.

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46229: Only one of two security annotations
OperationRequiredGlobalSecurityRole and
OperationRequiredCustomSecurityGroup can be applied to MBean operation [0].[1]
Cause: Two security annotations on the MBean operation
Action: Apply only one or none security annotation the the MBean operation
Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46230: The following security Annotation(s) cannot be applied to MBean operation \{0\}.\{1\}: \{2\}
Cause: Invalid security annotation(s) on MBean operation
Action: Remove invalid security annotation(s)
Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46231: Only one of two security annotations
AttributeGetterRequiredGlobalSecurityRole and
AttributeGetterRequiredCustomSecurityGroup can be applied to MBean
Attribute Getter \{0\}.\{1\}
Cause: Two security annotations on the MBean attribute getter
Action: Apply only one or none security annotations to the MBean attribute getter.
Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46232: The following security Annotation(s) cannot be applied to MBean attribute getter \{0\}.\{1\}: \{2\}
Cause: Invalid security annotation(s) on MBean attribute getter
Action: Remove invalid security annotation(s)
Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46233: Only one of two security annotations
AttributeSetterRequiredGlobalSecurityRole and
AttributeSetterRequiredCustomSecurityGroup can be applied to MBean
Attribute Setter \{0\}.\{1\}
Cause: Two security annotations on the MBean attribute setter
Action: Apply only one or none security annotations to the MBean attribute setter.
Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46234: The following security Annotation(s) cannot be applied to MBean attribute setter \{0\}.\{1\}: \{2\}
Cause: Invalid security annotation(s) on MBean attribute setter
Action: Remove invalid security annotation(s)

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46235: Only one of two security annotations
MBeanRequiredGlobalSecurityRole and
MBeanRequiredCustomSecurityGroup can be applied to MBean interface {0}
Cause: Two security annotations on the MBean interface
Action: Apply only one or none security annotations to the MBean interface.

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46236: Do not know how to map nonserializable type: "{0}" to Open
MBean Type.
Cause: A type that does not implement Serializable cannot be mapped by the jmx
framework
Action: Implement Serializable

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46237: Error while executing ServletContextListener initialization
Cause: See embedded root exception
Action: Fix issue related with embedded root exception

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46238: Cannot map nonserializable type "{0}" to Open MBean Type for
mbean interface {1}, attribute {2}.
Cause: A type that does not implement Serializable cannot be mapped by the jmx
framework
Action: Implement Serializable

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46239: Cannot map nonserializable type "{0}" to Open MBean Type for
mbean interface {1}, the return type of operation {2}.
Cause: A type that does not implement Serializable cannot be mapped by the jmx
framework
Action: Implement Serializable
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46240: Cannot map nonserializable type "(0)" to Open MBean Type for mbean interface (1), parameter (2) of operation (3).
Cause: A type that does not implement Serializable cannot be mapped by the jmx framework
Action: Implement Serializable

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46241: Error while delivering JMX notification "(0)" to listener "(1)"
Cause: See embedded root exception
Action: Fix issue related with embedded root exception

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46242: Cannot load class "(0)" for MBean operation "(1)" using ClassLoader "(2)"
Cause: See embedded root exception
Action: Fix issue related with embedded root exception

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46243: Cannot find method "(0)" for attribute "(1)"
Cause: See embedded root exception
Action: Fix issue related with embedded root exception

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46244: Error converting annotation "(0)" to descriptor. Could not get value for "(1)"
Cause: See embedded root exception
Action: Fix issue related with embedded root exception

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46245: Error creating ConstraintValidator "(0)" with ClassLoader "(1)"
Cause: See embedded root exception
**Action:** Fix issue related with embedded root exception

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**J2EE JMX-46246:** Error mapping java array or collection of type "[0]" to open type array. Individual element mapping resolved to "[1]"

**Cause:** See embedded root exception

**Action:** Fix issue related with embedded root exception

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**J2EE JMX-46247:** Cannot load class "[0]" using ClassLoader "[1]"

**Cause:** See embedded root exception

**Action:** Fix issue related with embedded root exception

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**J2EE JMX-46248:** Error mapping java Map of type "[0]" to open type TabularData. Key mapping resolved to "[1]", and Value mapping resolved to "[2]"

**Cause:** See embedded root exception

**Action:** Fix issue related with embedded root exception

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**J2EE JMX-46249:** Error mapping java Map entry of TabularType "[0]". Mapped Key instance is "[1]", and mapped Value instance is "[2]"

**Cause:** See embedded root exception

**Action:** Fix issue related with embedded root exception

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**J2EE JMX-46250:** Internal error: the setPersistable() invoked twice on config mbean

**Cause:** internal error

**Action:** Contact Oracle Support Services.

**Level:** 32

**Type:** INCIDENT_ERROR

**Impact:** Programmatic

**J2EE JMX-46251:** The MBean is no longer registered so no notification is delivered.

**Cause:** The mbean has been unregistered.
J2EE JMX-46000 to J2EE JMX-47006

Action: The notification is no longer delivered.
Level: 1
Type: NOTIFICATION
Impact: Programmatic

J2EE JMX-46252: Error during [0] for MBean [1]
Cause: See nested exception for root cause.
Action: Fix root cause, to ensure that the MBean gets registered.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46300: Class "[0]" is not compatible with the annotation on method "[1]" of class "[2]".
Cause: When a MinValue, MaxValue or LegalValues annotation was used, the class that the annotation applied to did not have either a public static valueOf(String) method or a public constructor with only a String parameter.
Action: Change the class that the MinValue, MaxValue or LegalValues annotation applies to so that it either has a public static valueOf(String) method or a public constructor with only a String parameter.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46301: An object cannot be obtained for the minimum value for "[0]" for method "[1]" of class "[2]".
Cause: An instance of the class that a MinValue annotation applied to was not constructed. The associated IllegalArgumentException indicates the reason.
Action: Examine the associated IllegalArgumentException information to determine what action to take.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46302: An object cannot be obtained for the maximum value for "[0]" for method "[1]" of class "[2]".
Cause: An instance of the class that a MaxValue annotation applied to was not constructed. The associated IllegalArgumentException indicates the reason.
Action: Examine the associated IllegalArgumentException information to determine what action to take.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46303: An object cannot be obtained for the valid value "[0]" for method "[1]" of class "[2]".
Cause: An instance of the class that a LegalValues annotation applied to was not be constructed. The associated IllegalArgumentException indicates the reason.

Action: Examine the associated IllegalArgumentException information to determine what action to take.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46304: The parameters being validated for method "[0]" of class "[1]
based on annotations do not match the method parameter types.
Cause: A constraint declared using the MinValue, MaxValue or LegalValues
annotation was being enforced, but the number of arguments passed to the
method was wrong.
Action: Change the code that has the call to the method to have the correct
number of arguments.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46305: Parameter "[0]" of method "[1]" of class "[2]" is less than the
MinValue.
Cause: The value for an attribute or parameter that was annotated with the
MinValue annotation failed the minimum value constraint test.
Action: Change the value so that it does not fail the minimum value constraint
test or change the annotation.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46306: Parameter "[0]" of method "[1]" of class "[2]" is greater than the
MaxValue.
Cause: The value for an attribute or parameter that was annotated with the
MaxValue annotation failed the maximum value constraint test.
Action: Change the value so that it does not fail the maximum value constraint
test or change the annotation.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46307: Parameter "[0]" of method "[1]" of class "[2]" cannot be compared to
the MinValue annotation value.
Cause: The class to which the MinValue annotation applied did not implement
the Comparable interface.
Action: Use a different class that implements the Comparable interface or modify
the existing class so that it implements the Comparable interface.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46308: Parameter "{0}" of method "{1}" of class "{2}" cannot be compared to
the MaxValue annotation value.
Cause: The class to which the MaxValue annotation applied did not implement
the Comparable interface.
Action: Use a different class that implements the Comparable interface or modify
the existing class so that it implements the Comparable interface.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46309: Parameter "{0}" of method "{1}" of class "{2}" does not match any
value in the LegalValues annotation.
Cause: The value for an attribute or parameter that was annotated with the
LegalValues annotation did not match any valid value.
Action: Change the value so that it is one of the valid values, or change the
annotation.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46310: Parameter "{0}" of method "{1}" of class "{2}" violates the constraint
that the LegalValues annotation cannot be used with a MinValue or MaxValue
annotation.
Cause: The LegalValues annotation was used at the same location with either a
MaxValue or MinValue annotation.
Action: Either use the LegalValues annotation, or use the MaxValue or MinValue
annotation.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46311: The value of the MinValue annotation is greater than the value of
the MaxValue annotation for parameter "{0}" of method "{1}" of class "{2}".
Cause: The value used for the MinValue annotation was greater than the value
used for the MaxValue annotation.
Action: Change the annotations so that the value used for MinValue annotation is
less than the value used for the MaxValue annotation.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46312: The type used for parameter "{0}" of method "{1}" of class "{2}" is
improper.
**Cause:** The value passed to an attribute or method parameter that was annotated with the MinValue or MaxValue annotation was not compared with an instance of the class used for the annotation because the type of the value was incorrect.

**Action:** Use the correct value for the attribute or method call, or change the annotation type.

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**J2EE JMX-46313: The delegate MBeanServerConnection cannot be null.**

**Cause:** A PatternBaseDelegationHandler was being constructed without the required MBeanServerConnection argument.

**Action:** Change the code to supply the required MBeanServerConnection argument.

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**J2EE JMX-46314: No handler for ObjectName "[0]" is registered.**

**Cause:** No handler existed for the object name being used.

**Action:** Register a handler that is appropriate for the object name that is used, or use a different object name.

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**J2EE JMX-46315: There is no registered handler to instantiate class "[0]".**

**Cause:** No handler was found to instantiate the class for the object name being used.

**Action:** Register a handler that is appropriate for the object name that is used, or use a different object name.

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**J2EE JMX-46318: An error occurs when registering an MBean with the ObjectName "[0]" and the implementation class "[1]".**

**Cause:** An error occurred when the MBean was being registered.

**Action:** See the associated Throwable exception information cited within the error message for details on the error.

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**J2EE JMX-46319: An error occurs when unregistering an MBean with the ObjectName "[0]" and implementation class "[1]".**
Cause: An error occurred when the MBean was being unregistered.
Action: See the associated Throwable exception information cited within the error message for details on the error.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46320: An error occurs when parsing an mbeans.xml file.
Cause: The mbeans.xml file had incorrect XML syntax.
Action: Correct the XML syntax in the mbeans.xml file.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46324: The MBeanServer object parameter for the MBeanServerForwarder is null, or it is equal to the MBeanServerForwarder, or an MBeanServer object is already set.
Cause: The MBeanServer argument was not valid.
Action: Correct the MBeanServer argument.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46329: Error when parsing {0}.
Cause: The META-INF/mbeans.xml is empty or has syntax error.
Action: Correct the META-INF/mbeans.xml with the correct syntax.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46330: Cannot find any jmx config mbeans in parsed mbeans.xml file
Cause: No config mbeans declared in META-INF/mbeans.xml in the application.
Action: Declare the config mbeans class, interface, config files in META-INF/mbeans.xml.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46331: The numbers of configuration files and persistence managers for the mbean {0} in mbeans.xml do not match
Cause: The injectNames for configuration files and persistence managers in mbeans.xml is inconsistent.
Action: Update the mbeans.xml to use correct configuration files and persistence managers.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46332: MBean "[0]" cannot be registered.
Cause:
Action:
Level: 1

Type: WARNING
Impact: Programmatic

J2EE JMX-46333: Cannot find config file {0} in the application for mbean {1}
Cause: The location of config file is not correct or the config file is missing in the application.
Action: Fix the application.
Level: 1

Type: WARNING
Impact: Programmatic

J2EE JMX-46334: This helper class "[0]" only supports a single config file per MBean. However the MBean "[1]" specified "[2]" config files.
Cause: Only one config file per MBean is supported from this helper class
Action: Fix the calling code
Level: 1

Type: ERROR
Impact: Programmatic

J2EE JMX-46335: MBean attribute access denied. MBean: {0} {1} for attribute {2}
Detail: {3}
Cause: Security check failed.
Action: Access the MBean attribute with the user in right role or group.
Level: 1

Type: ERROR
Impact: Programmatic

J2EE JMX-46336: MBean operation access denied. MBean: {0} Operation: {1} Detail: {2}
Cause: Security check failed.
Action: Access the MBean operation with the user in right role or group.
Level: 1

Type: ERROR
Impact: Programmatic

J2EE JMX-46337: RegisterMBean denied: MBean: {0} Detail: {1}
Cause: Security check failed.
Action: RegisterMBean is allowed to the user ADMIN role.
J2EE JMX-46338: DeregisterMBean denied: MBean: {0} Detail: {1}
Cause: Security check failed.
Action: DeregisterMBean is allowed to the user ADMIN role.

J2EE JMX-46339: Cannot find any jmx runtime mbeans in parsed mbeans.xml file
Cause: No runtime mbeans declared in META-INF/mbeans.xml in the application.
Action: Declare the config mbeans class, interface, config files in META-INF/mbeans.xml.

J2EE JMX-46340: EntityResolver ":[0]" failed to retrieve mbeans.xml xsd ":[1]"
Cause: Either XSD is invalid, or proper Java Security Permissions have not been granted to JMX Framework jars if Security Manager is turned on.
Action: Verify xsd in mbeans.xml file, and ensure proper Security Permissions are granted to JMX Framework jars if Security Manager is turned on.

J2EE JMX-46341: Failed to create application stripe Id. Missing key: {0}, MBean: {1}
Cause: The key is missing from MBean ObjectName.
Action: Check MBean interface security annotation, make sure the key is available.

J2EE JMX-46342: Failed to remove old backup of config file {0}
Cause: unknown.
Action: regular backup config directory may help in this case.

J2EE JMX-46343: Failed to rename old config file {0} to backup file {1}
Cause: unknown.
Action: regular backup config directory may help in this case.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46344: Access denied. Current subject: \{0\}; Required app roles: \{1\}
cause: Current user is not member of any required application roles.
Action: Try again with the user that is member of any of required application roles.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46345: Internal error: invalid security object. type \{0\}, value \{1\}
cause: unknown.
Action: Contact support.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46346: EntityResolver "\{0\}" failed to retrieve the JMX Framework configuration xsd "\{1\}"
cause: Either XSD is invalid, or proper Java Security Permissions have not been granted to JMX Framework jars if Security Manager is turned on.
Action: Verify xsd in JMX Framework configuration file, and ensure proper Security Permissions are granted to JMX Framework jars if Security Manager is turned on.

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46347: An error occurs when parsing the JMX Framework configuration file.
cause: The JMX Framework configuration file had incorrect XML syntax.
Action: Correct the JMX Framework configuration file XML syntax.

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46348: Unexpected xml tag \{0\}, when parsing the JMX framework configuration file.
cause: Invalid JMX Framework configuration file.
Action: Make sure your JMX Framework Configuration file is valid.

Level: 1
**Type:** ERROR  
**Impact:** Programmatic

**J2EE JMX-46349: Missing JMX Framework configuration file**  
**Cause:** Cannot find the JMX Framework configuration file.  
**Action:** Ensure that you either specify a valid configuration location, or that the default configuration is included in jmxspi.jar under the META-INF directory.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**J2EE JMX-46350: Error parsing JMX Framework Configuration. Invalid value "\{0\}" for attribute "\{1\}" defined in XML element "\{2\}".**  
**Cause:** The value for the attribute is not valid  
**Action:** Please correct the value in the JMX Framework configuration file.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**J2EE JMX-46351: Invalid ID "\{0\}". No internal MBean interceptor is associated with that ID.**  
**Cause:** The wrong value was specified.  
**Action:** Please correct the value in the JMX Framework configuration file.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**J2EE JMX-46352: Invalid URL for custom MBean interceptor "\{0\}" jar location "\{1\}"**  
**Cause:** The wrong value was specified in the JMX Framework configuration file for the MBean interceptor jar location.  
**Action:** Please correct the value in the JMX Framework configuration file.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**J2EE JMX-46353: Custom MBean interceptor "\{0\}" jar file cannot be found at the specified location "\{1\}"**  
**Cause:** Missing jar file, or incorrect location specified in the JMX Framework configuration file.  
**Action:** Please correct the value in the JMX Framework configuration file, or make sure the jar file is present.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic
J2EE JMX-46354: An error was raised while instantiating the JMX Framework MBean interceptor chain.
Cause: See root exception.
Action: Please correct the issue associated with the root exception.
Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-46355: An error occurred while initializing the JMX Framework MBean level logging interceptor.
Cause: See root exception.
Action: Please correct the issue associated with the root exception.

J2EE JMX-46408: An invalid location is defined in mbeans.xml for the config file:
  "(0)"
  Cause: An invalid jmx-config-mbean config-file path was encountered in the
  MBeans XML file.
  Action: Correct the path to the configuration file.
  Level: 1
  Type: WARNING
  Impact: Programmatic

J2EE JMX-46409: The Runtime MBean jar file "(0)" does not exist.
  Cause: The Runtime MBeans jar file specified in the "location" attribute of the
  "runtime-mbeans" tag did not exist
  Action: Correct the path to the Runtime MBeans jar file.
  Level: 1
  Type: WARNING
  Impact: Programmatic

J2EE JMX-46410: When specifying multiple "(0)" elements, the injection-name
  attribute is required
  Cause: Your MBean must include a name as part of the @Inject annotations to
  match resources defined in mbeans.xml
  Action: Correct the @Inject annotations in your MBean to reference resources
  defined in your mbeans.xml
  Level: 1
  Type: ERROR
  Impact: Programmatic

J2EE JMX-46502: internal session error: "(0)".
  Cause: A session operation resulted in an error.
Action: See the base exception information cited within the error message for details on the error.

Level: 1
Type: WARNING
Impact: Other

J2EE JMX-46503: The "{0}" call to the MBean with ObjectName "{1}" is not made in the context of a JMX configuration session.
Cause: The call that was made needed to be made in the context of a JMX configuration session.
Action: Create a JMX configuration session and then make the call.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46504: A call to commit or roll back the session is not made by the owner of the JMX configuration session.
Cause: The call was not made by the owner of the JMX configuration session.
Action: This call must be made by the owner of the JMX configuration session.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46505: The Config MBean implementation object "{0}" for ObjectName "{1}" does not implement MBeanServerSupport.
Cause: The Config MBean implementation did not implement MBeanServerSupport.
Action: Correct the Config MBean implementation so that it implements MBeanServerSupport.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46506: The parent MBean for "{0}" cannot be found.
Cause: The MBean specified a parent MBean that was missing.
Action: Correct the MBean implementation so that it specifies the correct parent.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46507: The ObjectName "{0}" is specified when adding or removing a notification listener in a JMX configuration session.
Cause: Specifying ObjectName when adding or removing a notification listener is not supported in a JMX configuration session.
Action: Add or remove the notification listener without specifying ObjectName.
Level: 1  
Type: WARNING  
Impact: Programmatic

J2EE JMX-46508: The createMBean method is called for the ObjectName "[0]".  
Cause: An attempt was made to create a ConfigMBean using the createMBean method.  
Action: Use the registerMBean method.

Level: 1  
Type: WARNING  
Impact: Programmatic

J2EE JMX-46509: MBean custom persistence method error for ObjectName"[0]": "[1]"  
Cause: An MBean custom persistence operation resulted in an error.  
Action: See the base exception information cited within the error message for details on the error.

Level: 1  
Type: WARNING  
Impact: Programmatic

J2EE JMX-46510: JAXB persistence method error: "[0]"  
Cause: An MBean JAXB Persistence operation resulted in an error.  
Action: See the base exception information cited within the error message for details on the error.

Level: 1  
Type: WARNING  
Impact: Programmatic

J2EE JMX-46511: MBean validation error prior to committing for ObjectName"[0]": "[1]"  
Cause: An error occurred during validation of an MBean before committing it.  
Action: See the base exception information cited within the error message for details on the error.

Level: 1  
Type: WARNING  
Impact: Programmatic

J2EE JMX-46512: MBean session life-cycle callback error for ObjectName "[0]": "[1]"  
Cause: This error occurred when the MBean session life-cycle callback was called.  
Action: See the base exception information cited within the error message for details on the error.

Level: 1  
Type: WARNING  
Impact: Programmatic

J2EE JMX-46513: unexpected error: "[0]"
Cause: An unexpected error occurred.

Action: See the base exception information cited within the error message for details on the error.

Level: 1
Type: WARNING
Impact: Other

J2EE JMX-46514: An MBean of type "{0}" implements Persistable directly or implements an unknown subclass of Persistable.

Cause: The MBean must not implement Persistable directly and must not implement an unknown subclass of Persistable.

Action: Remove the use of Persistable.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46515: A configuration session already exists.

Cause: A configuration session was started when one was already active.

Action: Do not attempt to start a second configuration session. Use the previously started configuration session.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46516: configuration session start error: "{0}".

Cause: There was a failure to start the JMX configuration session due to an error.

Action: See the base exception information cited within the error message for details on the error.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46517: configuration session commit error: "{0}".

Cause: There was a failure to commit the JMX configuration session due to an error.

Action: See the base exception information cited within the error message for details on the error.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46518: configuration session roll back error: "{0}".

Cause: There was a failure to roll back the JMX configuration session due to an error.

Action: See the base exception information cited within the error message for details on the error.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46519: cannot lock MBean: "[0]"
Cause: The MBean was in special domain oracle.as.jmx or was a delegate MBean.
Action: Provide an MBean whose object name is not in the special domain oracle.as.jmx and is not a delegate MBean.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46520: MBean "[0]" cannot be found in the session MBean server.
Cause: The MBean was not registered in the session MBean server.
Action: Register the MBean.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46600: The groupby attribute "[0]" is invalid.
Cause: The groupby attribute or property specified did not exist.
Action: Ensure that the groupby attribute specified refers to an MBean attribute or property.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46601: An aggregation attribute or property such as groupbyAttrs, aggOps, or aggAttrs is null.
Cause: An aggregation attribute or property was null.
Action: Ensure that the specified aggregation attribute or property exists.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46602: The aggregation operation "[0]" is invalid.
Cause: An invalid aggregation operator was specified.
Action: Verify that the aggregation operator specified is among OPERATION_AVG through OPERATION_GROUPBY defined in oracle.as.jmx.framework.bulkoperations.BulkOperationsMBean.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-46603: The groupby key "[0]" cannot be used for aggregation.
**Cause:** Aggregation was incorrectly specified on a groupby attribute or property.

**Action:** Specify either aggregation key or groupby key, but not both, on the attribute or property.

**Level:** 1  
**Type:** WARNING  
**Impact:** Programmatic

**J2EE JMX-46604: BulkOperationsMBean NamespaceHelper instance creation error:** 
"{0}"

**Cause:** The provided MBean server is invalid.

**Action:** Correct the MBean server that is being provided. See the base exception information cited within the error message for details on the error.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**J2EE JMX-46605: Parameter count ("{0}") does not match mbean count ("{1}")

**Cause:** The number of parameter arrays passed in does not match the number of mbeans that should be invoked

**Action:** Ensure that the correct number of parameter arrays are being passed.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**J2EE JMX-46606: non-numeric attribute {0} in aggregation

**Cause:** BukpOperationMBean Aggregation operation requires all attributes to have numeric values

**Action:** Do not use attributes with non-numeric values when using the aggregation operation provided by the BulkOperationMBean

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**J2EE JMX-46607: In BukpOperationMBean Aggregation operation, aggOps and aggAttrs need to be the same length

**Cause:** In BukpOperationMBean Aggregation operation, aggOps and aggAttrs need to be the same length

**Action:** Ensure that aggOps and aggAttrs are the same length

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**J2EE JMX-46608: A "null" value was passed to a BulkOperationsMBean method as part of an ObjectName[] parameter. We will ignore that value, as it would cause all MBeans to be selected. If this is the intended behavior use new ObjectName("*:*") in place of null

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic
Cause: This could be due to some user code logic error, and not intended.
Action: If this is the intended behavior use new ObjectName("*:*") in place of null

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JMX-47000: Property "[0]" is not set.
Cause: The expected property was not set.
Action: Add the expected property to the mbeans.xml file.

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-47001: A JAXB error occurred during unmarshalling.
Cause: Some data in the xml file is invalid.
Action: Use the JAXB error information to correct the xml file.

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-47002: A JAXB error occurred during marshalling of "[0]."
Cause: Some data to be marshalled is invalid.
Action: Correct the data to be marshalled.

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-47003: An error occurred during initializion of the JAXB context using the contextpath "[0]."
Cause: The contextpath in the mbeans.xml file is invalid.
Action: Correct the contextpath.

Level: 1
Type: ERROR
Impact: Programmatic

J2EE JMX-47004: The JAXB Object "[0]" has been loaded
Cause:
Action:

Level: 16
Type: TRACE
Impact: Programmatic

J2EE JMX-47005: THE JAXB Object "[0]" has been persisted.
Cause:
Action:

Level: 16
Type: TRACE
Impact: Programmatic

J2EE JMX-47006: Persistence manager "[0]" does not implement "[1]".
Cause: Persistence manager implementation inheritance incorrect.
Action: Correct the persistence manager implementation.

Level: 1
Type: WARNING
Impact: Programmatic
J2EE JOC-00001: exception caught in the load callback
  Cause: 
  Action: 
  Level: 1 
  Type: WARNING 
  Impact: Data 

J2EE JOC-00002: exception caught in the verify callback
  Cause: 
  Action: 
  Level: 1

J2EE JSP-00002: an internal JSP error occurred. Additional information follows: {0}.

**Cause:** JSP encountered an unexpected situation. This may be a bug in the JSP servlet.

**Action:** Contact Oracle Support Services. Oracle Support Services may recommend increasing the log level to FINER to help understand the situation.

**Level:** 1

**Type:** WARNING

**Impact:** Requests/Responses

J2EE JSP-00003: unable to fully process the TLD cache for the following reason: {0}.

**Cause:** An error occurred while the Tag Library Descriptor cache was created or accessed.

**Action:** Check the TLD for validity and fix the TLD, or remove it if it is not used in the application. If the logging level is set to FINER more information should be available in the exception contained in the error message.

**Level:** 1

**Type:** WARNING

**Impact:** Deployment

J2EE JSP-00005: unable to send the following error in the response. Response code: {0} Error message: {1}.

**Cause:** An exception occurred that prevented the error status from being sent in the response.

**Action:** See the exception cited in the error message. It may be necessary to increase the logging level to FINER to see the exception.

**Level:** 1

**Type:** WARNING

**Impact:** Requests/Responses

J2EE JSP-00006: unable to prepare or access an auxiliary object: {0} {1}.

**Cause:** The auxiliary object required for tracking JSP page dependencies was not read in or created.

**Action:** Recompile the page after checking factors that impact file reading such as disk corruption, permissions, and file handles.

**Level:** 1
Type: NOTIFICATION
Impact: Files

**J2EE JSP-00007: cannot find the message resource file, {0}, in the server to report error messages.**
*Cause:* Due to a missing error message resource bundle, the underlying error message was not presented.
*Action:* Contact Oracle Support Services.

Level: 1

Type: NOTIFICATION
Impact: Installation

**J2EE JSP-00008: unable to dispatch JSP page: {0}.**
*Cause:* An error prevented the dispatching of the JSP page.
*Action:* Correct the error described in this logged message.

Level: 1

Type: NOTIFICATION
Impact: Requests/Responses

**J2EE JSP-00009: unable to return the following error in the response: {0}.**
*Cause:* An input-output error occurred while trying to write an error message to the servlet response stream.
*Action:* The logged message contains the error message that could not be returned in the response, and the associated exception. It may be necessary to increase the logging level to FINER to see the exception. Scan the log files for additional error messages that may reveal the root cause of this problem.

Level: 1

Type: WARNING
Impact: Files

**J2EE JSP-00010: building the cache named {0}.**
*Cause:* Started building the Tag Library Descriptor persistent cache.
*Action:* none

Level: 1

Type: NOTIFICATION
Impact: Deployment

**J2EE JSP-00011: Invalid JSP tag library location. {0} does not exist or is not a directory.**
*Cause:* An invalid or nonexistent directory name was supplied as a tag library location.
*Action:* Correct the directory name and insure that it is available.

Level: 1

Type: WARNING
Impact: Programmatic
J2EE JSP-00012: obtaining application resources.
  Cause: Finished obtaining current Tag Library Descriptors for this application.

  Impact: Deployment

J2EE JSP-00017: inserting TLD at: {0}
  Cause: The TLD at the given URL was inserted into the TLD persistent cache.
  Action: none
  Level: 1
  Type: TRACE
  Impact: Deployment

J2EE JSP-00018: applying update to TLD at: {0}
Cause: The TLD at the given URL was updated in the TLD persistent cache.
Action: none
Level: 1
Type: TRACE
Impact: Deployment

J2EE JSP-00019: completing processing of TLD persistent cache
Cause: The processing of this TLD persistent cache is finished.
Action: none
Level: 1
Type: TRACE
Impact: Deployment

J2EE JSP-00020: writing TLD persistent cache to file system
Cause: Finished writing out the Tag Library Descriptor Persistent Cache.
Action: See error message.
Level: 1
Type: TRACE
Impact: Deployment

J2EE JSP-00021: URL for entry is {0}.
Cause: Processed a TLD at the following given URL.
Action: none
Level: 1
Type: TRACE
Impact: Deployment

J2EE JSP-00022: loading external TLD with uri element, {0}, from JAR {1}.
Cause: Loaded TLD from the location external to the application given in the message text.
Action: none
Level: 1
Type: TRACE
Impact: Deployment

J2EE JSP-00023: loading application TLD with uri element, {0}, from location {1}.
Cause: Loaded TLD from the application location given in the message text.
Action: See error message.
Level: 1
Type: TRACE
Impact: Deployment

J2EE JSP-00024: loading TLD accessible via the name, {0}, from {1}
Cause: Loaded tag library descriptor at the following location for access via file or jar name.

Action: See error message.

Level: 1
Type: TRACE
Impact: Deployment

J2EE JSP-00025: finding listener, {0}, in TLD
Cause: The name of a listener element found in a Tag Library Descriptor visible to the application is supplied.
Action: none

Level: 1
Type: TRACE
Impact: Deployment

J2EE JSP-00026: missing required uri element in external TLD: {0}
Cause: Encountered a Tag Library Descriptor with an invalid or missing uri-element where one is required. For example, global tag libraries and those external to the application must have URI elements.
Action: Supply the URI element in the TLD file or move the tag library to the application level.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JSP-00027: unable to parse TLD file: {0}
Cause: The TLD at the given location could not be parsed.
Action: Check for invalid XML syntax, especially unbalanced angle brackets or start and end tags.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JSP-00028: duplicate URI element, {0}, in TLD, {1}, and TLD, {2}
Cause: More than one tag library descriptor encountered using the same URI element. URI elements visible to the application must be unique.
Action: Change one of the uri element values or exclude one of the tag libraries from the this application.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JSP-00029: unable to obtain cache key: {0}
Cause: A corrupted cache key was encountered in the TLD cache.
**Action:** Stop the server, delete the TLD cache files from the application's persistence directory and from the global directory, tldcache and restart the application server. Contact Oracle Support Services if this problem persists.

**Level:** 1  
**Type:** WARNING  
**Impact:** Deployment

**J2EE JSP-00030: unable to obtain the JSP parameters**

**Cause:** A unknown problem was encountered when attempting to initialize JSP configuration parameters.

**Action:** Verify the XML syntax in orion-web.xml, especially in the attributes of ojsp-init element if used. Verify the syntax of any init-parameters supplied to the JspServlet in web.xml or global-web-applications.xml. Then redeploy the application. If that fails, or if errors were found in the global-web-application.xml, restart the server. If the problem persists contact Oracle Support Services

**Level:** 1  
**Type:** WARNING  
**Impact:** Configuration

**J2EE JSP-00031: refreshing the cache named {0}.**

**Cause:** Started refreshing the Tag Library Descriptor cache.

**Action:** none

**Level:** 1  
**Type:** TRACE  
**Impact:** Deployment

**J2EE JSP-00032: looking for global resource at {0}.**

**Cause:** The global Tag Library Descriptors were sought in the location or locations cited in the error message.

**Action:** none

**Level:** 1  
**Type:** TRACE  
**Impact:** Deployment

**J2EE JSP-00033: unable to process an invalid or unsupported TLD version: {0}**

**Cause:** An invalid or unsupported value of the taglib element's attribute, version, element was supplied.

**Action:** The taglib element is the root element for all TLD's. The element's attribute, version, must be either 2.0 or 2.1.

**Level:** 1  
**Type:** WARNING  
**Impact:** Programmatic

**J2EE JSP-00034: loading cachedConfigTable from persistent cache**

**Cause:** The internal configuration data structure was loaded from the persistent Tag Library Descriptor cache.
Action: none
Level: 1
Type: TRACE
Impact: Deployment

J2EE JSP-00035: unable to load changeAwareClassLoader class. Shared libraries from web-app and enclosing app will not be scanned for TLDs
Cause: Loading of ChangeAwareClassLoader failed
Action: none
Level: 1
Type: TRACE
Impact: Deployment

J2EE JSP-00036: unable to obtain Tag Library listeners: {0}
Cause: An error was encountered while obtaining Tag Library listeners during the parsing of Tag Library Descriptors.
Action: Verify that classes given in the listener-classes element are available in the application's class path. Check for general XML syntax (i.e., unmatched quotes or start/end tags) in the application's TLD's.
Level: 1
Type: WARNING
Impact: Deployment

J2EE JSP-00037: cannot load tag library {0} specified in web.xml
Cause: A tag library defined in the application's web.xml file was not loaded.
Action: Verify that the taglib-uri and taglib-location are correctly formatted and point to valid values, and that the tag library implementations classes are available to the application.
Level: 1
Type: WARNING
Impact: Programmatic

J2EE JSP-00038: error preparing dependency file for tag file:
Cause: An error was encountered while writing or preparing the dependency file for a tag file.
Action: Recompile the page that accesses the tag file after checking factors that impact file writing such as disk space, permissions, and file handles.
Level: 1
Type: WARNING
Impact: Files

J2EE JSP-00039: invalid tag file: {0}. File must end with .tag or .tagx and start with /WEB-INF/tags or /META-INF/tags.
Cause: Encountered a tag file path that is an invalid or non-existent location.
Action: Correct the tagfile-path element value by ensuring that it ends with either .tag or .tagx, and starts with either /WEB-INF/tags or /META-INF/tags.
Level: 1
Type: WARNING
Impact: Programmatic

**J2EE JSP-00040: duplicate tag name : {0}. TLD is invalid**
*Cause:* A tag name that was used in more than one Tag Library Descriptor was visible to the application and caused an error.
*Action:* Tag names must be unique. Change the duplicate name in that tag or tag file element.

Level: 1
Type: WARNING
Impact: Programmatic

**J2EE JSP-00041: The value {0} is invalid for main mode.**
*Cause:* An invalid value for the main mode was detected.
*Action:* Valid values for the main mode are recompile, reload and justrun.

Level: 1
Type: WARNING
Impact: Configuration

**J2EE JSP-00042: The value {0} is invalid for debug.**
*Cause:* An invalid JSR45 debug parameter was specified.
*Action:* Valid values for debug are none, file and class.

Level: 1
Type: WARNING
Impact: Configuration

**J2EE JSP-00043: The value {0} is invalid for tags reuse.**
*Cause:* An invalid tags reuse parameter was specified.
*Action:* Valid values for tag resuse are compiletime, compiletime-with-release and none.

Level: 1
Type: WARNING
Impact: Configuration

**J2EE JSP-00044: error invoking the following JSP tag life-cycle method: {0}**
*Cause:* An internal error occurred. The JSP runtime failed to execute a method provided by the Oracle JSF Injection Provider. The JSP page in which the error occurred will not be serviced.
*Action:* Contact Oracle Support Services.

Level: 1
Type: WARNING
Impact: Programmatic

**J2EE JSP-00045: unable to scan annotation for tag {0}: {1}**
Cause: The tag implementation class given in the error text could not be scanned for annotations.

Action: See the error cited in the error message to determine what action is required.

Level: 1
Type: WARNING
Impact: Files

J2EE JSP-00046: Unable to load class {0} while scanning for annotated JSP tags.

Cause: The tag class for annotations cited in the error message was not scanned. The class appeared to be missing, or was unloadable.

Action: Make sure that the missing class is available in the application class path. Verify that the class file was generated with a jdk version that supports annotations.

Level: 1
Type: WARNING
Impact: Files

J2EE JSP-00047: unable to scan annotation {0}. It is not a JSP tag.

Cause: The class to be scanned does not implement the JspTag interface or cannot be loaded.

Action: Make sure the class is available in the application classpath and that it implements the javax.servlet.jsp.tagext.JspTag interface.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JSP-00048: annotation scanning is incomplete: {0}

Cause: Scanning for annotations in the Tag Library Descriptors, visible to the application, was not completed.

Action: Verify that the class is available in the applications classpath. If so, check application server log files for problems such as out of memory, file permissions, network access.

Level: 1
Type: WARNING
Impact: Files

J2EE JSP-00049: reading implicit.tld file at {0}

Cause:

Action:

Level: 16
Type: TRACE
Impact: Files

J2EE JSP-00050: Parameter {0} is no longer supported as of Oracle Containers for J2EE 11g. The parameter is ignored.
Cause: An application attempted to use the parameter cited in the error message that was desupported as of release 11G.

Action: You can avoid this message by removing the given parameter.

Level: 1
Type: WARNING
Impact: Configuration

J2EE JSP-00051: unable to write an auxiliary object during the page compilation: {0} {1}.

Cause: The auxiliary object required for tracking the JSP page dependencies could not be written to a file.

Action: Recompile the page after investigating the factors that impact file writing such as disk space, permissions, and file handles.

Level: 1
Type: NOTIFICATION
Impact: Files

J2EE JSP-00052: Using the ProviderURI {0} that is returned from custom provider for processing requests.

Cause: An application-specific provider was registered and used.

Action: none

Level: 1
Type: TRACE
Impact: Configuration

J2EE JSP-00053: The value {0} is an invalid value for generic servlet mode.

Cause: An invalid parameter for the generic servlet mode was specified.

Action: Use a valid parameter value. They include shared, single, none, and single_and_persist.

Level: 1
Type: WARNING
Impact: Configuration

J2EE JSP-00054: Unable to retrieve HttpApp object through ThreadState.

Cause: An application that did not use the default OC4J HttpApplication object failed to supply its own application context object.

Action: Supply the application context or allow the use of the default one.

Level: 1
Type: WARNING
Impact: Programmatic

J2EE JSP-00055: Setting JSP:Config parameter {0} = {1}.

Cause: The JSP:Config parameter cited in the message was set.

Action: none

Level: 32
Type: TRACE
Impact: Configuration

**J2EE JSP-00056**: The web.xml at {0} is version 2.3 but has a `<jsp-config>` element.
**Ignoring `<jsp-config>` element.**
**Cause:** Web.xml version 2.3 does not include support for `<jsp-config>`
**Action:** Either remove the `<jsp-config>` element or upgrade the web.xml to version 2.4 or higher

Level: 1
Type: WARNING
Impact: Other

**J2EE JSP-00057**: unable to determined the last-modified date of the file at path, {0}.
**Cause:** This is usually caused by an IO error. However this error may related to something that happened before this instance of OC4J started. This has been known to happen if at some point two processes attempted to write to the same file at the same time. This error can also occur if the file was last modified within one second of EPOCH (at 0 hour on January 1, 1970), in this case it should be ignored.
**Action:** Verify that the file is not corrupted. If it is not, this error can be ignored. You may use the touch command, in unix, to update the last modified date of the file to prevent subsequent logging of this error. If the file is corrupted attempt to determine the cause of the corruption and fix it, or Contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Other

**J2EE JSP-00058**: error attempting to parse web.xml at {0}.
**Cause:** Error parsing the web.xml file located at the path location listed in the log message.
**Action:** Attempt to fix the error in the web.xml file base on the information contained in the log message.

Level: 1
Type: WARNING
Impact: Deployment

**J2EE JSP-00059**: unable to inject a resource.
**Cause:** The exception cited in the error message occurred when the JSP page was processed.
**Action:** Read the exception cited in the error message to understand the cause. If no exception is shown, increase the log level to FINER.

Level: 16
Type: TRACE
Impact: Requests/Responses

**J2EE JSP-00060**: unable to parse the tld with the following url: {0}. Error details follow: {1}.
Cause: Failed to parse the tag specified in the error message.
Action: Read the error details cited in the error message and attempt to fix the offending tag, or remove it if it is not needed.
Level: 16
Type: TRACE
Impact: Requests/Responses
J2EE JSP-00061: there is a JSP error in file {0} at line {1}. The error is: {2}, in {3}.
Cause: A JspParse Exception was encountered.
Action: Examine the content of the error message which indicates the nature and location of the error. Then fix the error.
Level: 16
Type: TRACE
Impact: Requests/Responses
J2EE JSP-00062: unable to get the TLD document associated to file {0} at line {1}. The error is: {3}.
Cause: Internal error. Inconsistent gathering of performance statistics
Action: Examine the content of the error message which indicates the nature and location of the error. Attempt to fix the error. If that does not work, contact Oracle Support Services and give them the full error message.
Level: 16
Type: TRACE
Impact: Requests/Responses
J2EE JSP-00063: unable to read the jar file named {0}.
Cause: An input-output exception occurred while attempting to read the jar file specified in the message.
Action: Examine the content of the error message which indicates the nature and location of the error. Attempt to fix the error. If that does not work, contact Oracle Support Services and give them the full error message.
Level: 16
Type: TRACE
Impact: Requests/Responses
J2EE JSP-00064: unable to obtain URI because of an XML parsing exception in file, {0} at element, {1}.
Cause: An exception occurred in the XML parser while parsing for a URI.
Action: Examine the content of the error message which contains at least the name of the relevant file and most likely the name of the relevant XML element. Attempt to fix the error. If that does not work, contact Oracle Support Services and give them the full error message.
Level: 16
Type: TRACE
Impact: Requests/Responses
J2EE JSP-00065: unable to process the file at {0} due to an input-output exception.

**Cause:** An input-output exception prevented the processing of the file named in the log message.

**Action:** Examine the content of the error message which indicates the nature of the error as well as the location of the file involved. Attempt to fix the error. If that does not work, contact Oracle Support Services and give them the full error message.

**Level:** 16
**Type:** TRACE
**Impact:** Requests/Responses

J2EE JSP-00066: unable to find class named {0} in resource {1}.

**Cause:** The JSP runtime could not find the class specified in the message in the resource also specified in the message.

**Action:** Verify the resource in question and attempt to fix the error. If that does not work, contact Oracle Support Services and give them the full error message.

**Level:** 16
**Type:** TRACE
**Impact:** Requests/Responses

J2EE JSP-00067: unable to read optional data.

**Cause:** The JSP runtime encountered a java.io.OptionalDataException.

**Action:** Read the full error message and consult the Javadoc on OptionalDataException to understand the problem and attempt to fix it. If that does not work, contact Oracle Support Services and give them the full error message.

**Level:** 16
**Type:** TRACE
**Impact:** Requests/Responses

J2EE JSP-00068: invalid taglib uri: {0}, unless non taglib namespace was intended in a JSP document.

**Cause:** An invalid taglib uri was specified.

**Action:** Fix the taglib attributes in your jsp.

**Level:** 1
**Type:** NOTIFICATION
**Impact:** Configuration

J2EE JSP-00069: Name space, {0}, also known as {1} will override name space {2}

**Cause:** The namespace definition in the last tld defining the namespace override any previous definition of that namespace.

**Action:** See error message.

**Level:** 1
**Type:** WARNING
**Impact:** Other
J2EE JSP-00070: an unlikely, but generally harmless, situation has been detected. Additional information follows: {0}.

Cause: JSP encountered an rare situation. This should not cause any adverse effect on your application.

Action: If this occurs in the absence of other errors, this is most likely a benign situation, if accompanied by other error messages, this may help diagnose the root cause of the problem reported by the other error messages. You may contact Oracle Support Services to help us improve the product in future releases. Oracle Support Services may recommend increasing the log level to FINER to help understand the situation.

Level: 1
Type: WARNING
Impact: Requests/Responses

J2EE JSP-00071: Adding jar name {0} to the global cache with tlds {1}

Cause: Global cache with init-param 'global_app_taglib_jars' is enabled for this application. We will add the jar/tlds to the global cache.

Action: See error message.

Level: 1
Type: NOTIFICATION
Impact: Files

J2EE JSP-00072: Found jar name {0} in the global cache with tlds {1}

Cause: Global cache with init-param 'global_app_taglib_jars' is enabled for this application. We will use the jar/tlds previously cached from the global cache.

Action: See error message.

Level: 1
Type: NOTIFICATION
Impact: Files

J2EE JSP-00073: Error loading third-party EL library specified in the init-param of the Oracle JSP servlet {0}: {1}

Cause: The JSP runtime could not load the EL factory class specified in the init-param of the Oracle JSP servlet.

Action: Verify the third party EL library specified in init-param 'el_expression_factory' and attempt to fix the error. If that does not work, contact Oracle Support Services and give them the full error message.

Level: 16
Type: TRACE
Impact: Requests/Responses

J2EE JSP-00074: Unable to process third-party EL library specified in the init-param of the Oracle JSP servlet {0}: {1}

Cause: The JSP runtime could not process the EL factory class specified in the init-param of the Oracle JSP servlet.

Action: Verify the third party EL library specified in init-param 'el_expression_factory' and attempt to fix the error. Check the specified factory class for validity;
for example, the constructor for the specified factory class should be public. If all fails, contact the third-party for support.

Level: 16
Type: TRACE
Impact: Requests/Responses

J2EE JSP-00075: Unable to look up JRF helper API to query Exalogic optimization: {0}
Cause: The JSP runtime could not look up JRF helper API to query Exalogic optimization flag.
Action: Currently JRF supports only JBoss and WebSphere, other platforms are yet supported.

Level: 16
Type: TRACE
Impact: Requests/Responses

J2EE JSP-00101: Inconsistent use of the DMS (statistics aggregation) framework. The problem occurred in application, {0}, for this uri: {1}. {2}
Cause: Internal error. Inconsistent gathering of performance statistics
Action: Examine the error message to determine which statistics are inconsistent; those statistics should not be trusted. Contact Oracle Support Services and give them the full error message.

Level: 1
Type: ERROR
Impact: Performance

J2EE JSP-00111: the Oracle DMS framework is unavailable.
Cause: The JSP servlet could not find the Oracle DMS classes.
Action: If using a third-party application server, the DMS functionality will simply not be available. If using an Oracle Application Server, this message indicates that there is something wrong with the installation. In that case, contact Oracle Support Services and give them the full error message.

Level: 1
Type: WARNING
Impact: Installation

J2EE JSP-00300: unable to access osgi.syspath, {0}, even though it exists.
Cause: There is a problem with the path corresponding to System property osgi.syspath.
Action: Check that the path is valid, unlocked, and that WebSphere has read/write permissions for it.

Level: 1
Type: ERROR
Impact: Files

J2EE JSP-00301: unable to extract the local classpath field.
**Cause:** There is a problem extracting the local class path from the WebSphere class loader.

**Action:** Contact Oracle Support Services and ask for a patch if this prevents ojsp.next from functioning normally.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**J2EE JSP-00302: unable to determine the osgi pluggin classpath.**

**Cause:** There is a problem assembling the osgi plugin class path.

**Action:** Contact Oracle Support Services and ask for a patch if this prevents ojsp.next from functioning normally.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic
JBO-24000: no JAAS Context. Permission information is not available.
   Cause: An error occurred while initializing the Java Authentication and Authorization Service (JAAS).
   Action: Make sure that the JAAS configuration is correct.
   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-24001: Role {0} is not found.
   Cause: An error occurred while retrieving the role.
   Action: Make sure that the role information is correct.
   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-24002: User {0} is not found.
   Cause: An error occurred while retrieving the user.
   Action: Make sure that the user information is correct.
   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-24003: Attribute {2} in entity {1} is not updatable.
   Cause: An attempt was made to update the attribute, but the user did not have permission or the attribute was not updatable.
   Action: Make sure that the user permission and updatable setting for the attribute are correct.
   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-24004: Rows cannot be removed from entity {0}.
   Cause: An attempt was made to remove the row, but the user did not have permission or the entity was read-only.
**Action:** Make sure that the user permission and read-only setting for the entity are correct.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-24005: Rows cannot be created in entity [0].**

**Cause:** An attempt was made to create a row, but the user did not have permission or the entity was read-only.

**Action:** Make sure that the user permission and read-only setting for the entity are correct.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-24006: The entity already has permission defined.**

**Cause:** The entity already has permission defined.

**Action:** Modify permission def is not allowed.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-25000: SQL type {0} is invalid.**

**Cause:** An attempt was made to generate a null value for a domain with an invalid SQL type.

**Action:** Provide a valid SQL type name for the domain. Examples include VARCHAR, CHAR and NUMBER. See oracle.jbo.server.OracleTypeMapEntries for a full list.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-25001: Object [1] of type [0] already exists.**

**Cause:** An attempt was made to load a business component with the same name and type as another business component already loaded by the application module.

**Action:** Provide a different name for the business component. If a null value or null string is provided for the name, the framework will create a unique name within the scope of the application module.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-25002: Definition [1] of type [0] is not found.**

**Cause:** A definition object with the given name could not be found.
**JBO-24000 to JBO-80008**

**Action:** Provide a correct name for the business component definition (using the format 'packagename.objectname') and ensure that the definition is available on the classpath. This error can also occur if there is a case conflict, as when the database expects 'DEPTNO' and receives 'Deptno' instead.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25003: Object {1} of type {0} is not found.**  
**Cause:** A business component object with the given name could not be found in the application module.  
**Action:** Provide a different name for the business component object or create a new business component with the given name.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25004: Definition name {1} of type {0} is invalid.**  
**Cause:** An attempt has been made to load an invalid definition name or associate a definition name with a type for which it is not valid.  
**Action:** Ensure that the name is a valid Java identifier with no spaces or punctuation, and conforms to the format 'packagename.objectname'.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25005: Object name {1} of type {0} is invalid.**  
**Cause:** An attempt has been made to associate a business component name with an object for which it is not valid.  
**Action:** Ensure that the name is a valid Java identifier with no spaces or punctuation, and conforms to the format 'packagename.objectname'.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25006: Value {2} passed as parameter {1} to method {0} is invalid: {3}.**  
**Cause:** An attempt was made to invoke a business components method with an invalid parameter value.  
**Action:** Pass a correct value for the parameter. To determine the allowed values for a given parameter, check the Javadoc for the method that throws this exception. For example, Javadoc indicates that the 'DBTransactionImpl.ExecuteCommand' method throws this exception when the 'command' parameter is empty.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic
JBO-25007: The validation flag cannot be reset for a default iterator.
Cause: An attempt was made to reset the row validation flag for the default iterator of a rowset or view object.
Action: Reset the row validation flag for the rowset or view object instead. This will create a secondary iterator to allow the rowset or view object to navigate to another row without validating.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-25008: Object {0} cannot be removed because it is referenced by object {1}.
Cause: An attempt was made to remove a view object that is participating in a view link.
Action: Remove the view link before removing the view object.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-25009: Cannot create an object of type:{0} from type:{2} with value:{1}
Cause: A domain object could not be created with the given value. Either a domain constructor that accepts the given value does not exist, or there is no conversion method in the domain object for the given value type, or the domain constructor threw an unexpected exception.
Action: Ensure that the value being passed is valid with respect to the domain type being created. For example, passing the string value 'one' to the 'oracle.jbo.domain.Number' constructor will throw this exception.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-25010: A validation failure has occurred while creating a domain with value {0}.
Cause: Validation failed with the given value in a domain constructor. This exception is thrown in the domain type 'validate()' method.
Action: Provide a valid value for the domain type.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-25011: Rowset {0} is forward only.
Cause: An attempt was made to invoke an invalid navigation method on a forward-only view object or rowset.
Action: Either remove the forward-only setting for the view object or rowset, or do not invoke navigation methods other than 'next()' on the forward-only view object or rowset.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-25012: View object \{0\} does not have entity \{1\} as its primary base.

Cause: The client attempted to locate a view row that has the given entity row as its primary entity row. However, the entity row’s entity definition does not match the entity definition of the view object’s primary entity object base.

Action: Ensure that the entity row used to locate view rows is based on the same entity definition as the view object’s primary entity object base.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25013: Too many objects match the primary key \{0\}.

Cause: An attempt was made to add a newly fetched or created entity to the cache, but the new entity has the same primary key as an existing entity. The primary key must be unique for this entity type.

Action: Add more attributes to the key definition for the entity type, so that each row for this entity is uniquely identifiable. Or fix the primary key value so that this entity has a unique key identifier.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25014: Another user has changed the row with primary key \{0\}.

Cause: The database value does not match the cached value for this entity object. This could happen when another user or operation has committed modifications to the same entity row in the database. This exception can also be thrown if the ‘equals’ method on one of the domain type attributes in the entity fails.

Action: Choose from the following options: 1. Verify that another user or operation has not modified the same row in the database. If this entity has attributes of a domain type verify that the <code>equals()</code> method on these domains do not fail when comparing the existing cached value with the newly fetched value. 2. For any attributes/columns that are updated by the database, modify the entity attribute definition by selecting ‘Refresh after update’ on the Attribute Settings page of the Entity Object Wizard. 3. Use ‘view.executeQuery()’ frequently, especially after any operations that result in data being changed.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25015: Query collection \{0\} is closed.

Cause: An attempt was made to execute a query or access a row from a closed or removed view object or rowset.

Action: Verify that the view object or rowset is not removed or closed.

Level: 1
Type: ERROR
Impact: Programmatic
JBO-25016: View object {0} is read-only.
   **Cause:** An attempt was made to modify data for a view object which is declared to be read-only. This includes creating a new row for this view object, removing a row, or modifying attributes of a view row for this view object.
   **Action:** Create a view object with the read-only flag set to 'false' in order to modify data.
   **Level:** 1
   **Type:** ERROR
   **Impact:** Programmatic

JBO-25017: New entity row of type {0} cannot be created.
   **Cause:** An unexpected exception occurred while creating a new entity instance.
   **Action:** Ensure that the entity has a public default constructor. Fix the cause of the InstantiationException or IllegalAccessException that appears in the details of this exception.
   **Level:** 1
   **Type:** ERROR
   **Impact:** Programmatic

JBO-25018: New view row of type {0} cannot be created.
   **Cause:** An unexpected exception occurred while creating a new view row instance.
   **Action:** Ensure that the view row has a public default constructor. Fix the cause of the InstantiationException or IllegalAccessException that appears in the details of this exception.
   **Level:** 1
   **Type:** ERROR
   **Impact:** Programmatic

JBO-25019: Entity row with key {1} is not found in {0}.
   **Cause:** An attempt was made to lock a nonexistent row in the database. This could occur when the cache has an entity which was subsequently deleted from the database by another user or operation.
   **Action:** Remove the current entity from the entity cache by calling 'remove'. Or, synchronize the cache with the database by rolling back the current transaction or by committing the existing set of changes and then dropping the entity cache.
   **Level:** 1
   **Type:** ERROR
   **Impact:** Programmatic

JBO-25020: View row with key {1} is not found in {0}.
   **Cause:** An attempt to find a referenced entity in the view row failed due to a changed foreign key value.
   **Action:** Provide a valid foreign key value or remove the current one.
   **Level:** 1
   **Type:** ERROR
Impact: Programmatic

JBO-25021: Domain object type {0} cannot be created.

Cause: A domain object could not be created with the given value. Either a domain constructor that accepts the given value does not exist, or there is no conversion method in the domain object for the given value type, or the domain constructor threw an unexpected exception.

Action: Ensure that the value being passed is valid with respect to the domain type being created. For example, passing the string value 'one' to the 'oracle.jbo.domain.Number' constructor will throw this exception.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25022: A view link {0} already exists between source view object {1} and destination view object {2}.

Cause: An attempt was made to set the master rowset for this rowset more than once.

Action: Do not invoke 'setMasterRowSetIterator' more than once on a rowset.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25023: Operation {0} on domain value {1} of class {2} cannot be performed.

Cause: An unexpected domain exception occurred.

Action: Contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25024: Method {0} is obsolete.

Cause: An attempt was made to use an obsolete type map constructor.

Action: Verify that the type map is compatible with this version of the framework. See example type maps in 'oracle.jbo.server.OracleTypeMapEntries'.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25025: Rowset with XML tag {0} cannot be loaded.

Cause: An error occurred while reading the XML data for a view object. This exception might contain other ReadXMLExceptions.

Action: Fix the contained row-level or attribute-level exceptions in the details for this exception.

Level: 1
Type: ERROR
Impact: Programmatic
JBO-25026: Row {1} with XML tag {0} cannot be loaded.

Cause: An error occurred while reading the XML data for a view row. This exception might contain other ReadXMLExceptions for contained rowsets or attributes.

Action: Fix the rowset-level or attribute-level exceptions in the details for this exception.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25027: Attribute {1} at index {2} with XML tag {0} cannot be loaded.

Cause: An error occurred while reading the XML data for an attribute of a view row. This exception might contain other JboExceptions thrown from the set method for this attribute.

Action: Fix the JboException in the details for this exception.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25028: Domain object type {0} cannot be created: {1}.

Cause: A domain object could not be created with the given value. Either a domain constructor that accepts the given value does not exist, or there is no conversion method in the domain object for the given value type, or the domain constructor threw an unexpected exception.

Action: Ensure that the value being passed is valid with respect to the domain type being created. For example, passing the string value 'one' to the 'oracle.jbo.domain.Number' constructor will throw this exception.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25029: Domain class {0} is not found.

Cause: The named data class (typically a domain) could not be found.

Action: Ensure that the data class is accessible from the CLASSPATH and is a valid data class.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25030: Detail entity {0} with row key {1} cannot find or invalidate its owning entity.

Cause: No container entity was found for a detail entity in a composition association. This could occur if a nonexistent master key value was passed in during creation of a new detail entity instance, or if the foreign key value of this entity was modified so that it no longer matched any master entity.

Action: Pass a valid foreign key value to the 'create' method or 'setAttribute' method so that an appropriate master row is found for this entity.
Level: 1
Type: ERROR
Impact: Programmatic

**JBO-25031: View row for view object \{0\} is missing entity row for \{1\}.**

*Cause:* The client attempted to access an attribute of a view which is mapped to an entity row, but the corresponding entity row is null. If the view object consists of multiple entity object bases and if the secondary entity object bases are reference-only, the entity rows could be null if the foreign key linking the primary entity to the secondary entity object is null.

*Action:* Do not try to access attributes of missing entity rows in this situation.

Level: 1
Type: ERROR
Impact: Programmatic

**JBO-25032: Passivation to target store \{1\} is unsuccessful.**

*Cause:* A failure occurred while trying to passivate the application module or transaction state.

*Action:* Resolve the detail exception raised by the passivation target store (Database, File or Memory).

Level: 1
Type: ERROR
Impact: Programmatic

**JBO-25033: Activating state with id \{0\} from target store \{1\} is unsuccessful.**

*Cause:* A failure occurred while trying to activate the application module or transaction state.

*Action:* Resolve the detail exception raised by the passivation target store (Database, File or Memory) and ensure that the state snapshot ID exists in the target store.

Level: 1
Type: ERROR
Impact: Programmatic

**JBO-25034: Row with handle \{1\} is not found in rowset \{0\}.**

*Cause:* The client attempted to locate a row with a stale row handle. This error might be raised if the client tries to take a row out of one query collection and use its handle to find a row in another query collection. Note that if the client calls executeQuery on a rowset, it might receive a new query collection. Thus, this error might occur if the client retrieves a row from a rowset, takes its row handle, calls executeQuery, and then tries to locate the row using the saved handle. This exception might also be raised if a row reference is used across transaction boundaries and the row handle has become stale and hence the corresponding row cannot be found.

*Action:* Make sure that the row handle is not stale. One approach is to find the row again using its primary key before attempting to act on the row.

Level: 1
**Type:** ERROR  
**Impact:** Programmatic  

**JBO-25035: The application module passivation store is invalid.**  
**Cause:** An application attempted to change an application module's passivation store after it had been initialized. The passivation store (Database, File or Memory) can only be initialized once. If the customer application logic has not specified a passivation store when the serialization framework is invoked, the passivation store is initialized by the framework.  
**Action:** Check the client application logic for invocations of ApplicationModuleImpl.setStoreForPassiveState which are invoked after the application module passivation store has been initialized.  
**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic  

**JBO-25036: An invalid object operation was invoked on type {0} with name {1}**  
**Cause:** An application invoked an object operation that is not supported in the object's current state.  
**Action:** Remove the invalid operation invocation or provide exception handling logic.  
**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic  

**JBO-25037: Detail row set {0} is missing a master row set iterator for view link {1}, master view object {2}**  
**Cause:** This row set is a detail in a master-detail relationship, but it is missing a master row set iterator. Most likely, this occurred because a master row set iterator was removed through a call to removeMasterRowSetIterator() and has not been replaced with an appropriate one.  
**Action:** Call setMasterRowSetIterator() to provide a valid master row set iterator.  
**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic  

**JBO-25038: Value {2} passed as parameter {1} to method {0} is invalid.**  
**Cause:** An attempt was made to invoke a business components method with an invalid parameter value.  
**Action:** Refer to the documentation of error message JBO-25006 (EXC_INVALID_PARAMETER) for more information. The difference between this error message and EXC_INVALID_PARAMETER is that this version does not include an explanation. In general, Oracle recommends using JBO-25006 instead of JBO-25038.  
**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic
JBO-25039: No current row in row set iterator [0]
   Cause: The client attempted to work with the current row of a row set iterator,
   but the iterator has no current row.
   Action: Position the iterator to the correct row and perform the operation.
   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-25040: Row should be locked before getting an output stream from an attribute.
   Cause: The row containing a large object was not locked before attempting to call
   a method on the large object that could potentially change the data of the object.
   Action: Lock the row before attempting to get an output stream or write into a
   large object domain instance.
   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-25041: Type map cannot convert data from [1] to [0] with operation [2].
   Cause: The TypeFactory class asked the TypeMapEntries class to convert data,
   but the TypeMapEntries class did not know how to perform the conversion. This
   is typically an issue with the TypeMapEntries implementation.
   Action: Contact Oracle Support Services.
   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-25042: Row of trans post listener handle [0] not found in list.
   Cause: Entity row of the given handle is not found in transaction post listener list.
   Most likely cause of this error is as follows: the user requests certain operation.
   The operation tries to get access to the row in database. This fails for whatever
   reason (this exception's detail might have further information). The system tries to
   fix the problem at the entity level. It looks for the entity row in the transaction post
   listener list. The specified row is not found.
   Action: Look at the details and see if the cause can be determined from them.
   Check to see if concurrent updates to database could have caused the problem.
   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-25043: Extraneous key [0] of index [1] (in key-value array) passed to findByKey
   for view object [2].
   Cause: Extraneous key passed in to findByKey(). For example, suppose the View
   Object expects no more than a two-part key, but the key passed into findByKey is
   a three-part key. Then, this exception will be thrown.
   Action: Provide a valid key.
   Level: 1
Type: ERROR
Impact: Programmatic

JBO-25044: Application state snapshot is based on an older version of the application definition metadata.
Cause: An attempt was made to activate application module or transaction state based on an older metadata definition into an application module with a later metadata definition.
Action: Ensure that snapshots used for state activation were generated from the currently running version of the application definition metadata.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25045: Row set iterator [0] has detected an implicit synchronization attempt.
Cause: An attempt was made to implicitly synchronize an iterator in a 3-tier running environment. When the application module synchronization mode is set to SYNC_BATCH, iterator synchronization must be done explicitly.
Action: Remove code that attempts to synchronize the iterator implicitly.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25046: Requested row not available in row set iterator [0].
Cause: This exception is thrown when running in 3 tier SYNC_BATCH mode. The user requested a row, but that row is not available in the cache.
Action: Make appropriate API calls to bring the required row into cache. Then, try to get the row again.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25047: Attempt to make call to server detected for application module [0].
Cause: An attempt to make a call to server detected for an operation that is supposed to work only with client cache.
Action: Remove code/operation that attempts to call server.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25048: Operation [0] is invalid for a working set object.
Cause: This operation is invalid for this working set object. It might be because the operation doesn’t make sense in batch mode, or because the batch communication mode (WSApplicationModuleImpl.getBatchCommMode()) does not allow this operation.
Action: Remove code/operation that calls the named method of set the batch communication mode to allow this operation.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-25049: Entity \{0\} cannot be set to batch mode because a key attribute is marked as refresh-on-insert or refresh-on-update.
Cause: An attempt was made to set batch mode on an entity that has a primary key marked as refresh-on-insert or refresh-on-update.
Action: Remove the refresh-on-insert or refresh-on-update setting of the primary key attribute.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25050: Batch mode post operation failed. See Exception details for a list of failures.
Cause: Posting entities in batch mode failed with a set of exceptions
Action: Fix the cause for each of the exceptions in the details array.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25051: Row of range index \{1\} is not found in RowSetIterator \{0\}.
Cause: The client has attempted to locate a row with a range index, but the Row Set Iterator's range does not have a row at the index. It might be that the range index is too big (>= the range size), or that the range is at the bottom and the range index is beyond the last row of the Row Set. Or, the Row Set might have been reset because of operations like rollback and clear-cache. Hence, the range is empty and no row is found
Action: Make sure that the row set iterator is open and has rows in its range. Also, make sure that the range index falls between the first and the last row of the range.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25052: View object \{0\} with no key attributes cannot be activated.
Cause: A view object with no key attributes was configured to passivate one or more of its transient attributes. However, a view object without key attributes cannot participate in state passivation.
Action: Define one or more key attributes for this view object.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25053: Cannot navigate with unposted rows in a RangePaging RowSet.
Cause: An attempt has been made to navigate a rowset in Range Paging mode when the rowset has inserted/removed rows.
**Action:** Post this transaction before navigating.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25054: Cannot locate the specified stack snapshot id: {0}**

**Cause:** An attempt has been made to activate a stack snapshot that does not exist. The specified snapshot might already have been activated or the stack might already have been cleared by a previous rollback/commit.

**Action:** Ensure that stack snapshot ids are maintained by the application across transaction boundaries.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25055: Snapshot {0} cannot be removed.**

**Cause:** An attempt was made to remove a persistent snapshot that is referenced by the snapshot stack.

**Action:** Clear the snapshot stack before attempting to remove the referenced snapshot.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25056: Cannot call removeFromCollection() or removeAndRetain() on an Entity row: Entity name {0}**

**Cause:** An attempt has been made to call removeFromCollection() on an Entity row. It is illegal to call removeFromCollection() on an Entity row.

**Action:** Remove code that calls removeFromCollection() on an Entity row.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25057: Entity row update operation did not find matching row: Entity name {0}, key {1}**

**Cause:** In LOCK_OPTUPDATE locking mode, an attempt was made to update an Entity row. The update operation failed to update any row.

**Action:** Another user might have modified the row and committed the changes.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25058: Definition {1} of type {0} is not found in {2}.**

**Cause:** No business component definition found with the given name in the project classpath.
**Action:** Provide a correct name for the business component definition and ensure the definition is available on the classpath. Names are of the format `<code>myProjectPackage.BusinessPackage.BusinessComponent</code>`. This error can also occur if there is a case conflict, as when the database expects 'DEPTNO' and receives 'Deptno' instead.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25059: View Object [0] has ManageRowsByKey turned on, but its key definition is empty**

**Cause:** This View Object is not Entity based, and its ManageRowsByKey flag is true. Yet, its key definition is empty. Restated, the user has asked for the View rows to be managed by keys, but the key definition is empty (which would produce empty keys for all rows).

**Action:** In order to manage EO-less View Object by key, a meaningful (non-empty) key definition must be supplied.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25060: Unexpected error encountered while trying to retrieve the next row from JDBC ResultSet for collection [0]**

**Cause:** An unexpected exception was thrown while retrieving the next row from JDBC ResultSet.

**Action:** Take a look at the detail exception for further information and fix underlying problems.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25061: Cannot enable passivation for internal ViewObjects and rowsets.**

**Cause:** ViewRowSetImpl.setPassivationEnabled called for internal rowset

**Action:** Create a datamodel ViewObject instance and use rowsets from that ViewObject to make them passivation enabled.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25062: Cannot find a matching detail ViewObject. Link definition: [0], master row set iterator [1].**

**Cause:** An attempt was made to create detail rowset. However, no matching detail view object could be found.

**Action:** Ensure that a matching view object is present before attempting to create a detail rowset.

**Level:** 1  
**Type:** ERROR
Impact: Programmatic

JBO-25063: Operation {0} cannot be performed because the working set object is not bound.
Cause: This operation is invalid for this working set object because the working set object is not bound to actual implementation object.
Action: This action must be performed after the working set object is bound.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-25064: Variable {1} in RowSet {0} is not a where-clause parameter. It is of kind {2}.
Cause: A call was made to define or set a named where-clause parameter value. However, the named variable's 'kind' is not 'where'. That is, the variable is not a where-clause parameter.
Action: Make sure that the variable name is correct and that the named variable is a where-clause parameter.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-25065: Named where-clause parameter {0} does not belong to ViewObject {1}. It belongs to an object of type {2}.
Cause: An attempt was made to remove a named where-clause parameter. However, this where-clause parameter is owned by neither the RowSet nor the ViewObject. Therefore, the parameter cannot be removed.
Action: It is illegal to try to remove a named where-clause parameter that does not belong to either the RowSet or the ViewObject.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-25066: View Object {0} is based on an Entity built from Row Set. For such a View Object, cannot include QUERY_MODE_SCAN_DATABASE_TABLES in its query mode.
Cause: An attempt was made to include QUERY_MODE_SCAN_DATABASE_TABLES in the View Object's query mode (through a call to setQueryMode()). However, this View Object can perform query only through Entity Object. Hence, QUERY_MODE_SCAN_DATABASE_TABLES is inappropriate.
Action: The View Object is probably based on an Entity, which in turn is based on a RowSet (EntityDefOverRowSet). It is illegal to use QUERY_MODE_SCAN_DATABASE_TABLES for a View Object built on top of an Entity which is built over a Row Set. Do not include QUERY_MODE_SCAN_DATABASE_TABLES in the setQueryMode() invocation.
Level: 1
Type: ERROR
Impact: Programmatic
JBO-25067: Entity \{0\} has a subclass EO \{1\} and no discriminator. Therefore this base Entity cannot be used to create an Entity Row.

**Cause:** An attempt was made to create a new instance of an Entity Row. However, this Entity Definition has a subclass Entity Definition with no discriminator. That is, this Entity Definition should really be abstract.

**Action:** Typically in this situation, the base class should not instantiate any row. Use the subclass Entity to create the row.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

JBO-25068: Entity \{0\} has a base EO \{1\} with no discriminator, but base EO has rows in its cache. Cannot populate both caches.

**Cause:** An attempt was made to create a new instance of an Entity Row. However, this Entity Definition is a subclass Entity Definition with no discriminator, and a base EO has a row already instantiated. A conflict exists because nothing discriminates this Entity from the base Entity.

**Action:** Typically in this situation, the base class should not instantiate any row. Use the subclass Entity to create the row.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

JBO-25069: Row definition \{0\} has two sibling subclasses defs, \{1\} and \{2\}, but no discriminator to distinguish them.

**Cause:** Two sibling subclasses of a Row Definition are found, but the Row Definition has no discriminator. This condition is disallowed because when a row is either retrieved or created, the framework cannot determine the correct row class. That is, the hierarchy forks without a discriminator. The only situation whether subclassing is allowed without discriminator is when the tree is straight lined and only one of the classes in the hierarchy line is used to instantiate rows.

**Action:** Either define discriminator attributes, or do not create siblings in the row class hierarchy.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

JBO-25070: Where-clause param variable \{0\} needs ordinal index array.

**Cause:** This view object of entity is using Oracle number style binding (:1, :2, ... binding, not named binding) or JDBC style (? binding). A variable of where-clause-param kind is found, but the extended int array that designates where the value should be bound is missing.

**Action:** When defining a variable for where-clause param in conjunction with a binding style which is not Oracle named binding, specify an int array that designates where the value should be bound.

**Level:** 1  
**Type:** ERROR
Impact: Programmatic

JBO-25071: Applying List binding [1] with given set of values leads to multiple matching rows for a row of type:{0}, key {2}
Cause: ListBinding results in more than one matching row for the given set of mapping values. Only one matching row is expected.
Action: Provide a new set of mapping values that will end up in a single matching row or adjust the StructureDef metadata to allow defaulting to the first matching row.

Level: 1
Type: ERROR

Impact: Programmatic

JBO-25072: Applying List binding [1] with given set of values leads to no matching row for a row of type :{0}, key {2}
Cause: ListBinding failed to find any matching row for the given set of mapping values.
Action: Provide a new set of mapping values that will end up in a single matching row or adjust the StructureDef metadata to allow defaulting to the first matching row.

Level: 1
Type: ERROR

Impact: Programmatic

JBO-25073: Definition [1] of type {0} is hidden
Cause: Def object is hidden. An attempt was made to access a hidden def object.
Action: This particular operation is disallowed on a hidden def object. Avoid this operation.

Level: 1
Type: ERROR

Impact: Programmatic

JBO-25074: Definition [1] of type {0} is hidden in {2}, operation: {3}
Cause: Def object is hidden. An attempt was made to access a hidden def object in the specified container object.
Action: This particular operation is disallowed on a hidden def object. Avoid this operation.

Level: 1
Type: ERROR

Impact: Programmatic

JBO-25075: Definition {0} of type {1} is read-only. Cannot modify it
Cause: Attempting to modify or save data for a def object which is read-only.
Action: If the def object is shared, do not attempt to modify anything. If the def object is session scoped, do not modify it if there are running instances of that definition. If the def object is session scoped and is not being used by any running instance, mark it editable before modifying it.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-25076: Expression validator does not allow setting a value to source attribute: {0}.
Cause: Expression validator does not allow direct assignment of a value to an attribute. This is to avoid possible cycle of assignments/validations.
Action: Remove direct assignments. If assignment is necessary, verify there is no cycle, and then use constructs like 'source.MyVar = ..'.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25077: Name {0} not found in the given object: {1}.
Cause: An invalid name was passed in an expression.
Action: Fix the expression by passing in a correct name for a property.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25078: Key attribute {1} for {0} not populated
Cause: While building the where-clause statement for an entity row operation (e.g., fault-in, delete, or update), the named key attribute value is not populated.
Action: This entity row operation requires the key attributes to be populated. Make sure that all key attributes have values in them.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25079: The list of discriminator attributes for subclass {0} is different from that of the base {1}
Cause: In a subclass hierarchy of RowDefs, found a subclass RowDef whose discr attr list has more attrs than the base class. It is disallowed for a subclass to change discr attr list in the subclass hierarchy.
Action: Make sure that subclass RowDefs have the same set of discr attributes as the base class.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25080: Definition name: {0} does not match the file in which it is loaded from: {1}
Cause: An attempt has been made to load a definition metadata file named differently from the name or id of the top level xml element in the file.
Action: The name should be a valid Java identifier with no spaces or punctuation. The name or id of the top level xml element in the file should match the file name.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-25081: The new fetch size \{0\} passed into setFetchSize() for a view object \{2\} is invalid. It is smaller than the old value \{1\}.
Cause: The fetch size passed into <code>ViewObjectImpl.setFetchSize()</code> is smaller than the previous value. Fetch size of a view object cannot decrease.
Action: Specify a value which is bigger than the current value.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25082: Cannot change the access mode for the row set \{0\} because either the VO has more than one RS or the RS has more than one iterator.
Cause: An attempt has been made to change the row set's access mode from scrollable/forward-only to range-paging or vice versa. This is allowed only if the VO has one or no row set. Or, an attempt has been made to set the row set's access mode to forward-only, but this is allowed only if the row set has one or no iterator.
Action: Close other row sets or iterators before changing the access mode.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25083: Cannot create a secondary iterator on row set \{0\} because the access mode is forward-only or range-paging
Cause: An attempt has been made to create a new row set iterator on a row set whose access mode is either forward-only or range-paging.
Action: Creation of secondary row set iterator is allowed if the row set's access mode is scrollable.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25084: Cannot call last() on row set \{0\} because the access mode uses range-paging
Cause: An attempt has been made to jump to the last row on a row set whose access mode uses range-paging.
Action: Replace 'last' with 'setRangeStart' for the range-paging based access mode.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25085: The value being set for attribute \{0\} does not match the value derived from list binding \{1\}
**Cause:** An attribute value being set does not match the attribute value derived from a list binding. This typically happens in the following situations. First, suppose the user sets values for Deptno from 10 to 20 and Dname from ABC to DEF. If a list binding is triggered by Deptno and if it sets Dname to XYZ, the result is an inconsistent state where DEF does not match XYZ. In this situation, this exception is thrown. Second, suppose there is an EmpDept view object with Emp and Dept entity bases. Suppose Dept is reference and read-only and there is a list binding on Dept.Dname whose derived attribute is Emp.Deptno. If the user selects a new Dept through the dept name, a new Dept entity row is brought in (because a new Emp.Deptno is chosen). After this, the framework checks to make sure that the Dname coming from the new entity row matches the original selection from the list binding. If they do not match, this exception is thrown.

**Action:** Make sure the list binding definition and attribute set values end up in a consistent result (i.e., the derived values from the list binding match the row’s attribute values).

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

**JBO-25086:** Operation {1} cannot be performed until definition {0} is resolved.

*Cause:* An attempt was made to use a def object before resolving it. The def object must be resolved first.

*Action:* Make sure resolveDefObject() is called before this operation.

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

**JBO-25087:** Cannot call getRowCount() on row set {0} because the access mode uses range-paging

*Cause:* An attempt has been made to get the row count of a row set whose access mode uses range-paging.

*Action:* Replace getRowCount() with getEstimatedRowCount() for range-paging based access mode.

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

**JBO-25088:** Persdef {0} has no static definition set

*Cause:* An attempt was made to perform an operation on a persdef that requires the static definition object, but the persdef has no static definition.

*Action:* Set the static definition object before attempting the operation.

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

**JBO-25089:** View object {0} attempted to fetch rows beyond the row limit

*Cause:* The view object attempted to fetch rows beyond a global row limit.
Action: If in a search region narrow down the results by providing more search criteria otherwise contact your system administrator.

Level: 1  
Type: ERROR  
Impact: Programmatic

JBO-25090: Attribute value {3} leads to duplicate keys for this entity type {1}.
Cause: An attempt was made to set an attribute value that leads to addition of a newly fetched or created entity to the cache, but the value makes the entity key same as another existing entity. The primary key must be unique for this entity type.
Action: Add more attributes to the key definition for the entity type, so that each row for this entity is uniquely identifiable. Or fix the key value so that this entity has a unique key identifier.

Level: 1  
Type: ERROR  
Impact: Programmatic

JBO-25091: View object {0} has no primary entity
Cause: An attempt was made to get the primary post state of a view row that has no entity usages.
Action: Only call this method on a view row with one or more entity usages

Level: 1  
Type: ERROR  
Impact: Programmatic

JBO-25092: Programmatically accessible view object definition {0} is not found.
Cause: An attempt has been made to find a view definition using a short name and no corresponding custom or standard object can be found.
Action: Use a shortname that corresponds to the name of a custom object in a registered custom object base package or else the name of a standard object that has been registered to be programmatically accessible.

Level: 1  
Type: ERROR  
Impact: Programmatic

JBO-25093: Attribute {0} is being modified, while it is being validated causing an infinite loop.
Cause: An attempt was made within an expression or validation rule to update an attribute while that attribute is being validated.
Action: Remove the call to set the erring attribute value

Level: 1  
Type: ERROR  
Impact: Programmatic

JBO-25150: The method {1} on class {0} is not permitted.
Cause: An attempt was made within an untrusted expression to call a method not on the list of allowed methods.

Action: Add the method to the list of allowed methods in adf-config.xml

Level: 1
Type: ERROR
Impact: Security

JBO-25151: Accessing the {1} property on class {0} is not permitted.

Cause: An attempt was made within an untrusted expression to access a property not allowed by methods on the list.

Action: Add the get and set methods corresponding to the property to the list of allowed methods in adf-config.xml

Level: 1
Type: ERROR
Impact: Security

JBO-25152: Calling the constructor for class {0} is not permitted.

Cause: An attempt was made within an untrusted expression to call a constructor not on the list of allowed constructors.

Action: Add the constructor to the list of allowed constructors in adf-config.xml.

Level: 1
Type: ERROR
Impact: Security

JBO-25153: Calling the {1} method on class {0} is not permitted.

Cause: An attempt was made within an untrusted expression to call a constructor not on the list of allowed constructors.

Action: Use an alternate method.

Level: 1
Type: ERROR
Impact: Security

JBO-25154: Calling the {1} function is not permitted.

Cause: An attempt was made within an untrusted expression to call a method which is on the list of blacklisted methods on scripts.

Action: Rename the method, or call it from a trusted context.

Level: 1
Type: ERROR
Impact: Security

JBO-25155: Defining an additional method is not permitted.

Cause: An attempt was made within an untrusted expression to define an additional method.

Action: Create the same logic without the use of an embedded method, or mark the script as trusted.
Level: 1
Type: ERROR
Impact: Security
JBO-25156: Defining an additional class is not permitted.
Cause: An attempt was made within an untrusted expression to define an additional class.
Action: Create the same logic without the use of an embedded class, or mark the script as trusted.

Level: 1
Type: ERROR
Impact: Security
JBO-25157: Calling the {1} method on class {0} is not permitted when used in a static context.
Cause: An attempt was made within an untrusted expression to call a method which is blacklisted when used in a static context.
Action: Instead use the method on an instance of the class.

Level: 1
Type: ERROR
Impact: Security
JBO-25158: Accessing the {1} property is not permitted.
Cause: An attempt was made within an untrusted expression to use a property on the list of blacklisted properties.
Action: Instead access the property with an allowed method.

Level: 1
Type: ERROR
Impact: Security
JBO-25159: Accessing the {1} property, when used in a static context on class {0}, is not permitted.
Cause: An attempt was made within an untrusted expression to use a property in a static context on the list of blacklisted properties.
Action: Instead access the property with an allowed method, or use in an instance context.

Level: 1
Type: ERROR
Impact: Security
JBO-25160: Defining a method pointer is not permitted.
Cause: An attempt was made within an untrusted expression to define a method pointer.
Action: Create the same logic without the use of a method pointer, or mark the script as trusted.
Type: ERROR
Impact: Security

JBO-25161: Calling the {1} function is not permitted.
  Cause: An attempt was made within an untrusted expression to call a method which is not allowed on scripts.
  Action: Rename the method, or call it from a trusted context.

Level: 1
Type: ERROR
Impact: Security

JBO-25162: Using the Java field operator (.@) is not permitted.
  Cause: An attempt was made within an untrusted expression to directly access a Java field via '.@'.
  Action: Create the same logic without the use of the '.@' operator, or mark the script as trusted.

Level: 1
Type: ERROR
Impact: Security

JBO-25170: Expression timed out.
  Cause: An untrusted expression exceeded the maximum time allotted for a run.
  Action: Break the task up into multiple tasks, increase the timeout value, or mark the script as trusted.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25171: Expression exceeded the maximum number of new view instances ({0}).
  Cause: An untrusted expression exceeded an allowed use of resources.
  Action: Change your expression to use fewer resources.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25180: Exception in expression "{0}": {2}
  Cause: An exception has occurred within a Transient Expression.
  Action: Examine the details to find the root cause, and modify the expression to avoid the root exception.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25181: Exception in expression "{0}" recalc expression {1} : {2}
  Cause: An exception has occurred within a Recalc Expression.
**Action:** Examine the details to find the root cause, and modify the Expression to avoid the root exception.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25182: Exception in expression "\{0\}" validation rule {1} : {2}**  
**Cause:** An exception has occurred within a Validation Rule expression.  
**Action:** Examine the details to find the root cause, and modify the expression to avoid the root exception.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25183: Exception in expression "\{0\}" trigger {1} : {2}**  
**Cause:** An exception has occurred within a Trigger expression.  
**Action:** Examine the details to find the root cause, and modify the expression to avoid the root exception.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25184: Exception in expression "\{0\}" object function {1} : {2}**  
**Cause:** An exception has occurred within an Object Function.  
**Action:** Examine the details to find the root cause, and modify the function to avoid the root exception.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25185: Exception in expression "\{0\}" global function {1} : {2}**  
**Cause:** An exception has occurred within an Object Function.  
**Action:** Examine the details to find the root cause, and modify the function to avoid the root exception.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-25186: Exception in expression "\{0\}" of unknown type {1} : {2}**  
**Cause:** An exception has occurred within an expression of unknown type.  
**Action:** Examine the details to find the root cause, and modify the expression to avoid the root exception.

**Level:** 1  
**Type:** ERROR
**Impact:** Programmatic

**JBO-25200: Application module is not connected to a database.**
*Cause:* The application module is not connected to the database.
*Action:* Provide a valid set of connection credentials to connect to a database.

**Level:** 1  
**Type:** ERROR

**Impact:** Programmatic

**JBO-25201: A database connection already exists.**
*Cause:* An attempt was made to reestablish a database connection.
*Action:* Disconnect the current database connection before trying to reestablish the JDBC connection.

**Level:** 1  
**Type:** ERROR

**Impact:** Programmatic

**JBO-25221: Method {0} not supported**
*Cause:* Attempting to call a method that is either not implemented or not supported.
*Action:* This method is not available on the called object. E.g. `<code>setAttribute()</code>` in `<code>oracle.jbo.Key</code>` class is not implemented and will throw this exception.

**Level:** 1  
**Type:** ERROR

**Impact:** Programmatic

**JBO-25222: Unable to create application module.**
*Cause:* The application module was typically not created for one of the following reasons: 1. Business components deployed in local mode were not found on the classpath. 2. Unresolved classes existed on the server. 3. Java2 permissions were not granted. 4. Java pool size was too small.
*Action:* Depending on the cause, chose from the following actions: If business components are deployed in local mode, they might not be on the classpath.  
If this is the cause of the error, the exception will usually be followed by a different exception, JBO-25002: NoDefException. If this occurs, try the following: Make a library for the business components. Add the library to the client’s project properties. Include the library on the ‘libraries’ page when creating a deployment profile for the client (whether the client was a web application or a command-line application). Copy the library with the client to the target platform (whether the client was a web application or a command-line application). Include all the copied files (including the library) when setting the classpath on the target platform. There might be unresolved classes on the server. Try the following procedure to resolve any unresolved classes on the database. In the System Navigator, right-click the JDBC connection used to deploy the Business Components project. Choose Invoke SQLPlus from the context menu. Copy and paste the following SQLPlus script into the SQLPlus window. set termout off set echo off set heading off set pages 999 set linesize 2000 set feedback off select ‘alter java class ‘ || replace(dbms_java.longname(object_name),’/’,’.’) || ‘’ resolve;’ from user_objects where object_type=’JAVA CLASS’ and status = ‘INVALID’ spool
C:\temp\resolve.sql / spool off set echo on set termout on @C:\temp\resolve.sql
There might be missing Java2 permissions. If this is the cause of the error, there
will be permissions errors in the database trace file. To correct the problem, see the
help topic 'Granting Permissions on a Business Components EJB' for information
on granting Java2 permissions. Note: The location of the database trace file varies
from installation to installation, but in a default Windows NT installation, the file
will be in the directory ORACLE_HOME\admin\orcl\udump and will have the
form orclnnnn.trc. The Java pool size might be too small Business Components for
Java deployed as EJBs work best with a Java pool size of at least 50MB. Edit the
init.ora file and check the <code>java_pool_size</code> parameter. If it is under
50MB, change it, restart the database, and try the connection again.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25223: Cannot create multiple root application modules.
Cause: When business components are running inside JServer, only one root
application module can be created. This is because JServer (already) provides one
transaction context.
Action: It is illegal to attempt to create multiple root transactions when running
inside JServer.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25224: Could not disconnect and retain application module state because
database state exists for current connection.
Cause: Trying to retain the application module state during a transaction
disconnect failed.
Action: The disconnect and retain application module state target requires that no
database state exist before the transaction connection is closed. Examples of
database state include open database cursors in non-forward only view objects,
database locks, and uncommitted database changes. The client should clean up
this state by fetching or resetting any open view objects and committing any
uncommitted changes.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25226: Application module definition {0} contains recursive AM reference.
Cause: This application module definition contains recursive references to child
application modules. For example, if application module definition appMod1
contains a child application module of appMod2, and appMod2 contains
appMod1, this error will be raised.
Action: Remove recursive application module definition references.

Level: 1
Type: ERROR
Impact: Programmatic
JBO-25227: Recursive view links found. Master-detail chain: {0}.

**Cause:** The user has attempted to create a view link (in an application module) that will result in a recursive loop of view links. The error message should show a chain of recursive master-detail relationships.

**Action:** If a static view link is causing the recursion, remove the view link from the application module. If a dynamic view link is causing the recursion, remove the code that creates the recursive view link.

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

JBO-25228: Unable to register a database change notification request for {0} view object

**Cause:** The View Object that has auto refresh turned on failed to register an Oracle database change notification request.

**Action:** Ensure that the database user is granted CHANGE NOTIFICATION privilege. Look at the exception details for further troubleshooting.

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

JBO-25229: Unable to unregister a database change notification request for {0} view object

**Cause:** The View Object that has auto refresh turned on failed to unregister an Oracle database change notification request.

**Action:** Look at the exception details for further troubleshooting.

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

JBO-25230: XML document {0} has no stream to save

**Cause:** An attempt was made to save XML document, but the document has not been persisted (most likely saveXMLContents() is called without a call to writeXMLContents()).

**Action:** Call writeXMLContents() first.

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

JBO-25301: Application module {0} is not a root app module but has no parent

**Cause:** While traversing the parenthood chain for application modules, a child application module was found with no container (parent) application module.

**Action:** If this application has added custom business component classes, the application code might be attempting to access a child application module before it is fully initialized. If this is not the case, this error probably represents some internal error in the framework, in which case contact Oracle Support Services.

**Level:** 1
Type: ERROR
Impact: Programmatic

JBO-25302: Component object {0} has no parent
Cause: A business component is found without a container (parent) application module.
Action: If this application has added custom business component classes, the application code might be attempting to access a business component before it is fully initialized. If this is not the case, this error probably represents some internal error in the framework, in which case contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25303: Cannot clear entity cache {0} because it has modified rows
Cause: A dirty entity cache cannot be cleared. The client asked to clear an entity cache but some rows in the entity cache have been modified. An entity cache with modified rows cannot be cleared.
Action: Do not attempt to clear an entity cache with modified rows in it.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25306: Design-time attribute {0} of type {1} could not be persisted
Cause: Could not persist a design-time attribute into the XML file.
Action: Identify the offending design-time attribute and contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25307: XML file not open
Cause: XML file is not open.
Action: Contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-25308: The primary key of an existing entity bean cannot be modified for entity facade {0}.
Cause: An attempt was made to modify the primary key of an existing entity bean. This is disallowed by EJB.
Action: Do not modify primary key of an old (not-new) entity bean.

Level: 1
Type: ERROR
Impact: Programmatic
JBO-25309: The primary key of an entity bean cannot be null for entity facade {0}.
   Cause: The primary key of an entity bean is null. This is disallowed by EJB.
   Action: Set the primary key to be not null.

   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-26000: A Generic exception occurred during loading Customizations.
   Cause: Metadata objects failed to load due to unexpected or corrupt data in the XML file.
   Action: Verify that the XML metadata for various components is valid.

   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-26001: XML File not found for the Container {0}
   Cause: Could not open the named XML file for reading.
   Action: Try the following: Make sure that the file is present. In particular, if the file is to be found in a Zip/JAR file, make sure that the Zip/JAR file is included in the CLASSPATH. This error is also reported if the name of the XML file does not match the object Name specified in the XML file. If the file system supports case insensitive file names (e.g., Windows NT), make sure that the file name matches the object Name in the XML file in case-sensitive fashion. For a JPX file, this error is reported if the JPX file is missing the JboProject XML tag. Check the JPX file to make sure that the valid tag is in there. One XML file might be extending another XML file (specified by the Extends element in this XML file). This error is reported if the base XML file is not found. When loading the XML file for a package (JboPackage tag), this error is reported if some unexpected error occurs while loading a contained object. In all of the above cases, a more descriptive message might be printed on Diagnostic. To see these messages, run the application with Diagnostic turned on, as in 'java -Djbo.debugoutput=console ...', to see Diagnostic messages.

   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-26002: Error Parsing the XML file "{0}".
   Cause: Some XML parsing exception
   (<code>oracle.xml.parser.v2.XMLParseException</code>) was thrown.
   Action: The XMLParseException information is output to Diagnostic. To see diagnostic messages, run the application with diagnostic turned on, for example 'java -Djbo.debugoutput=console ...'

   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-26003: Mismatch in the attribute indices declared in Java versus the indices in the definition for entity {0}.
**Cause:** An error occurred while loading entity object definitions. An attribute index in the Java class for this entity has a mismatch with the index in the definition, or an attribute index is missing in the Java class.

**Action:** Ensure that the indices of attributes in the definition for this entity match the indices defined in the Java class for this entity.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-26004:** A recursive base definition is found while attempting to set the base definition of [0] to [1].

**Cause:** An attempt was made to set the base definition of another definition object, e.g., setting B’s base definition to A (i.e., B Extends A). However, A already extends B. Setting a recursive (circular) subclassing relationship among definition objects is illegal.

**Action:** Review the subclassing hierarchy of the definition objects and correct errors.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-26005:** FetchMode must be either FETCH_AS_NEEDED, FETCH_ALL or FETCH_DEFAULT. View object [0]

**Cause:** The fetch mode specified in the view definition XML file is not valid.

**Action:** Check the content of the XML file for the view definition. Look for an XML element named ‘FetchMode’. Make sure that the value for that element is valid. Valid values are: ‘FETCH_AS_NEEDED’, ‘FETCH_ALL’, and ‘FETCH_DEFAULT’

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-26006:** FetchSize must be a positive integer. View object [0]

**Cause:** The fetch size specified in the view definition XML file is not valid.

**Action:** Check the content of the XML file for the view definition. Look for an XML element named ‘FetchSize’. Make sure that the value for the element is a positive integer.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-26007:** MaxFetchSize should be MAX_FETCH_UNLIMITED, MAX_FETCH_DEFAULT or integer. View object [0]

**Cause:** The maximum fetch size specified in the view definition XML file is not valid.

**Action:** Check the content of the XML file for the view definition. Look for an XML element named ‘MaxFetchSize’. Make sure that the value for the element is a
non-negative integer, or 'MAX_FETCH_UNLIMITED', or 'MAX_FETCH_DEFAULT'. A MaxFetchSize of 0 is the same as MAX_FETCH_UNLIMITED.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26008: Could not resolve reference to "(0)".
Cause: A problem is found in resolving a view link definition or an association. In case of a view link, this error might be caused by the fact that the source or destination view object cannot be found. Or, if the view link ends have attribute names, this error might indicate that the named attributes cannot be found. Similarly, for an association, this error indicates that either source or destination entity object or attributes involved in the association cannot be found.
Action: Make sure the XML definition for the view link/association has correct view object/entity object/attribute names.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26009: Serialized file "(0)" is invalid. The root object is not a Business Component object.
Cause: This error occurs if the application uses meta object serialization files (.ser files) instead of XML files. It indicates that after the .ser file was deserialized, the top level object returned from deserialization was not an instance of oracle.jbo.server.xml.JboElementImpl.
Action: Repair the corrupt .ser file.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26010: Invalid Entity Attribute Name "(1)" specified for the View Attribute "(0)"
Cause: Entity attribute name in the view definition XML file is invalid or is not found.
Action: Make sure that the entity name is valid. Also, check to make sure that the named attribute does exist in the entity object. The entity object is identified by the EntityUsage element.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26011: SQLType not specified for the View Attribute "(0)"
Cause: Attribute definition found in XML file is invalid. It is missing SQLType value.
Action: Correct the error in the XML file.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26012: Invalid View Link Definition "(0)". View Link must have two ViewLinkDefEnds.
Cause: The view link definition in the XML file is missing either the source or destination view link end. For a view link XML file, two elements named ViewLinkDefEnd should be found.
Action: Correct the error in the XML file.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26013: Naming Exception occurred while looking up the object "(0)".
Cause: Meta object name passed for lookup is invalid.
Action: Normally, the meta object name is a dot-separated name of the meta object. For an entity object named Emp in package1.example, the correct name would be <code>package1.example.Emp</code>. To correct, locate where the invalid name is coming from (could be meta object names mentioned in an XML file, or the name of the project, etc.) and change the name to a valid one.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26015: View object (0) does not include a discriminator column (2) of entity base (1).
Cause: A view definition does not include a discriminator column of an entity base. If an entity base has discriminator columns, it must include all of them in the view object's attribute mapping.
Action: Change the view definition to include discriminator column attributes.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26016: Cannot set user query to view "(0)" because it is a destination in a view link
Cause: An attempt was made to call 'setQuery()' on a detail view object in a master detail view link.
Action: Do not call setQuery() if the view object is a detail.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26017: Association or view link definition (0) has an invalid attribute list.
Cause: The association or view link definition has a missing or invalid attribute list.
Action: Correct the error(s) in the XML file.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26018: Entity [0] cannot be posted to the database because it has no attributes set.
Cause: An attempt was made to post a row with no attribute set. Some databases (Oracle Database in particular) do not allow an INSERT statement with no VALUE specified.
Action: Set some attributes on the row before attempting to insert it into the database.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-26019: Attempting to remove a parent entity without removing all children entities
Cause: Attempting to remove a master which has detail entities. In the case of a composition, a master cannot be removed if it has details.
Action: Remove all the details of this master by accessing the details via an association and removing all of them.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-26020: Attempting to insert row with no matching EO base
Cause: The application code tried to take a row from one row set (or view object) and insert it into another row set (view object). In response, the framework will make a copy of the row in the new row set. This new row will share references to the underlying entity objects. However, if the source and destination row sets do not share any entity object bases at all, this operation will fail as it does not find any entity rows to share.
Action: When attempting to take a row from one row set and insert into another, make sure that they share at least one entity object base.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-26021: NullPointerException while parsing XML file "[0]". Perhaps missing DTD file?
Cause: A NullPointerException was thrown while parsing an XML file. A possible cause for this is that the DTD file is missing (oracle.jbo.dtd.jbo.dtd).
Action: Make sure the appropriate DTD file is present.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-26022: Custom class [0] cannot be found.
**Cause:** A custom class could not be found and loaded. The custom class might be for a component (for example, view object), a definition (for example, view definition), or a row (for example, view row or entity row).

**Action:** Make sure that the named class is reachable from the CLASSPATH. The detail exception (if present) provides more specific reasons why the attempt to locate and load the custom class failed.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-26023: Custom class \(0\) is not assignable to \(1\)**

**Cause:** Custom class was found and loaded, but it is invalid in that it is not assignable to a framework (super) class.

**Action:** Make sure that the custom class subclasses the appropriate framework (super) class.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-26024: An error occurred while creating InitialContext**

**Cause:** An error occurred while creating initial context. This error usually carries a detail exception which will give further information on the cause of the error.

**Action:** When running inside JServer, make sure that the database user (schema) has the setContextClassLoader permission. To grant this, the database system administrator can invoke the following PL/SQL procedure: EXEC DBMS_JAVA.GRANT_PERMISSION('&&1', 'SYS:java.lang.RuntimePermission', 'setContextClassLoader', null);

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-26025: An error occurred while trying to get System properties**

**Cause:** An error occurred while trying to get System properties. Specifically, System.getProperties() call failed.

**Action:** When running inside JServer, make sure that the database user (schema) has the proper property permission. To grant this, database system can invoke the following PL/SQL procedure: EXEC DBMS_JAVA.GRANT_PERMISSION('&&1', 'SYS:java.util.PropertyPermission', '', 'read');

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-26026: An error occurred while loading properties from a properties file \(0\)**

**Cause:** An error occurred while trying to get load properties.

**Action:** Check to see if the named properties file contains valid Java properties.

**Level:** 1
Type: ERROR
Impact: Programmatic

JBO-26027: Unable to find resource. {0}
  Cause: Unable to find a resource
  Action: Check to see if the resource exists and the framework code has adequate permissions to load the resource.

  Level: 1
  Type: ERROR
  Impact: Programmatic

JBO-26028: View object {0} does not include a primary key attribute {2} of entity base {1}.
  Cause: A view definition does not include a primary key attribute of an entity base. When a view object uses an entity as one of its entity bases, it must include all primary key attributes of the underlying entity object.
  Action: Change the view definition to include all primary key attributes.

  Level: 1
  Type: ERROR
  Impact: Programmatic

JBO-26029: Could not find and load the type map class {0}
  Cause: Custom type map class could not be found and loaded.
  Action: Make sure that the named class is reachable from the CLASSPATH. If jbo.TypeMapEntries property is specified, make sure that the property value is correct. Also, though unlikely, this might be caused by an improper implementation of SQLBuilder where it is returning an incorrect value for type map class name. The detail exception (if present) will provide more specific reasons why the attempt to locate and load the custom class failed.

  Level: 1
  Type: ERROR
  Impact: Programmatic

JBO-26030: Failed to lock the record, another user holds the lock.
  Cause: This row has already been locked by another user or transaction.
  Action: Try locking the row again and the operation should succeed after the other user or transaction has released the lock.

  Level: 1
  Type: ERROR
  Impact: Programmatic

JBO-26031: Association end {0} of assoc {1} invalid for entity base {2} in view object {3}.
  Cause: Problem in secondary entity base definition in view definition. The named entity base is supposed to use the named entity association end to join it with another entity base, but, when resolved with the association definition, the association end does not resolve to the same entity. For example, suppose one builds a view object with Dept and Emp. Emp is supposed to join with Dept using
the EmpEnd of the DeptEmp association. For such a view definition, the framework verifies that EmpEnd indeed is from Emp entity. If EmpEnd was from another entity, say Person (or Dept), it would not be correct to use that association end to perform join.

**Action:** Most commonly, this is caused by incorrect information in the view object XML file. Make sure that the association end for the named entity usage is not pointing at the wrong end of association.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-26032:** Operation \{0\} is invalid for a ViewCriteria or ViewCriteriaRow.  
**Cause:** The attempted operation is invalid for a ViewCriteria or ViewCriteriaRow.  
**Action:** Remove code that attempts this operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-26033:** Cannot find Application Data Model with name \{0\}  
**Cause:** Cannot find application definition of the given name  
**Action:** Fix the application definition name or make the appropriate .cpx file available in the classpath.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-26034:** Cannot find Configuration with name \{0\}  
**Cause:** Cannot find configuration information in the application definition file  
**Action:** Fix the Configuration name or make the appropriate .cpx file available in the classpath.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-26035:** Secondary entity usage \{0\} is missing parts of association description.  
**Cause:** A view definition is found with an entity usage definition where the secondary entity usage’s association description is incomplete.  
**Action:** Examine the view object’s XML file. A secondary entity usage’s association description should have the following elements: 'Association', 'AssociationEnd', and 'SourceUsage'. Check to see if any of these are missing.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-26036:** The configuration of meta object \{0\} causes recursive substitution.
**Cause:** An attempt was made to set up meta object substitution that leads to recursion. For example, consider a substitution where C substitutes B, and B substitutes A, and A substitutes C. This results in a recursive substitution and will cause this error.

**Action:** Review the meta object substitution and correct errors.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-26037:** Cannot find matching EO from discriminator columns for view object {0}, entity base {1}, discr value {2}.

**Cause:** While creating a new view row, the system found an entity object base with discriminator column attributes. However, the discriminator column values coming from the view row do not match any of the entity objects (the entity for the entity object base or any of its extended entities).

**Action:** Make sure that the view row discriminator column values match one and only one entity object.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-26038:** Cannot find an entity usage for entity {1} in view link definition {0}, view link end {2}.

**Cause:** The view link definition is based on an entity association. One of its ends specifies the named entity definition, but the view definition for that view link end does not have an entity usage for that entity definition.

**Action:** Correct the error in the view link definition (XML file). In particular, check to see if the view link source and destination are not switched with those of the entity association.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-26039:** View object {0} does not include an alternate key attribute {2} of entity base {1}, entity key {3}.

**Cause:** A view definition does not include an alternate key attribute of an entity base. When a view object uses an entity as one of its entity bases, and when it defines a view object level alternate key using one of the entity alternate keys, it must map the entity attributes that make up the alternate key.

**Action:** Change the view definition to include all necessary alternate key attributes.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-26040:** Failed to post entity {1} to database during "{0}" : SQL Statement "{2}".
**Cause:** Some database error occurred while posting (writing) an entity to the database in JDBC batch mode. This error normally carries a detail exception from the database which will give further information about the database failure.

**Action:** Look at the details of the exception and address the database problem.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-26041:** Failed to post data to database during "(0)"; SQL Statement "(1)".

**Cause:** Some database error occurred while posting (writing) an entity to the database. This error normally carries a detail exception from the database which will give further information about the database failure.

**Action:** Look at the details of the exception and address the database problem.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-26042:** Failed to generate REF and OID on entity {0}.

**Cause:** A database failure occurred while trying to generate an object ID (OID) and object reference (REF). When a new row is created on an entity which maps to an Oracle object table, an OID and REF for the new row are generated. This executes a SQL statement like select a.oid, make_ref(table-name, a.oid) ... Somehow, this statement is failing.

**Action:** Ensure that: The Oracle database version is correct. The table in question is an object table. This error normally carries a detail exception from the database, which will give further information about the database failure. Take a look at the detail exception and address the database problem.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-26043:** REF and OID not supported by this SQLBuilder on entity {0}.

**Cause:** An attempt was made to generate an object ID (OID) and/or a reference (REF) on a database system that does not support Oracle objects.

**Action:** Do not try to create OID or REF on a database system that does not support Oracle objects.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-26044:** Error while getting estimated row count for view object {0}, statement {1}.

**Cause:** The application tried to get an estimated row count (getEstimatedRowCount()) on a row set. While building the appropriate query statement, executing it, and retrieving the estimated count, an error occurred. This error is accompanied by the SQL statement that caused the error. Also, it normally carries a detail exception from database, which will give further information about the database failure.
Action: Take a look at the SQL statement and the detail exception and address the database problem.

Level: 1

Type: ERROR

Impact: Programmatic

JBO-26045: Failed to generate PK-Based REF on entity {0}.

Cause: A database error occurred while trying to generate an object ID (OID) from the primary key. This operation is valid only if the table in question is an object table and if the table specifies that the reference (REF) is PK based.

Action: Ensure that: The Oracle database version is correct. The table in question is an object table. The object table uses a PK-based REF. This error normally carries a detail exception from database which will give further information about the database failure. Take a look at the detail exception and address the database problem.

Level: 1

Type: ERROR

Impact: Programmatic

JBO-26046: PK-Based REF not supported by this SQLBuilder on entity {0}.

Cause: An attempt was made to generate Oracle o8 object ref from a non-Oracle database SQLBuilder. This is not supported.

Action: Make sure that the correct SQLFlavor (i.e., SQLBuilder) is being used for the application and switch to the right one.

Level: 1

Type: ERROR

Impact: Programmatic

JBO-26047: LOCK_OPTUPDATE mode update operation missing change indicator value: Entity {0}, key {1}.

Cause: An attempt was made to update a row in LOCK_OPTUPDATE mode and the change indicator attribute value is not present.

Action: Look at the attribute mapping of the View Object that read in this Entity row and make sure that the View Object includes the change indicator attribute. The LOCK_OPTUPDATE mode requires the value to be present.

Level: 1

Type: ERROR

Impact: Programmatic

JBO-26048: Constraint "{2}" is violated during post operation "{0}" using SQL statement "{1}".

Cause: A constraint violation occurred in the database while posting (writing) an entity to the database. This error carries a detail exception from the database which will give further information about the database failure.

Action: Fix the cause for the constraint violation. Look at the details of the exception and address the database problem.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26049: An error occurred during loading definition {0}.
Cause: Metadata objects failed to load due to unexpected or corrupt data in the XML file.
Action: Verify that the XML metadata for various components is valid.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-26050: An error occurred while writing personalization definition {0}.
Cause: An I/O error occurred while writing personalization definition.
Action: Check the detail I/O exception and make necessary correction.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-26051: Unrecognized XML element tag {1} found in meta object {0}.
Cause: The element tag of the XML file is not recognized.
Action: Examine the XML file and make sure that the element tag is one of the recognized ones.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-26053: Invalid association or view link definition "[0]". Invalid unbound attribute list.
Cause: An association or view link definition end has an invalid unbound attribute list. This error is raised if the unbound attribute is not one of the association/view link end attributes.
Action: Correct the error(s) in the XML file.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-26054: Invalid version number for {0}. Require {1} or greater, but found {2}.
Cause: The XML document is either missing the version number or has a version number which is lower than the required version number.
Action: Check to see if the XML document has gone through a proper migration process. If not, migrate the application.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-26055: Failed to delete XML document {0}.
Cause: An attempt was made to delete an XML document from disk, but this operation failed.

Action: When running with MDS, make sure that the metadata store supports the delete operation. Check the detail exception.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26056: Multiple occurrences of XML element {1} found in {0}. Only one expected.

Cause: Multiple occurrences of an element were found in the XML document when only one was expected.

Action: Examine the XML document and see which element shows up multiple times. If the issue looks like a problem in the framework's persistence code, report it.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26057: Recursive entity references found in view def {0}. Entity refs: {1}

Cause: An attempt was made to create a view definition whose entity references have a cycle in it. For example, a view definition contains two entity references E and F, where E's source reference is F, and F's is E.

Action: Review your code that builds the view def. Make sure that entity references do not have a recursion in it.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26058: Cannot define view link {0} in application module {1}. The view object {2} is in application module {3} and the view link's application module is not a child of the view object's application module.

Cause: An attempt was made to establish a data model view link in an application module, but either the master or the detail view object is in an AM which is not the same AM as the view link's, or is not a parent of the view link's AM.

Action: When creating a data model VL, the VL's AM must be the same as the VO's, or must be a child (nested) AM of the VO (for both master and detail).

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26059: Invalid View Link Usage "[0]". Either the source ",[1]" or the destination ",[2]" is not defined.

Cause: The ViewLink Usage is not correctly defined.

Action: Specify both source and destination for the ViewLink Usage.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-26060: Error while registering JDBC driver.
Cause: A SQLException occurred while trying to register a JDBC driver.
Action: Fix the underlying SQLException.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-26061: Error while opening JDBC connection.
Cause: A SQLException occurred while trying to open a JDBC connection.
Action: Fix the underlying SQLException.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-26062: Error while closing JDBC connection.
Cause: A SQLException occurred while trying to close a JDBC connection.
Action: Fix the underlying SQLException.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-26064: Error while closing JDBC statement.
Cause: A SQLException occurred while trying to close a JDBC connection.
Action: Fix the underlying SQLException.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-26065: Error during commit.
Cause: A SQLException occurred during the commit phase of this transaction.
Action: Fix the underlying SQLException.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-26066: Error during rollback.
Cause: A SQLException occurred during the rollback phase of this transaction.
Action: Fix the underlying SQLException.
Level: 1

Type: ERROR
Impact: Programmatic
JBO-26067: Failed to add JDBC connection to the connection pool, connection pool is full.
   Cause: An exception occurred while adding a JDBC connection to a pool that was already full.
   Action: Modify the class that is using the pool to check the pool size before adding a new connection to the pool.

   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-26068: Failed to return JDBC connection to the connection pool, connection does not belong to the pool.
   Cause: The user attempted to return a connection to a pool that was not responsible for managing that connection.
   Action: Modify the class that is using the pool to ensure that the connection belongs to the pool before returning the connection to the pool.

   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-26069: Client request was timed out while waiting for a connection to be returned to the connection pool.
   Cause: A client request was timed out while waiting for a connection to be returned to the pool.
   Action: Increase the maximum pool size in order to accommodate 2x the maximum expected active request size.

   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-26070: Column definition retrieval from JDBC failed on view object {0}.
   Cause: A SQLException occurred while setting up metadata JDBC statement.
   Action: Fix the underlying SQLException. There might be a datatype mismatch between the attributes of the view object and columns in the SQL for it.

   Level: 1
   Type: ERROR
   Impact: Programmatic

JBO-26071: Access mode {1} is invalid. View object {0}
   Cause: The access mode specified in the view definition XML file is not valid.
   Action: Check the content of the XML file for the view definition. Look for an XML element named ‘AccessMode’. Make sure that the value for that element is valid.

   Level: 1
   Type: ERROR
   Impact: Programmatic
JBO-26072: Another user changed the document \{0\}.

**Cause:** The client requested to write metaobject, but the metaobject document was updated by another user.

**Action:** This exception carries the most up to date def object. Resolve the differences and retry write.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-26073: Document \{0\} has no MDS key.

**Cause:** The client requested to write metaobject, but the metaobject's MDS key is null and so we cannot perform the consistency check.

**Action:** An existing definition object's MDS key should not be null. Contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-26074: MDS detected another user changed the document \{0\} since the mutable MO was obtained.

**Cause:** The client requested to write metaobject, but the metaobject document was updated by another user. The difference between this error and <code>EXC_PERS_DOC_INCONSISTENT</code> is that this error is detected by MDS between <code>getMutableMO()</code> and <code>flushChanges()</code>. <code>EXC_PERS_DOC_INCONSISTENT</code> is raised by an MOKey check.

**Action:** This exception carries the most up to date def object. Resolve the differences and retry write.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-26075: Document \{0\} exists. Another user just created the same doc.

**Cause:** The client requested to create a new document. While creating and flushing the MDS MO, MDS threw a document-exists-exception, which means that another user just created the same document.

**Action:** Retry creating the document.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-26080: Error while selecting entity for \{0\}

**Cause:** An unexpected exception occurred while executing the SQL to fetch data for an entity instance or lock it.

**Action:** Fix the cause for the SQLException in the details of this exception.

**Level:** 1

**Type:** ERROR
Impact: Programmatic

JBO-26081: Error while getting datum for attribute {1} in {0}
Cause: A SQLException occurred when converting data from JDBC to <code>oracle.jbo.domain.Struct</code> attributes.
Action: Fix the conversion errors as suggested in SQLException.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-26083: Comparison operator {0} has a string code for its description, but the message bundle class cannot be found.
Cause: A comparison operator was specified with string code, but the message bundle class could not be loaded. When specifying a string code for translatable operator description, the framework first checks to see if the operator specification includes a message bundle class name. If so, it attempts to find the string in that message bundle. If not, then the framework tries to find the string in the owning object’s (either view object or entity object) message bundle. If both fail, this error is raised.
Action: Make sure that the comparison operator specification is correct in the XML file.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-26084: Invalid association definition "{0}". Association must have two AssociationEnds.
Cause: The association definition in the XML file is missing either the source or destination association end. For an association XML file, two elements named AssociationEnd should be found.
Action: Correct the error in the XML file.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-26085: Missing association name in EO-exists validator {0} of {1}.
Cause: The EO-exists validator is missing the association name in its definition.
Action: Correct the error in the XML file.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-26086: Association attributes do not match the destination EO"s primary keys in EO-exists validator {0} of {1}.
Cause: The EO-exists validator’s source side attribute list does not match the destination EO’s primary keys. For example, suppose there is a PurchaseOrder EO which includes an EO-exists validator to Customer EO. PurchaseOrder EO is using association CustToPurch to validate. In this case, the association attribute
list on the PurchaseOrder side match with Customer's PK exactly (order does not matter—they must equal as sets).

**Action:** Correct the error in the XML file.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic  

**JBO-26100: An error occurred after commit was performed.**  
**Cause:** An exception occurred in the afterCommit notification phase of the transaction.  
**Action:** Verify the exception in the details of this exception. Fix the failing afterCommit() overridden methods in the entities or transient TransactionListener objects registered with the transaction to listen into the commit/rollback cycle.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic  

**JBO-26101: An error occurred after posting was performed.**  
**Cause:** An exception occurred in the afterPost phase of the transaction.  
**Action:** Verify the exception in the details of this exception. Fix the failing afterPost() overridden methods in the entities or transient TransactionPostListener objects registered with the transaction to listen into the post cycle.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-26102: An error occurred after rollback was performed.**  
**Cause:** An exception occurred in afterRollback notification phase of the transaction.  
**Action:** Verify the exception in the details of this exception. Fix the failing afterRollback() overridden methods in the entities or transient TransactionListener objects registered with the transaction to listen into the commit/rollback cycle.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic  

**JBO-27001: Association attribute \{2\} included in \{0\} \{1\} is not updatable**  
**Cause:** This association attribute is marked readonly.  
**Action:** Cannot modify the value of the association attribute as it is marked readonly.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-27002: Entity validation with key \{1\} failed in entity object \{0\}**  
**Cause:** A custom validation rule failed to validate an attribute value.
Action: Fix the attribute value so that it passes the custom validation rule.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27003: Validation of rows in view object {0} failed
Cause: Modified or new entities in this view object failed to validate.
Action: Fix the failing entity values and revalidate the view object.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27004: Attribute set for {2} in entity {1} failed
Cause: Attempting to modify a read-only entity-attribute.
Action: Do not modify a read-only attribute value.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27005: Validation of rows in application module {0} failed
Cause: Modified or new entities within this application module or nested application module failed to validate.
Action: Fix the failing entities and then revalidate this application module.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27006: Validation failed because attribute {2} is not found in {0} {1}
Cause: An attribute cannot be found by the given name during validation.
Action: Entity metadata could be corrupt as there is an attribute which is to be validated but no definition could be found for that attribute in the metadata.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27007: Validation of a view row in view object {0} failed
Cause: Attempting to validate a ViewRow failed.
Action: Fix the failing entities or attributes as found in the details of this exception.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27008: Attribute {2} in view object {1} cannot be set.
Cause: An attempt was made to modify a view row attribute that is read-only.
Action: Modify the updatable setting of the view attribute.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27009: Batch set of attributes in view object {1} failed
Cause: Attempting to validate entities and attributes failed during validation of buffered attributes in Deferred Validation mode. (Not available in 3.x)
Action: Fix the failure cases.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27010: Attribute set with value {3} for {2} in {1} has invalid precision/scale
Cause: For strings, the length of the string value provided for an attribute is more than the max-length this attribute expects. For Numeric values, the length of the value (in string form) is more than what the attribute expects.
Action: Fix the attribute value with respect to the precision and scale information for the failing attribute.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27011: Attribute set with value {3} for {2} in {1} failed
Cause: A validation rule for an attribute failed either due to an unexpected exception in validating the attribute with that rule, or due to failure in evaluating the NOT operation on the rule.
Action: Fix the attribute value so that it validates against the failing rule.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27012: Row validation method {2} failed for row with key {1} in {0}
Cause: The custom method validator attached to an entity returned false, indicating a failure in the validation for that entity.
Action: Fix the cause for failure in the custom validation method for this attribute.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27013: Attribute set validation method {4} failed for attribute {2} in {1}
Cause: The custom method validator attached to an attribute returned false indicating a failure in validation for that attribute in the custom method.
Action: Fix the cause for failure in the custom validator method for this attribute.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27014: Attribute \{2\} in \{1\} is required.
Cause: The attribute value cannot be null as it has been marked mandatory.
Action: Provide non-null values for mandatory attributes.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-27015: \{0\} contained entity/s still invalid
Cause: In validating a master, some child entities were found that could not be validated. This occurs only in the case when there is a composition association between the master and detail entities.
Action: Fix the attribute values in the child entities so that they are valid when the child entities are validated by the master.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-27016: Invalid attribute kind for column \{0\}.
Cause: An unexpected attribute kind found in the definition for a view object.
Action: Fix the attribute kind information in the xml-metadata definition for attributes in this view object.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-27017: The primary key for Entity \{0\} could not be determined.
Cause: While loading the metadata definition for this entity, there was no attribute marked as the primary key.
Action: Set at least one attribute as the primary key for this entity type, so that entities of this type can be uniquely identified.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-27018: Attribute set with value \{3\} for \{2\} in \{1\} failed because of type mismatch
Cause: The type of attribute value provided as an argument to the set() method for this attribute is not an instance of the Java type that this attribute expects.
Action: Convert the argument to a proper Java type, such that it is an instance of the Java type that this attribute expects.
Level: 1

Type: ERROR
Impact: Programmatic
JBO-27019: The get method for attribute "(2)" in (1) cannot be resolved.

**Cause:** An unexpected exception occurred in the getAttribute method. Getter
methods should throw a subclass of JboException so that custom exception
messages are thrown/shown to the caller. This exception could also be thrown if
the getter is not a public Java method.

**Action:** Do not throw any exception other than subclasses of JboException from
any business logic code in the getter method for an attribute. Also verify that the
getter method is a public Java method.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-27020: The set method for attribute "(2)" in (1) cannot be resolved.

**Cause:** An unexpected exception occurred in the setAttribute method. Setter
methods should throw a subclass of JboException so that custom exception
messages are thrown/shown to the caller. This exception could also be thrown if
the setter is not a public Java method.

**Action:** Do not throw any exception other than subclasses of JboException from
any business logic code in the setter method for an attribute. Also verify that the
setter method is a public Java method.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-27021: Failed to load custom data type value at index (0) with java object of type
(1) due to (2).

**Cause:** An unexpected exception occurred during fetching values from a JDBC
result set into an attribute for a row object. There could be conversion errors
between the return type from JDBC for the attribute and its Java type.

**Action:** Verify that the JDBC-SQL type and Java type for the attribute are
compatible. Fix any conversion errors or domain exceptions that are in the details
of this exception.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-27022: Failed to load value at index (0) with java object of type (1) due to (2).

**Cause:** An unexpected exception occurred during fetching values from a JDBC
result set into an attribute for a row object. There could be conversion errors
between the return type from JDBC for the attribute and its Java type.

**Action:** Verify that the JDBC-SQL type and Java type for the attribute are
compatible. Fix any conversion errors or domain exceptions that are in the details
of this exception.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-27023: Failed to validate all rows in a transaction.
Cause: An unexpected exception occurred during validating changes in a transaction.

Action: Verify the details for DeferredRowValidationException and fix those errors.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27024: Failed to validate a row with key {1} in {0}

Cause: An unexpected exception occurred during validating a row.

Action: Verify the details for DeferredRowValidationException and fix those errors at the row level. The details can also contain DeferredAttrValidationExceptions which needs to be fixed as well.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27025: Failed to validate attribute {2} with value {3}

Cause: An unexpected exception occurred during validating an attribute of a row.

Action: Verify the details for JboExceptions and fix those errors at the row level.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27026: Set method threw an exception found in the details of this exception.

Cause: An unexpected exception occurred during a setter method for an attribute. This exception should not be seen outside of the framework.

Action: Verify the details for JboExceptions and fix those errors

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27027: Missing mandatory attributes for a row with key {1} of type {0}

Cause: An unexpected exception occurred during validating attributes of a row for mandatory fields.

Action: Verify the details for JboExceptions and fix those attributes with null values.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27028: Variable {2} in manager {1} is not updatable.

Cause: An attempt was made to set the value of a variable that is not updatable.

Action: Change the updatable setting of the variable.

Level: 1
**JBO-27029: Key definitions in definition 1 cannot be modified after it is resolved.**

**Cause:** An attempt was made to modify the key definition after the definition is resolved (resolveDefObject()).

**Action:** It is illegal to modify key definitions after the definition is resolved. If key definitions are to be modified, it should be done before.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-27030: An entity row without a primary key cannot be locked.**

**Cause:** An attempt was made to lock an entity row with key which is not the primary key.

**Action:** For locking an entity row, only the primary key can be used (and not an alternate key). Do not use a non-primary key for locking.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-27031: At least one of the following attributes 2 in 1 is required.**

**Cause:** At least one of the list attributes must be not null.

**Action:** Provide a non-null value for one of these attributes.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-27032: Session definition full name must start with 0**

**Cause:** The specified session definition full name is invalid.

**Action:** Session definition full name must start with the package name, 'sessiondef'. Make sure that the full name starts with it.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-27033: Validator 0 cannot be designated transaction level because it does not implement JboTransValidatorInterface**

**Cause:** An attempt was made to set a validator to transaction level validator, but the validator does not implement oracle.jbo.rules.JboTransValidatorInterface.

**Action:** Before setting the transaction level flag, make sure the validator class implements oracle.jbo.rules.JboTransValidatorInterface.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic
JBO-27034: Invalid kind for attribute {0} from the corresponding superclass attribute.
   
   **Cause:** Attribute kind is different between an entity or view object and the corresponding superclass.
   
   **Action:** Fix the attribute kind information in the xml-metadata definition for attributes in this entity or view object.
   
   **Level:** 1
   
   **Type:** ERROR
   
   **Impact:** Programmatic

JBO-27035: Attribute {2} is required.

   **Cause:** The attribute value cannot be null as it has been marked mandatory.
   
   **Action:** Provide non-null values for mandatory attributes.
   
   **Level:** 1
   
   **Type:** ERROR
   
   **Impact:** Programmatic

JBO-27036: At least one of the following attributes {2} is required.

   **Cause:** At least one of the list attributes must be not null.
   
   **Action:** Provide a non-null value for one of these attributes.
   
   **Level:** 1
   
   **Type:** ERROR
   
   **Impact:** Programmatic

JBO-27037: Please provide a value that does not begin with a wildcard character for attribute {2}.

   **Cause:** The attribute value may not begin with a wildcard character.
   
   **Action:** Please provide a value that does not begin with a wildcard character.
   
   **Level:** 1
   
   **Type:** ERROR
   
   **Impact:** Programmatic

JBO-27101: Attempt to access dead entity in {0}, key={1}

   **Cause:** Trying to refer to an invalid/obsolete entity. This could occur if some business logic has held on to an entity reference which was removed and the transaction has been posted or committed. It could also occur if a reference entity has been removed from the cache and any ViewRow is attempting to access it.
   
   **Action:** Use findByPrimaryKey to find a valid entity of the desired key instead of holding on to a reference to an entity instance.
   
   **Level:** 1
   
   **Type:** ERROR
   
   **Impact:** Programmatic

JBO-27102: Attempt to access dead view row of persistent id {0}
**Cause:** Trying to access a ViewRow which is part of an obsolete/invalid collection. This could happen if a reference to the ViewRow is held by some business logic while the containing view object was removed.

**Action:** Find the referenced ViewRow either by re-querying or using findByKey methods to get a valid reference to the ViewRow.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-27120: SQL error during query execution. Statement: {0}**  
**Cause:** Failed to execute a query. This could occur when trying to execute a query for a SQLValue domain class or a Sequence domain.  
**Action:** Fix the cause for the SQLException thrown by JDBC found in the details of this exception.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-27121: SQL error during statement execution. Statement: {0}**  
**Cause:** Failed to execute a SQL statement.  
**Action:** Fix the cause for the SQLException thrown by JDBC found in the details of this exception.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-27122: SQL error during statement preparation. Statement: {0}**  
**Cause:** Failed to prepare a JDBC PreparedStatement.  
**Action:** Fix the cause for the SQLException thrown by JDBC found in the details of this exception.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-27123: SQL error during call statement preparation. Statement: {0}**  
**Cause:** Failed to prepare a JDBC CallableStatement.  
**Action:** Fix the cause for the SQLException thrown by JDBC found in the details of this exception.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-27124: SQL error during empty statement creation**  
**Cause:** Failed to create a JDBC Statement object with the given set of parameters.  
**Action:** Fix the cause for the SQLException thrown by JDBC found in the details of this exception.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-27125: Cannot find matching type-map entries for all columns in a dynamic ViewObject-query
Cause: Failed to find a Java type for a column-type in the given dynamic ViewObject query.
Action: Either provide a typemap that maps the selected columns in the query or leave out the erring column-type from the query.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27126: Long running query "{0}" has been canceled.
Cause: The view object's query timeout was reached or the user requested cancellation of a long query.
Action: Review the query implementation.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27127: The effective date operation for Entity {0} will introduce gaps or overlaps. key={1}
Cause: Effective date constraint violation while creating or updating a row. The operation will cause gaps or overlaps in the effective date timeline
Action: Change the start or end effective date if it is a new row. If it is an update choose a different mode.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27128: The effective date update operation for Entity {0} failed because an existing row has the effective start date that matches the effective date. key={1}
Cause: Effective date row update with UPDATE mode is disallowed because the start effective date of an existing row matches the effective date.
Action: Choose a different mode to update the row like correction mode.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27129: The effective date row for Entity {0} has end date less than start date, key={1}
Cause: Effective end date is greater than the start date.
Action: Change the start or end effective date.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27130: Current mode {0} is not supported in Multiple Changes Per Day.
Cause: Current mode is not supported in Multiple Changes Per Day.
Action: Switch to Update Change Insert mode.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27131: Current mode {0} is supported only in Multiple Changes Per Day.
Cause: Current mode is not supported in Multiple Changes Per Day.
Action: Switch to Update Change Insert mode.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27132: Current operation cannot be performed in {0} mode because no future rows exist.
key={1}
Cause: Current operation cannot be performed when no future rows exist.
Action: Switch to Update mode.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27133: Current operation cannot be performed in {0} mode because no previous rows exist.
key={1}
Cause: Current operation cannot be performed when no previous rows exist.
Action: Switch to a different mode or navigate to a row where previous rows exist.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27134: Current Multiple Changes Per Day operation can be performed only on first sequenced row.
key={0}
Cause: Current Multiple Changes Per Day operation can be performed only on first sequenced row.
Action: Navigate to first sequenced row.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27200: JNDI failure. Unable to lookup {0} at context {1}
Cause: JNDI lookup failed. It can be caused by an incorrect data source name, particularly for the internal connection, or an internal error.
Action: Check the internal data source name to see if it is valid. If the error is not caused by the internal connection problem, contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27201: Error suspending current transaction
Cause: An error occurred while suspending a global transaction for JTA pcoll manager.
Action: Check the detail exception to determine the root cause of the problem.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27202: Error resuming current transaction
Cause: An error occurred while resuming a global transaction for JTA pcoll manager.
Action: Check the detail exception to determine the root cause of the problem.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-27203: Cannot use the default connection for persistence with global transactions.
Cause: While using global transactions, an attempt was made to use the transactional data source for acquiring the internal connection.
Action: Explicitly specify the jdbc url that should be used for creating the internal connection by setting the oracle.jbo.common.PropertyConstants.INTERNAL_CONNECTION_PARAMS property

Level: 1
Type: ERROR
Impact: Programmatic

JBO-28000: PersistManager class {0} not found
Cause: The client specified a custom persistent collection through the jbo.pcoll.mgr property. However, the class specified could not be located or loaded.
Action: Make sure that the name specified for jbo.pcoll.mgr is for a valid class name. The class name should be fully qualified with the package name. A special keyword None represents no persistent collection manager, i.e., no spilling to disk will occur.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-28001: Cannot connect to database
Cause: An error occurred while attempting to get a JDBC connection for persistent collection management.
Action: Make sure that the database connection URL is correct. The detail to this exception will give further information on the problem.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-28002: Could not create persistence control table

Cause: An error occurred while creating the persistent collection control table. Normally, the control table's name is PCOLL_CONTROL.
Action: Check to make sure that the connection has appropriate authority to create a table. The detail to this exception will give further information on the problem.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-28003: Could not delete row in control table for table

Cause: An unexpected error occurred while attempting to delete the persistent collection control row.
Action: Look at the details of this exception for further information on the problem and how to address it.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-28004: Could not lock row in control table for table

Cause: An error occurred while trying to lock the persistent collection control row. This error is thrown in two situations: An unexpected database error occurred while attempting to lock the row. After the persistent collection manager committed changes to database, it tried to lock the control row. Between the time of commit and lock attempt, another user somehow managed to lock the row and not release it within a set time. In this case, the detail will be null.
Action: In the first case, see the details of this exception for further information on the database problem. In the second case, make sure that no other user locks the control rows outside the Business Components framework.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-28005: Could not update row in control table for table

Cause: An unexpected error occurred while attempting to update the persistent collection control row.
Action: Look at the details of this exception for further information on the problem and how to address it.
Level: 1
**Type:** ERROR  
**Impact:** Programmatic

**JBO-28006: Could not create persistence table {0}**  
**Cause:** An error occurred while attempting to create a database table to store persistent collection material.  
**Action:** Look at the details of this exception for further information on the problem and how to address it.  
**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-28007: Could not commit while working on persistence table {0}**  
**Cause:** An unexpected error occurred while attempting to commit persistent collection changes  
**Action:** Look at the details of this exception for further information on the problem and how to address it.  
**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-28008: Could not create an index {0} on table {1} for persistent collection**  
**Cause:** An error occurred while attempting to create an index on a database table that stores persistent collection material.  
**Action:** Look at the details of this exception for further information on the problem and how to address it.  
**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-28009: Error while getting current time from database**  
**Cause:** An unexpected error occurred while attempting to get the system date from the database. For the Oracle persistent manager, the SQL statement used for this would be 'select sysdate from dual'.  
**Action:** Look at the details of this exception for further information on the problem and how to address it.  
**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-28010: Error while getting next sequence value for {0} from database**  
**Cause:** An error occurred while attempting to get the next value of a database sequence.  
**Action:** Make sure that the sequence object exists in the database. Also look at the details of this exception for further information on the problem and how to address it.  
**Level:** 1
Type: ERROR  
Impact: Programmatic

**JBO-28011: Error while querying for the next id from column {1} of table {0}, collection id {2}**

*Cause:* An error occurred while attempting to query for the next id from a persist coll table.

*Action:* Look at the details of this exception for further information on the problem and how to address it.

*Level:* 1

Type: ERROR
Impact: Programmatic

**JBO-28012: Could not add key column {0} to table {1}**

*Cause:* An error occurred while attempting to create add a key column on a database table that stores persistent collection material.

*Action:* Look at the details of this exception for further information on the problem and how to address it.

*Level:* 1

Type: ERROR
Impact: Programmatic

**JBO-28013: Could not create key info table {0}**

*Cause:* An error occurred while attempting to create a database table to store key info for persistent collection material.

*Action:* Look at the details of this exception for further information on the problem and how to address it.

*Level:* 1

Type: ERROR
Impact: Programmatic

**JBO-28020: Passivation error on collection {0}, collection id {1}, persistent id {2}**

*Cause:* An unexpected error occurred while passivating objects into the persistent store. An exception might have been thrown during serialization.

*Action:* Look at the details of this exception for further information on the problem and how to address it.

*Level:* 1

Type: ERROR
Impact: Programmatic

**JBO-28021: Activation error on collection {0}, collection id {1}, persistent id {2}**

*Cause:* An unexpected error occurred while activating objects from the persistent store. An exception might have been thrown during deserialization.

*Action:* Look at the details of this exception for further information on the problem and how to address it.

*Level:* 1
Type: ERROR
Impact: Programmatic

JBO-28030: Could not insert row into table {0}, collection id {1}, persistent id {2}
Cause: An unexpected error occurred while inserting a passivation row into the persistent store table.
Action: Look at the details of this exception for further information on the problem and how to address it.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-28031: Could not update row into table {0}, collection id {1}, persistent id {2}
Cause: An unexpected error occurred while updating a passivation row in the persistent store table.
Action: Look at the details of this exception for further information on the problem and how to address it.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-28032: Could not delete row from table {0}, collection id {1}, persistent id {2}
Cause: An unexpected error occurred while deleting a passivation row from the persistent store table.
Action: Look at the details of this exception for further information on the problem and how to address it.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-28033: Could not retrieve row from table {0}, collection id {1}, persistent id {2}
Cause: An unexpected error occurred while retrieving a passivation row from the persistent store table.
Action: Look at the details of this exception for further information on the problem and how to address it.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-28034: Retrieval by id not supported for collection {0}, collection id {1}. Call enableAccessById()
Cause: The client attempted to retrieve a row in a persistent collection by an id, but the by-id access is not enabled on the persistent collection.
Action: Enable by-id access by calling PCollection.enableIdAccess.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-28035: Persistent id \(1\) is invalid for a collection \(0\), collection id \(1\). It should be > 0

**Cause:** The client attempted to retrieve a row by an id, but the id value is invalid. The id must be greater than 0.

**Action:** Give a valid id.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-28036: Object of id \(2\) is already active in its parent \(3\) in a persistent collection \(0\), collection id \(1\)

**Cause:** While attempting to activate an object of a given id, an internal integrity problem was found. In particular, a node which was thought to be passivated was found to be active.

**Action:** Contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-28037: Object of id \(2\) not found in its parent \(3\) in a persistent collection \(0\), collection id \(1\)

**Cause:** While attempting to activate an object of a given id, an internal integrity problem was found. In particular, a child node/element expected to be found in a node is missing.

**Action:** Contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-28038: Could not delete all rows for collection of id \(1\) from table \(0\)

**Cause:** An unexpected error occurred while deleting all passivation rows from the persistent store table.

**Action:** Look at the details of this exception for further information on the problem and how to address it.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-28039: Root node for collection \(0\) is invalid, collection id \(1\), persistent id \(2\)

**Cause:** While attempting to activate an object of a given id, an internal integrity problem was found. In particular, the root node of the persistent collection is no good. It is either \(1\) <code>null</code>, \(2\) has younger or older sibling, or \(3\) has a parent node. None of these should apply to the root node.

**Action:** Contact Oracle Support Services.

**Level:** 1
Type: ERROR
Impact: Programmatic

JBO-28040: Could not retrieve ids of rows whose key id is {1} and hash is {2} from table {0}

Cause: An unexpected error occurred while retrieving an array of persistent ids of rows from the persistent store table of given key hash code at the given key index.

Action: Look at the details of this exception for further information on the problem and how to address it.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-28041: Update found multiple rows or no matching row. Persistence table {0}, collection id {1}, persistent id {2}

Cause: The system tried to update a row in the persistence store table, but it found either no row or more than one matching row.

Action: Contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-28100: The resource pool, {0}, failed to create a pooled resource instance.

Cause: Either the JDBC connection pool or the application pool were unable to create a new pooled JDBC connection or application module.

Action: If the exception details indicate that an exception occurred while creating a JDBC connection then check the JDBC connection description to ensure that it references a valid, live database instance. If the exception details indicate that an exception occurred while creating an application module then check the application module configuration to ensure that it references a valid, live application server and application application module class.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-28101: An application attempted to set a pooled resource that might be in use as available.

Cause: The application attempted to mark a pooled resource which has already been available in the resource pool as available.

Action: Remove the application logic that invokes \( \text{@link oracle.jbo.pool.ResourcePool#setAvailable(Object)} \), or move the application logic such that it occurs only once before the resource is made available.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-28102: A request was timed out while waiting for a resource to be returned to the resource pool, {0}.
**Cause:** A client request timed out while waiting for a resource to be returned to the resource pool.

**Action:** Increase the maximum resource pool size in order to accommodate the maximum expected active request size. If the exception details indicate that the exception was thrown while waiting for an application module in the application pool then the maximum pool size can be increased with the property, jbo.ampool.maxpoolsize. If the exception details indicate that the exception was thrown while waiting for a JDBC connection in the JDBC connection pool then the maximum pool size can be increased with the property, jbo.maxpoolsize.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-28103:** A pool operation was specified for a pooled resource that does not belong to the resource pool.

**Cause:** A pool request was made for a resource that does not belong to the pool.

**Action:** Ensure that the pool request is accessing the same pool instance that was used to acquire the resource instance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-28200:** Validation threshold limit reached. Invalid Entities still in cache

**Cause:** Invalid entities still found in the validation list of the transaction after attempting to validate all invalid entities for the VALIDATION_THRESHOLD 10 times (by default).

**Action:** Fix any logic that invalidates entity instances in the validation cycle (perhaps in overridden validateEntity() methods) such that all entities are valid before the VALIDATION_THRESHOLD limit is reached.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-28201:** Post threshold limit reached. Some entities yet to be posted.

**Cause:** There are invalid entities or entities in the post list of the transaction after trying to post all changes for the POST_THRESHOLD 10 times (by default).

**Action:** Fix any logic that places entities in the transaction's list of entities to be validated or posted in the post cycle, such that all entities get posted before the POST_THRESHOLD is reached.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JBO-28202:** Entities invalidated in beforeCommit(). Need to revalidate and post.

**Cause:** Invalid entity instances found in the transaction in the beforeCommit phase.
Action: Fix any business logic that invalidates entity instances in postChanges() such that there are no more invalid entities after all changes are posted during the commit cycle.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-28203: The updated row cannot be refreshed because its key values are unset or modified by database triggers.
Cause: The row could not be refreshed after update because the value of its primary or unique key was not set or unknown.
Action: Ensure values are set for at least one primary or unique key that can be used to fetch the row that is being updated. If that is not possible, use a custom SQLBuilder with doRefreshSQL() defined to refresh the row.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-28204: Too many objects match the alternate key {0} for entity {1}, key {2}.
Cause: Attempting to add a new entity to the cache with alternate key that is same as an existing entity. This exception is thrown when uniquing a newly fetched/created entity with the cached set of entities.
Action: Fix the named alternative value of the row. Or, the alternate key definition might have to be augmented with additional attributes.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-28205: Validator {0} needs a row from iterator {1} to perform its validation, but did not find any row. Validation fails for row with key {2}.
Cause: A validator needs a row to perform validation, but the view object could not find any matching row.
Action: Since the necessary row is not found, the validation failed. Check to ensure that it is not an application error that cause no row to be found.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-29000: Unexpected exception caught: {0}, msg={1}
Cause: If an unexpected exception occurs during a framework operation, this exception is thrown, with the unexpected exception included in the details of this exception.
Action: Fix the cause for the exception in the details for this JboException.

Level: 1
Type: ERROR
Impact: Programmatic
JBO-29001: Type mismatch. Expected {0}. Actual {0}
Cause: During creation of application module in the EJB deployment mode, the object returned by the EJB home is not an instance of oracle.jbo.common.remote.ejb.RemoteApplicationModule.
Action: This usually means that the wrong EJB home is being invoked to create a remote application module. Fix it to point to the correct home.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-29004: Server-side configuration for creating the pool not specified.
Cause: A configuration was not specified for the remote ApplicationModule usage.
Action: Use the design time to specify a configuration for the remote ApplicationModule usage.
Level: 1
Type: ERROR
Impact: Configuration

JBO-29100: Attribute {0} is not selected
Cause: Def object is not selected. An attempt was made to access a nonselected def object.
Action: This particular operation is disallowed on a nonselected def object. Avoid this operation.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-29101: Attribute {0} is not selected in {1}, operation: {2}
Cause: Def object is not selected. An attempt was made to access a nonselected def object in the specified container object.
Action: This particular operation is disallowed on a nonselected def object. Avoid this operation.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-29102: The S_ROW_ID table is unable to generate a new row ID.
Cause: No more row IDs were available in the database's configured row ID range.
Action: Contact the system administrator. The row ID table in the database needs to be refreshed with a new row ID range.
Level: 1
Type: ERROR
Impact: Programmatic
JBO-29103: Internal error: {0} cannot be null
  Cause: This is an internal exception. The specified argument cannot be NULL.
  Action: Contact the System Administrator. The specified argument cannot be NULL.

  Level: 1
  Type: ERROR
  Impact: Programmatic

JBO-29104: Unable to create RowId generator application Module. Add the RowIdAM application module in the AM Usage for the current application.
  Cause: The RowIdAM application module is not a shared application module of the current application module.
  Action: Add the RowIdAM application module in the AM Usage for the current application or contact the System Administrator.

  Level: 1
  Type: ERROR
  Impact: Programmatic

JBO-29105: Attributes referenced in view criteria {0}.{1} with property AppliedIfJoinSatisfied do not map to the same entity usage.
  Cause: The attributes used in the View Criteria do not map to the same entity usage.
  Action: Make sure the attributes used in the View Criteria all map to the same entity usage if AppliedIfJoinSatisfied is set to true.

  Level: 1
  Type: ERROR
  Impact: Programmatic

JBO-29106: Attributes referenced in view criteria {0}.{1} with property AppliedIfJoinSatisfied map to the primary entity usage.
  Cause: The attributes used in the View Criteria cannot map to the primary entity usage.
  Action: Make sure the attributes used in the View Criteria all map to a non-primary entity usage if AppliedIfJoinSatisfied is set to true.

  Level: 1
  Type: ERROR
  Impact: Programmatic

JBO-29107: View criteria {0}.{1} with property AppliedIfJoinSatisfied must be used with an entity-based view object.
  Cause: The view criteria cannot be used with a non-entity based view object
  Action: The view criteria can only be used with an entity-based view object if AppliedIfJoinSatisfied is set to true.

  Level: 1
  Type: ERROR
  Impact: Programmatic
JBO-29108: The value specified for the property \{0\} in the rowidam.properties file is invalid.
Cause: Invalid value specified in the rowidam.properties file. The values cannot be <= 0.
Action: Update the properties to specify accepted values. The property values should be > 0.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-29109: The value specified for column \{0\} in the S_ROW_ID table is invalid.
Cause: One or more column values in S_ROW_ID table are invalid.
Action: Update the S_ROW_ID table with accepted values. The column values should be greater than zero.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-29110: Unable to cast the class type specified for RowId comparison to GeneratorSequenceImpl or BigDecimal.
Cause: Invalid value specified for comparison.
Action: The value to be compared with the RowId should be of type BigDecimal or any other type that can converted to BigDecimal.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-29111: View criteria \{0\} is a union VC and contains an invalid element of type \{1\} at index \{2\}
Cause: This view criteria is marked for union query but contains a view criteria element which is neither a ViewCriteria nor ViewCriteriaUsage.
Action: A union view criteria can only contain ViewCriteria or ViewCriteriaUsage. Correct the view criteria definition.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-29112: The time zone "\{0\}" defined in adf-config.xml or TimeZone.getDefault().getID() does not exist in your Oracle database table V$TIMEZONE_NAMES. Please set an available time zone in your TZ environment variable or user.timezone Java system property.
Cause: The time zone could not be set as the value defined in adf-config.xml or TimeZone.getDefault().getID() does not exist in Oracle database table V$TIMEZONE_NAMES.
Action: Set an existing time zone defined in your Oracle database table V$TIMEZONE_NAMES in TZ environment variable or user.timezone Java system property.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-29113: Encountered database recoverable exception. Please retry your request.
Cause: Encountered database recoverable exception.
Action: Retry your request after performing some recovery steps such as acquiring a new connection.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-29114: ADF context is not setup to process messages for this exception. Use the exception stack trace and error code to investigate the root cause of this exception. Root cause error code is {1}
Cause: An error message cannot be constructed because ADF context is not setup on the thread.
Action: Use the error code and the stack trace to diagnose the root cause.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-29115: Unable to get the error message due to error {1}. Use the exception stack trace and error code to investigate the root cause of this exception. Root cause error code is {2}
Cause: An error occurred while constructing a display message for an underlying exception.
Action: Use the error code and the stack trace to diagnose the root cause.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-30000: Application module pool {0} has already been created.
Cause: The application attempted to create an application pool with the same name as an existing application pool.
Action: Correct the application logic that is creating an application pool. Validate that a pool with the given name has not already been registered with the pool manager.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-30001: Cookie {0} is invalid.
Cause: Deprecated.
Action: N/A

Level: 1
Type: ERROR
Impact: Programmatic

JBO-30002: The pool signature for the cookie is invalid.
Cause: Deprecated.
Action: N/A
Level: 1

Type: ERROR
Impact: Programmatic

JBO-30003: Application pool {0} fails to check out an application module due to the following exception:
Cause: The pool failed to create an application module instance during checkout. Typically this exception occurs when the pool has been configured with an invalid application module name, EJB server, etc. or when an invalid JDBC username, password, URL, or datasource name has been specified.
Action: See the exception details for more information regarding the failure. Correct the application's configuration properties appropriately.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-30004: An application module that was not checked out was checked into the pool, {0}
Cause: The application attempted to check in an application module that was not checked out from the pool.
Action: Remove redundant releaseApplicationModule() invocations from the application logic.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-30005: A pool operation was specified for an application module instance that was not created by that pool.
Cause: The application attempted to invoke an application pool method with an application module that was not created by that application pool instance.
Action: Correct the application logic. Use the session cookie that was used to acquire the application module instance to acquire a reference to the application pool that created that application module instance.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-30006: The cookie for session {0} and application {1} is not a valid handle for application pool, {2}. The cookie cannot be used to access this pool instance.
Cause: The application attempted to access the application pool with a session cookie that is not registered with that application pool.
Action: Correct the application logic. The application should not reference the application pool directly. Use the session cookie interface for all application pool interaction.

Level: 1  
Type: ERROR  
Impact: Programmatic

JBO-30009: A thread attempted to set as 'available' an application module that could already be in use. An application module's availability cannot be changed from outside of the pool once it has been made available.

Cause: The application attempted to modify the availability status of an application module that is already in active pool use.

Action: Remove the application logic that is updating the application module availability status.

Level: 1  
Type: ERROR  
Impact: Programmatic

JBO-30010: The cookie for session {0} and application {1} cannot be replicated with an active cookie instance.

Cause: The web server attempted to replicate a session cookie with an existing, active cookie.

Level: 1  
Type: ERROR  
Impact: Programmatic

JBO-30011: A null session cookie application id, session id, or application pool reference ({0}, {1}, {2}) was specified during cookie construction. The cookie could not be constructed.

Cause: The application attempted to create a session cookie with an invalid set of cookie parameters.

Action: Correct the application logic that creates the session cookie. Verify that the cookie session id, application id, and application pool reference are all not null.

Level: 1  
Type: ERROR  
Impact: Programmatic

JBO-30012: A cookie for session {0} and application {1} has already been registered with application pool {2}. The cookie must be removed first.

Cause: The application attempted to create a session cookie in an application pool that already contains that session cookie.

Action: Correct the application logic that creates the session cookie. Remove the existing session cookie before creating a new one in that pool.

Level: 1  
Type: ERROR
Impact: Programmatic

JBO-30013: The cookie environment for session [0] and application [1] cannot be reset after the cookie has become active.
Cause: The application attempted to change the session cookie environment after the session cookie became active.
Action: Correct the application logic that sets the session cookie environment. Move all logic that changes the session cookie such that it occurs before the session cookie becomes active. A session cookie is active after it is first used to acquire an application module.

Level: 1
Type: ERROR
Impact: Configuration

JBO-30014: The cookie for session [0] and application [1] cannot be removed from the application pool while it has an application module checked out.
Cause: Correct the application logic that sets the session cookie environment. Move all logic that changes the session cookie such that it occurs before the session cookie becomes active. A session cookie is active after it is first used to acquire an application module.
Action: Correct the application logic that removes the session cookie from the application pool. Be sure to invoke SessionCookie.releaseApplicationModule() before invoking ApplicationPool.removeCookie(SessionCookie).

Level: 1
Type: ERROR
Impact: Programmatic

JBO-30015: The cookie for session [0] and application [1] cannot be serialized while in use.
Cause: The application attempted to serialize a session cookie while that cookie had an application module instance checked out or which the cookie was locked by a client request thread.
Action: Correct the serialization logic such that the session cookie is serialized after the session cookie application module has been released to the application pool and after all client requests have released their cookie locks.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-30016: The request thread for session [0] and application [1] was timed out while waiting for an available application module in the pool, [2].
Cause: The application request thread timed out while waiting for an available application module instance in the pool.
Action: Prevent wait timeouts by increasing the maximum pool size.

Level: 1
Type: ERROR
Impact: Programmatic
JBO-30017: The cookie for session {0} and application {1} cannot be reset while an ApplicationModule is reserved.
Cause: ApplicationModuleRef.resetState() was invoked while the ApplicationModuleRef was referencing a reserved ApplicationModule instance.
Action: Release the ApplicationModule with ApplicationModuleRef.releaseApplicationModule(true, boolean) before invoking resetState.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-30018: The cookie configuration does not match the specified configuration. applicationId: {0}, sessionId: {1}, cookieConfig: {2}, specifiedConfig: {3}.
Cause: oracle.jbo.http.HttpContainer.findSessionCookie was invoked with a configName which was different than the configuration that was used to create the specified SessionCookie.
Action: Use a distinct applicationId to identify the cookie for each distinct Configuration.
Level: 1
Type: ERROR
Impact: Configuration

JBO-30019: An unavailable cookie state is detected while attempting to use a cookie from application {0}, session {1}.
Cause: An application pool method was invoked for a cookie that was not currently available. A cookie can be in an unavailable state if another thread is currently updating the cookie. For example, consider the following scenario: 1. cookie 1 releases an ApplicationModule with the managed state option 2. cookie 2 targets that ApplicationModule for recycling 3. Before cookie 2 has passivated the ApplicationModule state for cookie 1, cookie 1 requests another ApplicationModule In this instance the ApplicationPool could throw an unavailable exception. Note that most of the occurrences of this exception should be handled by the pooling framework.
Action: Report the exception to Oracle Support Services. Attempt the invalid operation again.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-30020: An invalid SessionCookie release mode was specified. applicationId: {0}, sessionId: {1}.
Cause: oracle.jbo.common.ampool.SessionCookie.releaseApplicationModule was invoked with an unsupported releaseMode.
Action: Invoke releaseApplicationModule(int) with a valid releaseMode attribute. Valid releaseModes include: SessionCookie.SHARED_MANAGED_RELEASE_MODE SessionCookie.SHARED_UNMANAGED_RELEASE_MODE SessionCookie.RESERVED_MANAGED_RELEASE_MODE SessionCookie.RESERVED_UNMANAGED_RELEASE_MODE
Level: 1
Type: ERROR
Impact: Programmatic

**JBO-33000: Configuration file {0} is not found.**
*Cause:* The requested configuration file could not be found.
*Action:* Provide a correct name for the configuration file. Or, make sure that the named configuration file can be found in one of the accessible paths.

Level: 1
Type: ERROR
Impact: Programmatic

**JBO-33001: Configuration file {0} is not found in the classpath.**
*Cause:* The requested configuration file could not be found in the class paths.
*Action:* Make sure that the named configuration file can be located in one of the class paths.

Level: 1
Type: ERROR
Impact: Programmatic

**JBO-33003: Connection name {0} is not defined.**
*Cause:* The specified connection could not be found. Or an error occurred during processing of the specified connection.
*Action:* Make sure that the connection name is correct.

Level: 1
Type: ERROR
Impact: Programmatic

**JBO-33004: Configuration file cannot be parsed.**
*Cause:* An error occurred while parsing configuration file.
*Action:* Check to make sure that the configuration file is a valid XML file. See the detail exception for further information.

Level: 1
Type: ERROR
Impact: Programmatic

**JBO-33005: Configuration {0} is not found.**
*Cause:* The named configuration parameter was not found in the configuration.
*Action:* The system expects to find the named configuration parameter, but could not. Check the configuration content to make sure that it contains the named configuration parameter.

Level: 1
Type: ERROR
Impact: Configuration

**JBO-33006: Data source {0} is not supported.**
Cause: This error message indicates that the underlying SQLBuilder does not support datasource.
Action: For this SQLBuilder, do not use datasource.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-33007: Data source {0} is not found.
Cause: The specified datasource could not be found.
Action: Make sure that the datasource name is correct. See the detail exception for further info.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-33020: Current time is not available from SQL statement ",(0)".
Cause: An error occurred while getting the current time from the database.
Action: If there is a detail exception, it will give further information about what went wrong. If no detail exception was provided, that means the SQL statement to get the current time returned no result (no row). Check the SQL statement for correctness.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-33021: User {0} cannot be authenticated.
Cause: An error occurred while authenticating the user.
Action: Make sure that the user authentication information is correct.

Level: 1
Type: ERROR
Impact: Security

JBO-33022: Thread {0} has timed out while waiting to acquire a lock.
Cause: A thread timed out while waiting for a resource that was protected with an 'oracle.jbo.common.Lock'.
Action: Verify that all threads that have acquired a lock have properly released that lock in a 'finally' code block.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-33023: Thread {0} is attempting to release a session cookie lock that it did not acquire.
Cause: The application attempted to release a [link oracle.jbo.common.Lock] that it did not hold.
JBO-33024: Graph nodes cannot be sorted due to a cycle in the graph.
   Cause: A cycle was detected in the dependency graph.
   Action: Check the edges in the graph and remove any cycles.

JBO-33025: Failed to release application module {0}. Cookie handle not found.
   Cause: Failed to release application module due to missing cookie handle.
   Action: Invoke the correct, counterpart releaseAM method.

JBO-33026: Value must be between {MinVal} and {MaxVal}
   Cause: Input values failed the range validator test.
   Action: Provide values that are within the range validator parameters.

JBO-33027: Value must be greater than {MinVal}
   Cause: Input values failed the minimum validator test.
   Action: Provide values that are greater than the minimum.

JBO-33028: Value must be less than {MaxVal}
   Cause: Input values failed the maximum validator test.
   Action: Provide values that are less than the maximum.

JBO-33029: Value must have exactly {MinLength} characters
   Cause: Input values must be longer than minimum length.
   Action: Provide values that are longer than the minimum length.
Impact: Programmatic

JBO-33030: Value can have at most {MaxLength} characters
Cause: Input values exceeded maximum length length.
Action: Provide values that are less than or equal to maximum length.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-33031: Value must have at least {MinLength} and at most {MaxLength} characters
Cause: Value must have at least (minLen) and at most (maxLen) characters.
Action: Provide values that are between minimum and maximum length.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-33032: Value must have exactly {MaxLength} characters
Cause: Value must be exactly (maxLen) characters.
Action: Provide values that is exactly the maximum length.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-34000: Definition class name missing in XML file of type {0}
Cause: Name of the definition Java class missing in the JClient XML file.
Action: Every metaobject in JClient must have name of the definition object's Java class in the XML file. Correct the error by regenerating XML file in the design time.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-34001: Iterator binding {0} is not of the expected class {1}
Cause: The iterator binding is of the wrong Java class. Some controls expect to work with a JUIterRowBinding, while others with JUIterRangeBinding. This error indicates that the supplied iterator binding is not of the expected class.
Action: If the error is caused by some client code that supplies an iterator binding, correct the code to supply an iterator binding of the correct class. If the error is caused by framework code, contact Oracle Support Services with the stack trace.
Level: 1
Type: ERROR
Impact: Programmatic

JBO-34002: The application obj has already been set for form binding {0}. Cannot do it again
Cause: The form binding has already been registered with an application (JUApplication) object. It is illegal to try to set the form binding’s application object again.

Action: This error typically means a program error. Contact Oracle Support Services with the stack trace.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-34003: No iterators bound with the given name :{0}
Cause: No iterator binding found with the given name.
Action: Fix the iterator binding name before attempting to change the iterator associated with it.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-34004: No matching row found for entered or selected item in the LOV iterator for a list-binding.
Cause: No matching row found for a selected value in a List binding.
Action: Enter/Select a valid item from the list so that the matching row in the LOV iterator can be found.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-34005: Exceptions occurred in synchronizing updates from this application. Click Details to see the complete list.
Cause: Exceptions occurred in synchronizing data from the client Application into the Business Components tier.
Action: Fix the exceptions displayed in the details list and then reapply the changes.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-34006: Method that creates the iterator for this object returns null.
Cause: Collection to which this iterator is bound returns null.
Action: Fix the return value so that a valid collection is available for this iterator to bind to.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-34007: A value is not passed for mandatory parameter {0}.
Cause: Mandatory Parameter was not set by the calling code either programmatically or by overriding it in a nested container usecase.

Action: Set the mandatory parameter value

Level: 1
Type: ERROR
Impact: Programmatic

JBO-34008: Final parameter \(0\) cannot be modified.

Cause: Mandatory Parameter was not set by the calling code either programmatically or by overriding it in a nested container usecase.

Action: Set the mandatory parameter value

Level: 1
Type: ERROR
Impact: Programmatic

JBO-34009: ListBinding definition \(0\) not found.

Cause: Server side ListBinding could not be found with the given usage name.

Action: Fix the server side ListBinding usage name in List binding metadata

Level: 1
Type: ERROR
Impact: Programmatic

JBO-34010: The "\(0\)" descriptor appears in the application classpath more than once:
- \{1\} - \{2\}

Cause: The cpx classpath name has already been found at a different source in the classpath. It is illegal to have the same relative cpx name in the classpath more than once.

Action: Refactor one of the indicated URLs in the message so it appears under a different relative package in the classpath.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-34011: Validator expression \(0\) did not result in a valid object for bindingContainer:\{1\}

Cause: Expression for custom validator does not resolve into a valid object that as a public method of name validateBindingContainer and that takes the bindingContainer as the only parameter.

Action: Provide a different expression or fix the expression so that an object whose class has a method with following signature: public validateBindingContainer(DCBindingContainer ctr)

Level: 1
Type: ERROR
Impact: Programmatic
JBO-34012: Attempting to register a Swing binding factory when Faces version is already installed.

**Cause:** Faces binding factory is already installed for ADF Model bindings. Attempt to install a Swing version will break the application due to binding class incompatibilities.

**Action:** Remove or replace references to juimodel in namespace attributes, in pagedef xml files in the application with: http://xmlns.oracle.com/adfm/uimodel.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-34013: Enter a nonempty string and a string not equal to ‘%’ in the list:{0} to filter the list of values.

**Cause:** Empty string or % was entered to filter list datasource for a list binding.

**Action:** Enter any other string to filter by in the list component bound to this list binding.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-34014: No matching child node found for row with key:{0} under parent node:{1}

**Cause:** No matching node in the current range of rows found for a row retrieved from the backend collection.

**Action:** Scroll the backend collection to the appropriate range where a node for this row will be found. If row keys are for rows outside of current range of rows in the RowIterator, use alternate client apis to access the row data avoiding calls into this node binding.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-36000: An unexpected expression token is found.

**Cause:** Unexpected token found.

**Action:** Found an unexpected expression token. Make sure that the words are spelled correctly and that the expression makes sense.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

JBO-36001: Mismatching parentheses are found.

**Cause:** Mismatching parentheses.

**Action:** Examine the expression and ensure that open parentheses match up with closing parentheses.

**Level:** 1
Type: ERROR
Impact: Programmatic

JBO-36002: The method call specification is invalid. "," or ")" is expected.
Cause: Invalid method call. After a method parameter, ',' or ')' is expected, but neither was found.
Action: Examine the expression and correct method invocation.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-36003: An expression token is not found.
Cause: Expecting a token. The expression string was terminated unexpectedly.
Action: Examine the expression and ensure that the expression does not end unexpectedly.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-36004: Mismatching square brackets are found. An invalid array index is specified.
Cause: Mismatching square brackets.
Action: Examine the expression and ensure that open square brackets (for array index) match up with closing brackets.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-36005: Variable {0} is not found.
Cause: Variable not found.
Action: Examine the expression and ensure that the variable name is correct.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-36006: cannot convert {0} into {1}
Cause: Cannot convert data.
Action: Cannot convert data from one class to another. Examine the expression and ensure that the data assignment does not cause incompatible conversion of data.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-36007: Binary operation {0} is invalid for strings.
Cause: An attempt was made to invoke an invalid binary operation on two strings.

Action: Examine the operation ID and correct the expression so that the invalid binary operation is not attempted on strings. The expression runtime only recognizes addition as a valid binary operation between two strings.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-36008: The AND separator for a BETWEEN operator cannot be found. Token {0} is found instead.

Cause: A BETWEEN operator was found but no AND for the two comparison expressions.

Action: Take a look at the expression string. The correct syntax for BETWEEN is 'testVal BETWEEN value1 AND value2'. The expression parser could not find the AND keyword. Correct the expression.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-55001: A value of type {1} cannot be set to a value of type {0}.

Cause: Unexpected type was provided to Variant utility.

Action: Provide an expected type as reported in the exception.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-55002: Variant type {0} is invalid.

Cause: The data-type passed to the Variant utility from a Validation rule is invalid. This could be due to a corrupt XML-metadata definition in the component's XML file.

Action: Fix the component XML for the offending validation rule.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-55003: Variant name {0} is invalid.

Cause: The name of the variant type passed to the Variant utility from a Validation rule is invalid. This could be due to a corrupt XML meta data definition in the component's XML file.

Action: Fix the component XML for the offending validation rule.

Level: 1
Type: ERROR
Impact: Programmatic

JBO-56001: Row value is missing for data object {0}.
**Cause:** The Row Value for a SDOValueStore is null.

**Action:** Should not use SDOValueStore with a NULL row value.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-56002: Operation \(0\) on object \(1\) is not supported.**

**Cause:** An attempt was made to invoke an invalid service operation.

**Action:** Ensure that this service operation is defined at design time.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-56003: Nonpersistent attribute \(0\) cannot be used in a database mode view criteria.**

**Cause:** A nonpersistent attribute is used for DB ViewCriteriaItem.

**Action:** Make sure the attribute is persistent.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-56004: Non-ViewLink accessor attribute \(0\) cannot be used for a view criteria item that has nested view criteria.**

**Cause:** A non-ViewLink accessor is used for DB ViewCriteriaItem that has nested ViewCriteria.

**Action:** Make sure the attribute is a ViewLink accessor.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-56005: SDO type is not found for ViewObject \(0\) with namespace \(1\) and name \(2\).**

**Cause:** SDO Type is not found for a ViewObject.

**Action:** Make sure the viewobject is SDO enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**JBO-56006: ComplexType SDO property \(0\) has conflict values \(1\) vs. \(2\) for attribute \(3\).**

**Cause:** Conflict input values for ComplexType non-value properties.

**Action:** Make sure the payload has the same values for the same ComplexType non-value properties.

**Level:** 1
Type: ERROR
Impact: Programmatic

JBO-56007: ViewObject not found for sdo dataobject {0} from base viewobject {1}.
Cause: Can't find corresponding ViewObject for one SDO Type.
Action: Make sure passing valid SDODataObject that maps to valid ViewObject.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-56008: Mapped value for name {0} not found in viewobject {1} attribute {2}.
Cause: Can't find mapped value for one given name.
Action: Add neccessary name/value to PropertySet.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-56009: Mapped name for value {0} not found in viewobject {1} attribute {2}.
Cause: Can't find mapped value for one given value.
Action: Add neccessary name/value to PropertySet.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-56101: Comparision Operation {0} is invalid for ViewCriteriaItem of attribute
{1}.
Cause: The attempted operation is invalid for a ViewCriteriaItem.
Action: Change the input value of this operation.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-56102: Nonpersistent attribute {0} cannot be sorted upon.
Cause: A nonpersistent attribute is used for DB SortCriteria.
Action: Make sure the attribute is persistent.
Level: 1

Type: ERROR
Impact: Programmatic

JBO-56102: Dependencies specified for view attribute {0} conflict with dependencies
specified on the underlying entity attribute.
Cause: View attribute dependencies conflict with the entity attribute
dependencies.
Action: Ensure that the dependencies are not specified on both the view and
entity attribute.
Level: 1  
Type: ERROR  
Impact: Programmatic

**JBO-56103: View object [0] is not prepared.**

**Cause:** This is the exception that gets thrown by ViewObjectImpl when attempting an operation on a declarative view object on which prepareVOForQuery has not been called, such as findByAltKey (bug 7455860) or createAndInitRow (bug 7504211).

**Action:** Call ViewObjectImpl.prepareVOForQuery before calling findByAltKey or createAndInitRow for the first time.

Level: 1  
Type: ERROR  
Impact: Programmatic

**JBO-80000: Connection is already open.**

**Cause:** An open operation was attempted on a URL connection that is already open and in a active state.

**Action:** Ensure that a close operation has been called before invoking the open operation on the connection.

Level: 1  
Type: ERROR  
Impact: Other

**JBO-80001: Connection is not open.**

**Cause:** An interaction with the URL was attempted without opening the connection.

**Action:** Ensure that the connection has been opened and is active before starting an interaction with the URL.

Level: 1  
Type: ERROR  
Impact: Other

**JBO-80002: Connection description cannot be created.**

**Cause:** There was an internal error creating the metadata fragment for the URLConnection.

**Action:** Verify if the details necessary to create a new URL connection are provided.

Level: 1  
Type: ERROR  
Impact: Other

**JBO-80003: Operation is invalid. Connection is already released to the pool.**

**Cause:** An operation was attempted on a connection that had already been released to the pool.

**Action:** Obtain a new active reference to the connection from the connections context.
JBO-80004: Authentication provider ":0:" cannot be initialized.
Cause: Either the metadata describing the authentication provider was corrupted or the class registered in the metadata for the authentication could not be loaded.
Action: Ensure that the class is available in the class path of the application. Contact Oracle Support Services if the corrupt metadata cannot be recovered.

JBO-80005: The connection cannot be created. Connection metadata is invalid.
Cause: The connection metadata in the repository has been corrupted possibly due to an external edit.
Action: Contact Oracle Support Services to recover the corrupted metadata.

JBO-80006: The connection instance cannot be created. Resource endpoint is not provided.
Cause: A URLConnection could not be created as the URI / URL to the resource endpoint was not supplied.
Action: Provide a valid URL / URI to create the connection.

JBO-80007: The connection fails to open. Resource endpoint "\0\" does not exist.
Cause: The URL resource could not be accessed after the connection was created. If the connection describes an HTTP URL resource outside a firewall, the proxy settings might not have been correctly configured to access the URL.
Action: Ensure that the URL is active and can be accessed. If the connection describes an HTTP URL outside a firewall, verify that the correct proxy settings are configured.

JBO-80008: Proxy is not supported for file connection protocol.
Cause: An attempt was made to configure proxy information for a file connection protocol.
Action: Proxy configuration is not supported for a file connection protocol. Remove any proxy configuration done for this connection.
Level: 1
Type: ERROR
Impact: Other
JPS-00001: The method {0} is not supported.
  Cause: An unsupported method was used.
  Action: This operation is not supported. It cannot be used.
  Level: 1
  Type: WARNING
  Impact: Requests/Responses

JPS-00003: The HTTP response callback is null.
  Cause: HTTP response callback was null.
  Action: Check the log files and provide a valid HTTP response callback.
  Level: 1
  Type: ERROR
  Impact: Session

JPS-00004: The HTTP response is null.
  Cause: HTTP response was null.
  Action: Check the log files and provide a valid HTTP response.
  Level: 1
  Type: ERROR
  Impact: Session

JPS-00005: HTTP request callback is null.
  Cause: HTTP request callback was null.
  Action: Check the log files and provide a valid HTTP request callback.
  Level: 1
  Type: ERROR
  Impact: Session

JPS-00006: The HTTP request is null.
  Cause: HTTP request was null.
  Action: Check the log files and provide a valid HTTP request.
  Level: 1
JPS-00007: Cannot find an application ID.
   Cause:
   Action:
   Level: 1
Type: ERROR
Impact: Session

JPS-00008: The application ID {0} is invalid.
   Cause: Application ID was NULL.
   Action: Provide a valid application ID.
   Level: 1
Type: TRACE
Impact: Session

JPS-00009: The subject is read-only, and it cannot modified.
   Cause: Attempted to modify a read-only subject.
   Action: A read-only subject cannot be modified.
   Level: 1
Type: WARNING
Impact: Configuration

JPS-00010: A JPS context is not available in the callback handler.
   Cause: A context was not available from callback handler.
   Action: Check configuration in jps-config.xml.
   Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-00011: The service instance {0} already exists.
   Cause: The named service instance was already in use.
   Action: Use a different name for this service instance.
   Level: 1
Type: ERROR
Impact: Session

JPS-00012: The service instance {0} is missing.
   Cause: The service instance with the name {0} was not found.
   Action: Ensure the service instance name is present in the file jps-config.xml.
   Level: 1
Type: ERROR
Impact: Configuration
JPS-00013: The login module {0} already exists.
  
  **Cause:** The login module with the name {0} was already present.
  
  **Action:** Ensure the login module name is correct.

  **Level:** 1
  **Type:** ERROR
  **Impact:** Configuration

JPS-00014: The login module with {0} is missing.
  
  **Cause:** The login module with the name {0} did not exist.
  
  **Action:** Ensure the login module name is correct.

  **Level:** 1
  **Type:** ERROR
  **Impact:** Configuration

JPS-00015: All available service instance names are already in use.
  
  **Cause:** All service instance names were in use.
  
  **Action:** Remove unwanted service instances from jps-config.xml.

  **Level:** 1
  **Type:** ERROR
  **Impact:** Configuration

JPS-00016: All available service provider names are already in use.
  
  **Cause:** All service provider names were in use.
  
  **Action:** Remove unwanted service providers form jps-config.xml.

  **Level:** 1
  **Type:** ERROR
  **Impact:** Configuration

JPS-00017: The LDAP type is invalid.
  
  **Cause:** An invalid LDAP type was specified.
  
  **Action:** Provide a valid LDAP type. Valid types are XML, OID, ACTIVE_DIRECTORY, IPLANET and OVD. See the documentation for details.

  **Level:** 1
  **Type:** ERROR
  **Impact:** Configuration

JPS-00018: The keystore path {0} is null or invalid.
  
  **Cause:** Keystore path was null.
  
  **Action:** Provide a valid keystore path.

  **Level:** 1
  **Type:** ERROR
  **Impact:** Configuration

JPS-00019: The key type {0} is not supported.
Cause: Invalid key type was provided.
Action: Provide a valid key type.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00020: LDAP URL {0} is null or invalid.
Cause: Invalid or null LDAP URL was provided.
Action: Provide a valid LDAP URL.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00021: An Object named {0} does not exist.
Cause: Object with the name {0} did not exist.
Action: Verify that the object name is valid and exists.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00022: Callback handler missing for this login module request.
Cause: The callback handler was null.
Action: Provide an appropriate callback handler to invoke this login module.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-00023: The callback used for this operation has no HTTP request value.
Cause: The callback did not have a request method.
Action: Verify that the callback is initialized with the correct HTTP request value.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-00024: The callback used for this operation has no digest response object value.
Cause: The callback did not have any digest response object.
Action: Verify that the callback is initialized with the correct digest response value.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-00025: The {0} subscriber {1} from the HTTP header is different from the subscriber configured by the identity store as {2}. 
Cause: Found a subscriber mismatch.
Action: Check the identity store subscriber configuration.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00026: The value [0] is invalid for the application [1].
Cause: An invalid value was provided for this application.
Action: Provide the correct value for the application.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-00027: internal error [0]
Cause: Internal system error was found.
Action: See the log files or contact the system administrator.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-00028: The property runas.mode is deprecated and supported only for backward compatibility.
Cause: The property runas.mode has been deprecated.
Action: Use instead the oracle.security.jps.jaas.mode property in jps-config.xml.

Level: 1
Type: NOTIFICATION
Impact: Requests/Responses

JPS-00029: The audit service initialization failed for the application [0]. Reason [1].
Cause: Audit service failed.
Action: Check the audit service configuration in jps-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00030: Cannot complete exist operation.
Cause: Could not find entity.
Action: Verify that the entity exist.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00031: Cannot load the required class [0]. Reason [1].
Cause: Could not load a class.
Action: Ensure the class is in the class path.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-00032: The migration cannot write directly to the specified LDAP identity store; specify an alternate LDIF file to create.
Cause: Could not perform a direct LDAP write operation.
Action: See the log files for details.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-00033: The direct policy store should be XML-based, and it can be specified as an XML file or as an input stream.
Cause: The policy store specification was invalid.
Action: Check the policy store specification.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-00034: Cannot find the application context.
Cause: A context was not available for the application.
Action: Check the jps-config.xml configuration.

Level: 1
Type: ERROR
Impact: Session

JPS-00035: The WSS digest value {0} is invalid.
Cause: Found missing WSS digest value in callback.
Action: Verify that the callback has a valid WSS digest value.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-00036: The WSS digest nonce {0} is invalid.
Cause: Found missing WSS digest nonce in callback.
Action: Verify that the callback has a valid WSS digest nonce.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-00037: The WSS digest created {0} is invalid.
Cause: Found missing WSS digest created in callback.
Action: Verify that the callback has a valid WSS digest created.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-00038: Cannot create or retrieve a ContextFactory.
Cause: Cannot retrieve or create a JPS ContextFactory.
Action: Check jps-config.xml for correctness.

Level: 1
Type: ERROR
Impact: Other

JPS-00039: The service instance with provider {0} and name {1} is missing.
Cause: A service instance configuration was missing.
Action: Check the service instance configuration.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00040: The JPS audit component events file {0} is missing or invalid.
Cause: Cannot find the audit component events file.
Action: Make sure the audit component events file is available and valid.

Level: 1
Type: ERROR
Impact: Other

JPS-00041: Cannot load the JpsAdminService class.
Cause: The class JpsAdminService or a dependent class could not be loaded.
Action: Review the cause to resolve the error.

Level: 1
Type: ERROR
Impact: Other

JPS-00042: The LDAP connection pool provider {0} is not valid; the supported providers are JNDI or IDM. If unspecified, it defaults to UCP/JNDI provider.
Cause: The connection.pool.provider.type property value was invalid.
Action: Configure a supported connection.pool.provider.type value, or use the default provider by not setting the connection.pool.provider.type property.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00043: Cannot establish an LDAP connection after {0} attempts.
Cause: The connection could not be established.
Action: Check the LDAP configuration.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-00044: The LDAP URL format must be ldap://<host>:<port> or ldaps://<host>:<port>; but found {0}.
Cause: Invalid LDAP URL format was found.
Action: The format of the LDAP URL must be ldap://<host>:<port> or ldaps://<host>:<port> format.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00045: The LDAP principal {0} is invalid.
Cause: The LDAP principal was invalid.
Action: Provide a correct value for principal.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00046: The LDAP credential is invalid.
Cause: The LDAP credential was invalid.
Action: Provide the correct credential value.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00047: The Subject parameter cannot be null.
Cause: The supplied parameter was null.
Action: Check the Subject parameter supplied in the method call.

Level: 1
Type: WARNING
Impact: Programmatic

JPS-00048: Principals are missing in the Subject.
Cause: No principals were not found in the Subject.
Action: Verify that the supplied Subject contains principals.

Level: 1
Type: WARNING
Impact: Programmatic

JPS-00049: The authenticated user principal is missing in the Subject.
Cause: Authenticated user principal was not found in the Subject.
Action: Verify that the supplied Subject contains an authenticated user principal.

Level: 1
Type: WARNING
Impact: Programmatic

JPS-00050: Invalid Subject parameter supplied.
Cause: The Subject contained an anonymous user principal and an authenticated user principal.
Action: Ensure that the Subject does not contain the anonymous user principal.

Level: 1
Type: WARNING
Impact: Programmatic

JPS-00051: The oracle.security.jps.config property not set.
Cause: The oracle.security.jps.config property was not set.
Action: Set the oracle.security.jps.config property to an appropriate value.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-00052: Failed to Refresh Audit Service with new configuration.
Cause: Failed to reload the audit configuration.
Action: Check the audit configuration file to see if the lastest changes are valid.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00053: Component events file is missing for {0} at {1}.
Cause: The component events file for the given component type was missing.
Action: Verify that the properties set for the component files are correct in jps-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00054: Failed to create the auditor for {0}.
Cause: Failed to create the auditor object.
Action: Ensure that the component events file is not missing or corrupt and check the log files additional errors.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00055: Bootstrap credential store service is not initialized for the service configurator.
Cause: The bootstrap credential store service was not initialised.
Action: Make sure the bootstrap credential store service is initialized before any other services.

Level: 1
Type: WARNING
Impact: Programmatic

JPS-00056: Failed to create identity store service instance {0}. Reason: {1}.
Cause: Failed to create identity store service instance {0}. Cause: {1}.
Action: Check the log files to resolve the error.

Level: 1
Type: WARNING
Impact: Configuration

JPS-00057: Failed to set OutputProperty for indent or XML encoding. Reason {0}.
Cause: Failed to setOutputProperty for indent or XML encoding. Cause: {0}
Action: Check the XML Transformer implementation.

Level: 1
Type: WARNING
Impact: Configuration

JPS-00058: Failed to set XML output encoding to UTF-8 in OutputStreamWriter. Reason {0}.
Cause: Failed to set XML output encoding to UTF-8 in OutputStreamWriter.
Cause: {0}
Action: Check the JDK OutputStreamWriter supported encodings.

Level: 1
Type: WARNING
Impact: Configuration

JPS-00059: The specified enterprise identity is null or invalid.
Cause: An enterprise identity provided was null or invalid
Action: Provide a valid enterprise identity value.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00060: The specified enterprise identity {0} is not found in identity store.
Cause: The specified enterprise identity {0} was not found in the identity store.
Action: Provide a valid enterprise identity value.

Level: 1
Type: ERROR
Impact: Configuration
JPS-00061: No platform specific factory is found to create the platform principals.
Check errors in the log files.
Cause: No platform specific factory was found to create platform principals.
Action: Check the log files for the errors.
Level: 1
Type: ERROR
Impact: Configuration

JPS-00062: No identity store associated with policy store found.
Cause: No identity store associate with policy store found
Action: Contact system administrator
Level: 1
Type: ERROR
Impact: Configuration

JPS-00063: Jps servlet filter creation failed. Reason: {0}.
Cause: Jps Servlet Filter creation failed
Action: Contact system administrator
Level: 1
Type: WARNING
Impact: Configuration

JPS-00064: Jps ejb interceptor creation failed. Reason: {0}.
Cause: Jps EJB Interceptor creation failed
Action: Contact system administrator
Level: 1
Type: WARNING
Impact: Configuration

JPS-00065: Jps platform factory creation failed. Reason: {0}.
Cause: Jps Platform Factory creation failed
Action: Contact system administrator
Level: 1
Type: WARNING
Impact: Configuration

JPS-00066: Jps property value retrieval failed. Reason: {0}.
Cause: Jps property value retrieval failed
Action: Check the property values in jps configuration files
Level: 1
Type: ERROR
Impact: Configuration
JPS-00068: Ldap security checking failed. The LDAP url should start with ldaps and oracle.ldap.wltloc system property should be set. Reason : {0}.
Cause: Is LDAP secure failed
Action: Contact system administrator
Level: 1
Type: ERROR
Impact: Security

JPS-00069: Ldap credential store provider missing.
Cause: LDAP credential provider missed
Action: Ensure ldap credential store provider is configured
Level: 1
Type: ERROR
Impact: Security

JPS-00070: Ldap policy store provider missing.
Cause: LDAP policy store provider missing
Action: Ensure ldap policy store is configured
Level: 1
Type: ERROR
Impact: Security

JPS-00071: Ldap bootstrap credential retrieval failed. Reason:{0}.
Cause: Retrieval of bootstrap credential failed
Action: Check the credential store configuration for credential types, maps and key
Level: 1
Type: ERROR
Impact: Security

JPS-00072: Policy schema upgrade not required. Store Schema version {0} is compatible to the seed schema version {1}
Cause: Comparison of policy schema version in the store against to seed schema version.
Action: No action required
Level: 1
Type: NOTIFICATION
Impact: Configuration

JPS-00073: Policy store schema version not found
Cause: Trying to determine version of the policy schema in the store
Action: Contact Oracle Support Services.
Level: 1
Type: NOTIFICATION
Impact: Configuration

JPS-00074: Policy store schema version {0} is less than the latest schema version {1}, upgraded the Policy store schema to latest version.
Cause: Comparison of the Policy schema version in the store against the schema to seed
Action: No action required
Level: 1
Type: NOTIFICATION
Impact: Configuration

JPS-00075: Unable to query Policy store schema version under "{0}", Cause {1}
Cause: Query of Policy schema from the store failed
Action: Confirm the Policy store schema containers are present in the store
Level: 1
Type: NOTIFICATION
Impact: Configuration

JPS-00076: Policy schema version set to {0}
Cause: Version of the policy schema has been set in the store
Action: No action required
Level: 1
Type: NOTIFICATION
Impact: Configuration

JPS-00077: Setting version of policy schema in the store failed. Cause {0}
Cause: Unexpected error occurred while setting the version of the Policy schema in the store
Action: Confirm the container is present in the store and caller has sufficient privileges to perform this operation
Level: 1
Type: ERROR
Impact: Configuration

JPS-00078: Credential store schema upgrade not required. Store Schema version {0} is compatible to the seed schema version {1}
Cause: Comparison of Credential schema version in the store against the seed schema version.
Action: No action required
Level: 1
Type: NOTIFICATION
Impact: Configuration

JPS-00079: Credential store schema version not found
Cause: Check if the DN exists, or if the Credential Store schema version attribute is present at the specified location
Action: Contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Configuration

JPS-00080: Credential store schema version {0} is less than the latest schema version {1}, upgraded the Credential store schema to latest version.

Cause: Comparison of the Credential schema version in the store against the schema to seed

Action: No action required

Level: 1
Type: NOTIFICATION
Impact: Configuration

JPS-00081: Unable to query Credential store schema version under "{0}", Cause {1}

Cause: Query of Credential schema from store store failed

Action: Confirm the Credential store schema container in the store is present

Level: 1
Type: NOTIFICATION
Impact: Configuration

JPS-00082: Credential schema version set to {0}

Cause: Version of the credential schema has been set in the store

Action: No action required

Level: 1
Type: NOTIFICATION
Impact: Configuration

JPS-00083: Setting version of credential schema in the store failed. Cause {0}

Cause: Unexpected error occurred while setting the version of the credential schema in the store

Action: Confirm the container is present in the store and caller has sufficient privileges to perform this operation

Level: 1
Type: ERROR
Impact: Configuration

JPS-00084: IOException raised from FileLocker {0}.

Cause: Closing IO objects in FileLocker

Action: Check the file system for access privileges and disk space availability.

Level: 1
Type: WARNING
Impact: Other

JPS-00085: OID version is unavailable.
Cause: OID version is unavailable
Action: Check the ldap url against the server type passed.
Level: 1
Type: WARNING
Impact: Other

JPS-00086: Error while encoding search string: {0} to UTF-8 encoding
Cause: Unable to encode user string to UTF-8 encoding
Action: Check the search string.
Level: 1
Type: WARNING
Impact: Other

JPS-00087: The subject parameter is null.
Cause: The subject parameter is null
Action: Make sure the subject parameter is not null
Level: 1
Type: ERROR
Impact: Security

JPS-00088: The user name parameter is null.
Cause: The user name parameter is null
Action: Make sure the user name parameter is not null
Level: 1
Type: ERROR
Impact: Security

JPS-00089: The subject from the current AccessControlContext is null.
Cause: No subject is associated with the current AccessControlContext.
Action: Ensure that the subject is associated with the current AccessControlContext.
Level: 1
Type: ERROR
Impact: Security

JPS-00090: Failed to create policy store service instance {0}. Cause: {1}.
Cause: Failed to create policy store service instance {0}. Cause: {1}.
Action: Check the log files to resolve the error.
Level: 1
Type: WARNING
Impact: Configuration

JPS-00091: No {0} available.
Cause: No {0} available.
Action: Contact the administrator.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-00092: The ldap service was null.
Cause: The ldap service was null.
Action: Ensure the ldap service is not null.

Level: 1
Type: ERROR
Impact: Security

JPS-00093: Class {0} was not type of {1}.
Cause: Class {0} was not type of {1}.
Action: Ensure class name is correct.

Level: 1
Type: ERROR
Impact: Security

JPS-00094: Failed to parse digest response.
Cause:
Action:

Level: 1
Type: WARNING
Impact: Configuration

JPS-00095: {0} system properties not set.
Cause: System properties {0} not set.
Action: Set the system properties.

Level: 1
Type: WARNING
Impact: Configuration

JPS-00096: No {0} defined for {1}.
Cause: No {0} defined for {1}.
Action: Defined the specified object.

Level: 1
Type: WARNING
Impact: Configuration

JPS-00097: {0} missing in message : {1}.
Cause: {0} missing in message : {1}.
Action: Check the input.

Type: ERROR
Impact: Requests/Responses

JPS-01003: The value of name {0}, url {1}, of port {2} is invalid in this datasource credential.
Cause: The specified datasource credential was invalid.
Action: Use only a supported credential type. The supported types are {0}.
Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-01004: The value \{0\} is invalid in this generic credential.**
**Cause:** The specified generic credential was invalid.
**Action:** Use only a supported credential type. The supported types are \{0\}.

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-01005: The credential type \{0\} is not supported.**
**Cause:** The specified credential type was invalid.
**Action:** Use only a supported credential type. The supported types are \{0\}.

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-01006: The credential expired on \{0\}.**
**Cause:** This credential expired on \{0\}.
**Action:** Create a new credential.

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-01007: The credential with map \{0\} and key \{1\} already exists.**
**Cause:** This credential already existed.
**Action:** Use a credential with different map name or key.

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-01008: The credential map name \{0\} already exists.**
**Cause:** This credential map name already existed.
**Action:** Use a different map name.

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-01009: The credential with map \{0\} and key \{1\} does not exist.**
**Cause:** This credential did not exist.
**Action:** Check the credential map name and key.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-01010: The credential map {0} does not exist.
Cause: This credential map name did not exist.
Action: Check the credential map name.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-01011: The credential store location property {0} is not configured, or the configured value {1} is invalid.
Cause: The credential store location was not specified.
Action: Check the value of the location attribute.

Level: 1
Type: ERROR
Impact: Configuration

JPS-01012: The credential property {0} is invalid or not defined.
Cause: The credential property {0} was invalid or not defined.
Action: Check the configuration of this property.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-01013: The credential store DN {0} is missing in the store; the target DN must be pre-configured.
Cause: The expected credential store DN {0} was missing.
Action: Configure this DN during the bootstrap process.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-01014: The credential {0} is invalid.
Cause: This credential was invalid.
Action: Use only a supported credential type. The supported types are password or generic.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-01015: Cannot retrieve credential {0}.
Cause: This credential was invalid.
Action: Use only a supported credential type. The supported types are password or generic.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-01016: A password credential is expected; instead found {0} for alias {1} and key {2} at location {3}.
Cause: Wrong credential type was found.
Action: Use the password credential type. Expecting password credential but found {0} for alias {1} and key {2} at location {3}.

Level: 1
Type: WARNING
Impact: Other

JPS-01017: A generic credential is expected; instead found {0}.
Cause: Wrong credential type was found.
Action: Use the generic credential type. Expecting generic credential but found {0}.

Level: 1
Type: WARNING
Impact: Other

JPS-01018: A password credential is missing in the credential store.
Cause: The password credential was not found in the credential store.
Action: Ensure that the credential is present in the credential store.

Level: 1
Type: ERROR
Impact: Session

JPS-01019: The credential store {0} has been moved or deleted.
Cause: The specified credential store did not exist.
Action: Ensure that the credential store location is valid.

Level: 1
Type: ERROR
Impact: Configuration

JPS-01020: Cannot create store {0}.
Cause: Could not create the credential store.
Action: Verify the store location, that sufficient permissions are in place, and that sufficient disk space is available.

Level: 1
Type: ERROR
Impact: Configuration

JPS-01021: The generic credential {0} is not serializable.
Cause: This generic credential was not serializable.
Action: Make this credential serializable.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-01022: The expiration time \{0\} is invalid: the expiration time must be later than the creation time.

Cause: Invalid credential expiration time.
Action: Set the expiration time to a time later than the credential creation time.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-01023: Store does not contain all expected maps. Reason \{0\}.

 Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01024: Store contains all expected maps. Result \{0\}.

 Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01025: Store does not contain all expected credentials. Reason \{0\}.

 Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01026: Store contains all expected credentials. Result \{0\}.

 Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01027: Cannot get credential map. Reason \{0\}.

 Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01028: successful getting of credential map
Cause:
Action:
Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01029: successful getting of credential
Cause:
Action:
Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01030: Cannot get credential. Reason {0}.
Cause:
Action:
Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01031: Cannot retrieve map names. Reason {0}.
Cause:
Action:
Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01032: successful setting of credential
Cause:
Action:
Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01033: Cannot set credential. Reason {0}.
Cause:
Action:
Level: 1
Type: NOTIFICATION
Impact: Compliance
JPS-01034: successful resetting of credential
  Cause:
  Action:

  Level: 1
  Type: NOTIFICATION
  Impact: Compliance

JPS-01035: Cannot reset credential. Reason {0}.
  Cause:
  Action:

  Level: 1
  Type: NOTIFICATION
  Impact: Compliance

JPS-01036: successful setting of credential map
  Cause:
  Action:

  Level: 1
  Type: NOTIFICATION
  Impact: Compliance

JPS-01037: Cannot set credential map. Reason {0}.
  Cause:
  Action:

  Level: 1
  Type: NOTIFICATION
  Impact: Compliance

JPS-01038: successful resetting of credential map
  Cause:
  Action:

  Level: 1
  Type: NOTIFICATION
  Impact: Compliance

JPS-01039: Cannot reset credential map. Reason {0}.
  Cause:
  Action:

  Level: 1
  Type: NOTIFICATION
  Impact: Compliance

JPS-01040: successful deletion of credential
  Cause:
Action:
Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01041: Cannot delete credential. Reason {0}.
Cause:
Action:
Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01042: successful deletion of credential map
Cause:
Action:
Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01043: Cannot delete credential map. Reason {0}.
Cause:
Action:
Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01044: successful deletion of all credentials from the store
Cause:
Action:
Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01045: Cannot delete all credentials from the store. Reason {0}.
Cause:
Action:
Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01046: successful retrieving of map names; mapNameSet {0}.
Cause:
Action:
Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01047: Cannot persist the wallet. Reason {0}.
   Cause: 
   Action: 

Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-01048: Modifying of credential failed. Reason {0}
   Cause: Modification of credential failed
   Action: Contact system administrator

Level: 1
Type: WARNING
Impact: Compliance

JPS-01049: Reading all credentials from the store failed. Reason {0}
   Cause: Read of all credentials failed
   Action: Contact system administrator

Level: 1
Type: WARNING
Impact: Compliance

JPS-01050: Opening of wallet based credential store failed. Reason {0}
   Cause: Credential wallet could not be opened
   Action: Contact system administrator

Level: 1
Type: WARNING
Impact: Compliance

JPS-01051: Credential audit events cannot be logged. Reason {0}
   Cause: Credential store audit events logging not enabled
   Action: Check the audit configuration to ensure auditing enabled

Level: 1
Type: WARNING
Impact: Compliance

JPS-01052: Credential audit event logging failed. Reason {0}
   Cause: Credential audit event logging failed
   Action: Contact system administrator

Level: 1
Type: WARNING
Impact: Compliance

JPS-01053: Creation of new credential map failed. Reason {0}
Cause: Creation of new credential map failed
Action: Ensure all jps libraries are in setup properly in the runtime
Level: 1
Type: WARNING
Impact: Compliance

JPS-01054: Refresh of credential wallet failed. Reason {0}
Cause: Refresh of credstore wallet failed
Action: Contact system administrator
Level: 1
Type: WARNING
Impact: Compliance

JPS-01055: Could not create credential store instance. Reason {0}
Cause: Could not create credential store instance
Action: Contact system administrator
Level: 1
Type: WARNING
Impact: Compliance

JPS-01056: The credential store location {0} was invalid. It should be a directory or full path to cwallet.sso file.
Cause: The credential store location {0} was invalid. It should be a directory or full path to cwallet.sso file.
Action: Check the value of the location property
Level: 1
Type: ERROR
Impact: Configuration

JPS-01057: The credential map was invalid. Reason {0}
Cause: The credential map was null.
Action: Check the value of the credential map
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-01058: The credential dn {0} was invalid.
Cause: The credential dn was invalid.
Action: Ensure the credential dn is valid.
Level: 1
Type: ERROR
**Impact:** Requests/Responses

**JPS-01059:** The credential store instance {0} was not fully initialized.

**Cause:** The credential store was not fully initialized until data source is available.

**Action:** Wait and retry later

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**JPS-01060:** The credential store instance does not have the property ldap url/JDBC url/datasource JNDI name defined.

**Cause:** The credential store property ldap.url or jdbc.url or datasource.jndi.name was not defined.

**Action:** Check the configuration for this property.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**JPS-01061:** Access to bootstrap credential store denied to application code.

**Cause:** Application code was trying to access a bootstrap credential store. Bootstrap credential store is intended only for the OPSS usage.

**Action:** bootstrap_credstore_context need not be used for credential store operations.

**Level:** 1  
**Type:** ERROR  
**Impact:** Security

**JPS-01062:** A backup of the bootstrap credential store could not be created.

**Cause:** A backup of the bootstrap credential store could not be created.

**Action:** Investigate the logs to find out the root cause of the exception.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-01500:** The anonymous service configuration is missing.

**Cause:** The anonymous service configuration was missing in jps-config.xml.

**Action:** Configure the anonymous service in jps-config.xml.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**JPS-01501:** The anonymous identity store provider instance {0} is not found.

**Cause:** The anonymous identity store provider configuration was invalid.

**Action:** Check the anonymous identity store provider configuration in jps-config.xml.
JPS-01502: The LDAP identity store provider instance {0} is not found.
Cause: Invalid or missing LDAP identity store provider configuration.
Action: Check LDAP identity store provider configuration in jps-config.xml.

JPS-01503: The XML identity store provider instance {0} is not found.
Cause: Invalid or missing XML identity store provider configuration.
Action: Check the XML identity store provider configuration in jps-config.xml.

JPS-01504: The secret store provider for provider {0} and instance {1} does not exist.
Cause: The credential provider was missing.
Action: Check the configuration of the credential store provider in jps-config.xml.

JPS-01505: The key store provider {0} is missing or not configured.
Cause: The keystore provider configuration was missing in jps-config.xml.
Action: Configure a keystore provider in jps-config.xml.

JPS-01506: Invalid context name.
Cause: Invalid context name found.
Action: Check the configurations of contexts in jps-config.xml.

JPS-01507: Invalid login module name.
Cause: Invalid login module name found.
Action: Check the login module configurations in jps-config.xml.
Impact: Configuration

**JPS-01508: Invalid login module descriptor.**
*Cause:* Invalid login module descriptor found.
*Action:* Check the login module instance configurations in jps-config.xml.

Level: 1
Type: ERROR

**JPS-01509: Invalid login module class name.**
*Cause:* Invalid login module class name found.
*Action:* Check the loginModuleClassName property in the login module instance configuration in jps-config.xml.

Level: 1
Type: ERROR

**JPS-01510: Invalid login module entries.**
*Cause:* Invalid login module entries found.
*Action:* The expected login module to be invoked is not present or misconfigured. Check the login module instance configurations in jps-config.xml.

Level: 1
Type: ERROR

**JPS-01511: Invalid login module entry.**
*Cause:* The login module entries were not valid in the jps-config.xml file.
*Action:* Correct the login module entries in service instances and service providers.

Level: 1
Type: ERROR

**JPS-01512: Missing login module entry.**
*Cause:* The login module entries were missing in the jps-config.xml file.
*Action:* Add the appropriate login module entries in service instances and service providers.

Level: 1
Type: ERROR

**JPS-01513: The configuration of the JAAS login provider {0} and the service instance {1} are missing.**
*Cause:* The login module provider was missing.
*Action:* Ensure that a login module provider is configured in the jps-config.xml.
Level: 1
Type: ERROR
Impact: Configuration

JPS-01514: The default context is missing in jps-config.xml.
Causes: Default context was missing in jps-config.xml.
Action: Add a default context to jps-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

JPS-01515: A context named anonymous is missing in jps-config.xml.
Causes: Context named anonymous was missing in jps-config.xml.
Action: Add a context named anonymous in jps-config.xml file with an anonymous service instance reference.

Level: 1
Type: ERROR
Impact: Configuration

JPS-01516: The default credential store service is missing in default jps-config.xml.
Causes: The default credential store service was missing in the default context in jps-config.xml.
Action: There must be at least one credential store service configured in the default context.

Level: 1
Type: ERROR
Impact: Other

JPS-01517: The generic identity store provider is missing.
Causes: Invalid or missing generic identity store provider configuration.
Action: Check the generic identity store provider configuration in jps-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

JPS-01518: The anonymous service is not available in the application context.
Causes: The anonymous service was not available in context.
Action: Check the context in jps-config.xml.

Level: 1
Type: ERROR
Impact: Session

JPS-01519: The default context configuration is missing in jps-config.xml.
Causes: The default context configuration was not available in jps-config.xml.
Action: Ensure that the default context is present in jps-config.xml.
Level: 1
Type: WARNING
Impact: Session

JPS-01520: Cannot initialize identity store, cause: {0}.
Cause: Could not initialize identity store.
Action: Correct the identity store configuration.

Level: 1
Type: ERROR
Impact: Configuration

JPS-01521: Identity store file path is invalid.
Cause: Identity store file path was invalid or null.
Action: Ensure that the path configured with the property ADF_IM_FILE_PATH is valid.

Level: 1
Type: ERROR
Impact: Configuration

JPS-01522: The Jps configuration is invalid.
Cause: JPS configuration was null or invalid.
Action: Verify configuration in jps-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

JPS-01523: The service instance {0} is invalid or not configured in jps-config.xml.
Cause: A service instance configuration was not valid.
Action: Verify that the instance is correctly configured in jps-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

JPS-01524: The service instance {0} is invalid or not configured in jps-config.xml.
Cause: A service provider configuration was invalid.
Action: Verify that the provider is correctly configured in jps-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

JPS-01525: The identity store service is not properly configured.
Cause: Found invalid identity store service configuration in jps-config.xml.
Action: Ensure a valid identity store configuration in jps-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

JPS-01526: Configured identity store, user manager, or role manager is invalid. The error is {0}.
Cause: Found null value for configured identity store, user manager, or role manager.
Action: Correct the identity store configuration.
Level: 1
Type: ERROR
Impact: Configuration

JPS-01527: The identity store factory name is not configured.
Cause: Could not find identity store factory name.
Action: Use the property ADF_IM_FACTORY_CLASS to specify the factory class.
Level: 1
Type: ERROR
Impact: Configuration

JPS-01528: Idm identity store is invalid.
Cause: The identity store was not configured correctly.
Action: Correct the configuration of the identity store in jps-config.xml.
Level: 1
Type: ERROR
Impact: Configuration

JPS-01529: The context {0} contains multiple services of type {1}.
Cause: The context {0} contains multiple services of type {0}.
Action: Check jps-config.xml for correctness.
Level: 1
Type: ERROR
Impact: Configuration

JPS-01530: The anonymous service is already configured in the context {0}.
Cause: The anonymous service is already configured in the context {0}.
Action: Check jps-config.xml for correctness.
Level: 1
Type: WARNING
Impact: Configuration

JPS-01531: Configuration location {0} is a directory. File name expected.
Cause: Configuration location {0} is a directory. File name expected.
Action: Provide a valid configuration file location, including a file name.
Level: 1
Type: ERROR
Impact: Configuration

JPS-01532: The service instance location {0} is invalid or not configured in jps-config.xml.
Cause: A service instance configuration was invalid.
Action: Verify that the location of the instance is correctly configured in jps-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

JPS-01533: Failed to create service instance {0} for application {1}.
Cause: Failed to create service instance {0} for application {1}.
Action: Check the log files to resolve the error.

Level: 1
Type: WARNING
Impact: Configuration

JPS-01534: Failed to get identity store configuration.
Cause: Failed to get identity store configuration.
Action: Ensure the configuration is available.

Level: 1
Type: ERROR
Impact: Security

JPS-01535: Failed to get configuration name {0}.
Cause: Failed to get configuration name {0}.
Action: Check the log files to resolve the error.

Level: 1
Type: WARNING
Impact: Configuration

JPS-01536: Failed to evaluate XML expression on Object {0}.
Cause: Failed to evaluate XML expression on Object {0}.
Action: Check the log files to resolve the error.

Level: 1
Type: WARNING
Impact: Configuration

JPS-01537: Failed to handle config location {0}. Reason {1}.
Cause:
Action:

Level: 1
Type: WARNING
Impact: Security

JPS-01538: The default policy provider was not found.
Cause: The default policy provider was not found.
Action: Ensure policy provider configuration is correct.
Level: 1

Type: ERROR
Impact: Security

JPS-01539: The Ovd IGF service provider instance {0} is not found.
Cause: Invalid or missing Ovd IGF service provider configuration.
Action: Check Ovd IGF service provider configuration in jps-config.xml.
Level: 1

Type: ERROR
Impact: Configuration

JPS-01543: The value of {0} is invalid. It must be an integer.
Cause: attribute.expire.time.seconds is not an integer.
Action: Ensure attribute.expire.time.seconds is a valid integer.
Level: 1

Type: ERROR
Impact: Configuration

JPS-02000: The authentication of user {0} succeeded.
Cause:
Action:
Level: 1

Type: TRACE
Impact: Requests/Responses

JPS-02001: The authentication of user {0} failed.
Cause: User authentication failed.
Action: Ensure the user exists in the identity store. Check the user credentials that are being sent for authentication.
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-02003: Authentication failed.
Cause: Could not authenticate user.
Action: Ensure that authentication uses valid user name and password.
Level: 1

Type: ERROR
Impact: Requests/Responses

**JPS-02004: Cannot authenticate user {0}.**

Cause: Could not authenticate user.
Action: Ensure that the credentials provided for authentication are correct.

Level: 1
Type: ERROR
Impact: Security

**JPS-02005: Cannot login user {0} because {1}. Check the log files for more details.**

Cause: Encountered an error while authenticating user.
Action: Contact the domain administrator.

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-02008: Authenticated role name is invalid: property {0} is invalid or not configured.**

Cause: Found invalid or undefined authentication role name property.
Action: Ensure that authentication role name properties are valid in jps-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

**JPS-02009: SAML trusted assertion issuer is not configured: property set {0} is not configured.**

Cause: Could not find configuration for SAML trusted assertion issuer.
Action: Set the property saml.trusted.issuers in jps-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

**JPS-02010: Cannot verify SAML assertion.**

Cause: Found invalid assertion; SAML trusted assertion issuer was not configured.
Action: Check assertion and set the property saml.trusted.issuers in jps-config.xml.

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-02011: SAML assertion is missing name identifier.**

Cause: Found invalid assertion: name identifier was missing.
Action: Ensure the use of a valid assertion.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-02012: SAML assertion subject name is invalid.
Cause: Found invalid assertion: subject name was null.
Action: Ensure the use of a valid assertion.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-02013: SAML assertion issuer name is invalid.
Cause: Found invalid assertion: issuer name was invalid.
Action: Ensure the use of a valid assertion.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-02014: SAML assertion is invalid.
Cause: Found invalid assertion.
Action: Ensure the use of a valid assertion.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-02015: SAML assertion has missing subject.
Cause: Found invalid assertion: subject statement was missing.
Action: Ensure the use of a valid assertion.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-02016: SAML assertion is missing conditions.
Cause: Found invalid assertion: condition statement was missing.
Action: Ensure the use of a valid assertion.

Level: 1
Type: ERROR
Impact: Requests/Responses

Action: Verify that the condition "not before" in the SAML assertion is set to a date earlier than or equal to today’s date.
Level: 1  
Type: ERROR  
Impact: Requests/Responses

Action: Verify that the condition "on or after" in the SAML assertion is set to a valid date.

Level: 1  
Type: ERROR  
Impact: Requests/Responses

JPS-02019: SAML assertion is missing assertion issuers signature.

Cause: Found invalid assertion: assertion issuers signature was missing.

Action: Ensure the use of a valid assertion.

Level: 1  
Type: ERROR  
Impact: Requests/Responses

JPS-02020: Signature for SAML assertion issuer is invalid.

Cause: Found invalid signature in SAML assertion issuer.

Action: Ensure the use of a valid assertion.

Level: 1  
Type: ERROR  
Impact: Requests/Responses

JPS-02021: Signature certificate (X509 Data) for SAML assertion issuer is invalid.

Cause: Found invalid signature certificate (X509 Data) in SAML assertion.

Action: Ensure the use of a valid assertion.

Level: 1  
Type: ERROR  
Impact: Requests/Responses

JPS-02022: Cannot verify signature for SAML assertion.

Cause: Failed to verify issuers signature in assertion.

Action: Check the assertion and set the property saml.trusted.issuers in jps-config.xml.

Level: 1  
Type: ERROR  
Impact: Requests/Responses

JPS-02023: Cannot verify SAML assertion signature certificate path.

Cause: Found invalid assertion signature.
**Action:** Check the assertion and set the property saml.trusted.issuers in jps-config.xml.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

**JPS-02024:** **Cannot retrieve trusted CA policy for issuer {0}**.
**Cause:** Found invalid assertion.
**Action:** Check the assertion and set the property saml.trusted.issuers in jps-config.xml.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

**JPS-02025:** **Cannot modify read-only Subject**.
**Cause:** Could not modify a read-only subject.
**Action:** Ensure the program logic is correct and that the program does not attempt to modify a read-only subject.

**Level:** 1
**Type:** ERROR
**Impact:** Requests/Responses

**JPS-02026:** **X509 certificate is invalid**.
**Cause:** The X509 certificate passed to the callback handler was null or invalid.
**Action:** Ensure that the callback handler uses a valid X509 certificate.

**Level:** 1
**Type:** ERROR
**Impact:** Other

**JPS-02027:** **The property set {0} is missing in jps-config.xml**.
**Cause:** Could not find property set in jps-config.xml.
**Action:** Configure the property set in jps-config.xml.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

**JPS-02028:** **The extended property set {0} is missing in jps-config.xml**.
**Cause:** Could not find extended property set in jps-config.xml.
**Action:** Configure the extended property set in jps-config.xml.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

**JPS-02029:** **The default realm is not configured in identity store service {0}**.
**Cause:** Could not find the default realm in the identity store service.
Action: Configure the default realm property in the identity store service.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02030: The default realm configured in identity store service {0} is empty or null.
Cause: Found null default realm configured in identity store service.
Action: Configure the default realm property in the identity store service.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02031: The invalid realm name property {0} is configured in identity store service {1}.
Cause: Found invalid realm name property in identity store service.
Action: Configure the correct realm name property in the identity store service.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02032: The duplicate realm name {0} is configured in identity store service {1}.
Cause: Found duplicate realm in identity store service.
Action: Remove duplicate realm configuration from the identity store service.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02033: The realm name {0} passed for authentication is invalid. Was expecting {1}, but found {0}.
Cause: Found invalid realm name {0}. Was expecting {1}, but found {0}.
Action: Check the realm name passed to the authentication of user name.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02034: Realm name is missing in user name for authentication in multi-realm configuration.
Cause: The realm name was not supplied for authentication of multi-realm configuration.
Action: Ensure that the realm name value is passed in the user name when authenticating a multi-realm configuration.

Level: 1
Type: ERROR
Impact: Configuration
JPS-02035: Cannot properly initialize the Kerberos authenticator.
    Cause: Could not initialize the Kerberos authenticator.
    Action: Check the log files for errors and contact the domain administrator.

    Level: 1
    Type: TRACE
    Impact: Requests/Responses

JPS-02036: Browser does not support Kerberos authentication.
    Cause: Could not find support for Kerberos authentication, or it was not configured correctly.
    Action: Verify that the browser is set to allow Kerberos authentication.

    Level: 1
    Type: TRACE
    Impact: Requests/Responses

JPS-02037: The SAML assertion issuer {0} certificate is missing from the keystore.
    Cause: Could not find SAML assertion certificate in keystore.
    Action: Store the SAML assertion issuer's certificate in the keystore, and configure the trustpoint alias in JpsSAMLLModule.

    Level: 1
    Type: ERROR
    Impact: Configuration

JPS-02038: The SAML assertion {0} is missing a signature.
    Cause: Could not find expected signature in assertion.
    Action: Check that the assertion sent has a valid signature.

    Level: 1
    Type: TRACE
    Impact: Requests/Responses

JPS-02039: Cannot assert certificate. Reason {0}.
    Cause: Found invalid certificate, or could not find corresponding user in identity store.
    Action: Make sure that the assertion is valid.

    Level: 1
    Type: TRACE
    Impact: Requests/Responses

JPS-02040: Both user identity and token were provided for assertion. Either user identity or token should be provided, not both.
    Cause: Both user identity and token were provided for assertion.
    Action: Provide either user identity or a token for assertion, not both.

    Level: 1
    Type: ERROR
Impact: Other

JPS-02041: Assertor class was configured as {0}, but does not implement {1}.
Cause: Assertor class was configured as {0}, but does not implement {1}.
Action: Provide an Assertor that implements {1}.
Level: 1
Type: ERROR
Impact: Other

JPS-02042: Token assertion failed.
Cause: Token assertion failed.
Action: Check detailed logs for more information.
Level: 1
Type: ERROR
Impact: Other

JPS-02043: User name cannot be null or empty.
Cause: User name cannot be null or empty.
Action: Check that the user name is not null or empty.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-02044: Found invalid attesting entity in SAML assertion. Attesting entity: {0}.
Cause: Found invalid attesting entity in SAML assertion. Attesting entity: {0}.
Action: Check that the attesting entity for the SAML assertion is valid.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-02045: Audience URI for SAML assertion is invalid.
Cause: SAML assertion audience URI is invalid.
Action: Check that the audience URI for the SAML assertion is valid.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-02046: Cannot get the user name from SAML assertion name identifier: {0}.
Cause: Cannot get the user name from SAML assertion name identifier: {0}.
Action: Check that the name identifier for the SAML assertion is valid.
Level: 1
Type: ERROR
Impact: Requests/Responses
JPS-02047: SAMLNameIdentifierMapper class was configured as {0}, but does not implement oracle.security.jps.internal.jaas.module.saml.SAMLNameIdentifierMapper.

**Cause:** SAMLNameIdentifierMapper class was configured as {0}, but does not implement oracle.security.jps.internal.jaas.module.saml.SAMLNameIdentifierMapper.

**Action:** Provide an SAMLNameIdentifierMapper that implements oracle.security.jps.internal.jaas.module.saml.SAMLNameIdentifierMapper.

**Level:** 1

**Type:** ERROR

**Impact:** Other

JPS-02048: Incorrect password was provided.

**Cause:** Incorrect password was provided.

**Action:** Ensure that authentication uses correct password.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

JPS-02049: Null or empty password was provided.

**Cause:** Null or empty password was provided.

**Action:** Ensure that authentication uses correct password.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

JPS-02050: Signature verification failed. Principal: {0}

**Cause:** Signature verification failed.

**Action:** This error is unlikely to occur. Contact technical support when necessary.

**Level:** 1

**Type:** ERROR

**Impact:** Security

JPS-02500: The principal name is invalid.

**Cause:** Found null principal name.

**Action:** Check the principal name.

**Level:** 1

**Type:** ERROR

**Impact:** Requests/Responses

JPS-02501: The principal type {0} is invalid.

**Cause:** Found invalid principal type.

**Action:** Check the principal type.

**Level:** 1
Type: ERROR
Impact: Requests/Responses
JPS-02502: The password \{0\} is invalid.
Cause: Found invalid password.
Action: Check the password passed to create user account.
Level: 1
Type: ERROR
Impact: Data
JPS-02503: The user name \{0\} is invalid.
Cause: Found invalid user name.
Action: Ensure that the user name used to create, fetch, or remove the account is valid.
Level: 1
Type: ERROR
Impact: Data
JPS-02504: The user range starting at \{0\} and ending at \{1\} is not a valid range.
Cause: The user range was invalid.
Action: Check the start and end range. The start range cannot be less than 0, and the end range cannot be less than start range.
Level: 1
Type: ERROR
Impact: Data
JPS-02505: The group \{0\} is invalid.
Cause: Group name was invalid.
Action: Check the group name that is being sent for creating/fetching/removing group.
Level: 1
Type: ERROR
Impact: Data
JPS-02506: The group range starting at \{0\} and ending at \{1\} is not valid range.
Cause: The JPSUserManager.getGroups() method was invoked with invalid start or end range.
Action: Check the start and end range. The start range cannot be less than 0, and the end range cannot be less than start range.
Level: 1
Type: ERROR
Impact: Data
JPS-02507: The anonymous user is not found.
Cause: The anonymous user was not found.
Action: Ensure that a valid anonymous user is configured.
Level: 1
Type: ERROR
Impact: Session

JPS-02508: The anonymous user name is invalid; property {0} is invalid or not defined.
Cause: The anonymous.user.name property was not configured in the anonymous service configuration.
Action: Configure the anonymous.user.name property to a valid user name in the identity store while configuring the Anonymous Service.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02509: The user {0} already exists in the store; choose a different user name.
Cause: The specified user name already existed in the store.
Action: Provide a different user name.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-02510: The group {0} already exists in the store; choose a different group name.
Cause: The specified group name already existed in the store.
Action: Provide a different group name.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-02511: The role for group {0} is invalid.
Cause: Found null role in group.
Action: Check the group’s name.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-02512: Cannot create a new user {0}.
Cause: Could not create user.
Action: Ensure that the user name is valid and distinct from any other existing user name.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02513: Cannot drop user {0}.
Cause: Could not drop the user.
Action: Ensure this user already exists.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02514: Cannot retrieve user profile.
Cause: Could not get profile for user.
Action: Ensure that the user exists.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02515: Cannot update user profile.
Cause: Could not set profile for user.
Action: Ensure that the user exists.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02516: Cannot retrieve role profile.
Cause: Could not get role profile.
Action: Ensure that the role exists.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02517: Cannot update role profile.
Cause: Could not set role profile.
Action: Ensure that the role exists.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02518: Cannot create role {0}.
Cause: Could not create role.
Action: Ensure that the role exists.

Level: 1
Type: ERROR
Impact: Security

JPS-02519: Cannot drop role {0}.
Cause: Could not drop role.
Action: Ensure that the role exists.
Level: 1  
Type: ERROR  
Impact: Configuration  

**JPS-02520: Cannot grant role to the principal.**  
**Cause:** Could not grant permission to role.  
**Action:** Ensure that the permission is set for the role.

Level: 1  
Type: ERROR  
Impact: Configuration  

**JPS-02521: Cannot revoke role from principal.**  
**Cause:** Could not revoke role.  
**Action:** Check that the correct permission to revoke the role is set.

Level: 1  
Type: ERROR  
Impact: Configuration  

**JPS-02522: Cannot add user to role owners.**  
**Cause:** Could not add owner to role.  
**Action:** Check log files and correct the appropriate configuration.

Level: 1  
Type: ERROR  
Impact: Configuration  

**JPS-02523: Cannot remove user from role owners.**  
**Cause:** Could not remove owner from role.  
**Action:** Check log files and correct the appropriate configuration.

Level: 1  
Type: ERROR  
Impact: Configuration  

**JPS-02524: Cannot retrieve role owners.**  
**Cause:** Could not get role owners.  
**Action:** Check log files and correct the appropriate configuration.

Level: 1  
Type: ERROR  
Impact: Configuration  

**JPS-02525: Cannot retrieve role grantees.**  
**Cause:** Could not get role grantees.  
**Action:** Check log files and correct the appropriate configuration.

Level: 1  
Type: ERROR
Impact: Configuration

JPS-02526: Cannot retrieve the roles granted to principal.
Cause: Could not get granted roles.
Action: Check log files and correct the appropriate configuration.
Level: 1
Type: ERROR

Impact: Configuration

JPS-02527: Cannot close identity store.
Cause: Could not close identity store.
Action: Check log files and correct the appropriate configuration.
Level: 1
Type: ERROR

Impact: Configuration

JPS-02528: Cannot obtain a handle for role manager MBean.
Cause: Could not get role manager object name.
Action: Check log files and correct the appropriate configuration.
Level: 1
Type: ERROR

Impact: Configuration

JPS-02529: Cannot obtain a handle for user manager MBean.
Cause: Could not get user manager object name.
Action: Check log files and correct the appropriate configuration.
Level: 1
Type: ERROR

Impact: Configuration

JPS-02530: Cannot get a list of searchable attributes.
Cause: Could not get searchable attributes.
Action: Check log files and correct the appropriate configuration.
Level: 1
Type: ERROR

Impact: Configuration

JPS-02531: Cannot get list of user property names.
Cause: Could not get user property names.
Action: Check log files and correct the appropriate configuration.
Level: 1
Type: ERROR

Impact: Configuration

JPS-02532: Cannot parse principals of role.
Cause: Could not parse role principals.
Action: Check log files and correct the appropriate configuration.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02533: Cannot parse principals of user.
Cause: Could not parse user principals.
Action: Check log files and correct the appropriate configuration.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02534: Cannot find role \{0\}.
Cause: Could not complete search role operation.
Action: Correct the role name and, if necessary, contact the domain administrator.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02535: Cannot complete search for roles.
Cause: Could not complete search for multiple roles.
Action: Correct role names and, if necessary, contact the domain administrator.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02536: Cannot complete search for user \{0\}.
Cause: Could not complete user search.
Action: Correct user name and, if necessary, contact the domain administrator.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02537: Cannot complete search for users.
Cause: Could not complete search for multiple users.
Action: Correct user names and, if necessary, contact the domain administrator.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02538: Cannot complete search operation.
Cause: Failed to complete search.
Action: Correct the search query.
Level: 1
Type: ERROR
Impact: Configuration

JPS-02539: Cannot change password of user {0}.
Cause: Could not change password.
Action: Contact the domain administrator.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02540: User {0} not found in the identity store.
Cause: User {0} not found in the identity store.
Action: Ensure user is valid.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02541: Identity store has an invalid configured subscriber name.
Cause: Found invalid subscriber name.
Action: Correct the configuration of property subscriber.name.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02542: unknown identity store service type {0}.
Cause: Found unknown identity store service type {0}.
Action: Correct the identity store configuration.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02543: Search type {0} is invalid.
Cause: Found invalid search type {0}.
Action: Correct the type passed for the search.

Level: 1
Type: ERROR
Impact: Other

JPS-02544: Operation type {0} is invalid.
Cause: Found invalid operation type {0}.
Action: Correct the type passed for the operation.

Level: 1
Type: ERROR
Impact: Other

JPS-02545: Search filter type {0} is invalid.
   Cause: Found invalid search filter type {0}.
   Action: Correct the type passed for the search filter.
   Level: 1
   Type: ERROR
   Impact: Other

JPS-02546: Scope type is invalid {0}.
   Cause: Found invalid scope type {0}.
   Action: Correct the type passed for the scope.
   Level: 1
   Type: ERROR
   Impact: Other

JPS-02547: Cannot create realm {0}.
   Cause: Could not created realm.
   Action: Check log files for error details.
   Level: 1
   Type: ERROR
   Impact: Requests/Responses

JPS-02548: Cannot delete realm {0}.
   Cause: Could not delete realm.
   Action: Check log files for error details.
   Level: 1
   Type: ERROR
   Impact: Requests/Responses

JPS-02549: A realm with the specified name already exists.
   Cause: A realm with the specified name already exists.
   Action: Choose a different realm name.
   Level: 1
   Type: TRACE
   Impact: Requests/Responses

JPS-02550: The realm {0} does not exist.
   Cause: Could not find realm with the name {0}.
   Action: Correct the supplied realm name.
   Level: 1
   Type: TRACE
   Impact: Requests/Responses

JPS-02551: Cannot perform an unsupported operation on a serialized object.
Cause: Could not perform operation on serialized object.
Action: Check log files for error details.
Level: 1
Type: TRACE
Impact: Requests/Responses

JPS-02552: Cannot add a duplicate owner.
  Cause: Attempted to add already present owner.
  Action: Correct the owner’s name.
  Level: 1
  Type: TRACE
  Impact: Data

JPS-02553: Cannot remove an owner that is not present.
  Cause: Attempted to remove a non existing owner.
  Action: Correct the owner’s name.
  Level: 1
  Type: TRACE
  Impact: Data

JPS-02554: Cannot add a duplicate member.
  Cause: Attempted to add already present member.
  Action: Correct the member’s name.
  Level: 1
  Type: TRACE
  Impact: Requests/Responses

JPS-02555: Cannot complete identity store operation. The error is {0}.
  Cause: Could not perform identity store operation.
  Action: Check error log files for details.
  Level: 1
  Type: ERROR
  Impact: Requests/Responses

JPS-02556: Run into error {0} while using identity store.
  Cause: Run into an internal identity store error.
  Action: Check error log files for details.
  Level: 1
  Type: ERROR
  Impact: Requests/Responses

JPS-02557: The group {0} is invalid.
  Cause: Found null or invalid group.
  Action: Correct the group’s name.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-02558: Operation isOwnedBy failed.
Cause: Could not perform operation isOwnedBy.
Action: Correct the owner’s name.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02559: Operation isManagedBy failed.
Cause: Could not perform operation isManagedBy.
Action: Correct the name.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02560: Cannot update role.
Cause: Could not update role.
Action: Verify that the role name is correct and, if necessary, contact the domain administrator.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02561: The realm entry {0} is missing in the identity store XML file.
Cause: Could not find realm entry {0} in XML-based identity store.
Action: Ensure that the realm name is present in the XML-based identity store.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02562: Identity store entry is missing in the identity store XML file.
Cause: Could not find identity store entry in XML-based identity store.
Action: Ensure that entry is present in the XML-based identity store.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02563: Length of the name attribute should be more than {0}.
Cause: Found attribute name with less than {0} characters.
Action: Ensure that the length of the attribute name is at least the minimum length.
Level: 1
Type: ERROR
Impact: Configuration

JPS-02564: Length of the name attribute should be less than \{0\}.
Cause: Found attribute name with more than \{0\} characters.
Action: Ensure that the length of the attribute name is at most the maximum length.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02565: Name attribute contains invalid characters.
Cause: Found invalid characters in attribute name.
Action: Ensure that attribute names have characters in the following sets only: [a-z], [A-Z], [0-9], ['.', '-', '_'].

Level: 1
Type: ERROR
Impact: Configuration

JPS-02566: The identity store config property \{0\} with value \{1\} is invalid.
Cause: Found invalid identity store configuration property.
Action: Correct the configuration of the identity store property.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02567: The credential with map \{0\} and key \{1\} does not exist.
Cause: Could not find credential with map and key names provided.
Action: Ensure that a credential with given map and key is present in the credential store.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02568: The password credential with map \{0\} and key \{1\} is invalid.
Cause: Found invalid user name or password.
Action: Ensure that the user name and password in the credential store are correct.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02569: Cannot find the XML file \{0\}.
Cause: Could not find XML file for XML-based identity store \{0\}.
Action: Check the path of the XML file specified for the identity store.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02570: XML file is unspecified.
Cause: Could not determine XML file.
Action: Specify the XML file for the XML-based repository.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02571: The algorithm {0} to encode passwords is not supported.
Cause: Found invalid password encoding algorithm.
Action: Specify a valid algorithm for password encoding.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02572: Caller does not have IdentityAssertion permission to execute this operation. Reason {0}.
Cause: Caller did not have IdentityAssertion permission.
Action: Make sure the caller has IdentityAssertion permission to execute this operation.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-02573: Cannot grant a role to itself.
Cause: Attempted to grant a role to itself.
Action: Verify that no role is being granted to itself.

Level: 1
Type: ERROR
Impact: Configuration

JPS-02574: Cannot delete default realm.
Cause: Could not delete default realm.
Action: The default realm cannot be deleted: assign another realm as the default realm before deleting this one.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-02575: A user with the specified name does not exist.
Cause: Could not find user with the specified name.
Action: Check the user name.
Level: 1
Type: TRACE
Impact: Requests/Responses

**JPS-02576: A role with the specified name already exists.**
Cause: Role with the specified name already existed.
Action: Use a different role name.
Level: 1
Type: TRACE
Impact: Requests/Responses

**JPS-02577: A role with the specified name does not exist.**
Cause: Could not find role with the specified name.
Action: Check the role name.
Level: 1
Type: TRACE
Impact: Requests/Responses

**JPS-02578: The principal type {0} is invalid for the identity store type {1}.**
Cause: Found unsupported principal type {0} for identity store type {1}.
Action: Verify that principals have supported types.
Level: 1
Type: TRACE
Impact: Requests/Responses

**JPS-02579: Identity store type for application {0} is null or empty.**
Cause: Found null identity store type configured in identity store.
Action: Pass one of the following identity store types: XML, OID, ACTIVE_DIRECTORY, IPLANET, EDIRECTORY, OPEN_LDAP, COREID, OVD, or CUSTOM.
Level: 1
Type: TRACE
Impact: Requests/Responses

**JPS-02580: Cannot grant role {0} to {1} because it would lead to a cyclic dependency.**
Cause: Could not grant role {0} to {1}, because it would lead to a cyclic dependency.
Action: Revoke the grant which would create the cyclic dependency, and try again.
Level: 1
Type: TRACE
Impact: Requests/Responses

**JPS-02582: LDAP user or group search base is invalid.**
Cause: Found invalid LDAP user or group search base.
Action: Check that the user and group search base properties are valid.

Level: 1
Type: NOTIFICATION
Impact: Requests/Responses

JPS-02583: JPS principal "[0]" with identity store type "[1]" cannot be created.
Cause: JPS principal "[0]" with identity store type "[1]" cannot be created.
Action: Ensure the principal value is valid.

Level: 1
Type: ERROR
Impact: Security

JPS-02584: JPS user name "[0]", principal type "[1]" with identity store type "[2]" cannot be created.
Cause: JPS user name "[0]", principal type "[1]" with identity store type "[2]" cannot be created.
Action: Ensure the user value is valid.

Level: 1
Type: ERROR
Impact: Security

JPS-02585: JPS enterprise role name "[0]", principal type "[1]" with identity store type "[2]" cannot be created.
Cause: JPS enterprise role name "[0]", principal type "[1]" with identity store type "[2]" cannot be created.
Action: Ensure the enterprise role value is valid.

Level: 1
Type: ERROR
Impact: Security

JPS-02586: JPS application role name "[0]", principal type "[1]" cannot be created.
Cause: JPS application role name "[0]", principal type "[1]" cannot be created.
Action: Ensure the application role value is valid.

Level: 1
Type: ERROR
Impact: Security

JPS-02587: Principal class "[0]", name "[1]" cannot be created.
Cause: Principal class "[0]", name "[1]" cannot be created.
Action: Ensure the principal value is valid.

Level: 1
Type: ERROR
Impact: Security
JPS-02588: Enterprise user principal "{0}" cannot be created.
Cause: Enterprise user principal "{0}" cannot be created.
Action: Ensure the user principal value is valid.
Level: 1
Type: ERROR
Impact: Security

JPS-02589: Enterprise role principal "{0}" cannot be created.
Cause: Enterprise role principal "{0}" cannot be created.
Action: Ensure the role principal value is valid.
Level: 1
Type: ERROR
Impact: Security

JPS-02590: Token type {0} cannot be supported. Supported types are: {1}.
Cause: Token type {0} cannot be supported. Supported types are: {1}.
Action: Use the Supported types.
Level: 1
Type: ERROR
Impact: Configuration

JPS-02591: Guid {0} is assigned to principal {1}.
Cause: Guid {0} is assigned to principal {1}.
Action: Check log for more details.

Type: WARNING
Impact: Security

JPS-02592: Failed to push ldap config data to libOvd for service instance "{0}" in JPS context "{1}", cause: {2}
Cause: Failed to push ldap config data to libOvd for service instance "{0}" in JPS context "{1}", cause: {2}
Action: Check libOvd log for more details.
Level: 1
Type: ERROR
Impact: Security

JPS-02593: Failed to get IGF UserManager or RoleManager instance from IGF API, cause: {0}
Cause: Failed to get IGF UserManager or RoleManager instance from IGF API, cause: {0}
Action: Check IGF API or libOvd log for more details.
Level: 1
Type: ERROR
Impact: Security

JPS-02594: The service instance "{0}" in JPS context "{1}" has no LDAP instance configured
Cause: The service instance "{0}" in JPS context "{1}" has no LDAP instance configured
Action: Check jps-config.xml to make sure the IGF service has either the IDStore instance defined, or use the WlsLdapIdStoreConfigProvider to get LDAP config from WLS Authentication providers.

Level: 1
Type: ERROR
Impact: Security

JPS-02595: The IGFService specified ldap "{0}" is not defined in the JPS service instances
Cause: The IGFService specified ldap "{0}" is not defined in the JPS service instances
Action: Check jps-config.xml to make sure the specified ldap is defined as a JPS service instance.

Level: 1
Type: ERROR
Impact: Security

JPS-02596: The provider class type for the specified ldap instance "{0}" is configured as "{1}", which not the expected type of "oracle.security.jps.internal.idstore.ldap.LdapIdentityStoreProvider"
Cause: The provider class type for the specified ldap instance "{0}" is configured as "{1}", which not the expected type of "oracle.security.jps.internal.idstore.ldap.LdapIdentityStoreProvider"
Action: Check jps-config.xml to make sure the provider type class for ldap instance is "oracle.security.jps.internal.idstore.ldap.LdapIdentityStoreProvider".

Level: 1
Type: ERROR
Impact: Security

JPS-02597: You configured a custom Authentication Provider or WLS generic LDAPAuthenticator, which the libOvd can not recognize. Supply the idstore.type property in jps-config.xml file, or use a specific WLS LDAP Authentication provider that matches your LDAP server instead of a generic one.
Cause: You configured a custom Authentication Provider or WLS generic LDAPAuthenticator, which is a custom type and not supported by libOvd
Action: The "idstore.type" property must be specified in jps-config.xml file as specific type such as OID, OVD etc. Alternatively, select a specific WLS LDAP Authentication provider that matches your LDAP server.

Level: 1
Type: ERROR
Impact: Security
JPS-02598: Pushed ldap name and types info to libOvd. Ldaps : {0}.
Cause: libOvd is enabled so Ldap configuration info is passed to libOvd
Action: No action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-02599: The configured Identity Store provider "{0}" is not supported by IDM IdentityDirectory
Cause: The configured Identity Store provider "{0}" is not supported by IDM IdentityDirectory
Action: Use supported Identity Store provider for the IdentityStoreService
Level: 1
Type: ERROR
Impact: Security

JPS-02600: libOvd required system parameter of "common.components.home" is not supplied in the JVM command line
Cause: libOvd required system parameter of "common.components.home" is not supplied in the JVM command line
Action: Supply the system flag of "-Dcommon.components.home" and point it to the oracle_common folder
Level: 1
Type: ERROR
Impact: Security

JPS-03000: Cannot instantiate permission class "{0}", target "{1}", or actions "{2}" as defined in the application policy context "{3}". Cause {4}
Cause: Could not load a permission class.
Action: Ensure that the class name is correct and available in the current class loader.
Level: 1
Type: WARNING
Impact: Security

JPS-03001: Cannot instantiate permission class "{0}", target "{1}", or actions "{2}" as defined in the system policy context. Cause {3}
Cause: Could not load a class.
Action: Ensure that the class name is correct and is available in the current class loader.
Level: 1
Type: WARNING
Impact: Security

JPS-03004: Cannot log check authorization event to the audit service.
Cause: Could not log check authorization events to the audit service.
**Action:** Ensure that auditing is configured correctly in your environment and application.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-03005:** LDAP policy store contains invalid configuration parameters.  
**Cause:** Found invalid parameters in LDAP policy store configuration.  
**Action:** Check the configuration of the LDAP policy store.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-03006:** The name "[0]" of application role "[1]" is missing or invalid.  
**Cause:** Found missing or invalid name in application role.  
**Action:** The internal identifier generated by the policy store seems malformed, due to an internal policy store error; contact Oracle Support Services.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-03007:** Authorization check permission succeeded.  
**Cause:**  
**Action:**

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Security

**JPS-03008:** Authorization check permission failed.  
**Cause:** Current Subject or source code did not have required permissions  
**Action:** Provide the required permissions.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-03009:** Executing privileged action in [0] mode as subject [1].  
**Cause:**  
**Action:**

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Security

**JPS-03010:** Policy store cleanup thread started.  
**Cause:**
Action:

Level: 1
Type: NOTIFICATION
Impact: Security
JPS-03011: Policy store cleanup thread stopped.
Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Security
JPS-03012: Error occurred when computing application roles in application context {0} for subject {1}. Exception: {2}
Cause: Error occurred when computing application roles in application context {0} for subject {1}. Exception: {2}
Action: Refer to the base exception in logs to resolve the issue.

Level: 1
Type: WARNING
Impact: Security
JPS-03013: Unsupported API method call.
Cause: Unsupported API method call.
Action: Check the policy provider.

Level: 1
Type: WARNING
Impact: Security
JPS-03014: Failed to distribute policy by timer.
Cause: Failed to distribute policy by timer.
Action: Check the log for more details or contact the administrator.

Level: 1
Type: ERROR
Impact: Configuration
JPS-03015: Resource-Actions "{0}" will be skipped in bulk authorization evaluation for Application: "{1}".
Cause: Application name not set in the resource-actions.
Action: Set the Application name in the resource-actions

Level: 1
Type: WARNING
Impact: Configuration
JPS-03016: Resource-Actions "{0}" will be skipped in bulk authorization. Reason: "{1}"
Cause: Failed to convert the Resource-Actions into a Permission instance.
Action: Check the logs for more information to resolve the error.

Level: 1
Type: WARNING
Impact: Configuration

JPS-03017: Failed to compute Application roles for Subject "(0)". Reason "(1)
Cause: Unable to get the ApplicationRoles granted to a principal.
Action: Check the logs for more information to resolve the error.

Level: 1
Type: WARNING
Impact: Configuration

JPS-03018: The authorization result is ignoring policies from application [0] as the application is not available
Cause: The application is not available at runtime, or the application is not defined in the policystore.
Action: Check if the application is provisioned in the policystore.

Level: 1
Type: WARNING
Impact: Configuration

Cause: Error occurred while evaluating policies.
Action: Refer to the logs to rectify the problem.

Level: 1
Type: WARNING
Impact: Configuration

JPS-03020: Policy evaluation in the system policy failed. Reason: [0]
Cause: Error occurred while evaluating system policies.
Action: Refer to the logs to rectify the problem.

Level: 1
Type: WARNING
Impact: Configuration

Cause: Error occurred while evaluating administrative policies.
Action: Refer to the logs to rectify the problem.

Level: 1
Type: WARNING
Impact: Configuration

JPS-03022: Failed to initialize PolicyStore for Discovery mode. Reason: [0]
Cause: Failed to initialize PolicyStore for Discovery mode. Reason: {0}
Action: Refer to the logs to rectify the problem.
Level: 1
Type: ERROR
Impact: Configuration

JPS-03023: Discovered policy directory either not exist or can not write, isExist={0},isDirectory={1},canWrite={2}
Cause: Discovered policy directory either not exist or can not write, isExist={0},isDirectory={1},canWrite={2}
Action: Make sure directory for writing discovered policy exist, is directory and can write.
Level: 1
Type: ERROR
Impact: Configuration

JPS-03024: Failed to write policy information during discovery. Reason: {0}
Cause: Failed to dump policy objects in discovery mode. Reason: {0}
Action: Refer to the logs to rectify the problem.
Level: 1
Type: WARNING
Impact: Configuration

JPS-03025: Input permission is null when getPermissions is called for application name= {0}
Cause: Input permission is null when getPermissions is called. application name= {0}
Action: Refer to the logs to rectify the problem.
Level: 1
Type: WARNING
Impact: Configuration

JPS-03026: PDPService and PolicyStore Service instance not found in default context. Reason: {0}
Cause: PolicyStore service instance and PDPService service instance not found in the default JpsContext in an uncontrolled mode.
Action: Configure a PDPService service instance in the default JpsContext, or if running in an uncontroled mode, a PolicyStore Service.
Level: 1
Type: ERROR
Impact: Configuration

JPS-03027: PDPService service instance failed during initialization due to lack of grant. If you are seeing this error after a new installation, make sure you have updated weblogic.policy as installation step suggested
Cause: PDPService service instance failed during initialization because of lack of grant.
Action: check codebase grant like weblogic.policy to see if proper grant set for all codebase of PDP service.

Level: 1
Type: ERROR
Impact: Configuration

**JPS-03028: Unable to convert to a permission entry to resource-actions entry.**
Reason: {0}
Cause: Unable to convert to a permission entry to resource-actions entry.
Action: Check the logs for more information to resolve the error.

Level: 1
Type: WARNING
Impact: Configuration

**JPS-03029: Unable to Notify to external Application:[0] Refresh Event. Reason [1]**
Cause: Unable to Notify to external Application Refresh Event.
Action: Check the logs for more information to resolve the error.

Level: 1
Type: WARNING
Impact: Configuration

**JPS-03030: Catch exception in PDP registration, will retry later.**
Cause: Catch exception in PDP registration, retry later.
Action: check the exception details and retry

Level: 1
Type: WARNING
Impact: Configuration

**JPS-03031: Catch InterruptedException in PDP registration. Registration failed.**
Cause: Catch InterruptedException in PDP registration. Registration failed
Action: check the exception details and retry

Level: 1
Type: ERROR
Impact: Configuration

**JPS-03032: Can not access PD server web service during PDP registration, will retry later.**
Cause: PD Server web service not available, retry later.
Action: wait retry to access to PD Server web service

Level: 1
Type: WARNING
Impact: Configuration
JPS-03033: Can not access PD client web service during PDP registration, will retry later.
   Cause:  PD client web service not available, retry later.
   Action: wait retry to access to PD client web service
   Level: 1
   Type: WARNING
   Impact: Configuration

JPS-03034: Policystore is not ready on admin server during PDP registration, will retry later.
   Cause:  Policystore isn't available from admin server, retry later.
   Action: wait retry accessing policystore
   Level: 1
   Type: WARNING
   Impact: Configuration

JPS-03035: PDP registration succeeded.
   Cause:  
   Action:  
   Level: 1
   Type: NOTIFICATION
   Impact: Configuration

JPS-03037: Exception happened during PDP initialization.
   Cause:  Exception happened during PDP Initialization
   Action:  check the exception details and retry
   Level: 1
   Type: ERROR
   Impact: Configuration

JPS-03150: Error during setting the field of a provider MBean. {0}
   Cause:  Error during setting the field of a provider MBean. {0}.
   Action:  Refer to the log files for details and correct the error.
   Level: 1
   Type: ERROR
   Impact: Security

JPS-03151: getSecurityService returning null for requested service type of {0} for realm {1}
   Cause:  getSecurityService returning null for requested service type of {0} for realm {1}.
   Action:  Refer to the log files for details and correct the error.
   Level: 1
   Type: WARNING
Impact: Security

JPS-03152: Query Atz Cache specified but no response collector supplied
    Cause: Query Atz Cache specified but no response collector supplied.
    Action: Supply the response collector in the request.
    Level: 1
    Type: ERROR

Impact: Security

JPS-03153: Error parsing atz. cache flush time.
    Cause: Error parsing atz. cache flush time.
    Action: Verify that the value is an integer.
    Level: 1
    Type: ERROR

Impact: Security

JPS-03154: Authorization cache has been flushed. Time={0}
    Cause: Authorization cache has been flushed. Time={0}.
    Action: No actions are required.
    Level: 1
    Type: NOTIFICATION

Impact: Security

JPS-03155: Cannot locate class: {0}
    Cause: Cannot locate class: {0}.
    Action: Refer to the log files for details and correct the error.
    Level: 1
    Type: ERROR

Impact: Security

JPS-03156: The exception has been thrown by ARME. The authorization result is set to deny.
    Cause: The exception has been thrown by ARME. The authorization result is set to deny.
    Action: Refer to the log files for details and correct the error.
    Level: 1
    Type: ERROR

Impact: Security

JPS-03157: Error during initialization of the security framework.
    Cause: Error during initialization of the security framework.
    Action: Refer to the log files for details and correct the error.
    Level: 1
    Type: ERROR
Impact: Security

JPS-03158: Failed to parse resource cache size: {0}
  Cause: Failed to parse resource cache size: {0}
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03159: Invalid built in type in Value object: {0}
  Cause: Invalid built in type in Value object: {0}
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03160: Attempt to {0} a {1} value for type: {2}
  Cause: Attempt to {0} a {1} value for type: {2}
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03161: identifier not found in symbol table: {0}
  Cause: Identifier not found in symbol table: {0}
  Action: Refer to the log files for details and correct the error.

  Type: ERROR
  Impact: Security

JPS-03162: ERROR: PARSE: reason:==>
  Cause: ERROR: PARSE: reason:==>
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03163: Invalid Declaration type received by setDeclType
  Cause: Invalid Declaration type received by setDeclType.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03164: Got exception
Cause: Got exception.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03165: Invalid declaration type found: {0}
Cause: Invalid declaration type found: {0}.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03166: Unexpected PolicyParserTokenType: {0}
Cause: Unexpected PolicyParserTokenType: {0}.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03167: Invalid attribute type: {0}
Cause: Invalid attribute type: {0}.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: WARNING
Impact: Security

JPS-03168: Invalid attribute value type: {0}
Cause: Invalid attribute value type: {0}.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: WARNING
Impact: Security

JPS-03169: Invalid configuration
Cause: Invalid configuration.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03170: Try to get {0}, but JPS Policy tree is not available.
Cause: Try to get {0}, but JPS Policy tree is not available.
Action: Refer to the log files for details and correct the error.
JPS-03171: Unable to update policy: unable to get {0} instance
Cause: Unable to update policy: unable to get {0} instance.
Action: Refer to the log files for details and correct the error.

JPS-03172: Unspecified error in {0}
Cause: Unspecified error in {0}.
Action: Refer to the log files for details and correct the error.

JPS-03173: Commit error: {0}
Cause: Commit error: {0}.
Action: Refer to the log files for details and correct the error.

JPS-03174: ARME can not find state.chk file.
Cause: ARME can not find state.chk file.
Action: Refer to the log files for details and correct the error.

JPS-03175: Invalid mac found in write check, rewrite policies and mac
Cause: Invalid mac found in write check, rewrite policies and mac
Action: Refer to the log files for details and correct the error.

JPS-03176: Failed to write check file.
Cause: Failed to write check file.
Action: Refer to the log files for details and correct the error.
Impact: Security

JPS-03177: Failed to close check file writer
Cause: Failed to close check file writer.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03178: Failed to write mac, which will cause Mac verification error in the future.
Cause: Failed to write mac, which will cause Mac verification error in the future.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03179: Prepare request in invalid state for update
Cause: Prepare request in invalid state for update.
Action: Refer to the log files for details and correct the error.

Level: 1

JPS-03225: Calling RBACEvals:{0}
  Cause: Calling RBACEvals:{0}.
  Action: No actions are required.
  Level: 1
Type: NOTIFICATION
Impact: Security

JPS-03226: Empty Application name or Obligation name is passed to report_obligation function.
Cause: Empty Application name or Obligation name is passed to report_obligation function.
Action: Refer to the log files for details and correct the error.
Level: 1

Type: ERROR
Impact: Security

JPS-03227: Unexpected error: invalid parameter instances.
Cause: Unexpected error: invalid parameter instances.
Action: Refer to the log files for details and correct the error.
Level: 1

Type: ERROR
Impact: Security

JPS-03228: The value of args is null
Cause: args is null.
Action: Refer to the log files for details and correct the error.
Level: 1

Type: ERROR
Impact: Security

JPS-03229: Error during initialization of RetrieverConfiguration.
Cause: Error during initialization of RetrieverConfiguration.
Action: Refer to the log files for details and correct the error.
Level: 1

Type: ERROR
Impact: Security

JPS-03230: args value type is null or wrong type value
Cause: args value type is null or wrong type value.
Action: Refer to the log files for details and correct the error.
Level: 1

Type: ERROR
Impact: Security

JPS-03231: {0} supplied to subject_in_group is not a qualified group, will qualify
Cause: {0} supplied to subject_in_group is not a qualified group, will qualify.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security

JPS-03232: Qualified group is {0}
   Cause: qualified group is {0}.
   Action: Refer to the log files for details and correct the error.

   Level: 1
Type: ERROR
Impact: Security

JPS-03233: Type of args should be String[]
   Cause: args should be String[].
   Action: Refer to the log files for details and correct the error.

   Level: 1
Type: ERROR
Impact: Security

JPS-03234: No value is passed to [0]
   Cause: No value is passed to [0].
   Action: Refer to the log files for details and correct the error.

   Level: 1
Type: ERROR
Impact: Security

JPS-03235: No attribute name is passed to sys_obj_exists
   Cause: No attribute name is passed to sys_obj_exists.
   Action: Refer to the log files for details and correct the error.

   Level: 1
Type: ERROR
Impact: Security

JPS-03236: Failed to get attribute [0] for eval function [0]
   Cause: Failed to get attribute [0] for eval function [0].
   Action: Refer to the log files for details and correct the error.

   Level: 1
Type: ERROR
Impact: Security

JPS-03237: Value passed to [0] is not valid, {1}
   Cause: Value passed to [0] is not valid, {1}.
   Action: Refer to the log files for details and correct the error.

   Level: 1
Type: ERROR
Impact: Security
JPS-03238: {0} is not a valid value for {1}
  Cause: {0} is not a valid value for {1}.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03239: valid_timeval called for unexpected eval function {0}
  Cause: valid_timeval called for unexpected eval function {0}.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03240: Unknown eval function {0} used in valid_until_timeofday
  Cause: Unknown eval function {0} used in valid_until_timeofday.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03241: Disabling extended performance data...
  Cause: Disabling extended performance data...
  Action: No actions are required.
  Level: 1
  Type: NOTIFICATION
  Impact: Security

JPS-03242: The extended performance data have been retrieved. The total number of attributes is {0}, the total number of functions is {1}.
  Cause: The extended performance data have been retrieved. The total number of attributes is {0}, the total number of functions is {1}.
  Action: No actions are required.
  Level: 1
  Type: NOTIFICATION
  Impact: Security

JPS-03243: Unexpected MBean attribute get method: {0}
  Cause: Unexpected mbean attribute get method: {0}.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security
JPS-03244: {0} specified but no response collector supplied
Cause: {0} specified but no response collector supplied.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03245: Received {0} in isProtectedResource
Cause: Received {0} in isProtectedResource.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03246: Role object passed into wles atz provider is null, ignoring
Cause: Null role object passed into wles atz provider, ignoring.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03247: A SecurityRole object passed to the authorization engine has role name equal to null. The object will be ignored. The string representation of the object is {0}.
Cause: A SecurityRole object passed to the authorization engine has role name equal to null. The object will be ignored. The string representation of the object is {0}.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03248: Error {0}
Cause: Error {0}.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03249: ASI shutdown failed
Cause: ASI shutdown failed.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03250: getInstance: Warning: The parent classloaders are different.
Cause: getInstance: Warning: The parent classloaders are different.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03251: addClassJars: [0]
Cause: addClassJars: [0].
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-03252: Missing JAR file: [0]
Cause: Missing JAR file: [0].
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-03253: Error initializing URLs in classloader. Vector: [0]
Cause: Error initializing URLs in classloader. Vector: [0].
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-03254: lazy getRoles failed with error [0]
Cause: lazy getRoles failed with error [0].
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-03255: null value returned in roles list, ignoring
Cause: null value returned in roles list, ignoring.
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security
JPS-03256: Internal error. Method queryRoles has returned role {0} that starts with an incorrect prefix for a role. The role will be ignored.

Cause: Internal error. Method queryRoles has returned role {0} that starts with an incorrect prefix for a role. The role will be ignored.

Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-03257: Passed an non URLResource, in getAttributeValue

Cause: Passed a non URLResource, in getAttributeValue.

Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-03258: Initializing UserUtils; {0}

Cause: Initializing UserUtils; {0}.

Action: No actions are required.

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-03259: Invalid built in type received

Cause: Invalid built in type received.

Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-03260: Attempt to {0} when CRED is wrong type

Cause: Attempt to {0} when CRED is wrong type.

Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-03261: No locally defined evaluator found for function {0}.

Cause: No locally defined evaluator found for function {0}.

Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security
JPS-03262: DiscoveryModeRoleMap does not support this operation
  Cause: DiscoveryModeRoleMap does not support this operation
  Action: Do not call method not supported
  Level: 1
  Type: WARNING
  Impact: Configuration

JPS-03263: DiscoveryModeRoleMap never contains data
  Cause: DiscoveryModeRoleMap never contains data
  Action: Do not try to get data from DiscoveryModeRoleMap.
  Level: 1
  Type: WARNING
  Impact: Configuration

JPS-03264: The attribute dependency leads to a dead loop, {1} depends on {0} already.
  Cause: The attribute dependency leads to a dead loop, {1} depends on {0} already.
  Action: Please check the configuration.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03265: Data source based DB query failed, try again.
  Cause: Data source based DB query failed, try again.
  Action: Refer to the log files for details.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03266: Failed to retrieve connection for url {0} due to following exception {1}.
  Cause: Failed to retrieve connection for {0}.
  Action: Refer to the log files for details.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03267: Ignoring credential variable exception in computeObligation for {0}.
  Cause:
  Action:
  Level: 1
  Type: NOTIFICATION
  Impact: Security
JPS-03268: In Policy {0}, an invalid Resource Name Expression {1} was encountered. The Policy will not participate in the runtime authorization evaluation. Reason:

Cause: Resource name expression in policy is invalid
Action: Correct the resource name expression.

Level: 1
Type: ERROR
Impact: Security

JPS-03269: Size of bag provided for type-one-and-only function is not one.

Cause: Size of bag provided to type one and only function is not one.
Action: Provide correct function.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-03270: Invalid value of year {0} or month {1} in yearMonthDuration. Must be between max and min values for integer.

Cause: Value provided for year or month is outside the supported integer range on this JVM.
Action: Provide a valid integer value.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-03271: Function name passed to evaluator is null.

Cause: Function name is null.
Action: Provide a valid function name.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-03272: No arguments passed to function {0}.

Cause: No arguments passed to function.
Action: Provide a valid function arguments.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-04000: Cannot get the default policy store.

Cause: Could not find to the default policy store.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: WARNING
Impact: Security

**JPS-04001: Cannot read the default policy store.**
- **Cause:** Could not read the default policy store.
- **Action:** Refer to the log files for details and correct the error.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-04002: Cannot get application policy for application "[0]".**
- **Cause:** Encountered a policy store internal error.
- **Action:** Refer to the log files for details and correct the error.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-04003: Duplicate principal present "[0]" in a grant request.**
- **Cause:** Found that list of principals in the grantee for the grant contains duplicate.
- **Action:** Correct the list of principals in the grantee.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-04004: Duplicate permission present "[0]" in a grant request.**
- **Cause:** Found that list of permissions in the grant contains duplicate.
- **Action:** Correct the list of permissions in the grant.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-04005: More than one result found for given Application Name:[0], Query:[1], Actual results:[2].**
- **Cause:** More than one results found for application name.
- **Action:** Refer to the log files for details and correct the error.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-04006: No results found for given Application Name:[0], DN: (1), Query: (2).**
- **Cause:** No results found for application name.
- **Action:** Refer to the log files for details and correct the error.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security
JPS-04021: Application Policy "[0]" already exists.
   Cause: Encountered two application policy contexts with identical names.
   Action: Modify an application policy context to have a distinct name.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-04022: Cannot create application policy context "[0]".
   Cause: Failed to complete persist operation while creating an application policy.
   Action: Refer to the base exception in log files and correct the error.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-04026: Cannot delete application policy context "[0]".
   Cause: Could not find a policy context with the provided name.
   Action: Verify that a context with the provided name exists.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-04027: Role with name "[0]" does not exist.
   Cause: Could not find a role with name {0}.
   Action: Verify that a role with the provided name exists.
   Level: 1
   Type: ERROR
   Impact: Configuration

JPS-04028: Application with name "[0]" does not exist.
   Cause: Could not find application with name {0}.
   Action: Verify that an application with the provided name exists.
   Level: 1
   Type: ERROR
   Impact: Configuration

JPS-04029: Cannot create principal with class name "[0]".
   Cause: Could not create principal with class name {0}.
   Action: Verify that the provided class name is valid.
   Level: 1
   Type: ERROR
   Impact: Configuration

JPS-04030: Cannot delete application policy context "[0]".
   Cause: Failed to complete persist operation while deleting an application policy.
Action: Refer to the base exception in log files and correct the error.

Level: 1
Type: WARNING
Impact: Security

JPS-04031: Parameter "[0]" is null.
Cause: Supplied parameter [0] was null.
Action: Verify that the supplied parameter is non-null. If it is of type String, ensure that its length is positive.

Level: 1
Type: WARNING
Impact: Security

JPS-04032: Parameter "[0]" supplied is not the instance of ":[1]".
Cause: Parameter [0] supplied is not the instance of [1].
Action: Ensure parameter is of correct datatype.

Level: 1
Type: WARNING
Impact: Security

JPS-04033: Parameter "[0]" supplied is not of the type ":[1]" (as expected).
Cause: Parameter [0] supplied is not of the type [1] (as expected).
Action: Ensure parameter is of correct datatype.

Level: 1
Type: WARNING
Impact: Security

JPS-04034: Failed to modify properties for Application "[0]".
Cause: Cannot modify application policy.
Action: Check the logs for errors.

Level: 1
Type: WARNING
Impact: Security

JPS-04035: AttributeName [0] supplied should start with alphabet or an underscore. Name cannot contain characters other than alphanumeric and/or underscores.
Cause: AttributeName [0] supplied should start with alphabet or an underscore. Name cannot contain characters contain other than alphanumeric and/or underscores.
Action: Ensure attribute name is of correct datatype.

Level: 1
Type: WARNING
Impact: Security
JPS-04036: Function Name \{0\} supplied should start with alphabet or an underscore. Name cannot contain characters other than alphanumeric and/or underscores.

*Cause:* Function Name \{0\} supplied should start with alphabet or an underscore. Name cannot contain characters contain other than alphanumeric and/or underscores.

*Action:* Ensure function name is of correct datatype.

*Level:* 1
*Type:* WARNING
*Impact:* Security

JPS-04037: Name \"{0}\" starts or ends with whitespace.

*Cause:* Object name should not start with or end with whitespace.

*Action:* Ensure object name has no whitespace in the beginning and end.

*Level:* 1
*Type:* WARNING
*Impact:* Security

JPS-04038: Object name only contains whitespace.

*Cause:* Object name should not only contain whitespace.

*Action:* Ensure object name doesn't only contain whitespace.

*Level:* 1
*Type:* WARNING
*Impact:* Security

JPS-04039: Application \"{0}\", Deleting \{1\} entries under \"{2}\", Maximum remaining re-tries \{3\}.

*Cause:*

*Action:*

*Level:* 1
*Type:* NOTIFICATION
*Impact:* Security

JPS-04080: Scanning of system policy failed. Reason \{0\}

*Cause:* Scan of system policy failed.

*Action:* Check the system policy setup and the provider setup.

*Level:* 1
*Type:* WARNING
*Impact:* Security

JPS-04081: Policy store purge thread interrupted. Reason \{0\}.

*Cause:* Purge thread interrupted in policy caching.

*Action:* Check the policy setup and the provider setup

*Level:* 1
*Type:* WARNING
Impact: Security

JPS-04082: Deletion of system policy failed. Reason {0}
  Cause: Deletion of system policy failed.
  Action: Provide legal non empty values for policy name
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04083: Creation of system policy failed. Reason {0}
  Cause: Creation of system policy failed.
  Action: Provide legal non empty values for policy name
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04084: Migration of application policy failed. Reason: {0}.
  Cause: Exception in migration of application policy
  Action: Check application policy setup or contact system administrator
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04085: Migration of codebase policy failed. Reason: {0}.
  Cause: Exception in migration of codebase policy
  Action: Check codebase policy setup or contact system administrator
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04086: Could not perform isPolicyModified. Reason {0}
  Cause: Is policy modification check failed.
  Action: Contact system administrator
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04089: Could not get policy cache count. Reason {0}
  Cause: Could not retrieve policy cache count.
  Action: Contact system administrator
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04090: The policy store property {0} is invalid or not defined.
Cause: The policy store property {0} was invalid or not defined.
Action: Check the configuration of this property.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-04091: Application {0} is being deployed with policy migration option set to {1}, start policy migration.
Cause: Start application policy migration
Action: No action required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-04092: Application {0} is being deployed with policy migration option set to neither OVERWRITE nor MERGE, skip policy migration.
Cause: Skip application policy migration
Action: No action required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-04093: Application policy migration for application {0} is completed successfully.
Cause: Complete application policy migration
Action: No action required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-04094: Start removing application policies for Application {0}.
Cause: Start application policy removal
Action: No action required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-04095: Application policy removal for application {0} is completed successfully.
Cause: Complete application policy removal
Action: No action required

Level: 1
Type: NOTIFICATION
Impact: Security
JPS-04096: Application policies for application {0} was NOT removed in application undeployment with jps.policystore.removal set to OFF.

Cause: Skip application policy removal
Action: No action required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-04097: Application {0} is being deployed without existing application policies found in static deployment, start policy migration.

Cause: Start application policy migration in static deployment
Action: No action required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-04098: Start codebase policy migration for application {0}.

Cause: Start codebase policy migration
Action: No action required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-04099: Codebase policy migration for {0} is completed successfully.

Cause: Complete codebase policy migration
Action: No action required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-04100: Application Role "{0}" already exists.

Cause: Encountered two roles with identical names.
Action: Modify a role to have a distinct name.

Level: 1
Type: WARNING
Impact: Security

JPS-04101: Cannot create application role "{0}".

Cause: Failed to complete persist operation while creating an application role.
Action: Refer to the base exception in logs to resolve the issue.

Level: 1
Type: WARNING
Impact: Security
JPS-04102: Cannot create application role. Cause: Invalid Argument -- Multiple role categories supplied for single application role
Cause: Persist operation failed because more than one role category supplied for create role
Action: Ensure supplied parameters are correct.

Level: 1  
Type: WARNING  
Impact: Security

JPS-04110: Cannot delete application role "{0}". Cause: Application role not found.
Cause: Could not find an application role in the application policy.
Action: Check the name of the application role.

Level: 1  
Type: WARNING  
Impact: Security

JPS-04111: Cannot delete application role "{0}".
Cause: Could not remove application role from policy store.
Action: Refer to the base exception in log files and correct the error.

Level: 1  
Type: WARNING  
Impact: Security

JPS-04112: Cannot delete application role "{0}".
Cause: Could not remove application role "{0}" because it may be in use; this role is a member of one or more other application roles (nested role hierarchy).
Action: Flatten the nested role hierarchy, and then remove the desired role. Alternatively, remove the application role using the option force set to true.

Level: 1  
Type: WARNING  
Impact: Security

JPS-04113: Cannot delete application role "{0}".
Cause: Could not remove application role "{0}" because it may be in use, or contains enterprise groups or enterprise users.
Action: Remove the enterprise groups and enterprise users from the application role, or remove the application role using the option force set to true.

Level: 1  
Type: WARNING  
Impact: Security

JPS-04114: Cannot delete application role "{0}".
Cause: Could not remove application role "{0}" because it may be in use; this role has one or more permissions granted to it.
Action: Revoke the permission(s) from the application role, and then remove the role. Alternatively, remove the application role using the option force set to true.
Level: 1
Type: WARNING
Impact: Security
**JPS-04120: Cannot add principal to application role.**
*Cause:* Encountered an internal policy store error.
*Action:* Refer to the base exception in log files and correct the error.

Level: 1
Type: WARNING
Impact: Security
**JPS-04121: Cannot add principal to application role "(0)".**
*Cause:* Could not find application role in the application policy context.
*Action:* Ensure the application role is present in the application policy.

Level: 1
Type: WARNING
Impact: Security
**JPS-04122: Cannot add principal to application role.**
*Cause:* Found that principal [0] is already a member of the application role [1].
*Action:* Correct the principal name.

Level: 1
Type: WARNING
Impact: Security
**JPS-04123: Cannot add principal to the application role.**
*Cause:* Attempted to insert an application role as a member of itself.
*Action:* Correct the application role principal name. The containment in the role hierarchy must be cycle-free.

Level: 1
Type: WARNING
Impact: Security
**JPS-04124: The application role [0] added to [1] has no GUID defined.**
*Cause:* The application role [0] added to [1] has no GUID defined.
*Action:* Ensure the application role has GUID before adding it as a member of an application role.

Level: 1
Type: ERROR
Impact: Requests/Responses
**JPS-04125: Application Role [0] granted to role category [1] cannot be found in application [2]**
*Cause:* Application Role [0] granted to role category [1] cannot be found in application [2]
Action: Ensure application role exists before assigning it to a role category

Level: 1
Type: WARNING
Impact: Security

JPS-04130: Cannot remove principal from application role.
Cause: Encountered an internal policy store error.
Action: Refer to the base exception in log files and correct the error.

Level: 1
Type: WARNING
Impact: Security

JPS-04131: Cannot remove principal from application role; cannot find application role "[0]" in application policy context.
Cause: Could not find the specified application role in the application policy context.
Action: Correct the application role name.

Level: 1
Type: WARNING
Impact: Security

JPS-04132: Cannot remove principal from application role; principal "[0]" is not member of application role "[1]".
Cause: See error message.
Action: Correct the principal role name.

Level: 1
Type: WARNING
Impact: Security

JPS-04135: Resource name not specified in application [0].
Cause: Resource name not specified in application [0].
Action: Ensure the resource name is not null.

Level: 1
Type: WARNING
Impact: Security

JPS-04136: Resource type name not specified in application [0].
Cause: Resource type name not specified in application [0].
Action: Ensure the resource type name is not null.

Level: 1
Type: WARNING
Impact: Security

JPS-04137: Permission set name not specified in application [0].
Cause: Permission set name not specified in application [0].
Action: Ensure the permission set name is not null.
Level: 1
Type: WARNING
Impact: Security

JPS-04138: Application role name not specified in application {0}.
Cause: Application role name not specified in application [0].
Action: Ensure the application role name is not null.
Level: 1
Type: WARNING
Impact: Security

JPS-04140: Cannot complete application role search because search expression "\{0\}" is incorrect.
Cause: Found an invalid search pattern.
Action: Refer to the base exception in log files and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-04141: Cannot complete application role search because of internal error {0}.
Cause: Encountered an internal policy store error while searching the policy store.
Action: Refer to the base exception in log files and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-04142: Cannot complete application role search because search role attribute "\{0\}" is incorrect.
Cause: Could not complete the search because the application role attribute [0] was invalid.
Action: Supply a valid role attribute name.
Level: 1
Type: WARNING
Impact: Security

JPS-04143: Cannot find application role "\{0\}".
Cause: Could not find application role in the application policy context.
Action: Supply the name of an existing application role name.
Level: 1
Type: WARNING
Impact: Security

JPS-04144: Cannot get granted application role for principal "{0}".
Cause: Encountered an internal policy store error.
Action: Refer to the base exception in log files and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-04145: Cannot get all application roles for application "{0}".
Cause: Encountered an internal policy store error.
Action: Refer to the base exception in log files and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-04146: Cannot complete application role search because search role attribute name is null.
Cause: Could not complete the search because the role attribute name was NULL.
Action: Provide a non-null role attribute name.
Level: 1
Type: WARNING
Impact: Security

JPS-04147: Cannot get members of application role "{0}".
Cause: Could not find application role in the application policy context.
Action: Supply the name of an existing application role name.
Level: 1
Type: WARNING
Impact: Security

JPS-04148: Exception when converting "{0}" to number, msg is "{1}".
Cause: Exception when converting {0} to number, msg is {1}
Action: Only number is allowed
Level: 1
Type: WARNING
Impact: Security

JPS-04150: Cannot alter application role {0} since multiple entries found for the application name:{1} query: {2} and actual result is {3}.
Cause: Encountered the policy store error {0}.
Action: Check the error details to resolve the issue.
Level: 1
Type: WARNING
Impact: Security

JPS-04151: Cannot alter application role.
Cause: Could not find application role {0} in the application policy context.
Action: Provide an existing application role name.
Level: 1
Type: WARNING
Impact: Security

JPS-04153: In Domain {0}, Application {1} is not present.
Cause: Application not found in the policystore
Action: Check the name of the application in the policystore.
Level: 1
Type: WARNING
Impact: Security

JPS-04154: Refresh of application policy failed. Reason {0}
Cause: Refresh of application policy failed.
Action: Check the application policy setup and the provider setup
Level: 1
Type: WARNING
Impact: Security

JPS-04155: Scanning of application policy failed. Reason {0}
Cause: Scan of application policy failed.
Action: Check the application policy setup and the provider setup
Level: 1
Type: WARNING
Impact: Security

JPS-04156: RoleCategory modification attribute "{0}" is invalid.
Cause: Invalid RoleCategory modify attribute
Action: Check whether the attribute you are trying to modify is valid or not.
Level: 1
Type: WARNING
Impact: Security

JPS-04157: RoleCategory "{0}" already exists.
Cause: The role category already exists.
Action: Supply a different role category name.
Level: 1
Type: WARNING
Impact: Security

JPS-04158: RoleCategory {0} does not exists
Cause: The role category does not exist.
Action: Supply a different role category name.
Level: 1
Type: WARNING
Impact: Security

JPS-04159: Role category search value: {0}, is invalid for matcher type: {1}
  Cause: The role category search query has invalid parameter value
  Action: Modify the search query and supply correct parameter value.

Level: 1
Type: WARNING
Impact: Security

JPS-04160: Cannot find PermissionSet {0}.
  Cause: Could not find PermissionSet in policy store.
  Action: Provide the name of a valid PermissionSet.

Level: 1
Type: WARNING
Impact: Security

JPS-04161: Search for PermissionSet {0} by name yielded more than one result.
  Cause: Found a duplicate PermissionSet name in search context.
  Action: Ensure that all PermissionSet names in the current search context are distinct.

Level: 1
Type: WARNING
Impact: Security

JPS-04162: PermissionSet "{0}" already exists in policy store.
  Cause: Permission Set already exists.
  Action: Create a PermissionSet with a different name.

Level: 1
Type: WARNING
Impact: Security

JPS-04163: PermissionSet {0} cannot have empty ResourceActions.
  Cause: PermissionSet {0} has empty ResourceActions.
  Action: Ensure PermissionSet has ResourceActions.

Level: 1
Type: WARNING
Impact: Security

JPS-04164: MemberResource {0} of type {1} not found in application {1}.
  Cause: MemberResource {0} of type {1} not found in application {1}.
  Action: Ensure the Resource exists in the PolicyStore.

Level: 1
Type: WARNING
Impact: Security

JPS-04165: ResourceType {0} referenced by MemberResource {1} not found in application {2}.
Cause: ResourceType {0} referenced by MemberResource {1} not found in application {2}.
Action: Ensure the ResourceType exists in the PolicyStore.
Level: 1

Type: WARNING
Impact: Security

JPS-04166: MemberResource {0} of type {1} does not have actions defined.
Cause: MemberResource {0} of type {1} does not have actions defined.
Action: Ensure the MemberResource has valid actions.
Level: 1

Type: WARNING
Impact: Security

JPS-04167: MemberResource {0} of type {1} has actions defined.
Cause: MemberResource {0} of type {1} has actions defined.
Action: Ensure the MemberResource does not have actions.
Level: 1

Type: WARNING
Impact: Security

JPS-04168: PermissionSet {0} cannot be created without ResourceActions.
Cause: PermissionSet {0} cannot be created without ResourceActions.
Action: Create a PermissionSet with ResourceActions.
Level: 1

Type: WARNING
Impact: Security

JPS-04169: ResourceAction {0} used to modify PermissionSet {1} has invalid actions for ResourceType {2}.
Cause: ResourceAction {0} used to modify PermissionSet {1} has invalid actions for ResourceType {2}.
Action: Modify PermissionSet using a ResourceAction that has valid actions.
Level: 1

Type: WARNING
Impact: Security

JPS-04173: The resource type {0} is not found in store
Cause: Unsupported Resource Type {0}.
Action: Check Resource Type.
Level: 1
Type: ERROR
Impact: Configuration

**JPS-04179: The resource type reference for resource \{0\} is not found in the application \{1\}. Hence using the first occurrence**

Cause: The resource type reference for resource \{0\} is not found in the application \{1\}. Hence using the first occurrence.

Action: Ensure the ResourceType reference exists for every resource.

Level: 1
Type: WARNING
Impact: Security

**JPS-04190: Cannot find resource.**

Cause: Could not find resource in the resource store.

Action: Modify your search query.

Level: 1
Type: WARNING
Impact: Security

**JPS-04191: Cannot find unregistered resource finder for resource type "\{0\}".**

Cause: Could not find a registered resource finder for the resource type.

Action: Provide a resource finder implementation for the resource type, and register it with JPS.

Level: 1
Type: WARNING
Impact: Security

**JPS-04192: Cannot load resource finder with provider name "\{0\}".**

Cause: Found an incorrect implementation: argumentless public constructor is missing.

Action: Revisit the implementation to provide an argumentless public constructor.

Level: 1
Type: WARNING
Impact: Security

**JPS-04193: Cannot load resource finder with provider name "\{0\}" and class "\{1\}".**

Cause: Could not load resource finder class: error encountered while reading a registered class file for resource finder.

Action: Check the configuration of the class property in jps-config.xml.

Level: 1
Type: WARNING
Impact: Security
JPS-04194: Cannot initialize resource finder with provider name "{0}" and class name "{1}".
Cause: Found an error while initializing a registered class for resource finder.
Action: Check the configuration of the class property in jps-config.xml.
Level: 1
Type: WARNING
Impact: Security

JPS-04195: Cannot load the resource finder with provider "{0}".
Cause: Found an error in external resource finder configuration: a required property was missing.
Action: Check the configuration of the class property in jps-config.xml.
Level: 1
Type: WARNING
Impact: Security

JPS-04198: Resource {0} in application {1} has a non existent resource type {2}. Ignoring this resource.
Cause: Resource {0} in application {1} has a non existent resource type {2}. Ignoring this resource.
Action: Ensure the ResourceType exists for every resource.
Level: 1
Type: WARNING
Impact: Security

JPS-04200: Cannot grant policy due to a policy store internal error.
Cause: Encountered a policy store error.
Action: Check the error details to resolve the issue.
Level: 1
Type: WARNING
Impact: Security

JPS-04201: Cannot grant permission(s). Grant already exists for grantee {0}.
Cause: Permissions already granted to grantee.
Action: Grant a different set of permissions.
Level: 1
Type: WARNING
Impact: Security

JPS-04202: Cannot revoke policy.
Cause: Encountered an internal policy store error while revoking a policy.
Action: Refer to the base exception in log files and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-04203: Cannot revoke permission.
  Cause: Found that a permission has not been granted.
  Action: Provide the appropriate permission to the grantee.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04204: Cannot revoke permissions.
  Cause: Found that permissions have not been granted.
  Action: Provide the appropriate permissions to the grantee.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04205: Cannot revoke permissions.
  Cause: Found that permissions have not been granted to principals.
  Action: Provide the appropriate permissions to principals.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04206: Cannot revoke permissions.
  Cause: Found that permissions have not been granted to code source.
  Action: Correct the code source grantee.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04207: Matching Grantee not found: {0}.
  Cause: Found that permissions have not been granted to principals or code source.
  Action: Correct the list of principals and code source in the grantee, or revoke permissions granted to this grantee.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04208: Cannot modify policy due to a policy store internal error.
  Cause: Encountered an internal policy store error while modifying the policy store.
  Action: Refer to the base exception in log files and correct the error.
  Level: 1
  Type: WARNING
Impact: Security
JPS-04209: Cannot modify property \{0\}.
  Cause: Could not modify a property.
  Action: Supply the name of a property that can be modified.
  Level: 1
  Type: WARNING
Impact: Security
JPS-04210: Modification code \{0\} is invalid.
  Cause: Found an unsupported modification code.
  Action: Ensure that the modification code is ADD, REMOVE, or REPLACE.
  Level: 1
  Type: WARNING
Impact: Security
JPS-04211: Cannot query, update, or delete Object with type "\{0\}" and name "\{1\}".
  Cause: Attempted to query, update, or delete an invalid policy store object.
  Action: Ensure that the object to be queried, updated, or deleted belongs to the appropriate policy domain
  Level: 1
  Type: WARNING
Impact: Security
JPS-04212: PermissionSet "\{0\}" is in use, cannot delete.
  Cause: Permission set already existed.
  Action: Permission set with the same name cannot be created. Use different name.
  Level: 1
  Type: WARNING
Impact: Security
JPS-04213: Cannot modify a grant with an empty permission entry.
  Cause: Encountered empty permission entry list while modifying a grant
  Action: Pass a non empty permission entry list while modifying a grant
  Level: 1
  Type: WARNING
Impact: Security
JPS-04216: Cannot grant/revoke permissions because type "\{0\}" is not known.
  Cause: Resource type validation for Permission set failed
  Action: Check whether the grant’s permission’s resourcetype is provisioned in the policystore.
  Level: 1
  Type: WARNING
Impact: Security

JPS-04217: Grant/revoke failed for grantee "{0}", permission class "{1}", resource name "{2}", permission actions "{3}", resource type "{4}". Reason: permission actions is not a subset of resource type actions "{5}".

Cause: Resource type validation for Permission set failed

Action: Check whether the actions in the Permission are valid actions for the resource type provisioned in the policy store.

Level: 1
Type: WARNING

Impact: Security

JPS-04218: Grant/revoke failed for grantee "{0}", permission class "{1}", resource Name "{2}", permission actions "{3}", resource type "{4}". Reason: permission class is not equal to resource type matcher class "{5}".

Cause: Resource type validation for Permission set failed

Action: Check whether the matcher class in the Permission is valid for the resource type provisioned in the policy store.

Level: 1
Type: WARNING

Impact: Security

JPS-04219: The action {0} is invalid for resource type {1}.

Cause: The action {0} is invalid for resource type {1}.

Action: Check the ResourceActionsEntry parameter.

Level: 1
Type: ERROR

Impact: Requests/Responses

JPS-04220: Cannot search because the search query "{0}" was empty (has no child query).

Cause: The search query {0} was empty (has no child query).

Action: Provide a non-empty search query in.

Level: 1
Type: ERROR

Impact: Requests/Responses

JPS-04221: Cannot search because the grant search query "{0}" has illegal object type for search property "{1}".

Cause: The grant search query {0} has wrong object type in search value for search property {1}.

Action: Provide an object type corresponding to the search property.

Level: 1
Type: WARNING

Impact: Security

JPS-04222: Cannot search because the search query was null for "{0}".
Cause: The search query was null for {0}.
Action: Provide a non-null search query.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-04227: The object name "{0}" is invalid.
Cause: The object name {0} is invalid.
Action: Pass a correct object name in.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-04300: Cannot save policy.
Cause: Could not save policy. Cause {0}.
Action: Check the log files and resolve the error.

Level: 1
Type: ERROR
Impact: Security

JPS-04301: Cannot read from policy store. Reason is {0}, {1}
Cause: Could not read from the policy store.
Action: Check the log files and resolve the error.

Level: 1
Type: ERROR
Impact: Security

JPS-04302: Cannot read from policy store.
Cause: Could not find the location property {1} in instance {0}.
Action: Ensure the location is set to a valid policy store file.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04303: Cannot read from policy store.
Cause: Could not find value for system property '{0}' or for location property '{2}' in instance '{1}'.
Action: Ensure the location is set to a valid policy store file.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04304: Policy store instance descriptor {0}, location value {1} is ignored.
Cause: Could not find value for the system property '{0}', which overrides the descriptor property {1} in the policy store service instance.
Action: Unset the system property so that the location is picked up from configuration in jps-config.xml.
Level: 1
Type: WARNING
Impact: Configuration

JPS-04410: Cannot create JACC module policy context "[0]" for application [1].
Cause: Could not create application policy because found two application module contexts with identical names.
Action: Ensure that all application module context names are distinct.
Level: 1
Type: WARNING
Impact: Security

JPS-04411: Cannot create application "[0]" JACC module policy context "[1]".
Cause: Could not create application policy; persist operation failed.
Action: Refer to the base exception in log files and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-04412: Cannot delete JACC module "[0]".
Cause: Could not find JACC policy context to delete.
Action: Check the JACC policy context name.
Level: 1
Type: WARNING
Impact: Security

JPS-04413: Cannot delete JACC module policy context "[0]".
Cause: Could not delete JACC policy; persist operation failed.
Action: Refer to the base exception in log files and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-04420: Application policy context name is missing from application role [0].
Cause: Could not find application policy context in the application role principal.
Action: Ensure that the application role principal has an application context.
Level: 1
Type: WARNING
Impact: Security
JPS-04421: Administrator role name is invalid.
   Cause: Found an invalid administrator role name.
   Action: Correct the name of the administrator role.

   Level: 1
   Type: WARNING
   Impact: Security

JPS-04422: Policy is malformed.
   Cause: Found system policy that granted permissions to application role(s).
   Action: Grants to application roles are not allowed in a system policy. Remove such grants.

   Level: 1
   Type: WARNING
   Impact: Security

JPS-04423: Application role name "[0]" is invalid.
   Cause: Found invalid application role name [0].
   Action: Verify that the application role name conforms with the role name syntax.

   Level: 1
   Type: WARNING
   Impact: Security

JPS-04502: Java SSO Login
   Cause: This was JSSO page title.
   Action: No action needed.

   Level: 1
   Type: TRACE
   Impact: Requests/Responses

JPS-04503: Enter your single sign-on username and password.
   Cause: User name and password were required for logging into JSSO.
   Action: Enter a valid user name and password.

   Level: 1
   Type: TRACE
   Impact: Requests/Responses

JPS-04504: Username
   Cause: This was JSSO login user name.
   Action: No action needed.

   Level: 1
   Type: TRACE
   Impact: Requests/Responses

JPS-04505: Password
Cause: This was JSSO login user password.
Action: No action needed.
Level: 1
Type: TRACE
Impact: Requests/Responses

JPS-04506: Login
Cause: Submit button.
Action: Press submit.
Level: 1
Type: TRACE
Impact: Requests/Responses

JPS-04507: Cancel
Cause: Cancel button.
Action: Press cancel to abort login.
Level: 1
Type: TRACE
Impact: Requests/Responses

JPS-04508: Failed.
Cause: JSSO login failed.
Action: Check user name and password used for login.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-04509: The maximum number of login attempts is exceeded. Contact the application administrator, or retry after {0} minutes.
Cause: Maximum login attempts was exceeded.
Action: Contact the system administrator.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-04510: Incorrect username or password.
Cause: User name or password was invalid.
Action: Check the user name and password used for login.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-04511: Java SSO Application Error.
Cause: Encountered and internal error.
Action: Contact the system administrator.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-04512: application error
Cause: Encountered and internal error.
Action: Contact the system administrator.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-04513: The Java SSO application is not properly configured.
Cause: The Java SSO application was not correctly configured.
Action: Reconfigure the application.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04514: Configuration error: {0}.
Cause: The Java SSO application was not correctly configured.
Action: Reconfigure the application.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04515: Usage arguments:
Cause: Defines the keytool usage.
Action: See error message.

Level: 1
Type: TRACE
Impact: Requests/Responses

JPS-04516: No key type for algorithm.
Cause: The algorithm key type was not specified.
Action: Configure the algorithm key type.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04517: Key does not match any known algorithm.
Cause: The given key did not match the corresponding algorithm.
Action: Reconfigure the algorithm key type.
JPS-04518: The number of JSSO cookies is zero or invalid.
Cause: Could not find JSSO cookie in header.
Action: Login again or contact the system administrator.

JPS-04519: The number of Oracle Access Manager cookies is zero or invalid.
Cause: Could not find Oracle Access Manager cookie in header.
Action: Login again or contact the system administrator.

JPS-04520: Token type is invalid: expected type is COOKIE_TOKEN, but found {0}.
Cause: The token type configured was invalid: it should be COOKIE_TOKEN.
Action: Reconfigure the token type to a valid value.

JPS-04521: The JSSO property {0} is not set.
Cause: JSSO property was not correctly configured.
Action: Reconfigure the property to a correct value.

JPS-04522: The authentication type {0} is invalid.
Cause: JSSO did not support this authentication type.
Action: Reconfigure the type to a supported type.

JPS-04523: Token is no longer valid.
Cause: The incoming token was no longer valid.
Action: Login again.
Impact: Requests/Responses

**JPS-04524: Cannot create token from JSSO cookie.**
*Cause:* Could not create token from the JSSO cookie; cookie may have expired.
*Action:* Login again.
*Level:* 1
*Type:* ERROR

**Impact:** Requests/Responses

**JPS-04525: The number of cookies is zero or the invalid number [0].**
*Cause:* Could not find at least one cookie in the request.
*Action:* Login again.
*Level:* 1
*Type:* ERROR

**Impact:** Requests/Responses

**JPS-04526: Token has invalid version number.**
*Cause:* Token had invalid version number.
*Action:* Login again.
*Level:* 1
*Type:* ERROR

**Impact:** Requests/Responses

**JPS-04527: Token has an invalid format.**
*Cause:* Token was corrupted or had invalid format.
*Action:* Login again.
*Level:* 1
*Type:* ERROR

**Impact:** Requests/Responses

**JPS-04528: An error occurred while encoding JSSO token.**
*Cause:* Could not encode JSSO token.
*Action:* Specify a valid, supported encoding.
*Level:* 1
*Type:* ERROR

**Impact:** Configuration

**JPS-04529: Cannot verify signature in the JSSO token.**
*Cause:* Could not verify signature: the token was tampered with, or the signature algorithm was invalid.
*Action:* Specify a supported signature algorithm.
*Level:* 1
*Type:* ERROR

**Impact:** Requests/Responses
JPS-04530: Algorithm is unsupported.
   Cause: Specified algorithm was unsupported.
   Action: Check documentation for the list of supported algorithms.

   Level: 1
   Type: ERROR
   Impact: Configuration

JPS-04531: Error creating cipher.
   Cause: Could not create cipher.
   Action: Check documentation for the list of supported cipher algorithms.

   Level: 1
   Type: ERROR
   Impact: Configuration

JPS-04532: JSSO logout URL is not configured.
   Cause: The logout URL was not configured or invalid.
   Action: Check the logout URL configuration properties, and reconfigure it to a valid URL.

   Level: 1
   Type: ERROR
   Impact: Configuration

JPS-04533: JSSO has encountered an unexpected error.
   Cause: An internal error occurred.
   Action: Contact the system administrator.

   Level: 1
   Type: ERROR
   Impact: Requests/Responses

JPS-04534: JSSO symmetric key is missing.
   Cause: The symmetric key configuration was missing.
   Action: Ensure that the properties "custom.sso.cred.key" and "custom.sso.cred.alias" are configured in the service instance, and that the symmetric key is present in the credential store.

   Level: 1
   Type: ERROR
   Impact: Configuration

JPS-04535: Identity name is invalid.
   Cause: User identity was invalid or missing.
   Action: Provide a valid user identity.

   Level: 1
   Type: ERROR
   Impact: Configuration
JPS-04536: The token name {0} is missing in request object.
Cause: Token name was missing in the request object.
Action: Ensure that the token name is present in the request object.
Level: 1
Type: ERROR
Impact: Configuration

JPS-04537: No token name is specified for token collector {0}.
Cause: Token collector was invalid or missing.
Action: Configure a valid token collector with the property "idm.token.collector.class".
Level: 1
Type: ERROR
Impact: Configuration

JPS-04538: The request object class is invalid.
Cause: The request object class was invalid.
Action: Ensure that the request object is valid.
Level: 1
Type: ERROR
Impact: Configuration

JPS-04539: Token collector is not properly initialized.
Cause: Could not initialize the token collector.
Action: Ensure that the token collector is correctly configured and initialized.
Level: 1
Type: ERROR
Impact: Configuration

JPS-04540: The token asserter is not properly initialized.
Cause: Could not initialize the token asserter.
Action: Ensure that the token asserter is correctly configured and initialized.
Level: 1
Type: ERROR
Impact: Configuration

JPS-04541: Cannot find authenticated identity.
Cause: Authentication failed.
Action: Provide a valid identity.
Level: 1
Type: ERROR
Impact: Configuration
JPS-04542: The token collector class \{0\} is not properly configured in the configuration file.

Cause: Token collector class was missing.

Action: Configure a valid token collector class with the property "idm.token.collector.class".

Level: 1
Type: ERROR
Impact: Configuration

JPS-04543: No login module is configured for application.

Cause: Could not find configured login module.

Action: Configure a login module in jps-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04544: The subject of the identity is invalid.

Cause: Subject was missing.

Action: Ensure that the valid Subject is present.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04545: Cannot verify the Subject \{0\}.

Cause: Could not verify Subject.

Action: Check the user credentials.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04546: The configuration (idm.subject.loginmodule.disabled=true) specifies that the Subject is populated by the token asserter.

Cause: Could not find Subject asserter.

Action: Configure an asserter to use a login module that returns a valid Subject.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04547: The token type \{0\} is not properly configured in the configuration file.

Cause: Could not find token type configuration.

Action: Configure a token type in the service instance with the property "idm.token.type property".

Level: 1
Type: ERROR
Impact: Configuration

JPS-04548: The token asserter class \{0\} is not properly configured in the configuration file.
Cause: Could not find token asserter class configuration.
Action: Configure a token asserter class in the service instance with the property "idm.token.asserter.class".

Level: 1
Type: ERROR
Impact: Configuration

JPS-04549: Token is no longer valid.
Cause: Found invalid or expired token.
Action: Check that the token is valid and has not expired.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04550: Token type is invalid: expected type is HEADER_TOKEN, but found \{0\}.
Cause: Token type was invalid: it should be HEADER_TOKEN.
Action: Reconfigure the token type to a valid type.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04551: The number of OSSO headers is zero or an invalid number.
Cause: Could not find OSSO header in HTTP request.
Action: Login again, or contact the system administrator.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-04552: The required Oracle Access Manager property \{0\} is missing or invalid.
Cause: A required Oracle Access Manager property was missing or invalid.
Action: Configure the property "access.sdk.install.path" in the service instance in jps-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04553: The user identity \{0\} for Oracle Access Manager is invalid.
Cause: The user identity for Oracle Access Manager was invalid.
Action: Login again.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-04554: The user password for Oracle Access Manager is invalid.
   Cause: The user password for Oracle Access Manager was invalid.
   Action: Login again.
   Level: 1
   Type: ERROR
   Impact: Requests/Responses

JPS-04555: The user {0} is not logged in to Oracle Access Manager. The error is {1}.
   Cause: The user was not logged in Oracle Access Manager.
   Action: Login again.
   Level: 1
   Type: ERROR
   Impact: Requests/Responses

JPS-04556: The user {0} is not authorized to access a resource type authentication in Oracle Access Manager.
   Cause: The user was not logged in Oracle Access Manager.
   Action: Login again.
   Level: 1
   Type: ERROR
   Impact: Requests/Responses

JPS-04557: Invalid parameter {0} supplied. Cannot be null or empty.
   Cause: Invalid parameter {0} supplied. Cannot be null or empty.
   Action: Ensure the parameter is not null or empty.
   Level: 1
   Type: WARNING
   Impact: Requests/Responses

JPS-04558: The SSO service is not properly configured: {0}.
   Cause: The SSO service is not properly configured: {0}.
   Action: Check the SSO Service configuration.
   Level: 1
   Type: ERROR
   Impact: Requests/Responses

JPS-04559: Failed to create the {0} token. Cause: {1}.
   Cause: Failed to create the {0} token. Cause: {1}.
   Action: Re-login.
   Level: 1
   Type: ERROR
   Impact: Requests/Responses
JPS-04560: SSO provider cannot initiate SSO process: {0}.
Cause: SSO provider cannot initiate SSO process: {0}.
Action: Check the SSO Service configuration.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-04561: Invalid parameter {0} supplied. Cannot be null.
Cause: Invalid parameter {0} supplied. Cannot be null.
Action: Ensure the parameter is not null.

Level: 1
Type: WARNING
Impact: Requests/Responses

JPS-04601: Cannot obtain audit service for policy store.
Cause: Could not query audit service about audit logging level for policy store messages.
Action: Ensure that auditing is configured correctly.

Level: 1
Type: WARNING
Impact: Security

JPS-04602: Cannot log policy management event to the audit service.
Cause: Could not log policy management audit messages to the audit service.
Action: Ensure that auditing is configured correctly in your environment and application.

Level: 1
Type: WARNING
Impact: Security

JPS-05500: Cannot create the user manager MBean.
Cause: Could not create the user manager MBean.
Action: Check errors in log files and contact the domain administrator.

Level: 1
Type: ERROR
Impact: Configuration

JPS-05501: Cannot create the role manager MBean.
Cause: Could not create the role manager MBean.
Action: Check the log files for errors and contact domain administrator.

Level: 1
Type: ERROR
Impact: Configuration
JPS-05502: Cannot create the identity store MBean.
    Cause: Could not create the identity store MBean.
    Action: Check log files and contact the domain administrator.
    Level: 1
    Type: ERROR
    Impact: Configuration

JPS-05513: Failed to determine realms to migrate file {0}. Reason {1}.
    Cause: Failed determine realms to migrate file {0}. Reason {1}.
    Action: Check log files and try again.
    Level: 1
    Type: WARNING
    Impact: Programmatic

JPS-05521: Invalid jaas.login.controlFlag {0} found for {1} service instance. Valid values should be {2}.
    Cause: Invalid jaas.login.controlFlag {0} found for {1} service instance. Valid values should be {2}.
    Action: Use a valid value.
    Level: 1
    Type: ERROR
    Impact: Requests/Responses

JPS-05542: Bootstrap credential store context missing
    Cause: Could not find bootstrap credstore context
    Action: Contact system administrator
    Level: 1
    Type: WARNING
    Impact: Compliance

JPS-05546: Bootstrap credential store service missing
    Cause: Could not find bootstrap credstore service
    Action: Contact system administrator
    Level: 1
    Type: WARNING
    Impact: Compliance

JPS-05626: Bootstrap credential already present in store
    Cause: Credential already present in the store
    Action: use different map name or key name for the credential
    Level: 1
    Type: WARNING
    Impact: Compliance
JPS-06000: The source context {0} is missing in jps configuration file.
   
   **Cause:** While migrating a security store, found that the context, specified as source {0}, did not exist in jps-config.xml.
   
   **Action:** Provide a context for source that is present in jps-config.xml.
   
   **Level:** 1
   
   **Type:** ERROR
   
   **Impact:** Configuration

JPS-06001: The destination context {0} is missing in jps configuration file.
   
   **Cause:** While migration of a security store, found that the context, specified as destination {0}, did not exist in jps-config.xml.
   
   **Action:** Provide a context for destination that is present in jps-config.xml.
   
   **Level:** 1
   
   **Type:** ERROR
   
   **Impact:** Configuration

JPS-06002: Cannot clean the destination credential store. Reason {0}.
   
   **Cause:** A codebase grant was found without the required permissions.
   
   **Action:** Set the right permissions to the codebase grant.
   
   **Level:** 1
   
   **Type:** WARNING
   
   **Impact:** Upgrade

JPS-06003: Cannot migrate credential folder/key {0}/(1).Reason {2}.
   
   **Cause:** Cannot migrate this credential.
   
   **Action:** Verify that the credential is correctly specified.
   
   **Level:** 1
   
   **Type:** WARNING
   
   **Impact:** Upgrade

JPS-06004: Cannot migrate an unknown user. Reason {0}.
   
   **Cause:** Cannot migrate this user.
   
   **Action:** Verify that the user is correctly specified.
   
   **Level:** 1
   
   **Type:** WARNING
   
   **Impact:** Upgrade

JPS-06005: Cannot get password of user {0}. Reason {1}.
   
   **Cause:** Cannot get this user password.
   
   **Action:** Verify that the password is correctly specified.
   
   **Level:** 1
   
   **Type:** WARNING
   
   **Impact:** Upgrade
JPS-06006: Cannot migrate user {0}. Reason {1}.
  Cause: Cannot migrate this user name.
  Action: Verify that the user name is correctly specified.
  Level: 1
  Type: WARNING
  Impact: Upgrade

JPS-06007: Cannot migrate an unknown role. Reason {0}.
  Cause: Cannot migrate this role.
  Action: Verify that the role is correctly specified.
  Level: 1
  Type: WARNING
  Impact: Upgrade

JPS-06008: Cannot migrate role {0}. Reason {1}.
  Cause: Cannot migrate this role name.
  Action: Verify that the role name is correctly specified.
  Level: 1
  Type: WARNING
  Impact: Upgrade

JPS-06009: Cannot migrate any member of role {0}. Reason {1}.
  Cause: Cannot migrate members.
  Action: Verify that the members are correctly specified.
  Level: 1
  Type: WARNING
  Impact: Upgrade

JPS-06010: Cannot migrate an unknown member of role {0}. Reason {1}.
  Cause: Cannot migrate this member.
  Action: Verify that the member is correctly specified.
  Level: 1
  Type: WARNING
  Impact: Upgrade

JPS-06011: Cannot migrate member {0} of role: {1}. Reason {2}.
  Cause: Cannot migrate this member name.
  Action: Verify that the member name is correctly specified.
  Level: 1
  Type: WARNING
  Impact: Upgrade

JPS-06012: cannot migrate a global grant. Reason {0}.
  Cause: Could not migrate a global grant. Reason {0}.
Action: Verify that the grant is correctly specified.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06013: cannot migrate an application grant. Reason {0}.
Cause: Could not migrate an application grant. Reason {0}.
Action: Verify that the application grant is correctly specified.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06014: Cannot migrate an indirect password for {0}. Reason {1}.
Cause: Could not migrate an indirect password due to an exception.
Action: Verify that the indirect password is correctly specified.

Level: 1
Type: WARNING
Impact: Upgrade

JPS-06015: Cannot migrate an indirect password for {0} because the specified realm is null.
Cause: Could not migrate an indirect password because the given realm was null.
Action: Provide a non-null realm.

Level: 1
Type: WARNING
Impact: Upgrade

JPS-06016: Cannot migrate an indirect password for {0} because the specified user name is null.
Cause: Could not migrate an indirect password because the given user name was null.
Action: Provide a non-null user name.

Level: 1
Type: WARNING
Impact: Upgrade

JPS-06017: Cannot migrate an indirect password for {0} because the specified realm does not exist.
Cause: Could not migrate an indirect password because the input realm does not exist.
Action: Provide an existing realm.

Level: 1
Type: WARNING
Impact: Upgrade
JPS-06018: Cannot migrate an indirect password for {0} because the specified user does not exist.
  
  **Cause:** Could not migrate an indirect password because the input user does not exist.
  
  **Action:** Provide an existing user.

  
  **Level:** 1
  
  **Type:** WARNING
  
  **Impact:** Upgrade

JPS-06019: The identity store associated with context {0} is missing in jps-config.xml.
  
  **Cause:** While migration of a policy store, found that the context, specified as containing the associated identity store {0}, did not exist in jps-config.xml.
  
  **Action:** Provide a context to associate identity store that is present in jps-config.xml.

  
  **Level:** 1
  
  **Type:** ERROR
  
  **Impact:** Configuration

JPS-06020: The principal class {0} specified in the source policy store cannot be loaded. Reason {1}.
  
  **Cause:** Could not load a class. Reason {0}.
  
  **Action:** Ensure the class is in the class path.

  
  **Level:** 1
  
  **Type:** ERROR
  
  **Impact:** Upgrade

JPS-06021: Cannot migrate the credentials in the folder {0}. Reason: {1}.
  
  **Cause:** Cannot migrate the credentials in this folder.
  
  **Action:** Check the folder in the source credential store.

  
  **Level:** 1
  
  **Type:** WARNING
  
  **Impact:** Upgrade

JPS-06022: Cannot determine the folder to be migrated.
  
  **Cause:** The credential store has more than one folder and the folder to be migrated was not defined.
  
  **Action:** Specify the folder to be migrated.

  
  **Level:** 1
  
  **Type:** WARNING
  
  **Impact:** Upgrade

JPS-06023: The input file {0} specified for migration or upgrade is not valid.
  
  **Cause:** The file {0} was non-readable, empty, or did not exist.
  
  **Action:** Provide a valid file.

  
  **Level:** 1
Type: ERROR
Impact: Upgrade

JPS-06024: Cannot initialize the destination identity store.
Cause: One or more required configuration properties were not be properly defined.
Action: Check the configuration of the destination identity store.
Level: 1
Type: ERROR
Impact: Upgrade

JPS-06025: There are undefined credential properties for the destination identity store.
Cause: One or more required configuration properties for credentials were not defined.
Action: Check the configuration of the destination identity store.
Level: 1
Type: ERROR
Impact: Upgrade

JPS-06026: Cannot get credentials for the destination identity store from the domain credential store.
Cause: Credentials were not found in the domain credential store.
Action: Ensure that the domain credential store has the appropriate credentials.
Level: 1
Type: ERROR
Impact: Upgrade

JPS-06027: Cannot migrate the specified realm.
Cause: The specified realm was not found in the source store.
Action: Specify a valid realm name.
Level: 1
Type: ERROR
Impact: Upgrade

JPS-06028: The required identity store property {0} required for migration is undefined.
Cause: A property required for migration was not configured in the identity store.
Action: Specify the missing configuration property.
Level: 1
Type: ERROR
Impact: Other

JPS-06029: JAZN properties cannot be read from config file {0}.
Cause: JAZN properties could not be read from config file {0}.
Action: Check the configuration file and try again.
JPS-06030: The required JAZN property {0} could not be read.
Cause: A required JAZN property {0} could not be read.
Action: Check the configuration file and try again.

JPS-06031: No application is configured in the source policy store.
Cause: No application was configured in the source policy store.
Action: Check the source policy store.

JPS-06032: Unable to determine the application policy to migrate.
Cause: More than one application was configured in the source policy store.
Action: Check the source policy store.

JPS-06033: The source credential store contains no credentials.
Cause: The requested credential was not found in the credential store.
Action: Ensure that the credential store has the requested credential.

JPS-06034: The folder {0} is missing in the credential store.
Cause: The requested map name was not found in the credential store.
Action: Ensure that the credential store contains the requested map name.

JPS-06035: The destination file {0} already exists; the existing LDIF file will not be appended or overwritten.
Cause: The destination file is already present.
Action: Delete the destination file, or provide the name of a non-existing file.
Type: ERROR
Impact: Requests/Responses

JPS-06036: Cannot determine the default realm to migrate file {0}. Reason {1}.
  Cause: An internal error occurred while determining the default realm.
  Action: Check log files and try again.
  Level: 1

Type: WARNING
Impact: Programmatic

JPS-06037: Cannot initialize the source credential store.
  Cause: The configuration for the credential store was invalid.
  Action: Verify that the credential store configuration is correct and try again.
  Level: 1

Type: ERROR
Impact: Upgrade

JPS-06038: Cannot initialize the destination credential store.
  Cause: The configuration for the credential store was invalid.
  Action: Verify that the credential store configuration is correct and try again.
  Level: 1

Type: ERROR
Impact: Upgrade

JPS-06039: Cannot migrate property {0} of user {1}. Reason {2}.
  Cause: Cannot migrate property {0} for user {1}. Reason {2}.
  Action: Check the log files and retry migrating.
  Level: 1

Type: WARNING
Impact: Upgrade

JPS-06040: Cannot migrate property {0} of role {1}. Reason {2}.
  Cause: Cannot migrate property {0} for role {1}. Reason {2}.
  Action: Check the log files and retry migrating.
  Level: 1

Type: WARNING
Impact: Upgrade

JPS-06041: The switch or keyword " {0} " is not applicable to " {1} = {2} ".
  Cause: One or more optional switches or keywords were invalid.
  Action: Refer to the command documentation for the correct usage.
  Level: 1

Type: ERROR
Impact: Requests/Responses
JPS-06042: Invalid scope for migration.
  Cause: Value of scope keyword was invalid.
  Action: Enter only one of the defined values/alias of scope as a value for the
  keyword scope.

  Level: 1
  Type: ERROR
  Impact: Requests/Responses

JPS-06043: The source application is undefined but required to migrate
application-specific policies.
  Cause: Optional keyword srcApp was not defined.
  Action: Specify, in the parameter srcApp, the value of the application whose
  policies are to be migrated.

  Level: 1
  Type: ERROR
  Impact: Requests/Responses

JPS-06044: Cannot create the temporary file {0}.
  Cause: Could not write the XML file.
  Action: Check permissions or disk space in the java.io.tmpdir directory.

  Level: 1
  Type: ERROR
  Impact: Programmatic

JPS-06045: Cannot parse the file {0}.
  Cause: Could not parse the XML file.
  Action: Check that the file is present in the java.io.tmpdir directory, and that it
  contains well-formed XML.

  Level: 1
  Type: ERROR
  Impact: Programmatic

JPS-06046: Cannot delete the file {0}.
  Cause: The temp file could not be deleted.
  Action: Check that the file is not being accessed by other applications.

  Level: 1
  Type: ERROR
  Impact: Programmatic

JPS-06047: Cannot migrate user credentials of user {0}.
  Cause: The source identity store was configured not to give cleartext password.
  Action: Configure the source identity store to obfuscate password.

  Level: 1
  Type: WARNING
Impact: Configuration

JPS-06048: Null values passed in for username or application stripes.
Cause: The user name or the application stripe was null.
Action: The user name must not be null. The list of application names must be null if only global policies are to be extracted.
Level: 1
Type: WARNING
Impact: Programmatic

JPS-06049: Application list is empty. Only global policies will be extracted.
Cause: The list of applications was empty.
Action: Only global policies are collected.
Level: 1
Type: NOTIFICATION
Impact: Programmatic

JPS-06050: file {0} was not found
Cause: The xml file was not found.
Action: Check if the file is present in the java.io.tmpdir directory.
Level: 1
Type: ERROR
Impact: Programmatic

JPS-06051: Processing of privilege roles is supported only when migrating an XML Policy store to an LDAP Policy Store.
Cause: Processing of privilege roles was supported only when migrating an XML policy store to an LDAP policy store.
Action: Make sure that the source store is XML-based and the destination store is LDAP-based.
Level: 1
Type: ERROR
Impact: Upgrade

JPS-06052: Error while processing a PermissionSet grant.
Cause: Error encountered while processing permissionSet grant.
Action: Check log files for details.
Level: 1
Type: ERROR
Impact: Upgrade

JPS-06053: Processing privilege roles failed. Cause {0}
Cause: The processing of privilege roles failed.
Action: Check log files for details.
Level: 1
Type: ERROR
Impact: Upgrade

JPS-06054: Error in creating resourceTypes in destination store. Cause {0}
  Cause: Error encountered while creating resourceTypes in destination store.
  Action: Check log files for details.
  Level: 1
Type: ERROR
Impact: Upgrade

JPS-06055: Location of the ldif file containing resourceType definitions cannot be null.
  Cause: Location of the LDIF file containing resourceType definitions was null or not found.
  Action: Provide the absolute path for the resource file.
  Level: 1
Type: ERROR
Impact: Upgrade

JPS-06056: Error while reading resource type file {0}.
  Cause: Error encountered while reading the resource type file {0}.
  Action: Ensure that the file exists and that it has the expected format.
  Level: 1
Type: ERROR
Impact: Upgrade

JPS-06057: Resource type name or matcher class cannot be null.
  Cause: Resource type name or matcher class was null.
  Action: Provide a valid name and matcher class for the resource type.
  Level: 1
Type: ERROR
Impact: Upgrade

JPS-06058: Permission class {0} with more than one matching resource type found.
  Cause: Permission class had more than one matching resource type.
  Action: Ensure that the a permission class has just one matching resource type.
  Level: 1
Type: ERROR
Impact: Upgrade

JPS-06059: A grant entry containing {0} as one of principals has multiple principal entries. This entry cannot be processed.
  Cause: A grant for a privilege role had multiple principals.
  Action: Ensure that the privilege role grant has a single principal.
  Level: 1
Type: WARNING
Impact: Upgrade

JPS-06060: The resource type definition file is missing.
Cause: The resource type definition file was not found.
Action: Provide the absolute path location for the resource definition file in LDIF format when using the option procPrivOption.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06061: The switch or keyword " {0} " is not defined for " {1} = {2} ".
Cause: One or more optional switches or keywords were invalid.
Action: Refer to the command documentation for the correct usage.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06062: Application role {0} corresponding to a member application role not defined.
Cause: Application role not defined.
Action: Check logs for details.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06063: No Matching resource type definition found for permission class {0}.
Cause: Permission class representing resource granted to a privileged role does not have corresponding resource type definition.
Action: Make sure a permission class has one matching resource type.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06064: Error getting the application role {0} from the source policy store
Cause: The application role was either not present or defined multiple times.
Action: Check the source policy store and make sure that the application role is uniquely defined.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06065: Report generation failed
Cause: 
Action: 

Level: 1
Type: ERROR
Impact: Configuration

JPS-06066: Invalid value for mode.
  Cause: Invalid value for mode
  Action: Make sure the value for mode is valid

Level: 1
Type: ERROR
Impact: Security

JPS-06067: {0} config file either not found or not a valid file.
  Cause: {0} config file either not found or not a valid file
  Action: Make sure to provide a valid config file

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06068: Unable to read configurations from jazn config file : {0}.
  Cause: Unable to read configurations from jazn data file : {0}.
  Action: Check the jazn data file.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06069: Provider referred from jazn config file {0} is of type XML and not LDAP.
  Cause: Provider referred from jps-config file {0} is of type XML and not LDAP.
  Action: Refer to a provider of type LDAP.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06070: Unable to read policies from policy store.
  Cause: Unable to read policies from policy store.
  Action: Check the policy store.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06071: Unable to read global policies from policy store.
  Cause: Unable to read global policies from policy store.
  Action: Check the policy store.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06072: Unable to read permissions for grantee {0} from policy store.
 Cause: Unable to read permissions for grantee {0} from policy store.
 Action: Check the policy store.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06073: Unable to read realm policies from policy store.
 Cause: Unable to read realm policies from policy store.
 Action: Check the policy store.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06074: Unable to read realm policies from realm {0} from policy store.
 Cause: Unable to read realm policies from realm {0} from policy store.
 Action: Check the policy store.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06075: Unsupported resource type file format. Use either an ldif file or a jazn-data with only resource type definitions.
 Cause: Unsupported resource type file format.
 Action: Use either an ldif file or a jazn-data with only resource type definitions.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06076: A Resource Type referred by {0} is expected to have a matching class {1} but has {2}.
 Cause: A Resource Type referred by a Permission is expected to have the same matching class as defined in the Permission
 Action: Make sure a permission class has one matching resource type with the same class name.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06077: A Resource Type referred by {0} is not defined.
 Cause: A Resource Type referred by a Permission is not defined.
 Action: Make sure a permission class has one matching resource type.

Level: 1
JPS-06078: Cannot migrate keystore/stripe {0}/{1}. Reason {2}.
  Cause: Cannot migrate the keystore in this stripe.
  Action: Check the keystore and stripe in the source keystore service.
  Level: 1

JPS-06079: Cannot determine the stripe to be migrated.
  Cause: The keystore service has more than one stripes and the stripe to be
  migrated was not defined.
  Action: Specify the stripe to be migrated.
  Level: 1

JPS-06080: The source keystore service contains no keystore within the given
  application stripe.
  Cause: The requested keystore was not found in the keystore service.
  Action: Ensure that the keystore service has the requested keystore.
  Level: 1

JPS-06082: Cannot initialize the source keystore service.
  Cause: The configuration for the keystore service was invalid.
  Action: Verify that the keystore service configuration is correct and try again.
  Level: 1

JPS-06083: Cannot initialize the destination keystore service.
  Cause: The configuration for the keystore service was invalid.
  Action: Verify that the keystore service configuration is correct and try again.
  Level: 1

JPS-06084: Cannot clean the destination keystore service. Reason {0}.
  Cause: A codebase grant was found without the required permissions.
  Action: Set the right permissions to the codebase grant.
  Level: 1
Type: WARNING
Impact: Upgrade

JPS-06085: Resource types not defined for the application {0}.
Cause: Resource Types not found for the application {0}.
Action: Define the resource types for the application {0}.
Level: 1

Type: ERROR
Impact: Upgrade

JPS-06086: Cannot upgrade policies for application {0}.
Cause: Exception during policy upgradation.
Action: Check the Causing exception and fix the error.
Level: 1

Type: ERROR
Impact: Upgrade

JPS-06087: Duplicate permissions: {0} present in grant in source.
Cause: Duplicate permissions are present in a grant in source.
Action: See error message.
Level: 1

Type: WARNING
Impact: Upgrade

JPS-06088: Duplicates principals:{0} present in grant in source.
Cause: Duplicates principals are present in a grant in source.
Action: See error message.
Level: 1

Type: WARNING
Impact: Upgrade

JPS-06089: Duplicate grant {0} present in source.
Cause: Duplicate grants are present in source.
Action: See error message.
Level: 1

Type: WARNING
Impact: Upgrade

JPS-06090: Duplicate app-role {0} present in source.
Cause: Duplicate app-roles are present in source.
Action: See error message.
Level: 1
JPS-06091: Duplicate member {0} present in an app-role in source.
  Cause: Duplicate members are present in an app-role in source.
  Action: See error message.
  Level: 1
  Type: WARNING
  Impact: Upgrade

JPS-06100: Policy Store version {0} and Oracle Platform Security Services Version {1} are not compatible.
  Cause: The policy store version and the version of Oracle Platform Security Services does not match.
  Action: Upgrade your binaries or your policy store.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-06101: Cannot initialize the source auditstore service.
  Cause: The configuration for the audit store was invalid.
  Action: Verify that the audit store configuration is correct and try again.
  Level: 1
  Type: ERROR
  Impact: Upgrade

JPS-06102: Cannot initialize the destination auditstore service.
  Cause: The configuration for the audit store was invalid.
  Action: Verify that the audit store configuration is correct and try again.
  Level: 1
  Type: ERROR
  Impact: Upgrade

JPS-06103: Default Admin Role {0} not found in the policy domain {1} in the destination policy store.
  Cause: The destination policy store may not conform to latest version and need to be upgraded.
  Action: See error message.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-06104: Default Admin Role {0} not found in the application {1} in the destination policy store.
  Cause: The destination policy store may not conform to latest version and need to be upgraded.
  Action: See error message.
  Level: 1
Type: WARNING
Impact: Security

JPS-06105: Default system Admin Role {0} not found in the destination policy store
Cause: The destination policy store may not conform to latest version and need to be upgraded
Action: See error message.
Level: 1

Type: WARNING
Impact: Security

JPS-06106: Instantiation of bootstrap credential store specified in file {0} failed.
Reason {1}
Cause: The configuration provided is not valid.
Action: Provide a valid configuration file which has configuration for bootstrap credential.
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-06107: Instantiation of credential store at path {0} failed. Reason: {1}
Cause: An underlying exception prevented initialization of credentials file.
Action: Check the cause of the exception and fix it.
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-06108: Import/Export of keys failed. Reason: {0}
Cause: An underlying exception prevented exporting/importing of key.
Action: Check the cause of the exception and fix it.
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-06109: Cannot read key from key file in Directory {0}. Reason {1}.
Cause: An underlying exception prevented reading of key.
Action: Check the cause of the exception and fix it.
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-06110: Key file Directory {0} does not have write permissions.
Cause: Key file directory not writable.
Action: Change the permissions of the directory.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06111: Key file Directory {0} does not have read permissions.
Cause: Key file directory is not readable.
Action: Change the permissions of the directory.
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-06112: Key file Directory {0} does not exist.
Cause: The path specified either donnot exist or is not a directory.
Action: Provide a valid directory.
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-06113: Configuration file {0} is not valid. It is either not present or does not have read permissions.
Cause: The file is either not present or is not readable.
Action: Provide a valid file.
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-06114: Key is not present in the key file in Directory {0}.
Cause: Export might have not completed successfully.
Action: Provide key file that has key in it.
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-06115: Empty DB username information. Please make sure to provide the correct jdbcUser info.
Cause: Empty DB username information.
Action: Please make sure to provide the correct jdbcUser info.
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-06116: Empty DB password information. Please make sure to provide the correct jdbcPassword info.
Cause: Empty DB password information.
Action: Please make sure to provide the correct jdbcPassword info.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06117: Empty JDBC host and port information. Please make sure to provide the correct jdbcUrl info.
Cause: Empty DB host and port information.
Action: Please make sure to provide the correct jdbcUrl info.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06118: Empty JDBC Driver information. Please make sure to provide the correct jdbcDriver info.
Cause: Empty JDBC Driver information.
Action: Please make sure to provide the correct jdbcDriver info.

Level: 1
Type: ERROR
Impact: Requests/Responses

Cause: No import was performed or import was not sucessfull.
Action: import the key(s) again.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06120: Policystore is already upgraded, so it will not be upgraded again.
Cause: Policystore is already upgraded.
Action: Policystore will not be upgraded again.

Level: 1
Type: WARNING
Impact: Upgrade

JPS-06121: Keystore is already upgraded, so it will not be upgraded again.
Cause: Keystore is already upgraded.
Action: Keystore will not be upgraded again.

**Impact:** Security

**JPS-07506: Token context creation failed.**
- **Cause:** Incorrect protocol or associated provider configuration.
- **Action:** Check protocol and associated provider configuration
- **Level:** 1
- **Type:** NOTIFICATION

**Impact:** Security

**JPS-07507: Token issue operation**
- **Cause:** Trust service token issue operation.
- **Action:** No action required
- **Level:** 1
- **Type:** NOTIFICATION

**Impact:** Security

**JPS-07508: Token issue operation failed.**
- **Cause:** Trust service token issue operation failed.
- **Action:** Check provider configuration
- **Level:** 1
- **Type:** ERROR

**Impact:** Security

**JPS-07509: Invalid token operation**
- **Cause:** Invalid Trust Service token operation.
- **Action:** Check invoked operation name
- **Level:** 1
- **Type:** ERROR

**Impact:** Security

**JPS-07510: Token validate operation.**
- **Cause:** Trust Service validate token operation.
- **Action:** No action required
- **Level:** 1
- **Type:** ERROR

**Impact:** Security

**JPS-07511: Validate operation failed.**
Cause: Trust service token validate operation failed.
Action: Check provider configuration

Level: 1
Type: ERROR
Impact: Security

JPS-07512: Missing token issuer identity.
Cause: Token issuer identity missing.
Action: Provide token issuer identity

Level: 1
Type: ERROR
Impact: Security

JPS-07513: Invalid subject confirmation method.
Cause: Invalid subject confirmation method.
Action: Provide correct subject confirmation method

Level: 1
Type: ERROR
Impact: Security

JPS-07514: Token audience restriction condition check failed.
Cause: Invalid token audience condition.
Action: Check the audience condition

Level: 1
Type: ERROR
Impact: Security

JPS-07515: Token signature validation failed.
Cause: Invalid token signature.
Action: Check token integrity and verify signature using correct certificate

Level: 1
Type: ERROR
Impact: Security

JPS-07516: Invalid token.
Cause: Invalid token.
Action: Check token integrity.

Level: 1
Type: ERROR
Impact: Security

JPS-07517: Input token is not an instance of GenericToken class.
Cause: Input token is not an instance of GenericToken class.
Action: Check the token object class
JPS-07518: Input token is not an instance of UsernameToken class
Cause: Input token is not an instance of UsernameToken class.
Action: Check the token object class

JPS-07519: Setting subject conformation method failed.
Cause: Invalid token object.
Action: Check the token object

JPS-07520: Token signing failed.
Cause: Token signing key is unavailable.
Action: Check the keystore and verify that signing key is present

JPS-07521: Token signature is not available.
Cause: Unsigned token.
Action: No action required.

JPS-07522: Token is not valid yet {0}
Cause: Token is not valid yet.
Action: Check the token validity start date.

JPS-07523: Token has expired {0}
Cause: Token has expired.
Action: Check the token validity end date.
Impact: Security

JPS-07524: Certificate is unavailable [0]
Cause: Certificate is not available.
Action: Check the keystore and ensure that the certificate is present.
Level: 1
Type: ERROR
Impact: Security

JPS-07525: Private key is unavailable
Cause: Private key is not available.
Action: Check the keystore and ensure that the private key is present.
Level: 1
Type: ERROR
Impact: Security

JPS-07526: Initializing provider
Cause: Provider is initializing.
Action: None
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07527: Shutting down provider
Cause: Provider is shutting down.
Action: None
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07528: Received unknown token type [0]
Cause: Received token type is unknown.
Action: Check the provided token.
Level: 1
Type: WARNING
Impact: Security

JPS-07529: Received unknown token class [0]
Cause: Token class is unknown.
Action: Check the token class.
Level: 1
Type: WARNING
Impact: Security

JPS-07530: Invalid token type or token not found
Cause: Invalid token authentication type specified.
Action: Check the token authentication type.

Level: 1
Type: WARNING
Impact: Security

JPS-07531: Input token is not an instance of {0}
Cause: Specified insance is not correct.
Action: Check the instance type validity.

Level: 1
Type: WARNING
Impact: Security

JPS-07532: Instance of {0} is invalid
Cause: Specified instance is invalid.
Action: Check the specified instance and ensure that it is correct.

Level: 1
Type: WARNING
Impact: Security

JPS-07533: Received empty token byte array
Cause: Given token is empty.
Action: Check the token content and ensure that it is not empty.

Level: 1
Type: ERROR
Impact: Security

JPS-07534: Trust service configuration is not valid
Cause: Invalid configuration parameters.
Action: Check the configuration parameters.

Level: 1
Type: WARNING
Impact: Security

JPS-07535: Using {0} Trust service configuration
Cause: Configuration type used by Trust Service
Action: None

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07536: Token credential missing
Cause: Token signing or validation credential missing.
Action: Provide correct credential.
Level: 1
Type: ERROR
Impact: Security

JPS-07537: Token signature missing
Cause: Token signature missing.
Action: Check the token for integrity.

Level: 1
Type: ERROR
Impact: Security

JPS-07538: The input token is not specified
Cause: Input token not provided.
Action: Check if the token has been provided.

Level: 1
Type: ERROR
Impact: Security

JPS-07539: Token signing method is not specified
Cause: Token signing algorithm parameter missing.
Action: Check the token signing algorithm parameter.

Level: 1
Type: ERROR
Impact: Security

JPS-07540: Token signing method is invalid
Cause: Token signing algorithm parameter invalid
Action: Check the specified token signing algorithm.

Level: 1
Type: ERROR
Impact: Security

JPS-07541: Token signing private key is not specified
Cause: Token signing private key missing.
Action: Check the token signing private key parameter.

Level: 1
Type: ERROR
Impact: Security

JPS-07542: Token signing certificate is not specified
Cause: Token signing certificate missing.
Action: Check the token signing certificate parameter.

Level: 1
Type: ERROR
Impact: Security

JPS-07543: Token signing credential is not specified
Cause: Token signing credential missing.
Action: Check the token signing credential parameter.

Level: 1
Type: ERROR

Impact: Security

JPS-07544: The specified token type is invalid
Cause: The token type is not supported.
Action: Check the token type parameter.

Level: 1
Type: ERROR

Impact: Security

JPS-07601: Complete staging offline deployment for application {0} in {1}
Cause: Complete staging offline deployment for application {0} in {1}
Action: No action required

Level: 1
Type: NOTIFICATION

Impact: Security

JPS-07602: Removal of application policy failed. Reason: {0}.
Cause: Exception in removing application policy
Action: Check application policy setup or contact system administrator

Level: 1
Type: WARNING

Impact: Security

JPS-08000: Subject object {0} is not supported.
Cause: Specified Object type is not supported by the provider for Subject.
Action: Check the document for supported object types.

Level: 1
Type: ERROR

Impact: Security

JPS-08001: Action object {0} is not supported.
Cause: Specified Object type is not supported by the provider for Action.
Action: Check the document for supported object types.

Level: 1
Type: ERROR

Impact: Security

JPS-08002: Resource object {0} is not supported.
Cause: Specified Object type is not supported by the provider for Resource.
Action: Check the document for supported object types.

Level: 1
Type: ERROR
Impact: Security

JPS-08003: Environment object {0} is not supported.
Cause: Specified Object type is not supported by the provider for Environment.
Action: Check the document for supported object types.

Level: 1
Type: ERROR
Impact: Security

JPS-08004: Invalid resource string: {0}.
Cause: The resource string is invalid.
Action: Check the document for the resource string format.

Level: 1
Type: ERROR
Impact: Security

JPS-08005: Subject cannot be null.
Cause: The subject is null.
Action: Use a valid subject.

Level: 1
Type: ERROR
Impact: Security

JPS-08006: Action cannot be null.
Cause: The action is null.
Action: Use a valid action.

Level: 1
Type: ERROR
Impact: Security

JPS-08007: Resource cannot be null.
Cause: The resource is null.
Action: Use a valid resource.

Level: 1
Type: ERROR
Impact: Security

JPS-08008: Action list cannot be null or empty.
Cause: The action list is null or empty.
Action: Use a valid action list.
Level: 1
Type: ERROR
Impact: Security

**JPS-08009: Resource list cannot be null or empty.**
- **Cause:** The resource list is null or empty.
- **Action:** Use a valid resource list.

Level: 1
Type: ERROR
Impact: Security

**JPS-08010: The size of action list and resource list is different.**
- **Cause:** The size of action list and resource list is different.
- **Action:** The size of action list should be identical to the size of resource list.

Level: 1
Type: ERROR
Impact: Security

**JPS-08011: Subject object {0} is not a valid subject on platform {1}.**
- **Cause:** The subject object is not a valid subject on current platform.
- **Action:** Use a valid subject.

Level: 1
Type: ERROR
Impact: Security

**JPS-08012: Scope cannot be null or empty.**
- **Cause:** Scope is null or empty.
- **Action:** Use a valid scope.

Level: 1
Type: ERROR
Impact: Security

**JPS-08013: Query Type cannot be null.**
- **Cause:** Query Type is null.
- **Action:** Use a valid Query Type.

Level: 1
Type: ERROR
Impact: Security

**JPS-08014: Invalid scope string: {0}.**
- **Cause:** The scope string is invalid.
- **Action:** Check the document for the scope string format.

Level: 1
Type: ERROR
Impact: Security

JPS-08015: Invalid search scope string: {0}.
  
  Cause: The search scope in scope string is invalid.
  
  Action: Check the document for the scope string format.
  
  Level: 1
  
  Type: ERROR
  
  Impact: Security

JPS-08016: An error has occurred while processing the PepResponse result.
  
  Cause: An error has occurred while processing the PepResponse results.
  
  Action: Check the policy setup and client code.
  
  Level: 1
  
  Type: ERROR
  
  Impact: Security

JPS-08017: Invalid resource string: {0}. Please provide a fully qualified resource string.
  
  Cause: Fully qualified resource string is required.
  
  Action: Please specify application ID, resource type and resource name.
  
  Level: 1
  
  Type: ERROR
  
  Impact: Security

JPS-08018: The configured policy provider {0} does not implement AzPolicy interface.
  
  Cause: The configured policy provider does not implement AzPolicy interface.
  
  Action: You must configure policy provider that implements AzPolicy interface, e.g. by calling Policy.setPolicy().
  
  Level: 1
  
  Type: ERROR

Impact: Security

JPS-08553: Failed to load opss_audit_registration.xml. Reason "{0}".
Cause: Failed to load opss_audit_registration.xml, Reason "{0}".
Action: See error message.
Level: 1

Type: WARNING
Impact: Security

JPS-08554: Failed to register Component type "{0}" due to malformed version number in event definition.
Cause: Failed to register Component type "{0}" due to malformed version number in event definition.
Action: See error message.
Level: 1
Type: WARNING
Impact: Security

JPS-09000: Resource type \{0\} already in use for \{1\}.
  Cause: Resource type was already in use.
  Action: Use a different resource type name.
Level: 1
Type: WARNING
Impact: Security

JPS-09001: Resource matching class name is missing. A subtype must not have its own matching algorithm.
  Cause: Resource matching class name was missing.
  Action: A subtype must not have its own matching algorithm.
Level: 1
Type: WARNING
Impact: Security

JPS-09002: The parameter \{0\} of type \{1\} does not exist.
  Cause: This parameter did not exist.
  Action: See the log files for more details.
Level: 1
Type: WARNING
Impact: Security

JPS-09003: For the parameter \{0\} more than expected values found for the Application name:\{1\}, Policy Domain:\{2\}, Query Parameter:\{3\}, Actual results: \{4\}
  Cause: More then expected values for given parameter found.
  Action: See the log files for more details.
Level: 1
Type: WARNING
Impact: Security

JPS-09004: For type \{0\} the modification is not allowed for \{1\}.
  Cause: Modify operation was not allowed.
  Action: See the log files for more details.
Level: 1
Type: WARNING
Impact: Security

JPS-09005: For the parameter \{0\} the given value \{1\} is invalid.
  Cause: The value for the given parameter was invalid.
Action: Provide the valid value for the given parameter.

Level: 1
Type: WARNING
Impact: Security

JPS-09006: Resource {0} already in use {1}.
Cause: Resource was already in use.
Action: Use a different resource name.

Level: 1
Type: WARNING
Impact: Security

JPS-09007: RoleCategory {0} cannot be deleted
Cause: The role category is referenced by one or more application roles.
Action: Modify the application role(s) definition that reference this role category by removing the role category for the application role.

Level: 1
Type: WARNING
Impact: Security

JPS-09008: Application policy for application {0} does not exist.
Cause: Application policy did not exist.
Action: The application policy must exist. Check the policy store.

Level: 1
Type: WARNING
Impact: Security

JPS-09009: Only limited set of properties are supported for resource action search. See the documentation for more details.
Cause: The property user to search resource action was invalid.
Action: Only limited set of properties are supported for resource action search. See the documentation for more details.

Level: 1
Type: WARNING
Impact: Security

JPS-09010: Cannot create permission set {0} with a non-existent resource type {1}.
Cause: Permission set could not be created without resource type.
Action: Resource type must be pre-defined to create the permission set.

Level: 1
Type: WARNING
Impact: Security

JPS-09011: Cannot create permission set {0} with a non-existent resource {1}.
Cause: Permission set could not be created without resource.
Action: Resource must be pre-defined to create the permission set.

Level: 1
Type: WARNING
Impact: Security

JPS-09012: Search value cannot be null. It can be null only if MATCHER is ANY.
Cause: Search value was null. It could be null only if MATCHER is ANY.
Action: Verify the search value for the given query.

Level: 1
Type: WARNING
Impact: Security

JPS-09013: This application roles [0] does not belong to this application [1].
Cause: This application role did not belong to this application.
Action: Ensure this application role belongs to this application.

Level: 1
Type: WARNING
Impact: Security

JPS-09014: The application role [0] cannot have null name or unique name for the application [1].
Cause: The name or unique name of this application role was null or invalid.
Action: Ensure the name or unique name of this application role is valid.

Level: 1
Type: WARNING
Impact: Security

JPS-09015: Application role does not exist in current application.
Cause: Application role was not found in current application.
Action: Ensure the application role belongs to this application.

Level: 1
Type: WARNING
Impact: Security

JPS-09016: Unknown policy store service type [0].
Cause: Unknown policy store service type [0].
Action: Correct the policy store configuration.

Level: 1
Type: ERROR
Impact: Configuration

JPS-09017: Policy entry [0] cannot be found.
Cause: Policy entry [0] cannot be found.
Action: Correct the policy entry.
JPS-09018: Policy object {0} cannot be found.
  Cause: Policy object {0} cannot be found.
  Action: Correct the policy object.

JPS-09019: {0} could not be cached.
  Cause: {0} did not be cached.
  Action: Ensure the Resource has valid actions.

JPS-09020: Principal entry class "{0}", name "{1}" cannot be created.
  Cause: Principal entry class "{0}", name "{1}" cannot be created.
  Action: Ensure that the principal entry class is correct and entry value is valid.

JPS-09021: Permission entry class "{0}", target "{1}", action "{2}" cannot be created.
  Cause: Permission entry class "{0}", target "{1}", action "{2}" cannot be created.
  Action: Ensure that the permission entry class is correct and entry value is valid.

JPS-09022: Resource entry type "{0}", resource "{1}" cannot be created.
  Cause: Resource entry type "{0}", resource "{1}" cannot be created.
  Action: Ensure that the resource entry class is correct and entry value is valid.

JPS-09023: Resource type entry name "{0}", matcher class "{1}", provider "{2}" cannot be created.
  Cause: Resource type entry name "{0}", matcher class "{1}", provider "{2}" cannot be created.
  Action: Ensure that the resource type entry class is correct and entry value is valid.
JPS-09024: Resource action entry type "{0}", name "{1}" cannot be created.
  Cause: Resource action entry type "{0}", name "{1}" cannot be created.
  Action: Ensure that the resource action entry class is correct and entry value is valid.

JPS-09025: Permission set entry (name: "{0}", actions: "{1}") cannot be created.
  Cause: Permissionset entry name "{0}", actions "{1}" cannot be created.
  Action: Ensure that the permissionset entry class is correct and entry value is valid.

JPS-09026: Role category entry name "{0}" cannot be created.
  Cause: Role category entry name "{0}" cannot be created.
  Action: Ensure that the role category entry class is correct and entry value is valid.

JPS-09027: Grantee DN was missing for principal {0}.
  Cause: Grantee DN was missing for principal {0}.
  Action: Check principal value.

JPS-09028: Failed to get permission for principal {0}. Reason: {1}.
  Cause: Failed to get permission for principal {0}. Reason: {1}.
  Action: Check principal value.

JPS-09029: Total Time to getPermissions in the Application {0} with {1} number of Grantees is: {2} ms.
Action: Check log for details.

Level: 1
Type: NOTIFICATION
Impact: Configuration

JPS-09030: Code signer data [0] cannot be migrated due to limitation in the destination policy store.
Cause: Code signer data [0] cannot be migrated due to limitation in the destination policy store.
Action: Check log for details.

Level: 1
Type: WARNING
Impact: Configuration

JPS-09031: Failed to read java policies for Application: [0]. Reason: [1].
Cause: Failed to read java policies for Application: [0]. Reason: [1].
Action: Check log for details.

Level: 1
Type: WARNING
Impact: Configuration

JPS-09032: Only one of permission array [0] and permission entry list [1] can be null or non-null.
Cause: Only one of permission array [0] and permission entry list [1] can be null/non-null.
Action: Ensure one of permission array or permission entry list values is null or non-null.

Level: 1
Type: ERROR
Impact: Configuration

JPS-09033: No grantee found for grantee entry [0].
Cause: No grantee found for grantee entry [0].
Action: Ensure the grantee exist in the policy store.

Level: 1
Type: ERROR
Impact: Configuration

JPS-09034: Modification on single-value attribute [0] but contains multiple attribute values.
Cause: Modification on single-value attribute [0] but contains multiple attribute values.
Action: Check modification details.
JPS-09035: Failed to create DN for {0}. Reason: {1}.
  Cause: Failed to create DN for {0}. Reason: {1}.
  Action: Check DN name.

JPS-09036: Failed to read JACC policy {0}. Reason: {0}.
  Cause: Failed to read JACC policy {0}. Reason: {0}.
  Action: Check LDAP configuration to resolve this error.

JPS-09037: No application DN found for name {0} under farm {1}.
  Cause: No application DN found for name {0} under farm {1}.
  Action: Check DN name.

JPS-09038: Resource type {0} does not exist for resource {1}
  Cause: This resource type does not exist.
  Action: Provide a valid resource type.

JPS-09041: Expression component provided for RuleExpressionEntry must not be null.
  Cause: Expression component provided for RuleExpressionEntry must not be null.
  Action: Check value of ExpressionComponent.

JPS-09042: Invalid expression component provided to RuleExpressionEntry.
  Cause: Invalid expression component provided to RuleExpressionEntry.
  Action: Check value of ExpressionComponent.
Level: 1  
Type: ERROR  
Impact: Programmatic

**JPS-09043: Function entry for an expression must not be null.**  
**Cause:** Function entry for an expression must not be null.  
**Action:** Check value of FunctionEntry.

Level: 1  
Type: ERROR  
Impact: Programmatic

**JPS-09044: Expression component of type [0] not supported.**  
**Cause:** Expression component of type [0] not supported.  
**Action:** Check value of ExpressionComponent.

Level: 1  
Type: ERROR  
Impact: Programmatic

**JPS-09045: Minimum number of input parameters must be less than or equal to maximum number of input parameters**  
**Cause:** Minimum number of input parameters must be less than or equal to maximum number of input parameters  
**Action:** Check parameters to constructor of VarArgsInfo.

Level: 1  
Type: ERROR  
Impact: Programmatic

**JPS-09046: The Matcher [0] in the search query is invalid**  
**Cause:** The matcher in the search query is invalid  
**Action:** Provide a valid Search Matcher in the query.

Level: 1  
Type: ERROR  
Impact: Programmatic

**JPS-09047: The Property [0] in the search query is invalid**  
**Cause:** The search property in the query is invalid  
**Action:** Provide a valid Search property in the query.

Level: 1  
Type: ERROR  
Impact: Programmatic

**JPS-09048: The search value is invalid**  
**Cause:** The search value in the query is invalid  
**Action:** Provide a valid Search value in the query.
Level: 1
Type: ERROR
Impact: Programmatic

JPS-09049: Null value provided for {0}
Cause: Invalid value provided to DataType object.
Action: Provide a non-null value

Level: 1
Type: WARNING
Impact: Programmatic

JPS-09050: Host name {0} is invalid for DNS name
Cause: Invalid value provided as DNS host.
Action: Provide a valid value

Level: 1
Type: WARNING
Impact: Programmatic

JPS-09051: Invalid data. Lower DNS port {0} is greater than higher port {1}.
Cause: Lower port is greater than upper range.
Action: Provide a valid value

Level: 1
Type: WARNING
Impact: Programmatic

JPS-09052: Unknown format, can not parse valid date from string {0}.
Cause: Unknown format for date string.
Action: Provide a valid value

Level: 1
Type: WARNING
Impact: Programmatic

JPS-09053: Invalid string {0} for fractional seconds.
Cause: Invalid string for fractional seconds.
Action: Provide a valid value

Level: 1
Type: WARNING
Impact: Programmatic

JPS-09054: Invalid string {0} for hour offset.
Cause: Invalid string for hour offset.
Action: Provide a valid value

Level: 1
Type: WARNING
Impact: Programmatic

JPS-09055: Invalid string {0} for minute offset.
  Cause: Invalid string for minute offset.
  Action: Provide a valid value
  Level: 1
  Type: WARNING
  Impact: Programmatic

JPS-09056: Negative value {0} not allowed.
  Cause: Negative value not allowed.
  Action: Provide a valid value
  Level: 1
  Type: WARNING
  Impact: Programmatic

JPS-09057: Invalid string {0} for dayTimeDuration. Cannot parse.
  Cause: Invalid string format for dayTimeDuration
  Action: Provide a valid value
  Level: 1
  Type: WARNING
  Impact: Programmatic

JPS-09058: Invalid string {0} for RFC822 name.
  Cause: RFC822Name cannot end with @.
  Action: Provide a valid value
  Level: 1
  Type: WARNING
  Impact: Programmatic

JPS-09059: Invalid string {0} for RFC822 domain.
  Cause: Invalid RFC822 domain name.
  Action: Provide a valid value
  Level: 1
  Type: WARNING
  Impact: Programmatic

JPS-09060: Invalid string {0} for yearMonthDuration.
  Cause: Invalid string format for yearMonthDuration
  Action: Provide a valid value
  Level: 1
  Type: WARNING
  Impact: Programmatic

JPS-09061: Invalid string {0} for OpssTime, must be a number.
Cause: Invalid string for time field, must be a number.
Action: Provide a valid value
Level: 1
Type: WARNING
Impact: Programmatic

JPS-09062: Invalid value \{0\}, must be between lower range \{1\} and upper range \{2\}.
Cause: Value provided for data type not in required range.
Action: Provide a valid value
Level: 1
Type: WARNING
Impact: Programmatic

JPS-09063: Invalid inputted Hex Binary value \{0\}.
Cause: Invalid value provided for OpssHexBinary data type.
Action: Provide a valid value
Level: 1
Type: WARNING
Impact: Programmatic

JPS-09400: Attribute key cannot be null.
Cause: Attribute key was null.
Action: Provide a valid attribute key.
Level: 1
Type: WARNING
Impact: Requests/Responses

JPS-09401: Name of attribute key cannot be null.
Cause: Name of attribute key was null.
Action: Provide a valid name of attribute key.
Level: 1
Type: WARNING
Impact: Requests/Responses

JPS-09402: Attribute service instance not found in the default context.
Cause: Attribute service instance not found in the default JpsContext.
Action: Configure an attribute service instance in the default JpsContext.
Level: 1
Type: WARNING
Impact: Configuration

JPS-10000: There was an internal error in the policy store.
Cause: The operation is not allowed for multivalued attribute.
Action: The operation is not allowed for multivalued attribute. Supply a valid operation.
Level: 1
Type: WARNING
Impact: Security
JPS-10001: Exception happened while decoding value: {0}.
  Cause: The encoding format is not correct.
  Action: Check encoding format of String value.
Level: 1
Type: WARNING
Impact: Security
JPS-10050: The application {0} cannot be found at runtime due to {1}.
  Cause: Corresponding runtime application does not exist.
  Action: Check if policy is properly distributed.
Level: 1
Type: ERROR
Impact: Security
JPS-10051: Policy object "{0}" already exists in application policy "{1}".
  Cause: Policy object with same name exists in this application policy.
  Action: Try a different name.
Level: 1
Type: ERROR
Impact: Security
JPS-10052: The list of runtime events is NULL.
  Cause: The list of runtime events is NULL
  Action: Please contact the security administrator.
Level: 1
Type: ERROR
Impact: Security
JPS-10053: The runtime events is NULL.
  Cause: The runtime event is NULL
  Action: Please contact the security administrator.
Level: 1
Type: ERROR
Impact: Security
JPS-10100: The policy domain "{0}" does not exist.
  Cause: The policy domain does not exist
  Action: Check the policy domain name.
Level: 1
Type: WARNING
Impact: Security

JPS-10102: The policy domain "(0)" already exists.
  Cause: The policy domain exists
  Action: Create a policy domain with a different name.

Level: 1
Type: WARNING
Impact: Security

JPS-10151: Application role (0) does not exist
  Cause: The application role does not exist.
  Action: Provide correct application role.

Level: 1
Type: WARNING
Impact: Security

JPS-10152: Application Role (0) is used.
  Cause: Application Role is used.
  Action: Remove the objects which use this application role.

Level: 1
Type: WARNING
Impact: Security

JPS-10153: Application role (0) does not belong to current application.
  Cause: Application role does not belong to current application policy.
  Action: Modify the application role with application role manager from correct application policy.

Level: 1
Type: WARNING
Impact: Security

JPS-10154: Class (0) is not supported.
  Cause: The principal class specified is not supported.
  Action: Provide correct principal class.

Level: 1
Type: WARNING
Impact: Security

JPS-10155: The application role attribute (0) is not supported for app role search.
  Cause: The application role attribute specified is not supported.
  Action: Provide supported attribute.

Level: 1
Type: WARNING
Impact: Security

JPS-10156: Error occurred while fetching the application role {0}.
Cause: The internal error occurred while fetching the application role.
Action: Refer to the log files for details and correct the error.
Level: 1

Type: WARNING
Impact: Security

JPS-10157: More than one results found for given Application role:{0}, Application
name {1}, query:{2} and Actual result: {3}.
Cause: More than one results found for application name.
Action: Refer to the log files for details and correct the error.
Level: 1

Type: WARNING
Impact: Security

JPS-10158: Invalid parameter.
Cause: Invalid parameter value.
Action: Please check the values are of required type.
Level: 1

Type: WARNING
Impact: Security

JPS-10159: Application Role {0} has an invalid unique name
Cause: Application role has an invalid unique name
Action: See the log files for more details.
Level: 1

Type: WARNING
Impact: Security

JPS-10160: The Application role {0} does not belong to application. The application
role dn {1} and unique name {2} are not matching.
Cause: The Application role does not belong to application context.
Action: See the log files for more details.
Level: 1

Type: WARNING
Impact: Security

JPS-10161: Internal error- More than one grantee entries found.
Cause: Internal error- More than one grantee entries found.
Action: See the log files for more details.
Level: 1
Type: WARNING
Impact: Security

JPS-10162: Grantee DN was missing
Cause: Grantee DN was missing
Action: See the log files for more details.

Level: 1

Type: WARNING
Impact: Security

JPS-10163: Internal error while revoking the permissions. Number of permissions to
revoke (or delete) [0] : though only [1] permission(s) would be revoked (or
deleted) if this operation were to proceed
Cause: Internal error while revoking the permissions.
Action: See the log files for more details.

Level: 1

Type: WARNING
Impact: Security

JPS-10164: Only one of permission list and permission entry list can be
null/non-null.
Cause: Only one of permission list and permission entry list can be null/non-null
Action: See the log files for more details.

Level: 1

Type: WARNING
Impact: Security

JPS-10165: MATCHER.ANY not allowed for this kind of search operation
Cause: MATCHER.ANY not allowed for this kind of search operation
Action: Search is not allowed for the MATCHER.ANY

Level: 1

Type: WARNING
Impact: Security

JPS-10166: Error occurred during performing the operation [0].
Cause: Error occurred during performing the operation.
Action: See the log files for more details.

Level: 1

Type: WARNING
Impact: Security

JPS-10167: Obligation does not exist for the policy domain [0].
Cause: Obligation does not exist for the policy domain [0].
Action: See the log files for more details.

Level: 1
Type: WARNING
Impact: Security

JPS-10168: Error occurred while preparing the principal in [0] method of [1] class : [2]. In standalone mode, weblogic specific jars should not be in classpath. Please check the classpath and try again.
Cause: Fail to resolve principal.
Action: Check classpath which may contain weblogic specific jars.
Level: 1
Type: ERROR
Impact: Security

JPS-10169: Default SystemAdminRole should be granted to at least one principal.
Cause: Revoking last member of default admin role SystemAdmin
Action: Keep at least one member of default admin role SystemAdmin
Level: 1
Type: WARNING
Impact: Security

JPS-10200: Administration role [0] already exists
Cause: Cannot have two administration roles with the same name.
Action: Provide a new name to the administration role.
Level: 1
Type: WARNING
Impact: Security

JPS-10201: Administration role [0] does not exist
Cause: Administration role is not found.
Action: Check the administration role name.
Level: 1
Type: WARNING
Impact: Security

JPS-10202: Administration role [0] is used
Cause: Administration role is used.
Action: Remove administration role members first.
Level: 1
Type: WARNING
Impact: Security

JPS-10203: Administration role [0] does not belong to current context
Cause: Administration role does not belong to current context.
Action: Use it in correct context.
Level: 1
Type: WARNING
Impact: Security

JPS-10204: Cannot create admin role with default name {0}
Cause: Cannot create admin role with reserved name.
Action: Use another name for admin role.
Level: 1

Type: WARNING
Impact: Security

JPS-10205: Cannot delete default admin role {0}
Cause: Cannot delete default admin role.
Action: Check the admin role name for deletion.
Level: 1

Type: WARNING
Impact: Security

JPS-10206: Cannot grant {0}, {1} to admin role because its super admin role has no such privilege
Cause: Cannot grant privileges to admin role whose super role has not.
Action: Check the admin resource action to grant.
Level: 1

Type: WARNING
Impact: Security

JPS-10207: Admin resource {0} is not for this scope {1}
Cause: This admin resource is not for this scope
Action: Check the admin resource to grant.
Level: 1

Type: WARNING
Impact: Security

JPS-10208: Cannot change rights of default admin role {0}
Cause: Cannot change rights of default admin role for a scope
Action: Check the admin role name.
Level: 1

Type: WARNING
Impact: Security

JPS-10209: The value for the SEARCHPROPERTY.PRINCIPAL does implement the java.security.Principal interface. It is of type "{0}".
Cause: The search by value is not an instance of java.security.Principal
Action: Supply an object of type java.security.Principal
Level: 1
Type: WARNING
Impact: Security
JPS-10210: The value for the SEARCH_PROPERTY.PRINCIPAL_NAME is not of type java.lang.String. It is of type "(0)".
Cause: The search by value is not an instance of java.lang.String
Action: Supply an object of type java.lang.String
Level: 1
Type: WARNING
Impact: Security
JPS-10211: Administration role cannot have more than one grantee for parameter Application:(0), policy Domain:(1), Query Parameter:(2), Actual results:(3).
Cause: The admin role cannot have more than one grantee entry.
Action: Check only one grantee entry available to admin role.
Level: 1
Type: WARNING
Impact: Security
JPS-10250: Resource type reference should not be null.
Cause: The parameter resource type reference is null.
Action: Use a valid object.
Level: 1
Type: WARNING
Impact: Security
JPS-10251: The resource type reference is invalid.
Cause: The current resource type reference is invalid.
Action: Use a valid resource type reference.
Level: 1
Type: WARNING
Impact: Security
JPS-10252: The resource type "(0)" already exists.
Cause: The resource type has existed.
Action: Make sure the resource type does not exist.
Level: 1
Type: WARNING
Impact: Security
JPS-10253: The super resource type {0} does not exist.
Cause: The resource type is referring an invalid super resource type.
Action: Make sure the super resource type exist.
Level: 1
Type: WARNING
Impact: Security

JPS-10254: The resource type \{0\} should not have its own matcher since it has super type.
Cause: The resource type has both its own matching algorithm and super type.
Action: Remove matching algorithm if the resource type should have super type. Otherwise, remove super type.

Level: 1
Type: WARNING
Impact: Security

JPS-10255: Resource type search context should not be null.
Cause: The resource type context could not be gotten.
Action: Make sure the application policy is available.

Level: 1
Type: WARNING
Impact: Security

JPS-10256: Could not get an available data manager.
Cause: The data manager is invalid.
Action: Make sure policy store and related configuration are correct.

Level: 1
Type: WARNING
Impact: Security

JPS-10257: The modification operator \{0\} is invalid.
Cause: The operator in ModificationItem is invalid.
Action: Make sure the operation is one of DirContext.ADD_ATTRIBUTE, DirContext.REPLACE_ATTRIBUTE and DirContext.REMOVE_ATTRIBUTE.

Level: 1
Type: WARNING
Impact: Security

JPS-10258: The property name \{0\} is unknown.
Cause: The attribute ID in ModificationItem is undefined.
Action: Make sure the attribute ID is a valid one.

Level: 1
Type: WARNING
Impact: Security

JPS-10259: The name of resource type could not be modified.
Cause: Resource type name could not be modified.
Action: Do not put resource type name in ModificationItem.

Level: 1
Type: WARNING
Impact: Security

JPS-10260: The super type of resource type could not be modified.
Cause: The super type of resource type could not be modified.
Action: Do not put super type in ModificationItem.
Level: 1

Type: WARNING
Impact: Security

JPS-10261: The matching algorithm of resource type could not be modified.
Cause: The matching algorithm of resource type could not be modified.
Action: Do not put matching algorithm in ModificationItem.
Level: 1

Type: WARNING
Impact: Security

JPS-10262: The action delimiter of resource type could not be modified.
Cause: The action delimiter of resource type could not be modified.
Action: Do not put action delimiter in ModificationItem.
Level: 1

Type: WARNING
Impact: Security

JPS-10263: The operation REPLACE_ATTRIBUTE could not be used to the allowed actions of resource type.
Cause: The operation REPLACE_ATTRIBUTE could not be used to the allowed actions of resource type.
Action: Use REMOVE_ATTRIBUTE and ADD_ATTRIBUTE in ModificationItem.
Level: 1

Type: WARNING
Impact: Security

JPS-10264: The property {0} of resource type is single, could not have more than one value.
Cause: The property could not have more than one value.
Action: First remove the existing value before adding new one.
Level: 1

Type: WARNING
Impact: Security

JPS-10265: Could not add or replace the property {0} since there is no value provided.
Cause: There is no value provided when trying to add or replace an property.
Action: Provide the new value.
Level: 1
Type: WARNING
Impact: Security

JPS-10266: The value data type of property {0} should be String.
Cause: The value data type of property is not String.
Action: Use a String object as value.

Level: 1
Type: WARNING
Impact: Security

JPS-10267: The resource type {0} does not exist.
Cause: The resource type does not exist.
Action: Make sure the resource type exist.

Level: 1
Type: WARNING
Impact: Security

JPS-10268: The resource type {0} is in use, could not be deleted.
Cause: The resource type could not be deleted without cascade since it is in use.
Action: Cascade delete it or first remove all referring objects.

Level: 1
Type: WARNING
Impact: Security

JPS-10269: The operation REPLACE_ATTRIBUTE could not be used to the resource type attribute
Cause: The operation REPLACE_ATTRIBUTE could not be used to the resource type attribute
Action: Use REMOVE_ATTRIBUTE and ADD_ATTRIBUTE in ModificationItem.

Level: 1
Type: WARNING
Impact: Security

JPS-10270: The resource type attribute {0} is used in policy(-ies) and can not be deleted.
Cause: The resource type attribute being deleted was used in one or more policies and could not be deleted.
Action: Before deleting the resource attribute, make sure it is not used.

Level: 1
Type: WARNING
Impact: Security

JPS-10271: The resource matcher class of resource type {0} could not be modified to {1}.
Cause: The resource type matcher class was changed while modifying.
Action: Keep matcher class unchanged.
Level: 1
Type: WARNING
Impact: Security

JPS-10272: Permission Class not found in the classpath: {0}
Cause: The permission class was not found in the class path.
Action: Make sure that the permission class is part of the class path for the program.
Level: 1
Type: WARNING
Impact: Security

JPS-10273: Permission class expected to be either oracle.security.jps.ResourcePermission or extending oracle.security.jps.AbstractTypedPermission but found {0} Resource Type: {1} is sharing permission class with Resource Type: {2}
Cause: The Permission class is not either ResourcePermission or Abstracted Permission
Action: The Permission class for the resource type must be a Resource permission
Level: 1
Type: WARNING
Impact: Security

JPS-10274: Permission should be associated with a Resource Type. Permission Name: {0}
Cause: The permission should have a resource type associated with it
Action: Make sure that the permission has a resource type associated with it
Level: 1
Type: WARNING
Impact: Security

JPS-10275: Resource Type Matcher Class and Permissions do not match. {0} and {1} do not match
Cause: Resource Type Matcher Class and Permissions do not match.
Action: Make sure that the Matcher Class and Permissions match.
Level: 1
Type: WARNING
Impact: Security

JPS-10276: Cannot determine the Resource Type from the permission {0}
Cause: Cannot determine the Resource Type from the permission.
Action: Make sure that there is a resource type associated with the permission class
Level: 1
Type: WARNING
Impact: Security

JPS-10277: Allowed attributes can not be modified.
Cause: Allowed attributes can not be modified.
Action: Make sure not modifying allowed attributes

Level: 1
Type: WARNING
Impact: Security

JPS-10278: Requested modification to the resource type {0} is not allowed.
Cause: Requested modification to the resource type is not allowed.
Action: Make sure not to make certain type of changes to the resource type when it is used by resources

Level: 1
Type: WARNING
Impact: Security

JPS-10279: The custom resource matcher class of resource type {0} could not be modified to {1}.
Cause: The custom resource matcher class was changed while modifying the resource type.
Action: Keep custom resource matcher class unchanged.

Level: 1
Type: WARNING
Impact: Security

JPS-10400: Resource reference should not be null.
Cause: The parameter resource reference is null.
Action: Use a valid object.

Level: 1
Type: WARNING
Impact: Security

JPS-10401: The resource reference is invalid.
Cause: The current resource reference is invalid.
Action: Use a valid resource reference.

Level: 1
Type: WARNING
Impact: Security

JPS-10402: The resource {0} does not exist.
Cause: The resource does not exist.
Action: Make sure the resource exist.
Level: 1
Type: WARNING
Impact: Security

JPS-10403: Could not get an available data manager.
Cause: The data manager is invalid.
Action: Make sure policy store and related configuration are correct.

Level: 1
Type: WARNING
Impact: Security

JPS-10404: The resource type {0} does not exist.
Cause: The resource type does not exist.
Action: Make sure the resource type exist.

Level: 1
Type: WARNING
Impact: Security

JPS-10405: The resource "{0}" with type "{1}" already exists in current application policy.
Cause: The resource to be created has existed.
Action: Make sure the resource does not exist.

Level: 1
Type: WARNING
Impact: Security

JPS-10406: The modification operator {0} is invalid.
Cause: The operator in ModificationItem is invalid.
Action: Make sure the operation is one of DirContext.ADD_ATTRIBUTE, DirContext.REPLACE_ATTRIBUTE and DirContext.REMOVE_ATTRIBUTE.

Level: 1
Type: WARNING
Impact: Security

JPS-10407: The property name {0} is unknown.
Cause: The attribute ID in ModificationItem is undefined.
Action: Make sure the attribute ID is a valid one.

Level: 1
Type: WARNING
Impact: Security

JPS-10408: The name and type of resource could not be modified.
Cause: The name and type of resource could not be modified.
Action: Do not put resource name and type in ModificationItem.
Level: 1
Type: WARNING
Impact: Security

JPS-10409: The property [0] of resource is single, could not have more than one value.
Cause: The property could not have more than one value.
Action: First remove the existing value before adding new one.

Level: 1
Type: WARNING
Impact: Security

JPS-10410: Could not add or replace the property [0] since there is no value provided.
Cause: There is no value provided when trying to add or replace an property.
Action: Provide the new value.

Level: 1
Type: WARNING
Impact: Security

JPS-10411: The resource [0] is in use, could not be deleted.
Cause: The resource could not be deleted without cascade since it is in use.
Action: Cascade delete it or first remove all referring objects.

Level: 1
Type: WARNING
Impact: Security

JPS-10412: The resource attribute [0] already exists in the current entry.
Cause: The resource attribute could not be added since it already exists.
Action: Remove duplicate resource attributes.

Level: 1
Type: WARNING
Impact: Security

JPS-10413: The resource action [0] already exists in the current entry.
Cause: The resource action could not be added since it already exists.
Action: Remove duplicate resource actions

Level: 1
Type: WARNING
Impact: Security

JPS-10414: The resource attribute [0] could not be deleted since it does not exist.
Cause: The resource attribute could not be deleted since it does not exist.
Action: Check if the resource attribute exists.
Level: 1
Type: WARNING
Impact: Security

**JPS-10415: The resource action {0} could not be deleted since it does not exist.**
Cause: The resource action could not be deleted since it does not exist.
Action: Check if the resource action exists

Level: 1
Type: WARNING
Impact: Security

**JPS-10416: Resource {0} does not belong to the context.**
Cause: The resource does not belong to current context
Action: Pass in correct resource.

Level: 1
Type: WARNING
Impact: Security

**JPS-10417: Resource query across different resource type is not allowed.**
Cause: Resource query across different resource type is not allowed
Action: Pass in correct query parameter.

Level: 1
Type: WARNING
Impact: Security

**JPS-10418: Cannot delete a resource that has one more child resources.**
Cause: Can not delete a resource that has one or more child resources
Action: Delete all child resources and then try again.

Level: 1
Type: WARNING
Impact: Security

**JPS-10419: Resource hierarchy type change is not allowed.**
Cause: Resource hierarchy type change is not allowed.
Action: Check the resource hierarchy type

Level: 1
Type: WARNING
Impact: Security

**JPS-10420: Resource name must begin with the resource name delimiter.**
Cause: Resource name must begin with the resource name delimiter
Action: Add resource name delimiter in the beginning of the resource name.

Level: 1
Type: WARNING
Impact: Security

JPS-10421: The given all action value already exists.
Cause: The given all action value already exists
Action: Check the input all action value and check for duplicate values.
Level: 1
Type: WARNING
Impact: Security

JPS-10422: The resource attribute \{0\} is used in policy(-ies) and can not be deleted.
Cause: The resource attribute is used in policy(-ies) and can not be deleted.
Action: Before deleting the resource attribute, make sure it is not used.
Level: 1
Type: WARNING
Impact: Security

JPS-10423: The action \{0\} is used by the \{1\} and can not be deleted.
Cause: The action is used by the permissionSet/permission and can not be deleted.
Action: Check if the action is used in any PermissionSet/Permission before deleting.
Level: 1
Type: WARNING
Impact: Security

JPS-10424: The resourceType \{0\} of hierarchy type is invalid as its parent is null.
Cause: The heirarical resourcetype's parent is null.
Action: Make sure to provide a valid name for the heirarical resourcetype
Level: 1
Type: ERROR
Impact: Security

JPS-10425: The resource attribute \{0\} already contains the value \{1\}.
Cause: The resource attribute already contains this value.
Action: Remove duplicate resource attributes values.
Level: 1
Type: WARNING
Impact: Security

JPS-10426: Cannot set all actions keyword for resource type with non-null matcher class.
Cause: All actions keyword cannot be set to resource type with matcher class
Action: Do not set all actions keyword for a resource type with a matcher class.
Level: 1
Type: WARNING
Impact: Security

JPS-10427: The resource name expression "\(0\)" is not a valid Java regular expression.
Cause: Regular expression provided for resource name expression is invalid.
Action: Check that the resource name expression is a valid Java regular expression.
Level: 1
Type: WARNING
Impact: Security

JPS-10428: The resource \(0\) of type \(1\) does not exist.
Cause: The resource of the resource type does not exist.
Action: Make sure the resource of the resource type exists.
Level: 1
Type: WARNING
Impact: Security

JPS-10429: The value data type of property \(0\) should be String and not \(1\).
Cause: The value data type of property is not String.
Action: Use a String object as value.
Level: 1
Type: WARNING
Impact: Security

JPS-10451: Permission set \(0\) does not belong to the context.
Cause: The permission set does not belong to current context
Action: Pass in correct permission set.
Level: 1
Type: WARNING
Impact: Security

JPS-10452: Permission set \(0\) has ResourceActionsEntry with null ResourceEntry and null ResourceNameExpression.
Cause: Both ResourceEntry and Resource name expression of ResourceActionsEntry is null
Level: 1
Type: WARNING
Impact: Security

JPS-10454: No resources or actions have been identified by the permission set.
Cause: No resources or actions have been identified by the permission set.
Action: Ensure that the permission set is created with valid resource actions.
Level: 1
Type: WARNING
Impact: Security

JPS-10455: Resource is not protected by a Java Permission.
  Cause: Resource is not protected by a Java Permission.
  Action: Ensure that the permission set is created with valid resource object.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10456: ResourceExpression and ResourceAction cannot be specified at the same time.
  Cause: ResourceExpression and ResourceAction cannot be specified at the same time.
  Action: PermissionSet ResourceAction should contain either Resource expression or ResourceEntry.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10457: Not able to perform operation due to invalid parameter. Cause: "{0}".
  Cause: Not able to perform operation due to invalid parameter. Cause: {0}.
  Action: Ensure that the operation is called with valid parameters.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10458: ResourceExpression and ResourceAction cannot be null at the same time.
  Cause: ResourceExpression and ResourceAction cannot be null at the same time.
  Action: PermissionSet ResourceAction should contain either Resource expression or ResourceEntry.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10459: The modified permission set {0} contains resources of multiple resource types. It is not permitted as there is policy(-ies) that references that permission set and uses resource attributes.
  Cause: The modified permission set contained resources of multiple resource types. It was not permitted if there was a policy that referenced that permission set and used resource attributes.
  Action: Fix the permission set or modify the policy(-ies).
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10460: The permission set search query {0} is not supported
Cause: The permission set search query is not supported.
Action: Use supported query scenario.
Level: 1
Type: WARNING
Impact: Security

JPS-10463: Requested actions: "{0}" are not a subset of valid actions: "{1}" for the given resource: "{2}" and type: "{3}".
Cause: Invalid resource actions for the given resource.
Action: Ensure that the actions in the resource-actions are a valid subset of the actions defined by the resource type.
Level: 1
Type: WARNING
Impact: Security

JPS-10464: Error occurred while getting the permission set entry for permission set search query {0}.
Cause: Error occurred while getting the permission set entry for permission set search query.
Action: See the log files for more details.
Level: 1
Type: WARNING
Impact: Security

JPS-10465: Permission set {0} has ResourceActionsEntry with null expression in ResourceNameExpression.
Cause: Expression in ResourceNameExpression of ResourceActionsEntry is null
Level: 1
Type: WARNING
Impact: Security

JPS-10466: Resource {0} has no action. To create policy both resource and action should be specified.
Cause: Empty resource actions for the given Resource, but Resource type has actions.
Action: Ensure that the actions in the resource-actions are not null or empty since the resource type has actions.
Level: 1
Type: WARNING
Impact: Security

JPS-10467: Permission set {0} has ResourceActionsEntry with null expression in ResourceNameExpression.
Cause: Expression in ResourceNameExpression of ResourceActionsEntry is null
Level: 1
Type: WARNING
Impact: Security

JPS-10468: Duplicate permission "{0}" in policy store.
Cause: Duplicate permission in policy store.
Action: Check the policy store and ensure that there is no duplicate permission.
Level: 1
Type: WARNING
Impact: Security

JPS-10470: The resource type name "{0}", does not match the resourceType in the encoded target name: "{1}". Permission class is "{2}"
Cause: Invalid resource type in permission target.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10471: Resource type is missing in the target name: "{0}", for permission: "{1}".
Cause: Resource type missing in permission target.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10472: Target "{0}" is missing the prefix "=resourceName=". Unable to determine the resource name for permission: "{1}".
Cause: Target name missing in permission target.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10473: The target name "{0}" is invalid. Should start with "{1}".
Cause: Target name encoding is not correct.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10474: The parameter: "{0}", value: "{1}" cannot be null
Cause: Permission target is null.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10475: The permission actions: "{0}" are not a subset of valid actions defined in resource type: "{1}"
Cause: Permission actions do not match with valid resource type actions.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10500: The target policy, {0}, does not exist.
Cause: The policy object does not exist.
Action: Check if the target policy exists.
Level: 1
Type: WARNING
Impact: Security

JPS-10501: Policy query contains unrecognizable information.
Cause: Policy query contains unrecognizable information.
Action: Check the policy query object.
Level: 1
Type: WARNING
Impact: Security

JPS-10502: Policy rule information is missing.
Cause: Policy rule information is missing.
Action: Check if policy rule information exists in policy repository.
Level: 1
Type: WARNING
Impact: Security

JPS-10503: Obligation information is missing.
Cause: Obligation information is missing.
Action: Check if obligation information exists in policy repository.
Level: 1
Type: WARNING
Impact: Security

JPS-10504: Permission set information is missing.
Cause: Permission set information is missing.
Action: Check if permission set information exists in policy repository.
Level: 1
Type: WARNING
Impact: Security

**JPS-10505: Grantee information is missing.**
*Cause:* Grantee information is missing.
*Action:* Check if grantee information exists in policy repository.

Level: 1
Type: WARNING
Impact: Security

**JPS-10506: The policy rule, {0}, does not exist.**
*Cause:* The policy rule does not exist.
*Action:* Check the policy rule name passed in.

Level: 1
Type: WARNING
Impact: Security

**JPS-10507: The condition string is in wrong format, {0}.**
*Cause:* Condition string is in wrong format.
*Action:* Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

**JPS-10508: Policy condition contains an unknown function, {0}.**
*Cause:* Policy condition contains an unknown function.
*Action:* Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

**JPS-10509: Policy condition parsing error.**
*Cause:* Policy condition parsing error.
*Action:* Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

**JPS-10510: The expression, {0}, is unknown.**
*Cause:* The policy expression is unknown.
*Action:* Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

**JPS-10511: The data type, {0}, is unknown.**
- **Cause:** The data type is unknown
- **Action:** Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

**JPS-10512: A ResourceActionsEntry should contain either resource entry or resource name expression.**
- **Cause:** The ResourceActionsEntry object does not contain resource information.
- **Action:** Check ResourceActionsEntry passed in.

Level: 1
Type: WARNING
Impact: Security

**JPS-10513: The search value type {0} is not supported for {1}.**
- **Cause:** Query criteria type does not support.
- **Action:** Pass in a correct query value.

Level: 1
Type: WARNING
Impact: Security

**JPS-10514: Cannot add PermissionSet to PolicyEntry if it has ResourceType.**
- **Cause:** Resource type is already defined in PolicyEntry.
- **Action:** Clear resource type of PolicyEntry before adding PermissionSetEntry.

Level: 1
Type: WARNING
Impact: Security

**JPS-10515: Cannot set ResourceType to PolicyEntry if it has PermissionSet.**
- **Cause:** Permission Set is already defined in PolicyEntry.
- **Action:** Clear Permission Set of PolicyEntry before setting Resource Type.

Level: 1
Type: WARNING
Impact: Security

**JPS-10516: Cannot add Rule if there is rule already in PolicyEntry**
- **Cause:** Add rule to policy when the policy already has rule.
- **Action:** Delete existing rule before adding new rule to policy.

Level: 1
Type: WARNING
Impact: Security
JPS-10517: Delete rule not existing in PolicyEntry
  Cause: rule does not belong to the PolicyEntry.
  Action: Check the rule before deleting rule from PolicyEntry.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10518: Delete permission set not existing in PolicyEntry
  Cause: permission set does not belong to the PolicyEntry.
  Action: Check the permission set before deleting permission set from PolicyEntry.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10519: Delete obligation not existing in PolicyEntry
  Cause: obligation does not belong to the PolicyEntry.
  Action: Check the obligation before deleting obligation from PolicyEntry.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10520: Delete Principal not existing in PolicyEntry
  Cause: principal does not belong to the PolicyEntry.
  Action: Check the principal before deleting principal from PolicyEntry.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10521: The obligation {0} already exists.
  Cause: The obligation already exists in the policy entry.
  Action: Check ObligationEntry passed in.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10522: The parameters passed in is invalid, we expect {0}, but {1} is passed in.
  Cause: The parameter passed in the function is not valid.
  Action: Pass in correct parameters.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10523: The function return type is invalid, we expect OpssBoolean, but {0} is passed in.
Cause: The return type of the function is not valid.
Action: Pass in a function with OpssBoolean return type.
Level: 1
Type: WARNING
Impact: Security

JPS-10524: The query with search property \{0\}, comparator type \{1\} and matcher \{2\} is not supported.
Cause: Such query is not supported.
Action: Pass in a supported query value.
Level: 1
Type: WARNING
Impact: Security

JPS-10525: The attribute assignment \{0\} could not be added since it already exists.
Cause: The attribute assignment could not be added since it already exists.
Action: Remove duplicate attribute assignments.
Level: 1
Type: WARNING
Impact: Security

JPS-10526: The permission set \{0\} could not be added since it already exists.
Cause: The permission set could not be added since it already exists.
Action: Remove duplicate permission sets.
Level: 1
Type: WARNING
Impact: Security

JPS-10527: The principal \{0\} could not be added since it already exists.
Cause: The principal could not be added since it already exists.
Action: Remove duplicate principals.
Level: 1
Type: WARNING
Impact: Security

JPS-10528: The Policy \{0\} referenced multiple resource types and resource attribute is used in policy condition or obligation.
Cause: Policies that used resource attributes in their conditions or obligations could not reference one or more permission sets that contain resources of multiple types.
Action: Split the policy to reference only one resource type in each policy.
Level: 1
Type: WARNING
Impact: Security
JPS-10529: The resource attribute [0] used in policy condition or obligation is invalid resource attribute of type [1].
Cause: The resource attribute used in policy condition was invalid for the referenced resource type
Action: Fix the policy condition to use only valid attributes for the given resource type.
Level: 1
Type: WARNING
Impact: Security

JPS-10530: Cannot create a policy [0] with AdminRole(s) [1].
Cause: Cannot create a policy with AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.
Level: 1
Type: WARNING
Impact: Security

JPS-10531: Cannot grant permission to AdminRole(s) [0].
Cause: Cannot grant permission to AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.
Level: 1
Type: WARNING
Impact: Security

JPS-10532: Cannot grant AdminRole [0] to another AdminRole [1].
Cause: Cannot grant AdminRole to another AdminRole.
Action: Change to grant AdminRole to either enterprise role or user.
Level: 1
Type: WARNING
Impact: Security

JPS-10533: Cannot revoke AdminRole [0] from another AdminRole [1].
Cause: Cannot revoke AdminRole from another AdminRole.
Action: Change to revoke AdminRole from either enterprise role or user.
Level: 1
Type: WARNING
Impact: Security

JPS-10534: Cannot grant AdminRole [0] to an AppRole [1].
Cause: Cannot grant AdminRole to an AppRole.
Action: Change to grant AdminRole to either enterprise role or user.
Level: 1
Type: WARNING
Impact: Security
JPS-10535: Cannot revoke AdminRole {0} from an AppRole {1}.
Caused by: Cannot revoke AdminRole from an AppRole.
Action: Change to revoke AdminRole from either enterprise role or user.
Level: 1
Type: WARNING
Impact: Security

JPS-10536: AdminRole {0} cannot be managed outside of the AdminManager.
Caused by: AdminRole cannot be managed outside of AdminManager.
Action: Use AdminManager for all AdminRole related administrative tasks.
Level: 1
Type: WARNING
Impact: Security

JPS-10537: Cannot modify grant permission to AdminRole(s) {0}.
Caused by: Cannot modify grant permission to AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.
Level: 1
Type: WARNING
Impact: Security

JPS-10538: Cannot revoke permission from AdminRole(s) {0}.
Caused by: Cannot revoke permission from AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.
Level: 1
Type: WARNING
Impact: Security

JPS-10539: Basic policy cannot have {0} information.
Caused by: Basic policy cannot have {0} information.
Action: Remove the information from basic policy.
Level: 1
Type: WARNING
Impact: Security

JPS-10540: Basic policy cannot have ResourceActionsEntry without ResourceEntry.
Caused by: Basic policy cannot have ResourceActionsEntry without ResourceEntry.
Action: Use ResourceActionsEntry with ResourceEntry for basic policy.
Level: 1
Type: WARNING
Impact: Security

JPS-10541: Basic policy cannot use Resource {0} without Resource Matcher Class.
Caused by: Basic policy cannot use Resource {0} without Resource Matcher Class.
Action: Use Resource with Resource Matcher Class for basic policy.

Level: 1
Type: WARNING
Impact: Security

JPS-10542: Default TransformerFactory cannot be located.
Cause: The TransformerFactory cannot be loaded
Action: Check the environment

Level: 1
Type: WARNING
Impact: Security

JPS-10543: Failed to retrieve Transformer.
Cause: The TransformerFactory cannot generate a Transformer.
Action: Check the environment

Level: 1
Type: WARNING
Impact: Security

JPS-10544: The policy "{0}" already exists.
Cause: The role policy object exists.
Action: Create a role policy with a different name.

Level: 1
Type: WARNING
Impact: Security

JPS-10545: The application role {0} could not be added since it already exists.
Cause: The application role could not be added since it already exists.
Action: Remove duplicate application role.

Level: 1
Type: WARNING
Impact: Security

JPS-10546: The resource {0}, {1} could not be added since it already exists.
Cause: The resource could not be added since it already exists.
Action: Remove duplicate resource.

Level: 1
Type: WARNING
Impact: Security

JPS-10547: The resource name expression {0}, {1} could not be added since it already exists.
Cause: The resource name expression could not be added since it already exists.
Action: Remove duplicate resource name expression.
Level: 1
Type: WARNING
Impact: Security

JPS-10548: The policy rule {0} already exists.
Cause: The policy rule already exists.
Action: Create policy rule with different name.

Level: 1
Type: WARNING
Impact: Security

JPS-10550: Attribute "{0}" already exists
Cause: Cannot have two attributes with the same name.
Action: Provide a new name to the attribute.

Level: 1
Type: WARNING
Impact: Security

JPS-10551: Attribute {0} does not exist
Cause: Attribute not found.
Action: Check the attribute name.

Level: 1
Type: WARNING
Impact: Security

JPS-10552: Attribute {0} is used.
Cause: Attribute is already used.
Action: Remove the objects which use this attribute.

Level: 1
Type: WARNING
Impact: Security

JPS-10553: Attribute {0} does not belong to current application.
Cause: Attribute does not belong to current application policy.
Action: Modify the attribute with extension manager from correct application policy.

Level: 1
Type: WARNING
Impact: Security

JPS-10554: The name of Attribute in policy repository is missing
Cause: Attribute in policy store has no name.
Action: Check the underline policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10555: The type of Attribute in policy repository is missing
Cause: Attribute in policy store has no type.
Action: Check the underline policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10556: The category of Attribute in policy repository is missing
Cause: Attribute in policy store has no category.
Action: Check the underline policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10557: Cannot overwrite a built-in attribute, {0}.
Cause: Try to overwrite a built-in attribute.
Action: Do not overwrite a built-in function.

Level: 1
Type: WARNING
Impact: Security

JPS-10558: Cannot modify a built-in attribute, {0}.
Cause: Try to modify a built-in attribute.
Action: Do not modify a built-in attribute.

Level: 1
Type: WARNING
Impact: Security

JPS-10559: Cannot delete a built-in attribute, {0}.
Cause: Try to delete a built-in attribute.
Action: Do not delete a built-in attribute.

Level: 1
Type: WARNING
Impact: Security

JPS-10581: Cannot overwrite a built-in function, {0}.
Cause: Try to overwrite a built-in function.
Action: Do not overwrite a built-in function.

Level: 1
Type: WARNING
Impact: Security
JPS-10582: The function does not exist, [0].
  Cause: The function does not exist.
  Action: Check the function name passed in.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10583: The function is in use, [0].
  Cause: The function is in use.
  Action: Cannot delete a function in use.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10584: The function is used in some policies, your changes on return type may lead to unpredictable issues.
  Cause: The function is in use.
  Action: Cannot change return type of a function in use.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10585: The function is used in some policies, your changes on parameter types may lead to unpredictable issues.
  Cause: The function is in use.
  Action: Cannot change parameter types of a function in use.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10586: Cannot modify a built-in function, [0].
  Cause: Try to modify a built-in function.
  Action: Do not modify a built-in function.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10587: Cannot delete a built-in function, [0].
  Cause: Try to delete a built-in function.
  Action: Do not delete a built-in function.

  Level: 1
  Type: WARNING
  Impact: Security
JPS-10588: The function "{0}" already exists.
   Cause: The function exists.
   Action: Create a function with a different name.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-10589: Cascade delete is not supported.
   Cause: Cascade delete not supported.
   Action: Set the cascade delete parameter to false.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-10590: Cannot find the function entry for function name {0}.
   Cause: Cannot find the function entry for function name.
   Action: Check function entry in policy repository.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-10591: Cannot find the expression type for expression {0}.
   Cause: Cannot find the expression type for the expression.
   Action: Check expression in policy repository.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-10592: Operation {1} is not allowed for multi valued attribute {0}.
   Cause: The category of Attribute is Invalid.
   Action: The category of Attribute is Invalid. Supply a valid Attribute category.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-10600: Failed to initialize PD instance.
   Cause: Failed to initialize PD instance.
   Action: Refer to the base exception in logs to resolve the issue.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-10601: Failed to initialize PolicyDistributionManager instance.
   Cause: Failed to initialize PolicyDistributionManager instance.
Action: Refer to the base exception in logs to resolve the issue.

Level: 1
Type: WARNING
Impact: Security

JPS-10602: PD has not been initialized.
Cause: PD has not been initialized.
Action: Check if OPSS policy store provider has been initialized successfully.

Level: 1
Type: WARNING
Impact: Security

JPS-10603: FAILURE: Retry [0] failed after [1] times retries due to following exception [2].
Cause: PD operation failed to retry.
Action: Check connectivity to backend repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10604: The operation is not allowed for non-controlled mode application [0].
Cause: Can not distribute policy for non-controlled policy distribution mode application
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10605: Failed to distribute policy for catch exception.
Cause: Distribute policy failed for catch exception
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10606: Failed to distribute policy to PDP [0] for catch exception [1].
Cause: Failed to distribute policy to pdp for catch exception
Action: Refer to the log files for details.

Level: 1

Impact: Security

Cause: Invalid cache key
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10608: Failed to copy files from active directory {0} to update directory {1}.
Cause: Failed to copy cache file from active directory to update directory
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10609: Failed to write state.chk file.
Cause: Failed to write state.chk file
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10610: Failed to update local cache since distributed payload for application {0} is empty.
Cause: Failed to update local cache since distributed payload is empty
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10611: Invalid distribution state {0} in step {1}.
Cause: Invalid distribution state
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10612: Local cache file verification failed, so redistribute all binding applications
Cause: Failed to verify local cache file, so need to redistribution all binding applications
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10613: Failed to parse PD port number, do not start PD registration web service.
Cause: Failed to parse PD port number, do not start PD registration web service.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10614: Failed to start PD registration web service for catch exception.
Cause: Failed to start PD registration web service for catch exception.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10615: Catch exception.
Cause: Catch interrupt exception in start registration service thread.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10616: Failed to find local host name, do not start PD registration web service.
Cause: Failed to find local host name, do not start PD registration web service.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10617: Failed to start PD push policy web service for catch exception.
Cause: Failed to start PD registration web service for catch exception.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10618: Invalid SSL configuration.
Cause: Invalid SSL configuration, please check log for details
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10619: Failed to initialize cipher {0} for local cache encryption/decryption.
Cause: Failed to initialize cipher for local cache encryption/decryption.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

**JPS-10620: Exception reported in registration thread.**
*Cause:* Catch interrupt exception in start registration service thread.
*Action:* Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

**JPS-10621: PD Lock not found**
*Cause:* PD Lock node not found.
*Action:* Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

**JPS-10622: Invalid PD Lock update time [0].**
*Cause:* Invalid PD Lock update time stamp.
*Action:* Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

**JPS-10623: PD is running in another Admin, please distribute policy after the process finished.**
*Cause:* PD is running in another Admin, please distribute policy after the process finished.
*Action:* Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

**JPS-10624: Failed to connect primary server, try secondary server.**
*Cause:* Failed to connect primary server, try secondary server.
*Action:* Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

**JPS-10625: Failed to read from the local cache. The cache will be removed. Reason: [0]**
*Cause:* Failed to read from the local cache. The cache will be removed.
*Action:* Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10626: Encryption/Decryption of the local cache file using the algorithm \{0\} is not supported.
Cause: The specified algorithm for local cache encryption/decryption is not supported.
Action: Please check PDP service configuration in jps-config.xml file.

Level: 1
Type: ERROR
Impact: Security

JPS-10627: The key length used to initialize cipher \{0\} is not valid. Expected key length is \{1\} bits, but raw key length is \{2\} bits.
Cause: The key length used to initialize cipher is not valid.
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10628: Retry \{0\} for the \{1\} times.
Cause: Retry \{0\} for the \{1\} times.
Action: No actions are required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10629: SUCCESS: Retry \{0\} successfully after \{1\} times retries.
Cause: SUCCESS: Retry \{0\} successfully after \{1\} times retries.
Action: No actions are required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10630: The default DB policy store is missing for mixed mode.
Cause: The default DB policy store is missing for mixed mode.
Action: Configure one DB policy store instance.

Level: 1
Type: ERROR
Impact: Security

JPS-10700: The value of attribute \{0\} should be unique
Cause: The unique attribute has duplicated values.
Action: Keep attribute value unique.
Level: 1  
Type: WARNING  
Impact: Security  

JPS-10701: Data Source lookup failure. It is safe to ignore the warning during WebSphere server starts up. If you still get the warning after WebSphere server starts up, check your configuration.  
Cause: Websphere data source lookup failure.  
Action: Safe to ignore during WebSphere starts up.

Level: 1  
Type: ERROR  
Impact: Security  

JPS-10702: The datasource \{0\} is not found.  
Cause: Given datasource jndi name is not found.  
Action: Check datasource jndi name.

Level: 1  
Type: ERROR  
Impact: Security  

JPS-10750: Application Policy unique name: "\{0\}" is invalid  
Cause: The application policy unique name is invalid  
Action: Refer to the log files for details.

Level: 1  
Type: ERROR  
Impact: Security  

JPS-10751: The version number of Application policy : "\{0\}" is invalid  
Cause: The application policy version number is invalid  
Action: Refer to the log files for details.

Level: 1  
Type: ERROR  
Impact: Security  

JPS-10752: The policy entry unique name: "\{0\}" is invalid  
Cause: The policy entry unique name is invalid  
Action: Refer to the log files for details.

Level: 1  
Type: ERROR  
Impact: Security  

JPS-10800: The role policy object "\{0\}" does not exist.  
Cause: The role policy object does not exist.  
Action: Check if the target role policy exists.
Level: 1
Type: WARNING
Impact: Security

JPS-10801: The role policy object "[0]" already exists.
Cause: The policy object exists.
Action: Create a policy with a different name.

Level: 1
Type: WARNING
Impact: Security

JPS-10802: Application role hierarchy cannot participate in a role mapping policy.
Cause: One or more principals in the role mapping policy are of type:
ApplicationRole or AnonymousRole or AuthenticatedRole or and AdminRole.
Action: Identify the principal type in the incoming principals, and ensure only a
user or group principal type is supplied.

Level: 1
Type: WARNING
Impact: Security

JPS-10803: At least one of the Resource(s)/Resource Name Expression(s) used in
Role Policy are permission based. This is not allowed.
Cause: At least one of the Resource(s)/Resource Name Expression(s) used in Role
Policy are permission based. This is not allowed.
Action: Ensure that resource(s)/resource name expression(s) are not permission
based.

**Type:** NOTIFICATION

**Impact:** Security

JPS-10921: function: urn:oasis:names:tc:xacml:1.0:function:date-equal The function returns true if the LHS (left-hand side) matches RHS (right-hand side); If LHS or RHS is a multiple value attribute and the other side is single value attribute, the function returns false; If both LHS and RHS are multiple value attribute, they have the same number of elements and for each element from the list on the left, there exists an element from the list on the right, the function returns true.

**Cause:** built-in attribute/function display name and description

**Action:** Prompt message, no action required

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Security

JPS-10922: function: urn:oasis:names:tc:xacml:1.0:function:time-equal The function returns true if the LHS (left-hand side) matches RHS (right-hand side); If LHS or RHS is a multiple value attribute and the other side is single value attribute, the function returns false; If both LHS and RHS are multiple value attribute, they have the same number of elements and for each element from the list on the left, there exists an element from the list on the right, the function returns true.

**Cause:** built-in attribute/function display name and description

**Action:** Prompt message, no action required

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Security

JPS-10923: function: urn:oasis:names:tc:xacml:1.0:function:string-is-in The function returns true if the LHS (left-hand side) matches one of the values in RHS (right-hand side); LHS should be single-valued. RHS can be single or multi-valued.

**Cause:** built-in attribute/function display name and description

**Action:** Prompt message, no action required

**Level:** 1

**Type:** NOTIFICATION
Impact: Security

JPS-10924: function: urn:oasis:names:tc:xacml:1.0:function:integer-is-in The function returns true if the LHS (left-hand side) matches one of the values in RHS (right-hand side); LHS should be single-valued. RHS can be single or multi-valued.

Cause: built-in attribute/function display name and description

Action: Prompt message, no action required

Level: 1

Type: NOTIFICATION

Impact: Security

JPS-10925: function: urn:oasis:names:tc:xacml:1.0:function:date-is-in The function returns true if the LHS (left-hand side) matches one of the values in RHS (right-hand side); LHS should be single-valued. RHS can be single or multi-valued.

Cause: built-in attribute/function display name and description

Action: Prompt message, no action required

Level: 1

Type: NOTIFICATION

Impact: Security

JPS-10926: function: urn:oasis:names:tc:xacml:1.0:function:time-is-in The function returns true if the LHS (left-hand side) matches one of the values in RHS (right-hand side); LHS should be single-valued. RHS can be single or multi-valued.

Cause: built-in attribute/function display name and description

Action: Prompt message, no action required

Level: 1

Type: NOTIFICATION

Impact: Security

JPS-10927: function: urn:oasis:names:tc:xacml:1.0:function:integer-greater-than The function returns true if the value of LHS is greater than RHS. Both LHS and RHS should be single value.

Cause: built-in attribute/function display name and description

Action: Prompt message, no action required

Level: 1

Type: NOTIFICATION

Impact: Security

JPS-10928: function: urn:oasis:names:tc:xacml:1.0:function:integer-greater-than-or-equal The function returns true if the value of LHS is greater than or equals to RHS. Both LHS and RHS should be single value.

Cause: built-in attribute/function display name and description

Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10929: function: urn:oasis:names:tc:xacml:1.0:function:integer-less-than
The function returns true if the value of LHS is less than RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10930: function: urn:oasis:names:tc:xacml:1.0:function:integer-less-than-or-equal
The function returns true if the value of LHS is less than or equals to RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10931: function: urn:oasis:names:tc:xacml:1.0:function:time-greater-than
The function returns true if the value of LHS is greater than RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10932: function: urn:oasis:names:tc:xacml:1.0:function:time-greater-than-or-equal
The function returns true if the value of LHS is greater than or equals to RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10933: function: urn:oasis:names:tc:xacml:1.0:function:time-less-than
The function returns true if the value of LHS is less than RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security
JPS-10934: function: urn:oasis:names:tc:xacml:1.0:function:time-less-than-or-equal
The function returns true if the value of LHS is less than or equals to RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security
JPS-10935: function: urn:oasis:names:tc:xacml:1.0:function:date-greater-than
The function returns true if the value of LHS is greater than RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security
JPS-10936: function: urn:oasis:names:tc:xacml:1.0:function:date-greater-than-or-equal
The function returns true if the value of LHS is greater than or equals to RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security
JPS-10937: function: urn:oasis:names:tc:xacml:1.0:function:date-less-than
The function returns true if the value of LHS is less than RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security
JPS-10938: function: urn:oasis:names:tc:xacml:1.0:function:date-less-than-or-equal
The function returns true if the value of LHS is less than or equals to RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security
JPS-10939: function: urn:oasis:names:tc:xacml:1.0:function:string-regexp-match The LHS should be a single-value string type attribute/value. The RHS should be a single value string which complies with Java Regular Expression. Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security
JPS-10940: function: urn:oasis:names:tc:xacml:1.0:function:or The function stands for an OR operation between two single-value boolean expressions/values. Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security
JPS-10941: function: urn:oasis:names:tc:xacml:1.0:function:and The function stands for an AND operation between two single-value boolean expressions/values. Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security
JPS-10943: function: valid_for_mseconds The function accepts a single integer value. Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security
JPS-10944: function: valid_for_seconds The function accepts a single integer value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10945: function: valid_for_minutes The function accepts a single integer value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10946: function: valid_for_hours The function accepts a single integer value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10947: function: valid_until_time The function accepts a single time value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10948: function: valid_until_date The function accepts a single date value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10949: function: sys_defined The function accepts a single string value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10950: current_gmt_time
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
JPS-10951: current_gmt_date
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

JPS-10952: sys_subjectgroups
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

JPS-10953: sys_user
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

JPS-10954: sys_app
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

JPS-10955: sys_obj_type
Cause: built-in attribute/function display name and description

Type: WARNING
Impact: Security

JPS-90630: Application Policy with the configuration id {0} not found.
Cause: Application with the id {0} not found.
Action: Make sure the Application Policy is valid.

Level: 1
Type: WARNING
Impact: Security

JPS-90631: SM Binding with the configuration id {0} and application name {1} successfully retrieved.
Cause: SM Binding with the configuration id {0} and application name {1} successfully retrieved.
Action: Audit message, no action required

Level: 1
Type: TRACE
Impact: Security

JPS-90632: SM with the configuration id {0} to application bindings retrieved.
Cause: SM with the configuration id {0} to application bindings retrieved.
Action: Audit message, no action required

Level: 1
Type: TRACE
Impact: Security

JPS-90633: SM with the configuration id {0} and application name {1} successfully unbound.
Cause: SM with the configuration id {0} and application name {1} successfully unbound.
Action: Audit message, no action required

Level: 1
Type: TRACE
Impact: Security

JPS-90634: PIP Binding with the configuration id {0} and application name {1} successfully retrieved.
Cause: PIP Binding with the configuration id {0} and application name {1} successfully retrieved.
Action: Audit message, no action required

Level: 1
Type: TRACE
Impact: Security

JPS-90635: PIP with the configuration id {0} to application bindings retrieved.
Cause: PIP with the configuration id {0} to application bindings retrieved.
Action: Audit message, no action required
Level: 1
Type: TRACE
Impact: Security

JPS-90636: PIP with the configuration id {0} and application name {1} successfully unbound.
Cause: PIP with the configuration id {0} and application name {1} successfully unbound.
Action: Audit message, no action required
Level: 1
Type: TRACE
Impact: Security

JPS-90637: Failed to create SM binding with the configuration id {0}, with error {1}
Cause: Failed to create SM binding with the configuration id {0}, with error {1}
Action: Check error message for further details.
Level: 1
Type: WARNING
Impact: Security

JPS-90638: Failed to create PIP binding with the configuration id {0}, with error {1}
Cause: Failed to create PIP binding with the configuration id {0}, with error {1}
Action: Check error message for further details.
Level: 1
Type: WARNING
Impact: Security

JPS-90639: Application {0} already bound to configuration {1}
Cause: Application {0} already bound to configuration {1}
Action: No need to bind again
Level: 1
Type: WARNING
Impact: Security

JPS-90640: Failed to unbind SM configuration
Cause: Failed to unbind SM with the configuration id {0}, with error {1}
Action: Check error message for further details.
Level: 1
Type: WARNING
Impact: Security

JPS-90641: Failed to unbind PIP Configuration
  Cause: Failed to unbind PIP with the configuration id {0}, with error {1}
  Action: Check error message for further details.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-90642: The non-controlled policy distribution mode application {0} can not be bound to SM configuration
  Cause: The non-controlled policy distribution mode application can not be bound to SM configuration
  Action: Bind controlled policy distribution mode application

  Level: 1
  Type: ERROR
  Impact: Security
JRF-10001: Fail to retrieve the application identifier. The internal exception is: {0}.
  
  Cause: The MBean server could not be accessed to retrieve the application name.
  
  Action: Verify that the MBean server is running and accessible.

  Level: 1
  
  Type: ERROR
  
  Impact: Configuration

JRF-10002: Fail to retrieve the WebLogic domain admin server name. The internal exception is: {0}.
  
  Cause: The MBean server could not be accessed to retrieve the admin server name.
  
  Action: Verify that the MBean server is running and accessible.

  Level: 1
  
  Type: ERROR
  
  Impact: Configuration

JRF-10003: Fail to retrieve the current server name. The internal exception is: {0}.
  
  Cause: The MBean server could not be accessed to retrieve the server name based on the current thread.
  
  Action: Verify that the MBean server is running and accessible.

  Level: 1
  
  Type: ERROR
  
  Impact: Configuration

JRF-10004: Fail to check if the current server is admin server. The internal exception is: {0}.
  
  Cause: The MBean server could not be accessed to verify that the server in the current thread is the admin server.
  
  Action: Verify that the MBean server is running and accessible.

  Level: 1
  
  Type: ERROR
  
  Impact: Configuration

JRF-10005: Fail to retrieve the server log path. The internal exception is: {0}.
Cause: The MBean server could not be accessed to retrieve the server log path.
Action: Verify that the MBean server is running and accessible.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10006: Fail to copy the config file from \{0\} to the server directory \{1\}. The internal exception is: \{2\}.
Cause: The server config directory could not be accessed.
Action: Use the applyJRF() wlst command to ensure that the server has been properly configured.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10007: Fail to retrieve the system property domain.home.
Cause: The system property domain.home was not specified during WebLogic server startup.
Action: Specify the system property domain.home when starting the WebLogic server.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10008: I/O exception occurs when accessing to the JRF template at \{0\}.
Cause: The specified JRF template was not accessible.
Action: Verify that the template jar from the template location is present and accessible.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10009: I/O exception occurs when parsing config/config.xml from the JRF template at \{0\}.
Cause: The config.xml might be missing from the JRF template or the JRF template jar might be corrupted.
Action: Verify that the JRF template is properly installed within the Oracle Home.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10010: The file config.xml under domain \{0\} does not exist.
Cause: The config.xml under domain config was missing or corrupted.
Action: Verify that the domain contains a valid config.xml file.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10011: Fail to parse the config.xml file from JRF template.
Cause: The domain config.xml might be missing or the JRF template jar might be corrupted.
Action: Verify that the JRF template is properly installed within the Oracle Home and that the domain contains a valid config.xml file.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10012: Fail to retrieve the property for the Common Components Home.
Cause: The Common Components Home property was not set.
Action: Set the Oracle Home property using the system property common.components.home or the environment variable COMMON_COMPONENTS_HOME.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10013: The specified Oracle Home directory {0} does not exist.
Cause: The Common Components Home directory did not exist.
Action: Verify that Common ComponentsHome, specified through the system property common.components.home or environment variable COMMON_COMPONENTS_HOME, is a valid directory.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10014: Fail to retrieve the current server name. The internal exception is: {0}.
Cause: The MBean server could not be accessed to retrieve the application server platform information.
Action: Verify that the MBean server is running and accessible.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10015: The specified application server platform {0} is not supported by JRF.
Cause: JRF does not support the specified platform.
Action: Contact Oracle Support Services for the JRF supported application server platforms.

Level: 1
Type: ERROR
Impact: Configuration
JRF-10016: The initialization of the server config directory from the Oracle Home {0} with domain directory {1} for copying fails. The internal exception is: {2}.
Cause: Could not retrieve the servers from the domain config.xml file.
Action: Verify that the domain contains a valid config.xml file.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10017: Unable to invoke {0} because the domain {1} has not been extended with JRF template.
Cause: Domain has not been extended with JRF template.
Action: Apply JRF template to the domain.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10018: Server or cluster "{0}" is not found.
Cause: The server or cluster is not found.
Action: Create the server or cluster.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10019: Could not obtain edit lock on the domain
Cause: Domain is being edited by someone else
Action: Wait until the edit lock on the domain is released and retry.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10020: Could not load/instantiate a WebLogic server platform support instance.
Cause: Could not load/instantiate a WebLogic server platform support instance.
Action: Check if the server platform support class can be loaded/instantiated by the classloader.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10021: Could not load/instantiate a WebSphere server platform support instance.
Cause: Could not load/instantiate a WebSphere server platform support instance.
Action: Check if the server platform support class can be loaded/instantiated by the classloader.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10022: Could not load system property 'oracle.domain.config.dir'.
Cause: Could not load system property 'oracle.domain.config.dir'.
Action: Verify JRF is installed and provisioned properly and the system property 'oracle.domain.config.dir' is set.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10023: Could not load system property 'oracle.server.config.dir'.
Cause: Could not load system property 'oracle.server.config.dir'.
Action: Verify JRF is installed and provisioned properly and the system property 'oracle.server.config.dir' is set.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10024: JRF is unable to determine the current application server platform.
Cause: JRF is unable to determine the current platform.
Action: Contact Oracle Support Services for the JRF supported application server platforms.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10025: Could not load/instantiate a JBoss server platform support instance.
Cause: Could not load/instantiate a JBoss server platform support instance.
Action: Check if the server platform support class can be loaded/instantiated by the classloader.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10026: Failed to get application server edition
Cause: JRF Failed to retrieve application server edition
Action: Verify that the application server is installed and accessible.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10027: Operation is not supported on this application server edition
Cause: Operation is not supported on this platform edition.
Action: Verify it is the right application server edition.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10028: Invoke startup and shutdown class {0}
Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Configuration

JRF-10029: String {0} is in invalid format. Example of correct string format is {1}
Cause: String format is invalid.
Action: Correct the string format, see example of a correct string format in the exception message

Level: 1
Type: ERROR
Impact: Configuration

JRF-20001: Read domain {0} to applyJRF
Cause:
Action:

Impact: Configuration

JRF-20006: Copying JRF configuration files from {0} to {1}
Cause:
Action:
Level: 1

Type: NOTIFICATION
Impact: Configuration

JRF-20007: Unable to add help for JRF commands: "{0}"
Cause:
Action:
Level: 1

Type: WARNING
Impact: Configuration

JRF-20008: No domain has been read
Cause: JRF detects that domain has not been read.
Action: Read the domain offline or connect online before invoke JRF WLST command.

Level: 1

Type: ERROR
Impact: Configuration

JRF-20009: JRF component or service with type "{0}" and name "{1}" is not found.
Cause: The WLST applyJRF command is out-of-sync with the template that is used to extend the domain, or domain has not been installed with JRF.
Action: Use the wlst.sh/cmd from the same Oracle Home that contains the JRF template, which was used to extend the domain; or extend the domain with JRF template if JRF is not installed

Level: 1

Type: ERROR
Impact: Configuration

JRF-20010: {0} is not found.
Cause: file not found
Action: Verify oraclehomeproperties.xml exist
Level: 1
Type: ERROR
Impact: Configuration
**JRF-20011: Node GUID does not exist or node is empty in {0}.
Cause: node not found or no value
Action: Verify oraclehomeproperties.xml exist**

Impact: Configuration
**JRF-20015: Failed to create custom service : {0}.
Cause: Creating custom service failed
Action: Verify server connection**

Level: 1
Type: ERROR
Impact: Configuration
**JRF-20016: JRF_FAILED_CREATE_URLPROVIDER : {0}.
Cause: Creating URL Provider failed
Action: Verify server connection**

Level: 1
Type: ERROR
Impact: Configuration

JRF-20017: Failed to configure JVM arguments for: {0}.
Cause: Config JVM memory arguments failed
Action: Verify server connection

Level: 1
Type: ERROR
Impact: Configuration

JRF-20018: Failed to add JVM system property for: {0}.
Cause: Adding system property failed
Action: Verify server connection

Level: 1
Type: ERROR
Impact: Configuration

JRF-20019: Failed to parse template: {0}.
Cause: Template has error
Action: Verify template

Level: 1
Type: ERROR
Impact: Configuration

JRF-20020: Failed to get variable {0} from {1}.
Cause: Get variable failed
Action: Verify variable.xml

Level: 1
Type: ERROR
Impact: Configuration

JRF-20021: Failed to update targets of application {0}.
Cause: Failed to update application target
Action: Verify application

Level: 1
Type: ERROR
Impact: Configuration

JRF-20022: Failed to update {0}.
Cause: Failed to update oracle jdbc driver path
Action: Verify server

Level: 1
Type: ERROR
Impact: Configuration

JRF-20023: Failed to install application {0}.
Cause: Failed to install application
Action: Verify application

Level: 1
Type: ERROR
Impact: Configuration

JRF-20024: Failed to create variable \{0\} for \{1\}.
Cause: Failed to create variable
Action: Verify server

Level: 1
Type: ERROR
Impact: Configuration

JRF-20025: Need to apply jrf template to cell.
Cause: Cell is not jrf enabled
Action: Apply jrf template to the cell since this cell is not jrf enabled

Level: 1
Type: ERROR
Impact: Configuration

JRF-20026: Could not load/instantiate \{0\} JRFService instance.
Cause: Could not load/instantiate a JRFService implementation class instance.
Action: Check if JRFService implementation class in the error message can be loaded/instantiated by the classloader.

Level: 1
Type: ERROR
Impact: Configuration

JRF-20028: JRFService not supported
Cause: JRFService is not supported.
Action: Check if the server has related JRFService available.

Level: 1
Type: ERROR
Impact: Configuration

JRF-20029: MapModulesToServers is disabled, cannot modify target of application \{0\}.
Cause: MapModulesToServers is disabled, cannot modify target of application.
Action: Enable MapModulesToServers task for this application

Level: 1
Type: ERROR
Impact: Configuration

JRF-20030: Enable StartupBeansService failed on server \{0\}.
**Cause:** Enable StartupBeansService failed

**Action:** Verify server connection

**Level:** 1

**Type:** ERROR

**Impact:** Configuration
MAPVIEWER-00001: No 'xml_request' parameter found in the request.
   **Cause:** The incoming HTTP request did not contain the mandatory parameter named 'xml_request'.
   **Action:** Ensure the HTTP request for MapViewer contains the required parameter.
   **Level:** 1
   **Type:** ERROR
   **Impact:** Process

MAPVIEWER-00002: Could not get a free MapMaker. Server is busy?
   **Cause:** MapViewer could not obtain the necessary resource to process an incoming request.
   **Action:** Try increasing the value of the "number_of_mappers" attribute in the definition of the involved data source.
   **Level:** 1
   **Type:** ERROR
   **Impact:** Process

MAPVIEWER-00003: SQL error occurred while generating map.
   **Cause:** MapViewer encountered an error while executing a SQL query.
   **Action:** Check the MapViewer server logs for details about the SQL exception and take appropriate actions.
   **Level:** 1
   **Type:** ERROR
   **Impact:** Process

MAPVIEWER-00004: Unable to add a predefined theme.
   **Cause:** MapViewer could not add or load a predefined theme while processing the current map request.
   **Action:** Ensure the predefined theme exists in the database or is accessible via the given data source.
   **Level:** 1
   **Type:** ERROR
   **Impact:** Process
MAPVIEWER-00005: Error while compressing raw image data.
   **Cause:** MapViewer could not successfully compress a generated map image into the requested file format.
   **Action:** Check the MapViewer server logs for the actual stack trace and take appropriate actions.

   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-00006: Location for saving map image files not specified.
   **Cause:** MapViewer could not obtain the path information for saving generated map files.
   **Action:** Check the MapViewer configuration file and make sure a path for saving image files is specified or the default path is a valid one.

   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-00007: No map image generated.
   **Cause:** MapViewer did not generate a map image.
   **Action:** Check the MapViewer server logs for details/exceptions and take appropriate actions.

   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-00008: Unable to add local theme(s).
   **Cause:** MapViewer could not create a new local theme for the current map request.
   **Action:** Check the MapViewer server logs for details/exceptions and take appropriate actions. Make sure the individual Geo-Features are in proper format.

   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-00009: Unable to add JDBC theme(s).
   **Cause:** MapViewer could not create a new JDBC (dynamic) theme for the current map request.
   **Action:** Check the MapViewer server logs for details/exceptions and take appropriate actions. Make sure the data source information is correct, and characters in the user-supplied SQL query are properly escaped for XML.

   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-00010: Error loading MapViewer configuration file.
MAPVIEWER-00011: Error creating a map data source.

Cause: MapViewer could not create a new data source.

Action: Make sure correct database connection information is supplied, including host name, database instance name/sid, listener port, and login user/password. Also make sure the host name or IP address is reachable by the host running the MapViewer server.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00012: Error obfuscating data source password in the config file.

Cause: MapViewer could not obfuscate the login password for a data source defined in its configuration file.

Action: Make sure the password is prefixed with an exclamation point (!).

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00013: Clear-text passwords in the config file must be prefixed with a '!' (exclamation mark).

Cause: Clear text password in the MapViewer configuration file was not prefixed with '!'.

Action: Make sure the database login password for any data source defined in the configuration file is prefixed with an exclamation point (!).

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00014: Error adding a MARKER style from an image URL.

Cause: MapViewer could not create a dynamic MARKER style that is based on a URL.

Action: Make sure the URL of the image is reachable from the host running the MapViewer server. If MapViewer is running behind a firewall, you may need to set up HTTP proxy information in MapViewer's configuration file, or via JVM run-time properties.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00015: Cannot fetch image from given URL
Cause: MapViewer could not fetch and load an image from a given URL.

Action: Make sure the URL of the image is reachable from the host running the MapViewer server. If MapViewer is running behind a firewall, you may need to set up HTTP proxy information in MapViewer's configuration file, or via JVM run-time properties.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00016: Error while attempting to clear a mapping metadata cache.

Cause: MapViewer could not clear the cached mapping metadata (style/theme/basemap definitions) for a given data source from memory.

Action: Make sure a correct data source name is specified. Also check MapViewer server logs for possible exceptions and stack traces.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00017: MapViewer is not ready. Please try again later.

Cause: MapViewer was still starting core services such as the mapping servlet. If this error still occurs 30 seconds after starting MapViewer, it may be stuck trying to connect to one or more database instances.

Action: Check and monitor MapViewer server logs to see which server has not been started yet. Check data source definitions in the configuration file and make sure all the database instances involved are up and running.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00018: Error parsing XML map request.

Cause: MapViewer encountered an error while parsing an XML map request.

Action: Make sure a well formed and valid XML map request is sent to the MapViewer server.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00019: Specified data source does not exist.

Cause: A specified data source did not exist or was not known by this MapViewer server.

Action: Make sure a correct data source name is supplied.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00020: Invalid general-purpose or admin XML request.
Cause: The incoming admin or non-map request was invalid or not supported.
Action: Make sure only valid and supported requests are sent to the MapViewer
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00021: No data source specified in the XML request.
Cause: The incoming request did not specify any data source name, and the MapViewer server has no default data source.
Action: Make sure a valid data source is specified as part of the request.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00101: XML map request: invalid 'geoFeature' element found.
Cause: The incoming map request contained an invalid 'geoFeature' element.
Action: Make sure all the 'geoFeature' elements have valid syntax.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00102: XML map request: invalid 'box' element found.
Cause: The incoming map request contained an invalid 'box' element.
Action: Make sure the 'box' element has valid syntax.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00103: XML map request: 'geoFeature' element must have a geometry defined.
Cause: The incoming map request contained one or more 'geoFeature' elements that do not contain any geometry data.
Action: Make sure all 'geoFeature' elements contain a geometry.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00104: XML map request: invalid geometry definition found.
Cause: A 'geoFeature' element with invalid geometry data was found in the XML map request.
Action: Make sure all 'geoFeature' elements contain a valid geometry.
Level: 1
Type: ERROR
Impact: Process
MAPVIEWER-00105: XML map request: 'geoFeature' does not support postal address.
Cause: A 'geoFeature' element with postal/street address was found in the XML map request.
Action: Currently 'geoFeature' elements could not use street address string to specify the location.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00106: XML map request: invalid JDBC theme definition.
Cause: The incoming map request contained an invalid JDBC theme.
Action: Make sure all JDBC themes have proper syntax.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00107: XML map request: 'center' element does not contain a 'geoFeature' sub-element.
Cause: The 'center' element of the incoming map request did not contain a 'geoFeature' sub-element.
Action: Ensure that the 'center' element has a 'geoFeature' sub-element that specifies a point geometry for the map center.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00108: XML map request: 'center' element must define either a 'size' or 'scale' attribute.
Cause: The 'center' element of the incoming map request did not contain any size or map-scale information.
Action: Ensure that the 'center' element has either a 'size' or 'scale' attribute that defines the map data window.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00109: XML map request: invalid map size or scale value.
Cause: The 'center' element of the incoming map request contained an invalid size or scale value.
Action: Make sure a proper value is specified for the 'size' or 'scale' attribute of the 'center' element in the XML map request.
Level: 1
Type: ERROR
Impact: Process
MAPVIEWER-00110: XML map request: invalid map height/width.

**Cause:** The incoming map request specified an invalid image width or height value.

**Action:** Make sure a proper value (positive integer) is specified for both the width and height attributes of the root 'map_request' element.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-00111: XML map request: invalid theme (min/max) scale range.

**Cause:** Some theme(s) in the incoming map request contained an invalid min/max scale range specification.

**Action:** Make sure proper value scale ranges are set for all themes in the map request.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-00112: XML map request: invalid WMS theme specified.

**Cause:** The incoming map request contained an invalid WMS theme.

**Action:** Make sure all WMS themes are properly defined in the XML map request.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-00113: Permission denied for this operation.

**Cause:** The requested operation was not permitted by the MapViewer server.

**Action:** Make sure your operation is permitted by MapViewer. For example, the server may disallow JDBC themes in the map request, or disable direct INFO requests. You will need either to avoid performing these operations or to modify MapViewer configuration to allow these operations.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-00114: Invalid type for dynamic binding parameter.

**Cause:** The incoming map request supplied invalid value(s) for a theme's binding variable.

**Action:** Make sure values for your theme's binding parameters are all of correct type.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-00115: list_predefined_themes: No base map found for map tile layer.
Cause: The 'list_predefined_themes' request specified a map tile layer that is based on a nonexistent base map.
Action: Make sure the base map for the specified map tile layer exists in the database view.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00116: list_predefined_themes: Map tile layer not found.
Cause: The 'list_predefined_themes' request specified a map tile layer that is not found.
Action: Make sure the specified map tile layer exists in the database view.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01000: No themes to render.
Cause: The Map request had no base map or themes defined.
Action: Add a base map that contains a list of themes or define individual themes on your request.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01001: Cannot load base map.
Cause: A database error may have happened while reading the base map definition from the USER_SDO_MAPS view, or the requested base map was not defined.
Action: Make sure the base map exists in the database; also check the MapViewer log for database errors and additional details.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01002: Cannot load theme.
Cause: A database error may have happened while reading the theme definition from the USER_SDO_THEMES view, or the requested theme was not defined.
Action: Make sure the theme exists in the database; also check the MapViewer log for database errors and additional details.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01003: Cannot load style.
Cause: A database error may have happened while reading the style definition from the USER_SDO_STYLES view. Or the requested style was not defined.
**Action:** Make sure the style exists in the database; also check the MapViewer log for database errors and additional details.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

MAPVIEWER-01004: Bounding Themes returned null MBR. Themes were not rendered.

**Cause:** Bounding themes may have been used to define the query window for the map request, but it produced no spatial feature. The map request was aborted due to this condition.

**Action:** Change the bounding theme or themes definition, so the definition defines a select statement that returns one or more features. In Map Builder, this message can happen when previewing base maps with full extent (no center and size defined). Map Builder uses the first theme of the base map as the bounding theme when a full extent is applied. If this first theme returns no features for a full extent request, then you should remove it from the base map list of themes.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

MAPVIEWER-01005: No spatial data to render.

**Cause:** A full extent request (no center and size defined) returned no features.

**Action:** Change the theme or themes definition to select one or more features.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

MAPVIEWER-01006: Invalid style type for Point features.

**Cause:** The style type used could not be applied to render point features.

**Action:** Do not use AREA or LINE styles to render point features.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

MAPVIEWER-01007: Feature has no geometric representation.

**Cause:** The feature geometry was null.

**Action:** Check the feature geometry column in the database table.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

MAPVIEWER-01008: Cannot parse xml style string: missing closing ".

**Cause:** The XML string was not correct and could not be parsed.

**Action:** Check for the missing closing character "."
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01009: Invalid style class specified in xml style string.
Cause: Attribute class on the xml definition was undefined.
Action: Assign a valid value to attribute class (COLOR,LINE,TEXT,MARKER,AREA).

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01010: Style cannot be created from a xml string that does not define the style class.
Cause: Unknown style class type defined.
Action: Change the attribute class value to a known type (COLOR,LINE,TEXT,MARKER,AREA).

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01011: Cannot find a custom image renderer for format:
Cause: Image theme format was not supported and there was no custom image renderer defined for this format.
Action: Use a known image format (GIF,JPEG,PNG,TIFF) or implement a custom image renderer for this format.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01012: Cannot create image to render from byte array.
Cause: Image array of bytes may be null or corrupted.
Action: Check the image data source. If it comes from a database column, verify that the column content is not null. If the image content appears to be correct, then report the error to Oracle.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01013: Invalid base map definition.
Cause: The XML string for base map definition could not be parsed.
Action: Fix the XML string that defines the base map.

Level: 1
Type: ERROR
Impact: Process
MAPVIEWER-01014: Invalid styling rules definition.
  Cause: The XML string for theme styling rules could not be parsed.
  Action: Fix the XML string that defines the theme styling rules.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01015: Unable to retrieve theme definition.
  Cause: The theme did not exist in USER_SDO_THEMES view.
  Action: Add a theme definition to user themes view.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01016: Theme with undefined styling rules.
  Cause: The styling rules section of theme XML definition was null.
  Action: Ensure that a theme styling rules section is defined in the theme definition.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01017: Undefined image column attribute in image theme definition.
  Cause: The image theme definition did not contain the image column attribute.
  Action: Define attribute 'image_column' in the image theme definition.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01018: Undefined image format attribute in image theme definition.
  Cause: The image theme definition did not contain the image format attribute.
  Action: Define attribute 'image_format' in the image theme definition.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01019: One or more attributes missing in image theme definition.
  Cause: Some mandatory attributes were missing from the image theme definition.
  Action: Attributes for defined image column (‘image_column’) and image format (‘image_format’) must be defined in the image theme definition.
  Level: 1
  Type: ERROR
  Impact: Process
MAPVIEWER-01020: Undefined network name attribute in network theme definition.
Causes: The network theme definition did not contain the network name attribute.
Actions: Define the attribute 'network_name' in the network theme definition.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01021: Undefined topology name attribute in topology theme definition.
Causes: The topology theme definition did not contain the topology name attribute.
Actions: Define the attribute 'topology_name' in the topology theme definition.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01022: Undefined WFS service URL attribute in WFS theme definition.
Causes: The WFS theme definition did not contain the service URL attribute.
Actions: Define the attribute 'service_url' in the WFS theme definition.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01023: Unable to find entry in ALL_SDO_GEOM_METADATA table for theme:
Causes: Theme base table and spatial column have not been registered in the user metadata view (USER_SDO_GEOM_METADATA).
Actions: Register the theme base table and spatial column in the user metadata view, by inserting a row in the USER_SDO_GEOM_METADATA view.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01024: Unable to convert query window SRID to theme SRID.
Causes: Conversion of map request query window projection to theme projection has failed. The database procedure sdo_cs.transform was used to convert coordinates from one SRID to another SRID.
Actions: Check the log for database errors.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01025: Cannot use ratio scale mode with theme that has unknown SRID.
Cause: A request with a ratio scale was attempted, but the data did not contain a valid Oracle SRID.

Action: Assign a valid SRID to the spatial data.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01026: Unable to get an instance of spatial provider.

Cause: A custom spatial provider was not defined in MapViewer's configuration file, or the provider class path was not accessible.

Action: Check the spatial provider section in the MapViewer configuration file for the definition of the provider. If it is defined there, check the library jar file path, and make sure it is part of the classpath definition for the application.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01027: Custom geometry theme must have a spatial data provider defined.

Cause: The custom geometry theme definition did not contain the spatial provider attribute.

Action: Define the attribute 'provider_id' in the custom theme definition.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01028: Custom spatial data provider is null.

Cause: The custom spatial data provider was not initialized and is null.

Action: Check if the provider name is defined in the theme definition, and also check if the provider class library is defined in the MapViewer configuration file and is part of the application classpath.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01029: Undefined geometry column for dynamic geometry theme.

Cause: A dynamic geometry theme definition did not contain the spatial column attribute.

Action: Define the attribute 'spatial_column' in the dynamic geometry theme definition.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01030: A set of four question marks separated by commas is required to define a geometry theme with a dynamic SDO_FILTER.
Cause: A set of questions marks was not used in the SDO_ORDINATE_ARRAY for a dynamic geometry theme with a SQL expression that also includes the spatial filter operator (SDO_FILTER). These question marks will be replaced with values based on the map request center and size.

Action: Use the following pattern for the ordinate array on the SOD_FILTER expression: SDO_ORDINATE_ARRAY(?,?,?,?).

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01031: Not enough binding parameters defined.
Cause: The theme definition contained binding parameters on its query expression, but the parameters were not provided in the map request.
Action: Pass the theme binding parameters to your theme definition, using the methods provided by the JavaScript API (Oracle Maps), or by the Java API; or if issuing a direct XML request, define the binding parameters in the theme section.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01032: GeoRaster spatial extent is null.
Cause: The GeoRaster object contained a null geometry as its spatial extent.
Action: Update the GeoRaster spatial extent using the PLSQL procedure sdo_geor.generateSpatialExtent.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01033: Invalid image stretch low value.
Cause: The image stretch low value was not numeric and ranging from 0 to 256. The default value 0 is used if the number is out of this range.
Action: Define a numeric value within the specified range.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01034: Invalid image stretch high value.
Cause: The image stretch high value was not numeric and ranging from 0 to 256. The default value 100 is used if the number is out of this range.
Action: Define a numeric value within the specified range.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01035: Invalid brightness value.
**Cause:** The image brightness value was not numeric and ranging from 0 to 256. The default value 0 is used if the number is out of this range.

**Action:** Define a numeric value within the specified range.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-01036: Undefined brightness value for image processing.**

**Cause:** The image brightness value was not defined, as required when a brightness operation is to be applied on a GeoRaster object.

**Action:** Define the parameter 'value' for brightness in the theme definition.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-01037: Invalid contrast value.**

**Cause:** The image contrast value was not numeric and ranging from 0 to 256. The default value 256 is used if the number is out of this range.

**Action:** Define a numeric value within the specified range.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-01038: Undefined contrast value for image processing.**

**Cause:** The image contrast value was not defined, as required when a contrast operation is to be applied on a GeoRaster object.

**Action:** Define the parameter 'value' for contrast in the theme definition.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-01039: Invalid threshold value.**

**Cause:** The image threshold value was not numeric and ranging from 0 to 256. The default value 0 is used if the number is out of this range.

**Action:** Define a numeric value within the specified range.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-01040: Invalid low threshold value.**

**Cause:** The image threshold low value was not numeric and ranging from 0 to 256. The default value 0 is used if the number is out of this range.

**Action:** Define a numeric value within the specified range.

**Level:** 1
Type: ERROR
Impact: Process

MAPVIEWER-01041: Invalid high threshold value.
Cause: The image threshold high value was not numeric and ranging from 0 to 256. The default value 0 is used if the number is out of this range.
Action: Define a numeric value within the specified range.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01042: Invalid image column type for image theme.
Cause: The image theme data was not stored in a column of type BLOB or ORDIMAGE.
Action: Assign a valid image column in the image theme definition.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01043: Network category is null.
Cause: The network model category information was null in the metadata view.
Action: Check the contents of column 'network_category' in the network metadata view USER_SDO_NETWORK_METADATA.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01044: Network geometry type is null.
Cause: The network model geometry type information was null in the metadata view.
Action: Check the contents of column 'geometry_type' in the network metadata view USER_SDO_NETWORK_METADATA.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01045: Undefined topology column for topology theme.
Cause: The topology theme definition did not contain the spatial column attribute.
Action: Define the attribute 'spatial_column' in the topology theme definition.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01046: WFS theme server URL is null.
Cause: The WFS server URL was not defined.
Action: Check if the WFS theme definition has a value for the attribute 'service_url'.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01047: WMS theme server URL is null.
Cause: The WMS server URL was not been defined.
Action: Check if the WMS theme definition has a value for attribute 'service_url'.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01048: Cannot load WMS map image.
Cause: The image could not be retrieved from the WMS server.
Action: Check if the WMS server URL defined in the theme definition is accessible. Change the timeout value in the theme definition if a timeout has happened.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01049: X or Y column not found in SQL query.
Cause: The SQL query string in a dynamic JDBC theme did not contain either x or y column.
Action: If your dynamic JDBC theme is using x and y columns to specify the location of a point theme (instead of an SDO_GEOMETRY column), make sure that both the x and y columns are present in the SQL query. Otherwise, check the query itself and make sure a proper SDO_GEOMETRY type column is selected.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02000: There is no database connection loaded.
Cause: Operation could not be performed unless a database connection has been added or loaded.
Action: Use Map Builder interface options to create or to add (load) a connection.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02001: Connection test failed.
Cause: The connection parameters were wrong, the database was down, or the listener was not running.
Action: Check the MapViewer log or console for database errors, and change connection parameters if necessary.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02002: Unable to register data source connection.

Cause: The connection parameters were wrong, the database was down, or the listener was not running.

Action: Check the MapViewer log or console for database errors. If the connection has been already added to Map Builder, check the connections parameters in the Map Builder preferences file (default file is oasmapbuilder.xml), and modify them if needed. Restart Map Builder to load the current preferences file. If it is a new connection being added, change the connection parameters and test the connection before trying to add it.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02050: Unable to save base map definition.

Cause: A database error may have happened while saving the base map in the USER_SDO_MAPS view.

Action: Check the MapViewer log for database errors.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02051: Unable to save style definition.

Cause: A database error may have happened while saving the style in the USER_SDO_STYLES view.

Action: Check the MapViewer log for database errors.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02052: Unable to save theme definition.

Cause: A database error may have happened while saving the theme in the USER_SDO_THEMES view.

Action: Check the MapViewer log for database errors.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02053: Unable to save tile layer definition.

Cause: A database error may have happened while saving the tile layer in the USER_SDO_CACHED_MAPS view.

Action: Check the MapViewer log for database errors.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02054: Unable to duplicate metadata.
  Cause: A database error may have happened while saving a duplicate metadata.
  Action: Make sure the new metadata name does not exist on the target database.
          Check the MapViewer log for database errors.

  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-02055: Unable to delete metadata.
  Cause: A database error may have happened while removing metadata from a
          database view.
  Action: Check the MapViewer log for database errors.

  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-02100: Invalid advanced style type.
  Cause: The style XML definition contained an invalid or unknown advanced style
          type.
  Action: Fix the style XML definition with an external tool, and refresh the
          connection in Map Builder.

  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-02101: Unable to build theme definition.
  Cause: A database error may have happened while reading theme parameters.
  Action: Check the MapViewer log for database errors.

  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-02102: Unable to parse hexadecimal value.
  Cause: The string value was not recognized as a valid hexadecimal expression.
  Action: Use the pattern #xxxxxx to represent the hexadecimal color value.
          Character # must be first followed by six digits or letters. Each x may be a digit
          between 0 and 9, or one of the letters "a,b,c,d,e,f".

  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-02103: Unable to parse style definition.
Cause: Database-related errors or SQL exceptions may have happened while reading style parameters.
Action: Check the MapViewer log for database-related errors or SQL exceptions.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02104: System will not be able to save this file.
Cause: The file path was not accessible to the system.
Action: Define a file name with a valid system path.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02105: Unable to save HTML file.
Cause: An IO error may have happened while saving file on disk.
Action: Check the MapViewer log for error details, and change file name if needed.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02200: Invalid raster block size.
Cause: The block size was nor a positive even number and power of two.
Action: Define a value that is positive and a power of two, such as 64 or 128.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02201: Unable to create GeoRaster table.
Cause: Database-related errors or SQL exceptions may have happened while creating a GeoRaster table.
Action: Check the MapViewer log for database-related errors or SQL exceptions.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02202: Unable to create GeoRaster raster data table.
Cause: Database-related errors or SQL exceptions may have happened while creating a GeoRaster raster data table. A raster data table name can not be repeated over cross schemas.
Action: Check the MapViewer log for database-related errors or SQL exceptions.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02203: Unable to insert GeoRaster record.
  Cause: Database-related errors or SQL exceptions may have happened while creating a new GeoRaster record.
  Action: Check the MapViewer log for database-related errors or SQL exceptions.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-02204: Unable to import image file.
  Cause: Database-related errors or SQL exceptions may have happened while importing image into a GeoRaster record.
  Action: Check the MapViewer log for database-related errors or SQL exceptions.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-02205: Unable to georeference GeoRaster object.
  Cause: Database-related errors or SQL exceptions may have happened while georeferencing the GeoRaster object.
  Action: Check the MapViewer log for database-related errors or SQL exceptions, and change georeferencing parameters if necessary.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-02206: Unable to update spatial extent of GeoRaster object.
  Cause: Database-related errors or SQL exceptions may have happened while updating the spatial extent of the GeoRaster object.
  Action: Check the MapViewer log for database-related errors or SQL exceptions.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-02207: Unable to generate pyramids for GeoRaster object.
  Cause: Database-related errors or SQL exceptions may have happened while generating pyramids for the GeoRaster object. Map Builder uses resampling mode NN.
  Action: Check the MapViewer log for database-related errors or SQL exceptions.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-02208: Unable to retrieve GeoRaster object size.
**Cause:** Database-related errors or SQL exceptions may have happened while retrieving the GeoRaster size from the metadata.

**Action:** Check the MapViewer log for database-related errors or SQL exceptions.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-02209: Unable to save GeoRaster metadata.**

**Cause:** Database-related errors or SQL exceptions may have happened while registering the GeoRaster spatial extent in the USER_SDO_GEOM_METADATA view.

**Action:** Check the MapViewer log for database-related errors or SQL exceptions.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-02210: Unable to create spatial indexes for GeoRaster table.**

**Cause:** Database-related errors or SQL exceptions may have happened while creating spatial indexes on the GeoRaster SPATIALEXTENT attribute.

**Action:** Check the MapViewer log for database-related errors or SQL exceptions.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-02300: Spatial data provider is not registered.**

**Cause:** The list of registered spatial data providers did not contain the provider name.

**Action:** Check the Map Builder preferences file (default file is oasmapbuilder.xml) to see if it defines the provider parameters. Spatial providers are registered at Map Builder startup if they are defined in the preferences file.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-02301: Unable to initialize spatial data provider.**

**Cause:** Initialization parameters were missing or were not accepted by the spatial provider.

**Action:** Check the spatial provider documentation for information about initialization parameters.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-02302: Unable to create an instance of spatial provider class.**

**Cause:** The library jar file location may not have been accessible to the application.
Action: Check the spatial provider parameters in the preferences file (default file is oasmapbuilder.xml), and modify the jar file location if necessary.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-03001: MapViewer cannot process your map request. Check MapViewer log for details.
Cause: MapViewer could not process a map request sent by your Java application.
Action: Check the MapViewer server logs written when the error occurred. Correct any mistakes accordingly.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-03002: Cannot check the existence of
Cause: MapViewer could not find the specified mapping metadata or spatial data table.
Action: Make sure the mentioned item (metadata such as style/theme/basemap or spatial data table) exists in the data base.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-03003: Cannot add a datasource:
Cause: MapViewer could not add a new data source per your map request.
Action: Adding a data source on-the-fly using the Java client API is no longer allowed. Data sources should be defined in the configuration file or added using the admin web page.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-03004: cannot list pre-defined themes in:
Cause: MapViewer could not get the list of themes in the specified base map.
Action: Make sure the base map exists in the database and that it contains predefined themes.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-03005: invalid image format specified.
Cause: The image format (for the map response) specified was invalid or not supported.
Action: Make sure that only image formats specified in the API are used in your code.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-03006: Failed to establish HTTP connection to MapViewer service.

Cause: The client failed to connect to the MapViewer servlet.

Action: Make sure the networking configuration settings (such as proxy settings) are correct in the client. Also make sure the correct MapViewer URL is supplied.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-03007: Failed to locate image URL in the XML map response.

Cause: The XML map response from the server did not contain a map image URL.

Action: Check MapViewer server logs to see if there is any error when processing the map request.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05500: Oracle Maps client internal error.

Cause: Oracle Maps client encountered an internal error.

Action: Contact Oracle Support if the issue persists.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05501: Map tile layer not found. Check map tile layer name and/or data source name.

Cause: MapViewer server could not find the specified map tile layer.

Action: Make sure the map tile layer and data source do exist and their names are spelled correctly.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05502: Cannot get map tile layer config information.

Cause: The client could not get the map tile layer configuration information from the server.

Action: Make sure the map tile layer and data source do exist and their names are spelled correctly.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05503: FOI ID cannot be null.
    Cause: The ID of the newly created FOI was null.
    Action: Make sure the FOI ID is not null.
    Level: 1
    Type: ERROR
    Impact: Process

MAPVIEWER-05504: MapViewer server base URL is not defined.
    Cause: The MapViewer server base URL was not specified.
    Action: Make sure the MapViewer server base URL is properly specified when creating the new MVMapView instance.
    Level: 1
    Type: ERROR
    Impact: Process

MAPVIEWER-05505: Wrong map center point specified. It should be an MVSdoGeometry point.
    Cause: The parameter passed as the map center into MVMapView.setCenter() or MVMapView.setCenterAndZoomLevel() was not a valid point MVSdoGeometry object.
    Action: Make sure the map center parameter is specified as a valid point type MVSdoGeometry object.
    Level: 1
    Type: ERROR
    Impact: Process

MAPVIEWER-05506: Invalid zoom level.
    Cause: The specified zoom level was invalid.
    Action: Make sure the zoom level value is not null and is within the predefined range.
    Level: 1
    Type: ERROR
    Impact: Process

MAPVIEWER-05507: Map tile layer name cannot be null.
    Cause: The map tile layer name was null.
    Action: Make sure map tile layer name is not null.
    Level: 1
    Type: ERROR
    Impact: Process

MAPVIEWER-05508: FOI Id is already used, please pick a new Id.
    Cause: The ID of the newly created FOI was already used by another FOI.
    Action: Choose a different ID for the new FOI.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05509: Theme-based FOI layer name is used, please pick a new name.
Cause: The name of the newly created theme-based FOI layer was already used by another theme-based FOI layer.
Action: Choose a different name for the new theme-based FOI layer.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05510: Cannot find theme-based FOI layer.
Cause: The client could not find the given theme-based FOI layer.
Action: Make sure the theme-based FOI layer has already been added to the MVMapView instance.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05511: Error occurred when sending request to MapViewer server.
Cause: An error occurred when the client sent the request to the MapViewer server.
Action: Make sure the MapViewer server is running and accessible from the client.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05512: Not enough points have been drawn.
Cause: Not enough points were drawn when calling MVRedline.generate().
Action: Make sure enough points have been drawn before calling MVRedline.generate().

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05513: Not a valid line or polygon type MVSdoGeometry.
Cause: getLength() or getArea() was called on a MVSdoGeometry object that is neither a polyline nor a polygon.
Action: Make sure these two methods are called on a polyline or polygon MVSdoGeometry object.

Level: 1
Type: ERROR
Impact: Process
MAPVIEWER-05514: Must have a filtering geometry when in high-light only mode.

**Cause:** A filtering geometry was not specified for a highlight-only theme-based FOI.

**Action:** Make sure the filtering geometry is specified.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-05516: Synchronized remote call is not supported when using Oracle Maps' non-AJAX remoting.

**Cause:** An attempt was made to invoke a synchronized remote call when using the Oracle Maps non-AJAX remoting mechanism.

**Action:** Send an asynchronous remote call instead.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-05517: Request string is too long for Oracle Maps' non-AJAX remoting.

**Cause:** The FOI request exceeded the length limit of the Oracle Maps non-AJAX remoting mechanism.

**Action:** Force the Oracle Maps client to use browser built-in AJAX remoting mechanism with MapViewer's built-in remoting proxy. Please refer to MAPMapView.enableXMLHTTP for more information.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-05518: Map tile layer hasn't been successfully added.

**Cause:** The map tile layer was not successfully added to the MAPMapView instance.

**Action:** Make sure both of the following two conditions are met when adding a map tile layer to the MAPMapView instance: 1. The MapViewer base URL is valid. 2. The map tile layer name and data source name are specified correctly.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-05519: One or more parameter is missing or invalid.

**Cause:** One or more parameters in the function call were missing or invalid.

**Action:** Make sure all required parameters are specified correctly.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-05520: Geometry SRID is null.
Cause: The srid attribute of the MVSdoGeometry object was not specified.
Action: Make sure the srid is specified.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05521: Call back function cannot be null when browser's built-in XMLHttpRequest is disabled.
Cause: The callback function was not specified when Oracle Maps' non-AJAX remoting mechanism was used.
Action: Specify a callback function.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05522: Client side coordinate system conversion not supported.
Cause: The client tried to invoke client-side coordinate system conversion that is not supported.
Action: Contact Oracle Support if the issue persists.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05523: Cannot process response from MapViewer server.
Cause: The client encountered an error when processing the response from the MapViewer server.
Action: Check the server response and server-side log file for the real cause.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05524: Theme feature highlighting is disabled for this theme.
Cause: The application tried to highlight or de-highlight a theme-based FOI layer that had theme feature highlighting disabled.
Action: Call MVThemeBasedFOI.enableHighlight to enable theme feature highlighting.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05525: Theme has not been added to a MVMapView instance.
Cause: The theme-based FOI layer had not been added to an MVMapView instance when the application invoked certain theme method.
Action: Make sure the theme method is invoked after the theme is added to an MVMapView instance.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06001: FOI width value is wrong.

Cause: MapViewer received an invalid width value for a FOI request.

Action: This typically indicates an application coding error. The two most common coding errors that may cause this error are: 1. The JavaScript function MVMapView.display() may have been invoked before the map container DIV object is fully materialized by the browser. 2. The map center X and Y coordinates were not specified as valid numbers. For cause 1, delay the execution of MVMapView.display() until the map container DIV object is fully materialized by the browser. For cause 2, make sure the map center X and Y coordinates are valid numbers.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06002: FOI height value is wrong.

Cause: MapViewer received an invalid height value for a FOI request.

Action: This typically indicates an application coding error. The two most common coding errors that may cause this error are: 1. The JavaScript function MVMapView.display() may have been invoked before the map container DIV object is fully materialized by the browser. 2. The map center X and Y coordinates were not specified as valid numbers. For cause 1, delay the execution of MVMapView.display() until the map container DIV object is fully materialized by the browser. For cause 2, make sure the map center X and Y coordinates are valid numbers.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06003: FOI ratX value is wrong.

Cause: MapViewer received an invalid ratX value for a FOI request.

Action: This typically indicates an application coding error. The two most common coding errors that may cause this error are: 1. The JavaScript function MVMapView.display() may have been invoked before the map container DIV object is fully materialized by the browser. 2. The map center X and Y coordinates were not specified as valid numbers. For cause 1, delay the execution of MVMapView.display() until the map container DIV object is fully materialized by the browser. For cause 2, make sure the map center X and Y coordinates are valid numbers.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06004: FOI ratY value is wrong.

Cause: MapViewer received an invalid ratY value for a FOI request.
**Action:** This typically indicates an application coding error. The two most common coding errors that may cause this error are: 1. The JavaScript function MVMapView.display() may have been invoked before the map container DIV object is fully materialized by the browser. 2. The map center X and Y coordinates were not specified as valid numbers. For cause 1, delay the execution of MVMapView.display() until the map container DIV object is fully materialized by the browser. For cause 2, make sure the map center X and Y coordinates are valid numbers.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-06005: FOI bounding box value is wrong.**  
**Cause:** MapViewer received an invalid bounding box for a FOI request.  
**Action:** This error should never happen. Contact Oracle Support if the issue persists.  

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-06007: Error rendering a FIG.**  
**Cause:** MapViewer encountered an error while rendering a feature of interest (FOI) object.  
**Action:** Check the MapViewer server-side log files for the actual cause.  

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-06008: Error rendering a POI.**  
**Cause:** MapViewer encountered an error while rendering a point of interest (POI) image.  
**Action:** Check the MapViewer server-side log files for the actual cause.  

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-06009: Error processing an FOI request.**  
**Cause:** MapViewer encountered an error while processing a feature of interest (FOI) request.  
**Action:** Check the MapViewer server-side log files for the actual cause.  

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-06011: Unsupported FOI request type.**
Cause: MapViewer encountered an unknown type of feature of interest (FOI) request.

Action: You should never see this error. Contact Oracle Support if the issue persists.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06013: Incorrect FIG 'gtype' number.
Cause: MapViewer encountered an invalid geometry type ('figgtype') in a FIG request.

Action: Contact Oracle Support if the issue persists.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06014: FOI style not found.
Cause: MapViewer could not find the style specified in the FOI request.

Action: Make sure the style specified in your individual FOI or theme-based FOI layer request exists.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06015: Map cache name is missing for bounding FOI theme.
Cause: MapViewer could not find the required map tile layer name in a bounding theme request.

Action: Make sure a map tile layer has been added to your map before issuing a bounding theme request.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06016: JDBC theme based FOI support is disabled for the given data source.
Cause: MapViewer was configured to disable JDBC theme-based FOI on the given data source.

Action: Enable JDBC theme-based FOI support in the data source definition.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06017: Create tile admin task: Map tile layer not found.
Cause: MapViewer could not find the map tile layer specified in a tile admin request.

Action: Make sure the map tile layer does exist and is correctly specified.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06018: Can not read from view USER_SDO_TILE_ADMIN_TASKS.
Cause: MapViewer could not read view USER_SDO_TILE_ADMIN_TASKS from the database connection.
Action: Make sure the SQL script mcsdefinition.sql is executed and the view USER_SDO_TILE_ADMIN_TASKS is created.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06019: Invalid SRS(spatial referencing system). This might be caused by invalid SRID or no database connection being available to retrieve SRS information
Cause: The SRID was not valid or no database connection was available to retrieve SRS information.
Action: Make sure the SRID is valid and MapViewer has a valid database connection (data source).

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06020: Invalid map tile layer name. "." is not allowed in map tile layer names.
Cause: The map tile layer name specified when creating a map tile layer contained '.' (period).
Action: Remove '.' from the map tile layer name.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06021: Map tile layer name is null. Cannot create map tile layer.
Cause: The map tile layer name specified when creating a map tile layer was empty.
Action: Make sure the map tile layer name is not empty.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06022: Cannot load the map source adapter class.
Cause: MapViewer could not load the map source adapter class.
Action: Make sure the path of the adapter class jar file is valid and it does contain the adapter class.

Level: 1
MAPVIEWER-06023: Cannot update database map tile layer configuration.

**Cause:** MapViewer encountered an error when updating map tile layer configuration stored in the database view USER_SDO_CACHED_MAPS.

**Action:** Check the MapViewer server-side log files for the actual cause.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-06024: Either <internal_map_source> clause or <external_map_source> clause must be defined

**Cause:** Neither the <internal_map_source> clause nor <external_map_source> clause was defined in the XML tile layer creation request.

**Action:** Make sure the clauses are properly specified.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-06025: Zoom levels definition is missing.

**Cause:** Zoom levels definition was missing in the XML tile layer creation request.

**Action:** Make sure the <zoom_levels> element is properly specified.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-06026: Coordinate system definition is missing.

**Cause:** The coordinate system definition was missing in the XML tile layer creation request.

**Action:** Make sure the <coordinate_system> element is properly specified.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-06027: Map source adapter class is null.

**Cause:** The map source adapter class was not specified when creating an external map tile layer.

**Action:** Make sure the map source adapter class is specified.

**Level:** 1

**Type:** ERROR

**Impact:** Process

MAPVIEWER-06028: Property name is empty(null) and is ignored.

**Cause:** The 'name' attribute of the external map source adapter property was empty or null.
Action: Make sure the 'name' attribute of the property is not empty.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06029: Invalid tile image width/height definition
Cause: The tile image width and/or height were null or not valid numbers.
Action: Make sure tile image width and height are valid not null numbers.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06030: Wrong zoom levels definition.
Cause: The zoom levels definition in the XML tile layer creation request was wrong.
Action: Make sure the zoom levels definition is valid.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06031: Cannot parse coordinate definition.
Cause: MapViewer could not parse the coordinate system definition in the XML tile layer creation request.
Action: Make sure the syntax of the XML coordinate system definition is valid.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06032: Data source cannot be null.
Cause: A data source was not specified.
Action: Make sure a data source is specified.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06033: Base map cannot be null for a internal map source.
Cause: A base map was not specified for an internal map tile layer.
Action: Make sure a base map is specified.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06034: Data source does not exist.
Cause: MapViewer could not find the specified data source.
**Action:** Make sure the data source does exist and its name is spelled correctly.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-06035: Base map does not exist.**

**Cause:** MapViewer could not find the specified base map.

**Action:** Make sure the base map source does exist and its name is spelled correctly.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-06036: MapTileServer is not ready. Please try again later.**

**Cause:** The map tile server was still being initialized and was not ready.

**Action:** Wait until the tile server is ready.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-06037: You must log in as admin user in order to perform this task.**

**Cause:** The user did not have the admin privilege when trying to perform an admin task.

**Action:** Log in as the admin user before submitting the admin task.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-06038: Not all scale, tile_width, tile_height definition can be empty.**

**Cause:** None of scale, tile_width, and tile_height parameters was specified for a zoom level.

**Action:** Make sure at least one of parameters is specified.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**MAPVIEWER-06039: No map data unit conversion information is available. Cannot create mesh rules.**

**Cause:** MapViewer could not find map data unit conversion parameters for the given coordinate system.

**Action:** Use tile_width instead of scale to specify zoom level definition.

**Level:** 1

**Type:** ERROR

**Impact:** Process
MAPVIEWER-06040: Map tile server is being shutdown!
   Cause: The map tile server was being shutdown.
   Action: Wait until MapViewer is restarted and the map tile server is ready.
   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-06041: Invalid zoom level.
   Cause: The zoom level was missing or invalid.
   Action: Make sure the zoom level is not null and valid.
   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-06042: MapViewer is not ready.
   Cause: MapViewer was still being initialized and was not yet ready.
   Action: Wait until MapViewer is ready.
   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-06043: Cannot access map tile layer configuration in database.
   Cause: MapViewer encountered error when trying to read the map tile layer
   configuration from the database.
   Action: Check the MapViewer server-side log file for the real cause.
   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-06044: The map tile is not correctly specified in the tile request.
   Cause: The tx or ty parameter (or both) of the map tile request was not specified
   or was invalid.
   Action: Make sure the tile tx and ty are properly specified.
   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-06045: Cannot create directory.
   Cause: MapViewer could not create the directory for tile storage.
   Action: Make sure MapViewer can write to the file system and that the file system
   is not full.
   Level: 1
   Type: ERROR
   Impact: Process
MAPVIEWER-06046: Cannot insert map tile layer configuration into database.
  Cause: MapViewer could not insert the map tile layer configuration into the database view.
  Action: Check the MapViewer server-side log file for the real cause.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-06047: Cannot find map tile layer.
  Cause: The specified map tile layer did not exist.
  Action: Make sure the map tile layer does exist and its name is spelled correctly.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-06048: Cannot load adapter jar file into database.
  Cause: MapViewer encountered an error when writing the adapter jar file into the database.
  Action: Check the MapViewer server-side log file for the real cause.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-06049: <map_tile_server_admin_request> tag is missing from the request.
  Cause: The <map_tile_server_admin_request> tag was missing in the XML tile server admin request.
  Action: Make sure this tag is properly specified.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-06050: Map tile layer definition is missing in the request.
  Cause: <map_tile_layer> tag was missing in the XML tile layer creation/redefining request.
  Action: Make sure <map_tile_layer> tag is properly specified.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-06051: Unknown request type.
  Cause: The tile admin request type was wrong.
  Action: Make sure the tile admin request type is specified correctly.
  Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06052: Error in parsing xml request.
    Cause: MapViewer encountered error when parsing the XML tile admin request.
    Action: Make sure the XML request is well formatted and free of syntax errors.
    Level: 1

Type: ERROR
Impact: Process

MAPVIEWER-06053: Zoom level or scale is not specified or invalid.
    Cause: The tile zoom level was not specified in the tile request.
    Action: Make sure the tile zoom level is specified.
    Level: 1

Type: ERROR
Impact: Process

MAPVIEWER-06054: Tile location definition is missing in the request. Either the tile mesh code or the tile location coordinates(tx,ty) must be specified.
    Cause: The tx or ty parameter (or both) of the map tile request was not specified or was invalid.
    Action: Make sure that the tile tx and ty are properly specified.
    Level: 1

Type: ERROR
Impact: Process

MAPVIEWER-06055: Map location/size definition is missing in the request. Either the map bounding box(bbox) or the map center(cx,cy) and map size(width,height) must be specified.
    Cause: Neither map bounding box nor map center and size was specified.
    Action: Make sure either the map bounding box or the map center and size are specified.
    Level: 1

Type: ERROR
Impact: Process

MAPVIEWER-06056: Invalid bounding box definition.
    Cause: The bounding box definition was invalid.
    Action: Make sure the bounding box definition is valid.
    Level: 1

Type: ERROR
Impact: Process

MAPVIEWER-06057: A map tile layer with the same name already exists.
    Cause: An already taken name was used to create a new map tile layer.
    Action: Choose a different name for the tile layer.
Level: 1
Type: ERROR
Impact: Process
MDS-00001: exception in Metadata Services layer
   Cause:  An exception occurred in the Metadata Services layer.
   Action: Details are usually given in the cause exception. Look for messages
descrating the cause exception and take the appropriate action.

   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-00002: unexpected internal error
   Cause:  An unexpected internal error occurred.
   Action: Contact Oracle Support Services.

   Level: 1
   Type: INCIDENT_ERROR
   Impact: Programmatic

MDS-00003: error connecting to the database
   Cause:  A database connection to the metadata repository could not be
established.
   Action: Contact the database administrator or system administrator to get the
problem resolved.

   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-00005: unable to find XML element or text "[0]"
   Cause:  The XML element with the given local name or the text node containing
the given data could not be located by traversing through the document while
applying customizations to a metadata object. The internal in-memory
MDocument structure may be corrupted.
   Action: Retry the operation. Contact Oracle Support Services if the problem
persists.

   Level: 1
   Type: INCIDENT_ERROR
   Impact: Programmatic
Cause: An attempt was made to add an attribute to an element that does not conform to the element’s schema definition.
Action: If the Bean API is being used, then determine if the beans need to be regenerated. Otherwise, inspect the element definition for valid attributes.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00010: DuplicateRefException. In document [0] there are multiple elements with the same ID [1].
Cause: Either an element was being added with an ID that already existed within the document, or a preexisting document had multiple elements with the same ID.
Action: Change the ID of the elements so that there is no ID duplication.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00011: unable to create configuration object or MDSInstance due to invalid configuration information: [0]
Cause: The MDS configuration was invalid.
Action: Refer to the MDS specification and correct the configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00012: invalid value "[0]" for attribute [1] (type = "[2]") in metadata object [3]
Cause: The value provided for the named attribute was invalid. For example, this error could occur if a named JNDI connection name is incorrect.
Action: Provide a valid attribute value.

Level: 1
Type: ERROR
Impact: Data

MDS-00013: no metadata found for metadata object "[0]"
Cause: MDS was unable to locate the given metadata object.
Action: Confirm the name and location of the metadata object, its existence in the configured metadata stores, and that it is in an accessible namespace.

Level: 1
Type: ERROR
Impact: Data

MDS-00015: Translation ignored in document "[0]": element with localRef "[1]" not found
Cause: A translation could not be applied because the underlying element to be translated was not found.

Action: If the element is expected, check the base document and any customizations to locate it.

Level: 1
Type: ERROR
Impact: Data

MDS-00016: Ignoring customization for instruction type "[0]" in metadata object "{1}" for customization layer "{2}"/{"3"}: not finding element with local reference "{4}"

Cause: A customization was not applied because the underlying element to be customized was not found.

Action: If the element is expected, examine the base document and any customizations to locate the element.

Level: 1
Type: ERROR
Impact: Data

MDS-00017: Customization instruction generated for "[0]" uses local reference(s) : "{1}" which is not upgrade safe.

Cause: The customization instruction contained a local reference that was not deemed safe for an upgrade operation.

Action: Ensure that the local reference used in the customization instruction would be safe during an upgrade operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00018: Fixed customization for instruction type "[0]" in metadata object "{1}" for customization layer "{2}"/{"3"}: not able to find the referenced element with local reference "{4}". inserted the customized element at the best possible location.

Cause: A customization was fixed because the referenced element was not found.

Action: Correct the customized element's position if needed.

Level: 1
Type: ERROR
Impact: Data

MDS-00019: Customization document contains an invalid instruction "[0]".

Cause: A customization document that was being applied contained an unrecognized instruction.

Action: Retry the operation. If necessary, either remove the customization document, or edit it to correct or remove the offending instruction.

Level: 1
Type: ERROR
Impact: Data
MDS-00020: Layer value "{0}" contains an invalid character.
  Cause: Using a layer value that has an invalid character.
  Action: Layer value should conform to MDS naming standards.
  Level: 1
  Type: ERROR
  Impact: Data

MDS-00029: Invalid namespace: The namespace "{0}" has not been registered with the MetadataManager.
  Cause: An attempt was made to access a document in an unknown location or namespace.
  Action: Ensure that the namespace reported is registered in the MDS configuration.
  Level: 1
  Type: ERROR
  Impact: Configuration

MDS-00032: cannot parse the input file: {0}
  Cause: An exception occurred while parsing the file.
  Action: Record the accompanying error and contact the developers of the application.
  Level: 1
  Type: ERROR
  Impact: Data

MDS-00033: cannot load the input file: {0}
  Cause: An exception occurred while loading the file.
  Action: Record the accompanying error and contact the developers of the application.
  Level: 1
  Type: ERROR
  Impact: Files

MDS-00034: cannot write to the output file: {0}
  Cause: An attempt to write to the output file failed.
  Action: Record the accompanying error and contact the developers of the application.
  Level: 1
  Type: ERROR
  Impact: Files

MDS-00035: cannot load the class: {0}.
  Cause: The class file could not be loaded.
**Action:** Ensure the class is available on the classpath so that it can be loaded by the application.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-00036: cannot instantiate the class: {0}**  
**Cause:** An exception occurred while instantiating a class.  
**Action:** Record the accompanying error and contact the developers of the application.  

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-00037: cannot access the class: {0}**  
**Cause:** An attempt was made to access an inaccessible class file.  
**Action:** Record any accompanying errors and contact the developers of the application.  

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-00039: error while attempting to parse the document {0} using SAX.**  
**Cause:** A SAX parsing exception occurred while trying to parse a document.  
**Action:** Record the accompanying error and contact the developers of the application.  

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**MDS-00040: There are no namespaces registered.**  
**Cause:** The operation attempted requires at least one registered namespace.  
**Action:** Correct the MDS configuration to include the required namespace schemas.  

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-00041: invalid classpath entry "{0}"**  
**Cause:** An entry on the application's classpath did not exist or was invalid.  
**Action:** Correct the application's classpath to remove the invalid entry.  

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration
MDS-00042: Classpath "[0]" does not contain any valid directories or jar files.
   Cause: The application's classpath contained no valid entries.
   Action: Correct the application's classpath.
   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-00043: A name pattern mapping for path [0] already exists.
   Cause: The MDS configuration had duplicate namespace mappings.
   Action: The MDS configuration must be corrected to remove the duplicate namespace mappings.
   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-00044: Metadata for MetadataObject with name [0] already exists in the configured store.
   Cause: An attempt was made to create a new Metadata Object. However an object with the same MDSReference already existed.
   Action: The name or location of one of the objects must be changed.
   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-00047: Use the flushChanges method on the MDSSession to commit the changes.
   Cause: Commit was disabled in the PTransaction that was being used.
   Action: Use the flushChanges method on the MDSSession to commit the changes.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-00054: The file to be loaded [0] does not exist.
   Cause: An attempt was made to load a persistent document using a URL but the underlying document was not found in the store.
   Action: Check that the document name is correct and that the store is correctly configured.
   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-00058: Invalid Metadata Path: Metadata Path cannot be null.
   Cause: The path used to create a FileMetadataStore was empty. It must point to a directory.
   Action: Correct the metadata store definition in the application configuration to specify a metadata path.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00068: Unable to find a type definition for: namespace = {0}, local name = {1}, file location = {2}
Cause: A request was made to locate a definition that did not exist in the named schema.
Action: Ensure the document contains only elements which are defined in the schema for the indicated namespace.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00084: Parameter {0} is invalid.
Cause: The supplied parameter was not of the expected type.
Action: Ensure the parameter is of the expected type.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00085: Parameter {0} is missing.
Cause: The named parameter was not supplied.
Action: Ensure that the named parameter is supplied. If transferring documents ensure a parameter file name is supplied.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00089: Parameter {0} must have a value.
Cause: A required parameter was null.
Action: Ensure that the indicated parameter is not null when the method is called.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00090: Error in JNDI lookup operation on MDSInstance name {0}, JNDI name {1}: object found {2} is an instance of class {3} classloader {4}, expected an instance of class {5} classloader {6}.
Cause: An object of an unexpected type was found, and it was bound to the JNDI context as the MDSInstance.
Action: Make sure no user-written code is binding anything to the same JNDI name. If the error occurs again try restarting the application. If the error still occurs, contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
MDS-00091: Unable to customize {0}, empty or null value for tip customization layer {1}

Cause: The customization layer configured as the tip, has a null or empty value.
Action: Ensure that a valid value is supplied for the tip customization layer.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00092: DuplicateNodeException. The same bean instance {0} already exists in document {1}.

Cause: An element was being added that already exists as the same bean instance within the document.
Action: Either create a new bean instance or remove the duplicate before attempting to insert in the document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00093: List of values provided for customization layer {0} was empty or null.

Cause: The list of customization layer values was either empty or null.
Action: Ensure that a valid list of layer values for the customization layer is provided.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00094: List of CustLayerUsage objects provided was empty or null.

Cause: The list of CustLayerUsage objects was either empty or null.
Action: Ensure that a valid list of CustLayerUsage objects is provided.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00095: The support to transfer customization documents based on the CustConfig and excluding customization documents of specific customization layers is not yet available.

Cause: CustOption is created to transfer customization documents based on the CustConfig and to exclude customization documents of specific customization layers which is not yet supported in MDS Transfer.
Action: Ensure CustOption is not created to use CustConfig and to exclude customization documents of specific customization layers.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-00111: The value of the property {0} for the component {1} must be set to the default value.

Cause: The indicated component property did not have a default value.
Action: Ensure the component property is given a default value.

Level: 1
Type: ERROR
Impact: Data

MDS-00153: invalid value for indicator

Cause: The production of merged XML failed.
Action: Verify the validity of XML documents and any schemas. If necessary forward these on to Oracle Support Services with the exception message and stack trace.

Level: 1
Type: INCIDENT_ERROR
Impact: Data

MDS-00154: The ContentHandler {0} does not implement org.xml.sax.ext.LexicalHandler.

Cause: MergedXML was passed a ContentHandler that does not implement org.xml.sax.ext.LexicalHandler.
Action: Use a ContentHandler that implements org.xml.sax.ext.LexicalHandler.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00155: unable to create a JSP file for document {0}

Cause: Oracle MDS was unable to create a JSP source document.
Action: Examine the MDS base document, as well as any customizations and translations. If necessary, forward these to Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Files

MDS-00156: unable to create a JSP output directory {0}

Cause: MDS-JSP integration failed because a problem was encountered while creating a directory.
Action: Verify that you have permission to create this directory.

Level: 1
Type: ERROR
Impact: Files

MDS-00157: unable to write to JSP file {0}

Cause: MDS-JSP integration failed because a problem was encountered while trying to write to a file.
Action: Verify that you have permission to create this file.
Level: 1
Type: ERROR
Impact: Files
MDS-00158: invalid directory: {0}
Cause: MDS-JSP integration failed. An attempt was made to write to an invalid directory.
Action: Verify the value of the invalid directory.

Level: 1
Type: ERROR
Impact: Files
MDS-00159: Invalid value "{0}" for {1} attribute (type = "{2}") in document {4}.
Cause: An attempt was made to write an invalid value to an attribute.
Action: Double-check the value and attribute type.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-00160: no local name has been specified for a resource
Cause: An attempt was made to create a resource without giving it a name.
Action: Verify that the resource that was created is given a local name.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-00161: no local name has been specified
Cause: An attempt was made to create a resource without giving it a local name.
Action: Verify that the resource that was created is given a local name.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-00162: invalid attribute value
Cause: An attempt was made to give to an invalid value to an attribute.
Action: Verify that the attribute has a valid value.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-00163: property value missing from element
Cause: An element was missing a property value.
Action: Ensure that each parameter used to create the element has a property value.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00164: There is a concurrent "[1]" operation on the document "[0]".
Cause: The document on which modification was being attempted had been updated by another user after it was retrieved.
Action: Retrieve the document again.

Level: 1
Type: ERROR
Impact: Data

MDS-00165: metadata Object "[0]" has changed
Cause: The creation, updating, or renaming of a metadata object failed due to conflicting changes made by another user.
Action: Retrieve the document containing the metadata object again.

Level: 1
Type: ERROR
Impact: Data

MDS-00166: unable to locate the unique identifier, [0]:[1], that has been configured for the element [2]
Cause: The element that required a unique identifier was created without one.
Action: Add a unique identifier attribute to the element.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00167: Invalid local name for mapping "[0]" - an empty string is not allowed.
Cause: A local name was given a null or empty value.
Action: Supply a valid local name.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00168: MDS object [0] is being used after it or its MDSInstance or PManager has been released.
Cause: An MDS object was used after it or its MDSInstance or PManager had been released.
Action: Create a new MDSInstance and re-create the MDS object.

Level: 1
Type: ERROR
Impact: Session

MDS-00169: The MDS instance is not ready for use because metadata deployment is in progress (status is "[0]"). Deployment messages so far are: "[1]".
Cause: The MDS instance cannot be used until metadata deployment has finished.  
Action: Try again later after metadata deployment has completed.  
Level: 1  
Type: ERROR  
Impact: Programmatic  
MDS-00170: The MDS instance is not usable because metadata deployment failed with status "[0]".  
Cause: Metadata deployment failed with the given status.  
Action: Please fix the error and redeploy the application's metadata using the importMAR operation on MDS Application Runtime MBean. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.  
Level: 1  
Type: ERROR  
Impact: Configuration  
MDS-00171: Document "[0]" already has unsaved updates on another instance of this metadata object in this session.  
Cause: An attempt was made to update metadata using more than one instance of the same metadata object at the same time in the same session.  
Action: Save the changes on the metadata object that already has updates before attempting to update it via another metadata object, or make further modifications on the metadata object on which updates have already been made.  
Level: 1  
Type: ERROR  
Impact: Data  
MDS-00172: The value "[0]" of local unique attribute {1} on the {2} element that is being inserted or updated in document {3}, is already used by a sibling element.  
Cause: An attempt was made to have two local unique attributes with the same value on elements that share the same parent.  
Action: Use a different value for the local unique attribute on the element that is being inserted or updated.  
Level: 1  
Type: ERROR  
Impact: Data  
MDS-00173: Attribute {0} of element {1} in document {2} has a null value.  
Cause: The value of the named attribute was null.  
Action: Provide a non-null value for the attribute or remove the attribute.  
Level: 1  
Type: ERROR  
Impact: Data
MDS-00174: A tenant scoped MDSInstance \{0\} is being requested with a null TenantId.
Cause: A tenant scoped MDSInstance was requested passing null for TenantId.
Action: Supply a non null TenantId or request an unscoped MDSInstance.

Level: 1
Type: ERROR
Impact: Session

MDS-00176: The operation on MDSInstance \{0\} cannot be performed as it is not tenant scoped.
Cause: The operation performed on the MDSInstance was invalid with a TenantId because it was not a tenant scoped MDSInstance.
Action: Perform the operation on an MDSInstance initialized for multitenant operation.

Level: 1
Type: ERROR
Impact: Session

MDS-00177: The operation on resource \{0\} cannot be performed as it is not configured to be owned by the current tenant scope.
Cause: The operation performed was illegal as the resource being created, updated or deleted has global scope and the current scope is tenant or the resource has tenant scope and the current tenant is global.
Action: Check that the configuration of the namespaces and CustomizationClasses is correct and that the correct customization class list is being used.

Level: 1
Type: ERROR
Impact: Session

MDS-00178: Multitenant MDSInstance \{0\} cannot be created with TenantId \{1\} when multitenant-capable in the persistence configuration = \{2\} and the JVM flag oracle.multitenant.enabled = \{3\}.
Cause: A valid TenantId was not provided appropriate to the configuration.
Action: Request an MDSInstance appropriate to the configuration.

Level: 1
Type: ERROR
Impact: Session

MDS-00179: The requested MDSInstance \{0\} cannot be returned for TenantId \{1\} as it was originally created with multitenant enabled = \{2\}.
Cause: The configuration at the time the MDS Instance was requested did not match with the configuration when it was originally created.
Action: Request an MDSInstance appropriate to the original configuration.

Level: 1
Type: ERROR
Impact: Session

MDS-00180: Only a single tenant cache configuration is allowed.
Cause: The number of TenantCacheConfigs was not 1.
Action: Pass a single tenant cache configuration object. Although the constructor for the TenantCacheConfigs class takes an array this is reserved for future use.

Level: 1
Type: ERROR
Impact: Session

MDS-00181: Only a single tenant document cache configuration is allowed.
Cause: The number of TenantDocumentCacheConfigs was not 1.
Action: Pass a single tenant document cache configuration object. Although the constructor for the TenantDocumentCacheConfigs class takes an array this is reserved for future use.

Level: 1
Type: ERROR
Impact: Session

MDS-00182: Tenant cache configuration information cannot be requested for the global tenant.
Cause: Tenant cache configuration information was being requested for the global tenant.
Action: Do not request the tenant cache configuration for the global tenant - use getCacheConfig directly from MDSConfig

Level: 1
Type: ERROR
Impact: Session

MDS-00183: Tenant document cache configuration information cannot be requested for the global tenant.
Cause: Multitenant document cache information was being requested for the global tenant.
Action: Do not request the tenant document cache configuration for the global tenant - use getDocumentCacheConfig from NamespaceConfig

Level: 1
Type: ERROR
Impact: Session

MDS-00184: The relationship from {0} to {1} is invalid because the latter is configured as a global resource and cannot be referenced from a tenant resource because the corresponding relationship is defined with cascade delete enabled.
Cause: Relationships with cascade delete enabled were spanning tenant boundaries.
Action: Reconfigure the relationship with cascade delete disabled or ensure the parent reference is within the same tenant scope.

Level: 1
Type: ERROR
Impact: Session

MDS-00185: The relationship from {0} to {1} is invalid because the latter is configured as a global resource and cannot be referenced from a tenant resource because the corresponding relationship is defined with enforced integrity.
Cause: Relationships with defined referential integrity were spanning tenant boundaries.
Action: Reconfigure the relationship without referential integrity or ensure the parent reference is within the same tenant scope.
Level: 1

Type: ERROR
Impact: Session

MDS-00186: A {0} element is already present in the parent {1} element in document {2}, but with the QNameLUID identification mechanism only one is allowed.
Cause: An attempt was made to have two or more elements with same QName under same parent while QNameLUID identification mechanism is used.
Action: Remove duplicate instances of elements with same QName
Level: 1

Type: ERROR
Impact: Data

MDS-00187: The existing {0} element in the parent {1} element in document {2} is automatically removed, and new customized {0} element of "[3]"/[4]" customization layer is inserted since with the QNameLUID identification mechanism, only one is allowed.
Cause: An attempt was made to have two or more elements with same QName under same parent while QNameLUID identification mechanism is used.
Action: Removed duplicate instances of elements with same QName
Level: 1

Type: ERROR
Impact: Data

MDS-00189: The existing {0} element with unique id {1} in the parent {2} element in document {3} is automatically removed, and new customized {0} element with unique id {1} of "[4]"/[5]" customization layer is inserted since {0} element is type-annotated to overwrite duplicates.
Cause: An attempt was made to have two or more elements with same QName under same parent having the same unique ID value while overwriteDuplicate mechanism is used.
Action: Removed duplicate instances of elements with same QName having the same unique ID value
Level: 1
MDS-00190: A call to \{0\} on the current MDSSession does not specify the correct transaction key

**Cause:** The current MDS Session was created using a transaction key and the subsequent operation was either being attempted passing no key or a different one from that originally used.

**Action:** If the MDS Session is created using a transaction key, then use the MDSSession API's that take a transaction key and use the same key.

**Level:** 1  
**Type:** ERROR  
**Impact:** Session

MDS-00191: An exception occurred in PChangeListener \{0\}

**Cause:** The MetadataStoreCommunicator was attempting to notify the listener when an exception occurred.

**Action:** Check the HandlePChanges method of the listener.

**Level:** 1  
**Type:** ERROR  
**Impact:** Session

MDS-00193: Document with the MDSReference \{0\} contains an ID attribute with an invalid value: \{1\}

**Cause:** The value of the ID attribute is invalid according to the schema definition.

**Action:** Ensure that the ID conforms to the schema definition.

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Data

MDS-00194: Auditing is disabled for component \{0\}.

**Cause:** There was an error registering the audit event definition(s) for the component.

**Action:** Ensure that the audit event definitions for the component are valid and that the audit service is functional.

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Configuration

MDS-00195: The custom audit event of type "\{0\}" that was associated with "\{1\}" is not audited because the MDS object was unmodified since the last time the changes in the MDSSession were committed.

**Cause:** MDS object associated with the event was unmodified since the last time the changes in the MDSSession were committed. A custom audit event is discarded if the associated MDSObject is not modified.

**Action:** No action required.

**Level:** 1  
**Type:** WARNING  
**Impact:** Programmatic
MDS-00196: The MDSSession referenced by the audit component "{0}" is invalid.
  Cause: The MDS audit support instance is being used even after the MDSSession that was used to created it is no longer referenced.
  Action: Fetch the audit support instance from the MDSSession and retry the operation.

  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-00500: No metadata store is configured to save the document {0}.
  Cause: An attempt was made to save a document, when no writable store was configured.
  Action: Provide a writable metadata store to save the document.

  Level: 1
  Type: ERROR
  Impact: Configuration

MDS-00501: Document {0} cannot be deleted because no metadata store is configured.
  Cause: An attempt to delete a document failed because there was no writable store configured.
  Action: To delete the document, provide a writable metadata store.

  Level: 1
  Type: ERROR
  Impact: Configuration

MDS-00503: The metadata path "{0}" does not contain any valid directories.
  Cause: Either the metadata path was empty or directories on the metadata path did not exist.
  Action: Ensure that the metadata path is not empty and that the directories on the metadata path exist.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-00504: failure to create document {0} because metadata store "{1}" is read-only
  Cause: An attempt to create a document on a read-only metadata store failed.
  Action: To create the document, provide a writable metadata store.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-00505: failure to save document {0} because metadata store "{1}" is read-only
  Cause: An attempt to save a document to a read-only metadata store failed.
  Action: To save the document, provide a writable metadata store.
Level: 1
Type: ERROR
Impact: Data

MDS-00506: failure to get child resources of package \{0\} because package does not exist in metadata store
Cause: Child resources for the package were not found because specified package did not exist in the metadata store.
Action: Verify that the package exists in the metadata store, and then retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00507: failure to delete document \{0\} because metadata store "\{1\}" is read-only
Cause: An attempt to delete a document from a read-only metadata store failed.
Action: To delete the document, provide a writable metadata store and retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00508: There is no content to be read for \{0\}.
Cause: An attempt was made to read empty metadata.
Action: Verify that the metadata has valid content, and then retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00509: failure to delete document \{0\} with file \{1\}
Cause: An error occurred while the document was being deleted.
Action: Verify that the document exists and then retry the operation, or provide a document that exists in the store.

Level: 1
Type: ERROR
Impact: Data

MDS-00510: failure to read document \{0\} because it is not found in the metadata path "\{1\}"
Cause: The document to be read was not found.
Action: Verify that the metadata path is correct and that the document exists in the metadata path.

Level: 1
Type: ERROR
Impact: Data
MDS-00511: failure to create document [0] at file [1]
   Cause: An error occurred while creating the document in the file store.
   Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
   Level: 1
   Type: ERROR
   Impact: Files

MDS-00512: failure to create document [0] because file [1] already exists
   Cause: An attempt was made to create a file that already existed in the metadata store.
   Action: Provide a different name for the file to be created, or delete the existing file first, and then retry the operation.
   Level: 1
   Type: ERROR
   Impact: Files

MDS-00513: failure to create package [0] because directory [1] already exists
   Cause: An attempt to create a package failed because a directory by the same name already existed.
   Action: Provide a different name for the package to be created and retry the operation.
   Level: 1
   Type: ERROR
   Impact: Files

MDS-00514: failure to save document [0] to file [1]
   Cause: An error occurred while saving the document to a file.
   Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
   Level: 1
   Type: ERROR
   Impact: Files

MDS-00515: failure to create document [0] in the metadata repository
   Cause: An error occurred while the document was being created in the metadata repository.
   Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
   Level: 1
   Type: ERROR
   Impact: Data
MDS-00516: failure to create document {0} because it already exists in the metadata repository
Cause: An error occurred while the document was being created in the metadata repository because the document already existed.
Action: Provide a different name or delete the existing document first, and then retry the operation.
Level: 1
Type: ERROR
Impact: Data

MDS-00517: failure to create package {0} because it already exists in the metadata repository
Cause: An error occurred while the package was being created in the metadata repository because the package already existed.
Action: Provide a different package name or delete the existing package first, and then retry the operation.
Level: 1
Type: ERROR
Impact: Data

MDS-00518: failure to create package {0} in the metadata repository
Cause: An error occurred while the package was being created in the metadata repository.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Data

MDS-00519: failure to delete document {0} from the metadata repository
Cause: An error occurred while the document was being deleted from the metadata repository.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Data

MDS-00520: failure to read document {0} because it is not in the metadata repository
Cause: The document was not read because it did not exist in the metadata repository.
Action: Verify that the document name is correct and that it exists in the metadata repository, and then retry the operation.
Level: 1
Type: ERROR
Impact: Data

MDS-00521: error while reading document {0} from metadata repository
Cause: An error occurred while the document was being read from the metadata repository.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data

MDS-00522: failure to save document {0} to the metadata repository
Cause: An error occurred while the document was being saved to the metadata repository.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data

MDS-00526: failure to generate SAX parsing events for document {0}
Cause: An error occurred while parsing the XML document.
Action: Verify that the XML document is well-formed. Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00531: failure to write to "{0}" because output to "{1}" protocol is not supported
Cause: An attempt to write modified metadata to a URL failed because the protocol is not supported.
Action: Retry writing modified metadata to a supported protocol.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00533: Exception: {3} Attribute "{0}" with an invalid MDS reference "{1}" in document "{2}" is not stored as a typed dependency in the database repository.
Cause: An error occurred while adding a typed dependency from the specified attribute.
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data
MDS-00534: Exception: {3} Subobject {0} in document {2} has invalid value "(1)" for unique identifier; typed dependencies from this subobject are not stored in the database repository.
Cause: An error occurred because the component had an invalid ID.
Action: Provide the correct ID value for the application metadata. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Programmatic
MDS-00535: cannot change TypeManager associated with a PManager after it is initialized
Cause: An attempt was made to associate TypeManager with PManager after it was initialized.
Action: Contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic
MDS-00536: cannot change FileTypeManager associated with a PManager after it is initialized
Cause: An attempt was made to associate FileTypeManager with PManager after it was initialized.
Action: Contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic
MDS-00537: unable to rename {0} to {1}
Cause: An error occurred during a rename operation.
Action: Retry the rename operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Data
MDS-00538: failure to rename document {0} because metadata store "(1)" is read-only
Cause: An error occurred during rename operation because the metadata store was configured as read-only.
Action: To rename a document, provide a store that can be written to, that is not read-only.
Level: 1
Type: ERROR
Impact: Data

MDS-00539: A document can be renamed only within its source store. The new name {1} in this rename operation does not map to the same store as the old name {0}.

Cause: An error occurred during a rename operation. An invalid new name for the rename operation caused the renamed document to be stored in another metadata store.

Action: Provide a new, valid document name that maps to the same metadata store that contains the original document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00541: SAX events cannot be generated for non-XML document {0}.

Cause: An attempt was made to generate SAX events for non-XML documents.

Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00547: The read operation is not supported for packages from Web content from the servlet context.

Cause: A read operation was attempted for packages from Web content, which is not supported.

Action: The read operation is not supported, therefore no action is required.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00550: Updates across multiple stores are not allowed in the same transaction.

Cause: An attempt was made to perform updates across multiple stores in the same transaction.

Action: Verify that the document is being saved to the same store on which it exists.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00551: failure to delete package {0} because it is not empty

Cause: An attempt was made to delete a package that was not empty.

Action: Delete the contents of the package to be deleted first, and then retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00552: failure to delete package {0} with directory {1}
  Cause: An error occurred while deleting the directory for the package.
  Action: Ensure no files from the directory are opened in other applications and retry the operation. Also, refer to the error messages in the application logs for more information on the actual reason for failure.

  Level: 1
  Type: ERROR
  Impact: Files

MDS-00554: Package {0} cannot be found in the specified store.
  Cause: The requested operation was not completed because the package name that was supplied was invalid.
  Action: Provide a valid package name and retry the operation.

  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-00555: The partitionName {0} is invalid.
  Cause: The requested operation was not completed because the partition name that was supplied was invalid.
  Action: Provide a valid partition name and retry the operation.

  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-00557: Resource {0} is already locked or is being modified.
  Cause: An attempt was made to modify a document that was already being modified by another user.
  Action: Retry modifying the document after the lock is released by the other users. Also, refer to the error messages in the application logs for more information on the actual reason for failure.

  Level: 1
  Type: ERROR
  Impact: Session

MDS-00558: The partitionName {0} is not available.
  Cause: No partition with that name existed.
  Action: Provide a partition name that exists.

  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-00559: A partition with name {0} already exists.
Cause: The name provided for creating a new partition was already in use by another partition.
Action: Provide a different name for the new partition.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00560: The MDS repository is incompatible with the archive. The repository version is {0} whereas archive version is {1}.
Cause: The MDS repository was not compatible with the archive provided.
Action: Upgrade the target MDS repository or use a compatible archive for the operation.

Level: 1
Type: ERROR
Impact: Upgrade

MDS-00561: The create operation is not supported for metadata stores of type "[0]".
Cause: An attempt was made to create a new document or package in a read-only metadata store.
Action: Reconfigure the application to use a writable metadata store.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00562: The delete operation is not supported for metadata stores of type "[0]".
Cause: An attempt was made to delete a document from a read-only metadata store.
Action: Reconfigure the application to use a writable metadata store.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00563: The save operation is not supported for metadata stores of type "[0]".
Cause: An attempt was made to save a document to a read-only metadata store.
Action: Reconfigure the application to use a writable metadata store.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00564: GUID feature is not supported for metadata stores of type "[0]".
Cause: An attempt was made to get a document by GUID from a metadata store that does not support GUIDs.
Action: Reconfigure the application to use a metadata store that supports GUIDs, such as DBMetadataStore.

Level: 1
MDS-00565: The rename operation is not supported for metadata stores of type "{0}".
Cause: An attempt was made to rename a document or package in a read-only store.
Action: Reconfigure the application to use a writable metadata store.
Level: 1

MDS-00566: The DOM content is NULL for {0}.
Cause: DOM document content provided was null.
Action: Provide valid DOM content and retry the operation.
Level: 1

MDS-00567: The metadata changes for document "{0}" cannot be written in the underlying store because read-only mode is enabled in the configuration.
Cause: An attempt to change metadata was made while changes were disabled for maintenance operations.
Action: Reconfigure the application to not specify read-only mode in the configuration and use a writable metadata store to persist metadata changes.
Level: 1

MDS-00568: MetadataStore initialization failure because "{0}" is invalid
Cause: The URL store mapping was invalid.
Action: Provide a valid URL store mapping.
Level: 1

MDS-00569: unable to read document {0} from "{1}"
Cause: There was an error reading the document from the URL metadata store.
Action: Retry the operation. If the problem persists, verify that the URL metadata store exists.
Level: 1

MDS-00570: The name or content exceeds the MDS repository schema size for {0}.
Cause: The metadata name or the content exceeded the schema size.
Action: Reduce the length of the metadata name or content, and then retry the operation. Refer to the documentation for the allowed sizes for names and content.

Level: 1
Type: ERROR
Impact: Data

MDS-00571: The bean content is NULL for {0}.
Cause: The bean content was null.
Action: Provide valid bean content, and then retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00572: failure to get the ConnectionManager because the DBContext is null
Cause: The DBContext value is null. Also, using any MetadataStore, PManager, or MDSInstance that has already been released might lead to this error.
Action: Do not use any metadata store, PManager, or MDSInstance that is already released.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00573: The metadata store is already associated with a PManager.
Cause: The PConfig provided for creating the PManager or MDSInstance was already used by another PManager or MDSInstance.
Action: Provide a new PConfig when creating the PManager or MDSInstance.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00574: The document {0} does not exist in the configured metadata store.
Cause: The document being locked did not exist in the configured metadata store.
Action: Ensure that the document to be locked exists, and that the name of the document is correct.

Level: 1
Type: ERROR
Impact: Data

MDS-00575: failure to acquire write lock for {0}
Cause: An attempt to acquire a write lock for a document failed.
Action: Refer to the cause exception message in application logs for details on the actual cause of the failure.

Level: 1
Type: ERROR
Impact: Data
MDS-00576: failure to process {0} because metadata store "[1]" is read-only
Causes: An attempt was made to modify metadata in a read-only metadata store.
Action: Provide a writable metadata store to allow modification of the document.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00577: Could not acquire read/write lock for {0} within the default waiting time interval
Causes: Read/Write lock could not be obtained for a file within the waiting time interval.
Action: Try the operation again after some time.
Level: 1
Type: ERROR
Impact: Files

MDS-00578: Failed to process document {0} due to a critical error writing to the repository
Causes: A critical error occurred while the metadata document was being written to the repository.
Action: Contact the application administrator with cause exception message details to resolve the repository error.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00579: The document {0} does not have version {1} in the repository.
Causes: Specified version does not exist for the document.
Action: Provide an existing version for the document.
Level: 1
Type: ERROR
Impact: Data

MDS-00580: operation failed for {0} because no metadata-store was defined in the configuration for metadata-store-usage {0}.
Causes: incomplete configuration, no metadata-store was defined for the metadata-store-usage
Action: Define the metadataStore for the empty metadata-store-usage.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00581: error deleting partition {0} in file repository {1}
Causes: The directory represented by the file repository or partition is read only.
Action: Verify that the metadata path to the repository and partition exist and are writable.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00582: The MetadataStore {0} is writable but does override getMetadataStoreCommunicator() method.
Cause: Configuration used a MetadataStore that was writable but not supporting MetadataStoreCommunicator interface.
Action: Override getMetadataStoreCommunicator() in the MetadataStore class to return an appropriate MetadataStoreCommunicator instance.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00583: Could not release read/write lock for {0} because the lock was not found.
Cause: Read/Write lock could not be released because it was already removed from the lock cache.
Action: Contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Files

MDS-00584: The MDS repository's database platform is different than that of the archive. The repository's database platform is {1} whereas the archive's platform is {0}.
Cause: The MDS repository platform was not compatible with the archive provided.
Action: Use a platform compatible archive for the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00585: Failure to create deployment lineage because metadata store "{0}" is read-only
Cause: An attempt was made to create deployment lineage in a read-only metadata store. Deployment lineage in repository represents Application name and MAR module name.
Action: Configure a metadata store that supports deployment management, typically a DBMetadataStore.

Level: 1
Type: ERROR
Impact: Configuration
MDS-00586: ArchiveMetadataStore is restricted to be used with MDS Transfer operation only. Reading or writing files in ArchiveMetadataStore is not supported outside of transfer.

Cause: An attempt was made to read or write files in ArchiveMetadataStore outside of transfer.

Action: ArchiveMetadataStore is not supported outside of transfer. Either use this ArchiveMetadataStore for MDS transfer operation or use some other MetadataStore to store your files.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00588: Cannot replace the original archive file {0} with the final archive file {1} because the final archive file could not be renamed to {0}.

Cause: The final archive file could not be renamed to the original archive file name.

Action: Look at the cause exception for more details and take corresponding actions.

Level: 1
Type: ERROR
Impact: Data

MDS-00589: Error occurred while creating the final archive file {0}.

Cause: Some exception occurred while creating the final archive.

Action: Look at the cause exception for more details and take corresponding actions.

Level: 1
Type: ERROR
Impact: Data

MDS-00590: Error occurred while opening or closing the input/output stream for archive file {0}.

Cause: Some exception occurred while opening or closing the input/output stream for archive file.

Action: Look at the cause exception for more details and take corresponding actions.

Level: 1
Type: ERROR
Impact: Data

MDS-00591: "{0}" operation is not supported in ArchiveMetadataStore.

Cause: An unsupported operation has been attempted in ArchiveMetadataStore.

Action: Look at the ArchiveMetadataStore javadoc for supported operations.

Level: 1
Type: ERROR
Impact: Data
MDS-00592: Error occurred while initializing FileMetadataStore connection for the temporary directory.
Caused: An error occurred while initializing the FileMetadataStore connection for the temporary directory.
Action: Look at the cause exception for more details and take corresponding actions.
Level: 1
Type: ERROR
Impact: Data

MDS-00593: Unable to read the file \{0\} from archive \{1\}.
Caused: Some I/O Exception occurred while reading the given file from archive.
Action: Look at the cause exception for more details and take corresponding actions.
Level: 1
Type: ERROR
Impact: Data

MDS-00594: Unable to write the file \{0\} to archive \{1\}.
Caused: Some I/O Exception occurred while writing the given file to archive.
Action: Look at the cause exception for more details and take corresponding actions.
Level: 1
Type: ERROR
Impact: Data

MDS-00595: The parent directory \{0\} given in archive file path does not exist.
Cannot create ArchiveMetadataStore for the archive file \{1\}.
Caused: The parent directory mentioned in archive file path does not exist.
Action: Provide valid parent directory in archive file path to create ArchiveMetadataStore.
Level: 1
Type: ERROR
Impact: Data

MDS-00596: Failure to read document \{0\} because it is not found in "\{1\}".
Caused: The document to be read was not found.
Action: Verify that the document exists in the ArchiveMetadataStore before reading the document.
Level: 1
Type: ERROR
Impact: Data

MDS-00597: Failure to open the archive file \{0\}. Cannot create ArchiveMetadataStore for the archive file \{0\}.
Caused: Could not open the given archive file.
Action: Try creating ArchiveMetadata store with a valid archive file.

Level: 1
Type: ERROR
Impact: Data

MDS-00598: Cannot create an intermediary archive during export to the archive file {0}.
Cause: Either the intermediary archive file could not be created in the default temporary-file directory or an I/O error occurred.
Action: Look at the cause exception for more details and take action accordingly.

Level: 1
Type: ERROR
Impact: Data

MDS-00599: Cannot obtain a connection to the Archive Metadata Store for archive file {0}.
Cause: There was a problem obtaining a connection to the Archive Metadata Store.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00601: The XLIFF document has invalid target language {0}.
Cause: The target language specified was either null or empty.
Action: Specify a valid target language and retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00703: The name {0} is not a valid name under package {1} because {2} resource not considered child of the package.
Cause: A specified child resource was not a child of the package.
Action: Specify a valid child resource name, and then retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00704: invalid value {0} for property {1} on component {2}
Cause: An invalid property value was provided.
Action: Provide a valid property value and retry.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00771: A component with {0} "(1)" already exists.
Cause: The specified component already existed.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data

MDS-00907: unable to save document "(0)" because either a document or package of the same name already exists
Cause: A document or package with the same name already existed in the repository, perhaps because it was just created by another user.
Action: Retry the operation. If necessary, choose another name for the object being saved.

Level: 1
Type: ERROR
Impact: Data

MDS-00908: unable to create package "(0)" because a document or package of the same name already exists
Cause: A document or package with the same name already existed in the repository, perhaps because it was just created by another user.
Action: Retry the operation. If necessary choose another name for the object being saved.

Level: 1
Type: ERROR
Impact: Data

MDS-00910: unable to save the document because the database sequence "MDS/document_id_nn_s" is corrupt
Cause: The database sequence used for generating the unique document ID was corrupt.
Action: Retry the operation after deploying metadata to another MDS database repository partition.

Level: 1
Type: ERROR
Impact: Data

MDS-00911: Document with name "(0)" and version {1} does not exist in the repository.
Cause: The document was not found in the MDS repository.
Action: Specify a correct name for the document and retry the operation. Check if the document is deleted by another user.

Level: 1
Type: ERROR
Impact: Data

MDS-00912: MDS repository is incompatible with the middle tier. Repository version "\{0\}" is older than minimum repository version "\{1\}" required.
Cause: The MDS repository was older than minimum version required by the middle tier.
Action: Upgrade the MDS repository to the required version.

Level: 1
Type: ERROR
Impact: Upgrade

MDS-00913: MDS repository is incompatible with the middle tier. MDS version "\{0\}" is older than minimum MDS version "\{1\}".
Cause: The MDS version was older than the minimum required version for using the MDS repository.
Action: Upgrade the MDS library to the required version.

Level: 1
Type: ERROR
Impact: Upgrade

MDS-00915: MDS repository is incompatible with the middle tier for dumping or restoring metadata.
Cause: The MDS repository was older than minimum version required by the middle tier to dump or restore metadata.
Action: Retry the operation after upgrading the MDS repository to newer version or use compatible middle tier to perform the operation.

Level: 1
Type: ERROR
Impact: Upgrade

MDS-00916: MetadataStore configured for \{0\} does not support deployment management.
Cause: The metadata store configured for the resource did not support deployment management.
Action: Deployment management is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00918: Connection details for the MDS repository are incomplete. The values for "\{0\}" are invalid
Cause: The MDS repository connection details were invalid or missing.
Action: Specify correct values for the MDS repository details in the configuration and retry the operation.
Level: 1
Type: ERROR
Impact: Configuration

**MDS-00919: Internal error: The database context for this repository appears to be corrupt.**

**Cause:** The database context was invalid.

**Action:** Verify that the repository details are correct in the configuration.

Level: 1
Type: ERROR
Impact: Configuration

**MDS-00922: The ConnectionManager "{0}" cannot be instantiated.**

**Cause:** There was an error instantiating the ConnnectionManager class

**Action:** Contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Configuration

**MDS-00923: Unable to create sandbox "{0}"**

**Cause:** An error occurred during creation of sandbox.

**Action:** Look in the error message log for the exact reason for the failure.

Level: 1
Type: ERROR
Impact: Data

**MDS-00928: Invalid document reference, package "cust" should appear before package "trans" in the names of customization translation documents.**

**Cause:** An internal MDS document (one in package mdssys) was found with an invalid name, or an attempt was made to create a name object with such an invalid name.

**Action:** Avoid using package or document names containing path element "mdssys" which is reserved for internal MDS use. If necessary, remove such invalid documents from the metadata store.

Level: 1
Type: ERROR
Impact: Data

**MDS-00929: unable to look up name "{0}" in JNDI context**

**Cause:** The implementation class to use for initial context was not found.

**Action:** Verify that environment properties are configured using system properties or application resources files.

Level: 1
Type: ERROR
Impact: Configuration
MDS-00930: The JNDI location details for the registered datasource are incomplete.

**Cause:** JNDI location details were found to be incomplete.

**Action:** Provide complete JNDI location information in the configuration.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

MDS-00931: The database version is {0}.{1}, but MDS requires at least {2}.{3}.

**Cause:** The database version is older than the minimum database version required for hosting MDS repository.

**Action:** Upgrade the database to the minimum required version. Contact the database administrator for assistance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Upgrade

MDS-00932: Unknown database vendor {0}

**Cause:** The database vendor could not be identified.

**Action:** Verify that the MDS repository is hosted on supported database vendors.

**Level:** 1  
**Type:** ERROR  
**Impact:** Installation

MDS-00933: Cannot create data source using URL "{0}"

**Cause:** An error occurred while creating the data source using the specified URL.

**Action:** Verify that the URL specified is correct and retry the operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

MDS-00934: XDB is not supported on database platform {0}.

**Cause:** An attempt was made to store XML metadata in a non-XDB database.

**Action:** Verify that the correct MDS repository is being used.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-00935: Unable to complete operation even after maximum connection retries ({0}).

**Cause:** An error occurred while performing operation.

**Action:** Ensure that the database is running. Retry the operation later.

**Level:** 1  
**Type:** ERROR  
**Impact:** High Availability
MDS-00936: Fast Connection Failover is not supported on the underlying database connection (0).

**Cause:** The underlying database connection did not support fast connection failover, and retry-connection was set to true in either the config file, or programmatically.

**Action:** Either stop and then restart the database connection and configure it to allow fast connection failover, or do not attempt to set retry-connection to true.

**Level:** 1  
**Type:** ERROR  
**Impact:** High Availability

MDS-00937: A local transaction operation like commit or rollback cannot be used in a global transaction on connection "(0)".

**Cause:** The database connection was configured for global transactions, but MDS was not configured to support global transactions.

**Action:** Reconfigure the database connection to use local transactions. Change "tx-level" attribute on the MDS datasource to "local".

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

MDS-00938: Unable to get an ADF library class loader

**Cause:** MDS expects to retrieve a resource from an ADF library, but is unable to obtain an ADF library classloader.

**Action:** Consider whether the resource should be repackaged in an ADF library rather than an ordinary jar.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-01059: document with the name {0} missing in the source metadata store

**Cause:** The document to be transferred did not exist in the source metadata store.

**Action:** Verify that the document name is correct, and that it exists in the source metadata store.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-01061: Listener {0} cannot be instantiated.

**Cause:** The listener class did not exist.

**Action:** Verify that the name of the listener class is correct. Ensure that the class is available on the class path.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration
MDS-01104: finding no documents for processing that match the pattern provided
  Cause: No documents were found on the source metadata store that matched the pattern provided, or that matched the document name.
  Action: Provide another pattern or document name, or provide another metadata store in which to look for the documents.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-01105: invalid label {0}
  Cause: The label specified for the source metadata store did not exist.
  Action: Verify that the label name is correct, or provide a label that exists in the source metadata store.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-01106: The TransferTypeRestriction {0} can not be associated with given TransferType {1}.
  Cause: The given TransferTypeRestriction can not be associated with the specified TransferType.
  Action: Ensure that given TransferTypeRestriction is valid for the specified TransferType.

  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-01107: Post transfer label cannot be created in target store.
  Cause: Post transfer label cannot be created in the target store. Examine the cause exception messages to find the root cause of it.
  Action: Examine any accompanying messages to decide if further action is required.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-01108: TransferType cannot be null for ExtendedTransferType.
  Cause: TransferType provided to create ExtendedTransferType was null.
  Action: Provide valid TransferType to create ExtendedTransferType.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-01109: The target archive configured in ArchiveMetadataStore already exists. Cannot export the documents into an existing archive file.
**Cause:** The target archive already exists. Exporting the documents into an existing archive is not allowed.

**Action:** Export the documents into a non existing archive file.

**Level:** 1

**Type:** ERROR

**Impact:** Data

**MDS-01110:** Sandbox export operation allowed only from a database metadata store to an archive metadata store.

**Cause:** Either source metadata store is not a database or the target metadata store is not an archive in sandbox export operation.

**Action:** Configure source metadata store to be a database and target metadata store to be an archive in sandbox export operation.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01111:** Sandbox import operation allowed only from Archive Metadata Store to a Database Metadata store.

**Cause:** Either source metadata store is not an archive metadata store or the target metadata store is not a database in sandbox import operation.

**Action:** Configure source metadata store to be an archive metadata store and target metadata store to be a database in sandbox import operation.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01112:** Transfer unit list in a Sandbox export/import operation should have atleast one transfer unit.

**Cause:** Transfer unit list in Sandbox export/import operation empty.

**Action:** Ensure that there is at least one transfer unit to be transferred in sandbox export/import operation.

**Level:** 1

**Type:** ERROR

**Impact:** Data

**MDS-01113:** Sandbox metadata file required for import to a new sandbox operation.

**Cause:** Sandbox metadata file missing in source Archive metadata store in import to a new sandbox operation.

**Action:** Import to a new sandbox only from an archive store whose contents were exported from a sandbox and contain sandbox metadata document.

**Level:** 1

**Type:** ERROR

**Impact:** Data
MDS-01114: Sandbox with same name as the one imported in a sandbox import operation exists on the target metadata store.
   Cause: Sandbox with same name already exists on the target metadata store and the flag to force creation of sandbox is not set to true.
   Action: Pass true for forceSBCreation to TransferParams.createForSandboxImport() or destroy sandbox already existing with same name on the target metadata store in sandbox import operation.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01115: Source sandbox in a sandbox export operation does not contain metadata.
   Cause: Source sandbox in export operation was not created with metadata.
   Action: Export from a Sandbox that was created with metadata.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01116: Existing target sandbox in import operation does not contain metadata.
   Cause: Target sandbox in an import into an existing sandbox operation was not created with metadata.
   Action: Import into an existing sandbox that was created with metadata.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01117: Sandbox archive imported into an existing sandbox.
   Cause: The archive imported into an existing sandbox contains sandbox metadata.
   Action: Import only regular archives(that do not contain sandbox metadata) into an existing sandbox.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01118: Sandbox export operation not supported because the source MDS database repository is of older version that does not support this feature.
   Cause: Sandbox metadata is needed to transfer documents from sandbox. Source store being used does not support storing metadata for sandbox.
   Action: Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.
   Level: 1
   Type: ERROR
   Impact: Configuration
MDS-01119: Sandbox import operation not supported because the target MDS database repository is of older version that does not support this feature.

Cause: Sandbox metadata is needed to transfer documents from sandbox. But target store being used does not support storing metadata for sandbox.

Action: Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01120: Sandbox transfer unit list creation not supported because the source MDS database repository is of older version that does not support this feature.

Cause: Sandbox metadata is needed to transfer documents from sandbox. Source store being used does not support storing metadata for sandbox.

Action: Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01121: Document "mds-transfer-config.xml" cannot be read by MDSTransfer.

Cause: The /meta-inf/mds-transfer-config.xml document cannot be read from source store. Refer to cause exception for more information on the actual reason for failure.

Action: Look for messages that describe the cause exception, and then take the appropriate action.

Level: 1
Type: ERROR
Impact: Data

MDS-01122: Metadata Object Name "[0]" specified in the mds-transfer-config.xml to preserve user updated documents in target repository is not a valid metadata object name.

Cause: Metadata object name specified in /meta-inf/mds-transfer-config.xml to preserve user updated documents in target repository is not a valid metadata object name.

Action: Make sure the document name specified in mds-transfer-config.xml is a valid metadata object name but not a special document name.

Level: 1
Type: ERROR
Impact: Data

MDS-01123: The metadata path "[0]" specified in the mds-transfer-config.xml to preserve user updated documents in target repository is not a valid metadata path.

Cause: The metadata path specified in /meta-inf/mds-transfer-config.xml to preserve the user updated documents in target repository is not a valid metadata path.

Level: 1
Type: ERROR
Impact: Data
Action: Make sure the metadata path specified in mds-transfer-config.xml is a valid metadata path.

Level: 1
Type: ERROR
Impact: Data

MDS-01150: Reference is null or empty.
Cause: A reference value was null or empty.
Action: Use a valid reference value that is not empty or null.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01151: Id/LocationPath reference is null or missing.
Cause: An Id/LocationPath reference value was null or empty.
Action: Use a valid Id/LocationPath reference value that is not empty or null.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01153: invalid LocationPath expression "{0}"
Cause: The LocationPath expression was invalid.
Action: Use a valid LocationPath format. The LocationPath expression should follow the format "/text()" or "/text()[x]", where 'x' is the index of "text block".

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01154: invalid LocationPath expression "{0}"
Cause: The node index in the LocationPath expression was invalid.
Action: Change the node index in the LocationPath expression to a number greater than or equal to 1.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01158: Expecting a base document. Reference "{0}" is a special document.
Cause: A base document was expected, but the reference was a special document.
Action: Use a valid base document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01159: Expecting absolute document reference. Reference "{0}" has local element reference portion.
Cause: The supplied reference was not the expected type.

Action: Ensure the reference is of the expected type.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01160: Expecting absolute document reference. Reference "{0}" is a relative reference to the document.

Cause: The supplied reference was not the expected type.

Action: Ensure the reference is of the expected type.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01161: Reference "{0}" has an invalid character "{1}".

Cause: The supplied reference did not follow the MDS naming standard.

Action: Use valid characters for the reference.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01162: Reference "{0}" has an invalid XML attribute character.

Cause: The supplied reference did not follow the MDS naming standard.

Action: Use valid characters for the reference.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01163: invalid reference "{0}".

Cause: The supplied reference did not follow the MDS naming standard.

Action: Ensure that the reference follows the MDS naming standard.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01164: invalid reference "{0}" for a translation document

Cause: The supplied reference did not have the expected document extension (.xlf).

Action: Use the correct extension, .xlf, for the translation document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01165: invalid reference "{0}" for a customization document
Cause: The supplied reference did not have the expected document extension (.xml).
Action: Use the correct extension, .xml, for the customization document.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01166: invalid reference "[0]" for a metadata extension document
Cause: The supplied reference did not have the expected document extension (.rdf).
Action: Use the correct extension, .rdf, for the metadata extension document.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01167: There is no namespace declaration for the prefix "[1]" used in LocationPath expression "[0]".
Cause: The LocationPath expression was incomplete.
Action: Use a valid LocationPath format.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01168: Partition name "[0]" starts or ends with character "[1]". Partition name cannot contain leading or trailing spaces, ".", "."
Cause: The supplied partition name contained leading or trailing spaces, ".", ".".
Action: Ensure that the partition name follows the MDS naming standard for partitions.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01169: Partition name "[0]" has an invalid character "[1]".
Cause: The supplied partition name did not follow the MDS naming standard.
Action: Use valid characters for the partition name.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01170: Partition name is null or empty.
Cause: Partition name value was null or empty.
Action: Use a valid partition name that is not empty or null.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01171: The ID prefix generated by concatenating the layer name "(0)" and layer value "(1)" is not a valid MDS ID.

Cause: The ID prefix generated by concatenating the layer name with layer value did not follow the MDS ID naming standard.

Action: Ensure that the ID prefix generated by concatenating the layer name with layer value follows the MDS ID naming standard.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01200: This operation is not supported.

Cause: An MDS query operation was attempted, but this particular operation is not supported.

Action: Note the stack backtrace and context of the operation, and contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-01201: An invalid parameter cannot be used when constructing a query condition.

Cause: An invalid parameter was passed to the class ConditionFactory.

Action: Note the stack backtrace and context of the operation, and contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-01205: A SQL error is occurring when performing the query: "{0}" with binds {1}.

Cause: An MDS query on a database store led to a SQL error.

Action: Note the stack backtrace and context of the operation, including the reported SQL query and error, and contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-01206: The array size for the query must be greater than zero.

Cause: An MDS query specified a fetch unit size that was not positive.

Action: Note the stack backtrace and context of the operation and contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic
MDS-01207: The namespace mapping for the prefix "{0}" specified in the location path, is missing.

- **Cause:** During XPath evaluation, the namespace prefix was used, but the prefix was not mapped to a namespace.
- **Action:** Note the stack backtrace and context of the operation and contact Oracle Support Services.

- **Level:** 1
- **Type:** INCIDENT_ERROR
- **Impact:** Configuration

MDS-01250: The file path "{0}" does not exist.

- **Cause:** An invalid path was provided.
- **Action:** Retry the operation with a valid file path.

- **Level:** 1
- **Type:** ERROR
- **Impact:** Files

MDS-01251: The parameter file {0} has no namespace on the document element.

- **Cause:** A namespace was missing from the parameter file provided.
- **Action:** Provide a parameter file with valid namespace information.

- **Level:** 1
- **Type:** ERROR
- **Impact:** Data

MDS-01252: The parameter file {0} must have either {1} or {2} definition.

- **Cause:** No source stores or target stores information were provided in the parameter file.
- **Action:** Check the parameter file to have source and target store information and retry.

- **Level:** 1
- **Type:** ERROR
- **Impact:** Data

MDS-01253: The parameter file {0} must not have both {1} and {2} definitions.

- **Cause:** An attempt was made to transfer from source directory to target directory. Both source and target as directories is not supported.
- **Action:** Provide correct source and target definition. Either source or target should be a metadata store.

- **Level:** 1
- **Type:** ERROR
- **Impact:** Data

MDS-01254: The parameter file {0} contains same store definition for sourceStore and targetStore.

- **Cause:** An attempt was made to transfer from and to the same store. The definition for sourceStore cannot be the same as the definition for targetStore.
Action: Provide correct source and target information. Change either source or target store definition.

Level: 1
Type: ERROR
Impact: Data

MDS-01255: The property {0} has not been supplied.
Cause: The required property was missing from the parameter file.
Action: Check the parameter file and supply the required property. Refer to the MDS documentation for the correct syntax. A sample parameter file is also part of documentation.

Level: 1
Type: ERROR
Impact: Data

MDS-01258: The value {0} for property {1} is invalid.
Cause: An invalid property value was provided in the parameter file.
Action: Provide a valid property value. Refer to the MDS documentation for the correct syntax. A sample parameter file is also part of documentation.

Level: 1
Type: ERROR
Impact: Data

MDS-01259: The metadata store "{0}" cannot be instantiated.
Cause: An error occurred during the instantiation of the class for the metadata store.
Action: Verify that correct values are provided in the parameter file. Refer to the error messages in application logs that describe the cause exception for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data

MDS-01260: failure to process command-line arguments
Cause: Invalid command-line parameters were provided.
Action: Provide valid command-line parameters, and retry the operation. Refer to the MDS documentation for syntax of the tool parameters, or run the tool without parameters in order to get the Help message.

Level: 1
Type: ERROR
Impact: Data

MDS-01262: failure of transfer operation on a read-only target metadata store
Cause: The target metadata store used for transfer was read-only, for example a classpath store.
Action: Provide a writable target metadata store.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01263: operation failure on the resource {0} because source metadata store is read-only
Cause: An attempt was made to delete, create, update or get a mutable metadata object from a read-only source metadata store.
Action: Provide a writable source metadata store.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01264: The given element must contain either "customization" or "translation" configuration.
Cause: A customization or a translation configuration was missing for an element.
Action: Examine the transfer parameter file for valid MDS configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01265: Invalid parameter file {0}. Reason: <{1}:{2}> {3}
Cause: Parameter file provided was not valid.
Action: Provide a valid parameter file. Refer to the MDS documentation for the correct syntax. A sample parameter file is also part of documentation. Refer to sample parameter for correct syntax.

Level: 1
Type: ERROR
Impact: Files

MDS-01266: The associated customization document is missing for a given customization class {0} for the given document name {1}.
Cause: The associated customization document for the given customization class did not exist.
Action: If the associated customization document was to be transferred, verify that it exists. Otherwise, no action is required.

Level: 1
Type: ERROR
Impact: Data

MDS-01267: The associated translation document is not found for a given locale {0} for the given document name {1}.
Cause: Associated translation document did not exist for the given locale.
Action: If the associated translation document was expected to be transferred, verify if it exists, otherwise, no action required.

Level: 1
Type: ERROR
Impact: Data

MDS-01268: The associated extended metadata document for the given document name {0} is missing.
Cause: No associated extended metadata document for the given document name existed.
Action: If the document was to be transferred, verify that the document exists. Otherwise, no action is required.

Level: 1
Type: ERROR
Impact: Data

MDS-01270: Opening and closing parentheses do not match.
Cause: Either an opening or closing parentheses was missing.
Action: Check and correct the namespace mappings provided. Each opening parentheses should have an equivalent closing parentheses and vice versa.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01271: Cannot get the dependency registry
Cause: An error occurred while getting the dependency registry.
Action: Retry the operation. If the problem persists, look for messages that describe the cause exception for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01272: unable to read mds-webapp-config.xml file
Cause: The mds-webapp-config.xml file was invalid.
Action: Confirm that the mds-webapp-config.xml file for the application is well formed, and valid.

Level: 1
Type: ERROR
Impact: Files

MDS-01273: The operation on the resource {0} failed because source metadata store mapped to the namespace {1} is read only.
Cause: An attempt was made to delete, create, update or get a mutable metadata object from a readonly source metadata store.
Action: Provide a writable source metadata store.

Level: 1
Type: ERROR
Impact: Configuration
MDS-01301: Element "|(1)|", namespace "|(0)|" is not a valid child under parent "|(3)|", namespace "|(2)|".
Cause: An attempt was made to add, insert or replace a child element of the wrong type.
Action: Check the schema definition and ensure that the child element is the correct type.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01302: failure to load schema file "|(0)|"
Cause: An exception occurred in the XM LEF layer during processing of the schema definitions.
Action: Look for messages that describe the cause exception, and then take the appropriate action.
Level: 1
Type: ERROR
Impact: Data

MDS-01303: failure to register grammar from schema file "|(0)|"
Cause: An exception occurred in the XM LEF layer during addition of schema definitions.
Action: Look for messages that describe the cause exception, and then take the appropriate action.
Level: 1
Type: ERROR
Impact: Data

MDS-01305: failure to locate schema file "|(0)|".
Cause: The schema definition file was not found.
Action: Verify that the schema file name is correct, and that it is in the correct location.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01306: Grammar from a Web application can be added only once.
Cause: There were multiple method calls to add grammar from a web application.
Action: Verify that a grammar definition has already been added for the given MDSInstance and ServletContext. If it has then remove the calls to add it multiple times.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01307: no schema files for processing
Cause: No schema files were found against which beans can be generated.
Action: Pass an existing schema file to the bean generator.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01308: Event "[0]" is not supported.
Cause: An attempt was made to use event types that are not supported for the selected content model.
Action: Use only the event types that are allowed for the selected content model.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01309: ContentModelPipeline is empty.
Cause: The contentModelPipeline contained an empty or null builder list.
Action: A list of one or more valid builders must be available in the ContentModelPipeline.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01310: Invalid ContentModelPipeline. Missing {0}.
Cause: The expected builder was not available in builder list of the ContentModelPipeline.
Action: Valid builders must be supplied to the ContentModelPipeline.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01311: The DOM tree does not support the DOM event model.
Cause: This DOM Document did not implement EventTarget interface.
Action: Verify whether the Oracle XML Developer's Kit is used.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01312: Change-list transaction state is invalid.
Cause: The current change-list transaction state is invalid for the customization operation performed.
Action: Ensure Change-list to be in valid transaction state to perform the necessary customization operation.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01313: The argument for document cannot be null.
  Cause: The argument for DocumentName was null.
  Action: Provide a valid DocumentName.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-01314: TypeAnnotationProvider cannot be null.
  Cause: The argument for TypeAnnotationProvider was null.
  Action: Provide a valid TypeAnnotationProvider.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-01316: Support for XPath is not implemented yet.
  Cause: Support for XPath has not been implemented yet.
  Action: Provide a valid Configurable ID.

  Level: 1
  Type: ERROR
  Impact: Configuration

MDS-01319: JAXP support is not available. Falling back to using Oracle XML Developer's Kit for parsing the document {0}.
  Cause: JAXP support was not available.
  Action: None.

  Level: 1
  Type: ERROR
  Impact: Configuration

MDS-01320: Modifying the prefix declaration for {0} from "{1}" to "{2}" in document {3} through customizations is not supported.
  Cause: An attempt was made to change an existing prefix declaration.
  Action: Avoid attempts to change existing prefix declarations.

  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-01321: Node type should be one of ImmutableModelNode.ELEMENT or ImmutableModelNode.TEXT or ImmutableModelNode.CDATA.
  Cause: The node was not of the type ImmutableModelNode.ELEMENT or ImmutableModelNode.TEXT or ImmutableModelNode.CDATA.
  Action: Ensure the node type is one of the following types: ImmutableModelNode.ELEMENT or ImmutableModelNode.TEXT or ImmutableModelNode.CDATA.
Level: 1
Type: ERROR
Impact: Data
MDS-01322: Value "\{0\}" does not satisfy "\{1\}" type.
  Cause: The data type conversion failed.
  Action: Verify that the expected XSD built-in simple data type and the passed-in string value are convertible.

Level: 1
Type: ERROR
Impact: Data
MDS-01323: Value "\{0\}" has an incorrect number of characters for a base64Binary.
  Cause: The value did not represent a valid Base64Binary.
  Action: Verify that the input value is valid.

Level: 1
Type: ERROR
Impact: Data
MDS-01324: Unknown XML schema built-in type "\{0\}"
  Cause: An attempt was made to use an unknown XML schema built-in type.
  Action: Use only valid XML schema built-in types.

Level: 1
Type: ERROR
Impact: Data
MDS-01325: unable to load type definition "\{0\}"
  Cause: Could not load this type definition because the specified location did not exist.
  Action: Ensure that the specified location for the type definition exists.

Level: 1
Type: ERROR
Impact: Configuration
MDS-01326: Loading of type definition from element "\{0\}" is not supported.
  Cause: An attempt was made to load a type definition from the specified element that is not supported in the MDS configuration.
  Action: Examine the schema definition to ensure that the entry specified in type definition is correct.

Level: 1
Type: ERROR
Impact: Configuration
MDS-01327: unable to load data from "\{0\}" into \{1\}
  Cause: An error occurred while loading the content of this configuration element.
Action: Examine the schema definition to ensure that the content of this configuration element is correct.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01328: unable to load element "[0]" into {1}
Cause: An error occurred while loading this configuration element.
Action: Examine the schema definition to ensure this configuration element is correctly specified in the MDS configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01329: unable to load element "[0]"
Cause: An error occurred while loading this configuration element.
Action: Examine the schema definition to ensure this configuration element is correctly specified in the MDS configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01330: unable to load MDS configuration document
Cause: An I/O or parsing error occurred while loading the MDS configuration document.
Action: Verify that the URL is correct, and ensure that the document contains valid MDS configuration information.

Level: 1
Type: ERROR
Impact: Files

MDS-01331: unable to load MDS configuration document "[0]"
Cause: An error occurred in loading the content of MDS configuration document.
Action: Verify that the URL is correct, and ensure that the document contains valid MDS configuration information.

Level: 1
Type: ERROR
Impact: Files

MDS-01332: Class {0} is not a subclass or implementation of {1}.
Cause: The class specified in the configuration information did not extend the required class, or implement the required interface.
Action: Ensure that the class specified in the configuration information extends the correct class, or implements the correct interface.

Level: 1
Type: ERROR
Impact: Configuration
MDS-01333: missing element "[0]"
   Cause: This element was missing from the MDS configuration information.
   Action: Ensure that the element is specified in the configuration information.
   Level: 1
Type: ERROR
Impact: Configuration
MDS-01334: missing element "[0]" in document "[1]"
   Cause: This element was missing from the MDS configuration information.
   Action: Ensure that this element is specified in the configuration document.
   Level: 1
Type: ERROR
Impact: Configuration
MDS-01335: namespace "[0]" mapped to metadata-store-usage "[1]" but its definition was not found in MDS configuration.
   Cause: Metadata-store-usage element that was referenced by a namespace not found in MDS configuration.
   Action: Ensure that this element is specified in MDS configuration.
   Level: 1
Type: ERROR
Impact: Configuration
MDS-01336: No XML element is provided to create [0].
   Cause: A null XML element was passed to the constructor of this configuration object.
   Action: Ensure that a valid XML element is provided to create a new instance of this configuration.
   Level: 1
Type: ERROR
Impact: Configuration
MDS-01337: No URL is provided to create [0].
   Cause: A null URL was passed to the constructor of this configuration object.
   Action: Ensure that a valid URL is provided to create a new instance of this configuration.
   Level: 1
Type: ERROR
Impact: Configuration
MDS-01340: More than one metadata store can be resolved for the namespace "[0]".
Cause: There were multiple namespace to metadata store mappings in the persistence configuration that satisfied the request for the metadata store of a given namespace.

Action: Correct the namespace mapping in persistence configuration to ensure that the namespace is mapped to only one metadata store.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01341: Namespace mapping for "{0}" is overridden by namespace mapping for "{1}"; the first mapping is not used.

Cause: A conflicting mapping to this namespace has already been defined in the persistence configuration.

Action: Correct the namespace mapping in the persistence configuration to ensure that there is no conflicting mapping to this namespace.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01342: No metadata store is mapped to the namespace "{0}".

Cause: No namespace mapping could be found in the persistence configuration for the specified namespace.

Action: Ensure that a correct namespace is passed into the method concerned, or alter the application configuration to define the specified namespace.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01343: There is a duplicate file extension mapping for "{0}".

Cause: A mapping to this file extension has already been defined in the file type configuration.

Action: Remove the duplicate file extension mapping from the file type configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01344: cannot create {0} due to null parameter

Cause: A null parameter was passed to the constructor of this configuration object.

Action: Ensure that a valid parameter is provided to create a new instance of this configuration.

Level: 1
Type: ERROR
Impact: Configuration
MDS-01346: The given namespace path "[0]" is not a valid path.
Cause: An invalid path was provided to create a namespace.
Action: Ensure that a valid path is provided to create a namespace.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01347: Base restriction is supported only for classpath store or servlet context store: namespace "[0]" mapped to "[1]".
Cause: The base restriction was specified for a metadata store other than the classpath metadata store and servlet context store.
Action: Correct the namespace mapping in the configuration to ensure that the base restriction is specified only for the classpath store or servlet context store.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01348: unable to save configuration document to "[0]"
Cause: An I/O error occurred while writing the configuration to a file.
Action: Check the file system and ensure that the file location is writable.
Level: 1
Type: ERROR
Impact: Files

MDS-01349: unable to read existing configuration document "[0]" to be updated
Cause: An I/O or parsing error occurred while reading the configuration file.
Action: Ensure that the configuration file does exist and has valid contents.
Level: 1
Type: ERROR
Impact: Files

MDS-01350: Adding namespace "[0]" mapped to "[1]" conflicts with existing namespace "[2]" mapped to "[3]".
Cause: An attempt was made to add a new namespace that conflicted with an existing namespace because it mapped to a different repository.
Action: Ensure that the new namespace does not map to a different repository if the new namespace is a super-namespace or sub-namespace of existing namespaces.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01351: Adding namespace "[0]" with "[1]" restriction conflicts with existing namespace "[2]" with "[3]" restriction.
Cause: An attempt was made to add a new namespace that conflicted with an existing namespace in the namespace restriction.
**Action**: Ensure that the new namespace does not conflict with existing namespaces in the namespace restriction if the new namespace is a super-namespace or sub-namespace of existing namespaces.

**Level**: 1  
**Type**: ERROR  
**Impact**: Configuration

**MDS-01352**: Customization configuration with granular mapping "(0)" is unsupported; only the slash, "/", is allowed.  
**Cause**: An attempt was made to add an invalid namespace mapping of the customization configuration. Only one namespace to customization class list mapping is currently allowed, and that namespace has to be a slash (\/).  
**Action**: Ensure that only the slash (\/) is specified in the namespace mapping of the customization configuration.

**Level**: 1  
**Type**: ERROR  
**Impact**: Configuration

**MDS-01353**: unable to retrieve customization layer values from "(0)"  
**Cause**: An I/O or parsing error occurred while reading the specified file to retrieve customization layer values.  
**Action**: Ensure that the file does exist and has valid contents.

**Level**: 1  
**Type**: ERROR  
**Impact**: Files

**MDS-01355**: Both TypeConfig parameters contain Grammar Providers. Only one Grammar Provider is allowed.  
**Cause**: A Grammar Provider was specified in multiple type configuration sources.  
**Action**: Ensure that only one Grammar Provider is specified in the type Configuration.

**Level**: 1  
**Type**: ERROR  
**Impact**: Configuration

**MDS-01356**: Both TypeConfig parameters contain Metadata Providers. Only one Metadata Provider is allowed.  
**Cause**: A Metadata Provider was specified in multiple type configuration sources.  
**Action**: Ensure that only one Metadata Provider is specified in the type Configuration.

**Level**: 1  
**Type**: ERROR  
**Impact**: Configuration

**MDS-01357**: MDS configuration is not compatible with JAXB 1.0.
Cause: JAXB 1.0 jar file (xml.jar) was found on the classpath before any JAXB 2.0 jar files.

Action: Ensure that JAXB 2.0 jar files appear on the classpath before JAXB 1.0 jar file (xml.jar).

Level: 1
Type: ERROR
Impact: Configuration

MDS-01358: Invalid MDS configuration. Configuring multiple metadata stores as the default repository for customizations.

Cause: Multiple metadata stores were configured as the default repository for customizations in the MDS configuration.

Action: Ensure that only a single metadata store is configured as the default repository for customizations.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01359: The namespace used (http://xmlns.oracle.com/mds/config_10_1_3_001) in the configuration document is deprecated. Update the configuration document to use "http://xmlns.oracle.com/mds/config" as the namespace.

Cause: The namespace used (http://xmlns.oracle.com/mds/config_10_1_3_001) in the configuration document is deprecated.

Action: Update the configuration document to use "http://xmlns.oracle.com/mds/config" as the namespace.

Level: 1
Type: WARNING
Impact: Configuration

MDS-01360: Invalid MDS configuration. The attribute file-type-extension on the file-type element is missing for file type configuration.

Cause: The attribute file-type-extension was not specified on the file-type element for file type configuration.

Action: Ensure that a valid file-type-extension attribute is specified for every file-type element.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01361: cannot add XSD grammar

Cause: An attempt was made to add XSD grammar made by passing in a SchemaGrammarProvider.

Action: Ensure that the grammar provider is obtained using oracle.jdeveloper.webapp.runtime.WebAppDesignContext.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01362: Failed to auto-purge MDS repository: "{0}".
Cause: MetadataStore was scheduled for auto-purge after the MDSInstance was released
Action: Try later and contact support if persists.
Level: 1
Type: WARNING

Impact: Other

MDS-01363: Failed to locate datasource with JNDI name "{0}" configured for the DBMetadataStore, defaulting to use ClassPathMetadataStore.
Cause: Application was configured with DBMetadataStore using JNDI datasource and JNDI lookup failed when running outside application server.
Action: No action required if defaulting to ClasspathMetadataStore is acceptable. Otherwise, use appropriate configuration such as FileMetadataStore.
Level: 1
Type: WARNING

Impact: Configuration

MDS-01365: Multiple metadata stores found with deploy-target attribute set to true, only one allowed per configuration.
Cause: Multiple metadata stores were configured as the deployment target.
Action: Ensure that only a single metadata store is configured for deployment.
Level: 1
Type: ERROR

Impact: Configuration

MDS-01366: Cannot find a metadata store with deploy-target attribute set to true
Cause: A single metadata store must be configured as a deploy target. None was found.
Action: Ensure that a single metadata store is configured for deployment.
Level: 1
Type: ERROR

Impact: Configuration

MDS-01367: Failed to create {0}. Invalid MDS configuration specified in: "{1}"
Cause: Declarative MDS configuration is invalid.
Action: Specify correct mds configuration information and try creating the configuration again.
Level: 1
Type: ERROR

Impact: Configuration

MDS-01368: Variable "{0}" used in configuration document is not defined either as system property or as environment variable.
**Cause:** This variable was not defined.

**Action:** Ensure that this variable is defined before loading the configuration.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01369: Variable declaration in "\{0\}" in configuration document is incorrect.**

**Cause:** Variable did not either start with "${" or it did not end with "}".

**Action:** Ensure that the configuration variable is correctly declared in the form ${var}.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01370: MetadataStore configuration for metadata-store-usage "\{0\}" is invalid.**

**Cause:** MetadataStore class or some of its properties were not valid.

**Action:** Ensure that the MetadataStore class exists and all required properties are valid. See message of the cause exception for more information on the actual reason for failure.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01371: ADF security is not configured in "\{0\}", password can not be securely processed.**

**Cause:** ADF security configuration was not found in the config file.

**Action:** Set the password using JDeveloper to ensure required configuration is generated.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01373: unable to retrieve password.**

**Cause:** unable to retrieve the password due to exception in security layer.

**Action:** See message of the cause exception for more information on the actual reason for failure.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01374: unable to save password.**

**Cause:** unable to save the password due to exception in security layer.

**Action:** See message of the cause exception for more information on the actual reason for failure.

**Level:** 1
Type: ERROR
Impact: Configuration

MDS-01375: No password defined for DBMetadataStore in configuration file or in the wallet file.
Cause: DBMetadataStore uses JDBC based configuration but no password specified.
Action: Set the password for the DBMetadataStore using JDeveloper.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01376: Unable to get database connection from data source "{1}" configured with JNDI name "{0}".
Cause: Failed to retrieve a database connection from the data source either because the data source is not configured correctly or the database details are not correct.
Action: Test the data source to check if it is correctly configured and if the database can be accessed. See message of the cause exception for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01377: Unable to get database connection from data source configured with JNDI name "{0}".
Cause: Failed to retrieve a database connection from the data source either because the data source is not configured correctly or the database details are not correct.
Action: Test the data source to check if it is correctly configured and if the database can be accessed. See message of the cause exception for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01378: metadata-store-usage attribute should not be set on namespace "{0}" defined in mds-config.xml.
Cause: metadata-store-usage attribute was set on the specified namespace in mds-component-config, but this namespace is always assumed to map to deploy-target metadata store.
Action: Ensure that the metadata-store-usage attribute is removed on specified namespace in mds-config.xml.
Level: 1
Type: ERROR
Impact: Configuration
MDS-01379: Tenant scope ":0:" is not valid for namespace ":1:" with namespace restriction ":2:".

Cause: Tenant scope configured for the namespace is not supported with the configured namespace restriction.

Action: Resolve the conflict between tenant scope and namespace-restriction in the application configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01380: Tenant scoped base metadata in package ":0:" can not have global customization layer ":1:".

Cause: Tenant scope GLOBAL on the specified customization layer conflicts with tenant scope TENANT on the base namespace.

Action: Resolve the conflicts between the tenant scope on the base namespace and that on the customization layer.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01381: Customization layer ":0:" has been configured more than once with the same tenant scope.

Cause: Duplicate configuration for the same customization layer was found.

Action: Remove the duplicate customization layer configuration from adf-config.xml of the application or component config (mds-config.xml) on classpath.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01382: Customization layer ":0:" has been configured more than once with conflicting tenant scopes.

Cause: Conflicting tenant scope configurations was found for the same customization layer.

Action: Remove the incorrect customization layer configuration from adf-config.xml of the application or component config (mds-config.xml) on classpath.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01383: Sandbox name should be provided for registering a sandbox change listener.

Cause: No sandbox name was provided for registering the sandbox change listener.

Action: Provide a valid sandbox name when registering the sandbox change listener.
MDS-01384: Sandbox change listener is not found when registering the lifecycle listener for sandbox {0}.
Cause: The SandboxChangeListener being registered was null.
Action: Provide a valid sandbox change listener when registering the lifecycle listener for the sandbox.

MDS-01385: Tenant scope "{0}" as base tenant scope is not valid for namespace "{1}".
Cause: The specified tenant scope type could not be configured as base tenant scope for the namespace.
Action: Use the correct base tenant scope parameter to create the namespace.

MDS-01386: Multitenant application can not be configured with metadata store "{0}" that does not support multitenancy.
Cause: A metadata store that does not support multitenancy was configured for a multitenant enabled application.
Action: Configure a metadata store such as DBMetadataStore that supports multitenancy.

MDS-01387: Tenant with id "{0}" is not allowed to change the autopurge settings; only the global admin can change this configuration.
Cause: A tenant cannot change the autopurge configuration.
Action: Only a global admin can change the autopurge configuration.

MDS-01388: Unable to set cache size in Java Object Cache to {0} KiloBytes.
Cause: The cache size requested was invalid either because it was negative or it was too large for the Java Object Cache.
Action: Check that the specified size is >0 and within the limit of Java Object Cache for a Named Cache.
**Impact:** Programmatic

**MDS-01389:** ContentType can not be specified for Streamed documents.

**Cause:** Conflicting settings between ContentType and isStreamed were found in ContentConfig.

**Action:** Change ContentOptions to use either ContentType or isStreamed.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01390:** An audit event name for component "(0)" is not specified.

**Cause:** An audit event was defined, but a name for the event was not specified.

**Action:** Give the audit event a valid name.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01391:** "(0)" is not a valid audit event name.

**Cause:** An invalid audit event name was found. An audit event name should start with a letter and contain only letters and digits.

**Action:** Specify a valid name for the audit event.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01392:** Conflicting definitions were found for the audit event with name "(0)" and audit-component "(1)".

**Cause:** Conflicting audit event definitions were found in audit-component element.

**Action:** Remove or modify one of the conflicting audit events.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01393:** Multiple audit events named "(0)" are defined for component "(1)".

**Cause:** Duplicate audit events were found in audit-component element.

**Action:** Remove or modify one of the duplicate audit events.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01400:** Read-only extended metadata resource "(0)" is not writable.

**Cause:** An attempt was made to update a read-only extended metadata resource.

**Action:** Ensure that the metadata object is mutable before getting the extended metadata.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01401: Updating a node in one document "[1]" using a node from a different document "[0]" is not allowed.
Cause: The node being added or inserted was from a different metadata object. They must be from the same base document.
Action: Ensure that the node being inserted is from the correct metadata object.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01402: attempting to update an immutable MElement: "[0]"
Cause: The MElement being updated was immutable.
Action: Check that the MElement in question really is mutable.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01403: Updating a mutable MElement using an immutable MElement: "[0]" is not allowed.
Cause: An attempt was made to update a mutable MElement using an immutable MElement.
Action: Verify that the child MElement being used for the update is mutable.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01404: Customization to replace root node of {0} is not allowed.
Cause: An attempt was made to replace the root node as part of a customization.
Action: Replace the root node in the base document, or modify the existing root node instead.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01450: missing GUID
Cause: The application removed an object's GUID while editing its XML metadata content.
Action: Fix the application so it does not tamper with MDS GUIDs.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01451: GUIDs do not match.
Cause: The application altered an object's GUID while editing its XML metadata content.

Action: Fix the application so it does not tamper with MDS GUIDs.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01452: GUID is null.
Cause: An attempt was made to retrieve a metadata object or document by GUID, but the given GUID was null.
Action: Fix the application so it passes a valid GUID to the method in question.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01455: multiple GUIDs on metadata object {0}
Cause: The application set multiple GUID values while editing an object's XML metadata content.
Action: Fix the application so it does not tamper with MDS GUIDs.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01456: invalid GUID on metadata object {0}
Cause: The application set an object's GUID to an invalid value while editing its XML metadata content.
Action: Fix the application so it does not tamper with MDS GUIDs.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01457: GUID feature not available
Cause: The application attempted to retrieve an object by GUID from a metadata store that does not yet support this.
Action: Fix the application so it does not attempt this, or configure the application to use a different type of metadata store.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01458: GUID must not be present.
Cause: The application set an object's GUID value while editing its XML metadata content.
Action: Fix the application so it does not tamper with MDS GUIDs.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01460: GUIDs on DOM Document do not match.
Cause: The application set an object's GUID to a different value while editing its XML metadata content.
Action: Fix the application so it does not tamper with MDS GUIDs.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01461: unable to create document [0] in the metadata repository; a document with the same name or GUID already exists
Cause: An attempt was made to import or create a document with a name or GUID that is already used by an existing document.
Action: Delete the document in the MDS repository prior to import or creation.

Level: 1
Type: ERROR
Impact: Data

MDS-01462: GUID feature is not supported in the classpath store.
Cause: The application attempted to retrieve an object by GUID from the classpath metadata store that does not support this.
Action: Fix the application so it does not attempt retrieval by GUID, or configure the application to use a different type of metadata store.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01464: unable to save GUIDRegister [0]
Cause: The GUID register (GUID index files) could not be written.
Action: Verify that the application has write permission for the given file, and that the disk is not full.

Level: 1
Type: ERROR
Impact: Files

MDS-01465: unable to remove node [0] from the GUIDRegister
Cause: The given node was not removed from the GUID register, possibly because it was not found.
Action: Delete the GUID register files, restart the application and try the operation again. If that fails, contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Data
MDS-01466: unable to create GUIDRegister directory {0}
Cause: The owning directories for the GUID register (GUID index files) were not created.
Action: Verify that you have permission to create the parent directories for the given file name.
Level: 1
Type: ERROR
Impact: Files

MDS-01468: A different GUID is already registered for document {0}.
Cause: The GUID register has become corrupted.
Action: Delete the GUID register files and restart the application (the files will then be re-created).
Level: 1
Type: ERROR
Impact: Data

MDS-01469: unable to remove old GUIDRegister store path {0}
Cause: Old GUID register files were not deleted.
Action: Verify that you have permission to delete these files.
Level: 1
Type: ERROR
Impact: Files

MDS-01470: more than one GUID is registered for document {0}
Cause: The GUID register has become corrupted.
Action: Delete the GUID register files and restart the application (the files will then be re-created).
Level: 1
Type: ERROR
Impact: Data

MDS-01471: more than one document is registered for GUID {0}
Cause: The GUID register has become corrupted.
Action: Delete the GUID register files and restart the application (the files will then be re-created).
Level: 1
Type: ERROR
Impact: Data

MDS-01472: GUID is missing in file {0}
Cause: No GUID was found in the given file but the metadata object type definition indicated there should be one.
Action: Re-create the metadata object or correct its type definition not to require a GUID.
Level: 1  
Type: ERROR  
Impact: Data  

MDS-01500: The MDSObject {0} is an XML document and cannot be loaded using StreamedObject API.  
Cause: An attempt was made to load an XML document via StreamedObject API.  
Action: Retry the operation using MetadataObject API or use a non-XML document.

Level: 1  
Type: ERROR  
Impact: Programmatic  

MDS-01501: The MDSObject {0} is not an XML document and cannot be loaded from MetadataObject API.  
Cause: An attempt was made to load a streamed object (non-XML document) using MetadataObject API.  
Action: Retry the operation using StreamedObject API or use a document containing valid XML.

Level: 1  
Type: ERROR  
Impact: Programmatic  

MDS-01502: The MDSObject "{0}" is an XML document and cannot be saved using StreamedObject API.  
Cause: An attempt was made to save an XML document using StreamedObject API.  
Action: Retry the operation using MetadataObject API.

Level: 1  
Type: ERROR  
Impact: Programmatic  

MDS-01503: The content of StreamedObject {0} cannot be read.  
Cause: An attempt to read the StreamedObject content failed.  
Action: Look at the error message and exception stack in the application logs to determine the reason for the failure.

Level: 1  
Type: ERROR  
Impact: Data  

MDS-01504: The document {0} is either registered as a streamed file type or is a non-XML file extension and cannot be created using MetadataObject API.  
Cause: An attempt was made to create an MDSObject named with a streamed object (non-XML) extension using MetadataObject API.  
Action: Retry the operation using StreamedObject API.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01600: The Dependency Analyzer requires a DependencyFilter.
Cause: Either no filter was supplied, or the filter supplied was null.
Action: Supply a non-null filter.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-01601: The relationship role name {0} is a duplicate.
Cause: A role name defined in a relationship had already been used.
Action: Ensure that the toParentRole and toChildRole in a relationship have not already been used by another relationship.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-01602: cannot locate the element type {0} in namespace {1} defined for the relationship
Cause: The element type did not exist in the given namespace.
Action: Ensure that the element type exists in the given namespace.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-01604: The relationship from {0} to {1} is invalid because the latter is not a valid MDS reference.
Cause: An invalid MDS reference was specified as the parent.
Action: Ensure the parent reference is a valid MDS reference.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-01605: The relationship from {0} to {1} is invalid because the latter does not exist.
Cause: No parent element was found matching the MDS reference supplied.
Action: Ensure that the parent reference in the relationship points to an existing element.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-01606: The relationship from {0} to {1} is invalid because the latter is of incorrect type.
Cause: The child element referenced a parent of the wrong type.
**Action:** Ensure that the parent type matches the one stipulated in the relationship definition.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01607:** The relationship from \{0\} to \{1\} is invalid because type information is not available for the latter.

**Cause:** No type definition could be found for the parent.

**Action:** Ensure that the parent type information is available.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01608:** The relationship from \{0\} to \{1\} is invalid because the latter maps to a different store.

**Cause:** The parent and child objects in the relationship have been mapped to different stores.

**Action:** Ensure that the parent maps to the same store as the child object.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01609:** The document \{0\} contains relationships that do not conform to the relationship definition.

**Cause:** Constraints in this document's relationship definitions were violated.

**Action:** Ensure that the relationships conform to the constraints in the relationship definition.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01610:** Some of the changes in the MDS session are not valid.

**Cause:** A change was made in the MDS session that was not valid.

**Action:** Check the changes made and ensure each of them is valid.

**Level:** 1

**Type:** ERROR

**Impact:** Data

**MDS-01611:** not saving changes in MDS session because some changes are not valid

**Cause:** A change made in the MDS session was not valid.

**Action:** Check all the changes made and ensure that all changes are valid.

**Level:** 1

**Type:** ERROR
Impact: Data

MDS-01612: The object [0] cannot be deleted because it is referenced by [1].
 Cause: An attempt was made to delete an element that was being referenced by a child object.
 Action: Remove the child reference to this object so the object can be deleted.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01613: The MetadataObject [0] cannot be deleted because of relationship integrity constraints.
 Cause: An attempt was made to delete an object that was still being referenced.
 Action: Remove the child references to the metadataObject so that it can be deleted.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01614: Rename is not allowed because integrity checking is not turned on in the object [1] in MetadataObject [0].
 Cause: Integrity checking was switched off so it was not possible to check whether the rename would have broken any relationship integrity constraints.
 Action: Ensure that integrity checking is turned on.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01615: failure to rename [0] because there is no reference attribute in MetadataObject [1], element [2]
 Cause: A child object could not reference the renamed object as its current reference was invalid.
 Action: Confirm that all the references in the child object are valid.

Level: 1
Type: ERROR
Impact: Data

MDS-01620: The untyped dependency with the following registration details cannot be inserted: [0], [1], [2], [3].
 Cause: The dependency could not be registered in the database repository due to a SQL exception.
 Action: Correct the cause of the SQL exception and retry the untyped dependency registration.

Level: 1
Type: ERROR
Impact: Data
MDS-01621: The untyped dependency information for {0} could not be removed.
   **Cause:** An attempt to remove untyped dependency information failed either because the document was invalid or there was a SQL exception.
   **Action:** Verify that the document and its dependencies are valid, or correct the cause of any SQL exceptions.

   **Level:** 1  
   **Type:** ERROR  
   **Impact:** Data

MDS-01622: There is no analyzer to unregister.
   **Cause:** No analyzers were supplied to be unregistered.
   **Action:** Supply the DependencyAnalyzer to be unregistered.

   **Level:** 1  
   **Type:** ERROR  
   **Impact:** Configuration

MDS-01630: invalid operation in a customized context on an element that could participate in a relationship: {0}
   **Cause:** Within a customized context there was an attempt to insert an element without first deleting it as part of a composite move.
   **Action:** Within the customized context, do not attempt inserts on elements without first deleting them as part of a composite move.

   **Level:** 1  
   **Type:** ERROR  
   **Impact:** Programmatic

MDS-01631: In a customized context, an element that could participate in a relationship as a child cannot be modified. The reference is {0} on {1}.
   **Cause:** Within a customized context, an attribute being customized could have been a parent reference within a relationship.
   **Action:** Do not attempt to modify or remove an attribute that could be a parent reference within a relationship.

   **Level:** 1  
   **Type:** ERROR  
   **Impact:** Programmatic

MDS-01633: In a customized context, an element that could participate in a relationship cannot be deleted: {0}.
   **Cause:** Within a customized context an attempt was made to delete an element that could participate in a relationship.
   **Action:** Do not attempt to delete an entity while in a customized context.

   **Level:** 1  
   **Type:** ERROR  
   **Impact:** Programmatic
MDS-01634: In {0}, a {1} element that participates in a relationship lacks a configurable ID.

**Cause:** An operation was attempted on a participant in a relationship that lacked a configurable ID.

**Action:** Add a configurable ID to the element on which it is missing. If necessary, refer to the element’s schema definition to identify the configurable ID attribute.

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

MDS-01635: Skipping the relationship validation for {0} in the metadata object {1} because the element contains an invalid MDS reference.

**Cause:** Validation of the object’s relationships was not performed because the element contained an invalid MDS reference.

**Action:** Correct the MDS references in the MetadataObject specified.

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

MDS-01700: MElementBeanImpl._setSimpleChild cannot be called on a non-simpleType element: name={0}, namespace{1}

**Cause:** An attempt was made to set a bean element to a simple type, but the definition in the schema was not a simple type. The generated beans may not have matched the registered schema.

**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

MDS-01701: Cannot set the value on an element that is not based on a simpleType: name={0}, namespace={1}

**Cause:** An attempt was made to set an element to a simple type, but the definition in the schema was not a simple type.

**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

MDS-01702: The method getBean() is not valid for metadata object {0} - it is allowed on only bean metadata objects.

**Cause:** An attempt was made to access the metadata object using the bean API but the metadata object was not a bean metadata object. The schema for the root element may not have been registered with MDS, or the beans were not available on the classpath.
**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01703:** error unmarshalling bean element: name={0}, namespace={1} in metadata object {2} - no object factory can be found or jaxb.properties cannot be found  
**Cause:** An element was found in the metadata object that did not have a corresponding bean class. The schema for the element may not have been registered with MDS, or the beans were not available on the classpath.  
**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01705:** error unmarshalling bean element: name={0}, namespace={1} in metadata object {2} - object factory class {3} does not have the expected unmarshal() method  
**Cause:** The bean object factory found for the element did not appear to have been generated by the MDS bean generation tool.  
**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**MDS-01706:** error unmarshalling bean element: name={0}, namespace={1} in metadata object {2} - object factory class {3} failure in unmarshal() method  
**Cause:** An unexpected exception occurred while creating a bean object for the element.  
**Action:** Contact the developers of the application, providing the cause exception.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**MDS-01800:** Sandbox is not supported for {0} configured on {1}.  
**Cause:** An underlying metadata store did not support the sandbox feature.  
**Action:** Provide a metadata store that supports sandbox feature.

**Level:** 1  
**Type:** ERROR
Impact: Configuration
MDS-01801: Document name {0} should not refer to the raw sandbox resource name.
Cause: A resource name pointed directly to a resource in the sandbox component.
Action: Provide a logical document name to resolve the issue.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01802: A sandbox by name {0} already exists in the {1} store.
Cause: A sandbox with the same name already existed in the store.
Action: Use a different name or destroy the existing sandbox before reusing the same name.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01803: Sandbox Persistence manager cannot be constructed using an instance of SandboxPManager.
Cause: An attempt was made to construct an instance of sandbox persistence manager using an instance of SandboxPManager.
Action: Contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-01804: Sandbox {0} configured with {1} namespace, {2} store and {3} label from mainline is not compatible with {4} label created on {5} namespace.
Cause: A label was used that is different from the mainline label associated with the sandbox.
Action: Use a label that is compatible with the sandbox and retry the operation.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01805: Sandbox {0} missing in {1}.
Cause: The specified sandbox was not found in the underlying metadata store.
Action: Provide the name of an existing sandbox, or create a new sandbox if necessary.
Level: 1
Type: ERROR
Impact: Data

MDS-01806: failure to remove {0} from {1}, because it is not a valid document in the sandbox
Cause: The specified document to be removed was not found in the sandbox.
Action: Verify that the document exists in the sandbox.

Level: 1
Type: ERROR
Impact: Data

MDS-01807: failure to delete sandbox {0}
Cause: An error occurred while deleting the sandbox.
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01808: SandboxUsage with the sandbox name set to {0} does not return any namespaces.
Cause: No namespaces were found on the SandboxUsage.
Action: Configure the SandboxUsage with namespaces that are associated with the sandbox.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01809: failure to list sandboxes matching {0}
Cause: An error occurred while listing or querying the sandboxes.
Action: Look for error messages to determine the actual cause of the failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01810: failure to refresh sandboxes to target label {0}
Cause: Target label is older than the current source label.
Action: Specify a target label which is later than current label.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01811: failure to list sandboxes matching customization for {0}, layer: {1}, value: {2}
Cause: An error occurred while listing or querying the sandboxes.
Action: Look for error messages to determine the actual cause of the failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01812: sandbox name {0} exceeds the maximum limit of {1} characters
Cause: Sandbox name is more than the supported size.
Action: Use a shorter sandbox name.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01813: sandbox metadata for {0} can not be saved because it is being updated by another user.
Cause: More than one user is updating the sandbox metadata at the same time.
Action: Get the sandbox metadata again and retry saving after making the changes.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01814: sandbox metadata for {0} cannot be changed because it is read only.
Cause: Sandbox metadata is read only and cannot be updated
Action: To update get an instance of sandbox and then get the sandbox metadata from the instance
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01815: store configured for sandbox {0} does not support sandbox metadata.
Cause: Sandbox metadata is not supported on the repository.
Action: Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later to use this feature.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01816: {0} is not a valid name for a sandbox.
Cause: The specified sandbox name is either an MDS reserved package part name or contains invalid characters.
Action: Ensure that the specified sandbox name is neither an MDS reserved package part name nor does it contain invalid characters as per the MDS Resource name specification.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01817: sandbox {0} is either active or applied to mainline. The undo operation cannot continue.
Cause: The sandbox is either applied or is in the active state.
Action: Check that the sandbox is in the intermediary state
MDS-01818: sandbox {0} is in applied_with_undo state. No further updates except finalized are allowed.
Cause: The sandbox is in applied_with_undo state and no further updates can be done to the sandbox.
Action: The only allowed operations in the intermediary state are: finalize and undo.

MDS-01819: Lock on sandbox {0} cannot be taken. A concurrent management operation may be in progress.
Cause: A management operation on the sandbox is in progress and has locked the sandbox.
Action: Retry the operation after a while.

MDS-01820: Metadata for sandbox {0} is not available. The sandbox management operation cannot proceed without sandbox metadata.
Cause: Sandbox was created without metadata.
Action: Use the management APIs that are available for sandboxes without metadata.

MDS-01821: Lifecycle change notifications for the sandbox {0} cannot be sent out because the change type is not defined.
Cause: 
Action: 

MDS-01900: None of the configured metadata stores support versioning.
Cause: The underlying metadata store did not support versioning.
Action: Configure a metadata store that supports versioning, and retry the operation.

Level: 1  
Type: ERROR  
Impact: Programmatic

Level: 1  
Type: ERROR

Level: 1  
Type: ERROR  
Impact: Programmatic

Level: 1  
Type: WARNING  
Impact: Other

Level: 1  
Type: ERROR
Impact: Configuration

MDS-01901: specifying multiple labels for a namespace not allowed
Cause: Multiple labels were provided for a namespace that pointed to a metadata store.
Action: Provide a single label to map to a namespace and retry the operation.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01902: Label or namespace is invalid.
Cause: Either the namespace or the label was invalid.
Action: Verify that the namespace and the label are correct, and retry the operation.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01903: Specified label {0} does not exist for {1} namespace.
Cause: The specified label did not exist in the metadata store mapped to the namespace.
Action: Verify that the label name is correct and that the label exists, and then retry the operation.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01906: A label with same name {0} already exists.
Cause: An attempt was made to create a label that already existed.
Action: Create a label with a different name, and then retry the operation.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01907: The label {1} is already configured for the store "[0]", so the same store cannot be configured with another label "[2]".
Cause: An attempt was made to map a label for a store when a label-to-store mapping already existed for that store.
Action: De-associate the existing label mapped to the store first, and then retry the operation.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01908: failure to delete versions of the document {0}
Cause: An error had occurred while versions were being deleted.
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01909: No namespaces are specified for creating label {0}.
Cause: No namespace information was found for creating a label.
Action: Provide a namespace for creating a label, and retry the operation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01910: The namespace {0} is already registered with the label {1}, so the super/sub namespace {2} cannot be assigned with the label {3}.
Cause: An attempt was made to associate multiple labels with a namespace, or an attempt was made to associate multiple namespaces with a single label.
Action: Associate a single label with a single namespace, and retry the operation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01911: failure of the metadata purge operation for the requested repository partition
Cause: An error occurred during a purge operation.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01912: MetadataStore configured for {0} does not support versioning.
Cause: The metadata store configured for the resource did not support versioning.
Action: Configure a metadata store that supports versioning or verify that the resource name is correct.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01913: A deployment lineage with same application name "{0}" and deployment module name "{1}" already exists.
Cause: An attempt was made to create a lineage that already existed.
Action: Create a lineage with a different application or MAR name, and then retry the operation.
Level: 1
Type: ERROR
Impact: Programmatic

**MDS-01914:** The application name and deployment module name cannot be null to create DeploymentInfo.

**Cause:** An attempt was made to create DeploymentInfo with null values.

**Action:** Make sure that the values for application name and deployment module name are non-null.

Level: 1
Type: ERROR
Impact: Programmatic

**MDS-02024:** Setting or modifying the unique identifier of an existing node through customizations is not supported.

**Cause:** An attempt was made to customize a configurable ID.

**Action:** Remove any customization that is attempting to modify the unique identifier of an XML element.

Level: 1
Type: ERROR
Impact: Programmatic

**MDS-02025:** The requested change is incompatible with changes already pending on the MDS session.

**Cause:** An attempt was made to perform a change operation on the MDS session which would update the same MetadataObject part as another change operation that has been done. For example, if you change a customization of a metadata object then attempt to delete all of its customizations, the latter operation will fail because it conflicts with the former. You must save the former change first before doing the second.

**Action:** Save the changes that have already been made on the session (by calling flushChanges), then retry the failed operation.

Level: 1
Type: ERROR
Impact: Programmatic

**MDS-02100:** Illegal permission target: "{0}" - must begin with {1}.

**Cause:** An attempt was made to create an MDS permission class with an incorrect syntax.

**Action:** Permission classes are usually created internally by MDS but may be created by the application directly. Contact the developers of the application to confirm that this is not an application error and if not contact Oracle Support Services.
MDS-02101: Illegal permission action: "{0}" - unknown action.
Cause: An attempt was made to create an MDS permission class with an incorrect syntax.
Action: Permission classes are usually created internally by MDS but may be created by the application directly. Contact the developers of the application to confirm that this is not an application error and if not contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-02102: Illegal permission action: "{0}" - customize action takes 0 or 2 parameters.
Cause: An attempt was made to create an MDS permission class with an incorrect syntax.
Action: Permission classes are usually created internally by MDS but may be created by the application directly. Contact the developers of the application to confirm that this is not an application error and if not contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-02201: type validation failure for the metadata object "{0}"
Cause: The content of the metadata object was not valid against the registered XSDs.
Action: Ensure that the metadata object content is valid with respect to the registered XSDs.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02202: Content of the metadata object "{0}" is not valid.
Cause: The content was not valid either with respect to the registered XSDs or with the registered relationships.
Action: Check the content of the metadata object and correct the content as necessary to make it valid.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02203: type validation error for the metadata object "{0}" at the node "{1}"
Cause: A validation error occurred at the specified node.
Action: Check the content at the specified node for compliance with registered XSDs and relationships.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02204: type validation warning for the metadata object "{0}" at the node "{1}"
Cause: A validation warning occurred at the specified node.
Action: Check the content at the specified node for compliance with registered XSDs.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02301: The rename unit is invalid because either "{0}" or "{1}" is reused in the rename plan.
Cause: The resource name provided in the rename plan was used more than once.
Action: Provide distinct names for source and target names while renaming.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02302: subobjects "{1}" not found in metadata object "{0}"
Cause: The specified subobjects were not found in the metadata object.
Action: Look in the error message log for details.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02303: The given rename plan syntax is invalid
Cause: The rename plan syntax specified was invalid.
Action: Look in the error message log for details.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02304: RenameOperation failed for StreamedObject "{0}" because subobjects were specified for this streamed object.
Cause: Streamed objects do not support subobjects.
Action: Remove the RenameObject that contains reference to the streamed object and subobject references from the RenamPlan.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02401: The operation {0} on the {1} node is not allowed.
Cause: An attempt was made to customize a node that was not customizable.
Action: If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be
MDS-02402: The type definition for {1} does not allow customization of {0}.

**Cause:** An attempt was made to customize a node that was not customizable.

**Action:** If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-02404: The subelement {1} in the MDX document does not allow customization of {0}.

**Cause:** An attempt was made to customize a node that was not customizable.

**Action:** Check the customization restriction information which can be located in the schema definition, standalone XML file or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-02405: The attribute {2} in element {1} in the MDX document does not allow customization of {0}.

**Cause:** An attempt was made to customize a node that was not customizable.

**Action:** If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-02406: Customization of {0} is not allowed because it is not explicitly allowed by any type definition nor any extended metadata entry.

**Cause:** An attempt was made to customize a node that was not customizable.

**Action:** If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.
metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-02407: Customization of {0} is not allowed because the local reference was not found in the document.
Cause: An enquiry about the customizability of a node supplied a local reference that wasn’t found in the document.
Action: Ensure that the local reference applies to the document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02408: The operation {0} on the {1} node is not allowed because the metadata object reference was not found in the change event.
Cause: A document change is not allowed because the metadata object reference was null.
Action: Ensure that the change document exists.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02500: Cannot find a valid MDSSession object for accessing the MDS document using ORAMDS URL
Cause: A valid MDSSession object was not set before accessing the document using the "oramds:///" protocol.
Action: Use the MDSSession.setMDSSession() method to set a valid MDSSession object before accessing MDS documents using the oramds protocol.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02501: cannot load the ORAMDS URL "{0}" because MDS session could not be created or resolved
Cause: An error occurred while creating or resolving an MDS session object.
Action: Look for messages describing the cause exception in the error message log for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02600: configuration migration failure because the configuration document contains more than one mds-config element
Cause: The given configuration document contained more than one mds-config element.

Action: Correct the configuration document to contain a single mds-config element.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02601: configuration migration failure because it contains more than one persistence-config element
Cause: The configuration document contained more than one persistence-config element.

Action: Correct the configuration document to contain a valid persistence-config element.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02602: configuration migration failure because it contains more than one metadata-stores element
Cause: The configuration document contained more than one metadata-stores element

Action: Correct the configuration document to be a valid 10.1.3 configuration document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02603: configuration migration failure because it contains an invalid metadata-store element
Cause: The configuration document contained an invalid metadata-store element.

Action: Correct the configuration document to be a valid 10.1.3 configuration document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02700: The resource "[0]" cannot be updated by tenant "[1]".
Cause: The given resource could not be updated by the current tenant because it was not available in current tenant's scope.

Action: Verify that the resource is being updated in the same scope of the tenant who updates the resource.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-02702: Tenant scoped PManager instance cannot be created for tenant \{0\} because given PManager instance does not have multitenancy enabled.

**Cause:** The PManager instance used here did not have multitenancy enabled but an attempt was made to create tenant scoped PManager instance.

**Action:** Verify that the PManager instance being passed has multitenancy support enabled.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

MDS-02703: Tenant scoped PManager cannot be created for tenant "null".

**Cause:** The PManager instance used here had multitenancy support enabled but an attempt was made to create tenant scoped PManager instance with "null" tenant.

**Action:** Create scoped PManager instance for valid tenant id.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

MDS-02704: Cannot create tenant scoped PManager instance using another tenant scoped PManager instance.

**Cause:** An attempt was made to create tenant scoped PManager using another scoped PManager instance.

**Action:** Create a tenant scoped PManager using an unscoped PManager instance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-02705: Cannot create PContext using an unscoped PManager instance.

**Cause:** Creating PContext using an unscoped PManager instance was not allowed.

**Action:** Use PManager instance that is scoped for a tenant to create PContext.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-02706: Cannot create PTransaction using an unscoped PManager instance.

**Cause:** Creating PTransaction using an unscoped PManager instance was not allowed.

**Action:** Use PManager instance that is scoped for a tenant to create PTransaction.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-02707: PContext with tenant id \{0\} cannot be used in scoped PManager with tenant id \{1\}.
**Cause:** Tenant id attached to PContext and the tenant id of tenant scoped PManager to which it was passed did not match.

**Action:** Create PContext from the tenant scoped PManager to which it is passed.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic  

**MDS-02708: PManager instance is being used after it has been released.**

**Cause:** PManager instance was being used after it had been released.

**Action:** Create a new PManager.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic  

**MDS-02709: Configuration change operation "{0}" on scoped PManager is not allowed for the tenant {1}. Only global tenant is allowed to change the configuration settings in PManager.**

**Cause:** A non global tenant attempted to change configurations in scoped PManager.

**Action:** Use global tenant scoped PManager to change the configuration settings.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**MDS-02710: Operation "{0}" is not allowed in unscoped PManager.**

**Cause:** A tenant aware operation was invoked in an unscoped PManager instance.

**Action:** Use a global or tenant scoped PManager to do the operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**MDS-02711: No tenant operations are allowed on MetadataStoreConnection not associated with any tenant id.**

**Cause:** A tenant aware operation was invoked in MetadataStoreConnection to database store which did not have any tenant id attached.

**Action:** Create a new MetadataStoreConnection with a valid tenant id.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic  

**MDS-02712: The operation {0} is not allowed in this MetadataStoreConnection to database store because the MetadataStoreConnection is not attached to any tenant id.**

**Cause:** A tenant aware operation was invoked in MetadataStoreConnection to database store which did not have any tenant id attached.
**Action:** Create a new MetadataStoreConnection with a valid tenant id.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-02713: PContext associated with tenant {0} cannot be used with MetadataStoreConnection associated with different tenant {1}. Operation {2} failure.  
**Cause:** The tenant id attached to PContext and MetadataStoreConnection did not match.  
**Action:** Use PContext with same tenant id as the one attached to metadata store connection.  

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-02714: Creating metadata store connection for tenant {0} is not allowed in non multitenant application.  
**Cause:** An attempt was made to create metadata store connection for non global tenant in non multitenant application.  
**Action:** Use global tenant id to create metadata store connection.  

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-02715: No tenant scoped PManager instances can be created on already released PManager instance.  
**Cause:** An attempt was made to create a tenant scoped PManager instance on already released PManager instance.  
**Action:** Create new PManager instance using a PConfig then try creating scoped PManager instance.  

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-02716: PManager instance is created with multitenancy support.  
**Cause:** PManager instance is created with multitenancy support.  
**Action:** No action required.  

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Configuration

MDS-02717: PManager instance is created without multitenancy support as JVM flag "oracle.multitenant.enabled" is not set to enable multitenancy support.  
**Cause:** PManager instance is created without multitenancy support because JVM flag to enable multitenancy support is not set.
**Action:** No action required.

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Configuration

**MDS-02718:** PManager instance is created without multitenancy support because "isMultitenantCapable" property is not set in PConfig.

**Cause:** PManager instance is created without multitenancy support because isMultitenantCapable property is not set in PConfig.

**Action:** No action required.

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Configuration

**MDS-02720:** Cannot rename the document {0} to {1} as the new tenant scope does not match the original tenant scope.

**Cause:** The new name for the document was configured to a different tenant scope to the old document name.

**Action:** Provide a new valid document name that maps to the same tenant scope as the original document.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-02721:** PResource {0} for tenant {1} cannot be used with MetadataStoreConnection that is associated with different tenant {2}. Operation {3} failure.

**Cause:** The tenant ids of the PResource and the MetadataStoreConnection did not match.

**Action:** Use PResource with same tenant id of the one attached to metadata store connection.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-02722:** Mar Lineage can be created by global tenant only. Creating MAR lineage is not supported for tenant {0}.

**Cause:** A non-global tenant attempted to create MAR lineage which is not supported. MAR lineage creation is allowed only for global tenant currently.

**Action:** Create MAR lineage from global tenant context.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-02723:** Operation "[{0}]" is not supported in Sandbox currently.

**Cause:** Unsupported operation was invoked in Sandbox instance.
Action: This operation is not supported in Sandbox currently.

Level: 1

Type: ERROR

Impact: Programmatic

MDS-02724: The ResourceName that is attached to tenant scope {0} is not allowed in SandboxPTransaction that is attached to the different tenant scope {1}. Operation {2} failure.

Cause: Tenant scope for ResourceName and SandboxPTransaction did not match.

Action: Use ResourceName with same tenant scope of the one attached to SandboxPTransaction.

Level: 1

Type: ERROR

Impact: Programmatic

MDS-02725: The Label {0} that is attached to tenant {1} is not allowed in MetadataStoreConnection that is attached to different tenant {2}. Operation {3} failure.

Cause: Tenant id for Label and MetadataStoreConnection did not match.

Action: Use label with same tenant id of the one attached to MetadataStoreConnection.

Level: 1

Type: ERROR

Impact: Programmatic

MDS-02726: The tenant {0} that is attached to PDocument {1} is not allowed in SandboxPTransaction that is attached to different tenant {2}. Operation {3} failure.

Cause: Tenant id for PDocument and SandboxPTransaction did not match.

Action: Use PDocument with same tenant id of the one attached to SandboxTransaction.

Level: 1

Type: ERROR

Impact: Programmatic

MDS-02727: The tenant {0} that is attached to Label {1} is not allowed in SandboxPTransaction that is attached to different tenant {2}. Operation {3} failure.

Cause: Tenant id for Label and SandboxPTransaction did not match.

Action: Use label with same tenant id of the one attached to SandboxPTransaction.

Level: 1

Type: ERROR

Impact: Programmatic

MDS-02728: The tenant {0} that is attached to {1} {2} is not allowed in Sandbox that is attached to different tenant {3}. Operation {4} failure.
Cause: Tenant id attached and Sandbox did not match.
Action: Use tenant id same as the one attached to Sandbox.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02729: The tenant scope {0} that is attached to {1} is not allowed in Sandbox that is attached to the different tenant scope {2}. Operation {3} failure.

Cause: Tenant scope attached and Sandbox did not match.
Action: Use tenant scope same as the one attached to Sandbox.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02730: Error in deprovisioning the tenant {0}. Unable to delete the resources in {1}.

Cause: Tenant resources might be on read-only store.
Action: Verify that tenant resources exist on a writable store.

Level: 1
Type: ERROR
Impact: Configuration

MDS-02731: Tenant specific operations cannot be done in multitenant disabled environment for tenant {0}.

Cause: An attempt was made to do tenant specific operations in Multitenant disabled environment.
Action: Enable the multitenant feature.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02732: TenantId cannot be created for the value "{0}".

Cause: TenantId could not be created with negative values or a value with more than 18 digits.
Action: Use positive values with max of 18 digits in decimal format to create a valid TenantId object.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02733: Rename across multiple tenant stripes is not supported on this store.

Cause: The store does not support writing to multiple tenant stripes or multitenancy is not enabled.
Action: Enable the multitenant feature.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02800: The label "{0}" cannot be provided as null for label based transfer.
Cause: The label was provided as null for label based transfer.
Action: Provide valid label name for label based transfer.
Level: 1

Type: ERROR
Impact: Configuration

MDS-02801: Document {0} with scope {1} cannot be transferred by tenant {2}.
Cause: The given document could not be transferred from source store by current tenant because the document was not in the scope of current tenant.
Action: Ensure that document being transferred mapped to current tenant scope.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-02802: Transfer is not supported for multitenant MDSInstance with file store.
Cause: Either source or target MDSInstance has multitenancy enabled and configured with file store.
Action: Use a non multitanant MDSInstance with file store.
Level: 1

Type: ERROR
Impact: Configuration

MDS-02803: List of patterns to select the MOs are either empty or null.
Cause: List of MOPatterns are empty or null.
Action: Ensure that valid list of MOPatterns are provided.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-02804: Layer name "{0}" configured in CustLayerFilter to remove customizations, contains patterns.
Cause: Layer name contains patterns.
Action: Ensure that layer name doesn't contain any patterns.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-05786: Unable to deploy the metadata archive: {0}.
Cause: Metadata archive (MAR) is corrupt.
Action: Validate that the metadata archive (MAR) is valid and readable.
Level: 1
Type: ERROR
Impact: Configuration

MDS-05787: Partition name is not specified in adf-config.xml file.
Cause: A property with name partition-name was not found as a child of the metadata-store element.
Action: Specify the target partition as a child property of the metadata-store element in adf-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

MDS-05788: Unable to find the JNDI datasource in the file adf-config.xml.
Cause: A property with name jndi-datasource was not found as a child of the metadata-store element.
Action: Specify the JNDI datasource as a child property of the metadata-store element in adf-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

MDS-05789: Unable to deploy the metadata archive.
Cause: Metadata archive (MAR) was not found.
Action: Ensure that the metadata archive (MAR) is packaged with the application.

Level: 1
Type: ERROR
Impact: Configuration

MDS-05790: The metadata store definition is either missing or incorrectly specified in the application configuration.
Cause: The metadata store definition is either missing or incorrectly configured in the file adf-config.xml.
Action: Ensure that the metadata store definition is present and contains the correct repository configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-05791: An error occurred during the deployment of the metadata archive (MAR) {0}.
Cause: Details are usually given in the cause exception. Look for messages describing the cause exception and take the appropriate action.
Action: Ensure that the metadata store configuration is correct.

Level: 1
Type: ERROR
Impact: Configuration
MDS-05792: Unable to load MDS configuration from "[0]"
    Cause: The MDS configuration is either not defined or incorrect.
    Action: Ensure that the MDS configuration is correctly defined.
    Level: 1
    Type: ERROR
    Impact: Configuration

    Cause: The metadata path named in the error message for the MDS file repository partition cited in the error message was either invalid or unreachable.
    Action: Ensure that the MDS file repository named in the error message is registered and that the metadata partition cited in the error message is configured with a valid metadata path in adf-config.xml.
    Level: 1
    Type: ERROR
    Impact: Configuration

MDS-05794: Unable to load MDS persistence configuration from "[0]"
    Cause: The MDS persistence configuration is either not defined or incorrect.
    Action: Ensure that the MDS persistence configuration is correctly defined.
    Level: 1
    Type: ERROR
    Impact: Configuration

MDS-05795: Invalid value "[0]" specified in the content-config of the application's configuration
    Cause: Only restriction type CUSTOMIZATIONS is supported in content-config. It is only allowed with path "/" and no file extension.
    Action: Ensure that the MDS persistence configuration is correctly defined.
    Level: 1
    Type: ERROR
    Impact: Configuration

MDS-10001: Error:
    Cause: An error occurred. Details are usually given in the accompanying messages.
    Action: Look for messages describing the cause and take the appropriate action.
    Level: 1
    Type: ERROR
    Impact: Data

MDS-10003: The specified [0] argument is null or empty.
    Cause: A required program argument was null or empty.
    Action: Record any accompanying exception messages and contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic
MDS-10009: The transfer of the document {0} is not successful.
Cause: Document transfer failed
Action: Examine any accompanying messages to decide if further action is required.

Level: 1
Type: WARNING
Impact: Data
MDS-10010: Deleting the document {0} is not successful.
Cause: Document deletion failed
Action: Examine any accompanying messages to decide if further action is required.

Level: 1
Type: WARNING
Impact: Data
MDS-10011: The operation on {0} has been rolled back. Total number of documents failed during the operation is {1}.
Cause: The transfer was rolled back
Action: Examine any accompanying messages to decide if further action is required.

Level: 1
Type: WARNING
Impact: Data
MDS-10012: The operation has failed.
Cause: The operation has failed.
Action: Examine any accompanying messages to decide if further action is required.

Level: 1
Type: WARNING
Impact: Data
MDS-10013: {0} operation started.
Cause: Transfer started.
Action: Transfer started, no action required.

Level: 1
Type: NOTIFICATION
Impact: Data
MDS-10014: {0} is completed. Total number of documents successfully processed: {1}, total number of documents failed: {2}.
Cause: Transfer complete.
Action: Check any accompanying messages to decide if any action is required.

Level: 1
Type: NOTIFICATION
Impact: Data

MDS-10015: Failure occurred while committing the {0} operation. The operation has been rolled back.
Cause: Failure occurred while committing the operation.
Action: Examine any accompanying messages to decide if further action is required.

Level: 1
Type: ERROR
Impact: Data

MDS-10016: The operation on {0} has been rolled back. The post transfer label {1} could not be created.
Cause: Failure occurred when creating the post transfer label.
Action: Examine any accompanying messages to decide if further action is required.

Level: 1
Type: ERROR
Impact: Data

MDS-10017: The target store does not support deployment management. Given application name "{0}" and deployment module name "{1}" could not be persisted as deployment information in store.
Cause: The target store does not support deployment management.
Action: No action required. The documents will be transferred without the deployment information attached. If you want to store deployment information as well, configure a metadata store that supports deployment management, typically a DB store.

Level: 1
Type: WARNING
Impact: Data

MDS-10018: The transfer restriction {0} is not supported in target store. All the documents will be transferred to target store.
Cause: Given transfer restriction is not supported in target store.
Action: No action required. The given restriction will not be applied to the transfer, all the documents will be transferred to target store.

Level: 1
Type: WARNING
Impact: Data
MDS-10019: The deployment information for application name "[0]" and module name "[1]" ignored since transfer operation is of type "[2]".
Cause: The deployment information will not be processed in transfer operation type other than “Deployment”.
Action: No action required. Given deployment information will not be processed in the current transfer operation.

Level: 1
Type: WARNING
Impact: Data

MDS-10020: Querying checksum data from target repository to avoid transferring unchanged documents.
Cause: To apply transfer restriction CHANGED, transfer queries the target repository to check whether documents being transferred already exist with same content.
Action: No action required.

Level: 1
Type: NOTIFICATION
Impact: Data

MDS-10022: Query to get the checksum of the documents from target repository completed successfully.
Cause: To apply transfer restriction CHANGED, transfer queries the target repository to check whether documents being transferred already exist with same content.
Action: No action required.

Level: 1
Type: NOTIFICATION
Impact: Data

MDS-10023: No valid exclusion rules are specified in mds-transfer-config.xml to preserve documents in target store.
Cause: No valid namespaces or metadata object names specified in /meta-inf/mds-transfer-config.xml to preserve the documents in target store.
Action: No action required.

Level: 1
Type: WARNING
Impact: Data

MDS-10024: Preparing the list of documents to be excluded during transfer as per the configuration given in mds-transfer-config.xml.
Cause: To preserve the documents in target store as specified in the given /meta-inf/mds-transfer-config.xml, MDSTransfer prepares the list of documents to be excluded by looking at source and target stores.
Action: No action required.

Level: 1
Type: NOTIFICATION
Impact: Data

MDS-10025: Following metadata paths are configured in mds-transfer-config.xml to preserve existing documents under this metadata path in target repository. Configured metadata paths are as follows {0}:
Cause: Some metadata paths are configured in mds-transfer-config.xml to preserve existing documents in target repository.
Action: No action required.
Level: 1

Type: NOTIFICATION
Impact: Other

MDS-10026: Following Metadata object names are configured in mds-transfer-config.xml to preserve existing metadata objects with same name in target repository. Configured metadata object names are {0}:
Cause: Some metadata object names are configured in mds-transfer-config.xml to preserve existing documents in target repository.
Action: No action required.
Level: 1

Type: NOTIFICATION
Impact: Other

MDS-10027: To preserve documents in target store, the following documents from source store are marked as excluded by transfer {0}.
Cause: To preserve documents in target store, some documents from source store are marked as excluded by transfer.
Action: No action required.
Level: 1

Type: NOTIFICATION
Impact: Other

MDS-11001: The type information for "{0}" is not obtainable though the document exists in the MetadataStore.
Cause: Could not get type information for a document, a possibly non-wellformed XML document.
Action: Examine the document
Level: 1

Type: WARNING
Impact: Data

MDS-11002: The type information for "{0}" is not obtainable because of exception "{1}"
Cause: Failed to get type information because an exception was raised.
Action: Examine the exception and the document.
Level: 1
Type: WARNING
Impact: Data
MDS-11003: Failed to force timestamp advance on file {0}: original timestamp = {1}, new timestamp = {2}.
Cause: Failed to advance the timestamp on a file which is being saved.
Action: Examine the file and its permissions.
Level: 1
Type: WARNING
Impact: Data
MDS-11006: Directory [0] does not exist.
Cause: The value of a name condition package did not have a corresponding file system directory.
Action: Check if the directory was expected and determine why it is not present.
Level: 1
Type: NOTIFICATION
Impact: Files
MDS-11007: Skipping directory [0] because [1] does not match the condition.
Cause: The query considered the given directory, but it could only contain documents that would not match the query.
Action: If you expected results from the directory, check that the query is correctly specified.
Level: 1
Type: NOTIFICATION
Impact: Programmatic
MDS-11008: Skipping directory [0] because it is a filestore root.
Cause: The query considered the directory, but it was another root path of the metadata store. This can arise when file store configuration includes multiple root paths and one of these is contained in another.
Action: If you expected results from the directory, check that the file store is configured correctly.
Level: 1
Type: NOTIFICATION
Impact: Files
MDS-11009: Skipping directory [0] because [1] is not a valid package name.
Cause: The query skipped the directory because the corresponding package name is invalid.
Action: If you expected results from the directory, check the directory name for validity.
Level: 1
Type: NOTIFICATION
Impact: Programmatic
MDS-11010: Document cache {0} exceeds its maximum number of entries {1}, so the cache is cleared.
Cause: The document cache exceeded its defined maximum size so it was cleared. If memory allows, the cache should be large enough for all documents for optimum performance but this is not required.
Action: Edit the adf-config.xml file and increase the size of the document cache.
Level: 1
Type: NOTIFICATION
Impact: Configuration

MDS-11011: Attempting to get failover connection to retry the operation because the database connection failed.
Cause: The connection to the database failed.
Action: No action is required. The database is configured with FCF so failover will be attempted.
Level: 1
Type: NOTIFICATION
Impact: Configuration

MDS-11012: Cache collision has been detected when adding key {0}, label set {1}, sandbox name {2}, scope {3}.
Cause: The described document was being added to the cache, but it was already present. This can be caused by an incorrect miss in the preceding lookup, or very rarely by the document having been just inserted by another thread.
Action: If this occurs frequently, contact Oracle Support Services.
Level: 1
Type: NOTIFICATION
Impact: Programmatic

MDS-11013: Cannot store the object of type {0} in the Java Object Cache because the cache or cache region is full
Cause: A CacheFullException or RegionFullException was reported when attempting to store an object in the Java Object Cache.
Action: Consider increasing the size of the configured MDS Cache by modifying the cache-config entry in adf-config.xml.
Level: 1
Type: NOTIFICATION
Impact: Configuration

MDS-11014: Purge-Repos Diagnostics [auto-purge, partition-name, partition-id, #versions purged]: [{0}, {1}, {2}, {3}].
Cause: An auto-purge occurred on a metadata-store.
Action: No action required.
Level: 1
Type: NOTIFICATION
Impact: Other
MDS-11017: Started creating the final archive file at {0}.
   
   **Cause:** ArchiveMetadataStore has started to create final archive file with all the changes done on the archive file so far.
   
   **Action:** No action required.
   
   **Level:** 1
   **Type:** NOTIFICATION
   **Impact:** Other

MDS-11018: The final archive file has been created successfully. The archive file is available at {0}.
   
   **Cause:** ArchiveMetadataStore has created final archive file with all the changes done on the archive file so far.
   
   **Action:** No action required.
   
   **Level:** 1
   **Type:** NOTIFICATION
   **Impact:** Other

MDS-11019: The default CharSet {0} is not a unicode character set. File names with non-ASCII characters may not operate as expected. Check locale settings.
   
   **Cause:** The Java default CharSet is used to convert file names to and from Java Strings. When this CharSet is a non-unicode character encoding, filenames that contain non-ASCII characters may not be correctly mapped to Java characters.
   
   **Action:** Check the locale environment variable settings for the process that is running the JVM that MDS is running in to ensure that a UTF encoding is being used. For example, the LC_ALL and LANG settings may be relevant.
   
   **Level:** 1
   **Type:** WARNING
   **Impact:** Configuration

MDS-11020: Cannot delete the intermediary archive file {0}.
   
   **Cause:** The intermediary archive file could not be deleted.
   
   **Action:** Try deleting the file outside of MDS.
   
   **Level:** 1
   **Type:** WARNING
   **Impact:** Other

MDS-11026: Ignoring the duplicate MDS component configuration file URL "{0}" found on the classpath.
   
   **Cause:** A duplicate URL for an MDS component configuration file was found on the classpath.
   
   **Action:** No action required
   
   **Level:** 1
   **Type:** NOTIFICATION
   **Impact:** Configuration
MDS-11027: Some metadata is configured to be stored as xml-stream. However it will be ignored because no metadata store configured for this application supports storing metadata in that form.

**Cause:** xml-stream content type was configured for some metadata content, but no metadataStore supports the feature.

**Action:** No action required if not using xml-stream content type is acceptable. Otherwise, to enhance MDS repository performance, ensure that the metadata store supports xml-stream feature.

**Level:** 1

**Type:** WARNING

**Impact:** Configuration

MDS-11028: Some metadata is configured to be stored as xml-stream. However it will be ignored because the corresponding metadata store, with class name: {0}, repository name: {1}, partition name: {2}, does not support storing metadata in that form.

**Cause:** xml-stream content type was configured for some metadata content, but the metadata store did not support the feature.

**Action:** No action required if not using xml-stream content type is acceptable. Otherwise, to enhance MDS repository performance, ensure that the metadata store supports xml-stream feature.

**Level:** 1

**Type:** WARNING

**Impact:** Configuration

MDS-11029: MetadataStore configuration for metadata-store-usage "[0]" is invalid. However the MetadataStore is ignored because it is not referenced by any namespace mapping.

**Cause:** MetadataStore class or some of its properties were not valid.

**Action:** Ensure that the MetadataStore class exists and all required properties are valid.

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Configuration

MDS-11030: Registered grammar using remote schema "[0]". In design time environment, it is recommended to use local resources.

**Cause:** Remote schema has been referred with http URI. In design time environment, recommendation is to use local resources.

**Action:** Replace it with local copy of schema.

**Level:** 1

**Type:** WARNING

**Impact:** Configuration

MDS-11100: MetadataObject.getBaseMO() found a mismatched CacheAccess in the cache. refNoGUID={0}, guidRef={1}, mdxLookupKey={2}, isLabelledRead=[3], baseDocLabel={4}, setSandboxName={5}, cacheAccess={6}, doc={7}, name={8}, GUID={9}.
**Cause:** CacheAcces does not match the given MORreference/Guid combination. The metadata object will not be cached.

**Action:** Check the MOName and guid are correct and there are no duplicate Guids in the metadata store.

**Level:** 1

**Type:** WARNING

**Impact:** Other

MDS-11101: MetadataObject.getBaseMO() recursing too deep. [refNoGUID={0}, guidRef={1}, mdxLookupKey={2}, isLabelledRead={3}, baseDocLabel={4}, setSandboxName={5}, cacheAccess={6}, doc={7}].

**Cause:** CacheAcces does not match the given MORreference/Guid combination. The metadata object will not be cached.

**Action:** Check the data in the metadata store to determine the cause.

**Level:** 1

**Type:** WARNING

**Impact:** Other

MDS-90013: The metadata partition with name "[0]" does not exist in the metadata repository "[1]."

**Cause:** The metadata partition with the specified name was not found in the metadata repository.

**Action:** Create a metadata partition with the specified name in the metadata repository before trying this operation.

**Level:** 1

**Type:** ERROR

**Impact:** Topology

MDS-90014: cannot update the metadata because the application is read-only

**Cause:** No metadata update was made because the ReadOnlyMode attribute was enabled.

**Action:** Disable the ReadOnlyMode attribute of the target application configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Topology

MDS-90015: The metadata repository with name "[0]" does not exist.

**Cause:** The metadata repository with the specified name was not found.

**Action:** Verify that the repository name is spelled correctly. If the repository does not exist, create one with the specified name and try again.

**Level:** 1

**Type:** ERROR

**Impact:** Topology

MDS-90016: There are no applications deployed to partition "[0]".
Cause: An attempt was made to perform this operation on a partition that is not associated with a deployed application.
Action: Specify a partition that is associated with a deployed application.
Level: 1
Type: ERROR
Impact: Topology

MDS-90017: The application to be used for this operation is not specified.
Cause: Could not determine which application configuration to use for this operation since there is more than one application deployed to partition "{0}".
Action: Specify an application that is deployed to partition "{0}" to be used for this operation.
Level: 1
Type: ERROR
Impact: Topology

MDS-90018: Application "{1}" is not deployed to partition "{0}".
Cause: The specified application was not deployed to the specified partition.
Action: Specify an application that is deployed to the partition.
Level: 1
Type: ERROR
Impact: Topology

MDS-90019: cannot set the user property on the driver: {0}
Cause: A problem occurred while setting the user property on the driver.
Action: Ensure that the database server is running properly.
Level: 1
Type: ERROR
Impact: Topology

MDS-90020: Metadata store cannot be assigned to server "{0}".
Cause: A problem occurred while assigning resource to the server.
Action: Ensure that the server is running properly.
Level: 1
Type: ERROR
Impact: Topology

MDS-90021: Metadata path {0} is invalid.
Cause: The path used to create a FileMetadataStore was invalid. It must point to a directory.
Action: Correct the metadata path.
Level: 1
Type: ERROR
Impact: Topology
MDS-90022: The host name of the database repository cannot be empty.
  Cause: The host name of the database repository was empty or null.
  Action: Use a valid host name.
  Level: 1
  Type: ERROR
  Impact: Topology

MDS-90023: The database name of the database repository cannot be empty.
  Cause: The database name of the database repository was empty or null.
  Action: Use a valid database name.
  Level: 1
  Type: ERROR
  Impact: Topology

MDS-90024: The user name of the database repository cannot be empty.
  Cause: The user name of the database repository was empty or null.
  Action: Use a valid user name.
  Level: 1
  Type: ERROR
  Impact: Topology

MDS-90025: The password of the database repository cannot be empty.
  Cause: The password of the database repository was empty or null.
  Action: Use a valid password.
  Level: 1
  Type: ERROR
  Impact: Topology

MDS-90026: The server name cannot be empty.
  Cause: The server name was empty or null.
  Action: Use a valid server name.
  Level: 1
  Type: ERROR
  Impact: Topology

MDS-90027: cannot find server "\{1\}" to register the metadata repository "\{0\}"
  Cause: The server name was invalid.
  Action: Use a valid server name.
  Level: 1
  Type: ERROR
  Impact: Topology

MDS-90028: Metadata repository with name "\{0\}" already exists.
  Cause: Metadata repository with the specified name already exists.
Action: Verify that the repository name is spelled correctly. If the repository already exists, create one with a different name and try again.

Level: 1
Type: ERROR
Impact: Topology

MDS-90029: The metadata db repository with name "{0}" does not exist.
Cause: The metadata db repository with the specified name was not found.
Action: Verify that the db repository name is spelled correctly.

Level: 1
Type: ERROR
Impact: Topology

MDS-90030: The metadata file repository with name "{0}" does not exist.
Cause: The metadata file repository with the specified name was not found.
Action: Verify that the file repository name is spelled correctly.

Level: 1
Type: ERROR
Impact: Topology

MDS-90031: The JDBC resource of metadata db repository "{0}" cannot be found.
Cause: The JDBC resource was not found.
Action: Verify that the metadata db repository is set up correctly.

Level: 1
Type: ERROR
Impact: Topology

MDS-90032: The metadata store of metadata file repository "{0}" cannot be found.
Cause: The metadata store was not found.
Action: Verify that the metadata file repository is set up correctly.

Level: 1
Type: ERROR
Impact: Topology

MDS-90033: unknown DB vendor code: "{0}"
Cause: The DB vendor code is invalid.
Action: Use a valid DB vendor code, such as 0 (ORACLE), 1 (MSSQL), or 2 (IBMDB2).

Level: 1
Type: ERROR
Impact: Topology

MDS-90034: The source directory or archive "{0}" for importing metadata is invalid.
Cause: The directory or archive location used to import metadata was invalid. It must point to a valid, existing directory or archive.
Action: Correct the source directory or archive location.

Level: 1
Type: ERROR
Impact: Topology

MDS-90035: The target directory or archive "[0]" for exporting metadata is invalid.
Cause: The directory or archive location used to export metadata was invalid. It must point to a valid location.
Action: Correct the target directory or archive file location.

Level: 1
Type: ERROR
Impact: Topology

MDS-90036: The application does not have a valid MAR file path.
Cause: The MAR path used to import MAR was invalid. It must point to a valid, existing MAR file.
Action: Make sure the MAR file exists and is located in the correct directory of the application.

Level: 1
Type: ERROR
Impact: Topology

MDS-90037: The archive "[0]" does not contain valid contents.
Cause: The archive used to import metadata was invalid. It must be to a valid, existing zip or jar file.
Action: Make sure the archive is valid.

Level: 1
Type: ERROR
Impact: Topology

MDS-90038: The database authentication alias "[0]" already exists. To reuse the same authentication alias, try the operation again without specifying user and password.
Cause: An attempt was made to configure a database authentication alias that already existed in Websphere server.
Action: Delete the existing authentication alias and try again, or specify a new authentication alias, or reuse the existing authentication alias by not specifying user and password.

Level: 1
Type: ERROR
Impact: Topology

MDS-90039: The database authentication alias "[0]" cannot be found. To create the authentication alias, try the operation again with user and password specified.
Cause: An attempt was made to use a database authentication alias that was not configured in Websphere server.
**Action:** Make sure the specified database authentication alias is properly configured in Websphere server, or automatically create the authentication alias by specifying user and password.

**Level:** 1  
**Type:** ERROR  
**Impact:** Topology

**MDS-90040: failed to connect to database**  
**Cause:** An error occurred when trying to connect to database.  
**Action:** Make sure the database connection details are correct. Look at the cause exception for more details.

**Level:** 1  
**Type:** ERROR  
**Impact:** Topology

**MDS-90041: Customization layer values are not supported for "excludeCustFor" parameter.**  
**Cause:** One or more customization layer values was specified for "excludeCustFor" parameter.  
**Action:** Make sure there are no customization layer values specified for "excludeCustFor" parameter.

**Level:** 1  
**Type:** ERROR  
**Impact:** Topology

**MDS-91001: MDS domain runtime MBean is not available. "[0]" operation failure.**  
**Cause:** MDS domain runtime MBean was not available in the server.  
**Action:** Ensure the MDS domain runtime MBean is available in the server.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-91002: MDS Application runtime MBean for "[0]" is not available. "[1]" operation failure.**  
**Cause:** MDS Application runtime MBean was not available in the server.  
**Action:** Ensure the MDS Application runtime MBean for the application is available in the server.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-91003: Multiple MDSAppRuntimeMBean exist for "[0]". To execute the command, parameter "applicationVersion" is required. "[1]" operation failure.**  
**Cause:** Multiple MDSAppRuntimeMBean for the application were found in the server.  
**Action:** Provide the ‘applicationVersion’ parameter.
Level: 1
Type: ERROR
Impact: Configuration

MDS-91004: MDS domain runtime MBean commands can be executed only from the Admin server. "{0}" operation failure.
Cause: WLST was not connected to the Admin server.
Action: Connect to an Admin server before executing the command.

Level: 1
Type: ERROR
Impact: Configuration

MDS-91005: No connection to a "{0}" server exists. The operation "{1}" can be executed only in the online mode.
Cause: Command was executed in the offline mode.
Action: Ensure WLST/WSADMIN is connected to the server.

Level: 1
Type: ERROR
Impact: Configuration

MDS-91006: Expecting a "{0}" for parameter "{1}" but encountering "{2}". "{3}" operation failure.
Cause: Parameter type passed to the command was not correct.
Action: Ensure the correct type of parameters are passed to the command.

Level: 1
Type: ERROR
Impact: Data

MDS-91007: dbVendor should be one of ORACLE, MSSQL, IBMDB2, or MYSQL. "{0}" operation failure.
Cause: dbVendor value was not correct.
Action: Ensure the dbVendor value is one of ORACLE, MSSQL, IBMDB2, or MYSQL.

Level: 1
Type: ERROR
Impact: Data

MDS-91008: The "{0}" parameter is required. Provide a valid value and retry the operation.
Cause: Required parameter for the command was not given.
Action: Provide the required parameters for the command.

Level: 1
Type: ERROR
Impact: Data

MDS-91009: Operation "{0}" failure.
Cause: Exception occurred during the execution of the command.
Action: Provide the required parameters for the command.
Level: 1
Type: ERROR
Impact: Data

MDS-91010: The "adf-config" element is not available in the given archive file. "{0}" operation failure.
Cause: The "adf-config" element is not available in the given archive file.
Action: Ensure the "adf-config" element is available in the adf-config.xml of the given archive file.
Level: 1
Type: ERROR
Impact: Data

MDS-91011: No "mds-config" element exists in the adf-config.xml of the given archive. "{0}" operation failure.
Cause: No mds-config element existed in the adf-config.xml file of the archive file.
Action: Ensure the "mds-config" element is available in the adf-config.xml file.
Level: 1
Type: ERROR
Impact: Configuration

MDS-91012: Metadata repository connection type value should be either "File" or "DB". "{0}" operation failure.
Cause: Metadata repository connection type value is not correct.
Action: Ensure the metadata repository connection type value is either 'File' or 'DB'.
Level: 1
Type: ERROR
Impact: Data

MDS-91013: For the metadata repository's DB connection type, JNDI location is a required parameter. "{0}" operation failure.
Cause: JNDI location not provided for DB connection type.
Action: Provide the JNDI location string while updating the repository connection to DB.
Level: 1
Type: ERROR
Impact: Data

MDS-91014: For the metadata repository's File connection type, path location is a required parameter. "{0}" operation failure.
Cause: The path value was not provided for File connection type.
Action: Provide the path location string while updating the repository connection to File.
Level: 1
Type: ERROR
Impact: Data

MDS-91015: All parameters are required to update shared metadata repository configuration in adf-config.xml. At present, source archive has no connection details for the namespace "(0)". "(1)" operation failure.

Cause: Complete connection information was not provided to set the shared repository for the given namespace.

Action: Provide complete connection information in case the adf-config.xml file does not have any metadata repository connection information for the given namespace already.

Level: 1
Type: ERROR
Impact: Data

MDS-91016: All parameters are required to define new application metadata repository configuration in adf-config.xml. The source archive configuration does not contain any application metadata repository at present. "(0)" operation failure.

Cause: Complete connection information was not provided to set the application target repository.

Action: Provide complete connection information in case the adf-config.xml does not have any metadata repository connection information for the application target repository already.

Level: 1
Type: ERROR
Impact: Data

MDS-91017: The given namespace "(0)" to set the shared repository is not valid. Ensure that the namespace is available in the adf-config.xml file and it is not a sub-namespace of any other namespace. "(1)" operation failure.

Cause: The namespace provided to set the shared repository details is not valid.

Action: Ensure that the namespace is available in the adf-config.xml file and it is not a subnamespace of any other namespace in that file.

Level: 1
Type: ERROR
Impact: Data

MDS-91018: No namespaces are mapped to any shared repository in the source archive adf-config.xml configuration file. Shared repository details cannot be set. "(0)" operation failure.

Cause: No namespaces were mapped to any shared repository in the source archive adf-config.xml configuration file.

Action: To set the shared repository connections, ensure at least one namespace is mapped to shared repository in the source archive adf-config.xml file.

Level: 1
Type: ERROR
Impact: Configuration

MDS-91019: Multiple MDSAppRuntimeMBean exist for application "[0]". Ensure that the "application" "node" and "server" parameters are correct. "[1]" operation failure.
Cause: Multiple MDSAppRuntimeMBean for the application were found in the server.
Action: Ensure that the "application" "node" and "server" parameters are correct.

Level: 1
Type: ERROR
Impact: Configuration

MDS-91020: MDS Application runtime MBean for "[0]" is not available in server "[2]". Ensure server name and application name are correct. "[1]" operation failure.
Cause: MDS Application runtime MBean was not available in the server.
Action: Ensure the MDS Application runtime MBean for the application is available in the server. Ensure the server name and the application name are correct.

Level: 1
Type: ERROR
Impact: Configuration

MDS-91021: Multiple MDSAppRuntimeMBean exist for "[0]" in server "[2]". To execute the command, parameter "applicationVersion" is required. "[1]" operation failure.
Cause: Multiple MDSAppRuntimeMBean for the application were found in the server.
Action: Provide the ‘applicationVersion’ parameter.

Level: 1
Type: ERROR
Impact: Configuration

MDS-91022: Parameter "[0]" cannot be an empty string. "[1]" operation failure.
Cause: The parameter is not allowed to be an empty string.
Action: Ensure the parameter has a correct value.

Level: 1
Type: ERROR
Impact: Data

MDS-91023: Parameter "[0]" contains at least one empty element. "[1]" operation failure.
Cause: The parameter is not allowed to contain one or more empty elements.
Action: Ensure every element specified in the parameter is correct.

Level: 1
Type: ERROR
Impact: Data
MODPLSQL-00001: mod_plsql: Out of memory
  Cause: System has run out of memory
  Action: Reduce memory usage in the system
  Level: 1
  Type: ERROR
  Impact: Runtime

MODPLSQL-00010: mod_plsql: Out of memory
  Cause: System has run out of memory
  Action: Reduce memory usage in the system
  Level: 1
  Type: ERROR
  Impact: Runtime

MODPLSQL-00102: mod_plsql: Wrong language, territory or charset in NLS_LANG value
  Cause: Incorrect NLS_LANG value specified
  Action: Refer to RDBMS and NLS documentation for the acceptable NLS_LANG value
  Level: 1
  Type: ALERT
  Impact: Configuration

MODPLSQL-00350: mod_plsql: Bad Procedure/Argument name in the request
  Cause: The procedure name and/or the argument is not a legal PL/SQL identifier
  Action: Correct the procedure name and the arguments to be legal PL/SQL identifiers
  Level: 1
  Type: ERROR
  Impact: Runtime

MODPLSQL-00367: mod_plsql: Illegal PLSQL identifier in input
  Cause: The procedure name and/or the argument is not a legal PL/SQL identifier
Action: Correct the procedure name and the arguments to be legal PL/SQL identifiers

Level: 1
Type: ERROR
Impact: Runtime

MODPLSQL-00368: mod_plsql: No target procedure specified for invocation
Cause: The procedure name to invoke is not specified in the URL
Action: Specify a legal PL/SQL procedure to invoke

Level: 1
Type: ERROR
Impact: Runtime

MODPLSQL-00369: mod_plsql: Illegal procedure name, part exceeds 32 bytes
Cause: The procedure name specified exceeds the legal PLSQL identifier length
Action: Correct the procedure name to be a legal PL/SQL identifier

Level: 1
Type: ERROR
Impact: Runtime

MODPLSQL-00370: mod_plsql: Illegal procedure name, has an empty part
Cause: The procedure name is not a legal PLSQL identifier
Action: Correct the procedure name to be a legal PL/SQL identifier

Level: 1
Type: ERROR
Impact: Runtime

MODPLSQL-00371: mod_plsql: Illegal procedure name, too many parts
Cause: The procedure name is not a legal PLSQL identifier
Action: Correct the procedure name to be a legal PL/SQL identifier

Level: 1
Type: ERROR
Impact: Runtime

MODPLSQL-00868: mod_plsql: Failed to validate configuration parameters
Cause: Illegal configuration property specified in the mod_plsql configuration
Action: Refer to the logs for more details, and correct the offending configuration property

Level: 1
Type: ERROR
Impact: Configuration
OAAM-00000: Invalid message.
   Cause: Unable to find message definition.
   Action: Report to administrator.

   Level: 1
   Type: ERROR
   Impact: Process

OAAM-00001: A system internal error occurred. The system cannot complete the operation at this time.
   Cause: A system internal error occurred. The error may be the result of a constraint or the unavailability of resources.
   Action: Try again. If the problem remains unresolved, you may contact Oracle Support Services.

   Level: 1
   Type: ERROR
   Impact: Process

OAAM-00002: The operation is not allowed.
   Cause: The user may not have sufficient privileges.
   Action: Report to the administrator about insufficient privileges.

   Level: 1
   Type: ERROR
   Impact: Process

OAAM-00003: Database error.
   Cause: The database may not be available.
   Action: Try again. If the problem remains unresolved, you may contact Oracle Support Services.

   Level: 1
   Type: ERROR
   Impact: Process

OAAM-00004: Insufficient context data. Required: {0}.
   Cause: The expected context information is not provided.
Action: Report to the administrator about the insufficient context data.

Level: 1
Type: ERROR
Impact: Process

OAAM-00005: Database error. Exception message is {0}.
Cause: The error may have resulted from the unavailability of the database or a database querying exception.
Action: Report the database error message to the administrator.

Level: 1
Type: ERROR
Impact: Process

OAAM-01001: Property name is required.
Cause: The property name is missing from the data.
Action: Make sure that the property name is provided for the operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-01002: Property value is required.
Cause: The property value is missing from the data.
Action: Make sure the property value is provided for the operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-01003: Property with name {0} already exists.
Cause: The property with the name already exists.
Action: Use a different property name and try again.

Level: 1
Type: ERROR
Impact: Process

OAAM-01004: Property with name {0} does not exist.
Cause: The property with the name was not found in the system.
Action: Make sure the property name provided is correct and then retry the operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-01005: Property search query is required to search properties.
Cause: The property search query was not provided for the search.
Action: Make sure that the valid property search query is provided.

Level: 1
Type: ERROR
Impact: Process

OAAM-01006: Cannot delete property [0] because it is a [1] type of property.
Cause: Property cannot be deleted. System- and file-based properties cannot be deleted. Only properties saved in the database can be deleted.
Action: System-based properties cannot be deleted. Only properties saved in the database and files can be deleted.

Level: 1
Type: ERROR
Impact: Process

OAAM-01007: Cannot modify property [0] because it is a [1] type of property.
Cause: Property cannot be changed. System-based properties cannot be changed. Only properties saved in the database and files can be changed.
Action: System-based properties cannot be changed. Only properties saved in the database and files can be changed.

Level: 1
Type: ERROR
Impact: Process

OAAM-01101: Object type was not specified for finding usage.
Cause: The required object type was not specified for finding usage.
Action: The object type must be specified to find the usage information. Specify non-null integer value and retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-01102: Object unique key was not specified for finding usage.
Cause: The required object unique key (primary key) was not specified for finding usage.
Action: The object unique (primary) key must be specified to find the usage. Specify a non-null long value and retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-01103: Usage cannot be computed for object type [0].
Cause: Usage API supports certain types of objects. The specified object is not specified by the Usage API.
Action: Specify the object type, which can be referenced by other objects in the system.
Level: 1
Type: ERROR
Impact: Process

OAAM-01104: Usage information for the primary object of type {0} with a unique ID of {1} cannot be determined.
Cause: Usage API is trying to find the usage of an object that does not exist.
Action: A unique ID of the object was provided, which was not found in the system. Make sure that the unique ID and the object are correct and retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-10000: Valid Case ID is required.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10001: Case {0} not found
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10002: No user {0}
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10004: User is blocked
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10005: No questions registered {0} {1}
Cause:
Action:
Level: 1
Type: ERROR
Impact: Process

OAAM-10006: Invalid application {0} and login {1} combination.
Cause: Combination may be incorrect or user name is used in place of the login name.
Action: Report to administrator.

Level: 1
Type: ERROR
Impact: Process

OAAM-10007: Challenge questions are already reset.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10008: Challenge Question Set is already reset.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10009: End Date is required.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10010: End Date should be in future.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10011: Valid Application name or user group name is required.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

**OAAM-10301: Note cannot be null or empty.**
*Cause:* Note cannot be null or empty string.
*Action:* Provide a valid note.
*Level:* 1

Type: ERROR
Impact: Process

**OAAM-10302: Closed case {0} cannot be escalated.**
*Cause:* Closed case {0} cannot be escalated.
*Action:* Reopen the closed case before trying to escalate it.
*Level:* 1

Type: ERROR
Impact: Process

**OAAM-10303: The Case {0} is not a CSR case; therefore, it cannot be escalated.**
*Cause:* The Case {0} is not a CSR case; therefore, it cannot be escalated.
*Action:* The case type for case {0} should be changed to CSR for escalation.
*Level:* 1

Type: ERROR
Impact: Process

**OAAM-10304: Query cannot be null.**
*Cause:* Query cannot be null.
*Action:* Provide a valid query object.
*Level:* 1

Type: ERROR
Impact: Process

**OAAM-10305: No query expression found.**
*Cause:* No query expression found.
*Action:* Provide the required parameters for the query expression.
*Level:* 1

Type: ERROR
Impact: Process

**OAAM-10306: No records found.**
*Cause:* No records found.
*Action:* Change the criteria before performing the operation.
*Level:* 1

Type: ERROR
Impact: Process
OAAM-10307: No linked sessions found.
  Cause: No linked sessions found.
  Action: For the given case, no linked sessions were found.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-10308: No sessions to link.
  Cause: No sessions to link.
  Action: Provide sessions to link.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-10309: No sessions to unlink.
  Cause: No sessions to unlink.
  Action: Provide sessions to unlink.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-11111: User not authorized to access the method {0}.
  Cause: User is not authorized to access the method {0}.
  Action: Retry accessing the method {0} with valid authorization.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-11112: Session ID of Admin users is required for case action.
  Cause: Session ID was not provided for performing the case action.
  Action: Retry the same case action and provide the valid Admin user Session ID for that API call.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-11113: Choose the action template for creating action instance.
  Cause: Action template was not provided for performing the action instance creation.
  Action: Retry the same action instance creation by choosing valid action template.
  Level: 1
  Type: ERROR
  Impact: Process
OAAM-11114: Subaction ID is required for case action.
   Cause: Subaction was not provided for performing the case action.
   Action: Retry the same case action and provide the valid Subaction ID for that
            API call. The Subaction ID is the case action enumeration.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-11115: New status required for case change status action.
   Cause: New status was not provided for performing the change status case action.
   Action: Retry the same case action and provide the valid new status (Integer
            object) for that API call. New status is the case status enumeration.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-11116: Reopen the closed case before trying to edit: Case ID {0}
   Cause: The case is in the Closed state. In this state, the case disposition or
           expiration cannot change.
   Action: The case is closed. In the Closed state, the disposition, severity, or
           expiration cannot be changed. To change these attributes, change the status of the
           case along with new severity, expiration time, or disposition
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-11117: Case with ID {0} is expired. It cannot be edited.
   Cause: The case is in the Expired state. In this state, the case disposition or
           expiration date cannot be changed.
   Action: The case is expired, and in the Expired state, its disposition, severity, or
           expiration cannot be changed. Reopen the case first and then try this operation.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-11120: Case reset action cannot be completed because: {0}.
   Cause: Case reset action cannot be performed because of the reason provided by
           the error message.
   Action: Retry the same case action after fixing the issue.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-11121: Challenge question-related case action cannot be performed because:
   {0}.
Cause: Challenge question-related case action cannot be performed because of the reason provided by the error message.
Action: Retry the same case action after fixing the issue.

Level: 1
Type: ERROR
Impact: Process

OAAM-11122: The customer's registration profile is not active and hence cannot be reset.
Cause: The customer's registration profile have already been reset.
Action: Cannot reset customer's registration profile since they are not active.

Level: 1
Type: ERROR
Impact: Process

OAAM-11123: Cannot reset user's image, as it is not set.
Cause: User does not have the image set.
Action: Cannot reset the user's image because the user is not registered or the image is not active for the user.

Level: 1
Type: ERROR
Impact: Process

OAAM-11124: Cannot reset the user's phrase, as it is not set.
Cause: The user does not have a phrase set.
Action: Cannot reset the user's phrase because either the user is not registered or the phrase is not active for the user.

Level: 1
Type: ERROR
Impact: Process

OAAM-11125: OTP reset action cannot be performed with cases that are not CSR cases.
Cause: For OTP reset actions that are performed with cases, the case has to be a CSR case. OTP reset cannot be performed with a case of any other type.
Action: Create a CSR case for the user and then try to do the OTP-related resets.

Level: 1
Type: ERROR
Impact: Process

OAAM-11126: OTP reset action cannot be performed with case in an incorrect state.
Cause: For OTP reset actions that are performed with cases, the case has to be in the correct state. An OTP reset cannot be performed with a case in the Closed, Escalated, or Expired state.
Action: Change the state of the case to Open, New, or Pending and then retry the operation.
Level: 1
Type: ERROR
Impact: Process

OAAM-11127: OTP reset profile attempted for user who does not have OTP profile enabled.
Cause: The user's OTP profile is not enabled. For such users, the OTP profile reset cannot be performed.
Action: Make changes to the user's preferences to register the OTP profile and then try this operation again.

Level: 1
Type: ERROR
Impact: Process

OAAM-11129: OTP reset keypad attempted for user who does not have OTP keypad enabled.
Cause: The user's OTP keypad is not enabled. For such users, the OTP keypad reset cannot be performed.
Action: Make the changes to the user's preferences to register the OTP keypad and then try this operation again.

Level: 1
Type: ERROR
Impact: Process

OAAM-11130: Authentication pad is already reset.
Cause: Authentication pad is already reset.
Action: No action required to reset.

Level: 1
Type: ERROR
Impact: Process

OAAM-11131: OTP failure counter for user is already in reset state. It may be possible that the user does not OTP enabled.
Cause: The user's OTP failure counter is already at zero. It is already in reset state. For such users, an OTP failure counter reset cannot be performed.
Action: Make sure that the user is registered for OTP and that the OTP failure counter is not at zero.

Level: 1
Type: ERROR
Impact: Process

OAAM-11132: OTP reset cannot be performed at this time because of an error. Try the reset again.
Cause: The OTP reset operation experienced a system error. Try the operation again.
Action: The OTP reset encountered an error. Make sure the user is registered for OTP and try the operation again.
Level: 1
Type: ERROR
Impact: Process

OAAM-11133: Access to link specified sessions to case is denied.
  Cause: Attempt was made to link the sessions of some users for which the agent does not have access.
  Action: Add the administrative user to the user group in the security set up for the OAAM administrative application.

Level: 1
Type: ERROR
Impact: Process

OAAM-11134: User does not access to create a case for user belonging to user group {0}.
  Cause: Attempt was made to create a case for user belonging to the user group for which the administrative user does not have access.
  Action: Add the administrative user to the user group in the security set up for the OAAM administrative application.

Level: 1
Type: ERROR
Impact: Process

OAAM-15001: Enter Organization ID and User name, or only User ID.
  Cause: A combination of Organization ID and User name or User ID are allowed.
  Action: Enter Organization ID and User name, or User ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-15002: Organization ID is required.
  Cause: Organization ID is not entered.
  Action: Enter Organization ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-15100: An attempt was made to change the status of expired cases. Select an extension duration to continue.
  Cause: The status of expired cases cannot be changed.
  Action: Select an extension duration so that the cases are no longer expired. Then, change the status.

Level: 1
Type: ERROR
Impact: Process
OAAM-15101: An attempt was made to extend the expiration of a closed case. Select a status other than close to continue.

**Type:** ERROR  
**Impact:** Process

**OAAM-20011: Profile rule map for the given Map ID not found.**
**Cause:** Profile rule map for the given Map ID not found.
**Action:** Provide a valid profile rule Map ID.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-20012: Profile for the given Map ID not found.**
**Cause:** Profile for the given Map ID not found.
**Action:** Provide a valid Map ID with profile.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-20013: Profile Rule Map ID cannot be null.**
**Cause:** Profile Rule Map ID cannot be null.
**Action:** Provide a non-null Profile Rule Map ID.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-20014: Rule Condition Map ID cannot be null.**
**Cause:** Rule Condition Map ID cannot be null.
**Action:** Provide a non-null Rule Condition Map ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-20015: Rule parameter value not found.
Cause: Rule parameter value not found.
Action: Provide a valid Map ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-20016: Rule parameter not found.
Cause: Rule parameter not found.
Action: Provide a valid Map ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-20017: The following policies depend on some of the policies being deleted: {0}.
Cause: The following policies depend on some of the policies being deleted: {0}.
Action: Remove the dependency. The policies cannot be deleted until the dependency is removed.

Level: 1
Type: ERROR
Impact: Process

OAAM-20018: Rule parameter value was not found for the given rule parameter. The rule may not work as expected unless the error is fixed.
Cause: Rule parameter value was not found for the given rule parameter.
Action: When a rule is added to a policy, the value of each rule parameters is kept. The system was not able to find a corresponding value for the rule parameter in the policy data. Verify the rule and its details. Make sure the migration had no errors if this rule had been migrated from the previous release.

Level: 1
Type: ERROR
Impact: Process

OAAM-20019: Rule name cannot be null.
Cause: Rule name cannot be null.
Action: Provide a valid rule name.

Level: 1
Type: ERROR
Impact: Process

OAAM-20020: Rule description cannot be null.
Cause: Rule description cannot be null.
Action: Provide a valid rule description.

Level: 1
Type: ERROR
Impact: Process

OAAM-20021: Rule score must be between {0} and {1}.
Cause: Rule score must be between {0} and {1}.
Action: Provide a rule score value between {0} and {1}.

Level: 1
Type: ERROR
Impact: Process

OAAM-20022: Rule weight must be between {0} and {1}.
Cause: Rule weight must be between {0} and {1}.
Action: Provide a rule weight between {0} and {1}.

Level: 1
Type: ERROR
Impact: Process

OAAM-20023: Minimum device score must be between {0} and {1}.
Cause: The minimum device score must be between {0} and {1}.
Action: Provide a minimum device score between {0} and {1}.

Level: 1
Type: ERROR
Impact: Process

OAAM-20024: Maximum device score must be between {0} and {1}.
Cause: The maximum device score must be between {0} and {1}.
Action: Provide a maximum device score between {0} and {1}.

Level: 1
Type: ERROR
Impact: Process

OAAM-20025: Maximum device score must not be less than the minimum device score.
Cause: The maximum device score must not be less than the minimum device score.
Action: Provide a maximum device score that is more than or equal to the minimum device score.

Level: 1
Type: ERROR
Impact: Process
OAAM-20026: Minimum country score must be between 0 and 1.
   Cause: Minimum country score must be between 0 and 1.
   Action: Provide a minimum country score value between 0 and 1.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-20027: Maximum country score must be between 0 and 1.
   Cause: Maximum country score must be between 0 and 1.
   Action: Provide a maximum country score value between 0 and 1.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-20028: Maximum country score must not be less than minimum country score.
   Cause: Maximum country score must not be less than minimum country score.
   Action: Provide a maximum country score that is more than or equal to the minimum country score.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-20029: Minimum state score must be between 0 and 1.

Type: ERROR
Impact: Process

**OAAM-20046: Column ID cannot be null or empty.**
**Cause:** Column ID cannot be null or empty.
**Action:** Provide a valid Column ID.

Level: 1
Type: ERROR
Impact: Process

**OAAM-20047: Rule set result with Column ID {0} does not belong to Policy ID {1}.**
**Cause:** Rule set result with the Column ID {0} does not belong to the Policy ID {1}.
**Action:** Provide a Column ID that belongs to the specified policy.

Level: 1
Type: ERROR
Impact: Process

**OAAM-20048: The provided overrides set is not complete for this policy.**
**Cause:** The provided ordered Override IDs array does not contain all the Override IDs for the policy.
**Action:** Provide an array that has all the Override IDs for the policy.

Level: 1
Type: ERROR
Impact: Process

**OAAM-20049: Override cannot be added for policy with Policy ID = {0} since no rules have been added to the policy.**
**Cause:** Override cannot be added for policy with Policy ID = {0} since no rules have been added to the policy.
**Action:** For adding override the policy should have a rule.

Level: 1
Type: ERROR
Impact: Process

**OAAM-20050: Condition ID list provided is null or empty.**
**Cause:** Condition ID list provided is null or empty.
**Action:** Provide a non-null and non-empty list.
Level: 1
Type: ERROR
Impact: Process

OAAM-20051: Rule ID is null or rule for the given ID not found.
Cause: Rule ID is null or rule for the given ID not found.
Action: Provide a valid non-null rule.

Level: 1
Type: ERROR
Impact: Process

OAAM-20052: Rule condition for the given Rule Condition ID not found.
Cause: Rule condition for the given Rule Condition ID not found.
Action: Provide a valid and existing Rule Condition ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-20053: Policy Rule Map cannot be null.
Cause: Policy Rule Map cannot be null.

Level: 1
Type: ERROR
Impact: Process

OAAM-20054: Number of conditions does not match the number of conditions that exists.
Cause: Number of conditions does not match the number of conditions that exists.
Action: Provide the same number as the conditions available.

Level: 1
Type: ERROR
Impact: Process

OAAM-20055: Condition Map provided does not exist.
Cause: Condition Map provided does not exist.
Action: Provide a valid and existent Condition Map ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-20056: Group is already linked and cannot be linked again.
Cause: Group is already linked and cannot be linked again.
Action: Provide a valid and unlinked group for linking.
Level: 1  
Type: ERROR  
Impact: Process  

OAAM-20057: Group ID cannot be null.  
Cause: Group ID cannot be null.  
Action: Provide a valid and non-null Group ID.

Level: 1  
Type: ERROR  
Impact: Process  

OAAM-20058: Some groups are not linked; therefore, they cannot be unlinked.  
Cause: Some of the groups are not linked; therefore, they cannot be unlinked.  
Action: Provide only linked groups for unlinking.

Level: 1  
Type: ERROR  
Impact: Process  

OAAM-20059: The condition type for condition [0] is not compatible with the checkpoint for policy [1].  
Cause: The condition type for condition [0] is not compatible with the checkpoint for policy [1].  
Action: Provide a condition where the condition type is compatible with the checkpoint of the policy.

Level: 1  
Type: ERROR  
Impact: Process  

OAAM-20060: The condition, [0], being deleted is associated with one or more policies; therefore, it cannot be deleted.  
Cause: The condition, [0], being deleted is associated with one or more policies; therefore, it cannot be deleted.  
Action: Remove the condition from the policies before deleting the condition.

Level: 1  
Type: ERROR  
Impact: Process  

OAAM-20061: The policy type and checkpoint for the policy [0] do not match that of the parent policy [1].  
Cause: The policy type and checkpoint for the policy [0] do not match with that of the parent policy [1].  
Action: Ensure that the policy type and checkpoint for the child policy is the same as that of the parent policy.

Level: 1  
Type: ERROR
Impact: Process

OAAM-20062: Score must be between \(0\) and \(1\).
  Cause: The score must be between \(0\) and \(1\).
  Action: Provide a score between \(0\) and \(1\).

Level: 1
Type: ERROR
Impact: Process

OAAM-20063: \(0\) is not a valid result type.
  Cause: \(0\) is not a valid result type.
  Action: Provide a valid result type.

Level: 1
Type: ERROR
Impact: Process

OAAM-20064: \(0\) is not a valid rule result.
  Cause: \(0\) is not a valid rule result.
  Action: Provide a valid value for rule result.

Level: 1
Type: ERROR
Impact: Process

OAAM-20065: Rule results for columns \(0\) and \(1\) are the same.
  Cause: Rule results for columns \(0\) and \(1\) are the same.
  Action: Provide different rule results for each column.

Level: 1
Type: ERROR
Impact: Process

OAAM-20066: Filter key type was not provided for retrieving the filter key.
  Cause: The filter key type must be provided as an Integer value. The error occurred because the value was not provided to get the correct filter based on the key type.
  Action: Provide a non-null value for the filter key type and retry the operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-20067: Transaction Definition ID was not provided for retrieving the filter key.
  Cause: The Transaction Definition ID provided must be a Long value. The error occurred because the value was not provided to get the correct filter based on the filter key type and transaction definition.
  Action: Provide a non-null value for the Transaction Definition ID and retry this operation.
Level: 1
Type: ERROR
Impact: Process

OAAM-20068: Transaction not found for the given Transaction Definition ID.
Cause: The Transaction Definition ID provided did not match with any of the transaction definitions in the system.
Action: Provide a valid Transaction Definition ID and retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-20069: Filter condition key was not provided.
Cause: The filter condition lookup key provided was either null or empty.
Action: Provide a valid filter condition lookup key string and retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-20070: Condition filter was not found based on filter condition key {0}.
Cause: The filter key provided does not match any condition filter.
Action: Provide a correct condition filter descriptor key and then retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-20071: The provided filter key is invalid.
Cause: The filter key provided was either null or empty.
Action: Provide a valid lookup string. Also note that any spaces at the beginning and end of the lookup string will be ignored.

Level: 1
Type: ERROR
Impact: Process

OAAM-20072: No filter descriptor was found for key {0}.
Cause: There is no filter key descriptor that match the key provided.
Action: Provide a lookup string that matches one of the filter keys in the system. Make sure the format is right and there are no typographical errors.

Level: 1
Type: ERROR
Impact: Process

OAAM-20073: Number of rule set results is not equal to the number of rules in the policy.
**Cause:** Number of RuleSetResults is not equal to the number of rules in the policy.

**Action:** Number of RuleSetResults should be equal to the number of rules in the policy.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-20074: Filter key descriptor is invalid.**  
**Cause:** The filter key provided was either null or empty.  
**Action:** Provide a lookup string that is not null or empty. Also note that any spaces at the beginning and end of the lookup string will be ignored.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-20075: A rule must have at least one condition. The current action tries to delete all conditions in this rule. Make sure at least one condition is not selected for deletion.**  
**Cause:** A rule must have at least one condition. The current action tries to delete all the conditions in this rule.  
**Action:** Make sure at least one condition is not selected for deletion.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-20076: Encryption is not supported for numeric data fields.**  
**Cause:** Attempt was made to set the numeric data field as encrypted. Encryption is not supported for numeric data fields.  
**Action:** Make sure the data fields selected for encryption do not include numeric data fields. Unselect the numeric data fields and then try the encryption operation again.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-30001: Group data is required to complete this operation.**  
**Cause:** The operation needs group data and that data was not provided.  
**Action:** Provide valid group data and retry this operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-30002: A group with name {0} already exists.**  
**Cause:** Group by the name and value type already exists.  
**Action:** Try a different group name for the given type of group.
Level: 1  
Type: ERROR  
Impact: Process  

OAAM-30003: Group type {0} not found.  
Cause: The group type provided for the operation was not correct.  
Action: Try a different group type. Group types can be found in value.type.enum through the system enumerations user interface.

Level: 1  
Type: ERROR  
Impact: Process  

OAAM-30004: Group name is incorrect.  
Cause: The group name is incorrect. It is not a valid group name.  
Action: Provide an alphanumeric string as the group name.

Level: 1  
Type: ERROR  
Impact: Process  

OAAM-30005: Group description is incorrect.  
Cause: The group description is incorrect. It is not a valid group description.  
Action: Provide an alphanumeric string for the group description.

Level: 1  
Type: ERROR  
Impact: Process  

OAAM-30006: Group cache type is incorrect.  
Cause: The group cache type is incorrect. It is not a valid group cache type.  
Action: Provide a correct cache type. Refer to cache type enumeration for possible values.

Level: 1  
Type: ERROR  
Impact: Process  

OAAM-30007: Group with given information not found: {0}.  
Cause: Group with given information not found.  
Action: Provide the correct information so the group can be retrieved. You can search for the groups in the system.

Level: 1  
Type: ERROR  
Impact: Process  

OAAM-30008: Group type cannot be changed.  
Cause: The group type is part of the basic function in the way that the group is used in the system. The group type cannot be changed at this time.
Action: Create another group with the required value type and then use it.

Level: 1
Type: ERROR
Impact: Process

OAAM-30009: Group type {0} not found.
Cause: The group type provided for the operation was not correct.
Action: Try a different group type. Group types can be found in value.list.type.enum through the system enumerations user interface.

Level: 1
Type: ERROR
Impact: Process

OAAM-30010: Group type cannot be changed.
Cause: The group type is part of the basic function in the way that the group is used in the system. The group type cannot be changed at this time.
Action: Create another group with the required type and then use it.

Level: 1
Type: ERROR
Impact: Process

OAAM-30011: Group element {0} is invalid for this group.
Cause: The group element is null or the group element type is not compatible with the group type.
Action: Provide an element that is compatible with the group type.

Level: 1
Type: ERROR
Impact: Process

OAAM-30012: List of groups is required for this operation.
Cause: A list of groups required for this operation was found to be null.
Action: Provide a valid list of groups and then retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-30013: List of groups has invalid group information.
Cause: A list of groups required for this operation contains some group-related information that is incorrect.
Action: Provide a valid list of groups with non-null Group IDs. Any duplicates in the list will be ignored.

Level: 1
Type: ERROR
Impact: Process
OAAM-30014: Query returned multiple groups from different group types.
  Cause: The query returned multiple groups of mixed type.
  Action: Use more specific search criteria to limit the number of groups returned.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-30015: Group element with given information not found {0}.
  Cause: Group element with given information not found.
  Action: Provide correct information so the group element can be retrieved. You can use the searchGroupElements feature to find group elements in the system.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-30016: Element {0} is not a member of group {1}.
  Cause: Element is not a member of the group.
  Action: Provide a correct combination of element and group.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-30017: The group {0} cannot be deleted, because it is linked to the following policies {1}.
  Cause: Policies are linked to this group; therefore, the group cannot be deleted.
  Action: The group is linked to policies and might contain session and transaction data associated with this group. Hence this group cannot be deleted.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-30018: The group {0} cannot be deleted, because it is used by rules.
  Cause: Policies use this group as a parameter value in their rules; therefore, the group cannot be deleted.
  Action: Remove the group name or ID as a value of the rule parameter(s) and then retry this operation.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-30019: The group {0} cannot be deleted, because it is used by user groups.
  Cause: Some user groups use this group; therefore, the group cannot be deleted.
  Action: Remove the group name or ID from those user groups and then retry this operation.
  Level: 1
Type: ERROR
Impact: Process
OAAM-30020: The IP Cluster object cannot be null.
Cause: The OARMIPCluster object cannot be null.
Action: Pass a non-null OARMIPCluster object.
Level: 1
Type: ERROR
Impact: Process
OAAM-30021: The label for IP cluster cannot be null.
Cause: The label for IP cluster cannot be null.
Action: Pass a non-null label for IP cluster.
Level: 1
Type: ERROR
Impact: Process
OAAM-30022: IP cluster with label {0} already exists.
Cause: IP cluster with label {0} already exists.
Action: Provide a different label for IP cluster.
Level: 1
Type: ERROR
Impact: Process
OAAM-30023: Invalid IP address range. From IP Address cannot be greater than To IP Address.
Cause: Invalid IP address range. From IP Address cannot be greater than To IP Address.
Action: Provide a From IP Address that is less than To IP Address.
Level: 1
Type: ERROR
Impact: Process
OAAM-30024: The IP address {0} is invalid.
Cause: The IP address {0} is invalid.
Action: Provide a valid IP address.
Level: 1
Type: ERROR
Impact: Process
OAAM-30025: The list of Cluster IDs cannot be null.
Cause: The list of Cluster IDs cannot be null.
Action: Provide a non-null list of Cluster IDs.
Level: 1
Type: ERROR
Impact: Process

OAAM-30026: The IP cluster with Cluster ID {0} does not exist.
  Cause: The IP cluster with Cluster ID {0} does not exist.
  Action: Provide a valid Cluster ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-30027: The IP cluster with Cluster ID {0} is being used by one or more
groups and cannot be deleted.
  Cause: The IP cluster with Cluster ID {0} is being used by one or more groups and
cannot be deleted.
  Action: Remove the IP cluster from the groups and then try to delete it.

Level: 1
Type: ERROR
Impact: Process

OAAM-30028: Duplicate element {0} cannot be added to group {1}.
  Cause: The element is already present in the group. Duplicate elements cannot be
  added to the group.
  Action: Add a different element to the group.

Level: 1
Type: ERROR
Impact: Process

OAAM-30029: The {0} group cannot be deleted because it is being used by one or
more policies.
  Cause: The group cannot be deleted because it is being used by one or more
  policies.
  Action: The group cannot be deleted because it is being used by one or more
  policies.

Level: 1
Type: ERROR
Impact: Process

OAAM-30030: The IP Range {0} cannot be created because a similar IP Range
already exists.
  Cause: IP Ranges being created have duplicate entries.
  Action: Ensure to enter a unique IP Range.

Level: 1
Type: ERROR
Impact: Process
OAAM-30031: The user cannot be removed from the group(s) {0} because they are primary user groups.
Cause: The user cannot be removed from the groups because they are primary user groups.
Action: Select other groups and retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-30032: The group {0} cannot be deleted, because it is used by policies.
Cause: Policies use this group as a parameter value in trigger combinations; therefore, the group cannot be deleted.
Action: Remove the group name or ID as a value from policy trigger combinations and then retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-35001: {0} is a duplicate of enumeration {1}. Enter another {2}.
Cause: Enumeration already exists in the database. Duplicate enumerations cannot be added.
Action: Enter a unique enumeration and retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-35002: Default Property cannot be deleted.
Cause: Default Property cannot be deleted.
Action: Select another property and retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-40001: Import failed error: {0}.
Cause: Import failed error: {0}.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40002: Invalid profile type: {0}.
Cause: Invalid profile type: {0}.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.
Level: 1
Type: ERROR
Impact: Process

OAAM-40003: Invalid policy type: {0}.
  Cause: Invalid policy type: {0}.
  Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40004: No policy data for policy: {0}.
  Cause: No policy data for policy: {0}.
  Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40005: Policy already exists in the database with name {0}.
  Cause: The policy already exists in the database with the name {0}.
  Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40006: Import failed, no group: {0}, rule instance: {1}.
  Cause: Import failed, no group: {0}, rule instance: {1}.
  Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40007: Import failed. Unable to set Override action: {0}.
  Cause: Import failed. Unable to set Override action: {0}.
  Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40008: Import failed. Unable to set Override alert: {0}.
Cause: Import failed. Unable to set Override alert: [0].
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40009: Bad rule data, policy: [0], Rule Global ID: [1].
Cause: Bad rule data, policy: [0], Rule Global ID: [1].
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40011: Import failed. Unable to set Alert group: [0], rule instance: [1].
Cause: Import failed. Unable to set Alert group: [0], rule instance: [1].
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40012: Import failed. Unable to set Action group: [0], rule instance: [1].
Cause: Import failed. Unable to set Action group: [0], rule instance: [1].
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40013: Import failed. Unable to set Exclude group: [0], rule instance: [1].
Cause: Import failed. Unable to set Exclude group: [0], rule instance: [1].
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40014: Question category not found.
Cause: The question category was not found.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.
Level: 1
Type: ERROR
Impact: Process

OAAM-40015: Validation not found.
Cause: The validation was not found.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.
Level: 1
Type: ERROR
Impact: Process

OAAM-40016: Question locale not found.
Cause: The question locale was not found.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.
Level: 1
Type: ERROR
Impact: Process

OAAM-40017: Question with Question ID [0] not found.
Cause: The question with the Question ID was not found.
Action: Provide a valid Question ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-40018: Configurable action with Action ID [0] not found.
Cause: The configurable action with the Action ID was not found.
Action: Provide a valid Action ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-40019: Transaction with Transaction ID [0] not found.
Cause: The transaction with the Transaction ID was not found.
Action: Provide a valid Transaction ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-40020: Pattern with Pattern ID {0} not found.
Cause: The pattern with the Pattern ID was not found.
Action: Provide a valid Pattern ID.
Level: 1

Type: ERROR
Impact: Process

OAAM-40021: Entity with Entity ID {0} not found.
Cause: The entity with the Entity ID was not found.
Action: Provide a valid Entity ID.
Level: 1

Type: ERROR
Impact: Process

OAAM-40022: Group with List ID {0} not found.
Cause: The group with the List ID was not found.
Action: Provide a valid List ID.
Level: 1

Type: ERROR
Impact: Process

OAAM-40023: Policy set with Policy Set ID {0} not found.
Cause: The policy set with Policy Set ID was not found.
Action: Provide a valid Policy Set ID.
Level: 1

Type: ERROR
Impact: Process

OAAM-40024: Answer hint with Answer Hint ID {0} not found.
Cause: The answer hint with the Answer Hint ID was not found.
Action: Provide a valid Answer Hint ID.
Level: 1

Type: ERROR
Impact: Process

OAAM-40025: Validation with Validation ID {0} not found.
Cause: Validation with Validation ID not found.
Action: Provide a valid Validation ID.
Level: 1

Type: ERROR
Impact: Process
OAAM-40026: Task group with Group ID {0} not found.
  Cause: Task group with Group ID not found.
  Action: Provide a valid Group ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-40027: A configurable action with the name {0} already exists.
  Cause: A configurable action with the name already exists.
  Action: Change the name of the existing configurable action.

Level: 1
Type: ERROR
Impact: Process

OAAM-40028: One or more files in the ZIP file are invalid XML files.
  Cause: One or more files in the ZIP file are invalid XML files.
  Action: One or more files in the ZIP file are invalid XML files.

Level: 1
Type: ERROR
Impact: Process

OAAM-40029: Import content has system properties. System properties are not imported as part of this Import action.
  Cause: System properties are not imported as part of Import Properties. System type properties may exist in the import data; they are not imported as part of this Import action.
  Action: This is not an error. It is only an informative message about the system properties. System properties are considered to be specific to the system or environment where the OAAM product runs. Such properties are not imported by other OAAM servers even when they are part of the data being imported. No user action is required.

Level: 1
Type: ERROR
Impact: Process

OAAM-40030: Import ignored the following system properties: {0}
  Cause: System properties, which were not imported as part of import properties, are listed here.
  Action: This is not an error. It is only an informative message about the system properties that were not imported. No user action is required.

Level: 1
Type: ERROR
Impact: Process

OAAM-40031: Export list has some properties that are system properties. System properties are not exported in this Export action.
Cause: System properties are not exported as part of Export Properties. There may be some system type properties in the export list. They are not exported as part of this export.

Action: This is not an error. It is only an informative message about the system properties. System properties are considered to be specific to the system or environment where OAAM product runs. Such properties are not exported by OAAM servers even when they are part of the list of properties being imported. No user action is required.

Level: 1
Type: ERROR
Impact: Process

OAAM-40032: Export has ignored the following system properties: [0]

Cause: System properties, which are not exported as part of Export Properties, are listed here.

Action: This is not an error. It is only an informative message about the system properties which are not exported. No user action is required.

Level: 1
Type: ERROR
Impact: Process

OAAM-40033: File provided does not appear to be correct for Import action.

Cause: The file provided for import may not be correct. The file may not be the one that was exported from OAAM, or it may contain data that cannot be imported into OAAM.

Action: Check that the file was obtained from another OAAM export. See if the file is not empty, and is readable and a valid ZIP file.

Level: 1
Type: ERROR
Impact: Process

OAAM-40034: File import error. Check the log for details.

Cause: A file import error occurred. Invalid import files were found in the ZIP file.

Action: Check whether the ZIP file contains valid import files.

Level: 1
Type: ERROR
Impact: Process

OAAM-40035: Unknown error during import operation. Check the log for details.

Cause: Invalid import files may exist in the ZIP file.

Action: Check if the ZIP file contains invalid import files.

Level: 1
Type: ERROR
Impact: Process
OAAM-40501: Snapshot name cannot be null or empty.
  Cause: Snapshot name cannot be null or empty.
  Action: Provide a snapshot name.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-40502: Snapshot description cannot be null or empty.
  Cause: Snapshot description cannot be null or empty.
  Action: Provide a valid Snapshot description.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-40503: Snapshot identifier cannot be null.
  Cause: Snapshot identifier cannot be null. This API requires a valid snapshot identifier.
  Action: Provide a valid snapshot identifier.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-40504: Snapshot with snapshot identifier {0} does not exist.
  Cause: Snapshot with given snapshot identifier does not exist.
  Action: Ensure that you provide the correct snapshot identifier for this operation.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-40505: List of snapshots was not found.
  Cause: List of snapshot identifiers was not found. The list is a mandatory parameter when performing this operation in the interface.
  Action: Provide the correct list of snapshot identifiers and retry the operation. The list is a mandatory parameter and cannot be null.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-40506: Snapshot data provided does not appear correct.
  Cause: Snapshot data bytes do not appear correct.
  Action: Ensure that the snapshot bytes array is not null and that the array represents the correct snapshot data. Make sure the byte data from the saved snapshot ZIP file is represented, and then retry the operation.
  Level: 1
Type: ERROR
Impact: Process

OAAM-50001: The fully-qualified transaction key must be a valid string.
Cause: The transaction key supplied to look up the transaction definition is not correct. It should be a non-empty string.
Action: Verify that the transaction key provided is correct and a non-empty string.

Level: 1
Type: ERROR
Impact: Process

OAAM-50002: Transaction definition was not found for the key {0}.
Cause: The key provided does not match any transaction definition.
Action: Verify that the transaction key provided is correct and a non-empty string.

Level: 1
Type: ERROR
Impact: Process

OAAM-50003: Transaction Definition ID is null.
Cause: Transaction Definition ID is null.
Action: Provide a valid Transaction Definition ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-50004: Transaction Definition ID is invalid or non-existent.
Cause: Transaction Definition ID is invalid or non-existent.
Action: Provide a valid and existent Transaction Definition ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-50005: Transaction name is null or invalid.
Cause: Transaction name is null or invalid.
Action: Provide a valid transaction name.

Level: 1
Type: ERROR
Impact: Process

OAAM-50006: Transaction definition cannot be null.
Cause: Transaction definition cannot be null.
Action: Provide a valid transaction definition object.

Level: 1
Type: ERROR
Impact: Process

OAAM-50007: Transaction Definition ID is null.
Cause: Transaction Definition ID is null.
Action: Provide a non-null Transaction Definition ID.
Level: 1

Type: ERROR
Impact: Process

OAAM-50008: Transaction Definition ID is either invalid or does not exist.
Cause: Transaction Definition ID is either invalid or does not exist.
Action: Provide valid Transaction Definition ID.
Level: 1

Type: ERROR
Impact: Process

OAAM-50009: Transaction definition could not be updated.
Cause: Transaction definition could not be updated.
Action: Check error log for details.
Level: 1

Type: ERROR
Impact: Process

OAAM-50010: Transaction Definition ID list is null or empty.
Cause: Transaction Definition ID list is null or empty.
Action: Provide a valid Transaction Definition ID list.
Level: 1

Type: ERROR
Impact: Process

OAAM-50011: Transaction definition for the given transaction definition {0} not found.
Cause: Transaction definition for the given transaction definition {0} not found.
Action: Provide a valid Transaction Definition ID.
Level: 1

Type: ERROR
Impact: Process

OAAM-50012: Transaction input data mapping is missing for transaction {0}.
Cause: Transaction input data mapping is missing for transaction {0}.
Action: Provide transaction input data mapping to activate the transaction {0}.
Level: 1

Type: ERROR
Impact: Process

OAAM-50013: Transaction definition for the given transaction definition \{0\} not found.
  
  Cause: Transaction definition for the given transaction definition \{0\} not found.
  
  Action: Provide a valid transaction definition.
  
  Level: 1
  
  Type: ERROR
  
  Impact: Process

OAAM-50014: Transaction input data mapping is missing for transaction \{0\}.
  
  Cause: Transaction input data mapping is missing for transaction \{0\}.
  
  Action: Provide transaction input data to activate the transaction \{0\}.
  
  Level: 1
  
  Type: ERROR
  
  Impact: Process

OAAM-50015: Source data is missing for transaction \{0\}.
  
  Cause: Source data is missing for transaction \{0\}.
  
  Action: Provide the required source data to activate transaction \{0\}.
  
  Level: 1
  
  Type: ERROR
  
  Impact: Process

OAAM-50016: Transaction data mapping is missing for transaction \{0\}.
  
  Cause: Transaction data mapping is missing for transaction \{0\}.
  
  Action: Provide transaction data mapping to activate transaction \{0\}.
  
  Level: 1
  
  Type: ERROR
  
  Impact: Process

OAAM-50017: Transaction data mapping is missing for transaction \{0\}.
  
  Cause: Transaction data mapping is missing for transaction \{0\}.
  
  Action: Provide transaction data mapping to activate transaction \{0\}.
  
  Level: 1
  
  Type: ERROR
  
  Impact: Process

OAAM-50018: Entity mapping could not be found for transaction \{0\}.
  
  Cause: Entity mapping could not be found for transaction \{0\}.
  
  Action: Make sure all entities are mapped before activating transaction \{0\}.
  
  Level: 1
  
  Type: ERROR
  
  Impact: Process
OAAM-50019: Transaction and entity mapping is missing for transaction [0].
  Cause: Transaction and entity mapping is missing for transaction [0].
  Action: Provide transaction and entity mapping to activate transaction [0].

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50020: Transaction Entity Definition Map ID cannot be null.
  Cause: Transaction Entity Definition Map ID cannot be null.
  Action: Provide a valid Transaction Entity Definition Map ID.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50021: Transaction Definition ID missing while creating transaction entity map.
  Cause: Transaction Definition ID missing while creating transaction entity map.
  Action: Provide a valid Transaction Definition ID.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50022: Entity Definition ID missing while creating transaction entity map.
  Cause: Entity Definition ID missing while creating transaction entity map.
  Action: Provide a valid Entity Definition ID.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50023: Entity definition validation failed. Operation cannot be performed.
  Cause: Entity definition validation failed. Operation cannot be performed.
  Action: Provide a valid entity definition.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50024: Entity name validation failed.
  Cause: Entity name validation failed.
  Action: Provide a valid and unique entity name.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50025: Invalid entity relation.
Cause: Invalid entity relation.
Action: Provide a valid entity relation.
Level: 1
Type: ERROR
Impact: Process

OAAM-50026: Invalid display order.
Cause: Invalid display order.
Action: Provide a valid display order.
Level: 1
Type: ERROR
Impact: Process

OAAM-50027: Duplicate entity name.
Cause: Duplicate entity name.
Action: Provide a valid and unique entity name.
Level: 1
Type: ERROR
Impact: Process

OAAM-50028: Invalid and non-unique entity relation.
Cause: Invalid and non-unique entity relation.
Action: Provide a valid and unique entity relation.
Level: 1
Type: ERROR
Impact: Process

OAAM-50029: Invalid and non-unique display order.
Cause: Invalid and non-unique display order.
Action: Provide a valid and unique display order.
Level: 1
Type: ERROR
Impact: Process

OAAM-50030: Transaction Definition ID missing while updating transaction entity map.
Cause: Transaction Definition ID missing while updating transaction entity map.
Action: Provide a valid and non-null Transaction Definition ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-50031: Entity Definition ID missing while updating transaction entity map.
Cause: Entity Definition ID missing while updating transaction entity map.
Action: Provide a valid and non-null Entity Definition ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-50032: Transaction delete is not allowed.
Cause: Transaction delete is not allowed.
Action: Select a valid transaction for delete.
Level: 1
Type: ERROR
Impact: Process

OAAM-50033: Data element definition cannot be null.
Cause: Data element definition cannot be null.
Action: Provide a valid data element definition.
Level: 1
Type: ERROR
Impact: Process

OAAM-50034: Data element definition array cannot be null or empty.
Cause: Data element definition array cannot be null or empty.
Action: Provide a non-null and valid data element definition array.
Level: 1
Type: ERROR
Impact: Process

OAAM-50035: Attribute validation failed.
Cause: Attribute validation failed.
Action: Provide a valid attribute.
Level: 1
Type: ERROR
Impact: Process

OAAM-50036: Creating the attribute failed.
Cause: Creating the attribute failed.
Action: Provide the valid entry for creating the attribute.
Level: 1
Type: ERROR
Impact: Process

OAAM-50037: Attribute not found.
Cause: Attribute not found.
Action: Provide a valid and non-null attribute.
Level: 1  
Type: ERROR  
Impact: Process  

OAAM-50038: Cannot find a matching data element definition.  
Cause: Cannot find a matching data element definition.  
Action: Provide a valid entry with a matching data element definition.  

Level: 1  
Type: ERROR  
Impact: Process  

OAAM-50039: No attribute found to delete.  
Cause: No attribute found to delete.  
Action: Provide a valid attribute to delete.  

Level: 1  
Type: ERROR  
Impact: Process  

OAAM-50040: Source validation failed.  
Cause: Source validation failed.  
Action: Provide valid source data.  

Level: 1  
Type: ERROR  
Impact: Process  

OAAM-50041: Cannot find a matching transaction data mapping.  
Cause: Cannot find a matching Transaction Data Mapping ID.  
Action: Provide a valid and matching Transaction Data Mapping ID.  

Level: 1  
Type: ERROR  
Impact: Process  

OAAM-50042: Transaction data mapping is null or empty.  
Cause: Transaction data mapping IDs are null or empty.  
Action: Provide a non-null or valid Transaction Data Mapping ID.  

Level: 1  
Type: ERROR  
Impact: Process  

OAAM-50043: No transaction mapping found to delete.  
Cause: No transaction mapping found to delete.  
Action: Transaction should have one or more mappings to delete.  

Level: 1  
Type: ERROR
Impact: Process

OAAM-50044: No entity mapping found to delete.
  Cause: No entity mapping found to delete.
  Action: Entity should have one or more mappings to delete.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50045: Transaction name is null or empty.
  Cause: Transaction name is null or empty.
  Action: Provide a valid and non-null transaction name.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50046: Transaction key is null or empty.
  Cause: Transaction key is null or empty.
  Action: Provide a valid and non-null transaction key.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50047: Transaction description is null or empty.
  Cause: Transaction description is null or empty.
  Action: Provide a valid and non-null transaction description.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50048: Duplicate transaction name or transaction key; validation failed.
  Cause: Validation failed because of a duplicate transaction name or transaction key.
  Action: Provide a valid and unique transaction name or transaction key.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50049: Transaction entity map for the ID {0} does not exist.
  Cause: Transaction entity map for the ID does not exist.
  Action: Provide a valid Transaction Entity Map ID.
  Level: 1
  Type: ERROR
  Impact: Process
OAAM-50050: Transaction Entity Map ID cannot be null.
   Cause: Transaction Entity Map ID cannot be null.
   Action: Provide a valid and non-null Transaction Entity Map ID.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-50102: Display/name scheme is not set for entity {0}.
   Cause: Display/name scheme is not set for entity.
   Action: Set the display/name scheme before activation.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-50103: ID scheme is not set for entity {0}.
   Cause: ID scheme is not set for entity.
   Action: Set the ID scheme before activation.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-50104: No data element definitions exist for entity {0}.
   Cause: No data element definitions exist for entity.
   Action: Add data element definitions before activating.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-50105: Row and Column values are not unique/valid for data element {0} for entity {1}.
   Cause: Row and Column values are not unique/valid for data element for entity.
   Action: Provide unique Row and Column values for data elements within an entity.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-50106: There is more than one data element with the same internal identifier, {0}, for entity {1}.
   Cause: There is more than one data element with the same internal identifier for the same entity.
   Action: Provide a unique internal identifiers for data element definitions within an entity.
   Level: 1
Type: ERROR
Impact: Process

OAAM-50107: Index for numeric data elements is not between {0} and {1} for entity {2}.
Cause: Index for numeric data elements is not between {0} and {1} for entity {2}.
Action: Ensure that index for numeric data elements is between {0} and {1} for entity {2}.

Level: 1
Type: ERROR
Impact: Process

OAAM-50108: Index for non-numeric data elements is not between {0} and {1} for entity {2}.
Cause: Index for non-numeric data elements is not between {0} and {1} for entity {2}.
Action: Ensure that index for non-numeric data elements is between {0} and {1} for entity {2}.

Level: 1
Type: ERROR
Impact: Process

OAAM-50109: No display scheme elements are available for entity {0}.
Cause: No display scheme elements have been added for entity {0}.
Action: Add display scheme elements before activating.

Level: 1
Type: ERROR
Impact: Process

OAAM-50110: There is more than one display data element with the same internal ID, {0}, for entity {1}.
Cause: There is more than one display data element with the same internal ID, {0}, for entity {1}.
Action: Entity should not have more than one display data element with the same internal ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-50111: There is more than one display data element with the same order, {0}, for entity {1}.
Cause: There is more than one display data element with the same order, {0}, for entity {1}.
Action: Correct the ordering for the display data elements for entity {1}.

Level: 1
Type: ERROR
Impact: Process

OAAM-50112: No ID scheme elements are available for entity {0}.
  Cause: No ID scheme elements have been added for entity {0}.
  Action: Add ID scheme elements before activating.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50113: There is more than one ID scheme data element with the same internal ID, {0}, for entity {1}.
  Cause: There is more than one ID scheme data element with the same internal ID, {0}, for entity {1}.
  Action: The entity should not have more than one ID scheme data element with the same internal ID.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50114: There is more than one ID scheme data element with the same order, {0}, for entity {1}.
  Cause: There is more than one ID scheme data element with the same order, {0}, for entity {1}.
  Action: The entity should not have more than one ID scheme data element with the same order.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50115: Database error.
  Cause: Database error.
  Action: Database error.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50116: Entity Name field cannot be blank.
  Cause: Entity Name field cannot be blank.
  Action: Provide an entity name for the Entity Name field.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50117: Entity Key field cannot be blank.
  Cause: Entity Key field cannot be blank.
  Action: Provide an entity key in the Key field.
Level: 1
Type: ERROR
Impact: Process

OAAM-50118: Entity Description field cannot be blank.
Cause: Entity Description field cannot be blank.
Action: Provide an entity description in the Description field.

Level: 1
Type: ERROR
Impact: Process

OAAM-50119: Another entity definition with the same name already exists.
Cause: Another entity definition with the same name already exists.
Action: Provide a unique name for the entity definition.

Level: 1
Type: ERROR
Impact: Process

OAAM-50120: Internal ID field of data elements cannot be blank.
Cause: Internal ID field of data elements cannot be blank.
Action: Provide an internal ID for data elements.

Level: 1
Type: ERROR
Impact: Process

OAAM-50121: Data Type field of the data elements of the entity cannot be blank.
Cause: Data Type field of the data elements of the entity cannot be blank.
Action: Provide a data type for data elements of the entity.

Level: 1
Type: ERROR
Impact: Process

OAAM-50122: Row number of the data elements of the entity cannot be less than zero.
Cause: Row number of the data elements of the entity cannot be less than zero.
Action: Provide positive integers as row numbers for the data elements of the entity.

Level: 1
Type: ERROR
Impact: Process

OAAM-50123: Column number of data elements of the entity cannot be less than zero.
Cause: Column number of data elements of the entity cannot be less than zero.
**Action:** Provide a positive integer as the column number for data elements of the entity.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-50124:** Internal ID of the data element of the entity should be unique.  
**Cause:** Internal ID of data element of the entity should be unique.  
**Action:** Ensure that the internal ID of the data element of the entity is unique.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-50125:** Name of data element of the entity should be unique.  
**Cause:** Name of data element of the entity should be unique.  
**Action:** Ensure that the name of the data element of the entity is unique.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-50126:** More than one data element definition exists with the same row and column.  
**Cause:** More than one data element definition exists with the same row and column.  
**Action:** Ensure that row and column values are unique for the data element definitions.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-50127:** Validation error: Data element definition identifier should not be set for creating a new data element definition.  
**Cause:** Validation error: Data element definition identifier should not be set for creating a new data element definition. The identifier is generated by the system for the new data element.  
**Action:** Validation error: Data element definition identifier should not be set for creating a new data element definition. The identifier is generated by the system for the new data element.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-50128:** Column value for numeric data elements should be between \{0\} and \{1\}.  
**Cause:** Column value for numeric data elements should be between \{0\} and \{1\}.  
**Action:** Column value for numeric data elements should be between \{0\} and \{1\}. 

59-50  
Product Title/BookTitle as a Variable
Level: 1
Type: ERROR
Impact: Process

OAAM-50129: Column value for non-numeric data elements should be between 1 and \[0\].
Cause: Column value for non-numeric data elements should be between 1 and \[0\].
Action: Column value for non-numeric data elements should be between 1 and \[0\].

Level: 1
Type: ERROR
Impact: Process

OAAM-50130: The entity \{0\} cannot be disabled because it is used by one or more active transactions.
Cause: The entity \{0\} cannot be disabled because it is used by one or more active transactions.
Action: The entity \{0\} cannot be disabled because it is used by one or more active transactions.

Level: 1
Type: ERROR
Impact: Process

OAAM-50131: The entity \{0\} cannot be deleted because it is used by one or more active transactions.
Cause: The entity \{0\} cannot be deleted because it is used by one or more active transactions.
Action: The entity \{0\} cannot be deleted because it is used by one or more active transactions.

Level: 1
Type: ERROR
Impact: Process

OAAM-50132: Entity Definition ID cannot be null.
Cause: Entity Definition ID cannot be null.
Action: Entity Definition ID cannot be null.

Level: 1
Type: ERROR
Impact: Process

OAAM-50133: Data profile definition not found for the Entity Definition ID.
Cause: Data profile definition not found for the Entity Definition ID.
Action: Data profile definition not found for the Entity Definition ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-50134: Data Definition ID does not match with Data Definition ID of the data profile.
Cause: Data Definition ID does not match with Data Definition ID of the data profile.
Action: Data Definition ID does not match with Data Definition ID of the data profile.
Level: 1
Type: ERROR
Impact: Process

OAAM-50135: Unable to create external ID data definition for the Entity Definition ID.
Cause: Unable to create external ID data definition for the Entity Definition ID.
Action: Unable to create external ID data definition for the Entity Definition ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-50136: The element with Element ID {0} cannot be deleted because it is used by one or more active transactions.
Cause: The element with Element ID {0} cannot be deleted because it is used by one or more active transactions.
Action: The element with Element ID {0} cannot be deleted because it is used by one or more active transactions.
Level: 1
Type: ERROR
Impact: Process

OAAM-50137: Data element having Data Definition Element ID {0} does not exist.
Cause: Data element having Data Definition Element ID {0} does not exist.
Action: Data element having Data Definition Element ID {0} does not exist.
Level: 1
Type: ERROR
Impact: Process

OAAM-50138: Identification scheme cannot be null.
Cause: Identification scheme cannot be null.
Action: Identification scheme cannot be null.
Level: 1
Type: ERROR
Impact: Process

OAAM-50139: Data Definition Element ID cannot be null.
Cause: Data Definition Element ID cannot be null.
Action: Data Definition Element ID cannot be null.
Level: 1
Type: ERROR
Impact: Process

OAAM-50140: System error occurred while loading entities.
Cause: System error occurred while loading entities.
Action: System error occurred while loading entities.
Level: 1
Type: ERROR
Impact: Process

OAAM-50141: Error loading object {0} with primary key {1} from database. {2}.
Cause: Error loading object {0} with primary key {1} from database. {2}.
Action: Error loading object {0} with primary key {1} from database. {2}.
Level: 1
Type: ERROR
Impact: Process

OAAM-50142: Error inserting object {0} to database.
Cause: Error inserting object to database. Database may not be available.
Action: Error inserting object to database. Try the operation again.
Level: 1
Type: ERROR
Impact: Process

OAAM-50200: Configurable Action ID provided is invalid or does not exist.
Cause: Configurable Action ID provided is invalid or does not exist.
Action: Provide a valid and existent Configurable Action ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-50201: Configurable Action ID cannot be null.
Cause: Configurable Action ID cannot be null.
Action: Provide a non-null Configurable Action ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-50202: Action parameters mismatch.
Cause: Action parameters mismatch.
Action: Provide a valid action parameter.
Level: 1
Type: ERROR
Impact: Process

OAAM-50203: Action name provided cannot be null.
Cause: Action name provided cannot be null.
Action: Provide a non-null action name.

Level: 1
Type: ERROR
Impact: Process

OAAM-50204: Java Class Name provided cannot be null.
Cause: Java Class Name provided cannot be null.
Action: Provide a non-null Java class name.

Level: 1
Type: ERROR
Impact: Process

OAAM-50205: Duplicate action.
Cause: Duplicate action.
Action: Provide a unique value to create a valid action.

Level: 1
Type: ERROR
Impact: Process

OAAM-50206: Configurable action cannot be deleted as it is currently used by one or more Action Instances.
Cause: Configurable action cannot be deleted as it is currently used by one or more Action Instances.
Action: Select a valid configurable action that is not in use.

Level: 1
Type: ERROR
Impact: Process

OAAM-50207: Invalid or non-existent Action ID.
Cause: Invalid or non-existent Action ID.
Action: Provide a valid and existent Action ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-50208: Action ID list provided cannot be null or empty.
Cause: Action ID list provided cannot be null or empty.
Action: Provide a non-null and valid Action ID list.
Level: 1
Type: ERROR
Impact: Process

OAAM-50209: Action ID provided cannot be null.
Cause: Action ID provided cannot be null.
Action: Provide a non-null Action ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-50210: Action Instance ID provided is invalid or non-existent.
Cause: Action Instance ID provided is invalid or non-existent.
Action: Provide a valid and existent Action Instance ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-50211: Action Instance ID cannot be null.
Cause: Action Instance ID cannot be null.
Action: Provide a non-null Action Instance ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-50212: Execution Order should be unique for synchronous actions.
Cause: Execution Order should be unique for synchronous actions.
Action: Provide unique execution order for each synchronous action.

Level: 1
Type: ERROR
Impact: Process

OAAM-50213: Action Instance name is a duplicate.
Cause: Action Instance name is a duplicate.
Action: Provide a unique action instance name.

Level: 1
Type: ERROR
Impact: Process

OAAM-50214: Action instance association is not allowed.
Cause: Action instance association is not allowed.
Action: Select the valid instance and parameters for the association.

Level: 1
Type: ERROR
Impact: Process

**OAAM-50215: Invalid or non-existent Action Instance ID {0}.
**
**Cause:** Invalid or non-existent Action Instance ID {0}.
**Action:** Provide a valid and existing Action Instance ID.

Level: 1
Type: ERROR
Impact: Process

**OAAM-50216: Value {1} provided for the parameter name {0} is not a valid Boolean value.
**
**Cause:** Value {1} provided for the parameter name {0} is not a valid Boolean value.
**Action:** Provide a valid Boolean value for the parameter name {0}. It can be true or false only.

Level: 1
Type: ERROR
Impact: Process

**OAAM-50217: Value {1} provided for the parameter name {0} is not a valid Integer value.
**
**Cause:** Value {1} provided for the parameter name {0} is not a valid Integer value.
**Action:** Provide a valid Integer value for the parameter name {0}.

Level: 1
Type: ERROR
Impact: Process

**OAAM-50218: Value {1} provided for the parameter name {0} is not a valid Long value.
**
**Cause:** Value {1} provided for the parameter name {0} is not a valid Long value.
**Action:** Provide a valid Long value for the parameter name {0}.

Level: 1
Type: ERROR
Impact: Process

**OAAM-50219: Value {1} provided for the parameter name {0} is not a valid Date value.
**
**Cause:** Value {1} provided for the parameter name {0} is not a valid Date value.
**Action:** Provide a valid Date value for the parameter name {0}.

Level: 1
Type: ERROR
Impact: Process

**OAAM-50220: Action parameter value validation failed.
**
**Cause:** The action parameter value validation failed.
**Action:** Verify all the parameter values for its data type are valid.
OAAM-50221: Nonexistent or invalid Parameter ID {0} with the parameter name {1}.
Cause: Nonexistent or invalid Parameter ID {0} with the parameter name {1}.
Action: Provide a valid existing parameter and value.

OAAM-50222: Unable to load configurable action class {0}. Ensure the class is made available in the class path.
Cause: Unable to load configurable action class {0}. Ensure the class is made available in the class path.
Action: Provide a valid class name with the class already in the class path.

OAAM-60001: Pattern ID cannot be null.
Cause: Pattern ID cannot be null.
Action: Pattern ID cannot be null.

OAAM-60002: Pattern with the name {0} already exists.
Cause: Pattern with the name {0} already exists.
Action: Pattern with the name {0} already exists.

OAAM-60003: Comparison value is required.
Cause: Comparison value is required.
Action: Comparison value is required.

OAAM-60004: The value {0} is invalid.
Cause: The value {0} is invalid.
Action: The value {0} is invalid.
Level: 1
Type: ERROR
Impact: Process

OAAM-60005: The value {0} is not a valid Integer value.
  Cause: The value {0} is not a valid Integer value.
  Action: The value {0} is not a valid Integer value.

Level: 1
Type: ERROR
Impact: Process

OAAM-60006: The value {0} is not a valid Long value.
  Cause: The value {0} is not a valid Long value.
  Action: The value {0} is not a valid Long value.

Level: 1
Type: ERROR
Impact: Process

OAAM-60007: The value {0} is not a valid Boolean value.
  Cause: The value {0} is not a valid Boolean value.
  Action: The value {0} is not a valid Boolean value.

Level: 1
Type: ERROR
Impact: Process

OAAM-60008: The value {0} is not a valid Float value.
  Cause: The value {0} is not a valid Float value.
  Action: The value {0} is not a valid Float value.

Level: 1
Type: ERROR
Impact: Process

OAAM-60009: The value {0} is not a valid Date value.
  Cause: The value {0} is not a valid Date value.
  Action: The value {0} is not a valid Date value.

Level: 1
Type: ERROR
Impact: Process

OAAM-60010: The value {0} is not a valid Double value.
  Cause: The value {0} is not a valid Double value.
  Action: The value {0} is not a valid Double value.

Level: 1
Type: ERROR
Impact: Process

OAAM-60011: Entered values overlaps with {0}-{1} range.
Causes: Entered values overlaps with {0}-{1} range.
Action: Entered values overlaps with {0}-{1} range.
Level: 1
Type: ERROR
Impact: Process

OAAM-60012: The attribute already exists.
Cause: The attribute already exists.
Action: The attribute already exists.
Level: 1
Type: ERROR
Impact: Process

OAAM-60013: Pattern parameter with Parameter ID {0} does not exist.
Cause: Pattern parameter with the Parameter ID {0} does not exist.
Action: Pattern parameter with the Parameter ID {0} does not exist.
Level: 1
Type: ERROR
Impact: Process

OAAM-60014: Parameter ID cannot be null.
Cause: Parameter ID cannot be null.
Action: Parameter ID cannot be null.
Level: 1
Type: ERROR
Impact: Process

OAAM-60015: Data has already been collected for this pattern. Changing this pattern will potentially render that data inaccurate.
Cause: Data has already been collected for this pattern. Changing this pattern will potentially render that data inaccurate.
Action: Data has already been collected for this pattern. Changing this pattern will potentially render that data inaccurate.
Level: 1
Type: ERROR
Impact: Process

OAAM-60016: Pattern is associated with active policies - {0}.
Cause: Pattern is associated to the active policies - {0}.
Action: Pattern is associated to the active policies - {0}.
Level: 1
Type: ERROR
Impact: Process

OAAM-65001: No policy set found.
  Cause: No policy set found.
  Action: No policy set found.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-65002: The scoring type value {0} is invalid.
  Cause: The scoring type value {0} is invalid.
  Action: The scoring type value {0} is invalid.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-65003: Action override with Block ID {0} does not exist.
  Cause: Action override with Block ID {0} does not exist.
  Action: Action override with Block ID {0} does not exist.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-65004: Score action with Score Action ID {0} does not exist.
  Cause: Score action with Score Action ID {0} does not exist.
  Action: Score action with Score Action ID {0} does not exist.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-65005: Score Action ID cannot be null.
  Cause: Score Action ID cannot be null.
  Action: Score Action ID cannot be null.
  Level: 1

   **Impact:** Process

OAAM-70001: Question [0] cannot be deleted because it is linked to the user.
   **Cause:** Question [0] cannot be deleted because it is linked to the user.
   **Action:** Either unlink the user from this question or delete some other question.
   **Level:** 1
Type: ERROR
Impact: Process

OAAM-70002: Selected Question ID cannot be updated to the given status.
Cause: Selected Question ID cannot be updated to the given status.
Action: Selected Question ID cannot be updated to the given status. Select a different question.

Level: 1
Type: ERROR
Impact: Process

OAAM-70003: IDs in the list cannot be null or empty.
Cause: IDs in the list cannot be null or empty.
Action: Provide a Valid ID list.

Level: 1
Type: ERROR
Impact: Process

OAAM-70004: Invalid status.
Cause: Invalid status.
Action: Provide a valid status: Active or Disabled.

Level: 1
Type: ERROR
Impact: Process

OAAM-70005: Invalid and non-existent Question ID.
Cause: Invalid and non-existent Question ID.
Action: Provide a valid and existent Question ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-70006: Question ID should not be null.
Cause: Question ID should not be null.
Action: Provide a valid Question ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-70007: Question name \{0\} already exist. Provide a unique question name.
Cause: Question name \{0\} already exist. Provide a unique question name.
Action: Provide a valid and unique question name.

Level: 1
Type: ERROR
Impact: Process

OAAM-70008: Category cannot be deleted because users have registered questions from this category.
Cause: Category cannot be deleted because users have registered questions from this category.
Action: Category cannot be deleted because users have registered questions from this category.
Level: 1
Type: ERROR
Impact: Process

OAAM-70009: Invalid category.
Cause: Invalid Category ID.
Action: Provide a valid Category ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-70010: Category cannot be null.
Cause: Category cannot be null.
Action: Provide a valid and non-null category.
Level: 1
Type: ERROR
Impact: Process

OAAM-70011: Name cannot be empty or null.
Cause: Name cannot be empty or null.
Action: Provide a valid and non-null name.
Level: 1
Type: ERROR
Impact: Process

OAAM-70012: Invalid or empty category name.
Cause: Invalid or empty category name.
Action: Provide a valid and non-null category name.
Level: 1
Type: ERROR
Impact: Process

OAAM-70013: Validation name \{0\} already exist. Provide a unique validation name.
Cause: Validation name \{0\} already exist. Provide a unique validation name.
Action: Provide a valid and unique validation name.
Level: 1
Type: ERROR
Impact: Process

**OAAM-70014: Validation cannot be null.**

*Cause:* Validation cannot be null.

*Action:* Provide a valid and non-null validation.

*Level:* 1

*Type:* ERROR

**Impact:** Process

**OAAM-70015: Invalid Validation ID.**

*Cause:* Invalid Validation ID.

*Action:* Provide a valid Validation ID.

*Level:* 1

*Type:* ERROR

**Impact:** Process

**OAAM-70016: Validations {0} are used in the KBA configuration and cannot be deleted.**

*Cause:* Validations are linked and cannot be deleted.

*Action:* Select only the unlinked validations for deleting.

*Level:* 1

*Type:* ERROR

**Impact:** Process

**OAAM-70017: Validation ID {0} is invalid and cannot be deleted.**

*Cause:* Validation ID is invalid and cannot be deleted.

*Action:* Provide a valid and existent Validation ID.

*Level:* 1

*Type:* ERROR

**Impact:** Process

**OAAM-70018: Validation {0} has already been added as global validation.**

*Cause:* Validation will not be added again as a global validation.

*Action:* Select a new Validation that is not part of the Global Validation list.

*Level:* 1

*Type:* ERROR

**Impact:** Process

**OAAM-70019: Validation ID is not in the Global Validation list.**

*Cause:* Validation ID is not found in the Global Validation list.

*Action:* Select a Validation ID which is part of the Global Validation list.

*Level:* 1

*Type:* ERROR

**Impact:** Process
OAAM-70020: No validation available in Global Validation list for delete.

**Cause:** No validation available in Global Validation list for delete.

**Action:** No validation available in Global Validation list for delete.

**Level:** 1

**Type:** ERROR

**Impact:** Process

OAAM-70021: Configuration value {0} is not a positive number.

**Cause:** Configuration value should be a positive number.

**Action:** Provide a positive number for the configuration value.

**Level:** 1

**Type:** ERROR

**Impact:** Process

OAAM-70022: Configuration value {0} cannot exceed the category count.

**Cause:** Configuration value cannot exceed the category count.

**Action:** Provide the configuration value within the allowed category count.

**Level:** 1

**Type:** ERROR

**Impact:** Process

OAAM-70023: No validation available in Global Validation list for delete.

**Cause:** No validation available in Global Validation list for delete.

**Action:** No validation available in Global Validation list for delete.

**Level:** 1

**Type:** ERROR

**Impact:** Process

OAAM-70024: Insufficient questions in the system for configuring {0} questions for each user with {1} questions per menu.

**Cause:** There are not enough questions in the system for each user to register for the number of questions per menu.

**Action:** Import/create more questions so that the number of questions that user needs to register multiplied by the questions per menu is less than the total number of questions available.

**Level:** 1

**Type:** ERROR

**Impact:** Process

OAAM-70025: Too few questions are being configured for users. Try to register at least {0} questions for the user.

**Cause:** You have tried to set the number of questions too low. This can lead to security vulnerability.

**Action:** For the best mix of security and usability, register at least three and at most five or so questions. These settings are dependent on your particular system implementation.
Level: 1
Type: ERROR
Impact: Process

OAAM-70026: Too many questions are being configured for users. Try to register at most {0} questions for user.
Cause: You have tried to set the number of questions too high. This can lead to usability issues.
Action: For the best mix of security and usability, register at least three and at most five questions. These settings are dependent on your particular system implementation.

Level: 1
Type: ERROR
Impact: Process

OAAM-70027: Selected category {0} cannot be updated to the given status.
Cause: Selected category {0} cannot be updated to the given status.
Action: Selected category {0} cannot be updated to the given status. Select a different category.

Level: 1
Type: ERROR
Impact: Process

OAAM-70028: Categories' status cannot be updated. This will lead to too few active categories.
Cause: Categories cannot be updated. This will result in very few categories being available for the registration logic.
Action: Make sure registration logic and available active categories are consistent with this change. One way to do this will be update the registration logic first and then try this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-70029: Categories cannot be deleted. This will lead to too few active categories.
Cause: Categories cannot be deleted. This will result in very few categories being available for the registration logic.
Action: Make sure registration logic and available active categories are consistent with this change. One way to do this will be update the registration logic first and then try this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-70030: Category name {0} already exist. Provide a unique category name.
Cause: Category name {0} already exist. Provide a unique category name.
**OAAM-70031: Failed to deactivate selected Categories.**

**Cause:** Failed to deactivate selected Categories. When category is deactivated the questions belonging to that category are also impacted. Some questions cannot be updated to the given status.

**Action:** Make sure that the questions in selected categories can be updated to the given status.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-70032: Failed to delete the selected groups. One or more of the groups are in use.**

**Cause:** Failed to delete the selected groups. One or more of the groups are in use.

**Action:** Remove the usages of the group and delete it.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-70033: Validation search query cannot be null.**

**Cause:** Validation search query object passed is null.

**Action:** Make sure to pass non-null search query object.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-70034: Validations marked for deletion {0} are also used being as global validations.**

**Cause:** Validations marked for deletion are also used being as global validation.

**Action:** Manage global validations from Registration Logic page.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-70035: Validation list for delete operation contains null value(s).**

**Cause:** One or more of the validation IDs sent for deletion contain null values.

**Action:** Make sure no null values are sent in validation ID lists.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process
OAAM-70036: Question {0} does not exist. It may have been deleted.
   Cause: Question {0} does not exist. It may have been deleted.
   Action: Question {0} does not exist.
   Level: 1
   Type: ERROR
   Impact: Process

  Impact: Process

OAAM-70902: Alert with Alert ID, {0}, does not exist
  Cause: Alert with Alert ID, {0}, does not exist
  Action: Alert with Alert ID, {0}, does not exist
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-80001: Invalid IP address value {0}
  Cause: Invalid IP address {0}. Validation failed.
  Action: Enter a valid IP address; the value {0} is invalid
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-90001: Task name {0} already exist. Provide a unique task name.
  Cause: Task name {0} already exist. Provide a unique task name.
  Action: Provide a valid and unique task name.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-90002: Task type {0} not found. Provide an existing task type.
  Cause: Task type {0} not found. Provide an existing task type.
  Action: Provide a valid and existing task type.
Level: 1
Type: ERROR
Impact: Process

OAAM-90003: Task status {0} not found. Provide an existing task status.
Cause: Task status {0} not found. Provide an existing task status.
Action: Provide a valid and existing task status.

Level: 1
Type: ERROR
Impact: Process

OAAM-90004: Task name {0} is not alphanumeric. Provide an alphanumeric task name.
Cause: Task name {0} is not alphanumeric. Provide an alphanumeric task name.
Action: Provide a valid and alphanumeric task name.

Level: 1
Type: ERROR
Impact: Process

OAAM-90005: Task priority {0} not found. Provide an existing task priority.
Cause: Task priority {0} not found. Provide an existing task priority.
Action: Provide a valid and existing task priority.

Level: 1
Type: ERROR
Impact: Process

OAAM-90006: Schedule type {0} is invalid. Type has to be either onetime or recurring.
Cause: Schedule type {0} is invalid. Type has to be either onetime or recurring.
Action: Provide a valid Schedule type and should be either onetime or recurring.

Level: 1
Type: ERROR
Impact: Process

OAAM-90007: Cancel duration type {0} not found. Provide an existing duration type.
Cause: Cancel duration type {0} not found. Provide an existing duration type.
Action: Provide a valid and existing duration type.

Level: 1
Type: ERROR
Impact: Process

OAAM-90008: Cancel duration unit {0} not found. Provide an existing duration unit.
Cause: Cancel duration unit {0} not found. Provide an existing duration unit.
Action: Provide a valid and existing duration unit.
Level: 1  
Type: ERROR  
Impact: Process

OAAM-90009: Start date is required for schedule.
Cause:  
Action:  
Level: 1  
Type: ERROR  
Impact: Process

OAAM-90010: Start time is required for schedule.
Cause:  
Action:  
Level: 1  
Type: ERROR  
Impact: Process

OAAM-90011: Recurrence type {0} not found. Provide an existing Recurrence type.
Cause: Recurrence type {0} not found. Provide an existing Recurrence type.
Action: Provide a valid and existing Recurrence type.
Level: 1  
Type: ERROR  
Impact: Process

OAAM-90012: Cutoff time {0} is invalid. Provide a value in the existing range.
Cause: Cutoff time {0} is invalid. Provide a value in the existing range.
Action: Provide a valid value in the cutoff time range.
Level: 1  
Type: ERROR  
Impact: Process

OAAM-90013: Custom loader {0} is invalid. Provide a valid custom loader.
Cause: Custom loader {0} is invalid. Provide a valid custom loader.
Action: Provide a valid custom loader.
Level: 1  
Type: ERROR  
Impact: Process

OAAM-90014: Custom run {0} is invalid. Provide a valid custom run.
Cause: Custom run {0} is invalid. Provide a valid custom run.
Action: Provide a valid custom run.
Level: 1  
Type: ERROR
Impact: Process

OAAM-90015: From date is required for data filters.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-90016: To time is required for data filters.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-90017: From date should be before To date for data filters.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-90018: Schedule cannot be null.
  Cause: Schedule was not selected.
  Action: Select a Schedule, and try again.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-90019: Rollup unit {0} not found. Provide an existing rollup unit.
  Cause: User specified an invalid rollup unit.
  Action: Provide a valid and existing rollup unit.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-90020: Job name cannot be null.
  Cause: User did not specify a job name.
  Action: Provide a job name.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-92000: Job Instance ID's are required.
Cause: No Job Instances were selected.
Action: Select one or more Job Instances, and try again.

Level: 1
Type: ERROR
Impact: Process

OAAM-92001: Job Instance ID's cannot be null.
  Cause: Job Instance was not selected.
  Action: Select one or more Job Instances, and try again.

Level: 1
Type: ERROR
Impact: Process

OAAM-92002: Job Instance with Job instance ID [0], does not exist.
  Cause: Invalid Job Instance ID [0] was selected. It may have been deleted.
  Action: Refresh the list of Job Instances, then select one or more valid Job Instances and try again.

Level: 1
Type: ERROR
Impact: Process

OAAM-92100: Job Instance named ",[0]" cannot be paused. Current status is ",[1]".
  Cause: Job Instances in ",[1]" status cannot be paused.
  Action: Select another action.

Level: 1
Type: ERROR
Impact: Process

OAAM-92101: Job Instance named ",[0]" cannot be resumed. Current status is ",[1]".
  Cause: Job Instances in ",[1]" status cannot be resumed.
  Action: Select another action.

Level: 1
Type: ERROR
Impact: Process

OAAM-92102: Job Instance named ",[0]" cannot be canceled. Current status is ",[1]".
  Cause: Job Instances in ",[1]" status cannot be canceled.
  Action: Select another action.

Level: 1
Type: ERROR
Impact: Process

OAAM-93000: Job ID's are required.
  Cause: No Job were selected.
Action: Select one or more Jobs, and try again.

Level: 1
Type: ERROR
Impact: Process

OAAM-93001: Job ID cannot be null.
Cause: Job was not selected.
Action: Select one or more Job, and try again.

Level: 1
Type: ERROR
Impact: Process

OAAM-93002: Job with Job ID {0}, does not exist.
Cause: Invalid Job ID {0} was selected. It may have been deleted.
Action: Refresh the list of Jobs, then select one or more valid Jobs and try again.

Level: 1
Type: ERROR
Impact: Process

OAAM-93003: Job named "{0}" cannot be processed now.
Cause: There exists Job of same type in Running status.
Action: Try after some time.

Level: 1
Type: ERROR
Impact: Process

OAAM-93100: Job named "{0}" cannot be enabled. Current status is "{1}".
Cause: Job in "{1}" status cannot be enabled.
Action: Select another action.

Level: 1
Type: ERROR
Impact: Process

OAAM-93101: Job named "{0}" cannot be disabled. Current status is "{1}".
Cause: Job in "{1}" status cannot be disabled.
Action: Select another action.

Level: 1
Type: ERROR
Impact: Process

OAAM-93102: Job named "{0}" cannot be deleted. Current status is "{1}".
Cause: Job in "{1}" status cannot be deleted.
Action: Select another action.
Level: 1
Type: ERROR
Impact: Process

OAAM-93103: Job with Job Name {0} cannot be deleted. The job has already Run.
  Cause: Job {0} cannot be deleted.
  Action: Try disabling the job instead of deleting.

Level: 1
Type: ERROR
Impact: Process

OAAM-94100: Job cannot be null.
  Cause: Job was not selected.
  Action: Select a Job, and try again.

Type: ERROR
Impact: Process
OAMAP-60501: The Access Server entry was not specified in the required format:
host:port
Cause: One or more Oracle Access Manager Access Server entries were not
specified correctly.
Action: Contact your Oracle Access Manager administrator to ensure that Access
Server entries are specified with host:port format. host is the DNS host name of the
computer where the Access Server is installed and port is the Access Server port
number.
Level: 1
Type: ERROR
Impact: Configuration

OAMAP-60502: No CallbackHandler was supplied to the Identity
Asserter/Authenticator.
Cause: No CallbackHandler was found during Identity Asserter/Authenticator
initialization.
Action: Contact your Oracle single sign-on administrator with exception/error
information.
Level: 1
Type: ERROR
Impact: Internal Error

OAMAP-60503: A required callback was not found.
Cause: A required callback was not found by the Identity Authenticator.
Action: Contact your Oracle single sign-on administrator with exception/error
information.
Level: 1
Type: ERROR
Impact: Internal Error

OAMAP-60504: Unable to read user input from the CallbackHandler.
Cause: The Identity Authenticator failed to read user input from the
CallbackHandler.
Action: Ensure that you have entered the appropriate credentials.
Level: 1
Type: ERROR
Impact: Data

OAMAP-60505: Found an unsupported token type.
Cause: The Identity Asserter was invoked with an unsupported token type.
Action: Contact your Oracle single sign-on administrator with exception/error information.

Level: 1
Type: ERROR
Impact: Internal Error

OAMAP-60506: Found an unsupported token class.
Cause: The Identity Asserter received an unknown token class "[0]". Expected: a byte[].
Action: Contact your Oracle single sign-on administrator with exception/error information.

Level: 1
Type: ERROR
Impact: Internal Error

OAMAP-60507: Found an invalid SSO Token.
Cause: The Identity Asserter received an SSO token with no characters.
Action: Contact your Oracle single sign-on administrator with exception/error information.

Level: 1
Type: ERROR
Impact: Data

OAMAP-60508: Authentication failed. An invalid ObSSOCookie was found.
Cause: An invalid ObSSOCookie was received.
Action: Contact your Oracle Access Manager administrator to ensure that the ObSSOCookie is not corrupted or timedout before it is passed to the Identity Asserter.

Level: 1
Type: ERROR
Impact: Data

OAMAP-60509: The Identity Authenticator does not support NameCallback.
Cause: NameCallback was not found in the callback array.
Action: Contact your Oracle single sign-on administrator with exception/error information.

Level: 1
Type: ERROR
Impact: Internal Error

OAMAP-60510: The Identity Authenticator does not support PasswordCallback.
Cause: PasswordCallback was not found in the callback array.
Action: Contact your Oracle single sign-on administrator with exception/error information.

Level: 1
Type: ERROR
Impact: Internal Error

OAMAP-60511: Resource "[0]" is not protected by an Oracle Access Manager policy domain.
Cause: The Identity Asserter/Authenticator detected that resource "[0]" is not protected by an Oracle Access Manager policy domain.
Action: Contact your Oracle Access Manager administrator to ensure that the Resource type, Resource Name, and Resource operations are specified correctly for identity assertion, and that the resource specified by the Resource Name is protected by an Oracle Access Manager policy domain and access policies.

Level: 1
Type: ERROR
Impact: Configuration

OAMAP-60512: Unable to get the user name from Return Actions configured in the Oracle Access Manager policy domain.
Cause: The Identity Asserter/Authenticator didn't get any Return Action named uid from the Access Server.
Action: Contact your Oracle Access Manager administrator to ensure that the Return Action in the Oracle Access Manager policy domain is configured correctly to return the user’s login name.

Level: 1
Type: ERROR
Impact: Configuration

OAMAP-60513: Required parameters are not configured for the Identity Asserter/Authenticator.
Cause: The Identity Asserter/Authenticator did not find one or more required parameters.
Action: Contact your Oracle Access Manager administrator to ensure that the AccessGate Name, AccessGate Password, Primary/Secondary Access Server Name parameters are specified correctly in the Access System Console.

Level: 1
Type: ERROR
Impact: Configuration

OAMAP-60514: Unable to get the user name.
Cause: No user name was found in NameCallback.
Action: Specify a user name when asked during the authentication challenge.

Level: 1
Type: ERROR
Impact: Data

OAMAP-60515: The AccessGate Name is not recognized by the Access Server.
 Cause: An incorrect AccessGate name was found.
 Action: Contact your Oracle Access Manager administrator to ensure that the AccessGate name configured for the Identity Asserter/Authenticator exists in a profile in the Access System Console.

Level: 1
Type: ERROR
Impact: Configuration

OAMAP-60516: Unable to create the AccessGate entry for identity assertion/authentication.
 Cause: AccessGate instance creation failed.
 Action: See the Identity Asserter/Authenticator log for details.

Level: 1
Type: ERROR
Impact: Configuration

OAMAP-60517: Failed to validate the SSO Token.
 Cause: The Identity Asserter failed to validate the SSO token.
 Action: See the Identity Asserter log for details.

Level: 1
Type: ERROR
Impact: Data

OAMAP-60518: Authentication failed.
 Cause: The user could not be authenticated with the provided credentials.
 Action: See the Identity Authenticator log for details.

Level: 1
Type: ERROR
Impact: Data

OAMAP-60519: Cannot find the SSO Token in the callback.
 Cause: The SSO Token was not found in the CallbackHandler.
 Action: Contact your Oracle single sign-on administrator with exception/error information.

Level: 1
Type: ERROR
Impact: Internal Error.

OAMAP-60520: Cannot get a logger instance.
 Cause: Cannot create a logger instance.
 Action: Contact your Oracle single sign-on administrator with exception/error information.
Level: 1
Type: ERROR
Impact: Internal Error.

OAMAP-60521: Found an invalid value for parameter "{0}".

Cause: The Identity Asserter/Authenticator parameter value contains a whitespace.

Action: Ensure that the value for Identity Asserter/Authenticator parameter doesn't contain any whitespaces.

Level: 1
Type: ERROR
Impact: Config
OAM-00001: Cannot parse the session token.
  Cause:  The session token appears to be invalid.
  Action: For more details, start logging at the FINE level.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-00002: Error occurred while handling the request.
  Cause: An internal error occurred.
  Action: For more details, start logging at the FINE level.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-00003: Request-Response handler configuration is incomplete.
  Cause: A request handler mapping was missing.
  Action: Add the missing handler mapping to the configuration.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-00004: Cannot initialize the Diagnostic Engine.
  Cause:
  Action:
  Level: 15
  Type: INFO
  Impact: Other

OAM-00005: Cannot locate the custom login page.
  Cause: The custom login page was not found.
  Action: Verify the configuration.
  Level: 15
Type: ERROR
Impact: Other
OAM-00006: Cannot locate the configuration of the custom login page.
  Cause: The custom custom login page was not specified in the configuration.
  Action: Add the custom login page location to the configuration.
  Level: 15
Type: ERROR
Impact: Other
OAM-00007: Cannot edit the custom login page
  Cause: The file permissions of the custom login page do not allow write access.
  Action: Change the file permissions to allow write access.
  Level: 15
Type: ERROR
Impact: Other
OAM-00008: Cannot close the custom login page
  Cause: The source code of the custom login page does not support closing of the login page.
  Action: Check the custom login page source code.
  Level: 15
Type: ERROR
Impact: Other
OAM-00009: Unable to parse the redirection URL
  Cause: An error occurred while parsing the redirect URL due to bad encoding or invalid format.
  Action: For more details, start logging at the FINE level.
  Level: 15
Type: ERROR
Impact: Other
OAM-00010: Cannot add query params to map for logout redirection
  Cause: URLDecoder throwing UnsupportedEncodingException
  Action: Check the AMLogoutResponseHandler - getQueryMap method code.
  Level: 15
Type: ERROR
Impact: Other
OAM-00011: Cannot parse the request token sent from client with User Agent {0} and IP Address {1}.
  Cause: The request token appears to be invalid.
  Action: For more details, start logging at the FINE level.
  Level: 15
Type: ERROR
Impact: Other

OAM-000012: Cannot construct the request token.
Cause: Could not create OAM request token.
Action: For more details, start logging at the FINE level.
Level: 15

Type: ERROR
Impact: Other

OAM-000013: Cannot construct OAM session token.
Cause: Could not create SSO Session token.
Action: For more details, start logging at the FINE level.
Level: 15

Type: ERROR
Impact: Other

OAM-000014: {0} set in {1} must be an integer greater-than or equal to zero.
Cause: SwitchGetToPostLimit was set incorrectly for the authentications scheme.
Action: Correct the SwitchGetToPostLimit challenge parameter within the authentication scheme.
Level: 15

Type: WARNING
Impact: Other

OAM-02001: Retrieve SSO session operation failed.
Cause: Cannot retrieve the SSO session from the request context. Session might have expired.
Action: For more details, start logging at the FINE level.
Level: 15

Type: ERROR
Impact: Other

OAM-02002: Error while processing the submitted credentials.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15

Type: ERROR
Impact: Other

OAM-02003: Error while processing credential collection.
Cause: An internal error occurred.
Action: Check the authentication scheme configuration.
Level: 15
Type: ERROR
Impact: Other

OAM-02004: Error while processing authorization request.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15

Type: ERROR
Impact: Other

OAM-02005: Error while parsing the SSO session token.
Cause: Error while parsing the SSO session token. Wrong session token format.
Action: Retry. If the error persists verify the key roll-over configuration.
Level: 15

Type: ERROR
Impact: Other

OAM-02006: Insufficient authentication level to access the resource.
Cause: An insufficient authentication level was used to access the resource.
Action: Step up the authentication level by re-authenticating to the required level.
Level: 15

Type: ERROR
Impact: Other

Cause: Insufficient privileges.
Action: Check the authorization permissions.
Level: 15

Type: ERROR
Impact: Other

Cause: Insufficient privileges.
Action: Check the authorization permissions.
Level: 15

Type: ERROR
Impact: Other

OAM-02009: Password reset required. Authentication failed.
Cause: Insufficient privileges.
Action: Check the authorization permissions.
Level: 15

Type: ERROR
Impact: Other
OAM-02010: User account is locked. Authentication failed.
  Cause: Insufficient privileges.
  Action: Check the authorization permissions.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-02011: No user account found. Authentication failed.
  Cause: Insufficient privileges.
  Action: Check the authorization permissions.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-02012: No user name password combination found. Authentication failed.
  Cause: Insufficient privileges.
  Action: Check the authorization permissions.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-02013: Password Policy action not supported by the client. Authentication failed.
  Cause: Insufficient privileges.
  Action: Check the authorization permissions.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-02052: SME Adapter initialization Failed.
  Cause: SME adapter initialization failed.
  Action: Verify the SME configuration.
  Level: 15
  Type: ERROR
  Impact: Other

  Cause: Component initialization failed.
  Action: Verify the server configuration.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-02054: SSO session creation failed.
Cause: Session Management Engine error.
Action: Check Session Management Engine error logs.

Level: 15
Type: ERROR
Impact: Other

OAM-02055: Retrieve SSO session operation failed.
Cause: Session might be expired.
Action: If the problem persists contact the administrator.

Level: 15
Type: ERROR
Impact: Other

OAM-02056: An error occurred while parsing the server token.
Cause: TPE token parsing failed.
Action: check Token Processing Engine logs.

Level: 15
Type: ERROR
Impact: Other

OAM-02057: Wrong Flow Controller configuration for {1}
Cause: Wrong Flow controller configuration
Action: Check flow controller class name and configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-02058: Event Flow goes in infinite loop.
Cause: Wrong configuration or too many allowed login attempts.
Action: Check event flow configuration and login attempt configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-02059: Flow Controller Cannot handle Event
Cause: Wrong Flow controller configuration
Action: Check error log more details.

Level: 15
Type: ERROR
Impact: Other

OAM-02060: Flow Controller :{0} Cannot handle Event :{1}
Cause: Wrong Flow controller configuration
Action: Check event to flow controller mapping.
OAM-02061: Event Handler error.
   Cause: Wrong event handler configuration
   Action: Check error log more details.

OAM-02062: Event Handler cannot handle the event.
   Cause: Wrong event handler configuration
   Action: Check event to event handler controller mapping.

OAM-02063: Event Handler :{0} Cannot handle Event :{1}
   Cause: Wrong event handler configuration
   Action: Check event to event handler controller mapping.

OAM-02064: Authentication Error during policy matching.
   Cause: Authentication Error
   Action: Check error log more details.

OAM-02065: Configuration Service Adapter initialization Failed.
   Cause: SConfiguration Service failed.
   Action: Verify the system configuration file

OAM-02066: Event Factory is not configured create the requested event.
   Cause: Wrong event factory configuration
   Action: Check error log more details.
Impact: Other

OAM-02067: Wrong event configuration. No event handler specified for event {0}.
Cause: Wrong event factory configuration
Action: Check error log more details.
Level: 15
Type: ERROR
Impact: Other

OAM-02068: Error occurred while configuring the request cache.
Cause: Wrong request cache handler class configuration.
Action: Check error log more details.
Level: 15
Type: ERROR
Impact: Other

OAM-02069: Error occurred while loading cache handler for class Name {0}
Cause: Wrong request cache handler class configuration.
Action: Check error log more details.
Level: 15
Type: ERROR
Impact: Other

OAM-02070: An error occurred while loading server aliases.
Cause: TPE token parsing failed.
Action: check system configuration if the aliases are set up properly logs.
Level: 15
Type: ERROR
Impact: Other

OAM-02071: No host configuration found for the alias {0}.
Cause: TPE token parsing failed.
Action: check system configuration if the aliases are set up properly logs.
Level: 15
Type: ERROR
Impact: Other

OAM-02072: Ignoring failure during Identity Store operation.
Cause: Operation to read or update user attribute in Identity Store resulted in exception.
Action: Check the availability of configured Identity Store.
Level: 15
Type: WARNING
Impact: Other
OAM-02073: Error while checking if the resource is protected or not.
  Cause: TPE token parsing failed.
  Action: check system configuration if the aliases are set up properly logs.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-02074: Error while checking if the resource {0} is protected or not.
  Cause: TPE token parsing failed.
  Action: check system configuration if the aliases are set up properly logs.
  Level: 15

Type: ERROR
Impact: Other

OAM-04036: Channel security mode is different as specified in configuration {0}
Causes: The agent tried to communicate in a mode different from its configuration.
Action: Check the agent mode. This may be a security issue if the configuration mode of agent is correct.
Level: 1
Type: SEVERE
Impact: Other
OAM-04037: Exception encountered while processing the HTTP message in OAM proxy:
   Cause: An internal error occurred.
   Action: For more details, start logging at the FINE level.

   Level: 1
   Type: SEVERE
   Impact: Other

OAM-04038: OAM proxy configuration parameter SSOOnlyMode is set to true. OAM proxy will skip authorization.
   Cause: OAM proxy configuration parameter SSOOnlyMode is set to true.
   Action:

   Level: 16
   Type: NOTIFICATION
   Impact: Other

OAM-04039: Agent {0} not privileged to invoke OPCODE {1}
   Cause: Agent is not privileged to invoke the operation.
   Action: Check the agent configuration.

   Level: 1
   Type: WARNING
   Impact: Other

OAM-04040: Target Resource is not as expected. Target Resource {0} WebGate resource {1}
   Cause: Target resource is not as expected. This issue may occur in session scope operations.
   Action: Runtime check failure. Check server logs.

   Level: 1
   Type: WARNING
   Impact: Other

OAM-04041: Failed to retrieve valid session from OAM Identity Assertion.
   Assertion {0}
   Cause: Either invalid assertion was specified or session corresponding to assertion is invalid.
   Action: Please see logs for more details.

   Level: 1
   Type: WARNING
   Impact: Other

OAM-04042: Failed to check token issuance policy. Resource: {0}. Requestor: {1}
   Cause: Evaluation of Token Issuance Policy failed.
   Action: Check Token Issuance Policy.
Level: 1
Type: WARNING
Impact: Other

OAM-04043: Request is not processed. Access management service is disabled.
Cause: Access management service is not enabled on server.
Action: Enable the access management service. Set oam proxy global parameter "10gCompatibleGetHostIdentifiersSupport" to true.

Level: 1
Type: WARNING
Impact: Other

OAM-06001: Cannot parse the session token.
Cause: The session token is invalid or the wrong decryption key is present in the configuration.
Action: Verify the key roll-over configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-10001: Cannot load the configuration file.
Cause: The configuration file location was invalid.
Action: Verify the location of the configuration file.

Level: 15
Type: ERROR
Impact: Other

OAM-10002: Cannot initialize the PAT Adapter.
Cause: The PAT configuration was invalid.
Action: Verify the PAT configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-10003: Cannot initialize the Cache Handlers.
Cause: The request cache handler configuration was invalid.
Action: Verify the request cache handler configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-10004: Cannot initialize the Controller.
Cause: The configuration for Controller events was invalid.
Action: Verify the Controller configuration.
Level: 15
Type: ERROR
Impact: Other

OAM-10005: Cannot initialize the Controller.
Cause: The configuration for the Flow controllerd was invalid.
Action: Verify the Controller configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-10006: Cannot initialize the Controller.
Cause: The configuration for the Flow Mapping was invalid.
Action: Verify the Controller configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-10007: Cannot initialize the Controller.
Cause: The configuration for the Event Handlers was invalid.
Action: Verify the Controller configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-10008: Cannot initialize the Controller.
Cause: The configuration for the Event UI was invalid.
Action: Verify the Controller configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-10009: Cannot initialize the Controller.
Cause: The Event Handler configuration was invalid.
Action: Verify the Controller configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-10010: Cannot initialize the Controller.
Cause: The Event Factory configuration was invalid.
Action: Verify the Controller configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-10011: An invalid Cookie Domain
Caused by: The cookie domain was invalid.
Action: Verify the configuration file.
Level: 15
Type: ERROR
Impact: Other

OAM-10012: Cannot load audit configuration.
Caused by: The audit configuration was invalid.
Action: Verify the audit configuration.
Level: 15
Type: ERROR
Impact: Other

OAM-10013: Cannot load audit configuration.
Caused by: Mismatch between logger and resource configuration.
Action: Verify the audit configuration.
Level: 15
Type: ERROR
Impact: Other

OAM-10014: Invalid done URL specified during logout - {0}.
Caused by: Done URL specified during logout is not in proper URL format.
Action: Verify the done URL.
Level: 15
Type: ERROR
Impact: Other

OAM-10015: Cache Info :: operation="[0]" paramName="[1]", paramDetail="[2]".
Caused by: Displayed when the cache is operating.
Action: None.
Level: 15
Type: NOTIFICATION
Impact: Other

OAM-10016: Cache entry expired.
Caused by: Displayed on expiry of the cached element.
Action: None.
Level: 1
Type: NOTIFICATION
Impact: Other

OAM-10017: Cannot intialize the server key.
Cause: Unable to retrieve server key from configuration.
Action: Verify the configuration.
Level: 15
Type: ERROR
Impact: Other

OAM-10018: No credcollect req resp handler specified
Cause: No credcollect req resp handler specified
Action: Verify configuration cred collect req resp handler
Level: 15
Type: ERROR
Impact: Other

OAM-12001: Cannot load audit configuration.
Cause: The specified configuration file does not exist, or the audit configuration is invalid.
Action: Check the server error logs.
Level: 15
Type: ERROR
Impact: Other

OAM-12002: User name value specified for special user is invalid.
Cause: The input value format is invalid, or exceeds 30 characters.
Action: Correct the input value.
Level: 15
Type: ERROR
Impact: Other

OAM-12003: Maximum directory size specified is invalid.
Cause: The input value format is invalid, is less than 1 or exceeds 1024.
Action: Correct the input value.
Level: 15
Type: ERROR
Impact: Other

OAM-12004: Maximum file size specified is invalid.
Cause: The input value format is invalid, is less than 1 or exceeds 1024.
Action: Correct the input value.
Level: 15
Type: ERROR
Impact: Other

OAM-12005: Map of audit events is invalid.
Cause: The audit event configuration is missing, or invalid.
Action: Verify the configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-12006: Invalid path for audit event definitions file.
Cause: The audit event definitions file location is incorrect.
Action: Verify the configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-12007: Invalid path for audit bustop directory.
Cause: The audit bustop location is missing, or invalid.
Action: Verify the configuration.

Level: 15

Type: WARNING
Impact: Other

OAM-30036: Internal server error. No server instances are running.
Cause: Internal server error occurred. No server instances exist.
Action:
Level: 1
Type: WARNING
Impact: Other

OAM-30037: Server instance is not running for the security mode specified: "{0}". Try again using a different security mode.
Cause: Server instance not running for the security mode specified
Action: Try again using a different security mode

Level: 1
Type: ERROR
Impact: Other

OAM-30038: Internal server error. There are no server instances running. Registration failed. Please try again later.
Cause:
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30039: Default security mode picked up for agent is: "{0}".
Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAM-30040: Could not retrieve the timeout cookie name and timeout cookie key information from the server configuration. Registration failed.
Cause: An internal error occurred. Error in retrieving timeout cookie name and timeout cookie key for the agent.
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30041: Error while generating the cipher key or mask for the agent. Registration failed: {0}
Cause: An internal error occurred. Error in generating the cipher key or mask for the agent.
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30042: Error in decrypting the secret key while passing back in the response. Registration failed.
  Cause: An internal error occurred. Error in decrypting the secret key while passing back in the response.
  Action:
  Level: 1
  Type: ERROR
  Impact: Other

OAM-30043: Agent type in the request is either null or unidentified. Please try again after verifying the agent type.
  Cause: Agent type that is passed in the request object is invalid.
  Action: Try again after checking the agent type that is specified.
  Level: 1
  Type: ERROR
  Impact: Other

OAM-30044: Internal error while encrypting/obfuscating the password. Registration failed: {0}
  Cause: An internal error occurred. Error in encrypting/obfuscating the password.
  Action:
  Level: 1
  Type: ERROR
  Impact: Other

OAM-30045: The hostIdentifier string: "{0}" has already been added to an existing hostIdentifier called: "{1}". Try again after deleting the host entry from the existing hostIdentifier or registering with a new hostIdentifier name.
  Cause: The hostIdentifier string specified is already registered under a different hostIdentifier name.
  Action: Try again after deleting the host entry from the existing hostIdentifier or registering with a new hostIdentifier name.
  Level: 1
  Type: ERROR
  Impact: Other

OAM-30046: {0} mode failed. Agent does not exist.
  Cause: Agent is not found.
  Action:
  Level: 1
  Type: ERROR
  Impact: Other

OAM-30047: Agent is found, but application domain does not exist. Agent could be in different application domain.
OAM-30048: Url is not valid. Ensure that URL is of the format http://example.domain.com:port or https://example.domain.com:port, where port number is optional.

Cause: Url is not valid.
Action:

OAM-30050: In DELETEMODE, agent profile deleted successfully, however, artifacts output directory was not present or could not be deleted for the agent name: "{0}" at the output folder location: "{1}". Please delete the folder manually.

Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAM-30051: In DELETEMODE, agent profile and artifacts output directory was successfully deleted for the agent name: "{0}" at the server side output folder location: "{1}".

Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAM-30052: Exception encountered while updating agent profile. Update of agent failed. {0}

Cause: An internal error occurred while updating agent profile
Action:
Level: 1
Type: ERROR
Impact: Other

Cause: The Application Domain is not found.
Action: Verify that the application domain you want to update exists and then try again.
Level: 1
Type: ERROR
Impact: Other

OAM-30054: Host identifier does not exist or is empty. {0} mode failed.
Cause: The Hostidentifier is not found.
Action: Verify that the hostidentifier you want to update exists and then try again.
Level: 1
Type: ERROR
Impact: Other

OAM-30055: The host: "{0}" and port: "{1}" is already present under the hostIdentifier: "{2}" and was not added again.
Cause: The hostPortVariation specified is already registered under an existing hostidentifier name, so it will not be added again.
Action:
Level: 1
Type: WARNING
Impact: Other

OAM-30056: Application domain already exists. policyCreate mode failed. Use policyUpdate mode to update existing application domains.
Cause: For policyCreate mode, application Domain already exists.
Action: Try again using policyUpdate mode to update existing application domains.
Level: 1
Type: ERROR
Impact: Other

OAM-30057: Create policy resource exception. {0} URI={1}
Cause: create resource failed. resource/uri format is not valid.
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30058: Agent name {0} exceeds maximum allowed length of {1} characters.
Cause: The name of the agent being created was too long.
Action: Try again using a shorter name.

Level: 1
Type: ERROR
Impact: Other

OAM-30059: The user-specified managed server name/id: "0" does not exist. Registration failed. Please try again after specifying valid server name.
Cause: The user-specified managed server name/id is invalid.
Action: Try again after providing a valid server name.

Level: 1
Type: ERROR
Impact: Other

OAM-30060: Internal server error. The location "0" is invalid or does not exist in configuration. Registration failed.
Cause: Internal server error. The specified location in the config file is invalid or not existing.
Action:

Level: 1
Type: ERROR
Impact: Other

OAM-30061: isFusionAppRegistration flag was set to: "0" and SSOOnlyMode field was set to true.
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAM-30062: isFusionAppRegistration flag was set to: "0" and denyOnNotProtected field was set to false(0).
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAM-30063: Agent type mismatch: Incoming agent request is of type: "0", but the existing agent profile type in the server is: "1". Registration failed. Please try again after using agent name of the same type.
Cause: Incoming agent type does not match with the agent type already registered in the server.
Action: Verify that the agentName belongs to the same type and try again.

Level: 1
Type: ERROR
Impact: Other

OAM-30064: Agent version mismatch: Incoming agent request is of the correct type: "[0]", but the version is: "{1}", while the existing agent version in the server is: "{2}". Registration failed. Please try again after using agent name of the same version.

Cause: Incoming agent type is the same, however, does not match the agent version already registered in the server.

Action: Verify that the agentName belongs to the same version and try again.

Level: 1

Type: ERROR
Impact: Data

OAMCFG-60014: Oracle Access Manager is not configured with this directory.
Cause: Oracle Access Manager is not configured for the specified directory.
Action: Contact your Oracle Access Manager administrator to configure Oracle Access Manager for the specified directory.

Level: 1
Type: ERROR
Impact: Configuration

OAMCFG-60015: Invalid value detected for oam_aaa_host or oam_aaa_port.
Cause: Cannot find the Access Server based on the specified host or port in configuration. Or check if oam_mode is correctly specified. Default is open mode
Action: Specify a valid Access Server host and port.

Level: 1
Type: ERROR
Impact: Configuration

OAMCFG-60016: Error in closing file handles.
Cause: An error occurred when closing file handles used by the tool.
Action: Check the file system for consistency.

Level: 1
Type: ERROR
Impact: Files

OAMCFG-60017: Cannot decode URI : {0} due to its length. Actual length: {1}
Cause: The URI in the directory is an illegal length. The encoded URI length must always be even.
Action: Contact your Oracle Access Manager administrator to correct or delete the URI in the directory.
Level: 1
Type: ERROR
Impact: Data

OAMCFG-60018: Cannot decode URI :{0}
Cause: The URI was found to contain illegal hexadecimal characters.
Action: Contact your Oracle Access Manager administrator to correct or delete the URI in the directory.

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60019: Cannot send the cache flush request to server {0} running on port {1} in mode {2}.
Cause: The Access server is down.
Action: Contact your Oracle Access Manager administrator to ensure that the Access Server is running.

Level: 1
Type: ERROR
Impact: Network

OAMCFG-60020: A cache flush request cannot be sent using the desired transport security mode {0}.
Cause: The Access Server is not available with the specified transport security mode.
Action: Contact your Oracle Access Manager administrator to ensure that the Access Server is running in the desired transport security mode.

Level: 1
Type: ERROR
Impact: Configuration

OAMCFG-60021: Found multiple policy stores in the directory:: {0}.
Cause: Multiple Access Server Policy Stores are configured in the directory.
Action: Use the ldap_base parameter to specify the correct searchbase.

Level: 1
Type: ERROR
Impact: Configuration

OAMCFG-60022: Access Server is not configured in this directory.
Cause: The Access Server is not configured.
Action: Contact your Oracle Access Manager administrator to configure the Access Server.

Level: 1
Type: ERROR
Impact: Configuration
OAMCFG-60023: A problem occurred when communicating with the LDAP directory server.
  Cause: The LDAP directory server is down.
  Action: Contact your LDAP directory server administrator to ensure the directory is running.

  Level: 1
  Type: ERROR
  Impact: Network

OAMCFG-60024: The LDAP operation failed.
  Cause: Either incorrect configuration or invalid parameters and values were specified.
  Action: Confirm that your parameters and values are correct.

  Level: 1
  Type: ERROR
  Impact: Data

OAMCFG-60025: A problem occurred while trying to fetch the Oracle Access Manager details from configuration.
  Cause: An Oracle Access Manager instance matching the specified input could not be found.
  Action: Confirm parameters oam_aaa_host and oam_aaa_port are correct.

  Level: 1
  Type: ERROR
  Impact: Data

OAMCFG-60026: Cannot get Global Sequence Number in the specified Oracle Access Manager policy store: {0}.
  Cause: The configuration data in the LDAP directory server is missing Global Sequence Number information.
  Action: Contact your Oracle Access Manager administrator to configure Oracle Access Manager with the LDAP directory.

  Level: 1
  Type: ERROR
  Impact: Configuration

OAMCFG-60027: Found {0} entries that match the name: {1}.
  Cause: Multiple names match the given name.
  Action: Contact your Oracle Access Manager administrator.

  Level: 1
  Type: ERROR
  Impact: Data

OAMCFG-60028: Found no entries that match the specified name:{0} of type:{1}.
  Cause: Entries matching the specified name cannot be found.
  Action: Confirm the name.
Level: 1
Type: ERROR
Impact: Data

OAMCFG-60029: Error while loading template:{0} to LDAP
Cause: Not all information could be loaded to LDAP directory.
Action: Contact your Oracle Access Manager administrator to validate that all data has been loaded.

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60030: The app_agent_password parameter is mandatory when creating a Web domain.
Cause: The app_agent_password parameter was not specified.
Action: Specify the app_agent_password when creating a Web domain.

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60031: The template file {0} cannot be located.
Cause: The specified template could not be found in either the file system or the Jar file.
Action: Obtain the Jar file again. If your template was customized, ensure it is in the expected file system location.

Level: 1
Type: ERROR
Impact: Files

OAMCFG-60032: The template file {0} cannot be read from file system.
Cause: The template file or file system (or both) might be corrupted.
Action: Ensure that the template file or file system error (or both) are corrected.

Level: 1
Type: ERROR
Impact: Files

OAMCFG-60033: Problem locating a template file in JAR file:{0}
Cause: The JAR file does not contain the required templates.
Action: Ensure that the correct JAR file is specified in the CLASSPATH.

Level: 1
Type: ERROR
Impact: Files

OAMCFG-60034: The specified LDAP SSL mode is invalid
Cause: An invalid LDAP SSL mode was specified.
**Action:** Specify a valid LDAP SSL mode: 1, 2 or 3.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**OAMCFG-60035:** The specified application domain, {0}, cannot be used.  
**Cause:** The value provided for app_domain parameter contains illegal characters.  
**Action:** Specify app_domain parameter with legal characters.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**OAMCFG-60036:** The specified web domain, {0}, cannot be used.  
**Cause:** The value provided for web_domain parameter contains illegal characters.  
**Action:** Specify web_domain parameter with legal characters.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**OAMCFG-60037:** ldap_userpassword is mandatory  
**Cause:** The ldap_userpassword parameter was not specified.  
**Action:** Specify the ldap_userpassword parameter.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**OAMCFG-60038:** The URIs file parameter should not be empty  
**Cause:** The uris_file param is empty.  
**Action:** If you are using the uris_file parameter, then specify an appropriate value. This value should list the full path to a file, containing protected and public uris

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**OAMCFG-60039:** The specified uris_file, {0}, could not be found  
**Cause:** The file specified by uris_file param does not exist.  
**Action:** Make sure the path you have specified for the file containing uris is correct

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**OAMCFG-60040:** uris_file, {0}, cannot be read  
**Cause:** There is some issue in reading the file
Action: Contact your administrator

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60041: uris_file, {0}, could not be closed
Cause: The file could not be closed
Action: No action needs to be taken, if there are no other errors

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60042: uris_file, {0}, does not have protected uris
Cause: No Protected uris have been specified
Action: Contact the file owner

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60043: Protected URIs have already been listed in the uris file
Cause: Protected uris are being specified again
Action: Include the protected uris, specified in command line, in the uris file and do not pass the protected_uris parameter

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60044: Public URIs have already been listed in the uris file
Cause: Public uris are being specified again
Action: Include the public uris, specified in command line, in the uris file and do not pass the public_uris parameter

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60045: Invalid Authenticating Webgate URL
Cause: The Authenticating Webgate URL is not formatted correctly
Action: Ensure that the URL is of the form, 'http://host.example.com:port' or 'https://host.example.com:port'. Note that it is important to specify the URL with a FQDN, a domain in which your cookie would be valid.

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60046: LDAP_HOST parameter is mandatory
Cause: LDAP_HOST parameter is not specified
Action: Specify LDAP_HOST parameter in command line
Level: 1
Type: ERROR
Impact: Data

OAMCFG-60047: OAM_AAA_HOST parameter is mandatory
Cause: OAM_AAA_HOST parameter is not specified
Action: Specify OAM_AAA_HOST parameter in command line
Level: 1
Type: ERROR
Impact: Data

OAMCFG-60048: APP_DOMAIN, {0}, does not exist
Cause: APP_DOMAIN, {0}, does not exist
Action: Specify a APP_DOMAIN parameter that exists in OAM
Level: 1
Type: ERROR
Impact: Data

OAMCFG-60049: URI, {0}, does not exist
Cause: URI, {0}, does not exist
Action: Specify a URI that exists in OAM
Level: 1
Type: ERROR
Impact: Data

OAMCFG-60050: Authentication scheme, {0}, does not exist
Cause: Authentication scheme, {0}, does not exist
Action: Specify a valid Authentication Scheme
Level: 1
Type: ERROR
Impact: Data

OAMCFG-60051: Webdomain, {0}, does not exist
Cause: Webdomain, {0}, does not exist
Action: Specify a valid Host Identifier as part of Web_domain
Level: 1
Type: ERROR
Impact: Data

OAMCFG-60052: Simple Mode Passphrase is mandatory for Simple mode
Cause: Simple Mode Passphrase has not been provided
Action: Specify a Simple Mode Passphrase
Level: 1
Type: ERROR
Impact: Data

OAMCFG-60053: OAM_AAA_PORT parameter is mandatory
Cause: OAM_AAA_PORT parameter is not specified
Action: Specify OAM_AAA_PORT parameter in command line

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60054: Specify protected or public uris either in command line or in a file
Cause: Both protected_uris and public_uris have not been specified for Create mode
Action: Specify protected or public uris either in command line or in a file

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60055: One of the default authentication schemes is in use and cannot be deleted
Cause: Some policies are using the default authentication schemes that you wish to delete
Action: First delete the policies that are using the authentication scheme specified

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60056: The default authentication scheme, OraDefaultAWGFormAuthNScheme, is in use and cannot be deleted
Cause: Some policies are using this authentication scheme that you wish to delete
Action: First delete the policies that are using the authentication scheme specified

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60057: The default authentication scheme, OraDefaultI18NFormAuthNScheme, is in use and cannot be deleted
Cause: Some policies are using this authentication scheme that you wish to delete
Action: First delete the policies that are using the authentication scheme specified

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60058: The web_domain specified, {0}, is in use and cannot be deleted
Cause: Some policies are using the web domain that you wish you delete
Action: First delete the policies that are using the web domain

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60059: Either app_domain or uris or web domain or authn schemes need to be provided. See help
Cause: Required parameters have not been specified for DELETE mode
Action: Specify whether app domain or uris or web domain or authn schemes need to be deleted

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60060: An error occurred while modifying the ldap attribute, {0}
Cause: An error occurred while modifying the ldap attribute, {0}
Action: Contact your OAM administrator

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60061: The Webgate with id, {0}, does not exist
Cause: The specified Webgate does not exist in OAM
Action: Specify the correct webgate id using the parameter, {0}

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60062: LogoutRedirectUrl has already been configured for the WebGate, {0}
Cause: LogoutRedirectUrl parameter is not empty for the specified WebGate
Action: You cannot reconfigure the parameter logoutRedirectUrl using the Config tool. Use OAM Policy Manager UI for this., {0}

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60063: The LogoutRedirectUrl element tag has been messed up in the attribute, 'obcompounddata' attribute for the WebGate, {0}
Cause: LogoutRedirectUrl element is not formatted correctly in the DS for the specified WebGate
Action: Contact the OAM Administrtror

Level: 1
Type: ERROR
Impact: Data
OAMCFG-60064: The LogoutRedirectUrl param cannot be configured without AWG
Cause: authenticating wg_url param is not specified
Action: Specify authenticating wg_url param
Level: 1
Type: ERROR
Impact: Data
OAMCFG-60065: The logouturi parameter is not a valid uri
Cause: The logouturi parameter needs to have a value beginning with '/'
Action: Specify a valid uri
Level: 1
Type: ERROR
Impact: Data
OAMCFG-60066: An unexpected parameter has been passed to the tool, {0}
Cause: An unexpected parameter is present as part of the command line arguments
Action: Make sure that none of the parameters have been mispelled and that all the parameters specified are indeed valid
Level: 1
Type: ERROR
Impact: Data
OAMCFG-60067: OimOhsHostPort needs to be specified if authenticating wg_url parameter is mentioned
Cause: OimOhsHostPort has not been specified and authenticating wg_url parameter is mentioned
Action: Specify OimOhsHostPort parameter
Level: 1
Type: ERROR
Impact: Data
OAMCFG-60068: The Authentication Scheme specified by {0} would be given preference over the default i18n authentication scheme
Cause: The default i18n authentication scheme specified by usei18nlogin flag would not be used because of the parameter default_authn_scheme
Action: One of the two parameters should be specified
Level: 1
Type: ERROR
Impact: Data
OAMCFG-60069: The Access Server Id, {0}, mentioned as part of the parameter, {1} is not present in OAM
OAMCFG-60070: The param, {0}, contains some values that are not valid. Check log for details.

Cause: Some of the Access Server Id’s mentioned are not valid.

Action: Make sure that the Access Server Id’s mentioned are all valid.

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60071: The transport security mode of WebGate, {0}, differs from Access Server, {1}.

Cause: There is a transport security mismatch.

Action: Make sure the transport security matches between the WebGate and Access Server.

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60072: The Access Management Service mode of WebGate, {0}, differs from Access Server, {1}.

Cause: There is a mismatch between Access Management Service modes.

Action: Make sure the Access Management Service matches between the WebGate and Access Server.

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60073: {0} has been specified as part of both Primary and Secondary server params.

Cause: Same value has been specified as part of both Primary and Secondary servers.

Action: Make sure that you have unique values for both Primary and Secondary Servers.

Level: 1
Type: ERROR
Impact: Data

OAMCFG-60074: The value, {0}, has been specified more than once in a comma separated input parameter.

Cause: Duplicate values have been provided in one of the input parameters.

Action: Make sure that you have unique values specified as part of input parameters.
OAMCFG-60075: The provided parameter, {0}, is not a valid integer  
   Cause: An invalid integer was passed  
   Action: Make sure the value provided is a valid integer

OAMCFG-60076: The URL for Impersonation Consent Form is mandatory  
   Cause: The URL for Impersonation Consent Form has not been passed  
   Action: Make sure you provide a URL for Impersonation Consent Form

OAMCFG-60077: The path to the Impersonation Authz Plugin is mandatory  
   Cause: The path to the Impersonation Authz Plugin has not been passed  
   Action: Make sure you provide a path to the Impersonation Authz Plugin

OAMCFG-60078: Impersonation Authz Scheme has not been configured and hence would not be used  
   Cause: Impersonation Authz Scheme has not been configured  
   Action: Configure the Impersonation Authn/Authz plugins, if required

OAMCFG-60079: The Authz rule, {0} already exists for this app domain, {1}  
   Cause: Authz rules already exists  
   Action: No action needs to be taken.

OAMCFG-60080: Authorization scheme, {0}, does not exist  
   Cause: Authorization scheme, {0}, does not exist  
   Action: Specify a valid Authorization Scheme
Type: ERROR
Impact: Data
OAMCFG-60081: The user, {0} probably has write permission to the OAM Policy store since he matches the user, {1}, that was provisioned as the OAM runtime user
Cause: Not able to conclusively validate
Action: Ensure that the intended user has appropriate privileges
Level: 1
Type: ERROR
Impact: Data
OAMCFG-60082: The user, {0} probably does not have write permission to the OAM Policy store since he does not match the user, {1}, that was provisioned as the OAM runtime user
Cause: Not able to conclusively validate
Action: Ensure that the intended user has appropriate privileges
Level: 1
Type: ERROR
Impact: Data
OAMCFG-60083: OAM Configuration did not complete successfully. Refer log for details
Cause: An exception occurred
Action: Check the messages in the log for details
Level: 1
Type: ERROR
Impact: Data
OAMCFG-60084: OAM server host, {0}, port, {1} is down
Cause: The server is down
Action: Make sure the specified server is up
Level: 1
Type: ERROR
Impact: Data
OAMCFG-60085: There could be an issue with cache flush. URL Prefix Mapper could not be setup
Cause: An exception occurred while constructing URL Prefix Map
Action: Verify any URLs that you may have created are protected. If not, restart WebServer and Access server
Level: 1
Type: ERROR
Impact: Data
OAMSSA-00001: Service provider configuration {0} is not valid.
  Cause: The service provider configuration in the system configuration was invalid.
  Action: Verify the identity and registration service provider configuration.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-00002: Cannot instantiate service provider.
  Cause: The service provider configuration was invalid.
  Action: Verify the identity and registration service provider configuration.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-00003: Identity service configuration is not valid.
  Cause: The identity service configuration was invalid.
  Action: Verify the identity service configuration.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-00004: User self service configuration is not valid.
  Cause: The user self service configuration was invalid.
  Action: Verify the user self service configuration.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-00005: Identity Manager Integration is enabled {0}.
  Cause:
  Action:
  Level: 15
Type: INFO
Impact: Other

OAMSSA-00006: User Self Service is enabled {0}.
  Cause:
  Action:
  Level: 15
  Type: INFO
  Impact: Other

OAMSSA-00007: Policy Evaluation result {0}.
  Cause:
  Action:
  Level: 15
  Type: INFO
  Impact: Other

OAMSSA-00008: Constructed URL {0}.
  Cause:
  Action:
  Level: 15
  Type: INFO
  Impact: Other

OAMSSA-02001: Session not found for sessionid: {0}
  Cause: Requested session object has expired, has been deleted, or does not exist.
  Action: Verify that the session exists before making the call.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-02002: Session not found for userid: {0} identity domain: {1} and sessionindex: {2}
  Cause: The requested session object has expired, has been deleted, or does not exist.
  Action: Verify that the session exists before making the call.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-02003: Cannot find method {0} on class {1}
  Cause: An attempt was made to access a method that does not exist.
  Action: Verify that the method exists before making the call.
  Level: 15
Type: ERROR
Impact: Other

OAMSSA-02004: Cannot execute method {0} on class {1}
    Cause: An attempt to execute a method that is not supported.
    Action: Use a supported method.
    Level: 15
Type: ERROR
Impact: Other

OAMSSA-02005: Cannot get SessionManager for type: {0}
    Cause: An invalid type was specified.
    Action: Verify that the type is supported before making the call.
    Level: 30
Type: ERROR
Impact: Other

OAMSSA-02006: SessionManager type not present: {0}
    Cause: The requested implementation was not specified in configuration files.
    Action: Add the SessionManager type to the configuration files
    Level: 15
Type: ERROR
Impact: Other

OAMSSA-02007: Factory class does not have factory methods.
    Cause: Factory class does not have factory methods.
    Action: None.
    Level: 15
Type: INFO
Impact: Other

OAMSSA-02008: Cannot instantiate the persistence access implementation for class {0}.
    Cause: An attempt was made to instantiate an invalid persistence access implementation.
    Action: Verify the settings in the configuration file.
    Level: 15
Type: ERROR
Impact: Other

OAMSSA-02009: Cannot extract attribute for method {0}.
    Cause: An incorrect method was used to extract an attribute value.
    Action: Use the correct API call.
    Level: 15
OAMSSA-02010: UpdateProcessor is in invalid mode for entry {0}.
   Cause: UpdateProcessor serialization failure.
   Action: Verify the configuration files, and the deployment.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-02011: Cannot update attribute for method {0}.
   Cause: An incorrect method was used to update the attribute value.
   Action: Use the correct API call.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-02012: Session count for user {0} has reached the maximum session limit per user.
   Cause: Session count for user has reached the maximum session limit per user.
   Action: Log out of some of the sessions before attempting to create new sessions.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-02013: SME expired session reaper thread not started.
   Cause: Database configuration may be in correct
   Action: Verify that the server started without errors.
   Level: 15
   Type: WARNING
   Impact: Other

OAMSSA-02014: Session {0} not deleted.
   Cause: Database configuration may be in correct
   Action: Verify Data Source Name and database configuration
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-02015: Session attribute type {0} for key {1} is not supported. Attribute will be ignored.
   Cause: Data in database is corrupted due to unknown cause, or session is updated with unsupported data type properties.
   Action: Correct the session client api usage.
   Level: 15
Type: ERROR
Impact: Other

OAMSSA-02016: Session object for sessionid {0} was not loaded.
Cause: Database configuration may be in correct
Action: Verify Data Source Name and database configuration
Level: 15

Type: ERROR
Impact: Other

OAMSSA-02017: Session object for sessionid {0} was not saved.
Cause: Database configuration may be incorrect
Action: Verify Data Source Name and database configuration
Level: 15

Type: ERROR
Impact: Other

OAMSSA-02018: Session attribute value {0} for key {1} is not serializable. Attribute will be ignored.
Cause: Session attribute value is invalid.
Action: Correct the session client api usage.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-02019: Session attribute key is null for userid {0} in session {1}.
Cause: Session attribute key is null.
Action: Correct the session client api usage.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-02020: Grant for impersonation of user {0} by user {1} does not exist, or has expired.
Cause: Impersonation grant does not exist, or has expired.
Action: Verify impersonation grant information.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-02021: Session exists for user {0} and sessionindex {1}.
Cause: Session object already exists.
Action: Use the existing session.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-02022: Session [0] is not an impersonation session.
  Cause: Session is not impersonation session.
  Action: Ensure that impersonation operations are done on an impersonation session.

  Level: 15
  Type: ERROR
  Impact: Other

  Cause: Impersonating sessions can not chain impersonation.
  Action: Ensure that impersonation requests are done on non-impersonating sessions.

  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-02024: Session [0] timed out.
  Cause: Session is inactive
  Action: Re-authenticate user.

  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-02025: Session attribute domain definition [0] is not supported. Default domain value of [1] used.
  Cause: Invalid configuration
  Action: Correct the search attribute definition

  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-02026: QueryDescriptor has invalid value. [0] is [1].
  Cause: Invalid search input
  Action: Correct the search attribute definition

  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-02027: Search request failed. [0].
  Cause: Search operation failed for provided cause.
  Action: Correct the cause of the failure.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-02028: Failed to transform the search request into a valid query.
Cause: The search request was not transformed into a search query.
Action: Correct the cause of the failure.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-02029: Search request resulted in a null result object.
Cause: The search request failed with no results.
Action: Correct the cause of the failure.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-02030: Selection list generation failed for extractor {0}.
Cause: Selection list transformation not supported for extractor or attribute.
Action: Verify supported attributes used in the session search

Level: 15
Type: ERROR
Impact: Other

OAMSSA-02031: Where clause generation failed for extractor {0}.
Cause: Extractor transformation not supported for extractor or attribute.
Action: Verify supported attributes used in the session search

Level: 15
Type: ERROR
Impact: Other

OAMSSA-02032: Selection list initialization failed for operation {0}.
Cause: Selection list transformation initialization failed.
Action: Verify supported selection initialization for failed operations.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-02033: Initialization of search failed.
Cause: Initialization of search failed
Action: Verify libraries and jar versions.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-02034: Conversion of database value to boolean failed. Defaulting [0] to [1].
Cause: Database column mapping incorrect, or database column type incorrect.
Action: Verify database field configuration.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-02035: Unsupported session store version detected. Required "[0]" but found "[1]".
Cause: The version of session store is not compatible with OAM version.
Action: Make sure OAM is configured to talk to correct version of session store.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-02036: Ignoring declaration for invalid search attribute. [0]
Cause: Invalid attribute definition in configuration.
Action: Verify the configuration of the search attributes.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-02037: The background delete thread has become unresponsive. Falling back to foreground session deletion.
Cause: The background delete thread has become unresponsive.
Action: Verify health of the JDBC data source connection.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-02038: Failed to put session [0] on queue [1].
Cause: Resource bounds exceeded.
Action: Correct cause of server overload.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-02039: Session store write restored at wait queue size [0]. Current limit on queue size is [1].
Cause: Load on background write queue has reduced.
Action: No action required.
Level: 15
Type: INFO
Impact: Other
OAMSSA-02040: Session store write disabled at wait queue size \{0\}. Current limit on queue size is \{1\}.
Cause: Load on background write queue has reached upper bound.
Action: Examine sources of loading.
Level: 15
Type: WARNING
Impact: Other
OAMSSA-02041: Client lease for session \{0\} has expired.
Cause: Session update lease has expired.
Action: Examine use case of session update to eliminate updates using old session objects.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-02042: Credentials for session \{0\} have expired.
Cause: Session credential has expired.
Action: Perform credential validation.
Level: 15
Type: WARNING
Impact: Other
OAMSSA-02043: Session object expected. Null value found.
Cause: Invalid input.
Action: Invoke method with valid input.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-02044: Session update context object expected. Null value found.
Cause: Invalid input.
Action: Invoke method with valid input.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-02045: Request to encode \{0\} numbers exceed maximum limit of \{1\}.
Cause: Invalid input.
Action: Invoke method with valid input.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-02046: Credential validation date cannot be null.
    Cause: Invalid input.
    Action: Invoke method with valid input.
    Level: 15
Type: ERROR
Impact: Other
OAMSSA-04001: Operation {0} is not supported.
    Cause: The requested operation was not supported.
    Action: Use a supported operation.
    Level: 15
Type: ERROR
Impact: Other
OAMSSA-04002: Incorrect number of parameters {0} passed for operation {1}
    Cause: An incorrect number of parameters was passed to the expression builder.
    Action: Pass the correct number of parameters required for the expression.
    Level: 15
Type: ERROR
Impact: Other
OAMSSA-04003: Unable to get data store instance.
    Cause: An invalid configuration file was supplied.
    Action: Verify the configuration file.
    Level: 15
Type: ERROR
Impact: Other
OAMSSA-04004: Cannot get extractor list from passed configuration.
    Cause: An incorrect extractor list was supplied.
    Action: Verify the supplied configuration.
    Level: 15
Type: ERROR
Impact: Other
OAMSSA-04005: Data store established but data connection cannot be made.
    Cause: Database connection information was invalid.
    Action: Verify configuration files.
    Level: 15
Type: INFO
Impact: Other
OAMSSA-04006: Cannot get connection from data source.
Cause: Data source configuration was invalid.
Action: Verify configuration files.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04007: Key is not unique: {0}
Cause: The key in the database was not unique.
Action: Verify data integrity.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04008: Data source definition not found. Store will be in-memory only.
Cause:
Action:
Level: 15
Type: INFO
Impact: Other

OAMSSA-04009: Invalid parameter type passed to construct {0}
Cause: The function parameter type was invalid.
Action: Verify client implementation.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04010: OAM Configuration for Coherence property {0} not found. Default configuration will be used.
Cause: No overrides were specified.
Action: None.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04011: Cannot resolve address for server instance {0}.
Cause: Server Instance listed in the Configuration is invalid.
Action: Correct the configuration and rerun the operation.
Level: 15
Type: WARNING
Impact: Other

OAMSSA-04012: Cannot set local host values for this server instance.
Cause: Unable to set permissions for local host.
Action: Please verify the network configuration and rerun this operation.
Level: 15
Type: WARNING
Impact: Other

OAMSSA-04013: Coherence property type update is not supported for property {0}. Supported types include String, Integer, Boolean.
Cause: An unsupported Coherence configuration property type was specified.
Action: Use a supported Coherence configuration property type.
Level: 15
Type: INFO
Impact: Other

OAMSSA-04014: Cannot set override properties for Coherence due to exception.
Cause: The supplied Coherence configuration properties are invalid.
Action: Correct the configuration.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04015: Datasource not found for provided name {0}.
Cause: The supplied Datasource name is invalid.
Action: Correct the configuration.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04016: Cannot store key {0} in data store.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04017: Cannot erase key {0} in data store.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04018: Cannot get Iterator of keys from data store.
Cause: An internal error occurred.
**Action:** For more details, start logging at the FINE level.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-04019: Cannot acquire distribution lock.**  
**Cause:** An internal error occurred.  
**Action:** For more details, start logging at the FINE level.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-04020: Distribution version is {0}. Version requested for distribution is {1}.**  
**Cause:** An internal error occurred.  
**Action:** For more details, start logging at the FINE level.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-04023: Cannot initialize configuration.**  
**Cause:** An internal error occurred.  
**Action:** For more details, start logging at the FINE level.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-04024: Stale data exception encountered for config version {0}.**  
**Cause:** An internal error occurred.  
**Action:** For more details, start logging at the FINE level.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-04032: Incorrect type of parameters {0} passed for operation {1}.**  
**Cause:** An invalid parameter type was passed to the expression builder.  
**Action:** Pass the correct parameters required for the expression.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-04033: Failed to get encryption key.**  
**Cause:** Shared Key for encryption not found.  
**Action:** Verify that installation completed without errors.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-04034: Invalid configuration map path \{0\}
Cause: Provided configuration map path is invalid.
Action: Ensure that the passed configuration map path is a valid path.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-04035: Operation \{0\} supports \{1\} operand(s) only.
Cause: Number of operands supplied for operation is incorrect.
Action: Correct the API call with the required number of operands.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-04036: Criterion type \{0\} does not support operation \{1\}.
Cause: Criterion does not support requested operation.
Action: Correct the API call with supported operand.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-04037: Extraction of attribute \{0\} failed.
Cause: Extraction of attribute failed.
Action: Correct the API call with supported attribute extractor.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-04038: The passed Criterion object type \{0\} is not supported by transformer type \{1\}.
Cause: Invalid parameter type.
Action: Correct the API call with supported criterion type.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-04039: Transform for operation \{0\} not found.
Cause: Operation transformation class not defined.
Action: Correct the transformation properties file.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-04040: Criterion [0] does not contain operation.
Cause: Criterion does not contain operation.
Action: Correct the configuration to make the correct API call.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-04041: Failed to read the operation to transforms mapping configuration.
Cause: Unable to read the operation to transforms mapping.
Action: Correct the configuration to make the correct API call.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-04042: Invalid mapping [0] found for operation [1].
Cause: Invalid operation to transform mapping.
Action: Correct the configuration to make the correct API call.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-04043: Null parameter value not supported.
Cause: Invalid parameter provided
Action: Correct the API call invocation.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-04044: Failed to sort on field [0].
Cause: Invalid sort field.
Action: Invoke the search operation with Comparable sort fields
Level: 15
Type: ERROR
Impact: Other
OAMSSA-04045: Failed to read the attribute to operations mapping configuration.
Using defaults.
Cause: Unable to read the attribute to operations mapping properties file.
Action: Correct the configuration to make the correct API call.
Level: 15
Type: ERROR
OAMSSA-04046: Invalid mapping \{0\} found for attribute type \{1\}.
  Cause: Invalid attribute type to operations mapping.
  Action: Correct the configuration to make the correct API call.

  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-04047: Service \{0\} is not running.
  Cause: Service has failed to start up or during operations.
  Action: Attempt to restart server.

  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-04048: Cache member joined: \{0\}, service: \{1\}.
  Cause: Cache cluster member has joined the service.
  Action: None

  Level: 15
  Type: NOTIFICATION
  Impact: Other

OAMSSA-04049: Cache member leaving: \{0\}, service: \{1\}.
  Cause: Cache cluster member is leaving the service.
  Action: None

  Level: 15
  Type: NOTIFICATION
  Impact: Other

OAMSSA-04050: Cache member left: \{0\}, service: \{1\}.
  Cause: Cache cluster member has left the service.
  Action: None

  Level: 15
  Type: NOTIFICATION
  Impact: Other

OAMSSA-04051: Listener in \{0\}, Thread \{1\} before lock, dist version \{2\} config version \{3\}.
  Cause: 
  Action: None

  Level: 15
  Type: NOTIFICATION
  Impact: Other
   Cause:
   Action: None
   Level: 15
   Type: NOTIFICATION
   Impact: Other

OAMSSA-04053: Exception on notification event [0] for listener [1].
   Cause:
   Action: None
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-04054: Failed to submit notification for [0]. Current queue size is [1].
   Cause:
   Action: None
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-04055: Failed to create mapstore statistics file.
   Cause:
   Action: Verify that the default output filesystem is writeable.
   Level: 15
   Type: WARNING
   Impact: Other

OAMSSA-04501: Exception on finalize of component [0].
   Cause: An internal error occurred.
   Action: For more details, start logging at the FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-04502: Exception on bootstrap of component [0].
   Cause: An internal error occurred.
   Action: For more details, start logging at the FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-04503: Distribution event of version [0] received for config of version [1].
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04504: Received null object as distribution event.
Cause: A null object was received as the distribution event.
Action: Verify the distributed data at the origin.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04505: Cannot handle distribution notification.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04506: Cannot acquire lock for configuration update.
Cause: Unable to acquire lock for configurable update.
Action: Identify source of contention and remove it.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04507: Cannot upload physical file change to configuration.
Cause: Unable to upload physical file change to configuration.
Action: Verify that the physical file is well formed.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04508: Mxbean attribute is null.
Cause: The Mxbean attribute was null.
Action: Size of document may be large causing this failure.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04509: Cannot handle config change notification.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04510: Starting upgrade from {0} to {1} ...
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-04511: Running {0} ...
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-04512: Finished upgrade from {0} to {1}.
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-04513: Source configuration path {0} is not specified, or is an invalid value.
Cause: Configuration path not specified for upgrade source, or is invalid value.
Action: Provide a valid configuration path.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04514: Destination configuration path {0} is not specified, or is an invalid value.
Cause: Configuration path not specified for upgrade destination, or is invalid value.
Action: Provide a valid configuration path.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04515: Configuration path {0} is not a valid file.
Cause: Provided path does not resolve into a valid file.
Action: Provide a path to a valid configuration file.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-04516: Initialization of configuration copy failed {0}.
    Cause: Configuration initialization failed.
    Action: Verify the contents of the configuration file.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-04517: configuration upgrade failed for component {0}.
    Cause: Configuration upgrade failed.
    Action: Rectify the cause of the failure.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-04518: Failed to build configuration build settings.
    Cause: Configuration setting for upgrade is not valid.
    Action: Rectify the cause of the failure.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-04519: Upgrade action request {0} is not valid.
    Cause: Requested upgrade action invalid.
    Action: Rectify the action request.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-04520: Destination configuration does not support data type {0} requested at path {1}.
    Cause: Provided configuration map value is not supported in destination configuration.
    Action: Transform the map value to a supported data type.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-04521: Destination configuration path {0} overwrites value {1} at element {2}.
    Cause: Destination path will overwrite value.
    Action: Change upgrade instructions to prevent path from overwriting values.
Level: 15  
Type: ERROR  
Impact: Other

OAMSSA-04522: Map destination path {0} will overwrite preserved path {1}.  
Cause: Destination path will overwrite value.  
Action: Change upgrade instructions to prevent path from overwriting values.

Level: 15  
Type: ERROR  
Impact: Other

OAMSSA-04523: Exception occurred during write of configuration for examination.  
Cause: Failure to write configuration for examination.  
Action: Correct the cause of the associated exception.

Level: 15  
Type: ERROR  
Impact: Other

OAMSSA-04524: Failed to create path {0}.  
Cause: Creation of folder or file specified by path failed.  
Action: Verify that the path can be written to, and that sufficient disk space exists.

Level: 15  
Type: ERROR  
Impact: Other

OAMSSA-05001: Unable to read configuration setting {0}, during Journal initialization.  
Cause: An internal error occurred while initializing a Journal.  
Action: For more details, start logging at FINE level.

Level: 15  
Type: ERROR  
Impact: Other

OAMSSA-05002: Invalid value {0} for parameter {1} was passed for Journal operation {2}, in instance {3}.  
Cause: An invalid parameter value was passed to the Journal operation.  
Action: For more details, start logging at FINE level.

Level: 15  
Type: ERROR  
Impact: Other

OAMSSA-05003: Unable to acquire lock on journal data for operation {0}, in instance {1}.  
Cause: A lock might have already been acquired by another thread, or there was an internal failure.
Action: For more details, start logging at FINE level.

Level: 15  
Type: ERROR  
Impact: Other

OAMSSA-05004: Journal entry with version {0} already exists in instance {1}.
Cause: A journal entry with the version already exists.
Action: Use a different version for the journal entry.

Level: 15  
Type: ERROR  
Impact: Other

OAMSSA-05005: Journal entry for version {0} does not exist in instance {1}.
Cause: A journal entry for the version doesn't exist.
Action: Check version of the journal entry.

Level: 15  
Type: ERROR  
Impact: Other

OAMSSA-05006: Unable to read Journal implementation name for instance {0}, using default name {1} instead.
Cause: Journal implementation name is not set in journal config setting.
Action: For more details, start logging at FINE level.

Level: 15  
Type: WARNING  
Impact: Other

OAMSSA-05007: Journal configuration setting for instance {0}, key = {1}, value = {2}.
Cause:  
Action:  

Level: 15  
Type: NOTIFICATION  
Impact: Other

OAMSSA-05008: Journal data in instance {0}: type = {1}, value = {2}.
Cause:  
Action:  

Level: 15  
Type: NOTIFICATION  
Impact: Other

OAMSSA-05009: Source is not a OAM11gR1 config file, version expected: "{0}", found: "{1}".
Cause: The source OAM config file does not belong to a OAM 11gR1 instance.
Action: Make sure config file from OAM 11gR1 instance is passed as source for upgrade.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-05501: Configuration for REST services not found.
Cause: Configuration file does not contain REST configuration
Action: Configure OAM for REST services.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-05502: Class declaration [0] is invalid.
Cause: REST class declaration is invalid.
Action: Correct the class declaration.

Type: ERROR
Impact: Other

OAMSSA-06036: Cannot find the file "[0]" in the classpath or on the filesystem
Cause: The policy file was not in the classpath.
Action: Add policy file to the classpath and run the program again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06037: XML data validation Error. Data in the input XML String maybe corrupt.
Cause: The policy file was invalid.
Action: Validate policy file against the schema and run the program again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06038: Validation Error while unmarshalling. Data in the input XML String maybe corrupt.
Cause: The policy file was invalid.
Action: Validate policy file against the schema and run the program again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06039: Cannot create temporal condition. Require either DayOfWeek or TimeOfDay.
Cause: The attribute required to create a temporal condition was not valid.
Action: Either DayOfWeek or TimeOfDay is missing. Add the required attribute and run the program again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06040: Invalid condition type "[0]" found in the policy store.
Cause: An internal error occurred.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-06041: Unable to distribute policy changes.
    Cause: An internal error occurred.
    Action: For more details, start policy logging at FINE level.
    Level: 15
    Type: ERROR
    Impact: Other

OAMSSA-06042: Null passed during modify operation.
    Cause: Object passed to modify operation was null.
    Action: Rerun with actual object.
    Level: 15
    Type: ERROR
    Impact: Other

OAMSSA-06043: Name cannot be null.
    Cause: During object creation, name value was null.
    Action: Rerun the operation with a valid name.
    Level: 15
    Type: ERROR
    Impact: Other

OAMSSA-06044: Name {0} exceeds maximum allowed length of {1} characters.
    Cause: During object creation, invalid name attribute was passed.
    Action: Rerun the operation with a valid name attribute.
    Level: 15
    Type: ERROR
    Impact: Other

OAMSSA-06045: An object of this type named "{0}" already exists.
    Cause: Policy object names must be unique for each object type and scope (global or domain).
    Action: Choose a different name for this object.
    Level: 15
    Type: ERROR
    Impact: Other

OAMSSA-06046: Mandatory attribute "{0}" is missing.
    Cause: A required attribute was missing during policy object creation.
    Action: Rerun the operation with the required attribute. When authn-level is the required attribute, set a positive value and rerun the operation.
    Level: 15
    Type: ERROR
    Impact: Other
OAMSSA-06047: "name" or "description" attribute missing in Module Property.
   Cause: A name or description attribute was missing in a module property.
   Action: Rerun the operation with required attribute set.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06048: Policy Object: {0} no longer exists.
   Cause: Policy object requested for removal was not found in the store; likely it has already been removed by another administrator.
   Action: None, the object has been removed.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06049: Module cannot be deleted. (Referred in Scheme).
   Cause: Module is being referred to in the scheme.
   Action: Remove the reference from the scheme and then delete the module.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06050: NULL passed during isDefaultAuthnScheme operation.
   Cause: Null passed while performing the default authn scheme operation.
   Action: Rerun the operation with the valid scheme.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06051: One of the challenge parameter key values is empty.
   Cause: A challenge param key value was empty.
   Action: Set the proper key value and then rerun the operation.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06052: Challenge Redirect URL is invalid.
   Cause: An invalid Challenge Redirect URL was entered.
   Action: Rerun the operation with valid challenge URL value.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06053: Challenge URL is null.
Cause: The URL entered is null.
Action: Re-run the operation with a valid URL value.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06054: Scheme referring to invalid authentication module.
Cause: The scheme was referring to an invalid authentication module.
Action: Rerun the operation after setting a valid authentication module.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06055: Scheme cannot be deleted. Referenced in an existing authentication policy.
Cause: The scheme is being referred to in a policy.
Action: Remove the reference from the policy and then delete the scheme.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06056: Default authentication scheme cannot be deleted.
Cause: An attempt was made to delete the default authentication scheme, which is not allowed.
Action: Rerun the operation with another authentication scheme.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06057: Invalid host format.
Cause: The host format was invalid.
Action: Rerun the operation with a valid host.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06058: Host "[0]" already exists under host identifier "[1]".
Cause: The host is already part of a host identifier.
Action: Remove the host from the other host identifier and then retry.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06059: Host Identifier cannot be deleted. (Referred to in a resource).
Cause: Host is being referred to in a resource.
Action: Remove the reference from the resource and then delete the host.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06060: Resource "[0]" does not exist in the application domain.
Cause: Resource does not exist in the application domain.
Action: Use a valid resource that exists in the application domain.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06061: Resource "[0]" cannot be added to this policy, as it is already referenced by [1] Policy "[2]".
Cause: A resource can only be associated with a single policy of a given type.
Action: Remove the resource from the named policy and try again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06062: A resource type name cannot start with a number.
Cause: Resource type names must start with a letter.
Action: Remove the numeric characters from the start of the name.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06063: Invalid operation format.
Cause: The operation list was invalid.
Action: Rerun the operation with a valid operation list.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06064: HostIdentifier is null.
Cause: A null HostIdentifier was passed to the operation.
Action: Rerun the operation with a valid host identifier.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06065: Invalid HostIdentifier.
Cause: No HostIdentifier was found in the policy.
Action: Rerun the operation with a valid host identifier.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06066: Unable to fetch HostIdentifier manager.
Cause: An internal error occurred.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06067: Resource URL format is not valid.
Cause: URL * was not followed by a .extension, or URL pattern (*any string) * was not followed by a character string, or URL * was preceded by a string (e.g. checking*.jsp is invalid), or URL pattern was invalid (e.g. "..." pattern is only allowed once).
Action: Rerun the operation with a valid resource url.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06068: Cannot delete resource, as it is referenced by {0} Policy "{1}".
Cause: A resource currently in use cannot be deleted.
Action: Delete the resource from the named policy and try again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06069: Token issuance policies can not contain responses.
Cause: Token issuance policies can not contain responses.
Action: Remove the responses.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06070: Unable to obtain policy manager for application domain id: "{0}".
Cause: An internal error occurred.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06071: Temporal condition validation failure for {0}.
Cause: Missing day of the week or time of the day required to create temporal condition, or no day selected in day of the week condition, or begin and end time not supplied for temporal condition, or end time is less than begin time.
Action: Rerun the operation with a valid Temporal condition.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06072: Identity condition validation failure for {0}.
Cause: User or group list was not supplied for identity condition creation, or users list was empty, or group list was empty.
Action: Rerun the operation with a valid Identity condition.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06073: IP4Range condition validation failure for {0}.
Cause: A null value was present in either start or end range.
Action: Rerun the operation with valid a IP4Range condition.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06074: {0} does not exist, id = {1}
Cause: An internal error occurred.
Action: For more details, start policy logging at FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06075: Unable to obtain a host identifier for the input name : hostIdName = {0}.
Cause: An internal error occurred.
Action: For more details, start policy logging at FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06076: Time of Day condition is not created as either begin time or end time is missing.
Cause: An internal error occurred.
Action: For more details, start policy logging at FINE level.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-06077: Cannot create condition object.
  Cause: An internal error occurred.
  Action: For more details, start policy logging at FINE level.
  Level: 15
  Type: ERROR
  Impact: Other
OAMSSA-06078: Error while creating condition of type: "{0}".
  Cause: An internal error occurred.
  Action: For more details, start policy logging at FINE level.
  Level: 15
  Type: ERROR
  Impact: Other
OAMSSA-06079: Error while reading response with name = "{0}".
  Cause: An internal error occurred.
  Action: For more details, start policy logging at FINE level.
  Level: 15
  Type: ERROR
  Impact: Other
OAMSSA-06080: Error while creating response from policy store object with name = "{0}".
  Cause: An internal error occurred.
  Action: For more details, start policy logging at FINE level.
  Level: 15
  Type: ERROR
  Impact: Other
OAMSSA-06081: Cannot open file.
  Cause: An internal error occurred.
  Action: For more details, start policy logging at FINE level.
  Level: 15
  Type: ERROR
  Impact: Other
OAMSSA-06082: Exception occurred while converting admin elements to runtime elements.
  Cause: An internal error occurred.
  Action: For more details, start policy logging at FINE level.
  Level: 15
  Type: ERROR
Impact: Other

OAMSSA-06083: No Client IPAddress found in AccessContext Map.
  
  **Cause:** An internal error occurred.
  
  **Action:** For more details, start policy logging at FINE level.
  
  **Level:** 15
  
  **Type:** ERROR
  
  **Impact:** Other

OAMSSA-06084: Null Authentication Scheme Id.
  
  **Cause:** An internal error occurred.
  
  **Action:** For more details, start policy logging at FINE level.
  
  **Level:** 15
  
  **Type:** ERROR
  
  **Impact:** Other

OAMSSA-06085: Constraints not supported for Authentication Policy. Pass null during Constraint creation.
  
  **Cause:** An internal error occurred.
  
  **Action:** For more details, start policy logging at FINE level.
  
  **Level:** 15
  
  **Type:** ERROR
  
  **Impact:** Other

OAMSSA-06086: OAM Admin Provider class not found : "{0}".
  
  **Cause:** An internal error occurred.
  
  **Action:** For more details, start policy logging at FINE level.
  
  **Level:** 15
  
  **Type:** ERROR
  
  **Impact:** Other

OAMSSA-06087: Unable to instantiate OAM Provider class : "{0}".
  
  **Cause:** An internal error occurred.
  
  **Action:** For more details, start policy logging at FINE level.
  
  **Level:** 15
  
  **Type:** ERROR
  
  **Impact:** Other

OAMSSA-06088: OAM provider class in the configuration does not implement PolicyAdminProvider: "{0}".
  
  **Cause:** An internal error occurred.
  
  **Action:** For more details, start policy logging at FINE level.
  
  **Level:** 15
  
  **Type:** ERROR
OAMSSA-06089: OAM Runtime Provider class not found : ":\{0\}".
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06090: Unable to instantiate OAM Runtime Provider class : ":\{0\}".
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06091: OAM provider class in the configuration does not implement PolicyRuntimeProvider: ":\{0\}".
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06092: Cache entry expired.
   Cause: 
   Action: 
   Level: 15
   Type: NOTIFICATION
   Impact: Other

OAMSSA-06093: Error while reading policy result cache size from configuration.
   Cause: Cache configuration was invalid.
   Action: Fix the cache configuration and the rerun the operation.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06094: Policy result cache is enabled.
   Cause: 
   Action: 
   Level: 15
   Type: NOTIFICATION
   Impact: Other
OAMSSA-06095: Registering PolicyDiagnosticConfigMediator.
  Cause:
  Action:
  Level: 15
  Type: NOTIFICATION
  Impact: Other

OAMSSA-06096: Successfully registered PolicyDiagnosticConfigMediator.
  Cause:
  Action:
  Level: 15
  Type: NOTIFICATION
  Impact: Other

OAMSSA-06097: Failed to register PolicyDiagnosticConfigMediator.
  Cause:
  Action:
  Level: 15
  Type: NOTIFICATION
  Impact: Other

OAMSSA-06098: Resource "{0}" already exists in policy "{1}".
  Cause: The resource already exists as part of an Authentication/Authorization Policy.
  Action: Rerun the operation using another resource.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-06099: Response "{0}" already exists in policy "{1}".
  Cause: The response already exists as part of an Authentication/Authorization Success/Failure List.
  Action: Rerun the operation using another response.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-06100: Condition "{0}" already exists in policy "{1}".
  Cause: The condition already exists as part of an Authorization policy.
  Action: Rerun the operation using another condition.
  Level: 15
  Type: ERROR
  Impact: Other
OAMSSA-06101: Policy change record number: "{0}".
  Cause:
  Action:
  Level: 15
  Type: NOTIFICATION
  Impact: Other

OAMSSA-06102: Unable to process policy change event for change record number: "{0}".
  Cause: An internal exception occurred.
  Action: For more details, start policy logging at FINE level.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-06103: Unable to acquire write lock on the XML policy store file, for change record number: "{0}".
  Cause: The XML policy store file is locked by another thread for more than the configured wait time.
  Action: For more details, start policy logging at FINE level.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-06104: Success URL is invalid.
  Cause: The success redirect URL was invalid.
  Action: Rerun the operation with a valid URL.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-06105: Failure URL is invalid.
  Cause: The failure redirect URL was invalid.
  Action: Rerun the operation with a valid URL.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-06106: Resource URL is invalid.
  Cause: The resource URL entered is invalid.
  Action: Re-run the operation with valid resource URL value.
  Level: 15
  Type: ERROR
  Impact: Other
OAMSSA-06107: Description for field {0} exceeds maximum allowed length of {1} characters.
   Cause: During object creation, invalid description attribute is passed.
   Action: Re-run the operation with valid description attribute.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06108: Operation list is empty.
   Cause: During object creation, invalid operation list attribute is passed.
   Action: Re-run the operation with valid operation list attribute.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06109: Resources belonging to a policy must be of the same type.
   Cause: The policy already contains resources of another type.
   Action: Apply the resource to a different policy.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06110: Resource type must not be null.
   Cause: Resource type must not be null.
   Action: Set the resource type.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06111: Unable to find HTTP resource type.
   Cause: The required HTTP resource type does not exist.
   Action: Create a new resource type with name "HTTP".
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06112: Application Domain should be empty before it is deleted.
   Cause: Application Domain is not empty.
   Action: Delete all resources and policies in an application domain before deleting the domain.
   Level: 15
   Type: ERROR
   Impact: Other
OAMSSA-06113: The resource URL cannot contain a query string.
   Cause: The resource URL cannot contain a query string.
   Action: Remove the query string component from the resource URL.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06114: The requested method is not supported by this policy object type.
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06115: An unsupported operation was unexpectedly requested.
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06116: A host identifier or resource type named "[0]" already exists.
   Cause: Names of host identifiers or resource types must be unique across both sets of objects.
   Action: Choose a different name for this object.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06117: An unsupported operation was unexpectedly requested.
   Cause: Exception while getting host identifier.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06118: Policy admin update event distribution setting : "[0]".
   Cause:
   Action:
   Level: 15
   Type: NOTIFICATION
   Impact: Other

OAMSSA-06119: Policy admin update event distribution is disabled.
Cause: Policy admin update event distribution is disabled
Action: Check the policy configuration setting for policy admin update event distribution
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06120: Host identifier doesn't exist for the given host and port.
Cause: There is no host identifier associated with the given host and port.
Action: Check the input host and port information.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06121: Policy runtime change event distribution failure, invalid (NULL) Journal instance.
Cause: An internal exception occurred while distributing policy runtime change events.
Action: For more details, start policy logging at FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06122: Policy runtime provider {0}, does not accept policy change events.
Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06123: Policy runtime provider {0}, accepts policy change events.
Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06124: Exception encountered while fetching current policy version from policy store.
Cause: An internal error occurred while fetching current policy version from policy store.
Action: For more details, start policy logging at FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06125: Policy data refresh by policy runtime engine did not complete after {0} time, hence policy cache is not refreshed.
Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06126: Exception encountered while refreshing policy cache by policy runtime.
Cause: An internal error occurred while refreshing policy cache by policy runtime.
Action: For more details, start policy logging at FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06127: Exception encountered while handling policy change event {0} by policy runtime.
Cause: An internal error occurred while handling policy change event by policy runtime.
Action: For more details, start policy logging at FINE level.

  Type: ERROR
  Impact: Other

OAMSSA-06269: Condition \{0\} contains an unset attribute value.
  Cause: An attribute value was not supplied for condition.
  Action: Rerun the operation with a valid attribute value.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06270: Resource type {0} cannot be created as read-only, or modified if already read-only.
Cause: A policy admin cannot create/update/delete read-only resource type without permission to do so.
Action: Do not attempt to manipulate a read-only resource type.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06271: One or more operations cannot be created as read-only, or modified if already read-only.
Cause: A policy admin cannot create/update/delete read-only operation(s) without permission to do so.
Action: Do not attempt to manipulate a read-only operation within a resource type.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06272: Operation {0} can not be used, because it does not exist for the type of this resource.
Cause: An invalid operation, one which does not exist for the resource's type, was used.
Action: Ensure that the operations added to a resource are a subset of those defined for its resource type.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06273: Policy contains more than one rule for rule effect "{{0}}".
Cause: More than the allowed single rule per rule effect was present.
Action: Create the policy using a single rule per rule effect.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06274: At least one of the policy rules must hold conditions selected for evaluation.
Cause: A policy using the simple rule mode needs one or more of the rules to contain conditions.
Action: Select conditions on at least one of the rules.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-06275: Invalid condition name "(0)" specified in "(1)" rule.
  Cause: A condition name was used within a rule, when no condition by that
  name exists.
  Action: Use names of conditions which exist when creating rules.
  Level: 15
Type: ERROR
Impact: Other
OAMSSA-06276: The same rule mode must be used across all rules contained in a
  policy.
  Cause: More than one rule mode was used within the policy’s rules.
  Action: Use only one rule mode within a policy.
  Level: 15
Type: ERROR
Impact: Other
OAMSSA-06277: Unable to process policy rule expression "(0)".
  Cause: Policy rule expression processing failed.
  Action: For more details, start logging at the FINE level.
  Level: 15
Type: ERROR
Impact: Other
OAMSSA-06278: At least one of the policy rules must hold an expression for
  evaluation.
  Cause: A policy using the expression rule mode needs one or more of the rules to
  contain expressions.
  Action: Create a valid rule expression on at least one of the rules.
  Level: 15
Type: ERROR
Impact: Other
OAMSSA-06279: Unexpected token "(0)" encountered at line "(1)", column "(2)" in
  the rule expression.
  Cause: Rule expression contains invalid syntax.
  Action: Use a valid rule expression in rules within a policy.
  Level: 15
Type: ERROR
Impact: Other
OAMSSA-06280: Number of open and close braces do not match in the rule
  expression.
  Cause: Rule expression contains invalid syntax.
**Action:** Use a valid rule expression in rules within a policy.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other  

**OAMSSA-06281:** Unable to escape special characters for condition name "\{0\}" to be used in rule expression.

Impact: Other

OAMSSA-08005: Cannot get implementation for type {0}.
Cause: The requested implementation was not specified in configuration file.
Action: Verify configuration files.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08006: Factory methods not declared for type: {0}.
Cause: None.
Action: None.
Level: 15
Type: INFO
Impact: Other

OAMSSA-08007: Cannot find file {0} in the classpath or on the filesystem.
Cause: The configuration file was not found.
Action: Verify the configuration file location.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08008: No parameters are defined for method {0}.
Cause: An invalid configuration definition was supplied.
Action: Correct the configuration definition.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08009: Cannot retrieve method {0} from class {1} for setting {2}. Loading MethodObject instead.
Cause: An invalid configuration definition was supplied.
Action: Correct the configuration definition.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08010: Cannot notify listener of file {0}.
Cause: Notification error.
Action: Verify if notification listener is valid.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08011: Unknown file notification error.
Cause: File notifier error.
Action: Verify file change notification listeners.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08012: Stale data exception encountered for configuration version {0}.
Cause: File version is old.
Action: Refresh to the latest file version.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08013: Configuration update failed with errors.
Cause: Configuration update failed.
Action: Correct the cause of update failure.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08014: Configuration path is null.
Cause: Request path value is null.
Action: Provide the path parameter in method call.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08015: Configuration initial load failed for {0}.
Cause: Initial load of configuration failed.
Action: Verify that the configuration file exists and is valid.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08016: Configuration does not exist for path {0}.
Cause: Configuration for the path was null.
Action: Verify the path provided.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08017: Element {0} is not a map.
Cause: Configuration for the path was invalid.
Action: Verify the path.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08018: Instance identifier is null.
Cause: The input parameter was invalid.
Action: Validate the input parameter.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08019: Component at path {0} must contain Global, Profile, and Instance sections.
Cause: The configuration path was invalid.
Action: Validate the input parameter.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08020: File is locked for updates by context {0}.
Cause: An attempt was made to update a locked file.
Action: Release the lock before updating file from another context.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08021: Cannot acquire notification lock.
Cause: Lock is being held by other configuration service instances.
Action: Retry after a delay.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08022: Cannot apply compensating transaction on version:{0}.
Cause: Failure is due to a cause that does not allow restoration of original values.
Action: Verify file system.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08023: Instance at {0} does not specify a {1}.
Cause: Server instance definition incorrect.
Action: Correct the definition in the configuration file.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08024: Element type of xsd:string required at path {0}{1}{2}.
Cause: Server instance profile type should be of type string.
Action: Correct the definition in the configuration file.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08025: Profile {0} specified by {1} does not exist.
Cause: Server instance profile does not exist.
Action: Correct the definition in the configuration file.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08026: Profile {0} specified by {1} should be of type htf:map.
Cause: Server instance profile should be of type map.
Action: Correct the definition in the configuration file.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-08027: Global section under {0} should be of type htf:map.
  Cause: Server global section should be of type map.
  Action: Correct the definition in the configuration file.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08028: Error parsing the configuration file {0}.
  Cause: Error parsing the configuration file.
  Action: Verify the configuration.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08029: Configuration file open error {0}.
  Cause: An error occurred when opening the file.
  Action: Verify the file location. Ensure that it is on the classpath or that its
            location is defined as a system property.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08030: Cannot get xml for configuration.
  Cause: Cannot get xml for configuration.
  Action: Correct the error indicated by the exception.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08031: Cannot load configuration from InputStream.
  Cause: Cannot load configuration from InputStream.
  Action: Correct the error indicated by the exception.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08032: Configuration event dispatch failed.
  Cause: Dispatch of the configuration event failed.
  Action: Correct the error indicated by the exception.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08033: Setting handler not found for type: {0}.
Cause: Configuration setting does not have a corresponding handler.
Action: Verify that the setting type is defined correctly.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08051: Configuration file is not loaded.
Cause: Configuration file was not loaded. See exception for cause.
Action: Correct the configuration file if it is badly formed.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08052: Configuration model is not found for object type {0}.
Cause: Configuration file was not loaded. See exception for cause.
Action: Correct the configuration file if it is badly formed.

Level: 15
Type: WARNING
Impact: Other

OAMSSA-08053: Error during construction of configuration model instantiation.
Cause: Invalid configuration data.
Action: Verify the configuration data for correctness.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08054: Configuration file is not saved.
Cause: Configuration file was not saved. See exception for cause.
Action: Correct the configuration file if it is badly formed.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08055: Configuration file does not support List of Lists construct. Ignoring element {0}.
Cause: Configuration file has an unsupported data construct.
Action: Correct the configuration file if it is badly formed.

Level: 15
Type: WARNING
Impact: Other

OAMSSA-08056: Path {0} and key set in the CompositeData {1} do not match.
Cause: Call made with inconsistent data.
Action: Correct the parameters of the call.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08057: Single valued data type found for multi-valued property on key {0}.
Cause: Call made on invalid data type
Action: Correct the parameters of the call.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08058: Multi-valued data type found for single valued property on key {0}.
Cause: Call made on invalid data type.
Action: Correct the parameters of the call.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08059: Operation returned type {0}. Expecting type {1}.
Cause: Property type accessed not found.
Action: Use the correct operation for the type.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08060: Cannot apply document to configuration. Exception message is {0}.
Cause: Document application failed.
Action: Use the correct operation for the type.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08061: Jar definitions provided for path {0} are invalid.
Cause: The path does not exist, or the jars are missing.
Action: Correct the configuration file with the right values.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08062: Jar definition {0} provided is invalid.
Cause: The path does not exist, or the jar is missing.
Action: Correct the configuration file with the right value.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08063: Distribution event of version [0] received for configuration of version [1].
Cause: Distribution values are not updated with latest configuration settings.
Action: Restart the server to ensure that it is synchronized with other servers.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08064: Received null object as distribution event.
Cause: Some server has not placed the document on the distributor.
Action: Locate the server and restart it.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08065: Cannot handle distribution notification.
Cause: An unexpected failure.
Action: Diagnose the problem from the stacktrace and address it.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08066: Cannot find the map for key [0]
Cause: An attempt was made to add a value to a map that does not exist.
Action: Ensure that the map exists before adding the property for the map.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08067: Invalid data [0] provided for time interval
Cause: Invalid data provided for construction of time interval.
Action: Correct the data in the configuration file.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08068: Invalid data [0] provided for memory size.
Cause: Invalid data provided for construction of memory size.
Action: Correct the data in the configuration file.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08069: Configuration MBean not initialized.
Cause: Initialization failure during MBean startup.
Action: Verify the exceptions at startup and correct the cause of the error.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08070: Setting properties at path {0} not supported
Cause: path provided is invalid
Action: Correct the path provided.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08071: Unsupported configuration store version detected. Required "{0}" but found "{1}".
Cause: The version of config store is not compatible with OAM version.
Action: Make sure OAM is configured to talk to correct version of config store.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08072: Applying configuration update at path {0}. Current version of configuration {2}. Change initiated on this node: {1}
Cause: None
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-08073: Error occurred while accessing the System Identity Store.
Cause: Failure while processing the configuration or when accessing the System Identity Store.
Action: Verify the System Identity Store configuration and that the directory is up and running.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08074: User {0} is not authorized to invoke operation on the Oracle Access Management MBeans
Cause: The user does not have the privileges to access the MBeans.
Action: Verify the System Identity Store configuration to ensure the correct privileges are set.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-10001: SSO server token parsing failed.
Cause: The SSO server token was invalid.
Action: Verify the server token key size and algorithm configuration.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-10002: SSO server token Marshaling failed.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-10003: SSO Session is not valid.
Cause: The SSO session was missing, has been deleted, or has expired.
Action: For more details, start logging at the FINE level.

Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-12102: Failed to initialize Authentication Engine Controller.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
OAMSSA-12103: Unable to connect to User Identity Store.
  **Cause:** The User Identity store was not running or the configuration was not valid.
  **Action:** Verify that User Identity store is running and the configuration is valid.

OAMSSA-12104: Authentication Module Executor is unable to get configuration parameters.
  **Cause:** An internal error occurred.
  **Action:** For more details, start logging at the FINE level.

OAMSSA-12105: Cannot initialize authentication scheme executor.
  **Cause:** An internal error occurred.
  **Action:** For more details, start logging at the FINE level.

OAMSSA-12106: Authentication Failed.
  **Cause:** The authentication was not successful.
  **Action:** For more details, start logging at the FINE level.

OAMSSA-12107: Invalid SPNEGO token in the request.
  **Cause:** The SPNEGO token in the incoming request was either invalid or missing.
  **Action:** For more details, start logging at the FINE level.

OAMSSA-12108: Invalid CallbackHandler in SPNEGO LoginModule.
  **Cause:** The CallbackHandler was not initialized properly.
  **Action:** Verify the configuration.
Level: 1  
Type: INCIDENT_ERROR  
Impact: Other  

OAMSSA-12109: Invalid Subject in SPNEGO LoginModule.  
Cause: An internal error occurred.  
Action: For more details, start logging at the FINE level.  

Level: 1  
Type: INCIDENT_ERROR  
Impact: Other  

OAMSSA-12110: Currently only value {0} is supported for parameter {1}.  
Cause: An invalid value was supplied for a parameter.  
Action: Rerun the operation with a valid parameter value.  

Level: 1  
Type: WARNING  
Impact: Other  

OAMSSA-12111: No user found in User Identity Store for the User certificate with certificate attribute {0} value {1}.  
Cause: The mapping of the user certificate to an user entry was incorrectly configured.  
Action: Verify the configuration.  

Level: 1  
Type: ERROR  
Impact: Other  

OAMSSA-12112: Cannot find the certificate of the OCSP server.  
Cause: No OCSP server certificate was present in the keystore.  
Action: Ensure that correct value is configured for the parameter OCSP_SERVER_CERT_ALIAS.  

Level: 1  
Type: ERROR  
Impact: Other  

OAMSSA-12113: Initialization of the X509ModuleExecutor failed.  
Cause: The keystore file was missing, or could not be read.  
Action: Verify the configuration.  

Level: 1  
Type: ERROR  
Impact: Other  

OAMSSA-12114: Initialization of the X509ModuleExecutor failed.  
Cause: An internal error occurred.
Action: Verify the configuration setting for the CERTMAPPERCLASS parameter of X509 Authentication Module and ensure that the class is present in the classpath.

Level: 1
Type: ERROR
Impact: Other

OAMSSA-12115: Initialization of the X509ModuleExecutor failed.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.

Level: 1
Type: ERROR
Impact: Other

OAMSSA-12116: Cannot find the user certificate.
Cause: An internal error occurred.
Action: Verify the configuration and rerun this operation using a valid user certificate.

Level: 1
Type: WARNING
Impact: Other

OAMSSA-12117: Cannot validate the user certificate.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.

Level: 1

Type: ERROR
Impact: Other

OAMSSA-20043: Error validating LDAP URL and credentials : {0}.
Cause: Test connection failed validation url and credentials.
Action: Check LDAP URL and credentials in provider configuration.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-20044: Error validating User Search Base : {0}.
Cause: Test Connection failed validation of user search base.
Action: Check User Search Base in provider configuration.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-20045: Error validating Group Search Base : {0}.
Cause: Test Connection failed validation of group search base.
Action: None.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-20046: Group Search Base not found or has 0 elements or Role Security Admin is invalid.
Cause: Test Connection failed getting more than 0 entries in group search base.
Action: Check group search base in directory for entries, specifically OAM Role Security Admin.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-20047: No entries were found under the User Search Base : {0} with attribute : {1}.
Cause: Test Connection failed getting more than 0 entries in user search base with the specified user name attribute.
Action: Check user search base in directory for entries or provide correct user name attribute.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-20048: Invalid User Name Attribute : {0}.
Cause: User Name Attribute was invalid.
Action: Check if User Name Attribute is valid.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-20049: Subscriber Name : {0} : has no entries.
Cause: Test Connection failed validation of Subscriber Name in directory.
Action: Check to see if the subscriber name attribute exists in directory.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-20050: Subscriber Name not found or has 0 elements.
Cause: Test Connection failed getting more than 0 entries in subscriber name.
Action: Check subscriber name in directory for entries.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-20051: Failure testing connection : {0}
Cause: Test Connection failed.
Action: Check parameters, entries, server.

  Cause: A connection with this name already exists
  Action: Choose a different name for the connection.

  Level: 2
  Type: Information
  Impact: Programmatic

OBI_OFFICE-00004: Could not insert BI Object
  Cause: An error occurred while inserting the view object
  Action: Examine the log for details on the error.

  Level: 2
  Type: Error
  Impact: Programmatic

OBI_OFFICE-00005: Could not save as a valid connection, please enter valid connection parameters.
  Cause: Unable to save the invalid connection.
  Action: Please provide the correct connection parameters and try again.
Level: 2
Type: Error
Impact: Network

OBI_OFFICE-00006: Empty result set. No rows will be displayed.
  Cause: The server returned no data.
  Action:

Level: 2
Type: Warning
Impact: Programmatic

OBI_OFFICE-00007: Empty result set. A blank chart will be displayed.
  Cause: The server returned no data.
  Action:

Level: 2
Type: Warning
Impact: Programmatic

OBI_OFFICE-00008: Empty result set. A default chart will be inserted.
  Cause: The server returned no data.
  Action:

Level: 2
Type: Warning
Impact: Programmatic

OBI_OFFICE-00009: Error while adding image:
  Cause: Failed to insert title view image
  Action: Examine the log for details on the error.

Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00010: Error during Oracle BI application creation:
  Cause: Unable to load Oracle BI Office Addin.
  Action: Examine the log for details on the error.

Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00011: Error while inserting Filter view:
  Cause: Failed to insert filter view.
  Action: Examine the log for details on the error.

Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00012: Error while inserting Title view:
Cause: Failed to insert title view.
Action: Examine the log for details on the error.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00013: Error while creating chart:
Cause: Error occurred while inserting chart view.
Action: Examine the log for details on the error.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00014: Error while creating chart: Error due to edit mode!
Cause: Error occurred while inserting chart view due to edit mode.
Action: Please unselect the chart and try again.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00015: Error while getting clipboard content:
Cause: Unable to access Clipboard contents
Action: Examine the log for details on the error.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00016: Error while initializing Oracle BI Add-in:
Cause: Error while initializing Oracle BI Office addin
Action: Examine the log for details on the error.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00017: Error while loading Oracle BI Add-in:
Cause: Error while loading the Oracle BI Office addin
Action: Examine the log for details on the error.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00018: Error while naming the sheet
Cause: A worksheet with the same name exists
Action: Examine the log for details on the error.

Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00019: Failed to connect to Server, please check the connection and try again.
Cause: Server connection has become unavailable.
Action: Please check the server connection and try again.

Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00020: Failed to get child items.
Cause: Unable to get Analysis/Views at this path.
Action: Please check the path in Answers.

Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00021: Failed to get child items. The folder maybe empty.
Cause: Unable to get Analysis/Views as the folder might be empty.
Action: Please check the folder at this path and make sure it is not empty, and the user has permission to access it.

Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00022: Failed to insert Oracle BI view.
Cause: Failed to insert the view.
Action: Examine the log for details on the error.

Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00023: Failed to insert Oracle BI view. Error due to edit mode!
Cause: Error occurred while inserting the view due to edit mode.
Action: Please unselect the view by pressing Esc key and try again.

Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00024: Filter view not inserted as it is empty.
Cause: Failed to insert filter view.
Action: Examine the log for details on the error.
Level: 2
Type: Error
Impact: Programmatic

**OBI_OFFICE-00025: Filter view removed as it is empty.**
Cause: The filterview inserted was empty and therefore has been removed.
Action: Please make sure the filter view is not empty.
Level: 2
Type: Error
Impact: Programmatic

**OBI_OFFICE-00026: Insufficient space in worksheet.**
Cause: The view is too large to fit into one worksheet.
Action: Consider using redesignign the Analysis so that it fits in one worksheet.
You may also consider upgrading to Office 2007.
Level: 2
Type: Error
Impact: Programmatic

**OBI_OFFICE-00027: Invalid Oracle BI Office server URL or network is not available. Working offline.**
Cause: Network connection is not available.
Action: Please make sure the network connection is available and try again.
Level: 2
Type: Error
Impact: Network

**OBI_OFFICE-00028: Invalid analysis defintion. Analysis must have at least one dimension and one measure**
Cause: The analysis is invalid.
Action: Please make sure that the analysis contains at least one dimension and one measure.
Level: 2
Type: Error
Impact: Programmatic

**OBI_OFFICE-00029: You must enter a $1 type for $2**
Cause: A wrong type value has been entered for the defined prompt column.
Action: Please enter a numeric value for numeric data type, or a date or datetime for date and datetime types.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00030: Invalid URL. Please check your Oracle BI Office server name and port number.
Cause: The BI Office server connection is invalid.
Action: Please edit the connection to make sure that the connection parameters are correct. Test the connection and try again.

Level: 2
Type: Error

Impact: Programmatic

OBI_OFFICE-00031: Login failed. Please check your username, password and Oracle BI Office server availability.
Cause: Either the username/password is incorrect, or the server is not available.
Action: Please make sure the username/password is correct and the server is available. Please check 'Test Connection' in connection details dialog under Preferences.

Level: 2
Type: Error

Impact: Programmatic

OBI_OFFICE-00032: You have no access right to Oracle BI from Microsoft Office.
Cause: You have no access right to Oracle BI from Microsoft Office.
Action: Please contact your administrator.

Level: 2
Type: Error

Impact: Programmatic

OBI_OFFICE-00033: No Oracle BI Office server connections found. Please add at least one server connection.
Cause: No connections have been entered so far.
Action: Please follow the instructions to enter a new BI Office server connection. You can enter or modify the connection at any time by selecting 'Preferences' from the Oracle BI menu.

Level: 2
Type: Warning

Impact: Programmatic

OBI_OFFICE-00034: No Oracle BI view in clipboard.
Cause: The clipboard is either empty or does not have a BI view copied.
Action: Please go to Answers using your webbrowser and click on 'Copy' link displayed at the bottom on the view.

Level: 2
Type: Warning

Impact: Programmatic

OBI_OFFICE-00035: No prompts and/or levels defined.
Cause: No prompts and/or levels defined for this analysis.

Action:

Level: 2
Type: Warning
Impact: Programmatic

OBI_OFFICE-00036: Only one BI Object can be edited at a time.

Cause: Multiple BI views have been selected.

Action: Please make sure to select only one view, and then click on Edit Prompts and Levels.

Level: 2
Type: Warning
Impact: Programmatic

OBI_OFFICE-00037: Oracle BI view not found.

Cause: The view no longer exists in Answers

Action: Please make sure that the view exists at that specified path on the server.

Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00038: Please enter a Office server name before test connection.

Cause: A name is not entered in the BI Office server name box.

Action: Please enter a valid name for the BI Office server.

Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00039: Please select a slide before inserting an Oracle BI view.

Cause: A slide has not been selected for the view to be inserted in.

Action: Please select a slide to insert the view into.

Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00040: Please select a slide to refresh.

Cause: A slide has not been selected to refresh.

Action: Please select a slide to refresh.

Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00041: Port numbers 9703 and 9706 are reserved by Oracle BI EE Server. Please verify your port number.
Cause: An invalid port number has been entered in the connection detail dialog.

Action: Please make sure that a valid port number (other than 9703 and 9706) have been entered in the connection detail dialog.

Level: 2
Type: Error
Impact: Network

OBI_OFFICE-00042: Analysis not found.
Cause: An analysis has not been found at the specified path.
Action: Please make sure that the analysis exists at the specified path.

Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00043: Server configuration file has wrong host name.
Cause: BIOffice.xml file on the BI Office server has incorrect hostname specified in the SAWBASEURL parameter.
Action: Please make sure the URL specified in as the SAWBASEURL in bioffice.xml file is valid and reachable.

Level: 2
Type: Error
Impact: Network

OBI_OFFICE-00044: Server configuration file has wrong port number.
Cause: BIOffice.xml file on the BI Office server has incorrect port number in the SAWBASEURL parameter.
Action: Please make sure the URL specified in as the SAWBASEURL in bioffice.xml file is valid and reachable.

Level: 2
Type: Error
Impact: Network

OBI_OFFICE-00045: Server has wrong SSL configuration (SSL Handshake exception thrown).
Cause: BIOffice.xml file on the BI Office server has incorrect SSL URL in the SAWBASEURL parameter.
Action: Please make sure the URL specified in as the SAWBASEURL in bioffice.xml file is valid and reachable.

Level: 2
Type: Error
Impact: Network

OBI_OFFICE-00046: Server configuration file has wrong URL, or other runtime HTTP exception has been thrown. Please check server configuration and/or server log files for more information.
Cause: Server configuration file has wrong URL, or other runtime HTTP exception has been thrown.
Action: Please check server configuration and/or server log files for more information.
Level: 2
Type: Error
Impact: Network

OBI_OFFICE-00047: Selected view no longer exists on the Oracle BI server.
Cause: Selected view no longer exists on the Oracle BI server.
Action: Please make sure that the view exists at the specified path on the server.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00048: Edit Prompts/Levels is not supported for this type of view
Cause: Edit Prompts/Levels action is initiated on Title or Filter view
Action: Please make sure to select a view other than Title and Filter in order to Edit Prompts/Levels.
Level: 2
Type: Warning
Impact: Programmatic

OBI_OFFICE-00049: Selected object is not a valid BI Object
Cause: Object selected is not an Oracle BI View.
Action: Please make sure to select a valid BI view object.
Level: 2
Type: Warning
Impact: Programmatic

OBI_OFFICE-00050: Test connection failed.
Cause: Unable to test connectivity to the Oracle BI Office server.
Action: Please make sure the connection parameters for this connection are set correctly and try again.
Level: 2
Type: Error
Impact: Network

OBI_OFFICE-00051: The folder is empty.
Cause: The folder you are trying to access is empty.
Action: Please make sure to select a non-empty folder.
Level: 2
Type: Information
Impact: Programmatic
OBI_OFFICE-00052: These Oracle BI views are not supported so will not be pasted.
    **Cause:** Some of the copied views are not supported by the BI Office addin and therefore will not be pasted.
    **Action:** Try pasting the unsupported views as images or flash(PowerPoint).
    **Level:** 2
    **Type:** Error
    **Impact:** Programmatic

OBI_OFFICE-00053: This chart type is not supported.
    **Cause:** The specified chart type is not supported by BI Office addin.
    **Action:** Try inserting the chart as image or flash(Powerpoint)
    **Level:** 2
    **Type:** Error
    **Impact:** Programmatic

OBI_OFFICE-00054: This Oracle BI view type is not supported.
    **Cause:** The specified view type is not supported.
    **Action:** Please make sure to insert a view that is supported by the addin.
    **Level:** 2
    **Type:** Error
    **Impact:** Programmatic

OBI_OFFICE-00055: Title view not inserted as it is empty :
    **Cause:** The title view is empty and therefore not inserted.
    **Action:** Please make sure the titleview is not empty.
    **Level:** 2
    **Type:** Warning
    **Impact:** Programmatic

OBI_OFFICE-00056: Unknown error occurred.
    **Cause:** An unknown error occurred on BI Office server.
    **Action:** Examine the logs on BI Office server to get more details.
    **Level:** 2
    **Type:** Error
    **Impact:** Programmatic

OBI_OFFICE-00057: You must select an operator
    **Cause:** An operator has not been selected in the prompt dialog.
    **Action:** Please make sure you enter a valid operator in the prompt selection dialog.
    **Level:** 2
    **Type:** Error
    **Impact:** Programmatic
OBI_OFFICE-00058: You must enter a connection name.
Cause: A connection name has not been entered in connection details dialog.
Action: Please make sure you enter a valid connection name in the prompt selection dialog.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00059: You must enter a date at row:
Cause: A valid date has not been entered in the prompt selection dialog.
Action: Please make sure you enter a valid date in the prompt selection dialog.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00060: You must enter office application name.
Cause: A BIOffice application name has not been entered in connection dialog.
Action: Please enter a valid application name for BI Office server connection.
Default: bioffice
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00061: You must enter a different value
Cause: Same date or datetime value has been entered in case of between operator.
Action: Please enter a different date or datetime for getting data in the specified time range.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00062: You must enter a number at row:
Cause: The value entered at the specified row is non-numeric.
Action: Please enter a numeric value at the specified row.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00063: You must enter a value for
Cause: Prompt value is not entered for a prompt column that is defined as mandatory (cannot be skipped).
Action: Please enter or select value for the defined prompt column.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00064: You must login again for this change to take effect.
   Cause: You have made changes to the connection information while being connected to the same connection.
   Action: Please logout and login again.
   Level: 2
   Type: Error
   Impact: Programmatic

OBI_OFFICE-00065: Please select at least one section to insert.
   Cause: You have not selected one or more sections of the pivottableview to insert.
   Action: Please select at least one section to insert in pivottable view.
   Level: 2
   Type: Error
   Impact: Programmatic

OBI_OFFICE-00066: You must select at least one level
   Cause: You have not selected one or more levels to insert in insert view dialog.
   Action: Please select at least one level in the level selection tab of insert view dialog.
   Level: 2
   Type: Error
   Impact: Programmatic

OBI_OFFICE-00067: The table being inserted contains more than $1 rows, insertion could be slow.
   Cause: The table view or pivot table view being inserted has large number of rows.
   Action: Select OK to proceed, or Cancel to stop the insertion.
   Level: 2
   Type: Information
   Impact: Programmatic

OBI_OFFICE-00068: The table being inserted contains more than $1 rows, please wait until insertion is complete or Click Cancel to stop.
   Cause: The table view or pivot table view being inserted has large number of rows.
   Action: Select OK to proceed, or Cancel to stop the insertion.
   Level: 2
   Type: Information
   Impact: Programmatic

OBI_OFFICE-00069: The table being inserted contains more than $1 columns, insertion could be slow.
Cause: The table view or pivot table view being inserted has large number of columns.
Action: Select OK to proceed, or Cancel to stop the insertion.
Level: 2
Type: Information
Impact: Programmatic

OBI_OFFICE-00070: The table being inserted contains more than $1 columns, please wait until insertion is complete or Click Cancel to stop.
Cause: The table view or pivot table view being inserted has large number of columns.
Action: Select OK to proceed, or Cancel to stop the insertion.
Level: 2
Type: Information
Impact: Programmatic

OBI_OFFICE-00071: This chart type $1 is not supported.
Cause: The chart type you have selected to insert is not supported by Oracle BI Office Addin.
Action: Select a different chart type to insert.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00072: Unknown server error has occurred. Please check the server logs.
Cause: Unknown server error has occurred.
Action: Please check the server logs.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00073: Error has occurred when creating log file. Please check if the path exists.
Cause: The file can not be created at this path.
Action: Make sure the path the file is created exists.
Level: 2
Type: Error
Impact: Programmatic

OBI_OFFICE-00074: The BIOffice objects copied into office clipboard.
Cause: Copy BIOffice objects into office clipboard.
Action:
Level: 2
Type: Information
Impact: Programmatic

OBI_OFFICE-00075: You must at least select one column.
Cause: At least one column needs to be selected.
Action: Select at least one column.

Level: 2
Type: Warning
Impact: Programmatic

OBI_OFFICE-00076: You have tried to insert one or more views that are not supported by the Oracle BI Add-in. For a complete list of views not supported please refer to the documentation.
Cause: The 11g views are not supported.
Action: Do not include the views are not supported.

Level: 2
Type: Warning
Impact: Programmatic

OBI_OFFICE-00077: The Oracle BI Add-in does not support certain features available in views. These features will not be available in views inserted into Office documents via the Oracle BI Add-in. For a complete list of these unsupported features please refer to the documentation.
Cause: The 11g features are not supported.
Action: Do not create report with features are not supported.

Level: 2
Type: Warning
Impact: Programmatic
ODF-10000: Unable to add incident file \{0\} for incident \{1\}.
  Cause: TODO
  Action: TODO
  Level: 1

Impact: Application Diagnostics

ODF-10802: Unsupported type {0} for parameter "{1}"
Cause: TODO
Action: TODO

Level: 1
Type: ERROR  
Impact: Application Diagnostics  

ODF-11200: An error occurred when loading diagnostics engine configuration from file {0}: {1}  
Cause: Diagnostics engine configuration could not be loaded because the configuration file could not be opened.  
Action: Please make sure the configuration file exists and has read permissions.  

Level: 1  
Type: ERROR  
Impact: Application Diagnostics  

ODF-11201: An error occurred when loading diagnostics engine configuration from deployed resource {0}: {1}  
Cause: Diagnostics engine configuration could not be loaded because the default configuration file inside DiagEngine.jar could not be opened.  
Action: Please make sure the configuration properties file exists inside the DiagEngine.jar  

Level: 1  
Type: ERROR  
Impact: Application Diagnostics  

ODF-11202: Unable to locate configuration properties resource at {0}.  
Cause: Diagnostics engine configuration could not be loaded because the default configuration file inside DiagEngine.jar could not be opened.  
Action: Please make sure the configuration properties file exists inside the DiagEngine.jar  

Level: 1  
Type: ERROR  
Impact: Application Diagnostics  

ODF-11203: Values are not set for the following configuration properties: {0}  
Cause: One or more required configuration properties for the Diagnostics Engine do not have values in the configuration file.  
Action: Specify values for the required configuration properties in the configuration file.  

Level: 1  
Type: ERROR  
Impact: Application Diagnostics  

ODF-11204: Unknown NLS Bundle: {0}  
Cause: NLS Bundle specified by a Diagnostic Test cannot be loaded. This can normally happen if the NLS Bundle is a resource bundle that does not exist or cannot be loaded.  
Action: Ensure that the NLS Bundle specified within the Diagnostic Test is a valid resource bundle class.  

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-11205: Unable to create an external URL. linkURI is not specified.
Cause: A link to an external website could not be created in the diagnostic test report because the 'linkURI' attribute was not specified by the diagnostic test when adding the link to the report.
Action: Correct the diagnostic test to specify the 'linkURI' attribute required when adding external links to the test report.
Level: 1

Type: ERROR
Impact: Application Diagnostics

ODF-11206: Unable to create an URL for Metalink note. Metalink document ID is not specified.
Cause: A link to a Metalink Document could not be created in the diagnostic test report because the document ID was not specified by the diagnostic test when adding the link to the report.
Action: Correct the diagnostic test to specify the document ID when adding links to Metalink documents to the test report.
Level: 1

Type: ERROR
Impact: Application Diagnostics

ODF-11207: Unable to create an internal URL. functionName is not specified.
Cause: A link to an internal application page within the applications system could not be created in the diagnostic test report because the name for the page was not specified by the diagnostic test when adding the link to the report.
Action: Correct the diagnostic test to specify the page name / function name when adding internal links to the test report.
Level: 1

Type: ERROR
Impact: Application Diagnostics

ODF-11208: Unable to load the FND Message Service due to an error: {0}
Cause: The Diagnostics Engine was unable to connect to the Message Service. This could happen if Message Service cannot connect to the applications database.
Action: Ensure that the applications database datasource is configured correctly and that the database is running.
Level: 1

Type: ERROR
Impact: Application Diagnostics

ODF-11209: Unable to get JPS context. Following exception is thrown : {0}
Cause: An error occurred when attempting to get the JpsContext from JpsContextFactory. This could happen if JPS is not configured properly in the server where diagnostics is running.
Action: Ensure that the JPS is properly configured on the server where diagnostics is running. Also check the managed server log files to determine the underlying root cause for the error.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-11210: No privilege to get credentials with key : {0}
Cause: Diagnostics Engine does not have appropriate privilege to read from the credential store.
Action: Ensure that the DiagEngine.jar file is granted appropriate privilege to read from the credential store.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-11211: Credential being set in credentials store is invalid. Please refer error message : {0}
Cause: Could not save credential to credential store because the credential was invalid.
Action: Ensure that valid credentials are specified when saving to the credential store.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-11212: Unable to retrieve problems for ADR Home {0} on server {1}. Please refer error message : {2}
Cause: This can occur if the diagnostics engine is unable to establish connection with the underlying IncidentManagerProxy MXBean in the domain to retrieve problems.
Action: Ensure that the AdminServer for the domain is up and running. Also check the associated error message and the server log file for further information.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-11213: Unable to retrieve incidents for a problem from ADR system. Please refer error message : {0}
Cause: This can occur if the diagnostics engine is unable to establish connection with the underlying IncidentManagerProxy MXBean in the domain to retrieve incidents.
Action: Ensure that the AdminServer for the domain is up and running. Also check the associated error message and the server log file for further information.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-11214: Unable to register a diagnostics test run with incident in ADR system.
Please refer error message: {0}
Cause: This can occur if the diagnostics engine is unable to establish connection
with the underlying IncidentManagerProxy MXBean in the domain while adding
a diagnostic test run to an incident in the ADR system.
Action: Ensure that the AdminServer for the domain is up and running. Also
check the associated error message and the server log file for further information.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-11215: Unable to close JMX connector. Please refer error message: {0}
Cause: Diagnostic Engine was able to perform the mbean operation but
encountered an error when attempting to close the JMX connection.
Action: Check the associated error message and the server log file for further
information.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-11216: Unable to obtain connection provider.
Cause: Diagnostic Engine was unable to connect to the AdminServer.
Action: Ensure that the AdminServer is up and running. Also check the server log
file for further information.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-11217: Invalid Problem object passed for querying incidents.
Cause: Invalid or null Problem argument was passed when querying for
incidents.
Action: Ensure that a valid Problem argument is passed when querying for
incidents.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-11218: Invalid incident or diagnostics test report provided.
Cause: One or more of the following parameters were not specified when
attempting to add diagnostic test report to an incident in ADR: incident ID, test
report file path, server name, ADR Home
Action: Ensure that valid parameters are specified when adding diagnostic test
report to an incident in ADR.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-11219: You do not have sufficient privileges to execute the test with name "{0}".

Cause: User did not have sufficient privileges to execute the diagnostic test.

Action: Ensure that the user belongs to an appropriate role with the execute test privilege required for executing diagnostic tests.

Level: 1

Type: ERROR

Impact: Application Diagnostics

ODF-11220: You do not have sufficient privileges to view report details for this execution.

Cause: User does not have sufficient privileges to view a diagnostic test report.

Action: Ensure that the user belongs to an appropriate role with the view test report privilege required for viewing test reports.

Level: 1

Type: ERROR

Impact: Application Diagnostics

ODF-11221: You do not have sufficient privileges to update the test with name "{0}".

Cause: User does not have sufficient privileges to update the definition of a diagnostic test.

Action: Ensure that the user belongs to an appropriate role with the update test privilege required for updating test definition.

Level: 1

Type: ERROR

Impact: Application Diagnostics

ODF-11222: You do not have sufficient privileges to update the tag with name "{0}".

Cause: User does not have sufficient privileges to update the diagnostic tag.

Action: Ensure that the user belongs to an appropriate role with the update tag privilege required for updating diagnostic tags.

Level: 1

Type: ERROR

Impact: Application Diagnostics

ODF-11223: You do not have sufficient privileges to delete the tag with name "{0}".

Cause: User does not have sufficient privileges to delete a tag.

Action: Ensure that the user belongs to an appropriate role with the delete tag privilege required for deleting diagnostic tags.

Level: 1

Type: ERROR

Impact: Application Diagnostics

ODF-11224: Could not obtain the security subject of the currently logged in user.
**Cause:** Diagnostics Engine was unable to get the security subject for the current user.
**Action:** Ensure that JPS is configured properly.
**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-11225:** Could not obtain the user name of the currently logged in user, could not find the user principal matching class "[0]".
**Cause:** Diagnostics Engine was unable to determine username for the current user.
**Action:** Ensure that JPS is configured properly.
**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-11226:** Could not obtain the user name and GUID of the currently logged in user.
**Cause:** Diagnostics Engine was unable to get the user name or the GUID of the current user.
**Action:** Ensure that JPS is configured properly. Check the underlying error trace in the server log file.
**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-11227:** Unable to obtain the module_id for the Diagnostics Logical Business Area (LBA).
**Cause:** An error occurred when querying the module_id for the Diagnostics LBA from the database.
**Action:** Ensure that the Diagnostics LBA seed data exists in the database and that the database is running. Also check for the underlying error trace in the server log file.
**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-11228:** Unable to obtain the menu_id for the FND menu with name "[0]".
**Cause:** An error occurred when querying the menu_id for a FND menu from the database.
**Action:** Ensure that the Diagnostics data security seed data exists in the database and that the database is running. Also check for the underlying error trace in the server log file.
**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics
ODF-11229: Unable to obtain the object_id for the FND object with name "[0]".
   Cause: An error occurred when querying the object_id for an FND Object from the database.
   Action: Ensure that the Diagnostics data security seed data exists in the database and that the database is running. Also check for the underlying error trace in the server log file.

   Level: 1
   Type: ERROR
   Impact: Application Diagnostics

ODF-11230: The execution of the PL/SQL procedure name validation method failed to return any values.
   Cause: TODO
   Action: TODO

   Level: 1
   Type: ERROR
   Impact: Application Diagnostics

ODF-11231: The execution of the PL/SQL procedure name validation method has failed.
   Cause: TODO
   Action: TODO

   Level: 1
   Type: ERROR
   Impact: Application Diagnostics

ODF-11233: Unable to create connection because one or more of the following properties are not specified: [0]
   Cause: One or more properties required for creating a database connection were not specified.
   Action: Specify the missing properties required for creating the database connection.

   Level: 1
   Type: ERROR
   Impact: Application Diagnostics

ODF-11234: Unable to load connection properties
   Cause: No properties were loaded from the properties file specified using the APPCONNFILE system property.
   Action: Ensure that the properties file specified using the APPCONNFILE system property exists and contains the required properties.

   Level: 1
   Type: ERROR
   Impact: Application Diagnostics

ODF-11235: System property "[0]" not specified.
**Cause:** A particular system property required for the Diagnostics Engine was not specified.

**Action:** Ensure that the system property referenced in the error message is specified using JVM arguments for the managed server or the command-line interface.

**Level:** 1

**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-11236: Unable to read APPCONNFILE: {0}**

**Cause:** Diagnostics engine was unable to read the file specified by the APPCONNFILE system property.

**Action:** Ensure that the properties file specified using the APPCONNFILE system property exists and has read permissions.

**Level:** 1

**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-11237: Unable to load properties from APPCONNFILE: {0}**

**Cause:** Configuration properties could not be loaded from the properties file specified using the APPCONNFILE system property.

**Action:** Ensure that the properties file specified using the APPCONNFILE system property exists, is readable, and contains the required properties.

**Level:** 1

**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-11238: The session was not attached due to an error during FND Session initialize: {0}**

**Cause:** An error occurred during initialization of the FND Session the database connection.

**Action:** Refer to the associated error message and the server log files for more information.

**Level:** 1

**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-11239: The session was not detached due to an error during FND Session detach: {0}**

**Cause:** An error occurred during detaching of the FND Session from the database connection.

**Action:** Refer to the associated error message and the server log files for more information.

**Level:** 1

**Type:** ERROR

**Impact:** Application Diagnostics
ODF-11240: Unable to lookup or obtain a connection from data source: [0]

**Cause:** This error generally occurs if the database does not exist or is not configured properly.

**Action:** Ensure that the datasource exists in the domain and is configured correctly.

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

ODF-11241: An error occurred while streaming contents from file [0] to incident [1] on server [2]: [3]

**Cause:** An error occurred while copying the contents of a file to an incident directory on a managed server.

**Action:** Refer to the associated error message and the server log files for more information.

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

ODF-11242: An error occurred while fetching value for profile option [0]: [1]

**Cause:** An error occurred while querying value of a profile option from the database.

**Action:** Refer to the associated error message and the server log files for more information.

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

ODF-11243: The profile option "[0]" is not set. Unable to compute report URL.

**Cause:** The Diagnostics Dashboard URL Profile Option is not set.

**Action:** Set the Diagnostics Dashboard URL Profile Option to point to your Diagnostics Dashboard Application URL.

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

ODF-11244: The value "[0]" for profile option "[1]" is invalid. Unable to compute report URL.

**Cause:** The Diagnostics Dashboard URL Profile Option is set to an invalid value.

**Action:** Set the Diagnostics Dashboard URL Profile Option to point to your Diagnostics Dashboard Application URL.

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

ODF-11245: Unable to evaluate value for expression: [0]
**Cause:** This generally occurs if the expression is invalid or if the system property specified in the expression is not set.

**Action:** Ensure that the expression is valid and the system property specified in the expression is set.

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

**ODF-11246: Null connection returned from ApplSessionUtil.**

**Cause:** ApplicationDB data source returned a null connection.

**Action:** Ensure that the ApplicationDB data source is configured properly.

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

**ODF-11247: Unable to access field: {0} in class: {1} with bundle name: {2}**

**Cause:** Unable to access the field with the given name from the given resource bundle class.

**Action:** Ensure that the field exists in the given resource bundle class.

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

**ODF-11251: Could not obtain the application roles for the currently logged in user.**

**Cause:** Diagnostics Engine was unable to determine the application roles for the current user.

**Action:** Ensure that JPS is configured properly.

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

**ODF-11252: An error occurred while attempting to retrieve the list of ADR Homes: {0}**

**Cause:** This can occur if the diagnostics engine is unable to establish connection with the underlying IncidentManagerProxy MXBean in the domain to retrieve the list of ADR Homes.

**Action:** Ensure that the AdminServer for the domain is up and running. Also check the associated error message and the server log file for further information.

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

**ODF-11253: You do not have sufficient privileges to execute this JMX API. Please ensure that the user ":0" is a member of one of the Fusion Applications Diagnostics Application ID enterprise roles.**
**Cause:** This can occur if the user attempting to invoke the JMX API is not a member of one of the required Diagnostics Application ID enterprise roles.

**Action:** Ensure that the user is a member of one or more of the Diagnostics Application ID enterprise roles.

**Level:** 1
**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-11254: You do not have sufficient privileges to delete the test with name "[0]".**

**Cause:** User does not have sufficient privileges to delete the definition of a diagnostic test.

**Action:** Ensure that the user belongs to an appropriate role with the delete test privilege required for deleting test definition.

**Level:** 1
**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-11600: An error occurred when setting save point [0]: {1}**

**Cause:** TODO

**Action:** TODO

**Level:** 1
**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-11601: An error occurred when saving definition for test [0]: {1}**

**Cause:** TODO

**Action:** TODO

**Level:** 1
**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-11602: An error occurred when saving inputset [0] : {1}**

**Cause:** TODO

**Action:** TODO

**Level:** 1
**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-11603: Invalid prerequisite entity for test '{0}'. A prerequisite for a test must have a test ID or a tag value ID.**

**Cause:** TODO

**ODF-12804: Test file not found: {0}**
- **Cause:** Test file not found in current file system or jar
- **Action:** Ensure test files exists in current file system or jar. Ensure test properties points to the correct jar for this system
- **Level:** 1
- **Type:** ERROR
- **Impact:** Application Diagnostics

**ODF-12805: Test file must be a xml file. Unsupported test file type: {0}**
- **Cause:** XML is the only supported file type for Tests in this release
- **Action:** Provide an XML file type for this test.
- **Level:** 1
- **Type:** ERROR
- **Impact:** Application Diagnostics

**ODF-12806: Found duplicate input parameter "{0}" in test "{1}".**
- **Cause:** Test metadata and/or input parameter has a duplicate definition
- **Action:** Correct test definition. Provide different input parameters that does not have a duplicate input parameter
- **Level:** 1
- **Type:** ERROR
- **Impact:** Application Diagnostics

**ODF-12807: Found duplicate output parameter "{0}" in test "{1}".**
- **Cause:** Test metadata and/or output parameter has a duplicate definition
- **Action:** Correct test definition. Provide a different output parameter that does not have a duplicate output parameter
- **Level:** 1
- **Type:** ERROR
Impact: Application Diagnostics

ODF-12808: Found duplicate step "{0}" in test "{1}".
   Cause: Test metadata has a duplicate step definition
   Action: Correct tests metadata so it doesn’t have a duplicate step definition. Remove one of the steps.

   Level: 1
   Type: ERROR
   Impact: Application Diagnostics

ODF-12809: Found duplicate step definition "{0}" in test "{1}".
   Cause: Test metadata has a duplicate step name in the definition
   Action: Correct tests metadata so it doesn’t have a duplicate step definition name. Remove one of the steps.

   Level: 1
   Type: ERROR
   Impact: Application Diagnostics

ODF-12810: Corresponding step definitions not found for the following steps in test "{0}": {1}
   Cause: Test step does not have a definition
   Action: Add a step definition in this Test

   Level: 1
   Type: ERROR
   Impact: Application Diagnostics

ODF-12811: Input parameter "{0}" in test "{1}" is required but does not have a default value.
   Cause: Required Input parameter in this test has not been provided with a default value
   Action: Provide a default Input value for this parameter in this test or remove required settings

   Level: 1
   Type: ERROR
   Impact: Application Diagnostics

ODF-12812: Default value "{0}" for parameter "{1}" in test "{2}" cannot be converted to specified type "{3}".
   Cause: The data type associated with the Default value for this parameter is not valid for type defined for the parameter
   Action: Changed the Default value or change the Type on the Parameter definition

   Level: 1
   Type: ERROR
   Impact: Application Diagnostics
ODF-12813: Value "[0]" for parameter "[1]" in test "[2]" cannot be converted to specified type "[3]".
Cause: The data type associated with the value for this parameter is not valid for type defined for the parameter
Action: Changed the value or change the Type on the Parameter definition
Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12814: Value "[0]" for parameter "[1]" in test "[2]" is of type "[3]" and cannot be converted to expected type "[4]".
Cause: The data type associated with the value for this parameter is not valid for type defined for the parameter
Action: Changed the value or change the Type on the Parameter definition
Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12815: Test "[0]" specifies default value for java.util.Date parameter "[1]" however the dateFormat attribute is not specified. Please specify a Java date format as value for the dateFormat attribute.
Cause: This parameter requires a date format and a non-date format was specified
Action: Provide an accepted date format. Check locale for date format.
Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12816: Default value "[0]" for parameter "[1]" in test "[2]" cannot be converted to specified type "[3]" using format "[4]".
Cause: This Default value requires a date format and a non-date format was specified
Action: Provide an accepted date format. Check locale for date format.
Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12817: Value "[0]" for parameter "[1]" in test "[2]" cannot be converted to specified type "[3]" using format "[4]".
Cause: This date value requires a date format and a non-date format was specified
Action: Provide an accepted date format. Check locale for date format.
Level: 1
Type: ERROR
Impact: Application Diagnostics
ODF-12818: The following prerequisite tests for test "[0]\" could not be located in the test repository: [1]
   Cause: The test definition requires a prerequisite test(s) to be run which could not be found
   Action: Ensure the test is located in the test repository or remove the prerequisite requirement from the test definition
   Level: 1
   Type: ERROR
   Impact: Application Diagnostics

ODF-12819: The following tag name values for test "[0]\" could not be located in the test repository: [1]
   Cause: The test specified has tag name value defined for it that don't exist in the test repository
   Action: Ensure the tag name value definitions exist in the repository by creating new ones or remove the tag name value from the specified test
   Level: 1
   Type: ERROR
   Impact: Application Diagnostics

ODF-12820: The following referenced tests in steps for test "[0]\" could not be located in the test repository: [1]
   Cause: The specified test has steps that reference tests not found in the test repository
   Action: Ensure the tests referred to in the steps are located in the test repository or remove the tests from the steps or remove the steps.
   Level: 1
   Type: ERROR
   Impact: Application Diagnostics

ODF-12821: The following prerequisite tag value IDs for test "[0]\" could not be located in the test repository: [1]
   Cause: The test definition requires prerequisite tag value IDs which could not be found
   Action: Ensure the tag value IDs are located in the test repository or remove the prerequisite requirement from the test definition
   Level: 1
   Type: ERROR
   Impact: Application Diagnostics

ODF-12822: The following tag value IDs for test "[0]\" could not be located in the test repository: [1]
   Cause: The test definition requires tag value IDs which could not be found
   Action: TODO
   Level: 1
   Type: ERROR
Impact: Application Diagnostics

ODF-12823: Invalid token "{0}" in binding for parameter "{1}" in step "{2}" in test "{3}". Must specify a parameter name.
  Cause: Missing a parameter name for the listed step in this test.
  Action: Provide the correct parameter name for this test step.
  Level: 1
  Type: ERROR

Impact: Application Diagnostics

ODF-12824: Invalid parameter reference in token "{0}" in binding for parameter "{1}" in step "{2}" in test "{3}". Referenced parameter is not defined.
  Cause: Parameter reference listed in not valid.
  Action: Check the test step listed for the correct parameter definition.
  Level: 1
  Type: ERROR

Impact: Application Diagnostics

ODF-12825: At least one of the following parameters must be specified for test registration: {0}
  Cause: This test requires parameters for it to be registered.
  Action: Check the test definition for the parameters that should be specified.
  Level: 1
  Type: ERROR

Impact: Application Diagnostics

ODF-12826: The specified directory does not exist: {0}
  Cause: The filesystem doesn't have the specified directory
  Action: Specify a valid directory from the current filesystem
  Level: 1
  Type: ERROR

Impact: Application Diagnostics

ODF-12827: The specified directory is not a directory: {0}
  Cause: The filesystem doesn't have the specified directory
  Action: Specify a valid directory from the current filesystem. Don't specify a filename in this case
  Level: 1
  Type: ERROR

Impact: Application Diagnostics

ODF-12828: The specified file does not exist: {0}
  Cause: The filesystem doesn't have the specified filename
  Action: Specify a valid filename from the current filesystem.

ODF-12853: The input parameters for test execution do not resolve to any registered test. Ensure at least one of the following parameters (in CLI or API) must be specified and not empty: {0}
**Cause:** This Test requires input parameters and none were found.
**Action:** Supply input parameters as defined by the Test definition and rerun the test.

**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-12854:** At least one of the following parameters must be specified: \{0\}
**Cause:** This test requires parameters that were not supplied with the tests
**Action:** Supply input parameters as defined by the Test definition and rerun the test.

**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-12856:** An unexpected error occurred during test execution.
**Cause:** TODO
**Action:** TODO

**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-12857:** Exactly one of the following parameters must be specified: \{0\}. Values for more than one parameters were specified: \{1\}.
**Cause:** The test was run with the incorrect number of parameters
**Action:** Rerun this test with exactly one parameters as specified by the test definition

**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-12858:** Invalid value \"\{0\}\" for parameter \"\{1\}\". Value must be one of the following: \{2\}
**Cause:** The test was run with invalid parameter values.
**Action:** Rerun this test with parameters values specified in the message

**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-12859:** Test run with ID \"\{0\}\" not found in the repository.
**Cause:** Test run ID not found or has been deleted.
**Action:** Use a test run ID found in the repository

**Level:** 1
**Type:** ERROR
Impact: Application Diagnostics

ODF-12860: Test run with name "\{0\}" not found in the repository.
Cause: Test run name does not exist in the repository or was deleted.
Action: No further action required
Level: 1
Type: ERROR

Impact: Application Diagnostics

ODF-12861: Test execution with ID "\{0\}" not found in the repository.
Cause: Test execution ID does not exist in the repository or was deleted.
Action: No further action required
Level: 1
Type: ERROR

Impact: Application Diagnostics

ODF-12862: Unable to create destination directory "\{0\}". Please ensure that appropriate permissions are set to create this directory or specify a different destination directory using the "destdir" parameter.
Cause: A destination directory exists in a filesystem where write or create permission is not available for the current owner
Action: Change the write and create privileges for the parent directory.
Level: 1
Type: ERROR

Impact: Application Diagnostics

ODF-12863: Unable to create a file under directory "\{0\}". Please ensure that appropriate permissions are set to create this directory or specify a different destination directory using the "destdir" parameter.
Cause: A file in a destination directory in the filesystem where write or create permission is not available for the current owner
Action: Change the write and create privileges for the parent directory.
Level: 1
Type: ERROR

Impact: Application Diagnostics

ODF-12864: "\{0\}" already exists and is not a directory. Please specify a different destination directory using the "destdir" parameter.
Cause: The name specified already exists as a directory.
Action: Use a different name for this directory or remove the existing directory
Level: 1
Type: ERROR

Impact: Application Diagnostics

ODF-12865: "\{0\}" already exists. Attempt to rename it failed.
Cause: The name specified already exists as a directory.
**Action:** Use a different name for this directory or remove the existing directory

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

**ODF-12866: Failed to create directory "[0]".**  
**Cause:** Directory already exists or parent directory has no write and create permissions  
**Action:** Remove the existing directory, change the permission on the parent directory or use a different directory name

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

**ODF-12867: Unable to perform translation. NLS Bundle is not specified.**  
**Cause:** Specify the correct NLS bundle name  
**Action:** Specify the correct NLS bundle name

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

**ODF-12868: No value specified for parameter "[0]"**  
**Cause:** This Parameter requires a value which was not specified  
**Action:** Provide a value for the specified parameter

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

**ODF-12869: Report not found for run ID "[0]"**  
**Cause:** Report was not generated because the Run had an error or the test didn’t complete  
**Action:** Check the report status and correct any errors. Rerun the test.

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

**ODF-12870: Report not found for run name "[0]"**  
**Cause:** Report was not generated because the Run had an error or the test didn’t complete  
**Action:** Check the report status and correct any errors. Rerun the test.

**Level:** 1  
**Type:** ERROR  
**Impact:** Application Diagnostics

**ODF-12871: Report not found for execution ID "[0]"**
Cause: Report was not generated because the Run had an error or the test didn’t complete
Action: Check the report status and correct any errors. Rerun the test.
Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12872: An input set with name "{0}" already exists for test "{1}"
Cause: The input set name already exists in the repository.
Action: Specify a different name for the input set
Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12873: Required parameter "{0}" does not have a value to run with.
Cause: Required must have values and the value is missing.
Action: Provide a value for the required parameter specified and rerun the test.
Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12874: Value "{0}" not in list of valid values for parameter "{1}".
Cause: This parameter is validated with an LOV that does not have the value specified.
Action: Provide a different value for the parameter specified.
Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12875: Validation error occurred for input value "{0}" for parameter "{1}": {2}
Cause: This parameter fails validation rules for the input value.
Action: Provide a different value for the parameter specified.
Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12885: Filter operator "{0}" is not supported for parameter "{1}"
Cause: TODO
Action: TODO
Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12886: Taxonomy module ID "{0}" not found.
**Cause:** A taxonomy module ID was provided that does not exist in the taxonomy definitions

**Action:** Provide a different taxonomy module ID

**Level:** 1

**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-12887: Null or empty tag name.**

**Cause:** A tag name is required in this context

**Action:** Provide a tag name.

**Level:** 1

**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-12888: Null or empty module ID**

**Cause:** A module ID is required in this context

**Action:** Require a module ID. Module IDs are found in Taxonomy tables

**Level:** 1

**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-12889: Tag with name "[0]" already exists.**

**Cause:** Duplicate tag names are not supported

**Action:** Provide a different tag name

**Level:** 1

**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-12890: Null or empty tag value.**

**Cause:** Tag values are required in this context

**Action:** Provide a tag value

**Level:** 1

**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-12891: Tag with name "[0]" does not exist.**

**Cause:** A tag name was provided that was not created or was deleted

**Action:** Create the tag name first or use a different tag name

**Level:** 1

**Type:** ERROR

**Impact:** Application Diagnostics

**ODF-12892: Tag with name "[0]" and value "[1]" already exists.**

**Cause:** A tag name was provided that was not created or was deleted
**Action:** Create the tag name first or use a different tag name

**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-12893: At least one criteria must be specified.**
**Cause:** Criteria are required in this context
**Action:** Supply criteria

**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-12894: Unable to delete Test Run(s). Cannot delete a test run [0] that is currently in progress.**
**Cause:** A test is still running and can’t be deleted
**Action:** Cancel the test run or wait for the test to complete before deleting it

**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-12895: Found one or more Runs with null Run ID.**
**Cause:** TODO
**Action:** TODO

**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-12896: Tag [0] with Value [1] does not exist.**
**Cause:** Tag value was deleted or never created for this tag name
**Action:** Create the tag value for this tag name or use a tag value that already exists

**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-12897: Cannot remove tag [0] created by Oracle.**
**Cause:** Oracle tags are seeded tags that can’t be deleted
**Action:** No further action required

**Level:** 1
**Type:** ERROR
**Impact:** Application Diagnostics

**ODF-12898: Cannot remove tag name value [0];[1] created by Oracle.**
**Cause:** Oracle tag values are seeded tag values that can’t be deleted
Action: No further action required

Impact: Application Diagnostics

ODF-12900: Unable to unregister Executor Mbean for Web Application {0}
Cause: TODO
Action: TODO
Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12901: Could not invoke test. Reasons could be because (a) The associated application {0} is not running (b) Credential Store and Permissions have not been set up correctly (c) The test is being invoked from outside the J2EE context.
Cause: See message for cause
Action: Setup and install credentials and permissions.
Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12902: Since "WEB_APP_NAME" tag is present, test must have attribute "requiresApplicationCode" set to "Y".
Cause: This test requires a specific application to run
Action: Set the requiresApplicationCode flag to Y or remove the WEB_APP_NAME tag
Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12903: Since "requiresApplicationCode" is set to "Y", test must have a tag for "WEB_APP_NAME".
Cause: This test requires a specific application to run
Action: Remove the requiresApplicationCode flag or supply the WEB_APP_NAME tag with the application name
Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12904: Could not connect to the Domain Runtime MBean Server. Reasons could be because (a) Credential Store and Permissions have not been set up correctly (b) The test is being invoked from outside the J2EE context.
Cause: See message for cause
Action: Setup and install credentials and permissions.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12905: Could not execute diagnostic test that requires application code.
Cause: This test requires code that exists in a specific application to run
Action: Ensure the specified application is also running when you run this test

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12906: Cannot invoke diagnostic test {0} from CLI since it requires application code. The Diagnostics UI can be used to run this type of test.
Cause: This test requires code that exists in a specific application to run
Action: Run this test from the Diagnostic Testing Dashboard. Ensure the specified application is also running when you run this test

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-12907: Cannot start the web application because neither display-name nor "fusion.odf.metadata.webappname" context-param was found in web.xml. The context-param(recommended) or display-name is necessary when Diagnostics Tests requiring applications code are present.
Cause: This test requires code that exists in a specific application to run
Action: Action is specified in the message

Level: 1

ODF-15206: Parameter "{0}" cannot be converted to an integer.
Cause: The parameter could not be converted.
Action: Make sure the value of the parameter is an integer.
Level: 1

Type: ERROR
Impact: Application Diagnostics

ODF-15207: Property "{0}" cannot be converted to a long.
Cause: The property could not be converted.
Action: Make sure the value of the property is a long (integer).
Level: 1

Type: ERROR
Impact: Application Diagnostics

ODF-15208: Parameter "{0}" cannot be converted to a long.
Cause: The parameter could not be converted.
Action: Make sure the value of the parameter is a long (integer).
Level: 1

Type: ERROR
Impact: Application Diagnostics
ODF-15209: Required credentials missing for target name "{0}", type "{1}".
Cause: The required credentials for the operation could not be found.
Action: Make sure the required credentials have been provided.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-15210: Unexpected credential column "{0}" for target name "{1}", type "{2}".
Cause: An unexpected credential column was found.
Action: Make sure the credentials provided conform to the expected format.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-15211: Required credential column "{0}" missing for target name "{1}", type "{2}".
Cause: The required credential column could not be found.
Action: Make sure the required credentials have been provided.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-15212: Unable to obtain connection to the Apps Database for corresponding EM target name "{0}", type "{1}".
Cause: Unable to obtain connection to the Apps Database.
Action: Check the connection information or try again.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-15213: The operation cannot complete because a valid EM Target was not provided.
Cause: A valid EM Target was not provided.
Action: Make sure the EM Target provided is valid.

Level: 1
Type: ERROR
Impact: Application Diagnostics

ODF-15214: The requested operation requires {0} EM Targets, {1} were provided.
Cause: An unexpected number of EM Targets were provided.
Action: Make sure the EM Targets provided are appropriate for the operation.

Level: 1
Type: ERROR
Impact: Application Diagnostics
ODF-15220: Cannot load resource bundle for {0} with locale {1}.
  Cause: The resource bundle could not be loaded.
  Action: Make sure the resource bundle exists for the required locale.

  Level: 1
  Type: ERROR
  Impact: Application Diagnostics

ODF-15221: Unexpected exception localizing bundle '{0}', key '{1}': {2}
  Cause: An entry in the bundle could not be localized.
  Action: Check the entry for the provided key as well as the exception details provided.

  Level: 1
  Type: ERROR
  Impact: Application Diagnostics

ODF-15222: Key '{0}' not found in bundle '{1}'
  Cause: The required entry was not found in the resource bundle.
  Action: Make sure the requested key exists in the resource bundle.

ODI-01200: Session start failure: the request is incorrectly formed.
  Cause: A malformed request was sent to the agent.
  Action: Verify the request format and parameters sent to the agent.
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01201: Session start failure on agent {0}: JDBC connection error occurs while connecting to the master repository.
  Cause: An incorrect connection was used for the master repository database, or repository database was down.
  Action: Verify the master repository connection information and the status of the master repository database.
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01202: Session start failure on agent {0}: data source for master repository does not contain a master repository.
  Cause: The master repository connection information pointed to a database schema that did not contain a master repository.
  Action: Verify the master repository connection information.
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01203: Session start failure on agent {0}: the master repository is in an invalid state.
  Cause: The master repository was in a state that did not allow connections. This is the case if an upgrade was being performed.
  Action: Verify the state of the master repository.
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01204: Session start failure on agent {0}: the master repository version {1} is not compatible with the agent version {2}.
  Cause: The master repository was upgraded but not this agent, or the agent was upgraded but not the master repository.
  Action: Upgrade the master repository version or the agent version.
  Level: 1
  Type: ERROR
  Impact: Other
ODI-01205: Session start failure on agent {0}: an authentication error occurred while connecting to the master repository.
   Cause: An incorrect ODI user or password was specified for this master repository.
   Action: Verify the ODI user and password used for connecting.
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01206: Session start failure on agent {0}: the agent is not defined in the topology for master repository.
   Cause: The session was not found in the master repository.
   Action: Verify that a session with this ID exists in the repository.
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01207: Session start failure on agent {0}: JDBC connection error occurs while connecting to the work repository {1}.
   Cause: An incorrect connection was used for the work repository database, or repository database was down.
   Action: Verify the work repository connection information and the status of the work repository database.
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01208: Session start failure on agent {0}: database schema {1} does not contain a work repository.
   Cause: The work repository connection information pointed to a database schema that did not contain a work repository.
   Action: Verify the work repository connection information.
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01209: Session start failure on agent {0}: work repository {1} is in an invalid state.
   Cause: The work repository was in a state that did not allow connections. This is the case if an upgrade was being performed.
   Action: Verify the state of the work repository.
   Level: 1
   Type: ERROR
   Impact: Other
ODI-01210: Session start failure on agent {0}: work repository {1} version {2} is not compatible with the agent version {3}.
Cause: The work repository was upgraded but not this agent, or the agent was upgraded but not the work repository.
Action: Upgrade the work repository version or the agent version.

Level: 1
Type: ERROR
Impact: Other

ODI-01211: Session start failure on agent {0}: work repository {1} is not bound to the master repository.
Cause: The work repository specified in the request was not found in the list of work repositories attached to this master.
Action: Verify that work repository name matches an existing one.

Level: 1
Type: ERROR
Impact: Other

ODI-01212: Session preparation failure: scenario {0} does not exist in work repository {1}.
Cause: The session request was received, but the agent was unable to find the named scenario in the work repository.
Action: Verify that the scenario name matches an existing scenario name in the work repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01213: Session preparation failure: scenario {0} version {1} does not exist in work repository {2}.
Cause: The session request was received, and the scenario existed in the work repository, but not with the specified version.
Action: Ensure that the scenario version matches an existing scenario version in the work repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01214: Session preparation failure: context {0} does not exist in the master repository.
Cause: The session request was received, but the agent was unable to find the context in the master repository.
Action: Ensure that the context matches an existing context code in the Topology.

Level: 1
Type: ERROR
Impact: Other
ODI-01215: Session preparation failure: privileges are insufficient to run scenario {0}.{1} in repository {2}.
  Cause: User privileges were not sufficient for running this scenario in this repository.
  Action: Ensure that the user has sufficient privileges for this task.

  Level: 1
  Type: ERROR
  Impact: Other

ODI-01216: Session preparation failure: insufficient privileges to use Context {0} ({1}).
  Cause: User privileges were not sufficient for using this context.
  Action: Ensure that the user has sufficient privileges for this task.

  Level: 1
  Type: ERROR
  Impact: Other

ODI-01217: Session {0} ({1}) fails with return code {2}.
  Cause: The session finished in an error state.
  Action: Review the session execution details in the Operator Navigator or Repository Explorer.

  Level: 1
  Type: ERROR
  Impact: Other

ODI-01218: Session preparation failure: database error occurs while connecting to the master repository.
  Cause: The agent received a database error from the master repository while creating the session.
  Action: Verify the state of the master repository database.

  Level: 1
  Type: ERROR
  Impact: Other

ODI-01219: Session preparation failure: database error while connecting to work repository {0}.
  Cause: The agent received a database error from the work repository while creating the session.
  Action: Verify the state of the work repository database.

  Level: 1
  Type: ERROR
  Impact: Other

ODI-01220: Session preparation failure: an unexpected exception occurred.
  Cause: The remote agent faced an unexpected error while attempting to create the session.

  Level: 1
  Type: ERROR
  Impact: Other
**Action:** Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode).

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01221:** Unable to restart session \(0\): session is not found in work repository \(1\).

**Cause:** The session to restart did not exist in the repository. This session may have been deleted, or an incorrect session ID or work repository was supplied.

**Action:** Verify that a session with this ID exists in the repository.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01222:** Session start failure on agent \(0\): logical schema \(1\) cannot be found in the master repository.

**Cause:** The object to be executed referred to a logical schema not present in the master repository.

**Action:** Ensure that the logical schema configuration exists in your master repository.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01223:** Database error while connecting to the master repository.

**Cause:** The connection for the master repository database was incorrect, or the repository database was down.

**Action:** Verify the master repository connection information and the status of the master repository database.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01224:** Database error while connecting to work repository \(0\)

**Cause:** The connection for the work repository database was incorrect, or the repository database was down.

**Action:** Verify the work repository connection information and the status of the master repository database.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01225:** An unexpected exception occurred.

**Cause:** The agent faced an unexpected exception.
Action: Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode).

Level: 1
Type: ERROR
Impact: Other

ODI-01226: Step {0} fails after {1} attempt(s).
  Cause: This is an execution warning. The session step failed to execute after the maximum number of retries. If step failure was not handled in the package design, the session finished in an error state.
  Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01227: Task {0} ({1}) fails on the source {2} connection {3}.
  Cause: This is an execution warning. The command on the source for this task finished with an error.
  Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01228: Task {0} ({1}) fails on the target {2} connection {3}.
  Cause: This is an execution warning. The command on the target for this task finished with an error.
  Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01229: An error occurred while performing a {0} operation on model code {1}.
  Cause: This is an execution warning. The operation specified failed on the model.
  Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01231: An error occurred while performing a {0} operation on datastore {1}.
  Cause: This is an execution warning. The operation specified failed on the datastore.
**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**ODI-01232: Procedure \{0\} execution fails.**  
**Cause:** This is an execution warning. The procedure execution failed.  
**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**ODI-01233: Error while evaluating variable the following expression: \{0\} \{1\} \{2\}**  
**Cause:** This is an execution warning. The variable evaluation failed.  
**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**ODI-01235: Error while incrementing variable \{0\} to value \{1\}**  
**Cause:** This is an execution warning. The variable increment failed.  
**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**ODI-01236: Error while refreshing variable \{0\}.**  
**Cause:** This is an execution warning. The variable refresh failed.  
**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**ODI-01237: Error while setting variable \{0\} to value \{1\}.**  
**Cause:** This is an execution warning. The set variable operation failed.  
**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** WARNING
Impact: Other

ODI-01238: Flow {0} fails because the maximum number of allowed errors ({1} rows) is exceeded during the flow check. This flow loads target table {2}.

Cause: This is an execution warning. The interface failed because the number of errors detected in the flow exceeded the value defined in the interface.

Action: Review the session execution details in the Operator Navigator or Repository Explorer. Review the erroneous records for this interface in the error table.

Level: 1
Type: WARNING

Impact: Other

ODI-01239: Flow {0} fails because the maximum percentage of allowed errors ({1} %) is exceeded during the flow check. This flow loads target table {2}.

Cause: This is an execution warning. The interface failed because the percentage of errors detected in the flow exceeded the value defined in the interface.

Action: Review the session execution details in the Operator Navigator or Repository Explorer. Review the erroneous records for this interface in the error table.

Level: 1
Type: WARNING

Impact: Other

ODI-01240: Flow {0} fails while performing a {1} operation. This flow loads target table {2}.

Cause: This is an execution warning. The interface failed because one of the statements returned an error return code.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING

Impact: Other

ODI-01241: Oracle Data Integrator tool execution fails.

Cause: This is an execution warning. The tool execution failed.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING

Impact: Other

ODI-01242: Operating system command execution fails.

Cause: This is an execution warning. Execution of the operating system command failed.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: WARNING
Impact: Other

ODI-01243: Session \{0\} \((1)\) fails because work repository \{2\} went down.
Cause: Work repository database went down while session was being executed.
Action: Verify the state of the work repository database. The session must be restarted.

Level: 1
Type: ERROR
Impact: Other

ODI-01244: Session \{0\} \{1\} was prepared successfully but fails because work repository \{2\} went down before execution could begin.
Cause: Work repository database went down while session was starting its execution.
Action: Verify the state of the work repository database. The session must be restarted.

Level: 1
Type: ERROR
Impact: Other

ODI-01245: Session preparation failure: work repository \{0\} went down during session preparation.
Cause: Work repository went down while session was being prepared.
Action: Verify the state of the work repository database. The session must be restarted.

Level: 1
Type: ERROR
Impact: Other

ODI-01246: The Logical Schema has not been set for \{0\}.
Cause: Because the logical schema had not been set, the object could not be executed.
Action: Verify the object that you are trying to execute, and set the logical schema for this object.

Level: 1
Type: ERROR
Impact: Other

ODI-01247: Session \{0\} \{1\} was prepared successfully but fails because master repository went down before execution could begin.
Cause: Master repository database went down while session was starting its execution.
Action: Verify the state of the master repository database. The session must be restarted.
Level: 1
Type: ERROR
Impact: Other

ODI-01248: Session preparation failure by Agent {0}: master repository went down during session preparation.
Cause: Master repository went down while session was being prepared.
Action: Verify the state of the master repository database. The session must be restarted.

Level: 1
Type: ERROR
Impact: Other

ODI-01249: Session {0} ({1}) fails because master repository went down.
Cause: Master repository database went down while session was being executed.
Action: Verify the state of the master repository database. The session must be restarted.

Level: 1
Type: ERROR
Impact: Other

ODI-01250: Session {0} ({1}) could not be stopped by Agent {2} because session {0} {1} already completed execution.
Cause: The session has already completed and cannot be stopped.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01251: Session (0) could not be stopped by Agent {1} because session (0) was not found in work repository {2}.
Cause: The session was not found in the work repository.
Action: Verify that a session with this ID exists in the repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01252: Session (0) could not be stopped by Agent {1}: insufficient privileges to access session.
Cause: User privileges were not sufficient for accessing this session in this agent.
Action: Ensure that the user has sufficient privileges for this task.

Level: 1
Type: ERROR
Impact: Other
ODI-01253: Session \{0\} (\{1\}) could not be stopped by Agent \{2\}: an unknown error occurred.

Cause: An unexpected Exception occurred.

Action: Verify your Agent configuration and make sure other operations on Agent are working correctly.

Level: 1
Type: ERROR
Impact: Other

ODI-01254: Session \{0\} (\{1\}) could not be stopped by Agent \{2\}: a JDBC error occurred on work repository \{3\}.

Cause: The agent had incorrect connection for the work repository database, or repository database was down.

Action: Verify the work repository connection information and the status of the work repository database.

Level: 1
Type: ERROR
Impact: Other

ODI-01255: Session \{0\} (\{1\}) could not be stopped by Agent \{2\}: insufficient privileges to stop the session.

Cause: User privileges were not sufficient for stopping this session in this agent.

Action: Ensure that the user has sufficient privileges for this task.

Level: 1
Type: ERROR
Impact: Other

ODI-01256: Session \{0\} (\{1\}) stopped (Normal) by user \{2\}.

Cause: Session was stopped by the user.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01257: Session \{0\} (\{1\}) stopped (Immediate) by user \{2\}.

Cause: Session was stopped by the user.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01258: Session \{0\} (\{1\}) stopped (Abort) by user \{2\}.

Cause: Session was aborted by the user.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01259: Session Task \{0\} (\{1\}) stopped (Normal) by user \{2\}.
Cause: Task was stopped by the user.
Action: Review the task execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01260: Session Task \{0\} (\{1\}) stopped (Immediate) by user \{2\}.
Cause: Task was stopped by the user.
Action: Review the task execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01261: Session Task \{0\} (\{1\}) stopped (Abort) by user \{2\}.
Cause: Task was aborted by the user.
Action: Review the task execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01262: Session \{0\} (\{1\}) could not be stopped by Agent \{2\}: a JDBC error occurred on master repository.
Cause: The agent had incorrect connection for the master repository database, or repository database was down.
Action: Verify the master repository connection information and the status of the master repository database.

Level: 1
Type: ERROR
Impact: Other

ODI-01263: Step \{0\} stopped (Normal) by user \{1\}.
Cause: Step was stopped by the user.
Action: Review the step execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01264: Step {0} stopped (Immediate) by user {1}.
   Cause: Step was stopped by the user.
   Action: Review the step execution details in the Operator Navigator or Repository Explorer.
   Level: 1
Type: ERROR
Impact: Other

ODI-01265: Step {0} stopped (Abort) by user {1}.
   Cause: Step was aborted by the user.
   Action: Review the step execution details in the Operator Navigator or Repository Explorer.
   Level: 1
Type: ERROR
Impact: Other

ODI-01266: Agent {0} detected Session as stale session and set to error status.
   Cause: The agent detected a stale session and the session status was set to error status.
   Action: Review the session execution details in the Operator Navigator or Repository Explorer.
   Level: 1
Type: ERROR
Impact: Other

ODI-01267: Session ({0}) could not be stopped by Agent {1} because stop type {2} provided in the request is an invalid stop type.
   Cause: The agent attempted to stop a session with an invalid stop type.
   Action: Review the session execution details in the Operator Navigator or Repository Explorer.
   Level: 1
Type: ERROR
Impact: Other

ODI-01268: Agent {0} does not support stopping asynchronous child sessions.
   Cause: The agent attempted to stop an asynchronous child session and this is not supported.
   Action: Review the session execution details in the Operator Navigator or Repository Explorer.
   Level: 1
Type: ERROR
Impact: Other
ODI-01269: Session [0] ([1]) could not be stopped by Agent [2]: session is being run by another Agent with the same name.
Cause: The agent attempted to stop a session that is being run by a different agent.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: ERROR
Impact: Other

ODI-01270: Session [0] ([1]) could not be stopped by Agent [2]: session [0] ([1]) is being run by [3] Agent which is not a listener Agent.
Cause: The agent attempted to stop a session that is being run by the internal agent and this is not supported.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: ERROR
Impact: Other

ODI-01271: The asynchronous jndi name cannot be null for asynchronous jobs. The ESS job status cannot be updated.
Cause: The agent attempted to set the status of the asynchronous ESS job and its jndi name was not set.
Action: Review the jndi name supplied to the Enterprise Scheduler job.
Level: 1
Type: WARNING
Impact: Other

ODI-01272: The Logical Schema has not been set on [0] for [1].
Cause: The logical schema for this object has not been set.
Action: Verify that the logical schema has been set in the Topology.
Level: 1
Type: ERROR
Impact: Other

ODI-01273: The selected technology [0] is not supported on source for [1].
Cause: The selected technology is not supported for this object.
Action: Verify that the object has a valid technology.
Level: 1
Type: ERROR
Impact: Other

ODI-01274: Agent Exception
Cause: An error was detected by the agent when performing an operation.
Action: Review the underlying exception for more details.
Level: 1
Type: ERROR
Impact: Other

ODI-01275: An error occurred while performing a {0} operation on submodel step {1} of the model code {2}.
Cause: This is an execution warning. The operation specified failed on the submodel operation.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01276: An error occurred while executing the OnConnect command on JDBC connection created for data server {0} with transaction label {1}.
Cause: An error was occurred while executing the OnConnect command on the JDBC connection created to the data server.
Action: Review the underlying exception and update the OnConnect command definition configured for the data server.

Level: 1
Type: ERROR
Impact: Other

ODI-01277: An error occurred while executing the OnDisconnect command on JDBC connection created for data server {0} with transaction label {1}.
Cause: An error was occurred while executing the OnDisconnect command on the JDBC connection created to the data server.
Action: Review the underlying exception and update the OnDisconnect command definition configured for the data server.

Level: 1
Type: ERROR
Impact: Other

ODI-01278: Load plan instance {0}, run {1} does not exist in work repository {2}.
Cause: The Load Plan Instance run does not exist in the repository. This Load Plan Instance run may have been deleted, or an incorrect instance ID/run number or work repository was supplied.
Action: Verify that a load plan instance run with this instance ID and run number exists in the repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01279: The Source Logical Schema {0} and Context {1} of the task {2} are not mapped to any Physical Schema.
Cause: The Logical Schema to Physical Schema Mapping is not defined for the Context used.
Action: For the Context used define the Logical Schema to Physical Schema Mapping in the Topology.
Level: 1
Type: ERROR
Impact: Other

ODI-01280: The Target Logical Schema {0} and Context {1} of the task {2} are not mapped to any Physical Schema.
Cause: The Logical Schema to Physical Schema Mapping is not defined for the Context used.
Action: For the Context used define the Logical Schema to Physical Schema Mapping in the Topology.
Level: 1
Type: ERROR
Impact: Other

ODI-01281: Source Technology {0} of task {1} is not of JDBC Type. When both Source and Target commands are specified, the Source Technology should be of JDBC type.
Cause: When Source and Target commands are specified, the Source Technology should always be of JDBC type.
Action: Make Sure that you modify your Procedure or KM to either use a JDBC Source Technology or edit your step to use only the Target command.
Level: 1
Type: ERROR
Impact: Other

ODI-01282: Invalid log level {0} is specified. A valid log level value is between {1} and {2}.
Cause: Invalid log level specified for scenario/session invocation or for session restart.
Action: Please specify a valid log level.
Level: 1
Type: ERROR
Impact: Other

ODI-01283: Owb preparation failure: Owb object {0} of type {1} in location {2} does not exist in Owb repository {3}.
Cause: The session request was received, but the agent was unable to find the named Owb object in the Owb repository.
Action: Verify that the Owb object name matches an existing Owb object in the location in the Owb repository.
Level: 1
Type: ERROR
Impact: Other

ODI-01284: Session {0} ({1}) with Owb audit Id {2} fails.
  Cause: The session finished in an error state.
  Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01285: Session {0} ({1}) Retrieval of audit for auditId {2} failed in the {3} phase {4}. Please use OWB Design Client or Browser for further information.
  Cause: An error was raised during the retrieval of the Owb audit data.
  Action: Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

Level: 1
Type: ERROR
Impact: Other

ODI-01286: Session {0} ({1}) could not find Owb job for this session.
  Cause: The session being aborted is not an Owb Job.
  Action: Review the session being aborted in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01287: Session {0} ({1}) with Owb audit Id {2} is in an invalid state to be aborted.
  Cause: The session being aborted is not in a state that can be aborted.
  Action: Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

Level: 1
Type: ERROR
Impact: Other

ODI-01288: Session {0} ({1}) with Owb audit Id {2} abort fails.
  Cause: The session abort finished in an error state.
  Action: Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

Level: 1
Type: ERROR
Impact: Other
ODI-01289: Agent [0] detected Session as stale session and set to error status. Please use OWB Design Client or Browser for further information.

Cause: The agent detected a stale OWB session and the session status was set to error status.

Action: Review the session execution details in the OWB Design Client or Browser.

Level: 1
Type: ERROR
Impact: Other

Cause: An error was raised during the loading of the Owb audit data.

Action: Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

Level: 1
Type: ERROR
Impact: Other

ODI-01291: Workspace [0] cannot be resolved to a physical workspace using context [1].

Cause: The context does not contain a mapping for the logical workspace.

Action: Review the mappings defined in the context.

Level: 1
Type: ERROR
Impact: Other

ODI-01292: An execution context cannot be determined for this job.

Cause: An execution context cannot be determined for this job.

Action: Use the Context to provide an explicit context for this execution.

Level: 1
Type: ERROR
Impact: Other

ODI-01293: Exception occurred during spawning of ECID to child session.

Cause: Spawning of ECID from parent session to child session failed.

Action: Review the exception raised to get more detail.

Level: 1
Type: WARNING
Impact: Other

ODI-01294: Unwrapping of a wrapped ECID [0] failed.

Cause: Unwrapping of ECID failed.

Action: Review the exception raised and the format of wrapped ECID to get more detail on unwrap failure.
Level: 1
Type: WARNING
Impact: Other

ODI-01295: Cleanup of Session {0} ({1}) raised the following {2} messages: {3}
  Cause: Messages were raised during the Cleanup phase.
  Action: Review the messages raised during the Cleanup and you may need to perform some manual cleanup.

Level: 1
Type: WARNING
Impact: Other

ODI-01296: The Cleanup Tool encountered the following {0} nested errors when executing the Cleanup tasks: {1}
  Cause: Messages were raised during the Cleanup tool execution.
  Action: Review the messages raised during the Cleanup and you may need to perform some manual cleanup.

Level: 1
Type: ERROR
Impact: Other

ODI-01297: Parallel task "[0]" failed; [1] child task(s) in error; Failed child tasks: {2}
  Cause: null
  Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01298: Serial task "[0]" failed because child task "[1]" is in error.
  Cause: null
  Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01299: A task "[0]" from one of the parallel branches has failed. Hence aborting the current branch
  Cause: null
  Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01300: ASYNC_JNDI_NAME cannot be null for async job.
  Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01301: Unable to submit Job Definition: {0}
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01302: Logical Agent {0} must be mapped to a Physical Agent in the ContextCode {1}
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01303: RuntimeSessionfactory must not be null.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01304: Unable to find request for ID {0}
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01305: jobDefinitionId must not be null
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01306: scheduleDefinitionId must not be null
Cause:
Action:
ODI-01307: ContextCode is null, cannot lookup physical agent
Caused by:
Action:

ODI-01308: SchedulingService object was created without an EntityManager, cannot lookup physical agent
Caused by:
Action:

ODI-01309: Unable to find logical agent : {0}.
Caused by:
Action:

ODI-01310: Unable to find context : {0}.
Caused by:
Action:

ODI-01311: JobDefinition with name {0} already exists.
Caused by: JobDefinition already exists.
Action: Check JobDefinition name.

ODI-01312: Schedule with name {0} already exists.
Caused by: Schedule already exists.
Action: Check Schedule name.
Type: ERROR
Impact: Other

ODI-01313: Unable to find job definition for ID {0}.
  Cause: Wrong ID.
  Action: Check ID.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-01314: Unable to find job definition with name {0}.
  Cause: Wrong name.
  Action: Check name.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-01315: Unable to update job definition.
  Cause: Exception during updating.
  Action: Check cause exception details.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-01316: Unable to remove job request.
  Cause: Exception was thrown.
  Action: Check cause exception details.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-01317: Unable to find scheduler definition with name {0}.
  Cause: Wrong name.
  Action: Check name.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-01318: jobDefinition is required to have a not null ID.
  Cause: Metadata Object ID is null.
  Action: Check job definition.

  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-01350: Credential map key "{0}" not found in credential map "{1}".
  
  Cause:
  
  Action:
  
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-01351: An unexpected error was thrown during execution of the scenario "{0} - {1}".
  
  Cause:
  
  Action:
  
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-01352: An unexpected error was thrown during job execution.
  
  Cause:
  
  Action:
  
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-01353: RequestId={0} Scenario={1} : Agent URL must be specified. The Job Definition must include the LocalAgent or the job submission must include a physical agent url (2) parameter.
  
  Cause:
  
  Action:
  
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-01354: Load plan must be asynchronous.
  
  Cause:
  
  Action:
  
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-01355: username "{0}" from credential map "{1}" does not match currentSubjectName "{2}".
  
  Cause:
  
  Action:
  
  Level: 32
  Type: SET_AT_RUNTIME
Impact: Other

ODI-01356: Credential map key parameter "{0}" not found.
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-01357: Error resolving ADF connection for connectionId="{0}".
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-01400: Agent {0} start failure: JDBC connection error occurs while connecting to the master repository.
  Cause: The master repository information was incorrect, or the repository database was down.
  Action: Verify the master repository connection information and the status of the master repository database.
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01401: Agent {0} start failure: data source for master repository did not contain a master repository.
  Cause: The master repository connection information pointed to a database schema that did not contain a master repository.
  Action: Verify the master repository connection information.
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01402: Agent {0} start failure: the master repository is in an invalid state.
  Cause: The master repository was in a state that did not allow connections. This is the case when an upgrade is being performed.
  Action: Verify the state of the master repository.
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01403: Agent {0} start failure: the master repository version {1} is not compatible with the agent version {2}. 
Cause: The master repository was upgraded but not this agent, or the agent was upgraded but not the master repository.
Action: Upgrade the master repository version or the agent version.
Level: 1
Type: ERROR
Impact: Other

ODI-01404: Agent {0} start failure: an authentication error occurred while connecting to the master repository.
Cause: An incorrect ODI user or password was specified for this master repository.
Action: Verify the ODI user and password used for connecting.
Level: 1
Type: ERROR
Impact: Other

ODI-01405: Agent {0} start failure: the agent is not defined in the topology for master repository.
Cause: This agent was not declared in the topology.
Action: Add this physical agent in the list of agents in the ODI topology.
Level: 1
Type: ERROR
Impact: Other

ODI-01406: Agent {0} started with warning: JDBC connection error occurs while connecting to the work repository {1}.
Cause: The work repository information was incorrect, or the repository database was down.
Action: Verify the work repository connection information and the status of the work repository database.
Level: 1
Type: ERROR
Impact: Other

ODI-01407: Agent {0} started with warning: connection details of {1} do not contain a work repository.
Cause: The work repository connection information pointed to a database schema that did not contain a work repository.
Action: Review the work repository connection information and revise it as necessary.
Level: 1
Type: ERROR
Impact: Other

ODI-01408: Agent {0} started with warning: work repository {1} is in an invalid state.
Cause: The work repository was in a state that did not allow connections. This is the case when an upgrade is being performed.

Action: Verify the state of the work repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01409: Agent [0] started with warning: work repository [1] version [2] is not compatible with the agent version [3].

Cause: The work repository was upgraded but not this agent, or the agent was upgraded but not the work repository.

Action: Upgrade the work repository version or the agent version.

Level: 1
Type: ERROR
Impact: Other

ODI-01410: Agent [0] started with warning: work repository [1] is not bound to the master repository.

Cause: The work repository specified in the request was not found in the list of work repositories attached to this master.

Action: Ensure that work repository name matches an existing one.

Level: 1
Type: ERROR
Impact: Other

ODI-01411: Agent [0] started with warning: a database error occurs while cleansing stale sessions.

Cause: The agent encountered a database error while attempting to close stale sessions.

Action: Review the status of the sessions for this agent, and manually remove the stale sessions.

Level: 1
Type: ERROR
Impact: Other

ODI-01412: Agent [0] started with warning: an unexpected error occurs while cleaning stale sessions.

Cause: The agent encountered an unexpected error while attempting to close stale sessions.

Action: Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode). Verify the status of the sessions for this agent, and manually remove the stale sessions.

Level: 1
Type: ERROR
Impact: Other
ODI-01413: Request is incorrectly formed.
   Cause: A malformed request was sent to the agent.
   Action: Review the request format and parameters sent to the agent.

   Level: 1
   Type: ERROR
   Impact: Other

ODI-01414: Error connecting to agent {0}: a JDBC error occurs while connecting to the master repository.
   Cause: The remote agent had incorrect connection for the master repository database, or repository database was down.
   Action: Verify the master repository connection information and the status of the master repository database.

   Level: 1
   Type: ERROR
   Impact: Other

ODI-01415: Error connecting to agent {0}: data source for master repository did not contain a master repository.
   Cause: The master repository connection information for the remote agent pointed to a database schema that did not contain a master repository.
   Action: Review the master repository connection information and revise it as necessary.

   Level: 1
   Type: ERROR
   Impact: Other

ODI-01416: Error connecting to agent {0}: the master repository is in an invalid state.
   Cause: The master repository was in a state that did not allow connections from the remote agent. This is the case when an upgrade is being performed.
   Action: Verify the state of the master repository.

   Level: 1
   Type: ERROR
   Impact: Other

ODI-01417: Error connecting to agent {0}: the master repository version {1} is not compatible with the agent version {2}.
   Cause: The master repository was upgraded but not the remote agent, or the remote agent was upgraded but not the master repository.
   Action: Upgrade the master repository version or the agent version.

   Level: 1
   Type: ERROR
   Impact: Other

ODI-01418: Error connecting to agent {0}: an authentication error occurs while connecting to the master repository.
**Cause:** An incorrect ODI user or password was specified for this master repository.

**Action:** Verify the ODI user and password used for connecting.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**ODI-01419:** Warning connecting to Agent {0}: JDBC connection error occurs while connecting to the work repository {1}.

**Cause:** The remote agent had incorrect connection for the work repository database, or the repository database was down.

**Action:** Verify the work repository connection information and the status of the work repository database.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**ODI-01420:** Warning connecting to Agent {0}: connection details of {1} do not contain a work repository.

**Cause:** The work repository connection information for the remote agent pointed to a database schema that did not contain a work repository.

**Action:** Verify the work repository connection information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**ODI-01421:** Warning connecting to Agent {0}: work repository {1} is in an invalid state.

**Cause:** The work repository was in a state that did not allow connections from the remote agent. This is the case when an upgrade is being performed.

**Action:** Verify the state of the work repository.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**ODI-01422:** Warning connecting to Agent {0}: work repository {1} version {2} is not compatible with the agent version {3}.

**Cause:** The work repository was upgraded but not the remote agent, or the remote agent was upgraded but not the work repository.

**Action:** Upgrade the work repository version or the agent version.

**Level:** 1

**Type:** ERROR

**Impact:** Other

**ODI-01423:** Warning connecting to Agent {0}: work repository {1} is not bound to the master repository.
Cause: The work repository specified in the request was not found in the list of work repositories attached to the master.
Action: Verify that work repository name matches an existing one.

Level: 1
Type: ERROR
Impact: Other

ODI-01424: Agent host or port cannot be reached using \{0\}.
Cause: Incorrect host or port information was provided, or the agent was not started on the remote host.
Action: Correct the host or port information or start the agent.

Level: 1
Type: ERROR
Impact: Other

ODI-01425: Agent application cannot be reached using \{0\}.
Cause: An incorrect application name was provided for this agent, or the agent application was not started on the host.
Action: Correct the application name used in the URL or verify the agent status.

Level: 1
Type: ERROR
Impact: Other

ODI-01426: Agent \{0\} is not defined in the topology for the master repository.
Cause: This agent was not declared in the topology.
Action: Add this physical agent to the list of agents in the ODI topology.

Level: 1
Type: ERROR
Impact: Other

ODI-01427: invalid parameters
Cause: Invalid parameters were supplied in the request.
Action: Check the parameters that were supplied as part of the request. Ensure that parameter names and cases are correct.

Level: 1
Type: WARNING
Impact: Other

ODI-01428: internal error
Cause: An agent internal error occurred.
Action: Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode).

Level: 1
Type: FATAL
Impact: Other

ODI-01429: The user [0] is not authorized to perform request [1] on Agent [2].
   Cause: The user had insufficient privileges for performing this request against the remote agent.
   Action: Amend the user privileges.

Level: 1
Type: ERROR
Impact: Other

ODI-01430: Agent [0] cannot clean the stale sessions in work repository [1] due to a database error.
   Cause: The remote agent faced a database error while attempting to close stale sessions.
   Action: Examine the status of the sessions for this agent, and manually remove the stale sessions.

Level: 1
Type: ERROR
Impact: Other

ODI-01431: Agent [0] cannot clean the stale sessions in work repository [1] because the work repository [1] is still down.
   Cause: The remote agent was not able to connect to the work repository while attempting to close stale sessions.
   Action: Determine the status of the repository. Once this repository is running, manually remove the stale sessions.

Level: 1
Type: ERROR
Impact: Other

ODI-01432: Agent [0] cannot clean the stale sessions in work repository [1] due to an unexpected error.
   Cause: The remote agent faced an unexpected error while attempting to close stale sessions.
   Action: Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode). Determine the status of the sessions for this agent, and manually remove the stale sessions.

Level: 1
Type: ERROR
Impact: Other

ODI-01433: The Internal agent does not support cleaning stale sessions from multiple work repositories.
   Cause: Empty string value was passed for the work repository name in the Clean Stale Sessions request sent to the Internal Agent.
Action: Specify a non-empty valid work repository name in the Clean Stale Sessions request sent to the Internal Agent. If you want to clean the stale sessions across the work repositories, perform this operation on a Remote physical Agent.

Level: 1
Type: ERROR
Impact: Other

ODI-01434: Agent {0} start failure: error while trying to use JMX Port {1}.
Cause: JMX Registry was unable to use the given port.
Action: Specify a different port by using the command-line parameter JMXPORT.

Level: 1
Type: ERROR
Impact: Other

ODI-01435: Storage space for the IDs of some object types is low in Repository {0}.
When no storage space is available, it will not be possible to create objects of these types. Consider creating a new repository for the following object types (Object Type: Number Remaining) {1}.
Cause: Storage space was low for some IDs in this repository.
Action: Consider creating a new repository.

Level: 1
Type: WARNING
Impact: Other

ODI-01436: Error retrieving ID statistics for repository {0}.
Cause: The ID statistics for this repository could not be verified.
Action: Verify the statistics for this repository manually.

Level: 1
Type: WARNING
Impact: Other

ODI-01437: Error retrieving information from the credential store map.
Cause: Could not retrieve information from the credential store map.
Action: Verify that the credentials have been entered correctly into the credential store map.

Level: 1
Type: ERROR
Impact: Other

ODI-01438: Agent {0} cannot be stopped by user {1}: a JDBC error occurred on master repository {2}.
Cause: Some SQL Exception occurred on the Master Repository.
Action: Verify that other operations on the Agent are working correctly.

Level: 1
Type: ERROR
Impact: Other

ODI-01439: Agent {0} cannot be stopped by user {1}: a JDBC error occurred on work repository {2}.
  Cause: Some SQL Exception occurred on the Work Repository.
  Action: Verify that other operations on the Agent are working correctly.

  Level: 1
  Type: ERROR
  Impact: Other

ODI-01440: Agent {0} cannot be stopped by user {1}: an unknown error occurred.
  Cause: An unexpected Exception occurred.
  Action: Verify your Agent configuration and make sure other operations on Agent are working correctly.

  Level: 1
  Type: ERROR
  Impact: Other

ODI-01441: Unable to connect to the master repository at JBDC URL={0} with USER={1}.
  Cause: An SQLException occurred while creating connection to the master repository with the given parameters.
  Action: Verify your Agent configuration and make sure the master repository connection parameters are correct.

  Level: 1
  Type: ERROR
  Impact: Other

ODI-01442: Unable to load JBDC Driver {0} configured for master repository connection.
  Cause: ClassNotFoundException occurred while loading the driver class.
  Action: Verify your Agent configuration and make sure the driver specified for master repository connection is correct and the corresponding jar is present under driver folder.

  Level: 1
  Type: ERROR
  Impact: Other

ODI-01443: Error while starting agent : {0}
  Cause: Error occurred while starting the embedded web container.
  Action: Verify your Agent configuration and make sure that the specified ports are available.

  Level: 1
  Type: ERROR
  Impact: Other
ODI-01444: The master repository signature specified by the client {0} does not match the master repository signature of the agent {1}.

**Cause:** The client and the agent are not using the same master repository

**Action:** Verify the client and the agent are using the same master repository. Verify that the client is calling the correct agent.

**Level:** 1

**Type:** ERROR

**Impact:** Other

ODI-01445: Invalid HTTP/S URL retrieved from the JRF utility : {0}

**Cause:** JRF utility has returned an invalid HTTP/S URL for the agent.

**Action:** Verify if ODI agent's dependent modules are successfully deployed on the container.

**Level:** 1

**Type:** ERROR

**Impact:** Other

ODI-01500: SQL Exception when accessing work repository {0} while executing load plan instance (1) - (2)

**Cause:** A SQLException was thrown when trying to update the work repository

**Action:** The same set of updates will be attempted later, potentially from a different agent

**Level:** 1

**Type:** ERROR

**Impact:** Other

ODI-01501: Cannot find variable "{0}" in the definition of load plan instance {1}.

**Cause:** The start/restart load plan request contained startup values for variables that are not defined in the load plan

**Action:** User error or problem in the IDE invocation code

**Level:** 1

**Type:** ERROR

**Impact:** Other

ODI-01502: Load plan instance {0} is in an inconsistent state: {1}

**Cause:** Indicates a problem in the ODI code, like a wrapped IllegalStateException

**Action:** null

**Level:** 1

**Type:** ERROR

**Impact:** Other

ODI-01503: Load plan logs for instance {0}, run {1} are corrupted: {2}

**Cause:** Indicates a problem in the ODI code, it is a wrapped IllegalStateException

**Action:** null

**Level:** 1
Type: ERROR
Impact: Other

ODI-01504: Trying to update variables during execution of step "{0}" (load plan instance {1}, run {2}), as part of the exception handler for step "{3}", but variable updates during exception handlers are not supported.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01505: Current value "{0}" of variable "{1}" (while evaluating When clause "{2}") is not a valid value of type {3} (load plan instance {4}, run {5}).
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01506: "Comparison value of step "{2}" ("{0}") is not a valid value of type {3} (load plan instance {4}, variable tested "{1}").
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01507: Load Plan Instance restart called for instance {0}, but no previous runs were found.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01508: Load Plan Instance start called for instance {0}, but previous runs have been found.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01509: Load Plan Instance {0} cannot be restarted because the previous run ("{1}") status "{2}" is not in "{3}" status.
ODI-01510: The same load plan instance {0} simultaneously started by two agents.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01511: Step "[0]" should have already been marked as started before adding value for variable "{1}" (load plan instance {2}, run {3}).
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01512: Variable "{0}" is defined as having datatype "{1}" in Load Plan instance {2}, but as having type "{3}" in scenario "{4}" (version {5}), Load Plan instance step "{6}".
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01513: Error reading load plan information for session number {0}: "{1}".
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01514: Error trying to stop load plan, instance {0} not found.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other
ODI-01515: Load Plan instance {0} could not be stopped by agent {1} because stop type {2} provided in the request is invalid.
   Cause: null
   Action: null
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01516: Can not start load plan: load plan with name "{0}" does not exist in work repository {1}.
   Cause: null
   Action: null
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01517: Load Plan instance {0}, run {1} could not be stopped because that run is already completed (with status "{2}").
   Cause: null
   Action: null
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01518: Parallel step "{0}" failed; {1} child step(s) in error, which is more than the maximum number of allowed errors {3} defined for the parallel step. Failed child steps: {2}
   Cause: null
   Action: null
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01519: Serial step "{0}" failed because child step "{1}" is in error.
   Cause: null
   Action: null
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01520: Case-When/Else step "{0}" failed because child step "{1}" is in error.
   Cause: null
   Action: null
   Level: 1
Type: ERROR
Impact: Other

ODI-01521: Case step "[0]" failed; the selected child "[1]" is in error.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01522: Run Scenario step failed during invocation. Error message was: [0]
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01523: Exception handler for step "[0]" failed, because the root exception serial step "[1]" is in error.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01524: Physical agent [0] could not be found.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01525: Physical agent not found for logical agent name "[0]" and context "[1]" while executing step "[2]".
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01526: Error encountered while trying to start scenario "[1][2]" (step "[3]"): [0]
  Cause: null
  Action: null
  Level: 1
Type: ERROR
Impact: Other

ODI-01527: Error refreshing variable "[0]": the associated SQL query returned no results.
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01528: Error refreshing variable "[0]": [1]
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01529: Refresh of variable "[0]" failed: [1] [2]
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01530: Load plan instance was stopped by user request.
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01531: Timeout triggered while executing step "[0]."
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01532: Timeout triggered on a parent step "[0]" while executing step "[1]."
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01533: Error refreshing variable \"(0)\": could not get a connection to the logical schema \"(1)\" using context \(2\).
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01534: Could not get SQL query text for variable \"(0)\" while trying to refresh it.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01535: Can not continue load plan instance \(0\), run \(1\), because the instance has been deleted.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01536: Load plan instance \(0\), run \(1\) failed to launch scenario: scenario \(2\) does not exist in work repository \(3\).
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01537: Load plan instance \(0\), run \(1\) failed to launch scenario: Version \(3\) of scenario \(2\) does not exist in work repository \(4\).
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01538: Unexpected Exception occurred while executing Load plan instance \(0\), run \(1\).
  Cause: null
  Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01539: Agent [0] cannot continue load plan processing for instance [1], run [2] on work repository [3].
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01540: Agent [0] start failure: error while trying to use Http Port [1].
 Cause: Http service was unable to use the given port.
Action: Specify a different port by using the command-line parameter PORT.

Level: 1
Type: ERROR
Impact: Other

ODI-01541: Load Plan start failure on agent [0]: ODI User and Password not specified.
Cause: ODI user and password are not set.
Action: Please specify ODI user and password.

Level: 1
Type: ERROR
Impact: Other

ODI-01542: Start Scenario failure on agent [0]: ODI User and Password not specified.
Cause: ODI User and password are not set.
Action: Please specify ODI user and password.

Level: 1
Type: ERROR
Impact: Other

ODI-01543: RuntimeAgent cannot be used inside an opened transaction, it must be used outside a TransactionTemplate
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01544: None of the agents in Load Balancing list is able to handle this execution ([0]).
ODI-01545: Missing odi supervisor credentials in credential store map [{0}] with key [{1}].
Cause: Could not retrieve information from the credential store map.
Action: Verify that the credentials have been entered correctly into the credential store map.
Level: 1
Type: ERROR
Impact: Other

ODI-01546: The dbms_lock acquisition with lock handle {0} timed out.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01547: The Agent detected deadlock on dbms_lock acquisition with lock handle {0}.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01548: The dbms_lock acquisition failed with illegal lock handle {0}.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01549: The dbms_lock acquisition with lock handle {0} failed with illegal params error. The parameters are {1}.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other
ODI-01550: The dbms_lock acquisition with lock handle {0} failed with unknown return code {1}.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01551: The dbms_lock acquisition failed with a sql exception {0}. Please check if the work repository db user has EXECUTE privilege on DBMS_LOCK package.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01552: The dbms_lock release failed with illegal lock handle {0}.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01553: The dbms_lock release for lock handle {0} failed with invalid parameters.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01554: The dbms_lock release for lock handle {0} failed because you do not own the lock.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01555: The dbms_lock release for lock handle {0} failed with an unknown return code {1}.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01556: The lock acquisition failed. The lock is already locked by other connection object.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01557: Error refreshing variable "{0}"; the associated SQL query returned a NULL value.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01558: The session {0} corresponding to the load plan step {1} of load plan instance {2}, run {3} is not found. We assume this step to be in error status.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01559: Load Plan Instance {0} cannot be restarted because the context {1} was not found in the work repository {2}.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01560: Load Plan {0} cannot be started because the context {1} was not found in the work repository {2}.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01561: Load Plan {0} cannot be started because the user {1} does not have view privileges to the execution context {2}.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01562: Load Plan Instance {0} cannot be restarted because the user {1} does not have view privileges to the execution context {2}.
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01563: Load Plan {0} cannot be started because the user {1} does not have execute privileges to the Load Plan {0}.
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01564: Load Plan Instance {0} cannot be restarted because the user {1} does not have restart privileges.
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01565: Load Plan {0} cannot be started because an unknown exception occurred.
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01566: Load Plan Instance {0} cannot be restarted because an unknown exception occurred.
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01567: Load Plan {0} cannot be started because a SQL Exception occurred.
ODI-01568: Load Plan Instance \(0\) cannot be restarted because a SQL Exception occurred.

ODI-01569: Error trying to stop load plan, instance \(0\) run \(1\) not found.

ODI-01570: Load Plan Instance \(0\), run \(1\) cannot be stopped by Agent \(2\) because User \(3\) does not have privileges to stop the Load Plan Instance.

ODI-01571: Load Plan Instance \(0\), run \(1\) cannot be stopped by Agent \(2\) because User \(3\) does not have privileges to stop Sessions.

ODI-01572: Load Plan Instance \(0\), run \(1\) cannot be stopped by Agent \(2\) because a SQL Exception occurred while accessing the Repository.
ODI-01573: Load Plan Instance {0}, run {1} cannot be stopped by Agent {2} because an Unknown error has occurred.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01574: Day of week is not specified for the schedule.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01575: Invalid value specified for the excluded days of month filter: {0}
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01576: LoadPlan Operation {0} on Agent {1} failed with the exception {2}.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01577: Parallel step error triggered on a parent step "{0}" while executing step "{1}".
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01578: Invalid load plan log level value specified: {0}. A valid load plan log value is between {1} and {2}.
  Cause: Invalid load plan log level value was supplied in the request.
  Action: Check that the load plan log level value supplied was valid (1 - 6) for the request.
  Level: 1
  Type: ERROR
Impact: Other

ODI-01579: Agent {0} start failure: data source for master repository did not contain a master repository using JDBC URL={1} with USER={2}.

Cause: The master repository connection information pointed to a database schema that did not contain a master repository.

Action: Verify the master repository connection information.

Level: 1
Type: ERROR
Impact: Other

ODI-01580: Unable to set the role OWB_USER for this user.

Cause: An attempt was made to set the role OWB_USER for the connected user.

Action: Check that the role exists and the connected user is an OWB user.

Level: 1
Type: ERROR
Impact: Other

ODI-01581: Unable to set the workspace {0} for this user.

Cause: An attempt was made to select the OWB workspace for the connected user.

Action: Check that the workspace exists and the connected user has got privilege to access it.

Level: 1
Type: ERROR
Impact: Other

ODI-01582: Unexpected error when connecting to Owb workspace {0}.

Cause: An unexpected error occurred when connecting to workspace.

Action: Verify that the Owb repository is up and running.

Level: 1
Type: ERROR
Impact: Other

ODI-01583: Owb workspace {0} does not contain components that enable execution from Odi.

Cause: A component that is required by ODI has not been found in this workspace.

Action: Verify that the Owb repository contains the correct patch for ODI.

Level: 1
Type: ERROR
Impact: Other

ODI-01584: Mandatory parameter {0} is missing for https protocol.

Cause: A parameter that is required to start ODI agent to enable https protocol is missing.
Action: Verify that the parameter is specified in odiparams.[sh|bat].

Level: 1

Impact: Other

ODI-01609: No of values provided for component name and JMXport number are not equal. Please provide the same no of values for both.
Cause:
ODI-01610: ODI environment variable {0} is not set and ODI Tool startcmd not launched from interactive console.

ODI-01611: Must provide username for {0} before obtaining password.

ODI-01612: Unknown parameter ignored: {0}

ODI-01613: Unknown parameter value pair ignored: {0}={1}

ODI-01614: session_number is a mandatory parameter

ODI-01615: DESCRIPTION Resumes an execution session. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX restartsession.(cmd | sh) "-INSTANCE=<instance_name>" <session_number> ["-log_level="%"] ["-AGENT_URL=<agent_url>"]
ODI-01616: DESCRIPTION Starts an agent. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX agent.(cmd | sh)
-NAME=<agent name> [-PORT=<port>] [-PROTOCOL=<protocol>]
[-JMXPORT=<jmxport>] [-ODI_CONNECTION_RETRY_COUNT=<nn>]
[-ODI_CONNECTION_RETRY_DELAY=<nn>] PORT represents the listening port. It should match the port value specified against the physical agent defined in Topology. PROTOCOL represents the listening protocol, HTTP or HTTPS. Its default value is HTTP. NAME represents the name of this physical agent. It should match the name of a physical agent defined in Topology. User must have created an agent with this name using configuration wizard. JMXPORT represents the JMX port used for JMX notifications etc. Its default value is calculated as PORT + 1000, or 20810 if the calculated value is greater than 65535. ODI_CONNECTION_RETRY_COUNT represents the number of times a connection to the ODI Repository will be retried. Its default value is 10. ODI_CONNECTION_RETRY_DELAY represents the number of milliseconds between connection retries to the ODI Repository. Its default value is 7000.

ODI-01617: DESCRIPTION Stops an agent. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX agentstop.(cmd | sh)
"-NAME=<agent name>" ["-AGENT_URL=<agent_url>"
["-IMMEDIATE=<true(default)|false>"] ["-MAX_WAIT=<stop timeout in millis>"]

ODI-01618: DESCRIPTION Restarts execution of a load plan instance. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX
restartloadplan.(cmd | sh) "-INSTANCE=<instance_name>" <load_plan_instance_id> [<log_level>] "-AGENT_URL=<agent_url>" ["-SYNC=(no | yes)"
["-POLLINT=<msec>"]

ODI-01100 to ODI-40962  66-63
Impact: Other

  Impact: Other

ODI-01702: This operation is not supported on this platform
  Cause:
  Action:

  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-01800: Exception {0} has occurred as ESS-EM linking is disabled.
  Cause: Unable to connect to master repository.
  Action: Check if the master repository is accessible and up. This is not mandatory since master repositories can be down.

  Level: 1
  Type: ERROR
  Impact: Configuration

ODI-01801: Agent target discovery mbean registration has failed due to {0}.
  Cause: A runtime error has occurred.
  Action: Check the log for details on the error and take corrective action.

  Level: 1
  Type: ERROR
  Impact: Programmatic

ODI-01802: Agent target discovery mbean unregistration has failed due to {0}.
  Cause: A runtime error has occurred.
  Action: Check the log for details on the error and take corrective action.

  Level: 1
  Type: ERROR
  Impact: Programmatic

ODI-01803: Error {0} has occurred during mbean registration.
Cause: A runtime error has occurred.
Action: Check the log for details on the error.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-01804: Error {0} has occurred during mbean deregistration.
Cause: A runtime error has occurred.
Action: Check the log for details on the error.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-01805: Error {0} has occurred during notification listener registration.
Cause: A runtime error has occurred.
Action: Check the log for details on the error.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-01806: Error {0} has occurred during notification listener deregistration.
Cause: A runtime error has occurred.
Action: Check the log for details on the error.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-01807: Error {0} has occurred during deregistration of ODI Service Mbean {1}.
Cause: A runtime error has occurred.
Action: Check the log for details on the error.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-01808: Error {0} has occurred during registration of Agent Service Mbean.
Cause: A runtime error has occurred.
Action: Check the log for details on the error, fix the server and restart the OdiConsole application.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-01809: Error {0} has occurred during registration of Master Repository Service Mbean.
Cause: A runtime error has occurred.

Action: Check the log for details on the error, fix the error and restart the OdiConsole application.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01810: Error {0} has occurred during registration of Work Repository Service Mbean.
Cause: A runtime error has occurred.
Action: Check the log for details on the error, fix the error and restart the OdiConsole application.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-01811: Error {0} has occurred during registration of Session Service Mbean.
Cause: A runtime error has occurred.
Action: Check the log for details on the error, fix the error and restart the OdiConsole application.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-01812: Error {0} has occurred during registration of Event Service Mbean.
Cause: A runtime error has occurred.
Action: Check the log for details on the error, fix the error and restart the OdiConsole application.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-01813: Error {0} has occurred during registration of Session Search Service Mbean.
Cause: A runtime error has occurred.
Action: Check the log for details on the error, fix the error and restart the OdiConsole application.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-01814: No repository definition found for work repository {0} in repositories.xml. Search will be disabled for this repository.
Cause: A configuration error has occurred.
Action: Add the jndi entries for all the work repositories for each of the master repositories in repositories.xml.
Level: 1
Type: ERROR
Impact: Configuration

ODI-01815: Exception {0} has occurred during Session Search by id.
Cause: A runtime error has occurred.
Action: No action is required. The session id mentioned for search is not available.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01816: Session status passed {0} is invalid.
Cause: A runtime error has occurred.
Action: Check the log for details on the error.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01817: Error {0} has occurred while fetching statistics for agents. Statistics shown might not be complete.
Cause: A runtime error has occurred.
Action: Check the log for details on the error.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01818: Agent Service Mbean is not initialized. Re-initialization of agents in tree is disabled.
Cause: A runtime error has occurred.
Action: Check the log for details on the error, fix the same and restart the OdiConsole application.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01819: Event Service Mbean is not initialized. Re-initialization of event notification listeners is disabled.
Cause: A runtime error has occurred.
Action: Check log for details on the error, fix the same and restart the OdiConsole application.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01820: Agent {0} is not up at {1} for reason {2}.
Cause: A runtime error has occurred.
Action: Check the log for details on the error.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03000: error in creating repository connection \{0\}
Cause: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03001: error in updating repository connection \{0\}
Cause: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03002: error in deleting repository connection \{0\}
Cause: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03003: Failed to connect to the error table \{0\}. Check the connection details and retry.
Cause: The table might no longer exist or the structure of the table might not be correct.
Action: Check the connection details and retry.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03016: Creation of Work Repository failed because a previous Work repository was found, and the user had asked not to overwrite any existing repository.
Cause: Work repository already exists and overwriting of the repository was not chosen
Action: Select overwriting of Work Repository

Level: 1
Type: ERROR
Impact: Data
ODI-03017: Exception occurred while creating Work Repository at {0} failed. Failure reason {1}.
  Cause: An unexpected error occurred.
  Action: Check the logs.
  Level: 1
  Type: ERROR
  Impact: Programmatic

ODI-03018: Test connection failed due to {0}.
  Cause: Connection to DB failed
  Action: Check the logs.
  Level: 1
  Type: ERROR
  Impact: Data

ODI-03019: Exception occurred while exporting Master Repository. Failure reason {0}.
  Cause: An unexpected error occurred.
  Action: Check the logs.
  Level: 1
  Type: ERROR
  Impact: Data

ODI-03020: Only zip files can be uploaded, the {0} upload was unsuccessful.
  Cause: A file with extension other than zip was uploaded.
  Action: Make sure file uploaded has zip as extension
  Level: 1
  Type: ERROR
  Impact: Data

ODI-03021: Exception occurred while importing Work Repository. Failure reason {0}.
  Cause: An unexpected error occurred.
  Action: Check the logs.
  Level: 1
  Type: ERROR
  Impact: Data

ODI-03022: Attaching of Work Repository failed due to error: {2}
  Cause: Errored out due to {2} and overwriting of the repository was not chosen
  Action: Check the logs
  Level: 1
  Type: ERROR
  Impact: Programmatic
ODI-03023: Attaching of Work Repository failed
    Cause: An unexpected error occurred and overwriting of the repository was not chosen
    Action: Check the logs
    Level: 1
    Type: ERROR
    Impact: Programmatic

ODI-03024: Exception occurred while attaching Work Repository at {0} failed.
    Failure reason (1).
    Cause: An unexpected error occurred.
    Action: Check the logs.
    Level: 1
    Type: ERROR
    Impact: Programmatic

ODI-03031: Creation of Master Repository failed at {0}.
    Cause: Creation of Master Repository Failed
    Action: Check the logs.
    Level: 1
    Type: ERROR
    Impact: Data

ODI-03032: Exception occurred while creating Master Repository at {0} failed.
    Failure reason (1).
    Cause: An unexpected error occurred.
    Action: Check the logs.
    Level: 1
    Type: ERROR
    Impact: Programmatic

ODI-03033: Supervisor Password and Confirm Supervisor Password fields should match.
    Cause: Supervisor Password and Confirm Supervisor Password fields must match
    Action: Input same passwords
    Level: 1
    Type: ERROR
    Impact: Data

ODI-03034: Test connection failed due to {0}.
    Cause: Testing of DB connection failed
    Action: Check the logs
    Level: 1
Type: ERROR
Impact: Data

ODI-03035: Supervisor Password and Confirm Supervisor Password fields should match and only zip files can be uploaded, the {0} upload was unsuccessful.
Cause: Both the password match and zip files to be uploaded conditions failed
Action: Make sure both the passwords are same and file uploaded is zip file

Level: 1
Type: ERROR
Impact: Data

ODI-03036: Only zip files can be uploaded, the {0} upload was unsuccessful.
Cause: zip files to be uploaded condition failed
Action: Make sure file uploaded is zip file

Level: 1
Type: ERROR
Impact: Data

ODI-03037: Exception occurred while exporting Master Repository. Failure reason [1].
Cause: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03038: Exception occurred while exporting Physical Topology. Failure reason [1].
Cause: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03039: Exception occurred while Importing Master Repository. Failure reason [1].
Cause: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03040: Unable to connect to the Repository User. {0}
Cause: Testing of DB connection failed
Action: Check the logs
Level: 1
Type: ERROR
Impact: Data

ODI-03041: Unable to connect to the DBA User. {0}
Causes: Testing of DB connection failed
Action: Check the logs

Level: 1
Type: ERROR
Impact: Data

ODI-03046: unable to find the agent for given logical agent and context code
Causes: Physical Agent mapping was not defined for selected logical agent and context.
Action: A different set of credentials is required or the mapping needs to be defined.

Level: 1
Type: ERROR
Impact: Data

ODI-03047: exception while executing {0}. Failure reason {1}
Causes: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03048: Only XML files can be uploaded: the {0} upload fails
Causes: File selected for import was not a XML file.
Action: Provide the XML file.

Level: 1
Type: ERROR
Impact: Data

ODI-03049: exception while importing {0}. Failure reason {1}
Causes: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03050: failed to start scenario : {0} ? {1} in debug mode.
Causes: An unexpected error occurred.
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03075: Error in purging Load Plans Executions/Sessions [0]
Cause: An exception has occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03076: exception while killing [0]. Failure reason [1]
Cause: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03077: Selected Session [0] is in [1] State, and therefore cannot be killed.
Cause: The selected session was in Done, Error, or Warning state.
Action: No action is required.

Level: 1
Type: ERROR
Impact: Data

ODI-03078: Selected Session [0] is in [1] State, and therefore cannot be restarted.
Cause: The selected session was not in Error state.
Action: No action is required.

Level: 1
Type: ERROR
Impact: Data

ODI-03079: exception while restarting [0]. Failure reason [1]
Cause: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03080: exception while clearing stale sessions. Failure reason [0]
Cause: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03081: Error fetching records from error table {0}. The table might no more exist or the format of the table is not correct
Cause: The table might no longer exist or the structure of the table might not be correct
Action: Upgrade the CKM

Level: 1
Type: ERROR
Impact: DATA

ODI-03082: CKM SQL does not contain ODI_PK primary key column. Hence unable to delete the error records.
Cause: CKM SQL does not contain ODI_PK primary key column. Hence unable to delete the error records.
Action: Future release will have the ODI_PK primary key column incorporated in CKM SQL.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03083: Scenario "{0}" parent not found.
Cause: Trying to get the Odi Object which does not exist or has been deleted.
Action: Check the logs

Level: 1
Type: ERROR
Impact: Data

ODI-03090: failed to restart session : {0} in debug mode.
Cause: An unexpected error occured
Action: Check the logs

Level: 1

ODI-10004: File already exists.  
Cause: File already existed.  
Action: Choose another file.

Level: 32  
Type: ERROR  
Impact: File  

ODI-10005: Repository is expected to be a master repository.  
Cause: Repository was expected to be a master repository.  
Action: Choose master repository.

Level: 32
Type: ERROR
Impact: Other

ODI-10006: Repository is expected to be enterprise repository.
Cause: Repository was expected to be an enterprise repository.
Action: Choose enterprise repository.
Level: 32

Type: ERROR
Impact: Other

ODI-10007: Object must be in editable state before using set methods.
Cause: The object was not in editable state.
Action: Edit this object.
Level: 32

Type: ERROR
Impact: Other

ODI-10008: Object must be in consult mode before using methods get.
Cause: The object was not in consult mode.
Action: Consult the object.
Level: 32

Type: ERROR
Impact: Other

ODI-10009: Object does not exist in the repository.
Cause: The repository did not contain this object.
Action: Choose another object or create first this one.
Level: 32

Type: ERROR
Impact: Other

ODI-10010: This type of object cannot be updated.
Cause: Object could not be updated.
Action: Do not update this object.
Level: 32

Type: ERROR
Impact: Other

ODI-10011: Invalid object; it has been updated by another user.
Cause: Object was updated by another user.
Action: Refresh the object.
Level: 32

Type: ERROR
Impact: Other
ODI-10012: Object cannot be inserted
   Cause: Object could not be inserted.
   Action: Check object.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10013: This import action has been cancelled because it could damage your repository. This is due to an [0] object that has object identifier [1] that is greater than that for the current [0] id sequence. Importing this object would lead to primary key violations in the future.
   Cause: Import could damage your repository.
   Action: Check identifier sequences.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10014: Method must be redefined in derived classes. It cannot be called for DwgObject
   Cause: Method must be redefined in derived classes.
   Action: Call redefined method.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10015: The work repository [0] is not declared in this master repository, the import process has been cancelled.
   Cause: Work repository was not declared in this master repository.
   Action: Declare work repository and try again.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10016: Import aborted.
   Cause: Import was aborted.
   Action: Check objects and try again.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10017: This import is forbidden: the text [0] has a different origin in the repository and in the import file.
   Cause: The text has a different origin in the repository and in the import file.
   Action: Check import file and try again.
   Level: 32
Type: ERROR
Impact: Other

ODI-10018: The repository \{0\} is not coherent between the current repository and the import file.
   Cause: The repository was not coherent between the current repository and the import file.
   Action: Check import file.

Level: 32
Type: ERROR
Impact: Other

ODI-10019: Impossible to create the directory \{0\}.
   Cause: I was not possible to create the directory.
   Action: Check your system rights for creating directory; directory’s path and name.

Level: 32
Type: ERROR
Impact: File

ODI-10020: Impossible to replace the file
   Cause: It was not possible to replace the file.
   Action: Check, if you have enough rights for this operation.

Level: 32
Type: ERROR
Impact: File

ODI-10021: Unspecified save directory.
   Cause: Directory to save environment information was unspecified.
   Action: Specify the directory for saving the environment information file.

Level: 32
Type: ERROR
Impact: Other

ODI-10022: You must specify all options.
   Cause: Missed one or more options.
   Action: Specify missed options.

Level: 32
Type: ERROR
Impact: Other

ODI-10023: Invalid license. This license is suitable for \{0\}.
   Cause: Invalid license.
   Action: Check license.

Level: 32
Type: ERROR
Impact: Security

ODI-10024: Your installation of Oracle Data Integrator is corrupted.
Cause: The technology description file contains errors.
Action: Reinstall Oracle Data Integrator.
Level: 32
Type: ERROR
Impact: Other

ODI-10025: Your installation of Oracle Data Integrator is corrupted.
Cause: The technology description file is missing.
Action: Reinstall Oracle Data Integrator.
Level: 32
Type: ERROR
Impact: Other

ODI-10026: Error while testing the Master Repository technology.
Cause: Error occurred while testing the Master Repository technology.
Action: Check parameters.
Level: 32
Type: ERROR
Impact: Other

ODI-10027: The import is canceled because at least one object is locked by another user.
Cause: At least one object was locked by another user.
Action: Check objects' locks.
Level: 32
Type: ERROR
Impact: Other

ODI-10028: It is forbidden to import a log into a repository having the same ID.
Cause: The log had the same ID as repository.
Action: Check log and/or repository id.
Level: 32
Type: ERROR
Impact: Other

ODI-10029: Version {0} for object {1} already exists.
Cause: Version already existed.
Action: Choose another version.
Level: 32
Type: ERROR
Impact: Other

ODI-10030: DwgBeanWrapper can only wrap DwgObjects
Cause: DwgBeanWrapper can only wrap DwgObjects
Action: Choose correct type of objects.

Level: 32
Type: ERROR
Impact: Other

ODI-10031: Object {0}: {1} is locked by user {2}
Cause: Object was locked by another user.
Action: Wait until object is unlocked.

Level: 32
Type: ERROR
Impact: Other

ODI-10032: You cannot import this object ({0}). A referenced object ({1}) does not exist in the repository.
Cause: A referenced object does not exist in the repository.
Action: Check import file.

Level: 32
Type: ERROR
Impact: Other

ODI-10033: You cannot delete this object because it is locked by another user ({0}).
Cause: This object was locked by another user.
Action: Wait until object is unlocked.

Level: 32
Type: ERROR
Impact: Other

ODI-10034: The technology hosting your master repository does not support Versioning.
Cause: The technology did not support versioning.
Action: Choose another repository or technology.

Level: 32
Type: ERROR
Impact: Other

ODI-10035: {0} : "{1}" violates alternate key constraint {2} {3} for values {4}
Cause: Object violated alternate key constraint.
Action: Check object properties and constraint's values.

Level: 32
Type: ERROR
Impact: Other

ODI-10036: Importing object {0} : {1} failed.
  Cause: Import failed.
  Action: Check import file and try again.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10037: Import-replace for this node is supported for action groups only. The import file is invalid.
  Cause: Import-replace for this node was supported for action groups only.
  Action: Check import file.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10038: The interface you are trying to use ((0)) is related to a logical schema ((1)) that no longer exists.
  Cause: Logical schema was not found.
  Action: Check interface.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10039: Bad ID for an object representer
  Cause: Bad ID for an object representer
  Action: Check object’s ID.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10040: Cannot create directory
  Cause: Directory could not be created.
  Action: Check directory path/name.
  Level: 32
  Type: ERROR
  Impact: File

ODI-10041: Oracle Data Integrator Remote Object (SnpRemoteObject) must inherit from SnpsFunction.
  Cause: Oracle Data Integrator Remote Object (SnpRemoteObject) did not inherit from SnpsFunction.
  Action: Use SnpsFunction as parent.
  Level: 32
Type: ERROR
Impact: Other

ODI-10042: SnpsQuery must be connected prior to execution
Cause: SnpsQuery was not connected.
Action: Set a connection.
Level: 32

Type: ERROR
Impact: Other

ODI-10043: Security token is a mandatory parameter
Cause: Security token was not specified.
Action: Check security parameters.
Level: 32

Type: ERROR
Impact: Security

ODI-10044: Unable to save the interface. Maximum number of source datastores exceeded.
Cause: Maximum number of source datastores was exceeded.
Action: Contact Oracle Support Services.
Level: 32

Type: ERROR
Impact: Other

ODI-10045: a2.getCargo() not instance of SAPSegment
Cause: a2.getCargo() not instance of SAPSegment
Action: Check SAP Tree.
Level: 32

Impact: Other

ODI-10047: Repository is not a development work repository
Cause: Repository was not a development work repository.
Action: Choose development work repository.
Level: 32

Type: ERROR
Impact: Other

ODI-10048: No work repository found.
  Cause: No work repository was found.
  Action: Check your connection settings or database.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10049: Missing parameter
  Cause: Parameter was missing.
  Action: Check all parameters.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10050: Missing parameter at: {0} SQL: {1}
  Cause: Parameter was missing.
  Action: Check all parameters.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10051: Some objects cannot be exported because they do not exist in the repository: {0} {1}
  Cause: Objects did not exist in the repository.
  Action: Check objects state.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10052: A problem occurred in your repository.
  Cause: A problem occurred in your repository.
  Action: Contact Oracle Support Services.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10053: Problem retrieving JCOFunction object. {0}
  Cause: Problem occurred retrieving JCOFunction object.
  Action: Check JCO Function object.
  Level: 32
  Type: ERROR
  Impact: Other
ODI-10054: Unable to find the XML file corresponding to your technology.
Caused: XML file corresponding to your technology was not found.
Action: Check technology and/or XML file for the technology.

Level: 32
Type: ERROR
Impact: Other

ODI-10055: This ID is already in use in the repository
Caused: This ID was already in use in the repository.
Action: Change ID.

Level: 32
Type: ERROR
Impact: Other

ODI-10056: This repository ID already exists. This repository cannot be created.
Caused: Repository ID already existed.
Action: Change repository ID.

Level: 32
Type: ERROR
Impact: Other

ODI-10057: Unrecognized export type.
Caused: Export type was unrecognized.
Action: Check export type.

Level: 32
Type: ERROR
Impact: Other

ODI-10058: You are trying to import objects from a master repository of an older version into {0} version. This action is forbidden. Master repositories must be upgraded using the upgrade assistant, not using the export/import facility.
Caused: You tried to import objects from a master repository of an older version.
Action: Master repositories must be upgraded using the upgrade assistant, not using the export/import facility.

Level: 32
Type: ERROR
Impact: Other

ODI-10059: Repository is null
Caused: Repository was null.
Action: Check repository.

Level: 32
Type: ERROR
Impact: Other
ODI-10060: Saputil is mandatory.
    Cause: Saputil was mandatory.
    Action: Check Saputil

    Level: 32
    Type: ERROR
    Impact: Other

ODI-10061: Empty XML Character Set
    Cause: XML Character Set was empty.
    Action: Fill XML Character Set.

    Level: 32
    Type: ERROR
    Impact: Other

ODI-10062: Unable to find license key {0}. An exception {1} occurred with message: {2}
    Cause: An exception occurred.
    Action: Check license key.

    Level: 32
    Type: ERROR
    Impact: Other

ODI-10063: Unable to check the license key. An exception {0} occurred with message: {1}
    Cause: An exception occurred.
    Action: Check license key.

    Level: 32
    Type: ERROR
    Impact: Other

ODI-10064: The interface must have a JMS datastore as a source or target. Another license is required otherwise.
    Cause: The interface must have a JMS datastore as a source or target.
    Action: Check datastore type and/or license.

    Level: 32
    Type: ERROR
    Impact: Other

ODI-10065: You license does not include these features. Please contact your reseller.
    Cause: You license does not include these features.
    Action: Please contact your reseller.

    Level: 32
    Type: ERROR
    Impact: Other
ODI-10066: The interface is using a Datastore defined in Model "[0]" which is linked to a logical schema "[1]" that no longer exists.
Cause: Logical schema was not found.
Action: Correct interface.
Level: 32
Type: ERROR
Impact: Other

ODI-10067: Target file already exists.
Cause: Target file already existed.
Action: Choose another target file name.
Level: 32
Type: ERROR
Impact: File

ODI-10068: SnpsConnection: Isolation level not supported
Cause: Isolation level not supported.
Action: Check isolation level.
Level: 32
Type: ERROR

ODI-10086: You cannot edit this object
Cause: You could not edit this object.
Action: Login with user with right privileges.
Level: 32
Type: ERROR
Impact: Security

ODI-10087: You can only give Supervisor Access Privileges if you are a Supervisor.
Cause: You could only give Supervisor Access Privileges if you are a Supervisor.
Action: Login with user with right privileges.

Level: 32
Type: ERROR
Impact: Security

ODI-10088: Empty Java Character Set.
Cause: Java Character Set was empty.
Action: Fill Java charset.

Level: 32
Type: ERROR
Impact: Other

ODI-10089: You cannot modify another user's password
Cause: You cannot modify another user's password
Action: Login with user with right privileges.

Level: 32
Type: ERROR
Impact: Security

ODI-10090: Object {0} {1} is referenced by: {2}. Cannot remove.
Cause: Object was referenced by another one.
Action: Check object’s references.

Level: 32
Type: ERROR
Impact: Other

ODI-10091: not connected
Cause: not connected
Action: Check connection.

Level: 32
Type: ERROR
Impact: Other

ODI-10092: Some objects cannot be exported. They do not exist in the repository.
Cause: Objects did not exist in the repository.
Action: Check objects” state.

Level: 32
Type: ERROR
Impact: Other

ODI-10093: You are importing an object from another repository with the same identifier. It is forbidden.
Cause: You tried to import an object from another repository with the same identifier.
Action: Change repository ID.
Level: 32
Type: ERROR
Impact: Other

ODI-10094: Problem while computing new name.
Cause: A problem occurred while computing new name.
Action: Try again.
Level: 32
Type: ERROR
Impact: Other

ODI-10095: Exception while getting the children list
Cause: Exception while getting the children list.
Action: Try again.
Level: 32
Type: ERROR
Impact: Other

ODI-10096: Error while parsing fields
Cause: Error occurred while parsing fields.
Action: Check fields value.
Level: 32
Type: ERROR
Impact: Other

ODI-10097: Impossible to find text with ID {0} in text list.
Cause: Text was not found.
Action: Check text ID
Level: 32
Type: ERROR
Impact: Other

ODI-10098: No connection available. Check connection parameters.
Cause: No connection was available.
Action: Check connection parameters.
Level: 32
Type: ERROR
**Impact:** Network

**ODI-10099:** Object cannot be exported because the file with name \{0\} could not be created.

- **Cause:** Object could not be exported because the file could not be created.
- **Action:** Check your system rights to write files and file name.

  - **Level:** 32
  - **Type:** ERROR
  - **Impact:** Other

**ODI-10100:** Empty XML Version

- **Cause:** XML version was empty.
- **Action:** Fill XML Version.

  - **Level:** 32
  - **Type:** ERROR
  - **Impact:** Other

**ODI-10101:** Invalid XML Version: \{0\}

- **Cause:** XML Version was invalid.
- **Action:** Check XML version.

  - **Level:** 32
  - **Type:** ERROR
  - **Impact:** Other

**ODI-10102:** Alias with the name \{0\} already exists.

- **Cause:** Alias already exists.
- **Action:** Change alias.

  - **Level:** 32
  - **Type:** ERROR
  - **Impact:** Other

**ODI-10103:** Alias with the name \{0\} does not exist.

- **Cause:** Alias doesn’t exist.
- **Action:** Check alias name ant try again.

  - **Level:** 32
  - **Type:** Error
  - **Impact:** Other

**ODI-10104:** File \{0\} is not a Smart Export file and cannot be imported by Smart Import.

- **Cause:** Smart Export file not specified for Smart Import.
- **Action:** Specify a Smart Export file for importing via Smart Import.

  - **Level:** 32
  - **Type:** ERROR
Impact: Other
ODI-10105: Smart Import file name cannot be null.
Causes: Smart Export file name not specified for Smart Import.
Action: Specify a Smart Export file for importing via Smart Import.
Level: 32
Type: ERROR
Impact: Other

ODI-10106: Smart Import response file name cannot be null.
Causes: Smart import response file name not specified for Smart Import.
Action: Specify a Smart Import response file.
Level: 32
Type: ERROR
Impact: Other

ODI-10107: Smart Import file [0] not found.
Causes: File does not exist.
Action: Specify an existing Smart Export file for importing via Smart Import.
Level: 32
Type: ERROR
Impact: Other

ODI-10108: Smart Import response file [0] not found.
Causes: Response file does not exist.
Action: Specify an existing Smart Import response file.
Level: 32
Type: ERROR
Impact: Other

ODI-10109: File [0] is not a valid Smart Import Response file.
Causes: File is not a valid Smart Import response.
Action: Specify an existing Smart Import response file.
Level: 32
Type: ERROR
Impact: Other

ODI-10110: [0] with the same [1] exists.
Causes: An object with the same alternative key value(s) exists.
Action: Change the alternative key value to be unique.
Level: 32
Type: ERROR
Impact: Other

66-110  Product Title/BookTitle as a Variable
Cause: A referenced object does not exist.
Action: Either import the missing object or change to reference a different object.

Level: 32
Type: WARNING
Impact: Other

ODI-10112: Project code will be changed from <{0}> to <{1}>.
Cause: The import will make a change to an existing project code.
Action: Determine whether the change to project code is desired or not.

Level: 32
Type: WARNING
Impact: Other

ODI-10113: {0} with {1} <{2}> does not exist.
Cause: A referenced object does not exist.
Action: Either import the missing object or change to reference a different object.

Level: 32
Type: WARNING
Impact: Other

ODI-10114: {0} with {1} id <{2}> does not exist.
Cause: A referenced object does not exist.
Action: Either import the missing object or change to reference a different object.

Level: 32
Type: WARNING
Impact: Other

ODI-10115: {0} with the same name <{1}> already exists.
Cause: A different object with the same name already exists.
Action: Either change the name of the object being imported or use match by name to match to the already existing object with the same name.

Level: 32
Type: WARNING
Impact: Other

ODI-10116: Model code will be changed from <{0}> to <{1}>.
Cause: The import will make a change to an existing model code.
Action: Determine whether the change to model code is desired or not.

Level: 32
Type: WARNING
Impact: Other

ODI-10117: Sub-model code will be changed from <{0}> to <{1}>.
Cause: The import will make a change to an existing sub-model code.
Action: Determine whether the change to sub-model code is desired or not.
Level: 32
Type: WARNING
Impact: Other

ODI-10118: A different Physical Schema is already set as the default physical schema for the same data server.
Cause:
Action:
Level: 32
Type: WARNING
Impact: Other

ODI-10119: A different Context is already set as the default Context.
Cause:
Action:
Level: 32
Type: WARNING
Impact: Other

ODI-10120: Context code will be changed from \(<\{0\}\) to \(<\{1\}\>.
Cause: The import will make a change to an existing context code.
Action: Determine whether the change to context code is desired or not.
Level: 32
Type: WARNING
Impact: Other

ODI-10121: Logical schema name will be changed from \(<\{0\}\) to \(<\{1\}\>.
Cause: The import will make a change to an existing logical schema name.
Action: Determine whether the change to logical schema name is desired or not.
Level: 32
Type: WARNING
Impact: Other

ODI-10122: Logical agent name will be changed from \(<\{0\}\) to \(<\{1\}\>.
Cause: The import will make a change to an existing logical agent name.
Action: Determine whether the change to logical agent name is desired or not.
Level: 32
Type: WARNING
Impact: Other

ODI-10123: \(<\{0\}\) with \(<\{1\}\) \(<\{2\}\) and \(<\{3\}\) \(<\{4\}\> does not exist.
Cause: A referenced object does not exist.
Action: Either import the missing object or change to reference a different object.
Level: 32
Type: WARNING
Impact: Other

ODI-10124: Smart import of file `{0}` cannot be run due to unfixed critical issues.
  Cause: Critical issues exist for objects in the Smart Import.
  Action: A fix must be provided for all critical issues before the Smart Import can be run.

Level: 32
Type: ERROR
Impact: Other

ODI-10125: Smart Export file name cannot be null.
  Cause: Smart Export file name not specified for Smart Export.
  Action: Specify a Smart Export file via Smart Export.

Level: 32
Type: ERROR
Impact: Other

ODI-10126: File `{0}` already exists.
  Cause: The file already exists.
  Action: Specify another file name.

Level: 32
Type: ERROR
Impact: Other

ODI-10127: Column position `{0}` is being used by another object `<{1}>`.
  Cause: The position value is already in use.
  Action: Specify a unique position value.

Level: 32
Type: ERROR
Impact: Other

ODI-10128: Multiple primary keys found. Only one primary key can be defined per datastore.
  Cause: Multiple primary keys defined.
  Action: Delete or match primary keys so that only one is defined.

Level: 32
Type: ERROR
Impact: Other

ODI-10129: Object with id `{0}` and type `{1}` is not a smart exportable object.
  Cause: Smart Export does not support the type of object specified.
  Action: Do not export this object.
Level: 32
Type: ERROR
Impact: Other
ODI-10130: Smart Import Response file {0} is not valid for Smart Export file {1}.
Cause: Smart Import Response file was not generated for the Smart Export file being imported.
Action: Specify a Smart Import response file that belongs to the Smart Export file being imported.

Level: 32
Type: ERROR
Impact: Other
ODI-10131: Entity of type {0} cannot be merged.
Cause: Wrong entity type.
Action: Check entity type.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-10132: Entity of type {0} cannot be removed.
Cause: Wrong entity type.
Action: Check entity type.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-10133: Cannot create a transaction against the extended persistent context [{0}].
Cause: Another persistence context is already bound to the current thread.
Action: Unbound persistence context from current thread.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-10134: You don't have READ permission on at least one object from the collection/list.
Cause: Insufficient level of permissions.
Action: Check your permissions

Level: 32
Type: ERROR
Impact: Security
ODI-10135: Max value ({1}) reached for sequence {0} and reset is not allowed.
Cause: Reset is not allowed.
Action: Check configuration of sequence behaviour.
Level: 32
Type: ERROR
Impact: Other

ODI-10136: Illegal transaction state: transaction synchronization is active but entity manager is not synchronized within the transaction.
Cause: Entity manager is not synchronized within the transaction.
Action: Synchronize entity manager and try again.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10137: Your program needs to set authentication first.
Cause: There is no authentication set.
Action: Set authentication via 
odiInstance.getSecurityManager().setGlobalAuthentication(.) or 
odiInstance.getSecurityManager().setCurrentThreadAuthentication(.), see the SecurityManager API for more detail.

Level: 32
Type: ERROR
Impact: Security

ODI-10138: Unable to create DwgConnectConnection to {0} repository.
Cause: Exception during connection.
Action: Check repository configuration.

Level: 32
Type: ERROR
Impact: Other

ODI-10139: {0} must not be null or empty.
Cause: Parameter is null or empty.
Action: Check parameter name.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10140: {0} must be greater or equal 0.
Cause: Parameter is negative.
Action: Check parameter value.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10141: Unable to create datasource provider from class [{0}].
Cause: Exception during creation.
Action: Check configuration.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10142: Active transaction is required to use the method {0} on the TransactionalOdiEntityManager.
Cause: Transaction isn't active.
Action: Check transaction state.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10143: Error while accessing the {0} repository.
Cause: Network problems.
Action: Check the network connection and the database status.

Level: 32
Type: ERROR
Impact: Network

ODI-10144: OdiInstance is closed.
Cause: OdiInstance is closed.
Action: Check OdiInstance status.

Level: 32
Type: ERROR
Impact: Other

ODI-10145: Limited persistence support.
Cause: Limited persistence support.
Action: Check OdiInstance configuration.

Level: 32
Type: ERROR
Impact: Other

ODI-10146: Cannot create JDBC DataSource for this type of DataServer.
Cause: Invalid connection provider.
Action: Check connection provider.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10147: Repository type mismatches.
Cause: Wrong repository type.
Action: Check repository type.
Level: 32
Type: ERROR
Impact: Configuration

ODI-10148: Repository is in error install/upgrade state and needs to be repaired. Connection has been disabled.
Cause: Repository install/upgrade did not complete successfully.
Action: Check install/upgrade log files and/or ODI user documentation for information on reparation process.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10149: Local Repository table is empty.
Cause: Local Repository table is empty.
Action: Check repository configuration.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10150: Work repository with ID {0} is not bound to master: Definition in master ID:{0}, Name:{1}, Timestamp:{2} Definition in work ID:{3}, Name:{4}, Timestamp:{5}.
Cause: Work repository with ID is not bound to master repository.
Action: Check work and master repositories configuration.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10151: Unable to get ID for entity {0}.
Cause: Wrong entity ID.
Action: Check entity ID.

Level: 32
Type: ERROR
Impact: Security

ODI-10152: I_OBJECTS for entity class {0} is not found.
Cause: Entity type is not mapped to I_OBJECTS.
Action: Check entity class.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10153: {0} is denied.
Cause: Insufficient level of permissions.
Action: Check permissions.
Level: 32
Type: ERROR
Impact: Security

ODI-10154: [0] is denied for [1].
Cause: Insufficient level of permissions.
Action: Check permissions.

Level: 32
Type: ERROR
Impact: Security

ODI-10155: You don't have [0] permission on at least one object from the collection/list.
Cause: Insufficient level of permissions.
Action: Check permissions.

Level: 32
Type: ERROR
Impact: Security

ODI-10156: Impossible to connect to JPS MBean Server.
Cause: Exception during connection.
Action: Check configuration.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10157: [0]: must call preWebLogic() before postWebLogic().
Cause: Wrong API usage.
Action: Call preWebLogic() before postWebLogic().

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10158: The credential with map name [0] and key [1] already exists.
Cause: Wrong credential.
Action: Check credential configuration.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10159: The user [0] hasn't required CONNECT profile.
Cause: The user hasn't required profile.
Action: Grant the user CONNECT profile first.
Level: 32
Type: ERROR
Impact: Security

**ODI-10160: Unable to load user.**
*Cause:* Exception during user loading.
*Action:* Check repository connection.

Level: 32
Type: ERROR
Impact: Other

**ODI-10162: This OPSS user "[0]" is not registered to Oracle Data Integrator.**
*Cause:* The user is not registered to ODI.
*Action:* Check user name.

Level: 32
Type: ERROR
Impact: Configuration

**ODI-10163: This OPSS user "[0]" has different GUID than the one found in Oracle Data Integrator repository.**
*Cause:* OPSS user differs from ODI user in GUID.
*Action:* Check user GUID.

Level: 32
Type: ERROR
Impact: Security

**ODI-10164: Only supervisor user can invoke this API.**
*Cause:* Insufficient level of permissions.
*Action:* Check user role.

Level: 32
Type: ERROR
Impact: Security

**ODI-10165: The RunAsUser {0} is not a valid user from external user identity store.**
*Cause:* User isn’t valid.
*Action:* Check user.

Level: 32
Type: ERROR
Impact: Security

**ODI-10166: The RunAsUser: {0} has different GUID in ODI repository and external user identity store.**
*Cause:* User from external user identity store differs from ODI user in GUID.
*Action:* Check user.
Level: 32
Type: ERROR
Impact: Security

ODI-10167: Authentication is missing.
Cause: Authentication is missing.
Action: Check authentication configuration.

Level: 32
Type: ERROR
Impact: Security

ODI-10168: There is already an Authentication bound to this thread.
Cause: There is already an Authentication bound to this thread.
Action: Check authentication configuration.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10169: Trying to set authentication object which is not created by this security manager.
Cause: Authentication object isn’t created by this security manager.
Action: Check authentication configuration.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10170: There is currently no Authentication bound to this thread.
Cause: There is currently no Authentication bound to this thread.
Action: Check authentication configuration.

Level: 32
Type: ERROR
Impact: Security

ODI-10171: There is already an Authentication bound as global Authentication.
Cause: There is already an Authentication bound as global Authentication.
Action: Check authentication configuration.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10172: There is currently no global Authentication bound to this SecurityManager.
Cause: There is currently no global Authentication bound to this SecurityManager.
Action: Check authentication configuration.
Level: 32  
Type: ERROR  
Impact: Security  

ODI-10173: You are not authorized to change the password for external user "{0}".  
Cause: Insufficient level of permissions.  
Action: Check permissions.  

Level: 32  
Type: ERROR  
Impact: Security  

ODI-10174: You are not authorized to change the password for user "{0}".  
Cause: Insufficient level of permissions.  
Action: Check permissions.  

Level: 32  
Type: ERROR  
Impact: Security  

ODI-10175: You are not authorized to change the password for external user.  
Cause: Insufficient level of permissions.  
Action: Check permissions.  

Level: 32  
Type: ERROR  
Impact: Security  

ODI-10176: Authentication is needed to change password.  
Cause: Authentication is missed.  
Action: Authenticate first.  

Level: 32  
Type: ERROR  
Impact: Security  

ODI-10177: ODI was not able to load the jdbc driver class "{0}" provided on {1}.  
Cause: Wrong jdbc driver class.  
Action: Check that the driver class name is correct and that this driver is available to ODI classloader.  

Level: 32  
Type: ERROR  
Impact: Other  

ODI-10178: The jdbc URL "{1}" was not accepted by the jdbc driver class "{0}" provided on {2}.  
Cause: Insufficient jdbc URL.  
Action: Check that the jdbc URL and the driver class name are matching.
ODI-10179: Client requires a repository with version \{0\} but the repository version found is \{1\}.
  Cause: Insufficient repository version.
  Action: Check repository configuration.

ODI-10180: ODI was not able to load the jdbc driver class \{0\} specified in ODI topology for work repository \{1\}.
  Cause: Wrong jdbc driver class.
  Action: Check that the driver class name is correct and that this driver is available to ODI classloader. If the driver class name is incorrect please connect to ODI topology to fix it.

ODI-10181: Uncategorized configuration exception.
  Cause: An unexpected error occurred.
  Action: Check exception cause for details.

ODI-10182: Uncategorized exception during repository access.
  Cause: An unexpected error occurred.
  Action: Check exception cause for details.

ODI-10183: \{0\} is an invalid finder class.
  Cause: Wrong finder class.
  Action: Check finder class.

ODI-10184: Could not get ESS \{0\}.
  Cause: Exception during session retrieving.
Action: Check configuration and try again.

Level: 32
Type: ERROR
Impact: Session

ODI-10185: Operation is not granted.
Cause: Current level of permission is not sufficient.
Action: Check your permissions.

Level: 32
Type: ERROR
Impact: Security

ODI-10186: User {0} is inactive.
Cause: There is no GUID defined for this User in ODI repository
Action: Check user GUID.

Level: 32
Type: ERROR
Impact: Security

ODI-10187: The authentication API is used in wrong way.
Cause: The authentication API is used in wrong way.
Action: Check usage of API.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10188: Error while login from OPSS.
Cause: Exception was thrown during login process.
Action: Make sure OPSS is configured correctly for this installation.

Level: 32
Type: ERROR
Impact: Other

ODI-10189: The password violates the following rule: "Password policy {0}". Select another password.
Cause: Weak password
Action: Check password policy and correct password.

Level: 32
Type: ERROR
Impact: Security

ODI-10190: The user {0} has its account expired.
Cause: Account expired
Action: Request supervisor for account unlocking.
Level: 32
Type: ERROR
Impact: Security

ODI-10191: Unable to create datasource provider.
Cause: Exception during creation.
Action: Check configuration.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10192: Unable to retrieve user GUID.
Cause: Exception during GUID retrieving.
Action: Check repository connection.

Level: 32
Type: ERROR
Impact: Other

ODI-10193: Unexpected null value in port.
Cause: JPS port value is null.
Action: Check JPS configuration.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10194: Uncategorized security exception.
Cause: An unexpected error occurred.
Action: Check exception cause for details.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10195: CsfAccessor is only available for CsfPasswordStorageConfiguration
Cause: Password storage configuration is internal.
Action: Check storage configuration.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10196: Error while accessing the repository.
Cause: Network problems.
Action: Check the network connection and the database status.

Level: 32
Type: ERROR
Impact: Network
ODI-10197: Instance is not connected to a work repository
    Cause: Work datasource is null.
    Action: Check work datasource.
    Level: 32
    Type: ERROR
    Impact: Programmatic
ODI-10198: Context with code '{0}' wasn't found.
    Cause: Context wasn't found.
    Action: Check context code.
    Level: 32
    Type: ERROR
    Impact: Programmatic
ODI-10199: Incorrect ODI username or password.
    Cause: Incorrect ODI username or password.
    Action: Check username and password.
    Level: 32
    Type: ERROR
    Impact: Security
ODI-10200: Work repository {0} wasn't found.
    Cause: Wrong repository name or repository isn't defined.
    Action: Check repository name.
    Level: 32
    Type: ERROR
    Impact: Programmatic
ODI-10201: The user {0} has its password expired.
    Cause: Account expired
    Action: Request supervisor for changing password.
    Level: 32
    Type: ERROR
    Impact: Security
ODI-10202: Supervisor privilege is required to setup repository.
    Cause: Insufficient level of permissions.
    Action: User supervisor account for this operation.
    Level: 32
    Type: ERROR
    Impact: Security
ODI-10203: Transaction state is illegal.
Cause: Transaction state is illegal.
Action: Check transaction state.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10204: Inappropriate usage of a ODI transaction API.
Cause: Inappropriate usage of a ODI transaction API.
Action: Check ODI transaction API.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10205: Unexpected rollback.
Cause: Attempt to commit a transaction resulted in an unexpected rollback.
Action: Check transaction.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10206: Transaction can't be created.
Cause: Exception was thrown during transaction creation.
Action: Check transaction.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10207: Uncategorized exception during transaction system usage.
Cause: An unexpected error occurred.
Action: Check exception cause for details.

Level: 32
Type: ERROR
Impact: Other

ODI-10208: Error when changing password for user {0}.
Cause: An unexpected error occurred.
Action: Check exception cause for details.

Level: 32
Type: ERROR
Impact: Other

ODI-10209: Cannot access a closed IODiEntityManager.
Cause: IODiEntityManager has been closed.
Action: Check IODiEntityManager state.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10210: File {0} does not contain any objects to be imported by Smart Import.
   Cause: Smart Export file specified for Smart Import is empty.
   Action: Specify a Smart Export file with objects for importing via Smart Import.

Level: 32
Type: ERROR
Impact: Other

ODI-10211: Unsupported Java Character Set: {0}
   Cause: Unsupported Java Character Set.
   Action: Check Java charset.

Level: 32
Type: ERROR
Impact: Other

ODI-10212: Parent object {0}: "{1}" already has child {2}: "{3}". Technical details: {2}:
   "{3}" violates alternate key constraint {4} {5} for values {6}
   Cause: Object violated alternate key constraint.
   Action: Check object properties and constraint's values.

Level: 32
Type: ERROR
Impact: Other

ODI-10213: Fixed format file field {0} (starts at {1} ends at {2}) has a file position that
   overlaps with the file position of field {3} (starts at {4} ends at {5}).
   Cause: Two fields from a fixed format file have overlapping file positions.
   Action: Modify the file positions or remove a field if the overlapping file positions are not correct.

Level: 32
Type: ERROR
Impact: Other

ODI-10214: Fixed format file fields {0} (starts at {1} ends at {2}) and {3} (starts at {4}
   ends at {5}) have unused file positions between them.
   Cause: Two fields from a fixed format file have unused file positions between them.
   Action: Modify the file positions if having unused file positions is not correct.

Level: 32
Type: ERROR
Impact: Other

ODI-10215: It is forbidden to import a log into a repository using any other import mode except "Synonym Mode Insert".
Cause: Import mode is not "Synonym Mode Insert".
Action: Correct import mode.
Level: 32
Type: Error
Impact: Other

ODI-10216: Upgrade key cannot be null when importing objects from before ODI 12C.
Cause: Upgrade key is not set for import that must upgrade objects to have global ids.
Action: Specify the upgrade key to be used.
Level: 32
Type: Error
Impact: Other

ODI-10217: Permission check failed for instance object {0}.
Cause: Permission check failed for instance object.
Action: Need to grant initial permission for creator on object.
Level: 32
Type: NOTIFICATION
Impact: Other

ODI-10218: Invalid WAS_HOME ("{0}") set or WebSphere library jar ("{1}") not found under WAS_HOME/plugins.
Cause: Wrong WAS_HOME set (or) WebSphere libraries (com.ibm.ws.admin.core.jar, com.ibm.ws.admin.services.jar, com.ibm.ws.runtime.jar) are moved
Action: Check that the environment-variable WAS_HOME is set properly to point to WebSphere Application Server root. Also, ensure the libraries exist under WAS_HOME/plugins.
Level: 32
Type: ERROR
Impact: Other

ODI-10219: ODI Library for WebSphere access ("{0}") not found.
Cause: Library could be moved / deleted
Action: Check that the specified library present
Level: 32
Type: ERROR
Impact: Other

ODI-10220: ODI was unable to find the technology "{0}".
Cause: Missing technology.
Action: Check that this technology is defined in the repository.
Level: 32
Type: ERROR
Impact: Other

ODI-10221: It's taken {0} second to synchronize Snp_Ent_Principal table content.
Cause:
Action:
Level: INFO
Type: NOTIFICATION
Impact: Other

ODI-10222: The compatible Mapping/ReusableMapping {0} can only be modified by 11g SDK.
Cause: An attempt was made to modify compatible Mapping using 12c SDK.
Action: Modify compatible Mapping using 11g Interface SDK.
Level: 32
Type: ERROR
Impact: Other

ODI-10223: A non-legacy compatible import source cannot be imported into a legacy compatible repository.
Cause: An attempt was made to import a non-legacy compatible import source into a legacy compatible repository.
Action: Import a legacy compatible import source or make repository not legacy compatible.
Level: 32
Type: Error
Impact: Other

ODI-10224: You are not authorized to create new user.
Cause: Only SUPERVISOR could create users.
Action: Check permissions.
Level: 32
Type: ERROR
Impact: Security

ODI-10225: Invalid wallet password: A valid password must have a minimum length of eight characters and contain alphabetic characters combined with numbers or special characters.
Cause: Invalid wallet password.
Action: Please choose a valid wallet password accordingly.
Level: 32
Type: ERROR
Impact: Security

ODI-10226: Wallet already exists.
Cause: Try to create a wallet which already exists.
Action: Please stop creating a wallet. Instead use the existing one.

Level: 32
Type: ERROR
Impact: Security

ODI-10227: Wallet new password is same as old password.
Cause: You provide a new wallet password which is the same as the old one.
Action: Please choose different wallet password than the old one.

Level: 32
Type: ERROR
Impact: Security

ODI-10228: Repository with id "{0}" or with name "{1}" has been already used in your master repository.
Cause: Master repository has already work repository with the same name or id.
Action: Check your master repository and work repository.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10229: Repository with id "{0}" has been already used in your master repository.
Cause: Master repository has already work repository with the same id.
Action: Check your master repository and work repository.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10230: Repository with name "{0}" has been already used in your master repository.
Cause: Master repository has already work repository with the same name.
Action: Check your master repository and work repository.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10231: Interface {0} cannot be imported because source temporary interface / mapping {1} is not found.
Cause: An attempt was made to import an interface with a source temporary interface / mapping that cannot be found in the import source or target repository.
Action: Import the missing source temporary interface / mapping.

Level: 32
Type: ERROR
Impact: Other

ODI-10232: The password violates the following rule: "New password must be different from old one". Select another password.
Cause: Weak password
Action: Check password policy and correct password.
Level: 32
Type: ERROR
Impact: Security

ODI-10235: No Importable files found
Cause: None of XML files imported from ZipFolder
Action: Check XML files to be imported from Zip Folder
Level: 32
Type: ERROR
Impact: Other

ODI-10236: Object must be replaced with an object of same KM type
Cause: KM of different type to the existing KM was selected for import replace.
Action: Import Replace KM with existing KM type
Level: 32
Type: ERROR
Impact: Other

ODI-10237: Object not replaced
Cause: A KM was selected for the Import Replace with a different type to the current KM.
Action: Select a KM of the same type for import replace.
Level: 32
Type: WARNING
Impact: Other

ODI-10238: Object must be replaced with an object of same type
Cause: Different ODI object is used to Import Replace KM
Action: Import Replace KM with Same type
Level: 32
Type: ERROR
Impact: Other

ODI-10243: Cannot import an export file with parents using regular import and INSERT_UPDATE mode. Use smart import instead.

Cause: An attempt was made to import an export file created with parent objects using regular import and INSERT_UPDATE mode. This would cause all other objects under the parent objects and not in the import file to be deleted.

Action: Use smart import to import an export file created with parent objects when INSERT_UPDATE functionality is needed.

Level: 32
Type: ERROR
Impact: Other

ODI-13700: Unable to set the role OWB_USER for this user.

Cause: An attempt was made to set the role OWB_USER for the connected user.

Action: Check that the role exists and the connected user is an OWB user.

Level: 1
Type: ERROR
Impact: Other

ODI-13701: Unable to set the workspace {0} for this user.

Cause: An attempt was made to select the OWB workspace for the connected user.

Action: Check that the workspace exists and the connected user has got privilege to access it.
Level: 1
Type: ERROR
Impact: Other

ODI-13702: Unexpected error when connecting to OWB workspace {0}.
  Cause: An unexpected error occurred when connecting to workspace.
  Action: Verify that the Owb repository is up and running.

Level: 1
Type: ERROR
Impact: Other

ODI-13703: Unexpected error when locating object {0} in OWB workspace {1}.
  Cause: An unexpected error occurred when locating an object in a workspace
  Action: Verify that the Owb repository is up and running and the object exists.

Level: 1
Type: ERROR
Impact: Other

ODI-13704: Could not locate the physical schema associated with OWB workspace {0} in context {1}.
  Cause: An error occurred when finding the schema related to an OWB workspace in a context.
  Action: Verify that the OWB workspace is related to a physical schema in the context.

ODI-14101: Checking for Pre 4.3.3.2 Version
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-14102: Upgrading To Master Repository Till 4.3.3.2 Version
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-14103: Upgrading Master Repository Post 4.3.3.2 Version
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-14104: Reimporting Metadata
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-14105: Reimporting Security Seed Data
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-14106: Getting Work Repositories
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-14107: Found {0} Work Repositories to Upgrade
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-14108: Upgrading {0} Work Repository
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-14109: Cannot Connect To Work Repository
**ODI-14110: Work Repository \{0\} Is In Invalid State.**

*Cause:*
- Cannot Connect To Work Repository \{0\}

*Action:*
- Check your connection settings or database

*Level:* 32  
*Type:* ERROR  
*Impact:* Other

**ODI-14111: Work Repository Already Up To Date.**

*Cause:*

*Action:*

*Level:* 32  
*Type:* SET_AT_RUNTIME  
*Impact:* Other

**ODI-14112: Converting All Interface to Mapping**

*Cause:*

*Action:*

*Level:* 32  
*Type:* SET_AT_RUNTIME  
*Impact:* Other

**ODI-14113: Work repository is already attached to the master repository.**

*Cause:*
- Attempt to attach already attached work repository was made.

*Action:*
- Please do not attach the work repository again to the master repository.

*Level:* 32  
*Type:* ERROR  
*Impact:* Other

**ODI-15000: BSF Not Present**

*Cause:*
- Bean Scripting Framework manager cannot be found.

*Action:*
- Ensure that class org.apache.bsf.BSFManager is available in the classpath.

*Level:* 32  
*Type:* ERROR  
*Impact:* Programmatic

**ODI-15001: No End Separator for the following text:**

*Cause:*
- No end delimiter found for a delimited text in the expression.

*Action:*
- Add an end delimiter to the delimited text.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15002: The string to be transformed cannot be null.
Cause: Parsing failed for an expression reference tag.
Action: Fix the expression.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15003: Error during Code Interpreter creation
Cause: Code generator internal error.
Action: Contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15005: The datatype "{0}" does not exist in technology: {1}.
Cause: The datatype for a column is not supported by the technology.
Action: Change the datatype or the technology of the execution location.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15006: The source datatype is null for the column: {0}, and the technology: {1}.
Cause: The datatype for a column is null for the technology.
Action: Change the datatype or the technology of the execution location.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15007: Syntax not set for 'Create Table' for the datatype: {0} for the technology: {1}.
Cause: The execution location technology does not have any "Create Table" syntax set up.
Action: Edit the technology definition and add "Create Table" syntax.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15009: No text for the 'Writable Datatype Syntax' for the datatype: {0} in technology: {1}.
Cause: The datatype does not have a "Writable Datatype Syntax" property value set up for the execution location technology.
Action: Edit the datatype in the technology to add a "Writable Datatype Syntax".

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15010: No conversion for the datatype {0}, for the source technology {1} and for the target technology {2}
Cause: No conversion is defined for the source technology datatype to the target technology datatype.
Action: Edit the source or target technology datatype to add a conversion from the source to the target datatype.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15011: The variable does not exist in the database.
Cause: A variable is being referenced but it does not exist in the repository.
Action: Create the variable in the repository.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15012: Sequence does not exist in database
Cause: A sequence is referenced but does not exist in the repository.
Action: Create the sequence in the repository.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15013: The table {0} has fatal errors.
Cause: The table cannot be processed.
Action: Check the table for inconsistencies.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15014: The referenced text does not exist in the database.
Cause: The text reference in the expression does not exist in the repository.
Action: Repository corruption has occurred, contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15015: Too much recursion in this text resolution.
Cause: The expression text references other text recursively too many times.
Action: Review the expression and try to simplify.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15016: Commands Undefined.
Cause: KM is missing a block of lines.
Action: Check the KM.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15017: Table not selected (null).
Cause: Target table not found.
Action: Check interface for consistency.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15018: CKM not selected.
Cause: The CKM is not selected for the object.
Action: Select a CKM.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15019: Missing context
Cause: The context object cannot be found.
Action: Check the context selection.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15020: No JKM available
Cause: JKM has not been set or is not found.
Action: Set a valid JKM for the interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15021: Journalizing requires a Primary Key on the Table:
Cause: Journalizing is enabled, but the target table has no primary key.
Action: Add a primary key to the target table.
Level: 32  
**Type:** ERROR  
**Impact:** Programmatic  

**ODI-15022: No RKM Set.**  
**Cause:** RKM has not been set or is not found.  
**Action:** Set a valid RKM for the object.

Level: 32  
**Type:** ERROR  
**Impact:** Programmatic  

**ODI-15023: Cannot perform standard reverse. Choose customized reverse and set RKM.**  
**Cause:** Standard reverse engineering is not supported for this object.  
**Action:** Select customized reverse engineering for the object and select an RKM.

Level: 32  
**Type:** ERROR  
**Impact:** Programmatic  

**ODI-15025: The interface clause text does not exist.**  
**Cause:** The interface clause refers to text that does not exist.  
**Action:** Check interface clauses for (join, filter, etc.) for consistency.

Level: 32  
**Type:** ERROR  
**Impact:** Programmatic  

**ODI-15026: Interface clauses are missing.**  
**Cause:** The code generator cannot find the clause collection for the interface.  
**Action:** Check the interface for consistency.

Level: 32  
**Type:** ERROR  
**Impact:** Programmatic  

**ODI-15027: Interface source tables are missing.**  
**Cause:** The code generator cannot find the source table collection for the interface.  
**Action:** Check the interface for consistency.

Level: 32  
**Type:** ERROR  
**Impact:** Programmatic  

**ODI-15028: Interface result collection is null.**  
**Cause:** Internal error.  
**Action:** Contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15029: Interface error clause collection is missing.
Cause: Internal error.
Action: Contact Oracle support.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15030: Interface is missing the integration work table collection.
Cause: Internal error.
Action: Contact Oracle support.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15031: Technology not selected.
Cause: No technology is selected for the interface target execution location.
Action: Check the technology selection for the interface target.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15032: Unknown object in interface source table collection
Cause: Internal Error.
Action: Contact Oracle support.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15033: The expression: {0} does not have an associated column.
Cause: The expression should represent a column, but no column is found for the name.
Action: Fix the expression.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15034: A scenario with the same name and the same number already exists. Please select other values.
Cause: Cannot create a duplicate scenario with the same name and version number as an existing scenario.
Action: Give the scenario a different name or version.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15036: Scenario's name and/or number are missing.
  Cause: A scenario must have a name and version, but the name or version is missing.
  Action: Set values for name and version for the scenario.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15037: The interface [0] has fatal errors.
  Cause: The interface has fatal errors.
  Action: Check and fix interface issues.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15038: The scenario name substitution pattern [0] is not supported. Please check the user parameter for the scenario naming convention.
  Cause: Invalid substitution pattern used for scenario name.
  Action: Change the substitution pattern.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15039: The interface [0] use native sequence. Native sequence are not allowed for Derived Table (sub select statement)
  Cause: Native sequence was used in a sub-select or derived interface.
  Action: Remove the native sequence usage.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15040: Errors detected when building SQL clauses.
  Cause: An error occurred when generating code for the SQL clauses.
  Action: Fix the interface clauses.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15041: An aggregation function may not be used in a join condition. Please use a separate interface for the aggregation and join the result in this interface.
  Cause: An aggregation function was used inside a join condition expression.
  Action: Change the join condition to remove the aggregation function.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15042: Unable to regenerate this scenario. It references an package that does not exist.
Cause: The scenario must reference a package, but it doesn’t.
Action: Delete the scenario and create a new one.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15043: Unable to regenerate this scenario from a Runtime repository.
Cause: The scenario must cannot be regenerated from the runtime repository.
Action: Delete the scenario and create a new one.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15044: Invalid pScenSource type when calling SnpGeneratorSOLCIT.mainGenScenSourceScenario
Cause: Internal error.
Action: Contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15045: Invalid value for KM type.
Cause: An invalid value was specified for the KM type.
Action: Specify a valid value.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15046: The column cache is null during code generation.
Cause: Internal Error.
Action: Contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15047: The cached column is null in the column cache during code generation.
Cause: Internal Error.
Action: Contact Oracle support.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15050: Flow Control not possible if no key is declared in your target datastore
Cause: Flow control is enabled for the interface, but the target datastore has no primary key defined.
Action: Define a primary key for the target datastore object, and re-add the target datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15051: Missing mapping instance for interface.
Cause: The target column does not have any mapping.
Action: Add a mapping expression for the target column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15052: The interface is missing a dataset.
Cause: There is no dataset for the interface source.
Action: Check the interface for consistency.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15055: Character "|" missing in: {0}.
Cause: A bracketed tag inside a KM line is missing a closing bracket ("|") character.
Action: Fix the KM line.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15057: Non-ordered outer join not supported for technology.
Cause: Non-ordered outer join syntax disabled for technology.
Action: Correct join.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15058: Variable scenario generation error: Logical schema is required.
Cause: Variable scenario cannot be generated if logical schema is not set.
Action: Set the logical schema.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15059: I_TXT is mandatory.
Cause: A call was made to SnpTxtCachedHashMap.getInstance, but the pITxt parameter was null.
Action: Contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15060: The JKM line {0} uses an unsupported execution channel: {1}
Cause: A line in the JKM uses an execution channel that is not supported.
Action: Change the line in the JKM to use a supported channel.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15061: The JKM line {0} uses an unsupported commit type: {1}
Cause: A line in the JKM uses a commit type that is not supported.
Action: Change the line in the JKM to use a supported commit type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15062: Invalid commit type: {0}
Cause: An invalid commit type was passed to SnpServiceGenerator.convertCommitType
Action: Contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15063: The alternate key {0} is not unique.
Cause: An alternate key defined by the repository is found to be non-unique.
Action: Check the data or the alternate key definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15064: The primary key {0} is not unique.
Cause: A primary key defined by the repository is found to be non-unique.
Action: Check the data or primary key definitions.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15065: Join error ({0}) between the table {1} and the table {2}.
Cause: A foreign key relationship is not found.
Action: A foreign key relationship between 2 tables defined in the repository is not valid.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15066: The column {0} cannot be null.
Cause: The column is marked in the repository as not nullable.
Action: Check the data, or change the not null value.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15067: The datatype value "{0}" is incorrect.
Cause: An invalid datatype has been found.
Action: The repository table contains an invalid datatype.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15068: Unknown flexfield code.
Cause: An undefined flex field code is being referenced
Action: Check the flex field references in the KM, and the flex field definitions

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15069: {0} Is not valid without session context.
Cause: A current session context does not exist.
Action: Check session definition.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15070: Unable to find method object: PythonInterpreter.initialize(Properties, Properties, String[]) method
Cause: The python method used by the script is not found.
Action: Check the KM step.
Level: 32
Type: ERROR
Impact: Other

ODI-15071: Error occurred
Cause: An exception was thrown while executing a python script in the KM step.
Action: Check the cause.

Level: 32
Type: ERROR
Impact: Other

ODI-15072: There is no PK constraint
Cause: There is a call to "getPK" in the KM, but no PK is found.
Action: Check the KM and the PK definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15073: There is no index
Cause: There is a call to "getIndex" in the KM, but no index is found.
Action: Check the KM and the index definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15076: no dataset
Cause: A KM line is calling "getDataSet", but no data set is found.
Action: Check the KM or the DataSet definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15077: No Current Model Set
Cause: There is a call to "getModel" in the KM, but no model is found.
Action: Check the KM and the model definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15078: There is no Not Null column
Cause: There is a call to "getNotNullCol" in the KM, but no not null column is found.
Action: Check the KM and the not null column definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15079: There is no current Pop.
Cause: There is a call to "getPop" in the KM, but no interface is found.
Action: Check the KM and the interface definitions.
Level: 32

ODI-15080: There is no Step
Cause: There is a call to "getStep" in the KM, but no step is found.
Action: Check the KM and the step definitions.
Level: 32

ODI-15081: There is no Target Table
Cause: There is a call to "getTargetTable" in the KM, but no target table is found.
Action: Check the KM and the interface target table definitions.
Level: 32

ODI-15083: Multiple Primary Keys have been detected for {0}.
Cause: A repository table can only have one primary key defined, but multiple primary keys are defined.
Action: Edit the table’s primary key definitions and remove all but one.
Level: 32

ODI-15084: There is no session
Cause: There is a call to "getSession" in the KM, but no session is found.
Action: Check the KM and the session definitions.
Level: 32

ODI-15085: The value : ''({0})'' is unknown.
Cause: A KM line has a templated call which contains an unknown bracketed property.
Action: Fix the KM.
Level: 32
Type: ERROR
Impact: Programmatic

**ODI-15086: There is no Temporary Index**
*Cause:* There is a call to "getTemporaryIndex" in the KM, but no temporary index is found.
*Action:* Check the KM and the temporary index definitions.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-15087: There is no current execution context defined.**
*Cause:* There is a call to "getContext" in the KM, but no context is found.
*Action:* Check the KM and the context definitions.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-15088: Not in designer mode**
*Cause:* A KM line has a call to access design information, but the interpretation location is not set to designer.
*Action:* Make sure that the interpretation location is set to designer when this line is executed.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-15089: asked '((0)) and available value are between 0 and ((1)).**
*Cause:* A KM line is calling "getDataSet", but the specified index is out of range.
*Action:* Fix the KM or the DataSet definitions.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-15090: Table "[0]" not found on model "[1]", schema "[2]"**
*Cause:* Attempt to initialize data services from a table that cannot be found
*Action:* Change data services reference or make sure that table exists

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-15091: Impossible to connect to JPS MBean Server**
*Cause:* Cannot connect to JPS MBean server.
*Action:* Internal Error.

**Level:** 32
Type: ERROR
Impact: Other

ODI-15092: Unable to generate data service - the column \{0\} does not exist in the database.
Cause: A data service references a column that does not exist
Action: Fix the data service reference or make sure that the column exists
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15093: Unable to regenerate this scenario. It references a null package.
Cause: The scenario must reference a package, but the package is null.
Action: Delete the scenario and create a new one.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15094: You must give a name for the published entity for each datastore.
Cause: A web services data store does not have a name.
Action: Give the data store a name.
Level: 32
Type: ERROR
Impact: Other

ODI-15095: Invalid entity for datastore: \{0\}
Cause: A web services data store has an invalid entity.
Action: Associate the data store with a valid entity.
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15096: Property name must not be null.
Cause: The KM line is calling "isColAttrChanged", but the property value is null.
Action: Internal error, contact Oracle support.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15097: Unknown value \{0\} for property
Cause: The KM line is making a templated call, but the property value is unknown.
Action: Fix the KM.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15098: You must define a data source for the model.
Cause: The model used by a web service does not have any data source.
Action: Define a data source for the model.
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15099: You must specify a JKM for the model.
Cause: The model used by a web service does not have an associated JKM.
Action: Define a JKM for the model.
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15100: You must define a Java package for the model.
Cause: The model used by a web service does not have an associated Java package.
Action: Define a Java package for the model.
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15101: Invalid Java package format: {0}
Cause: The Java package associated with a model has an invalid package format.
Action: Correct the package format for the model.
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15102: You must specify an XML namespace for the model.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15103: Invalid namespace: {0}
Cause: A model namespace used by a web service is invalid.
Action: Correct the namespace for the model.
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15104: You must specify an SKM for the model.
   Cause: A model used by a web service does not have an associated SKM.
   Action: Add an SKM to the model.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

ODI-15105: You must specify which schema the model will be deployed to.
   Cause: No web service deployment schema is specified for the model.
   Action: Specify a schema to which the model will be deployed.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

ODI-15106: You must specify a name for the Data Service for the model.
   Cause: The data service for the model does not have a name.
   Action: Set a valid name for the data service.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

ODI-15107: Invalid model code: {0}. It should follow the Java identifiers naming
   conventions.
   Cause: The web service model name does not follow the standard Java identifier
   naming convention.
   Action: Set a valid name for the model.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

ODI-15108: Invalid model Data Service name: {0}. It should follow the Java
   identifiers naming conventions.
   Cause: The web service model Data Service name does not follow the standard
   Java identifier naming convention.
   Action: Set a valid name for the model Data Service.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

ODI-15109: Invalid web service name for datastore: {0}
   Cause: The web service model data store has an invalid name.
   Action: Set a valid name for the model data store.
   Level: 32
- **Type**: SET_AT_RUNTIME
  **Impact**: Other

**ODI-15110: SKM is empty**
- **Cause**: The web service SKM has no valid lines.
- **Action**: Add some lines to the SKM.
- **Level**: 32
- **Type**: SET_AT_RUNTIME
- **Impact**: Other

**ODI-15111: Problem during deployment**
- **Cause**: Internal error.
- **Action**: Contact Oracle support.
- **Level**: 32
- **Type**: SET_AT_RUNTIME
- **Impact**: Deployment

**ODI-15113: Reverse table \[0\] for model \[1\] already exists.**
- **Cause**: An attempt was made to reverse engineer a table, but it already exists in the model.
- **Action**: Move or rename the data store in the model, or skip reverse engineering for the table.
- **Level**: 32
- **Type**: SET_AT_RUNTIME
- **Impact**: Other

**ODI-15116: There is not enough data in the target file to proceed with the reverse-engineering. Please make sure the file has at least one non-empty line and number of rows to skip is correct.**
- **Cause**: An attempt was made to reverse engineer a target file that is empty, or the number of skipped rows is larger than the number of rows in the file.
- **Action**: Set the number of skipped lines to a lower value, or add some data to the file.
- **Level**: 32
- **Type**: SET_AT_RUNTIME
- **Impact**: Other

**ODI-15117: Not allowed (OLD and NEW are involved)**
- **Cause**: The KM line is calling "getColumn", but the ADH action origin is not "NEW" or "OLD".
- **Action**: Change the ADH action origin.
- **Level**: 32
- **Type**: ERROR
- **Impact**: Programmatic

**ODI-15118: Invalid FTP URL**
**ODI-15119: Column \(0\) has no Java datatype.**  
**Cause:** The column being processed has no java datatype.  
**Action:** Internal Error: contact Oracle support.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-15120: Column \(0\) has no String datatype.**  
**Cause:** The column being processed has no string datatype.  
**Action:** Internal Error: contact Oracle support.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-15121: Selector must be not null**  
**Cause:** The ADH selector value must not be null when "getColumn" is called from the KM line.  
**Action:** Change the ADH selector value.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15122: Exception getPKColList**  
**Cause:** An exception was found when calling "getPKColList" during KM execution.  
**Action:** Fix the KM or the PK definitions.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15123: There is no AK constraint**  
**Cause:** There is a call to "getAK" in the KM, but no AK is found.  
**Action:** Check the KM and the AK definitions.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15125: Missing DataSet.**
Cause: The interface is missing a dataset.
Action: Check interface for consistency.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15126: The sub-model must be set.
Cause: The sub-model is not set for the source or target.
Action: Check the interface for consistency.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15127: There is no CK constraint
Cause: There is a call to "getCK" in the KM, but no CK is found.
Action: Check the KM and the CK definitions.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15128: There is no FK constraint
Cause: There is a call to "getFK" in the KM, but no FK is found.
Action: Check the KM and the FK definitions.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15129: Selector value must be 'OLD' or 'NEW'
Cause: The ADH selector value must be 'OLD' or 'NEW' when "getColumn" is called from the KM line.
Action: Change the ADH selector value.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15130: Unknown object in interface source table list
Cause: Internal Error.
Action: Contact Oracle support.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15131: You must define the name of each web service to be generated for each datastore.
ODI-01100 to ODI-40962

66-175

Cause: A web service associated with a data store has no name.
Action: Give a name to the web service.
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15132: Exception getPK
Cause: An exception was found when calling "getPK" during KM execution.
Action: Fix the KM or the PK definitions.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15135: There is no current index.
Cause: The current index can not be found for the property name.
Action: Check the reference.
Level: 32
Type: ERROR
Impact: Other

ODI-15140: Unable to regenerate the following scenario:
Cause: The scenario must reference a package, but it does not
Action: Delete the scenario and create a new one
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15141: Repository is not a development work repository
Cause: When getting a connection used to execute the KM, it was determined that
the provided connection information does not point to a development work
repository
Action: Fix the connection information
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15142: [PROPERTY: {0} not found.]
Cause: The bracketed property in the KM line (e.g. "[COL_NAME]") is not found.
Action: Fix the KM line to specify a correct property name.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15143: Invalid isolation level : {0}
Cause: An invalid isolation level value was passed to SnpServiceGenerator.convertIsolationLevel
Action: Contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15144: KM not encrypted since it is empty.
    Cause: KM was not encrypted since it is empty.
    Action: Skip encryption.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-15146: Data Type can't be null
    Cause: null DataType passed.
    Action: Pass non null DataType.
    Level: 32
    Type: ERROR
    Impact: Programmatic

ODI-15147: The changes on this target column will be lost since it is not saved (it has no mapping text)
    Cause: Target column will not be saved.
    Action: Enter mapping text if the column requires to be saved.
    Level: 32
    Type: WARNING
    Impact: Interface Issue

ODI-15148: The target datastore is not on the Oracle Technology: this interface cannot be used with the platform compiler
    Cause: Target datastore is not on Oracle.
    Action: Move target datastore to an Oracle schema.
    Level: 32
    Type: WARNING
    Impact: Interface Issue

ODI-15149: The staging area is not on the Oracle Technology: this interface cannot be used with the platform compiler
    Cause: Staging Area is not on Oracle.
    Action: Move Staging Area to an Oracle schema.
    Level: 32
    Type: WARNING
    Impact: Interface Issue
ODI-15150: The source datastore is not on the Oracle Technology: this interface cannot be used with the platform compiler

Cause: Source DataStore not on Oracle.

Action: Use only DataStores located on an Oracle technology.

Level: 32
Type: WARNING
Impact: Interface Issue

ODI-15151: Non ordered outer joins cannot be used with the platform compiler

Cause: An outer join is not ordered.

Action: Make the join ordered.

Level: 32
Type: WARNING
Impact: Interface Issue

ODI-15152: Unhandled Action [0]

Cause: This shouldn't happen. Programmer added an action in the enum and forgot to add it in switch.

Action: Add action in switch.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15153: The column is already the first column and cannot be moved up

Cause: Column already first and cannot be moved up.

Action: Do not try to move first column up.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15154: The column is already the last column and cannot be moved down

Cause: Column already last and cannot be moved down.

Action: Do not try to move last column down.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15155: Cannot move a target column to a position that is 0 or negative: [0]

Cause: Trying to move a column beyond the boundaries of column positions.

Action: Use a value between 1 and the number of columns.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-15156: Cannot move a target column to a position beyond the size of the column list: {0} is greater than {1}
    Cause: Trying to move a column beyond the boundaries of column positions.
    Action: Use a value between 1 and the number of columns.

    Level: 32
    Type: ERROR
    Impact: Programmatic

ODI-15157: Cannot remove the only dataset of interface {0}
    Cause: Trying to remove the last dataset of an interface is not permitted.
    Action: Make sure there are more than one dataset in the interface before deleting it.

    Level: 32
    Type: ERROR
    Impact: Programmatic

ODI-15159: Cannot move target columns on a non temporary DataStore.
    Cause: Trying to move columns on a non temporary DataStore.
    Action: Make sure that the target DataStore is temporary before attempting to move target columns.

    Level: 32
    Type: ERROR
    Impact: Programmatic

ODI-15160: Native Sequences may not be supported by the target technology after transforming with the Platform Compiler
    Cause: Using Native Sequence and Platform Compiler Enabled User Param Set
    Action: Make sure that all target technologies will support native sequences

    Level: 32
    Type: WARNING
    Impact: Programmatic

ODI-15162: The interface [0] use native sequence. Native sequence are not allowed for Derived Table (sub select statement)
    Cause: Using native sequence in derived sub interface
    Action: Make sure that none sub interface using native sequence

    Level: 32
    Type: ERROR
    Impact: Programmatic

ODI-15200: Tried to retrieve an int with an {0} object
    Cause: Attempted to read the column from RDB as an integer, but the column type is not integer
    Action: Internal Error: contact Oracle support

    Level: 32
Type: ERROR
Impact: Programmatic

ODI-15201: Tried to retrieve a short with an {0} object
Cause: Attempted to read the column from RDB as a short type, but the column type is not short
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15202: This resultset accepts only FETCHFORWARD requests
Cause: Attempted to set the fetch direction to something other than FETCH_FORWARD for a RDB result set read
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15203: This function is unsupported: the software you are using might not be compatible with this driver.
Cause: A jdbc call was made that is not supported by the currently loaded jdbc driver for RDB
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15204: The {0} call is not implemented in this result set class.
Cause: A result set call was made that is not implemented by the ODI RDB result set class
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15205: The call is not supported in this result set class.
Cause: A result set call was made that is not supported by the ODI RDB result set class
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15207: Unmanaged numeric type {0}
**Cause:** When selecting a parent row based on a primary key, multiple rows were returned

**Action:** Internal Error: contact Oracle support

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15208:** The PK column of the root table has an unknown type: {0}

**Cause:** When unloading data from the RDB, the PK column of the parent table has an unknown type

**Action:** Internal Error: contact Oracle support

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15209:** Unsupported technology (Driver: {0}, Url: {1})

**Cause:** The jdbc driver is not supported by the ODI RDB

**Action:** Internal Error: contact Oracle support

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15210:** Unsupported technology: HSQL cannot create FKs after the tables have been created

**Cause:** The Hypersonic SQL engine cannot create FK after the table is already created

**Action:** Internal Error: contact Oracle support

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15211:** Unsupported technology: HSQL cannot create PKs after the tables have been created

**Cause:** The Hypersonic SQL engine cannot create PK after the table is already created

**Action:** Internal Error: contact Oracle support

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15212:** Datatype NULL (0) unsupported

**Cause:** The Hypersonic SQL engine does not support the null datatype

**Action:** Internal Error: contact Oracle support

**Level:** 32
Type: ERROR
Impact: Programmatic

ODI-15213: JDBC Datatype '{0}' unsupported
Cause: The Hypersonic SQL engine does not support the datatype
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15214: JDBC Datatype '{0}' with length parameter unsupported
Cause: The Hypersonic SQL engine does not support the datatype with length
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15215: JDBC Datatype '{0}' with length and scale parameters unsupported
Cause: The Hypersonic SQL engine does not support the datatype with scale
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15216: JDBC Datatype '{0}' unsupported
Cause: The internal MS Sql Server database does not support the datatype
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15217: JDBC Datatype '{0}' with length parameter unsupported
Cause: The internal MS SQL Server database does not support the datatype with length
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15218: JDBC Datatype '{0}' with length and scale parameters unsupported
Cause: The internal MS SQL Server database engine does not support the datatype with length and scale
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15219: Please transform your URL into: {0};SelectMethod=cursor
Cause: The internal MS SQL Server database engine does not recognize the supplied URL.
Action: Change the format of the connection URL
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15220: need length param
Cause: The internal Oracle database does not support the selected type without a length param.
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15221: Datatype NULL (0) unsupported
Cause: The internal Oracle SQL engine does not support the null datatype.
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15222: JDBC Datatype '{0}' unsupported
Cause: The internal Oracle database does not support the datatype.
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15223: JDBC Datatype '{0}' with length parameter unsupported
Cause: The internal Oracle database does not support the datatype with length
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15224: JDBC Datatype '{0}' with length and scale parameters unsupported
Cause: The internal Oracle database engine does not support the datatype with length and scale
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15225: No key found on table {0}
Cause: The internal database table does not have a key
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15226: The root table {0} has no data
Cause: The internal database table does not have any data
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15227: Multiple keys found on table {0}
Cause: The internal database table has multiple keys
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15228: *** FATAL *** Table {0} could not be validated
Cause: The internal database cannot validate the table
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15229: *** FATAL *** Table {0} could not be found
Cause: The internal database cannot find the table
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15230: Could not convert object {0} to a {1}
Cause: The internal database cannot convert the datatype of the selected column
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic
ODI-15231: No '=' sign found on line {0} of bundle {1}
  Cause: The internal database engine encountered a syntax error when reading the property file
  Action: Fix the property file
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15232: The alias {0} for table {1} is already used by another table, when reading bundle {2}
  Cause: The internal database found a duplicate table alias in a property file
  Action: Fix the property file
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15233: Table {0} is used twice. Make sure that the table names and aliases do not conflict.
  Cause: The internal database found a duplicate table name in the property bundle
  Action: Fix the property file
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15234: Internal RDB database table {0} not found
  Cause: The requested table cannot be found in the internal database
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15235: Internal RDB database key {0} not found
  Cause: The requested key cannot be found in the internal database
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15236: Unknown table {0}
  Cause: The requested table cannot be found in the internal database
  Action: Correct the model
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15237: Duplicate table
  Cause: The internal database table is a duplicate table
  Action: Correct the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15238: Could not find table although we should have created it!
  Cause: The newly created table cannot be found
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15239: Only SnpsRDBDiffActionImportDifference are supported for now.
  Cause: When processing diff actions in a diff operation, an unsupported diff action class was found
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15240: Unknown key {0}
  Cause: When processing diff actions in a diff operation, a nonexistent key was specified by the diff action
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15241: This type of difference is not managed for now: {0}
  Cause: When processing diff actions in a diff operation, an unsupported diff action class was found
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15242: Unknown difference type: {0}
  Cause: When processing diff actions in a diff operation, an unknown diff class was found
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
Impact: Programmatic

ODI-15243: Bad model number: {0}
Cause: When processing diff actions in a diff operation, the 2 models that are being compared are internally numbered as model 1 and 2. A model number other than 1 or 2 was used internally in a call to getModel.
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15244: Could not add a key because {0} is not an ID key.
Cause: When building a model, the specified key class instance was not an id key
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15246: Unknown key type: {0}
Cause: When building a model, an unknown key class was found
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15247: The table {0} cannot be found. It is referenced by key: {1}.
Cause: When building a model, an table name is referenced by a key, but the table cannot be found
Action: Check the model
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15248: The column {0} in table {1} cannot be found. It is referenced by key: {2}.
Cause: When building a model, an column name is referenced by a key, but the column cannot be found
Action: Check the model
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15249: An {0} was caught while adding a key which is not an FK. Very strange.
Cause: When building a model, an column name is referenced by a key, but the column cannot be found
Action: Check the model
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15250: The key {0} referenced by table {1} cannot be found.
  Cause: When building a model, a key name is referenced by a table, but the key cannot be found
  Action: Check the model

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15251: A duplicate key was found: {0}
  Cause: When dropping a model, a duplicate key was found in the model
  Action: Check the model

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15252: Key already exists: {0}
  Cause: When updating a model, a duplicate key was found in the model
  Action: Check the model

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15253: Key not found: {0}
  Cause: When updating a model, the key was not found
  Action: Check the model

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15254: Could not find a constructor with a key name for class {0}
  Cause: When creating a key class instance, the constructor could not be found
  Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15255: Could not instantiate an object of class {0}
  Cause: Could not instantiate the key class
  Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15256: Could not create an object for class {0} for security reasons
  Cause: Could not instantiate the key class, due to a security failure
  Action: Check security settings
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-15257: Could create an object for class {0} because a {1} occurred saying {2}
  Cause: Could not instantiate the key class, due to an invocation target exception
  Action: Internal Error: contact Oracle support
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-15258: Column {0} not found
  Cause: The column could not be found
  Action: Internal Error: contact Oracle support
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-15259: The key class {0} is not an ID key class.
  Cause: The specified key class instance was not a SnpsRDBIdKey instance
  Action: Internal Error: contact Oracle support
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-15260: Could not add column {0}: Unsupported datatype: {1}
  Cause: Cannot add the column to the model because the datatype is not supported by the technology
  Action: Correct the model
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-15261: Unsupported action: {0}
  Cause: The action class is not supported by the ODI RDB
  Action: Internal Error: contact Oracle support
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-15262: Cannot drop column {0}. It is used in a foreign key!
Cause: An attempt was made to drop a column that participates in a foreign key
Action: Drop the key first, then the column
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15263: Cannot drop column {0}. It is used in a primary key!
Cause: An attempt was made to drop a column that participates in a primary key
Action: Drop the key first, then the column
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15264: Cannot modify this column. It is used in a foreign key!
Cause: An attempt was made to modify a column that participates in a foreign key
Action: Drop the key first, then modify the column
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15265: Cannot modify this column. It is used in a primary key!
Cause: An attempt was made to modify a column that participates in a primary key
Action: Drop the key first, then modify the column
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15268: Table not found: {0}
Cause: When attempting to drop a table during an update, the table name is not found
Action: Check the model
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15270: Key type {0} is not supported here.
Cause: The key type is not supported
Action: Correct the model
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15272: An error occurred while executing a RDB command: {0}
  Cause: When executing a command action, an exception was thrown
  Action: Check root cause
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15273: {0}: action is not accepted: {1}
  Cause: Attempt to execute a command action, but it is not accepted
  Action: Check root cause
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15274: Multiple PKs are not allowed on a table
  Cause: When reverse engineering a primary key, multiple primary keys were found for the table
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15275: An exception occurred while retrieving a table primary key: {0}
  Cause: When reverse engineering a table, a primary key could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15276: An exception occurred while retrieving the indexes of a table: {0}
  Cause: When reverse engineering a table, the indexes could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15277: An exception occurred while retrieving a table foreign keys: {0}
  Cause: When reverse engineering a table, the foreign keys could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15278: An exception occurred while retrieving the check constraints of a table: {0}
  Cause: When reverse engineering a table, the check constraints could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15279: An exception occurred while retrieving the alternate keys of a table: {0}
  Cause: When reverse engineering a table, the alternate keys could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15280: *** FATAL *** Table {0} is duplicate as root
  Cause: The table is duplicated as the root when determining the root tables of the model
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15281: *** FATAL ** Table {0} is unknown
  Cause: The root table is unknown
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15282: Table {0} is unknown though it was reversed
  Cause: The table cannot be found in the ODI model, although it was reversed
  Action: Retry the reverse engineering
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15283: Duplicate declaration for table {0}
  Cause: The model XML contains a duplicate table declaration
  Action: Fix the XML
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15285: FK [0] references a table with no PK.

**Cause:** The model XML contains a foreign key that references a table with no defined primary key

**Action:** Fix the XML

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

ODI-15286: Unknown PK table for foreign key [0]: please check the name and order of the tables and FK.

**Cause:** The model XML contains a foreign key that references an unknown primary key table

**Action:** Fix the XML

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

ODI-15287: Unknown element: [0]

**Cause:** The model XML contains an unknown element

**Action:** Fix the XML

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

ODI-15288: An [0] error occurred with the following message: [1]

**Cause:** An error occurred when writing the model to a file

**Action:** See root cause

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

ODI-15290: Column [0] was not found in table [1]

**Cause:** The column was not found when building the columns from column names

**Action:** Check the model

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

ODI-15291: *** FATAL *** Could not rename table [0] to [1]

**Cause:** Could not rename table

**Action:** Check permissions and security settings

**Level:** 32

**Type:** ERROR
**Impact:** Programmatic

**ODI-15292:** *** FATAL *** Could not rename table {0} because it was not found in the model!

*Cause:* Could not rename table, because the table to be renamed does not exist

*Action:* Check the model

*Level:* 32

*Type:* ERROR

**ODI-15293:** Unknown FK table for foreign key {0}: please check the name and order of the tables and FK.

*Cause:* The model XML contains a foreign key that references an unknown table

*Action:* Fix the XML

*Level:* 32

*Type:* ERROR

**ODI-15294:** unknown element: {0}

*Cause:* The model XML contains an unknown XML element

*Action:* Fix the XML

*Level:* 32

*Type:* ERROR

**ODI-15295:** Unsupported datatype: {0}

*Cause:* The datatype is unsupported when creating the column from attributes

*Action:* Check the model

*Level:* 32

*Type:* ERROR

**ODI-15300:** A {0} occurred while creating the helper of class {1}. Error message: {2}

*Cause:* INTERNAL ERROR: A helper cannot be created.

*Action:* Internal error: contact Oracle support.

*Level:* 32

*Type:* ERROR

**ODI-15301:** Choose: {0}

*Cause:* Choose one of the displayed options.

*Action:* Choose one of the displayed options.

*Level:* 32

*Type:* ERROR
Impact: Other

ODI-15302: FK is null: {0}
  Cause: The FK is null, may indicate repository corruption.
  Action: Internal error: contact Oracle support.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-15303: JDBC Datatype '{0}' with length '{1}' parameter unsupported
  Cause: MySQL database does not support the datatype with length
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15304: JDBC Datatype '{0}' with length '{1}' and scale '{2}' parameter unsupported
  Cause: MySQL database does not support the datatype with scale
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15305: JDBC Datatype '{0}' unsupported
  Cause: MySQL database does not support the datatype
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Programmatic

ODI-15400: Error in generating data service
  Cause: Exception thrown when creating the data service used for DDL generation and reverse engineering.
  Action: Check the root cause.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15401: Unknown key {0}
  Cause: Unknown key encountered when processing diff class instances during DDL generation.
  Action: Check the model.
  Level: 32
  Type: ERROR
Impact: Programmatic

ODI-15402: Exception thrown in the DDL generation service: {0}
Cause: An exception was thrown while generating DDL.
Action: Check the root cause.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15403: The method is not supposed to sort something else than the expected actors. Attempting to sort class instances: {0}, {1}
Cause: While sorting action commands, the DDL generator service encountered an unknown class instance type.
Action: Internal Error: contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15404: Scenario generation has not been implemented for this container.
Cause: During DDL generation, an attempt was made to generate a scenario for an object that does not support it.
Action: Internal Error: contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15405: Scenario generation exception: {0}
Cause: An exception was thrown during scenario generation.
Action: Check root cause.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15500: Column {0} is executed on the target
Cause: Possible Cause
Action: Suggested Action

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15501: Cannot attach a data store to a target mapping because column {0} is not found.
Cause: The specified target column was not found.
Action: Verify that the correct column has been specified.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15502: Target mapping not found for column {0}
Cause: The specified column is not mapped.
Action: Map the specified column.

Level: 32

Type: ERROR
Impact: Programmatic

ODI-15503: Cannot set the attached datastore because the mapping is not executed on the SOURCE
Cause: The mapping has been configured for execution on the target.
Action: Configure the mapping for execution on the source.

Level: 32

Type: ERROR
Impact: Programmatic

ODI-15504: Unknown indicator type: {0}
Cause: An invalid indicator type has been specified.
Action: Specify one of the following indicator types from the IndicatorType enumeration: CHECK_NOT_NULL, INSERT, UPDATE, or UPDATE_KEY.

Level: 32

Type: ERROR
Impact: Programmatic

ODI-15505: Invalid UD number: {0}
Cause: An invalid UD number has been specified.
Action: Specify a UD number 1 to 10.

Level: 32

Type: ERROR
Impact: Programmatic

ODI-15506: The specified target column was not found: {0}
Cause: The specified target column was not found when attempting to remove a column from a temporary data store.
Action: Only remove columns which exist in the temporary target datastore.

Level: 32

Type: ERROR
Impact: Programmatic

ODI-15507: Column {0} may not be removed. It is used in other mappings, join clauses, or filter clauses
Cause: The specified target column is used in other mappings, filters, or joins. This dependency prevents removal of the column.
Action: Only remove a column after mapping, filter, or join dependencies have been removed.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15508: Column [0] may not be removed because it is referenced in interface (1).
Cause: The specified target column is referenced in a filter or join clause in another interface. This dependency prevents removal of the column.
Action: Only remove a column after other references have been removed.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15509: The specified target column was not found: [0]
Cause: The specified target column was not found.
Action: Verify the column name.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15510: A column was not found while updating the key
Cause: The update key contains a column that does not exist.
Action: Check the columns of the update key.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15511: The join must be attached to the datastore to expand a lookup.
Cause: The join is not attached to a datastore, so a valid lookup does not exist.
Action: Only use the lookup expansion, with a pCreateLookup parameter value of false, on valid lookups.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15512: Cannot transform a normal datastore into a normal lookup.
Cause: The data store is already a non-lookup data store.
Action: Do not use this transformation on a non-lookup data store. If the datastore and join are non-lookup, use a pCreateLookup parameter value of true to create a lookup from a normal join and normal datastore.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-15513: Cannot transform a normal, non-lookup join into a normal join.

**Cause:** The join is already a normal join, not a lookup join, so expansion to a normal, non-lookup join is not possible.

**Action:** Do not use this transformation on a normal join. If the datastore and join are non-lookup, use a pCreateLookup parameter value of true to create a lookup from a normal join and normal datastore.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

ODI-15514: Cannot transform a lookup datastore into a lookup.

**Cause:** The data store is already designated as a lookup, so transforming to a lookup is not possible.

**Action:** Do not use this transformation on a lookup. If the datastore and join are designated for lookup, use a pCreateLookup parameter value of false to expand a lookup to a normal join and normal datastore.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

ODI-15515: Cannot transform a lookup join into a lookup.

**Cause:** The join is already designated as a lookup, so transforming to a lookup is not possible.

**Action:** Do not use this transformation on a lookup. If the datastore and join are designated for lookup, use a pCreateLookup parameter value of false to expand a lookup to a normal join and normal datastore.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

ODI-15516: The join must be attached to the datastore to make a lookup.

**Cause:** The join is not properly attached to data sources, so transforming to a lookup is not possible.

**Action:** Designate data sources for the join.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

ODI-15517: Cannot add a column with the same name as an existing target column: `{0}`.

**Cause:** The column being added already exists.

**Action:** Add a column with a unique name.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic
ODI-15518: A dataset is already assigned the order: [0].
  Cause: Another dataset has already been assigned the order that is being set.
  Action: Assign a unique order to the dataset.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15519: The target datastore cannot be changed. Interface [0] is used in interface(s) [1] as a source datastore.
  Cause: The interface is used as a source datastore of another interface, so the target datastore cannot be changed.
  Action: Create a separate interface to avoid the source datastore dependency in the other interface.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15520: Temporary interface from another project is not allowed.
  Cause: The interface is used as a source datastore of another interface, so the target datastore cannot be changed.
  Action: Create a separate interface to avoid the source datastore dependency in the other interface.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15521: A source datastore with alias [0] already exists.
  Cause: The datastore alias has already been used.
  Action: Specify a unique alias.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15522: Cannot transform a join into a CrossJoin or natural join if it does not have both attached datastores set.
  Cause: The join does not have datastores attached yet.
  Action: Attach both join datastores before transforming to a cross join.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15523: LKM [0] not accepted for source set [1]
  Cause:
  Action:
  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15524: LKM {0} not accepted for staging area to target
  Cause:
  Action:
  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15525: CKM {0} not accepted for target technology
  Cause:
  Action:
  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15526: IKM {0} not accepted for staging and target technology
  Cause:
  Action:
  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15527: IKM {0} not accepted for target technology
  Cause:
  Action:
  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15528: Mapping expression cannot be set because the target column {0} was not found.
  Cause: The column was not found when setting the expression for a mapping.
  Action: Specify a valid column for the expression.
  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15529: Action was not reversible.
  Cause: The actions causing an impact are not reversible.
  Action: Avoid the sequence of actions causing the impact.
  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15530: The interface does not have a source set.
Cause: The interface does not have a source set.
Action: Add a source set to the interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15531: The execution location parameter for the computeExpression method is invalid.
Cause: The execution location parameter for the computeExpression method is invalid.
Action: Specify an execution location parameter of ExecutionLocation.SOURCE, ExecutionLocation.WORK, or ExecutionLocation.TARGET.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15532: The pExecutableTextHolder parameter for the getLogicalSchemaForTextHolder method does not have a valid execution location.
Cause: The pExecutableTextHolder parameter for the getLogicalSchemaForTextHolder method does not have a valid execution location.
Action: Specify an execution location parameter of ExecutionLocation.SOURCE, ExecutionLocation.WORK, or ExecutionLocation.TARGET.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15533: The physical schema could not be mapped from logical schema {0} and context {1}.
Cause: The getPhysicalSchema method failed to map and logical schema and context to a physical schema.
Action: Ensure that logical to physical schema mappings are created or check the logical schema and context parameters.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15534: Sub interface must not be null.
Cause: The pSubInterface parameter passed to the checkSubInterfaceValid method is null.
Action: A non-null sub interface parameter is required for the checkSubInterfaceValid method.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15535: The technology [0] of the source temporary interface [1] used as a derived table does not support derived tables.

Cause: The pSubInterface parameter passed to the checkSubInterfaceValid method is null.

Action: A non-null sub interface parameter is required for the checkSubInterfaceValid method.

Level: 32
Type: ERROR
Impact: Programmatic

Cause: The temporary interface cannot be used because a physical schema has not been mapped to the logical schema for the source.

Action: Create a mapping between the logical schema, context, and physical schema for the source data store.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15537: Source temporary interface [0] cannot be used as a derived table. The logical schema of the target datastore [1] has no associated physical schema in context [2].

Cause: The temporary interface cannot be used because a physical schema has not been mapped to the logical schema for the target.

Action: Create a mapping between the logical schema, context, and physical schema for the target data store.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15538: Source temporary interface [0] cannot be used as a derived table. The logical schema of the staging area [1] has no associated physical schema in the optimization context [2].

Cause: The temporary interface cannot be used because a physical schema has not been mapped to the logical schema for the staging area.

Action: Create a mapping between the logical schema, context, and physical schema.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15539: Source temporary interface [0] cannot be used as a derived table. Source datastore [1] is not on the same data server as the target.
Cause: The temporary interface cannot be used because the source data store is not on the same data server as the target.
Action: Ensure that the source and target datastores are on the same data server.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15540: Source temporary interface {0} cannot be used as a derived table. Staging area and target datastores are not in the same data server. You may have forced the target context to a different context than the optimization context.
Cause: The temporary interface cannot be used because the staging data store is not on the same data server as the target.
Action: Ensure that the staging and target datastores are on the same data server.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15541: Source temporary interface {0} uses a journalized datastore and cannot be used as a derived table.
Cause: The temporary interface cannot be used because it uses a journalized datastore.
Action: Use only non journalized data stores in temporary interfaces.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15542: Source temporary interface {0} cannot be used as a derived table. All source datastores of this interface should be in the same data server as the target and should not be journalized.
Cause: The temporary interface cannot be used because it uses a journalized datastore.
Action: Use only non journalized data stores in temporary interfaces.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15543: Another interface with the same name already exists in this folder. Please choose a unique interface name.
Cause: Another interface with the same name already exists in this folder.
Action: Specify a unique interface name.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15544: The interface must have a name.
Cause: The interface does not have a name.
Action: Specify a unique interface name.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15545: Temporary target datastore has no name.
Cause: The temporary target datastore has no name
Action: Specify a unique datastore name.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15546: The interface must have a logical schema.
Cause: The interface does not have a logical schema.
Action: Specify a logical schema for the interface.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15547: Could not fix a missing reference correctly.
Cause: The interface is missing one or more references.
Action:
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15548: The source datastore has already been set.
Cause: The source datastore has already been set.
Action: Only invoke setSourceDataStore once.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15549: Cannot set the source filter because the source datastore is not set.
Cause: The source datastore has not been set prior to setting the filter.
Action: Set the source datastore prior to setting the filter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15550: The target datastore has already been set.
Cause: The source datastore has already been set.
Action: Only invoke setSourceDataStore once.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15551: Mappings on the target are not allowed in this helper.

Cause:

Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15552: A source filter requires a source datastore.

Cause: The interface cannot be saved because it contains a filter without a source datastore.

Action: Create a source datastore before creating a source filter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15553: The target datastore must be set.

Cause: The target datastore for the interface has not been set.

Action: Set the target datastore before saving the interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15554: An LKM must be set on the source set.

Cause: A loading knowledge module has not been assigned to the source set.

Action: Set the LKM for the source set before saving the interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15555: Target IKM must be set on the target table.

Cause: An integration knowledge module has not been assigned to the target table.

Action: Set the IKM for the target before saving the interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15556: Unknown generic clause type: [0]

Cause: An unknown generic clause class was passed to the createSnpPopClauseFromGenericClause method.

Action: Pass only generic clause classes for join or filter.
Level: 32  
Type: ERROR  
Impact: Programmatic

ODI-15557: Unknown execution location type: \{0\}  
Cause: An unknown execution location enumeration was passed to the getStringExeDbFromExecutionLocation method.  
Action: Pass only location enumerations of ExecutionLocation.SOURCE, ExecutionLocation.WORK, ExecutionLocation.TARGET.

Level: 32  
Type: ERROR  
Impact: Programmatic

ODI-15558: There is a conflict between physical schemas  
Cause: There is a conflict between the various physical schemas used to obtain the data, such as multiple data stores in the same source set connected using different physical schemas.  
Action: Ensure that physical schemas of a source set have consistent connection information.

Level: 32  
Type: ERROR  
Impact: Programmatic

ODI-15559: Unsupported component: \{0\}  
Cause: An unsupported component was passed as a parameter to createDataAccessinfo.  
Action: For the plInterfaceSubComponents parameter, supported components are SourceDataStore, ISourceColumn, TargetMapping, and GenericClause.

Level: 32  
Type: ERROR  
Impact: Programmatic

ODI-15560: Fatal interface condition: \{0\}  
Cause: A fatal issue was discovered while saving or verifying an interface.  
Action: Correct the interface issue before saving it.

Level: 32  
Type: ERROR  
Impact: Programmatic

ODI-15561: Could not find column \{0\} which choosing a mapping.  
Cause: The MappingChooserFirst.chooseMapping method was called with an column name that does not exist.  
Action: Check the column name passed to chooseMapping.

Level: 32  
Type: ERROR
**Impact:** Programmatic

**ODI-15562:** Source sets cannot be computed because one execution area doesn’t have a physical schema. Check the errors on the interface.

**Cause:** Source sets cannot be computed because one execution area doesn’t have a physical schema.

**Action:** Check the errors on the interface.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-15563:** Source sets cannot be computed because the staging area is not properly defined. Check your target datastore and the staging area’s physical schema in the Definition tab.

**Cause:** Source sets cannot be computed because the staging area is not properly defined.

**Action:** Check your target datastore and the staging area’s physical schema in the Definition tab.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-15564:** There should be one source set on the interface.

**Cause:** The interface has more than one source set.

**Action:** Ensure that only one source set is defined.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-15565:** Column [0] not found while setting the update key.

**Cause:** A column specified for the update key does not exist.

**Action:** Recheck the column names used to define the update key.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-15566:** No target column was found while setting the target data store.

**Cause:** No target column was found while setting the target data store.

**Action:** Define columns before setting the target datastore.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-15567:** Target column [0] was not found.

**Cause:** No specified target column was not found in the target data store.
Action: Check the column name parameter in the RealBasicInterfaceCreationHelper.getTargetColumn method call.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15568: Column \(0\) not found on datastore \(1\).
Cause: A referenced column was not found in a source data store.
Action: Check the source datastore columns and references for a mismatch.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15569: Cannot create a data source.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15570: Cannot add a datastore of type \(0\) as source.
Cause: An invalid datastore type has been specified.
Action: Specify a datastore of type TargetDataStore, SourceDataStore, or OdiDataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15571: Unexpected join type \(0\)
Cause: An invalid join type has been specified when setting join properties.
Action: Specify a join type of INNER, CROSS, or NATURAL.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15572: Unexpected join state.
Cause: An invalid join state has been reached. The expected join type is CROSS or NATURAL.
Action: .

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15573: Failed to create an interface helper instance.
Cause: A general exception was encountered while constructing an interface helper.

Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15574: General exception encountered in the interface helper while preparing to persist.
Cause: General exception encountered in the interface helper while preparing to persist.
Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15575: Two journalized datastores have been found. There should be only one.
Cause: Two journalized datastores have been found. There should be only one.
Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15576: Two journalized filters have been found. There should be only one.
Cause: Two journalized filters have been found. There should be only one.
Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15577: Unmanaged type: {0}
Cause: An invalid element type was passed to the prepareSQLStatement method.
Action: Pass only valid element types such as GenericClause, SourceDataStore, TargetDataStore, ISourceColumn, TargetMapping, SourceSet, DataSet, or TargetColumn.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15578: No interface was found in the elements.
Cause: No interface could be traced to the elements passed to the prepareSQLStatement method.
Action: Create an interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15579: No dataset was found in the elements.
Cause: No data set could be traced to the elements passed to the prepareSQLStatement method.
Action: Ensure that a dataset has been created first.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15580: The target is a temporary table.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15581: Cannot build the query because the ordered joins are not correct.
Cause: The SQL clause cannot be generated because the ordered joins are not correct.
Action: Ensure that all joins are correct.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15582: This operation is not supported on joined file datastores.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15583: This operation is not supported on multiple file datastores.
Cause: More than one source datastore was found.
Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15584: Elements are from different interfaces.
Cause: The components passed to prepareSQLStatement are from different interfaces.
Action:

Level: 32
Type: ERROR

ODI-15585: Elements are from different datasets.

  Cause: The components passed to prepareSQLStatement are from different data
datasets.

  Action:

  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15586: Unsupported component: [0]

  Cause: An invalid component type was passed to connectionForData.

  Action: Only pass components of type SourceDataStore, ISourceColumn,
TargetMapping, TargetColumn, GenericClause, or TargetDataStore.

  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15587: Journalization filter not found for the journalized table.

  Cause: The journalized table does not have a filter.

  Action: Define a journalizing filter for the table.

  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15588: The SQL join clause is not valid for a cross join.

  Cause: A join clause has been specified for a cross join.

  Action: Remove the join condition or change the join type.

  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15589: Cannot change the ON_TARGET indicator on a temporary interface.

  Cause: An attempt was made to set the ON_TARGET indicator for a temporary
datastore.

  Action: Do not change the ON_TARGET indicator for a temporary datastore.

  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15590: Unknown indicator type: [0]

  Cause: An unknown value was passed to the constructor for
InterfaceActionOnStagingAreaSetIndicator.

  Action: Use valid values of DISTINCT_ROW, ON_TARGET, or ON_USER_
DATABASE_SCHEMA for the pIndicatorType parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15591: Staging Area is on the target and cannot be switched to another logical schema.
Cause: The staging area is on the target and uses the target schema. It cannot be switched.
Action: Do not attempt to switch the schema, or use a separate staging area.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15592: GenericClause is of unknown type: {0}
Cause: InterfaceActionRemoveGenericClause was constructed with an invalid generic clause.
Action: Use a generic clause type of JOIN or FILTER.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15593: Could not set LKM for object of type {0}
Cause: An LKM is being set for a TargetDataStore or some other invalid type.
Action: Only set an LKM for a SourceSet or StagingArea.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15594: Could not set the CKM for a holder of type {0}
Cause: A CKM is being set for a SourceSet, StagingArea, or some other invalid type.
Action: Only set a CKM for a TargetDataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15595: Could not set the IKM for a holder of type {0}
Cause: An IKM is being set for a SourceSet, StagingArea, or some other invalid type.
Action: Only set an IKM for a TargetDataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15596: Invalid KM type: {0}
Cause: An invalid object type is being used to set a KM.
Action: Only set a KM of type LKM, CKM, or IKM.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15597: Could not set the LKM option for a holder of type {0}
Cause: An LKM is being set for a TargetDataStore or some other invalid type.
Action: Only set an LKM option for a SourceSet or StagingArea.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15598: Could not set the CKM option for a holder of type {0}
Cause: A CKM option is being set for a SourceSet, StagingArea, or some other invalid KM holder type.
Action: Only set a CKM option for a KM holder of type TagetDataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15599: Could not set the IKM option for a holder of type {0}
Cause: An IKM option is being set for a SourceSet, StagingArea, or some other invalid KM holder type.
Action: Only set an IKM option for a KM holder of type TagetDataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15600: Dataset 1 was not found in the list of the interface datasets used with the interface.
Cause: The first dataset given as a parameter in the construction of the InterfaceActionSwitchDataSetOrders class is not used in the interface.
Action: Recheck the datasets being switched for this interface. Both datasets must be used in the interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15601: Dataset 2 was not found in the list of the datasets used with the interface.
Cause: The second dataset given as a parameter in the construction of the InterfaceActionSwitchDataSetOrders class is not used in the interface.
Action: Recheck the datasets being switched for this interface. Both datasets must be used in the interface.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15602: Dataset 2 was not found in the list of the datasets used with the interface.
Cause: An unimplemented method has been called. This is an ODI internal error.
Action: Do not call this method.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15603: Cannot create an alias for a datastore of type {0}
Cause: The method computeAliasForDataStore was called with an invalid datastore type.
Action: Only call computeAliasForDataStore for datastores of type TargetDataStore or OdiDataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15604: A non ordered clause was passed to the buildTreeSet method.
Cause: A non ordered clause is passed to the construction of ordered joins trees method.
Action: Use ordered join clauses with this method.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15605: Multiple ordered joins in this dataset use the same order number.
Cause: One or more join clauses uses the same order number in the call to buildTreeSet.
Action: Ensure that all clauses of an ordered join have unique order numbers.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15606: Join references the same table twice (directly or indirectly).
Cause: A join clause contains two references to the same table.
Action: Ensure that the join clause only references one table.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15607: Join references the same table twice through other joins.
**Cause:** A join clause contains two references to the same table.

**Action:** Ensure that the join clause only references one table.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15608: Subcomponent type of {0} is not supported.**

**Cause:** An unsupported type was passed to getIssuesComputer.

**Action:** Only pass types of OdiInterface, DataSet, SourceDataStore, Filter, Join, StagingArea, TargetDataStore, SourceSet, TargetMapping, or TargetColumn.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15609: Invalid KM holder type: {0}**

**Cause:** An invalid KM holder type was passed to InterfaceKMHolderFactory.getKMHolderFor

**Action:** Only pass KM holder types of SOURCE_SET_LKM, STAGING_AREA_LKM, TARGET_CKM, or TARGET_IKM.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15610: Component must be a source datastore or a source column.**

**Cause:** ReferenceManagerAbstract.getReferencesTo was called with an invalid subcomponent.

**Action:** Only pass subcomponent types of SourceDataStore or ISourceColumn.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15611: Column not found from an xref.**

**Cause:** A column referenced in an expression was not found in a datastore. It may have been deleted.

**Action:** Ensure that all columns referenced in the expression exist.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15612: Failed to attach an element of type {0} to a source set.**

**Cause:** An invalid type of component was found when attaching elements to a source set.

**Action:** Elements being attached to a source set must be of type SourceDataStore, Join, Filter, or TargetMapping.

**Level:** 32
ODI-15613: Interface must have only one dataset.
   Cause: This sourceset computer can only handle a single dataset, and more than one was found.
   Action:
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15614: Interface must have only one source table.
   Cause: This sourceset computer can only handle a single table, and more than one dataset was found.
   Action:
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15615: Interface must not have joins.
   Cause: This sourceset computer can only handle a single table, and the interface contains a join.
   Action:
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15616: Source datastore must be a real table
   Cause: This sourceset computer can only handle a single, real table.
   Action:
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15617: Invalid type for a TextHolder: [0]
   Cause: The method getExecutableTextHolderFor was called with an invalid TextHolder component type.
   Action: Valid types are TargetMapping, TargetColumn, Filter, and Join.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15618: Cannot set a source set on a target column.
   Cause: SetSourceSet was called for a target column, which is not a valid usage. This method is specified for the interface, but is not valid for this class.
   Action: SetSourceSet should never be invoked for this class.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15619: Inconsistent filter with a clauseType of {0}
Cause: The Filter.getFilterType method was called, but the clause type was not a filter type.
Action: Ensure that the filter has a type of SnpPopClause.CLAUSE_TYPE_FILTER or SnpPopClause.CLAUSE_TYPE_JRN_FILTER.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15620: Execution location is null. Target technology cannot be determined
Cause: The execution filter for the location was not set.
Action: The execution location should be set in the Filter constructor or by invoking setExecutionLocation.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15621: Attached dataStore is null. Target technology cannot be determined
Cause: The attached datastore for the execution location was not set.
Action: The datastore should be set in the Filter constructor or by invoking setAttachedDataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15622: Staging area does not have a logical schema. Target technology cannot be determined
Cause: The attached datastore for the execution location was not set.
Action: The datastore should be set in the Filter constructor or by invoking setAttachedDataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15623: Invalid technology for the given index type
Cause: The technology of the clause and index type do not match.
Action: Ensure that the index type technology matches the clause technology.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15624: Inconsistent join with clauseType = {0} and joinType = {1}
**Cause:** The join clause type is invalid.

**Action:** This exception is thrown from a deprecated method. Use isCross or isOrdered methods instead.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15625: Cannot set OdiDataType on a journalized source column**

**Cause:** The setDataType method has been invoked for a journalized source column, but the datatype cannot be set for journalized columns.

**Action:** Do not invoke this method for a journalized column.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15626: Cannot set the length on a journalized source column**

**Cause:** The setLength method has been invoked for a journalized source column, but the length cannot be set for journalized columns.

**Action:** Do not invoke this method for a journalized column.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15627: Cannot set the scale on a journalized source column**

**Cause:** The setScale method has been invoked for a journalized source column, but the scale cannot be set for journalized columns.

**Action:** Do not invoke this method for a journalized column.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15628: Cannot set the data type on a source column**

**Cause:** The setDataType method has been invoked for a source column, but the datatype cannot be set for source columns.

**Action:** Do not invoke this method for a source column.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15629: Cannot set the length on a source column**

**Cause:** The setLength method has been invoked for a source column, but the length cannot be set for source columns.

**Action:** Do not invoke this method for a source column.

**Level:** 32
Type: ERROR
Impact: Programmatic

ODI-15630: Cannot set the scale on a source column
Cause: The setScale method has been invoked for a source column, but the scale cannot be set for source columns.
Action: Do not invoke this method for a source column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15631: Connection information is not available.
Cause: The physical schema has not been set.
Action: Define physical and logical schemas.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15632: Column [0] may not be removed because it is mapped in interface [1].
Cause: The specified target column is mapped in another interface. This dependency prevents removal of the column.
Action: Only remove a column after mapping dependencies have been removed.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15633: Data Type must be set first.
Cause: Data Type is null.
Action: Set Data Type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15634: Length is not allowed for the current Data Type
Cause: Data Type doesn't support length.
Action: Check Data Type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15635: Scale is not allowed for the current Data Type.
Cause: Data Type doesn't support scale.
Action: Check Data Type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15636: Cannot change the column because it's not a temporary column.
Cause: Column isn't temporary.
Action: Check column state.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15637: Execution location must be either null or target.
Cause: Wrong Execution location state.
Action: Check Execution location.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15638: Scenario {0} contains invalid characters. Try {1}.
cause: String contains invalid characters.
Action: Check scenario name.
Level: 32

Type: ERROR
Impact: Other

ODI-15639: Scenario version is not set.
Cause: Scenario version is not set.
Action: Set scenation version.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15640: No Scenario was found through the Tag : {0}.
Cause: No Scenario was found.
Action: Check tag.
Level: 32

Type: ERROR
Impact: Other

ODI-15641: The refresh SQL statement of a variable cannot contain sequence references when the variable is added to a load plan.
Cause: SQL statement contains sequence references.
Action: Check refresh SQL statement.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15642: Scenario name must be \{0\} characters long max.
  Cause: Scenario name is too long.
  Action: Check name length.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-15643: No Deployment Spec from Mapping: \{0\}.
  Cause: Cannot find any Deployment Spec from Mapping.
  Action: Check there is valid Deployment Spec.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-15644: The physical data server for the source code and for sequence(s) \{0\} is not the same, this may result in the same sequence value being used for each row.
  Cause: The sequence may be remote so a single nextval is calculated and reused per row.
  Action: Make sure the sequence and task have the same data server if you want the sequences to use distinct values per row.
  Level: 32
  Type: INFO
  Impact: Other

ODI-15645: The physical data server for the target code and for sequence(s) \{0\} is not the same, this may result in the same sequence value being used for each row.
  Cause: The sequence may be remote so a single nextval is calculated and reused per row.
  Action: Make sure the sequence and task have the same data server if you want the sequences to use distinct values per row.
  Level: 32
  Type: INFO
  Impact: Other

ODI-15700: Exception thrown in the Odi shortcut service: \{0\}
  Cause: An exception was thrown while materializing a shortcut object.
  Action: Check the root cause.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17500: Invalid old password.
  Cause: Old password did not match current password.
Action: Provide the correct password.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17501: Temporary table has no column.
Cause: No column have been defined for the temporary table.
Action: Define a column mapping to the temporary table.
Level: 32
Type: ERROR
Impact: Other

ODI-17502: No next value returned.
Cause: No sequence next value was found for given context code.
Action: Verify sequence definition or context code.
Level: 32
Type: ERROR
Impact: Other

ODI-17503: Internal error: object ConnectConnection
Cause: Missed connection.
Action: Try reconnect.
Level: 32
Type: ERROR
Impact: Other

ODI-17504: An ordered join references the same table twice (directly or indirectly).
Cause: A same table was referenced twice by a join.
Action: Check interface definition.
Level: 32
Type: ERROR
Impact: Other

ODI-17505: An ordered join references the same table twice through another join.
Cause: A join was referencing the same table twice through another join.
Action: Check interface definition.
Level: 32
Type: ERROR
Impact: Other

ODI-17506: Variable has no value
Cause: Variable had no value.
Action: Provide value for variable.
Level: 32
Type: ERROR
Impact: Other

ODI-17507: Key does not exist
Cause: Key was unknown.
Action: Provide a known key.

Level: 32
Type: ERROR
Impact: Other

ODI-17508: No conversion for data type "[0]" from source technology "[1]" to destination technology "[2]"
Cause: No data type conversion between technology was found.
Action: Define corresponding data type conversion.

Level: 32
Type: ERROR
Impact: Other

ODI-17509: Query to access value for specific sequence {0} has failed. Query="[1]"
Cause: Query for sequence has failed.
Action: Check sequence definition.

Level: 32
Type: ERROR
Impact: Other

ODI-17510: Driver does not exist.
Cause: Driver was not found.
Action: Check repository.

Level: 32
Type: ERROR
Impact: Other

ODI-17511: No value to be set to variable "{0}".
Cause: No value was returned to be set to the variable.
Action: Check variable value.

Level: 32
Type: ERROR
Impact: Other

ODI-17512: Sequence is already locked
Cause: The sequence was already locked.
Action: Unlock the sequence.

Level: 32
Type: ERROR
Impact: Other

ODI-17513: Variable "[0]" does not exist.
  Cause: Variable was not found.
  Action: Check variable.
  Level: 32

Type: ERROR
Impact: Other

ODI-17514: Unrecognized Oracle Data Integrator built-in function: [0]
  Cause: Oracle Data Integrator built-in function was not recognized.
  Action: Check function syntax.
  Level: 32

Type: ERROR
Impact: Other

ODI-17515: Invalid loading command (INSERT,UPDATE...).
  Cause: Loading command was invalid.
  Action: Check loading command.
  Level: 32

Type: ERROR
Impact: Other

ODI-17516: Internal error within the connection list
  Cause: Internal error within the connection list.
  Action: Try again.
  Level: 32

Type: ERROR
Impact: Other

  Cause: A task interpretation error has occurred.
  Action: Check tasks and try again.
  Level: 32

Type: ERROR
Impact: Other

ODI-17518: Error while interpreting the user name.
  Cause: User name interpretation has failed.
  Action: Check user name.
  Level: 32

Type: ERROR
Impact: Other
ODI-17519: Error while interpreting the URL
  Cause: URL interpretation has failed
  Action: Check URL.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17520: Error while interpreting the password
  Cause: Password interpretation has failed.
  Action: Check password.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17521: Error while interpreting the driver
  Cause: Driver interpretation has failed.
  Action: Check driver.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17522: Empty column name are not allowed
  Cause: A empty column name was found.
  Action: Fill column name.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17523: There is no connection for this logical schema / context pair: {0} / {1}.
  Cause: No connection was found for this logical schema / context pair.
  Action: Check schema and context assignment.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17524: Cannot set an empty alias for a source table.
  Cause: Source table’s alias was empty.
  Action: Fill alias of source table.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17525: Cannot set an empty source set name.
  Cause: Source set name was empty.
**Action:** Fill alias of a source table.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-17526: Cannot set Longc value in a PopCol having a column**  
**Cause:** Cannot set Longc value in a PopCol having a column.  
**Action:** Check interface’s columns.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-17527: Cannot set SourceDt value in a PopCol having a column**  
**Cause:** Cannot set SourceDt value in a PopCol having a column.  
**Action:** Check interface’s columns.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-17528: Cannot set Scalec value in a PopCol having a column**  
**Cause:** Cannot set Scalec value in a PopCol having a column.  
**Action:** Check interface’s columns.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-17529: Reference check failure**  
**Cause:** Reference check has failed.  
**Action:** Check control conditions.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-17530: Incomplete join may result in partial cross join**  
**Cause:** An incomplete join was found.  
**Action:** Check joins.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-17531: KM already encrypted.**  
**Cause:** KM has been already encrypted.  
**Action:** Skip encryption.
Level: 32
Type: ERROR
Impact: Other

ODI-17532: KM not encrypted.
   Cause: KM was not encrypted.
   Action: Check KM.

Level: 32
Type: ERROR
Impact: Other

ODI-17533: Clause set to cross join on a technology that does not support cross joins.
   Cause: Technology did not support cross joins.
   Action: Correct joins.

Level: 32
Type: ERROR
Impact: Other

ODI-17534: Clause set to full join on a technology that does not support full joins.
   Cause: Technology did not support full joins.
   Action: Correct joins.

Level: 32
Type: ERROR
Impact: Other

ODI-17535: Clause set to outer join on a technology that does not support left outer joins or right outer joins.
   Cause: Technology did not support left outer joins.
   Action: Correct joins.

Level: 32
Type: ERROR
Impact: Other

ODI-17536: Incomplete clause (Missing order number).
   Cause: Order number was missing.
   Action: Correct clause.

Level: 32
Type: ERROR
Impact: Other

ODI-17537: Incomplete clause (table1 and/or table2 must be set).
   Cause: Table1 and/or table2 were undefined.
   Action: Set clause’s table1 and/or table2 tables.
Level: 32
Type: ERROR
Impact: Other

ODI-17538: Filter is not properly set (The table must be defined)
Cause: The table must have been set.
Action: Set filter’s table.

Level: 32
Type: ERROR
Impact: Other

ODI-17539: Clause is ordered on a technology that does not support it
Cause: Technology did not support ordering.
Action: Remove ordering.

Level: 32
Type: ERROR
Impact: Other

ODI-17540: Connection is not set for this source set [0].
Cause: Source set’s connection was not set.
Action: Set connection.

Level: 32
Type: ERROR
Impact: Other

ODI-17541: Method SnpTrt::getAllTrtOfTypeForTechnosAndProject requires not null parameters for technologies
Cause: Method requires not null parameters
Action: Specify correct parameters.

Level: 32
Type: ERROR
Impact: Other

ODI-17542: Sequence must be locked before using this function
Cause: Sequence was not locked.
Action: Lock sequence and try again.

Level: 32
Type: ERROR
Impact: Other

ODI-17543: Technology does not support joins
Cause: Technology did not support joins.
Action: Check technology and/or joins.

Level: 32
Type: ERROR
Impact: Other
ODI-17544: This Technology does not support the WHERE clause
    Cause: Technology did not support the WHERE clause
    Action: Check technology and/or clause.
    Level: 32
Type: ERROR
Impact: Other
ODI-17545: Technology not set for this source set {0}
    Cause: Source set's technology was undefined.
    Action: Set technology.
    Level: 32
Type: ERROR
Impact: Other
ODI-17546: Specified variable not found in the Repository
    Cause: Variable was not found in the Repository.
    Action: Define variable and try again.
    Level: 32
Type: ERROR
Impact: Other
ODI-17547: Data type "{0}" for the technology "{1}" does not exist.
    Cause: Data type for the technology did not exist.
    Action: Check data type and/or technology.
    Level: 32
Type: ERROR
Impact: Other
ODI-17548: The file reverse-engineering is only possible for delimited files.
    Cause: The file reverse-engineering was performed against a not delimited file.
    Action: Use delimited files.
    Level: 32
Type: ERROR
Impact: Other
ODI-17549: Source data type "{0}" for the technology "{1}" does not exist.
    Cause: Source data type was not found.
    Action: Check data type and/or technology.
    Level: 32
Type: ERROR
Impact: Other
ODI-17550: Missing default Physical Schema for Data Server "](0]"
  Cause: Default Physical Schema was undefined.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17551: Duplicate clause order numbers
  Cause: Duplicated order numbers were found.
  Action: Check clause definition.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17552: Duplicate join order numbers
  Cause: Duplicated join order numbers were found.
  Action: Check join.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17553: Exceeded the maximum number of errors allowed.
  Cause: The maximum number of errors allowed were exceeded.
  Action: Check maximum error numbers.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17554: Agent "](0]" does not exist.
  Cause: Agent was not found.
  Action: Check agent definition.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17555: You cannot unlock this object. Only the lock owners and Supervisors can unlock objects.
  Cause: An attempt was made to unlock objects that were locked by another user.
  Action: Login as Supervisor or as the lock owners and try again.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17556: Error during decryption of text.
Cause: Text decryption has failed.
Action: Try again.

Level: 32
Type: ERROR
Impact: Other

ODI-17557: No condition defined for this rule.
Cause: No condition have been defined for this rule.
Action: Define conditions.

Level: 32
Type: ERROR
Impact: Other

ODI-17558: The field for this rule is not specified.
Cause: The field was unspecified.
Action: Specify field for this rule.

Level: 32
Type: ERROR
Impact: Other

ODI-17559: The operator for this rule is not specified.
Cause: The operator was unspecified.
Action: Specify operator for this rule.

Level: 32
Type: ERROR
Impact: Other

ODI-17560: The value to test is not defined.
Cause: The value to test was not defined.
Action: Specify value.

Level: 32
Type: ERROR
Impact: Other

ODI-17561: This operator is not supported.
Cause: This operator was not supported.
Action: Correct operator.

Level: 32
Type: ERROR
Impact: Other

ODI-17562: This operator cannot be used with this field.
Cause: The operator could not be used with the given field.
Action: Correct operator.
Level: 32
Type: ERROR
Impact: Other

ODI-17563: There is no work repository matching the name "[0]".
Cause: Work repository was not found.
Action: Check work repository with the given name exists.

Level: 32
Type: ERROR
Impact: Other

ODI-17564: More than one work repository found with the name "[0]" for this master repository.
Cause: More than one work repository with the specified name was found for this master repository.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-17565: Scenario has been already encrypted. No encryption was performed.
Cause: Scenario has been already encrypted.
Action: Decrypt and try again.

Level: 32
Type: ERROR
Impact: Other

ODI-17566: Scenario is not encrypted. No decryption was performed.
Cause: Scenario was not encrypted.
Action: Check Scenario.

Level: 32
Type: ERROR
Impact: Other

ODI-17567: A Scenario generated from a Variable cannot be encrypted or decrypted.
Cause: An attempt was made to encrypte or decrypte a Scenario generated from a Variable.
Action: Change Scenario” source component.

Level: 32
Type: ERROR
Impact: Other

ODI-17568: Could not connect to the database referenced by the context and the logical schema
Cause: Connection to the database failed.
Action: Check context and logical schema.
Level: 32
Type: ERROR
Impact: Network

ODI-17569: Unable to update sequence's next value.
Cause: Updating sequence was not possible.
Action: Check sequence definition.
Level: 32
Type: ERROR
Impact: Other

ODI-17570: Your text is too long. Please shorten it or choose the "LONG TEXT" datatype.
Cause: Text was too long.
Action: Shorten the text or choose the LONG TEXT data type.
Level: 32
Type: ERROR
Impact: Other

ODI-17571: Password does not respect the following rule: "{0}".
Cause: The password did not respect the rule.
Action: Choose another password.
Level: 32
Type: ERROR
Impact: Security

ODI-17572: This SnpFfValue does not exist.
Cause: Value was not found.
Action: Check FlexField value.
Level: 32
Type: ERROR
Impact: Other

ODI-17573: This SnpFfValuem does not exist.
Cause: Value was not found.
Action: Check FlexField value.
Level: 32
Type: ERROR
Impact: Other

ODI-17574: This SnpFfValuew does not exist.
Cause: Value was not found.
Action: Check FlexField value.
ODI-17575: SnpLicense does not exist.
    Cause: SnpLicense was not found.
    Action: Check License.

ODI-17576: Unknown actual constraint type for an interface constraint.
    Cause: Interface constraint type was unknown.
    Action: Check constraint type.

ODI-17577: Unknown variable data type.
    Cause: Variable data type was unknown.
    Action: Check variable data type.

ODI-17578: Name "{0}" is already used.
    Cause: Name was already used.
    Action: Use another name or change mode of import.

ODI-17579: Type of clause is not set.
    Cause: Type of clause was not set.
    Action: Set type of clause.

ODI-17580: Type of join is not set.
    Cause: Type of join was not set.
    Action: Set type of join.
Impact: Other

ODI-17581: A non ordered clause is passed to the construction of ordered joins trees method.

Cause: A non ordered clause was passed to the construction of ordered joins trees method.

Action: Check clauses.

Level: 32
Type: ERROR
Impact: Other

ODI-17582: Missing order number for an ordered clause.

Cause: Clause order was not set.

Action: Set the clause order.

Level: 32
Type: ERROR
Impact: Other

ODI-17583: More than one unique constraint associated to an interface constraint.

Cause: More than one unique constraint associated to an interface constraint was found.

Action: Check constraints.

Level: 32
Type: ERROR
Impact: Other

ODI-17584: URL does not exist.

Cause: URL was not found.

Action: Check URL.

Level: 32
Type: ERROR
Impact: Other

ODI-17585: Key cannot be checked.

Cause: Key could not be checked.

Action: Check key definition.

Level: 32
Type: ERROR
Impact: Other

ODI-17586: Field separator is mandatory for a delimited file.

Cause: Field separator was missing.

Action: Check separator and/or file type.

Level: 32
Type: ERROR
ODI-17587: Object name "\{0\}" is too long for the technology "\{1\}" (Logical schema : "\{2\}" ; Context Code : "\{3\}"")
  Cause: Object name was too long.
  Action: Correct object name.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17588: Unable to load work repository info.
  Cause: Work repository was not found.
  Action: Contact Oracle Support Services.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17589: Logical schema has not been specified for sequence "\{0\}"
  Cause: Logical schema was not specified.
  Action: Specify logical schema.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17590: Code \{0\} for model "\{1\}" is already used by another model.
  Cause: An already used code was assigned.
  Action: Change code for model.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17591: Name "\{0\}" is already used.
  Cause: A name already used was assigned.
  Action: Change name.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17592: Object is not in execution work repository.
  Cause: Object was not in execution work repository.
  Action: Check object and/or repository.
  Level: 32
  Type: ERROR
  Impact: Other
ODI-17593: Maximum number or source/target technologies exceeded. Current limit is {0}.
   Cause: Maximum number or source/target technologies was exceeded.
   Action: Check limit and number of technologies.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17594: Cannot encrypt already encrypted action.
   Cause: This action has been already encrypted.
   Action: Skip encryption.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17595: This action is not encrypted.
   Cause: This action was not encrypted.
   Action: Check parameters and try again.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17596: Query to retrieve value for native sequence "{0}" has failed Query="{1}".
   Cause: Query has failed.
   Action: Check query.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17597: Cannot mix ordered and non-ordered join syntax within a dataset for technology.
   Cause: Mixed join not allowed within a dataset.
   Action: Change all joins in dataset to same join syntax (either ordered or non-ordered).
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17598: Non-ordered natural join is not supported.
   Cause: Non-ordered natural join is not supported.
   Action: Change natural join to use ordered syntax.
   Level: 32
   Type: ERROR
   Impact: Other
ODI-17599: Ordered inner join is not supported.
  Cause: Ordered inner join is disabled for technology.
  Action: Change join type.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17600: Ordered left outer join is not supported.
  Cause: Ordered left outer join is disabled for technology.
  Action: Change join type.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17601: Ordered right outer join is not supported.
  Cause: Ordered right outer join is disabled for technology.
  Action: Change join type.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17602: Non-ordered full outer join is not supported.
  Cause: Non-ordered full outer join is not supported.
  Action: Change full outer join to use ordered syntax.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17603: Sql error checking a condition. {0}
  Cause: Sql error checking a condition.
  Action: Correct the Sql in the condition.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17604: Reference column isn't associated with this instance of reference.
  Cause: Reference column isn't associated with this instance of reference.
  Action: Check reference column.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17605: Column is not associated to this datastore.
  Cause: Datastore doesn't have this column.
**Action:** Check datastore and column.
**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-17606: {0} already belongs to another OdiDataStore.**
**Cause:** Object belongs to another datastore.
**Action:** Check object and datastore.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-17607: Parameter pReference is not an outbound reference for this OdiDataStore.**
**Cause:** Parameter is not an outbound reference for OdiDataStore.
**Action:** Check parameter.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-17608: Invalid technology for the given data type.**
**Cause:** Invalid technology for the given data type.
**Action:** Check technology.

**Level:** 32
**Type:** ERROR
**Impact:** Other

**ODI-17609: Invalid data type code.**
**Cause:** Invalid data type code.
**Action:** Check data type code.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-17610: Found NULL in STEP_TYPE.**
**Cause:** Step type is null.
**Action:** Check step type.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

**ODI-17611: STEP_TYPE is not valid.**
**Cause:** Step type isn't valid.
**Action:** Check step type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17612: MultiConnectionSupported is not settable for {0}.
Cause: MultiConnectionSupported is not settable.
Action: Check knowledge module.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17613: Cannot handle {0} of type {1}.
Cause: Cannot handle object.
Action: Check object's type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17614: Unknown key type: {0}.
Cause: Unknown key type.
Action: Check key.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17615: The command is not an ODI Tool command.
Cause: Wrong command.
Action: Check command.

Level: 32
Type: ERROR
Impact: Other

ODI-17616: No WorkTextOrig was found for ID: {0}.
Cause: Invalid ID.
Action: Check ID.

Level: 32
Type: ERROR
Impact: Other

ODI-17617: Class descriptor for WorkTextOrig {0} is null.
Cause: Descriptor is null.
Action: Check class descriptors.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17618: Unable to deal with an AliasedColumnCrossRef with type {0}.
Cause: Incorrect column type.
Action: Check column type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17619: Unexpected CrossRef {0} type.
Cause: Incorrect CrossRef type.
Action: Check CrossRef.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17620: Object type is not valid.
Cause: Object type is not valid.
Action: Check object type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17621: Unable to manage crossRef for object from class [ {0} ].
Cause: Illegal object type.
Action: Check object type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17622: pSqlIndGroup is not a valid group type.
Cause: Invalid group type.
Action: Check type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17623: Too many parameters for function {0}, Object {1}, Language {2}.
Cause: Too many parameters.
Action: Check parameters count.

Level: 32
Type: ERROR
Impact: Other

ODI-17624: Missing parameter for function {0}, Object {1}, Language {2}.
Cause: Missing parameter.
Action: Check parameters count.
Level: 32
Type: ERROR
Impact: Other

ODI-17625: Only OdiColumns are currently supported for SnpsExpressionTag.
Cause: Wrong column type.
Action: Check column type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17626: Cannot reassign a DataType.
Cause: Technology has been assigned yet.
Action: Check DataType
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17627: Inconsistent connection settings.
Cause: Inconsistent connection settings.
Action: Check connection settings type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17628: Unknown IConnectionSettings implementation.
Cause: Unknown IConnectionSettings implementation.
Action: Check settings type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17629: Connection Settings for repository server must be instanceof JdbcSettings.
Cause: Wrong settings type.
Action: Check settings type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17630: Unknown OptionType.
Cause: Unknown OptionType.
Action: Check option type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17631: The given class has no matching OverridenOptionOrig.
Cause: The given class has no matching OverridenOptionOrig.
Action: Check class.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17632: Unexpected variable type.
Cause: Unexpected variable type.
Action: Check variable type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17633: {0} datatype is expected.
Cause: Wrong value datatype.
Action: Check value datatype.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17634: Parameter must have text; it must not be null or empty.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17635: Parameter must have text; it must not be null, empty, or blank.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17636: Parameter {0} must be false.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17637: Parameter must not be null.
Cause: Wrong parameter value.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17638: Parameter {0} must be null.
Cause: Wrong parameter value.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17639: Parameter must be null.
Cause: Wrong parameter value.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17640: Parameter {0} must have text; it must not be null or empty.
Cause: Wrong parameter value.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17641: No {0} matches this IObject: {1}.
Cause: IObject is not matched.
Action: Check class.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17642: No Entity Class matches this Snp Class: {0}.
Cause: No Entity Class matches Snp Class.
Action: Check Entity Class.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17643: No Snp Class matches this Entity Class: {0}.
Cause: No Snp Class matches Entity Class.
Action: Check Snp Class.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17644: Unknown FlexFieldType.
Cause: Unknown FlexFieldType.
Action: Check FlexFieldType type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17645: Parameter must be instance of {0}.
Cause: Wrong parameter type.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17646: It is forbidden to use a variable of one project in a package of another project.
Cause: Variable and package have different parents.
Action: Check variable and package.
Level: 32
Type: ERROR
Impact: Other

ODI-17647: Unable to create the expression element, Object {0}, Language {1}.
Cause: Unable to create the expression element.
Action: Check expression parameters.
Level: 32
Type: ERROR
Impact: Other

ODI-17648: A mapping cannot be on the target.
Cause: A mapping cannot be on the target.
Action: Check execution location.
Level: 32
Type: ERROR
Impact: Other
ODI-17649: Can't create join between 2 source datastore from different DataSet.
  Cause: Source datastores are from different DataSet.
  Action: Correct join.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17650: A {0} was expected as value since {1} is {2}.
  Cause: Wrong type.
  Action: Check type.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17651: Parameter {0} must be instance of [{1}].
  Cause: Wrong parameter class.
  Action: Check parameter class.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17652: Class {0} is not assignable to {1}.
  Cause: Inconsistent classes.
  Action: Check classes.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17653: {0} line isn't found.
  Cause: Missed line.
  Action: Check line count.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17654: Parameter {0} must be not null.
  Cause: Parameter must be not null.
  Action: Check parameter.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17655: Parameter {0} must be {1} characters long max.
  Cause: Parameter length is too long.
Action: Check parameter length.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17656: Can't define variable override for steps in exception tree.
Cause: Step is in exception tree.
Action: Check step and variable for consistency.
Level: 32
Type: ERROR
Impact: Other

ODI-17657: Cannot add a reference column to an OdiReference with type [{0}].
Cause: Reference type isn't ReferenceType.COMPLEXREFERENCE.
Action: Check reference type.
Level: 32
Type: ERROR
Impact: Other

ODI-17658: Cannot change the target table because it’s not a temporary datastore.
Cause: Datastore isn’t temporary.
Action: Check target table and datastore.
Level: 32
Type: ERROR
Impact: Other

ODI-17659: Cannot get the journalized columns of a non-journalized datastore.
Cause: Datastore isn’t journalized.
Action: Check datastore.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17660: Cannot set a clause on the target.
Cause: Wrong execution location.
Action: Check execution location.
Level: 32
Type: ERROR
Impact: Other

ODI-17661: {0} is not supported for this Technology.
Cause: Object is not supported for this Technology.
Action: Check topology.
Level: 32  
Type: ERROR  
Impact: Other  

ODI-17662: Parameter [0] must have text; it must not be null, empty, or blank.  
Cause: Incorrect parameter.  
Action: Check parameter.

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-17663: Parameter [0] must be uppercase.  
Cause: Parameter is lower case.  
Action: Check parameter case.

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-17664: Parameter [0] must not contain whitespaces.  
Cause: Parameter contains whitespaces.  
Action: Consider to replace whitespace with another symbol (e.g. underscore)

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-17665: Column is not associated with this instance of OdiKey.  
Cause: Column is not associated with instance of OdiKey.  
Action: Check column and OdiKey.

Level: 32  
Type: ERROR  
Impact: Other  

ODI-17666: Column is not present in the key.  
Cause: Column is not present in the key.  
Action: Check column and key.

Level: 32  
Type: ERROR  
Impact: Other  

ODI-17667: Data type should be set before accessing value.  
Cause: Illegal method usage.  
Action: Set Data type.
Impact: Programmatic

ODI-17668: Datastore already has a Primary Key.
Cause: Datastore already has a Primary Key.
Action: Remove the current primary key before adding a new one.
Level: 32
Type: ERROR
Impact: Other

ODI-17669: {0} must be set before calling method {1}.
Cause: Illegal method usage.
Action: Set actual value.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17670: Default implementation already exists.
Cause: Default implementation already exists.
Action: Check function implementation.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17671: {0} must not be negative.
Cause: Wrong parameter value.
Action: Set value to 0 or greater.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17672: FlexFields isn't initialized.
Cause: FlexFields isn't initialized.
Action: Call initFlexFields method first.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17673: Foreign key column"s datastore must be equals to this reference"s foreign datastore.
Cause: Inconsistent datastores.
Action: Check datastore.
Level: 32
Type: ERROR
Impact: Other
ODI-17674: IncrementValue is not set.
  Cause: IncrementValue is not set.
  Action: Set IncrementValue with setVariable method.

  Level: 32
  Type: ERROR
  Impact: Programmatic

  Cause: Step status is not RUNNING.
  Action: Check step status.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17676: Invalid value type.
  Cause: Invalid value type.
  Action: Check value type.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17677: Cycle could be defined in {0} hierarchy.
  Cause: It is forbidden to define cycle in {0} hierarchy.
  Action: Check hierarchy.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17678: It is forbidden to fill a key with columns from another datastore.
  Cause: It is forbidden to fill a key with columns from another datastore.
  Action: Check datastore.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17679: It is forbidden to link two steps from different packages.
  Cause: Steps are from different packages.
  Action: Check steps and packages.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17680: Line wasn't found.
  Cause: Line wasn't found.
Action: Check procedure lines.
Level: 32
Type: ERROR
Impact: Other

ODI-17681: Maximum number of sessions must be positive.
Cause: Wrong value.
Action: Check maximum number.
Level: 32
Type: ERROR
Impact: Other

ODI-17682: Method is not valid unless MultiConnectionSupported.
Cause: MultiConnectionSupported is true.
Action: Check procedure.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17683: Model must be in Customized mode.
Cause: Wrong model mode.
Action: Call setReverseType(ReverseType.CUSTOMIZED).
Level: 32
Type: ERROR
Impact: Other

ODI-17684: Name can't be set.
Cause: Name is computed.
Action: Check name.
Level: 32
Type: ERROR
Impact: Other

ODI-17685: No [0] is defined for this model.
Cause: Missed definition.
Action: Define CKM for model.
Level: 32
Type: ERROR
Impact: Other

ODI-17686: No valid [0] name was found from this qualified name.
Cause: Valid name wasn’t found.
Action: Check qualified name.
Level: 32
Type: ERROR
Impact: Other

ODI-17687: No valid qualified name was provided.
Cause: Name is invalid.
Action: Check qualified name.

Level: 32
Type: ERROR
Impact: Other

ODI-17688: OdiScenario is undefined.
Cause: OdiScenario is undefined.
Action: Check OdiScenario definition.

Level: 32
Type: ERROR
Impact: Other

ODI-17689: Option must be in the same procedure as line.
Cause: Option procedure is inconsistent.
Action: Check option procedure.

Level: 32
Type: ERROR
Impact: Other

ODI-17690: Package and procedure must be owned by the same project.
Cause: Procedure parent is inconsistent.
Action: Check procedure parent.

Level: 32
Type: ERROR
Impact: Other

ODI-17691: Primary key column's datastore must be equals to this reference's primary datastore.
Cause: Column datastore is inconsistent.
Action: Check datastores.

Level: 32
Type: ERROR
Impact: Other

ODI-17692: Reference column doesn't belong to this reference.
Cause: Column is inconsistent.
Action: Check column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17693: Reference's foreign datastore is not equal to this datastore.
Cause: Datastores are inconsistent.
Action: Check datastores.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17694: Steps can't be moved from one package to another.
Cause: Steps can't be moved from one package to another.
Action: Consid not to move steps.

Level: 32
Type: ERROR
Impact: Other

ODI-17695: The new position is not valid.
Cause: The new position is not valid.
Action: Check new position.

Level: 32
Type: ERROR
Impact: Other

ODI-17696: The option already exists.
Cause: The option already exists.
Action: Check option.

Level: 32
Type: ERROR
Impact: Other

ODI-17697: The option owner has already been set.
Cause: The option owner has already been set.
Action: Check option owner.

Level: 32
Type: ERROR
Impact: Other

ODI-17698: The reference type must be [ {0} ] in order to define a complex SQL expression.
Cause: Wrong reference type.
Action: Check reference type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17699: The reference type must be \{0\} in order to obtain the complex SQL expression.
Cause: Wrong reference type.
Action: Check reference type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17700: The string value length should not exceed MAX\_SHORT\_TEXT\_LENGTH since FlexFieldType is SHORT\_TEXT.
Cause: FlexFieldType is SHORT\_TEXT.
Action: Check FlexFieldType and string value length.
Level: 32
Type: ERROR
Impact: Other

ODI-17701: This OdiLoadPlanInstanceRun is not ESS Job related.
Cause: OdiLoadPlanInstanceRun is not ESS Job related.
Action: Check OdiLoadPlanInstanceRun.
Level: 32
Type: ERROR
Impact: Other

ODI-17702: This session is not ESS Job related.
Cause: Session is not ESS Job related.
Action: Check session.
Level: 32
Type: ERROR
Impact: Other

ODI-17703: This OdiReference must be from type \{0\} in order to access the primary DataStore alias.
Cause: Wrong OdiReference type.
Action: Check OdiReference type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17704: This OdiReference must be from type \{0\} in order to set the primary DataStore alias.
Cause: Wrong OdiReference type.
Action: Check OdiReference type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17705: This file descriptor is not consistent with the parent model's technology.
Cause: File descriptor is not consistent.
Action: Check file descriptor and parent technology.
Level: 32

Type: ERROR
Impact: Other

ODI-17706: This setVariable is used for increment.
Cause: Increment value is set.
Action: Use method getIncrementValue().
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17707: Unable to add an alien main partition.
Cause: Main partition datastore is inconsistent.
Action: Check main partition.
Level: 32

Type: ERROR
Impact: Other

ODI-17708: Unable to compute name.
Cause: Name has been set on this physical schema.
Action: Do not compute name.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17709: Parameter must be false.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17710: Parameter {0} must be true.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32

Type: ERROR
Impact: Programmatic
ODI-17711: Undefined ODI work repository name.
  Cause: Undefined repository name.
  Action: Check repository name.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17712: Variable and Step should be defined in the same Load Plan.
  Cause: Variable and Step have different parent Load Plans.
  Action: Define variable and step in the same Load Plan.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17713: VariableDataType should be set before accessing DefaultValue.
  Cause: VariableDataType is undefined.
  Action: Set VariableDataType.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17714: You can only set KMs contained in the OdiProject containing of the OdiInterface.
  Cause: KM has different parent project than OdiInterface.
  Action: Check KM.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17715: Can't add a null variable to load plan.
  Cause: Variable is null.
  Action: Check variable value.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17716: DataTypes must be consistent.
  Cause: DataTypes is inconsistent.
  Action: Check DataTypes.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17717: Constraint is not a condition.
Cause: Inconsistent constraint type.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17718: Constraint is not a key.
Cause: Inconsistent constraint type.
Action: Check constraint.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17719: Option is not associated to this procedure.
Cause: Option is not associated to this procedure.
Action: Check option and procedure.

Level: 32
Type: ERROR
Impact: Other

ODI-17720: Constraint is not a reference.
Cause: Inconsistent constraint type.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17721: Parameter [0] already belongs to [1].
Cause: Parameter has parent.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17722: Parameter [0] does not belong to this instance of [1].
Cause: Parameter has different parent.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17723: Parameter [0] must belong to this [1].
Cause: Parameter parent is inconsistent.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17724: Parameter [0] can't be moved to an other [1].
Cause: Parameter can't be moved.
Action: Do not move parameter.

Level: 32
Type: ERROR
Impact: Other

Cause: Parameter has wrong prefix.
Action: Check parameter prefix.

Level: 32
Type: ERROR
Impact: Other

ODI-17726: Logical Agent [0] must be mapped to a Physical Agent in the ContextCode [1].
Cause: Agent is null.
Action: Check agents.

Level: 32
Type: ERROR
Impact: Other

ODI-17727: pDataServiceContainer is not a data service.
Cause: pDataServiceContainer is not a data service.
Action: Check pDataServiceContainer.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17728: Package and interface must be owned by the same project.
Cause: Package and interface have different parents.
Action: Check package and interface.

Level: 32
Type: ERROR
Impact: Other

ODI-17729: Parameter must be true.
Cause: Wrong parameter value.
Action: Check parameter.
Type: ERROR
Impact: Programmatic

ODI-17730: Not legal for shortcut.
Cause: Object is shortcut.
Action: Use getShortcutBaseObject() to access the real object.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17731: Not legal to construct a shortcut from a datastore in a model with a different technology.
Cause: Inconsistent technologies.
Action: Check model and datastore.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17732: Odi object Must be shortcut after materialize.
Cause: Object isn’t shortcut.
Action: Check object.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17733: Reference's primary datastore must be not null in order to define a ReferenceColumn.
Cause: Primary DataStore is null.
Action: Check DataStore.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17734: pDataServiceContainer [0] has no technology defined.
Cause: Data Service Container has no technology defined.
Action: Define technology.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17735: Reference's foreign datastore is not equals to this datastore.
Cause: Reference’s foreign datastore is not equals to this datastore.
Action: Check DataStores.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17736: You can only set global KMs or KMs contained in the OdiProject containing the OdiInterface.
Cause: Wrong KM.
Action: Check KM and project.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17737: StepLog and Variable don't belong to the same session.
Cause: Inconsistent session.
Action: Check Session value for StepLog and Variable.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17738: Unable to find '{0}' as variable used by the scenario '{1}' in version '{2}.'
Cause: Variable is null.
Action: Check variable name.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17739: Unable to override '{0}' variable for execution. It is marked as read-only for scenario '{1}' in version '{2}.'
Cause: Variable is read-only.
Action: Check variable.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17740: Error while connecting to the Application Server at URL {0}.
Cause: Exception was thrown during connection.
Action: Ensure that the Application Server is running and accepting requests.
Level: 32
Type: ERROR
Impact: Network

ODI-17741: Datastore isn't used as a lookup source.
Cause: Datastore isn't used as a lookup source.
Action: Check Datastore.
Level: 32
Type: ERROR

Impact: Programmatic

ODI-17742: Parameter \{0\} must be greater or equal than \{1\} and less or equal than \{2\}.
Cause: Wrong parameter value
Action: Check parameter.

Level: 32

Type: ERROR

Impact: Programmatic

ODI-17743: Variable should be related to the same \{0\}.
Cause: Wrong parent for variable.
Action: Check variable.

Level: 32

Type: ERROR

Impact: Programmatic

ODI-17744: The status can only be switched from ERROR to DONE or from DONE to ERROR.
Cause: Wrong status
Action: Check status.

Level: 32

Type: ERROR

Impact: Programmatic

ODI-17745: Parameter \{0\} must be greater or equal than \{1\}.
Cause: Wrong parameter value.
Action: Check parameter.

Level: 32

Type: ERROR

Impact: Programmatic

ODI-17746: Parameter \{0\} must be greater than \{1\}.
Cause: Wrong parameter value.
Action: Check parameter.

Level: 32

Type: ERROR

Impact: Programmatic

ODI-17747: Array \{0\} must not be empty.
Cause: Array length is 0.
Action: Check array.

Level: 32

Type: ERROR
Impact: Programmatic
ODI-17748: Parameter {0} is not relevant to this schedule.
  Cause: Wrong parameter.
  Action: Check parameter.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17749: Invalid value was specified. Cannot create {0} with the value {1}.
  Cause: Invalid value was specified.
  Action: Check value.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17750: Parent folder already has the release tag set.
  Cause: Setting the release tag when the parent already has the release tag set.
  Action: Set the release tag in parent.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17751: Shortcut and the base object are under same folder.
  Cause: Cannot create shortcut {0} with the base object under same folder {1}.
  Action: Create shortcut in different folder.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17752: Shortcut and the base object are in different projects.
  Cause: Cannot create shortcut {0} in project {1} which is different from the project of the base object.
  Action: Create shortcut in same project as the base object.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17753: Shortcut with same reference object in same folder.
  Cause: There is other shortcut object with same reference object as {0} in the same folder.
  Action: Create shortcut in different folder.
  Level: 32
  Type: ERROR
Impact: Programmatic

ODI-17754: Shortcut and the base object are under same model.
Cause: Cannot create shortcut \{0\} with the base object under same model \{1\}.
Action: Create shortcut in different model.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17755: Shortcut with same reference object in same model.
Cause: There is other shortcut object with same reference object as \{0\} in the same model.
Action: Create shortcut in different model.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17756: Scenario "\{0\}", which is referenced by RunScenario step "\{1\}", has variable "\{2\}" but LoadPlan does not have variable with the same name.
Cause: Missed variable in Load Plan
Action: Check Load Plan’s variables.
Level: 32
Type: WARNING
Impact: Programmatic

ODI-17757: Scenario "\{0\}", which is referenced by RunScenario step "\{1\}", has a newer version "\{2\}" in the repository
Cause: Scenario has newer version.
Action: Consider to use latest version.
Level: 32
Type: NOTIFICATION
Impact: Programmatic

ODI-17758: LoadPlan Variable "\{0\}" SQL is different than the design repository Variable "\{1\}" SQL.
Cause: Variable's SQL was redefined.
Action: Check LoadPlan's variable.
Level: 32
Type: NOTIFICATION
Impact: Programmatic

ODI-17759: LoadPlan Variable "\{0\}" LogicalSchema "\{1\}" is different than the design repository Variable "\{2\}" LogicalSchema "\{3\}".
Cause: Variable's Logical Schema was redefined.
Action: Check LoadPlan's variable.
Level: 32
Type: NOTIFICATION
Impact: Programmatic
ODI-17760: Exception "{0}" is not used in the Load Plan.
Cause: Exception is not used.
Action: Consider to delete or disable unused exception.
Level: 32
Type: NOTIFICATION
Impact: Programmatic
ODI-17761: LoadPlan Variable "{0}" is refreshed at step "{1}", but it has no SQL.
Cause: LoadPlan Variable doesn't have refresh SQL.
Action: Check variable’s SQL or disable variable refreshing.
Level: 32
Type: ERROR
Impact: Programmatic
ODI-17762: Context is specified on a step "{0}", but it's no longer present in the topology.
Cause: Context was removed.
Action: Check step’s context.
Level: 32
Type: ERROR
Impact: Programmatic
ODI-17763: Logical Agent is specified on a step "{0}", but it is no longer present in the topology
Cause: Logical Agent was removed.
Action: Check step’s Logical Agent.
Level: 32
Type: ERROR
Impact: Programmatic
ODI-17764: Context "{0}" and Logical agent "{1}" on a step "{2}" does not map to any physical agent.
Cause: Physical Agent doesn’t exist.
Action: Check agents’ mapping.
Level: 32
Type: ERROR
Impact: Programmatic
ODI-17765: Scenario variable "{0}" type and LoadPlan variable "{1}" type mismatch.
Cause: Variables have different datatype.
Action: Check variables.
Level: 32
Type: ERROR
Impact: Programmatic
ODI-17766: Scenario "[0]" wasn't found.
Cause: Scenario doesn't exist
Action: Check scenario and Load Plan step.

Level: 32
Type: WARNING
Impact: Programmatic
ODI-17767: LoadPlan has variable "[0]", but repository doesn't have variable with the same name.
Cause: Variable was deleted.
Action: Check variables.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-17768: LoadPlan Variable "[0]" has SQL, which could not be validated.
Cause: OdiVariableTextGeneratorException during validation.
Action: Check variable and variable text generator.

Level: 32
Type: WARNING
Impact: Programmatic
ODI-17769: OdiRef: Internal ID [0] of IObjects [1] should not be used when the repository is 12c mode.
Cause: Internal ID is used in 12c mode.
Action: Use Global Id instead of internal id.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-17770: Profile [0] is not assigned to role [1].
Cause: Profile is not assigned to role.
Action: Check role's profiles.

Level: 32
Type: ERROR
Impact: Security
ODI-17771: Enterprise principal with unique ID/name [0] is not mapped to role [1].
Cause: Enterprise principal is not mapped to role.
Action: Check role's mapped enterprise principals.
Level: 32
Type: ERROR
Impact: Security

ODI-17772: Parameter {0} should be {1} or {2}.
Cause: Wrong parameter value.
Action: Check parameter value.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17773: Enterprise User or Role {0} does not exist.
Cause: Enterprise principal with such name could be found at LDAP server.
Action: Check principal name and LDAP server.

Level: 32
Type: ERROR
Impact: Security

ODI-17774: Maximum number of concurrent threads must be positive.
Cause: Wrong value.
Action: Check maximum number provided.

Level: 32
Type: ERROR
Impact: Other

ODI-17775: Maximum number of threads per session can not be negative.
Cause: Wrong value.
Action: Check maximum number provided.

Level: 32
Type: ERROR
Impact: Other

ODI-17776: Maximum number of concurrent threads must not be less than maximum session count.
Cause: Wrong value.
Action: Check maximum numbers provided.

Level: 32
Type: ERROR
Impact: Other

ODI-17777: Maximum number of threads per session must be not greater than maximum number of threads.
Cause: Wrong value.
Action: Check maximum numbers provided.
Level: 32  
Type: ERROR  
Impact: Other

ODI-17778: Maximum number of cache entries in Session Blueprint queue cannot be negative.  
Cause: Wrong value.  
Action: Check value.

Level: 32  
Type: ERROR  
Impact: Other

ODI-17779: Maximum idle time for Session Blueprint in cache cannot be negative.  
Cause: Wrong value.  
Action: Check value.

Level: 32  
Type: ERROR  
Impact: Other

ODI-17780: Package and mapping must be owned by the same project.  
Cause: Package and mapping have different parents.  
Action: Check package and mapping.

Level: 32  
Type: ERROR  
Impact: Other

ODI-17781: Deployment spec must be owned by the mapping.  
Cause: Deployment Spec is not owned by mapping.  
Action: Check mapping and deployment spec.

Level: 32  
Type: ERROR  
Impact: Other

ODI-17782: OdiRef: Internal ID is retrieved in method {0}.{1} for 12c repository.  
Cause: Internal ID is retrieved in 12c mode.  
Action: Retrieve Global Id instead of internal id.

Level: 32  
Type: ERROR  
Impact: Programmatic

ODI-17783: Mapping metadata version mismatch. Expected {0}, but was {1}.  
Cause: Mapping metadata version mismatch.  
Action: Check the expected and actual Mapping metadata version.

Level: 32
Type: ERROR
Impact: Other
ODI-17784: Reusable Mapping metadata version mismatch. Expected {0}, but was {1}.
Cause: Reusable Mapping metadata version mismatch.
Action: Check the expected and actual Reusable Mapping metadata version.
Level: 32
Type: ERROR
Impact: Other
ODI-17785: Option positions in knowledge module must be unique.
Cause: Option position undefined or multiple option in knowledge module has same position.
Action: Modify the position of options to be unique and not null.
Level: 32
Type: ERROR
Impact: Programmatic
ODI-17786: JKM is not Oracle Golden Gate JKM.
Cause: Model doesn't have JKM set or JKM is not Oracle Golden Gate JKM.
Action: Set Oracle Golden Gate JKM for the model.
Level: 32
Type: ERROR
Impact: Programmatic
ODI-17787: Extract and initial extract processes cannot be the same.
Cause: Extract and initial extract processes are the same.
Action: Choose another extract or initial extract process.
Level: 32
Type: ERROR
Impact: Programmatic
ODI-17788: Replicat and initial replicat processes cannot be the same.
Cause: Replicat and initial replicat processes are the same.
Action: Choose another replicat or initial replicat process.
Level: 32
Type: ERROR
Impact: Programmatic
ODI-20001: ODI-20001: Cannot check the key because the Datastore does not exist in the database.
Cause: The Datastore referenced by this key did not exist in the database.
Action: Ensure the Datastore refers to an existing database table.
Level: 32
Type: ERROR
Impact: Other

ODI-20002: The selected file is not a valid key file.
Cause: An invalid encryption key file was selected.
Action: Select a valid encryption key file.

Level: 32
Type: ERROR
Impact: Other

ODI-20003: Cannot edit the condition
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20004: Cannot edit the reference
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20005: Cannot edit the variable
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20006: Cannot display table's data. Data is probably already displayed.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20007: Cannot display table's data.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20008: You cannot Display this Column Data. Data is probably already displayed
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20009: Cannot display data. The datastore resource name is {0} characters long which is longer than allowed by the technology ({1}). Please review the technology settings in Topology.
Cause: The datastore resource name exceeded the limit allowed by its technology.
Action: Ensure the maximum table name length setting in the corresponding technology is correct. Consider changing the datastore resource name to comply.
Level: 32
Type: ERROR
Impact: Other

ODI-20010: Cannot display this Column Data
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20011: Cannot perform this action: a Column of this Datastore is currently being edited
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20012: Cannot perform this action: the Datastore containing this Column is currently being modified
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20013: Unable to perform the action because the package is currently being modified
Cause:
ODI-20014: Cannot encrypt the Procedure: it is currently being modified

Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20015: Cannot initialize the Flexfields values

Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20016: Unable to add project user functions

Cause: An unsupported action was attempted.
Action: No action required as Project user functions are not a valid selection to be added to a solution.

Level: 32
Type: ERROR
Impact: Other

ODI-20017: Unable to add project sequences

Cause: An unsupported action was attempted.
Action: No action required as Project sequences are not a valid selection to be added to a solution.

Level: 32
Type: ERROR
Impact: Other

ODI-20018: Unable to add project variables

Cause: An unsupported action was attempted.
Action: No action required as Project variables are not a valid selection to be added to a solution.

Level: 32
Type: ERROR
Impact: Other

ODI-20019: Unable to get GBO object

Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20020: ODI-20020: Cannot change CKM
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20021: ODI-20021: Cannot change the order of this Command because you do not have 'Edit' privileges on this Object
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20022: ODI-20022: Could not change the KM
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20023: ODI-20023: Cannot Duplicate a Command
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20024: ODI-20024: Cannot create the cross reference for the condition
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20025: ODI-20025: Cannot create the cross references for the reference
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20026: ODI-20026: Cannot view this Datastore: one of its Columns is currently being edited
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20027: ODI-20027: Cannot view this Column: its Datastore is currently being edited
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20028: ODI-20028: Cannot start execution.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20029: ODI-20029: Cannot move a line
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20030: ODI-20030: Cannot start the generation. The file is probably already open.
Cause:  Attempt to open report file for output failed.
Action:  Ensure the specified file is not currently open and the file permissions allow for write access before retrying the operation. Consider choosing a different file for output.

Level: 32
Type: ERROR
Impact: Other

ODI-20031: ODI-20031: Cannot Delete a Command being Edited.
ODI-20032: ODI-20032: Cannot Delete a Command
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20033: ODI-20033: Cannot find the KM description
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20034: ODI-20034: Cannot find the Options list for a Command
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20035: ODI-20035: Could not find a description for the KM
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20036: ODI-20036: Impossible to find the technology name, please check your privileges.
  Cause: The ODI security permissions were insufficient to allow access to the specified technology.
  Action: Ensure the ODI user security permissions are correct.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20037: ODI-20037: Cannot find data transferred by the Drag'n'Drop
ODI-20038: ODI-20038: Could not connect
  Cause: A connection was not established to the selected Logical Schema.
  Action: Ensure the connection data for the Physical Schema of the selected Logical Schema is valid.

ODI-20039: ODI-20039: Incorrect context
  Cause:
  Action:

ODI-20040: ODI-20040: Problem encountered when determining the context
  Cause:
  Action:

ODI-20041: ODI-20041: No candidate datastore was found.
  Cause: There were no datastores in the current model usable as candidates for generating OUT mappings.
  Action: Consider creating an mapping to load data into a datastore of the current model.

ODI-20042: ODI-20042: Property key is empty
  Cause: The Property key for one of the specified Data Server's properties was not specified.
  Action: Ensure a non-empty key value is supplied or remove the property with this key.
Impact: Other

ODI-20043: ODI-20043: Invalid property key entered. Property key maximum length is 250 characters
Cause: The Property key for one of the specified Data Server's properties had a length greater than 250 characters.
Action: Ensure a key value with the valid length is supplied or remove the property with this key.

Level: 32
Type: ERROR
Impact: Other

ODI-20044: ODI-20044: Invalid property value entered. Property value maximum length is 250 characters
Cause: The Property value for one of this Data Server's properties had a length greater than 250 characters.
Action: Ensure a value with the valid length is supplied or remove the property with this value.

Level: 32
Type: ERROR
Impact: Other

ODI-20046: ODI-20046: Unable to change an open object
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20047: ODI-20047: Unable to change Value
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20048: ODI-20048: Invalid Value entered. Value maximum length is 250 characters
Cause: The Value for one of this object's Flexfields had a length greater than 250 characters.
Action: Ensure the value supplied has a valid length.

Level: 32
Type: ERROR
Impact: Other

ODI-20049: ODI-20049: You cannot copy a folder into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Folders cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20050: You cannot copy a knowledge module into another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20051: You cannot copy a package into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Packages cannot be copied into hierarchy of another projects.

Level: 32

   Type: ERROR
   Impact: Other

ODI-20058: You cannot move a procedure into a folder belonging to another project.
   Cause: An unsupported operation was attempted.
   Action: Procedures cannot be moved into hierarchy of another projects.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20059: You cannot copy a knowledge module into a package belonging to another project.
   Cause: An unsupported operation was attempted.
   Action: Knowledge modules cannot be copied into packages from another projects.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20060: You cannot copy an interface into a package belonging to another project.
   Cause: An unsupported operation was attempted.
   Action: Interfaces cannot be copied into packages from another projects.
   Level: 32
Type: ERROR
Impact: Other

ODI-20061: You cannot copy a procedure into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be copied into packages from another projects.
Level: 32

Type: ERROR
Impact: Other

ODI-20062: You cannot move a knowledge module into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be moved into packages from another projects.
Level: 32

Type: ERROR
Impact: Other

ODI-20063: You cannot move an interface into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be moved into packages from another projects.
Level: 32

Type: ERROR
Impact: Other

ODI-20064: You cannot move a step into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Package steps cannot be moved into packages from another projects.
Level: 32

Type: ERROR
Impact: Other

ODI-20065: You cannot move a procedure into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be moved into packages from another projects.
Level: 32

Type: ERROR
Impact: Other

ODI-20066: You cannot copy a folder into another project.
Cause: An unsupported operation was attempted.
Action: Folders cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20067: ODI-20067: You cannot copy a procedure into another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20068: ODI-20068: You cannot copy a variable into another project.
Cause: An unsupported operation was attempted.
Action: Variables cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20069: ODI-20069: You cannot move a folder into another project.
Cause: An unsupported operation was attempted.
Action: Folders cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20070: ODI-20070: You cannot move a sequence into another project. Copy the sequence instead.
Cause: An unsupported operation was attempted.
Action: Sequences cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20071: ODI-20071: You cannot move a procedure into another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20072: ODI-20072: You cannot move a variable into another project.
Cause: An unsupported operation was attempted.
Action: Variables cannot be moved into hierarchy of another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20073: ODI-20073: You cannot copy a schedule into a scenario belonging to another project.
Cause: An unsupported operation was attempted.
Action: Schedules cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20074: ODI-20074: You cannot move a schedule into a scenario belonging to another project.
Cause: An unsupported operation was attempted.
Action: Schedules cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20075: ODI-20075: You cannot move a folder into one of its subfolders.
Cause: An unsupported operation was attempted.
Action: Folders cannot be moved into their subfolders.

Level: 32
Type: ERROR
Impact: Other

ODI-20076: ODI-20076: You cannot copy a knowledge module into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be copied into package steps from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20077: ODI-20077: You cannot copy an interface into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be copied into package steps from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20078: ODI-20078: You cannot copy a procedure into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be copied into package steps from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20079: ODI-20079: You cannot move a knowledge module into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be moved into package steps from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20080: ODI-20080: You cannot move an interface into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be moved into package steps from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20081: ODI-20081: You cannot move a step into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Steps cannot be moved into package steps from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20082: ODI-20082: You cannot move a procedure into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be moved into package steps from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20083: ODI-20083: Unable to perform the operation. {0} is being edited.
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20084: ODI-20084: Only variables from the same project can be placed in a package.
Cause: An unsupported operation was attempted.
Action: Variables from another projects cannot be placed in packages.
Level: 32
Type: ERROR
Impact: Other

ODI-20085: ODI-20085: Only interfaces from the same project can be placed in a package.
Cause: An unsupported operation was attempted.
Action: Interfaces from another projects cannot be placed in packages.
Level: 32

Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20090: ODI-20090: Error while duplicating
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20091: ODI-20091: An unexpected error occurred.
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20092: ODI-20092: An error occurred while replacing the version.
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20093: ODI-20093: Scenario generation is not allowed for non-saved object
  Cause: Scenario generation could not be performed because the source object was not saved.
  Action: Ensure the source object is saved before attempting scenario generation for it.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20094: ODI-20094: Specify the object name to generate Scenario
  Cause: Scenario generation could not be performed because the source object's name was not specified.
  Action: Ensure the source object's name is specified before attempting scenario generation for it.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20095: ODI-20095: Marker Group save was cancelled
  Cause: Marker group save was cancelled by a user.
  Action: No action required.
  Level: 32
ODI-20096: Unable to edit the action line.
  Cause: 
  Action: 
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20097: The line Name is mandatory
  Cause: A value for the Action Line Name field was not specified.
  Action: Enter a non-empty value for the Action Line Name field.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20098: Some Datatype Conversions between current and new Technologies are absent
  Cause: Changing the selected Model's Technology failed because the Physical Architecture did not provide datatype conversion rules for datatypes used by columns of datastores belonging to the selected model.
  Action: Ensure datatype conversion rules exist for all datatypes used by columns of datastores belonging to the selected model or do not use datatypes that cannot be converted.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20099: Unable to create execution window
  Cause: 
  Action: 
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20100: Unable to access a join or a filter
  Cause: Access to a join or filter failed due to insufficient ODI security permissions.
  Action: Ensure the ODI user security permissions are correct for the join or filter object.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20101: Unable to find mapping alias
Cause: Access to the target mapping failed due to insufficient ODI security permissions.
Action: Ensure the ODI user security permissions are correct for the target mapping.

Level: 32
Type: ERROR
Impact: Other

ODI-20102: ODI-20102: Unable to find source table alias
Cause: Access to the source table failed due to insufficient ODI security permissions.
Action: Ensure the ODI user security permissions are correct for the source table.

Level: 32
Type: ERROR
Impact: Other

ODI-20103: ODI-20103: Unable to access a target column
Cause: Access to the target column failed due to insufficient ODI security permissions.
Action: Ensure the ODI user security permissions are correct for the target column.

Level: 32
Type: ERROR
Impact: Other

ODI-20105: ODI-20105: "Schema", "Table", "Column" and "Filter" are mandatory fields.
Cause: Values for the mandatory "Schema", "Table", "Column" and "Filter" fields were not supplied.
Action: Ensure values are supplied for these mandatory fields.

Level: 32
Type: ERROR
Impact: Other

ODI-20106: ODI-20106: Schema and Native sequence name are mandatory fields
Cause: Values for the mandatory Schema and Native sequence name fields were not supplied.
Action: Ensure values are supplied for these mandatory fields.

Level: 32
Type: ERROR
Impact: Other

ODI-20107: ODI-20107: A project sequence with the name "{0}" already exists in the project "{1}"
Cause: Saving the project sequence failed because the Sequence name was not unique within the Project.
Action: Ensure the sequence name entered is unique.
Level: 32
Type: ERROR
Impact: Other

ODI-20108: A global sequence with the name "{0}" already exists
Cause: Saving the Global sequence failed because the Global Sequence name was not unique.
Action: Ensure the sequence name entered is unique.
Level: 32
Type: ERROR
Impact: Other

ODI-20109: Error while restoring the version
Cause: Saving the Global sequence failed because the Global Sequence name was not unique.
Action: Ensure the sequence name entered is unique.
Level: 32
Type: ERROR
Impact: Other

ODI-20110: No version of this element exist.
Cause: The selected version of this object was not found in version repository.
Action: Create or restore the selected version of the object.
Level: 32
Type: ERROR
Impact: Other

ODI-20111: Sub-model code cannot be empty.
Cause: A value of the mandatory Sub-model code field was not supplied.
Action: Enter a non-empty value for the Sub-model code field.
Level: 32
Type: ERROR
Impact: Other

ODI-20112: The path defined in the logical schema is incorrect.
Cause: Incorrect path was specified in physical schema which is linked to the logical schema of this datastore in the current context.
Action: Ensure the path specified in physical schema is correct.
Level: 32
Type: ERROR
Impact: Other

ODI-20113: The GUID that was supplied does not match the GUID for this user in the external identity store. Please retrieve the correct GUID before saving.
Cause: The supplied GUID did not match GUID from external identity store.
Action: Provide a valid GUID.

Level: 32
Type: ERROR
Impact: Other

ODI-20114: ODI-20114: Error while subscribing
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20115: ODI-20115: Error while stopping journalizing
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20116: ODI-20116: Aliases are specified and are not unique.
Cause: Duplicate Alises were detected.
Action: Change the name of the join key alias.

Level: 32
Type: ERROR
Impact: Other

ODI-20117: ODI-20117: Error while executing command line.
Cause: An unexpected error occurred while trying to open the Report.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20118: ODI-20118: Error while building the menu.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

Cause: An unexpected error occurred during the report generation.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20120: ODI-20120: Error while journalizing
Cause: 
Action: 

Level: 32
Type: ERROR
Impact: Other

ODI-20121: ODI-20121: Error while saving the diagram
Cause: An unexpected error occurred during the saving the diagram.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20122: ODI-20122: Error while unsubscribing
Cause: An unexpected error occurred during the unsubscribing action.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20123: ODI-20123: Error while executing query
Cause: 
Action: Check the error details for further actions.

Level: 32
Type: ERROR
Impact: Other

ODI-20124: ODI-20124: Operation cancelled by user.
Cause: Operation cancelled by user
Action: Review the other messages for further actions.

Level: 32
Type: WARNING
Impact: Other

ODI-20126: ODI-20126: TreeTableColumn cannot be added
Cause: TreeTableColumn with this order number already exists
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
ODI-20127: ODI-20127: This TreeTableColumn cannot be removed.
   Cause: TreeTableColumn does not exist.
   Action: Contact Oracle Support Services.
   Level: 32
   Type: ERROR
   Impact: Other

   Cause: An error occurred during rollback operation.
   Action: Review other messages for further information.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20129: ODI-20129: Exception occurred.
   Cause:
   Action:
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20130: ODI-20130: You must select a folder.
   Cause: A folder was not selected.
   Action: Select a folder before attempting this action.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20131: ODI-20131: Cannot retrieve the table list
   Cause: An error occurred while trying to retrieve a list of tables.
   Action: Review the message log for more information. If problem persists contact Oracle Support Services.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20132: ODI-20132: An interface cannot be moved to another project
   Cause: An unsupported drag and drop operation was attempted.
   Action: No action required.
   Level: 32
   Type: ERROR
   Impact: Other
ODI-20133: ODI-20133: A procedure cannot be moved to another project  
**Cause:** An unsupported drag and drop operation was attempted.  
**Action:** No action required.  
**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20134: ODI-20134: A variable cannot be moved to another project  
**Cause:** An unsupported drag and drop operation was attempted.  
**Action:** No action required  
**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20135: ODI-20135: A step cannot be moved to another package  
**Cause:** An unsupported drag and drop operation was attempted.  
**Action:** No action required  
**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20138: ODI-20138: An error occurred during: dragGesture  
**Cause:** An unexpected error occurred while dragging an object.  
**Action:** Review the message log for more information. If problem persists contact Oracle Support Services.  
**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20139: ODI-20139: An error occurred during: dragEnter  
**Cause:**  
**Action:**  
**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20140: ODI-20140: An error occurred during: Drop  
**Cause:** An unexpected error occurred while dropping an object.  
**Action:** Review the message log for more information. If problem persists contact Oracle Support Services.  
**Level:** 32  
**Type:** ERROR  
**Impact:** Other
ODI-20141: ODI-20141: Login Creation Error
Cause: An unexpected error occurred while creating a new Login.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20142: ODI-20142: Popup Menu Creation Error
Cause: An unexpected error occurred while creating a popup menu.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20144: ODI-20144: Error while Deleting
Cause: An unexpected error occurred while deleting a tree object.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20145: ODI-20145: Error while Opening splitframe.
Cause: 
Action: 
Level: 32
Type: ERROR
Impact: Other

ODI-20146: ODI-20146: Error occurred during duplication
Cause: An unexpected error occurred while duplicating an object.
Action: Review the error details and message log for more information.
Level: 32
Type: ERROR
Impact: Other

ODI-20148: ODI-20148: An error occurred during: drag over the object
Cause: An unexpected error occurred while dragging an object over another object.
Action: Review the error details and message log for more information.
Level: 32
Type: ERROR
Impact: Other

ODI-20149: ODI-20149: Logical schema can't be undefined
Cause: A Logical schema was not defined.
Action: Define a Logical schema.

Level: 32
Type: ERROR
Impact: Other

ODI-20150: ODI-20150: KM or Procedure already encrypted. No encryption was performed.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20151: ODI-20151: File is not found. Invalid file location
Cause: The specified file could not be located in the file system.
Action: Ensure file location specified is valid and accessible.

Level: 32
Type: ERROR
Impact: Other

ODI-20152: ODI-20152: Object cannot be deleted
Cause: The specified object could not be deleted.
Action: Ensure the specified object exists and the security permissions permit deletion.

Level: 32
Type: ERROR
Impact: Other

ODI-20153: ODI-20153: The following field is missing: Syntax
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20155: ODI-20155: Changing the Logical Schema may require a re-generation of your Mappings. It may be better to modify the Topology information instead.
Cause:
Action:

Level: 32
Type: WARNING
Impact: Other
  Cause: An error occurred during the datastore distribution process.
  Action: Review the message details and message log for more information. If problem persists contact Oracle Support Services.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20159: ODI-20159: The Column {0} is used as a Reference
  Cause: An attempt was made to delete a column referenced by another object.
  Action: Delete the object which references this column then retry deleting this column.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20160: ODI-20160: The table {0} does not exist.
  Cause: An error occurred while executing the SQL request
  Action: Review the message details for more information. If problem persists contact Oracle Support Services.
  Level: 32
  Type: ERROR
  Impact: Other

  Cause: An error occurred during the standard reverse-engineering process.
  Action: Ensure the technology or driver supports standard reverse-engineering. Otherwise choose Customized Reverse and select an appropriate RKM for the technology.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20162: ODI-20162: The context is not valid.
  Cause: A Context was not specified.
  Action: Specify a Context.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20163: ODI-20163: Unable to add object
  Cause: An error occurred while dragging and dropping an object.
  Action: Review the message details and message log for more information.
  Level: 32
Type: ERROR
Impact: Other

ODI-20164: ODI-20164: The line Name is mandatory
Cause: A name was not specified.
Action: Specify a Line name.
Level: 32
Type: ERROR
Impact: Other

ODI-20165: ODI-20165: The project name {0} is a reserved word.
Cause: A reserved word was used as the name of a project.
Action: Enter a different project name.
Level: 32
Type: ERROR
Impact: Other

ODI-20166: ODI-20166: The project code {0} is a reserved word.
Cause: A reserved word was used as the project code.
Action: Enter a different project code.
Level: 32
Type: ERROR
Impact: Other

ODI-20167: ODI-20167: Logical schema is not set for the current context
Cause: A Logical schema was not set for the current context.
Action: Ensure the Logical Schema is not set to "Undefined" in the Context editor.
Level: 32
Type: ERROR
Impact: Other

ODI-20168: ODI-20168: Logical schema is not set for the current context
Cause: A Logical schema was not set for the current context.
Action: Ensure the Logical Schema is not set to "Undefined" in the Context editor.
Level: 32
Type: ERROR
Impact: Other

ODI-20169: ODI-20169: The field {0} is mandatory.
Cause: A mandatory field was not specified.
Action: Enter a value for this field.
Level: 32
Type: ERROR
Impact: Other
ODI-20170: You are trying to insert this versioned object but the version was deleted. Please re-create a version for this object.
**Cause:** The requested version of the object did not exist in the repository.
**Action:** Recreate the required version of this object.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20171: The solution already contains a child of [0]. To add [1] to the solution, you should delete [2] [3]. It is advised to use the button "synchronize" later to check the solution's coherence.
**Cause:** The solution already contained the specified object as a child.
**Action:** Delete the child object from the solution before retrying the addition. Consider using the synchronize option to verify the solution's coherence.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20172: The solution already contains a parent of [0]. To add [1] to the solution, you should delete [2] [3]. It is advised to use the button "synchronize" later to check the solution's coherence.
**Cause:** The solution has already contained the specified object as a parent of [0].
**Action:** Delete the parent object from the solution before retrying the addition. Consider using the synchronize option to verify the solution's coherence.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20173: An error occurred while generating the procedure
**Cause:**
**Action:**

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20174: Folder [0] already contains an mapping named [1]
**Cause:** An mapping of the same name already existed in the specified folder.
**Action:** Specify another name for the mapping.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20175: You cannot give an empty name to an mapping
**Cause:** The Mapping’s name was not specified.
**Action:** Enter a non-empty value for the mapping’s name.
Level: 32
Type: ERROR
Impact: Other

ODI-20176: You cannot create multiple mappings with the same name
Cause: An mapping of the same name already existed.
Action: Specify a different name for the mapping.

Level: 32
Type: ERROR
Impact: Other

ODI-20177: You must select a generation folder
Cause: The Generation folder was not selected.
Action: Select a generation folder.

Level: 32
Type: ERROR
Impact: Other

ODI-20180: You cannot choose an expiration date in the past.
Cause: Entered expiration date was in the past.
Action: Enter valid expiration date.

Level: 32
Type: ERROR
Impact: Other

ODI-20181: You cannot set an expiration date if there is no password.
Cause: No password was entered.
Action: Enter a password before setting an expiration date.

Level: 32
Type: ERROR
Impact: Other

ODI-20182: Error while opening window
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20183: Error while refreshing Solution
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20184: ODI-20184: The request to retrieve the sequence list has not been defined on the technology.
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20185: ODI-20185: Error while opening window
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20186: ODI-20186: Error while saving
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20187: ODI-20187: Error while adding the marker
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20188: ODI-20188: This object is locked by another user. You cannot edit its markers.
Cause: The object was locked by another user.
Action: Wait until the object is unlocked. Consider contacting the user who has the object locked.
Level: 32
Type: ERROR
Impact: Other

ODI-20189: ODI-20189: You do not have the sufficient privileges to reverse-engineer a model
Cause: The model could not be reverse-engineered due to insufficient privileges.
Action: Ensure the SUPERVISOR or owner of model grants the appropriate permissions.
Level: 32
Type: ERROR
Impact: Other

ODI-20190: You cannot reverse engineer a model in 'Standard' mode: the model technology assumes RKM to be selected.
Cause: No RKM was specified for this model.
Action: Select an RKM for this model.

Level: 32
Type: ERROR
Impact: Other

ODI-20191: The model you want to reverse-engineer references a logical schema that no longer exists.
Cause: The referenced Logical Schema for the Model was not found.
Action: Ensure a valid Logical Schema is assigned for the Model.

Level: 32

ODI-20345: ODI-20345: Cannot change the clause position
Cause: An unexpected internal exception has occurred.
Action: Contact Oracle Support Services.
Level: 32

Type: ERROR
Impact: Other

ODI-20346: ODI-20346: Cannot get the boolean value of an option
Cause: The boolean value of the option could not be retrieved due to a security error.
Action: Review the message log and contact Oracle Support Services for further assistance.
Level: 32

Type: ERROR
Impact: Other

ODI-20347: ODI-20347: Error during data transfer for drag and drop
Cause: An internal error occurred while dropping the object into the diagram.
Action: Review the message log for additional information and contact Oracle Support Services for further assistance.
Level: 32

Type: ERROR
Impact: Other
ODI-20348: An interface with the same name already exists in this folder. Please change the name of the new interface.

**Cause:** An interface with the specified name exists in the folder. The interface name must be unique within a folder.

**Action:** Enter a new interface name that is unique within the folder.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20349: Unknown event detected by the event manager. Please contact Oracle Support Services.

**Cause:** The Package Event Manager was called to action an unknown event.

**Action:** Contact Oracle Support Services for further assistance.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20350: Your diagram contains one or more FATAL/CRITICAL errors preventing display of the Flow Editor

**Cause:** The diagram is incomplete or contains errors that prevent the Flow Editor being displayed.

**Action:** Return to the diagram tab and review the error messages using the errors and warnings button in the toolbar. Fix the errors in order to access the Flow Editor.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20351: Error adding source to Quick Edit source table.

**Cause:** An internal error occurred which prevented the source being added.

**Action:** Contact Oracle Support Services for further assistance.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20352: Error adding target datastore to Quick Edit mapping table.

**Cause:** An internal error occurred which prevented the target being added.

**Action:** Contact Oracle Support Services for further assistance.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20353: Only a single column may be pasted into a Quick Edit table.

**Cause:** The clipboard contains multiple columns. Quick Edit only supports pasting a single cell into a table.

**Action:** Select the cells to be copied and paste them one at a time.
Level: 32
Type: ERROR
Impact: Other

ODI-20354: Paste targets must be in the same column as the previous copy. This does not apply to Expression columns (Lookup Expression, Join Expression, Filter Expression, and Mapping Expression).
 cause: You have selected a value from one column, and tried to paste it into a different column. This is only supported for Expression Columns.
 action: Please enter the values into the cell manually.

Level: 32
Type: ERROR
Impact: Other

ODI-20355: Duplicate value is not supported on this column.
 cause: The paste operation is not permitted in the Alias and Target Column Name fields as these fields must contain a unique value.
 action: Please enter the Alias or Name field manually.

Level: 32
Type: ERROR
Impact: Other

ODI-20356: Can not perform paste into a read-only column.
 cause: The Paste operation is not permitted on read-only columns.
 action: You may not update this value in the table.

Level: 32
Type: ERROR
Impact: Other

ODI-20357: Can not perform deletion because the target datastore is not temporary.
 cause: An attempt was made to delete a row in the target, but the target datastore is not a temporary table. Only rows in a temporary target table may be deleted.
 action: You cannot delete the row.

Level: 32
Type: ERROR
Impact: Other

ODI-20358: Interface cannot be saved because it has a fatal error: {0}.
 cause: The Interface could not be saved because it contains a fatal error which must be resolved.
 action: Review the errors in the Diagram tab and resolve the fatal errors.

Level: 32
Type: ERROR
Impact: Other
ODI-20359: Only one cell can be copied one at a time.
   Cause: More than one cell was selected. Quick Edit only supports copying a single cell.
   Action: Select and copy a single cell.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

ODI-20360: Only Expression columns support Copy and Paste from other applications. For all other columns, please perform a copy first on that column before pasting.
   Cause: Only values from other applications may be copied into Expression columns.
   Action: For all other columns, perform a copy first on that column before pasting.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

   Cause: Values may not be copied between tables in Quick Edit, apart from between Expression columns.
   Action: Please enter the values manually.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

ODI-20370: Shortcuts within a project can only refer to objects that belong to that same project
   Cause: Shortcuts within a project can only refer to objects that belong to that same project
   Action: Try another folder destination
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20371: No two shortcut objects within a folder may refer to the same base object
   Cause: No two shortcut objects within a folder may refer to the same base object
   Action: Try another folder destination or fix folder contents
   Level: 32
   Type: ERROR
   Impact: Other
ODI-20372: ODI-20372 : The source and destination models must be defined with the same Technology
Cause: The source and destination models must be defined with the same Technology
Action: Try another model destination or fix model properties.

Level: 32
Type: ERROR
Impact: Other

ODI-20373: ODI-20373 : No two shortcuts within a model may contain the same base object
Cause: No two shortcuts within a model may contain the same base object
Action: Try another folder destination or fix model contents.

Level: 32
Type: ERROR
Impact: Other

ODI-20374: ODI-20374 : A model cannot contain a datastore and a datastore shortcut to another datastore with the same datastore name
Cause: A model cannot contain a datastore and a shortcut to another datastore with the same datastore name
Action: Try another folder destination or fix model contents.

Level: 32
Type: ERROR
Impact: Other

ODI-20701: ODI-20701: The Name field is mandatory.
Cause: The Name field was not entered.
Action: Enter a name for the Load Plan.

Level: 32
Type: ERROR
Impact: Other

ODI-20702: ODI-20702: The name given for the Load Plan is already used by another load plan. Please provide another name.
Cause: The name provided for the Load Plan was not unique.
Action: Enter a unique name for the Load Plan.

Level: 32
Type: ERROR
Impact: Other

ODI-20703: ODI-20703: Variable "[0]" is not found.
Cause: The variable could not be found.
Action: Provide another name for the variable.

Level: 32
Type: ERROR
Impact: Other

ODI-20704: ODI-20704: Datatype of variable "[0]" has been changed.
Cause: The datatype of the original variable is different to the datatype of the load plan variable.
Action: Verify the datatype of the variable and ensure that the types of the original and load plan variables match.
Level: 32
Type: ERROR
Impact: Other

ODI-20705: ODI-20705: This variable is used in one or more case steps. Removing it will trigger deletion of those case steps, and all of their child steps. Do you want to continue?
Cause: An attempt was made to remove a variable which is used in one or more case steps.
Action: To remove the variable and its associated case steps, click Yes. Otherwise, click No, and nothing will be removed.
Level: 32
Type: WARNING
Impact: Other

ODI-20706: ODI-20706: The Step Name is mandatory.
Cause: The Step Name field was not entered.
Action: Enter a name for the Step.
Level: 32
Type: ERROR
Impact: Other

ODI-20707: ODI-20707: The Variable is mandatory.
Cause: A Variable was not selected.
Action: Select a variable.
Level: 32
Type: ERROR
Impact: Other

ODI-20708: ODI-20708: The Scenario is mandatory.
Cause: A Scenario was not selected.
Action: Select a Scenario.
Level: 32
Type: ERROR
Impact: Other

ODI-20709: ODI-20709: The Value is mandatory.
Cause: A Value was not provided.
**Action:** Enter a Value.
**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20710: ODI-20710: The Value format is not valid.**
**Cause:** An incorrect format was given for the Value.
**Action:** Check the format of the Value and correct it.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20711: ODI-20711: The Step Name is mandatory.**
**Cause:** The Step Name field was not entered.
**Action:** Provide the name of the Step.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20712: ODI-20712: The Variable is mandatory.**
**Cause:** A Variable was not selected.
**Action:** Select a Variable.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20713: ODI-20713: The Scenario is mandatory.**
**Cause:** A Scenario was not selected.
**Action:** Select a Scenario.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20714: ODI-20714: The Context is mandatory.**
**Cause:** A Context was not selected for execution.
**Action:** Select an execution Context.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20715: ODI-20715: The Logical Agent is mandatory.**
**Cause:** A Logical Agent was not selected for execution.
**Action:** Select a Logical Agent.
Level: 32
Type: ERROR
Impact: Other

ODI-20716: ODI-20716: No Physical Agent is defined for the selected Logical Agent and Context. Edit Logical Agent "[0]", and define a Physical Agent for Context "[1]".

Cause: There was no Physical Agent associated with this Logical Agent in the specified context.

Action: Associate a Physical Agent with the Logical Agent in the selected context.

Level: 32
Type: ERROR
Impact: Other

ODI-20717: ODI-20717: No Physical Agents are running. A Physical Agent must be running in order to Restart a Load Plan.

Cause: There were no Physical Agents running.

Action: Start a Physical Agent before restarting the Load Plan.

Level: 32
Type: ERROR
Impact: Other

ODI-20718: ODI-20718: No Physical Agents are running. A Physical Agent must be running in order to Stop a Load Plan.

Cause: There were no Physical Agents running.

Action: Start the Agent before executing the Load Plan.

Level: 32
Type: ERROR
Impact: Other

ODI-20719: ODI-20719: Scenario "[0]" is not found.

Cause: The scenario was not found.

Action: Specify an existing scenario.

Level: 32
Type: ERROR
Impact: Other

ODI-20720: ODI-20720: Physical Agent "[0]" - which is defined in Logical Agent "[1]" to be used for Context "[2]" - is not responding. Verify that Physical Agent "[0]" has been started.

Cause: The Physical Agent was not reachable.

Action: Check the Physical Agent and start it.

Level: 32
Type: ERROR
Impact: Other
ODI-20721: Interface contains one or more errors. You should correct the errors before attempting to execute it

**Cause:** The interface contains errors which prevent it from being executed.

**Action:** Review the errors shown in the interface editor and update the interface to fix the problems.

**Level:** 32
**Type:** ERROR
**Impact:** Other

ODI-20722: Cannot display data. Source alias is \(0\) characters long which is longer than allowed by the technology \((1)\). Please review the technology settings in Topology.

**Cause:** Source alias exceeded the limit allowed by its technology.

**Action:** Ensure the maximum table name length setting in the corresponding technology is correct. Consider changing source alias to comply.

**Level:** 32
**Type:** ERROR
**Impact:** Other

ODI-20723: There is no any version of scenario \(0\) found. A scenario of the step \(1\) cannot be refreshed.

**Cause:** The scenario of step was not found.

**Action:** Check if specified scenario for this step is correct.

**Level:** 32
**Type:** WARNING
**Impact:** Other

ODI-20724: Journalized data not found. Journal data view: \(0\)

**Cause:** Journal is not started or is stopped.

**Action:** Ensure the journal is started: select Changed Data Capture > Journal Data.

**Level:** 32
**Type:** ERROR
**Impact:** Other

ODI-20726: The Step Name is mandatory.

**Cause:** The Step Name field was not entered.

**Action:** Enter a name for the Step.

**Level:** 32
**Type:** WARNING
**Impact:** Other

ODI-20727: Scenario "(0)" parent is not found.

**Cause:** The Scenario source object does not exist.

**Action:** Check if the source object, from which the Scenario was generated, does exist.
Level: 32
Type: ERROR
Impact: Other

ODI-20728: ODI-20728: The column name is mandatory
Cause: The datastore column could not be saved because the mandatory Name field was not entered.
Action: Enter a value in the column name field.

Level: 32
Type: ERROR
Impact: Other

ODI-20729: ODI-20729: {0} is a dependant object of the following object(s) {1} and cannot be removed
Cause: Selected object for removal is a dependent object.
Action: Remove the dependent object first.

Level: 32
Type: ERROR
Impact: Other

ODI-20731: ODI-20731: The parent from which this scenario is generated does not exist anymore so the editor couldn't show the parent related information.
Cause: The editor couldn't show the parent related information because the scenario parent does not exist anymore. This could happen, for example, if you imported the scenario, but didn't import it's parent object.
Action: Try to figure out, why the scenario parent object does not exist. Try to restore the parent.

Level: 32
Type: ERROR
Impact: Other

ODI-20732: ODI-20732: You cannot move a submodel into another model.
Cause: An unsupported operation was attempted.
Action: Submodels cannot be moved into hierarchy of another models.

Level: 32
Type: ERROR
Impact: Other

ODI-20733: ODI-20733: You cannot copy a submodel into another model.
Cause: An unsupported operation was attempted.
Action: Submodels cannot be copied into hierarchy of another models.

Level: 32
Type: ERROR
Impact: Other
ODI-20734: Changing the name of a user function only impacts the user function itself; it has no impact on objects referencing it.

**Cause:** The user function name has been updated

**Action:** It is the user's responsibility to determine where the user function is referenced and to manually change the name of the user function in those places

**Level:** 32

**Type:** WARNING

**Impact:** Other

ODI-20736: The Name field is mandatory.

**Cause:** The value for the Name field was not specified.

**Action:** Enter a name for the Object.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20737: Could not build WSDL Model.

**Cause:**

**Action:**

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20741: This is not a valid Cobol Copybook.

**Cause:** The file chosen in the Reverse Engineering Cobol Copybook process is not a valid Cobol Copybook.

**Action:** Ensure the file is a valid Cobol Copybook.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20742: You cannot copy a mapping into a folder belonging to another project.

**Cause:** An unsupported operation was attempted.

**Action:** Mappings cannot be copied into hierarchy of another projects.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20743: You cannot copy a reusable mapping into a folder belonging to another project.

**Cause:** An unsupported operation was attempted.

**Action:** Reusable mappings cannot be copied into hierarchy of another projects.

**Level:** 32
Type: ERROR
Impact: Other

ODI-20744: ODI-20744: You cannot move a mapping into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Mappings cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20745: ODI-20745: You cannot move a reusable mapping into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Reusable mappings cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20746: ODI-20746: You cannot move a global reusable mapping into a folder.
Cause: An unsupported operation was attempted.
Action: Global Reusable mappings cannot be moved into a folder.

Level: 32
Type: ERROR
Impact: Other

ODI-20747: ODI-20747: You cannot copy a global reusable mapping into a folder.
Cause: An unsupported operation was attempted.
Action: Global Reusable mappings cannot be copied into a folder.

Level: 32
Type: ERROR
Impact: Other

ODI-20748: ODI-20748: Open is not valid for this node.
Cause: The editor is not applicable for this node.
Action: Editor cannot be opened for this node.

Level: 32
Type: ERROR
Impact: Other

ODI-20749: ODI-20749: Selected Capture/Initial Load Capture process is associated with another model. This may cause conflicts during 'Start Journal' action, if the logical process instance selected uses the same physical process instance.
Cause: Selected Goldengate Capture/Initial Load Capture process is used in a different model.
Action: Select a different set of process instances for this model.
Level: 32  
Type: ERROR  
Impact: Other

ODI-20750: ODI-20750: Selected Delivery/Initial Load Delivery process is associated with another model. This may cause conflicts during 'Start Journal' action, if the logical process instance selected uses the same physical process instance.  
**Cause:** Selected Goldengate Delivery/Initial Load Delivery process is used in a different model.  
**Action:** Select a different set of process instances for this model.

Level: 32  
Type: ERROR  
Impact: Other

ODI-20751: ODI-20751: Load Plan Debugging is not supported: [0].  
**Cause:** An unsupported operation was attempted.  
**Action:** Load Plan can't be debug.

Level: 32  
Type: ERROR  
Impact: Other

ODI-23001: ODI-23001: The import process failed  
**Cause:** The work repository export file specified could not be imported.  
**Action:** Ensure the specified file is readable and is a valid work repository export file.

Level: 32  
Type: ERROR  
Impact: Other

ODI-23006: ODI-23006: Agent Test failed  
**Cause:** Agent could not be contacted using the specified connection details.  
**Action:** Ensure the Agent connection details are correct and the Agent is running.

Level: 32  
Type: ERROR  
Impact: Other

ODI-23007: ODI-23007: Data Source already exists for "[0]".  
**Cause:** The Data Source has already been associated with this Agent.  
**Action:** No action is necessary as the Data Source is already associated with this Agent. Consider removing the Data Source from this Agent and retrying this action.

Level: 32  
Type: ERROR  
Impact: Other
ODI-23010: Please enter first a name, an expression and a help text for this language element.

**Cause:** The Name, Expression or Help Text parameter values for this Language Element were not entered in the Definition panel. These are mandatory parameters.

**Action:** Return to the Definition panel and ensure the Name, Expression and Help Text parameters have valid values.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-23011: Name is empty

**Cause:** A value for the Name parameter of the Language Element Implementation was not entered. This is a mandatory parameter.

**Action:** Enter a valid value for the Name parameter before saving this Language Element.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-23012: Expression is empty

**Cause:** A value for the Expression parameter of the Language Element Implementation was not entered. This is a mandatory parameter.

**Action:** Enter a valid value for the Expression parameter before saving this Language Element.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-23013: Help is undefined

**Cause:** A value for the Help Text parameter of the Language Element Implementation was not entered. This is a mandatory parameter.

**Action:** Enter a valid value for the Help Text parameter before saving this Language Element.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-23014: Technology is undefined

**Cause:** A value for the Technology parameter of the Language Element Implementation was not entered. This is a mandatory parameter.

**Action:** Enter a valid value for the Technology parameter before saving this Language Element.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other
ODI-23015: Logical Schema [0] is already linked to a physical schema in context [1].
Cause: A Physical Schema has already been defined for this Context and Logical Schema combination.
Action: Remove the Context and Logical Schema combination from the Context editor, then retry saving the Physical Schema.
Level: 32
Type: ERROR
Impact: Other

ODI-23016: The context is either invalid or no longer exists in the database.
Cause: One of the Contexts used by the Physical Schema is invalid or no longer exists in the Master Repository.
Action: Ensure the Context for the Physical Schema is correct by either selecting a valid Context for the Physical Schema or recreating the missing Context.
Level: 32
Type: ERROR
Impact: Other

ODI-23017: This Physical Schema already exists for this data server.
Cause: A Physical Schema referencing this Data Server has already been defined in the Master Repository.
Action: Specify the correct Physical Schema for this Data Server to use.
Level: 32
Type: ERROR
Impact: Other

ODI-23018: Unable to connect to Work Repository
Cause: The Work Repository could not be accessed using the connection details defined for it. This may be due to the database or host not being available, or the password could have changed.
Action: Ensure the Work Repository host and database are active. Using the Work Repository editor, ensure the connection details for it are correct.
Level: 32
Type: ERROR
Impact: Other

ODI-23019: Error Detected during Repository Installation. Invalid connection parameters.
Cause: The repository installation process was unable to connect to the repository database.
Action: Correct any errors identified in the installation log and retry the installation. If the problem persists then contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

**ODI-23020: ODI-23020: Error Detected during Repository Installation. Invalid External Authentication credentials.**

**Cause:** The ODI Supervisor credentials supplied did not match the credentials held in the External Password Store.

**Action:** Retry the installation, ensuring the Supervisor user name and password match those held in the external store.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-23021: ODI-23021: Error Detected during Repository Installation. Invalid External Authentication configuration.**

**Cause:** A connection to the External Authentication Store could not be established.

**Action:** Ensure the External Authentication Store is available and the connection details specified in the JPS configuration file are valid.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-23022: ODI-23022: An error occurred during the generation of the Data Service.**

**Cause:**

**Action:**

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-23023: ODI-23023: The Schema path ([0]) is not supported**

**Cause:** The Model's Physical Schema attempted to define the Schema path using an unsupported protocol (ftp, http or file).

**Action:** Change the Physical Schema to not use ftp, http or file protocol to reference the file.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-23024: ODI-23024: The URL is mandatory.**

**Cause:** The URL field has not been entered and is a mandatory parameter.

**Action:** Enter the URL parameter. A template chosen from the drop down list may help to ensure the syntax is correct.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-23025: ODI-23025: The ID is mandatory.**
Cause: The Repository ID parameter has not been entered and is a mandatory parameter.
Action: Enter an integer value for the Repository ID parameter.
Level: 32
Type: ERROR
Impact: Other

ODI-23026: ODI-23026: The ID must be an integer value.
Cause: The value entered for the Repository ID is not a valid integer.
Action: Enter an integer value for the Repository ID parameter.
Level: 32
Type: ERROR
Impact: Other

ODI-23027: ODI-23027: The driver is mandatory.
Cause: A JDBC Driver was not specified and is a mandatory parameter.
Action: Select a JDBC Driver from the list of values.
Level: 32
Type: ERROR
Impact: Other

ODI-23028: ODI-23028: The password is mandatory.
Cause: The Supervisor user's Password parameter was not specified.
Action: Enter the Supervisor password.
Level: 32
Type: ERROR
Impact: Other

ODI-23029: ODI-23029: The confirm password is mandatory.
Cause: The Supervisor user's Confirm Password parameter was not specified.
Action: Enter the Supervisor user's password in the Confirm Password parameter.
Level: 32
Type: ERROR
Impact: Other

ODI-23030: ODI-23030: Password and Confirm Password are different
Cause: The Password and Confirm Password parameters are not the same.
Action: Ensure the same value is entered for both the Password and Confirm Password parameters.
Level: 32
Type: ERROR
Impact: Other
ODI-23031: The Supervisor username is mandatory.

**Cause:** The Supervisor User parameter was not entered.

**Action:** Enter a value for the Supervisor User parameter ensuring it matches a user in the external enterprise identify store, or switch to ODI Authentication.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-23032: Maximum number of sessions cannot be less or equal to 0.

**Cause:** The Maximum Number of Sessions parameter value was specified as 0.

**Action:** Change the Maximum Number of Sessions parameter in the Agent Definition tab to a value greater than 0.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-23033: The file reverse-engineering is only possible for delimited files.

**Cause:** The file format for the specified file was not delimited.

**Action:** Select a delimited format file and retry the reverse-engineering action.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-23035: Can not update the scheduling - This agent may not be running

**Cause:** The Update Scheduling action could not be performed because the ODI Client could not connect to the Agent.

**Action:** Check that the Agent connection details are correct and that the agent is running. Use the Agent Test button to check the connection details.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-23036: Logical Schema not set for this Context

**Cause:** A Logical Schema entry in the Physical Schema’s Context was specified as <Undefined>.

**Action:** Ensure none of the Logical Schemas on the Physical Schema’s Context tab are set to <Undefined>.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-23037: To use scheduling please associate a Logical Agent to a Physical Agent via the Logical Architecture Accordion in the Topology Navigator
Cause: There are no logical agents available to use for scheduling.
Action: Associate a logical agent with a physical agent using the Topology Navigator and then resubmit your schedule request.

Level: 32
Type: ERROR
Impact: Other

ODI-23038: ODI-23038: Cannot resolve the table name. Check the masks defined for this physical schema.
Cause: The table and schema format could not be calculated. This is because the object mask has not been set for the Physical Schema that contains this table.
Action: From the Topology Navigator edit the Physical Schema containing this table and ensure the Masks parameter value is valid for the schema based on its technology (for example "%SCHEMA.%OBJECT").

Level: 32
Type: ERROR
Impact: Other

ODI-23039: ODI-23039: You cannot carry out this type of export.
Cause: The export type specified is not supported.
Action: Retry the export. If the problem persists then contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-23040: ODI-23040: Import file "(0)" error
Cause: An error occurred during the import file process.
Action: Correct any errors identified in the error log and retry the import process. If the problem persists then contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-23042: ODI-23042: An error occurred while changing the repository number.
Cause: An error occurred while changing the repository number.
Action: Correct any errors identified in the message log and retry the action. If the problem persists then contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-23043: ODI-23043: The Repository ID must be numeric.
Cause: The value specified for the Repository ID parameter was not a valid numeric value.
Action: Enter a valid numeric value for the Repository ID parameter.
Level: 32  
Type: ERROR  
Impact: Other

ODI-23044: ODI-23044: The new ID you have chosen is already in use as a table "[0]" primary key. The renumbering has been aborted. No changes have been made.  
Cause: The Repository ID specified is already used by an existing object.  
Action: Enter a different value for the Repository ID parameter ensuring it is unique within the repository.

Level: 32  
Type: ERROR  
Impact: Other

ODI-23045: ODI-23045: You may not renumber a repository before version 11. Please upgrade your repository first.  
Cause: The renumber functionality is not supported for ODI Repository versions prior to version 11.  
Action: Upgrade the repository to version 11 (or higher) and then renumber it.

Level: 32  
Type: ERROR  
Impact: Other

ODI-23046: ODI-23046: An error was encountered during the test.  
Cause: An attempt to connect a Work Repository failed.  
Action: Correct any errors identified in the message log. Ensure the Work Repositories are available and the connection information is correctly specified in the Master Repository. Retry the test.

Level: 32  
Type: ERROR  
Impact: Other

ODI-23047: ODI-23047: Could not connect to the work repository. The renumbering process has been aborted. No changes have been made.  
Cause: An attempt to connect a Work Repository failed.  
Action: Correct any errors identified in the message log. Ensure the Work Repositories are available and the connection information is correctly specified in the Master Repository. Retry the test.

Level: 32  
Type: ERROR  
Impact: Other

ODI-23048: ODI-23048: Import report generation error  
Cause: The import was performed, but there was an unexpected error while opening the Import Report.  
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-23049: ODI-23049: Error Detected during Repository Installation
Cause: An error occurred during the creation or import of the Master Repository.
Action: Correct any errors described in the message log and retry the installation process. If the problem persists then contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-23050: ODI-23050: The password you entered doesn't match the actual password
Cause: The password you entered doesn't match the actual password
Action: Ensure that the password entered matches the actual password

Level: 32
Type: ERROR
Impact: Other

ODI-23052: ODI-20735: The name given for the Physical Agent is already used by another agent. Please provide another name
Cause: Values for maximum number of thread per session is not valid
Action: Enter valid value for maximum number of threads per session

Level: 32
Type: ERROR
Impact: Other

ODI-23053: ODI-23053: Maximum number of threads cannot be less than maximum number of threads per session.
Cause: Maximum number of threads less than maximum number of threads per session
Action: Enter valid values for maximum number of threads and maximum number of threads per session

Level: 32
Type: ERROR
Impact: Other

ODI-23054: ODI-23054: Maximum number of cache entries cannot be less than zero.
Cause: Values for maximum number of cache entries is not valid
Action: Enter valid values for maximum number of cache entries

Level: 32
Type: ERROR
Impact: Other

ODI-23055: ODI-23055: Session Blueprint Lifetime cannot be less than zero.
Cause: Value for session blueprint lifetime is not valid
**Action:** Enter valid values for session blueprint lifetime
**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-23056:** **ODI-23056:** Syntax of condition "[0]" is not valid.  
**Cause:** The entered condition has invalid syntax.  
**Action:** Specify the valid condition expression.
**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-23058:** **ODI-23058:** This Technology does not support multiple schemas.  
**Cause:** Attempt to create multiple Physical Schemas for Technologies that support only one Schema.  
**Action:** The solution for Technologies that do not support multiple Physical Schemas is to create separate Data Dervers from the Physical Schemas.
**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-23059:** **ODI-23059:** No Agent selected  
**Cause:** No Agent has been selected for the selected DataSource.  
**Action:** Make sure an Agent is selected for the DataSource.
**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-23060:** **ODI-23060:** Update Import Modes are not valid for Interfaces  
**Cause:** An invalid import mode of Update is selected for an Interface export file.  
**Action:** Use an import mode other than Update or alternatively only import Mapping export files
**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-23061:** **ODI-23061:** Syntax of expression "[0]" is not valid.  
**Cause:** The entered expression has invalid syntax.  
**Action:** Specify the valid expression.
**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-23062:** **ODI-23062:** Maximum number of threads cannot be less than the maximum number of sessions.
**Cause:** Value for maximum number of threads is less than the maximum number of sessions

**Action:** Ensure that maximum number of threads is equal to or greater than the maximum number of sessions

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-24004:** There are no supervisor accounts in the ODI repository with matching entries in the identity store. Please provide a suitable supervisor account.

**Cause:** The ODI repository does not have any supervisor account that matches the entries in the identity store.

**Action:** Create a supervisor account in the ODI repository that matches an entry in the identity store.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-24005:** An error occurred while checking the status of the master repository.

**Cause:** An unexpected error occurred.

**Action:** Check the exception to see if it gives details about the error and contact Oracle Support Services for further assistance.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-24006:** An error occurred while switching the authentication mode for the master repository.

**Cause:** An unexpected error occurred.

**Action:** Check the exception to see if it gives details about the error and contact Oracle Support Services for further assistance.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-24007:** Rules should not have empty conditions.

**Cause:** Rules associated with policy have empty conditions.

**Action:** Create rules with conditions associated with them.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-25001:** Unable to input a larger element

**Cause:** The total length of all keywords exceeds the maximum length.
Action: Remove one or more of the keywords, or decrease their lengths.

Level: 32
Type: ERROR
Impact: Other

ODI-25002: ODI-25002: The end date cannot be before the start date.
Cause: The end date is before the start date.
Action: Set the end date to be after the start date.

Level: 32
Type: ERROR
Impact: Other

ODI-25003: ODI-25003: Error while starting session
Cause: An unexpected error occurred while starting the session.
Action: Check the error details for further information and contact Oracle Support Services for further assistance.

Level: 32
Type: ERROR
Impact: Other

ODI-25004: ODI-25004: Date Format Not Valid
Cause: One of the Date fields is invalid. This may be the From or To Date.
Action: Click the button to the right of the field to invoke a dialog for entering a valid Time and Date.

Level: 32
Type: ERROR
Impact: Other

ODI-25005: ODI-25005: Incorrect date format. The format is {0}.
Cause: The date format is incorrect.
Action: Use the format that is presented in the error message.

Level: 32
Type: ERROR
Impact: Other

ODI-25006: ODI-25006: At least one agent must be selected.
Cause: Agent selection is mandatory.
Action: Select at least one agent to clean stale sessions.

Level: 32
Type: ERROR
Impact: Other

ODI-25007: ODI-25007: At least one work repository must be selected.
Cause: Work repository selection is mandatory.
Action: Select at least one work repository to clean stale sessions.

Level: 32
Type: ERROR
Impact: Other

ODI-26001: ODI-26001: Boolean does not correspond to the Field Update Object Layer.
Cause: The repository contained an invalid value of the Field Update property for a checkbox or radio group.
Action: Ensure the repository value is a boolean for checkbox or a valid action command for a radio group.

Level: 32
Type: ERROR
Impact: Other

ODI-26002: ODI-26002: This object is referenced by another object. View the details for more information. You may also see where this object is used in the hierarchy.
Cause: The specified object could not be used because it is referenced by another object.
Action: Remove references to this object. The "Uses" hierarchy may be useful in finding objects references.

Level: 32
Type: ERROR
Impact: Other

ODI-26003: ODI-26003: This object cannot be removed: it is referenced by another object.
Cause: The specified object could not be deleted because it is referenced by another object.
Action: Remove references to this object before deleting it. The "Uses" hierarchy may be useful in finding objects references.

Level: 32
Type: ERROR
Impact: Other

ODI-26004: ODI-26004: Action denied:
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26005: ODI-26005: You are importing an object from another repository with the same identifier. It is forbidden.
Cause: An object in the import file has an identifier which already exists in the repository.
Action: Consider manually changing the "com.sunopsis.dwg.dwgobj.SnpImportRep" object section of the import XML file to use a unique identifier.

Level: 32
Type: ERROR
Impact: Other

ODI-26006: The specified encryption key is invalid.
Cause: The encryption key specified was found to be invalid during the decrypting phase.
Action: Ensure a valid encryption key is utilized.

Level: 32
Type: ERROR
Impact: Other

ODI-26007: KM or Procedure not encrypted. No decryption was performed.
Cause: Decryption was requested for a non-encrypted KM or Procedure.
Action: Do not attempt to decrypt a non-encrypted KM or Procedure.

Level: 32
Type: ERROR
Impact: Other

ODI-26008: Scenario not encrypted. No decryption was performed.
Cause: Decryption was requested for a non-encrypted Scenario.
Action: Do not attempt to decrypt a non-encrypted Scenario.

Level: 32
Type: ERROR
Impact: Other

ODI-26009: Action not encrypted. No decryption was performed.
Cause: Decryption was requested for a non-encrypted Action.
Action: Do not attempt to decrypt a non-encrypted Action.

Level: 32
Type: ERROR
Impact: Other

ODI-26010: Incompatible key or encrypted data.
Cause: The data used for the key was invalid. It is likely the data decryption failed.
Action: Ensure the encrypted data is correct and the decryption key is correctly specified.

Level: 32
Type: ERROR
Impact: Other

ODI-26011: ODI-26011: unable to find specified encryption API
Cause: The specified cryptographic algorithm requested was not available in the environment.
Action: Ensure the environment can access the DES/ECB/PKCS5Padding algorithms and padding.
Level: 32
Type: ERROR
Impact: Other

ODI-26012: ODI-26012: invalid encrypted data.
Cause: The BASE64 content may be invalid or the zip file contents may be corrupted.
Action: Ensure the encrypted data is correct and the decryption key is correctly specified.
Level: 32
Type: ERROR
Impact: Other

ODI-26013: ODI-26013: Your security parameters are insufficient to perform this action.
Cause: The ODI user security parameters do not specifically permit the user to perform this particular action.
Action: Ensure this ODI user is granted the security access to perform this action.
Level: 32
Type: ERROR
Impact: Other

ODI-26014: ODI-26014: The code of your {0} is already used by another {1}. Please give another code to save this {2}.
Cause: The value entered for code must be unique for the entire work repository.
Action: Ensure the a unique value is entered.
Level: 32
Type: ERROR
Impact: Other

ODI-26015: ODI-26015: You do not have sufficient privileges to perform this operation.
Cause: The ODI user security parameters do not specifically permit the user to perform this particular operation.
Action: Ensure this ODI user is granted the security access to perform this operation.
Level: 32
Type: ERROR
Impact: Security

ODI-26016: The requested operation cannot succeed. The object no longer exists.
Cause: The specified ODI object cannot be accessed because it no longer exists in the repository (it may have been deleted by another ODI user).
Action: Recreate the specified ODI object. Consider importing the object from a backup.

Level: 32
Type: ERROR
Impact: Other

ODI-26017: Error.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26018: Key Error.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26019: Action Denied.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26020: Retrieve method incorrect.
Cause: Retrieve method is incorrect. Must be "set" or "get".
Action: Please change the retrieve method to "set" or "get".

Level: 32
Type: ERROR
Impact: Other

ODI-26021: Object initialization denied.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

Cause: The object could not be saved. This is possibly due to a repository connection error, or inconsistent data values supplied. It’s also possible that the object was modified by another user.

Action: Ensure the repository database is available and the data values supplied are valid. Try to save changed data, then refresh edited object and apply changed data again.

Level: 32
Type: ERROR

Impact: Other

ODI-26023: ODI-26023: Cannot create object.

Cause: An unexpected error occurred during the object creation process.

Action: Contact Oracle Support Services.

Level: 32
Type: ERROR

Impact: Other

ODI-26024: ODI-26024: Cannot stop update operation.

Cause: An unexpected error occurred during the update operation.

Action: Contact Oracle Support Services.

Level: 32
Type: ERROR

Impact: Other

ODI-26025: ODI-26025: Display Initialization denied.

Cause: An unexpected error occurred during the display initialization process.

Action: Contact Oracle Support Services.

Level: 32
Type: ERROR

Impact: Other

Cause: An unexpected error occurred during the refresh process.

Action: Contact Oracle Support Services.

Level: 32
Type: ERROR

Impact: Other

ODI-26027: ODI-26027: Security not set for the instance. The instance will not be added to the tree.

Cause: Instance security permissions “By repository” were chosen but a concrete repository is not specified.

Action: Ensure a repository is specified.
Level: 32
Type: ERROR
Impact: Security

ODI-26028: ODI-26028: Cannot save your modifications.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26029: ODI-26029: Could not deploy the datasource automatically.
Cause: Weblogic Administration server is not up and running, the server connection parameters are wrong.
Action: Please check Weblogic Administration server connection parameters and the server state.

Level: 32
Type: ERROR
Impact: Other

ODI-26030: ODI-26030: The new password does not meet the password policy. Your change could not be saved.
Cause: The new password does not meet the password policy.
Action: Please verify that the new password meets the password policy (go to the "Security Navigator -> Password policies...").

Level: 32
Type: ERROR
Impact: Other

ODI-26031: ODI-26031: You may not delete work repository {0} because you are connected to it. To delete this repository, reconnect to a different work repository or use a master repository only connection.
Cause: Deletion of a work repository which is currently connected is not supported.
Action: Disconnect from the repository and then connect utilizing a Master Repository Only connection or a different work repository before attempting to delete the specified work repository.

Level: 32
Type: ERROR
Impact: Other

ODI-26032: ODI-26032: This object was modified by {0} on {1} at {2}. Your changes cannot be saved.
Cause: The object was changed in the repository after the editor was opened for this object.
Action: Close the editor without saving changes. Open the editor again and reapply the edits and save. Note: consider using the lock object facility to disallow current modifications to an object.

Level: 32
Type: ERROR
Impact: Other

ODI-26033: ODI-26033: You cannot edit this object because it is locked by another user ({0}). You can only view it.
Cause: The ODI object opened for editing is locked by another user. Other ODI users can only view such objects.
Action: Try to edit the object later.

Level: 32
Type: ERROR
Impact: Other

ODI-26034: ODI-26034: An error occurred while deleting executions.
Cause: The specified executions could not be deleted. This is possibly caused by the repository database connection problems.
Action: Retry to delete the executions. If problem persists, contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26036: ODI-26036: Error while encrypting.
Cause: A general error occurred during the encrypting process, possibly caused by repository database access problems, lack of security permissions, or encryption engine failures,
Action: Retry the encrypt action again.

Level: 32
Type: ERROR
Impact: Other

ODI-26037: ODI-26037: Encryption key is not valid.
Cause: An invalid encryption key was entered causing an encryption engine failure.
Action: Enter a valid encryption key and retry the action.
ODI-26038: ODI-26038: Unable to execute, the selected Logical Agent is not associated to a Physical Agent in the desired Context.

**Cause:** A Logical Agent was not associated with this Physical Agent in this Context.

**Action:** Ensure a valid "Logical Agent - Physical Agent" association exists in the desired Context.

---

**Cause:** The attempt to connect to the repository failed. This may be due to one or more of the following: invalid connection parameters specified, database problems, network problems.

**Action:** Ensure the repository database is available and accessible and the repository connection parameters are correct.

---

ODI-26040: ODI-26040: error while updating

**Cause:** Failed to update the ODI logins file: snps_login_work.xml.

**Action:** Ensure write-access is granted to the ODI logins file: snps_login_work.xml.

---

ODI-26041: ODI-26041: Error while attempting to get FieldData from ObjectDisplay.

**Cause:** An unexpected error occurred obtaining FieldData from ObjectDisplay.

**Action:** Contact Oracle Support Services.

---

ODI-26042: ODI-26042: Error while attempting to set FieldUpdate from ObjectUpdate.

**Cause:** An unexpected error occurred updating FieldUpdate from ObjectUpdate.

**Action:** Contact Oracle Support Services.
Impact: Other

ODI-26043: Window closing cancelled by the User.
  Cause: User asked to close the parent window where child lines were modified.
  Action: No action performed on that.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26044: Host Variable Not Found.
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26045: Unable to perform the drop operation.
  Cause: Dropped entity is invalid.
  Action: Check whether the dropped entity is valid and perform the drag-n-drop action again.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26046: MethodGetter was not found
  Cause: An unexpected error occurred obtaining the getter method.
  Action: Contact Oracle Support Services.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26047: Object on method setObjectDisplay(Object pObjectDisplay) is not an array.
  Cause: This is caused by programmatic error.
  Action: ODI users should normally never see this message.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26048: Object on method setObjectDisplay(Object pObjectDisplay) is not a vector.
  Cause: This is caused by programmatic error.
  Action: ODI users should normally never see this message.
  Level: 32
  Type: ERROR
Impact: Other

ODI-26049: ODI-26049: Parameters not valid.
Cause: An unexpected error occurred due to an invalid parameter value.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-26050: ODI-26050: Master repository not installed on this connection.
Cause: This is caused by programmatic error.
Action: ODI users should normally never see this message.

Level: 32
Type: ERROR
Impact: Other

Cause: An error occurred during the creation of the XML Export file.
Action: Ensure the repository is accessible and the export file and its directory are writable.

Level: 32
Type: ERROR
Impact: Other

Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26053: ODI-26053: An error occurred during initialization.
Cause: Initialization failed possibly due to a repository access failure or insufficient ODI security permissions.
Action: Ensure the repository database is available, and the ODI user security permissions permit connection.

Level: 32
Type: ERROR
Impact: Other

ODI-26054: ODI-26054: Page not available.
Cause: The selected page number was invalid.
Action: Ensure the page number entered is greater than 0 and less than the total number of pages.

Level: 32
Type: ERROR
Impact: Other

ODI-26056: ODI-26056: Error while disconnecting.
Cause: This error is occurred while closing the repository database connection after "Test query" action completed.
Action: This error may be ignored.
Level: 32
Type: ERROR
Impact: Other

ODI-26057: ODI-26057: Unable to connect the agent. The agent is probably not started.
Cause: The connection request to the agent failed.
Action: Ensure the agent is started and available. Ensure the connection information is valid.
Level: 32
Type: ERROR
Impact: Other

ODI-26058: ODI-26058: Unable to connect the agent. The agent URL cannot be found.
Cause: The connection request to the agent failed using the given URL.
Action: Ensure the agent is started and available. Ensure the connection URL information is valid.
Level: 32
Type: ERROR
Impact: Other

ODI-26059: ODI-26059: Object on method setObjectDisplay(Object pObjectDisplay) is not a List.
Cause: An unexpected error occurred setting ObjectData.
Action: Contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

Cause: The values entered for Password and Confirmation Password did not match.
Action: Enter the same value for Password and Confirmation Password.
Level: 32
Type: ERROR
Impact: Other

ODI-26061: ODI-26061: The minimum password length is {0} characters.
Cause: The length of the Password entered is less than specified in password policy rule.
Action: Enter a Password whose length is greater than or equal to the specified minimum length.

Level: 32
Type: ERROR
Impact: Other

ODI-26062: ODI-26062: The password violates the following rule: "(0)". Select another password.
Cause: The password supplied was invalid.
Action: Enter a valid password.

Level: 32
Type: ERROR
Impact: Other

Cause: The password supplied was invalid.
Action: Enter a valid password.

Level: 32
Type: ERROR
Impact: Other

ODI-26064: ODI-26064: Error while exporting.
Cause: An error occurred during the creation of the Export file.
Action: Ensure the repository is accessible and the export file and its directory are writable.

Level: 32
Type: ERROR
Impact: Other

ODI-26065: ODI-26065: You must specify all the options.
Cause: This is caused by programmatic error.
Action: ODI users should normally never see this message.

Level: 32
Type: ERROR
Impact: Other

ODI-26066: ODI-26066: An unexpected error has occurred.
Cause: An unexpected error occurred this process.
Action: Retry action. If problem persists then contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other
ODI-26067: mandatory field "Java charset" not entered
Cause: A value for the "Java character set" field was not entered.
Action: Enter a value for the "Java character set" field.
Level: 32
Type: ERROR
Impact: Other

ODI-26068: unable to load export list in the module: {0}
Cause: The contents of the export file list was not formatted correctly.
Action: Correct the format of the export list file specified.
Level: 32
Type: ERROR
Impact: Other

ODI-26069: The specified export directory does not exist.
Cause: The specified export directory is invalid.
Action: Ensure the specified export directory exists and is writable.
Level: 32
Type: ERROR
Impact: Other

ODI-26070: The Open Tool class name must not begin with "Snp" or "Odi".
Cause: The Open Tool class name begins with "Snp" or "Odi".
Action: Ensure the Open Tool class name does not begin with "Snp" or "Odi".
Level: 32
Type: ERROR
Impact: Other

ODI-26071: Open Tool not activated. Your Open Tool references a class which not found.
Cause: The class name specified in this Open Tool was not found.
Action: Ensure the Open Tool class name specified is valid and available in the class path.
Level: 32
Type: ERROR
Impact: Other

ODI-26072: Your Open Tool has been installed. You can now use it in a procedure or package.
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-26073: ODI-26073: Could not activate Open Tool. Check that it is in the "oracledi/userlib" directory.

Cause: The Open Tool references a class which was not found.

Action: Ensure the Open Tool class exists in the "oracledi/userlib" directory.

Level: 32
Type: ERROR
Impact: Other

ODI-26074: ODI-26074: Policy "Name" is a mandatory field.

Cause: A value for the Policy "Name" field value was not entered.

Action: Enter a value for the Policy "Name" field.

Level: 32
Type: ERROR
Impact: Other

ODI-26075: ODI-26075: Policy "Name" must be unique.

Cause: A Policy with the same name already exists.

Action: Enter a unique value in Policy "Name" field.

Level: 32
Type: ERROR
Impact: Other

ODI-26076: ODI-26076: You do not have enough memory to generate this report.

Cause: There was not enough memory allocated to generate the report.

Action: Increase the maximum Java heap size value by using the "-Xmx" JVM option.

Level: 32
Type: ERROR
Impact: Other

ODI-26077: ODI-26077: Target file name is not specified.

Cause: The Target file name is mandatory and was not specified.

Action: Enter a value for the target file name.

Level: 32
Type: ERROR
Impact: Other

ODI-26078: ODI-26078: Error while creating the version

Cause:

Action:

Level: 32
Type: ERROR
Impact: Other

Cause: A version with the specified version number already exists.
Action: Enter a unique version number.

Level: 32
Type: ERROR
Impact: Other

ODI-26080: ODI-26080: Unable to delete version {0} for {1} {2}. It is referenced by solution {3}
Cause: Deletion of a version of an object referenced by a Solution was attempted.
Action: Delete the solution referencing the object version. Then retry deleting the object version.

Level: 32
Type: ERROR
Impact: Other

ODI-26081: ODI-26081: Unable to delete version {0} for {1} {2}. It is referenced by version {3} of solution {4}
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26082: ODI-26082: No difference found
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26083: ODI-26083: No difference found.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26084: ODI-26084: Could not compare versions of different objects.
Cause: Objects of different types were selected for comparison.
Action: Select objects of the same type before performing comparison.

Level: 32
Type: ERROR
Impact: Other

ODI-26085: ODI-26085: You cannot restore several versions of the same object.
Cause: Multiple versions were selected for restoring.
Action: Select a single version when performing this action.

Level: 32
Type: ERROR
Impact: Other

ODI-26086: ODI-26086: You cannot select more than one version at the same time.
Cause: Multiple version were selected for this action.
Action: Select a single version when performing this action.

Level: 32
Type: ERROR
Impact: Other

ODI-26087: ODI-26087: You must select a version.
Cause: A version was not selected.
Action: Select a version before performing this action.

Level: 32
Type: ERROR
Impact: Other

ODI-26088: ODI-26088: You must select the version to restore.
Cause: A version to restore was not selected.
Action: Select a version to restore.

Level: 32
Type: ERROR
Impact: Other

ODI-26089: ODI-26089: This object is currently locked by user: {0}. Version restoration cancelled.
Cause: The object selected for restoration was locked by another user.
Action: Ensure the selected object is not locked by another user before retrying the operation.

Level: 32
Type: ERROR
Impact: Other

ODI-26090: ODI-26090: Object version list is empty.
Cause: The object selected was not versioned.
Action: Select a versioned object before retrying the operation.

Level: 32
Type: ERROR
Impact: Other

ODI-26091: ODI-26091: An array with an invalid size was passed to SnpsObjectTableColumnTextIntrospectMapper.createMapFromArrayOfArrays.
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-26092: ODI-26092: Table Model must have at least one Column.
Cause: The Model for this Table did not contain any Columns.
Action: Add at least one Column to the Table's Model.
Level: 32
Type: ERROR
Impact: Other

ODI-26093: ODI-26093: Unable to open window.
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-26094: ODI-26094: Your license does not allow Changed Data Capture operations.
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-26095: ODI-26095: This object is locked by {0}. You cannot edit it unless it is unlocked.
Cause: Object could not be opened for write access because it was already locked by another user.
Action: Ensure the selected object is not locked by another user before retrying the operation.
Level: 32
Type: ERROR
Impact: Other

Cause: The file specified did not contain correctly formed XML.
Action: Ensure the XML in the specified file is valid before retrying the operation.
Level: 32
Type: ERROR
Impact: Other

ODI-26097: ODI-26097: Replace failed due to an SQL exception.
   Cause: The file used to replace this object is not a valid XML format.
   Action: Select a valid XML file format before performing this replace object action.

Level: 32
Type: ERROR
Impact: Other

ODI-26098: ODI-26098: You must specify an Export Path or File.
   Cause: Either the Export Path or File was not specified.
   Action: Specify a value for either the Export Path or File.

Level: 32
Type: ERROR
Impact: Other

ODI-26099: ODI-26099: You don't have the appropriate license to use this KM
   Cause:
   Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26100: ODI-26100: You don't have the appropriate privileges on Step objects.
   Cause: Package Steps operation failed due to insufficient ODI security permissions.
   Action: Ensure the ODI user security permissions are correct for the Package Steps object.

Level: 32
Type: ERROR
Impact: Other

ODI-26101: ODI-26101: The Data Check cannot be performed. A CKM is not selected on the Model.
   Cause: No CKM was assigned to the Model.
   Action: Enter a CKM for the Model before performing the Data Check. Consider using the Model editor to make this entry.

Level: 32
Type: ERROR
Impact: Other

ODI-26102: ODI-26102: The Service cannot be generated. An Application Server is not selected on the Model.
Cause: No Application Server was assigned to the Model.

Action: Enter an Application Server for the Model before performing Generate Service. Consider using the Model editor to make entry.

Level: 32
Type: ERROR
Impact: Other

ODI-26103: ODI-26103: You must specify a connection parameter

Cause:

Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26104: ODI-26104: You must specify a query parameter

Cause:

Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26105: ODI-26105: Test failed

Cause: The value of Schema, Table, Column or Filter was invalid.

Action: Ensure the Schema, Table, Column and Filter are valid. Consult the details for additional information.

Level: 32
Type: ERROR
Impact: Other

ODI-26106: ODI-26106: Decryption failed. Data has been restored.

Cause: The Decryption process failed.

Action: Consult the details for additional information.

Level: 32
Type: ERROR
Impact: Other

ODI-26107: ODI-26107: Cannot find this {0} icon

Cause:

Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26108: ODI-26108: The specified path is not valid.
Cause: The specified path was invalid or was not found on the file system.
Action: Ensure a valid file system path is entered.

Level: 32
Type: ERROR
Impact: Other

ODI-26109: ODI-26109: Error while reading the search criteria. Invalid file
Cause: The selected file did not contain search criteria in a valid format.
Action: Ensure the selected file is one exported from the ODI search UI and contains correctly formatted search criteria information.

Level: 32
Type: ERROR
Impact: Other

ODI-26110: ODI-26110: An error occurred while saving.
Cause: 
Action: 

Level: 32
Type: ERROR
Impact: Other

ODI-26111: ODI-26111: Error while accessing the file
Cause: The specified file could not be opened.
Action: Ensure the specified file exists and is accessible.

Level: 32
Type: ERROR
Impact: Other

ODI-26112: ODI-26112: Error while performing the search
Cause: 
Action: 

Level: 32
Type: ERROR
Impact: Other

ODI-26113: ODI-26113: XML parser configuration error
Cause: The selected file is not a valid search criteria file format.
Action: Select a valid search criteria file exported from the ODI search UI.

Level: 32
Type: ERROR
Impact: Other

ODI-26114: ODI-26114: Host cannot be empty.
Cause: The Host field is mandatory and was not specified.
Action: Enter a valid Host name.
Level: 32
Type: ERROR
Impact: Other

ODI-26115: Port number must be an integer between 1024 and 65535.
Cause: The value for Port Number was not valid.
Action: Enter a valid integer value between 1024 and 65535 for Port Number.
Level: 32
Type: ERROR
Impact: Other

ODI-26116: User cannot be empty.
Cause: The User field is mandatory and was not supplied.
Action: Enter a valid User Name.
Level: 32
Type: ERROR
Impact: Other

ODI-26117: Connection failed. Reason:
Cause: Could not connect to a repository with the specified connection details.
Action: Ensure the repository database is available and valid connection details are supplied.
Level: 32
Type: ERROR
Impact: Other

ODI-26118: External password storage connection test failed.
Cause: Could not connect to the external password storage with the specified connection details.
Action: Ensure the external password storage is available and valid connection details are supplied.
Level: 32
Type: ERROR
Impact: Other

ODI-26119: Exception when computing the value
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-26120: Fields compared are not the same
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-26121: ODI-26121: Error while exploring version
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-26122: ODI-26122: Exception when getting the children list
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-26123: ODI-26123: Cannot connect to the repository with the provided login information.
Cause: Could not connect to a repository with the specified connection details.
Action: Ensure the repository database is available and valid connection details are supplied.
Level: 32
Type: ERROR
Impact: Other

ODI-26124: ODI-26124: Exception during connection to the repository with the provided login information:
Cause: Could not connect to a repository with the specified connection details.
Action: Ensure the repository database is available and valid connection details are supplied.
Level: 32
Type: ERROR
Impact: Other

ODI-26125: ODI-26125: The configured external password storage is still accessible. Instead, use the Password Storage Switch service to change the configuration.
Cause: Could not connect to the external password storage with the specified connection details.
Action: Ensure the external password storage is available and valid connection details are supplied. Consider using the Password Storage Switch service to change the configuration.
Level: 32
Type: ERROR
Impact: Other

ODI-26126: ODI-26126: Error while opening window.
 Cause: An unexpected error occurred while opening window.
 Action: Contact Oracle Support Services.
 Level: 32

Type: ERROR
Impact: Other

ODI-26127: ODI-26127: The selected master repository configured to use internal password storage. Recovery is possible only for external storages.
 Cause: Recovery was attempted for a master repository configured to use internal password storage.
 Action: Select a master repository not configured to use internal password storage.
 Level: 32

Type: ERROR
Impact: Other

ODI-26128: ODI-26128: Unable to open Editor
 Cause: 
 Action: 
 Level: 32

Type: ERROR
Impact: Other

ODI-26129: ODI-26129: Unable to open Editor: Technology could not be opened twice
 Cause: 
 Action: 
 Level: 32

Type: ERROR
Impact: Other

ODI-26130: ODI-26130: Could not connect to repository
 Cause: Could not connect to a repository with the specified connection details.
 Action: Ensure the repository database is available and valid connection details are supplied.
 Level: 32

Type: ERROR
Impact: Other

ODI-26131: ODI-26131: Specify Import Path
 Cause: A value for Import Path is a mandatory and it was not supplied.
 Action: Enter the correct value for the Import Path.
ODI-26132: Repository id [0] or Repository name [1] is already used in your master repository.

**Cause:** The ID or Name specified for the master repository were already used.

**Action:** Enter valid unique values for Repository ID and Repository name.

Level: 32
Type: ERROR
Impact: Other

ODI-26134: Invalid number format for port number.

**Cause:** The value specified for Port Number was not in a valid format and number range.

**Action:** Enter a valid Port Number. See SQL*Net documentation for additional information regarding format and range.

Level: 32
Type: ERROR
Impact: Other

ODI-26135: The Network Adapter could not establish the connection.

**Cause:** Connection via the Network Adapter could not be established.

**Action:** Ensure the network resource is available and the connection details in the Network Adapter are correct.

Level: 32
Type: ERROR
Impact: Other

ODI-26136: The specified character set is not supported.

**Cause:** The specified character set was not supported.

**Action:** Select a supported character set.

Level: 32
Type: ERROR
Impact: Other

ODI-26137: The context or type are incorrect.

**Cause:** The selected ODI context is invalid: it was probably removed from the repository database.

**Action:** Reopen Execution dialog again so that the list of ODI contexts will be reloaded.

Level: 32
Type: ERROR
Impact: Other

ODI-26150: Incorrect Context.
Cause: A valid Context was not specified.
Action: Select a Context from the list. If none are available then create one from the Topology Navigator.

Level: 32
Type: ERROR
Impact: Other

ODI-26153: ODI-26153: Connection failed; JDBC Error
Cause: An unexpected JDBC error was encountered during the connection process.
Action: Ensure the resource referenced is available and the connection information is correct.

Level: 32
Type: ERROR
Impact: Other

ODI-26155: ODI-26155: No Master Repository on this connection
Cause: A connection to the Master Repository could not be established.
Action: Ensure the Master Repository is available and valid connection details are provided.

Level: 32
Type: ERROR
Impact: Other

ODI-26156: ODI-26156: Designer cannot connect to an Execution repository. The operation will be canceled.
Cause: Unable to establish a connection to the Execution repository.
Action: Ensure the Execution repository is available and the connection details are correct.

Level: 32
Type: ERROR
Impact: Other

ODI-26157: ODI-26157: Connection Error
Cause: A connection to the Master Repository could not be established.
Action: Ensure the Master Repository is available and valid connection details are provided.

Level: 32
Type: ERROR
Impact: Other

ODI-26158: ODI-26158: Work Repository Attachment Error
Cause: A connection to the Work Repository could not be established.
Action: Ensure the Work Repository is available and valid connection details are provided.
Level: 32
Type: ERROR
Impact: Other

ODI-26159: ODI-26159: Error while creating Work Repository
   Cause: An unexpected error occurred while creating the Work Repository.
   Action: Correct any issues described in the error details.

Level: 32
Type: ERROR
Impact: Other

ODI-26160: ODI-26160: URL not referenced in the list.
   Cause: 
   Action: 

Level: 32
Type: ERROR
Impact: Other

ODI-26161: ODI-26161: File Not Found
   Cause: 
   Action: 

Level: 32
Type: ERROR
Impact: Other

ODI-26162: ODI-26162: Connection failure
   Cause: A connection to the repository could not be established.
   Action: Ensure the repository is available and valid connection details are provided.

Level: 32
Type: ERROR
Impact: Other

ODI-26163: ODI-26163: Access Denied
   Cause: A connection to the repository could not be established because of insufficient user privilege.
   Action: Ensure the ODI user has sufficient privilege to connect to the specified repository.

Level: 32
Type: ERROR
Impact: Other

ODI-26164: ODI-26164: The reverse cannot be executed. Your Model will be created.
   Cause: The specified technology or driver did not support standard reverse-engineering.
**Action:** Ensure the technology or driver supports standard reverse-engineering. Otherwise choose Customized Reverse and select an appropriate RKM for the technology.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26165: ODI-26165: This driver has no match in the URL list**

**Cause:**

**Action:**

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26166: ODI-26166: The template was not generated: {0}**

**Cause:** The WLS Template could not be generated.

**Action:** Correct any errors identified in the error log and retry the operation.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26167: ODI-26167: File System Error: {0}**

**Cause:** Creation of the Server Template file failed due to an error detected by the file system.

**Action:** Correct any errors identified in the error log. Ensure the file system location is accessible and retry the operation.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26168: ODI-26168: Client requires a repository with version {0} but the repository version found is {1}**

**Cause:** Could not connect to the repository due to the old repository version.

**Action:** Update repository to the latest version.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26169: ODI-26169: JDBC driver is mandatory.**

**Cause:** JDBC driver was not entered.

**Action:** Provide JDBC driver for database connection.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other
ODI-26170: JDBC url is mandatory.
  Cause: JDBC url was not entered.
  Action: Provide JDBC url for database connection.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26171: User is mandatory.
  Cause: User was not entered.
  Action: Provide user for database connection.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26172: Id is mandatory.
  Cause: Id was not entered.
  Action: Provide work repository ID.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26173: Name is mandatory.
  Cause: Name was not entered.
  Action: Provide work repository name.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26174: Database connection is not available.
  Cause: Connection error occurred while connecting to the database.
  Action: Verify that the Database Connection details are correct and the database is available.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26175: Import folder does not exist or not a valid folder.
  Cause: Non-existing or invalid folder was specified.
  Action: Ensure the specified folder path is correct and refers to an existing folder.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26176: Import file does not exist or not a valid file.
Cause: Non-existing or invalid file was specified.
Action: Ensure the specified file path is correct and refers to an existing file.

Level: 32
Type: ERROR
Impact: Other

ODI-26177: ODI-26177: Unable to connect to the DBA user.
Cause: Unable to connect to the DBA account.
Action: Check that the DBA username and password are correct.

Level: 32
Type: ERROR
Impact: Other

ODI-26178: ODI-26178: Unable to connect to the Repository user.
Cause: Unable to connect to the Repository account.
Action: Check that the Repository connection details are correct.

Level: 32
Type: ERROR
Impact: Other

ODI-26179: ODI-26179: Invalid Date Format
Cause: An Invalid Date format was entered in the date filter.
Action: Ensure the date entered is of the required format.

Level: 32
Type: ERROR
Impact: Other

ODI-26180: ODI-26180: Changing the name of a sequence only impacts the sequence itself; it has no impact on objects referencing that sequence
Cause:
Action:

Level: 32
Type: WARNING
Impact: Other

ODI-26181: ODI-26181: Unable to add a Project knowledge module
Cause: An unsupported action was attempted.
Action: No action required as Project knowledge modules are not a valid selection to be added to a solution.

Level: 32
Type: ERROR
Impact: Other

ODI-26182: ODI-26182: Object was modified by another user and cannot be saved.
Cause: The object could not be saved. It’s possible that the object was modified by another user.
Action: Try to save changed data, then refresh edited object and apply changed data again.
Level: 32
Type: ERROR
Impact: Other

ODI-26183: ODI-26183: The maximum password length is [0] characters.
Cause: The entered work repository password length is greater than allowed.
Action: Provide a shorter password.
Level: 32
Type: ERROR
Impact: Other

ODI-26184: ODI-26184: SQL error occurred. See error details for more information.
Cause: SQL error occurred while performing UI action.
Action: If this error is not expected, contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

ODI-26185: ODI-26185: File does not exist or cannot be created. See error details for more information.
Cause: UI action tried to open a file which did not exist, or create a file which could not be created due to some reasons.
Action: Make sure the file path is typed correctly. Make sure application has enough file system permissions in order to create a file at the specified path.
Level: 32
Type: ERROR
Impact: Other

ODI-26186: ODI-26186: Character set is not supported. See error details for more information.
Cause: UI action tried to use character encoding which is not supported.
Action: Make sure character set is typed correctly.
Level: 32
Type: ERROR
Impact: Other

ODI-26187: ODI-26187: Unexpected I/O error occurred. See error details for more information.
Cause: UI action caused unexpected I/O error.
Action: Contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

ODI-26188: ODI-26188: There is no enough memory to perform this UI action. Increase the maximum Java heap size value (-Xmx).
Causes: UI action requires more memory than available at the current moment.
Action: Increase the maximum Java heap size value by using the "-Xmx" JVM option.
Level: 32

Type: ERROR
Impact: Other

Causes: UI action caused unexpected report generation error.
Action: Contact Oracle Support Services.
Level: 32

Type: ERROR
Impact: Other

ODI-26190: ODI-26190: A user with same name {0} already exists in ODI. Note: LDAP user name is case insensitive. You have to first drop that user prior to registering or changing this one.
Causes: Due to LDAP user name is case insensitive so ODI will follow same rule in external authentication mode.
Action: Please drop the existing user with same name(ignoring case) first prior to registering this one.
Level: 32

Type: ERROR
Impact: Other

ODI-26191: ODI-26191: You cannot move this object because it is locked by another user ({0}).
Causes: This object was locked by another user.
Action: Wait until object is unlocked.
Level: 32

Type: ERROR
Impact: Other

ODI-26192: ODI-26192: You cannot drag & drop this object because it is locked by another user ({0}).
Causes: This object was locked by another user.
Action: Wait until object is unlocked.
Level: 32

Type: ERROR
Impact: Other
ODI-26193: You are not allowed to delete master repository.
   Cause: User attempt to delete master repository.
   Action: Cancel deleting master repository.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26194: Database Connection User is mandatory.
   Cause: Database Connection User was not entered.
   Action: Provide Database Connection User.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26195: Database Connection Password is mandatory.
   Cause: Database Connection Password was not entered.
   Action: Provide Database Connection Password.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26196: Failed to migrate login information to new format.
   Cause: ODI was not able to migrate login information from old format into the new format.
   Action: Make sure that directory %ODI_HOME%/oracledi has write permissions. Try manually copying %ODI_HOME%/oracledi/snps_login_work.xml into %ODI_HOME%/oracledi/snps_login_work_12.xml file.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26197: Failed to delete old login information.
   Cause: ODI was not able to delete old login information after migration from old format into the new format.
   Action: Make sure that directory %ODI_HOME%/oracledi and file %ODI_HOME%/oracledi/snps_login_work.xml have write permissions. Try manually removing %ODI_HOME%/oracledi/snps_login_work.xml file.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26198: Passwords do not match.
   Cause: Password confirmation doesn't match the entered password.
   Action: Make sure that password and password confirmation are the same.
   Level: 32
Type: ERROR
Impact: Other

ODI-26199: ODI-26199: User {0} is not authorized to grant object {1}.
Cause: Current user is not authorized to grant generic object privileges
Action: Assign generic object privileges to user.
Level: 32
Type: ERROR
Impact: Security

ODI-26200: ODI-26200: User {0} is not authorized to grant method {1}.
Cause: Current user is not authorized to grant generic method privileges
Action: Assign generic method privileges to user.
Level: 32
Type: ERROR
Impact: Security

ODI-30000: Error while parsing request file.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Files

ODI-30001: One of the following parameters: {0} or {1} must be defined.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Configuration

ODI-30002: Parameters {0} and {1} cannot be set at the same time.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Configuration

ODI-30003: OdiOSCommand not supported for this operating system. Use tool "OS Command".
Cause:
Action:
Level: 32

Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-40510: Not finished loading!
  Cause:
  Action:
  Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-40511: Bad element [0] while in level
  Cause:
  Action:
  Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-40512: Because an element [0] is not supposed to appear here. Please check your data model.
  Cause:
  Action:
  Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-40513: Entry [0] in {1} has a key [2] which is different from the original key found: [3]
  Cause:
  Action:
  Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-40514: Not implemented
  Cause:
  Action:
  Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-40515: Not implemented
  Cause:
  Action:
  Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40516: Could not add table {0} because the model told us it's a duplicate. Please try changing the grouping factor.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40517: Could not add table {0} because the model told us it's a duplicate. Please try changing the grouping factor.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40518: The table {0} already exists in the model and could not be added
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40519: The table {0} is a duplicate root
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40520: The table {0} doesn't exist
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40521: A NamingException occurred saying {0} because of {1} with the remaining name {2}
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40522: Exception [0] occurred saying: [1]
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40523: Property {0} is invalid
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40524: Property {0} from the URL is invalid
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40525: Internal connection is null. This shouldn't happen that way.
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40526: A NamingException occured saying: [0] with this explanation: [1] and this remaining name: [2]
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40527: Could not read alias bundle because an IOException occurred saying: [0]
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
Impact: Other

ODI-40528: A {0} occurred saying: {1}
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40529: Could not write alias bundle because an IOException occurred saying {0}
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40530: The schema is now in a read only mode because the technology is not HSQL
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40531: Exception {0} occurred saying: {1}
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40532: Could not find the element for row of table {0}: {1}
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40533: Element {0} has no identifier so this row could not be updated.
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
Impact: Other

ODI-40534: Exception getting original attributes of baseDN={0}
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40535: Key column {0} has a null value though it's required
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40536: Deleting attribute {0} from Object {1}
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40537: Deleting object {0}
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40538: Creating attribute value {0} in attribute {1} from Object {2}
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40539: Adding object {0} to the database from row {1}
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40540: Modifying attribute value {0} to {1} in attribute {2} from Object {3}
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40541: Adding attribute value {0} in attribute {1} from Object {2}.
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40542: This update is not permitted because it would move the element to another location in the hierarchy.
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40543: This update is not permitted because it would move this attribute to another element.
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40544: The attribute {0} cannot exist in an element of class {1}.
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40545: Modifying attribute value {0} to {1} in attribute {2} from Object {3}.
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40546: A user has not been provided.
ODI-40547: Not Supported
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-40548: Parameter [0] has already been specified. Old value: [1] New value: [2]
Cause:
Action:

Type: SET_AT_RUNTIME
Impact: Other
ODI-40549: Invalid value specified for [0]
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-40700: Schema [0] cannot be dropped because it is referenced by one or more connections.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-40701: Exception [0] occurred saying: [1]
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-40702: XSD is required for processing flat files
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40703: Root element name is required for processing flat file
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40704: The schema \{0\} already exists. Use the "REPLACE" option to replace the schema
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40705: The schema parameter is required in the command SET SCHEMA
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40706: This schema doesn't exist: \{0\}
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40707: No existing schema with this name: "\{0\}". Please verify that it is the same schema name than the one you specified in your URL connection.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40708: Error synchronizing automatically the schema
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40709: The xml file is required in a LOAD FILE command
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40710: The schema name is mandatory for the CREATE SCHEMA command
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40711: This schema has no DTD and cannot be saved to a XML file
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40712: This table doesn't exist in the schema so it can't be the root table: [0]
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40713: The file parameter is required to write a file
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40714: Could not find a file to verify: make sure you are on a schema associated with a file or use the "VALIDATE FILE <FileName>" syntax.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40715: Exception {0} occurred saying: {1}
  Cause:
  Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40716: Parameter {0} has been declared twice. Old value: {1} New value: {2}
  Cause:
  Action:

Level: 32

ODL-52001: deleting log file: {0}, size: {1} bytes

**Cause:** A log file was deleted because of the rules defined in the current configuration.

**Action:** This is an information message, no action is needed.

**Level:** 16

**Type:** NOTIFICATION

**Impact:** Logging

ODL-52002: invalid value for parameter {0}: {1}. Value must be greater than zero.

**Cause:** An invalid value was assigned to a numeric parameter that require a positive value.

**Action:** Use a value that is greater than zero value for the parameter.

**Level:** 1

**Type:** ERROR

**Impact:** Logging

ODL-52003: invalid value for parameter maxLogSize: {0}. Value must be greater than the value of maxFileSize: {1}.

**Cause:** The value used for the maxLogSize parameter is smaller than the value used for the maxFileSize parameter, which is not valid.

**Action:** Enter a value for the maxLogSize parameter that is greater than the value of the maxFileSize parameter.

**Level:** 1

**Type:** ERROR

**Impact:** Logging

ODL-52004: invalid encoding: {0}

**Cause:** The value used for encoding parameter is not valid.

**Action:** Enter a valid encoding value.

**Level:** 1

**Type:** ERROR

**Impact:** Logging
ODL-52005: invalid path: {0}. This path is already being used by another log writer instance of a different type.

Cause: There was an attempt to create a log using a path that is already being used by another log, but the two logs are of different types.

Action: Contact Oracle support services.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52006: Path cannot be null.

Cause: A null value was used for the log file path.

Action: Enter a non-null value for the path.

Level: 1
Type: ERROR
Impact: Logging

ODL-52007: The log path is not a directory: {0}.

Cause: The value used for the log path is not a directory. Some log types require that the log path be a directory, not a file, because the log file name is fixed.

Action: Enter a directory path instead of a file path.

Level: 1
Type: ERROR
Impact: Logging

ODL-52008: unable to create log directory: {0}

Cause: One or more directories that were used in the log path could not be created.

Action: Make sure that the process has permission to create the directories, or enter a different path. It may also be possible to create the directories manually.

Level: 1
Type: ERROR
Impact: Logging

ODL-52009: The log directory is not writable: {0}.

Cause: The process could not write to the log directory.

Action: Make sure that the process has permission to write to the log directory, or enter a different path.

Level: 1
Type: ERROR
Impact: Logging

ODL-52010: no permission to access log directory: {0}

Cause: The process could not access the log directory.

Action: Make sure that the process has permission to access the log directory, or enter a different path.
Level: 1
Type: ERROR
Impact: Logging

ODL-52011: attempting to operate on a closed LogWriter
Cause: There was an attempt to perform an operation on a log writer that is already closed.
Action: This is possible a programming error. Contact Oracle Support Services. If the problem occurs during process shut down, it is possible that some component is attempting to log a message after the logging system has already shut down.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52012: attempting to write to a closed LogWriter
Cause: There was an attempt to write a message to a log writer that is already closed.
Action: This is possible a programming error. Contact Oracle Support Services. If the problem occurs during process shut down, it is possible that some component is attempting to log a message after the logging system has already shut down.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52013: attempting to flush a closed LogWriter.
Cause: There was an attempt to flush a log writer that is already closed.
Action: This is possible a programming error. Contact Oracle Support Services. If the problem occurs during process shut down, it is possible that some component is attempting to log a message after the logging system has already shut down.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52014: Maximum log size is reached.
Cause: The maximum size for the log defined in the configuration was reached and the current configuration does not enable automated removal of older log messages.
Action: Review the logging configuration. It may be necessary to increase the maxLogSize parameter, or enable a policy for the automatic removal of older messages.

Level: 1
Type: ERROR
Impact: Logging

ODL-52015: unable to delete old archived file
Cause: There was an attempt to delete an old log file, but the file could not be deleted.
Action: Check that the process has permission to delete the log file.

Level: 1
Type: ERROR
Impact: Logging

ODL-52016: failure to rotate log file: {0}
Cause: There was an attempt to rename a log file, but the operation failed.
Action: Check that the process has permission to rename files.

Level: 1
Type: ERROR
Impact: Logging

ODL-52017: out of log file names
Cause: There was an attempt to rename a log file, but there are no more names that can be used.
Action: Remove some or all of the archived files.

Level: 1
Type: ERROR
Impact: Logging

ODL-52018: unable to write to log "{0}": {1}
Cause: There was an error when writing messages to a log file.
Action: See the error message for the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52019: unable to close log "{0}": {1}
Cause: There was an error when closing a log file.
Action: See the error message for the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52020: failed to get a lock on file "{0}" after {1} milliseconds
Cause: A log file lock could not be acquired within the specified time period, and the log write operation has time-out.
Action: Check that other processes are not holding a lock to the log file.

Level: 1
Type: ERROR
Impact: Logging

ODL-52021: thread interrupted while waiting to lock file "{0}" 
Cause: The thread was interrupted while waiting to acquire a lock on a lock file.
**Action:** Check that other processes are not holding a lock to the log file.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52029:** recursive logging detected that exceeds the recursion depth limit of {0}. The handler will not log the message.  
**Cause:** The handler detect recursive logging calls that exceed that maximum configured recursion depth limit.  
**Action:** Review the source code to eliminate logging calls within code that may be called while formatting a log message.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52030:** invalid property name: {0}  
**Cause:** An invalid property name was used in the logging configuration.  
**Action:** Review the configuration and enter a valid property name.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52031:** required property "{0}" is not found  
**Cause:** A required property was not present in the configuration of a log handler.  
**Action:** Review the configuration and add the required property.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52032:** invalid format: {0}. Valid formats are: {1}.  
**Cause:** An invalid value for the 'format' property was used in the configuration of an ODLHandler.  
**Action:** Review the configuration and add a valid value for the format property.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52033:** invalid value for property {0}: {1}.  
**Cause:** An invalid value for used for an ODLHandler property.  
**Action:** Review the configuration and add a valid value for the property.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52034:** Configuration is invalid: {0} cannot be less than {1}.
Cause: An invalid value for used for a size property in an ODLHandler configuration.

Action: Review the configuration and make sure that the value of the 'maxFileSize' property is not greater than the value of the 'maxLogSize' property.

Level: 1
Type: ERROR
Impact: Logging

ODL-52035: failure to create ODLHandler: {0}

Cause: An ODLHandler instance could not be created.
Action: Check the error message for the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52036: invalid level: {0}. Check spelling and verify that the value is a valid ODL or Java level.

Cause: An invalid level was used in the configuration of a logger or handler.
Action: Review the configuration and enter a valid level.

Level: 1
Type: ERROR
Impact: Logging

ODL-52040: failure to initialize class {0}: property {1} must be defined.

Cause: A required system property was not defined.
Action: Review the process configuration and make sure that the required system property is defined.

Level: 1
Type: ERROR
Impact: Logging

ODL-52041: Use of {0} in logging configuration is deprecated; replacing it with {1}. (File: {2}).

Cause: A deprecated property was used in the logging configuration.
Action: Review the logging configuration and consider replacing the deprecated property. While the configuration may be valid, use of deprecated properties should be avoided.

Level: 1
Type: WARNING
Impact: Logging

ODL-52042: undefined property: {0}.

Cause: An undefined property was used in the logging configuration.
Action: Review the logging and process configuration and either replace the invalid property in the logging configuration, or define a value for the property.
Level: 1
Type: ERROR
Impact: Logging

ODL-52043: expecting one element of type "{0}"  
Cause: The logging configuration contained more than one XML element of a given type, when only one was expected.  
Action: Review the logging configuration and remove the extra XML elements.

Level: 1
Type: ERROR
Impact: Logging

ODL-52044: cannot find handler: {0}  
Cause: The logging configuration assigned a handler to one or more loggers, but the handler was not defined.  
Action: Review the logging configuration and either add the missing handler, or remove any references to the handler.

Level: 1
Type: ERROR
Impact: Logging

ODL-52045: invalid class: {0}  
Cause: The logging configuration defined an invalid class for a handler.  
Action: Review the logging configuration and make sure that the handler class is valid. The handler class must be either a subclass of java.util.logging.Handler, or implement the oracle.core.ojdl.logging.HandlerFactory interface.

Level: 1
Type: ERROR
Impact: Logging

ODL-52046: cannot find class: {0}  
Cause: The logging configuration defined a handler, filter, or error manager class, but that class could not be found.  
Action: Review the logging and process configuration and make sure that the class is available in the system classpath, or that the class is visible to the classloader that loads the ODL configuration classes.

Level: 1
Type: ERROR
Impact: Logging

ODL-52047: cannot load or link class "{0}": {1}  
Cause: The logging configuration defined a handler, filter, or error manager class, but that class could not be loaded due to a linkage error.  
Action: Review the logging and process configuration and make sure that the class is available in the system classpath, or that the class is visible to the classloader that loads the ODL configuration classes, or that the correct version of the class is being used.
Level: 1
Type: ERROR
Impact: Logging

ODL-52048: Class "(0)" is not of expected type "(1)."
  Cause: The logging configuration defined a handler, filter, or error manager class, but that class is not a handler, filter or error manager instance.
  Action: Review the logging and process configuration and make sure that the class is of the correct type.

Level: 1
Type: ERROR
Impact: Logging

ODL-52049: cannot create instance of class "(0)": (1)
  Cause: The logging configuration defined a handler, filter, or error manager class, but an instance of that class could not be created.
  Action: Review the error message for the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52050: unable to process file "(0)", XML parse exception (line: (1), column: (2)): (3)
  Cause: The logging configuration could not be processed due to an XML error in the configuration file.
  Action: Review the error message for a description of the XML error, and correct the problem in the configuration file.

Level: 1
Type: ERROR
Impact: Logging

ODL-52051: unable to process file "(0)"; exception: (1)
  Cause: The logging configuration could not be processed due to a unexpected XML parser error.
  Action: Review the error message for a description of the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52052: unable to find resource: (0)
  Cause: The logging configuration could not be processed due to a missing XML schema or DTD.
  Action: Contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52053: unable to create handler instance using class "{0}"; exception: {1}
Cause: The creation of a handler instance failed because the handler factory threw an exception.
Action: Review the error message for the root cause.
Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52054: The logger "{0}" is already defined.
Cause: There was an attempt to add a new logger to the configuration file, but the logger is already defined.
Action: Verify that the logger name is correct.
Level: 1
Type: ERROR
Impact: Logging

ODL-52055: The handler "{0}" is already defined.
Cause: There was an attempt to add a new handler to the configuration file, but a handler is already defined.
Action: Verify that the handler name is correct.
Level: 1
Type: ERROR
Impact: Logging

ODL-52056: The logger "{0}" is not defined.
Cause: There was an attempt to access a logger in the logging configuration but the logger is not defined.
Action: Verify if the logger name is correct.
Level: 1
Type: ERROR
Impact: Logging

ODL-52057: The handler "{0}" is not defined.
Cause: There was an attempt to access a handler in the logging configuration but the handler is not defined.
Action: Verify if the handler name is correct.
Level: 1
Type: ERROR
Impact: Logging

ODL-52058: The handler "{0}" cannot be removed because it is being used by logger "{1}".
Cause: There was an attempt to remove a handler from the logging configuration, but the handler could not be removed because it is being used by a logger.
**Action:** Verify that the handler name is correct, or remove the handler from all the loggers first before attempting to remove the handler.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging  

ODL-52059: The logger "{0}" already has handler "{1}".  
**Cause:** There was an attempt to add a handler to a logger but the logger already has the given handler.  
**Action:** Verify if the logger and handler names are correct.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging  

ODL-52060: The logger "{0}" does not have handler "{1}".  
**Cause:** There was an attempt to remove a handler from a logger, but the logger does not contain the given handler.  
**Action:** Verify if the logger and handler names are correct.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging  

ODL-52061: The handler "{0}" does not have property "{1}".  
**Cause:** There was an attempt to remove a property from a handler, but the handler does not have a property with the given name.  
**Action:** Verify if the handler and property are correct.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging  

ODL-52062: Illegal value for "{0}": {1}  
**Cause:** There was an attempt to set a property for a handler or logger, but the value of the property is not valid.  
**Action:** Verify if the handler or loggers properties are valid.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging  

ODL-52063: Unable to load logging configuration from "{0}"; exception: {1}  
**Cause:** There was an error while loading the logging configuration file.  
**Action:** Review the error message for the root cause.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging
ODL-52064: The handler "[0]" is already defined in the target logging configuration document.
Causes: There was an attempt to add a handler to a logging configuration file, but a handler with the given name already exists in the target file.
Action: Review the definition of the new handler.

Level: 1
Type: ERROR
Impact: Logging

ODL-52065: The logger "[0]" or a descendant is already defined in the target logging configuration document.
Causes: There was an attempt to add a logger to a logging configuration file, but the logger or one of its descendants is already defined in target logging configuration.
Action: Review the definition of the new logger.

Level: 1
Type: ERROR
Impact: Logging

ODL-52080: Reading logging configuration from "[0]".
Causes: 
Action: 

Level: 1
Type: NOTIFICATION
Impact: Logging

ODL-52081: unable to read logging configuration from file "[0]"; exception: {1}
Causes: There was an error reading the logging configuration from the given file.
Action: Review the error message for the root cause.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52082: unable to register logging runtime MBean; exception: {0}
Causes: 
Action: 

Level: 1
Type: ERROR
Impact: Logging

ODL-52083: unable to register log dump; exception: {0}
Causes: There was an error registering the log dump with the FMW Diagnostics Framework.
Action: Review the error message for the root cause. The system may still work, but the log dump will not be available.
Level: 1  
Type: WARNING  
Impact: Logging  

ODL-52084: unable to initialize ODL; exception: {0}  
Cause: There was an error initializing Oracle Diagnostic Logging (ODL).  
Action: Review the error message for the root cause. Oracle Diagnostic Logging is not properly configured in this system.  

Level: 1  
Type: ERROR  
Impact: Logging  

ODL-52085: Reloading logging configuration from "(0)".  
Cause:  
Action:  

Level: 1  
Type: NOTIFICATION  
Impact: Logging  

ODL-52086: unable to reload logging configuration from file "(0)"; exception: {1}  
Cause: There was an error reloading the logging configuration from the given file.  
Action: Review the error message for the root cause.  

Level: 1  
Type: INCIDENT_ERROR  
Impact: Logging  

ODL-52087: suspicious logging configuration reload. The original configuration was read from file "(0)", but the new configuration is being read from "(1)".  
Cause: The logging configuration is being reloaded, but the configuration file is different from the configuration file used for the initial configuration.  
Action: This is probably an error, there should only be one configuration file.  

Level: 1  
Type: INCIDENT_ERROR  
Impact: Logging  

ODL-52088: The java.util.logging configuration was reloaded.
