   Cause: Allowed attributes can not be modified.
   Action: Make sure not modifying allowed attributes
   Level: 1
   Type: WARNING
   Impact: Security

JPS-10277: Allowed attributes can not be modified.
   Cause: Allowed attributes can not be modified.
   Action: Make sure not modifying allowed attributes
   Level: 1
   Type: WARNING
   Impact: Security

JPS-10278: Requested modification to the resource type {0} is not allowed.
   Cause: Requested modification to the resource type is not allowed.
   Action: Make sure not to make certain type of changes to the resource type when it is used by resources
   Level: 1
   Type: WARNING
   Impact: Security
JPS-10278: Requested modification to the resource type {0} is not allowed.
   Cause: Requested modification to the resource type is not allowed.
   Action: Make sure not to make certain type of changes to the resource type when
   it is used by resources
   Level: 1
   Type: WARNING
   Impact: Security

JPS-10279: The custom resource matcher class of resource type {0} could not be
   modified to {1}.
   Cause: The custom resource matcher class was changed while modifying the
   resource type.
   Action: Keep custom resource matcher class unchanged.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-10280: The resource attribute {0} does not exist in the resource type {1}.
   Cause: The resource attribute does not exist in the resource type.
   Action: Check all the valid resource attributes in the resource type.
Level: 1
Type: WARNING
Impact: Security

**JPS-10400: Resource reference should not be null.**
*Cause:* The parameter resource reference is null.
*Action:* Use a valid object.

Level: 1
Type: WARNING
Impact: Security

**JPS-10400: Resource reference should not be null.**
*Cause:* The parameter resource reference is null.
*Action:* Use a valid object.

Level: 1
Type: WARNING
Impact: Security

**JPS-10400: Resource reference should not be null.**
*Cause:* The parameter resource reference is null.
*Action:* Use a valid object.

Level: 1
Type: WARNING
Impact: Security

**JPS-10401: The resource reference is invalid.**
*Cause:* The current resource reference is invalid.
*Action:* Use a valid resource reference.

Level: 1
Type: WARNING
Impact: Security

**JPS-10401: The resource reference is invalid.**
*Cause:* The current resource reference is invalid.
*Action:* Use a valid resource reference.

Level: 1
Type: WARNING
Impact: Security

**JPS-10401: The resource reference is invalid.**
*Cause:* The current resource reference is invalid.
*Action:* Use a valid resource reference.

Level: 1

Impact: Security

JPS-10402: The resource {0} does not exist.
  Cause: The resource does not exist.
  Action: Make sure the resource exist.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10402: The resource {0} does not exist.
  Cause: The resource does not exist.
  Action: Make sure the resource exist.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10402: The resource {0} does not exist.
  Cause: The resource does not exist.
  Action: Make sure the resource exist.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10403: Could not get an available data manager.
  Cause: The data manager is invalid.
  Action: Make sure policy store and related configuration are correct.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10403: Could not get an available data manager.
  Cause: The data manager is invalid.
  Action: Make sure policy store and related configuration are correct.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10403: Could not get an available data manager.
  Cause: The data manager is invalid.
  Action: Make sure policy store and related configuration are correct.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10404: The resource type {0} does not exist.
Cause: The resource type does not exist.
Action: Make sure the resource type exist.

Level: 1
Type: WARNING
Impact: Security

JPS-10404: The resource type {0} does not exist.
Cause: The resource type does not exist.
Action: Make sure the resource type exist.

Level: 1
Type: WARNING
Impact: Security

JPS-10404: The resource type {0} does not exist.
Cause: The resource type does not exist.
Action: Make sure the resource type exist.

Level: 1
Type: WARNING
Impact: Security

JPS-10405: The resource "{0}" with type "{1}" already exists in current application policy.
Cause: The resource to be created has existed.
Action: Make sure the resource does not exist.

Level: 1
Type: WARNING
Impact: Security

JPS-10405: The resource {0} with type {1} already exists in current application policy.
Cause: The resource to be created has existed.
Action: Make sure the resource does not exist.

Level: 1
Type: WARNING
Impact: Security

JPS-10405: The resource {0} with type {1} already exists in current application policy.
Cause: The resource to be created has existed.
Action: Make sure the resource does not exist.

Level: 1
Type: WARNING
Impact: Security

JPS-10406: The modification operator {0} is invalid.
Cause: The operator in ModificationItem is invalid.
Action: Make sure the operation is one of DirContext.ADD_ATTRIBUTE, DirContext.REPLACE_ATTRIBUTE and DirContext.REMOVE_ATTRIBUTE.

Level: 1
Type: WARNING
Impact: Security

JPS-10406: The modification operator \{0\} is invalid.
Cause: The operator in ModificationItem is invalid.
Action: Make sure the operation is one of DirContext.ADD_ATTRIBUTE, DirContext.REPLACE_ATTRIBUTE and DirContext.REMOVE_ATTRIBUTE.

Level: 1
Type: WARNING
Impact: Security

JPS-10406: The modification operator \{0\} is invalid.
Cause: The operator in ModificationItem is invalid.
Action: Make sure the operation is one of DirContext.ADD_ATTRIBUTE, DirContext.REPLACE_ATTRIBUTE and DirContext.REMOVE_ATTRIBUTE.

Level: 1
Type: WARNING
Impact: Security

JPS-10407: The property name \{0\} is unknown.
Cause: The attribute ID in ModificationItem is undefined.
Action: Make sure the attribute ID is a valid one.

Level: 1
Type: WARNING
Impact: Security

JPS-10407: The property name \{0\} is unknown.
Cause: The attribute ID in ModificationItem is undefined.
Action: Make sure the attribute ID is a valid one.

Level: 1
Type: WARNING
Impact: Security

JPS-10407: The property name \{0\} is unknown.
Cause: The attribute ID in ModificationItem is undefined.
Action: Make sure the attribute ID is a valid one.

Level: 1
Type: WARNING
Impact: Security

JPS-10408: The name and type of resource could not be modified.
Cause: The name and type of resource could not be modified.
Action: Do not put resource name and type in ModificationItem.

Level: 1
Type: WARNING
Impact: Security

JPS-10408: The name and type of resource could not be modified.
Cause: The name and type of resource could not be modified.
Action: Do not put resource name and type in ModificationItem.

Level: 1
Type: WARNING
Impact: Security

JPS-10409: The property {0} of resource is single, could not have more than one value.
Cause: The property could not have more than one value.
Action: First remove the existing value before adding new one.

Level: 1
Type: WARNING
Impact: Security

JPS-10409: The property {0} of resource is single, could not have more than one value.
Cause: The property could not have more than one value.
Action: First remove the existing value before adding new one.

Level: 1
Type: WARNING
Impact: Security

JPS-10410: Could not add or replace the property {0} since there is no value provided.
**Cause:** There is no value provided when trying to add or replace an property.

**Action:** Provide the new value.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-10410:** Could not add or replace the property \{0\} since there is no value provided.

**Cause:** There is no value provided when trying to add or replace an property.

**Action:** Provide the new value.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-10410:** Could not add or replace the property \{0\} since there is no value provided.

**Cause:** There is no value provided when trying to add or replace an property.

**Action:** Provide the new value.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-10411:** The resource \{0\} is in use, could not be deleted.

**Cause:** The resource could not be deleted without cascade since it is in use.

**Action:** Cascade delete it or first remove all referring objects.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-10411:** The resource \{0\} is in use, could not be deleted.

**Cause:** The resource could not be deleted without cascade since it is in use.

**Action:** Cascade delete it or first remove all referring objects.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-10411:** The resource \{0\} is in use, could not be deleted.

**Cause:** The resource could not be deleted without cascade since it is in use.

**Action:** Cascade delete it or first remove all referring objects.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-10412:** The resource attribute \{0\} already exists in the current entry.
Cause: The resource attribute could not be added since it already exists.
Action: Remove duplicate resource attributes.

Level: 1
Type: WARNING
Impact: Security

JPS-10412: The resource attribute {0} already exists in the current entry.
Cause: The resource attribute could not be added since it already exists.
Action: Remove duplicate resource attributes.

Level: 1
Type: WARNING
Impact: Security

JPS-10413: The resource action {0} already exists in the current entry.
Cause: The resource action could not be added since it already exists.
Action: Remove duplicate resource actions

Level: 1
Type: WARNING
Impact: Security

JPS-10413: The resource action {0} already exists in the current entry.
Cause: The resource action could not be added since it already exists.
Action: Remove duplicate resource actions

Level: 1
Type: WARNING
Impact: Security

JPS-10413: The resource action {0} already exists in the current entry.
Cause: The resource action could not be added since it already exists.
Action: Remove duplicate resource actions

Level: 1
Type: WARNING
Impact: Security

JPS-10414: The resource attribute {0} could not be deleted since it does not exist.
Cause: The resource attribute could not be deleted since it does not exist.
Action: Check if the resource attribute exists.
Level: 1  
Type: WARNING  
Impact: Security  

JPS-10414: The resource attribute \{0\} could not be deleted since it does not exist.  
Cause: The resource attribute could not be deleted since it does not exist.  
Action: Check if the resource attribute exists.  

Level: 1  
Type: WARNING  
Impact: Security  

JPS-10415: The resource action \{0\} could not be deleted since it does not exist.  
Cause: The resource action could not be deleted since it does not exist.  
Action: Check if the resource action exists  

Level: 1  
Type: WARNING  
Impact: Security  

JPS-10416: Resource \{0\} does not belong to the context.  
Cause: The resource does not belong to current context  
Action: Pass in correct resource.  

Level: 1  
Type: WARNING
Impact: Security

JPS-10416: Resource {0} does not belong to the context.
Cause: The resource does not belong to current context
Action: Pass in correct resource.

Level: 1
Type: WARNING
Impact: Security

JPS-10416: Resource {0} does not belong to the context.
Cause: The resource does not belong to current context
Action: Pass in correct resource.

Level: 1
Type: WARNING
Impact: Security

JPS-10417: Resource query across different resource type is not allowed.
Cause: Resource query across different resource type is not allowed
Action: Pass in correct query parameter.

Level: 1
Type: WARNING
Impact: Security

JPS-10417: Resource query across different resource type is not allowed.
Cause: Resource query across different resource type is not allowed
Action: Pass in correct query parameter.

Level: 1
Type: WARNING
Impact: Security

JPS-10417: Resource query across different resource type is not allowed.
Cause: Resource query across different resource type is not allowed
Action: Pass in correct query parameter.

Level: 1
Type: WARNING
Impact: Security

JPS-10418: Cannot delete a resource that has one or more child resources.
Cause: Can not delete a resource that has one or more child resources
Action: Delete all child resources and then try again.

Level: 1
Type: WARNING
Impact: Security

JPS-10418: Cannot delete a resource that has one or more child resources.
**JPS-10418: Cannot delete a resource that has one or more child resources.**

**Cause:** Can not delete a resource that has one or more child resources

**Action:** Delete all child resources and then try again.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

---

**JPS-10419: Resource hierarchy type change is not allowed.**

**Cause:** Resource hierarchy type change is not allowed.

**Action:** Check the resource hierarchy type

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

---

**JPS-10420: Resource name must begin with the resource name delimiter.**

**Cause:** Resource name must begin with the resource name delimiter

**Action:** Add resource name delimiter in the begining of the resource name.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security
Level: 1
Type: WARNING
Impact: Security

JPS-10420: Resource name must begin with the resource name delimiter.
Cause: Resource name must begin with the resource name delimiter
Action: Add resource name delimiter in the beginning of the resource name.

Level: 1
Type: WARNING
Impact: Security

JPS-10421: The given all action value already exists.
Cause: The given all action value already exists
Action: Check the input all action value and check for duplicate values.

Level: 1
Type: WARNING
Impact: Security

JPS-10421: The given all action value already exists.
Cause: The given all action value already exists
Action: Check the input all action value and check for duplicate values.

Level: 1
Type: WARNING
Impact: Security

JPS-10421: The given all action value already exists.
Cause: The given all action value already exists
Action: Check the input all action value and check for duplicate values.

Level: 1
Type: WARNING
Impact: Security

JPS-10422: The resource attribute {0} is used in policy(-ies) and can not be deleted.
Cause: The resource attribute is used in policy(-ies) and can not be deleted.
Action: Before deleting the resource attribute, make sure it is not used.

Level: 1
Type: WARNING
Impact: Security

JPS-10422: The resource attribute {0} is used in policy(-ies) and can not be deleted.
Cause: The resource attribute is used in policy(-ies) and can not be deleted.
Action: Before deleting the resource attribute, make sure it is not used.

Level: 1
Type: WARNING
Impact: Security

JPS-10422: The resource attribute {0} is used in policy(-ies) and can not be deleted.
Cause: The resource attribute is used in policy(-ies) and can not be deleted.
Action: Before deleting the resource attribute, make sure it is not used.

Level: 1
Type: WARNING
Impact: Security

JPS-10423: The action {0} is used by the {1} and can not be deleted.
Cause: The action is used by the permissionSet/permission and can not be deleted.
Action: Check if the action is used in any PermissionSet/Permission before deleting.

Level: 1
Type: WARNING
Impact: Security

JPS-10423: The action {0} is used by the permissionSet/permission and can not be deleted.
Cause: The action is used by the permissionSet/permission and can not be deleted.
Action: Check if the action is used in any PermissionSet/Permission before deleting.

Level: 1
Type: WARNING
Impact: Security

JPS-10423: The action {0} is used by the permissionSet/permission and can not be deleted.
Cause: The action is used by the permissionSet/permission and can not be deleted.
Action: Check if the action is used in any PermissionSet/Permission before deleting.

Level: 1
Type: WARNING
Impact: Security

JPS-10424: The resourceType {0} of hierarchy type is invalid as its parent is null.
Cause: The heirarical resourcetype's parent is null.
Action: Make sure to provide a valid name for the heirarical resourcetype

Level: 1
Type: ERROR
Impact: Security

JPS-10424: The resourceType {0} of hierarchy type is invalid as its parent is null.
Cause: The heirarchical resourcetype's parent is null.
Action: Make sure to provide a valid name for the heirarchical resourcetype
Level: 1
Type: ERROR
Impact: Security

JPS-10424: The resourceType {0} of hierarchy type is invalid as its parent is null.
Cause: The heirarchical resourcetype's parent is null.
Action: Make sure to provide a valid name for the heirarchical resourcetype
Level: 1
Type: ERROR
Impact: Security

JPS-10425: The resource attribute {0} already contains the value {1}.
Cause: The resource attribute already contains this value.
Action: Remove duplicate resource attributes values.
Level: 1
Type: WARNING
Impact: Security

JPS-10425: The resource attribute {0} already contains the value {1}.
Cause: The resource attribute already contains this value.
Action: Remove duplicate resource attributes values.
Level: 1
Type: WARNING
Impact: Security

JPS-10425: The resource attribute {0} already contains the value {1}.
Cause: The resource attribute already contains this value.
Action: Remove duplicate resource attributes values.
Level: 1
Type: WARNING
Impact: Security

JPS-10426: Cannot set all actions keyword for resource type with non-null matcher class.
Cause: All actions keyword cannot be set to resource type with matcher class
Action: Do not set all actions keyword for a resource type with a matcher class.
Level: 1
Type: WARNING
Impact: Security

JPS-10426: Cannot set all actions keyword for resource type with non-null matcher class.
Cause: All actions keyword cannot be set to resource type with matcher class
Action: Do not set all actions keyword for a resource type with a matcher class.

Level: 1
Type: WARNING
Impact: Security

JPS-10426: Cannot set all actions keyword for resource type with non-null matcher class.
Cause: All actions keyword cannot be set to resource type with matcher class
Action: Do not set all actions keyword for a resource type with a matcher class.

Level: 1
Type: WARNING
Impact: Security

JPS-10427: The resource name expression "{0}" is not a valid Java regular expression.
Cause: Regular expression provided for resource name expression is invalid.
Action: Check that the resource name expression is a valid Java regular expression.

Level: 1
Type: WARNING
Impact: Security

JPS-10427: The resource name expression "{0}" is not a valid Java regular expression.
Cause: Regular expression provided for resource name expression is invalid.
Action: Check that the resource name expression is a valid Java regular expression.

Level: 1
Type: WARNING
Impact: Security

JPS-10427: The resource name expression "{0}" is not a valid Java regular expression.
Cause: Regular expression provided for resource name expression is invalid.
Action: Check that the resource name expression is a valid Java regular expression.

Level: 1
Type: WARNING
Impact: Security

JPS-10428: The resource {0} of type {1} does not exist.
Cause: The resource of the resource type does not exist.
Action: Make sure the resource of the resource type exists.

Level: 1
Type: WARNING
Impact: Security
JPS-10428: The resource {0} of type {1} does not exist.
  Cause: The resource of the resource type does not exist.
  Action: Make sure the resource of the resource type exists.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10428: The resource {0} of type {1} does not exist.
  Cause: The resource of the resource type does not exist.
  Action: Make sure the resource of the resource type exists.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10429: The value data type of property {0} should be String and not {1}.
  Cause: The value data type of property is not String.
  Action: Use a String object as value.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10429: The value data type of property {0} should be String and not {1}.
  Cause: The value data type of property is not String.
  Action: Use a String object as value.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10429: The value data type of property {0} should be String and not {1}.
  Cause: The value data type of property is not String.
  Action: Use a String object as value.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10430: The Resource name {0} has an invalid format
  Cause: Too many delimiters in the resource name
  Action: Limit the number of delimiters in the beginning and middle of resource name to one.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10431: Wrong isSingle property for the attribute {0}; expected {1}, but {2}.
Cause: Wrong isSingle property of resource attribute
Action: Ensure isSingle property of the attribute in resource is the same as the definition in resource type
Level: 1
Type: WARNING
Impact: Security

JPS-10432: Wrong DataType property for the attribute {0}; expected {1}, but {2}.
Cause: Wrong DataType property of resource attribute
Action: Ensure DataType property of the attribute on resource is the same as the definition in resource type
Level: 1
Type: WARNING
Impact: Security

JPS-10451: Permission set {0} does not belong to the context.
Cause: The permission set does not belong to current context
Action: Pass in correct permission set.
Level: 1
Type: WARNING
Impact: Security

JPS-10451: Permission set {0} does not belong to the context.
Cause: The permission set does not belong to current context
Action: Pass in correct permission set.
Level: 1
Type: WARNING
Impact: Security

JPS-10451: Permission set {0} does not belong to the context.
Cause: The permission set does not belong to current context
Action: Pass in correct permission set.
Level: 1
Type: WARNING
Impact: Security

JPS-10452: Permission set {0} has ResourceActionsEntry with null ResourceEntry and null ResourceNameExpression.
Cause: Both ResourceEntry and Resource name expression of ResourceActionsEntry is null
Level: 1
Type: WARNING
Impact: Security
JPS-10452: Permission set {0} has ResourceActionsEntry with null ResourceEntry and null ResourceNameExpression.
    Cause: Both ResourceEntry and Resource name expression of ResourceActionsEntry is null

    Level: 1
    Type: WARNING
    Impact: Security

JPS-10454: No resources or actions have been identified by the permission set.
    Cause: No resources or actions have been identified by the permission set.
    Action: Ensure that the permission set is created with valid resource actions.

    Level: 1
    Type: WARNING
    Impact: Security

JPS-10455: Resource is not protected by a Java Permission.
    Cause: Resource is not protected by a Java Permission.
    Action: Ensure that the permission set is created with valid resource object.

    Level: 1
    Type: WARNING
Impact: Security

JPS-10455: Resource is not protected by a Java Permission.
  Cause: Resource is not protected by a Java Permission.
  Action: Ensure that the permission set is created with valid resource object.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10455: Resource is not protected by a Java Permission.
  Cause: Resource is not protected by a Java Permission.
  Action: Ensure that the permission set is created with valid resource object.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10456: ResourceExpression and ResourceAction cannot be specified at the same time.
  Cause: ResourceExpression and ResourceAction cannot be specified at the same time.
  Action: PermissionSet ResourceAction should contain either Resource expression or ResourceEntry.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10456: ResourceExpression and ResourceAction cannot be specified at the same time.
  Cause: ResourceExpression and ResourceAction cannot be specified at the same time.
  Action: PermissionSet ResourceAction should contain either Resource expression or ResourceEntry.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10456: ResourceExpression and ResourceAction cannot be specified at the same time.
  Cause: ResourceExpression and ResourceAction cannot be specified at the same time.
  Action: PermissionSet ResourceAction should contain either Resource expression or ResourceEntry.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10457: Not able to perform operation due to invalid parameter. Cause: "{0}".
Cause: Not able to perform operation due to invalid parameter. Cause: {0}.
Action: Ensure that the operation is called with valid parameters.

Level: 1
Type: WARNING
Impact: Security

JPS-10457: Not able to perform operation due to invalid parameter. Cause: "{0}".
Cause: Not able to perform operation due to invalid parameter. Cause: {0}.
Action: Ensure that the operation is called with valid parameters.

Level: 1
Type: WARNING
Impact: Security

JPS-10458: ResourceExpression and ResourceAction cannot be null at the same time.
Cause: ResourceExpression and ResourceAction cannot be null at the same time.
Action: PermissionSet ResourceAction should contain either Resource expression or ResourceEntry.

Level: 1
Type: WARNING
Impact: Security

JPS-10458: ResourceExpression and ResourceAction cannot be null at the same time.
Cause: ResourceExpression and ResourceAction cannot be null at the same time.
Action: PermissionSet ResourceAction should contain either Resource expression or ResourceEntry.

Level: 1
Type: WARNING
Impact: Security

JPS-10458: ResourceExpression and ResourceAction cannot be null at the same time.
Cause: ResourceExpression and ResourceAction cannot be null at the same time.
Action: PermissionSet ResourceAction should contain either Resource expression or ResourceEntry.

Level: 1
Type: WARNING
Impact: Security
JPS-10459: The modified permission set {0} contains resources of multiple resource types. It is not permitted as there is policy(-ies) that references that permission set and uses resource attributes.

Cause: The modified permission set contained resources of multiple resource types. It was not permitted if there was a policy that referenced that permission set and used resource attributes.

Action: Fix the permission set or modify the policy(-ies).

Level: 1
Type: WARNING
Impact: Security

JPS-10459: The modified permission set {0} contains resources of multiple resource types. It is not permitted as there is policy(-ies) that references that permission set and uses resource attributes.

Cause: The modified permission set contained resources of multiple resource types. It was not permitted if there was a policy that referenced that permission set and used resource attributes.

Action: Fix the permission set or modify the policy(-ies).

Level: 1
Type: WARNING
Impact: Security

JPS-10459: The modified permission set {0} contains resources of multiple resource types. It is not permitted as there is policy(-ies) that references that permission set and uses resource attributes.

Cause: The modified permission set contained resources of multiple resource types. It was not permitted if there was a policy that referenced that permission set and used resource attributes.

Action: Fix the permission set or modify the policy(-ies).

Level: 1
Type: WARNING
Impact: Security

JPS-10460: The permission set search query {0} is not supported

Cause: The permission set search query is not supported.

Action: Use supported query scenario.

Level: 1
Type: WARNING
Impact: Security

JPS-10460: The permission set search query {0} is not supported

Cause: The permission set search query is not supported.

Action: Use supported query scenario.

Level: 1
Type: WARNING
Impact: Security
JPS-10460: The permission set search query {0} is not supported
  Cause: The permission set search query is not supported.
  Action: Use supported query scenario.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10463: Requested actions: "{0}" are not a subset of valid actions: "{1}" for the given resource: "{2}" and type: "{3}".
  Cause: Invalid resource actions for the given resource.
  Action: Ensure that the actions in the resource-actions are a valid subset of the actions defined by the resource type.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10464: Error occurred while getting the permission set entry for permission set search query {0}.
  Cause: Error occurred while getting the permission set entry for permission set search query.
  Action: See the log files for more details.

  Level: 1
  Type: WARNING
  Impact: Security
JPS-00001 to JPS-90642
29-741

Cause: Error occurred while getting the permission set entry for permission set search query.
Action: See the log files for more details.
Level: 1
Type: WARNING
Impact: Security

JPS-10464: Error occurred while getting the permission set entry for permission set search query {0}.
Cause: Error occurred while getting the permission set entry for permission set search query.
Action: See the log files for more details.
Level: 1
Type: WARNING
Impact: Security

JPS-10465: Permission set {0} has ResourceActionsEntry with null expression in ResourceNameExpression.
Cause: Expression in ResourceNameExpression of ResourceActionsEntry is null
Level: 1
Type: WARNING
Impact: Security

JPS-10465: Permission set {0} has ResourceActionsEntry with null expression in ResourceNameExpression.
Cause: Expression in ResourceNameExpression of ResourceActionsEntry is null
Level: 1
Type: WARNING
Impact: Security

JPS-10465: Permission set {0} has ResourceActionsEntry with null expression in ResourceNameExpression.
Cause: Expression in ResourceNameExpression of ResourceActionsEntry is null
Level: 1
Type: WARNING
Impact: Security

JPS-10466: Resource {0} has no Resource Actions, but Resource Type {1} has resource actions.
Cause: Empty resource actions for the given Resource, but Resource type has actions.
Action: Ensure that the actions in the resource-actions are not null or empty since the resource type has actions.
Level: 1
Type: WARNING
Impact: Security

JPS-10466: Resource {0} has no Resource Actions, but Resource Type {1} has resource actions.
Cause: Empty resource actions for the given Resource, but Resource type has actions.
Action: Ensure that the actions in the resource-actions are not null or empty since the resource type has actions.
Level: 1
Type: WARNING
Impact: Security

JPS-10467: Permission set {0} has ResourceActionsEntry with null expression in ResourceNameExpression.
Cause: Expression in ResourceNameExpression of ResourceActionsEntry is null
Level: 1
Type: WARNING
Impact: Security
JPS-10467: Permission set [0] has ResourceActionsEntry with null expression in ResourceNameExpression.
Cause: Expression in ResourceNameExpression of ResourceActionsEntry is null
Level: 1
Type: WARNING
Impact: Security

JPS-10468: Duplicate permission "[0]" in policy store.
Cause: Duplicate permission in policy store.
Action: Check the policy store and ensure that there is no duplicate permission.
Level: 1
Type: WARNING
Impact: Security

JPS-10468: Duplicate permission "[0]" in policy store.
Cause: Duplicate permission in policy store.
Action: Check the policy store and ensure that there is no duplicate permission.
Level: 1
Type: WARNING
Impact: Security

JPS-10468: Duplicate permission "[0]" in policy store.
Cause: Duplicate permission in policy store.
Action: Check the policy store and ensure that there is no duplicate permission.
Level: 1
Type: WARNING
Impact: Security

JPS-10469: Cannot remove all the ResourceActionsEntries in PermissionSet.
Cause: Try to remove all the ResourceActionsEntries in existing PermissionSet.
Action: Check the updated resource actions, make sure PermissionSet does not have up empty resource actions.
Level: 1
Type: WARNING
Impact: Security

JPS-10470: The resource type name "[0]", does not match the resourceType in the encoded target name: "][1]". Permission class is "[2]"
Cause: Invalid resource type in permission target.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10470: The resource type name "(0)", does not match the resourceType in the encoded target name: "(1)". Permission class is "(2)"
Cause: Invalid resource type in permission target.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10470: The resource type name "(0)", does not match the resourceType in the encoded target name: "(1)". Permission class is "(2)"
Cause: Invalid resource type in permission target.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10471: Resource type is missing in the target name: "(0)", for permission: "(1)"
Cause: Resource type missing in permission target.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10471: Resource type is missing in the target name: "(0)", for permission: "(1)"
Cause: Resource type missing in permission target.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10471: Resource type is missing in the target name: "(0)", for permission: "(1)"
Cause: Resource type missing in permission target.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10472: Target "(0)" is missing the prefix "=resourceName=". Unable to determine the resource name for permission: "(1)"
Cause: Target name missing in permission target.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10472: Target "[0]" is missing the prefix '='resourceName='. Unable to determine the resource name for permission: "[1]"
  Cause: Target name missing in permission target.
  Action: Refer to the log files for details.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-10472: Target "[0]" is missing the prefix '='resourceName='. Unable to determine the resource name for permission: "[1]"
  Cause: Target name missing in permission target.
  Action: Refer to the log files for details.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-10473: The target name "[0]" is invalid. Should start with "[1]"
  Cause: Target name encoding is not correct.
  Action: Refer to the log files for details.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-10473: The target name "[0]" is invalid. Should start with "[1]"
  Cause: Target name encoding is not correct.
  Action: Refer to the log files for details.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-10473: The target name "[0]" is invalid. Should start with "[1]"
  Cause: Target name encoding is not correct.
  Action: Refer to the log files for details.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-10474: The parameter: "[0]", value: "[1]" cannot be null
  Cause: Permission target is null.
  Action: Refer to the log files for details.
  Level: 1
  Type: ERROR
Impact: Security

JPS-10474: The parameter: "{0}", value: "{1}" cannot be null
Causes: Permission target is null.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10474: The parameter: "{0}", value: "{1}" cannot be null
Causes: Permission target is null.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10475: The permission actions: "{0}" are not a subset of valid actions defined in resource type: "{1}"
Causes: Permission actions do not match with valid resource type actions.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10475: The permission actions: "{0}" are not a subset of valid actions defined in resource type: "{1}"
Causes: Permission actions do not match with valid resource type actions.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10475: The permission actions: "{0}" are not a subset of valid actions defined in resource type: "{1}"
Causes: Permission actions do not match with valid resource type actions.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10500: The target policy, {0}, does not exist.
Causes: The policy object does not exist.
Action: Check if the target policy exists.
Level: 1
Type: WARNING
Impact: Security

JPS-10500: The target policy, \{0\}, does not exist.
Cause: The policy object does not exist.
Action: Check if the target policy exists.

Level: 1
Type: WARNING
Impact: Security

JPS-10500: The target policy, \{0\}, does not exist.
Cause: The policy object does not exist.
Action: Check if the target policy exists.

Level: 1
Type: WARNING
Impact: Security

JPS-10501: Policy query contains unrecognizable information.
Cause: Policy query contains unrecognizable information.
Action: Check the policy query object.

Level: 1
Type: WARNING
Impact: Security

JPS-10501: Policy query contains unrecognizable information.
Cause: Policy query contains unrecognizable information.
Action: Check the policy query object.

Level: 1
Type: WARNING
Impact: Security

JPS-10501: Policy query contains unrecognizable information.
Cause: Policy query contains unrecognizable information.
Action: Check the policy query object.

Level: 1
Type: WARNING
Impact: Security

JPS-10502: Policy rule information is missing.
Cause: Policy rule information is missing.
Action: Check if policy rule information exists in policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10502: Policy rule information is missing.
Cause: Policy rule information is missing.
Action: Check if policy rule information exists in policy repository.
Level: 1
Type: WARNING
Impact: Security

JPS-10502: Policy rule information is missing.
Cause: Policy rule information is missing.
Action: Check if policy rule information exists in policy repository.
Level: 1
Type: WARNING
Impact: Security

JPS-10503: Obligation information is missing.
Cause: Obligation information is missing.
Action: Check if obligation information exists in policy repository.
Level: 1
Type: WARNING
Impact: Security

JPS-10503: Obligation information is missing.
Cause: Obligation information is missing.
Action: Check if obligation information exists in policy repository.
Level: 1
Type: WARNING
Impact: Security

JPS-10503: Obligation information is missing.
Cause: Obligation information is missing.
Action: Check if obligation information exists in policy repository.
Level: 1
Type: WARNING
Impact: Security

JPS-10504: Permission set information is missing.
Cause: Permission set information is missing.
Action: Check if permission set information exists in policy repository.
Level: 1
Type: WARNING
Impact: Security

JPS-10504: Permission set information is missing.
Cause: Permission set information is missing.
Action: Check if permission set information exists in policy repository.
JPS-10504: Permission set information is missing.
Cause: Permission set information is missing.
Action: Check if permission set information exists in policy repository.

JPS-10505: Grantee information is missing.
Cause: Grantee information is missing.
Action: Check if grantee information exists in policy repository.

JPS-10506: The policy rule, {0}, does not exist.
Cause: The policy rule does not exist.
Action: Check the policy rule name passed in.
Impact: Security
JPS-10506: The policy rule, {0}, does not exist.
Cause: The policy rule does not exist.
Action: Check the policy rule name passed in.
Level: 1
Type: WARNING
Impact: Security

JPS-10507: The condition string is in wrong format, {0}.
Cause: Condition string is in wrong format.
Action: Check condition string in policy repository.
Level: 1
Type: WARNING
Impact: Security

JPS-10507: The condition string is in wrong format, {0}.
Cause: Condition string is in wrong format.
Action: Check condition string in policy repository.
Level: 1
Type: WARNING
Impact: Security

JPS-10507: The condition string is in wrong format, {0}.
Cause: Condition string is in wrong format.
Action: Check condition string in policy repository.
Level: 1
Type: WARNING
Impact: Security

JPS-10508: Policy condition contains an unknown function, {0}.
Cause: Policy condition contains an unknown function.
Action: Check condition string in policy repository.
Level: 1
Type: WARNING
Impact: Security

JPS-10508: Policy condition contains an unknown function, {0}.
Cause: Policy condition contains an unknown function.
Action: Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10509: Policy condition parsing error.
Cause: Policy condition parsing error.
Action: Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10509: Policy condition parsing error.
Cause: Policy condition parsing error.
Action: Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10509: Policy condition parsing error.
Cause: Policy condition parsing error.
Action: Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10510: The expression, {0}, is unknown.
Cause: The policy expression is unknown.
Action: Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10510: The expression, {0}, is unknown.
Cause: The policy expression is unknown.
Action: Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10510: The expression, {0}, is unknown.
Cause: The policy expression is unknown.
Action: Check condition string in policy repository.
Level: 1
Type: WARNING
Impact: Security

JPS-10511: The data type, {0}, is unknown.
Cause: The data type is unknown
Action: Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10511: The data type, {0}, is unknown.
Cause: The data type is unknown
Action: Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10511: The data type, {0}, is unknown.
Cause: The data type is unknown
Action: Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10512: A ResourceActionsEntry should contain either resource entry or resource name expression.
Cause: The ResourceActionsEntry object does not contain resource information.
Action: Check ResourceActionsEntry passed in.

Level: 1
Type: WARNING
Impact: Security

JPS-10512: A ResourceActionsEntry should contain either resource entry or resource name expression.
Cause: The ResourceActionsEntry object does not contain resource information.
Action: Check ResourceActionsEntry passed in.

Level: 1
Type: WARNING
Impact: Security

JPS-10512: A ResourceActionsEntry should contain either resource entry or resource name expression.
Cause: The ResourceActionsEntry object does not contain resource information.
Action: Check ResourceActionsEntry passed in.
Level: 1
Type: WARNING
Impact: Security

JPS-10513: The search value type {0} is not supported for {1}.
Cause: Query criteria type does not support.
Action: Pass in a correct query value.

Level: 1
Type: WARNING
Impact: Security

JPS-10513: The search value type {0} is not supported for {1}.
Cause: Query criteria type does not support.
Action: Pass in a correct query value.

Level: 1
Type: WARNING
Impact: Security

JPS-10513: The search value type {0} is not supported for {1}.
Cause: Query criteria type does not support.
Action: Pass in a correct query value.

Level: 1
Type: WARNING
Impact: Security

JPS-10514: Cannot add PermissionSet to PolicyEntry if it has ResourceType.
Cause: Resource type is already defined in PolicyEntry.
Action: clear resource type of PolicyEntry before adding PermissionSetEntry.

Level: 1
Type: WARNING
Impact: Security

JPS-10514: Cannot add PermissionSet to PolicyEntry if it has ResourceType.
Cause: Resource type is already defined in PolicyEntry.
Action: clear resource type of PolicyEntry before adding PermissionSetEntry.

Level: 1
Type: WARNING
Impact: Security

JPS-10514: Cannot add PermissionSet to PolicyEntry if it has ResourceType.
Cause: Resource type is already defined in PolicyEntry.
Action: clear resource type of PolicyEntry before adding PermissionSetEntry.

Level: 1
Type: WARNING
Impact: Security
JPS-10515: Cannot set ResourceType to PolicyEntry if it has PermissionSet.
  Cause: Permission Set is already defined in PolicyEntry.
  Action: clear Permission Set of PolicyEntry before setting Resource Type.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10515: Cannot set ResourceType to PolicyEntry if it has PermissionSet.
  Cause: Permission Set is already defined in PolicyEntry.
  Action: clear Permission Set of PolicyEntry before setting Resource Type.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10515: Cannot set ResourceType to PolicyEntry if it has PermissionSet.
  Cause: Permission Set is already defined in PolicyEntry.
  Action: clear Permission Set of PolicyEntry before setting Resource Type.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10516: Cannot add Rule if there is rule already in PolicyEntry
  Cause: Add rule to policy when the policy already has rule.
  Action: Delete existing rule before adding new rule to policy.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10516: Cannot add Rule if there is rule already in PolicyEntry
  Cause: Add rule to policy when the policy already has rule.
  Action: Delete existing rule before adding new rule to policy.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10516: Cannot add Rule if there is rule already in PolicyEntry
  Cause: Add rule to policy when the policy already has rule.
  Action: Delete existing rule before adding new rule to policy.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10517: Delete rule not existing in PolicyEntry
Cause:  rule does not belong to the PolicyEntry.
Action:  Check the rule before deleting rule from PolicyEntry.
Level: 1
Type: WARNING
Impact: Security

JPS-10517: Delete rule not existing in PolicyEntry
Cause:  rule does not belong to the PolicyEntry.
Action:  Check the rule before deleting rule from PolicyEntry.
Level: 1
Type: WARNING
Impact: Security

JPS-10517: Delete rule not existing in PolicyEntry
Cause:  rule does not belong to the PolicyEntry.
Action:  Check the rule before deleting rule from PolicyEntry.
Level: 1
Type: WARNING
Impact: Security

JPS-10518: Delete permission set not existing in PolicyEntry
Cause:  permission set does not belong to the PolicyEntry.
Action:  Check the permission set before deleting permission set from PolicyEntry.
Level: 1
Type: WARNING
Impact: Security

JPS-10518: Delete permission set not existing in PolicyEntry
Cause:  permission set does not belong to the PolicyEntry.
Action:  Check the permission set before deleting permission set from PolicyEntry.
Level: 1
Type: WARNING
Impact: Security

JPS-10518: Delete permission set not existing in PolicyEntry
Cause:  permission set does not belong to the PolicyEntry.
Action:  Check the permission set before deleting permission set from PolicyEntry.
Level: 1
Type: WARNING
Impact: Security

JPS-10519: Delete obligation not existing in PolicyEntry
Cause:  obligation does not belong to the PolicyEntry.
Action:  Check the obligation before deleting obligation from PolicyEntry.
Level: 1
Type: WARNING
Impact: Security

JPS-10519: Delete obligation not existing in PolicyEntry
Cause: obligation does not belong to the PolicyEntry.
Action: Check the obligation before deleting obligation from PolicyEntry.

Level: 1
Type: WARNING
Impact: Security

JPS-10519: Delete obligation not existing in PolicyEntry
Cause: obligation does not belong to the PolicyEntry.
Action: Check the obligation before deleting obligation from PolicyEntry.

Level: 1
Type: WARNING
Impact: Security

JPS-10520: Delete Principal not existing in PolicyEntry
Cause: principal does not belong to the PolicyEntry.
Action: Check the principal before deleting principal from PolicyEntry.

Level: 1
Type: WARNING
Impact: Security

JPS-10520: Delete Principal not existing in PolicyEntry
Cause: principal does not belong to the PolicyEntry.
Action: Check the principal before deleting principal from PolicyEntry.

Level: 1
Type: WARNING
Impact: Security

JPS-10520: Delete Principal not existing in PolicyEntry
Cause: principal does not belong to the PolicyEntry.
Action: Check the principal before deleting principal from PolicyEntry.

Level: 1
Type: WARNING
Impact: Security

JPS-10521: The obligation {0} already exists.
Cause: The obligation already exists in the policy entry.
Action: Check ObligationEntry passed in.

Level: 1
Type: WARNING
Impact: Security

JPS-10521: The obligation \{0\} already exists.
Cause: The obligation already exists in the policy entry.
Action: Check ObligationEntry passed in.
Level: 1
Type: WARNING

Impact: Security

JPS-10521: The obligation \{0\} already exists.
Cause: The obligation already exists in the policy entry.
Action: Check ObligationEntry passed in.
Level: 1
Type: WARNING

Impact: Security

JPS-10522: The parameters passed in is invalid, we expect \{0\}, but \{1\} is passed in.
Cause: The parameter passed in the function is not valid.
Action: Pass in correct parameters.
Level: 1
Type: WARNING

Impact: Security

JPS-10522: The parameters passed in is invalid, we expect \{0\}, but \{1\} is passed in.
Cause: The parameter passed in the function is not valid.
Action: Pass in correct parameters.
Level: 1
Type: WARNING

Impact: Security

JPS-10522: The parameters passed in is invalid, we expect \{0\}, but \{1\} is passed in.
Cause: The parameter passed in the function is not valid.
Action: Pass in correct parameters.
Level: 1
Type: WARNING

Impact: Security

JPS-10523: The function return type is invalid, we expect OpssBoolean, but \{0\} is passed in.
Cause: The return type of the function is not valid.
Action: Pass in a function with OpssBoolean return type.
Level: 1
Type: WARNING

Impact: Security
JPS-10523: The function return type is invalid, we expect OpssBoolean, but {0} is passed in.
Cause: The return type of the function is not valid.
Action: Pass in a function with OpssBoolean return type.
Level: 1
Type: WARNING
Impact: Security

JPS-10524: The query with search property {0}, comparator type {1} and matcher {2} is not supported.
Cause: Such query is not supported.
Action: Pass in a supported query value.
Level: 1
Type: WARNING
Impact: Security

JPS-10525: The attribute assignment {0} could not be added since it already exists.
Cause: The attribute assignment could not be added since it already exists.
Action: Remove duplicate attribute assignments.
Level: 1
Type: WARNING
Impact: Security
JPS-10525: The attribute assignment {0} could not be added since it already exists.
  Cause: The attribute assignment could not be added since it already exists.
  Action: Remove duplicate attribute assignments.
Level: 1
Type: WARNING
Impact: Security
JPS-10526: The permission set {0} could not be added since it already exists.
  Cause: The permission set could not be added since it already exists.
  Action: Remove duplicate permission sets.
Level: 1
Type: WARNING
Impact: Security
JPS-10527: The principal {0} could not be added since it already exists.
  Cause: The principal could not be added since it already exists.
  Action: Remove duplicate principals.
Level: 1
JPS-10527: The principal {0} could not be added since it already exists.
  Cause: The principal could not be added since it already exists.
  Action: Remove duplicate principals.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10527: The principal {0} could not be added since it already exists.
  Cause: The principal could not be added since it already exists.
  Action: Remove duplicate principals.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10528: The Policy {0} referenced multiple resource types and resource attribute is used in policy condition or obligation.
  Cause: Policies that used resource attributes in their conditions or obligations could not reference one or more permission sets that contain resources of multiple types.
  Action: Split the policy to reference only one resource type in each policy.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10528: The Policy {0} referenced multiple resource types and resource attribute is used in policy condition or obligation.
  Cause: Policies that used resource attributes in their conditions or obligations could not reference one or more permission sets that contain resources of multiple types.
  Action: Split the policy to reference only one resource type in each policy.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10528: The Policy {0} referenced multiple resource types and resource attribute is used in policy condition or obligation.
  Cause: Policies that used resource attributes in their conditions or obligations could not reference one or more permission sets that contain resources of multiple types.
  Action: Split the policy to reference only one resource type in each policy.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10529: The resource attribute {0} used in policy condition or obligation is invalid resource attribute of type {1}.
Cause: The resource attribute used in policy condition was invalid for the referenced resource type
Action: Fix the policy condition to use only valid attributes for the given resource type.
Level: 1
Type: WARNING
Impact: Security

JPS-10529: The resource attribute \{0\} used in policy condition or obligation is invalid resource attribute of type \{1\}.
Cause: The resource attribute used in policy condition was invalid for the referenced resource type
Action: Fix the policy condition to use only valid attributes for the given resource type.
Level: 1
Type: WARNING
Impact: Security

JPS-10530: Cannot create a policy \{0\} with AdminRole(s) \{1\}.
Cause: Cannot create a policy with AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.
Level: 1
Type: WARNING
Impact: Security

JPS-10530: Cannot create a policy \{0\} with AdminRole(s) \{1\}.
Cause: Cannot create a policy with AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.
Level: 1
Type: WARNING
Impact: Security

JPS-10530: Cannot create a policy \{0\} with AdminRole(s) \{1\}.
Cause: Cannot create a policy with AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.
Level: 1
Type: WARNING
Impact: Security

JPS-10531: Cannot grant permission to AdminRole(s) {0}.
Cause: Cannot grant permission to AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.

Level: 1
Type: WARNING
Impact: Security

JPS-10531: Cannot grant permission to AdminRole(s) {0}.
Cause: Cannot grant permission to AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.

Level: 1
Type: WARNING
Impact: Security

JPS-10531: Cannot grant AdminRole {0} to another AdminRole {1}.
Cause: Cannot grant AdminRole to another AdminRole.
Action: Change to grant AdminRole to either enterprise role or user.

Level: 1
Type: WARNING
Impact: Security

JPS-10532: Cannot grant AdminRole {0} to another AdminRole {1}.
Cause: Cannot grant AdminRole to another AdminRole.
Action: Change to grant AdminRole to either enterprise role or user.

Level: 1
Type: WARNING
Impact: Security

JPS-10532: Cannot grant AdminRole {0} to another AdminRole {1}.
Cause: Cannot grant AdminRole to another AdminRole.
Action: Change to grant AdminRole to either enterprise role or user.

Level: 1
Type: WARNING
Impact: Security

JPS-10532: Cannot grant AdminRole {0} to another AdminRole {1}.
Cause: Cannot grant AdminRole to another AdminRole.
Action: Change to grant AdminRole to either enterprise role or user.

Level: 1
Type: WARNING
Impact: Security

JPS-10533: Cannot revoke AdminRole {0} from another AdminRole {1}.
Cause: Cannot revoke AdminRole from another AdminRole.
Action: Change to revoke AdminRole from either enterprise role or user.
Level: 1
Type: WARNING
Impact: Security

JPS-10534: Cannot grant AdminRole {0} to an AppRole {1}.
Cause: Cannot grant AdminRole to an AppRole.
Action: Change to grant AdminRole to either enterprise role or user.
Level: 1
Type: WARNING
Impact: Security

JPS-10535: Cannot revoke AdminRole {0} from an AppRole {1}.
Cause: Cannot revoke AdminRole from an AppRole.
Action: Change to revoke AdminRole from either enterprise role or user.

Level: 1
Type: WARNING
Impact: Security

JPS-10535: Cannot revoke AdminRole {0} from an AppRole {1}.
Cause: Cannot revoke AdminRole from an AppRole.
Action: Change to revoke AdminRole from either enterprise role or user.

Level: 1
Type: WARNING
Impact: Security

JPS-10535: Cannot revoke AdminRole {0} from an AppRole {1}.
Cause: Cannot revoke AdminRole from an AppRole.
Action: Change to revoke AdminRole from either enterprise role or user.

Level: 1
Type: WARNING
Impact: Security

JPS-10536: AdminRole {0} cannot be managed outside of the AdminManager.
Cause: AdminRole cannot be managed outside of AdminManager.
Action: Use AdminManager for all AdminRole related administrative tasks.

Level: 1
Type: WARNING
Impact: Security

JPS-10536: AdminRole {0} cannot be managed outside of the AdminManager.
Cause: AdminRole cannot be managed outside of AdminManager.
Action: Use AdminManager for all AdminRole related administrative tasks.

Level: 1
Type: WARNING
Impact: Security

JPS-10536: AdminRole {0} cannot be managed outside of the AdminManager.
Cause: AdminRole cannot be managed outside of AdminManager.
Action: Use AdminManager for all AdminRole related administrative tasks.

Level: 1
Type: WARNING
Impact: Security

JPS-10537: Cannot modify grant permission to AdminRole(s) {0}.
Cause: Cannot modify grant permission to AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.
Level: 1
Type: WARNING
Impact: Security

JPS-10537: Cannot modify grant permission to AdminRole(s) {0}.
Cause: Cannot modify grant permission to AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.

Level: 1
Type: WARNING
Impact: Security

JPS-10537: Cannot modify grant permission to AdminRole(s) {0}.
Cause: Cannot modify grant permission to AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.

Level: 1
Type: WARNING
Impact: Security

JPS-10538: Cannot revoke permission from AdminRole(s) {0}.
Cause: Cannot revoke permission from AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.

Level: 1
Type: WARNING
Impact: Security

JPS-10538: Cannot revoke permission from AdminRole(s) {0}.
Cause: Cannot revoke permission from AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.

Level: 1
Type: WARNING
Impact: Security

JPS-10538: Cannot revoke permission from AdminRole(s) {0}.
Cause: Cannot revoke permission from AdminRoleEntry(s).
Action: Remove the AdminRole principals from the principal list.

Level: 1
Type: WARNING
Impact: Security

JPS-10539: Basic policy cannot have {0} information.
Cause: Basic policy cannot have {0} information.
Action: Remove the information from basic policy.

Level: 1
Type: WARNING
Impact: Security

JPS-10539: Basic policy cannot have {0} information.
  Cause: Basic policy cannot have {0} information.
  Action: Remove the information from basic policy.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10540: Basic policy cannot have ResourceActionsEntry without ResourceEntry.
  Cause: Basic policy cannot have ResourceActionsEntry without ResourceEntry.
  Action: Use ResourceActionsEntry with ResourceEntry for basic policy.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10541: Basic policy cannot use Resource {0} without Resource Matcher Class.
  Cause: Basic policy cannot use Resource {0} without Resource Matcher Class.
  Action: Use Resource with Resource Matcher Class for basic policy.
  Level: 1
  Type: WARNING
  Impact: Security
Cause: Basic policy cannot use Resource {0} without Resource Matcher Class.
Action: Use Resource with Resource Matcher Class for basic policy.
Level: 1
Type: WARNING
Impact: Security

JPS-10541: Basic policy cannot use Resource {0} without Resource Matcher Class.
Cause: Basic policy cannot use Resource {0} without Resource Matcher Class.
Action: Use Resource with Resource Matcher Class for basic policy.
Level: 1
Type: WARNING
Impact: Security

JPS-10542: Default TransformerFactory cannot be located.
Cause: The TransformerFactory cannot be loaded
Action: Check the environment
Level: 1
Type: WARNING
Impact: Security

JPS-10542: Default TransformerFactory cannot be located.
Cause: The TransformerFactory cannot be loaded
Action: Check the environment
Level: 1
Type: WARNING
Impact: Security

JPS-10543: Failed to retrieve Transformer.
Cause: The TransformerFactory cannot generate a Transformer.
Action: Check the environment
Level: 1
Type: WARNING
Impact: Security

JPS-10543: Failed to retrieve Transformer.
Cause: The TransformerFactory cannot generate a Transformer.
Action: Check the environment
Level: 1
Type: WARNING
Impact: Security

JPS-10543: Failed to retrieve Transformer.
Cause: The TransformerFactory cannot generate a Transformer.
Action: Check the environment

Level: 1
Type: WARNING
Impact: Security

JPS-10544: The policy "[0]" already exists.
Cause: The role policy object exists.
Action: Create a role policy with a different name.

Level: 1
Type: WARNING
Impact: Security

JPS-10544: The policy, [0], exists.
Cause: The role policy object exists.
Action: Create a role policy with a different name.

Level: 1
Type: WARNING
Impact: Security

JPS-10544: The policy, [0], exists.
Cause: The role policy object exists.
Action: Create a role policy with a different name.

Level: 1
Type: WARNING
Impact: Security

JPS-10545: The application role [0] could not be added since it already exists.
Cause: The application role could not be added since it already exists.
Action: Remove duplicate application role.

Level: 1
Type: WARNING
Impact: Security

JPS-10545: The application role [0] could not be added since it already exists.
Cause: The application role could not be added since it already exists.
Action: Remove duplicate application role.

Level: 1
Type: WARNING
Impact: Security
JPS-10545: The application role {0} could not be added since it already exists.
   Cause: The application role could not be added since it already exists.
   Action: Remove duplicate application role.
   Level: 1
   Type: WARNING
Impact: Security
JPS-10546: The resource {0}, {1} could not be added since it already exists.
   Cause: The resource could not be added since it already exists.
   Action: Remove duplicate resource.
   Level: 1
   Type: WARNING
Impact: Security
JPS-10546: The resource {0}, {1} could not be added since it already exists.
   Cause: The resource could not be added since it already exists.
   Action: Remove duplicate resource.
   Level: 1
   Type: WARNING
Impact: Security
JPS-10547: The resource name expression {0}, {1} could not be added since it already exists.
   Cause: The resource name expression could not be added since it already exists.
   Action: Remove duplicate resource name expression.
   Level: 1
   Type: WARNING
Impact: Security
JPS-10547: The resource name expression {0}, {1} could not be added since it already exists.
   Cause: The resource name expression could not be added since it already exists.
   Action: Remove duplicate resource name expression.
   Level: 1
   Type: WARNING
Impact: Security

JPS-10547: The resource name expression {0}, {1} could not be added since it already exists.
Cause: The resource name expression could not be added since it already exists.
Action: Remove duplicate resource name expression.
Level: 1
Type: WARNING
Impact: Security

JPS-10548: The policy rule {0} already exists.
Cause: The policy rule already exists.
Action: Create policy rule with different name.
Level: 1
Type: WARNING
Impact: Security

JPS-10548: The policy rule {0} already exists.
Cause: The policy rule already exists.
Action: Create policy rule with different name.
Level: 1
Type: WARNING
Impact: Security

JPS-10548: The policy rule {0} already exists.
Cause: The policy rule already exists.
Action: Create policy rule with different name.
Level: 1
Type: WARNING
Impact: Security

JPS-10549: The policy rule {0} is in use, could not be deleted.
Cause: The policy rule could not be deleted without cascade since it is in use.
Action: Cascade delete it or first remove all referring objects.
Level: 1
Type: WARNING
Impact: Security

JPS-10550: Attribute "{0}" already exists
Cause: Cannot have two attributes with the same name.
Action: Provide a new name to the attribute.
Level: 1
Type: WARNING
Impact: Security
JPS-10550: Attribute [0] already exists
  Cause: Cannot have two attributes with the same name.
  Action: Provide a new name to the attribute.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10550: Attribute [0] already exists
  Cause: Cannot have two attributes with the same name.
  Action: Provide a new name to the attribute.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10551: Attribute [0] does not exist
  Cause: Attribute not found.
  Action: Check the attribute name.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10551: Attribute [0] does not exist
  Cause: Attribute not found.
  Action: Check the attribute name.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10551: Attribute [0] does not exist
  Cause: Attribute not found.
  Action: Check the attribute name.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10552: Attribute [0] is used.
  Cause: Attribute is already used.
  Action: Remove the objects which use this attribute.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10552: Attribute [0] is used.
  Cause: Attribute is already used.
**Action:** Remove the objects which use this attribute.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10552: Attribute [0] is used.**  
**Cause:** Attribute is already used.  
**Action:** Remove the objects which use this attribute.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10553: Attribute [0] does not belong to current application.**  
**Cause:** Attribute does not belong to current application policy.  
**Action:** Modify the attribute with extension manager from correct application policy.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10553: Attribute [0] does not belong to current application.**  
**Cause:** Attribute does not belong to current application policy.  
**Action:** Modify the attribute with extension manager from correct application policy.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10553: Attribute [0] does not belong to current application.**  
**Cause:** Attribute does not belong to current application policy.  
**Action:** Modify the attribute with extension manager from correct application policy.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10554: The name of Attribute in policy repository is missing**  
**Cause:** Attribute in policy store has no name.  
**Action:** Check the underline policy repository.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10554: The name of Attribute in policy repository is missing**  
**Cause:** Attribute in policy store has no name.
Action: Check the underline policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10554: The name of Attribute in policy repository is missing
Cause: Attribute in policy store has no name.
Action: Check the underline policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10555: The type of Attribute in policy repository is missing
Cause: Attribute in policy store has no type.
Action: Check the underline policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10555: The type of Attribute in policy repository is missing
Cause: Attribute in policy store has no type.
Action: Check the underline policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10555: The type of Attribute in policy repository is missing
Cause: Attribute in policy store has no type.
Action: Check the underline policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10556: The category of Attribute in policy repository is missing
Cause: Attribute in policy store has no category.
Action: Check the underline policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10556: The category of Attribute in policy repository is missing
Cause: Attribute in policy store has no category.
Action: Check the underline policy repository.
Level: 1
Type: WARNING
Impact: Security

JPS-10556: The category of Attribute in policy repository is missing
Cause: Attribute in policy store has no category.
Action: Check the underline policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10557: Cannot overwrite a built-in attribute, {0}.
Cause: Try to overwrite a built-in attribute.
Action: Do not overwrite a built-in function.

Level: 1
Type: WARNING
Impact: Security

JPS-10558: Cannot modify a built-in attribute, {0}.
Cause: Try to modify a built-in attribute.
Action: Do not modify a built-in attribute.
Impact: Security

JPS-10558: Cannot modify a built-in attribute, {0}.
Cause: Try to modify a built-in attribute.
Action: Do not modify a built-in attribute.
Level: 1
Type: WARNING
Impact: Security

JPS-10559: Cannot delete a built-in attribute, {0}.
Cause: Try to delete a built-in attribute.
Action: Do not delete a built-in attribute.
Level: 1
Type: WARNING
Impact: Security

JPS-10559: Cannot delete a built-in attribute, {0}.
Cause: Try to delete a built-in attribute.
Action: Do not delete a built-in attribute.
Level: 1
Type: WARNING
Impact: Security

JPS-10559: Cannot delete a built-in attribute, {0}.
Cause: Try to delete a built-in attribute.
Action: Do not delete a built-in attribute.
Level: 1
Type: WARNING
Impact: Security

JPS-10581: Cannot overwrite a built-in function, {0}.
Cause: Try to overwrite a built-in function.
Action: Do not overwrite a built-in function.
Level: 1
Type: WARNING
Impact: Security

JPS-10581: Cannot overwrite a built-in function, {0}.
Cause: Try to overwrite a built-in function.
Action: Do not overwrite a built-in function.
Level: 1
Type: WARNING
Impact: Security

JPS-10581: Cannot overwrite a built-in function, {0}.
Cause: Try to overwrite a built-in function.
Action: Do not overwrite a built-in function.
Level: 1
Type: WARNING
Impact: Security
JPS-10582: The function does not exist, {0}.
Cause: The function does not exist.
Action: Check the function name passed in.
Level: 1
Type: WARNING
Impact: Security
JPS-10582: The function does not exist, {0}.
Cause: The function does not exist.

Impact: Security

JPS-10587: Cannot delete a built-in function, {0}.
Cause: Try to delete a built-in function.
Action: Do not delete a built-in function.

Level: 1
Type: WARNING
Impact: Security

JPS-10587: Cannot delete a built-in function, {0}.
Cause: Try to delete a built-in function.
Action: Do not delete a built-in function.

Level: 1
Type: WARNING
Impact: Security

JPS-10587: Cannot delete a built-in function, {0}.
Cause: Try to delete a built-in function.
Action: Do not delete a built-in function.
Level: 1
Type: WARNING
Impact: Security

JPS-10588: The function "[0]" already exists.
Cause: The function exists.
Action: Create a function with a different name.

Level: 1
Type: WARNING
Impact: Security

JPS-10588: The function already exists, [0].
Cause: The function exists.
Action: Create a function with a different name.

Level: 1
Type: WARNING
Impact: Security

JPS-10588: The function already exists, [0].
Cause: The function exists.
Action: Create a function with a different name.

Level: 1
Type: WARNING
Impact: Security

JPS-10589: Cascade delete is not supported.
Cause: Cascade delete not supported.
Action: Set the cascade delete parameter to false.

Level: 1
Type: WARNING
Impact: Security

JPS-10589: Cascade delete is not supported.
Cause: Cascade delete not supported.
Action: Set the cascade delete parameter to false.

Level: 1
Type: WARNING
Impact: Security

JPS-10589: Cascade delete is not supported.
Cause: Cascade delete not supported.
Action: Set the cascade delete parameter to false.

Level: 1
Type: WARNING
Impact: Security

JPS-10590: Cannot find the function entry for function name {0}.
Caused: Cannot find the function entry for function name.
Action: Check function entry in policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10591: Cannot find the expression type for expression {0}.
Caused: Cannot find the expression type for the expression.
Action: Check expression in policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10592: Operation {1} is not allowed for multi valued attribute {0}
Cause: The category of Attribute is Invalid.
Action: The category of Attribute is Invalid. Supply a valid Attribute category
Level: 1
Type: WARNING
Impact: Security

JPS-10592: Operation {1} is not allowed for multi valued attribute {0}
Cause: The category of Attribute is Invalid.

JPS-11000: Policy Set member with type: "{0}" and name "{1}" does not exist

Cause: The policy set member does not exist in policy store
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-11001: Can not delete policy set "{0}" which is referred by other policy set

Cause: The policy set to be deleted is referred by other policy set
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-11002: Policy set dependency loop could be introduced by modifyPolicySet operation

Cause: The policy set dependency could be introduced by modifyPolicySet operation
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

**JPS-11003: Policy set "[0]" does not exist**
- **Cause:** The policy set entry with specified name does not exist in policy store
- **Action:** Refer to the log files for details.

**Level:** 1

Type: ERROR
Impact: Security

**JPS-11004: Multiple principal entries provided have principal constraint**
- **Cause:** Multiple principal entries have principal constraint
- **Action:** Refer to the log files for details.

**Level:** 1

Type: ERROR
Impact: Security

**JPS-11005: Can not add AllResource to permission set: "[0]"**
- **Cause:** Adding AllResource to Permission set is not supported
- **Action:** Refer to the log files for details.

**Level:** 1

Type: ERROR
Impact: Security

**JPS-11006: Adding [0] combiner parameters for [0] "[1]" not referred in this policy set**
- **Cause:** Adding policy or policy set combiner parameters for policy or policy set not referred in this policy set
- **Action:** Refer to the log files for details.

**Level:** 1

Type: ERROR
Impact: Security

**JPS-11007: Can not add codesource, principals, resource actions or permission sets to [0]: "[1]" which has XACML3 target**
- **Cause:** Adding codesource, principals, resource actions or permission sets to policy, policy set or rule which has XACML3 target
- **Action:** Refer to the log files for details.

**Level:** 1

Type: ERROR
Impact: Security

**JPS-11008: Can not add XACML3 target to [0]: "[1]" which has codesource, principals, resource actions or permission sets**
- **Cause:** Adding XACML3 target to policy, policy set or rule which has codesource, principals, resource actions or permission sets
- **Action:** Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-11009: Policy set "(0)" already exists
Cause: The policy set entry with specified name already exists in the policy store
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-12000: No such Configuration Profile "(0)" exists in the system.
Cause: The specified configuration profile is not registered with configuration service.
Action: Check the name, or try listing the registered profiles.

Level: 1
Type: ERROR
Impact: Configuration

JPS-12001: Cannot create ContextConfiguration, A JPS Context with name "(0)"
already exists in the system.
Cause: A jpsContext with the specified contextId exists in the system.
Action: Use another unique contextId.

Level: 1
Type: ERROR
Impact: Configuration

JPS-12002: Could not Construct the ConfigurationManagementService:
Configuration Context Descriptor NOT FOUND in jps-config.xml or specifies
an invalid Configuration serviceInstance descriptor.
Cause: A jpsContext by the name "ConfigContext" that references a Configuration Service Instance Descriptor is missing from jps-config.xml.
Action: Check the MultiTenancy Enablement steps and/or scripts.

Level: 1
Type: ERROR
Impact: Configuration

JPS-12003: Could not Construct ConfigurationManagementService from its
Descriptor in jps-config.xml, due to empty/missing configuration data in the Descriptor.
Cause: The configuration jpsContext does seem to contain a <serviceInstanceRef>
pointing to the ConfigurationManagementService instance descriptor.
Action: Check the MultiTenancy Enablement steps and/or scripts.

Level: 1
Type: ERROR
Impact: Configuration

JPS-12004: No such JpsContext "{0}" exists in jps-config.xml.
   Cause: A jpsContext with the specified contextId does not exists in the system.
   Action: Check jps-config.xml of the domain.
   Level: 1
   Type: ERROR

Impact: Configuration

JPS-12005: A ContextConfiguration with "{0}" "{1}" already exists in the system.
   Cause: A ContextConfiguration with the specified name already exists.
   Action: Use another unique name.
   Level: 1
   Type: ERROR

Impact: Data

JPS-12006: No Registered ContextConfiguration with "{0}" "{1}" exists in the system.
   Cause: The specified configuration profile is not registered with configuration service.
   Action: Check the name, or try listing the registered profiles.
   Level: 1
   Type: ERROR

Impact: Data

JPS-12007: Cannot delete ContextConfiguration "{0}" in "{1}" state.
   Cause: A ContextConfiguration in ACTIVE state cannot be deleted.
   Action: DeActivate the context and then try deleting it.
   Level: 1
   Type: ERROR

Impact: Data

JPS-12008: Cannot DeActivate ContextConfiguration "{0}" as it is in state "{1}".
   Cause: A ContextConfiguration ACTIVE state (only) can be DeActivated. DeActivation from other states is illegal.
   Action: Make sure the context configuration is ACTIVE and then try deactivating it.
   Level: 1
   Type: ERROR

Impact: Data

JPS-12009: Cannot Activate ContextConfiguration "{0}" as it is in state "{1}".
   Cause: A ContextConfiguration must be in COMPLETE or INACTIVE state for Activation to succeed.
   Action: Check to make sure the state of the Context is COMPLETE or INACTIVE.
   Level: 1
Type: ERROR
Impact: Data

JPS-12010: Cannot Update ContextConfiguration "[0]" as it is in state "[1]".
  Cause: A ContextConfiguration must be in CREATED or INACTIVE state before it can be UPDATED.
  Action: Check to make sure the state of the Context is CREATED or INACTIVE. A configuration in COMPLETE or ACTIVE states cannot be updated

Level: 1
Type: ERROR
Impact: Data

JPS-12011: OPSS Runtime Cannot fetch Configuration for context "[0]", The context does not exist or is not in ACTIVE state.
  Cause: OPSS Runtime failed to fetch the Configuration for the context. Either the context does not exist or is not in ACTIVE state. The Runtime can only view ContextConfigurations in ACTIVE state
  Action: Check to make sure the Context exists and is in ACTIVE state.

Level: 1
Type: ERROR
Impact: Data

JPS-12012: Cannot initialize Configuration Store : One of DataSource/JDBC-URL/FilePath for MetaDataStore should be Configured in the Configuration Service Descriptor.
  Cause: The configuration serviceInstance descriptor does not seem to contain a property for DataSource/JDBC-URL/FilePath for connecting to the Configuration Store.
  Action: Check MultiTenancy enablement steps/scripts.

Level: 1
Type: ERROR
Impact: Configuration

JPS-12013: File based Configuration Store should be used only for Development and not in Production.
  Cause: File based Configuration Store should be used only for Testing and not in Production.
  Action: Nothing to do if this is a Test Environment, else check Multi-Tenancy enablement steps.

Level: 1
Type: WARNING
Impact: Configuration

JPS-12014: Map/Key name(s) for Credential required to bind to MetaDataStore with JDBC-URL not configured in the Configuration Service.
  Cause: A Password Credential is required when JDBC-URL is used to connect to the Configuration Store.
**Action:** Check to see that the Configuration serviceInstance descriptor contains properties for the Map and Key name of the credential.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**JPS-12015: Property JPS_CONFIG_PATH not set for use by PersistenceManager.**  
**Cause:** Internal Error/Bug: The Configuration Management Service is expected to set a property JPS_CONFIGSERVICE.PATH for use by the PersistenceManager.  
**Action:** Report Bug on Oracle OPSS with relevant logs.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**JPS-12016: Internal Error: Unable to locate ContextConfiguration named "[0]" in the Configuration Profile "[1]".**  
**Cause:** Internal Error/Bug: The Configuration Service is in a state where it thinks the specified contextId should exist under the specified profileId, but the persisted information in the store does not match the expectation.  
**Action:** Report Bug on Oracle OPSS with relevant logs.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**JPS-12017: Invalid Customization expression, specified XPath "[0]" does not evaluate to a "[1]".**  
**Cause:** The XPath expression specified in Customization spec does not point to the intended element in the Configuration Profile document.  
**Action:** Check the XPath expression against the structure of the configuration Profile being referenced.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**JPS-12018: Invalid Location Override Customization in Global Scope. Location Customization can be specified for ServiceInstances only.**  
**Cause:** The Location Override in Customization spec is only applicable to a serviceInstance attribute and cannot be applied to an element in Global Scope.  
**Action:** Check the XPath expression.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**JPS-12019: Cannot apply "[0]" overrides on element of type "[1]", expected an element of type "[2]", check the Element XPath specified in the customization.**
Cause: The XPath expression specified in Customization spec does not point to the intended element in the Configuration Profile document.

Action: Check the XPath expression against the structure of the configuration Profile being referenced.

Level: 1
Type: ERROR
Impact: Data

JPS-12020: Cannot modify values of existing ExtendedProperty elements during customization.

Cause: Cannot modify values of existing ExtendedProperty elements during customization.

Action: This is an Unsupported Customization spec, change the customization instructions supplied to the Configuration Management Service.

Level: 1
Type: WARNING
Impact: Data

JPS-12021: Cannot create ContextConfiguration "[0]", No such profile "[1]" exists in the system.

Cause: Cannot create ContextConfiguration as the referenced Configuration Profile does not seem to exist.

Action: Check the name of the specified profile.

Level: 1
Type: ERROR
Impact: Data

JPS-12022: MetaDataObject "[0]" not found. Ensure ContextConfiguration "[1]" exists or first create it.

Cause: The PersistenceManager is unable to find the MetaDataObject corresponding to the specified contextId.

Action: Check the name of the context or make sure it is registered with the Configuration Service.

Level: 1
Type: ERROR
Impact: Configuration

JPS-12023: Mutable MetadataObject "[0]" cannot be obtained from MetadataStore specified since there are pending writes to other MetadataStores. Do flushChanges/cancelChanges on MDSSession to proceed.

Cause: Internal Error/Bug: The persistence manager is in a state where it is trying to perform multiple updates to the profile document concurrently.

Action: Report a Bug on Oracle OPSS with relevant logs.

Level: 1
Type: ERROR
Impact: Process
JPS-12024: A profile with name "{0}" already exists.
   Cause: A configuration profile with the given name already exists.
   Action: Try using a unique profileId.
   Level: 1
   Type: ERROR
   Impact: Data

JPS-12025: Cannot Delete Profile "{0}",Named ContextConfigurations exist under the profile.
   Cause: A configuration profile which has named ContextConfiguration's referencing it cannot be deleted.
   Action: Try deleting the ContextConfiguration's before attempting to delete the profile.
   Level: 1
   Type: ERROR
   Impact: Data

JPS-12026: No such ContextConfiguration "{0}" exists in the system.
   Cause: The specified ContextConfiguration is not registered with the Configuration Service.
   Action: Check the name or try listing the registered ContextConfigurations.
   Level: 1
   Type: ERROR
   Impact: Data

JPS-12027: Required PasswordCredential at Map = "{0}",Key = "{1}" was not found in Specified Bootstrap CredentialStore.
   Cause: A required PasswordCredential does not exist at the specified map, and key in the supplied bootstrap credential store.
   Action: Check the bootstrap credential store.
   Level: 1
   Type: ERROR
   Impact: Configuration

JPS-12028: Malformed jps-config.xml : stale service instance reference "{0}" from JpsContext.
   Cause: The PersistenceManager found a STALE <serviceInstanceRef> that does not exist in the jps-config.xml.
   Action: Check the jps-config.xml of the Profile or the Out-of-the-Box jps-config.xml as appropriate.
   Level: 1
   Type: ERROR
   Impact: Configuration

JPS-12029: Cannot set Name for ContextConfiguration "{0}" in state "{1}", deactivate it first.
Cause: Cannot set contextName for a ContextConfiguration in ACTIVE.
Action: DeActivate it first and then set a Name for it.

Level: 1
Type: ERROR
Impact: Data

JPS-12030: Cannot setContextName, ConfigurationContext "[0]" is already Named "[1]", unset the Name first.
Cause: A ContextConfiguration that is already has a Name cannot be Named again.
Action: Unset the current Name first and then set a new Name for it.

Level: 1
Type: ERROR
Impact: Data

JPS-12031: Cannot unset Name for ContextConfiguration "[0]" in state "[1]", deactivate it first.
Cause: Cannot unset the contextName for a ContextConfiguration in ACTIVE state.
Action: DeActivate the Context first and then unset the contextName.

Level: 1
Type: ERROR
Impact: Data

JPS-12032: Error in initializing JAXBContext.
Cause: Internal Error: JAXB context initialization in PersistenceManager Failed.
Action: Report a Bug on Oracle OPSS with relevant logs.

Level: 1
Type: ERROR
Impact: Configuration

JPS-12033: Invalid profile jps-config.xml document, does not contain a required element "[0]".
Cause: Internal Error: the profile document does not contain a mandatory element.
Action: Check the jps-config.xml that was used as a Configuration Profile.

Level: 1
Type: ERROR
Impact: Configuration

JPS-12034: MDSPersistenceManager Cannot handle Persistence of Element "[0]".
Cause: Unsupported operation: The persistence manager configured with the Configuration Service does not handle persistence of the specified element.
Action: Report a Bug on Oracle OPSS with relevant logs.

Level: 1
JPS-12035: Cannot setContextName for ConfigurationContext "{0}" to Name "{1}", as the Name is already assigned to "{2}".
Cause: Names used for ContextConfiguration must be unique, an attempt is being made to set the same Name for more than one ContextConfiguration.
Action: Use a different unique Name.
Level: 1

JPS-12036: ContextConfiguration "{0}" does not have any name set for it, Naming a ContextConfiguration is mandatory before its configuration STATE can be set to COMPLETE.
Cause: An attempt is being made to set the STATE of an Un-Named ContextConfiguration to COMPLETE.
Action: Use the setContextName(contextId) method to set a Name.
Level: 1

JPS-12037: Service configuration update done for Configurator.
Cause: Service configuration update done for Configurator.
Action: No action required.
Level: 1

JPS-12038: Failed to check if audit is enabled.
Cause: Configuration management events logging was not enabled.
Action: Check the audit configuration to ensure auditing enabled.
Level: 1

JPS-12039: Failed to log audit record.
Cause: Configuration management audit event logging failed.
Action: Contact the administrator.
Level: 1

JPS-12100: The expiry time should be in format {0}
Cause: Invalid input
Action: Correct the input.
Level: 1
Type: WARNING
Impact: Configuration

JPS-12101: The filter value is {0} invalid
Cause: Invalid input
Action: Correct the input.

Level: 1
Type: WARNING
Impact: Configuration

JPS-12102: One of the attributes {0} is undefined
Cause: Invalid input
Action: Correct the input.

Level: 1
Type: WARNING
Impact: Configuration

JPS-12103: Parameter {0} is missing
Cause: Missing Parameter
Action: Correct the input.

Level: 1
Type: WARNING
Impact: Configuration

JPS-12104: Alias {0} did not exist or point to a key
Cause: Alias did not exist or point to a key
Action: Correct the input Alias.

Level: 1
Type: WARNING
Impact: Configuration

JPS-20000: GlobalPolicy can not be created by MAPI methods
Cause: GlobalPolicy can not be created by MAPI methods.
Action: Set up policy store using reassociation or upgrading

Level: 1
Type: WARNING
Impact: Programmatic

JPS-20000: GlobalPolicy can not be created by MAPI methods
Cause: GlobalPolicy can not be created by MAPI methods.
Action: Set up policy store using reassociation or upgrading

Level: 1
Type: WARNING
Impact: Programmatic

JPS-20000: GlobalPolicy can not be created by MAPI methods
Cause: GlobalPolicy can not be created by MAPI methods.
Action: Set up policy store using reassociation or upgrading

Level: 1
Type: WARNING

Impact: Programmatic

JPS-20001: GlobalPolicy can not be deleted by MAPI methods.
Cause: GlobalPolicy can not be deleted by MAPI methods.
Action: GlobalPolicy is a built-in stripe, can not be deleted

Level: 1
Type: WARNING

Impact: Programmatic

JPS-20001: GlobalPolicy can not be deleted by MAPI methods.
Cause: GlobalPolicy can not be deleted by MAPI methods.
Action: GlobalPolicy is a built-in stripe, can not be deleted

Level: 1
Type: WARNING

Impact: Programmatic

JPS-20002: GlobalPolicy can not be returned from the method.
Cause: GlobalPolicy can not be returned from the method.
Action: Gets GlobalPolicy from the method getGlobalPolicy

Level: 1
Type: WARNING

Impact: Programmatic

JPS-20002: GlobalPolicy can not be returned from the method.
Cause: GlobalPolicy can not be returned from the method.
Action: Gets GlobalPolicy from the method getGlobalPolicy

Level: 1
Type: WARNING

Impact: Programmatic

JPS-20002: GlobalPolicy can not be returned from the method.
Cause: GlobalPolicy can not be returned from the method.
Action: Gets GlobalPolicy from the method getGlobalPolicy

Level: 1
Type: WARNING
Impact: Programmatic

JPS-20003: Cannot add global role to application role
Causes: Attempted to add a global role {0} to members of an application role or grant a global role {0} to an application role
Action: Do not add a global role to members of an application role and do not grant a global role to an application role.

Level: 1
Type: WARNING
Impact: Security

JPS-20004: Principals can not contain global role.
Causes: Principals contain global role {0}
Action: Remove global role from principals.

Level: 1
Type: WARNING
Impact: Security

JPS-20005: Cannot delete global role "{0}".
Causes: Global role "{0}" is referenced in a Policy defined in an Application.
Action: Make sure the global role is not referenced in any application policy, then remove it.

Level: 1
Type: WARNING
Impact: Security

JPS-20006: Authorization policy is not supported in global policy.
Causes: Authorization policy is not supported in global policy.
Action: Do not create authorization policies in global policy.

Level: 1
Type: WARNING
Impact: Security

JPS-20007: Permission grant is not supported in global policy.
Causes: Permission grant is not supported in global policy.
Action: Do not grant permissions in global policy

Level: 1
Type: WARNING
Impact: Security
JPS-20008: {0} : {1} in global policy which are referenced in application have been changed but not distributed.
  Cause: {0} : {1} in global policy which are referenced in application have been changed but not distributed.
  Action: Distribute global policy firstly

Level: 1
Type: WARNING
Impact: Security

JPS-20010: Attribute name {0} already exist in {1}.
  Cause: Attribute name {0} already exist in {1}
  Action: Choose another name

Impact: Programmatic

JPS-20011: Function name {0} already exist in {1}.
  Cause: Function name {0} already exist in {1}
  Action: Choose another name

Level: 1
Type: WARNING
Impact: Programmatic

JPS-20012: Global attribute {0} is used in application {1}.
  Cause: Global attribute {0} is used in application policy {1}
  Action: Make sure the global attribute is not used in any applications including global policy

Level: 1
Type: WARNING
Impact: Programmatic

JPS-20013: Global function {0} is used in application {1}.
  Cause: Global function {0} is used in application policy {1}
  Action: Make sure the global function is not used in any applications including global policy

Level: 1
Type: WARNING
Impact: Programmatic

JPS-20014: Policy domain is not supported in global policy
  Cause: Policy domain is not supported in global policy.
  Action: Do not use policy domain in global policy

Level: 1
Type: WARNING
Impact: Security

JPS-20020: Resource type name {0} already exists in application {1}.
Cause: Resource type name {0} already exists in application {1}
Action: Choose another name

Level: 1
Type: WARNING
Impact: Programmatic

JPS-20021: Global resource type {0} is used in application {1}.
Cause: Resource type {0} is used in application {1}
Action: Make sure global resource type is not used in any application

Level: 1
Type: WARNING
Impact: Programmatic

JPS-20022: Global policy can not be unbound from SM
Cause: Global policy can not be unbound from SM
Action: Do not unbind global policy from SM

Level: 1
Type: WARNING
Impact: Programmatic

JPS-20050: Combining algorithm {0} not found.
Cause: Combining algorithm not found.
Action: Make sure the used combining algorithm exists.

Level: 1
Type: WARNING
Impact: Programmatic

JPS-20051: Exception in converting execution frequency {0}, message is {1}
**Cause:** Exception in converting value of algorithm execution frequency.
**Action:** Make sure the execution frequency is valid.

**Level:** 1
**Type:** WARNING
**Impact:** Programmatic

**JPS-20051:** Exception in converting execution frequency {0}, message is {1}

**Cause:** Exception in converting value of algorithm execution frequency.
**Action:** Make sure the execution frequency is valid.

**Level:** 1
**Type:** WARNING
**Impact:** Programmatic

**JPS-20051:** Exception in converting execution frequency {0}, message is {1}

**Cause:** Exception in converting value of algorithm execution frequency.
**Action:** Make sure the execution frequency is valid.

**Level:** 1
**Type:** WARNING
**Impact:** Programmatic

**JPS-20052:** Exception in converting algorithm usage {0}, message is {1}

**Cause:** Exception in converting value of algorithm usage.
**Action:** Make sure the usage is valid.

**Level:** 1
**Type:** WARNING
**Impact:** Programmatic

**JPS-20052:** Exception in converting algorithm usage {0}, message is {1}

**Cause:** Exception in converting value of algorithm usage.
**Action:** Make sure the usage is valid.

**Level:** 1
**Type:** WARNING
**Impact:** Programmatic

**JPS-20052:** Exception in converting algorithm usage {0}, message is {1}

**Cause:** Exception in converting value of algorithm usage.
**Action:** Make sure the usage is valid.

**Level:** 1
**Type:** WARNING
**Impact:** Programmatic

**JPS-20053:** A combining algorithm must be provided if policy is using more than one rule.

**Cause:** Policy uses multiple rules, but no combining algorithm provided.
**Action:** Provide a combining algorithm.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JPS-20053:** A combining algorithm must be provided if policy is using more than one rule.  
**Cause:** Policy uses multiple rules, but no combining algorithm provided.  
**Action:** Provide a combining algorithm.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JPS-20054:** A acl match type must be provided if policy is a RAS one.  
**Cause:** RAS policy has no acl match type to be provided.  
**Action:** Provide a ACL Match Type.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JPS-20055:** A list of RAS policy rule must be provided if policy is a RAS one.  
**Cause:** RAS policy has no policy rule to be provided.  
**Action:** Provide policy rule(s).

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JPS-20056:** A list of RAS resource must be provided if policy is a RAS one.  
**Cause:** RAS policy has no resource to be provided.  
**Action:** Provide resource(s).

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**JPS-20060:** Number of input parameters to the function and provided value types for them are not of same size.
Cause: Number of input parameters to the function and provided value types for
them are not of same size.
Action: Parameter value types, if provided, must be provided for all input
parameters
Level: 1
Type: ERROR
Impact: Programmatic

JPS-20060: Number of input parameters to the function and provided value types for
them are not of same size.
Cause: Number of input parameters to the function and provided value types for
them are not of same size.
Action: Parameter value types, if provided, must be provided for all input
parameters
Level: 1
Type: ERROR
Impact: Programmatic

JPS-20061: Value collection added to expression is null.
Cause: Value collection added to expression is null.
Action: Provide a non-null collection of values to expression.
Level: 1
Type: ERROR
Impact: Programmatic

JPS-20061: Value collection added to expression is null.
Cause: Value collection added to expression is null.
Action: Provide a non-null collection of values to expression.
Level: 1
Type: ERROR
Impact: Programmatic

JPS-20061: Value collection added to expression is null.
Cause: Value collection added to expression is null.
Action: Provide a non-null collection of values to expression.
Level: 1
Type: ERROR
Impact: Programmatic

JPS-20062: Value collection passed to input parameter when a single object is expected.
Cause: Value collection passed to input parameter when a single object is expected.
Action: Provide a single object as input parameter.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-20062: Value collection passed to input parameter when a single object is expected.
Cause: Value collection passed to input parameter when a single object is expected.
Action: Provide a single object as input parameter.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-20062: Value collection passed to input parameter when a single object is expected.
Cause: Value collection passed to input parameter when a single object is expected.
Action: Provide a single object as input parameter.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-20063: Wrong type of collection passed as input parameter; expected type is {0}, provided {1}.
Cause: Wrong type of collection passed as input parameter; expected type is {0}, provided {1}.
Action: Provide correct type of collection as function input parameter.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-20063: Wrong type of collection passed as input parameter; expected type is {0}, provided {1}.
Cause: Wrong type of collection passed as input parameter; expected type is {0}, provided {1}.
Action: Provide correct type of collection as function input parameter.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-20063: Wrong type of collection passed as input parameter; expected type is \{0\}, provided \{1\}.
Cause: Wrong type of collection passed as input parameter; expected type is \{0\}, provided \{1\}.
Action: Provide correct type of collection as function input parameter.
Level: 1

Type: ERROR
Impact: Programmatic

JPS-20064: Function \{0\} is unknown.
Cause: Function \{0\} is unknown.
Action: Provide correct function.
Level: 1

Type: ERROR
Impact: Programmatic

JPS-20064: Function \{0\} is unknown.
Cause: Function \{0\} is unknown.
Action: Provide correct function.
Level: 1

Type: ERROR
Impact: Programmatic

JPS-20070: In mixed mode, PDP configuration id could not be null
Cause: PDP configuration id is missing.
Action: Specify the PDP configuration id
Level: 1

Type: WARNING
Impact: Programmatic

JPS-20070: In mixed mode, PDP configuration id could not be null
Cause: PDP configuration id is missing.
Action: Specify the PDP configuration id
Level: 1
Type: WARNING  
Impact: Programmatic  
JPS-20070: In mixed mode, PDP configuration id could not be null  
Cause: PDP configuration id is missing.  
Action: Specify the PDP configuration id  
Level: 1  
Type: WARNING  
Impact: Programmatic  
JPS-20100: Rules \{0\} for policy \{1\} is in use by other policies. It will not be deleted.  
Cause: Rule \{0\} of policy \{1\} is shared by other policies.  
Action: Provide correct Rule.  
Level: 1  
Type: ERROR  
Impact: Security  
JPS-20101: Policy \{0\} is referred by one or more policy sets. It can not be deleted if cascading is set to false.  
Cause: Policy \{0\} is referred by other policie sets.  
Action: Either use cascading delete or remove references from policy sets.  
Level: 1  
Type: ERROR  
Impact: Security  
JPS-20102: Rule \{0\} used in policy is not sharable. The policy will not be created or updated.  
Cause: Rule \{0\} used in policy is not sharable.  
Action: Provide correct Rule.  
Level: 1  
Type: ERROR  
Impact: Security  
JPS-20103: Policy can not have both private rules and sharable rules.  
Cause: Policy can not have both private rules and sharable rules.  
Action: Provide correct Rule.  
Level: 1  
Type: ERROR  
Impact: Security  
JPS-20104: Exclusive rule \{0\} can not be deleted explicitly.  
Cause: Exclusive rule \{0\} can not be deleted explicitly.  
Action: Delete the referred policy.  
Level: 1
JPS-20105: The permission {0} has no target name.
  Cause: Permission has no target name.
  Action: Make sure the usage is valid. If not revoke the permission.
  Level: 1

JPS-20200: Adding attributes to data security resource type {0} is not allowed.
  Cause: Attributes present in Data Security Resource Type.
  Action: Remove Attributes present in Data Security Resource Type.
  Level: 1

JPS-20201: Adding matcher class to data security resource type {0} is not allowed.
  Cause: Matcher Class present in Data Security Resource Type.
  Action: Remove Matcher Class present in Data Security Resource Type.
  Level: 1

JPS-20202: Hierarchical data security resource type {0} is not allowed.
  Cause: Data Security Resource Type is Hierarchial.
  Action: Change Data Security Resource Type to Flat. It cannot be Hierarchial.
  Level: 1

JPS-20203: Adding both actions and action collection references to data security resource type {0} is not allowed.
  Cause: Both Actions and Action Collection References are added to Data Security Resource Type.
  Action: Add either Actions or Action Collection References to Data Security Resource Type.
  Level: 1

JPS-20204: Adding null data security information object to data security resource type {0} is not allowed.
  Cause: Null data security information object found for data security resource type.
  Action: Add data security information object to data security resource type.
Level: 1
Type: WARNING
Impact: Security

JPS-20205: Data source name is required for a data security resource type \{0\}.

Cause: Data security information object found for data security resource type has no data source name.

Action: Provide valid data source name for data security information object for data security resource type.

Level: 1
Type: WARNING
Impact: Security

JPS-20206: Invalid value for data source type of data security resource type \{0\}.

Cause: Data security information object found for data security resource type has invalid data source type.

Action: Data Security information object found for data security resource type has invalid data source type

Level: 1
Type: WARNING
Impact: Security

JPS-20207: Constraint required for data security resource type \{0\} as data source type is virtual.

Cause: Virtual data source type requires data source constraint to be present.

Action: Provide valid data source constraint for virtual data source.

Level: 1
Type: WARNING
Impact: Security

JPS-20208: Actions List cannot contain actions that are inherited by default for resource type \{0\}.

Cause: Actions list in resource type contains default inherited data security actions.

Action: Remove default data security actions from data security resource type.

Level: 1
Type: WARNING
Impact: Security

JPS-20209: Duplicate column definition (same column names) not allowed in data source of resource type \{0\}.

Cause: Duplicate column definition (same names) in secured data source in resource type.

Action: Remove duplicate column definition from secured data source.

Level: 1
Type: WARNING
Impact: Security

JPS-20210: Action collection reference name {1} referred in resource type {0} not found in policy store.
Cause: Action collection reference in resource type not found in the policy store.
Action: Either create action collection in store or remove the reference from resource type.
Level: 1
Type: WARNING
Impact: Security

JPS-20220: Data Security Resource Type should be present for Data Security Resource {0}.
Cause: No RAS resource type present for RAS resource OR is not of type RAS resource type.
Action: Add RAS resource type for RAS resource.
Level: 1
Type: WARNING
Impact: Security

JPS-20221: For data security resource {0} SQL predicate or XML expression is required.
Cause: Both SQL predicate and XML expression missing in data security resource.
Action: Add either SQL Predicate or XML expression to data security resource.
Level: 1
Type: WARNING
Impact: Security

JPS-20240: Multiple rules not allowed for triton policy {0}.
Cause: Multiple rules in triton data security policy.
Action: Add only one rule to triton data security policy.
Level: 1
Type: WARNING
Impact: Security

JPS-20241: Data security policy {0} has invalid type {1} and category {2}.
Cause: Invalid policy category and type combination.
Action: Provide valid policy category and type combination.
Level: 1
Type: WARNING
Impact: Security

JPS-20242: RAS policy only takes resources with same resource type.
Cause: RAS Policy have resources with different resource types.
Action: Provide resources just with same resource type for RAS policy.
Level: 1
Type: WARNING
Impact: Security

JPS-20243: For RASParameterValue, only EXACT matcher is supported.
Cause: Search RAS Policy by RASParameterValue ONLY support MATCHER.EXACT.
Action: Use MATCHER.EXACT for search by RASParameterValue.

Level: 1
Type: WARNING
Impact: Security

JPS-20244: For RASParameterValue, only EQUALITY comparator is supported.
Cause: Search RAS Policy by RASParameterValue ONLY support COMPARATOR.EQUALITY.
Action: Use COMPARATOR.EQUALITY for search by RASParameterValue.

Level: 1
Type: WARNING
Impact: Security

JPS-20260: RAS Resource type name referred in RAS policy set {0} is Null.
Cause: RAS resource type reference in RAS policy set is Null.
Action: Either create given resource type in store beforehand or use an existing one.

Level: 1
Type: WARNING
Impact: Security

JPS-20261: Data security policy set {0} has invalid type {1} and category {2}.
Cause: Invalid policy set category and type combination.
Action: Provide valid policy set category and type combination.

Level: 1
Type: WARNING
Impact: Security

JPS-20262: Policy set {0} is an ACL protecting an Attribute Collection and cannot be deleted.
Cause: Attempt to delete ACL that is protecting an Attribute Collection.
Action: Check that the ACL is not protecting any Attribute Collection.

Level: 1
Type: WARNING
Impact: Security

JPS-20263: RAS Policy set only takes policies whose ras resources are of same ras resource type.
Cause: RAS policy set only takes policies whose ras resources are of same ras resource type.
Action: Use ras policies with same ras resource type for ras policy set.
Level: 1
Type: WARNING
Impact: Security

JPS-20264: The length of RAS {0} name plus the length of RAS application name cannot exceed 29.
Cause: The length of RAS artifact name plus the length of ras application name exceeds 29.
Action: Shorten the RAS artifact name
Level: 1
Type: WARNING
Impact: Security

JPS-20265: The name of RAS {0} is allowed to consist of only alphanumeric characters and the special characters $, _, and #, and MUST begin with a letter.
Cause: The RAS artifact name is allowed to consist of only alphanumeric characters and the special characters $, _, and #, and MUST begin with a letter.
Action: Change the RAS artifact name
Level: 1
Type: WARNING
Impact: Security

JPS-20300: The action or implied action "{0}" already exists in action collection "{1}" or its parent(s).
Cause: Duplicate action or implied action found in action collection or one of its parents.
Action: Verify the action and implied action lists of this action collection and its parents.
Level: 1
Type: WARNING
Impact: Security

JPS-20301: The action collection "{0}" is already referenced in action collection "{1}" or its parent(s).
Cause: Duplicate action collection reference found in action collection or one of its parents.
Action: Verify the action collection reference lists of this action collection and its parents.
Level: 1
Type: WARNING
Impact: Security

JPS-20302: The action collection "{0}" already exists in application policy "{1}".
Cause: Action collection already exists in the application.

Action: Verify the action collection in the application or try modify operation.

Level: 1
Type: WARNING
Impact: Security

JPS-20303: The action collection "(0)" was not found in application policy "(1)".

Cause: Action collection not found in application.

Action: Verify the action collection is present in the application.

Level: 1
Type: WARNING
Impact: Security

JPS-20304: The action collection "(0)" is in use by another policy object.

Cause: Action collection is in use by another policy object.

Action: Verify the usages of the action collection.

Level: 1
Type: WARNING
Impact: Security

JPS-20305: Create, modify & delete operations are not permitted on built-in action collection "(0)".

Cause: The action collection being deleted, created or modified is built-in in the database.

Action: Use a different name for the action collection.

Level: 1
Type: WARNING
Impact: Security

JPS-20306: Action (0) referred in implied action (1) is not defined in action collection (2) or any of its parents.

Cause: The mapping specified for given implied action is not found in action collection or its parents.

Action: Check the implied actions mappings.

Level: 1
Type: WARNING
Impact: Security

JPS-20307: The action or implied action "(0)" already exists in implied action "(1)".

Cause: The mapping specified for given implied action contains duplicate actions.

Action: Check the implied actions mappings.

Level: 1
Type: WARNING
Impact: Security
JPS-20308: The implied action "{0}" refers to itself.
Cause: The mapping specified for given implied action contains reference to itself.
Action: Check the implied actions mappings.
Level: 1
Type: WARNING
Impact: Security

JPS-20320: "{0}" is not a RAS target database.
Cause: The SM is not a RAS target database.
Action: make sure the name corresponds to a RAS target database
Level: 1
Type: WARNING
Impact: Security

JPS-20321: "{0}" is not a RAS application.
Cause: The application is not a RAS application.
Action: make sure the name corresponds to a RAS application
Level: 1
Type: WARNING
Impact: Security

JPS-20322: "{0}" is not found or it is not a RAS target database.
Cause: RAS target database not found
Action: make sure the name corresponds to a RAS target database
Level: 1
Type: WARNING
Impact: Security

JPS-20350: All of handlerSchemaName, handlerPackageName and handlerFunctionName must be present or must be null in an attribute collection.
Cause: Atleast one of schema name, package name or function name of handler function is null.
Action: Verify the schema name, package name and function name of handler function.
Level: 1
Type: WARNING
Impact: Security

JPS-20351: The attribute "{0}" already exists in attribute collection "{1}".
Cause: Duplicate attribute found in attribute collection.
Action: Verify the attribute list of this attribute collection and its parents.
Level: 1
Type: WARNING
Impact: Security

JPS-20352: Attributes in attribute collection must be of category DYNAMIC.
Cause: Category of added attribute was wrong.
Action: Verify the added attribute is of category DYNAMIC.
Level: 1
Type: WARNING
Impact: Security

JPS-20353: The attribute collection "[0]" already exists in application policy "[1]."
Cause: Attribute collection already exists in the application.
Action: Verify the attribute collection in the application or try modify operation.
Level: 1
Type: WARNING
Impact: Security

JPS-20354: The attribute collection "[0]" was not found in application policy "[1]."
Cause: Attribute collection not found in application.
Action: Verify the attribute collection is present in the application.
Level: 1
Type: WARNING
Impact: Security

JPS-20355: Attributes in attribute collection must be single-valued.
Cause: Multi-valued attributes not supported.
Action: Verify the added attribute(s) are all single-valued.
Level: 1
Type: WARNING
Impact: Security

JPS-20356: The ACE(Policy Rule) "[0]" is not present in the application.
Cause: ACE(policy rule) protecting Attribute collection not found in application.
Action: Verify the ACE(Policy Rule) is present in the application.
Level: 1
Type: WARNING
Impact: Security

JPS-20357: The attributes in an attribute collection "[0]" is null or empty.
Cause: RASAttribute list is null or empty
Action: Make sure RASAttribute list is not null or empty.
Level: 1
Type: WARNING
Impact: Security
JPS-20400: The definition for attribute "{0}" exists in the application policy with wrong category. Expected: {1}, Found: {2}
Cause: Attribute definition exists in application with different category than expected.
Action: Verify the attribute definition in the application.

Level: 1
Type: WARNING
Impact: Security

JPS-20401: The definition for attribute "{0}" exists in the application policy with wrong type. Expected: {1}, Found: {2}
Cause: Attribute definition exists in application with different type than expected.
Action: Verify the attribute definition in the application.

Level: 1
Type: WARNING
Impact: Security

JPS-20403: Attribute designator functionality is not supported for this schema version.
Cause: Attribute designator functionality is not supported for this schema version.
Action: Don't use designator functionality or upgrade to newer version.

Level: 1
Type: ERROR
Impact: Security

JPS-20411: Invalid match function. Match function for a constraint must take two input parameters, provided function requires {0} input parameters.
Cause: Match function for constraint does not take 2 input parameters.
Action: Provide a correct match function for constraint.

Level: 1
Type: WARNING
Impact: Security

JPS-20412: Invalid match function. Both input parameters to a match function must be of same data type; provided function takes input parameters of type {0} and {1}.
Cause: Match function for constraint musts take two input parameters of same data type.
Action: Provide a correct match function for constraint.

Level: 1
Type: WARNING
Impact: Security

JPS-20413: Invalid match function. First parameter for a match function must be a single value.
Causes of constraints:

**JPS-20414: Mismatch of attribute category in constraint.** Expected {0}, actual {1}.

**Cause:** Category of attribute provided to the constraint must either be dynamic or match the constraint type.

**Action:** Provide attribute with correct category type to the constraint.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-20415: The data type {0} of attribute "[1]" does not match data type {2} of function second parameter passed to AttributeValueAssertion.**

**Cause:** Attribute data type and expected function parameter data type are different.

**Action:** Verify the data type of attribute entry passed to AttributeValueAssignment.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-20416: Data type of value and expected input parameter type of function provided for attribute value assertion does not match.** Expected type {0}, provided {1}.

**Cause:** Data type of value and expected input parameter type of function provided for attribute value assertion does not match.

**Action:** Provide value with correct data type to the constraint.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-20417: Constraints are only supported for TargetEntry and SimpleTargetEntry**

**Cause:** Constraints are supported only for TargetEntry and SimpleTargetEntry.

**Action:** If a constraint must be used, add it using a TargetEntry or SimpleTargetEntry.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-20420: Function Element is not supported as return type of a function.**

**Cause:** Function Element is not supported as return type of a function.

**Action:** Provide some other return type.

**Level:** 1
Type: WARNING
Impact: Security

JPS-20421: Data type for a Function Element input parameter must be OpssString.
Cause: Data type for a Function Element input parameter must be OpssString.
Action: Provide correct data type.
Level: 1

Type: WARNING
Impact: Security

JPS-20422: Function Element not supported for this version of policystore.
Cause: Function element not supported for this schema version.
Action: Don't use function element or upgrade.
Level: 1

Type: WARNING
Impact: Security

JPS-20423: AttributeAssignment can not be defined using a Function Element.
Cause: Attribute assignment cannot be defined using a function element.
Action: Don't use function element.
Level: 1

Type: WARNING
Impact: Security

JPS-20500: Quoted name for {0}, must be terminated by double-quote (").
Cause: Quoted id for triton entity needs to be terminated with double-quote("").
Action: Verify the id provided.
Level: 1

Type: WARNING
Impact: Security

JPS-20501: Length of {0} name must be between 1 and 30 characters (excluding the quotes ("), in case of quoted identifier), but was {1}
Cause: Id for triton entity has invalid length.
Action: Verify the id provided.
Level: 1

Type: WARNING
Impact: Security

JPS-20502: Quoted name for {0} contains invalid character "{'1}" at position {2}.
Quoted names must not contain null character(\0) or double-quote(")) within the name
Cause: Quoted id for triton entity has invalid character.
Action: Verify the id provided.
Level: 1
Type: WARNING
Impact: Security

JPS-20503: Unquoted name for {0} contains invalid character "{1}" at position {2}.

Unquoted names must begin with an alphabet. They may contain a letter, digit, underscore(_), dollar($), hash(#), or dot(.) symbols at other positions.

Cause: Unquoted id for triton entity has invalid character.

Action: Verify the id provided.

Level: 1
Type: WARNING
Impact: Security

JPS-20504: The name "{0}" is an implicit object name in the database and cannot be used as a name for {1}.

Cause: Id provided for triton entity is an implicit object name in the database.

Action: Verify the id provided.

Level: 1
Type: WARNING
Impact: Security

JPS-20505: The value "{0}" is of an unsupported type.

Cause: Parameter value is using an invalid type.

Action: Verify the parameter value provided.

Level: 1
Type: WARNING
Impact: Security

JPS-20521: A simple target must have at least one resource action entry or permission set reference.

Cause: A simple target must have at least one resource action entry or permission set reference.

Action: Provide resource actions or permission sets.

Level: 1
Type: WARNING
Impact: Security

JPS-20600: MetaData-Provisioned is true, but no meta data found in policy object {0}.

Cause: MetaData-Provisioned is true, but no meta data found in policy object {0}.

Action: Check the policy store, make sure it is in an consistent state.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-20601: Provided version "{0}" is invalid. Only alphabetic characters, digits, underscores, and dots are allowed.
Cause: Provided version \{0\} is invalid. Only alphabetic characters, digits, underscores, and dots are allowed.
Action: Provide a valid version.
Level: 1
Type: ERROR
Impact: Programmatic

JPS-20602: Provided meta data \{0\} is invalid. Reason: \{1\}
Cause: Provided meta data \{0\} is invalid. Reason: \{1\}.
Action: Provide a valid meta data.
Level: 1
Type: ERROR
Impact: Programmatic

JPS-90600: Security Module with the configuration id \{0\} already exists.
Cause: Security Module with the configuration id \{0\} already exists.
Action: Provide a unique configuration id.
Level: 1
Type: WARNING
Impact: Security

JPS-90600: Security Module with the configuration id \{0\} already exists.
Cause: Security Module with the configuration id \{0\} already exists.
Action: Provide a unique configuration id.
Level: 1
Type: WARNING
Impact: Security

JPS-90600: Security Module with the configuration id \{0\} already exists.
Cause: Security Module with the configuration id \{0\} already exists.
Action: Provide a unique configuration id.
Level: 1
Type: WARNING
Impact: Security

JPS-90601: Failed to create Security Module with the configuration id \{0\}, with error \{1\}
Cause: Failed to create Security Module with the configuration id \{0\}, with error \{1\}
Action: Check error message for further details.
Level: 1
Type: WARNING
Impact: Security
JPS-90601: Failed to create Security Module with the configuration id {0}, with error {1}
    Cause: Failed to create Security Module with the configuration id {0}, with error {1}
    Action: Check error message for further details.

Level: 1
Type: WARNING
Impact: Security

JPS-90601: Failed to create Security Module with the configuration id {0}, with error {1}
    Cause: Failed to create Security Module with the configuration id {0}, with error {1}
    Action: Check error message for further details.

Level: 1
Type: WARNING
Impact: Security

JPS-90602: Security Module with the configuration id {0} not found.
    Cause: Security Module with the configuration id {0} not found.
    Action: Make sure the configuration id is valid.

Level: 1
Type: WARNING
Impact: Security

JPS-90602: Security Module with the configuration id {0} not found.
    Cause: Security Module with the configuration id {0} not found.
    Action: Make sure the configuration id is valid.

Level: 1
Type: WARNING
Impact: Security

JPS-90602: Security Module with the configuration id {0} not found.
    Cause: Security Module with the configuration id {0} not found.
    Action: Make sure the configuration id is valid.

Level: 1
Type: WARNING
Impact: Security

JPS-90603: AuditService is improperly configured.
    Cause: Audit Service is not initializable.
    Action: Configure an audit server for audit trails

Level: 1
Type: WARNING
**Impact:** Security

**JPS-90603: AuditService is improperly configured.**
- **Cause:** Audit Service is not initializable.
- **Action:** Configure an audit server for audit trails

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-90604: Security Module with the configuration id {0} successfully created.**
- **Cause:** Security Module with the configuration id {0} successfully created.
- **Action:** Audit message, no action required

**Level:** 1  
**Type:** TRACE  
**Impact:** Security

**JPS-90604: Security Module with the configuration id {0} successfully created.**
- **Cause:** Security Module with the configuration id {0} successfully created.
- **Action:** Audit message, no action required

**Level:** 1  
**Type:** TRACE  
**Impact:** Security

**JPS-90605: Security Module with the configuration id {0} successfully modified.**
- **Cause:** Security Module with the configuration id {0} successfully modified.
- **Action:** Audit message, no action required

**Level:** 1  
**Type:** TRACE  
**Impact:** Security

**JPS-90605: Security Module with the configuration id {0} successfully modified.**
Cause: Security Module with the configuration id {0} successfully modified.
Action: Audit message, no action required
Level: 1
Type: TRACE
Impact: Security

JPS-90605: Security Module with the configuration id {0} successfully modified.
Cause: Security Module with the configuration id {0} successfully modified.
Action: Audit message, no action required
Level: 1
Type: TRACE
Impact: Security

JPS-90606: Security Module with the configuration id {0} successfully deleted.
Cause: Security Module with the configuration id {0} successfully deleted.
Action: Audit message, no action required
Level: 1
Type: TRACE
Impact: Security

JPS-90606: Security Module with the configuration id {0} successfully deleted.
Cause: Security Module with the configuration id {0} successfully deleted.
Action: Audit message, no action required
Level: 1
Type: TRACE
Impact: Security

JPS-90606: Security Module with the configuration id {0} successfully deleted.
Cause: Security Module with the configuration id {0} successfully deleted.
Action: Audit message, no action required
Level: 1
Type: TRACE
Impact: Security

JPS-90607: Security Module with the configuration id {0} successfully retrieved.
Cause: Security Module with the configuration id {0} successfully retrieved.
Action: Audit message, no action required
Level: 1
Type: TRACE
Impact: Security

JPS-90607: Security Module with the configuration id {0} successfully retrieved.
Cause: Security Module with the configuration id {0} successfully retrieved.
Action: Audit message, no action required

Level: 1

Type: ERROR

Impact: Security
JRF-10001: Fail to retrieve the application identifier. The internal exception is: {0}.

  **Cause:** The MBean server could not be accessed to retrieve the application name.
  
  **Action:** Verify that the MBean server is running and accessible.
  
  **Level:** 1
  
  **Type:** ERROR
  
  **Impact:** Configuration

JRF-10002: Fail to retrieve the WebLogic domain adminser server name. The internal exception is: {0}.

  **Cause:** The MBean server could not be accessed to retrieve the admin server name.
  
  **Action:** Verify that the MBean server is running and accessible.
  
  **Level:** 1
  
  **Type:** ERROR
  
  **Impact:** Configuration

JRF-10003: Fail to retrieve the current server name. The internal exception is: {0}.

  **Cause:** The MBean server could not be accessed to retrieve the server name based on the current thread.
  
  **Action:** Verify that the MBean server is running and accessible.
  
  **Level:** 1
  
  **Type:** ERROR
  
  **Impact:** Configuration

JRF-10004: Fail to check if the current server is admin server. The internal exception is: {0}.

  **Cause:** The MBean server could not be accessed to verify that the server in the current thread is the admin server.
  
  **Action:** Verify that the MBean server is running and accessible.
  
  **Level:** 1
  
  **Type:** ERROR
  
  **Impact:** Configuration

JRF-10005: Fail to retrieve the server log path. The internal exception is: {0}.
Cause: The MBean server could not be accessed to retrieve the server log path.
Action: Verify that the MBean server is running and accessible.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10006: Fail to copy the config file from {0} to the server directory {1}. The internal exception is: {2}.
Cause: The server config directory could not be accessed.
Action: Use the applyJRF() wlst command to ensure that the server has been properly configured.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10007: Fail to retrieve the system property domain.home.
Cause: The system property domain.home was not specified during WebLogic server startup.
Action: Specify the system property domain.home when starting the WebLogic server.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10008: I/O exception occurs when accessing to the JRF template at {0}.
Cause: The specified JRF template was not accessaible.
Action: Verify that the template jar from the template location is present and accessible.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10009: I/O exception occurs when parsing config/config.xml from the JRF template at {0}.
Cause: The config.xml might be missing from the JRF template or the JRF template jar might be corrupted.
Action: Verify that the JRF template is properly installed within the Oracle Home.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10010: The file config.xml under domain {0} does not exist.
Cause: The config.xml under domain config was missing or corrupted.
Action: Verify that the domain contains a valid config.xml file.

Level: 1
Type: ERROR
Impact: Configuration

JRF-10011: Fail to parse the config.xml file from JRF template.
Cause: The domain config.xml might be missing or the JRF template jar might be corrupted.
Action: Verify that the JRF template is properly installed within the Oracle Home and that the domain contains a valid config.xml file.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10012: Fail to retrieve the property for the Common Components Home.
Cause: The Common Components Home property was not set.
Action: Set the Oracle Home property using the system property common.components.home or the environment variable COMMON_COMPONENTS_HOME.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10013: The specified Oracle Home directory {0} does not exist.
Cause: The Common Components Home directory did not exist.
Action: Verify that Common ComponentsHome, specified through the system property common.components.home or environment variable COMMON_COMPONENTS_HOME, is a valid directory.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10014: Fail to retrieve the current server name. The internal exception is: {0}.
Cause: The MBean server could not be accessed to retrieve the application server platform information.
Action: Verify that the MBean server is running and accessible.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10015: The specified application server platform {0} is not supported by JRF.
Cause: JRF does not support the specified platform.
Action: Contact Oracle Support Services for the JRF supported application server platforms.
Level: 1
Type: ERROR
Impact: Configuration
JRF-10016: The initialization of the server config directory from the Oracle Home {0} with domain directory {1} for copying fails. The internal exception is: {2}.
Cause: Could not retrieve the servers from the domain config.xml file.
Action: Verify that the domain contains a valid config.xml file.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10017: Unable to invoke {0} because the domain {1} has not been extended with JRF template.
Cause: Domain has not been extended with JRF template.
Action: Apply JRF template to the domain.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10018: Server or cluster "{0}" is not found.
Cause: The server or cluster is not found.
Action: Create the server or cluster.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10019: Could not obtain edit lock on the domain
Cause: Domain is being edited by someone else
Action: Wait until the edit lock on the domain is released and retry.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10020: Could not load/instantiate a WebLogic server platform support instance.
Cause: Could not load/instantiate a WebLogic server platform support instance.
Action: Check if the server platform support class can be loaded/instantiated by the classloader.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10021: Could not load/instantiate a WebSphere server platform support instance.
Cause: Could not load/instantiate a WebSphere server platform support instance.
Action: Check if the server platform support class can be loaded/instantiated by the classloader.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10022: Could not load system property 'oracle.domain.config.dir'.
Cause: Could not load system property 'oracle.domain.config.dir'.
Action: Verify JRF is installed and provisioned properly and the system property 'oracle.domain.config.dir' is set.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10023: Could not load system property 'oracle.server.config.dir'.
Cause: Could not load system property 'oracle.server.config.dir'.
Action: Verify JRF is installed and provisioned properly and the system property 'oracle.server.config.dir' is set.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10024: JRF is unable to determine the current application server platform.
Cause: JRF is unable to determine the current platform.
Action: Contact Oracle Support Services for the JRF supported application server platforms.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10025: Could not load/instantiate a JBoss server platform support instance.
Cause: Could not load/instantiate a JBoss server platform support instance.
Action: Check if the server platform support class can be loaded/instantiated by the classloader.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10026: Failed to get application server edition
Cause: JRF Failed to retrieve application server edition
Action: Verify that the application server is installed and accessible.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10027: Operation is not supported on this application server edition
Cause: Operation is not supported on this platform edition.
Action: Verify it is the right application server edition.
Level: 1
Type: ERROR
Impact: Configuration

JRF-10028: Invoke startup and shutdown class {0}
Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Configuration

JRF-10029: String {0} is in invalid format. Example of correct string format is {1}
Cause: String format is invalid.
Action: Correct the string format, see example of a correct string format in the exception message

   Impact: Configuration

JRF-20029: MapModulesToServers is disabled, cannot modify target of application \{0\}.
   Cause: MapModulesToServers is disabled, cannot modify target of application.
   Action: Enable MapModulesToServers task for this application
   Level: 1
   Type: ERROR
   Impact: Configuration

JRF-20030: Enable StartupBeansService failed on server \{0\}.
Cause: Enable StartupBeansService failed
Action: Verify server connection

Level: 1
Type: ERROR
Impact: Configuration

JRF-20031: Initializing sun.awt.AppContext to avoid a redeployment leak. Please see bug 7711331
Cause: Avoid a redeployment leak
Action: Initializing sun.awt.AppContext

Level: 1
Type: NOTIFICATION
Impact: Configuration

JRF-20032: sun.awt.AppContext not found
Cause: sun.awt.AppContext not found
Action: Verify jdk

Level: 1
Type: NOTIFICATION
Impact: Configuration

JRF-20033: JRF startups - {0} failed. JRF is not configured properly. Resolve these issues before continuing. Individual startup stacktrace are included in the error log.
Cause: JRF is not configured properly
Action: Resolve these issues

Level: 1
Type: NOTIFICATION
Impact: Configuration

JRF-20034: JRF shutdowns - {0} failed. JRF is not configured properly. Resolve these issues before continuing. Individual shutdown stacktrace are included in the error log.
Cause: JRF is not configured properly
Action: Resolve these issues

Level: 1
Type: NOTIFICATION
Impact: Configuration

JRF-20035: invalid format.
Cause: invalid url format
Action: fix url format

Level: 1
Type: NOTIFICATION
**Impact:** Configuration

**JRF-20036: checkIfJRFApplied api failed on target {0} with exception {1}**

**Cause:** The operation that checks if JRF applied to a target server or cluster failed

**Action:** See message and exception stack trace in admin server log to debug

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Configuration
MCS-38601: The diagnostics application encountered an internal error while processing the request.
   Cause: Diagnostic Application Internal Error
   Action: See the corresponding error message in the server logs for the root cause.
   Level: 1
   Type: SEVERE
   Impact: Other

MCS-38602: Invalid value for request parameter "[0]": {1}
   Cause: Invalid request parameter
   Action: Retry the request with valid parameter values.
   Level: 1
   Type: SEVERE
   Impact: Other

MCS-38610: The custom code container agent is not running, or cannot be reached (host: {0}, port: {1})
   Cause: The custom code container agent is not running or cannot be reached
   Action: Start the custom code container agent, or verify the system configuration
   Level: 1
   Type: WARNING
   Impact: Other

MCS-15200: Invalid request URI: {0}. Relative URI must be of the form /<api>/<apiVersion>/<resource>.
   Cause: The provided request URI is invalid.
   Action: Relative URI must be of the form /api/apiVersion/resource.
   Level: 1
   Type: SEVERE
   Impact: Other

MCS-15201: Could not retrieve metadata for the given API name and version.
   Cause: Metadata could not be retrieved for the provided API name and version.
Action: Verify that the provided Backend, API and Resource information is correct.

Level: 1
Type: SEVERE
Impact: Other

MCS-15202: An IO exception occurred writing to ResponseContext out stream [0].
Cause: An IO exception occurred writing to ResponseContext out stream.
Action: Check server diagnostics log for details.

Level: 1
Type: SEVERE
Impact: Other

MCS-15203: Processing of request URI [0] was aborted due to an exception occurring while attempting to access the HttpServletResponse output stream.
Cause: The HttpServletRequest output stream could not be accessed.
Action: Check server diagnostics log for details.

Level: 1
Type: SEVERE
Impact: Other

MCS-15204: Could not create a request context for URI [0] as an unexpected exception has occurred.
Cause: An exception occurred while attempting to create a RequestContext.
Action: Check server diagnostics log for details.

Level: 1
Type: SEVERE
Impact: Other

MCS-15205: A timeout occurred waiting on a response for the request context for URI [0].
Cause: A timeout occurred waiting on a response from the RequestContext.
Action: Check server diagnostics log for details.

Level: 1
Type: SEVERE
Impact: Other

MCS-15206: Requested URI [0] references an internal API. Internal APIs are only accessible from within the domain.
Cause: An internal API request was made from outside the domain.
Action: Check server diagnostics log for details.

Level: 1
Type: SEVERE
Impact: Other
MCS-15207: 404 - Not Found

Cause:

Action:

Level: 1
Type: SEVERE
Impact: Other

MCS-15208: An authentication failure occurred while processing request URI {0}. An Authorization header with valid credentials is required.

Cause: An authentication failure occurred.

Action: Check server diagnostics log for details.

Level: 1
Type: SEVERE
Impact: Other

MCS-15209: 401 - Unauthorized

Cause:

Action:

Level: 1
Type: SEVERE
Impact: Other

MCS-15240: The RAML parser was unable to parse the supplied RAML for API {0}, version {1}. Error: {2}

Cause: The mobile API testing service was unable to parse the provided RAML

Action: Ensure the RAML provided to the API is correct.

Level: 1
Type: SEVERE
Impact: Other

MCS-15241: The API testing service received a poorly formatted Accept header in the request: {0}

Cause: The mobile API testing service received a poorly formatted Accept header

Action: Ensure the Accept header in the request is correctly formatted.

Level: 1
Type: WARNING
Impact: Other

MCS-15242: The API testing service received an Accept header for which it has no matching results. Available types are : {0}

Cause: The mobile API testing service received an Accept header it could not fulfil

Action: Ensure the Accept header in the request is of a type available in the RAML.

Level: 1
Type: WARNING
Impact: Other

MCS-15280: Service lifecycle listener {0} failed during startup with error: {1}
  Cause: A setup or programming error has occurred for the indicated service lifecycle listener that prevented it from starting up correctly.
  Action: Look for failures during invocation of this service instance

Level: 1
Type: WARNING
Impact: Other

MCS-15281: Service lifecycle listener {0} failed during shutdown with error: {2}
  Cause: A setup or programming error has occurred for the indicated service lifecycle listener that prevented it from shutting down correctly.
  Action: Error: Message CAUSE specified without a matching ACTION. Fix me.

Level: 1
Type: INFO
Impact: Other

MCS-15282: McsCore instance already set and cannot be reset
  Cause:
  Action:

Level: 1
Type: WARNING
Impact: Other

MCS-15283: Cannot get large/Reader Body content as a String
  Cause: An attempt was made to read a message body as a String when the body had content that did not allow this
  Action: Error: Message CAUSE specified without a matching ACTION. Fix me.

Level: 1
Type: WARNING
Impact: Other

MCS-15284: Cannot get large/stream Body content as a byte[]
  Cause: An attempt was made to read a message body as a byte[] when the body had content that did not allow this
  Action: Error: Message CAUSE specified without a matching ACTION. Fix me.

Level: 1
Type: WARNING
Impact: Other

MCS-15285: Cannot get binary content as a Reader/String (character data)
  Cause: An attempt was made to read a message body as a Reader when the body had binary content. This is not allowed.
  Action: Error: Message CAUSE specified without a matching ACTION. Fix me.
MCS-15286: Body content already consumed. Cannot consume again.
Cause: An attempt was made to read a message body that had already been read, where the body is large and cannot be read multiple times.
Action: Error: Message CAUSE specified without a matching ACTION. Fix me.

MCS-15287: Cannot find binary content from given types of content
Cause: An attempt to identify binary content for a message body (given current available content types) failed.
Action: Error: Message CAUSE specified without a matching ACTION. Fix me.

MCS-15288: Cannot find character content from given types of content
Cause: An attempt to identify character content for a message body (given current available content types) failed.
Action: Error: Message CAUSE specified without a matching ACTION. Fix me.

MCS-15289: Error draining stream into internal byte[] content
Cause: An attempt to drain a message body stream into an internal byte[] for processing has failed.
Action: Error: Message CAUSE specified without a matching ACTION. Fix me.

MCS-15290: Error draining Reader into internal String content
Cause: An attempt to drain a message body Reader into an internal String for processing has failed.
Action: Error: Message CAUSE specified without a matching ACTION. Fix me.

MCS-15291: Unsupported XML parsed/node type: {0}
Cause: An attempt was made to create an XML message body using an unsupported/unknown XML node/object type.
Action: Error: Message CAUSE specified without a matching ACTION. Fix me.

Level: 1
Type: WARNING
Impact: Other

MCS-15292: Service was interrupted by an unchecked Error: \{0\}
Cause:
Action:

Level: 1
Type: WARNING
Impact: Other

MCS-15293: Service was interrupted by an unchecked Exception: \{0\}
Cause:
Action:

Level: 1
Type: WARNING
Impact: Other

MCS-15360: Unhandled exception was caught and returned via onException()
Cause:
Action:

Level: 1
Type: INFO
Impact: Other

MCS-15361: Unhandled error was caught and callback notified via onError()
Cause:
Action:

Level: 1
Type: INFO
Impact: Other

MCS-15362: A second response has been received for the request. It has been ignored. \{0\}
Cause: Multiple responses have been received for a request.
Action: No action required. Only the first response has been returned.

Level: 1
Type: SEVERE
Impact: Other
MCS-15363: Ignoring response because an exception or error has already been returned. {0}
  Cause: 
  Action: 
  Level: 1
  Type: WARNING
  Impact: Other

MCS-15364: Ignoring error because a response, exception or error has already been returned.
  Cause: 
  Action: 
  Level: 1
  Type: WARNING
  Impact: Other

MCS-15365: Ignoring exception because a response, exception or error has already been returned.
  Cause: 
  Action: 
  Level: 1
  Type: WARNING
  Impact: Other

MCS-15366: Ignoring exception raised when performing callback.
  Cause: 
  Action: 
  Level: 1
  Type: WARNING
  Impact: Other

MCS-37000: Server does not support ECID
  Cause: The server running MCS does not support ECID
  Action: To use ECID deploy MCS to a server that supports ECID
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-37001: The metering event could not be emitted
  Cause: The request information could not be interpreted.
  Action: Review the reported exception for further details
  Level: 1
  Type: WARNING
  Impact: Other
MCS-37002: Unable to register event listener \{0\}
Cause: The event listener is not installed properly and cannot be found from the classpath.
Action: Review the reported exception for further details
Level: 1
Type: WARNING
Impact: Other

MCS-37003: Unable to set request context
Cause: The request context cannot be set in the HttpServletRequest
Action: Review the reported exception for further details
Level: 1
Type: WARNING
Impact: Other

MCS-37004: Unable to set request attributes
Cause: The request attributes cannot be set in the HttpServletRequest
Action: Review the reported exception for further details
Level: 1
Type: WARNING
Impact: Other

MCS-37005: Meter Event Processor is interrupted
Cause: The Meter Event Processor is interrupted and cannot process further events
Action: Review the reported exception for further details
Level: 1
Type: WARNING
Impact: Other

MCS-38501: Failed to update derived noun \{0\}.
Cause: An exception prevented a derived noun from updating one or more of its metrics.
Action: Review the reported exception for further details
Level: 1
Type: WARNING
Impact: Other

MCS-38591: Start of API Invocation
Cause:
Action:
Level: 1
Type: INFO
Impact: Other
MCS-38592: End of API Invocation
   Cause:
   Action:
   Level: 1
   Type: INFO
   Impact: Other

MCS-38593: Unserviceable request
   Cause:
   Action:
   Level: 1
   Type: INFO
   Impact: Other

MCS-38594: Request Timeout
   Cause:
   Action:
   Level: 1
   Type: INFO
   Impact: Other

MCS-82701: We can't find an object with key {0} in collection ":1".
   Cause:
   Action:
   Level: 1
   Type: SEVERE
   Impact: Other

MCS-82702: We can't find collection ":0". Verify that {0} is included in your mobile backend.
   Cause:
   Action:
   Level: 1
   Type: SEVERE
   Impact: Other

MCS-82703: You must specify the content-length HTTP request header (the size of the object in bytes).
   Cause:
   Action:
   Level: 1
   Type: SEVERE
   Impact: Other
MCS-82704: SQL exception occurred.
  Cause:
  Action:
  Level: 1
  Type: INCIDENT_ERROR
  Impact: Other

MCS-82705: {0} exceeds maximum object name length of {1} characters.
  Cause:
  Action:
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-82707: You must specify a device ID (using the {0} HTTP request header) to access a collection with device-level isolation.
  Cause: A request was made against a device isolated collection without including the device id
  Action: Ensure the MDEVICE_ID header is specified on the request.
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-82708: We can't find your mobile backend. Verify the name and ID.
  Cause: X-Backend-Token header was missing or a mobile backend with the corresponding token was not found
  Action: Check that a valid X-Backend-Token header was provided on the request.
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-82709: Your object was last modified on {0}, and hasn't changed since the date specified in the If-Modified-Since HTTP request header: {1}
  Cause:
  Action:
  Level: 1
  Type: INFO
  Impact: Other

MCS-82710: Your object was last modified on {0}, which is after the date specified in the If-Unmodified-Since HTTP request header: {1}
  Cause:
  Action:
  Level: 1
MCS-82711: Method is not allowed.
  Cause:
  Action:
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-82712: The \{0\} query parameter must be an integer greater than or equal to 0. You specified: \{1\}.
  Cause: Invalid value passed in for offset or limit query parameter
  Action: Ensure the value of the offset and limit query parameters are valid integers.
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-82713: We can't fill your request for a subset of bytes in this range. Ensure that your range request does not exceed the size of the object in bytes.
  Cause: Value provided in the Range header was not valid for this object.
  Action: Update the value of the Range header. The range must be valid for the specified object.
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-82715: Object with eTag \{0\} did not match one of \{1\} that was specified in the If-Match HTTP request header.
  Cause:
  Action:
  Level: 1
  Type: INFO
  Impact: Other

MCS-82716: Object with eTag \{0\} matched one of \{1\} that was specified on the If-None-Match HTTP request header.
  Cause:
  Action:
  Level: 1
  Type: INFO
  Impact: Other

MCS-82717: We can't find an object with the GUID
  Cause:
MCS-74500: Mobile client id is not specified
  Cause: Mobile client id has not been specified.
  Action: Ensure that an mobile client id is specified

MCS-74501: Platform is invalid (should be {0})
  Cause: Platform is invalid.
  Action: The error message indicates the correct platform

MCS-74502: Certificate is not specified
  Cause: APNS certificate has not been specified.
  Action: Ensure that an APNS certificate is specified

MCS-74503: Certificate is invalid: {0}
  Cause: APNS certificate is invalid.
  Action: Ensure that an APNS certificate is valid and encrypted correctly

MCS-74504: Certificate is empty
  Cause: APNS certificate is empty.
  Action: Ensure that an APNS certificate actually has a certificate

MCS-74505: API key is not specified
  Cause: GCM API key has not been specified.
  Action: Ensure that a GCM API key is specified
Level: 1
Type: SEVERE
Impact: Other

MCS-74506: Sender id is not specified
Cause: GCM sender id has not been specified. It is required if using XMPP.
Action: Ensure that a GCM sender id is specified

Level: 1
Type: SEVERE
Impact: Other

MCS-74507: Method is not specified
Cause: GCM method has not been specified.
Action: Ensure that a GCM method is specified

Level: 1
Type: SEVERE
Impact: Other

MCS-74508: Service configuration for {0} ({1}) not found
Cause:
Action:

Level: 1
Type: INFO
Impact: Other

MCS-74509: One of message or payload must be specified
Cause: Neither message nor payload has been specified. We don't have a message to send.
Action: Specify either message or payload

Level: 1
Type: SEVERE
Impact: Other

MCS-74510: Backend id is not specified
Cause: Backend id has not been specified.
Action: Ensure that a backend id is specified

Level: 1
Type: SEVERE
Impact: Other

MCS-74511: Mobile client {0} not found
Cause: Mobile client was not found.
Action: Ensure that a mobile client has been registered

Level: 1
MCS-74512: The service configuration is invalid: {0}
   Cause: The service configuration is invalid. The exception will be provide more
   exact details.
   Action: Update the service configuration to correct the exception.

MCS-74513: Notification token is not specified
   Cause: Notification token has not been specified.
   Action: Ensure that a notification token is specified

MCS-74514: Platform is not specified
   Cause: Platform has not been specified.
   Action: Ensure that a platform is specified

MCS-74515: Mobile client version is not specified
   Cause: Mobile client version has not been specified.
   Action: Ensure that a mobile client version is specified

MCS-74516: Mobile client is not specified
   Cause: Mobile client has not been specified.
   Action: Ensure that a mobile client is specified

MCS-74517: Device is not specified
   Cause: Device has not been specified.
   Action: Ensure that a device is specified
Impact: Other

MCS-74518: Problem formatting Date
Cause: The date send could not be parsed.
Action: Ensure that date specified are in the correct yyyy-MM-dd'T'HH:mm'Z' format
Level: 1
Type: SEVERE
Impact: Other

MCS-74519: Service configuration is not specified
Cause: Service configuration has not been specified.
Action: Ensure that a service configuration is specified
Level: 1
Type: SEVERE
Impact: Other

MCS-74520: Platform [0] does not match the service type [1].
Cause: Service type in service configuration is not for the mobile client's platform.
Action: Ensure that the platform in the mobile client matches the service type
Level: 1
Type: SEVERE
Impact: Other

MCS-74530: Notification is not specified
Cause: Notification has not been specified.
Action: Ensure that a notification is specified
Level: 1
Type: SEVERE
Impact: Other

MCS-74531: Notification id not specified
Cause: Notification id has not been specified.
Action: Ensure that a notification id is specified
Level: 1
Type: SEVERE
Impact: Other

MCS-74532: Notification [0] not found
Cause: Notification was not found.
Action: Ensure that the correct notification id is specified.
Level: 1
Type: SEVERE
Impact: Other
MCS-74533: Notification has already been processed and cannot delete notification [0]

Cause: The notification has already been processed and cannot be deleted.
Action: No action required

Level: 1
Type: SEVERE
Impact: Other

MCS-74534: Unexpected exception occurred

Cause: Unexpected error has occurred
Action: The exception message should provide more details.

Level: 1
Type: SEVERE
Impact: Other

MCS-74535: Error uploading APNS certificate

Cause: There was an unexpected exception uploading the APNS certificate
Action: Take action based on the underlying exception

Level: 1
Type: SEVERE
Impact: Other

MCS-74536: Invalid devices have not been specified

Cause: Invalid devices have not been specified
Action: Ensure that the invalid devices have been specified

Level: 1
Type: SEVERE
Impact: Other

MCS-74537: The value {0} is not a valid integer

Cause: An invalid integer value has been specified
Action: Ensure that the value is an integer

Level: 1
Type: SEVERE
Impact: Other

MCS-74538: The value {0} is not in the correct date format (must be in the form "YYYY-MM-DD[Thh:mm]Z")

Cause: An invalid date format has been specified
Action: Ensure that the expected date format is used.

Level: 1
Type: SEVERE
Impact: Other
MCS-74539: The value {0} is not in the correct date format (must be in the form "YYYY-MM-DDThh:mm:ss.SSSZ")

Cause: An invalid date format has been specified
Action: Ensure that the expected date format is used.

Level: 1
Type: SEVERE
Impact: Other

MCS-74540: The value {0} is not valid for the {1} enumeration. Valid values are {2}

Cause: An invalid enum value has been specified
Action: Ensure that the value is valid for the enum

Level: 1
Type: SEVERE
Impact: Other

MCS-74541: A handler was NOT found for {0}.

Cause: A handler has not been found for the given URI. This shouldn't happen because Asset Catalog should not have forwarded the request if it is unsupported.
Action: Contact Oracle Support Services.

Level: 1
Type: SEVERE
Impact: Other

MCS-74542: The media type was wrong. Expected "{0}" but was "{1}"

Cause: The request has the wrong media type.
Action: Ensure that the request has the correct media type

Level: 1
Type: SEVERE
Impact: Other

MCS-74543: "{0}" is not a valid sort field format. It should be of the form "<field name>:<asc|desc>".

Cause: The specified sort is invalid.
Action: Ensure that the sort is in the valid form

Level: 1
Type: SEVERE
Impact: Other

MCS-74544: "{0}" is not a supported sort field. It should be one of {1}.

Cause: The specified sort is unsupported.
Action: Ensure that the sort is supported

Level: 1
Type: SEVERE
Impact: Other
MCS-74560: The device token is in an invalid format: {0}
  Cause: The device token is in an invalid format
  Action: Ensure that the device token is in a valid format (either a 64 character hex
           string or 32 byte binary equivalent).
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-74561: The device provider for {0} was not found
  Cause: The driver provider for the specified service type was not found
  Action: Ensure that the driver provider is registered with the driver registry.
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-74570: Notification sent via APNS using {0}
  Cause:
  Action:
  Level: 1
  Type: INFO
  Impact: Other

MCS-74571: APNS returned a response packet: {0}
  Cause: APNS sent a response packet
  Action: Take action based on the reason.
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-74572: Unexpected exception thrown while sending via APNS
  Cause: Exception thrown while sending an exception via APNS
  Action: Take action based on the exception.
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-74573: Payload size ({0} bytes) exceeds limit ({1})
  Cause: The payload is too large for APNS
  Action: Ensure that the payload is less than the max size.
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-74574: Unexpected exception thrown while checking the feedback service
Cause: Exception thrown while checking the APNS Feedback Service
Action: Take action based on the reason it was rejected.
Level: 1
Type: SEVERE
Impact: Other

MCS-74580: Notification sent via GCM to [0] device(s)
Cause:
Action:
Level: 1
Type: INFO
Impact: Other

MCS-74581: Unexpected exception thrown while sending via GCM
Cause: Exception thrown while sending an exception via GCM
Action: Take action based on the exception.
Level: 1
Type: SEVERE
Impact: Other

MCS-74582: Notification was rejected by GCM. Status=[0]. Response=[1]
Cause: The request was rejected by GCM
Action: Take action based on the reason it was rejected.
Level: 1
Type: SEVERE
Impact: Other

MCS-74583: GCM returned an invalid number of responses (expected=[0]; actual=[1])
Cause: The response returned by GCM has an invalid no of results. It should equal the number of devices in the notification.
Action: Contact Oracle Support
Level: 1
Type: SEVERE
Impact: Other

MCS-74584: Driver not found for '{0}'
Cause: There is no driver for the specific service type.
Action: Contact Oracle Support
Level: 1
Type: SEVERE
Impact: Other

MCS-74585: Maximum retries exceeded for notification [0] ([1])
MCS-74590: Feedback service will next check for invalid tokens @ {0}
Cause:
Action:
Level: 1
Type: WARNING
Impact: Other

MCS-74591: Error getting invalid notification tokens from APNS feedback service for {0}
Cause: An error occurred reading the invalid tokens from the APNS Feedback Service
Action: The exception message will provide more detail
Level: 1
Type: SEVERE
Impact: Other

MCS-74592: Unexpected status ({0}) when sending invalid tokens to environment {0}. Will be ignored.
Cause:
Action:
Level: 1
Type: WARNING
Impact: Other

MCS-74593: Checking APNS Feedback Service for invalid tokens
Cause:
Action:
Level: 1
Type: INFO
Impact: Other

MCS-74594: Unexpected exception thrown while getting invalid notification tokens from APNS feedback service
Cause: Exception thrown while checking for invalid tokens from the APNS Feedback Service
Action: Take action based on the exception.
Level: 1
Type: SEVERE
Impact: Other

MCS-39500: The MetricFeederAPI cannot be initialized  
Cause: The required resources for the MetricsFeederAPI such as JMS cannot be acquired  
Action: Check JMS configurations corresponding to Analytics server.

  Impact: Other

MCS-57806: Attempted to rename asset "[0]" (type: "[1]") to "[2]". Asset renaming is not allowed
  Cause: Asset renaming is not allowed
  Action: Avoid renaming asset
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-57807: BindingPolicy can be assigned to Environment only. Got: ' for API "[1]".
  Cause: BindingPolicy can be assigned to Environment only
  Action: Avoid attaching BindingPolicy to other assets
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-57808: Preset metadata references a resource "[0]" that can not be found
  Cause: Cannot find requested resource
  Action: Verify that resource is available at the specified location
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-57809: Can not update read-only Asset (name: [0], version: [1], id: [2])
  Cause: Read-only assets cannot be updated
  Action: Clone read-only asset instead of updating it
  Level: 1
  Type: SEVERE
  Impact: Other

MCS-57810: Asset name ("[0]") is too long. Actual length: "[1]". Allowed length: "[2]".
  Cause: Asset name length is limited
  Action: Limit asset name to the suggested value
  Level: 1
  Type: SEVERE
**Impact:** Other

**MCS-57811:** Asset name "{0}" contains one of the reserved characters: "{1}"

- **Cause:** Asset name contains invalid characters
- **Action:** Specify correct asset name

- **Level:** 1
- **Type:** SEVERE
- **Impact:** Other

**MCS-57812:** Asset "{0}" has no version value provided.

- **Cause:** Asset version is missing
- **Action:** Provide version for the asset

- **Level:** 1
- **Type:** SEVERE
- **Impact:** Other

**MCS-57813:** Asset "{0}" has version "{1}" in incorrect format. Supported version format is 'major.minor[.extra]+' with only '.'(dot) and digits allowed.

- **Cause:** Asset version is incorrect
- **Action:** Provide correct version for the asset

- **Level:** 1
- **Type:** SEVERE
- **Impact:** Other

**MCS-57814:** Failed to convert {0} into {1}

- **Cause:** Cannot find appropriate convertor
- **Action:** Register appropriate convertor for required types

- **Level:** 1
- **Type:** SEVERE
- **Impact:** Other

**MCS-57815:** Failed to merge {0} with {1}

- **Cause:** Cannot find appropriate merger
- **Action:** Register appropriate merger for required types

- **Level:** 1
- **Type:** SEVERE
- **Impact:** Other

**MCS-57816:** Failed to patch {0} using {1}

- **Cause:** Cannot find appropriate patcher
- **Action:** Register appropriate patcher for required types

- **Level:** 1
- **Type:** SEVERE
- **Impact:** Other
MCS-57817: Failed to load RAML content
  Cause: Cannot load RAML content
  Action: Verify RAML artifact details
Level: 1
Type: SEVERE
Impact: Other

MCS-57819: Cannot find default Environment
  Cause: Cannot find default environment
  Action: Create default environment
Level: 1
Type: SEVERE
Impact: Other

MCS-57820: Icon {0} not found
  Cause: Cannot find requested icon
  Action: Verify icon identifier
Level: 1
Type: SEVERE
Impact: Other

MCS-57821: Artifact {0} not found
  Cause: Cannot find requested artifact
  Action: Verify artifact identifier
Level: 1
Type: SEVERE
Impact: Other

MCS-57822: Unable to detect default user realm.
  Cause: Cannot identify default user realm
  Action: Verify that only user realm exist with default name
Level: 1
Type: SEVERE
Impact: Other

MCS-57823: Asset not found: {0}
  Cause: Cannot find requested asset
  Action: Verify that requested asset exists
Level: 1
Type: SEVERE
Impact: Other

MCS-57824: Policy Specification "{0}" does not exist
  Cause: Specified policy specification does not exist
Action: Verify that policy specification name is correct, or create a new one

Level: 1
Type: SEVERE
Impact: Other

MCS-57825: Cannot delete missing entity: {0}
Cause: Specified entity does not exist
Action: Verify that correct entity identifier was specified

Level: 1
Type: SEVERE
Impact: Other

MCS-57826: Cannot update missing entity: {0}
Cause: Specified entity does not exist
Action: Verify that correct entity identifier was specified

Level: 1
Type: SEVERE
Impact: Other

MCS-57827: Incorrect token: "[0]". The appropriate Mobile Backend cannot be found
Cause: Specified mobile backend token is incorrect
Action: Verify mobile backend token

Level: 1
Type: SEVERE
Impact: Other

MCS-57828: ErrorCode must be a URI: {0}
Cause: Specified error code is incorrect
Action: Verify error code

Level: 1
Type: SEVERE
Impact: Other

MCS-57829: Cannot lookup specified EJB: {0}
Cause: Specified EJB is not found
Action: Verify EJB name

Level: 1
Type: SEVERE
Impact: Other

MCS-57830: Generic error
Cause: Generic error occurred
Action: Verify logs
Level: 1
Type: SEVERE
Impact: Other
MCS-57832: No unique collection with a given name "\(0\)" is associated with the Mobile Backend identified by token "\(1\)"
Cause: Incorrect collection name given
Action: Verify requested collection name

Level: 1
Type: SEVERE
Impact: Other
MCS-57833: Cannot clone missing entity: \(0\)
Cause: Specified entity does not exist
Action: Verify that correct entity identifier was specified

Level: 1
Type: SEVERE
Impact: Other
MCS-57834: Asset can not have empty name
Cause: Asset name is empty or not specified
Action: Set name to the asset

Level: 1
Type: SEVERE
Impact: Other
MCS-57835: Resource paths "\(0\)" and "\(1\)" can not be a part of one API, because one of them contains path parameter in place where another has a static value or they differ only by path parameter names or they are completely similar.
Cause: Incorrect API definition
Action: Verify API definition

Level: 1
Type: SEVERE
Impact: Other
MCS-57836: Client could not be published
Cause: Client couldn't be published
Action: Do not publish the Client

Level: 1
Type: SEVERE
Impact: Other
MCS-57837: Name is empty or is not specified in the package.json file
Cause: Name is empty or is not specified in the package.json file
Action: Set name to the implementation
Level: 1
Type: SEVERE
Impact: Other

MCS-57838: Version is empty or is not specified in the package.json file
   Cause: Version is empty or is not specified in the package.json file
   Action: Set version to the implementation

Level: 1
Type: SEVERE
Impact: Other

MCS-57839: Main entry is empty or is not specified in the package.json file
   Cause: Main entry is empty or is not specified in the package.json file
   Action: Set main entry to the implementation

Level: 1
Type: SEVERE
Impact: Other

MCS-57840: Keyword {0} not found
   Cause: Cannot find requested keyword
   Action: Verify keyword name

Level: 1
Type: SEVERE
Impact: Other
MFT-02001: Not able to load the MDS repository.
  Cause: MDS repository initialization failed.
  Action: Check the metadata repository configuration and make sure that they are valid.

  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-02002: No transfer found for the source(ID {0}).
  Cause: No transfer found for the source.
  Action: Ensure that the source is attached to a transfer.

  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-02006: Data not found in MDS repository.
  Cause: Data not found in MDS repository.
  Action: Check the metadata repository configuration and make sure that they are valid. Also, review the diagnostic log for the exact error. Make sure the meta data exists.

  Level: CRITICAL
  Type: ERROR
  Impact: SYSTEM

MFT-02007: Error while creating new label with value {0} in MDS repository.
  Cause: An error while creating new MDS label. Check if the label already exists.
  Action: Check the metadata repository configuration and make sure that they are valid. Check if the label already exists in the system.

  Level: CRITICAL
  Type: ERROR
  Impact: SYSTEM

MFT-02008: Not able to resolve the MDS reference for source with ID {0}.
  Cause: Reference meta data not exists in repository.
Action: Restore the deleted data in the MDS repository.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-02009: Not able to resolve the MDS reference for transfer with ID {0}.
Cause: Reference metadata does not exist in the repository.
Action: Restore the deleted data in the MDS repository.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-02010: Not able to resolve the MDS reference for target with ID {0}.
Cause: Referenced metadata does not exist in the repository.
Action: Restore the deleted data in the MDS repository.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-02011: Label {0} does not exist in the MDS repository.
Cause: Label no longer exists in the MDS repository.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-02101: Validation failed for the artifact [{0}].
Cause: Validation failed for the given artifact.
Action: Check the artifact configuration and try again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-02102: Not able to retrieve {0} from the credential store for {1}.
Cause: Not able to retrieve the password from the credential store.
Action: Check the settings and data in the credential store or recreate the password. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-02104: No target associated with the transfer.
Cause: No target is associated with the transfer.
Action: Associate at least one target with the transfer and redeploy.
MFT-02105: No source associated with the transfer.

**Cause:** No source is associated with the transfer.

**Action:** Associate a source with the transfer and redeploy.

MFT-02301: Error occurred while exporting the metadata.

**Cause:** Error during metadata export.

**Action:** Check the metadata repository configuration and make sure that they are valid. Also, review the diagnostic log for the exact error.

MFT-02351: Error occurred while importing the metadata.

**Cause:** Invalid import metadata.

**Action:** Make sure that import zip file is proper. Also, review the diagnostic log for the exact error.

MFT-02401: The source \([0]\) is currently associated with some transfers and so cannot be deleted.

**Cause:** The given source is currently referenced in some transfers and so cannot be deleted at this point.

**Action:** For each associated transfer that is associated with given source, detach the source, associate a new source, or delete the transfer. Then try deleting the source again.

MFT-02402: The target \([0]\) is currently associated with some transfers and so cannot be deleted.

**Cause:** The given target is currently referenced in some transfers and so cannot be deleted at this point.

**Action:** For each associated transfer that is associated with given target, detach the target, associate a new target, or delete the transfer. Then try deleting the target again.
Type: ERROR
Impact: SYSTEM
MFT-02403: Error occurred while resetting the metadata with preserved user changes [0].
Cause: Exception while resetting the metadata.
Action: Check the metadata repository configuration and make sure that they are valid. Also, review the diagnostic log for the exact error.
Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-02404: Error occurred while deleting the source [{0}] from metadata store.
Cause: Exception while deleting the given source from metadata store.
Action: Check the metadata repository configuration and make sure that they are valid. Also, review the diagnostic log for the exact error.
Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-02405: Cannot delete the domain-info(name {0}) because it is referenced in some B2B source/target types.
Cause: Cannot delete the domain-info because it is referenced in some B2B source/target types.
Action: Detach the domain-info from the referring B2B sources or targets. Then try deleting the domain-info again.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-02406: Cannot delete the domain-info(name {0}) because it is referenced in some Healthcare source/target types.
Cause: Cannot delete the domain-info because it is referenced in some Healthcare source/target types.
Action: Detach the domain-info from the referring Healthcare sources or targets. Then try deleting the domain-info again.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-02407: Cannot delete the callout(name {0}) because it is referenced in some transfer preprocessing.
Cause: Cannot delete the callout because it is referenced in some transfer preprocessing.
Action: Detach the callout from the referring transfer preprocessing. Then try deleting the callout again.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-02408: Cannot delete the callout(name {0}) because it is referenced in some transfer postprocessing.
Cause: Cannot delete the callout because it is referenced in some transfer postprocessing.
Action: Detach the callout from the referring transfer postprocessing. Then try deleting the callout again.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-02409: Cannot delete the domain-info(name {0}) because it is referenced in some Web Service source/target types.
Cause: Cannot delete the domain-info because it is referenced in some Web Service source/target types.
Action: Detach the domain-info from the referring Web Service sources or targets. Then try deleting the domain-info again.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-02410: Error occurred while deleting the transfer [{0}] from metadata store.
Cause: Exception while deleting the given transfer from metadata store.
Action: Check the metadata repository configuration and make sure that they are valid. Also, review the diagnostic log for the exact error.
Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-02411: Error occurred while deleting the target [{0}] from metadata store.
Cause: Exception while deleting the given target from metadata store.
Action: Check the metadata repository configuration and make sure that they are valid. Also, review the diagnostic log for the exact error.
Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-02501: Error occurred while deploying the source artifact with id [{0}].
Cause: Error occurred while deploying the given source artifact.
Action: The configuration of the given source artifact may be incorrect or error occurred while deploying the artifact. Check the source configuration and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02502: Error occurred while enabling the source artifact with id [{0}].
Cause: Error occurred while enabling the given source artifact.
Action: The configuration of the given source artifact may be incorrect or error occurred while enabling the artifact. Check the source configuration and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02503: Error occurred while disabling the source artifact with id [{0}].
Cause: Error occurred while disabling the given source artifact.
Action: The configuration of the given source artifact may be incorrect or error occurred while disabling the artifact. Check the source configuration and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02504: Error occurred while undeploying the source artifact with id [{0}].
Cause: Error occurred while undeploying the given source artifact.
Action: The configuration of the given source artifact may be incorrect or error occurred while undeploying the artifact. Check the source configuration and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02505: Could not delete Deployment record for the currently deployed {0} [{1}] with label [{2}].
Cause: Artifact corresponding to given name and label is currently an Active deployment.
Action: Undeploy the artifact from the MFT console monitoring page and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02506: Deployment record does not exist for {0} [{1}] with label [{2}].
Cause: Artifact corresponding to given name and label is not found.
Action: Review the deployment history from the MFT console deployment page for the given artifact and check if artifact with the given label exists.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02507: Artifact {0} of type {1} is referenced in Transfer {2}.
Cause: Artifact corresponding to the given name is referenced in a transfer and cannot be deleted.

Action: Review deployment history for the given artifact and make sure it is not referenced in Transfer Deployments.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02508: Error deploying source {0}. Another source {1} was found deployed for URL {2}.
Cause: Another source that is already deployed is configured with the same URL.
Action: Configure the source with a different URL and try deployment again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02509: Error deploying source {0}. Another source {1} was found deployed for folder {2}.
Cause: Another source that already deployed is configured with the same folder.
Action: Configure the source with a different folder and try deployment again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02510: Error deploying SFTP source {0}. The configured private key is incorrect.
Cause: Error occurred while deploying the sFTP source. The configured private key is incorrect.
Action: Check if the key is imported to the key store. If not, import it and try deployment again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02511: Error deploying SFTP target {0}. The configured private key is incorrect.
Cause: Error occurred while deploying the sFTP target. The configured private key is incorrect.
Action: Check if the key is imported to the key store. If not, import it and try deployment again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02512: Error deploying source {0}. The configured PGP encryption alias is incorrect.
Cause: Error occurred while deploying the source. The configured PGP encryption alias is not valid.
**Action:** Check if the encryption key is imported to the key store. If not, import it and try deployment again.

**Level:** LOW

**Type:** ERROR

**Impact:** SYSTEM

MFT-02513: Error deploying source {0}. The configured PGP decryption alias is incorrect.

**Cause:** Error occurred while deploying the source. The configured PGP decryption alias is not valid.

**Action:** Check if the decryption key is imported to the key store. If not, import it and try deployment again.

**Level:** LOW

**Type:** ERROR

**Impact:** SYSTEM

MFT-02514: Error deploying transfer {0}. The configured PGP encryption alias for target {1} is incorrect.

**Cause:** Error occurred while deploying the target. The configured PGP encryption alias is not valid.

**Action:** Check if the encryption key is imported to the key store. If not, import it and try deployment again.

**Level:** LOW

**Type:** ERROR

**Impact:** SYSTEM

MFT-02515: Error deploying transfer {0}. The configured PGP decryption alias for target {1} is incorrect.

**Cause:** Error occurred while deploying the target. The configured PGP decryption alias is not valid.

**Action:** Check if the decryption key is imported to the key store. If not, import it and try deployment again.

**Level:** LOW

**Type:** ERROR

**Impact:** SYSTEM

MFT-02516: Error deploying transfer {0}. No Internal server address configured in server properties.

**Cause:** Error occurred while deploying the Web Service target. The internal server address is not configured.

**Action:** Go to the Server Properties page and check the internal server information under Advanced Delivery Properties. Enter correct values and try deployment again.

**Level:** LOW

**Type:** ERROR

**Impact:** SYSTEM
MFT-02517: Error deploying transfer {0}. No External server address configured in server properties.

**Cause:** Error occurred while deploying the Web Service target. The external server address is not configured.

**Action:** Go to the Server Properties page and check the external server information under Advanced Delivery Properties. Enter correct values and try deployment again.

**Level:** LOW  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-02518: Error deploying transfer {0}. No internal FTP port configured in server properties.

**Cause:** Error occurred while deploying the Web Service target. The Internal Server FTP port is not configured in server properties.

**Action:** Go to the Server Properties page and check the internal server information under Advanced Delivery Properties. Enter correct values and try deployment again.

**Level:** LOW  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-02519: Error deploying transfer {0}. No external FTP port configured in server properties.

**Cause:** Error occurred while deploying the Web Service target. The External FTP port is not configured in server properties.

**Action:** Go to the Server Properties page and check the external server information under Advanced Delivery Properties. Enter correct values and try deployment again.

**Level:** LOW  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-02520: Error deploying transfer {0}. No internal FTPS port configured in server properties.

**Cause:** Error occurred while deploying the Web Service target. The Internal Server FTPS port is not configured in server properties.

**Action:** Go to the Server Properties page and check the internal server information under Advanced Delivery Properties. Enter correct values and try deployment again.

**Level:** LOW  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-02521: Error deploying transfer {0}. No external FTPS port configured in server properties.

**Cause:** Error occurred while deploying the Web Service target. The External FTPS port is not configured in server properties.
Action: Go to the Server Properties page and check the external server information under Advanced Delivery Properties. Enter correct values and try deployment again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02522: Error deploying transfer [0]. No internal sFTP port configured in server properties.
Cause: Error occurred while deploying the Web Service target. The Internal Server sFTP port is not configured in server properties.
Action: Go to the Server Properties page and check the internal server information under Advanced Delivery Properties. Enter correct values and try deployment again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02523: Error deploying transfer [0]. No external sFTP port configured in server properties.
Cause: Error occurred while deploying the Web Service target. The External sFTP port is not configured in server properties.
Action: Go to the Server Properties page and check the external server information under Advanced Delivery Properties. Enter correct values and try deployment again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02524: Deployment validation failed while deploying source [0].
Cause: Deployment validation failed while deploying the source.
Action: Check the source configuration and try again. Deploy from the UI again to check what validations failed or deploy the source using WLST in interactive mode.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02525: Deployment validation failed while deploying transfer [1].
Cause: Deployment validation failed while deploying the transfer.
Action: Check the transfer configuration and try again. Deploy from the UI again to check what validations failed or deploy the transfer using WLST in interactive mode.

Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-02526: Deployment validation failed while deploying target {1}.
   **Cause:** Deployment validation failed while deploying the target.
   **Action:** Check the target configuration and try again. Deploy from the UI again to check what validations failed or deploy the target using WLST in interactive mode.
   **Level:** LOW
   **Type:** ERROR
   **Impact:** SYSTEM

MFT-02527: Deployment of source {0} failed. The password configured is incorrect.
   **Cause:** Deployment of source failed due to invalid password.
   **Action:** Check the key store configuration and ensure the password configured for the source is available in the key store.
   **Level:** LOW
   **Type:** ERROR
   **Impact:** SYSTEM

MFT-02528: Deployment of target {0} failed. The password configured is incorrect.
   **Cause:** Deployment of target failed due to invalid password.
   **Action:** Check the key store configuration and ensure the password configured for the target is available in the key store.
   **Level:** LOW
   **Type:** ERROR
   **Impact:** SYSTEM

MFT-02529: Error deploying source {0}. Transport Endpoint validation failed.
   **Cause:** Error occurred while deploying the source. Transport validation failed due to incorrect configuration of the source endpoint.
   **Action:** Check the source configuration and try again. Deploy from the UI again to check what validations failed or deploy the source using WLST in interactive mode.
   **Level:** LOW
   **Type:** ERROR
   **Impact:** SYSTEM

MFT-02530: Error deploying Target {0}. Transport endpoint validation failed.
   **Cause:** Error occurred while deploying the target. Transport validation failed due to incorrect configuration of the target endpoint.
   **Action:** Check the target configuration and try again. Deploy from the UI again to check what validations failed or deploy the target using WLST in interactive mode.
   **Level:** LOW
   **Type:** ERROR
   **Impact:** SYSTEM

MFT-02531: Invalid configuration found in the associated source {0}.
Cause: Error occurred while deploying the transfer because source configuration is invalid.
Action: Go to the source page, fix the invalid configuration, and try redeploying the transfer.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02532: Invalid configuration found in the associated target {0}.
Cause: Error occurred while deploying the transfer because the target configuration is invalid.
Action: Go to the target page, fix the invalid configuration, and try redeploying the transfer.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02533: Error. Could not find a deployment record for source {0}.
Cause: A deployment record for the given source artifact could not be found in database.
Action: Deploy the source and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02534: Error. Could not find a deployment record for target {0}.
Cause: A deployment record for the given target artifact could not be found in database.
Action: Deploy the target and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02535: Error. Could not find a deployment record for transfer {0}.
Cause: A deployment record for the given transfer artifact could not be found in database.
Action: Deploy the transfer and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02536: The transfer {0} is already enabled.
Cause: The deployment record for the given transfer artifact is already enabled.
Action: No action required.
Level: LOW

Type: ERROR
Impact: SYSTEM

MFT-02552: Error creating transfer [{0}]. Another transfer was found with this name.
Cause: Another transfer found with the same name as the given name.
Action: Configure the transfer with a different name and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02553: Incorrect additional http header value. Use key value pair and # as separator. Example pro1=value1#pro2=value2.
Cause: Incorrect additional http header value.
Action: Correct the value and try deploying again.
Level: LOW
MFT-02554: Payload access is referring to invalid user/groups/roles.
  Cause: Payload access is referring to invalid resource.
  Action: Associate valid users/groups/roles and try redeploying the transfer.
  Level: LOW

MFT-03001: Error while starting the MFT server.
  Cause: Unable to initialize the MFT Server dependent components.
  Action: Ensure the infrastructure components like Identity Store, Security Store, Database, JCA are configured properly.
  Level: CRITICAL

MFT-03002: Error while registering the Web Service source {0} with the provider.
  Cause: Unable to register the Web Service source with the provider.
  Action: Verify the Web Service source configuration and provider availability. Contact Oracle Support Services if the problem persists.
  Level: CRITICAL

MFT-03003: Error while Initializing Web Service source {0}.
  Cause: An error occurred while registering the Web Service sources.
  Action: Check the configuration of the deployed Web Service sources.
  Level: CRITICAL

MFT-03004: Error while initializing Security components for Stripe {0}.
  Cause: An Error occurred while creating the application policy data in the domain-wide policy store or while obtaining the connection to the default realm identity store.
  Action: Ensure that the required permissions are granted to the MFT source and check the config parameters of the Identity Store.
  Level: CRITICAL

MFT-03005: Error while initializing the WebLogic Work Manager {0}.
  Cause: Unable to look up the Work Manager from the underlying environment.
  Action: Check the Work Manager configuration in the WebLogic console.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03006: Error while registering the EM Discovery Mbean with Object name {0}.
Cause: An error occurred while registering the Config MBean with the Platform MBean Server.
Action: Review the diagnostic log for the exact error. Check whether management infrastructure is up and MFT MBean details are correct.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03007: Error while shutting down MFT server.
Cause: Unable to stop one or more dependent components of the MFT server.
Action: Review the diagnostic log for the exact error. Failure might be due to configuration of infrastructure components or connection problem.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03008: Error occurred while unsubscribing the Web Service source.
Cause: Unable to unsubscribe the Web Service source.
Action: Failure could be due to unavailability of Web Service registration service or improper Web Service configuration. Review the diagnostic log for the exact error.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03009: Error while getting the Application Properties metadata.
Cause: Unable to get the Application Properties details.
Action: Check the Application Properties configuration in the system.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03010: Error occurred while updating the port {2} for service {1} of server {0} by user {3}
Cause: Exception while updating the port details of databases.
Action: Check the service, server instance and port. If these are correct it could be due to database issue. Review the diagnostic log for the exact error.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM
MFT-03011: Error while loading the MFT Configuration MBean Properties from underlying infrastructure.
Cause: Unable to load the MBean Properties.
Action: Unable to load the MBean config properties from the underlying metadata store. Review the diagnostic log for the exact error.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03012: Error while initializing the MFT persistence context.
Cause: Unable to initialize the persistence units context.
Action: Check the database availability and connection configuration. Review the diagnostic log for the exact error.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03013: Error while initializing the MFT System event manager.
Cause: Unable to initialize the System event manager with required Queue and Topic receiver(s).
Action: Check the JMS system event Queue and Topic configurations in the WebLogic console.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03014: Error while initializing the MFT Purge event manager.
Cause: Unable to initialize the Purge event manager with required Queue receiver(s).
Action: Check the JMS purge event Queue and Topic configurations in the WebLogic console.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03015: Error while initializing the source listener {0}
Cause: Unable to start the JCA adapter to poll the files on the source.
Action: Check the source configuration parameters. Contact Oracle Support Services if the problem persists.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03016: Error updating port for server instance [{0}] and service [{1}]. The given server instance or service is incorrect.
Cause: Error occurred while updating port assignment for the given server instance and service in database.
Action: Check the port configuration for the server instance. Contact Oracle Support Services if the problem persists.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03250: Invalid argument(s) {0} provided to MFT utility for method {1}.
Cause: Arguments of the MFT command line utility are either missing or invalid.
Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-03251: MFT utility - Operation {0} failed for parameters {1}.
Cause: EJBException thrown by the MFT utility due to failure in operation.
Action: Refer to MFT utilities documentation to determine the arguments and their types for the given command.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-03252: Exception occurred while executing runtime purge for batch id [{0}].
Cause: Exception occurred while executing runtime purge for batch id [{0}].
Action: Try again with the recovery option by passing same batch id. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-03253: Error while processing the purge event {0}.
Cause: An error occurred during processing of the purge event by the JCA JMS Adapter.
Action: Check the Purge Event Queue configuration in the server. Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. Contact Oracle Support Services if the problem persists.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03254: Exception occurred while executing runtime archive for batch id [{0}].
Cause: Exception occurred while executing runtime archive for batch id [{0}].
Action: Try again by passing same batch id. If the problem persists, contact Oracle Support Services.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-03255: Exception occurred while executing runtime restore from archive file
[[0]].
Cause: Exception occurred while executing runtime restore from archive file [[0]].
Action: Try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-03302: Failed to initialize the engine. The engine message queue receivers for
queue {0} were not initialized properly.
Cause: Problem with JMS queue settings.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR'. This error line, along with the preceding lines, indicates the reason for this exception. Correct the queue settings and restart the MFT server.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03303: Error while stopping queue receivers for queue {0}.
Cause: An error has occurred while stopping the queue receivers.
Action: Review the diagnostic log for the exact error. Check the MFT specific JMS Queue settings in the WebLogic console.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-03304: Failed to initialize the engine. The engine queue message producer for
queue {0} was not initialized properly.
Cause: Problem with JMS queue settings.
Action: Check the MFT specific JMS Queue settings in the WebLogic console.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-03305: Error while stopping the message producer for queue {0}.
Cause: An error has occurred while stopping queue message producer.
Action: Review the diagnostic log for the exact error. Check the MFT specific JMS Queue settings in the WebLogic console.

Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-03306: Error while initializing the source listeners
  Cause: Unable to start the JCA adapter to poll the files on the sources.
  Action: Check the source configuration parameters. Contact Oracle Support Services if the problem persists.
  Level: CRITICAL
  Type: ERROR
  Impact: SYSTEM

MFT-03307: Error initializing the MFT message processing engine.
  Cause: An error has occurred while starting the message processing engine for MFT.
  Action: Check the MFT specific JMS Queue settings in the WebLogic console.
  Level: CRITICAL
  Type: ERROR
  Impact: SYSTEM

MFT-03308: Error during shutdown of source listener {0}.
  Cause: Unable to stop the JCA Adapter that is polling the source.
  Action: Review the diagnostic log for the exact error. Check the MFT specific JMS Queue settings in the WebLogic console.
  Level: CRITICAL
  Type: ERROR
  Impact: SYSTEM

MFT-03309: Error stopping the MFT message processing engine.
  Cause: An error has occurred while stopping the message processing engine for MFT.
  Action: Review the diagnostic log for the exact error. Check the MFT specific JMS Queue settings in the WebLogic console.
  Level: CRITICAL
  Type: ERROR
  Impact: SYSTEM

MFT-03601: Error while starting the hosted server {0} with root dir {1} and port {2}.
  Cause: An error occurred while starting the hosted server at a specified port and root directory.
  Action: Check the root directory and Port assigned to the hosted server. For FTP over SSL and sFTP Servers, verify that all the required keys are configured.
  Level: CRITICAL
  Type: ERROR
  Impact: SYSTEM

MFT-03602: Error while shutting down the Hosted Server {0} running at port {1}.
  Cause: An error occurred while stopping the hosted server running at the specified port.
  Action: Review the diagnostic log for the exact error.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03604: Error while allocating the HA ports for the server instance {0}.
Cause: An error occurred while persisting the ports of the hosted servers for a given server instance.
Action: Check the ports definitions in MDS and the database config parameters. Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. Contact Oracle Support Services if the problem persists.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03605: Error while fetching the Key store configuration from MDS.
Cause: An Error occurred while getting the default key store MO from MDS.
Action: Unable to get the key store information from the underlying metadata store during initialization. Review the diagnostic log for the exact error.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03606: Error while fetching the ES root directories from path {0} with option {1} for {2} server
Cause: An Error occurred while getting the directories under the ES root directory
Action: Check the Embedded Server root directory configuration and access permissions. Review the diagnostic log for the exact error.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-04001: No associated active source found for the incoming file {0} from the endpoint {1}.
Cause: No matching MFT source found for the incoming message.
Action: Create and deploy the matching source. Redeliver the message to MFT.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04002: Multiple matching active sources found for the file {0} from endpoint {1}. Matching sources : {3}.
Cause: Invalid configuration: multiple active deployed sources for the same endpoint.
Action: Activate only one source for a given endpoint configuration.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04003: Not able to find the metadata reference for source with id {0}.
   Cause: Reference metadata for the given source id does not exist in repository.
   Action: Restore the deleted data in the metadata repository and redeploy the source.
   Level: LOW
   Type: ERROR
   Impact: MESSAGE

MFT-04004: Invalid source message received for source message processing. Source message ID {0}.
   Cause: Internal processing error.
   Action: Contact Oracle Support Services.
   Level: LOW
   Type: ERROR
   Impact: MESSAGE

MFT-04005: Invalid source configuration.
   Cause: Invalid source configuration.
   Action: The listening or Web Service source could not be registered due to error while creating the endpoint. Review the diagnostic log for the exact error.
   Level: LOW
   Type: ERROR
   Impact: SYSTEM

MFT-04007: Associated source {2} for the file {0} from endpoint {1} was disabled.
   Cause: Associated source was disabled.
   Action: Enable the source and redeliver the message to MFT.
   Level: LOW
   Type: ERROR
   Impact: SYSTEM

MFT-04008: No matching active transfer found for the message.
   Cause: There is no associated transfer with a matching content type for the incoming message.
   Action: Associate and deploy the matching transfer for the incoming message and resubmit the source message.
   Level: LOW
   Type: ERROR
   Impact: SYSTEM

MFT-04009: Error during source message processing.
   Cause: Unexpected error.
   Action: Unexpected error encountered during source processing. Review the diagnostic log for the exact error.
Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04010: Source {0} is disabled.
    Cause: Source is disabled.
    Action: Enable the source and retry.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04011: Duplicate source message. Original message id {0}.
    Cause: Duplicate message submitted.
    Action: Check the status of original message.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04012: Directory reference as payload is not allowed for the source if compression processing action is not associated with the source.
    Cause: Directory reference as payload is not allowed if compression processing action is not associated with the source.
    Action: Associate compression as processing action for the source and redeploy the source. Resubmit the message after that.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04013: Invalid Payload information.
    Cause: Bad request or specified payload doesn't exists.
    Action: Send valid request, make sure payload information is correct.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04202: File {0} does not exist in the file system.
    Cause: File does not exist in the file system.
    Action: If the file has been purged, restore the file and resubmit the appropriate message.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04204: IO exception encountered during message processing.
    Cause: IO exception.
Action: IO exception encountered. Review the diagnostic log for the exact error.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04205: Error while encrypting the payload using PGP.
Cause: PGP encryption setting error.
Action: Review the diagnostic log for the exact error.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04206: Error while decrypting payload using PGP.
Cause: Invalid PGP-encrypted payload.
Action: Check the incoming payload.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04207: Error while compressing the payload.
Cause: Compression setting error.
Action: Review the diagnostic log for the exact error.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04208: Error while decompressing the payload.
Cause: Invalid compressed payload.
Action: Check the incoming payload.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04209: Error while executing source preprocessing
Cause: Unexpected source preprocessing error.
Action: Review the diagnostic log for the exact error.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04210: Error while executing source postprocessing
Cause: Unexpected source postprocessing error.
Action: Review the diagnostic log for the exact error.
Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04211: Error while executing target preprocessing
  Cause: Unexpected target preprocessing error.
  Action: Review the diagnostic log for the exact error.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04212: Error while executing target postprocessing.
  Cause: Unexpected target postprocessing error.
  Action: Review the diagnostic log for the exact error.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04213: Error during instance message processing.
  Cause: Unexpected error.
  Action: Review the diagnostic log for the exact error.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04214: Unsupported compressed payload content.
  Cause: The compression format of the payload is not supported in MFT.
  Action: None: compressed format is not supported in MFT.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04215: Multiple file decompression is only supported for web service targets: SOAP, SOA, Service Bus, and ODI
  Cause: Compressed payload contains multiple files. Multiple file decompression is only supported for web service targets: SOAP, SOA, Service Bus, and ODI.
  Action: Decompress and submit a message for each decompressed file.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04216: No file found after decompression.
  Cause: There were no files found after decompression.
  Action: None: Invalid input message.
Level: LOW  
Type: ERROR  
Impact: MESSAGE

**MFT-04217: PGP private key not found for key alias {0}**  
**Cause:** Key for the alias is not present in the key store.  
**Action:** Import the key and resubmit the message.

Level: LOW  
Type: ERROR  
Impact: SYSTEM

**MFT-04218: PGP public key not found for key alias {0}**  
**Cause:** Key for the alias is not present in the key store.  
**Action:** Import the key and resubmit the message.

Level: LOW  
Type: ERROR  
Impact: SYSTEM

**MFT-04219: Message cannot be processed as the associated schedule has expired.**  
**Cause:** Message cannot be processed as the associated schedule has expired.  
**Action:** Associate valid schedule and redeploy.

Level: LOW  
Type: ERROR  
Impact: SYSTEM

**MFT-04220: PGP private key is invalid or key password is incorrect.**  
**Cause:** PGP private key is invalid or key password is incorrect.  
**Action:** Correct the key password if key password is incorrect otherwise import valid PGP private key.

Level: LOW  
Type: ERROR  
Impact: SYSTEM

**MFT-04221: Incoming data is encrypted with different public key.**  
**Cause:** PGP public key used for encryption is not corresponding key pair for private key specified.  
**Action:** Associate correct private key alias for the decryption action.

Level: LOW  
Type: ERROR  
Impact: SYSTEM

**MFT-04222: Incoming data is not a valid PGP encrypted data.**  
**Cause:** Incoming data is not a valid PGP encrypted data.  
**Action:** Check the incoming data.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04223: Encryption algorithm or key length is restricted under the java policy.
Cause: Encryption algorithm or key length is restricted.
Action: Make sure algorithms and key used is not restricted under java security policy.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04224: PGP Encryption key is not a valid encryption key.
Cause: PGP Encryption key is not a valid encryption key.
Action: Make sure key alias is a correct PGP encryption public key.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04401: Exception encountered during execution of callout {0}.
Cause: Error while executing custom callout.
Action: Review the diagnostic log for the exact error.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04501: Payload {0} not found in the MFT data storage.
Cause: Payload does not exist in the MFT data storage.
Action: If the data exists, try to restore the data.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04502: Invalid digest algorithm {0}.
Cause: Invalid algorithm.
Action: Correct the setting for the digest algorithm.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04503: Unexpected Error.
Cause: Unexpected exception occurred.
Action: Review the diagnostic log for the exact error.

Level: MEDIUM
Type: ERROR
Impact: MESSAGE

MFT-04504: JTA Transaction Error
Cause: JTA Transaction Error
Action: Review the diagnostic log for the exact error.
Level: MEDIUM
Type: ERROR
Impact: MESSAGE

MFT-04506: The archive {0} does not exist.
Cause: The given archive file could not be found. The file path is incorrect or the archive is empty.
Action: Check the archive file path. If path is correct, then ensure that the archive file is proper and try again.
Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04507: IP address or name of the host machine could not be determined.
Cause: IP address or name of the host machine could not be determined.
Action: Check if the system and network configuration is correct. Contact Oracle Administrator if problem persists.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-04508: Invalid argument.
Cause: Invalid argument.
Action: Check the input arguments provided and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04509: External ports in the application properties cannot be null.
Cause: External ports in the application properties are null.
Action: Set the external ports in the application properties.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04510: External ports in the application properties cannot be null.
Cause: External ports in the application properties are null.
Action: Set the external ports in the application properties.
Level: LOW
MFT-04511: External ports in the application properties cannot be null.
   Cause: External ports in the application properties are null.
   Action: Set the external ports in the application properties.
   Level: LOW

MFT-04512: Error creating the directory {0}.
   Cause: IO exception.
   Action: Review the diagnostic log for the exact error.
   Level: LOW

MFT-04513: Invalid in-progress transfer count {0} for source.
   Cause: Unexpected error.
   Action: Internal error while calculating the progress in transfer count. No action needed.
   Level: LOW

MFT-04514: Invalid in-progress target count {0} for the transfer.
   Cause: Unexpected error.
   Action: Internal error while calculating the progress in transfer count. No action needed.
   Level: LOW

MFT-04515: Transfer {0} is disabled.
   Cause: Transfer is disabled.
   Action: Enable the transfer and retry.
   Level: LOW

MFT-04516: Target {0} is disabled.
   Cause: Target is disabled.
   Action: Enable the target and retry.
   Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04517: No target record found for the instance ID {0}.
Cause: No target record found for the instance.
Action: Try resubmitting the transfer or source instead.
Level: LOW

Type: ERROR
Impact: SYSTEM

MFT-04518: Target {0} is no longer associated with transfer {1}.
Cause: Target is no longer associated with transfer {1}.
Action: Associate the target with the transfer and retry.
Level: LOW

Type: ERROR
Impact: SYSTEM

MFT-04519: Unexpected error occurred while processing message with id [{0}].
Cause: An unexpected error occurred during processing of the message with the given message id.
Action: Review the diagnostic log for the exact error.
Level: LOW

Type: ERROR
Impact: MESSAGE

MFT-04520: Internal ports in the application properties cannot be null.
Cause: Internal ports in the application properties are null.
Action: Set the internal ports in the application properties.
Level: LOW

Type: ERROR
Impact: SYSTEM

MFT-04521: Internal ports in the application properties cannot be null.
Cause: Internal ports in the application properties are null.
Action: Set the internal ports in the application properties.
Level: LOW

Type: ERROR
Impact: SYSTEM

MFT-04522: Internal ports in the application properties cannot be null.
Cause: Internal ports in the application properties are null.
Action: Set the internal ports in the application properties.
Level: LOW

Type: ERROR
Impact: SYSTEM

MFT-04523: Error while moving the file [{0}] to location [{1}].
Cause: Issue while moving the file from one location to another.
Action: Check user permissions in the destination location.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04524: Unexpected error occurred during instance message processing for transfer [{0}].
Cause: An unexpected error occurred during instance message processing for the given transfer.
Action: Review the diagnostic log for the exact error.
Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04525: Unexpected error occurred during message processing for target [{0}].
Cause: An unexpected error occurred during message processing for the given target.
Action: Review the diagnostic log for the exact error.
Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04526: Unexpected error occurred during message processing for source [{0}].
Cause: An unexpected error occurred during message processing for the given source.
Action: Review the diagnostic log for the exact error.
Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04801: Error while processing the system event {0}.
Cause: An error occurred during processing of the system event by the JCA JMS Adapter.
Action: Check the System Event Queue and Topic configuration in the server. Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. Contact Oracle Support Services if the problem persists.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-04802: Error while submitting the system event {0} for service {1}. 
**Cause:** An error occurred during processing of the system event by the JCA JMS Adapter.

**Action:** Check the System Event Queue and Topic configuration in the server. Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. Contact Oracle Support Services if the problem persists.

**Level:** CRITICAL

**Type:** ERROR

**Impact:** SYSTEM

**MFT-04803:** Error while submitting the system event \{0\} with resubmit type as \{1\} for instances \{2\} by user \{3\}.

**Cause:** An error occurred during submission of the system event by the JCA JMS Adapter.

**Action:** Check the System Event Queue and Topic configuration in the server. Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. Contact Oracle Support Services if the problem persists.

**Level:** CRITICAL

**Type:** ERROR

**Impact:** SYSTEM

**MFT-04804:** Error while submitting the system event \{0\} with instance ID \{1\} by user \{2\}.

**Cause:** An error occurred during submission of the system event by the JCA JMS Adapter.

**Action:** Check the System Event Queue and Topic configuration in the server. Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. Contact Oracle Support Services if the problem persists.

**Level:** CRITICAL

**Type:** ERROR

**Impact:** SYSTEM

**MFT-04805:** Error while submitting pause transfer request. Target Message with Id \{0\} does not exist.

**Cause:** The given target message does not exist in database.

**Action:** Check the target message Id is correct and try again. Use the UI Monitoring Dashboard to verify target message details.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

**MFT-04806:** Error while submitting resume transfer request. Target Message with Id \{0\} does not exist.

**Cause:** The given target message does not exist in database.

**Action:** Check the target message Id is correct and try again. Use the UI Monitoring Dashboard to verify target message details.

**Level:** HIGH
Type: ERROR
Impact: SYSTEM

MFT-05001: Unsupported endpoint {0} passed to adapter.
  Cause: Unsupported endpoint has been passed to the adapter. Adapter only supports File / FTP / sFTP / JMS.
  Action: Check the endpoint that was passed.

  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05002: Error occurred while creating JCABindingFactoryImpl. Type: {0}, endpoint: {1}.
  Cause: An error occurred while initializing the adapter.
  Action: Check the adapter properties and try again. If the problem persists, please contact Oracle Support Services.

  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05003: No payload found while delivering to endpoint {0}.
  Cause: No payload found while delivering a message.
  Action: Try resubmitting the message.

  Level: HIGH
  Type: ERROR
  Impact: MESSAGE

MFT-05004: Error occurred while delivering message [{0}] to endpoint [{1}].
  Cause: Error occurred while delivering message.
  Action: Check the adapter properties and try again. If the problem persists, please contact Oracle Support Services.

  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05005: Error occurred while closing connection after sending file to end point [{0}].
  Cause: Error occurred while closing adapter connection.
  Action: Check adapter properties and try again. If the problem persists, contact Oracle Support Services.

  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05006: Error occurred while trying to open connection for endpoint [{0}], Type [{1}] and interface [{2}].
Cause: Error occurred while trying to open connection.
Action: Check the adapter properties and try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05007: Exception occurred while sending file [{0}] to endpoint [{1}].
Cause: File [{0}] does not exist.
Action: Ensure that the file [{0}] exists and resubmit.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05008: Exception occurred while creating connection with [{0}] for operation [{1}].
Cause: Error occurred while creating connection.
Action: Check the adapter properties and try again. If the problem persists, please contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05010: Exception occurred while validating adapter binding reference property for end point [{0}].
Cause: Could not validate Binding reference properties.
Action: Check the adapter properties and try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05011: Value for property 'Physical Directory' is missing.
Cause: No value specified for property 'Physical Directory' in the input connection properties.
Action: Specify a value for 'Physical Directory' in the connection properties for the endpoint and try again.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05012: Exception occurred while creating connection for polling to end point [{0}] for operation [{1}]
Cause: Error occurred while creating connection.
Action: Check the adapter properties and try again. If the problem persists, please contact Oracle Support Services.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05013: Exception occurred while creating poller service for endpoint [{0}].
Cause: Error occurred while creating poller service.
Action: Check the adapter properties and try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05014: Exception occurred while starting poller service for endpoint [{0}].
Cause: Error occurred while starting poller service.
Action: Check the adapter properties and try again. If the problem persists, please contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05015: Exception occurred while validating poller service for endpoint [{0}].
Cause: Could not validate adapter properties for poller service.
Action: Check the adapter properties and try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05017: Error occurred while stopping the adapter polling.
Cause: Exception occurred while trying to close the adapter to stop polling the messages.
Action: Check the adapter properties and try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05019: Exception occurred while creating file [{0}] received from end point [{1}].
Cause: Could not create the file [{0}], which was received from endpoint [{1}].
Action: Check if the file exists but is a directory rather than a regular file, does not exist but cannot be created, or cannot be opened for any other reason.

Level: HIGH
Type: ERROR
Impact: MESSAGE
MFT-05020: IO Exception occurred while writing to file \([0]\) received from endpoint \([1]\).
   **Cause:** File created, but could not write to the file \([0]\), which was received from endpoint \([1]\).
   **Action:** Check if write permissions are provided for file \([0]\).

   **Level:** HIGH
   **Type:** ERROR
   **Impact:** MESSAGE

MFT-05021: IO Exception occurred while closing file \([0]\) after writing. This file was received from endpoint \([1]\).
   **Cause:** File \([0]\) written, but IO exception occurred while closing the file, which was received from endpoint \([1]\).
   **Action:** Check if write permissions are provided for the file \([0]\).

   **Level:** HIGH
   **Type:** ERROR
   **Impact:** MESSAGE

MFT-05022: Source Message was found null while transferring to endpoint \([0]\).
   **Cause:** Source message found null.
   **Action:** Resubmit the message. If the problem persists, contact Oracle Support Services.

   **Level:** HIGH
   **Type:** ERROR
   **Impact:** MESSAGE

MFT-05023: The JNDI queue name specified is null.
   **Cause:** Adapter initialization failed because of invalid queue name.
   **Action:** Try again. If the problem persists, please contact Oracle Support Services.

   **Level:** HIGH
   **Type:** ERROR
   **Impact:** SYSTEM

MFT-05024: Exception occurred in postprocessing while moving or renaming the file after sending to \([5]\). Source File Name \([1]\), Source Folder \([0]\), Target Folder \([2]\), Target File Name \([3]\), Target File Naming Convention \([4]\).
   **Cause:** Error occurred while moving or renaming a file after sending.
   **Action:** Check the adapter properties and resubmit the message. If the problem persists, please contact Oracle Support Services.

   **Level:** HIGH
   **Type:** ERROR
   **Impact:** MESSAGE

MFT-05025: Exception occurred while creating directory \([0]\) for storing file \([1]\) received from endpoint \([2]\).
   **Cause:** Could not create directory \([0]\).

   **Level:** HIGH
   **Type:** ERROR
   **Impact:** MESSAGE
Action: Ensure that permissions (for creating directory and files) are assigned to this folder.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05027: Exception occurred while looking for directory for storing file \{0\} received from endpoint \{1\}.
Cause: Error occurred while looking for directory for storing file.
Action: Check server properties. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05028: Exception occurred while deactivating poller service for end point \{0\}.
Cause: Error occurred while deactivating poller service.
Action: Check the adapter properties and try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05029: Exception occurred while closing poller service for endpoint \{0\}.
Cause: Error occurred while closing poller service.
Action: Check the adapter properties and try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05030: Configuration mismatch found while polling to endpoint \{0\}. Alert code \{1\}.
Cause: Configuration mismatch found while polling to endpoint \{0\}.
Action: Ensure that the host name, port, username and password configured are correct and that the server is running.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05031: Error occurred while reading metadata of file \{0\} from endpoint \{1\}.
Cause: Error occurred while reading metadata of file.
Action: Check the adapter properties and try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05032: Unexpected error during target delivery.
Cause: Unexpected error during target delivery.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.
Level: LOW
Type: ERROR
Impact: MESSAGE
MFT-05033: Error while creating the B2B/Healthcare endpoint {0} during target delivery.
Cause: Unexpected error while creating a b2b/healthcare endpoint.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05034: Error while delivering the payload to B2B/Healthcare target.
Cause: Unexpected error while delivering the payload.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05035: Error occurred while closing connection after getting size for file {{0}} for end point {{1}}.
Cause: Error occurred while closing adapter connection.
Action: Check adapter properties and try again. If the problem persists, contact Oracle Support Services.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05036: Error occurred while closing connection after pausing transfer for end point {{0}}.
Cause: Error occurred while closing adapter connection.
Action: Check adapter properties and try again. If the problem persists, contact Oracle Support Services.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05037: Value for property 'Host Name' is missing.
  Cause: No value specified for property 'Host Name' in the input connection properties.
  Action: Specify a value for 'Host Name' in the connection properties for the endpoint and try again.

  Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05038: Value for property 'Port' is missing.
  Cause: No value specified for property 'Port' in the input connection properties.
  Action: Specify a value for 'Port' in the connection properties for the endpoint and try again.

  Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05039: Value for property 'User Name' is missing.
  Cause: No value specified for property 'User Name' in the input connection properties.
  Action: Specify a value for 'User Name' in the connection properties for the endpoint and try again.

  Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05040: Error occurred during shutting down while clearing JCA resources.
  Cause: Unexpected error occurred while clearing JCA resources.
  Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

  Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-05400: Invalid SOAP request received by MFTService on endpoint {0}.
  Cause: SOAP message contains invalid XML.
  Action: Review the SOAP request and check if the SOAP message contains invalid XML. This can be done by copying the request to a temporary XML file and opening the file in a web browser.

  Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05401: MFT Service could not deliver message to Web Service endpoint {0}.
  Cause: Web Service endpoint configured in MFT Target definition is either invalid or down.
  Action: Check the Target configuration in the MFT console and verify the Web Service configuration parameters such as url, Port and Service. Try connecting to the configured endpoint by typing URL in a web browser.
  Level: CRITICAL
  Type: ERROR
  Impact: SYSTEM

MFT-05402: Invalid SOAP request received by MFT Discovery Service from URL {0}.
  Cause: SOAP Message contains invalid XML.
  Action: Review the SOAP request and check if the SOAP message contains invalid XML. This can be done by copying the request to a temporary XML file and opening the file in a web browser.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05403: Discovery service is unable to query MFT Sources for the given application {0} and search Filter {1}.
  Cause: MFT Source Message Table cannot be queried due to a Persistence Error.
  Action: Verify whether the MFT Server is initialized successfully in the MFT Diagnostic Log. If there are issues in loading MFT persistence, try restarting MFT.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05404: Discovery service is unable to create a SOAP response for the given application {0} and search Filter {1}.
  Cause: SOAP exception in creating SOAP response.
  Action: Contact your Oracle Administrator.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05405: SOAP Request received on endpoint url {0} contains multiple attachments, which is not supported in MFT.
  Cause: SOAP message contains an AttachmentPart that has multiple attachments. MFT does not support multiple attachments inline. Only one attachment is allowed.
  Action: Review the SOAP request and make sure that the AttachmentPart has only one attachment.
  Level: HIGH
  Type: ERROR
  Impact: MESSAGE
MFT-05406: MFT Service is unable to process the AttachmentPart in the SOAP request received from endpoint url {0}.

**Cause:** IO error in reading the attachment stream.

**Action:** Review the SOAP request and make sure the attachment is configured according to SOAP standards.

**Level:** HIGH
**Type:** ERROR
**Impact:** MESSAGE

MFT-05407: MFT Service is unable to process inline payload received from endpoint url {0}.

**Cause:** IO exception in reading inline Payload embedded in the SOAP body.

**Action:** Review the SOAP request and make sure the inline payload embedded in the SOAP body conforms to the schema defined in the MFT Service wsdl.

**Level:** HIGH
**Type:** ERROR
**Impact:** MESSAGE

MFT-05408: MFT Service is unable to process reference payload coming from the endpoint url {0}.

**Cause:** IO exception in reading Reference payload embedded in the SOAP body.

**Action:** Review the SOAP request and make sure the FileReference or FTPReference element in the SOAP body conforms to the schema defined in the MFT Service wsdl.

**Level:** HIGH
**Type:** ERROR
**Impact:** MESSAGE

MFT-05409: MFT Service is unable to process SOAP Headers coming from the endpoint url {0}.

**Cause:** IO exception in reading SOAP Headers embedded in the SOAP message.

**Action:** Review the SOAP request and make sure the headers conform to the MFTHeader element schema defined in the MFT Service wsdl.

**Level:** HIGH
**Type:** ERROR
**Impact:** MESSAGE

MFT-05410: Invalid url in Reference Payload element received on endpoint url {0} for reference type {1}.

**Cause:** For an incoming SOAP request containing a Reference Payload element, the URL defined in the message is invalid.

**Action:** Review the SOAP request and verify that the URL element in the Reference Payload contains a valid URL.

**Level:** HIGH
**Type:** ERROR
**Impact:** MESSAGE
MFT-05410:
  Cause:
  Action:
  Level: HIGH
  Type: ERROR
  Impact: MESSAGE

MFT-05411: Unable to create SOAP message from MessageFactory.
  Cause: Unknown error due to the SOAP MessageFactory being unable to create
  the SOAP message.
  Action: Contact the Oracle Administrator.
  Level: CRITICAL
  Type: ERROR
  Impact: SYSTEM

MFT-05412: MFT Web Service transport is unable to create a SOAP Message with
  InlinePayload for Web Service endpoint {0}.
  Cause: SOAP exception while adding InlinePayload element in the SOAP
  message. This could be due to invalid inline payload data passed to Transport
  layer
  Action: Review the SOAP target configured in the MFT console to verify the
  Payload type and message type configuration. Also verify that the InlinePayload
  being passed to transport layer.
  Level: CRITICAL
  Type: ERROR
  Impact: MESSAGE

MFT-05413: MFT Web Service transport is unable to create a SOAP Message with
  Reference Payload for Web Service endpoint {0}.
  Cause: SOAP exception while adding Reference Payload element in the SOAP
  message. This could be due to invalid Reference payload data passed to Transport
  layer
  Action: Review the SOAP target configured in the MFT console to verify the type
  of reference defined.
  Level: CRITICAL
  Type: ERROR
  Impact: MESSAGE

MFT-05414: MFT Web Service transport is unable to create SOAP Message with
  Reference of type {0} for Web Service endpoint {1}.
  Cause: SOAP exception while adding FTP reference Payload element in the SOAP
  message. This could be due to invalid Reference payload data passed to the
  transport layer
  Action: Review the SOAP target configured in the MFT console to verify the type
  of reference defined.
  Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05415: MFT Web Service transport is unable to create SOAP Message with Base64 Encoded format for Web Service endpoint {0}.
Cause: Error in encoding the SOAP message in Base64 format.
Action: Review the SOAP target configured in the MFT console to verify the payload type and MessageType.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05416: MFT Web Service transport is unable to create SOAP Message with SOAP Header {0} for Web Service endpoint {1}.
Cause: SOAP Exception while adding the SOAP headers to SOAP Message.
Action: Contact the Oracle Administrator.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05417: MFT Web Service transport is unable to create SOAP Message with additional transport headers for Web Service endpoint {0}.
Cause: SOAP Exception while adding the HTTP headers to SOAP Message.
Action: Review Target configuration in MFT console to verify Additional headers field. Headers format is [header1]=[value1]#[header2]=[value2].

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05418: MFT Service is unable process SOAP Message containing Base64 content for Web Service endpoint {0}.
Cause: Error in Decoding the SOAP message containing Inline payload in Base64 format. This could be because the message does not contain a valid Base64 format.
Action: Review the SOAP target configured in the MFT console to verify the payload type and MessageType. Also check the SOAP request to validate the Base64 format.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05419: URL {0} configured for Web Service endpoint is invalid.
Cause: Web Service endpoint configured in MFT Target definition is either invalid or down.
Action: Check the target configuration in the MFT console and verify the Web Service URL. Try connecting to the configured endpoint by typing the URL in a web browser.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05420: MFT webservice Transport has encountered error parsing Inline XML payload for webservice endpoint [0].
Cause: Error in parsing Inline XML payload. This could be because the Inline payload does not contain a valid XML format.
Action: Review the SOAP target configured in the MFT console to verify the payload type and MessageType. Also check the inline payload to validate the XML format.

Level: High
Type: ERROR
Impact: Message

MFT-05421: MFT webservice Transport has encountered error processing the payload stream.
Cause: Error in reading the inline payload stream. This could be because the payload stream may be Null or contains invalid data.
Action: Review the SOAP target configured in the MFT console to verify the payload type and MessageType. Also check the payload received from MFT Source contains valid data.

Level: High
Type: ERROR
Impact: Message

MFT-05501: The [0] record [1] is already persisted.
Cause: The new record you are trying to persist is already available in the database.
Action: Check the details of the record you are trying to insert and try again.

Level: CRITICAL
Type: ERROR
Impact: MESSAGE

MFT-05502: No instance record found for message ID [0].
Cause: There was no instance record found in the database.
Action: Check the ID of the entity.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-05503: Error occurred while performing persistence operation.
Cause: Exception occurred while performing the persistence operation.
Action: Review diagnostic log for detailed error message.

Level: LOW
Type: ERROR
Impact: MESSAGE
MFT-05504: Could not perform the persistence lock operation \(0\) for entity \(1\).
**Cause:** Exception occurred while performing the persistence operation.
**Action:** The exception may have occurred while performing the corresponding database lock operation. Check the logs for the exception trace.

**Level:** LOW  
**Type:** ERROR  
**Impact:** MESSAGE

MFT-05505: Error while deleting Data Storage \(0\).
**Cause:** Error occurred while deleting the Data Storage entity in the database.
**Action:** Make sure the Data Storage is not associated with any entity. Check the logs for the exception trace.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** MESSAGE

MFT-05506: Error deleting Source Message for source \(0\).
**Cause:** Error occurred while deleting the Source Message entity in the database.
**Action:** Make sure the source is not associated with any transfer. Check the logs for the exception trace.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** MESSAGE

MFT-05507: Error deleting transfer instance for transfer \(0\).
**Cause:** Error occurred while deleting the transfer instance entity in the database.
**Action:** Check the logs for the exception trace.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** MESSAGE

MFT-05508: Error deleting Target Message \(0\).
**Cause:** Error occurred while deleting the Target Message entity in the database.
**Action:** Check the logs for the exception trace.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** MESSAGE

MFT-05509: No retry info record exists in database.
**Cause:** Internal error.
**Action:** Contact Oracle Support Services.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** MESSAGE
MFT-05510: No source lifecycle record exists for source name {0} and label {1} in database.
  Cause: No record found.
  Action: Redeploy the source and resubmit the message.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05511: No source record found for message ID {0}.
  Cause: There was no source record found in the database.
  Action: Check the ID of the entity.
  Level: LOW
  Type: ERROR
  Impact: MESSAGE

MFT-05512: No transfer instance record found for message ID {0}.
  Cause: There was no transfer instance record found in the database.
  Action: Check the ID of the entity.
  Level: LOW
  Type: ERROR
  Impact: MESSAGE

MFT-05513: No target message record found for ID {0}.
  Cause: There was no transfer message record found in the database.
  Action: Check the ID of the entity.
  Level: LOW
  Type: ERROR
  Impact: MESSAGE

MFT-05514: Source {0} is not deployed.
  Cause: Source is not deployed.
  Action: Deploy the source and retry.
  Level: LOW
  Type: ERROR
  Impact: SYSTEM

MFT-05515: Transfer {0} is not deployed.
  Cause: Transfer is not deployed.
  Action: Deploy the transfer and retry.
  Level: LOW
  Type: ERROR
  Impact: SYSTEM

MFT-05516: Target {0} is not deployed.
Cause: Target is not deployed.
Action: Deploy the target and retry.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-05517: Error deleting source {0}.
Cause: Error occurred while deleting the source in the database.
Action: Check the logs for the exception trace.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05518: Error deleting transfer {0}.
Cause: Error occurred while deleting the transfer in the database.
Action: Check the logs for the exception trace.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05519: Error deleting target {0}.
Cause: Error occurred while deleting the target in the database.
Action: Check the logs for the exception trace.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05520: Error fetching sources with label {0}.
Cause: Error occurred while fetching sources with this label from the database.
Action: Check the logs for the exception trace.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05521: Error fetching transfers with label {0}.
Cause: Error occurred while fetching transfers with this label from the database.
Action: Check the logs for the exception trace.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05522: Error fetching targets with label {0}.
Cause: Error occurred while fetching targets with this label from the database.
Action: Check the logs for the exception trace.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05523: Batch id [{0}] provided by user for purge recovery does not exist.
Cause: Batch id [{0}] provided by user for purge recovery does not exist.
Action: Check the passed batch id and try again. You can start a new purge also by passing the batch id as blank. Contact Oracle Support if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05524: Batch id [{0}] provided by user, for filesystem purge, does not exist.
Cause: Batch id [{0}] provided by user, for filesystem purge, does not exist.
Action: Check the passed batch id and try again. Contact Oracle Support if the problem persists.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-05525: Filesystem purge is already run successfully for the provided batch id [{0}].
Cause: Filesystem purge is already run successfully for the provided batch id [{0}].
Action: Check the passed batch id and try again. Contact Oracle Support if the problem persists.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-05526: Filesystem purge can not be run without a valid Root Directory configured.
Cause: No Root directory configured in the Application Settings.
Action: Check the Root Directory under Hosted Server properties. Contact Oracle Support if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05527: Runtime Purge is not yet executed for the batch id [{0}]. FS Purge can not be run without first running the Runtime Purge.
Cause: Runtime Purge is not yet executed for the batch id. FS Purge can not be run without first running the Runtime Purge.
Action: Check the Root Directory under Hosted Server properties. Contact Oracle Support if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05528: Filesystem archive is already run successfully for the provided batch id [{0}].
Cause: Filesystem archive is already run successfully for the provided batch id [{0}].
Action: Check the passed batch id and try again. Contact Oracle Support if the problem persists.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-05529: Batch id [{0}] provided by user, for filesystem archive, does not exist.
Cause: Batch id [{0}] provided by user, for filesystem archive, does not exist.
Action: Check the passed batch id and try again. Contact Oracle Support if the problem persists.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-05530: Filesystem archive can not be run without a valid Root Directory configured.
Cause: No Root directory configured in the Application Settings.
Action: Check the Root Directory under Hosted Server properties. Contact Oracle Support if the problem persists.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05531: Error while creating the archive file {0}. Error Message: {1}
Cause: Error while creating the archive file.
Action: Check the Root Directory under Hosted Server properties. Contact Oracle Support if the problem persists.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05532: Filesystem Archive operation started for the provided batch id [{0}] but not complete. Filesystem purge can not continue.
Cause: Filesystem Archive operation started for the provided batch id but not complete. Filesystem purge can not continue.
Action: Check the passed batch id and try again. Contact Oracle Support if the problem persists.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-05533: Error while adding payload {0} to the archive file. Error Message: {1}
Cause: Filesystem error while adding payload file to the archive.
Action: Check the payload file path, permissions and try again. Contact Oracle Support if the problem persists.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-05534: Error while working with archive file {0}. Error Message: {1}
Cause: Filesystem error while working with archive file.
Action: Check the archive file path, permissions and try again. Contact Oracle Support if the problem persists.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-05535: Error while working with archive file {0} for restore. Error Message: {1}
Cause: Filesystem error while working with archive file.
Action: Check the archive file path, permissions and try again. Contact Oracle Support if the problem persists.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-05802: Exception occurred while querying for ESS job definition [0].
Cause: Unexpected exception occurred while querying for the ESS job definition [0].
Action: Ensure that the MFT Custom Hosting App is properly deployed. For further details, contact Oracle Support Services.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05806: Exception occurred while looking up JNDI context.
Cause: Unexpected exception occurred while looking up the JNDI context.
Action: Check the JNDI configuration for ESS on your application server.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05807: Exception occurred while looking up EJB [0].
Cause: Could not look up ESS EJB [0].
Action: Ensure that the MFT custom hosting app (MFTCustomHostingApp) is installed properly.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05808: Unexpected error occurred while submitting an ESS job with details:
job type [{0}], schedule name [{1}], job description [{2}], schedule time [{3}].
Cause: Unexpected error occurred while submitting an ESS job.
Action: Check the schedule details and deploy again. Also verify that ESS environment is up and running.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05809: [0]
Cause: Validation failed for schedule.
Action: Check your schedule details. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05810: Exception occurred while looking for schedule with name [{0}].
Cause: Unexpected exception occurred while looking for schedule with name [{0}].
Action: Ensure that the schedule is attached to the artifact and try deploy again. For further details, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05811: Could not find schedule with name [{0}].
Cause: Could not find a schedule with name [{0}].
Action: Ensure that the schedule is attached with artifact and try deploy again. For further details, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05812: Exception occurred while opening ESS runtime service. Event: [{0}].
Cause: Could not open ESS runtime service.
Action: Check that ESS environment is up and running.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05813: Exception occurred while opening ESS metadata service. Event: [{0}].
Cause: Could not open ESS metadata service
Action: Check that ESS environment is up and running.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05814: Exception occurred while closing ESS runtime service. Event: [0].
Cause: Could not close ESS runtime service.
Action: Check that ESS environment is up and running.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05815: Exception occurred while closing ESS runtime service. Event: [0].
Cause: Could not close ESS metadata service.
Action: Check that ESS environment is up and running.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05816: Could not find ESS job with id [0] while cancelling.
Cause: Could not find the ESS job while cancelling.
Action: Ignore this exception. A new job has been submitted as part of a new deployment.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05817: Exception occurred while cancelling the ESS job with ID [0].
Cause: Illegal Job State Found. Cannot be cancelled.
Action: Try again or contact Oracle Support Services.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05818: Could not find ESS job request with ID [0]. Event [0].
Cause: Could not find ESS job request with id [0].
Action: Check that the artifact is deployed and try again.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05819: Unexpected error occurred for job request ID [0]. Event [1].
Cause: Unexpected error occurred for job request ID [0].
**Action:** Check that the artifact is deployed and try again.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-05821: Exception occurred while looking up EJB [{0}].  
**Cause:** Could not look up ESS EJB [{0}].  
**Action:** Ensure that the MFT custom hosting app (MFTCustomHostingApp) is installed properly. For further details, contact Oracle Support Services.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-05822: Error occurred for schedule name [{1}]. Event: [{0}].  
**Cause:** Error occurred for schedule name [{1}]. Event: [{0}].  
**Action:** Check the schedule details and try again.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-05823: Validation failed for schedule name [{1}]. Event [{0}].  
**Cause:** Validation failed for schedule name [{1}]. Event: [{0}].  
**Action:** Check the schedule details and try again.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-05824: Schedule already exists with name [{1}]. Event: [{0}].  
**Cause:** Schedule already exists with name [{1}]. Event: [{0}].  
**Action:** Check the schedule details and try again.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-05825: Null schedule passed for event [{0}].  
**Cause:** Null schedule passed for event [{0}].  
**Action:** Check the schedule details and try again.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-05826: ID in schedule found null for event [{0}].  
**Cause:** ID in schedule found null for event [{0}].  
**Action:** Check the schedule details and try again.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05827: Exception occurred for schedule [1]. Event: [0].
Cause: Unexpected exception occurred for schedule [1]. Event: [0].
Action: Check the schedule details and try again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05828: Validation failed for schedule [1]. Event: [0].
Cause: Validation failed for schedule [1]. Event: [0].
Action: Check the schedule details and try again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05829: Schedule object found null for event [0].
Cause: Schedule object found null for event [0].
Action: Check the schedule details and try again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05830: Passed schedule name is null for event [0].
Cause: Passed schedule name is null for event [0].
Action: Check the schedule details and try again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05831: No schedule found with given name [0].
Cause: No schedule found with given name [0].
Action: Check the schedule details and try again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05832: Unexpected error occurred while querying for schedule with name [0].
Cause: Unexpected error occurred while querying for schedule with name [0].
Action: Check the schedule details and try again. Also verify that ESS environment is up and running.

Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05833: Schedule name passed as NULL while deleting schedule.
Cause: Schedule name passed as NULL while deleting schedule.
Action: Check the schedule details and try again.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05834: Unexpected error occurred while deleting schedule with name [0].
Cause: Unexpected error occurred while deleting schedule with name [0].
Action: Check the schedule details and try again. Also verify that ESS environment is up and running.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05841: Could not find job definition with name [0].
Cause: Could not find job definition with name [0].
Action: Ensure that the MFT Custom Hosting App is deployed. For further details, contact Oracle Support Services.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05842: Exception occurred while checking if schedule with name [0] is in use.
Cause: Unexpected exception occurred while checking if schedule with name [0] is in use.
Action: Check the database connection.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05843: Could not find ESS job with id [0] while doing operation [1].
Cause: Could not find the ESS job while doing a specified operation.
Action: Ignore this exception. Job has been cancelled already as part of deployment cleanup.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05844: Exception occurred while doing the operation [1] with ESS job ID [0].
Cause: Illegal Job State Found. Cannot do the specified operation.
Action: Try again or contact Oracle Support Services.
Level: HIGH  
Type: ERROR  
Impact: SYSTEM  

MFT-05845: Operation {1} with ESS job ID [{0}] is not allowed.
Cause: Specified operation is not allowed on the given job.
Action: Try again or contact Oracle Support Services.

Level: HIGH  
Type: ERROR  
Impact: SYSTEM  

MFT-05846: {0}
Cause: Exception occurred while interacting with ESS
Action: Check your ESS environment and try again.

Level: HIGH  
Type: ERROR  
Impact: SYSTEM  

MFT-05847: {0}
Cause: Exception occurred while invoking the ESS through security interceptor.
Action: Check your ESS environment and try again.

Level: HIGH  
Type: ERROR  
Impact: SYSTEM  

MFT-06001: Error while initializing security for stripe {0}.
Cause: An error occurred while defining the required policy for the application stripe.
Action: Check whether the application has all the required permissions in the EM and policy store connection properties. Review the diagnostic log for the exact error, which begins with the string 'ERROR'. Contact Oracle Support Services if the problem persists.

Level: HIGH  
Type: ERROR  
Impact: SYSTEM  

MFT-06002: An error occurred while performing the security operation.
Cause: An error occurred while executing the security operation on the specified application stripe.
Action: Check the security store configuration in the WebLogic console or jps-config.xml and default permissions of MFT in the policy store. Review the diagnostic log for the exact error.

Level: HIGH  
Type: ERROR  
Impact: SYSTEM
MFT-06003: Error while initializing the identity store for default realm.
  **Cause:** An error occurred while initializing identity store with default security realm.
  **Action:** Check the security store configuration in the WebLogic console or jps-config.xml and default permissions of MFT in the policy store. Review the diagnostic log for the exact error.
  **Level:** HIGH
  **Type:** ERROR
  **Impact:** SYSTEM

MFT-06005: Illegal MFTESPermission resource name {0}.
  **Cause:** The resource name is not in the expected MFT ES Permission format.
  **Action:** Correct the resource name parameter using the format ‘resourceName={ResourceName},includeSubfolders=true | false,,serverType=FTP | SFTP’.
  **Level:** CRITICAL
  **Type:** ERROR
  **Impact:** SYSTEM

MFT-06006: Error while performing the SSH Key store operations on key type:{0} and alias {1}.
  **Cause:** An error occurred while getting the SSH key store keys or aliases from the specified location.
  **Action:** Check the key store location in the metadata repository and ensure that the required keys are present in the specified location. Review the diagnostic log for the exact error, and Contact Oracle Support Services if the problem persists.
  **Level:** CRITICAL
  **Type:** ERROR
  **Impact:** SYSTEM

MFT-06007: Secured Method {0} is not annotated with required parameters.
  **Cause:** An error occurred while checking the access provisioning before executing the method.
  **Action:** Annotate the method with the required parameters.
  **Level:** CRITICAL
  **Type:** ERROR
  **Impact:** SYSTEM

MFT-06008: Error while performing the credential operation {0} for alias {1}.
  **Cause:** An error occurred while performing the credential operation.
  **Action:** Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.
  **Level:** CRITICAL
  **Type:** ERROR
  **Impact:** SYSTEM
MFT-06009: Error while performing the key store operation {0}.
  Cause: An error occurred while performing the key store operation.
  Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

  Level: CRITICAL
  Type: ERROR
  Impact: SYSTEM

MFT-06010: An error occurred while performing the security operation on stripe {0}, store {1} and alias {2}.
  Cause: An error occurred while executing the security operation on the specified application stripe.
  Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-06011: Invalid key file location [{0}]. The given path does not exist.
  Cause: The given key file location does not exist or the key file is an empty file.
  Action: Provide the correct path for export and while importing make sure that valid non empty key file exists at the given path.

  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-06012: The imported key file {0} has multiple key rings. Importing multiple key rings is not supported.
  Cause: The key file being imported has more than one PGP key.
  Action: Import a valid key file that has only one key ring.

  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-06013: Unable to get the resource type {0} while granting the permission for resource {1}.
  Cause: Internal resource type definition might have failed, there is no associated resource type defined in the policy store.
  Action: Resource type should be predefined before granting the permission by the security layer. Contact Oracle Support Services if the problem persists.

  Level: HIGH
  Type: ERROR
  Impact: SYSTEM
MFT-06014: Unable to get the Principal of user/group {0} with type {1}.
   Cause: The principal type specified for permission grant is invalid.
   Action: Grant the permission with the valid principal type which can be a User or
   Group or Application Role.

   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-06015: Error while granting the permission {2} to resource {0} for principal(s){1}.
   Cause: An exception occurred while granting the permission for a resource.
   Action: Check the parameters used for granting the permission. Contact Oracle
   Support Services if the problem persists.

   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-06016: Error while getting principals and actions of resource {0} with type {1}.
   Cause: An exception occurred while getting the principals and actions of a
   resource.
   Action: Check the resource name for validity. Contact Oracle Support Services if
   the problem persists.

   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-06017: Error while revoking the permission {2} of a resource{0} for
   principal(s){1}.
   Cause: An exception occurred while deleting the permissions of a resource.
   Action: Check the revoke parameters. Contact Oracle Support Services if the
   problem persists.

   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-06018: Authorization failure for principal(s) {0} to resource {1} for action {2}.
   Cause: Access control exception occurred for a user while doing an operation.
   Action: If this error encountered even if the operation was allowed for the user,
   then check the permissions of the user. Contact Oracle Support Services if the
   problem persists.

   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-06019: Unable to create the MFT OPSS resource type {0}.
   Cause: An error occurred while defining the resource type.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06020: Unable to create the Principal object for principal name {0} and type {1}.
Cause: An error occurred while creating the principal object.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06021: Unable to get the members of the role {0}.
Cause: An error occurred while fetching the members of a role.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06022: Error while fetching all the application roles of application stripe {0}.
Cause: An error occurred while fetching the all the application roles.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06023: Error while fetching all the application roles of principal {0} with type {1}.
Cause: An error occurred while fetching the all the application roles of a principal.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06024: Error while fetching the granted resources of a principal {0}.
Cause: An error occurred while fetching the resources of a principal.
**Action:** Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

**MFT-06025:** Error while deleting all the grants of a resource {0} with type {1}.

**Cause:** An error occurred while deleting all the grants of a resource.

**Action:** Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

**MFT-06026:** Error while creating an application role with name {0}.

**Cause:** An error occurred while creating an application role.

**Action:** Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

**MFT-06027:** Error while deleting the application role with name {0}.

**Cause:** An error occurred while deleting an application role.

**Action:** Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

**MFT-06028:** Error while adding the member(s) {0} to application role {1}.

**Cause:** An error occurred while adding members to an application role.

**Action:** Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

**MFT-06029:** Error while removing the member(s) {0} from application role {1}.

**Cause:** An error occurred while removing members of an application role.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06030: Unable to authenticate the user {0}.
Cause: An error occurred while authenticating the user.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06031: Unable to get the enterprise groups of the user {0}.
Cause: An error occurred while getting the enterprise groups of the user.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06032: Error while retrieving the list of users/groups from identity store with criteria {0}.
Cause: An error occurred while fetching the users from identity store with search criteria.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06033: Invalid value [{0}] for parameter [{1}].
Cause: Parameter value supplied is incorrect.
Action: Provide the expected parameter value.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06034: The imported key file is not having valid encryption/decryption key.
Cause: The key file being imported has no valid PGP key.
Action: Import a key file that has a valid PGP key.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06035: A key already exists for the given key alias {0} in credential store.
Cause: A key is already created for the given key alias in the credential store.
Action: Import the key file again with a different key alias.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06036: Key not found for the given key alias {0} in credential store.
Cause: No key was found for the given key alias in the credential store.
Action: Check if a key for the given key alias has been generated or not in the credential store.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06037: Invalid key file [{0}]. The given key file is an empty file.
Cause: The given key file location to export CSF Key does not exist.
Action: Provide the correct path for export and while importing make sure that valid non empty key file exists at the given path.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06038: Path {0} specified on MFT embedded server for the resource is invalid.
Cause: No directory exists on MFT Embedded server specified by given path.
Action: Check if path specified is a valid directory on MFT Embedded server. If directory does not exist correct the Path input to point to existing directory OR create a new directory with the given Path.

Level: MEDIUM
Type: ERROR
Impact: MESSAGE

MFT-06039: Error in configuring home directory {0} for user {1}.
Cause: Error in configuring user home directory due to error accessing metadata for User/Group.
Action: Review Metadata repository configuration for MFT Embedded Server users. Try running MFT metadata export command to see if metadata repository configured properly.

Level: MEDIUM
Type: ERROR
Impact: MESSAGE
MFT-06040: Invalid Embedded Server types specified in the input.
  **Cause:** Server Types specified in the input does not belong to one/more of the types FTP,SFTP.
  **Action:** Provide server types which contains one ore more values FTP,SFTP.
  **Level:** MEDIUM
  **Type:** ERROR
  **Impact:** MESSAGE

MFT-06041: Invalid permissions set {0} provided.
  **Cause:** The permissions set provided contains one or more values that are not from the supported set 'READ,WRITE,DELETE,LIST'.
  **Action:** Provide permissions that contains one or more values from supported set 'READ,WRITE,DELETE,LIST'.
  **Level:** MEDIUM
  **Type:** ERROR
  **Impact:** SYSTEM

MFT-06042: Error while registering the WSM Security Policies to endpoint {0}.
  **Cause:** An exception occurred while registering the WSM policies with WSM Policy Manager.
  **Action:** Check the endpoint policies and WSM Manager configuration.
  **Level:** MEDIUM
  **Type:** ERROR
  **Impact:** SYSTEM

MFT-06043: Error while unregistering the WSM Security Policies of endpoint {0}.
  **Cause:** An exception occurred while unregistering the WSM policies from WSM Policy Manager.
  **Action:** Check the endpoint policies and WSM Manager configuration.
  **Level:** MEDIUM
  **Type:** ERROR
  **Impact:** SYSTEM

MFT-06044: Error while deleting the WSM assembly file of endpoint {0}.
  **Cause:** An exception occurred while deleting the WSM assembly file from the MDS repository.
  **Action:** Check the MDS configuration and endpoint availability.
  **Level:** MEDIUM
  **Type:** ERROR
  **Impact:** SYSTEM

MFT-07001: Error while creating audit record for the event {0}.
  **Cause:** Error while creating audit record for the event.
  **Action:** Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07002: Error while initializing audit framework.
Cause: Error initializing audit framework.
Action: Check Audit configuration in EM console. Contact Oracle Administrator.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07003: Audit enabled method [0] is not annotated with the required parameters.
Cause: An error occurred during auditing after executing a method.
Action: Annotate the method with the required parameters.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-07201: Error while sending notification.
Cause: Error while sending notification.
Action: Check the notification settings. Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07202: Error while sending email notification.
Cause: Error while sending email notification.
Action: Check the notification settings. Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07203: Error while sending sms notification.
Cause: Error while sending sms notification.
Action: Check the notification settings. Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07401: Callout with name: {0} exists in the Metadata Store. Not creating a new one.

Cause: An existing callout with same name was found in the Metadata Store.
Action: Change the callout name and try again. Refer to the MFT utilities documentation to determine the arguments and their types for the given command.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07402: Exception while creating Callout.

Cause: EJBException thrown by utility while creating callout.
Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07403: Callout definition XML input file [{0}] not found.

Cause: Callout definition XML input file not found. The given file name or file path is incorrect.
Action: Provide a valid file path and try again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07404: Callout definition XML File validation failed. Please correct the errors and rerun the utility.

Cause: Callout definition XML File validation failed. Please correct the errors and rerun the utility.
Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07405: Invalid Notification event type: {0}.

Cause: Invalid notification event type.
Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07406: Contact Information not found. Type: {0} Value: {1}.
  Cause: Contact not found. Add the contact to the system and rerun the utility.
  Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

  Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07407: An Exception occurred while running MFT utility.
  Cause: An Exception occurred while running the MFT utility.
  Action: Refer to the MFT utilities documentation to determine arguments and their types for the given command to make sure correct values are passed to the given method.

  Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07408: Contact already exists. Type: {0} # Value: {1}.
  Cause: A contact of the given type and value already exists in the system.
  Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

  Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07409: Error while creating contact of type: {0} and value: {1}.
  Cause: An error occurred while creating a new contact of the given type and value.
  Action: Refer to the MFT utilities help to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

  Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07410: Error while deleting callout: {0}.
  Cause: An error occurred while deleting the given callout.
  Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

  Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07411: Error occurred while listing all the callouts in the system.
  Cause: An error occurred while listing all the callouts in the system.
  Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.
  Level: HIGH

Type: ERROR
Impact: SYSTEM

MFT-07412: Error while adding a contact to notification event. Event: {0} # Contact type: {1} # Value: {2}.
  Cause: An error occurred while adding a contact to the notification event.
  Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.
  Level: HIGH

Type: ERROR
Impact: SYSTEM

MFT-07413: Error while removing a contact from a notification event. Error Message: {0}.
  Cause: An error occurred while removing a contact from the notification event.
  Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.
  Level: HIGH

Type: ERROR
Impact: SYSTEM

MFT-07414: Error while deleting a contact from the system. Error Message: {0}.
  Cause: An error occurred while deleting a contact from the system.
  Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.
  Level: HIGH

Type: ERROR
Impact: SYSTEM

MFT-07415: Unsupported artifact type found. Artifact type: {0}.
  Cause: Unsupported artifact type found. Supported values are SOURCE, TARGET and TRANSFER.
  Action: Contact the Oracle Administrator.
  Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07416: Exception while getting the id for source artifact [{0}].
  Cause: Exception occurred while getting the source id from metadata store for the
  given name.
  Action: Contact the Oracle Administrator.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-07417: Cannot delete the contact. Given contact is associated with a
 notification event. Contact type: {0} :: Value: {1}.
  Cause: Given contact is associated with a notification event. First remove the
  contact from the event and then try deleting the contact again.
  Action: Refer to the MFT utilities documentation to determine the arguments and
  their types for the given command to make sure correct values are passed to the
  given method.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-07418: Error while listing contacts from the system. Contact type: {0}.
  Cause: Error while listing the contacts of the given type. Try again.
  Action: Refer to the MFT utilities documentation to determine the arguments and
  their types for the given command to make sure correct values are passed to the
  given method.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-07419: Callout with name: {0} not found in MDS. No changes done.
  Cause: An existing callout with the given name was not found in the Metadata
  Store.
  Action: Provide a different and correct callout name and try again. Refer to the
  MFT utilities documentation to determine the arguments and their types for the
  given command.
  Level: MEDIUM
  Type: ERROR
  Impact: SYSTEM

MFT-07420: Invalid value supplied for group name. Callout definition for {0} not
 changed.
  Cause: Incorrect value provided for group name.
  Action: Valid values for group name can contain any combination of
 comma-separated values of following:
 Source-pre,Source-post,Target-pre,Target-post. Refer to the MFT utilities
documentation to determine the arguments and their types for the given command.

**Level:** MEDIUM  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07421: Error while modifying callout {0}. Error Message: {1}.**

**Cause:** An Error occurred while modifying the callout definition.  
**Action:** Refer to the MFT utilities documentation to determine the arguments and their types for the given command.

**Level:** MEDIUM  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07422: Error while creating {0} keys. Error Message: {1}.**

**Cause:** An Error occurred while creating sample keys.  
**Action:** Refer to the MFT utilities documentation to determine the arguments and their types for the given command.

**Level:** MEDIUM  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07423: Exception while getting the id for target artifact [{0}].**

**Cause:** Exception occurred while getting the target id from metadata store for the given name.  
**Action:** Contact the Oracle Administrator.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07424: Exception while getting the id for transfer artifact [{0}].**

**Cause:** Exception occurred while getting the transfer id from metadata store for the given name.  
**Action:** Contact the Oracle Administrator.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07425: Exception while getting the name for transfer artifact id [{0}].**

**Cause:** Exception occurred while getting the transfer id from metadata store for the given name.  
**Action:** Contact the Oracle Administrator.

**Level:** HIGH  
**Type:** ERROR
MFT-07426: Exception while getting the name for target artifact id [{0}].
Cause: Exception occurred while getting the target id from metadata store for the given name.
Action: Contact the Oracle Administrator.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07427: Exception while getting the name for source artifact id [{0}].
Cause: Exception occurred while getting the source id from metadata store for the given name.
Action: Contact the Oracle Administrator.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07428: Error while retrieving deployment history for transfer [{0}].
Cause: Exception occurred while retrieving deployment history information for the given transfer.
Action: Check the transfer deployment details in UI. Deploy the transfer from UI or WLST and try again.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07429: Error while retrieving deployment history for target [{0}].
Cause: Exception occurred while retrieving deployment history information for the given target.
Action: Check the target deployment details in UI. Deploy the target from UI or WLST and try again.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07430: Error while retrieving deployment history for source [{0}].
Cause: Exception occurred while retrieving deployment history information for the given source.
Action: Check the source deployment details in UI. Deploy the source from UI or WLST and try again.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07431: Error while retrieving deployment history for transfer [{0}].
Cause: Exception occurred while retrieving deployment history information for the transfer source.

Action: Check the transfer deployment details in UI. Deploy the transfer from UI or WLST and try again.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07432: Exception occurred while checking if transfer [{0}] exists in metadata store.

Cause: Exception occurred while checking if the given transfer exists in metadata store.

Action: Restore the deleted transfer artifact in metadata store and try again.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07433: Exception occurred while checking if target [{0}] exists in metadata store.

Cause: Exception occurred while checking if the given target exists in metadata store.

Action: Restore the deleted target artifact in metadata store and try again.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07434: Exception occurred while checking if source [{0}] exists in metadata store.

Cause: Exception occurred while checking if the given source exists in metadata store.

Action: Restore the deleted source artifact in metadata store and try again.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-08001: Error while reading metadata archive {0}. Error Message: {1}

Cause: An Error occurred while reading the metadata archive file.

Action: Refer to the plugin logs for more details.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-08002: Error while closing metadata archive {0}. Error Message: {1}

Cause: An Error occurred while closing the metadata archive file.

Action: Refer to the plugin logs for more details.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-08003: Error while processing metadata file {0}. Error Message: {1}
Cause: An Error occurred while either reading or parsing the metadata xml file.
Action: Refer to the plugin logs for more details.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM
MDS-00001: exception in Metadata Services layer
  Cause:  An exception occurred in the Metadata Services layer.
  Action:  Details are usually given in the cause exception. Look for messages
describing the cause exception and take the appropriate action.

  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-00002: unexpected internal error
  Cause:  An unexpected internal error occurred.
  Action:  Contact Oracle Support Services.

  Level: 1
  Type: INCIDENT_ERROR
  Impact: Programmatic

MDS-00003: error connecting to the database
  Cause:  A database connection to the metadata repository could not be
  established.
  Action:  Contact the database administrator or system administrator to get the
  problem resolved.

  Level: 1
  Type: ERROR
  Impact: Configuration

MDS-00005: unable to find XML element or text "[0]"
  Cause:  The XML element with the given local name or the text node containing
  the given data could not be located by traversing through the document while
  applying customizations to a metadata object. The internal in-memory
  MDocument structure may be corrupted.
  Action:  Retry the operation. Contact Oracle Support Services if the problem
  persists.

  Level: 1
  Type: INCIDENT_ERROR
  Impact: Programmatic

**Cause:** An attempt was made to add an attribute to an element that does not conform to the element’s schema definition.

**Action:** If the Bean API is being used, then determine if the beans need to be regenerated. Otherwise, inspect the element definition for valid attributes.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

MDS-00010: DuplicateRefException. In document [0] there are multiple elements with the same ID [1].

**Cause:** Either an element was being added with an ID that already existed within the document, or a preexisting document had multiple elements with the same ID.

**Action:** Change the ID of the elements so that there is no ID duplication.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

MDS-00011: unable to create configuration object or MDSInstance due to invalid configuration information: [0]

**Cause:** The MDS configuration was invalid.

**Action:** Refer to the MDS specification and correct the configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-00012: invalid value "[0]" for attribute [1] (type = "[2]") in metadata object [3]

**Cause:** The value provided for the named attribute was invalid. For example, this error could occur if a named JNDI connection name is incorrect.

**Action:** Provide a valid attribute value.

**Level:** 1

**Type:** ERROR

**Impact:** Data

MDS-00013: no metadata found for metadata object "[0]"

**Cause:** MDS was unable to locate the given metadata object.

**Action:** Confirm the name and location of the metadata object, its existence in the configured metadata stores, and that it is in an accessible namespace.

**Level:** 1

**Type:** ERROR

**Impact:** Data

MDS-00015: Translation ignored in document "[0]": element with localRef "[1]" not found
Cause: A translation could not be applied because the underlying element to be translated was not found.

Action: If the element is expected, check the base document and any customizations to locate it.

Level: 1
Type: ERROR
Impact: Data

MDS-00016: Ignoring customization for instruction type "[0]" in metadata object "[1]" for customization layer "[2]/"[3]": not finding element with local reference "[4]"

Cause: A customization was not applied because the underlying element to be customized was not found.

Action: If the element is expected, examine the base document and any customizations to locate the element.

Level: 1
Type: ERROR
Impact: Data

MDS-00017: Customization instruction generated for "[0]" uses local reference(s): "[1]" which is not upgrade safe.

Cause: The customization instruction contained a local reference that was not deemed safe for an upgrade operation.

Action: Ensure that the local reference used in the customization instruction would be safe during an upgrade operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00018: Fixed customization for instruction type "[0]" in metadata object "[1]" for customization layer "[2]/"[3]": not able to find the referenced element with local reference "[4]", inserted the customized element at the best possible location.

Cause: A customization was fixed because the referenced element was not found.

Action: Correct the customized element's position if needed.

Level: 1
Type: ERROR
Impact: Data

MDS-00019: Customization document contains an invalid instruction "[0]".

Cause: A customization document that was being applied contained an unrecognized instruction.

Action: Retry the operation. If necessary, either remove the customization document, or edit it to correct or remove the offending instruction.

Level: 1
Type: ERROR
Impact: Data

MDS-00020: Layer value "{0}" contains an invalid character.
Cause: Using a layer value that has an invalid character.
Action: Layer value should conform to MDS naming standards.
Level: 1
Type: ERROR
Impact: Data

MDS-00029: Invalid namespace: The namespace "{0}" has not been registered with the MetadataManager.
Cause: An attempt was made to access a document in an unknown location or namespace.
Action: Ensure that the namespace reported is registered in the MDS configuration.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00032: cannot parse the input file: {0}
Cause: An exception occurred while parsing the file.
Action: Record the accompanying error and contact the developers of the application.
Level: 1
Type: ERROR
Impact: Data

MDS-00033: cannot load the input file: {0}
Cause: An exception occurred while loading the file.
Action: Record the accompanying error and contact the developers of the application.
Level: 1
Type: ERROR
Impact: Data

MDS-00034: cannot write to the output file: {0}
Cause: An attempt to write to the output file failed.
Action: Record the accompanying error and contact the developers of the application.
Level: 1
Type: ERROR
Impact: Files

MDS-00035: cannot load the class: {0}.
Cause: The class file could not be loaded.
Action: Ensure the class is available on the classpath so that it can be loaded by the application.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00036: cannot instantiate the class: {0}
Cause: An exception occurred while instantiating a class.
Action: Record the accompanying error and contact the developers of the application.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00037: cannot access the class: {0}
Cause: An attempt was made to access an inaccessible class file.
Action: Record any accompanying errors and contact the developers of the application.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00039: error while attempting to parse the document {0} using SAX.
Cause: A SAX parsing exception occurred while trying to parse a document.
Action: Record the accompanying error and contact the developers of the application.

Level: 1
Type: ERROR
Impact: Data

MDS-00040: There are no namespaces registered.
Cause: The operation attempted requires at least one registered namespace.
Action: Correct the MDS configuration to include the required namespace schemas.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00041: invalid classpath entry "[0]"
Cause: An entry on the application’s classpath did not exist or was invalid.
Action: Correct the application’s classpath to remove the invalid entry.

Level: 1
Type: ERROR
Impact: Configuration
MDS-00042: Classpath "(0)" does not contain any valid directories or jar files.

Cause: The application's classpath contained no valid entries.

Action: Correct the application's classpath.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00043: A name pattern mapping for path (0) already exists.

Cause: The MDS configuration had duplicate namespace mappings.

Action: The MDS configuration must be corrected to remove the duplicate namespace mappings.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00044: Metadata for MetadataObject with name (0) already exists in the configured store.

Cause: An attempt was made to create a new Metadata Object. However an object with the same MDSReference already existed.

Action: The name or location of one of the objects must be changed.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00047: Use the flushChanges method on the MDSSession to commit the changes.

Cause: Commit was disabled in the PTransaction that was being used.

Action: Use the flushChanges method on the MDSSession to commit the changes.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00054: The file to be loaded (0) does not exist.

Cause: An attempt was made to load a persistent document using a URL but the underlying document was not found in the store.

Action: Check that the document name is correct and that the store is correctly configured.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00058: Invalid Metadata Path: Metadata Path cannot be null.

Cause: The path used to create a FileMetadataStore was empty. It must point to a directory.

Action: Correct the metadata store definition in the application configuration to specify a metadata path.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00068: Unable to find a type definition for: namespace = {0}, local name = {1}, file location = {2}
Cause: A request was made to locate a definition that did not exist in the named schema.
Action: Ensure the document contains only elements which are defined in the schema for the indicated namespace.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00084: Parameter {0} is invalid.
Cause: The supplied parameter was not of the expected type.
Action: Ensure the parameter is of the expected type.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00085: Parameter {0} is missing.
Cause: The named parameter was not supplied.
Action: Ensure that the named parameter is supplied. If transferring documents ensure a parameter file name is supplied.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00089: Parameter {0} must have a value.
Cause: A required parameter was null.
Action: Ensure that the indicated parameter is not null when the method is called.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00090: Error in JNDI lookup operation on MDSInstance name {0}, JNDI name {1}: object found {2} is an instance of class {3} classloader {4}, expected an instance of class {5} classloader {6}.
Cause: An object of an unexpected type was found, and it was bound to the JNDI context as the MDSInstance.
Action: Make sure no user-written code is binding anything to the same JNDI name. If the error occurs again try restarting the application. If the error still occurs, contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-00091: Unable to customize {0}, empty or null value for tip customization layer {1}.
Cause: The customization layer configured as the tip, has a null or empty value.
Action: Ensure that a valid value is supplied for the tip customization layer.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00092: DuplicateNodeException. The same bean instance {0} already exists in document {1}.
Cause: An element was being added that already exists as the same bean instance within the document.
Action: Either create a new bean instance or remove the duplicate before attempting to insert in the document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00093: List of values provided for customization layer {0} was empty or null.
Cause: The list of customization layer values was either empty or null.
Action: Ensure that a valid list of layer values for the customization layer is provided.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00094: List of CustLayerUsage objects provided was empty or null.
Cause: The list of CustLayerUsage objects was either empty or null.
Action: Ensure that a valid list of CustLayerUsage objects is provided.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00095: The support to transfer customization documents based on the CustConfig and excluding customization documents of specific customization layers is not yet available.
Cause: CustOption is created to transfer customization documents based on the CustConfig and to exclude customization documents of specific customization layers which is not yet supported in MDS Transfer.
Action: Ensure CustOption is not created to use CustConfig and to exclude customization documents of specific customization layers.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-00111: The value of the property {0} for the component {1} must be set to the default value.

**Cause:** The indicated component property did not have a default value.

**Action:** Ensure the component property is given a default value.

**Level:** 1

**Type:** ERROR

**Impact:** Data

MDS-00153: invalid value for indicator

**Cause:** The production of merged XML failed.

**Action:** Verify the validity of XML documents and any schemas. If necessary forward these on to Oracle Support Services with the exception message and stack trace.

**Level:** 1

**Type:** INCIDENT_ERROR

**Impact:** Data

MDS-00154: The ContentHandler {0} does not implement org.xml.sax.ext.LexicalHandler.

**Cause:** MergedXML was passed a ContentHandler that does not implement org.xml.sax.ext.LexicalHandler.

**Action:** Use a ContentHandler that implements org.xml.sax.ext.LexicalHandler.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

MDS-00155: unable to create a JSP file for document {0}

**Cause:** Oracle MDS was unable to create a JSP source document.

**Action:** Examine the MDS base document, as well as any customizations and translations. If necessary, forward these to Oracle Support Services.

**Level:** 1

**Type:** INCIDENT_ERROR

**Impact:** Files

MDS-00156: unable to create a JSP output directory {0}

**Cause:** MDS-JSP integration failed because a problem was encountered while creating a directory.

**Action:** Verify that you have permission to create this directory.

**Level:** 1

**Type:** ERROR

**Impact:** Files

MDS-00157: unable to write to JSP file {0}

**Cause:** MDS-JSP integration failed because a problem was encountered while trying to write to a file.

**Action:** Verify that you have permission to create this file.
Level: 1
Type: ERROR
Impact: Files
MDS-00158: invalid directory: {0}
  Cause: MDS-JSP integration failed. An attempt was made to write to an invalid directory.
  Action: Verify the value of the invalid directory.

Level: 1
Type: ERROR
Impact: Files
MDS-00159: Invalid value "{0}" for {1} attribute (type = "{2}") in document {4}.
  Cause: An attempt was made to write an invalid value to an attribute.
  Action: Double-check the value and attribute type.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-00160: no local name has been specified for a resource
  Cause: An attempt was made to create a resource without giving it a name.
  Action: Verify that the resource that was created is given a local name.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-00161: no local name has been specified
  Cause: An attempt was made to create a resource without giving it a local name.
  Action: Verify that the resource that was created is given a local name.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-00162: invalid attribute value
  Cause: An attempt was made to give to an invalid value to an attribute.
  Action: Verify that the attribute has a valid value.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-00163: property value missing from element
  Cause: An element was missing a property value.
  Action: Ensure that each parameter used to create the element has a property value.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00164: There is a concurrent "[1]" operation on the document "[0]".
   Cause: The document on which modification was being attempted had been updated by another user after it was retrieved.
   Action: Retrieve the document again.

Level: 1
Type: ERROR
Impact: Data

MDS-00165: metadata Object "[0]" has changed
   Cause: The creation, updating, or renaming of a metadata object failed due to conflicting changes made by another user.
   Action: Retrieve the document containing the metadata object again.

Level: 1
Type: ERROR
Impact: Data

MDS-00166: unable to locate the unique identifier, [0]:[1], that has been configured for the element [2]
   Cause: The element that required a unique identifier was created without one.
   Action: Add a unique identifier attribute to the element.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00167: Invalid local name for mapping "[0]" - an empty string is not allowed.
   Cause: A local name was given a null or empty value.
   Action: Supply a valid local name.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00168: MDS object [0] is being used after it or its MDSInstance or PManager has been released.
   Cause: An MDS object was used after it or its MDSInstance or PManager had been released
   Action: Create a new MDSInstance and re-create the MDS object.

Level: 1
Type: ERROR
Impact: Session

MDS-00169: The MDS instance is not ready for use because metadata deployment is in progress (status is "[0]"). Deployment messages so far are: "[1]".
Cause: The MDS instance cannot be used until metadata deployment has finished.
Action: Try again later after metadata deployment has completed.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00170: The MDS instance is not usable because metadata deployment failed with status "{0}".
Cause: Metadata deployment failed with the given status.
Action: Please fix the error and redeploy the application's metadata using the importMAR operation on MDS Application Runtime MBean. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00171: Document "{0}" already has unsaved updates on another instance of this metadata object in this session.
Cause: An attempt was made to update metadata using more than one instance of the same metadata object at the same time in the same session.
Action: Save the changes on the metadata object that already has updates before attempting to update it via another metadata object, or make further modifications on the metadata object on which updates have already been made.
Level: 1
Type: ERROR
Impact: Data

MDS-00172: The value "{0}" of local unique attribute {1} on the {2} element that is being inserted or updated in document {3}, is already used by a sibling element.
Cause: An attempt was made to have two local unique attributes with the same value on elements that share the same parent.
Action: Use a different value for the local unique attribute on the element that is being inserted or updated.
Level: 1
Type: ERROR
Impact: Data

MDS-00173: Attribute {0} of element {1} in document {2} has a null value.
Cause: The value of the named attribute was null.
Action: Provide a non-null value for the attribute or remove the attribute.
Level: 1
Type: ERROR
Impact: Data
MDS-00174: A tenant scoped MDSInstance {0} is being requested with a null TenantId.
   Cause: A tenant scoped MDSInstance was requested passing null for TenantId.
   Action: Supply a non null TenantId or request an unscoped MDSInstance.
   Level: 1
   Type: ERROR
   Impact: Session

MDS-00176: The operation on MDSInstance {0} cannot be performed as it is not tenant scoped.
   Cause: The operation performed on the MDSInstance was invalid with a TenantId because it was not a tenant scoped MDSInstance.
   Action: Perform the operation on an MDSInstance initialized for multitenant operation.
   Level: 1
   Type: ERROR
   Impact: Session

MDS-00177: The operation on resource {0} cannot be performed as it is not configured to be owned by the current tenant scope.
   Cause: The operation performed was illegal as the resource being created, updated or deleted has global scope and the current scope is tenant or the resource has tenant scope and the current tenant is global.
   Action: Check that the configuration of the namespaces and CustomizationClasses is correct and that the correct customization class list is being used.
   Level: 1
   Type: ERROR
   Impact: Session

MDS-00178: Multitenant MDSInstance {0} cannot be created with TenantId {1} when multitenant-capable in the persistence configuration = {2} and the JVM flag oracle.multitenant.enabled = {3}.
   Cause: A valid TenantId was not provided appropriate to the configuration.
   Action: Request an MDSInstance appropriate to the configuration.
   Level: 1
   Type: ERROR
   Impact: Session

MDS-00179: The requested MDSInstance {0} cannot be returned for TenantId {1} as it was originally created with multitenant enabled = {2}.
   Cause: The configuration at the time the MDS Instance was requested did not match with the configuration when it was originally created.
   Action: Request an MDSInstance appropriate to the original configuration.
   Level: 1
   Type: ERROR
Impact: Session

MDS-00180: Only a single tenant cache configuration is allowed.
Cause: The number of TenantCacheConfigs was not 1.
Action: Pass a single tenant cache configuration object. Although the constructor for the TenantCacheConfigs class takes an array this is reserved for future use.
Level: 1
Type: ERROR
Impact: Session

MDS-00181: Only a single tenant document cache configuration is allowed.
Cause: The number of TenantDocumentCacheConfigs was not 1.
Action: Pass a single tenant document cache configuration object. Although the constructor for the TenantDocumentCacheConfigs class takes an array this is reserved for future use.
Level: 1
Type: ERROR
Impact: Session

MDS-00182: Tenant cache configuration information cannot be requested for the global tenant.
Cause: Tenant cache configuration information was being requested for the global tenant.
Action: Do not request the tenant cache configuration for the global tenant - use getCacheConfig directly from MDSConfig
Level: 1
Type: ERROR
Impact: Session

MDS-00183: Tenant document cache configuration information cannot be requested for the global tenant.
Cause: Multitenant document cache information was being requested for the global tenant.
Action: Do not request the tenant document cache configuration for the global tenant - use getDocumentCacheConfig from NamespaceConfig
Level: 1
Type: ERROR
Impact: Session

MDS-00184: The relationship from {0} to {1} is invalid because the latter is configured as a global resource and cannot be referenced from a tenant resource because the corresponding relationship is defined with cascade delete enabled.
Cause: Relationships with cascade delete enabled were spanning tenant boundaries.
Action: Reconfigure the relationship with cascade delete disabled or ensure the parent reference is within the same tenant scope.
Level: 1
Type: ERROR
Impact: Session
MDS-00185: The relationship from {0} to {1} is invalid because the latter is configured as a global resource and cannot be referenced from a tenant resource because the corresponding relationship is defined with enforced integrity.
Cause: Relationships with defined referential integrity were spanning tenant boundaries.
Action: Reconfigure the relationship without referential integrity or ensure the parent reference is within the same tenant scope.
Level: 1
Type: ERROR
Impact: Session
MDS-00186: A {0} element is already present in the parent {1} element in document {2}, but with the QNameLUID identification mechanism only one is allowed.
Cause: An attempt was made to have two or more elements with same QName under same parent while QNameLUID identification mechanism is used.
Action: Remove duplicate instances of elements with same QName
Level: 1
Type: ERROR
Impact: Data
MDS-00187: The existing {0} element in the parent {1} element in document {2} is automatically removed, and new customized {0} element of "[3]""[4]" customization layer is inserted since with the QNameLUID identification mechanism, only one is allowed.
Cause: An attempt was made to have two or more elements with same QName under same parent while QNameLUID identification mechanism is used.
Action: Removed duplicate instances of elements with same QName
Level: 1
Type: ERROR
Impact: Data
MDS-00188: The relationship from {0} to {1} is invalid because the latter is configured as a tenant resource and cannot be referenced from a global resource.
Cause: An attempt was made to reference a tenant resource from a global resource.
Action: Ensure all references from global resources are also global.
Level: 1
Type: ERROR
Impact: Session
MDS-00189: The existing {0} element with unique id {1} in the parent {2} element in document {3} is automatically removed, and new customized {0} element with unique id {1} of "[4]""[5]" customization layer is inserted since {0} element is type-annotated to overwrite duplicates.
Cause: An attempt was made to have two or more elements with same QName under same parent having the same unique ID value while overwriteDuplicate mechanism is used.

Action: Removed duplicate instances of elements with same QName having the same unique ID value

Level: 1
Type: ERROR
Impact: Data

MDS-00190: A call to {0} on the current MDSSession does not specify the correct transaction key

Cause: The current MDS Session was created using a transaction key and the subsequent operation was either being attempted passing no key or a different one from that originally used.

Action: If the MDS Session is created using a transaction key, then use the MDSSession API's that take a transaction key and use the same key.

Level: 1
Type: ERROR
Impact: Session

MDS-00191: An exception occured in PChangeListener {0}

Cause: The MetadataStoreCommunicator was attempting to notify the listener when an exception occurred.

Action: Check the HandlePChanges method of the listener.

Level: 1
Type: ERROR
Impact: Session

MDS-00192: Validation of {0} caused a NullPointerException: check there is an MDS bean object set on the MDS bean MO

Cause: This error most typically occurs when a Bean MO has been created but no bean object has been set on it.

Action: Check that an MDS bean is set on this MO. Failing that, examine the stack for clues for alternative causes.

Level: 1
Type: ERROR
Impact: Data

MDS-00193: Document with the MDSReference {0} contains an ID attribute with an invalid value: {1}

Cause: The value of the ID attribute is invalid according to the schema definition.

Action: Ensure that the ID conforms to the schema definition.

Level: 1
Type: WARNING
Impact: Data
MDS-00194: Auditing is disabled for component [0].
   Cause: There was an error registering the audit event definition(s) for the component.
   Action: Ensure that the audit event definitions for the component are valid and that the audit service is functional.

   Level: 1
   Type: NOTIFICATION
   Impact: Configuration

MDS-00195: The custom audit event of type "[0]" that was associated with "[1]" is not audited because the MDS object was unmodified since the last time the changes in the MDSSession were committed.
   Cause: MDS object associated with the event was unmodified since the last time the changes in the MDSSession were committed. A custom audit event is discarded if the associated MDSObject is not modified.
   Action: No action required.

   Level: 1
   Type: WARNING
   Impact: Programmatic

MDS-00196: The MDSSession referenced by the audit component "[0]" is invalid.
   Cause: The MDS audit support instance is being used even after the MDSSession that was used to created it is no longer referenced.
   Action: Fetch the audit support instance from the MDSSession and retry the operation.

   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-00197: An internal error occurred when processing MetadataObject [0] with cache key [1].
   Cause: An error occurred in the LayeredCache processing.
   Action: Check for log messages. If the problem persists, clear the MDS cache and contact Oracle Support Services.

   Level: 1
   Type: WARNING
   Impact: Session

MDS-00198: The requested object is deleted in the current PTransaction
   Cause: The requested document was deleted in an earlier part of the PTransaction and not replaced.
   Action: Review whether the document needed to be deleted or replace with a new version.

   Level: 1
   Type: ERROR
   Impact: Data
MDS-00199: The requested object is deleted in the current MDSSession

Cause: The requested document was deleted in an earlier part of the MDSSession and not replaced.

Action: Review whether the document needed to be deleted or replace with a new version.

Level: 1
Type: ERROR
Impact: Data

MDS-00200: Reference not found in Document

Cause: Unable to locate the reference within the named Metadata Object.

Action: Check that the reference is correct.

Level: 1
Type: ERROR
Impact: Data

MDS-00201: PDocument not found in MetadataStore : {0}

Cause: The requested persistence document was not found in the given MetadataStore.

Action: Check that the requested name is correct and that the store is mapped to the namespace correctly.

Level: 1
Type: ERROR
Impact: Data

MDS-00202: The Document was not found on the classpath

Cause: The requested document was not found on the classpath.

Action: Check that the document is available on the classpath as a resource.

Level: 1
Type: ERROR
Impact: Data

MDS-00500: No metadata store is configured to save the document {0}.

Cause: An attempt was made to save a document, when no writable store was configured.

Action: Provide a writable metadata store to save the document.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00501: Document {0} cannot be deleted because no metadata store is configured.

Cause: An attempt to delete a document failed because there was no writable store configured.

Action: To delete the document, provide a writable metadata store.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00503: The metadata path "[0]" does not contain any valid directories.
Cause: Either the metadata path was empty or directories on the metadata path did not exist.
Action: Ensure that the metadata path is not empty and that the directories on the metadata path exist.

Level: 1
Type: ERROR
Impact: Data

MDS-00504: failure to create document [0] because metadata store "[1]" is read-only
Cause: An attempt to create a document on a read-only metadata store failed.
Action: To create the document, provide a writable metadata store.

Level: 1
Type: ERROR
Impact: Data

MDS-00505: failure to save document [0] because metadata store "[1]" is read-only
Cause: An attempt to save a document to a read-only metadata store failed.
Action: To save the document, provide a writable metadata store.

Level: 1
Type: ERROR
Impact: Data

MDS-00506: failure to get child resources of package [0] because package does not exist in metadata store
Cause: Child resources for the package were not found because specified package did not exist in the metadata store.
Action: Verify that the package exists in the metadata store, and then retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00507: failure to delete document [0] because metadata store "[1]" is read-only
Cause: An attempt to delete a document from a read-only metadata store failed.
Action: To delete the document, provide a writable metadata store and retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00508: There is no content to be read for [0].
Cause: An attempt was made to read empty metadata.
Action: Verify that the metadata has valid content, and then retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00509: failure to delete document {0} with file {1}
Cause: An error occurred while the document was being deleted.
Action: Verify that the document exists and then retry the operation, or provide a document that exists in the store.

Level: 1
Type: ERROR
Impact: Data

MDS-00510: failure to read document {0} because it is not found in the metadata path "{1}"
Cause: The document to be read was not found.
Action: Verify that the metadata path is correct and that the document exists in the metadata path.

Level: 1
Type: ERROR
Impact: Data

MDS-00511: failure to create document {0} at file {1}
Cause: An error occurred while creating the document in the file store.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Files

MDS-00512: failure to create document {0} because file {1} already exists
Cause: An attempt was made to create a file that already existed in the metadata store.
Action: Provide a different name for the file to be created, or delete the existing file first, and then retry the operation.

Level: 1
Type: ERROR
Impact: Files

MDS-00513: failure to create package {0} because directory {1} already exists
Cause: An attempt to create a package failed because a directory by the same name already existed.
Action: Provide a different name for the package to be created and retry the operation.
Level: 1
Type: ERROR
Impact: Files

MDS-00514: failure to save document [0] to file [1]
Cause: An error occurred while saving the document to a file.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Files

MDS-00515: failure to create document [0] in the metadata repository
Cause: An error occurred while the document was being created in the metadata repository.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data

MDS-00516: failure to create document [0] because it already exists in the metadata repository
Cause: An error occurred while the document was being created in the metadata repository because the document already existed.
Action: Provide a different name or delete the existing document first, and then retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00517: failure to create package [0] because it already exists in the metadata repository
Cause: An error occurred while the package was being created in the metadata repository because the package already existed.
Action: Provide a different package name or delete the existing package first, and then retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00518: failure to create package [0] in the metadata repository
Cause: An error occurred while the package was being created in the metadata repository.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data

MDS-00519: failure to delete document {0} from the metadata repository
Cause: An error occurred while the document was being deleted from the metadata repository.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data

MDS-00520: failure to read document {0} because it is not in the metadata repository
Cause: The document was not read because it did not exist in the metadata repository.
Action: Verify that the document name is correct and that it exists in the metadata repository, and then retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00521: error while reading document {0} from metadata repository
Cause: An error occurred while the document was being read from the metadata repository.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data

MDS-00522: failure to save document {0} to the metadata repository
Cause: An error occurred while the document was being saved to the metadata repository.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data

MDS-00526: failure to generate SAX parsing events for document {0}
Cause: An error occurred while parsing the XML document.

Action: Verify that the XML document is well-formed. Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00531: failure to write to "[0]" because output to "[1]:" protocol is not supported
Cause: An attempt to write modified metadata to a URL failed because the protocol is not supported.
Action: Retry writing modified metadata to a supported protocol.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00533: Exception: [3] Attribute "[0]" with an invalid MDS reference "[1]" in document "[2]" is not stored as a typed dependency in the database repository.
Cause: An error occurred while adding a typed dependency from the specified attribute.
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data

MDS-00534: Exception: [3] Subobject [0] in document [2] has invalid value "[1]" for unique identifier; typed dependencies from this subobject are not stored in the database repository.
Cause: An error occurred because the component had an invalid ID.
Action: Provide the correct ID value for the application metadata. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00535: cannot change TypeManager associated with a PManager after it is initialized
Cause: An attempt was made to associate TypeManager with PManager after it was initialized.
Action: Contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic
MDS-00536: cannot change FileTypeManager associated with a PManager after it is initialized
Cause: An attempt was made to associate FileTypeManager with PManager after it was initialized.
Action: Contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-00537: unable to rename {0} to {1}
Cause: An error occurred during a rename operation.
Action: Retry the rename operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Data

MDS-00538: failure to rename document {0} because metadata store "[1]" is read-only
Cause: An error occurred during rename operation because the metadata store was configured as read-only.
Action: To rename a document, provide a store that can be written to, that is not read-only.
Level: 1
Type: ERROR
Impact: Data

MDS-00539: A document can be renamed only within its source store. The new name {1} in this rename operation does not map to the same store as the old name {0}.
Cause: An error occurred during a rename operation. An invalid new name for the rename operation caused the renamed document to be stored in another metadata store.
Action: Provide a new, valid document name that maps to the same metadata store that contains the original document.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00541: SAX events cannot be generated for non-XML document {0}.
Cause: An attempt was made to generate SAX events for non-XML documents.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00547: The read operation is not supported for packages from Web content from the servlet context.
Cause: A read operation was attempted for packages from Web content, which is not supported.
Action: The read operation is not supported, therefore no action is required.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00550: Updates across multiple stores are not allowed in the same transaction.
Cause: An attempt was made to perform updates across multiple stores in the same transaction.
Action: Verify that the document is being saved to the same store on which it exists.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00551: failure to delete package [0] because it is not empty
Cause: An attempt was made to delete a package that was not empty.
Action: Delete the contents of the package to be deleted first, and then retry the operation.
Level: 1
Type: ERROR
Impact: Data

MDS-00552: failure to delete package [0] with directory [1]
Cause: An error occurred while deleting the directory for the package.
Action: Ensure no files from the directory are opened in other applications and retry the operation. Also, refer to the error messages in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Files

MDS-00554: Package [0] cannot be found in the specified store.
Cause: The requested operation was not completed because the package name that was supplied was invalid.
Action: Provide a valid package name and retry the operation.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00555: The partitionName [0] is invalid.
Cause: The requested operation was not completed because the partition name that was supplied was invalid.
Action: Provide a valid partition name and retry the operation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00557: Resource {0} is already locked or is being modified.
Cause: An attempt was made to modify a document that was already being modified by another user.
Action: Retry modifying the document after the lock is released by the other users. Also, refer to the error messages in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Session

MDS-00558: The partitionName {0} is not available.
Cause: No partition with that name existed.
Action: Provide a partition name that exists.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00559: A partition with name {0} already exists.
Cause: The name provided for creating a new partition was already in use by another partition.
Action: Provide a different name for the new partition.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00560: The MDS repository is incompatible with the archive. The repository version is {0} whereas archive version is {1}.
Cause: The MDS repository was not compatible with the archive provided.
Action: Upgrade the target MDS repository or use a compatible archive for the operation.

Level: 1
Type: ERROR
Impact: Upgrade

MDS-00561: The create operation is not supported for metadata stores of type "{0}".
Cause: An attempt was made to create a new document or package in a read-only metadata store.
Action: Reconfigure the application to use a writable metadata store.
Level: 1
Type: ERROR
Impact: Configuration
MDS-00562: The delete operation is not supported for metadata stores of type 
"([0])".
Cause: An attempt was made to delete a document from a read-only metadata store.
Action: Reconfigure the application to use a writable metadata store.

Level: 1
Type: ERROR
Impact: Configuration
MDS-00563: The save operation is not supported for metadata stores of type 
"([0])".
Cause: An attempt was made to save a document to a read-only metadata store.
Action: Reconfigure the application to use a writable metadata store.

Level: 1
Type: ERROR
Impact: Configuration
MDS-00564: GUID feature is not supported for metadata stores of type 
"([0])".
Cause: An attempt was made to get a document by GUID from a metadata store that does not support GUIDs.
Action: Reconfigure the application to use a metadata store that supports GUIDs, such as DBMetadataStore.

Level: 1
Type: ERROR
Impact: Configuration
MDS-00565: The rename operation is not supported for metadata stores of type 
"([0])".
Cause: An attempt was made to rename a document or package in a read-only store.
Action: Reconfigure the application to use a writable metadata store.

Level: 1
Type: ERROR
Impact: Configuration
MDS-00566: The DOM content is NULL for [0].
Cause: DOM document content provided was null.
Action: Provide valid DOM content and retry the operation.

Level: 1
Type: ERROR
Impact: Data
MDS-00567: The metadata changes for document "([0])" cannot be written in the underlying store because read-only mode is enabled in the configuration.
Cause: An attempt to change metadata was made while changes were disabled for maintenance operations.
Action: Reconfigure the application to not specify read-only mode in the configuration and use a writable metadata store to persist metadata changes.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00568: MetadataStore initialization failure because "{0}" is invalid
Cause: The URL store mapping was invalid.
Action: Provide a valid URL store mapping.
Level: 1
Type: ERROR
Impact: Files

MDS-00569: unable to read document {0} from "{1}"
Cause: There was an error reading the document from the URL metadata store.
Action: Retry the operation. If the problem persists, verify that the URL metadata store exists.
Level: 1
Type: ERROR
Impact: Data

MDS-00570: The name or content exceeds the MDS repository schema size for {0}.
Cause: The metadata name or the content exceeded the schema size.
Action: Reduce the length of the metadata name or content, and then retry the operation. Refer to the documentation for the allowed sizes for names and content.
Level: 1
Type: ERROR
Impact: Data

MDS-00571: The bean content is NULL for {0}.
Cause: The bean content was null.
Action: Provide valid bean content, and then retry the operation.
Level: 1
Type: ERROR
Impact: Data

MDS-00572: failure to get the ConnectionManager because the DBContext is null
Cause: The DBContext value is null. Also, using any MetadataStore, PManager, or MDSInstance that has already been released might lead to this error.
Action: Do not use any metadata store, PManager, or MDSInstance that is already released.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00573: The metadata store is already associated with a PManager.
   Cause: The PConfig provided for creating the PManager or MDSInstance was already used by another PManager or MDSInstance.
   Action: Provide a new PConfig when creating the PManager or MDSInstance.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00574: The document [0] does not exist in the configured metadata store.
   Cause: The document being locked did not exist in the configured metadata store.
   Action: Ensure that the document to be locked exists, and that the name of the document is correct.

Level: 1
Type: ERROR
Impact: Data

MDS-00575: failure to acquire write lock for [0]
   Cause: An attempt to acquire a write lock for a document failed.
   Action: Refer to the cause exception message in application logs for details on the actual cause of the failure.

Level: 1
Type: ERROR
Impact: Data

MDS-00576: failure to process [0] because metadata store "[1]" is read-only
   Cause: An attempt was made to modify metadata in a read-only metadata store.
   Action: Provide a writable metadata store to allow modification of the document.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00577: Could not acquire read/write lock for [0] within the default waiting time interval
   Cause: Read/Write lock could not be obtained for a file within the waiting time interval.
   Action: Try the operation again after some time.

Level: 1
Type: ERROR
Impact: Files

MDS-00578: Failed to process document [0] due to a critical error writing to the repository
Cause: A critical error occurred while the metadata document was being written to the repository.

Action: Contact the application administrator with cause exception message details to resolve the repository error.

Level: 1  
Type: ERROR  
Impact: Configuration

MDS-00579: The document [0] does not have version [1] in the repository.

Cause: Specified version does not exist for the document.

Action: Provide an existing version for the document.

Level: 1  
Type: ERROR  
Impact: Data

MDS-00580: operation failed for [0] because no metadata-store was defined in the configuration for metadata-store-usage [0].

Cause: incomplete configuration, no metadata-store was defined for the metadata-store-usage

Action: Define the metadataStore for the empty metadata-store-usage.

Level: 1  
Type: ERROR  
Impact: Configuration

MDS-00581: error deleting partition [0] in file repository [1]

Cause: The directory represented by the file repository or partition is read only.

Action: Verify that the metadata path to the repository and partition exist and are writable.

Level: 1  
Type: ERROR  
Impact: Configuration

MDS-00582: The MetadataStore [0] is writable but does override getMetadataStoreCommunicator() method.

Cause: Configuration used a MetadataStore that was writable but not supporting MetadataStoreCommunicator interface.

Action: Override getMetadataStoreCommunicator() in the MetadataStore class to return an appropriate MetadataStoreCommunicator instance.

Level: 1  
Type: ERROR  
Impact: Programmatic

MDS-00583: Could not release read/write lock for [0] because the lock was not found.

Cause: Read/Write lock could not be released because it was already removed from the lock cache.
Action: Contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Files

MDS-00584: The MDS repository's database platform is different that of the archive. The repository's database platform is {1} whereas the archive's platform is {0}.
Cause: The MDS repository platform was not compatible with the archive provided.
Action: Use a platform compatible archive for the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00585: Failure to create deployment lineage because metadata store "[0]" is read-only
Cause: An attempt was made to create deployment lineage in a read-only metadata store. Deployment lineage in repository represents Application name and MAR module name.
Action: Configure a metadata store that supports deployment management, typically a DBMetadataStore.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00586: ArchiveMetadataStore is restricted to be used with MDS Transfer operation only. Reading or writing files in ArchiveMetadataStore is not supported outside of transfer.
Cause: An attempt was made to read or write files in ArchiveMetadataStore outside of transfer.
Action: ArchiveMetadataStore is not supported outside of transfer. Either use this ArchiveMetadataStore for MDS transfer operation or use some other MetadataStore to store your files.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00588: Cannot replace the original archive file [0] with the final archive file [1] because the final archive file could not be renamed to [0].
Cause: The final archive file could not be renamed to the original archive file name.
Action: Look at the cause exception for more details and take corresponding actions.

Level: 1
Type: ERROR
Impact: Data
MDS-00589: Error occurred while creating the final archive file {0}.
   Cause: Some exception occurred while creating the final archive.
   Action: Look at the cause exception for more details and take corresponding actions.
   Level: 1
   Type: ERROR
   Impact: Data

MDS-00590: Error occurred while opening or closing the input/output stream for archive file {0}.
   Cause: Some exception occurred while opening or closing the input/output stream for archive file.
   Action: Look at the cause exception for more details and take corresponding actions.
   Level: 1
   Type: ERROR
   Impact: Data

MDS-00591: "{0}" operation is not supported in ArchiveMetadataStore.
   Cause: An unsupported operation has been attempted in ArchiveMetadataStore.
   Action: Look at the ArchiveMetadataStore javadoc for supported operations.
   Level: 1
   Type: ERROR
   Impact: Data

MDS-00592: Error occurred while initializing FileMetadataStore connection for the temporary directory.
   Cause: An error occurred while initializing the FileMetadataStore connection for the temporary directory.
   Action: Look at the cause exception for more details and take corresponding actions.
   Level: 1
   Type: ERROR
   Impact: Data

MDS-00593: Unable to read the file {0} from archive {1}.
   Cause: Some I/O Exception occurred while reading the given file from archive.
   Action: Look at the cause exception for more details and take corresponding actions.
   Level: 1
   Type: ERROR
   Impact: Data

MDS-00594: Unable to write the file {0} to archive {1}.
   Cause: Some I/O Exception occurred while writing the given file to archive.
Action: Look at the cause exception for more details and take corresponding actions.

Level: 1
Type: ERROR
Impact: Data

MDS-00595: The parent directory {0} given in archive file path does not exist. Cannot create ArchiveMetadataStore for the archive file {1}.
Cause: The parent directory mentioned in archive file path does not exist.
Action: Provide valid parent directory in archive file path to create ArchiveMetadataStore.

Level: 1
Type: ERROR
Impact: Data

MDS-00596: Failure to read document {0} because it is not found in "{1}"
Cause: The document to be read was not found.
Action: Verify that the document exists in the ArchiveMetadataStore before reading the document.

Level: 1
Type: ERROR
Impact: Data

MDS-00597: Failure to open the archive file {0}. Cannot create ArchiveMetadataStore for the archive file {0}.
Cause: Could not open the given archive file.
Action: Try creating ArchiveMetadata store with a valid archive file.

Level: 1
Type: ERROR
Impact: Data

MDS-00598: Cannot create an intermediary archive during export to the archive file {0}.
Cause: Either the intermediary archive file could not be created in the default temporary-file directory or an I/O error occurred.
Action: Look at the cause exception for more details and take action accordingly.

Level: 1
Type: ERROR
Impact: Data

MDS-00599: Cannot obtain a connection to the Archive Metadata Store for archive file {0}.
Cause: There was a problem obtaining a connection to the Archive Metadata Store.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00601: The XLIFF document has invalid target language {0}.
Cause: The target language specified was either null or empty.
Action: Specify a valid target language and retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00703: The name {0} is not a valid name under package {1} because {2} resource not considered child of the package.
Cause: A specified child resource was not a child of the package.
Action: Specify a valid child resource name, and then retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00704: invalid value {0} for property {1} on component {2}
Cause: An invalid property value was provided.
Action: Provide a valid property value and retry.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00771: A component with {0} "[{1}]" already exists.
Cause: The specified component already existed.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data

MDS-00907: unable to save document "{0}" because either a document or package of the same name already exists
Cause: A document or package with the same name already existed in the repository, perhaps because it was just created by another user.
Action: Retry the operation. If necessary, choose another name for the object being saved.

Level: 1
Type: ERROR
Impact: Data

MDS-00908: unable to create package "{0}" because a document or package of the same name already exists
Cause: A document or package with the same name already existed in the repository, perhaps because it was just created by another user.
Action: Retry the operation. If necessary choose another name for the object being saved.
Level: 1
Type: ERROR
Impact: Data

MDS-00910: unable to save the document because of corrupt MDS database sequences or other internal errors.
Cause: The database sequence used for generating the unique document ID was corrupt or some other internal errors caused violation of unique constraints.
Action: Retry the operation after deploying metadata to another MDS database repository partition. If that still fails, contact Oracle Support Services.
Level: 1
Type: ERROR
Impact: Data

MDS-00911: Document with name "{0}" and version \{1\} [Low CN={2}, High CN={3}] does not exist in the repository.
Cause: The document was not found in the MDS repository.
Action: Specify a correct name for the document and retry the operation. Check if the document is deleted by another user.
Level: 1
Type: ERROR
Impact: Data

MDS-00912: MDS repository is incompatible with the middle tier. Repository version "{0}" is older than minimum repository version "{1}" required.
Cause: The MDS repository was older than minimum version required by the middle tier.
Action: Upgrade the MDS repository to the required version.
Level: 1
Type: ERROR
Impact: Upgrade

MDS-00913: MDS repository is incompatible with the middle tier. MDS version "{0}" is older than minimum MDS version "{1}".
Cause: The MDS version was older than the minimum required version for using the MDS repository.
Action: Upgrade the MDS library to the required version.
Level: 1
Type: ERROR
Impact: Upgrade

MDS-00914: unable to save document "{0}" because either an already deleted
document or package with conflicting name or type already exists
Cause: A document or package with the same name or a parent package of
incorrect type already existed in the repository as a deleted version.
Action: Delete the conflicting resource from repository or check if the new resource
is invalid. If necessary, choose another name for the object being saved.

Level: 1
Type: ERROR
Impact: Data

MDS-00915: MDS repository is incompatible with the middle tier for dumping or
restoring metadata.
Cause: The MDS repository was older than minimum version required by the
middle tier to dump or restore metadata.
Action: Retry the operation after upgrading the MDS repository to newer version
or use compatible middle tier to perform the operation.

Level: 1
Type: ERROR
Impact: Upgrade

MDS-00916: MetadataStore configured for {0} does not support deployment
management.
Cause: The metadata store configured for the resource did not support
deployment management.
Action: Deployment management is supported in MDS repository version
11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or
later.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00918: Connection details for the MDS repository are incomplete. The values
for "{0}" are invalid
Cause: The MDS repository connection details were invalid or missing.
Action: Specify correct values for the MDS repository details in the configuration
and retry the operation.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00919: Internal error: The database context for this repository appears to be
corrupt.
Cause: The database context was invalid.
Action: Verify that the repository details are correct in the configuration.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00922: The ConnectionManager "\{0\}" cannot be instantiated.
Cause: There was an error instantiating the ConnectionManager class
Action: Contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Configuration

MDS-00923: Unable to create sandbox "\{0\}"
Cause: An error occurred during creation of sandbox.
Action: Look in the error message log for the exact reason for the failure.

Level: 1
Type: ERROR
Impact: Data

Cause: An internal MDS document (one in package mdssys) was found with an invalid name, or an attempt was made to create a name object with such an invalid name.
Action: Avoid using package or document names containing path element "mdssys" which is reserved for internal MDS use. If necessary, remove such invalid documents from the metadata store.

Level: 1
Type: ERROR
Impact: Data

MDS-00929: unable to look up name "\{0\}" in JNDI context
Cause: The implementation class to use for initial context was not found.
Action: Verify that environment properties are configured using system properties or application resources files.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00930: The JNDI location details for the registered datasource are incomplete.
Cause: JNDI location details were found to be incomplete.
Action: Provide complete JNDI location information in the configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00931: The database version is \{0\}.\{1\}, but MDS requires at least \{2\}.\{3\}. 
Cause: The database version is older than the minimum database version required for hosting MDS repository.

Action: Upgrade the database to the minimum required version. Contact the database administrator for assistance.

Level: 1
Type: ERROR
Impact: Upgrade

MDS-00932: unknown database vendor {0}
Cause: The database vendor could not be identified.
Action: Verify that the MDS repository is hosted on supported database vendors.

Level: 1
Type: ERROR
Impact: Installation

MDS-00933: cannot create data source using URL "(0)"
Cause: An error occurred while creating the data source using the specified URL.
Action: Verify that the URL specified is correct and retry the operation.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00934: XDB is not supported on database platform {0}.
Cause: An attempt was made to store XML metadata in a non-XDB database.
Action: Verify that the correct MDS repository is being used.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00935: Unable to complete operation even after maximum connection retries (0).
Cause: An error occurred while performing operation.
Action: Ensure that the database is running. Retry the operation later.

Level: 1
Type: ERROR
Impact: High Availability

MDS-00936: Fast Connection Failover is not supported on the underlying database connection (0).
Cause: The underlying database connection did not support fast connection failover, and retry-connection was set to true in either the config file, or programmatically.
Action: Either stop and then restart the database connection and configure it to allow fast connection failover, or do not attempt to set retry-connection to true.

Level: 1
ERROR
Impact: High Availability

MDS-00937: A local transaction operation like commit or rollback cannot be used in a global transaction on connection "[0]".
Cause: The database connection was configured for global transactions, but MDS was not configured to support global transactions.
Action: Reconfigure the database connection to use local transactions. Change "tx-level" attribute on the MDS datasource to "local".

Level: 1
Type: ERROR
Impact: Configuration

MDS-00938: Unable to get an ADF library class loader
Cause: MDS expects to retrieve a resource from an ADF library, but is unable to obtain an ADF library classloader.
Action: Consider whether the resource should be repackaged in an ADF library rather than an ordinary jar.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01059: document with the name [0] missing in the source metadata store
Cause: The document to be transferred did not exist in the source metadata store.
Action: Verify that the document name is correct, and that it exists in the source metadata store.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01061: Listener [0] cannot be instantiated.
Cause: The listener class did not exist.
Action: Verify that the name of the listener class is correct. Ensure that the class is available on the class path.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01104: finding no documents for processing that match the pattern provided
Cause: No documents were found on the source metadata store that matched the pattern provided, or that matched the document name.
Action: Provide another pattern or document name, or provide another metadata store in which to look for the documents.

Level: 1
Type: ERROR
Impact: Configuration
MDS-01105: invalid label {0}
  Cause: The label specified for the source metadata store did not exist.
  Action: Verify that the label name is correct, or provide a label that exists in the source metadata store.
  Level: 1
  Type: ERROR
  Impact: Data

MDS-01106: The TransferTypeRestriction {0} can not be associated with given TransferType {1}.
  Cause: The given TransferTypeRestriction can not be associated with the specified TransferType.
  Action: Ensure that given TransferTypeRestriction is valid for the specified TransferType.
  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-01107: Post transfer label cannot be created in target store.
  Cause: Post transfer label cannot be created in the target store. Examine the cause exception messages to find the root cause of it.
  Action: Examine any accompanying messages to decide if further action is required.
  Level: 1
  Type: ERROR
  Impact: Data

MDS-01108: TransferType cannot be null for ExtendedTransferType.
  Cause: TransferType provided to create ExtendedTransferType was null.
  Action: Provide valid TransferType to create ExtendedTransferType.
  Level: 1
  Type: ERROR
  Impact: Data

MDS-01109: The target archive configured in ArchiveMetadataStore already exists. Cannot export the documents into an existing archive file.
  Cause: The target archive already exists. Exporting the documents into an existing archive is not allowed.
  Action: Export the documents into a non existing archive file.
  Level: 1
  Type: ERROR
  Impact: Data

MDS-01110: Sandbox export operation allowed only from a database metadata store to an archive metadata store.
**Cause:** Either source metadata store is not a database or the target metadata store is not an archive in sandbox export operation.

**Action:** Configure source metadata store to be a database and target metadata store to be an archive in sandbox export operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01111:** Sandbox import operation allowed only from Archive Metadata Store to a Database Metadata store.

**Cause:** Either source metadata store is not an archive metadata store or the target metadata store is not a database in sandbox import operation.

**Action:** Configure source metadata store to be an archive metadata store and target metadata store to be a database in sandbox import operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01112:** Transfer unit list in a Sandbox export/import operation should have at least one transfer unit.

**Cause:** Transfer unit list in Sandbox export/import operation empty.

**Action:** Ensure that there is at least one transfer unit to be transferred in sandbox export/import operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**MDS-01113:** Sandbox metadata file required for import to a new sandbox operation.

**Cause:** Sandbox metadata file missing in source Archive metadata store in import to a new sandbox operation.

**Action:** Import to a new sandbox only from an archive store whose contents were exported from a sandbox and contain sandbox metadata document.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**MDS-01114:** Sandbox with same name as the one imported in a sandbox import operation exists on the target metadata store.

**Cause:** Sandbox with same name already exists on the target metadata store and the flag to force creation of sandbox is not set to true.

**Action:** Pass true for forceSBCreation to TransferParams.createForSandboxImport() or destroy sandbox already existing with same name on the target metadata store in sandbox import operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic
MDS-01115: Source sandbox in a sandbox export operation does not contain metadata.
    
    **Cause:** Source sandbox in export operation was not created with metadata.
    
    **Action:** Export from a Sandbox that was created with metadata.
    
    **Level:** 1
    **Type:** ERROR
    **Impact:** Programmatic

MDS-01116: Existing target sandbox in import operation does not contain metadata.
    
    **Cause:** Target sandbox in an import into an existing sandbox operation was not created with metadata.
    
    **Action:** Import into an existing sandbox that was created with metadata.
    
    **Level:** 1
    **Type:** ERROR
    **Impact:** Programmatic

MDS-01117: Sandbox archive imported into an existing sandbox.
    
    **Cause:** The archive imported into an existing sandbox contains sandbox metadata.
    
    **Action:** Import only regular archives (that do not contain sandbox metadata) into an existing sandbox.
    
    **Level:** 1
    **Type:** ERROR
    **Impact:** Programmatic

MDS-01118: Sandbox export operation not supported because the source MDS database repository is of older version that does not support this feature.
    
    **Cause:** Sandbox metadata is needed to transfer documents from sandbox. Source store being used does not support storing metadata for sandbox.
    
    **Action:** Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.
    
    **Level:** 1
    **Type:** ERROR
    **Impact:** Configuration

MDS-01119: Sandbox import operation not supported because the target MDS database repository is of older version that does not support this feature.
    
    **Cause:** Sandbox metadata is needed to transfer documents from sandbox. But target store being used does not support storing metadata for sandbox.
    
    **Action:** Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.
    
    **Level:** 1
    **Type:** ERROR
    **Impact:** Configuration
MDS-01120: Sandbox transfer unit list creation not supported because the source MDS database repository is of older version that does not support this feature.

**Cause:** Sandbox metadata is needed to transfer documents from sandbox. Source store being used does not support storing metadata for sandbox.

**Action:** Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-01121: Document "mds-transfer-config.xml" cannot be read by MDSTransfer.

**Cause:** The /meta-inf/mds-transfer-config.xml document cannot be read from source store. Refer to cause exception for more information on the actual reason for failure.

**Action:** Look for messages that describe the cause exception, and then take the appropriate action.

**Level:** 1

**Type:** ERROR

**Impact:** Data

MDS-01122: Metadata Object Name "{0}" specified in the mds-transfer-config.xml to preserve user updated documents in target repository is not a valid metadata object name.

**Cause:** Metadata object name specified in /meta-inf/mds-transfer-config.xml to preserve user updated documents in target repository is not a valid metadata object name.

**Action:** Make sure the document name specified in mds-transfer-config.xml is a valid metadata object name but not a speical document name.

**Level:** 1

**Type:** ERROR

**Impact:** Data

MDS-01123: The metadata path "{0}" specified in the mds-transfer-config.xml to preserve user updated documents in target repository is not a valid metadata path.

**Cause:** The metadata path specified in /meta-inf/mds-transfer-config.xml to preserve the user updated documents in target repository is not a valid metadata path.

**Action:** Make sure the metadata path specified in mds-transfer-config.xml is a valid metadata path.

**Level:** 1

**Type:** ERROR

**Impact:** Data

MDS-01150: Reference is null or empty.

**Cause:** A reference value was null or empty.

**Action:** Use a valid reference value that is not empty or null.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01151: Id/LocationPath reference is null or missing.
Cause: An Id/LocationPath reference value was null or empty.
Action: Use a valid Id/LocationPath reference value that is not empty or null.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01153: invalid LocationPath expression "[0]"
Cause: The LocationPath expression was invalid.
Action: Use a valid LocationPath format. The LocationPath expression should follow the format "/text()" or "/text()[x]", where 'x' is the index of 'text block'.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01154: invalid LocationPath expression "[0]"
Cause: The node index in the LocationPath expression was invalid.
Action: Change the node index in the LocationPath expression to a number greater than or equal to 1.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01158: Expecting a base document. Reference "[0]" is a special document.
Cause: A base document was expected, but the reference was a special document.
Action: Use a valid base document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01159: Expecting absolute document reference. Reference "[0]" has local element reference portion.
Cause: The supplied reference was not the expected type.
Action: Ensure the reference is of the expected type.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01160: Expecting absolute document reference. Reference "[0]" is a relative reference to the document.
Cause: The supplied reference was not the expected type.
Action: Ensure the reference is of the expected type.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01161: Reference "{0}" has an invalid character "{1}".
Cause: The supplied reference did not follow the MDS naming standard.
Action: Use valid characters for the reference.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01162: Reference "{0}" has an invalid XML attribute character.
Cause: The supplied reference did not follow the MDS naming standard.
Action: Use valid characters for the reference.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01163: invalid reference "{0}"
Cause: The supplied reference did not follow the MDS naming standard.
Action: Ensure that the reference follows the MDS naming standard.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01164: invalid reference "{0}" for a translation document
Cause: The supplied reference did not have the expected document extension (.xlf).
Action: Use the correct extension, .xlf, for the translation document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01165: invalid reference "{0}" for a customization document
Cause: The supplied reference did not have the expected document extension (.xml).
Action: Use the correct extension, .xml, for the customization document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01166: invalid reference "{0}" for a metadata extension document
Cause: The supplied reference did not have the expected document extension (.rdf).
**Action:** Use the correct extension, .rdf, for the metadata extension document.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-01167: There is no namespace declaration for the prefix "{1}" used in LocationPath expression "[0]".

**Cause:** The LocationPath expression was incomplete.

**Action:** Use a valid LocationPath format.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-01168: Partition name "[0]" starts or ends with character "{1}". Partition name cannot contain leading or trailing spaces, ",", "."

**Cause:** The supplied partition name contained leading or trailing spaces, ",", ".".

**Action:** Ensure that the partition name follows the MDS naming standard for partitions.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-01169: Partition name "[0]" has an invalid character "{1}".

**Cause:** The supplied partition name did not follow the MDS naming standard.

**Action:** Use valid characters for the partition name.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

MDS-01170: Partition name is null or empty.

**Cause:** Partition name value was null or empty.

**Action:** Use a valid partition name that is not empty or null.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

MDS-01171: The ID prefix generated by concatenating the layer name "[0]" and layer value "[1]" is not a valid MDS ID.

**Cause:** The ID prefix generated by concatenating the layer name with layer value did not follow the MDS ID naming standard.

**Action:** Ensure that the ID prefix generated by concatenating the layer name with layer value follows the MDS ID naming standard.

**Level:** 1  
**Type:** ERROR
Impact: Programmatic

MDS-01200: This operation is not supported.
   Cause: An MDS query operation was attempted, but this particular operation is not supported.
   Action: Note the stack backtrace and context of the operation, and contact Oracle Support Services.
   Level: 1
   Type: INCIDENT_ERROR
   Impact: Programmatic

MDS-01201: An invalid parameter cannot be used when constructing a query condition.
   Cause: An invalid parameter was passed to the class ConditionFactory.
   Action: Note the stack backtrace and context of the operation, and contact Oracle Support Services.
   Level: 1
   Type: INCIDENT_ERROR
   Impact: Programmatic

MDS-01205: A SQL error is occurring when performing the query: "{0}" with binds {1}.
   Cause: An MDS query on a database store led to a SQL error.
   Action: Note the stack backtrace and context of the operation, including the reported SQL query and error, and contact Oracle Support Services.
   Level: 1
   Type: INCIDENT_ERROR
   Impact: Programmatic

MDS-01206: The array size for the query must be greater than zero.
   Cause: An MDS query specified a fetch unit size that was not positive.
   Action: Note the stack backtrace and context of the operation and contact Oracle Support Services.
   Level: 1
   Type: INCIDENT_ERROR
   Impact: Programmatic

MDS-01207: The namespace mapping for the prefix "{0}" specified in the location path, is missing.
   Cause: During XPath evaluation, the namespace prefix was used, but the prefix was not mapped to a namespace.
   Action: Note the stack backtrace and context of the operation and contact Oracle Support Services.
   Level: 1
   Type: INCIDENT_ERROR
   Impact: Configuration
MDS-01208: MDS query condition produces more than \(0\) characters of SQL where clause.

**Cause:** An MDS query condition was so large that it would produce a very large SQL statement.

**Action:** Note the stack backtrace and context of the operation, and contact Oracle Support Services.

**Level:** 1  
**Type:** INCIDENT_ERROR  
**Impact:** Programmatic

MDS-01250: The file path "\(0\)" does not exist.

**Cause:** An invalid path was provided.

**Action:** Retry the operation with a valid file path.

**Level:** 1  
**Type:** ERROR  
**Impact:** Files

MDS-01251: The parameter file \(0\) has no namespace on the document element.

**Cause:** A namespace was missing from the parameter file provided.

**Action:** Provide a parameter file with valid namespace information.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-01252: The parameter file \(0\) must have either \(1\) or \(2\) definition.

**Cause:** No source stores or target stores information were provided in the parameter file.

**Action:** Check the parameter file to have source and target store information and retry.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-01253: The parameter file \(0\) must not have both \(1\) and \(2\) definitions.

**Cause:** An attempt was made to transfer from source directory to target directory. Both source and target as directories is not supported.

**Action:** Provide correct source and target definition. Either source or target should be a metadata store.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-01254: The parameter file \(0\) contains same store definition for sourceStore and targetStore.

**Cause:** An attempt was made to transfer from and to the same store. The definition for sourceStore cannot be the same as the definition for targetStore.
Action: Provide correct source and target information. Change either source or target store definition.

Level: 1
Type: ERROR
Impact: Data

MDS-01255: The property {0} has not been supplied.
Cause: The required property was missing from the parameter file.
Action: Check the parameter file and supply the required property. Refer to the MDS documentation for the correct syntax. A sample parameter file is also part of documentation.

Level: 1
Type: ERROR
Impact: Data

MDS-01258: The value {0} for property {1} is invalid.
Cause: An invalid property value was provided in the parameter file.
Action: Provide a valid property value. Refer to the MDS documentation for the correct syntax. A sample parameter file is also part of documentation.

Level: 1
Type: ERROR
Impact: Data

MDS-01259: The metadata store "[0]" cannot be instantiated.
Cause: An error occurred during the instantiation of the class for the metadata store.
Action: Verify that correct values are provided in the parameter file. Refer to the error messages in application logs that describe the cause exception for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data

MDS-01260: failure to process command-line arguments
Cause: Invalid command-line parameters were provided.
Action: Provide valid command-line parameters, and retry the operation. Refer to the MDS documentation for syntax of the tool parameters, or run the tool without parameters in order to get the Help message.

Level: 1
Type: ERROR
Impact: Data

MDS-01262: failure of transfer operation on a read-only target metadata store
Cause: The target metadata store used for transfer was read-only, for example a classpath store.
Action: Provide a writable target metadata store.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01263: operation failure on the resource {0} because source metadata store is read-only
Cause: An attempt was made to delete, create, update or get a mutable metadata object from a read-only source metadata store.
Action: Provide a writable source metadata store.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01264: The given element must contain either "customization" or "translation" configuration.
Cause: A customization or a translation configuration was missing for an element.
Action: Examine the transfer parameter file for valid MDS configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01265: Invalid parameter file {0}. Reason: <{1}:{2}> {3}
Cause: Parameter file provided was not valid.
Action: Provide a valid parameter file. Refer to the MDS documentation for the correct syntax. A sample parameter file is also part of documentation. Refer to sample parameter for correct syntax.

Level: 1
Type: ERROR
Impact: Files

MDS-01266: The associated customization document is missing for a given customization class {0} for the given document name {1}.
Cause: The associated customization document for the given customization class did not exist.
Action: If the associated customization document was to be transferred, verify that it exists. Otherwise, no action is required.

Level: 1
Type: ERROR
Impact: Data

MDS-01267: The associated translation document is not found for a given locale {0} for the given document name {1}.
Cause: Associated translation document did not exist for the given locale.
Action: If the associated translation document was expected to be transferred, verify if it exists, otherwise, no action required.
MDS-01268: The associated extended metadata document for the given document name {0} is missing.

**Cause:** No associated extended metadata document for the given document name existed.

**Action:** If the document was to be transferred, verify that the document exists. Otherwise, no action is required.

**Level:** 1

**Type:** ERROR

**Impact:** Data

MDS-01270: Opening and closing parentheses do not match.

**Cause:** Either an opening or closing parentheses was missing.

**Action:** Check and correct the namespace mappings provided. Each opening parentheses should have an equivalent closing parentheses and vice versa.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-01271: Cannot get the dependency registry

**Cause:** An error occurred while getting the dependency registry.

**Action:** Retry the operation. If the problem persists, look for messages that describe the cause exception for more information on the actual reason for failure.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-01272: unable to read mds-webapp-config.xml file

**Cause:** The mds-webapp-config.xml file was invalid.

**Action:** Confirm that the mds-webapp-config.xml file for the application is well formed, and valid.

**Level:** 1

**Type:** ERROR

**Impact:** Files

MDS-01273: The operation on the resource {0} failed because source metadata store mapped to the namespace {1} is read only.

**Cause:** An attempt was made to delete, create, update or get a mutable metadata object from a readonly source metadata store.

**Action:** Provide a writable source metadata store.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration
MDS-01301: Element "[1]", namespace "{0}" is not a valid child under parent "{3}", namespace "{2}".

Cause: An attempt was made to add, insert or replace a child element of the wrong type.

Action: Check the schema definition and ensure that the child element is the correct type.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01302: failure to load schema file "{0}"

Cause: An exception occurred in the XMLEF layer during processing of the schema definitions.

Action: Look for messages that describe the cause exception, and then take the appropriate action.

Level: 1
Type: ERROR
Impact: Data

MDS-01303: failure to register grammar from schema file "{0}".

Cause: An exception occurred in the XMLEF layer during addition of schema definitions.

Action: Look for messages that describe the cause exception, and then take the appropriate action.

Level: 1
Type: ERROR
Impact: Data

MDS-01305: failure to locate schema file "{0}".

Cause: The schema definition file was not found.

Action: Verify that the schema file name is correct, and that it is in the correct location.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01306: Grammar from a Web application can be added only once.

Cause: There were multiple method calls to add grammar from a web application.

Action: Verify that a grammar definition has already been added for the given MDSInstance and ServletContext. If it has then remove the calls to add it multiple times.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01307: no schema files for processing
Cause: No schema files were found against which beans can be generated.
Action: Pass an existing schema file to the bean generator.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01308: Event ":[0]" is not supported.
Cause: An attempt was made to use event types that are not supported for the selected content model.
Action: Use only the event types that are allowed for the selected content model.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01309: ContentModelPipeline is empty.
Cause: The contentModelPipeline contained an empty or null builder list.
Action: A list of one or more valid builders must be available in the ContentModelPipeline.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01310: Invalid ContentModelPipeline. Missing [0].
Cause: The expected builder was not available in builder list of the ContentModelPipeline.
Action: Valid builders must be supplied to the ContentModelPipeline.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01311: The DOM tree does not support the DOM event model.
Cause: This DOM Document did not implement EventTarget interface.
Action: Verify whether the Oracle XML Developer's Kit is used.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01312: Change-list transaction state is invalid.
Cause: The current change-list transaction state is invalid for the customization operation performed.
Action: Ensure Change-list to be in valid transaction state to perform the necessary customization operation.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-01313: The argument for document cannot be null.
   Cause: The argument for DocumentName was null.
   Action: Provide a valid DocumentName.
   Level: 1
   Type: ERROR
   Impact: Data

MDS-01314: TypeAnnotationProvider cannot be null.
   Cause: The argument for TypeAnnotationProvider was null.
   Action: Provide a valid TypeAnnotationProvider.
   Level: 1
   Type: ERROR
   Impact: Data

MDS-01316: Support for XPath is not implemented yet.
   Cause: Support for XPath has not been implemented yet.
   Action: Provide a valid Configurable ID.
   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-01319: JAXP support is not available. Falling back to using Oracle XML Developer's Kit for parsing the document {0}.
   Cause: JAXP support was not available.
   Action: None.
   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-01320: Modifying the prefix declaration for {0} from "{1}" to "{2}" in document {3} through customizations is not supported.
   Cause: An attempt was made to change an existing prefix declaration.
   Action: Avoid attempts to change existing prefix declarations.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01321: Node type should be one of ImmutableModelNode.ELEMENT or ImmutableModelNode.TEXT or ImmutableModelNode.CDATA.
   Cause: The node was not of the type ImmutableModelNode.ELEMENT or ImmutableModelNode.TEXT or ImmutableModelNode.CDATA.
   Action: Ensure the node type is one of the following types: ImmutableModelNode.ELEMENT or ImmutableModelNode.TEXT or ImmutableModelNode.CDATA.
Level: 1
Type: ERROR
Impact: Data

MDS-01322: Value "{0}" does not satisfy "{1}" type.
Cause: The data type conversion failed.
Action: Verify that the expected XSD built-in simple data type and the passed-in string value are convertible.

Level: 1
Type: ERROR
Impact: Data

MDS-01323: Value "{0}" has an incorrect number of characters for a base64Binary.
Cause: The value did not represent a valid Base64Binary.
Action: Verify that the input value is valid.

Level: 1
Type: ERROR
Impact: Data

MDS-01324: Unknown XML schema built-in type "{0}"
Cause: An attempt was made to use an unknown XML schema built-in type.
Action: Use only valid XML schema built-in types.

Level: 1
Type: ERROR
Impact: Data

MDS-01325: unable to load type definition "{0}"
Cause: Could not load this type definition because the specified location did not exist.
Action: Ensure that the specified location for the type definition exists.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01326: Loading of type definition from element "{0}" is not supported.
Cause: An attempt was made to load a type definition from the specified element that is not supported in the MDS configuration.
Action: Examine the schema definition to ensure that the entry specified in type definition is correct.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01327: unable to load data from "{0}" into {1}
Cause: An error occurred while loading the content of this configuration element.
**Action:** Examine the schema definition to ensure that the content of this configuration element is correct.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01328: unable to load element "0" into {1}**

**Cause:** An error occurred while loading this configuration element.

**Action:** Examine the schema definition to ensure this configuration element is correctly specified in the MDS configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01329: unable to load element "0"**

**Cause:** An error occurred while loading this configuration element.

**Action:** Examine the schema definition to ensure this configuration element is correctly specified in the MDS configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01330: unable to load MDS configuration document**

**Cause:** An I/O or parsing error occurred while loading the MDS configuration document.

**Action:** Verify that the URL is correct, and ensure that the document contains valid MDS configuration information.

**Level:** 1

**Type:** ERROR

**Impact:** Files

**MDS-01331: unable to load MDS configuration document "0"**

**Cause:** An error occurred in loading the content of MDS configuration document.

**Action:** Verify that the URL is correct, and ensure that the document contains valid MDS configuration information.

**Level:** 1

**Type:** ERROR

**Impact:** Files

**MDS-01332: Class 0 is not a subclass or implementation of {1}.**

**Cause:** The class specified in the configuration information did not extend the required class, or implement the required interface.

**Action:** Ensure that the class specified in the configuration information extends the correct class, or implements the correct interface.

**Level:** 1
Type: ERROR
Impact: Configuration

MDS-01333: missing element "{0}"
Cause: This element was missing from the MDS configuration information.
Action: Ensure that the element is specified in the configuration information.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01334: missing element "{0}" in document "{1}"
Cause: This element was missing from the MDS configuration information.
Action: Ensure that this element is specified in the configuration document.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01335: namespace "{0}" mapped to metadata-store-usage "{1}" but its definition was not found in MDS configuration.
Cause: Metadata-store-usage element that was referenced by a namespace not found in MDS configuration.
Action: Ensure that this element is specified in MDS configuration.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01336: No XML element is provided to create {0}.
Cause: A null XML element was passed to the constructor of this configuration object.
Action: Ensure that a valid XML element is provided to create a new instance of this configuration.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01337: No URL is provided to create {0}.
Cause: A null URL was passed to the constructor of this configuration object.
Action: Ensure that a valid URL is provided to create a new instance of this configuration.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01340: More than one metadata store can be resolved for the namespace "{0}".
Cause: There were multiple namespace to metadata store mappings in the persistence configuration that satisfied the request for the metadata store of a given namespace.

Action: Correct the namespace mapping in persistence configuration to ensure that the namespace is mapped to only one metadata store.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01341: Namespace mapping for "[0]" is overridden by namespace mapping for "[1]"; the first mapping is not used.
Cause: A conflicting mapping to this namespace has already been defined in the persistence configuration.

Action: Correct the namespace mapping in the persistence configuration to ensure that there is no conflicting mapping to this namespace.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01342: No metadata store is mapped to the namespace "[0]".
Cause: No namespace mapping could be found in the persistence configuration for the specified namespace.

Action: Ensure that a correct namespace is passed into the method concerned, or alter the application configuration to define the specified namespace.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01343: There is a duplicate file extension mapping for "[0]".
Cause: A mapping to this file extension has already been defined in the file type configuration.

Action: Remove the duplicate file extension mapping from the file type configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01344: cannot create [0] due to null parameter
Cause: A null parameter was passed to the constructor of this configuration object.

Action: Ensure that a valid parameter is provided to create a new instance of this configuration.

Level: 1
Type: ERROR
Impact: Configuration
MDS-01346: The given namespace path "[0]" is not a valid path.
   Cause: An invalid path was provided to create a namespace.
   Action: Ensure that a valid path is provided to create a namespace.

   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-01347: Base restriction is supported only for classpath store or servlet context store: namespace "[0]" mapped to "[1]".
   Cause: The base restriction was specified for a metadata store other than the classpath metadata store and servlet context store.
   Action: Correct the namespace mapping in the configuration to ensure that the base restriction is specified only for the classpath store or servlet context store.

   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-01348: unable to save configuration document to "[0]"
   Cause: An I/O error occurred while writing the configuration to a file.
   Action: Check the file system and ensure that the file location is writable.

   Level: 1
   Type: ERROR
   Impact: Files

MDS-01349: unable to read existing configuration document "[0]" to be updated
   Cause: An I/O or parsing error occurred while reading the configuration file.
   Action: Ensure that the configuration file does exist and has valid contents.

   Level: 1
   Type: ERROR
   Impact: Files

MDS-01350: Adding namespace "[0]" mapped to "[1]" conflicts with existing namespace "[2]" mapped to "[3]".
   Cause: An attempt was made to add a new namespace that conflicted with an existing namespace because it mapped to a different repository.
   Action: Ensure that the new namespace does not map to a different repository if the new namespace is a super-namespace or sub-namespace of existing namespaces.

   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-01351: Adding namespace "[0]" with "[1]" restriction conflicts with existing namespace "[2]" with "[3]" restriction.
   Cause: An attempt was made to add a new namespace that conflicted with an existing namespace in the namespace restriction.
**Action:** Ensure that the new namespace does not conflict with existing namespaces in the namespace restriction if the new namespace is a super-namespace or sub-namespace of existing namespaces.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01352:** Customization configuration with granular mapping "(0)" is unsupported; only the slash, "/", is allowed.  
**Cause:** An attempt was made to add an invalid namespace mapping of the customization configuration. Only one namespace to customization class list mapping is currently allowed, and that namespace has to be a slash (/).

**Action:** Ensure that only the slash (/) is specified in the namespace mapping of the customization configuration.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01353:** unable to retrieve customization layer values from "(0)"  
**Cause:** An I/O or parsing error occurred while reading the specified file to retrieve customization layer values.

**Action:** Ensure that the file does exist and has valid contents.

**Level:** 1  
**Type:** ERROR  
**Impact:** Files

**MDS-01355:** Both TypeConfig parameters contain Grammar Providers. Only one Grammar Provider is allowed.  
**Cause:** A Grammar Provider was specified in multiple type configuration sources.

**Action:** Ensure that only one Grammar Provider is specified in the type Configuration.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01356:** Both TypeConfig parameters contain Metadata Providers. Only one Metadata Provider is allowed.  
**Cause:** A Metadata Provider was specified in multiple type configuration sources.

**Action:** Ensure that only one Metadata Provider is specified in the type Configuration.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01357:** MDS configuration is not compatible with JAXB 1.0.
Cause: JAXB 1.0 jar file (xml.jar) was found on the classpath before any JAXB 2.0 jar files.
Action: Ensure that JAXB 2.0 jar files appear on the classpath before JAXB 1.0 jar file (xml.jar).
Level: 1
Type: ERROR
Impact: Configuration

MDS-01358: Invalid MDS configuration. Configuring multiple metadata stores as the default repository for customizations.
Cause: Multiple metadata stores were configured as the default repository for customizations in the MDS configuration.
Action: Ensure that only a single metadata store is configured as the default repository for customizations.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01359: The namespace used (http://xmlns.oracle.com/mds/config_10_1_3_001) in the configuration document is deprecated. Update the configuration document to use "http://xmlns.oracle.com/mds/config" as the namespace.
Cause: The namespace used (http://xmlns.oracle.com/mds/config_10_1_3_001) in the configuration document is deprecated.
Action: Update the configuration document to use "http://xmlns.oracle.com/mds/config" as the namespace.
Level: 1
Type: WARNING
Impact: Configuration

MDS-01360: Invalid MDS configuration. The attribute file-type-extension on the file-type element is missing for file type configuration.
Cause: The attribute file-type-extension was not specified on the file-type element for file type configuration.
Action: Ensure that a valid file-type-extension attribute is specified for every file-type element.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01361: cannot add XSD grammar
Cause: An attempt was made to add XSD grammar made by passing in a SchemaGrammarProvider.
Action: Ensure that the grammar provider is obtained using oracle.jdeveloper.webapp.runtime.WebAppDesignContext.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01362: Failed to auto-purge MDS repository: "{0}".
 Cause: MetadataStore was scheduled for auto-purge after the MDSInstance was released
 Action: Try later and contact support if persists.
 Level: 1
 Type: WARNING
 Impact: Other

MDS-01363: Failed to lookup datasource with JNDI name "{0}" configured for the DBMetadataStore, defaulting to use ClassPathMetadataStore.
 Cause: Application was configured with DBMetadataStore using JNDI datasource and JNDI lookup failed when running outside application server.
 Action: No action required if defaulting to ClasspathMetadataStore is acceptable. Otherwise, use appropriate configuration such as FileMetadataStore.
 Level: 1
 Type: WARNING
 Impact: Configuration

MDS-01365: Multiple metadata stores found with deploy-target attribute set to true, only one allowed per configuration.
 Cause: Multiple metadata stores were configured as the deployment target.
 Action: Ensure that only a single metadata store is configured for deployment.
 Level: 1
 Type: ERROR
 Impact: Configuration

MDS-01366: Cannot find a metadata store with deploy-target attribute set to true
 Cause: A single metadata store must be configured as a deploy target. None was found.
 Action: Ensure that a single metadata store is configured for deployment.
 Level: 1
 Type: ERROR
 Impact: Configuration

MDS-01367: Failed to create {0}. Invalid MDS configuration specified in: "{1}".
 Cause: Declarative MDS configuration is invalid.
 Action: Specify correct mds configuration information and try creating the configuration again.
 Level: 1
 Type: ERROR
 Impact: Configuration

MDS-01368: Variable "{0}" used in configuration document is not defined either as system property or as environment variable.
Cause: This variable was not defined.
Action: Ensure that this variable is defined before loading the configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01369: Variable declaration in "{0}" in configuration document is incorrect.
Cause: Variable did not either start with "${" or it did not end with "}".
Action: Ensure that the configuration variable is correctly declared in the form ${var}.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01370: MetadataStore configuration for metadata-store-usage "{0}" is invalid.
Cause: MetadataStore class or some of its properties were not valid.
Action: Ensure that the MetadataStore class exists and all required properties are valid. See message of the cause exception for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01371: ADF security is not configured in "{0}", password can not be securely processed.
Cause: ADF security configuration was not found in the config file.
Action: Set the password using JDeveloper to ensure required configuration is generated.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01373: unable to retrieve password.
Cause: unable to retrieve the password due to exception in security layer.
Action: See message of the cause exception for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01374: unable to save password.
Cause: unable to save the password due to exception in security layer.
Action: See message of the cause exception for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01375: No password defined for DBMetadataStore in configuration file or in the wallet file.
Cause: DBMetadataStore uses JDBC based configuration but no password specified.
Action: Set the password for the DBMetadataStore using JDeveloper.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01376: Unable to get database connection from data source "{1}" configured with JNDI name "{0}".
Cause: Failed to retrieve a database connection from the data source either because the data source is not configured correctly or the database details are not correct.
Action: Test the data source to check if it is correctly configured and if the database can be accessed. See message of the cause exception for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01377: Unable to get database connection from data source configured with JNDI name "{0}".
Cause: Failed to retrieve a database connection from the data source either because the data source is not configured correctly or the database details are not correct.
Action: Test the data source to check if it is correctly configured and if the database can be accessed. See message of the cause exception for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01378: metadata-store-usage attribute should not be set on namespace "{0}" defined in mds-config.xml.
Cause: metadata-store-usage attribute was set on the specified namespace in mds-component-config, but this namespace is always assumed to map to deploy-target metadata store.
Action: Ensure that the metadata-store-usage attribute is removed on specified namespace in mds-config.xml.

Level: 1
Type: ERROR
Impact: Configuration
MDS-01379: Tenant scope "[0]" is not valid for namespace "[1]" with namespace restriction "[2]".
   Cause: Tenant scope configured for the namespace is not supported with the configured namespace restriction.
   Action: Resolve the conflict between tenant scope and namespace-restriction in the application configuration.
   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-01380: Tenant scoped base metadata in package "[0]" cannot have global customization layer "[1]".
   Cause: Tenant scope GLOBAL on the specified customization layer conflicts with tenant scope TENANT on the base namespace.
   Action: Resolve the conflicts between the tenant scope on the base namespace and that on the customization layer.
   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-01381: Customization layer "[0]" has been configured more than once with the same tenant scope.
   Cause: Duplicate configuration for the same customization layer was found.
   Action: Remove the duplicate customization layer configuration from adf-config.xml of the application or component config (mds-config.xml) on classpath.
   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-01382: Customization layer "[0]" has been configured more than once with conflicting tenant scopes.
   Cause: Conflicting tenant scope configurations was found for the same customization layer.
   Action: Remove the incorrect customization layer configuration from adf-config.xml of the application or component config (mds-config.xml) on classpath.
   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-01383: Sandbox name should be provided for registering a sandbox change listener.
   Cause: No sandbox name was provided for registering the sandbox change listener.
   Action: Provide a valid sandbox name when registering the sandbox change listener.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01384: Sandbox change listener is not found when registering the lifecycle listener for sandbox {0}.
Cause: The SendboxChangeListener being registered was null.
Action: Provide a valid sandbox change listener when registering the lifecycle listener for the sandbox.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01385: Tenant scope "[0]" as base tenant scope is not valid for namespace "[1]".
Cause: The specified tenant scope type could not be configured as base tenant scope for the namespace.
Action: Use the correct base tenant scope parameter to create the namespace.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01386: Multitenant application can not be configured with metadata store "[0]" that does not support multitenancy.
Cause: A metadata store that does not support multitenancy was configured for a multitenant enabled application.
Action: Configure a metadata store such as DBMetadataStore that supports multitenancy.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01387: Tenant with id "{0}" is not allowed to change the autopurge settings; only the global admin can change this configuration.
Cause: A tenant cannot change the autopurge configuration.
Action: Only a global admin can change the autopurge configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01388: Unable to set cache size to {0} KiloBytes.
Cause: The cache size requested was invalid either because it was negative or it was too large for the Java Object Cache.
Action: Check that the specified size is >0 and within the limit for the cache implementation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01389: ContentType can not be specified for Streamed documents.
Cause: Conflicting settings between ContentType and isStreamed were found in ContentConfig.
Action: Change ContentOptions to use either ContentType or isStreamed.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01390: An audit event name for component "{0}" is not specified.
Cause: An audit event was defined, but a name for the event was not specified.
Action: Give the audit event a valid name.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01391: "{0}" is not a valid audit event name.
Cause: An invalid audit event name was found. An audit event name should start with a letter and contain only letters and digits.
Action: Specify a valid name for the audit event.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01392: Conflicting definitions were found for the audit event with name "{0}" and audit-component "{1}".
Cause: Conflicting audit event definitions were found in audit-component element.
Action: Remove or modify one of the conflicting audit events.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01393: Multiple audit events named "{0}" are defined for component "{1}".
Cause: Duplicate audit events were found in audit-component element.
Action: Remove or modify one of the duplicate audit events.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01394: The repository-name property element is not specified for a metadata-store element that does not have the class-name property.
Cause: The repository-name property element was not specified for a metadata-store element. It is required when the class-name property is not
specified on the metadata-store element to support look up of the repository
details.

**Action:** Specify the repository name in a child property element of the
metadata-store element or specify the class-name property for the metadat-store
element in the configuration file.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

MDS-01395: Unable to look up the details of the specified repository \{0\} for the
metadata-store configuration.

**Cause:** The specified repository was not registered in the domain or the repository
was not configured properly.

**Action:** Ensure that the specified repository for the metadata-store is configured
and registered properly in the domain.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

MDS-01396: metadata-store-usage attribute is not set on namespace \"\{0\}\" defined in
mds-config.xml.

**Cause:** metadata-store-usage attribute was missing on the specified namespace in
mds-component-config.

**Action:** Ensure that the metadata-store-usage attribute is set on the specified
namespace in mds-config.xml.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

MDS-01397: Multiple audit events with display name \"\{0\}\" are defined for
component \"\{1\}\".

**Cause:** More than one audit event was found with the same display name in
audit-component element.

**Action:** Ensure that the display names are unique for all audit events of a
component.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

MDS-01400: Read-only extended metadata resource \"\{0\}\" is not writable.

**Cause:** An attempt was made to update a read-only extended metadata resource.

**Action:** Ensure that the metadata object is mutable before getting the extended
metadata.

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic
MDS-01401: Updating a node in one document "[1]" using a node from a different document "[0]" is not allowed.
  Cause: The node being added or inserted was from a different metadata object. They must be from the same base document.
  Action: Ensure that the node being inserted is from the correct metadata object.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01402: attempting to update an immutable MElement: "[0]"
  Cause: The MElement being updated was immutable.
  Action: Check that the MElement in question really is mutable.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01403: Updating a mutable MElement using an immutable MElement: "[0]" is not allowed.
  Cause: An attempt was made to update a mutable MElement using an immutable MElement.
  Action: Verify that the child MElement being used for the update is mutable.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01404: Customization to replace root node of {0} is not allowed.
  Cause: An attempt was made to replace the root node as part of a customization.
  Action: Replace the root node in the base document, or modify the existing root node instead.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01450: missing GUID
  Cause: The application removed an object's GUID while editing its XML metadata content.
  Action: Fix the application so it does not tamper with MDS GUIDs.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01451: GUIDs do not match.
  Cause: The application altered an object's GUID while editing its XML metadata content.
  Action: Fix the application so it does not tamper with MDS GUIDs.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01452: GUID is null.
Cause: An attempt was made to retrieve a metadata object or document by GUID, but the given GUID was null.
Action: Fix the application so it passes a valid GUID to the method in question.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01455: multiple GUIDs on metadata object {0}
Cause: The application set multiple GUID values while editing an object’s XML metadata content.
Action: Fix the application so it does not tamper with MDS GUIDs.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01456: invalid GUID on metadata object {0}
Cause: The application set an object’s GUID to an invalid value while editing its XML metadata content.
Action: Fix the application so it does not tamper with MDS GUIDs.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01457: GUID feature not available
Cause: The application attempted to retrieve an object by GUID from a metadata store that does not yet support this.
Action: Fix the application so it does not attempt this, or configure the application to use a different type of metadata store.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01458: GUID must not be present.
Cause: The application set an object’s GUID value while editing its XML metadata content.
Action: Fix the application so it does not tamper with MDS GUIDs.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01460: GUIDs on DOM Document do not match.
**Cause:** The application set an object’s GUID to a different value while editing its XML metadata content.

**Action:** Fix the application so it does not tamper with MDS GUIDs.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01461: unable to create document [0] in the metadata repository; a document with the same name or GUID already exists**

**Cause:** An attempt was made to import or create a document with a name or GUID that is already used by an existing document.

**Action:** Delete the document in the MDS repository prior to import or creation.

**Level:** 1

**Type:** ERROR

**Impact:** Data

**MDS-01462: GUID feature is not supported in the classpath store.**

**Cause:** The application attempted to retrieve an object by GUID from the classpath metadata store that does not support this.

**Action:** Fix the application so it does not attempt retrieval by GUID, or configure the application to use a different type of metadata store.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01464: unable to save GUIDRegister [0]**

**Cause:** The GUID register (GUID index files) could not be written.

**Action:** Verify that the application has write permission for the given file, and that the disk is not full.

**Level:** 1

**Type:** ERROR

**Impact:** Files

**MDS-01465: unable to remove node [0] from the GUIDRegister**

**Cause:** The given node was not removed from the GUID register, possibly because it was not found.

**Action:** Delete the GUID register files, restart the application and try the operation again. If that fails, contact Oracle Support Services.

**Level:** 1

**Type:** INCIDENT_ERROR

**Impact:** Data

**MDS-01466: unable to create GUIDRegister directory [0]**

**Cause:** The owning directories for the GUID register (GUID index files) were not created.
**Action:** Verify that you have permission to create the parent directories for the given file name.

**Level:** 1

**Type:** ERROR

**Impact:** Files

**MDS-01468:** A different GUID is already registered for document {0}.

**Cause:** The GUID register has become corrupted.

**Action:** Delete the GUID register files and restart the application (the files will then be re-created).

**Level:** 1

**Type:** ERROR

**Impact:** Files

**MDS-01469:** unable to remove old GUIDRegister store path {0}

**Cause:** Old GUID register files were not deleted.

**Action:** Verify that you have permission to delete these files.

**Level:** 1

**Type:** ERROR

**Impact:** Files

**MDS-01470:** more than one GUID is registered for document {0}

**Cause:** The GUID register has become corrupted.

**Action:** Delete the GUID register files and restart the application (the files will then be re-created).

**Level:** 1

**Type:** ERROR

**Impact:** Data

**MDS-01471:** more than one document is registered for GUID {0}

**Cause:** The GUID register has become corrupted.

**Action:** Delete the GUID register files and restart the application (the files will then be re-created).

**Level:** 1

**Type:** ERROR

**Impact:** Data

**MDS-01472:** GUID is missing in file {0}

**Cause:** No GUID was found in the given file but the metadata object type definition indicated there should be one.

**Action:** Re-create the metadata object or correct its type definition not to require a GUID.

**Level:** 1

**Type:** ERROR
Impact: Data

MDS-01500: The MDSObject \{0\} is an XML document and cannot be loaded using StreamedObject API.
Cause: An attempt was made to load an XML document via StreamedObject API.
Action: Retry the operation using MetadataObject API or use a non-XML document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01501: The MDSObject \{0\} is not an XML document and cannot be loaded from MetadataObject API.
Cause: An attempt was made to load a streamed object (non-XML document) using MetadataObject API.
Action: Retry the operation using StreamedObject API or use a document containing valid XML.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01502: The MDSObject "\{0\}" is an XML document and cannot be saved using StreamedObject API.
Cause: An attempt was made to save an XML document using StreamedObject API.
Action: Retry the operation using MetadataObject API.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01503: The content of StreamedObject \{0\} cannot be read.
Cause: An attempt to read the StreamedObject content failed.
Action: Look at the error message and exception stack in the application logs to determine the reason for the failure.

Level: 1
Type: ERROR
Impact: Data

MDS-01504: The document \{0\} is either registered as a streamed file type or is a non-XML file extension and cannot be created using MetadataObject API.
Cause: An attempt was made to create an MDSObject named with a streamed object (non-XML) extension using MetadataObject API.
Action: Retry the operation using StreamedObject API.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-01600: The Dependency Analyzer requires a DependencyFilter.
   Cause: Either no filter was supplied, or the filter supplied was null.
   Action: Supply a non-null filter.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01601: The relationship role name {0} is a duplicate.
   Cause: A role name defined in a relationship had already been used.
   Action: Ensure that the toParentRole and toChildRole in a relationship have not already been used by another relationship.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01602: cannot locate the element type {0} in namespace {1} defined for the relationship
   Cause: The element type did not exist in the given namespace.
   Action: Ensure that the element type exists in the given namespace.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01604: The relationship from {0} to {1} is invalid because the latter is not a valid MDS reference.
   Cause: An invalid MDS reference was specified as the parent.
   Action: Ensure the parent reference is a valid MDS reference.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01605: The relationship from {0} to {1} is invalid because the latter does not exist.
   Cause: No parent element was found matching the MDS reference supplied.
   Action: Ensure that the parent reference in the relationship points to an existing element.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01606: The relationship from {0} to {1} is invalid because the latter is of incorrect type.
   Cause: The child element referenced a parent of the wrong type.
   Action: Ensure that the parent type matches the one stipulated in the relationship definition.
Level: 1
Type: ERROR
Impact: Programmatic
MDS-01607: The relationship from {0} to {1} is invalid because type information is not available for the latter.
Cause: No type definition could be found for the parent.
Action: Ensure that the parent type information is available.

Level: 1
Type: ERROR
Impact: Configuration
MDS-01608: The relationship from {0} to {1} is invalid because the latter maps to a different store.
Cause: The parent and child objects in the relationship have been mapped to different stores.
Action: Ensure that the parent maps to the same store as the child object.

Level: 1
Type: ERROR
Impact: Configuration
MDS-01609: The document {0} contains relationships that do not conform to the relationship definition.
Cause: Constraints in this document's relationship definitions were violated.
Action: Ensure that the relationships conform to the constraints in the relationship definition.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-01610: Some of the changes in the MDS session are not valid.
Cause: A change was made in the MDS session that was not valid.
Action: Check the changes made and ensure each of them is valid.

Level: 1
Type: ERROR
Impact: Data
MDS-01611: not saving changes in MDS session because some changes are not valid
Cause: A change made in the MDS session was not valid.
Action: Check all the changes made and ensure that all changes are valid.

Level: 1
Type: ERROR
Impact: Data
MDS-01612: The object {0} cannot be deleted because it is referenced by {1}.
Cause: An attempt was made to delete an element that was being referenced by a child object.

Action: Remove the child reference to this object so the object can be deleted.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01613: The MetadataObject {0} cannot be deleted because of relationship integrity constraints.

Cause: An attempt was made to delete an object that was still being referenced.

Action: Remove the child references to the metadataObject so that it can be deleted.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01614: Rename is not allowed because integrity checking is not turned on in the object {1} in MetadataObject {0}.

Cause: Integrity checking was switched off so it was not possible to check whether the rename would have broken any relationship integrity constraints.

Action: Ensure that integrity checking is turned on.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01615: failure to rename {0} because there is no reference attribute in MetadataObject {1}, element {2}

Cause: A child object could not reference the renamed object as its current reference was invalid.

Action: Confirm that all the references in the child object are valid.

Level: 1
Type: ERROR
Impact: Data

MDS-01620: The untyped dependency with the following registration details cannot be inserted: {0}, {1}, {2}, {3}.

Cause: The dependency could not be registered in the database repository due to a SQL exception.

Action: Correct the cause of the SQL exception and retry the untyped dependency registration.

Level: 1
Type: ERROR
Impact: Data

MDS-01621: The untyped dependency information for {0} could not be removed.
Cause: An attempt to remove untyped dependency information failed either because the document was invalid or there was a SQL exception.

Action: Verify that the document and its dependencies are valid, or correct the cause of any SQL exceptions.

Level: 1  
Type: ERROR  
Impact: Data

MDS-01622: There is no analyzer to unregister.
Cause: No analyzers were supplied to be unregistered.
Action: Supply the DependencyAnalyzer to be unregistered.

Level: 1  
Type: ERROR  
Impact: Configuration

MDS-01630: invalid operation in a customized context on an element that could participate in a relationship: {0}
Cause: Within a customized context there was an attempt to insert an element without first deleting it as part of a composite move.
Action: Within the customized context, do not attempt inserts on elements without first deleting them as part of a composite move.

Level: 1  
Type: ERROR  
Impact: Programmatic

MDS-01631: In a customized context, an element that could participate in a relationship as a child cannot be modified. The reference is {0} on {1}.
Cause: Within a customized context, an attribute being customized could have been a parent reference within a relationship.
Action: Do not attempt to modify or remove an attribute that could be a parent reference within a relationship.

Level: 1  
Type: ERROR  
Impact: Programmatic

MDS-01633: In a customized context, an element that could participate in a relationship cannot be deleted: {0}.
Cause: Within a customized context an attempt was made to delete an element that could participate in a relationship.
Action: Do not attempt to delete an entity while in a customized context.

Level: 1  
Type: ERROR  
Impact: Programmatic

MDS-01634: In {0}, a {1} element that participates in a relationship lacks a configurable ID.
**Cause:** An operation was attempted on a participant in a relationship that lacked a configurable ID.

**Action:** Add a configurable ID to the element on which it is missing. If necessary, refer to the element’s schema definition to identify the configurable ID attribute.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-01635: Skipping the relationship validation for {0} in the metadata object {1} because the element contains an invalid MDS reference.  
**Cause:** Validation of the object’s relationships was not performed because the element contained an invalid MDS reference.  
**Action:** Correct the MDS references in the MetadataObject specified.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-01700: MEelementBeanImpl._setSimpleChild cannot be called on a non-simpleType element: name={0}, namespace={1}  
**Cause:** An attempt was made to set a bean element to a simple type, but the definition in the schema was not a simple type. The generated beans may not have matched the registered schema.  
**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

MDS-01701: Cannot set the value on an element that is not based on a simpleType: name={0}, namespace={1}  
**Cause:** An attempt was made to set an element to a simple type, but the definition in the schema was not a simple type.  
**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

MDS-01702: The method getBean() is not valid for metadata object {0} - it is allowed on only bean metadata objects.  
**Cause:** An attempt was made to access the metadata object using the bean API but the metadata object was not a bean metadata object. The schema for the root element may not have been registered with MDS, or the beans were not available on the classpath.
**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

MDS-01703: error unmarshalling bean element: name={0}, namespace={1} in metadata object {2} - no object factory can be found or jaxb.properties cannot be found

**Cause:** An element was found in the metadata object that did not have a corresponding bean class. The schema for the element may not have been registered with MDS, or the beans were not available on the classpath.

**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

MDS-01705: error unmarshalling bean element: name={0}, namespace={1} in metadata object {2} - object factory class {3} does not have the expected unmarshal() method

**Cause:** The bean object factory found for the element did not appear to have been generated by the MDS bean generation tool.

**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1
**Type:** ERROR
**Impact:** Data

MDS-01706: error unmarshalling bean element: name={0}, namespace={1} in metadata object {2} - object factory class {3} failure in unmarshal() method

**Cause:** An unexpected exception occurred while creating a bean object for the element.

**Action:** Contact the developers of the application, providing the cause exception.

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

MDS-01707: Error generating relationship method {0} for relationship defined on attribute {1}: incorrect parentType definition

**Cause:** There was an error in the relationship definition.

**Action:** Check the parentType definition on the relationship

**Level:** 1
**Type:** ERROR
Impact: Programmatic

MDS-01800: Sandbox is not supported for {0} configured on {1}.
  Cause: An underlying metadata store did not support the sandbox feature.
  Action: Provide a metadata store that supports sandbox feature.

  Level: 1
  Type: ERROR

Impact: Configuration

MDS-01801: Document name {0} should not refer to the raw sandbox resource name.
  Cause: A resource name pointed directly to a resource in the sandbox component.
  Action: Provide a logical document name to resolve the issue.

  Level: 1
  Type: ERROR

Impact: Programmatic

MDS-01802: A sandbox by name {0} already exists in the {1} store.
  Cause: A sandbox with the same name already existed in the store.
  Action: Use a different name or destroy the existing sandbox before reusing the same name.

  Level: 1
  Type: ERROR

Impact: Configuration

MDS-01803: Sandbox Persistence manager cannot be constructed using an instance of SandboxPManager.
  Cause: An attempt was made to construct an instance of sandbox persistence manager using an instance of SandboxPManager.
  Action: Contact Oracle Support Services.

  Level: 1
  Type: INCIDENT_ERROR

Impact: Programmatic

MDS-01804: Sandbox {0} configured with {1} namespace, {2} store and {3} label from mainline is not compatible with {4} label created on {5} namespace.
  Cause: A label was used that is different from the mainline label associated with the sandbox.
  Action: Use a label that is compatible with the sandbox and retry the operation.

  Level: 1
  Type: ERROR

Impact: Programmatic

MDS-01805: Sandbox {0} missing in {1}.
  Cause: The specified sandbox was not found in the underlying metadata store.
  Action: Provide the name of an existing sandbox, or create a new sandbox if necessary.
Level: 1  
Type: ERROR  
Impact: Data  

MDS-01806: failure to remove \{0\} from \{1\}, because it is not a valid document in the sandbox  
Cause: The specified document to be removed was not found in the sandbox.  
Action: Verify that the document exists in the sandbox.  

Level: 1  
Type: ERROR  
Impact: Data  

MDS-01807: failure to delete sandbox \{0\}  
Cause: An error occurred while deleting the sandbox.  
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.  

Level: 1  
Type: ERROR  
Impact: Programmatic  

MDS-01808: SandboxUsage with the sandbox name set to \{0\} does not return any namespaces.  
Cause: No namespaces were found on the SandboxUsage.  
Action: Configure the SandboxUsage with namespaces that are associated with the sandbox.  

Level: 1  
Type: ERROR  
Impact: Programmatic  

MDS-01809: failure to list sandboxes matching \{0\}  
Cause: An error occurred while listing or querying the sandboxes.  
Action: Look for error messages to determine the actual cause of the failure.  

Level: 1  
Type: ERROR  
Impact: Programmatic  

MDS-01810: failure to refresh sandboxes to target label \{0\}  
Cause: Target label is older than the current source label.  
Action: Specify a target label which is later than current label.  

Level: 1  
Type: ERROR  
Impact: Programmatic  

MDS-01811: failure to list sandboxes matching customization for \{0\}, layer: \{1\}, value: \{2\}
Cause: An error occurred while listing or querying the sandboxes.
Action: Look for error messages to determine the actual cause of the failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01812: sandbox name {0} exceeds the maximum limit of {1} characters
Causes: Sandbox name is more than the supported size.
Action: Use a shorter sandbox name.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01813: sandbox metadata for {0} cannot be saved because it is being updated by another user.
Causes: More than one user is updating the sandbox metadata at the same time.
Action: Get the sandbox metadata again and retry saving after making the changes.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01814: sandbox metadata for {0} cannot be changed because it is read only.
Causes: Sandbox metadata is read only and cannot be updated
Action: To update get an instance of sandbox and then get the sandbox metadata from the instance

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01815: store configured for sandbox {0} does not support sandbox metadata.
Causes: Sandbox metadata is not supported on the repository.
Action: Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later to use this feature.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01816: {0} is not a valid name for a sandbox.
Causes: The specified sandbox name is either an MDS reserved package part name or contains invalid characters.
Action: Ensure that the specified sandbox name is neither an MDS reserved package part name nor does it contain invalid characters as per the MDS Resource name specification.
Level: 1
Type: ERROR
Impact: Programmatic
MDS-01817: sandbox {0} is either active or applied to mainline. The undo operation cannot continue.
Cause: The sandbox is either applied or is in the active state.
Action: Check that the sandbox is in the intermediary state

Level: 1
Type: ERROR
Impact: Programmatic
MDS-01818: sandbox {0} is in applied_with_undo state. No further updates except finalized are allowed.
Cause: The sandbox is in applied_with_undo state and no further updates can be done to the sandbox.
Action: The only allowed operations in the intermediary state are: finalize and undo.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-01819: Lock on sandbox {0} cannot be taken. A concurrent management operation may be in progress.
Cause: A management operation on the sandbox is in progress and has locked the sandbox.
Action: Retry the operation after a while.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-01820: Metadata for sandbox {0} is not available. The sandbox management operation cannot proceed without sandbox metadata.
Cause: Sandbox was created without metadata.
Action: Use the management APIs that are available for sandboxes without metadata.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-01821: Lifecycle change notifications for the sandbox {0} cannot be sent out because the change type is not defined.
Cause: The sandbox lifecycle change does not have a valid change type.
Action: Contact Oracle Support Services.

Level: 1
Type: WARNING
Impact: Other

MDS-01900: None of the configured metadata stores support versioning.
  Cause: The underlying metadata store did not support versioning.
  Action: Configure a metadata store that supports versioning, and retry the operation.
  Level: 1
  Type: ERROR
  Impact: Configuration

MDS-01901: specifying multiple labels for a namespace not allowed
  Cause: Multiple labels were provided for a namespace that pointed to a metadata store.
  Action: Provide a single label to map to a namespace and retry the operation.
  Level: 1
  Type: ERROR
  Impact: Configuration

MDS-01902: Label or namespace is invalid.
  Cause: Either the namespace or the label was invalid.
  Action: Verify that the namespace and the label are correct, and retry the operation.
  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-01903: Specified label {0} does not exist for {1} namespace.
  Cause: The specified label did not exist in the metadata store mapped to the namespace.
  Action: Verify that the label name is correct and that the label exists, and then retry the operation.
  Level: 1
  Type: ERROR
  Impact: Configuration

MDS-01906: A label with same name {0} already exists.
  Cause: An attempt was made to create a label that already existed.
  Action: Create a label with a different name, and then retry the operation.
  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-01907: The label {1} is already configured for the store "{0}" , so the same store cannot be configured with another label "{2}".
  Cause: An attempt was made to map a label for a store when a label-to-store mapping already existed for that store.
**Action:** De-associate the existing label mapped to the store first, and then retry the operation.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01908: failure to delete versions of the document {0}**

**Cause:** An error had occurred while versions were being deleted.

**Action:** Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01909: No namespaces are specified for creating label {0}**

**Cause:** No namespace information was found for creating a label.

**Action:** Provide a namespace for creating a label, and retry the operation.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01910: The namespace {0} is already registered with the label {1}, so the super/sub namespace {2} cannot be assigned with the label {3}**.

**Cause:** An attempt was made to associate multiple labels with a namespace, or an attempt was made to associate multiple namespaces with a single label.

**Action:** Associate a single label with a single namespace, and retry the operation.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01911: failure of the metadata purge operation for the requested repository partition**

**Cause:** An error occurred during a purge operation.

**Action:** Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01912: MetadataStore configured for {0} does not support versioning.**

**Cause:** The metadata store configured for the resource did not support versioning.

**Action:** Configure a metadata store that supports versioning or verify that the resource name is correct.

**Level:** 1
Type: ERROR

Impact: Configuration

MDS-01913: A deployment lineage with same application name "{0}" and deployment module name "{1}" already exists.
Cause: An attempt was made to create a lineage that already existed.
Action: Create a lineage with a different application or MAR name, and then retry the operation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01914: The application name and deployment module name cannot be null to create DeploymentInfo.
Cause: An attempt was made to create DeploymentInfo with null values.
Action: Make sure that the values for application name and deployment module name are non-null.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02024: Setting or modifying the unique identifier of an existing node through customizations is not supported.
Cause: An attempt was made to customize a configurable ID.
Action: Remove any customization that is attempting to modify the unique identifier of an XML element.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02025: The requested change is incompatible with changes already pending on the MDS session.
Cause: An attempt was made to perform a change operation on the MDS session which would update the same MetadataObject part as another change operation that has been done. For example, if you change a customization of a metadata object then attempt to delete all of its customizations, the latter operation will fail because it conflicts with the former. You must save the former change first before doing the second.
Action: Save the changes that have already been made on the session (by calling flushChanges), then retry the failed operation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02100: Illegal permission target: "{0}" - must begin with {1}.
Cause: An attempt was made to create an MDS permission class with an incorrect syntax.
Action: Permission classes are usually created internally by MDS but may be created by the application directly. Contact the developers of the application to confirm that this is not an application error and if not contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-02101: Illegal permission action: "[0]" - unknown action.
Cause: An attempt was made to create an MDS permission class with an incorrect syntax.
Action: Permission classes are usually created internally by MDS but may be created by the application directly. Contact the developers of the application to confirm that this is not an application error and if not contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-02102: Illegal permission action: "[0]" - customize action takes 0 or 2 parameters.
Cause: An attempt was made to create an MDS permission class with an incorrect syntax.
Action: Permission classes are usually created internally by MDS but may be created by the application directly. Contact the developers of the application to confirm that this is not an application error and if not contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-02201: type validation failure for the metadata object "[0]"
Cause: The content of the metadata object was not valid against the registered XSDs.
Action: Ensure that the metadata object content is valid with respect to the registered XSDs.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02202: Content of the metadata object "[0]" is not valid.
Cause: The content was not valid either with respect to the registered XSDs or with the registered relationships.
Action: Check the content of the metadata object and correct the content as necessary to make it valid.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02203: type validation error for the metadata object "\{0\}" at the node "\{1\}"

Cause: A validation error occurred at the specified node.

Action: Check the content at the specified node for compliance with registered XSDs and relationships.

Level: 1
Type: ERROR

Impact: Programmatic

MDS-02204: type validation warning for the metadata object "\{0\}" at the node "\{1\}"

Cause: A validation warning occurred at the specified node.

Action: Check the content at the specified node for compliance with registered XSDs.

Level: 1
Type: ERROR

Impact: Programmatic

MDS-02301: The rename unit is invalid because either "\{0\}" or "\{1\}" is reused in the rename plan.

Cause: The resource name provided in the rename plan was used more than once.

Action: Provide distinct names for source and target names while renaming.

Level: 1
Type: ERROR

Impact: Programmatic

MDS-02302: subobjects "\{1\}" not found in metadata object "\{0\}"

Cause: The specified subobjects were not found in the metadata object.

Action: Look in the error message log for details.

Level: 1
Type: ERROR

Impact: Programmatic

MDS-02303: The given rename plan syntax is invalid

Cause: The rename plan syntax specified was invalid.

Action: Look in the error message log for details.

Level: 1
Type: ERROR

Impact: Configuration

MDS-02304: RenameOperation failed for StreamedObject "\{0\}" because subobjects were specified for this streamed object.

Cause: Streamed objects do not support subobjects.

Action: Remove the RenameObject that contains reference to the streamed object and subobject references from the RenamPlan.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02401: The operation {0} on the {1} node is not allowed.
Cause: An attempt was made to customize a node that was not customizable.
Action: If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-02402: The type definition for {1} does not allow customization of {0}.
Cause: An attempt was made to customize a node that was not customizable.
Action: If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file, tag library definition file, or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-02404: The subelement {1} in the MDX document does not allow customization of {0}.
Cause: An attempt was made to customize a node that was not customizable.
Action: Check the customization restriction information which can be located in the schema definition, standalone xml file or an extended metadata file. Also check the customization policy for the MDSSession in use and the customization configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-02405: The attribute {2} in element {1} in the MDX document does not allow customization of {0}.
Cause: An attempt was made to customize a node that was not customizable.
Action: If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-02406: Customization of \{0\} is not allowed because it is not explicitly allowed by any type definition nor any extended metadata entry.
Cause: An attempt was made to customize a node that was not customizable.
Action: If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-02407: Customization of \{0\} is not allowed because the local reference was not found in the document.
Cause: An enquiry about the customizability of a node supplied a local reference that wasn't found in the document.
Action: Ensure that the local reference applies to the document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02408: The operation \{0\} on the \{1\} node is not allowed because the metadata object reference was not found in the change event.
Cause: A document change is not allowed because the metadata object reference was null.
Action: Ensure that the change document exists.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02500: Cannot find a valid MDSSession object for accessing the MDS document using ORAMDS URL
Cause: A valid MDSSession object was not set before accessing the document using the "oramds:///" protocol.
Action: Use the MDSURLHelper.setMDSSession() method to set a valid MDSSession object before accessing MDS documents using the oramds protocol.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02501: cannot load the ORAMDS URL "\{0\}" because MDS session could not be created or resolved
Cause: An error occurred while creating or resolving an MDS session object.
Action: Look for messages describing the cause exception in the error message log for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02600: configuration migration failure because the configuration document contains more than one mds-config element
Cause: The given configuration document contained more than one mds-config element.
Action: Correct the configuration document to contain a single mds-config element.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02601: configuration migration failure because it contains more than one persistence-config element
Cause: The configuration document contained more than one persistence-config element.
Action: Correct the configuration document to contain a valid persistence-config element.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02602: configuration migration failure because it contains more than one metadata-stores element
Cause: The configuration document contained more than one metadata-stores element
Action: Correct the configuration document to be a valid 10.1.3 configuration document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02603: configuration migration failure because it contains an invalid metadata-store element
Cause: The configuration document contained an invalid metadata-store element.
Action: Correct the configuration document to be a valid 10.1.3 configuration document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02700: The resource "[0]" cannot be updated by tenant "[1]."
Cause: The given resource could not be updated by the current tenant because it was not available in current tenant's scope.
**Action:** Verify that the resource is being updated in the same scope of the tenant who updates the resource.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-02702:** Tenant scoped PManager instance cannot be created for tenant \{0\} because given PManager instance does not have multitenancy enabled.

**Cause:** The PManager instance used here did not have multitenancy enabled but an attempt was made to create tenant scoped PManager instance.

**Action:** Verify that the PManager instance being passed has multitenancy support enabled.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-02703:** Tenant scoped PManager cannot be created for tenant "null".

**Cause:** The PManager instance used here had multitenancy support enabled but an attempt was made to create tenant scoped PManager instance with "null" tenant.

**Action:** Create scoped PManager instance for valid tenant id.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-02704:** Cannot create tenant scoped PManager instance using another tenant scoped PManager instance.

**Cause:** An attempt was made to create tenant scoped PManager using another scoped PManager instance.

**Action:** Create a tenant scoped PManager using an unscoped PManager instance.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-02705:** Cannot create PContext using an unscoped PManager instance.

**Cause:** Creating PContext using an unscoped PManager instance was not allowed.

**Action:** Use PManager instance that is scoped for a tenant to create PContext.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-02706:** Cannot create PTransaction using an unscoped PManager instance.

**Cause:** Creating PTransaction using an unscoped PManager instance was not allowed.

**Action:** Use PManager instance that is scoped for a tenant to create PTransaction.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02707: PContext with tenant id {0} cannot be used in scoped PMRangern with tenant id {1}.
Cause: Tenant id attached to PContext and the tenant id of tenant scoped PMRanger to which it was passed did not match.
Action: Create PContext from the tenant scoped PMRanger to which it is passed.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02708: PMRanger instance is being used after it has been released.
Cause: PMRanger instance was being used after it had been released.
Action: Create a new PMRanger.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02709: Configuration change operation "\(0\)" on scoped PMRanger is not allowed for the tenant \(1\). Only global tenant is allowed to change the configuration settings in PMRanger.
Cause: A non global tenant attempted to change configurations in scoped PMRanger.
Action: Use global tenant scoped PMRanger to change the configuration settings.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02710: Operation "\(0\)" is not allowed in unscoped PMRanger.
Cause: A tenant aware operation was invoked in an unscoped PMRanger instance.
Action: Use a global or tenant scoped PMRanger to do the operation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02711: No tenant operations are allowed on MetadataStoreConnection not associated with any tenant id.
Cause: A tenant aware operation was invoked in MetadataStoreConnection to database store which did not have any tenant id attached.
Action: Create a new MetadataStoreConnection with a valid tenant id.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02712: The operation {0} is not allowed in this MetadataStoreConnection to database store because the MetadataStoreConnection is not attached to any tenant id.
Cause: A tenant aware operation was invoked in MetadataStoreConnection to database store which did not have any tenant id attached.
Action: Create a new MetadataStoreConnection with a valid tenant id.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02713: PContext associated with tenant {0} cannot be used with MetadataStoreConnection associated with different tenant {1}. Operation {2} failure.
Cause: The tenant id attached to PContext and MetadataStoreConnection did not match.
Action: Use PContext with same tenant id as the one attached to metadata store connection.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02714: Creating metadata store connection for tenant {0} is not allowed in non multitenant application.
Cause: An attempt was made to create metadata store connection for non global tenant in non multitenant application.
Action: Use global tenant id to create metadata store connection.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02715: No tenant scoped PManager instances can be created on already released PManager instance.
Cause: An attempt was made to create a tenant scoped PManager instance on already released PManager instance.
Action: Create new PManager instance using a PConfig then try creating scoped PManager instance.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02720: Cannot rename the document {0} to {1} as the new tenant scope does not match the original tenant scope.
Cause: The new name for the document was configured to a different tenant scope to the old document name.
Action: Provide a new valid document name that maps to the same tenant scope as the original document.
Level: 1
Type: ERROR
Impact: Programmatic
MDS-02721: PResource {0} for tenant {1} cannot be used with MetadataStoreConnection that is associated with different tenant {2}. Operation {3} failure.
Cause: The tenant ids of the PResource and the MetadataStoreConnection did not match.
Action: Use PResource with same tenant id of the one attached to metadata store connection.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-02722: Mar Lineage can be created by global tenant only. Creating MAR lineage is not supported for tenant {0}.
Cause: A non-global tenant attempted to create MAR lineage which is not supported. MAR lineage creation is allowed only for global tenant currently.
Action: Create MAR lineage from global tenant context.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-02723: Operation "{0}" is not supported in Sandbox currently.
Cause: Unsupported operation was invoked in Sandbox instance.
Action: This operation is not supported in Sandbox currently.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-02724: The ResourceName that is attached to tenant scope {0} is not allowed in SandboxPTransaction that is attached to the different tenant scope {1}. Operation {2} failure.
Cause: Tenant scope for ResourceName and SandboxPTransaction did not match.
Action: Use ResourceName with same tenant scope of the one attached to SandboxPTransaction.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-02725: The Label {0} that is attached to tenant {1} is not allowed in MetadataStoreConnection that is attached to different tenant {2}. Operation {3} failure.
Cause: Tenant id for Label and MetadataStoreConnection did not match.
Action: Use label with same tenant id of the one attached to MetadataStoreConnection.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02726: The tenant {0} that is attached to PDocument {1} is not allowed in SandboxPTransaction that is attached to different tenant {2}. Operation {3} failure.
Cause: Tenant id for PDocument and SandboxPTransaction did not match.
Action: Use PDocument with same tenant id of the one attached to SandboxPTransaction.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02727: The tenant {0} that is attached to Label {1} is not allowed in SandboxPTransaction that is attached to different tenant {2}. Operation {3} failure.
Cause: Tenant id for Label and SandboxPTransaction did not match.
Action: Use label with same tenant id of the one attached to SandboxPTransaction.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02728: The tenant {0} that is attached to {1} {2} is not allowed in Sandbox that is attached to different tenant {3}. Operation {4} failure.
Cause: Tenant scope attached and Sandbox did not match.
Action: Use tenant id same as the one attached to Sandbox.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02729: The tenant scope {0} that is attached to {1} {2} is not allowed in Sandbox that is attached to the different tenant scope {3}. Operation {4} failure.
Cause: Tenant scope attached and Sandbox did not match.
Action: Use tenant scope same as the one attached to Sandbox.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02730: Error in deprovisioning the tenant {0}. Unable to delete the resources in {1}.
Cause: Tenant resources might be on read-only store.
Action: Verify that tenant resources exist on a writable store.

Level: 1
Type: ERROR
**Impact:** Configuration

**MDS-02731: Tenant specific operations cannot be done in multitenant disabled environment for tenant {0}.**

**Cause:** An attempt was made to do tenant specific operations in Multitenant disabled environment.

**Action:** Enable the multitenant feature.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**MDS-02732: TenantId cannot be created for the value "{0}".**

**Cause:** TenantId could not be created with negative values or a value with more than 18 digits.

**Action:** Use positive values with max of 18 digits in decimal format to create a valid TenantId object.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**MDS-02733: Rename across multiple tenant stripes is not supported on this store.**

**Cause:** The store does not support writing to multiple tenant stripes or multitenancy is not enabled.

**Action:** Enable the multitenant feature.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**MDS-02800: The label "{0}" cannot be provided as null for label based transfer.**

**Cause:** The label was provided as null for label based transfer.

**Action:** Provide valid label name for label based transfer.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-02801: Document {0} with scope {1} cannot be transferred by tenant {2}.**

**Cause:** The given document could not be transferred from source store by current tenant because the document was not in the scope of current tenant.

**Action:** Ensure that document being transferred mapped to current tenant scope.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**MDS-02802: Transfer is not supported for multitenant MDSInstance with file store.**

**Cause:** Either source or target MDSInstance has multitenancy enabled and configured with file store.
Action: Use a non multitanant MDSInstance with file store.

Level: 1
Type: ERROR
Impact: Configuration

MDS-02803: List of patterns to select the MOs are either empty or null.
Cause: List of MOPatterns are empty or null.
Action: Ensure that valid list of MOPatterns are provided.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02804: Layer name "[0]" configured in CustLayerFilter to remove customizations, contains patterns.
Cause: Layer name contains patterns.
Action: Ensure that layer name doesn't contain any patterns.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-05786: Unable to deploy the metadata archive: {0}.
Cause: Metadata archive (MAR) is corrupt.
Action: Validate that the metadata archive (MAR) is valid and readable.

Level: 1
Type: ERROR
Impact: Configuration

MDS-05787: Partition name is not specified in adf-config.xml file.
Cause: A property with name partition-name was not found as a child of the metadata-store element.
Action: Specify the target partition as a child property of the metadata-store element in adf-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

MDS-05788: Unable to find the JNDI datasource in the file adf-config.xml.
Cause: A property with name jndi-datasource was not found as a child of the metadata-store element.
Action: Specify the JNDI datasource a child property of the metadata-store element in adf-config.xml.

Level: 1
Type: ERROR
Impact: Configuration
MDS-05789: Unable to deploy the metadata archive.
   Cause: Metadata archive (MAR) was not found.
   Action: Ensure that the metadata archive (MAR) is packaged with the application.

   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-05790: The metadata store definition is either missing or incorrectly specified in the application configuration.
   Cause: The metadata store definition is either missing or incorrectly configured in the file adf-config.xml.
   Action: Ensure that the metadata store definition is present and contains the correct repository configuration

   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-05791: An error occurred during the deployment of the metadata archive (MAR) [0].
   Cause: Details are usually given in the cause exception. Look for messages describing the cause exception and take the appropriate action.
   Action: Ensure that the metadata store configuration is correct.

   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-05792: Unable to load MDS configuration from "[0]"
   Cause: The MDS configuration is either not defined or incorrect.
   Action: Ensure that the MDS configuration is correctly defined.

   Level: 1
   Type: ERROR
   Impact: Configuration

   Cause: The metadata path named in the error message for the MDS file repository partition cited in the error message was either invalid or unreachable.
   Action: Ensure that the MDS file repository named in the error message is registered and that the metadata partition cited in the error message is configured with a valid metadata path in adf-config.xml.

   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-05794: Unable to load MDS persistence configuration from "[0]"
   Cause: The MDS persistence configuration is either not defined or incorrect.
Action: Ensure that the MDS persistence configuration is correctly defined.

Level: 1
Type: ERROR
Impact: Configuration

MDS-05795: Invalid value "[0]" specified in the content-config of the application's configuration
Cause: Only restriction type CUSTOMIZATIONS is supported in content-config. It is only allowed with path "/" and no file extension.
Action: Ensure that the MDS persistence configuration is correctly defined.

Level: 1
Type: ERROR
Impact: Configuration

MDS-10001: Error:
Cause: An error occurred. Details are usually given in the accompanying messages.
Action: Look for messages describing the cause and take the appropriate action.

Level: 1
Type: ERROR
Impact: Data

MDS-10003: The specified {0} argument is null or empty.
Cause: A required program argument was null or empty.
Action: Record any accompanying exception messages and contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-10009: The transfer of the document {0} is not successful.
Cause: Document transfer failed
Action: Examine any accompanying messages to decide if further action is required.

Level: 1
Type: WARNING
Impact: Data

MDS-10010: Deleting the document {0} is not successful.
Cause: Document deletion failed
Action: Examine any accompanying messages to decide if further action is required.

Level: 1
Type: WARNING
Impact: Data

MDS-10011: The operation on {0} has been rolled back. Total number of documents failed during the operation is {1}.
Cause: The transfer was rolled back
Action: Examine any accompanying messages to decide if further action is required.
Level: 1
Type: WARNING
Impact: Data

MDS-10012: The operation has failed.
Cause: The operation has failed.
Action: Examine any accompanying messages to decide if further action is required.
Level: 1
Type: WARNING
Impact: Data

MDS-10013: {0} operation started.
Cause: Transfer started.
Action: Transfer started, no action required.
Level: 1
Type: NOTIFICATION
Impact: Data

MDS-10014: {0} is completed. Total number of documents successfully processed : {1}, total number of documents failed : {2}.
Cause: Transfer complete.
Action: Check any accompanying messages to decide if any action is required.
Level: 1
Type: NOTIFICATION
Impact: Data

MDS-10015: Failure occurred while committing the {0} operation. The operation has been rolled back.
Cause: Failure occurred while committing the operation.
Action: Examine any accompanying messages to decide if further action is required.
Level: 1
Type: ERROR
Impact: Data

MDS-10016: The operation on {0} has been rolled back. The post transfer label {1} could not be created.
Cause: Failure occurred when creating the post transfer label.
Action: Examine any accompanying messages to decide if further action is required.

Level: 1
Type: ERROR
Impact: Data

MDS-10017: The target store does not support deployment management. Given application name "{0}" and deployment module name "{1}" could not be persisted as deployment information in store.
Cause: The target store does not support deployment management.
Action: No action required. The documents will be transferred without the deployment information attached. If you want to store deployment information as well, configure a metadata store that supports deployment management, typically a DB store.

Level: 1
Type: WARNING
Impact: Data

MDS-10018: The transfer restriction {0} is not supported in target store. All the documents will be transferred to target store.
Cause: Given transfer restriction is not supported in target store.
Action: No action required. The given restriction will not be applied to the transfer, all the documents will be transferred to target store.

Level: 1
Type: WARNING
Impact: Data

MDS-10019: The deployment information for application name "{0}" and module name "{1}" ignored since transfer operation is of type "{2}".
Cause: The deployment information will not be processed in transfer operation type other than "Deployment".
Action: No action required. Given deployment information will not be processed in the current transfer operation.

Level: 1
Type: WARNING
Impact: Data

MDS-10020: Querying checksum data from target repository to avoid transferring unchanged documents.
Cause: To apply transfer restriction CHANGED, transfer queries the target repository to check whether documents being transferred already exist with same content.
Action: No action required.

Level: 1
Type: NOTIFICATION
Impact: Data
MDS-10022: Query to get the checksum of the documents from target repository completed successfully.

**Cause:** To apply transfer restriction CHANGED, transfer queries the target repository to check whether documents being transferred already exist with same content.

**Action:** No action required.

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Data

MDS-10023: No valid exclusion rules are specified in mds-transfer-config.xml to preserve documents in target store.

**Cause:** No valid namespaces or metadata object names specified in /meta-inf/mds-transfer-config.xml to preserve the documents in target store.

**Action:** No action required.

**Level:** 1

**Type:** WARNING

**Impact:** Data

MDS-10024: Preparing the list of documents to be excluded during transfer as per the configuration given in mds-transfer-config.xml.

**Cause:** To preserve the documents in target store as specified in the given /meta-inf/mds-transfer-config.xml, MDSTransfer prepares the list of documents to be excluded by looking at source and target stores.

**Action:** No action required.

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Data

MDS-10025: Following metadata paths are configured in mds-transfer-config.xml to preserve existing documents under this metadata path in target repository.

**Configured metadata paths are as follows (0):**

**Cause:** Some metadata paths are configured in mds-transfer-config.xml to preserve existing documents in target repository.

**Action:** No action required.

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Other

MDS-10026: Following Metadata object names are configured in mds-transfer-config.xml to preserve existing metadata objects with same name in target repository. Configured metadata object names are (0):

**Cause:** Some metadata object names are configured in mds-transfer-config.xml to preserve existing documents in target repository.

**Action:** No action required.

**Level:** 1
Type: NOTIFICATION
Impact: Other

MDS-10027: To preserve documents in target store, the following documents from source store are marked as excluded by transfer {0}.
Cause: To preserve documents in target store, some documents from source store are marked as excluded by transfer.
Action: No action required.
Level: 1

Type: NOTIFICATION
Impact: Other

MDS-10030: Sandbox {0} created as part of Import operation is not destroyed after import failed.
Cause: A Critical Write error on database side has occured. Look for specific exception in the log file.
Action: Destroy unused sandbox from metadata repository. Contact application administrator for assistance.
Level: 1

Type: NOTIFICATION
Impact: Other

MDS-11001: The type information for "{0}" is not obtainable though the document exists in the MetadataStore.
Cause: Could not get type information for a document, a possibly non-wellformed XML document.
Action: Examine the document
Level: 1

Type: WARNING
Impact: Data

MDS-11002: The type information for "{0}" is not obtainable because of exception "{1}"
Cause: Failed to get type information because an exception was raised.
Action: Examine the exception and the document.
Level: 1

Type: WARNING
Impact: Data

MDS-11003: Failed to force timestamp advance on file {0}: original timestamp = {1}, new timestamp = {2}.
Cause: Failed to advance the timestamp on a file which is being saved.
Action: Examine the file and its permissions.
Level: 1

Type: WARNING
Impact: Data
MDS-11006: Directory [0] does not exist.
   Cause: The value of a name condition package did not have a corresponding file system directory.
   Action: Check if the directory was expected and determine why it is not present.
   Level: 1
   Type: NOTIFICATION
   Impact: Files

MDS-11007: Skipping directory [0] because [1] does not match the condition.
   Cause: The query considered the given directory, but it could only contain documents that would not match the query.
   Action: If you expected results from the directory, check that the query is correctly specified.
   Level: 1
   Type: NOTIFICATION
   Impact: Programmatic

MDS-11008: Skipping directory [0] because it is a filestore root.
   Cause: The query considered the directory, but it was another root path of the metadata store. This can arise when file store configuration includes multiple root paths and one of these is contained in another.
   Action: If you expected results from the directory, check that the file store is configured correctly.
   Level: 1
   Type: NOTIFICATION
   Impact: Files

MDS-11009: Skipping directory [0] because [1] is not a valid package name.
   Cause: The query skipped the directory because the corresponding package name is invalid.
   Action: If you expected results from the directory, check the directory name for validity.
   Level: 1
   Type: NOTIFICATION
   Impact: Programmatic

MDS-11010: Document cache [0] exceeds its maximum number of entries [1], so the cache is cleared.
   Cause: The document cache exceeded its defined maximum size so it was cleared. If memory allows, the cache should be large enough for all documents for optimum performance but this is not required.
   Action: Edit the adf-config.xml file and increase the size of the document cache.
   Level: 1
   Type: NOTIFICATION
   Impact: Configuration
MDS-11011: Attempting to get failover connection to retry the operation because the database connection failed.

**Cause:** The connection to the database failed.

**Action:** No action is required. The database is configured with FCF so failover will be attempted.

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Configuration

MDS-11012: Cache collision has been detected when adding key [0], label set [1], sandbox name [2], scope [3].

**Cause:** The described document was being added to the cache, but it was already present. This can be caused by an incorrect miss in the preceding lookup, or very rarely by the document having been just inserted by another thread.

**Action:** If this occurs frequently, contact Oracle Support Services.

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Programmatic

MDS-11013: Cannot store the object of type [0] in the Java Object Cache because the cache or cache region is full.

**Cause:** A CacheFullException or RegionFullException was reported when attempting to store an object in the Java Object Cache.

**Action:** Consider increasing the size of the configured MDS Cache by modifying the cache-config entry in adf-config.xml.

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Configuration

MDS-11014: Purge-Repos Diagnostics [auto-purge, partition-name, partition-id, #versions purged]: [{0}, {1}, {2}, {3}].

**Cause:** An auto-purge occurred on a metadata-store.

**Action:** No action required.

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Other

MDS-11016: MDS JSP Integration has been configured in Developer Mode to allow changes to files to be detected. Do not use this mode for production or performance testing.

**Cause:** Developer Mode is configured as a servlet initialisation parameter either explicitly or because the application is being run within JDeveloper.

**Action:** No action required.

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Configuration
MDS-11017: Started creating the final archive file at {0}.
   Cause: ArchiveMetadataStore has started to create final archive file with all the
   changes done on the archive file so far.
   Action: No action required.
   Level: 1
   Type: NOTIFICATION
   Impact: Other

MDS-11018: The final archive file has been created successfully. The archive file is
available at {0}.
   Cause: ArchiveMetadataStore has created final archive file with all the changes
   done on the archive file so far.
   Action: No action required.
   Level: 1
   Type: NOTIFICATION
   Impact: Other

MDS-11019: The default CharSet {0} is not a unicode character set. File names with
non-ASCII characters may not operate as expected. Check locale settings.
   Cause: The Java default CharSet is used to convert file names to and from Java
   Strings. When this CharSet is a non-unicode character encoding, filenames that
   contain non-ASCII characters may not be correctly mapped to Java characters.
   Action: Check the locale environment variable settings for the process that is
   running the JVM that MDS is running in to ensure that a UTF encoding is being
   used. For example, the LC_ALL and LANG settings may be relevant.
   Level: 1
   Type: WARNING
   Impact: Configuration

MDS-11020: Cannot delete the intermediary archive file {0}.
   Cause: The intermediary archive file could not be deleted.
   Action: Try deleting the file outside of MDS.
   Level: 1
   Type: WARNING
   Impact: Other

MDS-11023: MDS Remote Notifications: Coherence is not configured to use unicast
and no cluster name is specified so remote notification is not enabled.
   Cause: MDS remote notification only works if the Coherence configuration
   specifies unicast or a cluster name.
   Action: Unicast can be set by either specifying a unicast-listener in your
   Coherence cluster-config or by system property tangosol.coherence.wk. A
   cluster-name can be set either as part of a member-identity in your cluster-config
   or by system property tangosol.coherence.cluster.
   Level: 1
   Type: WARNING
Impact: Configuration

MDS-11026: Ignoring the duplicate MDS component configuration file URL "{0}" found on the classpath.
Cause: A duplicate URL for an MDS component configuration file was found on the classpath.
Action: No action required.

Level: 1
Type: NOTIFICATION
Impact: Configuration

MDS-11027: Some metadata is configured to be stored as xml-stream. However it will be ignored because no metadata store configured for this application supports storing metadata in that form.
Cause: xml-stream content type was configured for some metadata content, but no metadataStore supports the feature.
Action: No action required if not using xml-stream content type is acceptable. Otherwise, to enhance MDS repository performance, ensure that the metadata store supports xml-stream feature.

Level: 1
Type: WARNING
Impact: Configuration

MDS-11028: Some metadata is configured to be stored as xml-stream. However it will be ignored because the corresponding metadata store, with class name: {0}, repository name: {1}, partition name: {2}, does not support storing metadata in that form.
Cause: xml-stream content type was configured for some metadata content, but the metadata store did not support the feature.
Action: No action required if not using xml-stream content type is acceptable. Otherwise, to enhance MDS repository performance, ensure that the metadata store supports xml-stream feature.

Level: 1
Type: WARNING
Impact: Configuration

MDS-11029: MetadataStore configuration for metadata-store-usage "{0}" is invalid. However the MetadataStore is ignored because it is not referenced by any namespace mapping.
Cause: MetadataStore class or some of its properties were not valid.
Action: Ensure that the MetadataStore class exists and all required properties are valid.

Level: 1
Type: NOTIFICATION
Impact: Configuration

MDS-11030: Failed to get schema version from registry for repository "{0}" because of exception: {1}
**Cause:** Either the DataSource definition for the repository is no longer valid or the MDS schema is not created using RCU.

**Action:** Ensure the DataSource connection is valid or the schema is created using RCU.

**Level:** 1  
**Type:** WARNING  
**Impact:** Configuration

**MDS-11032:** Registered grammar using remote schema "(0)". In design time (JDev) environment, it is recommended to use local resources.

**Cause:** Remote schema was referred with http URI. In design time environment, recommendation is to use local resources.

**Action:** Replace it with local copy of schema.

**Level:** 1  
**Type:** WARNING  
**Impact:** Configuration

**MDS-11100:** MetadataObject.getBaseMO() found a mismatched CacheAccess in the cache. [refNoGUID={0}, guidRef={1}, mdxLookupKey={2}, isLabelledRead={3}, baseDocLabel={4}, setSandboxName={5}, cacheAccess={6}, doc={7}, name={8}, GUID={9}].

**Cause:** CacheAcces does not match the the given MOReference/Guid combination. The metadata object will not be cached.

**Action:** Check the MOName and guid are correct and there are no duplicate Guids in the metadata store.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**MDS-11101:** MetadataObject.getBaseMO() recursing too deep. [refNoGUID={0}, guidRef={1}, mdxLookupKey={2}, isLabelledRead={3}, baseDocLabel={4}, setSandboxName={5}, cacheAccess={6}, doc={7}].

**Cause:** CacheAcces does not match the the given MOReference/Guid combination. The metadata object will not be cached.

**Action:** Check the data in the metadata store to determine the cause.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**MDS-11102:** The MDS session was created by the ADF framework with a transaction key for its "single flush" feature, and the call to {0} is restricted to that framework. This call does not use that transaction key and although working now, will fail with an exception in future. To find the originator of the call, set the log level for logger "oracle.mds.transkey" to FINEST. Note that the ADF framework manages the MDS session created for the request so an explicit call to {0} should be removed.

**Cause:** A call was made to a restricted method on the MDS session and that call should be removed as it is liable to fail in later releases.
Action: Identify the caller and ensure that the call to this method is removed.

Level: 1
Type: WARNING
Impact: Other

MDS-90013: The metadata partition with name "[0]" does not exist in the metadata repository "[1]."
Cause: The metadata partition with the specified name was not found in the metadata repository.
Action: Create a metadata partition with the specified name in the metadata repository before trying this operation.

Level: 1
Type: ERROR
Impact: Topology

MDS-90014: cannot update the metadata because the application is read-only
Cause: No metadata update was made because the ReadOnlyMode attribute was enabled.
Action: Disable the ReadOnlyMode attribute of the target application configuration.

Level: 1
Type: ERROR
Impact: Topology

MDS-90015: The metadata repository with name "[0]" does not exist.
Cause: The metadata repository with the specified name was not found.
Action: Verify that the repository name is spelled correctly. If the repository does not exist, create one with the specified name and try again.

Level: 1
Type: ERROR
Impact: Topology

MDS-90016: There are no applications deployed to partition "[0]."
Cause: An attempt was made to perform this operation on a partition that is not associated with a deployed application.
Action: Specify a partition that is associated with a deployed application.

Level: 1
Type: ERROR
Impact: Topology

MDS-90017: The application to be used for this operation is not specified.
Cause: Could not determine which application configuration to use for this operation since there is more than one application deployed to partition "[0]."
Action: Specify an application that is deployed to partition "[0]" to be used for this operation.
Level: 1
Type: ERROR
Impact: Topology
MDS-90018: Application "[1]" is not deployed to partition "[0]".
Cause: The specified application was not deployed to the specified partition.
Action: Specify an application that is deployed to the partition.

Level: 1
Type: ERROR
Impact: Topology
MDS-90019: cannot set the user property on the driver: [0]
Cause: A problem occurred while setting the user property on the driver.
Action: Ensure that the database server is running properly.

Level: 1
Type: ERROR
Impact: Topology
MDS-90020: Metadata store cannot be assigned to server "[0]".
Cause: A problem occurred while assigning resource to the server.
Action: Ensure that the server is running properly.

Level: 1
Type: ERROR
Impact: Topology
MDS-90021: Metadata path [0] is invalid.
Cause: The path used to create a FileMetadataStore was invalid. It must point to a directory.
Action: Correct the metadata path.

Level: 1
Type: ERROR
Impact: Topology
MDS-90022: The host name of the database repository cannot be empty.
Cause: The host name of the database repository was empty or null.
Action: Use a valid host name.

Level: 1
Type: ERROR
Impact: Topology
MDS-90023: The database name of the database repository cannot be empty.
Cause: The database name of the database repository was empty or null.
Action: Use a valid database name.

Level: 1
Type: ERROR
Impact: Topology
MDS-90024: The user name of the database repository cannot be empty.
Cause: The user name of the database repository was empty or null.
Action: Use a valid user name.
Level: 1
Type: ERROR
Impact: Topology
MDS-90025: The password of the database repository cannot be empty.
Cause: The password of the database repository was empty or null.
Action: Use a valid password.
Level: 1
Type: ERROR
Impact: Topology
MDS-90026: The server name cannot be empty.
Cause: The server name was empty or null.
Action: Use a valid server name.
Level: 1
Type: ERROR
Impact: Topology
MDS-90027: cannot find server "(1)" to register the metadata repository "(0)"
Cause: The server name was invalid.
Action: Use a valid server name.
Level: 1
Type: ERROR
Impact: Topology
MDS-90028: Metadata repository with name "(0)" already exists.
Cause: Metadata repository with the specified name already exists.
Action: Verify that the repository name is spelled correctly. If the repository already exists, create one with a different name and try again.
Level: 1
Type: ERROR
Impact: Topology
MDS-90029: The metadata db repository with name "(0)" does not exist.
Cause: The metadata db repository with the specified name was not found.
Action: Verify that the db repository name is spelled correctly.
Level: 1
Type: ERROR
**Impact:** Topology

**MDS-90030:** The metadata file repository with name "(0)" does not exist.

**Cause:** The metadata file repository with the specified name was not found.

**Action:** Verify that the file repository name is spelled correctly.

**Level:** 1

**Type:** ERROR

**Impact:** Topology

**MDS-90031:** The JDBC resource of metadata db repository "(0)" cannot be found.

**Cause:** The JDBC resource was not found.

**Action:** Verify that the metadata db repository is set up correctly.

**Level:** 1

**Type:** ERROR

**Impact:** Topology

**MDS-90032:** The metadata store of metadata file repository "(0)" cannot be found.

**Cause:** The metadata store was not found.

**Action:** Verify that the metadata file repository is set up correctly.

**Level:** 1

**Type:** ERROR

**Impact:** Topology

**MDS-90033:** unknown DB vendor code: "(0)"

**Cause:** The DB vendor code is invalid.

**Action:** Use a valid DB vendor code, such as 0 (ORACLE), 1 (MSSQL), or 2 (IBMDB2).

**Level:** 1

**Type:** ERROR

**Impact:** Topology

**MDS-90034:** The source directory or archive "(0)" for importing metadata is invalid.

**Cause:** The directory or archive location used to import metadata was invalid. It must point to a valid, existing directory or archive.

**Action:** Correct the source directory or archive location.

**Level:** 1

**Type:** ERROR

**Impact:** Topology

**MDS-90035:** The target directory or archive "(0)" for exporting metadata is invalid.

**Cause:** The directory or archive location used to export metadata was invalid. It must point to a valid location.

**Action:** Correct the target directory or archive file location.

**Level:** 1

**Type:** ERROR
Impact: Topology

MDS-90036: The application does not have a valid MAR file path.

Cause: The MAR path used to import MAR was invalid. It must point to a valid, existing MAR file.

Action: Make sure the MAR file exists and is located in the correct directory of the application.

Level: 1
Type: ERROR

Impact: Topology

MDS-90037: The archive "{0}" does not contain valid contents.

Cause: The archive used to import metadata was invalid. It must be to a valid, existing zip or jar file.

Action: Make sure the archive is valid.

Level: 1
Type: ERROR

Impact: Topology

MDS-90038: The database authentication alias "{0}" already exists. To reuse the same authentication alias, try the operation again without specifying user and password.

Cause: An attempt was made to configure a database authentication alias that already existed in Websphere server.

Action: Delete the existing authentication alias and try again, or specify a new authentication alias, or reuse the existing authentication alias by not specifying user and password.

Level: 1
Type: ERROR

Impact: Topology

MDS-90039: The database authentication alias "{0}" cannot be found. To create the authentication alias, try the operation again with user and password specified.

Cause: An attempt was made to use a database authentication alias that was not configured in Websphere server.

Action: Make sure the specified database authentication alias is properly configured in Websphere server, or automatically create the authentication alias by specifying user and password.

Level: 1
Type: ERROR

Impact: Topology

MDS-90040: failed to connect to database

Cause: An error occurred when trying to connect to database.

Action: Make sure the database connection details are correct. Look at the cause exception for more details.

Level: 1
Type: ERROR
Impact: Topology

MDS-90041: Customization layer values are not supported for "excludeCustFor" parameter.
Cause: One or more customization layer values was specified for "excludeCustFor" parameter.
Action: Make sure there are no customization layer values specified for "excludeCustFor" parameter.

Level: 1
Type: ERROR
Impact: Topology

MDS-90042: "(0)" is not a valid tenant name.
Cause: The specified tenant was not provisioned in the specified partition and repository.
Action: Specify a valid tenant name.

Level: 1
Type: ERROR
Impact: Topology

MDS-90043: This operation cannot be performed by the tenant named "(0)". It can only be invoked by the "(1)" tenant.
Cause: The specified tenant was not provisioned in the partition and repository provided.
Action: Execute this operation as GLOBAL tenant.

Level: 1
Type: ERROR
Impact: Configuration

MDS-90044: This operation cannot be performed because the WebLogic edit session has been locked by a different user.
Cause: The WebLogic edit session has been locked by a different user.
Action: Retry the operation after the edit session lock is released.

Level: 1
Type: ERROR
Impact: Configuration

MDS-90143: "(0)" is not a valid component name.
Cause: The specified component name is invalid.
Action: Specify a valid audit component name that uses only letters.

Level: 1
Type: ERROR
Impact: Configuration

MDS-90144: Error registering audit event definitions for component "(0)".
Cause: The audit event definitions could not be registered.
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Configuration

MDS-90145: Error occurred when raising audit event "{0}" for component "{1}".
Cause: The audit event was not registered or an unknown error occurred in the auditing system.
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Configuration

MDS-90146: Error occurred when checking if "{0}" is auditable.
Cause: An unknown error occurred when checking if auditing is enabled for the component "{0}".
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Configuration

MDS-90147: Error occurred when checking if the component "{0}" is auditable.
Cause: An unknown error occurred when checking if auditing is enabled for the event "{1}" defined for the component "{0}".
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Configuration

MDS-90243: Content auto merge failed for MO part "{0}" with change type "{1}" because its type is not registered for auto merge.
Cause: The specified MOType is not registered for auto merge functionality.
Action: Register the MOType for auto merge functionality.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-90244: Content auto merge failed for MO part "{0}" with change type "{1}" because its base document is not accessible for read from any configured metadata stores.
Cause: Base document is not accessible for read.
**Action:** Make sure base document is available for read through any of configured metadata stores.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-90245:** Content auto merge failed for MO part "(0)" with change type "(1)" because both base and customization MOParts have conflicts and base MOPart is not a stub.

**Cause:** Base MOPart is not a stub document.

**Action:** This is unsupported case. Contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-90246:** Content auto merge failed for MO part "(0)" with change type "(1)" because mainline contains conflicting change type "(2)" for the same MOPart.

**Cause:** There were conflicting changes for MetadataObject between sandbox and mainline and cannot be resolved by content auto merge.

**Action:** Contact Application Administrator to resolve these conflicts manually or perform the changes again in a new sandbox.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-90247:** Content auto merge failed for MOPart "(0)" with change type "(1)", because conflicts identified for metadata object include changes for non tip or non configured customization layer "(2)".

**Cause:** Conflicts detected for given metadata object include changes for non tip or non configured customization layer.

**Action:** This is unsupported case. Contact Oracle Support Services.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-90248:** Content auto merge failed for MetadataObject "(0)".

**Cause:** Content auto merge failed for specified MO.

**Action:** Please check each MOPart exception for detailed reasons.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-90249:** Content auto merge failed for MetadataObject "(0)", because the MO constitutes more than one customization MOPart for the customization layer "(2)".

**Cause:** Customization layer yields multiple layer values.
Action: This is unsupported case. Contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-90300: Following metadata content auto-merge exception(s) occurred - * [0]
Cause: One or more metadata content auto-merge exception(s) occurred.
Action: For more details, use getContentAutoMergeExceptions() method on MOPartChangeContentAutoMergeException instance.

Level: 1
Type: ERROR
Impact: Data

MDS-90301: Unexpected content auto-merge error
Cause: An unexpected content auto-merge error occurred.
Action: Please resolve the conflict before attempting auto-merge operation again.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-90302: Invalid input documents for content auto-merge operation.
Cause: Invalid documents are provided to perform content auto-merge operation.
Action: Provide valid documents.

Level: 1
Type: ERROR
Impact: Data

MDS-90303: Limited support available for XSD content auto-merge operation.
Cause: Unable to auto-merge changes being made by the request or by another user done to XSD metadata object.
Action: Please resolve the conflict before attempting auto-merge operation again.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-90304: Unable to auto-merge merge-unit with local reference "[0]" in metadata object "[1]" due to conflicting changes being made by the request or by another user.
Cause: Encountered merge-unit auto-merge conflict while performing content auto-merge.
Action: Please resolve the conflict before attempting auto-merge operation again.

Level: 1
Type: ERROR
Impact: Data
MDS-90305: Type annotation automergeChildListOrderDefault set on element definition of root element in metadata object ":0" does not have valid value. Valid values are "childListOrderNotImportant" and "childListOrderImportant".

**Cause:** Invalid value provided for automergeChildListOrderDefault type-annotation.

**Action:** Provide valid value for automergeChildListOrderDefault type-annotation. Valid values are "childListOrderNotImportant" and "childListOrderImportant".

**Level:** 1

**Type:** ERROR

**Impact:** Data

MDS-90340: Unable to auto-merge changes done to attribute(s) on element with local reference ":0" in metadata object ":1" due to conflicting changes being made by the request or by another user.

**Cause:** Encountered element attribute(s) auto-merge conflict while performing content auto-merge.

**Action:** Please resolve the conflict before attempting auto-merge operation again.

**Level:** 1

**Type:** ERROR

**Impact:** Data

MDS-90343: Sandbox ":0" Apply operation failed for MO part ":1" since conflict were identified with mainline changes for MO Part ":2" that violates the relationship and dependency constraints.

**Cause:** Sandbox changes violate some dependency constraints with mainline changes.

**Action:** Contact Application Administrator to resolve these conflicts manually or perform the changes again in a new sandbox.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

MDS-90344: Sandbox ":0" apply operation with content auto merge failed.

**Cause:** Sandbox apply operation with auto merge failed.

**Action:** Please check each MO exception for detailed reasons.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

MDS-90345: Failure to get conflicts for sandbox

**Cause:** Target label is older than the sandbox mainline label.

**Action:** Specify a target label which is later than current label.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic
MDS-90350: Unable to auto-merge changes done to simple type element/simple-base complex type element with local reference "{0}" in metadata object "{1}" due to conflicting changes being made by the request or by another user.

**Cause:** Encountered simple type element/simple-base complex type element auto-merge conflict while performing content auto-merge.

**Action:** Please resolve the conflict before attempting auto-merge operation again.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-90360: Element insertion auto-merge failed for element with local reference "{0}" in metadata object "{1}" due to conflicting changes done by another user.

**Cause:** Encountered element insertion auto-merge conflict while performing content auto-merge.

**Action:** Please resolve the conflict before attempting auto-merge operation again.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-90361: Content auto-merge failed due to conflicting element insertion with local reference "{0}" in metadata object "{1}" done by another user.

**Cause:** Encountered element insertion auto-merge conflict while performing content auto-merge.

**Action:** Please resolve the conflict before attempting auto-merge operation again.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-90370: Unable to auto-merge element deletion with local reference "{0}" in metadata object "{1}" due to conflicting changes being made by the request or by another user.

**Cause:** Encountered element deletion auto-merge conflict while performing content auto-merge.

**Action:** Please resolve the conflict before attempting auto-merge operation again.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-90390: No support to auto-merge move operation

**Cause:** Encountered move operation while performing content auto-merge operation.

**Action:** Please resolve the conflict before attempting auto-merge operation again.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data
MDS-90400: Element with local reference "[0]" in metadata object "[1]" does not have childListOrderNotImportant type-annotation

**Cause:** Child-list of the underlying element was modified as part of content auto-merge operation.

**Action:** If the child-list of the underlying element should be auto-merged, attach the needed childListOrderNotImportant type-annotation.

Level: 1  
Type: ERROR  
Impact: Data

MDS-90401: Type annotation "automerge" for child-list order preference on element with local reference "[0]" in metadata object "[1]" does not have valid value. Valid values are "childListOrderNotImportant" and "childListOrderImportant"

**Cause:** Child-list of the underlying element was modified as part of content auto-merge operation.

**Action:** Provide valid value for "automerge" type-annotation. Valid values are "childListOrderNotImportant" and "childListOrderImportant".

Level: 1  
Type: ERROR  
Impact: Data

MDS-91001: MDS domain runtime MBean is not available. "[0]" operation failure.

**Cause:** MDS domain runtime MBean was not available in the server.

**Action:** Ensure the MDS domain runtime MBean is available in the server.

Level: 1  
Type: ERROR  
Impact: Configuration

MDS-91002: MDS Application runtime MBean for "[0]" is not available. "[1]" operation failure.

**Cause:** MDS Application runtime MBean was not available in the server.

**Action:** Ensure the MDS Application runtime MBean for the application is available in the server.

Level: 1  
Type: ERROR  
Impact: Configuration

MDS-91003: Multiple MDSAppRuntimeMBean exist for "[0]". To execute the command, parameter "applicationVersion" is required. "[1]" operation failure.

**Cause:** Multiple MDSAppRuntimeMBean for the application were found in the server.

**Action:** Provide the 'applicationVersion' parameter.

Level: 1  
Type: ERROR  
Impact: Configuration
MDS-91004: MDS domain runtime MBean commands can be executed only from the Admin server. "{0}" operation failure.
Cause: WLST was not connected to the Admin server.
Action: Connect to an Admin server before executing the command.
Level: 1
Type: ERROR
Impact: Configuration

MDS-91005: No connection to a "{0}" server exists. The operation "{1}" can be executed only in the online mode.
Cause: Command was executed in the offline mode.
Action: Ensure WLST/WSADMIN is connected to the server.
Level: 1
Type: ERROR
Impact: Configuration

MDS-91006: Expecting a "{0}" for parameter "{1}" but encountering "{2}". "{3}" operation failure.
Cause: Parameter type passed to the command was not correct.
Action: Ensure the correct type of parameters are passed to the command.
Level: 1
Type: ERROR
Impact: Data

MDS-91007: dbVendor should be one of ORACLE, MSSQL, IBMDB2, or MYSQL. "{0}" operation failure.
Cause: dbVendor value was not correct.
Action: Ensure the dbVendor value is one of ORACLE, MSSQL, IBMDB2, or MYSQL.
Level: 1
Type: ERROR
Impact: Data

MDS-91008: The "{0}" parameter is required. Provide a valid value and retry the operation.
Cause: Required parameter for the command was not given.
Action: Provide the required parameters for the command.
Level: 1
Type: ERROR
Impact: Data

MDS-91009: Operation "{0}" failure.
Cause: Exception occurred during the execution of the command.
Action: Provide the required parameters for the command.
Level: 1
Type: ERROR
Impact: Data
MDS-91010: The "adf-config" element is not available in the given archive file. "[0]" operation failure.
Cause: The "adf-config" element is not available in the given archive file.
Action: Ensure the "adf-config" element is available in the adf-config.xml of the given archive file.
Level: 1
Type: ERROR
Impact: Configuration
MDS-91011: No "mds-config" element exists in the adf-config.xml of the given archive. "[0]" operation failure.
Cause: No mds-config element existed in the adf-config.xml file of the archive file.
Action: Ensure the "mds-config" element is available in the adf-config.xml file.
Level: 1
Type: ERROR
Impact: Configuration
MDS-91012: Metadata repository connection type value should be either "File" or "DB". "[0]" operation failure.
Cause: Metadata repository connection type value is not correct.
Action: Ensure the metadata repository connection type value is either 'File' or 'DB'.
Level: 1
Type: ERROR
Impact: Data
MDS-91013: For the metadata repository"s DB connection type, JNDI location is a required parameter. "[0]" operation failure.
Cause: JNDI location not provided for DB connection type.
Action: Provide the JNDI location string while updating the repository connection to DB.
Level: 1
Type: ERROR
Impact: Data
MDS-91014: For the metadata repository"s File connection type, path location is a required parameter. "[0]" operation failure.
Cause: The path value was not provided for File connection type.
Action: Provide the path location string while updating the repository connection to File.
Level: 1
Type: ERROR
Impact: Data
MDS-91015: All parameters are required to update shared metadata repository configuration in adf-config.xml. At present, source archive has no connection details for the namespace "[0]". "[1]" operation failure.

Cause: Complete connection information was not provided to set the shared repository for the given namespace.

Action: Provide complete connection information in case the adf-config.xml file does not have any metadata repository connection information for the given namespace already.

Level: 1
Type: ERROR
Impact: Data

MDS-91016: All parameters are required to define new application metadata repository configuration in adf-config.xml. The source archive configuration does not contain any application metadata repository at present. "[0]" operation failure.

Cause: Complete connection information was not provided to set the application target repository.

Action: Provide complete connection information in case the adf-config.xml file does not have any metadata repository connection information for the application target repository already.

Level: 1
Type: ERROR
Impact: Data

MDS-91017: The given namespace "[0]" to set the shared repository is not valid. Ensure that the namespace is available in the adf-config.xml file and it is not a sub-namespace of any other namespace. "[1]" operation failure.

Cause: The namespace provided to set the shared repository details is not valid.

Action: Ensure that the namespace is available in the adf-config.xml file and it is not a subnamespace of any other namespace in that file.

Level: 1
Type: ERROR
Impact: Data

MDS-91018: No namespaces are mapped to any shared repository in the source archive adf-config.xml configuration file. Shared repository details cannot be set. "[0]" operation failure.

Cause: No namespaces were mapped to any shared repository in the source archive adf-config.xml configuration file.

Action: To set the shared repository connections, ensure at least one namespace is mapped to shared repository in the source archive adf-config.xml file.

Level: 1
Type: ERROR
Impact: Configuration
MDS-91019: Multiple MDSAppRuntimeMBean exist for application "[0]". Ensure that the "application" "node" and "server" parameters are correct. "[1]" operation failure.

Cause: Multiple MDSAppRuntimeMBean for the application were found in the server.

Action: Ensure that the "application" "node" and "server" parameters are correct.

Level: 1
Type: ERROR
Impact: Configuration

MDS-91020: MDS Application runtime MBean for "[0]" is not available in server "[2]". Ensure server name and application name are correct. "[1]" operation failure.

Cause: MDS Application runtime MBean was not available in the server.

Action: Ensure the MDS Application runtime MBean for the application is available in the server. Ensure the server name and the application name are correct.

Level: 1
Type: ERROR
Impact: Configuration

MDS-91021: Multiple MDSAppRuntimeMBean exist for "[0]" in server "[2]". To execute the command, parameter "applicationVersion" is required. "[1]" operation failure.

Cause: Multiple MDSAppRuntimeMBean for the application were found in the server.

Action: Provide the 'applicationVersion' parameter.

Level: 1
Type: ERROR
Impact: Configuration

MDS-91022: Parameter "[0]" cannot be an empty string. "[1]" operation failure.

Cause: The parameter is not allowed to be an empty string.

Action: Ensure the parameter has a correct value.

Level: 1
Type: ERROR
Impact: Data

MDS-91023: Parameter "[0]" contains at least one empty element. "[1]" operation failure.

Cause: The parameter is not allowed to contain one or more empty elements.

Action: Ensure every element specified in the parameter is correct.

Level: 1
Type: ERROR
Impact: Data
MDS-92000: Oracle Metadata Services schema upgrade is invalid.
Cause: Specified Metadata Services schema was updated but is invalid.
Action: Restore the Metadata Services schema from a backup and retry. Check the error messages in log file. Correct the problem before running the Assistant again.
Level: 1
Type: ERROR
Impact: Upgrade

MDS-92001: The upgrade is not supported from Oracle Metadata Services schema version of [0].
Cause: An unsupported base schema version was being upgraded.
Action: Refer to the Oracle Metadata Services Upgrade Guide for supported versions to upgrade.
Level: 1
Type: ERROR
Impact: Upgrade

MDS-92002: Error in upgrading Oracle Metadata Services schema.
Cause: An unexpected error occurred during Oracle Metadata Services schema upgrade.
Action: Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.
Level: 1
Type: INCIDENT_ERROR
Impact: Upgrade

MDS-92003: Error occurred while verifying the character set in target Metadata Services schema
Cause: Some SQL error occurred while verifying the character set in target Metadata Services schema.
Action: Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.
Level: 1
Type: INCIDENT_ERROR
Impact: Upgrade

MDS-92004: Error occurred while closing the resources during Metadata Services schema upgrade
Cause: Some error occurred while closing the resources during Metadata Services schema upgrade.
Action: Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.
Level: 1
Type: INCIDENT_ERROR

Impact: Upgrade

MDS-92005: Error occurred while closing Metadata Services schema upgrade log files.
Cause: An unexpected error occurred while closing Metadata Services schema upgrade log files.
Action: Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.

Level: 1

Type: INCIDENT_ERROR

Impact: Upgrade

MDS-92006: Oracle Metadata Service schema status is invalid.
Cause: Specified Oracle Metadata Services database schema was invalid.
Action: Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.

Level: 1

Type: INCIDENT_ERROR

Impact: Upgrade
OAAM-00000: Invalid message.
  Cause: Unable to find message definition.
  Action: Report to administrator.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-00001: A system internal error occurred. The system cannot complete the operation at this time.
  Cause: A system internal error occurred. The error may be the result of a constraint or the unavailability of resources.
  Action: Try again. If the problem remains unresolved, you may contact Oracle Support Services.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-00002: The operation is not allowed.
  Cause: The user may not have sufficient privileges.
  Action: Report to the administrator about insufficient privileges.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-00003: Database error.
  Cause: The database may not be available.
  Action: Try again. If the problem remains unresolved, you may contact Oracle Support Services.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-00004: Insufficient context data. Required: {0}.
  Cause: The expected context information is not provided.
**OAAM-00005: Database error. Exception message is {0}.
**
*Cause:* The error may have resulted from the unavailability of the database or a database querying exception.

*Action:* Report the database error message to the administrator.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-01001: Property name is required.**

*Cause:* The property name is missing from the data.

*Action:* Make sure that the property name is provided for the operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-01002: Property value is required.**

*Cause:* The property value is missing from the data.

*Action:* Make sure the property value is provided for the operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-01003: Property with name {0} already exists.**

*Cause:* The property with the name already exists.

*Action:* Use a different property name and try again.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-01004: Property with name {0} does not exist.**

*Cause:* The property with the name was not found in the system.

*Action:* Make sure the property name provided is correct and then retry the operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**OAAM-01005: Property search query is required to search properties.**

*Cause:* The property search query was not provided for the search.
Action: Make sure that the valid property search query is provided.

Level: 1
Type: ERROR
Impact: Process

OAAM-01006: Cannot delete property {0} because it is a {1} type of property.
Cause: Property cannot be deleted. System- and file-based properties cannot be deleted. Only properties saved in the database can be deleted.
Action: System-based properties cannot be deleted. Only properties saved in the database and files can be deleted.

Level: 1
Type: ERROR
Impact: Process

OAAM-01007: Cannot modify property {0} because it is a {1} type of property.
Cause: Property cannot be changed. System-based properties cannot be changed. Only properties saved in the database and files can be changed.
Action: System-based properties cannot be changed. Only properties saved in the database and files can be changed.

Level: 1
Type: ERROR
Impact: Process

OAAM-01101: Object type was not specified for finding usage.
Cause: The required object type was not specified for finding usage.
Action: The object type must be specified to find the usage information. Specify non-null integer value and retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-01102: Object unique key was not specified for finding usage.
Cause: The required object unique key (primary key) was not specified for finding usage.
Action: The object unique (primary) key must be specified to find the usage. Specify a non-null long value and retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-01103: Usage cannot be computed for object type {0}.
Cause: Usage API supports certain types of objects. The specified object is not specified by the Usage API.
Action: Specify the object type, which can be referenced by other objects in the system.
Level: 1
Type: ERROR
Impact: Process

OAAM-01104: Usage information for the primary object of type {0} with a unique ID of {1} cannot be determined.
Cause: Usage API is trying to find the usage of an object that does not exist.
Action: A unique ID of the object was provided, which was not found in the system. Make sure that the unique ID and the object are correct and retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-10000: Valid Case ID is required.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10001: Case {0} not found
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10002: No user {0}
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10004: User is blocked
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10005: No questions registered {0} {1}
Cause:
Action:
Level: 1
Type: ERROR
Impact: Process

OAAM-10006: Invalid application {0} and login {1} combination.
Cause: Combination may be incorrect or user name is used in place of the login name.
Action: Report to administrator.

Level: 1
Type: ERROR
Impact: Process

OAAM-10007: Challenge questions are already reset.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10008: Challenge Question Set is already reset.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10009: End Date is required.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10010: End Date should be in future.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10011: Valid Application name or user group name is required.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-10301: Note cannot be null or empty.
  Cause: Note cannot be null or empty string.
  Action: Provide a valid note.
  Level: 1

Type: ERROR
Impact: Process

OAAM-10302: Closed case {0} cannot be escalated.
  Cause: Closed case {0} cannot be escalated.
  Action: Reopen the closed case before trying to escalate it.
  Level: 1

Type: ERROR
Impact: Process

OAAM-10303: The Case {0} is not a CSR case; therefore, it cannot be escalated.
  Cause: The Case {0} is not a CSR case; therefore, it cannot be escalated.
  Action: The case type for case {0} should be changed to CSR for escalation.
  Level: 1

Type: ERROR
Impact: Process

OAAM-10304: Query cannot be null.
  Cause: Query cannot be null.
  Action: Provide a valid query object.
  Level: 1

Type: ERROR
Impact: Process

OAAM-10305: No query expression found.
  Cause: No query expression found.
  Action: Provide the required parameters for the query expression.
  Level: 1

Type: ERROR
Impact: Process

OAAM-10306: No records found.
  Cause: No records found.
  Action: Change the criteria before performing the operation.
  Level: 1

Type: ERROR
Impact: Process
OAAM-10307: No linked sessions found.
   Cause: No linked sessions found.
   Action: For the given case, no linked sessions were found.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-10308: No sessions to link.
   Cause: No sessions to link.
   Action: Provide sessions to link.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-10309: No sessions to unlink.
   Cause: No sessions to unlink.
   Action: Provide sessions to unlink.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-11111: User not authorized to access the method {0}.
   Cause: User is not authorized to access the method {0}.
   Action: Retry accessing the method {0} with valid authorization.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-11112: Session ID of Admin users is required for case action.
   Cause: Session ID was not provided for performing the case action.
   Action: Retry the same case action and provide the valid Admin user Session ID for that API call.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-11113: Choose the action template for creating action instance.
   Cause: Action template was not provided for performing the action instance creation.
   Action: Retry the same action instance creation by choosing valid action template.
   Level: 1
   Type: ERROR
   Impact: Process
OAAM-11114: Subaction ID is required for case action.
  Cause: Subaction was not provided for performing the case action.
  Action: Retry the same case action and provide the valid Subaction ID for that API call. The Subaction ID is the case action enumeration.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-11115: New status required for case change status action.
  Cause: New status was not provided for performing the change status case action.
  Action: Retry the same case action and provide the valid new status (Integer object) for that API call. New status is the case status enumeration.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-11116: Reopen the closed case before trying to edit: Case ID {0}
  Cause: The case is in the Closed state. In this state, the case disposition or expiration cannot change.
  Action: The case is closed. In the Closed state, the disposition, severity, or expiration cannot be changed. To change these attributes, change the status of the case along with new severity, expiration time, or disposition
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-11117: Case with ID {0} is expired. It cannot be edited.
  Cause: The case is in the Expired state. In this state, the case disposition or expiration date cannot be changed.
  Action: The case is expired, and in the Expired state, its disposition, severity, or expiration cannot be changed. Reopen the case first and then try this operation.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-11120: Case reset action cannot be completed because: {0}.
  Cause: Case reset action cannot be performed because of the reason provided by the error message.
  Action: Retry the same case action after fixing the issue.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-11121: Challenge question-related case action cannot be performed because: {0}.
Cause: Challenge question-related case action cannot be performed because of the reason provided by the error message.
Action: Retry the same case action after fixing the issue.
Level: 1
Type: ERROR
Impact: Process

OAAM-11122: The customer's registration profile is not active and hence cannot be reset.
Cause: The customer’s registration profile have already been reset.
Action: Cannot reset customer’s registration profile since they are not active.
Level: 1
Type: ERROR
Impact: Process

OAAM-11123: Cannot reset user's image, as it is not set.
Cause: User does not have the image set.
Action: Cannot reset the user’s image because the user is not registered or the image is not active for the user.
Level: 1
Type: ERROR
Impact: Process

OAAM-11124: Cannot reset the user's phrase, as it is not set.
Cause: The user does not have a phrase set.
Action: Cannot reset the user’s phrase because either the user is not registered or the phrase is not active for the user.
Level: 1
Type: ERROR
Impact: Process

OAAM-11125: OTP reset action cannot be performed with cases that are not CSR cases.
Cause: For OTP reset actions that are performed with cases, the case has to be a CSR case. OTP reset cannot be performed with a case of any other type.
Action: Create a CSR case for the user and then try to do the OTP-related resets.
Level: 1
Type: ERROR
Impact: Process

OAAM-11126: OTP reset action cannot be performed with case in an incorrect state.
Cause: For OTP reset actions that are performed with cases, the case has to be in the correct state. An OTP reset cannot be performed with a case in the Closed, Escalated, or Expired state.
Action: Change the state of the case to Open, New, or Pending and then retry the operation.
Level: 1
Type: ERROR
Impact: Process

OAAM-11127: OTP reset profile attempted for user who does not have OTP profile enabled.
Cause: The user's OTP profile is not enabled. For such users, the OTP profile reset cannot be performed.
Action: Make changes to the user's preferences to register the OTP profile and then try this operation again.

Level: 1
Type: ERROR
Impact: Process

OAAM-11129: OTP reset keypad attempted for user who does not have OTP keypad enabled.
Cause: The user's OTP keypad is not enabled. For such users, the OTP keypad reset cannot be performed.
Action: Make the changes to the users preferences to register the OTP keypad and then try this operation again.

Level: 1
Type: ERROR
Impact: Process

OAAM-11130: Authentication pad is already reset.
Cause: Authentication pad is already reset.
Action: No action required to reset.

Level: 1
Type: ERROR
Impact: Process

OAAM-11131: OTP failure counter for user is already in reset state. It may be possible that the user does not OTP enabled.
Cause: The user's OTP failure counter is already at zero. It is already in reset state. For such users, an OTP failure counter reset cannot be performed.
Action: Make sure that the user is registered for OTP and that the OTP failure counter is not at zero.

Level: 1
Type: ERROR
Impact: Process

OAAM-11132: OTP reset cannot be performed at this time because of an error. Try the reset again.
Cause: The OTP reset operation experienced a system error. Try the operation again.
Action: The OTP reset encountered an error. Make sure the user is registered for OTP and try the operation again.
Level: 1
Type: ERROR
Impact: Process

OAAM-11133: Access to link specified sessions to case is denied.
Cause: Attempt was made to link the sessions of some users for which the agent does not have access.
Action: Add the administrative user to the user group in the security set up for the OAAM administrative application.

Level: 1
Type: ERROR
Impact: Process

OAAM-11134: User does not access to create a case for user belonging to user group {0}.
Cause: Attempt was made to create a case for user belonging to the user group for which the administrative user does not have access.
Action: Add the administrative user to the user group in the security set up for the OAAM administrative application.

Level: 1
Type: ERROR
Impact: Process

OAAM-15001: Enter Organization ID and User name, or only User ID.
Cause: A combination of Organization ID and User name or User ID are allowed.
Action: Enter Organization ID and User name, or User ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-15002: Organization ID is required.
Cause: Organization ID is not entered.
Action: Enter Organization ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-15100: An attempt was made to change the status of expired cases. Select an extension duration to continue.
Cause: The status of expired cases cannot be changed.
Action: Select an extension duration so that the cases are no longer expired. Then, change the status.

Level: 1
Type: ERROR
Impact: Process
OAAM-15101: An attempt was made to extend the expiration of a closed case. Select a status other than close to continue.

Cause:

Action:

Level: 1
Type: ERROR
Impact: Process

OAAM-20000: Policy name cannot be null or empty.

Cause: Policy name cannot be null or empty.

Action: Provide a valid policy name.

Level: 1
Type: ERROR
Impact: Process

OAAM-20001: Policy weight must be between {0} and {1}.

Cause: Policy weight must be between {0} and {1}.

Action: Ensure that the policy weight is between {0} and {1}.

Level: 1
Type: ERROR
Impact: Process

OAAM-20002: Policy description cannot be null or empty.

Cause: Policy description cannot be null or empty.

Action: Provide a valid policy description.

Level: 1
Type: ERROR
Impact: Process

OAAM-20003: A policy with name {0} already exists.

Cause: A policy with name {0} already exists.

Action: A policy with name {0} exists. Use a different name.

Level: 1
Type: ERROR
Impact: Process

OAAM-20004: Policy ID cannot be null.

Cause: Policy ID cannot be null.

Action: Provide a non-null Policy ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-20005: Policy with Policy ID {0} does not exist.
Cause: Policy with Policy ID {0} does not exist.
Action: Provide a valid Policy ID.
Level: 1
Type: ERROR
Impact: Process

**OAAM-20009: Rule ID cannot be null.**
Cause: Rule ID cannot be null.
Action: Provide a non-null Rule ID.
Level: 1
Type: ERROR
Impact: Process

**OAAM-20010: Rule with the given ID not found.**
Cause: Rule with the given ID not found.
Action: Provide a valid Rule ID.
Level: 1
Type: ERROR
Impact: Process

**OAAM-20011: Profile rule map for the given Map ID not found.**
Cause: Profile rule map for the given Map ID not found.
Action: Provide a valid profile rule Map ID.
Level: 1
Type: ERROR
Impact: Process

**OAAM-20012: Profile for the given Map ID not found.**
Cause: Profile for the given Map ID not found.
Action: Provide a valid Map ID with profile.
Level: 1
Type: ERROR
Impact: Process

**OAAM-20013: Profile Rule Map ID cannot be null.**
Cause: Profile Rule Map ID cannot be null.
Action: Provide a non-null Profile Rule Map ID.
Level: 1
Type: ERROR
Impact: Process

**OAAM-20014: Rule Condition Map ID cannot be null.**
Cause: Rule Condition Map ID cannot be null.
Action: Provide a non-null Rule Condition Map ID.
Level: 1
Type: ERROR
Impact: Process
OAAM-20015: Rule parameter value not found.
   Cause: Rule parameter value not found.
   Action: Provide a valid Map ID.

Level: 1
Type: ERROR
Impact: Process
OAAM-20016: Rule parameter not found.
   Cause: Rule parameter not found.
   Action: Provide a valid Map ID.

Level: 1
Type: ERROR
Impact: Process
OAAM-20017: The following policies depend on some of the policies being deleted: {0}.
   Cause: The following policies depend on some of the policies being deleted: {0}.
   Action: Remove the dependency. The policies cannot be deleted until the dependency is removed.

Level: 1
Type: ERROR
Impact: Process
OAAM-20018: Rule parameter value was not found for the given rule parameter.
   The rule may not work as expected unless the error is fixed.
   Cause: Rule parameter value was not found for the given rule parameter.
   Action: When a rule is added to a policy, the value of each rule parameters is kept. The system was not able to find a corresponding value for the rule parameter in the policy data. Verify the rule and its details. Make sure the migration had no errors if this rule had been migrated from the previous release.

Level: 1
Type: ERROR
Impact: Process
OAAM-20019: Rule name cannot be null.
   Cause: Rule name cannot be null.
   Action: Provide a valid rule name.

Level: 1
Type: ERROR
Impact: Process
OAAM-20020: Rule description cannot be null.
Cause: Rule description cannot be null.
Action: Provide a valid rule description.
Level: 1

Impact: Process

OAAM-20021: Rule score must be between [0] and [1].
Cause: Rule score must be between [0] and [1].
Action: Provide a rule score value between [0] and [1].
Level: 1
Type: ERROR
Impact: Process

OAAM-20022: Rule weight must be between [0] and [1].
Cause: Rule weight must be between [0] and [1].
Action: Provide a rule weight between [0] and [1].
Level: 1
Type: ERROR
Impact: Process

OAAM-20023: Minimum device score must be between [0] and [1].
Cause: The minimum device score must be between [0] and [1].
Action: Provide a minimum device score between [0] and [1].
Level: 1
Type: ERROR
Impact: Process

OAAM-20024: Maximum device score must be between [0] and [1].
Cause: The maximum device score must be between [0] and [1].
Action: Provide a maximum device score between [0] and [1].
Level: 1
Type: ERROR
Impact: Process

OAAM-20025: Maximum device score must not be less than the minimum device score.
Cause: The maximum device score must not be less than the minimum device score.
Action: Provide a maximum device score that is more than or equal to the minimum device score.
Level: 1
Type: ERROR
Impact: Process
OAAM-20026: Minimum country score must be between \{0\} and \{1\}.
Cause: Minimum country score must be between \{0\} and \{1\}.
Action: Provide a minimum country score value between \{0\} and \{1\}.

Level: 1
Type: ERROR
Impact: Process

OAAM-20027: Maximum country score must be between \{0\} and \{1\}.
Cause: Maximum country score must be between \{0\} and \{1\}.
Action: Provide a maximum country score value between \{0\} and \{1\}.

Level: 1
Type: ERROR
Impact: Process

OAAM-20028: Maximum country score must not be less than minimum country score.
Cause: Maximum country score must not be less than minimum country score.
Action: Provide a maximum country score that is more than or equal to the minimum country score.

Level: 1
Type: ERROR
Impact: Process

OAAM-20029: Minimum state score must be between \{0\} and \{1\}.
Cause: Minimum state score must be between \{0\} and \{1\}.
Action: Provide a minimum state score value between \{0\} and \{1\}.

Level: 1
Type: ERROR
Impact: Process

OAAM-20030: Maximum state score must be between \{0\} and \{1\}.
Cause: Maximum state score must be between \{0\} and \{1\}.
Action: Provide a maximum state score value between \{0\} and \{1\}.

Level: 1
Type: ERROR
Impact: Process

OAAM-20031: Maximum state score must not be less than the minimum state score.
Cause: Maximum state score must not be less than the minimum state score.
Action: Provide a maximum state score that is more than or equal to the minimum state score.

Level: 1
Type: ERROR
Impact: Process
OAAM-20032: Minimum city score must be between \(0\) and \(1\).
- **Cause:** Minimum city score must be between \(0\) and \(1\).

Type: ERROR
Impact: Process

OAAM-20041: Select checkpoint.
Cause: Select checkpoint.
Action: Provide a valid checkpoint.
Level: 1
Type: ERROR
Impact: Process

OAAM-20042: Destination policy cannot be the same as the source policy.
Cause: The destination policy cannot be the same as the source policy.
Action: Provide a destination policy that is different from the source policy.
Level: 1
Type: ERROR
Impact: Process

OAAM-20043: Override with Override ID {0} does not exist.
Cause: Override with Override ID {0} does not exist.
Action: Provide a valid Override ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-20044: Override with Override ID {0} does not belong to Policy ID {1}.
Cause: Override with Override ID {0} does not belong to Policy ID {1}.
Action: Provide an Override ID that belongs to the specified policy.
Level: 1
Type: ERROR
Impact: Process

**OAAM-20045: Override ID cannot be null or empty.**
*Cause:* Override ID cannot be null or empty.
*Action:* Provide a valid Override ID.

Level: 1
Type: ERROR
Impact: Process

**OAAM-20046: Column ID cannot be null or empty.**
*Cause:* Column ID cannot be null or empty.
*Action:* Provide a valid Column ID.

Level: 1
Type: ERROR
Impact: Process

**OAAM-20047: Rule set result with Column ID {0} does not belong to Policy ID {1}.**
*Cause:* Rule set result with the Column ID {0} does not belong to the Policy ID {1}.
*Action:* Provide a Column ID that belongs to the specified policy.

Level: 1
Type: ERROR
Impact: Process

**OAAM-20048: The provided overrides set is not complete for this policy.**
*Cause:* The provided ordered Override IDs array does not contain all the Override IDs for the policy.
*Action:* Provide an array that has all the Override IDs for the policy.

Level: 1
Type: ERROR
Impact: Process

**OAAM-20049: Override cannot be added for policy with Policy ID = {0} since no rules have been added to the policy.**
*Cause:* Override cannot be added for policy with Policy ID = {0} since no rules have been added to the policy.
*Action:* For adding override the policy should have a rule.

Level: 1
Type: ERROR
Impact: Process

**OAAM-20050: Condition ID list provided is null or empty.**
*Cause:* Condition ID list provided is null or empty.
*Action:* Provide a non-null and non-empty list.
Level: 1  
Type: ERROR  
Impact: Process  
OAAM-20051: Rule ID is null or rule for the given ID not found.  
Cause: Rule ID is null or rule for the given ID not found.  
Action: Provide a valid non-null rule.

Level: 1  
Type: ERROR  
Impact: Process  
OAAM-20052: Rule condition for the given Rule Condition ID not found.  
Cause: Rule condition for the given Rule Condition ID not found.  
Action: Provide a valid and existing Rule Condition ID.

Level: 1  
Type: ERROR  
Impact: Process  
OAAM-20053: Policy Rule Map cannot be null.  
Cause: Policy Rule Map cannot be null.  

Level: 1  
Type: ERROR  
Impact: Process  
OAAM-20054: Number of conditions does not match the number of conditions that exists.  
Cause: Number of conditions does not match the number of conditions that exists.  
Action: Provide the same number as the conditions available.

Level: 1  
Type: ERROR  
Impact: Process  
OAAM-20055: Condition Map provided does not exist.  
Cause: Condition Map provided does not exist.  
Action: Provide a valid and existent Condition Map ID.

Level: 1  
Type: ERROR  
Impact: Process  
OAAM-20056: Group is already linked and cannot be linked again.  
Cause: Group is already linked and cannot be linked again.  
Action: Provide a valid and unlinked group for linking.
Level: 1
Type: ERROR
Impact: Process
OAAM-20057: Group ID cannot be null.
  Cause: Group ID cannot be null.
  Action: Provide a valid and non-null Group ID.

Level: 1
Type: ERROR
Impact: Process
OAAM-20058: Some groups are not linked; therefore, they cannot be unlinked.
  Cause: Some of the groups are not linked; therefore, they cannot be unlinked.
  Action: Provide only linked groups for unlinking.

Level: 1
Type: ERROR
Impact: Process
OAAM-20059: The condition type for condition {0} is not compatible with the checkpoint for policy {1}.
  Cause: The condition type for condition {0} is not compatible with the checkpoint for policy {1}.
  Action: Provide a condition where the condition type is compatible with the checkpoint of the policy.

Level: 1
Type: ERROR
Impact: Process
OAAM-20060: The condition, {0}, being deleted is associated with one or more policies; therefore, it cannot be deleted.
  Cause: The condition, {0}, being deleted is associated with one or more policies; therefore, it cannot be deleted.
  Action: Remove the condition from the policies before deleting the condition.

Level: 1
Type: ERROR
Impact: Process
OAAM-20061: The policy type and checkpoint for the policy {0} do not match that of the parent policy {1}.
  Cause: The policy type and checkpoint for the policy {0} do not match with that of the parent policy {1}.
  Action: Ensure that the policy type and checkpoint for the child policy is the same as that of the parent policy.
Impact: Process

OAAM-20062: Score must be between \{0\} and \{1\}.
Cause: The score must be between \{0\} and \{1\}.
Action: Provide a score between \{0\} and \{1\}.

Level: 1
Type: ERROR
Impact: Process

OAAM-20063: \{0\} is not a valid result type.
Cause: \{0\} is not a valid result type.
Action: Provide a valid result type.

Level: 1
Type: ERROR
Impact: Process

OAAM-20064: \{0\} is not a valid rule result.
Cause: \{0\} is not a valid rule result.
Action: Provide a valid value for rule result.

Level: 1
Type: ERROR
Impact: Process

OAAM-20065: Rule results for columns \{0\} and \{1\} are the same.
Cause: Rule results for columns \{0\} and \{1\} are the same.
Action: Provide different rule results for each column.

Level: 1
Type: ERROR
Impact: Process

OAAM-20066: Filter key type was not provided for retrieving the filter key.
Cause: The filter key type must be provided as an Integer value. The error occurred because the value was not provided to get the correct filter based on the key type.
Action: Provide a non-null value for the filter key type and retry the operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-20067: Transaction Definition ID was not provided for retrieving the filter key.
Cause: The Transaction Definition ID provided must be a Long value. The error occurred because the value was not provided to get the correct filter based on the filter key type and transaction definition.
Action: Provide a non-null value for the Transaction Definition ID and retry this operation.
Level: 1
Type: ERROR
Impact: Process

OAAM-20068: Transaction not found for the given Transaction Definition ID.
Cause: The Transaction Definition ID provided did not match with any of the transaction definitions in the system.
Action: Provide a valid Transaction Definition ID and retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-20069: Filter condition key was not provided.
Cause: The filter condition lookup key provided was either null or empty.
Action: Provide a valid filter condition lookup key string and retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-20070: Condition filter was not found based on filter condition key {0}.
Cause: The filter key provided does not match any condition filter.
Action: Provide a correct condition filter descriptor key and then retry this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-20071: The provided filter key is invalid.
Cause: The filter key provided was either null or empty.
Action: Provide a valid lookup string. Also note that any spaces at the beginning and end of the lookup string will be ignored.

Level: 1
Type: ERROR
Impact: Process

OAAM-20072: No filter descriptor was found for key {0}.
Cause: There is no filter key descriptor that match the key provided.
Action: Provide a lookup string that matches one of the filter keys in the system. Make sure the format is right and there are no typographical errors.

Level: 1
Type: ERROR
Impact: Process

OAAM-20073: Number of rule set results is not equal to the number of rules in the policy.
Cause: Number of RuleSetResults is not equal to the number of rules in the policy.
Action: Number of RuleSetResults should be equal to the number of rules in the policy.
Level: 1
Type: ERROR
Impact: Process

OAAM-20074: Filter key descriptor is invalid.
Cause: The filter key provided was either null or empty.
Action: Provide a lookup string that is not null or empty. Also note that any spaces at the beginning and end of the lookup string will be ignored.
Level: 1
Type: ERROR
Impact: Process

OAAM-20075: A rule must have at least one condition. The current action tries to delete all conditions in this rule. Make sure at least one condition is not selected for deletion.
Cause: A rule must have at least one condition. The current action tries to delete all the conditions in this rule.
Action: Make sure at least one condition is not selected for deletion.
Level: 1
Type: ERROR
Impact: Process

OAAM-20076: Encryption is not supported for numeric data fields.
Cause: Attempt was made to set the numeric data field as encrypted. Encryption is not supported for numeric data fields.
Action: Make sure the data fields selected for encryption do not include numeric data fields. Unselect the numeric data fields and then try the encryption operation again.
Level: 1
Type: ERROR
Impact: Process

OAAM-30001: Group data is required to complete this operation.
Cause: The operation needs group data and that data was not provided.
Action: Provide valid group data and retry this operation.
Level: 1
Type: ERROR
Impact: Process

OAAM-30002: A group with name {0} already exists.
Cause: Group by the name and value type already exists.
Action: Try a different group name for the given type of group.
Level: 1
Type: ERROR
Impact: Process

OAAM-30003: Group type {0} not found.
Cause: The group type provided for the operation was not correct.
Action: Try a different group type. Group types can be found in value.type.enum through the system enumerations user interface.

Level: 1
Type: ERROR
Impact: Process

OAAM-30004: Group name is incorrect.
Cause: The group name is incorrect. It is not a valid group name.
Action: Provide an alphanumeric string as the group name.

Level: 1
Type: ERROR
Impact: Process

OAAM-30005: Group description is incorrect.
Cause: The group description is incorrect. It is not a valid group description.
Action: Provide an alphanumeric string for the group description.

Level: 1
Type: ERROR
Impact: Process

OAAM-30006: Group cache type is incorrect.
Cause: The group cache type is incorrect. It is not a valid group cache type.
Action: Provide a correct cache type. Refer to cache type enumeration for possible values.

Level: 1
Type: ERROR
Impact: Process

OAAM-30007: Group with given information not found: [{0}].
Cause: Group with given information not found.
Action: Provide the correct information so the group can be retrieved. You can search for the groups in the system.

Level: 1
Type: ERROR
Impact: Process

OAAM-30008: Group type cannot be changed.
Cause: The group type is part of the basic function in the way that the group is used in the system. The group type cannot be changed at this time.
**Action:** Create another group with the required value type and then use it.

**Level:** 1
**Type:** ERROR
**Impact:** Process

**OAAM-30009: Group type {0} not found.**
**Cause:** The group type provided for the operation was not correct.
**Action:** Try a different group type. Group types can be found in value.list.type.enum through the system enumerations user interface.

**Level:** 1
**Type:** ERROR
**Impact:** Process

**OAAM-30010: Group type cannot be changed.**
**Cause:** The group type is part of the basic function in the way that the group is used in the system. The group type cannot be changed at this time.
**Action:** Create another group with the required type and then use it.

**Level:** 1
**Type:** ERROR
**Impact:** Process

**OAAM-30011: Group element {0} is invalid for this group.**
**Cause:** The group element is null or the group element type is not compatible with the group type.
**Action:** Provide an element that is compatible with the group type.

**Level:** 1
**Type:** ERROR
**Impact:** Process

**OAAM-30012: List of groups is required for this operation.**
**Cause:** A list of groups required for this operation was found to be null.
**Action:** Provide a valid list of groups and then retry this operation.

**Level:** 1
**Type:** ERROR
**Impact:** Process

**OAAM-30013: List of groups has invalid group information.**
**Cause:** A list of groups required for this operation contains some group-related information that is incorrect.
**Action:** Provide a valid list of groups with non-null Group IDs. Any duplicates in the list will be ignored.

**Level:** 1
**Type:** ERROR
**Impact:** Process
OAAM-30014: Query returned multiple groups from different group types.
  
  **Cause:** The query returned multiple groups of mixed type.
  
  **Action:** Use more specific search criteria to limit the number of groups returned.

  **Level:** 1
  **Type:** ERROR
  **Impact:** Process

OAAM-30015: Group element with given information not found {0}.
  
  **Cause:** Group element with given information not found.
  
  **Action:** Provide correct information so the group element can be retrieved. You can use the searchGroupElements feature to find group elements in the system.

  **Level:** 1
  **Type:** ERROR
  **Impact:** Process

OAAM-30016: Element [0] is not a member of group [1].
  
  **Cause:** Element is not a member of the group.
  
  **Action:** Provide a correct combination of element and group.

  **Level:** 1
  **Type:** ERROR
  **Impact:** Process

OAAM-30017: The group [0] cannot be deleted, because it is linked to the following policies [1].
  
  **Cause:** Policies are linked to this group; therefore, the group cannot be deleted.
  
  **Action:** The group is linked to policies and might contain session and transaction data associated with this group. Hence this group cannot be deleted.

  **Level:** 1
  **Type:** ERROR
  **Impact:** Process

OAAM-30018: The group [0] cannot be deleted, because it is used by rules.
  
  **Cause:** Policies use this group as a parameter value in their rules; therefore, the group cannot be deleted.
  
  **Action:** Remove the group name or ID as a value of the rule parameter(s) and then retry this operation.

  **Level:** 1
  **Type:** ERROR
  **Impact:** Process

OAAM-30019: The group [0] cannot be deleted, because it is used by user groups.
  
  **Cause:** Some user groups use this group; therefore, the group cannot be deleted.
  
  **Action:** Remove the group name or ID from those user groups and then retry this operation.

  **Level:** 1
OAAM-30020: The IP Cluster object cannot be null.
Cause: The OARMIPCluster object cannot be null.
Action: Pass a non-null OARMIPCluster object.
Level: 1

OAAM-30021: The label for IP cluster cannot be null.
Cause: The label for IP cluster cannot be null.
Action: Pass a non-null label for IP cluster.
Level: 1

OAAM-30022: IP cluster with label {0} already exists.
Cause: IP cluster with label {0} already exists.
Action: Provide a different label for IP cluster.
Level: 1

OAAM-30023: Invalid IP address range. From IP Address cannot be greater than To IP Address.
Cause: Invalid IP address range. From IP Address cannot be greater than To IP Address.
Action: Provide a From IP Address that is less than To IP Address.
Level: 1

OAAM-30024: The IP address {0} is invalid.
Cause: The IP address {0} is invalid.
Action: Provide a valid IP address.
Level: 1

OAAM-30025: The list of Cluster IDs cannot be null.
Cause: The list of Cluster IDs cannot be null.
Action: Provide a non-null list of Cluster IDs.
Level: 1
Type: ERROR
Impact: Process

OAAM-30026: The IP cluster with Cluster ID {0} does not exist.
Cause: The IP cluster with Cluster ID {0} does not exist.
Action: Provide a valid Cluster ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-30027: The IP cluster with Cluster ID {0} is being used by one or more groups and cannot be deleted.
Cause: The IP cluster with Cluster ID {0} is being used by one or more groups and cannot be deleted.
Action: Remove the IP cluster from the groups and then try to delete it.

Level: 1
Type: ERROR
Impact: Process

OAAM-30028: Duplicate element {0} cannot be added to group {1}.
Cause: The element is already present in the group. Duplicate elements cannot be added to the group.
Action: Add a different element to the group.

Level: 1
Type: ERROR
Impact: Process

OAAM-30029: The {0} group cannot be deleted because it is being used by one or more policies.
Cause: The group cannot be deleted because it is being used by one or more policies.
Action: The group cannot be deleted because it is being used by one or more policies.

Level: 1
Type: ERROR
Impact: Process

OAAM-30030: The IP Range {0} cannot be created because a similar IP Range already exists.
Cause: IP Ranges being created have duplicate entries.
Action: Ensure to enter a unique IP Range.

Level: 1
Type: ERROR
Impact: Process
OAAM-30031: The user cannot be removed from the group(s) {0} because they are primary user groups.
Cause: The user cannot be removed from the groups because they are primary user groups.
Action: Select other groups and retry this operation.
Level: 1
Type: ERROR
Impact: Process

OAAM-30032: The group {0} cannot be deleted, because it is used by policies.
Cause: Policies use this group as a parameter value in trigger combinations; therefore, the group cannot be deleted.
Action: Remove the group name or ID as a value from policy trigger combinations and then retry this operation.
Level: 1
Type: ERROR
Impact: Process

OAAM-35001: {0} is a duplicate of enumeration {1}. Enter another {2}.
Cause: Enumeration already exists in the database. Duplicate enumerations cannot be added.
Action: Enter a unique enumeration and retry this operation.
Level: 1
Type: ERROR
Impact: Process

OAAM-35002: Default Property cannot be deleted.
Cause: Default Property cannot be deleted.
Action: Select another property and retry this operation.
Level: 1
Type: ERROR
Impact: Process

OAAM-40001: Import failed error: {0}.
Cause: Import failed error: {0}.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.
Level: 1
Type: ERROR
Impact: Process

OAAM-40002: Invalid profile type: {0}.
Cause: Invalid profile type: {0}.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.
Level: 1
Type: ERROR
Impact: Process

OAAM-40003: Invalid policy type: {0}.
Cause: Invalid policy type: {0}.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40004: No policy data for policy: {0}.
Cause: No policy data for policy: {0}.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40005: Policy already exists in the database with name {0}.
Cause: The policy already exists in the database with the name {0}.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40006: Import failed, no group: {0}, rule instance: {1}.
Cause: Import failed, no group: {0}, rule instance: {1}.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40007: Import failed. Unable to set Override action: {0}.
Cause: Import failed. Unable to set Override action: {0}.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40008: Import failed. Unable to set Override alert: {0}. 

OAAM-00000 to OAAM-94100  34-31
**OAAM-40009: Bad rule data, policy: {0}, Rule Global ID: {1}.**

*Cause:* Bad rule data, policy: {0}, Rule Global ID: {1}.

*Action:* Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

*Level:* 1  
*Type:* ERROR  
*Impact:* Process

**OAAM-40010: Policy: {0} Rule Global ID: {1} not present.**

*Cause:* Policy: {0} Rule Global ID: {1} not present.

*Action:* Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

*Level:* 1  
*Type:* ERROR  
*Impact:* Process

**OAAM-40011: Import failed. Unable to set Alert group: {0}, rule instance: {1}.**

*Cause:* Import failed. Unable to set Alert group: {0}, rule instance: {1}.

*Action:* Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

*Level:* 1  
*Type:* ERROR  
*Impact:* Process

**OAAM-40012: Import failed. Unable to set Action group: {0}, rule instance: {1}.**

*Cause:* Import failed. Unable to set Action group: {0}, rule instance: {1}.

*Action:* Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

*Level:* 1  
*Type:* ERROR  
*Impact:* Process

**OAAM-40013: Import failed. Unable to set Exclude group: {0}, rule instance: {1}.**

*Cause:* Import failed. Unable to set Exclude group: {0}, rule instance: {1}.

*Action:* Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

*Level:* 1
Type: ERROR
Impact: Process

OAAM-40014: Question category not found.
Cause: The question category was not found.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40015: Validation not found.
Cause: The validation was not found.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40016: Question locale not found.
Cause: The question locale was not found.
Action: Check the error logs. If the problem remains unresolved, you may contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Process

OAAM-40017: Question with Question ID {0} not found.
Cause: The question with the Question ID was not found.
Action: Provide a valid Question ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-40018: Configurable action with Action ID {0} not found.
Cause: The configurable action with the Action ID was not found.
Action: Provide a valid Action ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-40019: Transaction with Transaction ID {0} not found.
Cause: The transaction with the Transaction ID was not found.
Action: Provide a valid Transaction ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-40020: Pattern with Pattern ID {0} not found.
  Cause: The pattern with the Pattern ID was not found.
  Action: Provide a valid Pattern ID.
  Level: 1

Type: ERROR
Impact: Process

OAAM-40021: Entity with Entity ID {0} not found.
  Cause: The entity with the Entity ID was not found.
  Action: Provide a valid Entity ID.
  Level: 1

Type: ERROR
Impact: Process

OAAM-40022: Group with List ID {0} not found.
  Cause: The group with the List ID was not found.
  Action: Provide a valid List ID.
  Level: 1

Type: ERROR
Impact: Process

OAAM-40023: Policy set with Policy Set ID {0} not found.
  Cause: The policy set with Policy Set ID was not found.
  Action: Provide a valid Policy Set ID.
  Level: 1

Type: ERROR
Impact: Process

OAAM-40024: Answer hint with Answer Hint ID {0} not found.
  Cause: The answer hint with the Answer Hint ID was not found.
  Action: Provide a valid Answer Hint ID.
  Level: 1

Type: ERROR
Impact: Process

OAAM-40025: Validation with Validation ID {0} not found.
  Cause: Validation with Validation ID not found.
  Action: Provide a valid Validation ID.
  Level: 1

Type: ERROR
Impact: Process
OAAM-40026: Task group with Group ID {0} not found.
  Cause: Task group with Group ID not found.
  Action: Provide a valid Group ID.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-40027: A configurable action with the name {0} already exists.
  Cause: A configurable action with the name already exists.
  Action: Change the name of the existing configurable action.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-40028: One or more files in the ZIP file are invalid XML files.
  Cause: One or more files in the ZIP file are invalid XML files.
  Action: One or more files in the ZIP file are invalid XML files.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-40029: Import content has system properties. System properties are not imported as part of this Import action.
  Cause: System properties are not imported as part of Import Properties. System type properties may exist in the import data; they are not imported as part of this Import action.
  Action: This is not an error. It is only an informative message about the system properties. System properties are considered to be specific to the system or environment where the OAAM product runs. Such properties are not imported by other OAAM servers even when they are part of the data being imported. No user action is required.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-40030: Import ignored the following system properties: {0}
  Cause: System properties, which were not imported as part of import properties, are listed here.
  Action: This is not an error. It is only an informative message about the system properties that were not imported. No user action is required.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-40031: Export list has some properties that are system properties. System properties are not exported in this Export action.
Cause: System properties are not exported as part of Export Properties. There may be some system type properties in the export list. They are not exported as part of this export.

Action: This is not an error. It is only an informative message about the system properties. System properties are considered to be specific to the system or environment where OAAM product runs. Such properties are not exported by OAAM servers even when they are part of the list of properties being imported. No user action is required.

Level: 1  
Type: ERROR  
Impact: Process

OAAM-40032: Export has ignored the following system properties: {0}
Cause: System properties, which are not exported as part of Export Properties, are listed here.

Action: This is not an error. It is only an informative message about the system properties which are not exported. No user action is required.

Level: 1  
Type: ERROR  
Impact: Process

OAAM-40033: File provided does not appear to be correct for Import action.
Cause: The file provided for import may not be correct. The file may not be the one that was exported from OAAM, or it may contain data that cannot be imported into OAAM.

Action: Check that the file was obtained from another OAAM export. See if the file is not empty, and is readable and a valid ZIP file.

Level: 1  
Type: ERROR  
Impact: Process

OAAM-40034: File import error. Check the log for details.
Cause: A file import error occurred. Invalid import files were found in the ZIP file.

Action: Check whether the ZIP file contains valid import files.

Level: 1  
Type: ERROR  
Impact: Process

OAAM-40035: Unknown error during import operation. Check the log for details.
Cause: Invalid import files may exist in the ZIP file.

Action: Check if the ZIP file contains invalid import files.

Level: 1  
Type: ERROR  
Impact: Process
OAAM-40501: Snapshot name cannot be null or empty.
    Cause: Snapshot name cannot be null or empty.
    Action: Provide a snapshot name.
    Level: 1
    Type: ERROR
    Impact: Process

OAAM-40502: Snapshot description cannot be null or empty.
    Cause: Snapshot description cannot be null or empty.
    Action: Provide a valid Snapshot description.
    Level: 1
    Type: ERROR
    Impact: Process

OAAM-40503: Snapshot identifier cannot be null.
    Cause: Snapshot identifier cannot be null. This API requires a valid snapshot identifier.
    Action: Provide a valid snapshot identifier.
    Level: 1
    Type: ERROR
    Impact: Process

OAAM-40504: Snapshot with snapshot identifier {0} does not exist.
    Cause: Snapshot with given snapshot identifier does not exist.
    Action: Ensure that you provide the correct snapshot identifier for this operation.
    Level: 1
    Type: ERROR
    Impact: Process

OAAM-40505: List of snapshots was not found.
    Cause: List of snapshot identifiers was not found. The list is a mandatory parameter when performing this operation in the interface.
    Action: Provide the correct list of snapshot identifiers and retry the operation. The list is a mandatory parameter and cannot be null.
    Level: 1
    Type: ERROR
    Impact: Process

OAAM-40506: Snapshot data provided does not appear correct.
    Cause: Snapshot data bytes do not appear correct.
    Action: Ensure that the snapshot bytes array is not null and that the array represents the correct snapshot data. Make sure the byte data from the saved snapshot ZIP file is represented, and then retry the operation.
    Level: 1
Type: ERROR
Impact: Process
OAAM-50001: The fully-qualified transaction key must be a valid string.
Cause: The transaction key supplied to look up the transaction definition is not correct. It should be a non-empty string.
Action: Verify that the transaction key provided is correct and a non-empty string.
Level: 1
Type: ERROR
Impact: Process
OAAM-50002: Transaction definition was not found for the key {0}.
Cause: The key provided does not match any transaction definition.
Action: Verify that the transaction key provided is correct and a non-empty string.
Level: 1
Type: ERROR
Impact: Process
OAAM-50003: Transaction Definition ID is null.
Cause: Transaction Definition ID is null.
Action: Provide a valid Transaction Definition ID.
Level: 1
Type: ERROR
Impact: Process
OAAM-50004: Transaction Definition ID is invalid or non-existent.
Cause: Transaction Definition ID is invalid or non-existent.
Action: Provide a valid and existent Transaction Definition ID.
Level: 1
Type: ERROR
Impact: Process
OAAM-50005: Transaction name is null or invalid.
Cause: Transaction name is null or invalid.
Action: Provide a valid transaction name.
Level: 1
Type: ERROR
Impact: Process
OAAM-50006: Transaction definition cannot be null.
Cause: Transaction definition cannot be null.
Action: Provide a valid transaction definition object.
Level: 1
Type: ERROR
**Impact:** Process

**OAAM-50007:** Transaction Definition ID is null.
- **Cause:** Transaction Definition ID is null.
- **Action:** Provide a non-null Transaction Definition ID.
- **Level:** 1
- **Type:** ERROR
- **Impact:** Process

**OAAM-50008:** Transaction Definition ID is either invalid or does not exist.
- **Cause:** Transaction Definition ID is either invalid or does not exist.
- **Action:** Provide valid Transaction Definition ID.
- **Level:** 1
- **Type:** ERROR
- **Impact:** Process

**OAAM-50009:** Transaction definition could not be updated.
- **Cause:** Transaction definition could not be updated.
- **Action:** Check error log for details.
- **Level:** 1
- **Type:** ERROR
- **Impact:** Process

**OAAM-50010:** Transaction Definition ID list is null or empty.
- **Cause:** Transaction Definition ID list is null or empty.
- **Action:** Provide a valid Transaction Definition ID list.
- **Level:** 1
- **Type:** ERROR
- **Impact:** Process

**OAAM-50011:** Transaction definition for the given transaction definition {0} not found.
- **Cause:** Transaction definition for the given transaction definition {0} not found.
- **Action:** Provide a valid Transaction Definition ID.
- **Level:** 1
- **Type:** ERROR
- **Impact:** Process

**OAAM-50012:** Transaction input data mapping is missing for transaction {0}.
- **Cause:** Transaction input data mapping is missing for transaction {0}.
- **Action:** Provide transaction input data mapping to activate the transaction {0}.
- **Level:** 1
- **Type:** ERROR
- **Impact:** Process
OAAM-50013: Transaction definition for the given transaction definition {0} not found.
  Cause: Transaction definition for the given transaction definition {0} not found.
  Action: Provide a valid transaction definition.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50014: Transaction input data mapping is missing for transaction {0}.
  Cause: Transaction input data mapping is missing for transaction {0}.
  Action: Provide transaction input data to activate the transaction {0}.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50015: Source data is missing for transaction {0}.
  Cause: Source data is missing for transaction {0}.
  Action: Provide the required source data to activate transaction {0}.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50016: Transaction data mapping is missing for transaction {0}.
  Cause: Transaction data mapping is missing for transaction {0}.
  Action: Provide transaction data mapping to activate transaction {0}.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50017: Transaction data mapping is missing for transaction {0}.
  Cause: Transaction data mapping is missing for transaction {0}.
  Action: Provide transaction data mapping to activate transaction {0}.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50018: Entity mapping could not be found for transaction {0}.
  Cause: Entity mapping could not be found for transaction {0}.
  Action: Make sure all entities are mapped before activating transaction {0}.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50019: Transaction and entity mapping is missing for transaction {0}.
Cause: Transaction and entity mapping is missing for transaction [0].
Action: Provide transaction and entity mapping to activate transaction [0].
Level: 1
Type: ERROR
Impact: Process

OAAM-50020: Transaction Entity Definition Map ID cannot be null.
Cause: Transaction Entity Definition Map ID cannot be null.
Action: Provide a valid Transaction Entity Definition Map ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-50021: Transaction Definition ID missing while creating transaction entity map.
Cause: Transaction Definition ID missing while creating transaction entity map.
Action: Provide a valid Transaction Definition ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-50022: Entity Definition ID missing while creating transaction entity map.
Cause: Entity Definition ID missing while creating transaction entity map.
Action: Provide a valid Entity Definition ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-50023: Entity definition validation failed. Operation cannot be performed.
Cause: Entity definition validation failed. Operation cannot be performed.
Action: Provide a valid entity definition.
Level: 1
Type: ERROR
Impact: Process

OAAM-50024: Entity name validation failed.
Cause: Entity name validation failed.
Action: Provide a valid and unique entity name.
Level: 1
Type: ERROR
Impact: Process

OAAM-50025: Invalid entity relation.
Cause: Invalid entity relation.
Error Messages

Action: Provide a valid entity relation.
Level: 1
Type: ERROR
Impact: Process

OAAM-50026: Invalid display order.
Cause: Invalid display order.
Action: Provide a valid display order.
Level: 1
Type: ERROR
Impact: Process

OAAM-50027: Duplicate entity name.
Cause: Duplicate entity name.
Action: Provide a valid and unique entity name.
Level: 1
Type: ERROR
Impact: Process

OAAM-50028: Invalid and non-unique entity relation.
Cause: Invalid and non-unique entity relation.
Action: Provide a valid and unique entity relation.
Level: 1
Type: ERROR
Impact: Process

OAAM-50029: Invalid and non-unique display order.
Cause: Invalid and non-unique display order.
Action: Provide a valid and unique display order.
Level: 1
Type: ERROR
Impact: Process

OAAM-50030: Transaction Definition ID missing while updating transaction entity map.
Cause: Transaction Definition ID missing while updating transaction entity map.
Action: Provide a valid and non-null Transaction Definition ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-50031: Entity Definition ID missing while updating transaction entity map.
Cause: Entity Definition ID missing while updating transaction entity map.
Action: Provide a valid and non-null Entity Definition ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-50032: Transaction delete is not allowed.
Cause: Transaction delete is not allowed.
Action: Select a valid transaction for delete.

Level: 1
Type: ERROR
Impact: Process

OAAM-50033: Data element definition cannot be null.
Cause: Data element definition cannot be null.
Action: Provide a valid data element definition.

Level: 1
Type: ERROR
Impact: Process

OAAM-50034: Data element definition array cannot be null or empty.
Cause: Data element definition array cannot be null or empty.
Action: Provide a non-null and valid data element definition array.

Level: 1
Type: ERROR
Impact: Process

OAAM-50035: Attribute validation failed.
Cause: Attribute validation failed.
Action: Provide a valid attribute.

Level: 1
Type: ERROR
Impact: Process

OAAM-50036: Creating the attribute failed.
Cause: Creating the attribute failed.
Action: Provide the valid entry for creating the attribute.

Level: 1
Type: ERROR
Impact: Process

OAAM-50037: Attribute not found.
Cause: Attribute not found.
Action: Provide a valid and non-null attribute.

Level: 1
Type: ERROR
Impact: Process

OAAM-50038: Cannot find a matching data element definition.
  Cause: Cannot find a matching data element definition.
  Action: Provide a valid entry with a matching data element definition.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50039: No attribute found to delete.
  Cause: No attribute found to delete.
  Action: Provide a valid attribute to delete.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50040: Source validation failed.
  Cause: Source validation failed.
  Action: Provide valid source data.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50041: Cannot find a matching transaction data mapping.
  Cause: Cannot find a matching Transaction Data Mapping ID.
  Action: Provide a valid and matching Transaction Data Mapping ID.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50042: Transaction data mapping is null or empty.
  Cause: Transaction data mapping IDs are null or empty.
  Action: Provide a non-null or valid Transaction Data Mapping ID.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50043: No transaction mapping found to delete.
  Cause: No transaction mapping found to delete.
  Action: Transaction should have one or more mappings to delete.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50044: No entity mapping found to delete.
Cause: No entity mapping found to delete.
Action: Entity should have one or more mappings to delete.

Level: 1
Type: ERROR
Impact: Process

OAAM-50045: Transaction name is null or empty.
Cause: Transaction name is null or empty.
Action: Provide a valid and non-null transaction name.

Level: 1
Type: ERROR
Impact: Process

OAAM-50046: Transaction key is null or empty.
Cause: Transaction key is null or empty.
Action: Provide a valid and non-null transaction key.

Level: 1
Type: ERROR
Impact: Process

OAAM-50047: Transaction description is null or empty.
Cause: Transaction description is null or empty.
Action: Provide a valid and non-null transaction description.

Level: 1
Type: ERROR
Impact: Process

OAAM-50048: Duplicate transaction name or transaction key; validation failed.
Cause: Validation failed because of a duplicate transaction name or transaction key.
Action: Provide a valid and unique transaction name or transaction key.

Level: 1
Type: ERROR
Impact: Process

OAAM-50049: Transaction entity map for the ID {0} does not exist.
Cause: Transaction entity map for the ID does not exist.
Action: Provide a valid Transaction Entity Map ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-50050: Transaction Entity Map ID cannot be null.
Cause: Transaction Entity Map ID cannot be null.
Action: Provide a valid and non-null Transaction Entity Map ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-50102: Display/name scheme is not set for entity {0}.
Cause: Display/name scheme is not set for entity.
Action: Set the display/name scheme before activation.
Level: 1
Type: ERROR
Impact: Process

OAAM-50103: ID scheme is not set for entity {0}.
Cause: ID scheme is not set for entity.
Action: Set the ID scheme before activation.
Level: 1
Type: ERROR
Impact: Process

OAAM-50104: No data element definitions exist for entity {0}.
Cause: No data element definitions exist for entity.
Action: Add data element definitions before activating.
Level: 1
Type: ERROR
Impact: Process

OAAM-50105: Row and Column values are not unique/valid for data element {0} for entity {1}.
Cause: Row and Column values are not unique/valid for data element for entity.
Action: Provide unique Row and Column values for data elements within an entity.
Level: 1
Type: ERROR
Impact: Process

OAAM-50106: There is more than one data element with the same internal identifier, {0}, for entity {1}.
Cause: There is more than one data element with the same internal identifier for the same entity.
Action: Provide a unique internal identifiers for data element definitions within an entity.
Level: 1
Type: ERROR
Impact: Process
OAAM-50107: Index for numeric data elements is not between {0} and {1} for entity {2}.
   Cause: Index for numeric data elements is not between {0} and {1} for entity {2}.
   Action: Ensure that index for numeric data elements is between {0} and {1} for entity {2}.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-50108: Index for non-numeric data elements is not between {0} and {1} for entity {2}.
   Cause: Index for non-numeric data elements is not between {0} and {1} for entity {2}.
   Action: Ensure that index for non-numeric data elements is between {0} and {1} for entity {2}.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-50109: No display scheme elements are available for entity {0}.
   Cause: No display scheme elements have been added for entity {0}.
   Action: Add display scheme elements before activating.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-50110: There is more than one display data element with the same internal ID, {0}, for entity {1}.
   Cause: There is more than one display data element with the same internal ID, {0}, for entity {1}.
   Action: Entity should not have more than one display data element with the same internal ID.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-50111: There is more than one display data element with the same order, {0}, for entity {1}.
   Cause: There is more than one display data element with the same order, {0}, for entity {1}.
   Action: Correct the ordering for the display data elements for entity {1}.
   Level: 1
   Type: ERROR
   Impact: Process

OAAM-50112: No ID scheme elements are available for entity {0}.
Cause: No ID scheme elements have been added for entity {0}.
Action: Add ID scheme elements before activating.

Level: 1
Type: ERROR
Impact: Process

OAAM-50113: There is more than one ID scheme data element with the same internal ID, {0}, for entity {1}.
Cause: There is more than one ID scheme data element with the same internal ID, {0}, for entity {1}.
Action: The entity should not have more than one ID scheme data element with the same internal ID.

Level: 1
Type: ERROR
Impact: Process

OAAM-50114: There is more than one ID scheme data element with the same order, {0}, for entity {1}.
Cause: There is more than one ID scheme data element with the same order, {0}, for entity {1}.
Action: The entity should not have more than one ID scheme data element with the same order.

Level: 1
Type: ERROR
Impact: Process

OAAM-50115: Database error.
Cause: Database error.
Action: Database error.

Level: 1
Type: ERROR
Impact: Process

OAAM-50116: Entity Name field cannot be blank.
Cause: Entity Name field cannot be blank.
Action: Provide an entity name for the Entity Name field.

Level: 1
Type: ERROR
Impact: Process

OAAM-50117: Entity Key field cannot be blank.
Cause: Entity Key field cannot be blank.
Action: Provide an entity key in the Key field.

Level: 1
OAAM-50118: Entity Description field cannot be blank.

**Cause:** Entity Description field cannot be blank.

**Action:** Provide an entity description in the Description field.

**Level:** 1

OAAM-50119: Another entity definition with the same name already exists.

**Cause:** Another entity definition with the same name already exists.

**Action:** Provide a unique name for the entity definition.

**Level:** 1

OAAM-50120: Internal ID field of data elements cannot be blank.

**Cause:** Internal ID field of data elements cannot be blank.

**Action:** Provide an internal ID for data elements.

**Level:** 1

OAAM-50121: Data Type field of the data elements of the entity cannot be blank.

**Cause:** Data Type field of the data elements of the entity cannot be blank.

**Action:** Provide a data type for data elements of the entity.

**Level:** 1

OAAM-50122: Row number of the data elements of the entity cannot be less than zero.

**Cause:** Row number of the data elements of the entity cannot be less than zero.

**Action:** Provide positive integers as row numbers for the data elements of the entity.

**Level:** 1

OAAM-50123: Column number of data elements of the entity cannot be less than zero.

**Cause:** Column number of data elements of the entity cannot be less than zero.

**Action:** Provide a positive integer as the column number for data elements of the entity.
OAAM-50124: Internal ID of the data element of the entity should be unique.
Cause: Internal ID of data element of the entity should be unique.
Action: Ensure that the internal ID of the data element of the entity is unique.

OAAM-50125: Name of data element of the entity should be unique.
Cause: Name of data element of the entity should be unique.
Action: Ensure that the name of the data element of the entity is unique.

OAAM-50126: More than one data element definition exists with the same row and column.
Cause: More than one data element definition exists with the same row and column.
Action: Ensure that row and column values are unique for the data element definitions.

OAAM-50127: Validation error: Data element definition identifier should not be set for creating a new data element definition.
Cause: Validation error: Data element definition identifier should not be set for creating a new data element definition. The identifier is generated by the system for the new data element.
Action: Validation error: Data element definition identifier should not be set for creating a new data element definition. The identifier is generated by the system for the new data element.

OAAM-50128: Column value for numeric data elements should be between \{0\} and \{1\}.
Cause: Column value for numeric data elements should be between \{0\} and \{1\}.
Action: Column value for numeric data elements should be between \{0\} and \{1\}.
Impact: Process

OAAM-50129: Column value for non-numeric data elements should be between 1 and {0}.
Cause: Column value for non-numeric data elements should be between 1 and {0}.
Action: Column value for non-numeric data elements should be between 1 and {0}.
Level: 1
Type: ERROR
Impact: Process

OAAM-50130: The entity {0} cannot be disabled because it is used by one or more active transactions.
Cause: The entity {0} cannot be disabled because it is used by one or more active transactions.
Action: The entity {0} cannot be disabled because it is used by one or more active transactions.
Level: 1
Type: ERROR
Impact: Process

OAAM-50131: The entity {0} cannot be deleted because it is used by one or more active transactions.
Cause: The entity {0} cannot be deleted because it is used by one or more active transactions.
Action: The entity {0} cannot be deleted because it is used by one or more active transactions.
Level: 1
Type: ERROR
Impact: Process

OAAM-50132: Entity Definition ID cannot be null.
Cause: Entity Definition ID cannot be null.
Action: Entity Definition ID cannot be null.
Level: 1
Type: ERROR
Impact: Process

OAAM-50133: Data profile definition not found for the Entity Definition ID.
Cause: Data profile definition not found for the Entity Definition ID.
Action: Data profile definition not found for the Entity Definition ID.
Level: 1
Type: ERROR
Impact: Process
OAAM-50134: Data Definition ID does not match with Data Definition ID of the data profile.
Cause: Data Definition ID does not match with Data Definition ID of the data profile.
Action: Data Definition ID does not match with Data Definition ID of the data profile.
Level: 1
Type: ERROR
Impact: Process

OAAM-50135: Unable to create external ID data definition for the Entity Definition ID.
Cause: Unable to create external ID data definition for the Entity Definition ID.
Action: Unable to create external ID data definition for the Entity Definition ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-50136: The element with Element ID {0} cannot be deleted because it is used by one or more active transactions.
Cause: The element with Element ID {0} cannot be deleted because it is used by one or more active transactions.
Action: The element with Element ID {0} cannot be deleted because it is used by one or more active transactions.
Level: 1
Type: ERROR
Impact: Process

OAAM-50137: Data element having Data Definition Element ID {0} does not exist.
Cause: Data element having Data Definition Element ID {0} does not exist.
Action: Data element having Data Definition Element ID {0} does not exist.
Level: 1
Type: ERROR
Impact: Process

OAAM-50138: Identification scheme cannot be null.
Cause: Identification scheme cannot be null.
Action: Identification scheme cannot be null.
Level: 1
Type: ERROR
Impact: Process

OAAM-50139: Data Definition Element ID cannot be null.
Cause: Data Definition Element ID cannot be null.
Action: Data Definition Element ID cannot be null.
Level: 1
Type: ERROR
Impact: Process

**OAAM-50140: System error occurred while loading entities.**
Cause: System error occurred while loading entities.
Action: System error occurred while loading entities.

Level: 1
Type: ERROR
Impact: Process

**OAAM-50141: Error loading object {0} with primary key {1} from database. {2}.**
Cause: Error loading object {0} with primary key {1} from database. {2}.
Action: Error loading object {0} with primary key {1} from database. {2}s.

Level: 1
Type: ERROR
Impact: Process

**OAAM-50142: Error inserting object {0} to database.**
Cause: Error inserting object to database. Database may not be available.
Action: Error inserting object to database. Try the operation again.

Level: 1
Type: ERROR
Impact: Process

**OAAM-50200: Configurable Action ID provided is invalid or does not exist.**
Cause: Configurable Action ID provided is invalid or does not exist.
Action: Provide a valid and existent Configurable Action ID.

Level: 1
Type: ERROR
Impact: Process

**OAAM-50201: Configurable Action ID cannot be null.**
Cause: Configurable Action ID cannot be null.
Action: Provide a non-null Configurable Action ID.

Level: 1
Type: ERROR
Impact: Process

**OAAM-50202: Action parameters mismatch.**
Cause: Action parameters mismatch.
Action: Provide a valid action parameter.

Level: 1
Type: ERROR
Impact: Process

OAAM-50203: Action name provided cannot be null.
  Cause: Action name provided cannot be null.
  Action: Provide a non-null action name.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50204: Java Class Name provided cannot be null.
  Cause: Java Class Name provided cannot be null.
  Action: Provide a non-null Java class name.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50205: Duplicate action.
  Cause: Duplicate action.
  Action: Provide a unique value to create a valid action.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50206: Configurable action cannot be deleted as it is currently used by one or more Action Instances.
  Cause: Configurable action cannot be deleted as it is currently used by one or more Action Instances.
  Action: Select a valid configurable action that is not in use.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50207: Invalid or non-existent Action ID.
  Cause: Invalid or non-existent Action ID.
  Action: Provide a valid and existent Action ID.
  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50208: Action ID list provided cannot be null or empty.
  Cause: Action ID list provided cannot be null or empty.
  Action: Provide a non-null and valid Action ID list.
  Level: 1
  Type: ERROR
Impact: Process

OAAM-50209: Action ID provided cannot be null.
    Cause: Action ID provided cannot be null.
    Action: Provide a non-null Action ID.
    Level: 1
    Type: ERROR
    Impact: Process

OAAM-50210: Action Instance ID provided is invalid or non-existent.
    Cause: Action Instance ID provided is invalid or non-existent.
    Action: Provide a valid and existent Action Instance ID.
    Level: 1
    Type: ERROR
    Impact: Process

OAAM-50211: Action Instance ID cannot be null.
    Cause: Action Instance ID cannot be null.
    Action: Provide a non-null Action Instance ID.
    Level: 1
    Type: ERROR
    Impact: Process

OAAM-50212: Execution Order should be unique for synchronous actions.
    Cause: Execution Order should be unique for synchronous actions.
    Action: Provide unique execution order for each synchronous action.
    Level: 1
    Type: ERROR
    Impact: Process

OAAM-50213: Action Instance name is a duplicate.
    Cause: Action Instance name is a duplicate.
    Action: Provide a unique action instance name.
    Level: 1
    Type: ERROR
    Impact: Process

OAAM-50214: Action instance association is not allowed.
    Cause: Action instance association is not allowed.
    Action: Select the valid instance and parameters for the association.
    Level: 1
    Type: ERROR
    Impact: Process

OAAM-50215: Invalid or non-existent Action Instance ID {0}. 
Cause: Invalid or non-existent Action Instance ID {0}.
Action: Provide a valid and existing Action Instance ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-50216: Value {1} provided for the parameter name {0} is not a valid Boolean value.
Cause: Value {1} provided for the parameter name {0} is not a valid Boolean value.
Action: Provide a valid Boolean value for the parameter name {0}. It can be true or false only.
Level: 1
Type: ERROR
Impact: Process

OAAM-50217: Value {1} provided for the parameter name {0} is not a valid Integer value.
Cause: Value {1} provided for the parameter name {0} is not a valid Integer value.
Action: Provide a valid Integer value for the parameter name {0}.
Level: 1
Type: ERROR
Impact: Process

OAAM-50218: Value {1} provided for the parameter name {0} is not a valid Long value.
Cause: Value {1} provided for the parameter name {0} is not a valid Long value.
Action: Provide a valid Long value for the parameter name {0}.
Level: 1
Type: ERROR
Impact: Process

OAAM-50219: Value {1} provided for the parameter name {0} is not a valid Date value.
Cause: Value {1} provided for the parameter name {0} is not a valid Date value.
Action: Provide a valid Date value for the parameter name {0}.
Level: 1
Type: ERROR
Impact: Process

OAAM-50220: Action parameter value validation failed.
Cause: The action parameter value validation failed.
Action: Verify all the parameter values for its data type are valid.
Level: 1
Type: ERROR
Impact: Process

OAAM-50221: Nonexistent or invalid Parameter ID \(0\) with the parameter name \(1\).
  Cause: Nonexistent or invalid Parameter ID \(0\) with the parameter name \(1\).
  Action: Provide a valid existing parameter and value.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-50222: Unable to load configurable action class \(0\). Ensure the class is made available in the class path.
  Cause: Unable to load configurable action class \(0\). Ensure the class is made available in the class path.
  Action: Provide a valid class name with the class already in the class path.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-60001: Pattern ID cannot be null.
  Cause: Pattern ID cannot be null.
  Action: Pattern ID cannot be null.

  Level: 1
  Type: ERROR
  Impact: Process

OAAM-60002: Pattern with the name \(0\) already exists.

Type: ERROR
Impact: Process

OAAM-70012: Invalid or empty category name.
Cause: Invalid or empty category name.
Action: Provide a valid and non-null category name.
Level: 1
Type: ERROR
Impact: Process

OAAM-70013: Validation name {0} already exist. Provide a unique validation name.
Cause: Validation name {0} already exist. Provide a unique validation name.
Action: Provide a valid and unique validation name.
Level: 1
Type: ERROR
Impact: Process
OAAM-70014: Validation cannot be null.
Cause: Validation cannot be null.
Action: Provide a valid and non-null validation.
Level: 1
Type: ERROR
Impact: Process

OAAM-70015: Invalid Validation ID.
Cause: Invalid Validation ID.
Action: Provide a valid Validation ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-70016: Validations {0} are used in the KBA configuration and cannot be deleted.
Cause: Validations are linked and cannot be deleted.
Action: Select only the unlinked validations for deleting.
Level: 1
Type: ERROR
Impact: Process

OAAM-70017: Validation ID {0} is invalid and cannot be deleted.
Cause: Validation ID is invalid and cannot be deleted.
Action: Provide a valid and existent Validation ID.
Level: 1
Type: ERROR
Impact: Process

OAAM-70018: Validation {0} has already been added as global validation.
Cause: Validation will not be added again as a global validation.
Action: Select a new Validation that is not part of the Global Validation list.
Level: 1
Type: ERROR
Impact: Process

OAAM-70019: Validation ID is not in the Global Validation list.
Cause: Validation ID is not found in the Global Validation list.
Action: Select a Validation ID which is part of the Global Validation list.
Level: 1
Type: ERROR
Impact: Process

OAAM-70020: No validation available in Global Validation list for delete.
**Cause:** No validation available in Global Validation list for delete.

**Action:** No validation available in Global Validation list for delete.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70021:** Configuration value \([0]\) is not a positive number.

**Cause:** Configuration value should be a positive number.

**Action:** Provide a positive number for the configuration value.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70022:** Configuration value \([0]\) cannot exceed the category count.

**Cause:** Configuration value cannot exceed the category count.

**Action:** Provide the configuration value within the allowed category count.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70023:** No validation available in Global Validation list for delete.

**Cause:** No validation available in Global Validation list for delete.

**Action:** No validation available in Global Validation list for delete.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70024:** Insufficient questions in the system for configuring \([0]\) questions for each user with \([1]\) questions per menu.

**Cause:** There are not enough questions in the system for each user to register for the number of questions per menu.

**Action:** Import/create more questions so that the number of questions that user needs to register multiplied by the questions per menu is less than the total number of questions available.

**Level:** 1

**Type:** ERROR

**Impact:** Process

**OAAM-70025:** Too few questions are being configured for users. Try to register at least \([0]\) questions for the user.

**Cause:** You have tried to set the number of questions too low. This can lead to security vulnerability.

**Action:** For the best mix of security and usability, register at least three and at most five or so questions. These settings are dependent on your particular system implementation.
Level: 1
Type: ERROR
Impact: Process

OAAM-70026: Too many questions are being configured for users. Try to register at most \(0\) questions for user.
Cause: You have tried to set the number of questions too high. This can lead to usability issues.
Action: For the best mix of security and usability, register at least three and at most five questions. These settings are dependent on your particular system implementation.

Level: 1
Type: ERROR
Impact: Process

OAAM-70027: Selected category \(0\) cannot be updated to the given status.
Cause: Selected category \(0\) cannot be updated to the given status.
Action: Selected category \(0\) cannot be updated to the given status. Select a different category.

Level: 1
Type: ERROR
Impact: Process

OAAM-70028: Categories' status cannot be updated. This will lead to too few active categories.
Cause: Categories cannot be updated. This will result in very few categories being available for the registration logic.
Action: Make sure registration logic and available active categories are consistent with this change. One way to do this will be update the registration logic first and then try this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-70029: Categories cannot be deleted. This will lead to too few active categories.
Cause: Categories cannot be deleted. This will result in very few categories being available for the registration logic.
Action: Make sure registration logic and available active categories are consistent with this change. One way to do this will be update the registration logic first and then try this operation.

Level: 1
Type: ERROR
Impact: Process

OAAM-70030: Category name \(0\) already exist. Provide a unique category name.
Cause: Category name \(0\) already exist. Provide a unique category name.
Action: Provide a valid and unique category name.

Level: 1
Type: ERROR
Impact: Process

**OAAM-70031: Failed to deactivate selected Categories.**

Cause: Failed to deactivate selected Categories. When category is deactivated the questions belonging to that category are also impacted. Some questions cannot be updated to the given status.

Action: Make sure that the questions in selected categories can be updated to the given status.

Level: 1
Type: ERROR
Impact: Process

**OAAM-70032: Failed to delete the selected groups. One or more of the groups are in use.**

Cause: Failed to delete the selected groups. One or more of the groups are in use.

Action: Remove the usages of the group and delete it.

Level: 1
Type: ERROR
Impact: Process

**OAAM-70033: Validation search query cannot be null.**

Cause: Validation search query object passed is null.

Action: Make sure to pass non-null search query object.

Level: 1
Type: ERROR
Impact: Process

**OAAM-70034: Validations marked for deletion {0} are also used being as global validations.**

Cause: Validations marked for deletion are also used being as global validation.

Action: Manage global validations from Registration Logic page.

Level: 1
Type: ERROR
Impact: Process

**OAAM-70035: Validation list for delete operation contains null value(s).**

Cause: One or more of the validation IDs sent for deletion contain null values.

Action: Make sure no null values are sent in validation ID lists.

Level: 1
Type: ERROR
Impact: Process
OAAM-70036: Question {0} does not exist. It may have been deleted.
   Cause: Question {0} does not exist. It may have been deleted.
   Action: Question {0} does not exist.

Cause: Alert ID cannot be null
Action: Alert ID cannot be null
Level: 1
Type: ERROR
Impact: Process

OAAM-70902: Alert with Alert ID, {0}, does not exist
Cause: Alert with Alert ID, {0}, does not exist
Action: Alert with Alert ID, {0}, does not exist
Level: 1
Type: ERROR
Impact: Process

OAAM-80001: Invalid IP address value {0}
Cause: Invalid IP address {0}. Validation failed.
Action: Enter a valid IP address; the value {0} is invalid
Level: 1
Type: ERROR
Impact: Process

OAAM-90001: Task name {0} already exist. Provide a unique task name.
Cause: Task name {0} already exist. Provide a unique task name.
Action: Provide a valid and unique task name.
Level: 1
Type: ERROR
Impact: Process

OAAM-90002: Task type {0} not found. Provide an existing task type.
Cause: Task type {0} not found. Provide an existing task type.
Action: Provide a valid and existing task type.
Level: 1
Type: ERROR
Impact: Process

OAAM-90003: Task status {0} not found. Provide an existing task status.
Cause: Task status {0} not found. Provide an existing task status.
Action: Provide a valid and existing task status.

Level: 1
Type: ERROR
Impact: Process

OAAM-90004: Task name {0} is not alpha numeric. Provide an alpha numeric task name.
Cause: Task name {0} is not alpha numeric. Provide an alpha numeric task name.
Action: Provide a valid and alpha numeric task name.

Level: 1
Type: ERROR
Impact: Process

OAAM-90005: Task priority {0} not found. Provide an existing task priority.
Cause: Task priority {0} not found. Provide an existing task priority.
Action: Provide a valid and existing task priority.

Level: 1
Type: ERROR
Impact: Process

OAAM-90006: Schedule type {0} is invalid. Type has to be either onetime or recurring.
Cause: Schedule type {0} is invalid. Type has to be either onetime or recurring.
Action: Provide a valid Schedule type and should be either onetime or recurring.

Level: 1
Type: ERROR
Impact: Process

OAAM-90007: Cancel duration type {0} not found. Provide an existing duration type.
Cause: Cancel duration type {0} not found. Provide an existing duration type.
Action: Provide a valid and existing duration type.

Level: 1
Type: ERROR
Impact: Process

OAAM-90008: Cancel duration unit {0} not found. Provide an existing duration unit.
Cause: Cancel duration unit {0} not found. Provide an existing duration unit.
Action: Provide a valid and existing duration unit.
Level: 1

Impact: Other

OAB-11020: An unexpected error occurred.

Cause:
Action:
Level: 1
Type: ERROR
Impact: Other

OAB-20003: No files in file set definition {0}.

Cause: (See message)
Action: Fix the file set definition so that at least one file is included.
Level: 1
Type: NOTIFICATION
Impact: User Input

OAB-20004: File \{0\} is not readable.
Cause: (See message)
Action: Create file sets as root, or set read permission of the file, or add it to EXCLUDE.

Level: 1
Type: ERROR
Impact: Files

OAB-20005: File set root \{0\} does not exist.
Cause: (See message)
Action: Make sure file set root exist.

Level: 1
Type: ERROR
Impact: Files

OAB-20006: File not found at \{0\}. Most likely it's a transient file that can safely be ignored.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Files

OAB-20007: Broken symbolic link at \{0\}.
Cause: (See message)
Action: Fix the broken symbolic link.

Level: 1
Type: ERROR
Impact: Files

OAB-20009: Cannot create file sets for external appliance \{0\}.
Cause: (See message)
Action: Make sure that the appliance you are trying to create file sets for is not external.

Level: 1
Type: ERROR
Impact: Other

OAB-20011: File sets already exist for \{0\} \{1\}.
Cause: (See message)
Action: Use -force to override.
Level: 1
Type: NOTIFICATION
Impact: Other

OAB-20012: Template exists for appliance {0}.
Cause: (See message)
Action: Use -force to override.

Level: 1
Type: NOTIFICATION
Impact: Other

OAB-20017: Windows not supported.
Cause: (See message)
Action: Run OVAB on supported platform(s), e.g., Oracle Enterprise Linux 5.4.

Level: 1
Type: ERROR
Impact: Other

OAB-20018: Unable to get dbconsole status.
Cause: (See message)
Action: Check if the following command can be executed: {0}. Contact Oracle support if necessary.

Level: 1
Type: ERROR
Impact: Process

OAB-20020: No valid appliance found in {0}.
Cause: (See message)
Action: Make sure introspection was completed successfully. Contact Oracle support if necessary.

Level: 1
Type: ERROR
Impact: Other

OAB-20021: {0} is not an atomic assembly.
Cause: (See message)
Action: Create file sets for sub-appliances and sub-assemblies individually.

Level: 1
Type: ERROR
Impact: User Input

OAB-20022: No file set definition was found.
Cause: (See message)
Action: Set or correct the file set definition. Contact Oracle support if necessary.
Level: 1
Type: ERROR
Impact: Other

OAB-20023: Invalid file set definition.
Cause: (See message)
Action: Correct the file set definition. Contact Oracle support if necessary.

Level: 1
Type: ERROR
Impact: Other

OAB-20024: Cannot create file sets for an individual appliance in an atomic assembly.
Cause: (See message)
Action: Create file sets for the parent atomic assembly.

Level: 1
Type: ERROR
Impact: Other

OAB-20026: The following file set creation validation steps failed for appliance {0}: {1}
Cause: (See message)
Action: Correct the conditions listed above. Contact Oracle support if necessary.

Level: 1
Type: ERROR
Impact: Other

OAB-20027: File set root {0} does not appear to be either a directory or a regular file.
Cause: (See message)
Action: Set file set root to a directory or a regular file.

Level: 1
Type: ERROR
Impact: Other

OAB-20028: I/O error occurred while listing files under {0}.
Cause: (See message)
Action: Make sure the file system is healthy. Correct Oracle support if necessary.

Level: 1
Type: ERROR
Impact: Files

OAB-20029: Ignoring non-regular file {0}.
Cause:
Action:
Level: 1
Type: NOTIFICATION
Impact: Files

OAB-23118: Assembly {0} does not have file sets captured.
Cause: (See message)
Action: Capture file sets for the assembly.

Level: 1
Type: ERROR
Impact: User Input

OAB-23119: Appliance {0} does not have file sets captured.
Cause: (See message)
Action: Capture file sets for the appliance or one of its siblings.

Level: 1
Type: ERROR
Impact: User Input

OAB-23120: Appliance {0} already has template for {1}.
Cause: (See message)
Action: Use -force flag to override existing template.

Level: 1
Type: ERROR
Impact: User Input

OAB-23121: Invalid base image at {0}.
Cause: (See message)
Action: Provide a valid base image location.

Level: 1
Type: ERROR
Impact: User Input

OAB-23122: Unable to locate supplied base image at {0}.
Cause: (See message)
Action: Provide a valid base image location.

Level: 1
Type: ERROR
Impact: Files

OAB-23123: Unable to locate vm.cfg for supplied base image.
Cause: (See message)
Action: Provide a valid base image location with vm.cfg.

Level: 1
Type: ERROR
OAB-23338: Cannot create template for external appliance {0}.
Cause: (See message)
Action: Choose non-external appliance for template creation.
Level: 1
Type: ERROR
Impact: Files

OAB-23339: Cannot create template for external reference {0}.
Cause: (See message)
Action: Choose non-external reference for template creation.
Level: 1
Type: ERROR
Impact: User Input

OAB-23340: Validator execution context of type {0} is from an incompatible template creation plug-in.
Cause: (See message)
Action: Contact Oracle support if necessary.
Level: 1
Type: ERROR
Impact: Other

OAB-23343: Unable to locate a valid default base image at {0} or {1}.
Cause: (See message)
Action: Specify a base image location, or place a base image in default location. Refer to user guide for detail.
Level: 1
Type: ERROR
Impact: Files

OAB-23344: Template directory {0} exists but is a regular file.
Cause:
Action:
Level: 1
Type: ERROR
Impact: Files

OAB-23345: Failed to create template directory at {0}.
Cause:
Action:
Level: 1
Type: ERROR
Impact: Files

OAB-23346: Failed to create template for assembly {0}.
  Cause: 
  Action: 
  Level: 1
  Type: ERROR
  Impact: Other

OAB-23348: Failed to copy from {0} to {1}.
  Cause: (See message)
  Action: Check the log file for underlying exception. Contact Oracle support if necessary.
  Level: 1
  Type: ERROR
  Impact: Files

OAB-23351: User 'oracle' does not exist in the base image.
  Cause: (See message)
  Action: Make sure the base image contains 'oracle' user.
  Level: 1
  Type: ERROR
  Impact: Other

OAB-23352: Group 'oracle' does not exist in the base image.
  Cause: (See message)
  Action: Make sure the base image contains 'oracle' group.
  Level: 1
  Type: ERROR
  Impact: Other

OAB-23353: User {0} does not exist in the base image.
  Cause: (See message)
  Action: Make sure the base image contains the specified user.
  Level: 1
  Type: ERROR
  Impact: Other

OAB-23354: Group {0} does not exist in the base image.
  Cause: (See message)
  Action: Make sure the base image contains the specified group.
  Level: 1
  Type: ERROR
  Impact: Other
OAB-23355: The specified index file location \{0\} could not be read.
  Cause:  (See message)
  Action: Specify a valid, readable base image index file location.
  Level: 1
  Type: ERROR
  Impact: Files

OAB-23356: The base image index file is invalid.
  Cause:  The index file is missing a required entry \{0\}.
  Action: Obtain a valid index file for the intended base image.
  Level: 1
  Type: ERROR
  Impact: Files

OAB-23471: Failed to run template tool binary.
  Cause:  (See message)
  Action: Check the log file for detail. Contact Oracle support if necessary.
  Level: 1
  Type: ERROR
  Impact: Process

OAB-23472: Permission for wrapper not set.
  Cause:  (See message)
  Action: Run ORACLE_HOME/oracleRoot.sh script as the root.
  Level: 1
  Type: ERROR
  Impact: Installation

OAB-23473: Wrapper not found at \{0\}.
  Cause:  (See message)
  Action: Contact Oracle support if necessary.
  Level: 1
  Type: ERROR
  Impact: Installation

OAB-23474: Wrapper is not executable at \{0\}.
  Cause:  (See message)
  Action: Run ORACLE_HOME/oracleRoot.sh script as the root. Contact Oracle support if necessary
  Level: 1
  Type: ERROR
  Impact: Installation

OAB-23475: Native library is not available.
Cause: (See message)
Action: Contact Oracle support if necessary.

Level: 1
Type: ERROR
Impact: Installation

OAB-23477: Element [0] was not found in the catalog.
Cause: (See message)
Action: Specify an existing top-level catalog element.

Level: 1
Type: ERROR
Impact: User Input

OAB-23478: Assembly archive already exists.
Cause: (See message)
Action: Use -force to override.

Level: 1
Type: ERROR
Impact: User Input

OAB-23479: Unable to locate an appropriate base image.
Cause: (See message)
Action: Ensure that appliance templates are created.

Level: 1
Type: ERROR
Impact: Files

OAB-23480: Invalid free space request [0] [1].
Cause: (See message)
Action: Correct the free space request to valid values.

Level: 1
Type: ERROR
Impact: User Input

OAB-23481: Failed to create assembly archive for [0].
Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-23482: Failed to generate assembly metadata for [0].
Cause:
Action:
OAB-23483: Specified platform {0} is not supported.

Cause:

Action:

OAB-23484: Cannot create template for {0} because it belongs to the following assemblies for which assembly archives exist: {1}.

Cause: Cannot recreate templates for a member of any assembly that has an existing assembly archive.

Action: Delete assembly archive for any assemblies that contain the specified element.

OAB-23485: {0} does not contain any appliances.

Cause: At least one appliance with file sets must exist for template creation to proceed.

Action: Specify an appliance or an assembly that contains at least one appliance.

OAB-23486: No provider could be found to handle the specified template request.

Cause: (See message)

Action: Contact Oracle support if necessary.

OAB-23487: Validator "{0}" is of unsupported type {1}.

Cause: (See message)

Action: Contact Oracle support if necessary.

OAB-23488: Cannot create an assembly archive for a nested element.

Cause: (See message)
Action: Specify a top-level assembly instead.
Level: 1
Type: ERROR
Impact: User Input

OAB-23489: Cannot create an assembly archive for an appliance or atomic assembly.
Cause: (See message)
Action: Specify a non-atomic assembly instead.
Level: 1
Type: ERROR
Impact: User Input

OAB-23490: Cannot export an assembly archive for a non-atomic assembly.
Cause: (See message)
Action: Omit the 'exportOnly' flag, or specify an atomic assembly or appliance instead.
Level: 1
Type: ERROR
Impact: User Input

OAB-23491: Cannot create an assembly archive for assembly {0}.
Cause: The assembly must have at least one Vnet defined.
Action: Define at least one Vnet for this assembly.
Level: 1
Type: ERROR
Impact: User Input

OAB-23492: Cannot create an assembly archive for assembly {0}.
Cause: The following interfaces in the assembly are not bound to any Vnet: [{0}].
Action: Ensure that all interfaces are bound to a Vnet.
Level: 1
Type: ERROR
Impact: User Input

OAB-23493: Cannot create an assembly archive for assembly {0}.
Cause: The following outputs in the assembly are not connected to any input: [{0}].
Action: Connect each output in the assembly to a suitable input.
Level: 1
Type: ERROR
Impact: User Input

OAB-23494: Delete assembly archive for any assemblies that contain the specified element, and specify "-force" option to override existing templates.
Cause:
OAB-23495: Loop device directory [0] does not exist.
Action: Contact Oracle support if necessary.

OAB-23496: There are not enough loop devices present to create a template for this appliance.
Action: Configure additional system loop devices. Contact Oracle support if necessary.

OAB-23497: Cannot create an assembly archive for assembly [0].
Action: Delete any unused Vnets or bind appliance network interfaces to unused Vnets.

OAB-24001: Unable to create directory at [0]
Action: Check the log file for more information. Contact Oracle support if necessary.
OAB-24002: Failed to mount {0}.
  Cause: (See message)
  Action: Make sure the image is valid. Contact Oracle support if necessary.
  Level: 1
  Type: ERROR
  Impact: Other

OAB-24003: Failed to umount {0}.
  Cause: (See message)
  Action: Contact Oracle support if necessary.
  Level: 1
  Type: ERROR
  Impact: Other

OAB-24004: Failed to build disk {0}.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Other

OAB-24005: Unable to locate jre.zip file at {0}.
  Cause: (See message)
  Action: Contact Oracle support if necessary.
  Level: 1
  Type: ERROR
  Impact: Other

OAB-24006: Unable to run command {0}.
  Cause: (See message)
  Action: Contact Oracle support if necessary.
  Level: 1
  Type: ERROR
  Impact: Process

OAB-24007: Appliance in atomic assembly cannot be individually used for template creation.
  Cause: (See message)
  Action: Create template for the parent atomic assembly.
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-24008: Unable to run command {0}; exit value = {1}; output = {2}
Cause:
Action:
Level: 1
Type: ERROR
Impact: Process

OAB-24101: Unable to create a file or directory at {0}
Cause: (See message)
Action: Check the log file for more information. Contact Oracle support if necessary.
Level: 1
Type: ERROR
Impact: Files

OAB-27001: Invalid template location at {0}.
Cause: (See message)
Action: Correct the error and try again.
Level: 1
Type: ERROR
Impact: Other

OAB-27002: Not a directory.
Cause:

Impact: Files

OAB-42201: Unable to find appliance or assembly {0}.
  Cause: (See message)
  Action: Make sure catalog contains specified appliance or assembly.
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-42301: Plugin {0} required by {1} is not available.
  Cause: (See message)
  Action: Install the plug-in.
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-42401: Configuration name space specification must not be null.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-42402: Name space must not contain any whitespace.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-42403: Configuration property keys must not be null.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-42404: Specified key "{0}" illegal characters.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-42405: Configuration property values must not be null.
OAB-42406: Configuration property values must not contain line separator characters.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-42407: Path "{0}" does not point to a readable directory.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-42408: Path "{0}" does not point to a readable file.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-42409: Error opening configuration file "{0}".
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Files

OAB-42410: Problem reading configuration file "{0}".
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Files

OAB-42411: Unable to make configuration directory "{0}".
  Cause:
OAB-42412: Problem writing configuration file "{0}".
Cause:
Action:

OAB-42413: Unable to delete configuration file "{0}".
Cause:
Action:

OAB-42551: "archive only" flag cannot be used for appliance {0}.
Cause: (See message)
Action: Choose an assembly, or turn off "archive only" flag.

OAB-42552: No assembly was found for name {0}.
Cause: (See message)
Action: Check your catalog and make sure named assembly exists.

OAB-42553: Assembly {0} does not have an assembly archive.
Cause: (See message)
Action: Create assembly archive before exporting.

OAB-42554: Invalid template directory found at {0}.
Cause: Catalog appears to be corrupted.
Action: Contact Oracle support if necessary.
Level: 1
Type: ERROR
Impact: Other

OAB-42555: No assembly archive found in template directory at {0}.
Cause: Catalog appears to be corrupted.
Action: Contact Oracle support if necessary.

Level: 1
Type: INCIDENT_ERROR
Impact: Other

OAB-42556: Destination directory {0} is not empty.
Cause: (See message)
Action: Clean up the directory, or choose an empty directory.

Level: 1
Type: ERROR
Impact: User Input

OAB-42557: Destination file {0} already exists.
Cause: (See message)
Action: Choose a different destination path.

Level: 1
Type: ERROR
Impact: User Input

OAB-42558: Failed to export assembly archive to {0}.
Cause: (See message)
Action: Check your log file for error message. Contact Oracle support if necessary.

Level: 1
Type: ERROR
Impact: Other

OAB-42711: Warning: A file with name {0} already exists in the archives directory.
The import operation will proceed, but the assembly archive will not be copied.
Cause: 
Action: 

Level: 1
Type: WARNING
Impact: Other

OAB-42720: The assembly archive does not contain AB.img.
Cause: 
Action: 

Level: 1
Type: ERROR
Impact: Data

OAB-42721: Catalog already contains {0} {1}.
  Cause: (See message)
  Action: Choose a different name to import as.
  Level: 1

Type: ERROR
Impact: Other

OAB-42722: The plug-in "[0]" is required but is not available.
  Cause:
  Action:
  Level: 1

Type: WARNING
Impact: Other

OAB-42723: Unable to create directory at {0}.
  Cause: (See message)
  Action: Check file permissions and attempt to manually create a directory.
  Level: 1

Type: ERROR
Impact: Files

OAB-42734: Could not mount disk image {0}.
  Cause: Mount operation failed with result "[0]".
  Action: Contact Oracle support if necessary.
  Level: 1

Type: ERROR
Impact: Files

OAB-42735: The assembly archive does not contain an assembly metadata descriptor as its first entry.
  Cause:
  Action:
  Level: 1

Type: ERROR
Impact: Data

OAB-42736: The assembly archive does not contain a disk image matching expected pattern <capture_id>[0].
  Cause: The archive is corrupted, or is not compatible with this version of Oracle Virtual Assembly Builder.
  Action: Contact Oracle Support Services if necessary.
  Level: 1
Type: ERROR
Impact: Data

OAB-42737: Import source {0} has invalid file extension.
Cause: Import source must have .ova file extension.
Action: Specify a valid archive from which to import.
Level: 1

Type: ERROR
Impact: Other

OAB-42738: No Assembly Builder metadata was extracted from the archive.
Cause: The archive is corrupted or was created by an incompatible tool.
Level: 1

Type: ERROR
Impact: Data

OAB-42739: An error occurred while attempting to import the {0} plug-in.
Cause:
Action:
Level: 1
Type: ERROR
Impact: Other

OAB-43001: Appliance does not contain sub-elements.
Cause: (See message)
Action: Specify an assembly instead.
Level: 1
Type: ERROR
Impact: Other

OAB-43002: Type of specified output did not match type of specified element.
Cause: (See message)
Action: Specify an output that belongs to the specified element.
Level: 1
Type: ERROR
Impact: Other

OAB-43003: The specified element does not belong to an assembly.
Cause: Attempted to create external resources for a top-level appliance or assembly.
Action: Add the specified element to an assembly before creating external resources.
Level: 1
Type: ERROR
Impact: Other

OAB-43004: Cannot add external resources to atomic assembly {0}.
   Cause:
   Action:
   Level: 1
   Type: ERROR
   Impact: Other

OAB-43005: The specified output {0} is already connected to another input.
   Cause: An output can only be connected to one input at a time.
   Action: Remove the existing connection or specify a different output.
   Level: 1
   Type: ERROR
   Impact: Other

OAB-43006: Cannot add external resources to assembly {0}.
   Cause: Cannot modify an assembly that has an existing assembly archive.
   Action: Delete the assembly's archive before attempting to modify the assembly.
   Level: 1
   Type: ERROR
   Impact: Other

OAB-43007: Cannot create external resource with name {0}.
   Cause: Another element with the specified name exists in the assembly.
   Action: Specify a name that does not conflict with an existing element in the assembly.
   Level: 1
   Type: ERROR
   Impact: Other

OAB-43010: Unable to create nested assembly {0}.
   Cause: Only top-level empty assemblies can be created.
   Action: Create a top-level empty assembly.
   Level: 1
   Type: ERROR
   Impact: Other

OAB-43020: Cannot add nested appliance or assembly {0}.
   Cause: Only top-level appliances or assemblies can be added to another assembly.
   Action: Specify a top-level appliance or assembly to add.
   Level: 1
   Type: ERROR
**Impact:** User Input

**OAB-43021:** Cannot add non-atomic assembly {0}.
*Cause:* Only atomic assemblies can be added to another assembly.
*Action:* Specify an atomic assembly to add.

*Level:* 1  
*Type:* ERROR  
**Impact:** User Input

**OAB-43022:** Element {0} was not found in the catalog.
*Cause:*  
*Action:*  

*Level:* 1  
*Type:* ERROR  
**Impact:** User Input

**OAB-43023:** Cannot add an element to atomic assembly {0}.
*Cause:* Only non-atomic assemblies can have elements added to them.
*Action:* Specify a non-atomic assembly to add elements to.

*Level:* 1  
*Type:* ERROR  
**Impact:** User Input

**OAB-43024:** An appliance or assembly with name {0} already exists in assembly {1}.
*Cause:* An appliance or assembly with the specified name already exists in the target assembly.
*Action:* Specify a different appliance or assembly to add.

*Level:* 1  
*Type:* ERROR  
**Impact:** User Input

**OAB-43025:** Cannot add to {0}.
*Cause:* Specified target element is not an assembly.
*Action:* Specify a valid assembly to add an element to.

*Level:* 1  
*Type:* ERROR  
**Impact:** User Input

**OAB-43026:** Cannot add to assembly {0}.
*Cause:* Cannot modify an assembly that has an existing assembly archive.
*Action:* Delete the assembly’s archive before attempting to modify the assembly.

*Level:* 1  
*Type:* ERROR  
**Impact:** User Input
OAB-43027: Cannot add an element to nested assembly [0].
    Cause: Only top-level assemblies can have elements added to them.
    Action: Specify a top-level assembly to add to.

    Level: 1
    Type: ERROR
    Impact: User Input

OAB-43028: Cannot modify a nested assembly [0].
    Cause: The specified modification can only be performed on a top-level assembly.
    Action: Specify a top-level assembly.

    Level: 1
    Type: SET_AT_RUNTIME
    Impact: User Input

OAB-43029: Cannot modify atomic assembly [0].
    Cause: The specified modification can only be performed on a non-atomic assembly.
    Action: Specify a non-atomic assembly.

    Level: 1
    Type: SET_AT_RUNTIME
    Impact: User Input

OAB-43030: Cannot modify an assembly that has an existing assembly archive.
    Cause: (See message)
    Action: Delete the assembly’s archive before attempting to modify the assembly.

    Level: 1
    Type: SET_AT_RUNTIME
    Impact: User Input

OAB-43031: Cannot modify [0].
    Cause: The specified modification can only be performed on an assembly.
    Action: Specify an assembly.

    Level: 1
    Type: SET_AT_RUNTIME
    Impact: User Input

OAB-43032: Cannot modify element [0] because it belongs to the following assemblies that have assembly archives: [1].
    Cause: Cannot modify a member of any assembly that has an assembly archive.
    Action: Delete the assembly archives for all assemblies that contain the specified element.

    Level: 1
    Type: SET_AT_RUNTIME
    Impact: User Input
OAB-43033: Cannot modify {0}.
   Cause: The specified modification can only be performed on an appliance.
   Action: Specify an appliance.
   Level: 1
   Type: SET_AT_RUNTIME
   Impact: User Input

OAB-43034: Cannot modify element {0} because its containing assembly {1} has an assembly archive.
   Cause: Cannot modify a member of an assembly that has an assembly archive.
   Action: Delete any existing assembly archives for the containing assembly.
   Level: 1
   Type: SET_AT_RUNTIME
   Impact: User Input

OAB-43035: Cannot modify {0}.
   Cause: The specified modification can only be performed on an appliance that belongs to a non-atomic assembly.
   Action: Add the appliance to a top-level assembly.
   Level: 1
   Type: SET_AT_RUNTIME
   Impact: User Input

OAB-43036: Cannot bind the file set definition.
   Cause: The existing file set {0} in appliance {1} has an identical file set root: {2}.
   Action: Check the specified file set root.
   Level: 1
   Type: ERROR
   Impact: User Input

OAB-43040: Cannot create Vnet in the specified assembly.
   Cause:
   Action:
   Level: 1
   Type: ERROR
   Impact: Other

OAB-43041: The assembly already contains a Vnet with name {0}.
   Cause: (See message)
   Action: Specify a different name for the Vnet.
   Level: 1
   Type: ERROR
   Impact: User Input
OAB-43042: Cannot delete Vnet in the specified assembly.
   Cause:
   Action:

   Level: 1
   Type: ERROR
   Impact: Other

OAB-43043: The assembly does not contain a Vnet with name {0}.
   Cause: (See message)
   Action: Specify the name of an existing Vnet.

   Level: 1
   Type: ERROR
   Impact: User Input

OAB-43044: Vnet {0} cannot be deleted because the following appliance interfaces are currently bound to it: [{1}].
   Cause: A Vnet cannot be deleted if any interfaces refer to it.
   Action: Un-bind the above interfaces before deleting the Vnet.

   Level: 1
   Type: ERROR
   Impact: User Input

OAB-43054: The interface name is reserved.
   Cause: (See message)
   Action: Choose a different interface name.

   Level: 1
   Type: ERROR
   Impact: User Input

OAB-43055: Cannot create an interface in the specified appliance.
   Cause:
   Action:

   Level: 1
   Type: ERROR
   Impact: Other

OAB-43056: The appliance already contains an interface with name {0}.
   Cause: (See message)
   Action: Specify a different name for the interface.

   Level: 1
   Type: ERROR
   Impact: User Input

OAB-43057: Cannot delete interface in the specified appliance.
OAB-43058: The appliance does not contain an interface with name {0}.

Cause: (See message)
Action: Specify the name of an existing interface.

Level: 1
Type: ERROR
Impact: User Input

OAB-43059: Interface {0} cannot be deleted because the following appliance inputs are currently bound to it: [{1}].

Cause: An interface cannot be deleted if any inputs refer to it.
Action: Un-bind the above inputs before deleting the interface.

Level: 1
Type: ERROR
Impact: User Input

OAB-43060: Cannot bind interface to Vnet.

Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-43061: Cannot bind appliance input to interface.

Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-43062: The appliance does not contain an input with name {0}.

Cause: (See message)
Action: Specify the name of an existing appliance input.

Level: 1
Type: ERROR
Impact: User Input

OAB-43063: Cannot create file set definition in the specified appliance.

Cause:
Action:
Level: 1
Type: ERROR
Impact: Other

OAB-43064: The appliance already contains a file set definition with name {0}.
Cause: (See message)
Action: Specify a different name for the file set definition.

Level: 1
Type: ERROR
Impact: User Input

OAB-43065: Cannot delete file set definition in the specified appliance.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-43066: Cannot perform operation on non-editable file set definition.
Cause:
Action:

Level: 1
Type: ERROR
Impact: User Input

OAB-43068: Cannot bind file set definition to appliance.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-43069: The appliance is already bound to file set definition {0}.
Cause:
Action:

Level: 1
Type: ERROR
Impact: User Input

OAB-43071: Cannot unbind file set definition from appliance.
Cause:
Action:
Level: 1
Type: ERROR
Impact: Other

OAB-43072: Cannot create file set definition in the specified assembly.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-43073: Assembly already has a file set definition named {0}.
Cause: (See message)
Action: Specify a different name for the new file set definition.

Level: 1
Type: ERROR
Impact: User Input

OAB-43074: Top level assembly has no file set definition named {0}.
Cause:
Action:

Level: 1
Type: ERROR
Impact: User Input

OAB-43075: Cannot delete the file set definition from {0}.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-43076: File set definition is bound to one or more appliances, including {0}.
Cause: (See message)
Action: Unbind file set definition from all appliances to which it is bound.

Level: 1
Type: ERROR
Impact: User Input

OAB-43077: The appliance {0} has previously captured file sets and/or template built.
Cause: (See message)
Action: Use -force to enable removal of existing file sets and template from the appliance.
Error Messages

Level: 1
Type: ERROR
Impact: User Input

OAB-44001: Appliance {0} does not have a template for Platform "[1]", OS "[2]."
Cause: (See message)
Action: Create a template for {0} with the required Platform and OS first.

Level: 1
Type: ERROR
Impact: Other

OAB-44002: Assembly {0} does not have a template for Platform "[1]", OS "[2]."
Cause: (See message)
Action: Create a template for {0} with the required Platform and OS first.

Level: 1
Type: ERROR
Impact: Other

OAB-44003: Assembly {0} does not contain any Vnets.
Cause: (See message)
Action: Define at least one Vnet for this assembly.

Level: 1
Type: ERROR
Impact: Other

OAB-44004: Interface {0} in appliance {1} is not bound to any Vnet.
Cause: (See message)
Action: Assign the interface to one of the assembly's available Vnets.

Level: 1
Type: ERROR
Impact: Other

OAB-44005: Error in external appliance {0} vm.cfg file
Cause: (See message)
Action: Correct the disk entry of the external appliance's vm.cfg file

Level: 1
Type: ERROR
Impact: Other

OAB-44006: Cannot generate a descriptor for an external resource.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-44007: No templates exist for the assembly {0} with Platform "(1)", OS "(2)".
Cause: (See message)
Action: Create a template for an appliance of {0} with the required Platform and OS first.
Level: 1
Type: ERROR
Impact: Other

OAB-44008: The appliance {0} has ovm-template-config version {1}, whereas appliance {2} has conflicting version {3}. OVF generation must specify a single version.
Cause: (See message)
Action: Re-template appliances using base images with matching ovm-template-config packages.
Level: 1
Type: ERROR
Impact: Other

OAB-45101: Error creating file "(0)" for storing properties.
Cause:
Action:
Level: 1
Type: ERROR
Impact: Files

OAB-45101: Script directory "(0)" is not a directory.
Cause:
Action:
Level: 1
Type: ERROR
Impact: Files

OAB-45102: Error writing properties to file "(0)".
Cause:
Action:
Level: 1
Type: ERROR
Impact: Files

OAB-45102: Script directory "(0)" is not readable.
Cause:
Action:
Level: 1
Type: ERROR
Impact: Files

OAB-45103: Error opening file "{0}" for reading properties.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Files

OAB-45103: Unable to open property file "{0}".
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Files

OAB-45104: Error reading properties from file "{0}".
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Files

OAB-45104: Variable declaration missing "{0}".
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Other

OAB-45105: Error copying plug-in file "{0}" to "{1}".
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Files

OAB-45105: Bad variable name "{0}". Variable names must match regular expression "[a-zA-Z0-9_.-]+".
  Cause:
  Action:
  Level: 1
  Type: ERROR
Impact: User Input
OAB-45106: Unable to connect to remote server with parameters host={0}, port={1}, user={2}, and key file={3}.
Cause:
Action:
Level: 1
Type: ERROR
Impact: User Input
OAB-45106: Problem encountered while reading property file "{0}".
Cause:
Action:
Level: 1
Type: ERROR
Impact: Files
OAB-45107: Unable to connect to remote server with entered password and parameters host={0}, port={1}, and user={2}.
Cause:
Action:
Level: 1
Type: ERROR
Impact: User Input
OAB-45107: Error editing property file by reading "{0}" and writing to "{1}".
Cause:
Action:
Level: 1
Type: ERROR
Impact: Files
OAB-45108: Error closing connection.
Cause:
Action:
Level: 1
Type: ERROR
Impact: Network
OAB-45108: Error parsing property file {0} at line {1}: {2}
Cause:
Action:
Level: 1
Type: ERROR
Impact: User Input

OAB-45109: Unable to locate the standard temporary directory within the AB_INSTANCE.

Cause:
Action:
Level: 1
Type: ERROR
Impact: Files

OAB-45109: Script "(0)" already exists in phase directory "(1)"

Cause:
Action:
Level: 1
Type: ERROR
Impact: User Input

OAB-45110: Error creating a temporary file in the standard temporary directory.

Cause:
Action:
Level: 1
Type: ERROR
Impact: Files

OAB-45110: Error adding script: "(0)" does not exist.

Cause:
Action:
Level: 1
Type: ERROR
Impact: Files

OAB-45111: Error creating a temporary directory at path "(0)".

Cause:
Action:
Level: 1
Type: ERROR
Impact: Files

OAB-45111: Error adding script: "(0)" is not a file.

Cause:
Action:
Level: 1
Type: ERROR
Impact: Files
OAB-45112: Error copying plug-in configuration file from remote directory "{0}" to local directory "{1}".

Cause:

Action:

Level: 1
Type: ERROR
Impact: Files

OAB-45112: Cannot read script file "{0}".

Cause:

Action:

Level: 1
Type: ERROR
Impact: Files

OAB-45113: Error copying remote file "{0}" to local directory "{1}".

Cause:

Action:

Level: 1
Type: ERROR

  Action:
  Level: 1
  Type: ERROR
  Impact: Files

OAB-45121: Error attempting to backup directory by renaming {0} to {1}. 
OAB-45121: Invalid property key "{0}" found in property file for endpoint "{1}".
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Files

OAB-45122: Unable to install plug-in "{0}" because parent plug-in "{1}" is not installed.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Other

OAB-45122: Missing required property "{0}" in property file for endpoint "{1}".
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-45123: Unable to create one or more directories in the following path: {0}
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Files

OAB-45123: Value supplied for key "{0}" is not in encrypted form.
  Cause: (See message)
  Action: Generate encrypted values by executing 'abctl encryptProperties' from the current AB_INSTANCE.
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-45124: Unable to add property named "{0}" as it already exists in the appliance.
OAB-45126: The path "{0}" does not exist or is not a directory.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-45129: Error occurred while reading contents of directory "{0}".
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Files

OAB-45130: Unknown error attempting to remove plug-in directory "{0}".
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Other

OAB-45134: The plug-in configuration file "{0}" does not exist.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Files

  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Other

OAB-45136: Error patching GenericProd plug-in.
  Cause:
  Action:
Level: 1
Type: ERROR
Impact: Other

OAB-45201: Error preparing the catalog for introspection.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-45205: Unable to create introspection named "{(0)}".
Cause: An assembly or appliance with that name already exists.
Action: Use "-force" to overwrite.

Level: 1
Type: ERROR
Impact: User Input

OAB-45210: Error initializing the remote connection
Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-45211: Error initializing local execution context.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-45220: Interrupted during introspection execution.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-45221: Introspection failed.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-45230: Packaging failed.
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Other

OAB-45231: Cannot capture file sets for assembly \{0\} because it contains appliances with non-uniform file set definitions.
  Cause: The assembly members are divided into \{0\} groups, each of which shares file set definitions: \{1\}.
  Action: Capture file sets individually for one member of each of the above groups.
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-45232: Cannot capture file sets for \{0\} because it belongs to the following assemblies that have assembly archives: \{1\}.
  Cause: Cannot capture file sets for a member of any assembly that has an assembly archive.
  Action: Delete the assembly archives for all assemblies that contain the specified element.
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-45233: Cannot capture file sets for external appliance \{0\}.
  Cause: (See message)
  Action: Make sure that the appliance you are trying to capture file sets for is not an external appliance.
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-45234: Cannot capture file sets for external resource \{0\}.
  Cause: (See message)
  Action: Make sure that the appliance you are trying to capture file sets for is not an external resource.
  Level: 1
  Type: ERROR
  Impact: User Input

OAB-45235: File sets have already been captured for \{0\}.
Cause: (See message)
Action: Use -force to override.

Level: 1
Type: ERROR
Impact: Network

**OAB-90008: Unable to read Ping from remote side.**

Cause: The remote process may be running while its directory has been deleted.
Action: Verify the remote process is down on the remote machine.

Level: 1
Type: ERROR
Impact: Network

**OAB-90009: Unable to start the remote process.**

Cause: Error in starting process.
Action: See AB_INSTANCE/assemblybuilder.log for more information.

Level: 1
Type: ERROR
Impact: Process

**OAB-90021: Error in unzip of OVAB on remote machine. Exit code 0.**

Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-90042: Error in killing remote process. Response from kill -9 was {0}
Cause:
Action:

Level: 1
Type: ERROR
Impact: Process

OAB-90050: Thread interrupted, thread is continuing.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-90055: Error initializing the remote connection
Cause:
Action:

Level: 1
Type: ERROR
Impact: Network

OAB-90061: Unable to create connection to remote server.
Cause: Timed out trying to connect to IPV4 and IPV6 sockets. Remote process is not up or there are network connection issues.
Action: Verify port forwarding is enabled on remote machine. If sudoUser option is used, verify the remote user has sudo permissions.

Level: 1
Type: ERROR
Impact: Network

OAB-90102: Unable to obtain socket on address:port {0}:{1}.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Network

OAB-90204: Unable to initialize RemoteExecutionContext. Remote agent will be shut down.
Cause:
OAB-90207: Logging error detected during shutdown of remote assemblybuilder. Shutdown of connection will continue.

OAB-90208: Unable to process Method request. Exception will be logged here and sent to caller.

OAB-90209: Method parameters are incompatible with method:

OAB-90210: Exception thrown by method, {0}. Cause will be sent back to other side.

OAB-90211: Unable to invoke inaccessible method, {0}. Cause will be sent back to other side.

OAB-90213: Remote AssemblyBuilder agent could not be shut down. Connection to agent will be closed anyway.
OAB-90214: Unable to get AbHome from configuration. No directories will be checksummed.

OAB-90250: Unable to process request with unrecognized method name: {0}

OAB-90251: Packaged appliance {0} still has old packageId {1}. None of its files will be copied from remote side.

OAB-90252: Ping object {0} cannot be processed. The ping listener is not available.

OAB-90253: Unable to process object {0}. Object type is not recognized.

OAB-90254: Unable to process null object read from stream. Object will be ignored.
OAB-95526: Appliance {0}'s CaptureId cannot be null.
Caused by:
Action:

**Impact:** Deployment

**OAB-111490:** Error occurred while reconfiguring or getting the network for the appliance instance %s. Error is: %s

**Cause:**  
**Action:**

**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

**OAB-111491:** Error occurred while reconfiguring or getting the network for the appliance instance %s.

**Cause:**  
**Action:**

**Level:** 1  
**Type:** ERROR
Impact: Deployment

OAB-111492: Failed to configure the vNets on the appliance instance %s
Cause: Specified appliance instance did not receive vNet configured message in %d seconds
Action: Check to see if the appliance instance is reachable by SSH. If not, check and correct your vNet configuration and retry. For static IP networking, check gateway, netmask, DNS settings and IP address settings in the deployment plan. For DHCP networking, check your network router to insure DHCP is enabled and addresses are available for lease. If the appliance is reachable by SSH, then check the log files in /assemblybuilder and the instance home for errors that may have occurred during rehydration. If all seems well, the phone home timeout may need to be increased.

Level: 1
Type: ERROR
Impact: Deployment

OAB-111493: Appliance instance %s reported an error while configuring the network interfaces: %s
Cause: One or more required network interface configuration parameters was missing or incorrect
Action: Ensure that all required network interface configuration parameters were specified. Check assemblybuilder.log file and ab.out files on the appliance for details

Level: 1

   Type: ERROR
   Impact: Deployment

OAB-112124: Cannot deploy the assembly %s:%s. It is not registered with the resource pool %s
   Cause: The specified assembly is not registered with the specified resource pool
   Action: Register the assembly and try again
   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-112125: [Registration Request: %s] %s operation on the assembly %s:%s with the target %s - Successful
   Cause: 
   Action: 
   Level: 1
   Type: NOTIFICATION
   Impact: Deployment

OAB-112126: [Registration Request: %s] %s operation on the assembly %s:%s with the target %s - Failed. Error is: %s
   Cause: 
   Action: 
   Level: 1
   Type: WARNING
   Impact: Deployment

OAB-112127: Appliance instance %s in the assembly instance %s cannot be suspended. It is in %s state.
   Cause: Specified appliance instance is in the state that is invalid for transitioning to suspend state
   Action: Check the appliance instance state
Level: 1
Type: ERROR
Impact: Deployment

OAB-112128: Appliance instance %s in the assembly instance %s cannot be resumed. It is in %s state.
Cause: Specified appliance instance is in the state that is invalid for transitioning to resume state
Action: Check the appliance instance state

Level: 1
Type: ERROR
Impact: Deployment

OAB-112129: Error while validating assembly instance %s in list assembly instances operation
Cause: Resource pool may be unavailable
Action: Check the resource pool status in target specific manager

Level: 1
Type: ERROR
Impact: Deployment

OAB-112130: Error occurred while unregistering the assembly %s:%s from the resource pool %s:%s. Error is %s.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112131: Cannot delete assembly %s for the versions %s
Cause: The specified assembly versions are currently registered
Action: Unregister the specified versions and try again

Level: 1
Type: ERROR
Impact: Deployment

OAB-112132: Assembly %s:%s has already been registered with the resource pool %s
Cause: A given assembly cannot be registered more than once with a given resource pool
Action: Try it with a different assembly name and/or different version

Level: 1
Type: ERROR
Impact: Deployment
OAB-112133: Cannot unregister the assembly %s:%s from the resource pool %s. It has assembly instances %s

Cause: It cannot be unregistered when there are assembly instances
Action: Delete the specified assembly instances prior to attempting to unregister the assembly

Level: 1
Type: ERROR
Impact: Deployment

OAB-112134: The assembly %s isn't registered with the target %s. Nothing to do

Cause: The supplied assembly isn't registered with the supplied target
Action: Try it with a different assembly

Level: 1
Type: ERROR
Impact: Deployment

OAB-112135: Cannot acquire lock on the assembly %s:%s

Cause: The specified assembly is currently in use by some other operation
Action: Try the operation when it is unlocked

Level: 1
Type: ERROR
Impact: Deployment

OAB-112136: Error occurred while initiating registration request for assembly %s

Cause:
Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112137: The assembly %s:%s isn't registered with the target %s. Nothing to do

Cause: The supplied assembly isn't registered with the supplied target
Action: Try it with a different assembly name and/or different version

Level: 1
Type: ERROR
Impact: Deployment

OAB-112138: Cannot find property named component for the appliance instance %s

Cause: Incorrect generation of the assembly metadata
Action: Generate the assembly metadata properly or contact Oracle customer support

Level: 1
Type: ERROR
Impact: Deployment
OAB-112139: Cannot resolve hostname for the appliance instance %s
  Cause: Eth0 interface is configured for static but it does not define ip_address property
  Action: Check the assembly instance plan and fix the above mentioned problem
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-112140: Target user must be specified
  Cause: Supplied target user is either null or empty
  Action: Supply non-null and non-empty string
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-112141: Invalid request id %s
  Cause: No request exists for the supplied request id
  Action: Supply a valid request id
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-112142: Invalid time lived seconds parameter
  Cause: Supplied parameter value is non-positive integer
  Action: Supply a positive integer value
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-112143: Cannot delete target %s:%s
  Cause: The specified target is in use. It has registered assemblies or assembly instances
  Action: Make sure the supplied target does not have registered assemblies or deployed assemblies
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-112144: Phone home request timed out for the phonehome type %s uid %s
  Cause: A phone home call from the deployed VM was not received in %d seconds
  Action: Check to see if the appliance instance is reachable by SSH. If not, check and correct your vNet configuration and retry. For static IP networking, check gateway, netmask, DNS settings and IP address settings in the deployment plan. For DHCP networking, check your network router to insure DHCP is enabled and addresses are available for lease. If the appliance is reachable by SSH, then check the log files in /assemblybuilder and the instance home for errors that may have
occurred during rehydration. If all seems well, the phone home timeout may need to be increased.

Level: 1
Type: ERROR
Impact: Deployment

OAB-112145: [Registration Request: %s] %s operation for the assembly %s:%s with the target %s - Initiated
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112146: Registration identifier must be provided
Cause: Supplied registration identifier is either null or empty
Action: Supply non-null and non-empty string
Level: 1
Type: ERROR
Impact: Deployment

OAB-112147: Invalid assembly instance identifiers: %s
Cause: Above assembly instance identifiers does not exist in the system
Action: Supply valid assembly instance identifiers
Level: 1
Type: ERROR
Impact: Deployment

OAB-112148: Error occurred while loading version file. Error is %s
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112149: Oracle Assembly Builder Deployer Specification Version: %s
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112150: Oracle Assembly Builder Deployer Implementation Version: %s
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment
OAB-112151: Java VM Info: %s (build %s, %s)
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment
OAB-112152: Java Runtime Info: %s (build %s)
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment
OAB-112153: Cannot find disk with the name %s
Cause: Specified disk does not have disk configuration in the assembly metadata
Action: Fix the assembly metadata and try again
Level: 1
Type: ERROR
Impact: Deployment
OAB-112154: Received empty or null hostname from the appliance %s
Cause: Look at the assemblybuilder.log file and ab.out file on the appliance
Action: Look at the assemblybuilder.log file and ab.out file on the appliance to take the appropriate action
Level: 1
Type: ERROR
Impact: Deployment
OAB-112155: Error occurred while creating the assembly instance for the assembly %s:%s for the target %s. Error is %s
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment
OAB-112156: Error occurred while deleting the assembly instance %s. Error is: %s
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112157: Invalid appliance %s. It must contain at least one vNet
Cause: The specified appliance does not have any vNets configured
Action: Fix the assembly metadata and try again

Level: 1
Type: ERROR
Impact: Deployment

OAB-112158: Removing appliance %s
Cause:
Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112159: Successfully removed appliance %s
Cause:
Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112160: Appliance %s is a black box appliance. Not configuring vNet on the appliance
Cause:
Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112161: Cannot add or delete tags to the appliance instance %s. Specified appliance instance is in FAILED state
Cause: The specified appliance instance is in FAILED state
Action: Supply a valid appliance instance identifier

Level: 1
Type: ERROR
Impact: Deployment

OAB-112162: Cannot add or delete tags to the appliance instance %s. The assembly instance object for the specified appliance instance is in FAILED stage
Cause: The assembly instance object for the specified appliance instance is in FAILED stage
Action: Supply a valid appliance instance identifier
Level: 1
Type: ERROR
Impact: Deployment

OAB-112163: Error occurred while adding or deleting the tags to the appliance instance %s. Error is %s
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112164: Registration identifier must be provided
Cause: Supplied registration identifier is either null or empty string
Action: Supply non-null and non-empty string
Level: 1
Type: ERROR
Impact: Deployment

OAB-112165: Invalid Registration identifier
Cause: Registration with the supplied registration identifier does not exist
Action: Supply a valid registration identifier
Level: 1
Type: ERROR
Impact: Deployment

OAB-112166: Member identifier must be provided
Cause: Supplied member id is either null or empty string
Action: Supply non-null and non-empty string
Level: 1
Type: ERROR
Impact: Deployment

OAB-112167: Cannot find the registered assembly for the appliance %s
Cause: Supplied appliance is invalid
Action: Supply a valid appliance
Level: 1
Type: ERROR
Impact: Deployment

OAB-112168: Invalid resource identifiers: %s
**OAB-112169: Invalid resource identifier: %s**

**Cause:** The above specified id is not an appliance instance id, registration id or assembly archive name

**Action:** Specify a valid registration id, appliance instance id or assembly archive name

**Level:** 1

**Type:** ERROR

**Impact:** Deployment

**OAB-112170: Address for the vNet %s for the appliance instance %s was not reserved**

**Cause:** An error encountered while reserving the address

**Action:** Look at the target environment log files

**Level:** 1

**Type:** ERROR

**Impact:** Deployment

**OAB-112171: Cannot find static address for the vNet %s for the appliance instance %s**

**Cause:** Assembly instance plan does not contain address for the specified appliance instance

**Action:** Provide address in the assembly instance plan

**Level:** 1

**Type:** ERROR

**Impact:** Deployment

**OAB-112172: Cannot reserve address for the vNet %s for the appliance instance %s**

**Cause:** Look at the target environment log files for the possible root causes

**Action:** Look at the target environment log files and take appropriate action

**Level:** 1

**Type:** ERROR

**Impact:** Deployment

**OAB-112173: Error occurred while getting file source %s. Error is %s**

**Cause:**

**Action:**

**Level:** 1

**Type:** ERROR
Impact: Deployment

OAB-112174: Cleanup operation on the process %s failed. Error is %s
    Cause:
    Action:
    Level: 1
    Type: ERROR
    Impact: Deployment

OAB-112175: Cleanup operation on the process %s timed out after %s seconds
    Cause: Look at the target environment log files for the possible root causes or timeout value is too short for this operation
    Action: Look at the target environment log files and take appropriate action or increase the timeout value
    Level: 1
    Type: ERROR
    Impact: Deployment

OAB-112176: Process %s is in the invalid state %s for the destroy operation.
    Cause: Specified process is currently not in PoweredOff state. It might have been updated using target specific manager
    Action: Delete the assembly instance and deploy again
    Level: 1
    Type: ERROR
    Impact: Deployment

OAB-112177: No process plan found with id %s
    Cause: Internal Error
    Action: Contact customer support
    Level: 1
    Type: ERROR
    Impact: Deployment

OAB-112178: Error occurred while setting the state %s to the appliance %s. Error is %s
    Cause:
    Action:
    Level: 1
    Type: ERROR
    Impact: Deployment

OAB-112179: Error occurred while setting the state %s to the appliance instance %s.
    Error is %s
    Cause:
    Action:
OAB-112180: Error occurred while setting the state %s to the assembly instance %s.
   Error is %s
   Cause:
   Action:

OAB-112181: Error occurred while cloning the appliance %s
   Cause: Internal Error
   Action: Contact Oracle customer support

Cause:
Action:

OAB-112201: The assembly path is invalid: %s
Cause: A path representing an assembly element does not exist in the assembly metadata.
Action: Specify a valid path.

OAB-112202: The assembly metadata envelope argument is not set.
Cause:
Action:

OAB-112203: The assembly metadata envelope has no content
Cause:
Action:

OAB-112204: The content in the assembly metadata envelope has an unknown type: %s
Cause:
OAB-112205: The assembly metadata envelope contains a virtual system that has no id.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112206: There is no content in the assembly metadata associated with the specified path: %s
Cause:
Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112207: There assembly metadata element %s has no property named %s.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112208: The property key is not set.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112209: The assembly metadata contains an unknown resource type: %s
Cause:
Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112210: The value %s cannot be converted to %s.
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112211: The property type was not specified
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112212: Value %s is not of type %s
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112213: The requested value is not of type %s
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112214: The instance number %d does not exist for %s.
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112215: The property type %s is not a supported type.
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112216: Cannot find appliance for the virtual system identifier %s
Cause: Contact Oracle customer support
Action: Contact Oracle customer support
Level: 1
Type: ERROR
Impact: Deployment

OAB-112217: The appliance path is invalid: %s
   Cause:
   Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112218: The appliance property %s for appliance %s is invalid
   Cause:
   Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112219: Min for path %s cannot be set to a value smaller than %d. The plan value is %d.
   Cause:
   Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112220: Max for path %s cannot be set to a value larger than %d. The plan value is %d.
   Cause:
   Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112221: The instance count for path %s cannot be set to a value smaller than %d. The plan value is %d.
   Cause:
   Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112222: The instance count for path %s cannot be set to a value larger than %d. The plan value is %d.
   Cause:
OAB-112223: OVA was not created by OVAB

OAB-112224: The network property %s for appliance %s must be set when usedhcp is false.

OAB-112225: Could not validate the network properties for appliance %s.

OAB-112226: Plan has overrides for unused network definitions: %s

OAB-112227: Error occurred while validating virtual interface definitions: %s

OAB-112228: The name for the virtual interface on eth%d with index %d is not set for %s
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112229: The ip address for the virtual interface on eth%d with index %d is not set for %s
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112230: The required property %s for appliance path %s is unset.
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112231: The property %s for appliance path %s is not a legal address string: %s
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112232: The property %s for appliance path %s has a value that is not a legal address string: %s
Cause:
Action:
Level: 1

OAB-112443: Cannot remove assembly archive {0} because it is currently in use.
  Cause:
  Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112603: Assembly does not exist at path: {0}
  Cause: An assembly file specified does not exist.
  Action: Please specify an existing assembly archive file.

Level: 1
Type: ERROR
Impact: Deployment

OAB-112604: File specified by -fileName does not end in .ova: {0}
  Cause: An assembly file specified does not end in .ova format.
  Action: Please specify an assembly archive file ending in .ova format.

Level: 1
Type: ERROR
Impact: Deployment

OAB-112787: Authentication required. Please provide valid credentials and ensure you are specifying a secure connection with the -connectionName parameter.
  Cause:
  Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112788: Authorization required. Please provide valid credentials and ensure you are specifying a secure connection with the -connectionName parameter. Also ensure that you are authorized to access the resource.
  Cause:
  Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112789: The deployer web service could not be found at: {0}. Please ensure the web service is deployed and started
Cause:
Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112801: No Action parameter in HTTP request query string
Cause: No Action parameter in HTTP request query string
Action: Provide a valid Action parameter in HTTP request query string

Level: 1
Type: ERROR
Impact: Deployment

OAB-112802: Invalid Action %s
Cause: Requested Action is invalid.
Action: See WebService API documentation for list of valid actions.

Level: 1
Type: ERROR
Impact: Deployment

OAB-112803: Invalid Action '%s' for HTTP GET request
Cause: Invalid Action for the HTTP GET request
Action: Provide a valid Action parameter in HTTP GET request query string

Level: 1
Type: ERROR
Impact: Deployment

OAB-112804: Invalid Action %s for HTTP POST request
Cause: Invalid Action for the HTTP POST request
Action: Provide a valid Action parameter in HTTP POST request query string

Level: 1
Type: ERROR
Impact: Deployment

OAB-112805: Invalid HTTP method %s
Cause: HTTP method in request is not allowed
Action: Provide a valid HTTP method in request

Level: 1
Type: ERROR
Impact: Deployment

OAB-112806: Required parameter '%s' not provided for the action '%s'
Cause: Required parameter not provided for the specified action
Action: Provide the required parameter for the specified action
Level: 1

Type: ERROR
Impact: Deployment

OAB-112807: Parameter '%s' does not have a valid boolean value, received '%s'
Cause: Specified parameter does not have a valid boolean value
Action: Valid values for a boolean parameter are: true,false (case ignored)
Level: 1

Type: NOTIFICATION
Impact: Deployment

OAB-112849: Deployer service internal error
Cause: Unexpected error in deployer service
Action: See deployer service log
Level: 1

Cause: 
Action: 
Level: 1

Type: NOTIFICATION
Impact: Deployment
OAB-112861: Deployer web-service internal error when marshalling the result object. Error is: %s
  Cause:
  Action:
  Level: 1
  Type: NOTIFICATION
  Impact: Deployment

OAB-112862: Admin service returned null object for action '%s'
  Cause:
  Action:
  Level: 1
  Type: NOTIFICATION
  Impact: Deployment

OAB-112870: User error. Error is: %s
  Cause:
  Action:
  Level: 1
  Type: NOTIFICATION
  Impact: Deployment

OAB-112871: Service internal error. Error is: %s
  Cause:
  Action:
  Level: 1
  Type: NOTIFICATION
  Impact: Deployment

OAB-112872: Service unexpected internal error. Error is: %s
  Cause:
  Action:
  Level: 1
  Type: NOTIFICATION
  Impact: Deployment

OAB-112890: Deployer download service initialized with url %s
  Cause:
  Action:
  Level: 1
  Type: NOTIFICATION
  Impact: Deployment

OAB-112891: Added file to the download registry with path %s
OAB-112892: Removed file from the download registry with path %s
  Cause:
  Action:
  Level: 1
  Type: NOTIFICATION
  Impact: Deployment

OAB-112893: Unsupported JVM detected, OAB Deployer must run on Sun Microsystems JVM
  Cause:
  Action:
  Level: 1
  Type: NOTIFICATION
  Impact: Deployment

OAB-112900: Parameter '%s' does not have a valid long value, received '%s'
  Cause: Specified parameter does not have a valid long value
  Action: Please make sure the specified parameter has a valid long value
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-112901: Parameter event.type does not have a valid value, received '%s'
  Cause: Specified parameter does not have a valid value
  Action: Valid values for event.type parameter is VM
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-112901: Configuration for the deployer admin is not set
  Cause: The installation of the deployer did not properly set the configuration
  Action: Install the deployer with configuration settings
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-112902: Failed to close a resource. Error: %s
  Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-112902: FileStoreService is not available
Cause: The deployer is installed in a system without a FileStoreService
Action: Ensure that classes for the FileStoreService are installed in the system

Level: 1
Type: ERROR
Impact: Deployment

OAB-112903: Failed to open a resource file %s
Cause:
Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112903: Target name is not set
Cause: The request did not include a value for the target name
Action: Set the target name when invoking this operation

Level: 1
Type: ERROR
Impact: Deployment

OAB-112904: Parameter '%s' does not have a valid value to be decoded, received '%s'
Cause:
Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112904: Target type is not set
Cause: The request did not include a value for the target type
Action: Set the target type when invoking this operation

Level: 1
Type: ERROR
Impact: Deployment

OAB-112905: Target properties is not set
Cause: The request did not include a value for the target properties
Action: Set the target properties when invoking this operation
Level: 1
Type: ERROR
Impact: Deployment

OAB-112906: Target %s already exists
Cause: A request to CreateTarget specified a target name that already exists
Action: Choose a different target name for the new target

Level: 1
Type: ERROR
Impact: Deployment

OAB-112907: User name is not set
Cause: The request did not include a value for the user name
Action: Set the user name when invoking this operation

Level: 1
Type: ERROR
Impact: Deployment

OAB-112908: User properties is not set
Cause: The request did not include a value for the user properties
Action: Set the user properties when invoking this operation

Level: 1
Type: ERROR
Impact: Deployment

OAB-112909: There is no target named %s
Cause: A non-existent target was specified for an operation.
Action: Use a valid target name when performing the operation.

Level: 1
Type: ERROR
Impact: Deployment

OAB-112910: The OVAB Deployer config MXBean
Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Deployment

OAB-112910: User list is not set
Cause: The request did not include a value for the user list
Action: Set the user list when invoking this operation

Level: 1
Type: ERROR
Impact: Deployment

OAB-112911: Set the web server url in the OVAB deployer

Cause:

Action:

Level: 1

Type: NOTIFICATION

Impact: Deployment

OAB-112911: The user %s is not registered for target %s

Cause: The user must be registered for the target in order to perform the operation

Action: Register the user with the target

Level: 1

Type: ERROR

Impact: Deployment

OAB-112912: Retrieve the web server url from OVAB deployer

Cause:

Action:

Level: 1

Type: NOTIFICATION

Impact: Deployment

OAB-112912: Target information for user %s is not available for target %s

Cause: There is no target information configured for the user on the target

Action: Configure target information for the user

Level: 1

Type: ERROR

Impact: Deployment

OAB-112913: Cannot initialize the Ovab Deployer MBean [0]

Cause:

Action:

Level: 1

Type: ERROR

Impact: Deployment

OAB-112913: The target type %s is not one of %s

Cause: An invalid target type was specified in the request

Action: Specify a valid target type

Level: 1

Type: ERROR

Impact: Deployment
OAB-112914: Fail to register the Ovab Deployer MBean {0}
   Cause:
   Action:
   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-112914: Request for %s did not include all required properties. Required Properties are %s
   Cause: The request did not include all required properties
   Action: Specify all required properties in the request
   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-112915: Fail to unregister the Ovab Deployer MBean {0}
   Cause:
   Action:
   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-112915: Invalid value for the property %s: %s
   Cause: The value for the specified property must be a numeric value
   Action: Specify a numeric value
   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-112917: Invalid or unspecified assembly name(s)
   Cause: The request did not include a value for the assembly name or names
   Action: Set the assembly name or names when invoking this operation
   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-112918: Assembly list is not set
   Cause: The request did not include a value for the assembly list
   Action: Set the user list when invoking this operation
   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-112921: Access Denied: User %s unable to access %s
Cause: The user does not have access to the resource
Action: Grant access to the user for the resource

Level: 1
Type: ERROR
Impact: Deployment

OAB-112922: Target %s is in use.
Cause: The operation against the target configuration cannot be performed because the target is in use.
Action: Undeploy any assembly instances for the target and unregister any assemblies registered for the target.

Level: 1
Type: ERROR
Impact: Deployment

OAB-112923: Access Denied: user %s does not have access to this operation.
Cause: The user is not allowed to perform this operation
Action: Connect with a user identity having the proper privileges.

Level: 1
Type: ERROR
Impact: Deployment

OAB-112924: There is no appliance with id %s
Cause: The request indicated an appliance id that does not exist
Action: Specify a valid appliance id.

Level: 1
Type: ERROR
Impact: Deployment

OAB-112925: Request for %s included invalid properties: %s. Valid properties are %s.
Cause: The request included invalid properties
Action: Specify only valid properties in the request

Level: 1
Type: ERROR
Impact: Deployment

OAB-112926: Deployer not initialized
Cause: The deployer subsystem is not yet initialized
Action: Check deployer log for initialization failures

Level: 1
Type: ERROR
Impact: Deployment
OAB-112927: This is an ExaLogic OVAB Deployer
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-112928: This is a generic OVAB Deployer
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-112929: Failed to initialize ExaLogic connection configuration: %s
  Cause: An error occurred while reading the ExaLogic configuration
  Action: See underlying exception to determine the reason for failure.
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-112930: No such target: %s
  Cause: The target specified does not exist
  Action: Specify a valid target
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-112931: Reading properties from %s
  Cause:
  Action:
  Level: 1
  Type: NOTIFICATION
  Impact: Deployment

OAB-112932: No properties file at %s
  Cause:
  Action:
  Level: 1
  Type: WARNING
  Impact: Deployment

OAB-112933: Configuration is not initialized
  Cause:
Action:
Level: 1
Type: WARNING
Impact: Deployment

OAB-112934: Operation not allowed for ExaLogic: %s. Target configuration for Exalogic is performed at installation time.
Cause: On Exalogic systems, the target configuration is defined at installation time and may not be changed.
Action: None. Dynamic configuration of targets is not necessary on Exalogic systems.

Level: 1
Type: ERROR
Impact: Deployment

OAB-112935: Dynamic creation of ExaLogic targets is not allowed.
Cause: An attempt was made to dynamically create an ExaLogic target
Action: None. Exalogic targets are defined at install time.

Level: 1
Type: ERROR
Impact: Deployment

OAB-112936: OVAB Directory is %s
Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Deployment

OAB-112937: OVAB Assembly Directory is %s
Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Deployment

OAB-112938: OVAB State Directory is %s
Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Deployment

OAB-112939: OVAB Configuration Directory is %s
Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Deployment

OAB-112940: A failure occurred while attempting to lock a resource

Cause:

Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112941: %s is not set in the configuration.

Cause:

Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112942: Version file does not exist at %s

Cause:

Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112943: Version file at %s is unreadable.

Cause:

Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-112944: User %s already exists for the target %s

Cause: The specified user already exists for the specified target

Action: Use another user name

Level: 1
Type: ERROR
Impact: Deployment

OAB-112945: Users %s does not exist in the target %s

Cause: The specified users does not exist in the specified target

Action: Fix the users list and try again
OAB-112946: Invalid VMM Version: %s. Supported version(s): %s

Cause:

Action:

OAB-112947: User properties not allowed for target %s which is type %s

Cause: The target specified does not allow user properties.

Action: Do not specify user properties when adding user to target

OAB-112948: Storage targets %s are invalid.

Cause: The specified storage targets does not exist in the system

Action: Specify a valid storage target or configure the specified storage targets

OAB-112949: Storage target %s is in use by the targets %s. It cannot be deleted

Cause: Specified target is in use.

Action: Perform this operation when it is not in use.

OAB-112950: Specified target %s cannot be set as a default target because it is not a deployment target.

Cause: Specified target is not a deployment target and cannot be used as a default deployment target.

Action: Specify a deployment target to be used by default instead.

OAB-112951: Cannot connect to the target %s using specified connection properties.

Cause: Specified target connection properties are invalid, the target is down, or secure connection cannot be established because of deployer or target SSL configuration.
**Action:** Make sure the target connection properties are valid, the target is running and that deployer and target SSL configurations would allow for secure connection.

**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

**OAB-112952: OVAB Deployer app is not yet fully initialized.**  
**Cause:** The ovab.directory required to fully initialize the deployer app is not yet set.  
**Action:** Please set ovab.directory through OVAB deployer MBean.

**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

**OAB-112953: Value of %s is too small: %s**  
**Cause:** The property value was set to 0 or a negative number  
**Action:** Please set property to value greater than 0

**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

**OAB-113001: Request Handler {0} - registered**  
**Cause:**  
**Action:**

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Deployment

**OAB-113002: Request Handler {0} - unregistered**  
**Cause:**  
**Action:**

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Deployment

**OAB-113003: Request {0} is cancelled**  
**Cause:** Either user cancelled the specified request or it has been cancelled due to an error occurred  
**Action:** See log files for more details

**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

**OAB-113004: Request {0} is cancelled due to the error: {1}**
Cause: See the error specified in the message
Action: Check the log files and reinitiate the request if necessary
Level: 1
Type: ERROR
Impact: Deployment

OAB-113005: Cancelling the request due to repartitioning
Cause:
Action:
Level: 1
Type: WARNING
Impact: Deployment

OAB-113101: Assembly name is not set
Cause: An operation requiring the assembly name was invoked without specifying the assembly name
Action: Specify the assembly name when invoking this operation
Level: 1
Type: ERROR
Impact: Deployment

OAB-113102: Assembly archive source is not set
Cause: An operation requiring the assembly archive source was invoked without specifying the assembly source
Action: Provide the assembly source when invoking this operation
Level: 1
Type: ERROR
Impact: Deployment

OAB-113103: Assembly deployer storage not initialized
Cause: A deployer operation was invoked before the system was initialized
Action: Ensure the system is initialized
Level: 1
Type: ERROR
Impact: Deployment

OAB-113104: Assembly version is not set
Cause: An operation requiring the assembly version was invoked without specifying the assembly version
Action: Specify the assembly version when invoking this operation
Level: 1
Type: ERROR
Impact: Deployment
OAB-113105: Assembly description is not set  
**Cause:** An operation requiring the assembly description was invoked without specifying the assembly description  
**Action:** Specify the assembly description when invoking this operation  
**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

OAB-113106: Assembly name is not set with version  
**Cause:** You must set the assembly name when the assembly version is specified.  
**Action:** Specify name and version, name alone or neither name nor version, but do not specify version alone.  
**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

OAB-113107: No resources given in request  
**Cause:** The request requires one or more resource identifiers  
**Action:** Specify a resource identifier in the request  
**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

OAB-113108: No tags given in request  
**Cause:** The request requires one or more tag settings  
**Action:** Specify a tag setting in the request  
**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

OAB-113109: No resource given in request  
**Cause:** The request requires a resource id  
**Action:** Specify a resource identifier in the request  
**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

OAB-113110: One or more tags are missing values  
**Cause:** A tag must have a name and value  
**Action:** Specify values for all tags  
**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment
OAB-113111: Unable to connect to target %s.
Cause: The deployer was not able to connect to the target.
Action: Ensure target configuration is valid and the target is accessible from the deployer.
Level: 1
Type: ERROR
Impact: Deployment

OAB-113112: Assembly instance %s does not exist.
Cause: A request was made for an assembly instance that does not exist
Action: Specify a valid assembly instance id for this operation
Level: 1
Type: ERROR
Impact: Deployment

OAB-113113: The configuration for target %s is not valid.
Cause: An error occurred while trying to interact with the target due to invalid configuration settings
Action: Review the target configuration and ensure it is consistent with the target setup
Level: 1
Type: ERROR
Impact: Deployment

OAB-113114: Plan name is not set
Cause: An operation requiring the plan name was invoked without specifying the plan name
Action: Specify the plan name when invoking this operation

  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114842: Plan name must be specified
  Cause: Supplied plan name is either null or empty string
  Action: Supply non-null and non-empty string
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114843: Plan stream must be specified
  Cause: Supplied plan stream is null
  Action: Supply non-null stream
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114844: Resources stream must be specified
  Cause: Supplied resources stream is null
  Action: Supply non-null stream
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114845: Error occurred while uploading plan. Error is %s
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114846: Error occurred while downloading resources for the assembly %s.
  Error is %s
OAB-114847: Error occurred while writing late bingings of the instance %s to the file script params file.

Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-114848: Invalid update resources request for the assembly archive %s:%s with append option

Cause: No resources exist for the specified assembly archive
Action: Run the request without append option

Level: 1
Type: ERROR
Impact: Deployment

OAB-114849: Invalid plan name %s. Assembly archive %s:%s does not have the specified plan

Cause: Plan does not exist in the specified assembly archive
Action: Try with an existing plan or upload a plan

Level: 1
Type: ERROR
Impact: Deployment

OAB-114850: Cannot delete the deployment plan %s for the assembly archive %s:%s. It's currently in use.

Cause: The specified deployment plan has assembly instances
Action: Delete the deployments and try again

Level: 1
Type: ERROR
Impact: Deployment

OAB-114851: Cannot delete resources for the assembly archive %s:%s. It's currently in use.

Cause: The specified assembly has assembly instances
Action: Delete the deployments and try again

Level: 1
Type: ERROR
Impact: Deployment

OAB-114852: Delete scripts access not allowed on the assembly %s:%s
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114853: Invalid resources %s specified for the assembly %s:%s
  Cause: The specified resources does not exist for the specified assembly
  Action: Check the supplied resource set and try with a valid resource set
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114854: Invalid delete resources request for the assembly archive %s:%s
  Cause: No resources exist for the specified assembly archive
  Action: Verify assembly resources with describeAssemblyResources command
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114855: Error occurred while creating ISO shares for the assembly %s:%s in the storage target %s
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114856: No resources exist for the assembly archive %s:%s
  Cause: No resources exist for the specified assembly archive
  Action: Run the request without append option
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114857: Error occurred while creating ISO shares for the assembly instance %s
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Deployment
OAB-114858: Error occurred while deleting ISO shares for the assembly instance %s

Cause:

Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-114859: Cannot find cdrom for plan file-refs for the appliance instance %s

Cause: Error might have occurred while creating corresponding cdrom

Action: Contact oracle customer support with the appropriate log files

Level: 1
Type: ERROR
Impact: Deployment

OAB-114860: Could not create temporary directory %s

Cause: File system might be read-only or user does not have write-permissions or insufficient enough disk resources

Action: Check the cause and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-114861: Error occurred while creating ISO file for the appliance instance %s

Cause:

Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-114862: ISO file creation for the appliance instance %s failed with exit code %s

Cause: Check the log file for the root cause

Action: Check the log file and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-114863: Error occurred while opening the session to the storage target %s

Cause:

Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-114864: Use storage target argument must be specified
Cause: The supplied assembly contains shared ISO files and use storage target was not specified
Action: Supply non-null, non-empty and valid storage target
Level: 1
Type: ERROR
Impact: Deployment

OAB-114865: Error occurred while performing cleanup on the registration %s. Error is %s
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-114866: Cannot use storage target %s with the deployment target %s
Cause: The supplied storage target is not configured in the allowed storage targets list for the specified deployment target
Action: Provide a valid and configured allowed storage target for the specified deployment target
Level: 1
Type: ERROR
Impact: Deployment

OAB-114867: Cannot find assembly deployment plan %s for the assembly %s with version %s
Cause: No assembly deployment plan exists for the specified assembly name, plan name and version
Action: Provide valid assembly name, plan name and version
Level: 1
Type: ERROR
Impact: Deployment

OAB-114868: Error occurred while restoring the assembly instance %s. Error is: %s
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-114869: Invalid download resources request for the assembly archive %s:%s
Cause: No resources exist for the specified assembly archive
Action: Verify assembly resources with describeAssemblyResources command
Level: 1
Type: ERROR
Impact: Deployment

OAB-114870: Error occurred while adding or deleting the tags to the registration %s.
  Error is %s
  Cause:
  Action:
  Level: 1
Type: ERROR
Impact: Deployment

OAB-114871: Invalid network configuration for the interface %s in the appliance %s
  Cause: Network name unspecified
  Action: Fix the deployment plan with network name property
  Level: 1
Type: ERROR
Impact: Deployment

OAB-114872: Invalid network configuration for the interface %s in the appliance %s
  Cause: Network name and network id are unspecified
  Action: Fix the deployment plan with network name or network id property
  Level: 1
Type: ERROR
Impact: Deployment

OAB-114873: Network with the identifier %s does not exist in the target %s
  Cause: Specified network identifier does not exist
  Action: Fix the deployment plan with a valid and existing network id
  Level: 1
Type: ERROR
Impact: Deployment

OAB-114874: Network with the name %s does not exist in the target %s
  Cause: Specified network name does not exist
  Action: Fix the deployment plan with a valid and existing network name
  Level: 1
Type: ERROR
Impact: Deployment

OAB-114875: Assembly %s:%s has not been uploaded yet.
  Cause: Specified assembly is being uploaded to the repository
  Action: Wait till upload is complete or specify a different assembly version
  Level: 1
Type: ERROR
Impact: Deployment

OAB-114876: Invalid assembly names supplied
  Cause: Supplied empty list of assembly names
  Action: Specify one or more assembly names

  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114877: Invalid assembly names supplied. Particularly %s
  Cause: Specified assembly names does not exist in the repository
  Action: Supply valid assembly names

  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114878: Error occurred while restoring the assembly instance %s. Error is %s
  Cause:
  Action:

  Level: 1
  Type: WARNING
  Impact: Deployment

OAB-114879: Error occurred while releasing the addresses on the vnet %s. Error is %s
  Cause:
  Action:

  Level: 1
  Type: WARNING
  Impact: Deployment

OAB-114880: Error occurred while releasing the addresses for the instance {0}. Error is {1}
  Cause:
  Action:

  Level: 1
  Type: WARNING
  Impact: Deployment

OAB-114881: The value %s cannot be converted to %s.
  Cause:
  Action:

  Level: 1
  Type: ERROR
Impact: Deployment

OAB-114882: The value type was not specified
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114883: Value %s is not of type %s
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114884: The requested value is not of type %s
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114885: There is an illegal value type: %s
  Cause:
  Action:
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-114886: Assembly instance {0} does not contain the required appliance instances. Particularly, the instance {1} either went down or has been operated externally
  Cause:
  Action:
  Level: 1
  Type: WARNING
  Impact: Deployment

OAB-114887: Assembly instance {0} does not meet the deployment requirement
  Cause: One or more instances of the assembly instance in the corresponding target environment are either managed by the external tools or would have gone down
  Action: Delete the assembly instance and create it again
  Level: 1
Type: WARNING
Impact: Deployment
OAB-114888: Invalid metric service type: {0}
  Cause:
  Action:
  Level: 1
Type: WARNING
Impact: Deployment
OAB-114889: Found multiple action handling services of type: {0}
  Cause:
  Action:
  Level: 1
Type: WARNING
Impact: Deployment
OAB-114890: Cannot find action handling service of type: {0}
  Cause: ActionHandler of type {0} is not found in Deployer classpath.
  Action: Make sure ActionHandler of type {0} is in the classpath and restart the deployer.
  Level: 1
Type: ERROR
Impact: Deployment
OAB-114891: Required parameter {0} was not specified for action {1}
  Cause: Required parameter {0} was not specified for action {1}.
  Action: Specify all the parameters required by the rule action {1}.
  Level: 1
Type: ERROR
Impact: Deployment
OAB-114892: Specified parameter {0} value is not a number
  Cause: Wrong non-numeric parameter {0} value was specified for action {1}.
  Action: Correct the {0} parameter value passed to action {1}.
  Level: 1
Type: ERROR
Impact: Deployment
OAB-114893: Either parameter {0} or {1} must be specified for action {2}, but not both
  Cause: Both {0} and {1} parameters were specified for action {2} while only one can be set.
  Action: Update rule definition to specify only {0} or {1} parameter for action {2}.
  Level: 1
Type: ERROR
Impact: Deployment

OAB-114894: Either parameter {0} or {1} must be specified for action {2}
Cause: None of the required {0} or {1} parameters were specified for action {2}.
Action: Specify either {0} or {1} parameter in the rule definition invoking action {2}.

Level: 1
Type: ERROR
Impact: Deployment

OAB-114895: Invalid metric context specified with deploymentId {0}, appliancePath {1} and instanceId {2}
Cause: Invalid metric context specified
Action: Please provide the either deploymentId, appliancePath or instanceId in the metric context

Level: 1
Type: WARNING
Impact: Deployment

OAB-114896: Aggregation has to be specified for appliance metric collection
Cause:
Action:

Level: 1
Type: WARNING
Impact: Deployment

OAB-114897: Metric item has to be specified in metric reference
Cause:
Action:

Level: 1
Type: WARNING
Impact: Deployment

OAB-114898: For metric aggregation, the poll range in watch control has to be specified
Cause:
Action:

Level: 1
Type: WARNING
Impact: Deployment

OAB-114899: Specified value for parameter '{0}' of action '{1}' is invalid. The following values are expected: {2}
Cause: Invalid parameter value was specified in the rule definition.
Action: Update rule definition and specify correct action parameter.
Level: 1
Type: WARNING
Impact: Deployment

OAB-114900: The poll period has to be specified in watch control
Cause:
Action:

Level: 1
Type: WARNING
Impact: Deployment

OAB-114901: Invalid appliance instance watch control: aggression {0}, pollRange {1}
Cause: Invalid appliance instance watch control specified
Action: For appliance instance, both aggregation and pollRange have to be specified.

Level: 1
Type: WARNING
Impact: Deployment

OAB-114902: Invalid appliance instance watch control: aggression {0}
Cause: Invalid aggregation specified in appliance instance watch control
Action: For appliance instance, only average aggregation is supported.

Level: 1
Type: WARNING
Impact: Deployment

OAB-114903: {0} operation request {1} for the appliance {2} in the assembly instance {3} is cancelled
Cause: The deployer server handling the specified request is either crashed or has been shutdown
Action: Look at the logs for corresponding appliance and perform any cleanup if necessary

Level: 1
Type: WARNING
Impact: Deployment

OAB-114904: Error occurred while cleanuping the cancelled deployment request {0} for the assembly instance {1}. Error is {2}
Cause:
Action:

Level: 1
Type: WARNING
Impact: Deployment

OAB-114905: Error occurred while cleanuping the cancelled registration request {0} for the assembly archive {1}:{2} on the target {3}. Error is {4}
Cause:
Action:
Level: 1
Type: WARNING
Impact: Deployment

OAB-114906: {0} operation request {1} for the assembly instance {2} is cancelled
Cause: The deployer server handling the specified request is either crashed or has been shutdown
Action: 1. Look at the logs for corresponding assembly instance and perform any cleanup if necessary 2. Delete the specified deployment
Level: 1
Type: WARNING
Impact: Deployment

OAB-114907: {0} operation request {1} for the assembly archive {2}:{3} on the target {4} cancelled
Cause: The deployer server handling the specified request is either crashed or has been shutdown
Action: Look at the logs for corresponding registration and perform any cleanup if necessary
Level: 1
Type: WARNING
Impact: Deployment

OAB-114908: Invalid appliance instance id [0]
Cause: Contact Oracle customer support
Action: No native instance can be found with the specified id
Level: 1
Type: WARNING
Impact: Deployment

OAB-114909: The poll period {0} specified is below the minimally allowed value 5 sec
Cause: The poll period specified in below the minimally allowed value
Action: Please correct the poll period to be above the minimally allowed value
Level: 1
Type: WARNING
Impact: Deployment

OAB-114910: The target {0} does not support platform {1}
Cause:
Action:
Level: 1
Type: WARNING
Impact: Deployment

OAB-114911: Assembly archive file path must be specified
Cause: Supplied assembly archive file path is null
Action: Supply non-null assembly archive file path

Level: 1
Type: ERROR
Impact: Deployment

OAB-114912: Error occurred while generating snapshot for the assembly instance {0}
Cause:
Action:

Level: 1
Type: ERROR
Impact: Deployment

OAB-114913: Cannot find disk {0} in the appliance instance {1}
Cause: Disk with the supplied name isn’t a valid disk for the supplied appliance instance
Action: Check the specified disk is a valid disk attached to the supplied appliance instance against the ovf descriptor of the assembly and try again with the valid disk name

Level: 1
Type: WARNING
Impact: Deployment

OAB-114914: Cannot find disk {0} in the assembly instance {1}
Cause: Disk with the supplied name isn’t a valid disk in the assembly instance
Action: Check the specified disk is a valid disk the ovf descriptor of the assembly and try again with the valid disk name

Level: 1
Type: WARNING
Impact: Deployment

OAB-114915: Invalid disk {0} for the snapshot generation. Its not attached to the appliance instances in the assembly instance {1}
Cause: The disk with the supplied name isn’t configured to attach any appliance instance
Action: Check the specified disk is a valid disk the ovf descriptor of the assembly and it is configured to attach to one or more appliances

Level: 1
Type: WARNING
Impact: Deployment
OAB-114916: Invalid snapshot generation request. The appliance instance [0] doesn't have any disks attached
   Cause: The supplied appliance instance doesn't have any disks attached
   Action: Check the specified appliance instance against the ovf descriptor of the assembly and try again with the valid appliance instance
   Level: 1
   Type: WARNING
   Impact: Deployment

OAB-114917: Cannot generate snapshot to the appliance instance [0]. It has shared disks [1]
   Cause: The supplied appliance instance has shared disks. The appliance alone cannot be snapshotted when it has shared disks.
   Action: Generate snapshot to the assembly instance when there are shared disks
   Level: 1
   Type: WARNING
   Impact: Deployment

OAB-114918: Invalid snapshot identifier [0]
   Cause: The snapshot with the supplied identifier does not exist in the deployer
   Action: Use a valid and existing snapshot id for the restoration
   Level: 1
   Type: WARNING
   Impact: Deployment

OAB-114919: Cannot find native appliance instance for the identifier [0]
   Cause: Appliance instance identifier is invalid
   Action: Contact Oracle customer support
   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-114920: No snapshot disks found in the snapshot [0] for the appliance instance [1]. The appliance instance is new after the snapshot is generated. This appliance instance cannot be restored to the snapshot. Continuing the assembly restoration of rest of the appliance instances.
   Cause:
   Action:
   Level: 1

  Impact: Deployment

OAB-115001: Insufficient %s resource. Required %s but available %s
  Cause:
  Action:
  Level: 1
  Type: WARNING
  Impact: Deployment

OAB-115002: Target %s does not contain the network %s
  Cause:
  Action:
  Level: 1
  Type: WARNING
  Impact: Deployment
OAB-115003: Resource validations for the appliance %s against the target %s failed. Errors are %s
Cause: Check the errors in the message for the root causes.
Action: Fix the errors specified in the error message
Level: 1
Type: ERROR
Impact: Deployment

OAB-115004: Resource validations for the assembly %s against the target %s failed. Errors are %s
Cause: Check the errors in the message for the root causes.
Action: Fix the errors specified in the error message
Level: 1
Type: ERROR
Impact: Deployment

OAB-115005: Resource validations for the appliance instance %s against the target %s failed. Errors are %s
Cause: Check the errors in the message for the root causes.
Action: Fix the errors specified in the error message
Level: 1
Type: ERROR
Impact: Deployment

OAB-115006: Ovf file path must be provided
Cause: Did not provide ovf file path
Action: Provide ovf file path and try again
Level: 1
Type: ERROR
Impact: Deployment

OAB-115007: Invalid ovf file %s
Cause: Supplied ovf file does not exist
Action: Provide a valid ovf file
Level: 1
Type: ERROR
Impact: Deployment

OAB-115008: Error occurred while parsing the ovf file %s. Error is %s
Cause: 
Action: 
Level: 1
Type: ERROR
Impact: Deployment
OAB-115009: Deployment plan file path must be provided
Cause: Did not provide deployment plan file path
Action: Provide deployment plan file path and try again
Level: 1
Type: ERROR
Impact: Deployment

OAB-115010: Invalid deployment plan file %s
Cause: Supplied deployment plan file does not exist
Action: Provide a valid deployment plan file
Level: 1
Type: ERROR
Impact: Deployment

OAB-115011: Error occurred while parsing the deployment plan file %s. Error is %s
Cause:
Action:
Level: 1
Type: ERROR
Impact: Deployment

OAB-115157: Assembly resources file already exists at: {0}
Cause: An assembly resources file with the same name already exists at the location specified.
Action: Please choose a different name and/or location to download the assembly archive to using the 'fileName' parameter
Level: 1
Type: ERROR
Impact: Deployment

OAB-115261: Assembly name {0} is not valid
Cause: Assembly name specified is not valid
Action: Correct the assembly name so that it begins with an alphabetic character and only contains alphanumeric characters, underscore or hyphen
Level: 1
Type: ERROR
Impact: Deployment

OAB-115262: Request {0} has failed. Error is {1}
Cause: Check the error and the deployer logs to find the root cause
Action: Check the error and the deployer logs and take appropriate action
Level: 1
Type: ERROR
Impact: Deployment
OAB-115263: Invalid assembly archive - no OVF descriptor present

Cause: Specify a valid assembly archive file
Action: The specified assembly archive does not contain a valid OVF descriptor file

Level: 1
Type: ERROR
Impact: Deployment

OAB-115264: Assembly name {0} is not within length of 4 ~ 40 characters

Cause: Assembly name specified is not within length of 4 ~ 40 characters
Action: Please correct and use the correct length

Level: 1
Type: ERROR
Impact: Deployment

OAB-115432: The platform type {0} is not valid

Cause: Platform type used is not valid
Action: Please correct and use the correct platform type

Level: 1
Type: ERROR
Impact: Deployment

OAB-117036: Element {0} was not found in the catalog.

Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-117037: Unrecognized JobParameter.ValueType {0}.

Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-117038: Top level assembly {0} already exists in catalog.

Cause: (See message)
Action: Delete assembly or use -force flag.

Level: 1
Type: ERROR
Impact: User Input

OAB-117040: Bad port number supplied to the {0} parameter: {1}.
Cause:
Action:
Level: 1
Type: ERROR
Impact: User Input

OAB-117041: Missing remote address
Cause:
Action:
Level: 1
Type: ERROR
Impact: User Input

OAB-117042: Literal IPv6 address missing '[' and ']': {0}
Cause:
Action:
Level: 1
Type: ERROR
Impact: User Input

OAB-117501: Member %s - Joined
Cause:

  Action:
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-117801: Error occurred while uploading the assembly archive
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
  Type: ERROR
  Impact: Deployment
OAB-117802: Error occurred while downloading the assembly archive

Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-117803: Error occurred while downloading the assembly metadata

Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-117804: Error occurred while creating the assembly instance

Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-117805: Error occurred while deleting the assembly instance

Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-117806: Error occurred while deleting the deployment plan

Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-117807: Error occurred while undeploying the assembly instance

Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-117808: Error occurred while registering the assembly archive
Causes: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action
Level: 1

Type: ERROR
Impact: Deployment

OAB-117809: Error occurred while unregistering the assembly archive
Causes: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action
Level: 1

Type: ERROR
Impact: Deployment

OAB-117810: Error occurred while updating the assembly archive
Causes: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action
Level: 1

Type: ERROR
Impact: Deployment

OAB-117811: Error occurred while describing the assembly instances
Causes: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action
Level: 1

Type: ERROR
Impact: Deployment

OAB-117812: Error occurred while describing the assembly archives
Causes: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action
Level: 1

Type: ERROR
Impact: Deployment

OAB-117813: Error occurred while describing the requests
Causes: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

**OAB-117814: Error occurred while starting the assembly instance**
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

**OAB-117815: Error occurred while stopping the assembly instance**
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

**OAB-117816: Error occurred while downloading the deployment plan**
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

**OAB-117817: Error occurred while describing the deployer**
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

**OAB-117818: Error occurred while creating the target**
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment
OAB-117819: Error occurred while updating the target
   Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
   Action: Look at the underlying error and take appropriate action
   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-117820: Error occurred while describing the target names
   Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
   Action: Look at the underlying error and take appropriate action
   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-117821: Error occurred while deleting the target
   Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
   Action: Look at the underlying error and take appropriate action
   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-117822: Error occurred while setting the default target
   Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
   Action: Look at the underlying error and take appropriate action
   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-117823: Error occurred while describing the assembly instances
   Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
   Action: Look at the underlying error and take appropriate action
   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-117824: Error occurred while adding the target user
   Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
   Action: Look at the underlying error and take appropriate action
   Level: 1
Type: ERROR
Impact: Deployment

OAB-117825: Error occurred while describing the target user
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action
Level: 1
Type: ERROR
Impact: Deployment

OAB-117826: Error occurred while removing the target user
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action
Level: 1
Type: ERROR
Impact: Deployment

OAB-117827: Error occurred while describing the user targets
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action
Level: 1
Type: ERROR
Impact: Deployment

OAB-117828: Error occurred while creating the deployer connection
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action
Level: 1
Type: ERROR
Impact: Deployment

OAB-117829: Error occurred while deleting the deployer connection
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action
Level: 1
Type: ERROR
Impact: Deployment

OAB-117830: Error occurred while describing the deployer connections
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-117831: Error occurred while getting the deployer connection
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-117832: Error occurred while getting the default target
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-117833: Error occurred while getting the target type
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-117834: Error occurred while describing the scaling groups
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-117835: Error occurred while initiating the scaling operation
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment
OAB-117836: Error occurred while describing the vnets
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-117837: Error occurred while describing the targets
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-117838: Error occurred while describing the registrations
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-117839: Error occurred while describing the target configurations
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-117840: Error occurred while restarting the assembly instance
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-117841: Error occurred while redeploying the assembly instance
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
Type: ERROR
Impact: Deployment
OAB-117842: Error occurred while deleting the requests
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
Type: ERROR
Impact: Deployment
OAB-117843: Error occurred while describing the assembly users
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
Type: ERROR
Impact: Deployment
OAB-117844: Error occurred while adding the assembly user
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
Type: ERROR
Impact: Deployment
OAB-117845: Error occurred while deleting the assembly user
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
Type: ERROR
Impact: Deployment
OAB-117846: Error occurred while creating the tags
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
Type: ERROR
Impact: Deployment
OAB-117847: Error occurred while deleting the tags
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
**Action:** Look at the underlying error and take appropriate action

**Level:** 1

**Type:** ERROR

**Impact:** Deployment

**OAB-117848: Error occurred while deleting the log events**

**Cause:** An unexpected exception occurred. Look at the underlying error for the root cause.

**Action:** Look at the underlying error and take appropriate action

**Level:** 1

**Type:** ERROR

**Impact:** Deployment

**OAB-117849: Error occurred while describing the tags**

**Cause:** An unexpected exception occurred. Look at the underlying error for the root cause.

**Action:** Look at the underlying error and take appropriate action

**Level:** 1

**Type:** ERROR

**Impact:** Deployment

**OAB-117850: Error occurred while describing the resources**

**Cause:** An unexpected exception occurred. Look at the underlying error for the root cause.

**Action:** Look at the underlying error and take appropriate action

**Level:** 1

**Type:** ERROR

**Impact:** Deployment

**OAB-117851: Error occurred while describing the log events**

**Cause:** An unexpected exception occurred. Look at the underlying error for the root cause.

**Action:** Look at the underlying error and take appropriate action

**Level:** 1

**Type:** ERROR

**Impact:** Deployment

**OAB-117852: Error occurred while deleting the failed appliances**

**Cause:** An unexpected exception occurred. Look at the underlying error for the root cause.

**Action:** Look at the underlying error and take appropriate action

**Level:** 1

**Type:** ERROR

**Impact:** Deployment
OAB-117853: Error occurred while validating the resources
   Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
   Action: Look at the underlying error and take appropriate action

   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-117854: Error occurred while suspending the assembly instance
   Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
   Action: Look at the underlying error and take appropriate action

   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-117855: Error occurred while resuming the assembly instance
   Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
   Action: Look at the underlying error and take appropriate action

   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-117856: Error occurred while uploading the assembly plan
   Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
   Action: Look at the underlying error and take appropriate action

   Level: 1
   Type: ERROR
   Impact: Deployment

OAB-117857: Error occurred while uploading the assembly resources

Type: ERROR
Impact: Deployment

OAB-117872: Error occurred while updating assembly rules
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-117873: Error occurred while describing assembly rules
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-117874: Error occurred while downloading the rule set
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment

OAB-117875: Error occurred during assembly snapshot creation
Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
Action: Look at the underlying error and take appropriate action

Level: 1
Type: ERROR
Impact: Deployment
OAB-117876: Error occurred while deleting snapshots
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-117877: Error occurred while describing snapshots
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-117878: Error occurred while restoring the assembly from the snapshot
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-117879: Error occurred while describing snapshot disks
  Cause: An unexpected exception occurred. Look at the underlying error for the root cause.
  Action: Look at the underlying error and take appropriate action
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-117901: Cannot find the vNet %s in the target %s
  Cause: The specified vNet does not exist in the specified target
  Action: Verify the vNet name specified in the ovf descriptor
  Level: 1
  Type: ERROR
  Impact: Deployment

OAB-117902: Error occurred while attempting to query vsrserver metrics on the vm %s. Error is: %s
  Cause:
  Action:
  Level: 1
Type: ERROR
Impact: Deployment

OAB-117903: Error occurred while attempting to query vserver metrics on the vm %s

Cause:

Action:

Level: 1

Type: NOTIFICATION
Impact: Deployment

OAB-118101: Error extracting disk image from assembly archive.
    Cause: (See message)
    Action: Ensure the assembly archive is not corrupt.

Level: 1
Type: ERROR
Impact: Deployment

OAB-118102: Assembly archive does not appear to be a valid OVA.
    Cause: Could not read assembly archive as tar format.
    Action: Ensure the assembly archive is not corrupt.

Level: 1
Type: ERROR
Impact: Deployment

OAB-118103: The specified S3 bucket does not belong to the configured user.
    Cause: The specified bucket belongs to another user.
    Action: Specify a different S3 bucket in the target configuration.

Level: 1
Type: ERROR
Impact: Deployment

OAB-118104: Failed to parse base image index from assembly archive.
    Cause: The base image index is not a valid JSON object.
**Action:** Contact Oracle support.

**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

**OAB-118105:** Appliance %s does not have an IP address property defined for interface %s.

**Cause:**

**Action:**

**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

**OAB-118106:** The Elastic IP address %s assigned to %s is not allocated to the current AWS account.

**Cause:** The Elastic IP address is not allocated to the current AWS account.

**Action:** Ensure that an allocated Elastic IP address is assigned to the appliance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

**OAB-118107:** The Elastic IP address %s assigned to %s is not available because it is assigned to another instance.

**Cause:** The Elastic IP address is already assigned to another instance.

**Action:** Ensure that an available Elastic IP address is assigned to the appliance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

**OAB-118108:** Error initializing instance user-data.

**Cause:** One of the required fields could not be generated.

**Action:** Ensure that the assembly metadata is valid. Contact Oracle Support Services.

**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

**OAB-118109:** Error generating appliance instance message payload.

**Cause:** (See message)

**Action:** Contact Oracle Support Services.

**Level:** 1  
**Type:** ERROR  
**Impact:** Deployment

**OAB-118110:** Timed out while waiting for message from appliance instance.
Cause: The appliance instance did not send an expected message within the allowed timeout period.
Action: Check the appliance instance logs.

Level: 1
Type: ERROR
Impact: Deployment

OAB-118111: Unknown error while waiting for message from appliance instance.
Cause: (See message)
Action: Check the appliance instance logs.

Level: 1
Type: ERROR
Impact: Deployment

OAB-118596: Failed to describe target %s: %s
Cause:
Action:

Level: 1

Type: WARNING
Impact: Installation

OAB-900015: Exception received from remote side.
Cause:
Action:

Level: 1
Type: ERROR
Impact: Other

OAB-960015: Exception received from remote side.

Cause:

Action:

Level: 1
Type: ERROR
Impact: Other

OAB-960016: Exception from the underlying communication layer on local side.

Cause:

Action:

Level: 1
Type: ERROR
Impact: Other

OAB-960017: Unable to obtain the ab_instance directory.

Cause:

Action:

Level: 1
Type: ERROR
Impact: Other

OAB-960018: Unable to obtain the local machines IP address.

Cause:

Action:

Level: 1
Type: ERROR
Impact: Network
OAM-00001: Cannot parse the session token.
   **Cause:** The session token appears to be invalid.
   **Action:** For more details, start logging at the FINE level.

   **Level:** 15
   **Type:** ERROR
   **Impact:** Other

OAM-00002: Error occurred while handling the request.
   **Cause:** An internal error occurred.
   **Action:** For more details, start logging at the FINE level.

   **Level:** 15
   **Type:** ERROR
   **Impact:** Other

OAM-00003: Request-Response handler configuration is incomplete.
   **Cause:** A request handler mapping was missing.
   **Action:** Add the missing handler mapping to the configuration.

   **Level:** 15
   **Type:** ERROR
   **Impact:** Other

OAM-00004: Cannot initialize the Diagnostic Engine.
   **Cause:**
   **Action:**

   **Level:** 15
   **Type:** INFO
   **Impact:** Other

OAM-00005: Cannot locate the custom login page.
   **Cause:** The custom login page was not found.
   **Action:** Verify the configuration.

   **Level:** 15
Type: ERROR  
Impact: Other

OAM-00006: Cannot locate the configuration of the custom login page.
  Cause: The custom custom login page was not specified in the configuration.
  Action: Add the custom login page location to the configuration.
  Level: 15

Type: ERROR  
Impact: Other

OAM-00007: Cannot edit the custom login page
  Cause: The file permissions of the custom login page do not allow write access.
  Action: Change the file permissions to allow write access.
  Level: 15

Type: ERROR  
Impact: Other

OAM-00008: Cannot close the custom login page
  Cause: The source code of the custom login page does not support closing of the login page.
  Action: Check the custom login page source code.
  Level: 15

Type: ERROR  
Impact: Other

OAM-00009: Unable to parse the redirection URL
  Cause: An error occurred while parsing the redirect URL due to bad encoding or invalid format.
  Action: For more details, start logging at the FINE level.
  Level: 15

Type: ERROR  
Impact: Other

OAM-00010: Cannot add query params to map for logout redirection
  Cause: URLDecoder throwing UnsupportedEncodingException
  Action: Check the AMLogoutResponseHandler - getQueryMap method code.
  Level: 15

Type: ERROR  
Impact: Other

OAM-00011: Cannot parse the request token sent from client with User Agent {0} and IP Address {1}.
  Cause: The request token appears to be invalid.
  Action: For more details, start logging at the FINE level.
  Level: 15
Type: ERROR
Impact: Other

OAM-000012: Cannot construct the request token.
Cause: Could not create OAM request token.
Action: For more details, start logging at the FINE level.
Level: 15

Type: ERROR
Impact: Other

OAM-000013: Cannot construct OAM session token.
Cause: Could not create SSO Session token.
Action: For more details, start logging at the FINE level.
Level: 15

Type: ERROR
Impact: Other

OAM-000014: \{0\} set in \{1\} must be an integer greater-than or equal to zero.
Cause: SwitchGetToPostLimit was set incorrectly for the authentications scheme.
Action: Correct the SwitchGetToPostLimit challenge parameter within the authentication scheme.
Level: 15

Type: WARNING
Impact: Other

OAM-02001: Retrieve SSO session operation failed.
Cause: Cannot retrieve the SSO session from the request context. Session might have expired.
Action: For more details, start logging at the FINE level.
Level: 15

Type: ERROR
Impact: Other

OAM-02002: Error while processing the submitted credentials.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15

Type: ERROR
Impact: Other

OAM-02003: Error while processing credential collection.
Cause: An internal error occurred.
Action: Check the authentication scheme configuration.
Level: 15
Type: ERROR
Impact: Other
OAM-02004: Error while processing authorization request.
Caused: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15
Type: ERROR
Impact: Other
OAM-02005: Error while parsing the SSO session token.
Caused: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15
Type: ERROR
Impact: Other
OAM-02006: Insufficient authentication level to access the resource.
Caused: An insufficient authentication level was used to access the resource.
Action: Step up the authentication level by re-authenticating to the required level.
Level: 15
Type: ERROR
Impact: Other
Caused: An insufficient authentication level was used to access the resource.
Action: Step up the authentication level by re-authenticating to the required level.
Level: 15
Type: ERROR
Impact: Other
Caused: An insufficient authentication level was used to access the resource.
Action: Step up the authentication level by re-authenticating to the required level.
Level: 15
Type: ERROR
Impact: Other
OAM-02009: Password reset required. Authentication failed.
Caused: An insufficient authentication level was used to access the resource.
Action: Step up the authentication level by re-authenticating to the required level.
Level: 15
Type: ERROR
Impact: Other
OAM-02010: User account is locked. Authentication failed.
  Cause: Insufficient privileges.
  Action: Check the authorization permissions.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-02011: No user account found. Authentication failed.
  Cause: Insufficient privileges.
  Action: Check the authorization permissions.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-02012: No user name password combination found. Authentication failed.
  Cause: Insufficient privileges.
  Action: Check the authorization permissions.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-02013: Password Policy action not supported by the client. Authentication failed.
  Cause: Insufficient privileges.
  Action: Check the authorization permissions.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-02052: SME Adapter initialization Failed.
  Cause: SME adapter initialization failed.
  Action: Verify the SME configuration.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-02053: Component {1} initialization Failed.
  Cause: Component initialization failed.
  Action: Verify the server configuration.
  Level: 15
  Type: ERROR
  Impact: Other

OAM-02054: SSO session creation failed.
Cause: Session Management Engine error.
Action: Check Session Management Engine error logs.

Level: 15
Type: ERROR
Impact: Other

OAM-02055: Retrieve SSO session operation failed.
Cause: Session might be expired.
Action: If the problem persists contact the administrator.

Level: 15
Type: ERROR
Impact: Other

OAM-02056: An error occurred while parsing the server token.
Cause: TPE token parsing failed.
Action: check Token Processing Engine logs.

Level: 15
Type: ERROR
Impact: Other

OAM-02057: Wrong Flow Controller configuration for {1}
Cause: Wrong Flow controller configuration
Action: Check flow controller class name and configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-02058: Event Flow goes in infinite loop.
Cause: Wrong configuration or too many allowed login attempts.
Action: Check event flow configuration and login attempt configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-02059: Flow Controller Cannot handle Event
Cause: Wrong Flow controller configuration
Action: Check error log more details.

Level: 15
Type: ERROR
Impact: Other

OAM-02060: Flow Controller :{0} Cannot handle Event :{1}
Cause: Wrong Flow controller configuration
Action: Check event to flow controller mapping.
OAM-02061: Event Handler error.
Cause: Wrong event handler configuration
Action: Check error log more details.

OAM-02062: Event Handler cannot handle the event.
Cause: Wrong event handler configuration
Action: Check event to event handler controller mapping.

OAM-02063: Event Handler :{0} Cannot handle Event :{1}
Cause: Wrong event handler configuration
Action: Check event to event handler controller mapping.

OAM-02064: Authentication Error during policy matching.
Cause: Authentication Error
Action: Check error log more details.

OAM-02065: Configuration Service Adapter initialization Failed.
Cause: SConfiguration Service failed.
Action: Verify the system configuration file

OAM-02066: Event Factory is not configured create the requested event.
Cause: Wrong event factory configuration
Action: Check error log more details.
OAM-02067: Wrong event configuration. No event handler specified for event {0}.
  
  **Cause:** Wrong event factory configuration
  
  **Action:** Check error log more details.
  
  **Level:** 15
  
  **Type:** ERROR
  
  **Impact:** Other

OAM-02068: Error occurred while configuring the request cache.
  
  **Cause:** Wrong request cache handler class configuration.
  
  **Action:** Check error log more details.
  
  **Level:** 15
  
  **Type:** ERROR
  
  **Impact:** Other

OAM-02069: Error occurred while loading cache handler for class Name {0}.
  
  **Cause:** Wrong request cache handler class configuration.
  
  **Action:** Check error log more details.
  
  **Level:** 15
  
  **Type:** ERROR
  
  **Impact:** Other

OAM-02070: An error occurred while loading server aliases.
  
  **Cause:** TPE token parsing failed.
  
  **Action:** check system configuration if the aliases are set up properly logs.
  
  **Level:** 15
  
  **Type:** ERROR
  
  **Impact:** Other

OAM-02071: No host configuration found for the alias {0}.
  
  **Cause:** TPE token parsing failed.
  
  **Action:** check system configuration if the aliases are set up properly logs.
  
  **Level:** 15
  
  **Type:** ERROR
  
  **Impact:** Other

OAM-02072: Ignoring failure during Identity Store operation.
  
  **Cause:** Operation to read or update user attribute in Identity Store resulted in exception.
  
  **Action:** Check the availability of configured Identity Store.
  
  **Level:** 15
  
  **Type:** WARNING
  
  **Impact:** Other
OAM-02073: Error while checking if the resource is protected or not.
   Cause: TPE token parsing failed.
   Action: check system configuration if the aliases are set up properly logs.
   Level: 15

OAM-02110: Event flow controller is executed in infinite loops.
Cause: Wrong configuration.
Action: Check event flow controller configuration.

Level: 15
Type: ERROR
Impact: Other

OAM-04001: Configuration parameter type mismatch. Param {0}. Expected type {1}. Actual type {2}
Cause: The configuration parameter type was invalid.
Action: Validate the configuration parameter.

Level: 16
Type: NOTIFICATION
Impact: Other

OAM-04002: Unsupported value for config parameter. Parameter {0}. Value {1}. {2}
Cause: The specified configuration parameter was not valid.
Action: Validate the configuration parameter.

Level: 16
Type: NOTIFICATION
Impact: Other

OAM-04003: OAM proxy started. Listening on port {0}.
Cause: The OAM proxy has started listening on the specified port.
Action:

Level: 16
Type: NOTIFICATION
Impact: Other

OAM-04004: Read configuration parameter {0} = {1}.
Cause: The OAM proxy has loaded its configuration.
Action:

Level: 16
Type: NOTIFICATION
Impact: Other

OAM-04005: Client connection accepted.
Cause: A client TCP/IP connection was accepted.
Action:

Level: 16
Type: NOTIFICATION
Impact: Other

OAM-04006: Client connection closed. Connection id {0}.
Cause: A client TCP/IP connection was closed.
Action:
Level: 16
Type: NOTIFICATION
Impact: Other
OAM-04007: Message received from client. Message {0}, Host : {1} Port : {2}.
Cause: A message was received from a client on the NAP channel.
Action:

Level: 16
Type: NOTIFICATION
Impact: Other
OAM-04008: Message sent to client. Message {0}, Host : {1} Port : {2}.
Cause: A message was sent to a client on the NAP channel.
Action:

Level: 16
Type: NOTIFICATION
Impact: Other
Cause: An outbound connection was created with an OAM 10g server.
Action:

Level: 16
Type: NOTIFICATION
Impact: Other
OAM-04010: Message received on outbound channel from OAM Access server.
Message {0}, Host : {1} Port : {2}.
Cause: A message was received from an OAM 10g server.
Action:

Level: 16
Type: NOTIFICATION
Impact: Other
OAM-04011: Message sent on outbound channel to OAM 10g Access server.
Message {0}, Host : {1} Port : {2}.
Cause: A message was sent to an OAM 10g server.
Action:

Level: 16
Type: NOTIFICATION
Impact: Other
OAM-04012: Outbound connection closed.
Cause: A connection with an OAM 10g server was closed.
Action:
Level: 16
Type: NOTIFICATION
Impact: Other

OAM-04013: Unexpected message received from client. Message {0}
Cause: An unexpected message was received when a simple mode handshake message from the client was expected.
Action: Check the NAP mode configuration of the WebGate and the Server.

Level: 1
Type: WARNING
Impact: Other

OAM-04014: Malformed message received from client. Details {0}
Cause: The length of message received from client was less than 0.
Action: Restart the WebGate if the message is being received repeatedly.

Level: 1
Type: WARNING
Impact: Other

OAM-04015: Outbound connection to Access Server not found.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.

Level: 1
Type: WARNING
Impact: Other

OAM-04016: Session ID is missing in AmResponse
Cause: The session ID was not present in the OAM token.
Action: Retry the request.

Level: 1
Type: WARNING
Impact: Other

OAM-04017: OAM proxy end point activation failed. Exception:
Cause: The specified listening port is not available, or is already being used.
Action: Restart the server or contact the system administrator.

Level: 1
Type: SEVERE
Impact: Other

OAM-04018: Required configuration parameter missing. Required {0}
Cause: The required configuration parameters were missing.
Action: Verify the configuration.

Level: 1
Type: SEVERE
Impact: Other

OAM-04019: Work manager JNDI lookup failed. Exception:
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 1

Type: SEVERE
Impact: Other

OAM-04025: Error in connecting to Access server. {0}
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 1

Type: SEVERE
Impact: Other

OAM-04026: Error in NAP handshake with AAA server {0}
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 1

Type: SEVERE
Impact: Other

OAM-04027: Cannot create Executor instance
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 1

Type: SEVERE
Impact: Other

OAM-04028: Outbound Resource Adapter initialization error. {0}
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 1

Type: SEVERE
Impact: Other

OAM-04029: Error in generating AMEvent. Details {0}
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 1

Type: SEVERE
Impact: Other

OAM-04030: Partner lookup failed. Partner id {0}
Cause: The retrieval of partner metadata during client authentication was not successful.
Action: Check if the partner is registered with the Access Server.
Level: 1

Type: SEVERE
OAM-04031: NAP version mismatch during the NAP handshake. Client Message {0}
Cause: An unsupported NAP version was sent by the client.
Action: Check the client configuration and version. Older clients may need to be upgraded.
Level: 1
Type: SEVERE
Impact: Other

OAM-04032: PAT API error. Details {0}
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 1
Type: SEVERE
Impact: Other

OAM-04033: Error in retrieving secret information. {0} {1}
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 1
Type: SEVERE
Impact: Other

OAM-04034: Token Cache Enabled.
Cause: Information message indicating that the token cache is enabled.
Action:
Level: 1
Type: NOTIFICATION
Impact: Other

OAM-04035: Error while reading token cache size from configuration.
Cause: The cache configuration was invalid.
Action: Fix cache configuration and rerun the operation.
Level: 15
Type: ERROR
Impact: Other

OAM-04036: Channel security mode is different as specified in configuration {0}
Cause: The agent tried to communicate in a mode different from its configuration.
Action: Check the agent mode. This may be a security issue if the configuration mode of agent is correct.
Level: 1
Type: SEVERE
OAM-04037: Exception encountered while processing the HTTP message in OAM proxy:
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 1
Type: SEVERE
Impact: Other

OAM-04038: OAM proxy configuration parameter SSOOnlyMode is set to true. OAM proxy will skip authorization.
Cause: OAM proxy configuration parameter SSOOnlyMode is set to true.
Action:
Level: 16
Type: NOTIFICATION
Impact: Other

OAM-04039: Agent {0} not privileged to invoke OPCODE {1}
Cause: Agent is not privileged to invoke the operation.
Action: Check the agent configuration.
Level: 1
Type: WARNING
Impact: Other

OAM-04040: Target Resource is not as expected. Target Resource {0} WebGate resource {1}
Cause: Target resource is not as expected. This issue may occur in session scope operations.
Action: Runtime check failure. Check server logs.
Level: 1
Type: WARNING
Impact: Other

OAM-04041: Failed to retrieve valid session from OAM Identity Assertion. Assertion {0}
Cause: Either invalid assertion was specified or session corresponding to assertion is invalid.
Action: Please see logs for more details.
Level: 1
Type: WARNING
Impact: Other

OAM-04042: Failed to check token issuance policy. Resource: {0}. Requestor: {1}
Cause: Evaluation of Token Issuance Policy failed.
Action: Check Token Issuance Policy.
Level: 1  
Type: WARNING  
Impact: Other  

OAM-04043: Request is not processed. Access management service is disabled.  
Cause: Access management service is not enabled on server.  
Action: Enable the access management service. Set oam proxy global parameter "10gCompatibleGetHostIdentifiersSupport" to true.

Level: 1  
Type: WARNING  
Impact: Other  

OAM-06001: Cannot parse the session token.  
Cause: The session token is invalid or the wrong decryption key is present in the configuration.  
Action: Verify the key roll-over configuration.

Level: 15  
Type: ERROR  
Impact: Other  

OAM-10001: Cannot load the configuration file.  
Cause: The configuration file location was invalid.  
Action: Verify the location of the configuration file.

Level: 15  
Type: ERROR  
Impact: Other  

OAM-10002: Cannot initialize the PAT Adapter.  
Cause: The PAT configuration was invalid.  
Action: Verify the PAT configuration.

Level: 15  
Type: ERROR  
Impact: Other  

OAM-10003: Cannot initialize the Cache Handlers.  
Cause: The request cache handler configuration was invalid.  
Action: Verify the request cache handler configuration.

Level: 15

Impact: Other

OAM-30018: Internal error occurred. No response generated, due to either bad input or backend failure. See log file for details.
Cause: An internal error occurred. No response generated due to backend failure.
Action: See log file for details.

Level: 1
Type: ERROR
Impact: Other

OAM-30019: Exception encountered either while creating or writing to the native config file: {0}
Cause: An internal error occurred during creation of native config file
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30020: Exception encountered while writing to the output password file: {0}
Cause: An internal error occurred during creation of output password.xml file
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30021: Error in obfuscating the OSSO agent's output config file (osso.conf). Registration failed.
Cause: An internal error occurred. Error in obfuscating the created osso.conf config file.
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30022: Error in creating the credential store (wallet): {0}
Cause: An internal error occurred. Error in creating the creating the credential store (wallet).
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30023: Error in storing the secretKey in the credential store (wallet): {0}
Cause: An internal error occurred. Error in storing the secretkey in the credential store (wallet).
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30024: Error occurred while parsing the XML file. Error message is: "{0}" at column number: "{1}" and at line number: "{2}"
Cause: The XML file provided is invalid or not well-formed.
Action: Try again after verifying syntax and well-formedness of the XML as per the schema.

Level: 1
Type: ERROR
Impact: Other

OAM-30025: Malformed registration request xml string : "[0]" - {1}
Cause: The XML request string generated is malformed.
Action: Internal error during parsing. Check the input request xml and try again.

Level: 15
Type: ERROR
Impact: Other

OAM-30026: [0]
Cause:
Action:

Level: 15
Type: ERROR
Impact: Other

OAM-30027: Error in unmarshalling operation : [0]
Cause: Error in unmarshalling the XML data.
Action: Try again after verifying syntax and well-formedness of the XML as per the schema.

Level: 1
Type: ERROR
Impact: Other

OAM-30028: Error in setting the validation schema : [0]
Cause: Error in setting the validation schema
Action:

Level: 1
Type: ERROR
Impact: Other

OAM-30029: Error in setting the validation event handler : [0]
Cause: Error in setting the validation event handler
Action:

Level: 1
Type: ERROR
Impact: Other

OAM-30030: Error in marshalling operation : [0]
Cause: Error in marshalling the data.
OAM-30031: The character encoding being used is not supported : {0}
Cause: Internal error. Unsupported character encoding being used.
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30032: Exception encountered while writing to the certificate file : "{0}". Error message is: {1}
Cause: An internal error occurred during creation of output password.xml file
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30033: Certificates could not be retrieved from the server location. Registration failed: {0}
Cause: An internal error occurred. Error in retrieving the certificates.
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30034: Error while reading the certificate file stream. Registration failed: {0}
Cause: An internal error occurred. Error in retrieving the certificates.
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30035: Server instance is not running for the security mode specified: "{0}".
Cause: Server instance not running for the security mode specified.
Action:
Level: 1
Type: WARNING
Impact: Other

OAM-30036: Internal server error. No server instances are running.
Cause: Internal server error occurred. No server instances exist.
OAM-30037: Server instance is not running for the security mode specified: "{0}".
Try again using a different security mode.
Cause: Server instance not running for the security mode specified
Action: Try again using a different security mode

OAM-30038: Internal server error. There are no server instances running.
Registration failed. Please try again later.
Cause:
Action:

OAM-30039: Default security mode picked up for agent is: "{0}".
Cause:
Action:

OAM-30040: Could not retrieve the timeout cookie name and timeout cookie key information from the server configuration. Registration failed.
Cause: An internal error occurred. Error in retrieving timeout cookie name and timeout cookie key for the agent.
Action:

OAM-30041: Error while generating the cipher key or mask for the agent.
Registration failed: {0}
Cause: An internal error occurred. Error in generating the cipher key or mask for the agent.
Action:
Impact: Other

OAM-30042: Error in decrypting the secret key while passing back in the response. Registration failed.
Cause: An internal error occurred. Error in decrypting the secretkey while passing back in the response.
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30043: Agent type in the request is either null or unidentified. Please try again after verifying the agent type.
Cause: Agent type that is passed in the request object is invalid.
Action: Try again after checking the agent type that is specified.
Level: 1
Type: ERROR
Impact: Other

OAM-30044: Internal error while encrypting/obfuscating the password. Registration failed: {0}
Cause: An internal error occurred. Error in encrypting/obfuscating the password.
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30045: The hostIdentifier string: "{0}" has already been added to an existing hostIdentifier called: "{1}". Try again after deleting the host entry from the existing hostIdentifier or registering with a new hostIdentifier name.
Cause: The hostIdentifier string specified is already registered under a different hostIdentifier name.
Action: Try again after deleting the host entry from the existing hostIdentifier or registering with a new hostIdentifier name.
Level: 1
Type: ERROR
Impact: Other

OAM-30046: {0} mode failed. Agent does not exist.
Cause: Agent is not found.
Action:
Level: 1
Type: ERROR
Impact: Other

OAM-30047: Agent is found, but application domain does not exist. Agent could be in different application domain.
Cause: The Application Domain is not found.
Action: For validation, application domain name is agent name.

Level: 1
Type: ERROR
Impact: Other

OAM-30048: Url is not valid. Ensure that URL is of the format
http://example.domain.com:port or https://example.domain.com:port, where port number is optional.
Cause: Url is not valid.
Action:

Level: 1
Type: ERROR
Impact: Other

OAM-30049: Exception encountered while creating the logout.html script file : {0}
Cause: An internal error occurred while creating the logout.html script file
Action:

Level: 1
Type: ERROR
Impact: Other

OAM-30050: In DELETEMODE, agent profile deleted successfully, however, artifacts output directory was not present or could not be deleted for the agent name: "{0}" at the output folder location: "{1}". Please delete the folder manually.
Cause: 
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAM-30051: In DELETEMODE, agent profile and artifacts output directory was successfully deleted for the agent name: "{0}" at the server side output folder location: "{1}".
Cause: 
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAM-30052: Exception encountered while updating agent profile. Update of agent failed. {0}
Cause: An internal error occurred while updating agent profile
Action:

Level: 1
Type: ERROR
Impact: Other

Cause: The Application Domain is not found.
Action: Verify that the application domain you want to update exists and then try again.
Level: 1

Type: ERROR
Impact: Other

OAM-30054: Host identifier does not exist or is empty. {0} mode failed.
Cause: The HostIdentifier is not found.
Action: Verify that the hostidentifier you want to update exists and then try again.
Level: 1

Type: ERROR
Impact: Other

OAM-30055: The host: "{0}" and port: "{1}" is already present under the hostIdentifier: "{2}" and was not added again.
Cause: The hostPortVariation specified is already registered under an existing hostidentifier name, so it will not be added again.
Action: 
Level: 1

Type: WARNING
Impact: Other

OAM-30056: Application domain already exists. policyCreate mode failed. Use policyUpdate mode to update existing application domains.
Cause: For policyCreate mode, application Domain already exists.
Action: Try again using policyUpdate mode to update existing application domains.
Level: 1

Type: ERROR
Impact: Other

OAM-30057: Create policy resource exception. {0} URI={1}
Cause: create resource failed. resource/uri format is not valid.
Action: 
Level: 1

Type: ERROR
Impact: Other

OAM-30058: Agent name {0} exceeds maximum allowed length of {1} characters.
Cause: The name of the agent being created was too long.
Action: Try again using a shorter name.
Level: 1
Type: ERROR
Impact: Other

OAM-30059: The user-specified managed server name/id: 
"[0]" does not exist. Registration failed. Please try again after specifying valid server name.
Cause: The user-specified managed server name/id is invalid.
Action: Try again after providing a valid server name.

Level: 1
Type: ERROR
Impact: Other

OAM-30060: Internal server error. The location 
"[0]" is invalid or does not exist in configuration. Registration failed.
Cause: Internal server error. The specified location in the config file is invalid or not existing.
Action:

Level: 1
Type: ERROR
Impact: Other

OAM-30061: isFusionAppRegistration flag was set to: 
"[0]" and SSOOnlyMode field was set to true.
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAM-30062: isFusionAppRegistration flag was set to: 
"[0]" and denyOnNotProtected field was set to false(0).
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAM-30063: Agent type mismatch: Incoming agent request is of type: 
"[0]", but the existing agent profile type in the server is: 
"[1]". Registration failed. Please try again after using agent name of the same type.
Cause: Incoming agent type does not match with the agent type already registered in the server.
Action: Verify that the agentName belongs to the same type and try again.

Level: 1
Type: ERROR
Impact: Other

OAM-30064: Agent version mismatch: Incoming agent request is of the correct type: "\{0\}" , but the version is: "\{1\}" , while the existing agent version in the server is: "\{2\}". Registration failed. Please try again after using agent name of the same version.

Cause: Incoming agent type is the same, however, does not match the agent version already registered in the server.

Action: Verify that the agentName belongs to the same version and try again.

Level: 1
Type: ERROR
Impact: Other

OAM-30065: Registration failed. Error in finding or reading the template file \{0\} for agent\{1\} of type\{2\}. - \{3\}

Cause: An internal error occurred: the template file was not found or could not be opened.

Action:

Level: 1
Type: ERROR
Impact: Other

OAM-30066: Warning: The host:port variation - \{0\}:\{1\} is not present under the hostIdentifier - \{2\} and so was not deleted.

Cause: The host:port variation is not present under the given hostIdentifier

Action: Verify that the host:port variation you are passing is actually present

Level: 1
Type: WARNING
Impact: Other

OAM-30067: Warning: HostIdentifier \{0\} cannot be empty, so added this host:port entry back to it - \{1\}:\{2\}

Cause: The hostIdentifier cannot be empty, so cannot delete all host:port entries under it

Action: Adds the last entry being deleted back to the hostIdentifier

Level: 1
Type: WARNING
Impact: Other

OAM-30068: Warning: None of the given host:port variations are present for the hostIdentifier- \{0\} , so nothing to delete.

Cause: None of the specified host:port variations are present under the hostIdentifier

Action: Check the host:port variations list being passed and try again

Level: 1
Type: WARNING
Impact: Other

OAM-30069: Notification: The initial protected authn policy is created.
Cause: The initial protected authn policy is created.
Action:
Level: 1
Type: NOTIFICATION
Impact: Other

OAM-30070: Notification: The initial protected authz policy is created.
Cause: The initial protected authz policy is created.
Action:
Level: 1
Type: NOTIFICATION
Impact: Other

OAM-30071: Notification: The public authn policy using Anonymous Scheme is created.
Cause: The public authn policy using Anonymous Scheme is created.
Action:
Level: 1
Type: NOTIFICATION
Impact: Other

OAM-30072: Notification: The authn policy is updated.
Cause: The authn policy is updated.
Action:
Level: 1
Type: NOTIFICATION
Impact: Other

OAM-30073: Notification: The authz policy is updated.
Cause: The authz policy is updated.
Action:
Level: 1
Type: NOTIFICATION
Impact: Other

OAM-36001: Cannot obtain connection to domain MBean Server.
Cause: Console is not installed on the admin server.
Action: Check installation and configuration of the mbeans.
Level: 15
Type: ERROR
Impact: Other
OAM-36002: Cannot obtain MBean object.
   Cause: MBean is not installed correctly.
   Action: Check installation and configuration of the mbeans.

OAMSSA-02004: Cannot execute method {0} on class {1}
   Cause: An attempt to execute a method that is not supported.
   Action: Use a supported method.
   Level: 15

OAMSSA-02005: Cannot get SessionManager for type: {0}
   Cause: An invalid type was specified.
   Action: Verify that the type is supported before making the call.
   Level: 30

OAMSSA-02006: SessionManager type not present: {0}
   Cause: The requested implementation was not specified in configuration files.
   Action: Add the SessionManager type to the configuration files
   Level: 15

OAMSSA-02007: Factory class does not have factory methods.
   Cause: Factory class does not have factory methods.
   Action: None.
   Level: 15

OAMSSA-02008: Cannot instantiate the persistence access implementation for class {0}.
   Cause: An attempt was made to instantiate an invalid persistence access implementation.
   Action: Verify the settings in the configuration file.
   Level: 15

OAMSSA-02009: Cannot extract attribute for method {0}.
   Cause: An incorrect method was used to extract an attribute value.
   Action: Use the correct API call.
   Level: 15
Type: ERROR
Impact: Other

OAMSSA-02010: UpdateProcessor is in invalid mode for entry {0}.
Cause: UpdateProcessor serialization failure.
Action: Verify the configuration files, and the deployment.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-02011: Cannot update attribute for method {0}.
Cause: An incorrect method was used to update the attribute value.
Action: Use the correct API call.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-02012: Session count for user {0} has reached the maximum session limit per user.
Cause: Session count for user has reached the maximum session limit per user.
Action: Log out of some of the sessions before attempting to create new sessions.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-02013: SME expired session reaper thread not started.
Cause: Database configuration may be in correct
Action: Verify that the server started without errors.
Level: 15

Type: WARNING
Impact: Other

OAMSSA-02014: Session {0} not deleted.
Cause: Database configuration may be in correct
Action: Verify Data Source Name and database configuration
Level: 15

Type: ERROR
Impact: Other

OAMSSA-02015: Session attribute type {0} for key {1} is not supported. Attribute will be ignored.
Cause: Data in database is corrupted due to unknown cause, or session is updated with unsupported data type properties.
Action: Correct the session client api usage.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-02016: Session object for sessionid {0} was not loaded.
   Cause: Database configuration may be incorrect
   Action: Verify Data Source Name and database configuration
   Level: 15
Type: ERROR
Impact: Other
OAMSSA-02017: Session object for sessionid {0} was not saved.
   Cause: Database configuration may be incorrect
   Action: Verify Data Source Name and database configuration
   Level: 15
Type: ERROR
Impact: Other
OAMSSA-02018: Session attribute value {0} for key {1} is not serializable. Attribute will be ignored.
   Cause: Session attribute value is invalid.
   Action: Correct the session client api usage.
   Level: 15
Type: ERROR
Impact: Other
OAMSSA-02019: Session attribute key is null for userid {0} in session {1}.
   Cause: Session attribute key is null.
   Action: Correct the session client api usage.
   Level: 15
Type: ERROR
Impact: Other
OAMSSA-02020: Grant for impersonation of user {0} by user {1} does not exist, or has expired.
   Cause: Impersonation grant does not exist, or has expired.
   Action: Verify impersonation grant information.
   Level: 15
Type: ERROR
Impact: Other
OAMSSA-02021: Session exists for user {0} and sessionindex {1}.
   Cause: Session object already exists.
   Action: Use the existing session.
   Level: 15
Type: ERROR
Impact: Other
OAMSSA-02022: Session {0} is not an impersonation session.
Cause: Session is not impersonation session.
Action: Ensure that impersonation operations are done on an impersonation session.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-02023: Session {0} for user {1} index {2} is already impersonating. Further impersonations not allowed.
Cause: Impersonating sessions can not chain impersonation.
Action: Ensure that impersonation requests are done on non-impersonating sessions.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-02024: Session {0} timed out.
Cause: Session is inactive
Action: Re-authenticate user.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-02025: Session attribute domain definition {0} is not supported. Default domain value of {1} used.
Cause: Invalid configuration
Action: Correct the search attribute definition
Level: 15
Type: ERROR
Impact: Other
OAMSSA-02026: QueryDescriptor has invalid value. {0} is {1}.
Cause: Invalid search input
Action: Correct the search attribute definition
Level: 15
Type: ERROR
Impact: Other
OAMSSA-02027: Search request failed. {0}.
Cause: Search operation failed for provided cause.
Action: Correct the cause of the failure.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-02028: Failed to transform the search request into a valid query.
  Cause: The search request was not transformed into a search query.
  Action: Correct the cause of the failure.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-02029: Search request resulted in a null result object.
  Cause: The search request failed with no results.
  Action: Correct the cause of the failure.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-02030: Selection list generation failed for extractor {0}.
  Cause: Selection list transformation not supported for extractor or attribute.
  Action: Verify supported attributes used in the session search

Level: 15
Type: ERROR
Impact: Other

OAMSSA-02031: Where clause generation failed for extractor {0}.
  Cause: Extractor transformation not supported for extractor or attribute.
  Action: Verify supported attributes used in the session search

Level: 15
Type: ERROR
Impact: Other

OAMSSA-02032: Selection list initialization failed for operation {0}.
  Cause: Selection list transformation initialization failed.
  Action: Verify supported selection initialization for failed operations.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-02033: Initialization of search failed.
  Cause: Initialization of search failed
  Action: Verify libraries and jar versions.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-02034: Conversion of database value to boolean failed. Defaulting {0} to {1}.
  Cause: Database column mapping incorrect, or database column type incorrect.
  Action: Verify database field configuration.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-02035: Unsupported session store version detected. Required "{0}" but found "{1}".
  Cause: The version of session store is not compatible with OAM version.
  Action: Make sure OAM is configured to talk to correct version of session store.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-02036: Ignoring declaration for invalid search attribute. {0}
  Cause: Invalid attribute definition in configuration.
  Action: Verify the configuration of the search attributes.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-02037: The background delete thread has become unresponsive. Falling back to foreground session deletion.
  Cause: The background delete thread has become unresponsive.
  Action: Verify health of the JDBC data source connection.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-02038: Failed to put session {0} on queue {1}.
  Cause: Resource bounds exceeded.
  Action: Correct cause of server overload.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-02039: Session store write restored at wait queue size {0}. Current limit on queue size is {1}.
  Cause: Load on background write queue has reduced.
  Action: No action required.
  Level: 15
Type: INFO
Impact: Other
OAMSSA-02040: Session store write disabled at wait queue size {0}. Current limit on queue size is {1}.
Cause: Load on background write queue has reached upper bound.
Action: Examine sources of loading.
Level: 15
Type: WARNING
Impact: Other
OAMSSA-02041: Client lease for session {0} has expired.
Cause: Session update lease has expired.
Action: Examine use case of session update to eliminate updates using old session objects.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-02042: Credentials for session {0} have expired.
Cause: Session credential has expired.
Action: Perform credential validation.
Level: 15
Type: WARNING
Impact: Other
OAMSSA-02043: Session object expected. Null value found.
Cause: Invalid input.
Action: Invoke method with valid input.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-02044: Session update context object expected. Null value found.
Cause: Invalid input.
Action: Invoke method with valid input.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-02045: Request to encode {0} numbers exceed maximum limit of {1}.
Cause: Invalid input.
Action: Invoke method with valid input.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-02046: Credential validation date cannot be null.
Cause: Invalid input.
Action: Invoke method with valid input.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-04001: Operation {0} is not supported.
Cause: The requested operation was not supported.
Action: Use a supported operation.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-04002: Incorrect number of parameters {0} passed for operation {1}
Cause: An incorrect number of parameters was passed to the expression builder.
Action: Pass the correct number of parameters required for the expression.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-04003: Unable to get data store instance.
Cause: An invalid configuration file was supplied.
Action: Verify the configuration file.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-04004: Cannot get extractor list from passed configuration.
Cause: An incorrect extractor list was supplied.
Action: Verify the supplied configuration.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-04005: Data store established but data connection cannot be made.
Cause: Database connection information was invalid.
Action: Verify configuration files.
Level: 15

Type: INFO
Impact: Other
OAMSSA-04006: Cannot get connection from data source.
  Cause: Data source configuration was invalid.
  Action: Verify configuration files.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-04007: Key is not unique: {0}
  Cause: The key in the database was not unique.
  Action: Verify data integrity.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-04008: Data source definition not found. Store will be in-memory only.
  Cause:
  Action:
  Level: 15
  Type: INFO
  Impact: Other

OAMSSA-04009: Invalid parameter type passed to construct {0}
  Cause: The function parameter type was invalid.
  Action: Verify client implementation.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-04010: OAM Configuration for Coherence property {0} not found. Default configuration will be used.
  Cause: No overrides were specified.
  Action: None.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-04011: Cannot resolve address for server instance {0}.
  Cause: Server Instance listed in the Configuration is invalid.
  Action: Correct the configuration and rerun the operation.
  Level: 15
  Type: WARNING
  Impact: Other

OAMSSA-04012: Cannot set local host values for this server instance.
Cause: Unable to set permissions for local host.
Action: Please verify the network configuration and rerun this operation.

Level: 15
Type: WARNING
Impact: Other

OAMSSA-04013: Coherence property type update is not supported for property {0}. Supported types include String, Integer, Boolean.
Cause: An unsupported Coherence configuration property type was specified.
Action: Use a supported Coherence configuration property type.

Level: 15
Type: INFO
Impact: Other

OAMSSA-04014: Cannot set override properties for Coherence due to exception.
Cause: The supplied Coherence configuration properties are invalid.
Action: Correct the configuration.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04015: Datasource not found for provided name {0}.
Cause: The supplied Datasource name is invalid.
Action: Correct the configuration.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04016: Cannot store key {0} in data store.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04017: Cannot erase key {0} in data store.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04018: Cannot get Iterator of keys from data store.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04019: Cannot acquire distribution lock.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04020: Distribution version is {0}. Version requested for distribution is {1}.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04023: Cannot initialize configuration.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04024: Stale data exception encountered for config version {0}.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04032: Incorrect type of parameters {0} passed for operation {1}.
Cause: An invalid parameter type was passed to the expression builder.
Action: Pass the correct parameters required for the expression.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04033: Failed to get encryption key.
Cause: Shared Key for encryption not found.
Action: Verify that installation completed without errors.
OAMSSA-04034: Invalid configuration map path {0}
  Cause: Provided configuration map path is invalid.
  Action: Ensure that the passed configuration map path is a valid path.

OAMSSA-04035: Operation {0} supports {1} operand(s) only.
  Cause: Number of operands supplied for operation is incorrect.
  Action: Correct the API call with the required number of operands.

OAMSSA-04036: Criterion type {0} does not support operation {1}.
  Cause: Criterion does not support requested operation.
  Action: Correct the API call with supported operand.

OAMSSA-04037: Extraction of attribute {0} failed.
  Cause: Extraction of attribute failed.
  Action: Correct the API call with supported attribute extractor.

OAMSSA-04038: The passed Criterion object type {0} is not supported by transformer type {1}.
  Cause: Invalid parameter type.
  Action: Correct the API call with supported criterion type.

OAMSSA-04039: Transform for operation {0} not found.
  Cause: Operation transformation class not defined.
  Action: Correct the transformation properties file.
Type: ERROR  
Impact: Other

OAMSSA-04040: Criterion (0) does not contain operation.  
Cause: Criterion does not contain operation.  
Action: Correct the configuration to make the correct API call.  
Level: 15

Type: ERROR  
Impact: Other

OAMSSA-04041: Failed to read the operation to transforms mapping configuration.  
Cause: Unable to read the operation to transforms mapping.  
Action: Correct the configuration to make the correct API call.  
Level: 15

Type: ERROR  
Impact: Other

OAMSSA-04042: Invalid mapping [0] found for operation [1].  
Cause: Invalid operation to transform mapping.  
Action: Correct the configuration to make the correct API call.  
Level: 15

Type: ERROR  
Impact: Other

OAMSSA-04043: Null parameter value not supported.  
Cause: Invalid parameter provided  
Action: Correct the API call invocation.  
Level: 15

Type: ERROR  
Impact: Other

OAMSSA-04044: Failed to sort on field [0].  
Cause: Invalid sort field.  
Action: Invoke the search operation with Comparable sort fields  
Level: 15

Type: ERROR  
Impact: Other

OAMSSA-04045: Failed to read the attribute to operations mapping configuration.  
Using defaults.  
Cause: Unable to read the attribute to operations mapping properties file.  
Action: Correct the configuration to make the correct API call.  
Level: 15

Type: ERROR
Impact: Other

OAMSSA-04046: Invalid mapping {0} found for attribute type {1}.
Cause: Invalid attribute type to operations mapping.
Action: Correct the configuration to make the correct API call.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04047: Service {0} is not running.
Cause: Service has failed to start up or during operations.
Action: Attempt to restart server.

OAMSSA-04513: Source configuration path {0} is not specified, or is an invalid value.
Cause: Configuration path not specified for upgrade source, or is invalid value.
Action: Provide a valid configuration path.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-04514: Destination configuration path {0} is not specified, or is an invalid value.
Cause: Configuration path not specified for upgrade destination, or is invalid value.
Action: Provide a valid configuration path.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-04515: Configuration path {0} is not a valid file.
Cause: Provided path does not resolve into a valid file.
Action: Provide a path to a valid configuration file.
OAMSSA-04516: Initialization of configuration copy failed {0}.
  Cause: Configuration initialization failed.
  Action: Verify the contents of the configuration file.

OAMSSA-04517: configuration upgrade failed for component {0}.
  Cause: Configuration upgrade failed.
  Action: Rectify the cause of the failure.

OAMSSA-04518: Failed to build configuration build settings.
  Cause: Configuration setting for upgrade is not valid.
  Action: Rectify the cause of the failure.

OAMSSA-04519: Upgrade action request {0} is not valid.
  Cause: Requested upgrade action invalid.
  Action: Rectify the action request.

OAMSSA-04520: Destination configuration does not support data type {0} requested at path {1}.
  Cause: Provided configuration map value is not supported in destination configuration.
  Action: Transform the map value to a supported data type.

OAMSSA-04521: Destination configuration path {0} overwrites value {1} at element {2}.
  Cause: Destination path will overwrite value.
  Action: Change upgrade instructions to prevent path from overwriting values.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-04522: Map destination path \{0\} will overwrite preserved path \{1\}.
Cause: Destination path will overwrite value.
Action: Change upgrade instructions to prevent path from overwriting values.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04523: Exception occurred during write of configuration for examination.
Cause: Failure to write configuration for examination.
Action: Correct the cause of the associated exception.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-04524: Failed to create path \{0\}.
Cause: Creation of folder or file specified by path failed.
Action: Verify that the path can be written to, and that sufficient disk space exists.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-05001: Unable to read configuration setting \{0\}, during Journal initialization.
Cause: An internal error occurred while initializing a Journal.
Action: For more details, start logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-05002: Invalid value \{0\} for parameter \{1\} was passed for Journal operation \{2\}, in instance \{3\}.
Cause: An invalid parameter value was passed to the Journal operation.
Action: For more details, start logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-05003: Unable to acquire lock on journal data for operation \{0\}, in instance \{1\}.
Cause: A lock might have already been acquired by another thread, or there was an internal failure.
Action: For more details, start logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-05004: Journal entry with version \{0\} already exists in instance \{1\}.
Cause: A journal entry with the version already exists.
Action: Use a different version for the journal entry.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-05005: Journal entry for version \{0\} does not exist in instance \{1\}.
Cause: A journal entry for the version doesn't exist.
Action: Check version of the journal entry.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-05006: Unable to read Journal implementation name for instance \{0\}, using default name \{1\} instead.
Cause: Journal implementation name is not set in journal config setting.
Action: For more details, start logging at FINE level.

Level: 15
Type: WARNING
Impact: Other

OAMSSA-05007: Journal configuration setting for instance \{0\}, key = \{1\}, value = \{2\}.
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-05008: Journal data in instance \{0\}: type = \{1\}, value = \{2\}.
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-05009: Source is not a OAM11gR1 config file, version expected: "\{0\}",
found: "\{1\}".
Cause: The source OAM config file does not belong to a OAM 11gR1 instance.
Action: Make sure config file from OAM 11gR1 instance is passed as source for upgrade.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-05501: Configuration for REST services not found.
Cause: Configuration file does not contain REST configuration
Action: Configure OAM for REST services.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-05502: Class declaration [0] is invalid.
Cause: REST class declaration is invalid.
Action: Correct the class declaration.

  Impact: Other

OAMSSA-06015: Exception encountered while processing get authentication scheme request!
  Cause: An internal exception occurred.
  Action: For more details, start policy logging at FINE level.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-06016: Unable to reload the policy data for runtime.
  Cause: An internal exception occurred.
  Action: For more details, start policy logging at FINE level.
  Level: 15
  Type: ERROR
  Impact: Other
OAMSSA-06017: Exception encountered while creating runtime responses.
Cause: An internal exception occurred.
Action: For more details, start policy logging at FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06018: Unable to load cache.
Cause: An internal exception occurred.
Action: For more details, start policy logging at FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06019: Unable to load host identifiers from policy store.
Cause: An internal exception occurred.
Action: For more details, start policy logging at FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06020: Exception encountered while evaluating authentication policy.
Cause: An internal exception occurred.
Action: For more details, start policy logging at FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06021: Unable to obtain conditions from authorization policy.
Cause: No conditions were found.
Action: Check if policy has conditions and try again.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06022: Unable to obtain InetAddress from given IP Address.
Cause: An invalid IP Address was supplied.
Action: Check if the IP Address is valid (Only IP version 4 is supported). Try again with valid IP Address.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-06023: Unable to determine the host identifier matching the request. 
Resource: {0}.
Cause: No host identifier was configured for incoming resource.
Action: Update the policy, add the host identifier to the given resource and try again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06024: Unable to process Runtime Resource for getting URL path.
Cause: An invalid incoming resource URL.
Action: Correct the resource URL and try again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06025: Exception encountered while adding to the bucket.
Cause: An internal exception occurred.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06026: Object {0} with the name already exists.
Cause: That name has already been used to create an object.
Action: Modify the name and try to create the object once again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06027: Error while creating input stream for the policy file.
Cause: An internal error occurred. One of the many cause can be policy file not found.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06028: Error while creating a new policy distributor instance.
Cause: An internal error occurred.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-06029: ID of an element cannot be NULL.
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06030: Error while retrieving DATA SOURCE and RESPONSE TYPE values from policy.xml!
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06031: Error while retrieving the condition type.
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06032: Error while creating jaxb marshaller/unmarshaller.
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06033: Error while unmarshalling. Data may be corrupt in policy.xml
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06034: Policy data write failed with exception.
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06035: Error while creating input stream for policy file.
Cause: An internal error occurred.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06036: Cannot find the file "[0]" in the classpath or on the filesystem
Cause: The policy file was not in the classpath.
Action: Add policy file to the classpath and run the program again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06037: XML data validation Error. Data in the input XML String maybe corrupt.
Cause: The policy file was invalid.
Action: Validate policy file against the schema and run the program again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06038: Validation Error while unmarshalling. Data in the input XML String maybe corrupt.
Cause: The policy file was invalid.
Action: Validate policy file against the schema and run the program again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06039: Cannot create temporal condition. Require either DayOfWeek or TimeOfDay.
Cause: The attribute required to create a temporal condition was not valid.
Action: Either DayOfWeek or TimeOfDay is missing. Add the required attribute and run the program again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06040: Invalid condition type "[0]" found in the policy store.
Cause: An internal error occurred.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-06041: Unable to distribute policy changes.
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.

   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06042: Null passed during modify operation.
   Cause: Object passed to modify operation was null.
   Action: Rerun with actual object.

   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06043: Name cannot be null.
   Cause: During object creation, name value was null.
   Action: Rerun the operation with a valid name.

   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06044: Name {0} exceeds maximum allowed length of {1} characters.
   Cause: During object creation, invalid name attribute was passed.
   Action: Rerun the operation with a valid name attribute.

   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06045: An object of this type named "{0}" already exists.
   Cause: Policy object names must be unique for each object type and scope (global or domain).
   Action: Choose a different name for this object.

   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06046: Mandatory attribute "{0}" is missing.
   Cause: A required attribute was missing during policy object creation.
   Action: Rerun the operation with the required attribute. When authn-level is the required attribute, set a positive value and rerun the operation.

   Level: 15
   Type: ERROR
   Impact: Other
OAMSSA-06047: "name" or "description" attribute missing in Module Property.
   Cause: A name or description attribute was missing in a module property.
   Action: Rerun the operation with required attribute set.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06048: Policy Object: {0} no longer exists.
   Cause: Policy object requested for removal was not found in the store; likely it has already been removed by another administrator.
   Action: None, the object has been removed.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06049: Module cannot be deleted. (Referred in Scheme).
   Cause: Module is being referred to in the scheme.
   Action: Remove the reference from the scheme and then delete the module.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06050: NULL passed during isDefaultAuthnScheme operation.
   Cause: Null passed while performing the default authn scheme operation.
   Action: Rerun the operation with the valid scheme.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06051: One of the challenge parameter key values is empty.
   Cause: A challenge param key value was empty.
   Action: Set the proper key value and then rerun the operation.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06052: Challenge Redirect URL is invalid.
   Cause: An invalid Challenge Redirect URL was entered.
   Action: Rerun the operation with valid challenge URL value.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06053: Challenge URL is null.
OAMSSA-06054: Scheme referring to invalid authentication module.
    Cause: The scheme was referring to an invalid authentication module.
    Action: Rerun the operation after setting a valid authentication module.
    Level: 15
    Type: ERROR
    Impact: Other

OAMSSA-06055: Scheme cannot be deleted. Referenced in an existing authentication policy.
    Cause: The scheme is being referred to in a policy.
    Action: Remove the reference from the policy and then delete the scheme.
    Level: 15
    Type: ERROR
    Impact: Other

OAMSSA-06056: Default authentication scheme cannot be deleted.
    Cause: An attempt was made to delete the default authentication scheme, which is not allowed.
    Action: Rerun the operation with another authentication scheme.
    Level: 15
    Type: ERROR
    Impact: Other

OAMSSA-06057: Invalid host format.
    Cause: The host format was invalid.
    Action: Rerun the operation with a valid host.
    Level: 15
    Type: ERROR
    Impact: Other

OAMSSA-06058: Host "[0]" already exists under host identifier "{1}".
    Cause: The host is already part of a host identifier.
    Action: Remove the host from the other host identifier and then retry.
    Level: 15
    Type: ERROR
    Impact: Other

OAMSSA-06059: Host Identifier cannot be deleted. (Referred to in a resource).
Cause: Host is being referred to in a resource.
Action: Remove the reference from the resource and then delete the host.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06060: Resource "{0}" does not exist in the application domain.
Cause: Resource does not exist in the application domain.
Action: Use a valid resource that exists in the application domain.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06061: Resource "{0}" cannot be added to this policy, as it is already referenced by {1} Policy "{2}".
Cause: A resource can only be associated with a single policy of a given type.
Action: Remove the resource from the named policy and try again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06062: A resource type name cannot start with a number.
Cause: Resource type names must start with a letter.
Action: Remove the numeric characters from the start of the name.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06063: Invalid operation format.
Cause: The operation list was invalid.
Action: Rerun the operation with a valid operation list.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06064: HostIdentifier is null.
Cause: A null HostIdentifier was passed to the operation.
Action: Rerun the operation with a valid host identifier.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06065: Invalid HostIdentifier.
Cause: No HostIdentifier was found in the policy.
Action: Rerun the operation with a valid host identifier.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06066: Unable to fetch HostIdentifier manager.
Cause: An internal error occurred.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06067: Resource URL format is not valid.
Cause: URL * was not followed by a .extension, or URL pattern (*any string) * was not followed by a character string, or URL * was preceeded by a string (e.g. checking*.jsp is invalid), or URL pattern was invalid (e.g. "..." pattern is only allowed once).
Action: Rerun the operation with a valid resource url.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06068: Cannot delete resource, as it is referenced by {0} Policy "{1}".
Cause: A resource currently in use cannot be deleted.
Action: Delete the resource from the named policy and try again.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06069: Token issuance policies can not contain responses.
Cause: Token issuance policies can not contain responses.
Action: Remove the responses.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06070: Unable to obtain policy manager for application domain id: "{0}".
Cause: An internal error occurred.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06071: Temporal condition validation failure for {0}. 
Cause: Missing day of the week or time of the day required to create temporal condition, or no day selected in day of the week condition, or begin and end time not supplied for temporal condition, or end time is less than begin time.

Action: Rerun the operation with a valid Temporal condition.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06072: Identity condition validation failure for {0}.
Cause: User or group list was not supplied for identity condition creation, or users list was empty, or group list was empty.
Action: Rerun the operation with a valid Identity condition.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06073: IP4Range condition validation failure for {0}.
Cause: A null value was present in either start or end range.
Action: Rerun the operation with valid a IP4Range condition.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06074: {0} does not exist, id = {1}
Cause: An internal error occurred.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06075: Unable to obtain a host identifier for the input name : hostIdName = {0}.
Cause: An internal error occurred.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06076: Time of Day condition is not created as either begin time or end time is missing.
Cause: An internal error occurred.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06077: Cannot create condition object.
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06078: Error while creating condition of type: "{0}".
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06079: Error while reading response with name = "{0}".
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06080: Error while creating response from policy store object with name = "{0}".
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06081: Cannot open file.
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06082: Exception occurred while converting admin elements to runtime elements.
   Cause: An internal error occurred.
   Action: For more details, start policy logging at FINE level.
   Level: 15
   Type: ERROR
**Impact:** Other

**OAMSSA-06083:** No Client IPAddress found in AccessContext Map.

*Cause:* An internal error occurred.

*Action:* For more details, start policy logging at FINE level.

   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06099: Response "[0]" already exists in policy "[1]".
   Cause: The response already exists as part of an Authentication/Authorization Success/Failure List.
   Action: Rerun the operation using another response.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06100: Condition "[0]" already exists in policy "[1]".
   Cause: The condition already exists as part of an Authorization policy.
   Action: Rerun the operation using another condition.
   Level: 15
   Type: ERROR
   Impact: Other
OAMSSA-06101: Policy change record number: "{0}".
Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06102: Unable to process policy change event for change record number: "{0}".
Cause: An internal exception occurred.
Action: For more details, start policy logging at FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06103: Unable to acquire write lock on the XML policy store file, for change record number: "{0}".
Cause: The XML policy store file is locked by another thread for more than the configured wait time.
Action: For more details, start policy logging at FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06104: Success URL is invalid.
Cause: The success redirect URL was invalid.
Action: Rerun the operation with a valid URL.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06105: Failure URL is invalid.
Cause: The failure redirect URL was invalid.
Action: Rerun the operation with a valid URL.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06106: Resource URL is invalid.
Cause: The resource URL entered is invalid.
Action: Re-run the operation with valid resource URL value.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-06107: Description for field [0] exceeds maximum allowed length of [1] characters.
Cause: During object creation, invalid description attribute is passed.
Action: Re-run the operation with valid description attribute.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06108: Operation list is empty.
Cause: During object creation, invalid operation list attribute is passed.
Action: Re-run the operation with valid operation list attribute.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06109: Resources belonging to a policy must be of the same type.
Cause: The policy already contains resources of another type.
Action: Apply the resource to a different policy.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06110: Resource type must not be null.
Cause: Resource type must not be null.
Action: Set the resource type.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06111: Unable to find HTTP resource type.
Cause: The required HTTP resource type does not exist.
Action: Create a new resource type with name "HTTP".
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06112: Application Domain should be empty before it is deleted.
Cause: Application Domain is not empty.
Action: Delete all resources and policies in an application domain before deleting the domain.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-06113: The resource URL cannot contain a query string.
  Cause: The resource URL cannot contain a query string.
  Action: Remove the query string component from the resource URL.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-06114: The requested method is not supported by this policy object type.
  Cause: An internal error occurred.
  Action: For more details, start policy logging at FINE level.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-06115: An unsupported operation was unexpectedly requested.
  Cause: An internal error occurred.
  Action: For more details, start policy logging at FINE level.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-06116: A host identifier or resource type named "{0}" already exists.
  Cause: Names of host identifiers or resource types must be unique across both
  sets of objects.
  Action: Choose a different name for this object.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-06117: An unsupported operation was unexpectedly requested.
  Cause: Exception while getting host identifier.
  Action: For more details, start policy logging at FINE level.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-06118: Policy admin update event distribution setting : ":{0}".
  Cause:
  Action:
  Level: 15
  Type: NOTIFICATION
  Impact: Other

OAMSSA-06119: Policy admin update event distribution is disabled.
**Cause:** Policy admin update event distribution is disabled
**Action:** Check the policy configuration setting for policy admin update event distribution

**Level:** 15

**Type:** ERROR

**Impact:** Other

OAMSSA-06120: Host identifier doesn't exist for the given host and port.
**Cause:** There is no host identifier associated with the given host and port.
**Action:** Check the input host and port information.

**Level:** 15

**Type:** ERROR

**Impact:** Other

OAMSSA-06121: Policy runtime change event distribution failure, invalid (NULL) Journal instance.
**Cause:** An internal exception occurred while distributing policy runtime change events.
**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR

**Impact:** Other

OAMSSA-06122: Policy runtime provider {0}, does not accept policy change events.
**Cause:**
**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

OAMSSA-06123: Policy runtime provider {0}, accepts policy change events.
**Cause:**
**Action:**

**Level:** 15

**Type:** NOTIFICATION

**Impact:** Other

OAMSSA-06124: Exception encountered while fetching current policy version from policy store.
**Cause:** An internal error occurred while fetching current policy version from policy store.
**Action:** For more details, start policy logging at FINE level.

**Level:** 15

**Type:** ERROR
Impact: Other

OAMSSA-06125: Policy data refresh by policy runtime engine did not complete after [0] time, hence policy cache is not refreshed.
Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06126: Exception encountered while refreshing policy cache by policy runtime.
Cause: An internal error occurred while refreshing policy cache by policy runtime.
Action: For more details, start policy logging at FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06127: Exception encountered while handling policy change event [0] by policy runtime.
Cause: An internal error occurred while handling policy change event by policy runtime.
Action: For more details, start policy logging at FINE level.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06128: Policy data version in policy store is [0]
Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06129: Issued policy data refresh to policy runtime engine
Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06130: Skipping the addition of policy change record [0] to the Journal as policy admin provider returned the same version previously.
Cause:
Action:
OAMSSA-06131: Type "{0}" cannot be deleted, as one or more resources of this type exist.

*Cause:* Resources of the resource type to be deleted exist.

*Action:* Remove these resources, then try again.

---

OAMSSA-06132: A runtime resource must contain a URL.

*Cause:* The resource associated with the runtime request did not contain a URL.

*Action:* Create the request with a valid resource.

---

OAMSSA-06133: An HTTP runtime resource must contain a relative URL path.

*Resource:* "{0}".

*Cause:* The resource URL associated with the runtime request was not relative.

*Action:* Ensure that the resource URL is relative, starting with '/'.

---

OAMSSA-06134: Unable to match a resource type for the requested resource:

*request*="/0".

*Cause:* No resource type was configured for the requested resource.

*Action:* Add the required resource type.

---

OAMSSA-06135: Only querying policies from policy store ...

*Cause:

*Action:

---

OAMSSA-06137: Where <properties-file> should contain the following properties:

*Cause:

*Action:
OAMSSA-06138: policy-admin-provider-class=<provider-class-name>
Cause:
Action:

OAMSSA-06139: policy-admin-provider-name=<provider-name>
Cause:
Action:

OAMSSA-06140: <provider-name>.<provider-property-name>=<provider-property-value>
Cause:
Action:

OAMSSA-06141: ... list of provider properties.
Cause:
Action:

OAMSSA-06179: Invalid usage!
  Cause: Command line arguments passed were invalid.
  Action: Rerun the command with correct arguments.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-06180: Property file location argument is missing!
Cause: Property file location is invalid.
Action: Provide the correct property file location.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06181: Error! PolicyFile: "{0}" already exists! Remove this file before running the tool.
Cause: Policy file already exists.
Action: Remove this file before running the tool.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06182: Policy object not found!
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06183: Global default domain not yet setup!
Cause: Global default domain is not setup.
Action: Create global default domain.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06184: VM Property not set: "{0}"
Cause: Required JVM property was not set.
Action: Set the required JVM property.

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06185: Policy cannot make use of both specific and default schemes.
Cause: An authentication policy cannot use both a specific, named scheme and the default one.
Action: Ensure the policy uses either a specific scheme or the default one, not both.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-06186: Unable to initialize PolicyRuntimeProviderImpl! : "{0}".
   Cause: PolicyRuntime provider could not be initialized.
   Action: Recheck the oes settings and modify accordingly.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06187: Invalid IP address on range check, IP address was: "{0}".
   Cause: An IP address was provided out of range.
   Action: Provide correct IP address.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06188: App Domain Manager not setup.
   Cause: App domain manager was not set up.
   Action: Setup domain manager.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06189: Extension manager not found.
   Cause: Extension manager was not set up.
   Action: Setup extension manager.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06190: The host: "{0}" occurs more than once in the host identifier: "{1}".
   Cause: Same host entry is specified more than once in a host identifier.
   Action: Ensure same host is not added more than once to a host identifier.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06191: The runtime request is null or contains no resource.
   Cause: The runtime request, or the resource associated with the request, was null.
   Action: Create the request with a proper resource.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06192: The runtime request contains no identity.
   Cause: The identity associated with the runtime request was null.
Action: Create the request with a proper identity.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06193: Unable to process policy distribution event.
Cause: The policy admin provider failed to apply the changes contained in the event.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06194: Verifying OAM10g policy objects ...
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06195: Fetching OAM10gScheme authentication scheme ...
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06196: Adding OAM10g policy objects ...
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06197: Policy contains multiple constraints of class {0} and type {1}.
Cause: Each constraint class/type combination can appear at most once within a policy.
Action: Modify the policy to ensure that multiple constraints of the same class and type are not present.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06198: Authentication scheme {0} not found.
Cause: Authentication scheme not found in store
Action: Ensure that the authentication scheme has been created.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06199: Multiple resources exist for Authentication scheme {0}.
Cause: Authentication scheme is represented by multiple resources.
Action: Ensure that the data in the OES store is valid.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06200: Waiting for policy distribution ...
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06201: Waited {0} ms for policy distribution to complete ...
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06202: Distribution completed, total time taken was: {0}.
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06203: Distribution did not complete within the configured maximum wait time of {0} ms.
Cause: Policy distribution did not complete within maximum wait time alloted.
Action: Increase the maximum wait time for policy distribution in the config file.

Level: 15
Type: WARNING
Impact: Other

OAMSSA-06204: Condition "{0}" is of a type which cannot be used in a token issuance policy.
Cause: Only some types of conditions can be used with a token issuance policy.
Action: Use only conditions of types which are compatible with this policy.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06205: Resource "[0]" is of a type which cannot be used in a token issuance policy.
Cause: Only some types of resources can be used with a token issuance policy.
Action: Use only resources of types which are compatible with this policy.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06206: The token requestor identity condition validation failed for [0].
Cause: None of partner, user or group information was provided for condition creation.
Action: Provide at least one of partner, user or group information for condition creation.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06207: Only HTTP resources can have a protection level of Excluded.
Cause: An attempt was made to set the protection level of a non web resource to excluded.
Action: The protection level of non web resource can be either protected or unprotected.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06208: Excluded resource: [0], cannot have a policy associated.
Cause: An attempt was made to associate a excluded resource with a policy.
Action: Change the protection level to either protected or unprotected to create a policy around this resource.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06209: Resource protection level is null.
Cause: Resource protection level was set to null.
Action: Resource protection level should be set to valid values.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06210: Unprotected resource {0} cannot be associated with this policy, as it uses a non-anonymous authentication scheme.
Cause: Unprotected resources cannot be associated with this policy, as it uses a non-anonymous authentication scheme.
Action: Change the protection level of the resource(s) to Protected before adding to the policy.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06211: Protected resource {0} cannot be associated with this policy, as it uses an anonymous authentication scheme.
Cause: Protected resources cannot be associated with this policy, as it uses an anonymous authentication scheme.
Action: Change the protection level of the resource(s) to Unprotected before adding to the policy.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06212: Invalid request: isTokenRequestAuthorized calls cannot be made for HTTP resources.
Cause: An attempt was made at runtime to evaluate token issuance policy for HTTP resource.
Action: Make sure that at runtime HTTP resource is not used when evaluating Token issuance policies.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06213: Could not find application domain for Id: {0}, name: {1}.
Cause: Provided Application domain was not found in the store.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06214: Could not find hostIdentifier for Id: {0}.
Cause: Provided host identifier was not found in the store.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06215: Could not find hostIdentifier for name: {0}.
Cause: Given host identifier name was not found in the store.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06216: Could not find store entry for application domain Id: {0}.
Cause: No entry was found in the store for the given application domain Id.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06217: Excluded resource: {0} is not associated with the exclusion policy.
Cause: An excluded resource in the store was not associated with the exclusion policy.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06218: Invalid store resource name {0}.
Cause: The store resource name entry was found to be invalid.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06219: Invalid operation name: {0}, operation name cannot end with string: {1}.
Cause: The resource type operation name is invalid.
Action: Modify the operation name for the resource type.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06221: Exception while decrypting OES credentials.
Cause: An exception occurred while decrypting store credentials.
Action: For more details, start policy logging at FINE level.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-06222: Could not find the exclusion policy in the store from which to remove resource: {0}.
  Cause:  The exclusion policy was not found in the store from which the resource was requested to be removed.
  Action:  For more details, start policy logging at FINE level.

OAMSSA-06250: Fetching TAPScheme authentication-scheme object ...
Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06251: Unsupported policy store version detected. Required "[0]" but found "[1]".
Cause: The version of policy store is not compatible with OAM version.
Action: Make sure OAM is configured to talk to correct version of policy store.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-06252: The policy store is not available; please see the log file for more details.
   Cause: Policy store could not be instantiated. Database schema may be out of date
   Action: In case of database schema errors schema needs to be updated.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06253: Database schema is not valid.
   Cause: Database schema is missing or requires update.
   Action: Update the database schema.
   Level: 15
   Type: ERROR
   Impact: Other

OAMSSA-06254: Profiling started, strategy: \{0\}, amount: \{1\}, mechanism: \{2\}
   Cause:
   Action:
   Level: 15
   Type: NOTIFICATION
   Impact: Other

OAMSSA-06255: Profiling report for \{0\}: \{1\} ops, \{2\}/\{3\}/\{4\} avg/min/max (ms)
   Cause:
   Action:
   Level: 15
   Type: NOTIFICATION
   Impact: Other

OAMSSA-06256: Profiling ended.
   Cause:
   Action:
   Level: 15
   Type: NOTIFICATION
   Impact: Other

OAMSSA-06257: All hosts from R1 host identifier \{0\} would be migrated to PS1 host identifier \{1\}.
   Cause:
   Action:
   Level: 15
   Type: NOTIFICATION
   Impact: Other
OAMSSA-06258: The authentication scheme of authentication policy [0] would be modified to [1].
Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06259: Extra resource(s) were found in R1 [1] Protected policy. The following will need to be recreated manually after the upgrade is complete: [0].
Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06261: The LDAP filter search not executed because there was no DN for user [0].
Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06262: The LDAP filter [0] match for user [1] and identity domain [2] was successful.
Cause:
Action:
Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-06263: No user identity provider for domain [0] could be found.
Cause: No user identity provider could be found for the given domain.
Action: Check if the relevant userstore configuration was deleted.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-06264: Error getting the user identity provider for domain {0}.
  Cause: Unknown error while fetching the user identity provider for the given domain.
  Action: Check the relevant userstore configuration

Level: 15
Type: ERROR
Impact: Other
OAMSSA-06265: The IP4 Address {0} is not valid.
  Cause: The IP4 address specified is invalid.
  Action: Specify a valid IP4 address. This should be in the dotted decimal format xxx.xxx.xxx.xxx, where xxx is a number between 0 and 255.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-06266: The "From" address {0} in the IP4 range is greater than the "To" address {1}.
  Cause: The From address in the IP4 range is greater than the "To" address in the IP4 range.
  Action: Update the IP4 range so that the "To" address is greater than the "From" address.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-06267: Condition {0} does not contain any attributes.
  Cause: Attribute list was not supplied for condition creation.
  Action: Rerun the operation with a valid attribute list.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-06268: Condition {0} contains an unset attribute name.
  Cause: An attribute name was not supplied for condition.
  Action: Rerun the operation with a valid attribute name.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-06269: Condition {0} contains an unset attribute value.
  Cause: An attribute value was not supplied for condition.
  Action: Rerun the operation with a valid attribute value.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-06270: Resource type {0} cannot be created as read-only, or modified if already read-only.
Cause: A policy admin cannot create/update/delete read-only resource type without permission to do so.
Action: Do not attempt to manipulate a read-only resource type.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06271: One or more operations cannot be created as read-only, or modified if already read-only.
Cause: A policy admin cannot create/update/delete read-only operation(s) without permission to do so.
Action: Do not attempt to manipulate a read-only operation within a resource type.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06272: Operation {0} can not be used, because it does not exist for the type of this resource.
Cause: An invalid operation, one which does not exist for the resource's type, was used.
Action: Ensure that the operations added to a resource are a subset of those defined for its resource type.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06273: Policy contains more than one rule for rule effect "{0}".
Cause: More than the allowed single rule per rule effect was present.
Action: Create the policy using a single rule per rule effect.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06274: At least one of the policy rules must hold conditions selected for evaluation.
Cause: A policy using the simple rule mode needs one or more of the rules to contain conditions.
Action: Select conditions on at least one of the rules.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-06275: Invalid condition name "(0)" specified in "(1)" rule.
Cause: A condition name was used within a rule, when no condition by that name exists.
Action: Use names of conditions which exist when creating rules.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-06276: The same rule mode must be used across all rules contained in a policy.
Cause: More than one rule mode was used within the policy’s rules.
Action: Use only one rule mode within a policy.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-06277: Unable to process policy rule expression "(0)".
Cause: Policy rule expression processing failed.
Action: For more details, start logging at the FINE level.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-06278: At least one of the policy rules must hold an expression for evaluation.
Cause: A policy using the expression rule mode needs one or more of the rules to contain expressions.
Action: Create a valid rule expression on at least one of the rules.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-06279: Unexpected token "(0)" encountered at line "(1)", column "(2)" in the rule expression.
Cause: Rule expression contains invalid syntax.
Action: Use a valid rule expression in rules within a policy.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-06280: Number of open and close braces do not match in the rule expression.
Cause: Rule expression contains invalid syntax.
Action: Use a valid rule expression in rules within a policy.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06281: Unable to escape special characters for condition name "[0]" to be used in rule expression.
Cause: Internal error encountered while processing condition name.
Action: For more details, start logging at the FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06282: Unable to remove previously escaped special characters for a condition name "[0]" that is used in the rule expression.
Cause: Internal error encountered while processing condition name.
Action: For more details, start logging at the FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06283: Condition name "[0]" used at line "[1]", column "[2]" in rule expression is not defined in the policy.
Cause: Rule expression refers to a condition which has not been defined within the policy.
Action: Use a valid rule expression in rules within a policy.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06284: Both a query string and query parameters are specified for the resource.
Cause: A resource can have a query string or parameters specified, but not both.
Action: Remove either the query string or the query parameters from the resource.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06285: Exception encountered during policy rule evaluation. Condition "[0]" does not exist in authorization policy.
Cause: Internal error encountered while evaluating policy rule.
Action: For more details, start logging at the FINE level.

Level: 15
Type: ERROR
Impact: Other
OAMSSA-06286: Rule expression token must have a type.
    Cause: An internal error occurred.
    Action: For more details, start logging at the FINE level.
    Level: 15
    Type: WARNING
    Impact: Other

OAMSSA-06287: An HTTP runtime resource must contain a host name.
    Cause: The resource associated with the runtime request did not contain a host name.
    Action: Create the request with a valid resource.
    Level: 15
    Type: ERROR
    Impact: Other

OAMSSA-06288: An HTTP runtime resource must contain a valid port number.
    Resource: "{0}".
    Cause: The resource associated with the runtime request did not contain a valid port.
    Action: Create the request with a valid port, between 0 and 65535 inclusive.
    Level: 15
    Type: ERROR
    Impact: Other

OAMSSA-06289: This resource already exists, within domain "{0}".
    Cause: Resources belong to different application domains, but must be globally unique.
    Action: Either modify or remove the conflicting resource, or the elements of the one being created.
    Level: 15
    Type: ERROR
    Impact: Other

OAMSSA-06301: Response tokenization failed for policy: "{0}" in domain: "{1}".
    Response details: "{2}".
    Cause: An internal error occurred.
    Action: For more details, start logging at the FINE level.
    Level: 15
    Type: ERROR
    Impact: Other

OAMSSA-06302: Error thrown during response processing:
    Cause: An internal error occurred.
    Action: For more details, start logging at the FINE level.
OAMSSA-06303: No provider registered to handle namespace: "{0}".
  Cause: An internal error occurred.
  Action: For more details, start logging at the FINE level.

OAMSSA-06304: Provider failed to retrieve value for policy: "{0}" in domain: "{1}".
  Response details: "{2}".
  Cause: An internal error occurred.
  Action: For more details, start logging at the FINE level.

OAMSSA-06305: Invoked provider for unsupported namespace: "{0}".
  Cause: An internal error occurred.
  Action: For more details, start logging at the FINE level.

OAMSSA-06306: Invoked provider for unsupported variable name: "{0}".
  Cause: An internal error occurred.
  Action: For more details, start logging at the FINE level.

OAMSSA-06307: Subject is missing from the request context.
  Cause: An internal error occurred.
  Action: For more details, start logging at the FINE level.

OAMSSA-06308: Expected user attribute not found.
  Cause: An internal error occurred.
  Action: For more details, start logging at the FINE level.
Type: ERROR
Impact: Other

OAMSSA-06309: No attributes found in identity store for user: "[0]".
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-06310: Provider registration requires a class instance and list of namespaces.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-06311: Namespace must not be null.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-06312: Provider already registered for namespace: "[0]".
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15

Type: ERROR
Impact: Other

OAMSSA-06313: Response token must have a type.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15

Type: WARNING
Impact: Other

OAMSSA-06314: Variable namespace cannot be null.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
Level: 15
Type: ERROR
**Impact:** Other

**OAMSSA-06315:** Session ID cannot be null or empty.
**Cause:** An internal error occurred.
**Action:** For more details, start logging at the FINE level.
**Level:** 15
**Type:** ERROR
**Impact:** Other

**OAMSSA-06316:** Invalid session parameter name specified.
**Cause:** An internal error occurred.
**Action:** For more details, start logging at the FINE level.
**Level:** 15
**Type:** ERROR
**Impact:** Other

**OAMSSA-06317:** Could not find session with id: "[0]".
**Cause:** An internal error occurred.
**Action:** For more details, start logging at the FINE level.
**Level:** 15
**Type:** ERROR
**Impact:** Other

**OAMSSA-06318:** Invalid variable reference: "[0]".
**Cause:** An internal error occurred.
**Action:** For more details, start logging at the FINE level.
**Level:** 15
**Type:** ERROR
**Impact:** Other

**OAMSSA-06319:** Variable name cannot be null: "[0]".
**Cause:** An internal error occurred.
**Action:** For more details, start logging at the FINE level.
**Level:** 15
**Type:** ERROR
**Impact:** Other

**OAMSSA-06320:** Invalid variable attribute reference: "[0]".
**Cause:** An internal error occurred.
**Action:** For more details, start logging at the FINE level.
**Level:** 15
**Type:** ERROR
**Impact:** Other

**OAMSSA-06321:** Expected session attribute not found.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-06322: Cannot apply session response for policy: "{0}" in domain: "{1}".
Response details: "{2}".
Cause: A session response could not be applied. The request was not made by an authenticated user, hence no session was associated with it.
Action: Do not set session responses on policies which are public, e.g. not requiring authentication.

   Level: 15

Type: ERROR
Impact: Other

OAMSSA-08025: Profile {0} specified by {1} does not exist.
   Cause: Server instance profile does not exist.
   Action: Correct the definition in the configuration file.
   Level: 15

Type: ERROR
Impact: Other

OAMSSA-08026: Profile {0} specified by {1} should be of type htf:map.
   Cause: Server instance profile should be of type map.
   Action: Correct the definition in the configuration file.
   Level: 15

Type: ERROR
Impact: Other
OAMSSA-08027: Global section under {0} should be of type htf:map.
  Cause: Server global section should be of type map.
  Action: Correct the definition in the configuration file.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-08028: Error parsing the configuration file {0}.
  Cause: Error parsing the configuration file.
  Action: Verify the configuration.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-08029: Configuration file open error {0}.
  Cause: An error occurred when opening the file.
  Action: Verify the file location. Ensure that it is on the classpath or that its location is defined as a system property.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-08030: Cannot get xml for configuration.
  Cause: Cannot get xml for configuration.
  Action: Correct the error indicated by the exception.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-08031: Cannot load configuration from InputStream.
  Cause: Cannot load configuration from InputStream.
  Action: Correct the error indicated by the exception.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-08032: Configuration event dispatch failed.
  Cause: Dispatch of the configuration event failed.
  Action: Correct the error indicated by the exception.
  Level: 15
  Type: ERROR
  Impact: Other

OAMSSA-08033: Setting handler not found for type: {0}.
Cause: Configuration setting does not have a corresponding handler.
Action: Verify that the setting type is defined correctly.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08051: Configuration file is not loaded.
Cause: Configuration file was not loaded. See exception for cause.
Action: Correct the configuration file if it is badly formed.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08052: Configuration model is not found for object type {0}.
Cause: Configuration file was not loaded. See exception for cause.
Action: Correct the configuration file if it is badly formed.

Level: 15
Type: WARNING
Impact: Other

OAMSSA-08053: Error during construction of configuration model instantiation.
Cause: Invalid configuration data.
Action: Verify the configuration data for correctness.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08054: Configuration file is not saved.
Cause: Configuration file was not saved. See exception for cause.
Action: Correct the configuration file if it is badly formed.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08055: Configuration file does not support List of Lists construct. Ignoring element {0}.
Cause: Configuration file has an unsupported data construct.
Action: Correct the configuration file if it is badly formed.

Level: 15
Type: WARNING
Impact: Other

OAMSSA-08056: Path {0} and key set in the CompositeData {1} do not match.
Cause: Call made with inconsistent data.
Action: Correct the parameters of the call.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08057: Single valued data type found for multi-valued property on key {0}.
Cause: Call made on invalid data type
Action: Correct the parameters of the call.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08058: Multi-valued data type found for single valued property on key {0}.
Cause: Call made on invalid data type.
Action: Correct the parameters of the call.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08059: Operation returned type {0}. Expecting type {1}.
Cause: Property type accessed not found.
Action: Use the correct operation for the type.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08060: Cannot apply document to configuration. Exception message is {0}.
Cause: Document application failed.
Action: Use the correct operation for the type.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08061: Jar definitions provided for path {0} are invalid.
Cause: The path does not exist, or the jars are missing.
Action: Correct the configuration file with the right values.

Level: 15
Type: ERROR
Impact: Other

OAMSSA-08062: Jar definition {0} provided is invalid.
Cause: The path does not exist, or the jar is missing.
Action: Correct the configuration file with the right value.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08063: Distribution event of version {0} received for configuration of version {1}.
Cause: Distribution values are not updated with latest configuration settings.
Action: Restart the server to ensure that it is synchronized with other servers.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08064: Received null object as distribution event.
Cause: Some server has not placed the document on the distributor.
Action: Locate the server and restart it.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08065: Cannot handle distribution notification.
Cause: An unexpected failure.
Action: Diagnose the problem from the stacktrace and address it.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08066: Cannot find the map for key {0}
Cause: An attempt was made to add a value to a map that does not exist.
Action: Ensure that the map exists before adding the property for the map
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08067: Invalid data {0} provided for time interval
Cause: Invalid data provided for construction of time interval.
Action: Correct the data in the configuration file.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-08068: Invalid data {0} provided for memory size.
Cause: Invalid data provided for construction of memory size.
Action: Correct the data in the configuration file.
Level: 15  
Type: ERROR  
Impact: Other  

OAMSSA-08069: Configuration MBean not initialized.  
Cause: Initialization failure during MBean startup.  
Action: Verify the exceptions at startup and correct the cause of the error.

Level: 15  
Type: ERROR  
Impact: Other  

OAMSSA-08070: Setting properties at path {0} not supported  
Cause: path provided is invalid  
Action: Correct the path provided.

Level: 15  
Type: ERROR  
Impact: Other

OAMSSA-08071: Unsupported configuration store version detected. Required "{0}" but found "{1}".  
Cause: The version of config store is not compatible with OAM version.  
Action: Make sure OAM is configured to talk to correct version of config store.

Level: 15  
Type: ERROR  
Impact: Other

OAMSSA-08072: Applying configuration update at path {0}. Current version of configuration {2}. Change initiated on this node: {1}  
Cause: None  
Action: None

Level: 15  
Type: NOTIFICATION  
Impact: Other

OAMSSA-08073: Error occurred while accessing the System Identity Store.  
Cause: Failure while processing the configuration or when accessing the System Identity Store.  
Action: Verify the System Identity Store configuration and that the directory is up and running.

Level: 15  
Type: ERROR  
Impact: Other

OAMSSA-08074: User {0} is not authorized to invoke operation on the Oracle Access Management MBeans
**Cause:** The user does not have the privileges to access the MBeans.

**Action:** Verify the System Identity Store configuration to ensure the correct privileges are set.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-10001: SSO server token parsing failed.**

**Cause:** The SSO server token was invalid.

**Action:** Verify the server token key size and algorithm configuration.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-10002: SSO server token Marshaling failed.**

**Cause:** An internal error occurred.

**Action:** For more details, start logging at the FINE level.

**Level:** 15  
**Type:** ERROR  
**Impact:** Other

**OAMSSA-10003: SSO Session is not valid.**

**Cause:** The SSO session was missing, has been deleted, or has expired.

**Action:** For more details, start logging at the FINE level.

**Level:** 15

Impact: Other

OAMSSA-12101: Unable to register metrics for Authentication Engine with DMS.
Cause:
Action:

Level: 15
Type: NOTIFICATION
Impact: Other

OAMSSA-12102: Failed to initialize Authentication Engine Controller.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.
OAMSSA-12103: Unable to connect to User Identity Store.
  Cause: The User Identity store was not running or the configuration was not valid.
  Action: Verify that User Identity store is running and the configuration is valid.

OAMSSA-12104: Authentication Module Executor is unable to get configuration parameters.
  Cause: An internal error occurred.
  Action: For more details, start logging at the FINE level.

OAMSSA-12105: Cannot initialize authentication scheme executor.
  Cause: An internal error occurred.
  Action: For more details, start logging at the FINE level.

OAMSSA-12106: Authentication Failed.
  Cause: The authentication was not successful.
  Action: For more details, start logging at the FINE level.

OAMSSA-12107: Invalid SPNEGO token in the request.
  Cause: The SPNEGO token in the incoming request was either invalid or missing.
  Action: For more details, start logging at the FINE level.

OAMSSA-12108: Invalid CallbackHandler in SPNEGO LoginModule.
  Cause: The CallbackHandler was not initialized properly.
  Action: Verify the configuration.
Level: 1
Type: INCIDENT_ERROR
Impact: Other

OAMSSA-12109: Invalid Subject in SPNEGO LoginModule.
  Cause: An internal error occurred.
  Action: For more details, start logging at the FINE level.

Level: 1
Type: INCIDENT_ERROR
Impact: Other

OAMSSA-12110: Currently only value {0} is supported for parameter {1}.
  Cause: An invalid value was supplied for a parameter.
  Action: Rerun the operation with a valid parameter value.

Level: 1
Type: WARNING
Impact: Other

OAMSSA-12111: No user found in User Identity Store for the User certificate with
certificate attribute {0} value {1}.
  Cause: The mapping of the user certificate to an user entry was incorrectly
  configured.
  Action: Verify the configuration.

Level: 1
Type: ERROR
Impact: Other

OAMSSA-12112: Cannot find the certificate of the OCSP server.
  Cause: No OCSP server certificate was present in the keystore.
  Action: Ensure that correct value is configured for the parameter OCSP_SERVER_<
  CERT_ALIAS.

Level: 1
Type: ERROR
Impact: Other

OAMSSA-12113: Initialization of the X509ModuleExecutor failed.
  Cause: The keystore file was missing, or could not be read.
  Action: Verify the configuration.

Level: 1
Type: ERROR
Impact: Other

OAMSSA-12114: Initialization of the X509ModuleExecutor failed.
  Cause: An internal error occurred.
Action: Verify the configuration setting for the CERTMAPPERCLASS parameter of X509 Authentication Module and ensure that the class is present in the classpath.

Level: 1
Type: ERROR
Impact: Other

OAMSSA-12115: Initialization of the X509ModuleExecutor failed.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.

Level: 1
Type: ERROR
Impact: Other

OAMSSA-12116: Cannot find the user certificate.
Cause: An internal error occurred.
Action: Verify the configuration and rerun this operation using a valid user certificate.

Level: 1
Type: WARNING
Impact: Other

OAMSSA-12117: Cannot validate the user certificate.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level.

Level: 1
Type: ERROR
Impact: Other

OAMSSA-12118: Cannot load the configuration for authentication module {0}.
Cause: An internal error occurred.
Action: For more details, start logging at the FINE level. Check the log file and correct the error.

Level: 1
Type: ERROR
Impact: Other

OAMSSA-12119: Multiple users found in User Identity Store for the User certificate with certificate attribute {0} value {1}.
Cause: The mapping of the user certificate to an user entry was incorrectly configured.
Action: Verify the configuration.

Level: 1
Type: ERROR
Impact: Other

OAMSSA-12120: Failed to map DN against identity store.
Cause: DN not found in Ldap store.
Action: Check DN and re-run the test.
Level: 1
Type: NOTIFICATION
Impact: Other

OAMSSA-12121: Failed to map GUID against identity store.
Cause: GUID not found in Ldap store.
Action: Check GUID and re-run the test.
Level: 1
Type: NOTIFICATION
Impact: Other

OAMSSA-12122: Unable to find the mapper class for DAPModuleExecutor.
Cause: Unable to find the mapper class.
Action: Check the DAP Module mapper class configuration
Level: 15
Type: ERROR
Impact: Other

OAMSSA-12123: Initialization of the DAPModuleExecutor failed.
Cause: DAPModule init failed.
Action: Check the DAP Module configuration.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-12124: No user found in User Identity Store for the DAP Token with username value {0}.
Cause: Username could not be found in the identity store.
Action: Check the incoming DAP assertion token.
Level: 15
Type: ERROR
Impact: Other

OAMSSA-12125: No username found in DAP assertion token.
Cause: No username found in request.
Action: Check the incoming DAP assertion token.
Level: 15
Type: ERROR
Impact: Other
OAMSSA-12126: Cannot assert the username from DAP token.
Cause: Cannot assert the username from DAP token
Action: Check the incoming DAP assertion token.

*Type:* ERROR  
*Impact:* Other
ODI-01210: Session start failure on agent {0}: work repository {1} version {2} is not compatible with the agent version {3}.

**Cause:** The work repository was upgraded but not this agent, or the agent was upgraded but not the work repository.

**Action:** Upgrade the work repository version or the agent version.

**Level:** 1

**Type:** ERROR

**Impact:** Other

ODI-01211: Session start failure on agent {0}: work repository {1} is not bound to the master repository.

**Cause:** The work repository specified in the request was not found in the list of work repositories attached to this master.

**Action:** Verify that work repository name matches an existing one.

**Level:** 1

**Type:** ERROR

**Impact:** Other

ODI-01212: Session preparation failure: scenario {0} does not exist in work repository {1}.

**Cause:** The session request was received, but the agent was unable to find the named scenario in the work repository.

**Action:** Verify that the scenario name matches an existing scenario name in the work repository.

**Level:** 1

**Type:** ERROR

**Impact:** Other

ODI-01213: Session preparation failure: scenario {0} version {1} does not exist in work repository {2}.

**Cause:** The session request was received, and the scenario existed in the work repository, but not with the specified version.

**Action:** Ensure that the scenario version matches an existing scenario version in the work repository.

**Level:** 1

**Type:** ERROR

**Impact:** Other

ODI-01214: Session preparation failure: context {0} does not exist in the master repository.

**Cause:** The session request was received, but the agent was unable to find the context in the master repository.

**Action:** Ensure that the context matches an existing context code in the Topology.

**Level:** 1

**Type:** ERROR

**Impact:** Other
ODI-01215: Session preparation failure: privileges are insufficient to run scenario {0}.{1} in repository {2}.
   Cause: User privileges were not sufficient for running this scenario in this repository.
   Action: Ensure that the user has sufficient privileges for this task.

Level: 1
Type: ERROR
Impact: Other

ODI-01216: Session preparation failure: insufficient privileges to use Context {0} ({1}).
   Cause: User privileges were not sufficient for using this context.
   Action: Ensure that the user has sufficient privileges for this task.

Level: 1
Type: ERROR
Impact: Other

ODI-01217: Session {0} ({1}) fails with return code {2}.
   Cause: The session finished in an error state.
   Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01218: Session preparation failure: database error occurs while connecting to the master repository.
   Cause: The agent received a database error from the master repository while creating the session.
   Action: Verify the state of the master repository database.

Level: 1
Type: ERROR
Impact: Other

ODI-01219: Session preparation failure: database error while connecting to work repository {0}.
   Cause: The agent received a database error from the work repository while creating the session.
   Action: Verify the state of the work repository database.

Level: 1
Type: ERROR
Impact: Other

ODI-01220: Session preparation failure: an unexpected exception occurred.
   Cause: The remote agent faced an unexpected error while attempting to create the session.
Action: Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode).

Level: 1
Type: ERROR
Impact: Other

ODI-01221: Unable to restart session {0}: session is not found in work repository {1}.
Cause: The session to restart did not exist in the repository. This session may have been deleted, or an incorrect session ID or work repository was supplied.
Action: Verify that a session with this ID exists in the repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01222: Session start failure on agent {0}: logical schema {1} cannot be found in the master repository.
Cause: The object to be executed referred to a logical schema not present in the master repository.
Action: Ensure that the logical schema configuration exists in your master repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01223: Database error while connecting to the master repository.
Cause: The connection for the master repository database was incorrect, or the repository database was down.
Action: Verify the master repository connection information and the status of the master repository database.

Level: 1
Type: ERROR
Impact: Other

ODI-01224: Database error while connecting to work repository {0}
Cause: The connection for the work repository database was incorrect, or the repository database was down.
Action: Verify the work repository connection information and the status of the master repository database.

Level: 1
Type: ERROR
Impact: Other

ODI-01225: An unexpected exception occurred.
Cause: The agent faced an unexpected exception.
Action: Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode).

Level: 1
Type: ERROR
Impact: Other

ODI-01226: Step {0} fails after {1} attempt(s).
Cause: This is an execution warning. The session step failed to execute after the maximum number of retries. If step failure was not handled in the package design, the session finished in an error state.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01227: Task {0} fails on the source connection {1}.
Cause: This is an execution warning. The command on the source for this task finished with an error.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01228: Task {0} fails on the target connection {1}.
Cause: This is an execution warning. The command on the target for this task finished with an error.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01229: An error occurred while performing a {0} operation on model code {1}.
Cause: This is an execution warning. The operation specified failed on the model.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01231: An error occurred while performing a {0} operation on datastore {1}.
Cause: This is an execution warning. The operation specified failed on the datastore.
**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1

**Type:** WARNING

**Impact:** Other

ODI-01232: Procedure [0] execution fails.

**Cause:** This is an execution warning. The procedure execution failed.

**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1

**Type:** WARNING

**Impact:** Other

ODI-01233: Error while evaluating variable the following expression: [0] [1] [2]

**Cause:** This is an execution warning. The variable evaluation failed.

**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1

**Type:** WARNING

**Impact:** Other

ODI-01235: Error while incrementing variable [0] to value [1]

**Cause:** This is an execution warning. The variable increment failed.

**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1

**Type:** WARNING

**Impact:** Other

ODI-01236: Error while refreshing variable [0].

**Cause:** This is an execution warning. The variable refresh failed.

**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1

**Type:** WARNING

**Impact:** Other

ODI-01237: Error while setting variable [0] to value [1].

**Cause:** This is an execution warning. The set variable operation failed.

**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1

**Type:** WARNING
Impact: Other

ODI-01238: Flow {0} fails because the maximum number of allowed errors ({1} rows) is exceeded during the flow check. This flow loads target table {2}.
Cause: This is an execution warning. The interface failed because the number of errors detected in the flow exceeded the value defined in the interface.
Action: Review the session execution details in the Operator Navigator or Repository Explorer. Review the erroneous records for this interface in the error table.
Level: 1
Type: WARNING
Impact: Other

ODI-01239: Flow {0} fails because the maximum percentage of allowed errors ({1} %) is exceeded during the flow check. This flow loads target table {2}.
Cause: This is an execution warning. The interface failed because the percentage of errors detected in the flow exceeded the value defined in the interface.
Action: Review the session execution details in the Operator Navigator or Repository Explorer. Review the erroneous records for this interface in the error table.
Level: 1
Type: WARNING
Impact: Other

ODI-01240: Flow {0} fails while performing a {1} operation. This flow loads target table {2}.
Cause: This is an execution warning. The interface failed because one of the statements returned an error return code.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: WARNING
Impact: Other

ODI-01241: Oracle Data Integrator tool execution fails.
Cause: This is an execution warning. The tool execution failed.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: WARNING
Impact: Other

ODI-01242: Operating system command execution fails.
Cause: This is an execution warning. Execution of the operating system command failed.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: WARNING
Impact: Other

ODI-01243: Session {0} ({1}) fails because work repository {2} went down.
Cause: Work repository database went down while session was being executed.
Action: Verify the state of the work repository database. The session must be restarted.

Level: 1
Type: ERROR
Impact: Other

ODI-01244: Session {0} {1} was prepared successfully but fails because work repository {2} went down before execution could begin.
Cause: Work repository database went down while session was starting its execution.
Action: Verify the state of the work repository database. The session must be restarted.

Level: 1
Type: ERROR
Impact: Other

ODI-01245: Session preparation failure: work repository {0} went down during session preparation.
Cause: Work repository went down while session was being prepared.
Action: Verify the state of the work repository database. The session must be restarted.

Level: 1
Type: ERROR
Impact: Other

ODI-01246: The Logical Schema has not been set for {0}.
Cause: Because the logical schema had not been set, the object could not be executed.
Action: Verify the object that you are trying to execute, and set the logical schema for this object.

Level: 1
Type: ERROR
Impact: Other

ODI-01247: Session {0} {1} was prepared successfully but fails because master repository went down before execution could begin.
Cause: Master repository database went down while session was starting its execution.
Action: Verify the state of the master repository database. The session must be restarted.
Level: 1
Type: ERROR
Impact: Other

ODI-01248: Session preparation failure by Agent [0]: master repository went down during session preparation.
Cause: Master repository went down while session was being prepared.
Action: Verify the state of the master repository database. The session must be restarted.

Level: 1
Type: ERROR
Impact: Other

ODI-01249: Session [0] ([1]) fails because master repository went down.
Cause: Master repository database went down while session was being executed.
Action: Verify the state of the master repository database. The session must be restarted.

Level: 1
Type: ERROR
Impact: Other

ODI-01250: Session [0] ([1]) could not be stopped by Agent [2] because session [0] [1] already completed execution.
Cause: The session has already completed and cannot be stopped.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01251: Session ([0]) could not be stopped by Agent [1] because session ([0]) was not found in work repository [2].
Cause: The session was not found in the work repository.
Action: Verify that a session with this ID exists in the repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01252: Session ([0]) could not be stopped by Agent [1]: insufficient privileges to access session.
Cause: User privileges were not sufficient for accessing this session in this agent.
Action: Ensure that the user has sufficient privileges for this task.

Level: 1
Type: ERROR
Impact: Other
ODI-01253: Session {0} ({1}) could not be stopped by Agent {2}: an unknown error occurred.
Cause: An unexpected Exception occurred.
Action: Verify your Agent configuration and make sure other operations on Agent are working correctly.
Level: 1
Type: ERROR
Impact: Other

ODI-01254: Session {0} ({1}) could not be stopped by Agent {2}: a JDBC error occurred on work repository {3}.
Cause: The agent had incorrect connection for the work repository database, or repository database was down.
Action: Verify the work repository connection information and the status of the work repository database.
Level: 1
Type: ERROR
Impact: Other

ODI-01255: Session {0} ({1}) could not be stopped by Agent {2}: insufficient privileges to stop the session.
Cause: User privileges were not sufficient for stopping this session in this agent.
Action: Ensure that the user has sufficient privileges for this task.
Level: 1
Type: ERROR
Impact: Other

ODI-01256: Session {0} ({1}) stopped (Normal) by user {2}.
Cause: Session was stopped by the user.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: ERROR
Impact: Other

ODI-01257: Session {0} ({1}) stopped (Immediate) by user {2}.
Cause: Session was stopped by the user.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: ERROR
Impact: Other

ODI-01258: Session {0} ({1}) stopped (Abort) by user {2}.
Cause: Session was aborted by the user.
**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01259: Session Task [0] stopped (Normal) by user [1].**

**Cause:** Task was stopped by the user.

**Action:** Review the task execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01260: Session Task [0] stopped (Immediate) by user [1].**

**Cause:** Task was stopped by the user.

**Action:** Review the task execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01261: Session Task [0] stopped (Abort) by user [1].**

**Cause:** Task was aborted by the user.

**Action:** Review the task execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01262: Session [0] ([1]) could not be stopped by Agent [2]: a JDBC error occurred on master repository.**

**Cause:** The agent had incorrect connection for the master repository database, or repository database was down.

**Action:** Verify the master repository connection information and the status of the master repository database.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01263: Step [0] stopped (Normal) by user [1].**

**Cause:** Step was stopped by the user.

**Action:** Review the step execution details in the Operator Navigator or Repository Explorer.

**Level:** 1
Type: ERROR
Impact: Other

ODI-01264: Step {0} stopped (Immediate) by user {1}.
Cause: Step was stopped by the user.
Action: Review the step execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: ERROR
Impact: Other

ODI-01265: Step {0} stopped (Abort) by user {1}.
Cause: Step was aborted by the user.
Action: Review the step execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: ERROR
Impact: Other

ODI-01266: Agent {0} detected Session as stale session and set to error status.
Cause: The agent detected a stale session and the session status was set to error status.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: ERROR
Impact: Other

ODI-01267: Session ({0}) could not be stopped by Agent {1} because stop type {2} provided in the request is an invalid stop type.
Cause: The agent attempted to stop a session with an invalid stop type.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: ERROR
Impact: Other

ODI-01268: Agent {0} does not support stopping asynchronous child sessions.
Cause: The agent attempted to stop an asynchronous child session and this is not supported.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: ERROR
Impact: Other
ODI-01269: Session {0} ({1}) could not be stopped by Agent {2}: session is being run by another Agent with the same name.
   Cause: The agent attempted to stop a session that is being run by a different agent.
   Action: Review the session execution details in the Operator Navigator or Repository Explorer.
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01270: Session {0} ({1}) could not be stopped by Agent {2}: session {0} ({1}) is being run by {3} Agent which is not a listener Agent.
   Cause: The agent attempted to stop a session that is being run by the internal agent and this is not supported.
   Action: Review the session execution details in the Operator Navigator or Repository Explorer.
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01271: The asynchronous jndi name cannot be null for asynchronous jobs. The ESS job status cannot be updated.
   Cause: The agent attempted to set the status of the asynchronous ESS job and its jndi name was not set.
   Action: Review the jndi name supplied to the Enterprise Scheduler job.
   Level: 1
   Type: WARNING
   Impact: Other

ODI-01272: The Logical Schema has not been set on {0} for {1}.
   Cause: The logical schema for this object has not been set.
   Action: Verify that the logical schema has been set in the Topology.
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01273: The selected technology {0} is not supported on source for {1}.
   Cause: The selected technology is not supported for this object.
   Action: Verify that the object has a valid technology.
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01274: Agent Exception
   Cause: An error was detected by the agent when performing an operation.
   Action: Review the underlying exception for more details.
Level: 1
Type: ERROR
Impact: Other

ODI-01275: An error occurred while performing a {0} operation on submodel step {1} of the model code {2}.
Cause: This is an execution warning. The operation specified failed on the submodel operation.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01276: An error occurred while executing the OnConnect command on JDBC connection created for data server {0} with transaction label {1}.
Cause: An error was occurred while executing the OnConnect command on the JDBC connection created to the data server.
Action: Review the underlying exception and update the OnConnect command definition configured for the data server.

Level: 1
Type: ERROR
Impact: Other

ODI-01277: An error occurred while executing the OnDisconnect command on JDBC connection created for data server {0} with transaction label {1}.
Cause: An error was occurred while executing the OnDisconnect command on the JDBC connection created to the data server.
Action: Review the underlying exception and update the OnDisconnect command definition configured for the data server.

Level: 1
Type: ERROR
Impact: Other

ODI-01278: Load plan instance {0}, run {1} does not exist in work repository {2}.
Cause: The Load Plan Instance run does not exist in the repository. This Load Plan Instance run may have been deleted, or an incorrect instance ID/run number or work repository was supplied.
Action: Verify that a load plan instance run with this instance ID and run number exists in the repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01279: The Source Logical Schema {0} and Context {1} of the task {2} are not mapped to any Physical Schema.
Cause: The Logical Schema to Physical Schema Mapping is not defined for the Context used.
Action: For the Context used define the Logical Schema to Physical Schema Mapping in the Topology.

Level: 1
Type: ERROR
Impact: Other

ODI-01280: The Target Logical Schema {0} and Context {1} of the task {2} are not mapped to any Physical Schema.
Cause: The Logical Schema to Physical Schema Mapping is not defined for the Context used.
Action: For the Context used define the Logical Schema to Physical Schema Mapping in the Topology.

Level: 1
Type: ERROR
Impact: Other

ODI-01281: Source Technology {0} of task {1} is not of JDBC Type. When both Source and Target commands are specified, the Source Technology should be of JDBC type.
Cause: When Source and Target commands are specified, the Source Technology should always be of JDBC type.
Action: Make Sure that you modify your Procedure or KM to either use a JDBC Source Technology or edit your step to use only the Target command.

Level: 1
Type: ERROR
Impact: Other

ODI-01282: Invalid log level {0} is specified. A valid log level value is between {1} and {2}.
Cause: Invalid log level specified for scenario/session invocation or for session restart.
Action: Please specify a valid log level.

Level: 1
Type: ERROR
Impact: Other

ODI-01283: Owb preparation failure: Owb object {0} of type {1} in location {2} does not exist in Owb repository {3}.
Cause: The session request was received, but the agent was unable to find the named Owb object in the Owb repository.
Action: Verify that the Owb object name matches an existing Owb object in the location in the Owb repository.

Level: 1
Type: ERROR
ODI-01284: Session $\{0\}$ $\{1\}$ with Owb audit Id $\{2\}$ fails.

**Cause:** The session finished in an error state.

**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1

**Type:** ERROR

**Impact:** Other

ODI-01285: Session $\{0\}$ $\{1\}$ Retrieval of audit for auditId $\{2\}$ failed in the $\{3\}$ phase $\{4\}$. Please use OWB Design Client or Browser for further information.

**Cause:** An error was raised during the retrieval of the Owb audit data.

**Action:** Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

ODI-01286: Session $\{0\}$ $\{1\}$ could not find Owb job for this session.

**Cause:** The session being aborted is not an Owb Job.

**Action:** Review the session being aborted in the Operator Navigator or Repository Explorer.

**Level:** 1

**Type:** ERROR

**Impact:** Other

ODI-01287: Session $\{0\}$ $\{1\}$ with Owb audit Id $\{2\}$ is in an invalid state to be aborted.

**Cause:** The session being aborted is not in a state that can be aborted.

**Action:** Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

**Level:** 1

**Type:** ERROR

**Impact:** Other

ODI-01288: Session $\{0\}$ $\{1\}$ with Owb audit Id $\{2\}$ abort fails.

**Cause:** The session abort finished in an error state.

**Action:** Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

**Level:** 1

**Type:** ERROR

**Impact:** Other
ODI-01289: Agent [0] detected Session as stale session and set to error status. Please use OWB Design Client or Browser for further information.

Cause: The agent detected a stale OWB session and the session status was set to error status.

Action: Review the session execution details in the OWB Design Client or Browser.

Level: 1
Type: ERROR
Impact: Other

Cause: An error was raised during the loading of the Owb audit data.

Action: Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

Level: 1
Type: ERROR
Impact: Other

ODI-01291: Workspace [0] cannot be resolved to a physical workspace using context [1].

Cause: The context does not contain a mapping for the logical workspace.

Action: Review the mappings defined in the context.

Level: 1
Type: ERROR
Impact: Other

ODI-01292: An execution context cannot be determined for this job.

Cause: An execution context cannot be determined for this job.

Action: Use the Context to provide an explicit context for this execution.

Level: 1
Type: ERROR
Impact: Other

ODI-01293: Exception occurred during spawning of ECID to child session.

Cause: Spawning of ECID from parent session to child session failed.

Action: Review the exception raised to get more detail.

Level: 1
Type: WARNING
Impact: Other

ODI-01294: Unwrapping of a wrapped ECID [(0)] failed.

Cause: Unwrapping of ECID failed.

Action: Review the exception raised and the format of wrapped ECID to get more detail on unwrap failure
Level: 1
Type: WARNING
Impact: Other

ODI-01295: Cleanup of Session {0} ([1]) raised the following {2} messages: {3}
  Cause: Messages were raised during the Cleanup phase.
  Action: Review the messages raised during the Cleanup and you may need to perform some manual cleanup.

Level: 1
Type: WARNING
Impact: Other

ODI-01296: The Cleanup Tool encountered the following {0} nested errors when executing the Cleanup tasks: {1}
  Cause: Messages were raised during the Cleanup tool execution.
  Action: Review the messages raised during the Cleanup and you may need to perform some manual cleanup.

Level: 1
Type: ERROR
Impact: Other

ODI-01297: Parallel task "[0]" failed; {1} child task(s) in error; Failed child tasks: {2}
  Cause: null
  Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01298: Serial task "[0]" failed because child task "[1]" is in error.
  Cause: null
  Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01299: A task "[0]" from one of the parallel branches has failed. Hence aborting the current branch
  Cause: null
  Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01300: ASYNC_JNDI_NAME cannot be null for async job.
  Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01301: Unable to submit Job Definition: {0}
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01302: Logical Agent {0} must be mapped to a Physical Agent in the ContextCode {1}
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01303: RuntimeSessionfactory must not be null.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01304: Unable to find request for ID {0}
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01305: jobDefinitionId must not be null
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01306: scheduleDefinitionId must not be null
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-01307: ContextCode is null, cannot lookup physical agent
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-01308: SchedulingService object was created without an EntityManager, cannot lookup physical agent
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-01309: Unable to find logical agent : {0}.
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-01310: Unable to find context : {0}.
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-01311: JobDefinition with name {0} already exists.
Cause: JobDefinition already exists.
Action: Check JobDefinition name.

Level: 32
Type: ERROR
Impact: Other
ODI-01312: Schedule with name {0} already exists.
Cause: Schedule already exists.
Action: Check Schedule name.
Level: 32
Type: ERROR
Impact: Other

ODI-01313: Unable to find job definition for ID {0}.
   Cause: Wrong ID.
   Action: Check ID.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-01314: Unable to find job definition with name {0}.
   Cause: Wrong name.
   Action: Check name.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-01315: Unable to update job definition.
   Cause: Exception during updating.
   Action: Check cause exception details.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-01316: Unable to remove job request.
   Cause: Exception was thrown.
   Action: Check cause exception details.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-01317: Unable to find scheduler definition with name {0}.
   Cause: Wrong name.
   Action: Check name.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-01318: jobDefinition is required to have a not null ID.
   Cause: Metadata Object ID is null.
   Action: Check job definition.

   Level: 32
   Type: ERROR
   Impact: Programmatic
ODI-01319: Error while refreshing variable {0}. Null/Empty refresh query is provided.
Cause: This is an execution warning. The variable refresh failed.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: WARNING
Impact: Other

ODI-01350: Credential map key "{0}" not found in credential map "{1}".
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01351: An unexpected error was thrown during execution of the scenario "{0} - {1}".
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01352: An unexpected error was thrown during job execution
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01353: RequestId={0} Scenario={1}: Agent URL must be specified. The Job Definition must include the LocalAgent or the job submission must include a physical agent url (2) parameter.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01354: Load plan must be asynchronous
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01355: username "[0]" from credential map "[1]" does not match currentSubjectName "[2]"
    Cause:
    Action:
    Level: 32
    Type: SET_AT_RUNTIME
    Impact: Other

ODI-01356: Credential map key parameter "[0]" not found.
    Cause:
    Action:
    Level: 32
    Type: SET_AT_RUNTIME
    Impact: Other

ODI-01357: Error resolving ADF connection for connectionId='"[0]"'.
    Cause:
    Action:
    Level: 32
    Type: SET_AT_RUNTIME
    Impact: Other

ODI-01400: Agent [0] start failure: JDBC connection error occurs while connecting to the master repository.
    Cause:  The master repository information was incorrect, or the repository database was down.
    Action:  Verify the master repository connection information and the status of the master repository database.
    Level: 1
    Type: ERROR
    Impact: Other

ODI-01401: Agent [0] start failure: data source for master repository did not contain a master repository.
    Cause:  The master repository connection information pointed to a database schema that did not contain a master repository.
    Action:  Verify the master repository connection information.
    Level: 1
    Type: ERROR
    Impact: Other

ODI-01402: Agent [0] start failure: the master repository is in an invalid state.
Cause: The master repository was in a state that did not allow connections. This is the case when an upgrade is being performed.
Action: Verify the state of the master repository.
Level: 1
Type: ERROR
Impact: Other

ODI-01403: Agent {0} start failure: the master repository version {1} is not compatible with the agent version {2}.
Cause: The master repository was upgraded but not this agent, or the agent was upgraded but not the master repository.
Action: Upgrade the master repository version or the agent version.
Level: 1
Type: ERROR
Impact: Other

ODI-01404: Agent {0} start failure: an authentication error occurred while connecting to the master repository.
Cause: An incorrect ODI user or password was specified for this master repository.
Action: Verify the ODI user and password used for connecting.
Level: 1
Type: ERROR
Impact: Other

ODI-01405: Agent {0} start failure: the agent is not defined in the topology for master repository.
Cause: This agent was not declared in the topology.
Action: Add this physical agent in the list of agents in the ODI topology.
Level: 1
Type: ERROR
Impact: Other

ODI-01406: Agent {0} started with warning: JDBC connection error occurs while connecting to the work repository {1}.
Cause: The work repository information was incorrect, or the repository database was down.
Action: Verify the work repository connection information and the status of the work repository database.
Level: 1
Type: ERROR
Impact: Other

ODI-01407: Agent {0} started with warning: connection details of {1} do not contain a work repository.
Cause: The work repository connection information pointed to a database schema that did not contain a work repository.
Action: Review the work repository connection information and revise it as necessary.
Level: 1
Type: ERROR
Impact: Other

ODI-01408: Agent [0] started with warning: work repository [1] is in an invalid state.
Cause: The work repository was in a state that did not allow connections. This is the case when an upgrade is being performed.
Action: Verify the state of the work repository.
Level: 1
Type: ERROR
Impact: Other

ODI-01409: Agent [0] started with warning: work repository [1] version [2] is not compatible with the agent version [3].
Cause: The work repository was upgraded but not this agent, or the agent was upgraded but not the work repository.
Action: Upgrade the work repository version or the agent version.
Level: 1
Type: ERROR
Impact: Other

ODI-01410: Agent [0] started with warning: work repository [1] is not bound to the master repository.
Cause: The work repository specified in the request was not found in the list of work repositories attached to this master.
Action: Ensure that work repository name matches an existing one.
Level: 1
Type: ERROR
Impact: Other

ODI-01411: Agent [0] started with warning: a database error occurs while cleansing stale sessions.
Cause: The agent encountered a database error while attempting to close stale sessions.
Action: Review the status of the sessions for this agent, and manually remove the stale sessions.
Level: 1
Type: ERROR
Impact: Other

ODI-01412: Agent [0] started with warning: an unexpected error occurs while cleaning stale sessions.
**Cause:** The agent encountered an unexpected error while attempting to close stale sessions.

**Action:** Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode). Verify the status of the sessions for this agent, and manually remove the stale sessions.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01413: Request is incorrectly formed.**

**Cause:** A malformed request was sent to the agent.  
**Action:** Review the request format and parameters sent to the agent.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01414: Error connecting to agent {0}: a JDBC error occurs while connecting to the master repository.**

**Cause:** The remote agent had incorrect connection for the master repository database, or repository database was down.  
**Action:** Verify the master repository connection information and the status of the master repository database.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01415: Error connecting to agent {0}: data source for master repository did not contain a master repository.**

**Cause:** The master repository connection information for the remote agent pointed to a database schema that did not contain a master repository.  
**Action:** Review the master repository connection information and revise it as necessary.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01416: Error connecting to agent {0}: the master repository is in an invalid state.**

**Cause:** The master repository was in a state that did not allow connections from the remote agent. This is the case when an upgrade is being performed.  
**Action:** Verify the state of the master repository.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other
ODI-01417: Error connecting to agent [0]: the master repository version [1] is not compatible with the agent version [2].

**Cause:** The master repository was upgraded but not the remote agent, or the remote agent was upgraded but not the master repository.

**Action:** Upgrade the master repository version or the agent version.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

ODI-01418: Error connecting to agent [0]: an authentication error occurs while connecting to the master repository.

**Cause:** An incorrect ODI user or password was specified for this master repository.

**Action:** Verify the ODI user and password used for connecting.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

ODI-01419: Warning connecting to Agent [0]: JDBC connection error occurs while connecting to the work repository [1].

**Cause:** The remote agent had incorrect connection for the work repository database, or the repository database was down.

**Action:** Verify the work repository connection information and the status of the work repository database.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

ODI-01420: Warning connecting to Agent [0]: connection details of [1] do not contain a work repository.

**Cause:** The work repository connection information for the remote agent pointed to a database schema that did not contain a work repository.

**Action:** Verify the work repository connection information.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

ODI-01421: Warning connecting to Agent [0]: work repository [1] is in an invalid state.

**Cause:** The work repository was in a state that did not allow connections from the remote agent. This is the case when an upgrade is being performed.

**Action:** Verify the state of the work repository.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other
ODI-01422: Warning connecting to Agent [0]: work repository [1] version [2] is not compatible with the agent version [3].
Cause: The work repository was upgraded but not the remote agent, or the remote agent was upgraded but not the work repository.
Action: Upgrade the work repository version or the agent version.
Level: 1
Type: ERROR
Impact: Other

ODI-01423: Warning connecting to Agent [0]: work repository [1] is not bound to the master repository.
Cause: The work repository specified in the request was not found in the list of work repositories attached to the master.
Action: Verify that work repository name matches an existing one.
Level: 1
Type: ERROR
Impact: Other

ODI-01424: Agent host or port cannot be reached using [0].
Cause: Incorrect host or port information was provided, or the agent was not started on the remote host.
Action: Correct the host or port information or start the agent.
Level: 1
Type: ERROR
Impact: Other

ODI-01425: Agent application cannot be reached using [0].
Cause: An incorrect application name was provided for this agent, or the agent application was not started on the host.
Action: Correct the application name used in the URL or verify the agent status.
Level: 1
Type: ERROR
Impact: Other

ODI-01426: Agent [0] is not defined in the topology for the master repository.
Cause: This agent was not declared in the topology.
Action: Add this physical agent to the list of agents in the ODI topology.
Level: 1
Type: ERROR
Impact: Other

ODI-01427: invalid parameters
Cause: Invalid parameters were supplied in the request.
Action: Check the parameters that were supplied as part of the request. Ensure that parameter names and cases are correct.
Level: 1
Type: WARNING
Impact: Other

ODI-01428: internal error
Cause: An agent internal error occurred.
Action: Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode).

Level: 1
Type: FATAL
Impact: Other

ODI-01429: The user [0] is not authorized to perform request [1] on Agent [2].
Cause: The user had insufficient privileges for performing this request against the remote agent.
Action: Amend the user privileges.

Level: 1
Type: ERROR
Impact: Other

ODI-01430: Agent [0] cannot clean the stale sessions in work repository [1] due to a database error.
Cause: The remote agent faced a database error while attempting to close stale sessions.
Action: Examine the status of the sessions for this agent, and manually remove the stale sessions.

Level: 1
Type: ERROR
Impact: Other

ODI-01431: Agent [0] cannot clean the stale sessions in work repository [1] because the work repository [1] is still down.
Cause: The remote agent was not able to connect to the work repository while attempting to close stale sessions.
Action: Determine the status of the repository. Once this repository is running, manually remove the stale sessions.

Level: 1
Type: ERROR
Impact: Other

ODI-01432: Agent [0] cannot clean the stale sessions in work repository [1] due to an unexpected error.
Cause: The remote agent faced an unexpected error while attempting to close stale sessions.
Action: Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with
the logging level set to debug mode). Determine the status of the sessions for this agent, and manually remove the stale sessions.

Level: 1
Type: ERROR
Impact: Other

ODI-01433: The Internal agent does not support cleaning stale sessions from multiple work repositories.
Cause: Empty string value was passed for the work repository name in the Clean Stale Sessions request sent to the Internal Agent.
Action: Specify a non-empty valid work repository name in the Clean Stale Sessions request sent to the Internal Agent. If you want to clean the stale sessions across the work repositories, perform this operation on a Remote physical Agent.

Level: 1
Type: ERROR
Impact: Other

ODI-01434: Agent {0} start failure: error while trying to use JMX Port {1}.
Cause: JMX Registry was unable to use the given port.
Action: Specify a different port by using the command-line parameter JMXPORT.

Level: 1
Type: ERROR
Impact: Other

ODI-01435: Storage space for the IDs of some object types is low in Repository {0}. When no storage space is available, it will not be possible to create objects of these types. Consider creating a new repository for the following object types (Object Type: Number Remaining) {1}.
Cause: Storage space was low for some IDs in this repository.
Action: Consider creating a new repository.

Level: 1
Type: WARNING
Impact: Other

ODI-01436: Error retrieving ID statistics for repository {0}.
Cause: The ID statistics for this repository could not be verified.
Action: Verify the statistics for this repository manually.

Level: 1
Type: WARNING
Impact: Other

ODI-01437: Error retrieving information from the credential store map.
Cause: Could not retrieve information from the credential store map.
Action: Verify that the credentials have been entered correctly into the credential store map.
Level: 1
Type: ERROR
Impact: Other

ODI-01438: Agent [0] cannot be stopped by user [1]: a JDBC error occurred on master repository [2].
Cause: Some SQL Exception occurred on the Master Repository.
Action: Verify that other operations on the Agent are working correctly.

Level: 1
Type: ERROR
Impact: Other

ODI-01439: Agent [0] cannot be stopped by user [1]: a JDBC error occurred on work repository [2].
Cause: Some SQL Exception occurred on the Work Repository.
Action: Verify that other operations on the Agent are working correctly.

Level: 1
Type: ERROR
Impact: Other

ODI-01440: Agent [0] cannot be stopped by user [1]: an unknown error occurred.
Cause: An unexpected Exception occurred.
Action: Verify your Agent configuration and make sure other operations on Agent are working correctly.

Level: 1
Type: ERROR
Impact: Other

ODI-01441: Unable to connect to the master repository at JBDC URL={0} with USER={1}.
Cause: An SQLException occurred while creating connection to the master repository with the given parameters.
Action: Verify your Agent configuration and make sure the master repository connection parameters are correct.

Level: 1
Type: ERROR
Impact: Other

ODI-01442: Unable to load JBDC Driver {0} configured for master repository connection.
Cause: ClassNotFoundException occurred while loading the driver class.
Action: Verify your Agent configuration and make sure the driver specified for master repository connection is correct and the corresponding jar is present under driver folder.

Level: 1
Type: ERROR
Impact: Other

ODI-01443: Error while starting agent : {0}
Cause: Error occurred while starting the embedded web container.
Action: Verify your Agent configuration and make sure that the specified ports are available.
Level: 1
Type: ERROR
Impact: Other

ODI-01444: The master repository signature specified by the client {0} does not match the master repository signature of the agent {1}.
Cause: The client and the agent are not using the same master repository
Action: Verify the client and the agent are using the same master repository. Verify that the client is calling the correct agent.
Level: 1
Type: ERROR
Impact: Other

ODI-01445: Invalid HTTP/S URL retrieved from the JRF utility : {0}
Cause: JRF utility has returned an invalid HTTP/S URL for the agent.
Action: Verify if ODI agent's dependent modules are successfully deployed on the container.
Level: 1
Type: ERROR
Impact: Other

ODI-01460: Unable to insert into table {0} for concurrent execution control. Exceptions due to competing insertions can happen and are handled to continue execution. Other exceptions likely indicate a runtime problem. Error message: {1}
Cause: An exception was raised when inserting a record into the concurrent execution control table.
Action: Exceptions due to competing insertions can happen and are handled to continue execution. Other exceptions likely indicate a runtime problem.
Level: 1
Type: WARNING
Impact: Other

ODI-01461: {0} job status has changed unexpectedly from {1} to {2} while waiting for its turn to run under concurrent execution control.
Cause: The status of a job was likely changed outside of the control of the runtime agent while the job was waiting for its turn to run under concurrent execution control by the agent.
Action: The job may have been changed outside of the agent, and the agent skipped the job execution. Start the job again if it was not executed.
Level: 1
Type: WARNING
Impact: Other

ODI-01462: {0} job [1] should be the last one in the following waiting {0} list: {2}
Cause: The job may have been changed or deleted outside of the runtime agent while the job was waiting for its turn to run under concurrent execution control by the agent.
Action: The job may have been changed or deleted outside of the agent, and the agent skipped the job execution. Start the job again if it was not executed.

Level: 1
Type: WARNING
Impact: Other

ODI-01463: {0} job [1] blocked by the following {0} job(s) due to potential concurrent execution condition: {2}[3]
Cause: The job was under concurrent execution control with Raise Error violation behavior, and there were existing runnable and/or waiting jobs submitted ahead of the job.
Action: Start the job when other concurrently running and waiting jobs are completed, or change the job’s violation behavior to Wait To Execute before starting the job.

Level: 1
Type: WARNING
Impact: Other

ODI-01500: SQL Exception when accessing work repository {0} while executing load plan instance {1} - {2}
Cause: A SQLException was thrown when trying to update the work repository
Action: The same set of updates will be attempted later, potentially from a different agent

Level: 1
Type: ERROR
Impact: Other

ODI-01501: Cannot find variable "{0}" in the definition of load plan instance {1}.
Cause: The start/restart load plan request contained startup values for variables that are not defined in the load plan
Action: User error or problem in the IDE invocation code

Level: 1
Type: ERROR
Impact: Other

ODI-01502: Load plan instance {0} is in an inconsistent state: {1}
Cause: Indicates a problem in the ODI code, like a wrapped IllegalStateException
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01503: Load plan logs for instance {0}, run {1} are corrupted: {2}
Cause: Indicates a problem in the ODI code, it is a wrapped IllegalStateException
Action: null
Level: 1

Type: ERROR
Impact: Other

ODI-01504: Trying to update variables during execution of step "[0]" (load plan instance {1}, run {2}), as part of the exception handler for step "[3]", but variable updates during exception handlers are not supported.
Cause: null
Action: null
Level: 1

Type: ERROR
Impact: Other

ODI-01505: Current value "{0}" of variable "{1}" (while evaluating When clause "{2}") is not a valid value of type {3} (load plan instance {4}, run {5}).
Cause: null
Action: null
Level: 1

Type: ERROR
Impact: Other

ODI-01506: "Comparison value of step "[2]" ("[0]") is not a valid value of type {3} (load plan instance {4}, variable tested "[1]").
Cause: null
Action: null
Level: 1

Type: ERROR
Impact: Other

ODI-01507: Load Plan Instance restart called for instance {0}, but no previous runs were found.
Cause: null
Action: null
Level: 1

Type: ERROR
Impact: Other

ODI-01508: Load Plan Instance start called for instance {0}, but previous runs have been found.
Cause: null
ODI-01509: Load Plan Instance {0} cannot be restarted because the previous run ((1)) status "(2)" is not in "(3)" status.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01510: The same load plan instance {0} simultaneously started by two agents.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01511: Step "{0}" should have already been marked as started before adding value for variable "{1}" (load plan instance {2}, run {3}).
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01512: Variable "{0}" is defined as having datatype "{1}" in Load Plan instance {2}, but as having type "{3}" in scenario "{4}" (version {5}), Load Plan instance step "{6}".
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01513: Error reading load plan information for session number {0}: "{1}"
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01514: Error trying to stop load plan, instance {0} not found.
ODI-01515: Load Plan instance {0} could not be stopped by agent {1} because stop type ({2}) provided in the request is invalid.

ODI-01516: Can not start load plan: load plan with name "{0}" does not exist in work repository {1}.

ODI-01517: Load Plan instance {0}, run {1} could not be stopped because that run is already completed (with status "{2}").

ODI-01518: Parallel step "{0}" failed; {1} child step(s) in error, which is more than the maximum number of allowed errors ({3}) defined for the parallel step. Failed child steps: {2}

ODI-01519: Serial step "{0}" failed because child step "{1}" is in error.
Impact: Other

ODI-01520: Case-When/Else step "(0)" failed because child step "(1)" is in error.
   Cause: null
   Action: null
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01521: Case step "(0)" failed; the selected child "(1)" is in error.
   Cause: null
   Action: null
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01522: Run Scenario step failed during invocation. Error message was: (0)
   Cause: null
   Action: null
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01523: Exception handler for step "(0)" failed, because the root exception serial step "(1)" is in error.
   Cause: null
   Action: null
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01524: Physical agent (0) could not be found.
   Cause: null
   Action: null
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01525: Physical agent not found for logical agent name "(0)" and context "(1)" while executing step "(2)".
   Cause: null
   Action: null
   Level: 1
   Type: ERROR
Impact: Other

ODI-01526: Error encountered while trying to start scenario "[1][2]" (step "[3]"): [0]
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01527: Error refreshing variable "[0]": the associated SQL query returned no results.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01528: Error refreshing variable "[0]": [1]
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01529: Refresh of variable "[0]" failed: [1] [2]
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01530: Load plan instance was stopped by user request.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01531: Timeout triggered while executing step "[0]".
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other
ODI-01532: Timeout triggered on a parent step "{0}" while executing step "{1}".
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01533: Error refreshing variable "{0}": could not get a connection to the logical schema "{1}" using context {2}.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01534: Could not get SQL query text for variable "{0}" while trying to refresh it.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01535: Can not continue load plan instance {0}, run {1}, because the instance has been deleted.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01536: Load plan instance {0}, run {1} failed to launch scenario: scenario {2} does not exist in work repository {3}.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01537: Load plan instance {0}, run {1} failed to launch scenario: Version {3} of scenario {2} does not exist in work repository {4}.
  Cause: null
  Action: null
  Level: 1
  Type: ERROR
Impact: Other

ODI-01538: Unexpected Exception occurred while executing Load plan instance {0}, run {1}.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01539: Agent {0} cannot continue load plan processing for instance {1}, run {2} on work repository {3}.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01540: Agent {0} start failure: error while trying to use Http Port {1}.
Cause: Http service was unable to use the given port.
Action: Specify a different port by using the command-line parameter PORT.
Level: 1
Type: ERROR
Impact: Other

ODI-01541: Load Plan start failure on agent {0}: ODI User and Password not specified.
Cause: ODI user and password are not set.
Action: Please specify ODI user and password.
Level: 1
Type: ERROR
Impact: Other

ODI-01542: Start Scenario failure on agent {0}: ODI User and Password not specified.
Cause: ODI User and password are not set.
Action: Please specify ODI user and password.
Level: 1
Type: ERROR
Impact: Other

ODI-01543: RuntimeAgent cannot be used inside an opened transaction, it must be used outside a TransactionTemplate
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-01544: None of the agents in Load Balancing list is able to handle this execution ({0}).
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01545: Missing odi supervisor credentials in credential store map [{0}] with key [{1}].
Cause: Could not retrieve information from the credential store map.
Action: Verify that the credentials have been entered correctly into the credential store map.

Level: 1
Type: ERROR
Impact: Other

ODI-01546: The dbms_lock acquisition with lock handle {0} timed out.
Cause: null
Action: null

Level: 1

ODI-01615: DESCRIPTION Resumes an execution session. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX
  restartsession.(cmd|sh) "-INSTANCE=<instance_name>" <session_number> [<log_level>] [-AGENT_URL=<agent_url>]"
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-01616: DESCRIPTION Starts an agent. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX agent.(cmd|sh)
  -NAME=<agent name> [-PORT=<port>] [-PROTOCOL=<protocol>] [-JMXPORT=<jmxport>] [-ODI_CONNECTION_RETRY_COUNT=<nn>]
  [-ODI_CONNECTION_RETRY_DELAY=<nn>] PORT represents the listening port. It should match the port value specified against the physical agent defined in Topology. PROTOCOL represents the listening protocol, HTTP or HTTPS. Its
default value is HTTP. NAME represents the name of this physical agent. It should match the name of a physical agent defined in Topology. User must have created an agent with this name using configuration wizard. JMXPORT represents the JMX port used for JMX notifications etc. Its default value is calculated as PORT + 1000, or 20810 if the calculated value is greater than 65535. ODI_CONNECTION_RETRY_COUNT represents the number of times a connection to the ODI Repository will be retried. Its default value is 10. ODI_CONNECTION_RETRY_DELAY represents the number of milliseconds between connection retries to the ODI Repository. Its default value is 7000.

Action: Check the logs.
Level: 1
Type: ERROR
Impact: Data

**ODI-03032: Exception occurred while creating Master Repository at [0] failed.**

Failure reason [1].
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Programmatic
ODI-03033: Supervisor Password and Confirm Supervisor Password fields should match.
Cause: Supervisor Password and Confirm Supervisor Password fields must match
Action: Input same passwords
Level: 1
Type: ERROR
Impact: Data

ODI-03034: Test connection failed due to {0}.
Cause: Testing of DB connection failed
Action: Check the logs
Level: 1
Type: ERROR
Impact: Data

ODI-03035: Supervisor Password and Confirm Supervisor Password fields should match and only zip files can be uploaded , the {0} upload was unsuccessful.
Cause: Both the password match and zip files to be uploaded conditions failed
Action: Make sure both the passwords are same and file uploaded is zip file
Level: 1
Type: ERROR
Impact: Data

ODI-03036: Only zip files can be uploaded , the {0} upload was unsuccessful.
Cause: zip files to be uploaded condition failed
Action: Make sure file uploaded is zip file
Level: 1
Type: ERROR
Impact: Data

ODI-03037: Exception occurred while exporting Master Repository. Failure reason {1}.
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03038: Exception occurred while exporting Physical Topology. Failure reason {1}.
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03039: Exception occurred while Importing Master Repository. Failure reason {1}
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03040: Unable to connect to the Repository User. {0}
Cause: Testing of DB connection failed
Action: Check the logs
Level: 1
Type: ERROR
Impact: Data

ODI-03041: Unable to connect to the DBA User. {0}
Cause: Testing of DB connection failed
Action: Check the logs
Level: 1
Type: ERROR
Impact: Data

ODI-03046: unable to find the agent for given logical agent and context code
Cause: Physical Agent mapping was not defined for selected logical agent and context.
Action: A different set of credentials is required or the mapping needs to be defined.
Level: 1
Type: ERROR
Impact: Data

ODI-03047: exception while executing {0}. Failure reason {1}
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03048: Only XML files can be uploaded: the {0} upload fails
Cause: File selected for import was not a XML file.
Action: Provide the XML file.
Level: 1
Type: ERROR
Impact: Data

ODI-03049: exception while importing {0}. Failure reason {1}
Cause: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03050: failed to start scenario : {0} ? {1} in debug mode.
Cause: An unexpected error occurred
Action: Check the logs

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03075: Error in purging Load Plans Executions/Sessions {0}
Cause: An exception has occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03076: exception while killing {0}. Failure reason {1}
Cause: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03077: Selected Session {0} is in {1} State, and therefore cannot be killed.
Cause: The selected session was in Done, Error, or Warning state.
Action: No action is required.

Level: 1
Type: ERROR
Impact: Data

ODI-03078: Selected Session {0} is in {1} State, and therefore cannot be restarted.
Cause: The selected session was not in Error state.
Action: No action is required.

Level: 1
Type: ERROR
Impact: Data
ODI-03079: exception while restarting {0}. Failure reason {1}
   Cause: An unexpected error occurred.
   Action: Check the logs.
   Level: 1
   Type: ERROR
   Impact: Programmatic

ODI-03080: exception while clearing stale sessions. Failure reason {0}
   Cause: An unexpected error occurred.
   Action: Check the logs.
   Level: 1
   Type: ERROR
   Impact: Programmatic

ODI-03081: Error fetching records from error table {0}. The table might no more exist or the format of the table is not correct
   Cause: The table might no longer exist or the structure of the table might not be correct
   Action: Upgrade the CKM
   Level: 1
   Type: ERROR
   Impact: DATA

ODI-03082: CKM SQL does not contain ODI_PK primary key column. Hence unable to delete the error records.
   Cause: CKM SQL does not contain ODI_PK primary key column. Hence unable to delete the error records.
   Action: Future release will have the ODI_PK primary key column incorporated in CKM SQL.
   Level: 1
   Type: ERROR
   Impact: Programmatic

ODI-03083: Scenario "[0]" parent not found.
   Cause: Trying to get the Odi Object which does not exist or has been deleted.
   Action: Check the logs
   Level: 1
   Type: ERROR
   Impact: Data

ODI-03090: failed to restart session : {0} in debug mode.
   Cause: An unexpected error occurred
   Action: Check the logs
   Level: 1
Type: ERROR
Impact: Programmatic

**ODI-03101: import of \{1\} from \{0\} failed**
*Cause:* An unexpected error occurred
*Action:* Check the logs
*Level:* 1

**Type: ERROR**
**Impact: Programmatic**

**ODI-03102: export of \{1\} to \{0\} failed**
*Cause:* An unexpected error occurred

**Type: ERROR**
**Impact: Programmatic**

**ODI-03105: failed to start a scenario: \{0\} ? \{1\}**
*Cause:* An unexpected error occurred
*Action:* Check the logs
*Level:* 1

**Type: ERROR**
**Impact: Programmatic**

**ODI-03106: failed to restart session: \{0\}**
*Cause:* An unexpected error occurred
*Action:* Check the logs
*Level:* 1

**Type: ERROR**
**Impact: Programmatic**
ODI-03107: failed to clean stale sessions for repository : {0}
   Cause: An unexpected error occurred
   Action: Check the logs
   Level: 1
   Type: ERROR
   Impact: Programmatic

ODI-03108: failed to stop session : {0}
   Cause: An unexpected error occurred
   Action: Check the logs
   Level: 1
   Type: ERROR
   Impact: Programmatic

ODI-03109: Creation of work runtime repository at {0} failed. Failure reason {1}
   Cause: An unexpected error occurred
   Action: Check the logs
   Level: 1
   Type: ERROR
   Impact: Programmatic

ODI-03110: Update of work runtime repository at {0} failed. Failure reason {1}
   Cause: An unexpected error occurred
   Action: Check the logs
   Level: 1
   Type: ERROR
   Impact: Programmatic

ODI-03111: failed to read config.properties
   Cause: An unexpected error occurred
   Action: Check the logs
   Level: 1
   Type: ERROR
   Impact: Programmatic

ODI-03112: shared config dir path is not valid : {0}
   Cause: An unexpected error occurred
   Action: Check the logs
   Level: 1
   Type: ERROR
   Impact: Programmatic

ODI-03114: {0} not set
   Cause: An unexpected error occurred
Action: Check the logs
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03115: {0} is not correct
Cause: An unexpected error occurred
Action: Check the logs
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03116: failed to read
Cause: An unexpected error occurred
Action: Check the logs
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03117: datasource not located at {0}
Cause: An unexpected error occurred
Action: Check the logs
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03118: Could not get the service locator. JpsServiceLocator service is not configured.
Cause: An unexpected error occurred
Action: Check the logs
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03119: JPS Exception {0} was thrown. Credential Store might not be configured.
Cause: An unexpected error occurred
Action: Check the logs
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03120: Credential store could not be found.
Cause: An unexpected error occurred
Action: Check the logs
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03121: Not populating any values in credential store
  Cause: An unexpected error occurred
  Action: Check the logs

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03122: Exception in purging Session/Load Plan Executions
  Cause: An unexpected error occurred
  Action: Check the logs

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03123: Exception occured while inserting usedInContext in Physical Schema
  Cause: An unexpected error occurred
  Action: Check the logs

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03124: Exception occured while deleting usedInContext in Physical Schema
  Cause: An unexpected error occurred
  Action: Check the logs

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03125: Exception occured while inserting usedInContext in Edit Physical Schema
  Cause: An unexpected error occurred
  Action: Check the logs

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03126: Exception in adding an entity
  Cause: An unexpected error occurred
  Action: Check the logs

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03127: Odi object not found
Cause: An unexpected error occurred
Action: Check the logs
Level: 1

Type: ERROR
Impact: Programmatic

ODI-03128: Exception in update
Cause: An unexpected error occurred
Action: Check the logs
Level: 1

Type: ERROR
Impact: Programmatic

ODI-03129: Unable to find odi object {0}
Cause: An unexpected error occurred
Action: Check the logs
Level: 1

Type: ERROR
Impact: Programmatic

ODI-03130: Loading of entity failed
Cause: An unexpected error occurred
Action: Check the logs
Level: 1

Type: ERROR
Impact: File

ODI-10020: Impossible to replace the file
Cause: It was not possible to replace the file.
Action: Check, if you have enough rights for this operation.
Level: 32

Type: ERROR
Impact: File

ODI-10021: Unspecified save directory.
Cause: Directory to save environment information was unspecified.
Action: Specify the directory for saving the environment information file.
Level: 32

Type: ERROR
Impact: Other

ODI-10022: You must specify all options.
Cause: Missed one or more options.
Action: Specify missed options.
Level: 32

Type: ERROR
Impact: Other

ODI-10023: Invalid license. This license is suitable for {0}.
Cause: Invalid license.
Action: Check license.
Level: 32

Type: ERROR
Impact: Security

ODI-10024: Your installation of Oracle Data Integrator is corrupted.
Cause: The technology description file contains errors.
Action: Reinstall Oracle Data Integrator.
Level: 32

Type: ERROR
Impact: Other

ODI-10025: Your installation of Oracle Data Integrator is corrupted.
Cause: The technology description file is missing.
Action: Reinstall Oracle Data Integrator.
Level: 32

Type: ERROR
Impact: Other
ODI-10026: Error while testing the Master Repository technology.
   Cause: Error occurred while testing the Master Repository technology.
   Action: Check parameters.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10027: The import is canceled because at least one object is locked by another user.
   Cause: At least one object was locked by another user.
   Action: Check objects’ locks.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10028: It is forbidden to import a log into a repository having the same ID.
   Cause: The log had the same ID as repository.
   Action: Check log and/or repository id.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10029: Version \{0\} for object \{1\} already exists.
   Cause: Version already existed.
   Action: Choose another version.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10030: DwgBeanWrapper can only wrap DwgObjects
   Cause: DwgBeanWrapper can only wrap DwgObjects
   Action: Choose correct type of objects.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10031: Object \{0\}: \{1\} is locked by user \{2\}
   Cause: Object was locked by another user.
   Action: Wait until object is unlocked.
   Level: 32
   Type: ERROR
   Impact: Other
ODI-10032: You cannot import this object ({0}). A referenced object ({1}) does not exist in the repository.
   Cause: A referenced object does not exist in the repository.
   Action: Check import file.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10033: You cannot delete this object because it is locked by another user ({0}).
   Cause: This object was locked by another user.
   Action: Wait until object is unlocked.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10034: The technology hosting your master repository does not support Versioning.
   Cause: The technology did not support versioning.
   Action: Choose another repository or technology.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10035: {0} : ''{1}'' (with global id: {5} and internal id: {6}) violates alternate key constraint {2} {3} for values {4}
   Cause: Object violated alternate key constraint.
   Action: Check object properties and constraint's values.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10036: Importing object {0} : {1} (with global id: {2} and internal id: {3}) failed.
   Cause: Import failed.
   Action: Check import file and try again.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10037: Import-replace for this node is supported for action groups only. The import file is invalid.
   Cause: Import-replace for this node was supported for action groups only.
   Action: Check import file.
   Level: 32
   Type: ERROR
Impact: Other

ODI-10038: The interface you are trying to use ({0}) is related to a logical schema ({1}) that no longer exists.
   Cause: Logical schema was not found.
   Action: Check interface.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-10039: Bad ID for an object representer
   Cause: Bad ID for an object representer
   Action: Check object's ID.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-10040: Cannot create directory
   Cause: Directory could not be created.
   Action: Check directory path/name.

   Level: 32
   Type: ERROR
   Impact: File

ODI-10041: Oracle Data Integrator Remote Object (SnpRemoteObject) must inherit from SnpsFunction.
   Cause: Oracle Data Integrator Remote Object (SnpRemoteObject) did not inherit from SnpsFunction.
   Action: Use SnpsFunction as parent.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-10042: SnpsQuery must be connected prior to execution
   Cause: SnpsQuery was not connected.
   Action: Set a connection.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-10043: Security token is a mandatory parameter
   Cause: Security token was not specified.
   Action: Check security parameters.

   Level: 32
   Type: ERROR
ODI-10044: Unable to save the interface. Maximum number of source datastores exceeded.
Cause: Maximum number of source datastores was exceeded.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-10045: a2.getCargo() not instance of SAPSegment
Cause: a2.getCargo() not instance of SAPSegment
Action: Check SAP Tree.

Level: 32
Type: ERROR
Impact: Other

ODI-10046: No IDoc.
Cause: Missed IDoc.
Action: Check IDoc.

Level: 32
Type: ERROR
Impact: Other

ODI-10047: Repository is not a development work repository
Cause: Repository was not a development work repository.
Action: Choose development work repository.

Level: 32
Type: ERROR
Impact: Other

ODI-10048: No work repository found.
Cause: No work repository was found.
Action: Check your connection settings or database.

Level: 32
Type: ERROR
Impact: Other

ODI-10049: Missing parameter
Cause: Parameter was missing.
Action: Check all parameters.

Level: 32
Type: ERROR
Impact: Other
ODI-10050: Missing parameter at: {0} SQL: {1}
  Cause: Parameter was missing.
  Action: Check all parameters.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-10051: Some objects cannot be exported because they do not exist in the
repository: {0} {1}
  Cause: Objects did not exist in the repository.
  Action: Check objects state.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-10052: A problem occurred in your repository.
  Cause: A problem occurred in your repository.
  Action: Contact Oracle Support Services.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-10053: Problem retrieving JCOFunction object. {0}
  Cause: Problem occurred retrieving JCOFunction object.
  Action: Check JCO Function object.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-10054: Unable to find the XML file corresponding to your technology.
  Cause: XML file corresponding to your technology was not found.
  Action: Check technology and/or XML file for the technology.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-10055: This ID is already in use in the repository
  Cause: This ID was already in use in the repository.
  Action: Change ID.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-10056: This repository ID already exists. This repository cannot be created.
Cause: Repository ID already existed.
Action: Change repository ID.
Level: 32
Type: ERROR
Impact: Other

ODI-10057: Unrecognized export type.
Cause: Export type was unrecognized.
Action: Check export type.
Level: 32
Type: ERROR
Impact: Other

ODI-10058: You are trying to import objects from a master repository of an older version into [0] version. This action is forbidden. Master repositories must be upgraded using the upgrade assistant, not using the export/import facility.
Cause: You tried to import objects from a master repository of an older version.
Action: Master repositories must be upgraded using the upgrade assistant, not using the export/import facility.
Level: 32
Type: ERROR
Impact: Other

ODI-10059: Repository is null
Cause: Repository was null.
Action: Check repository.
Level: 32
Type: ERROR
Impact: Other

ODI-10060: Saputil is mandatory.
Cause: Saputil was mandatory.
Action: Check Saputil.
Level: 32
Type: ERROR
Impact: Other

ODI-10061: Empty XML Character Set
Cause: XML Character Set was empty.
Action: Fill XML Character Set.
Level: 32
Type: ERROR
Impact: Other
ODI-10062: Unable to find license key {0}. An exception {1} occurred with message: {2}
Cause: An exception occurred.
Action: Check license key.
Level: 32
Type: ERROR
Impact: Other

ODI-10063: Unable to check the license key. An exception {0} occurred with message: {1}
Cause: An exception occurred.
Action: Check license key.
Level: 32
Type: ERROR
Impact: Other

ODI-10064: The interface must have a JMS datastore as a source or target. Another license is required otherwise.
Cause: The interface must have a JMS datastore as a source or target.
Action: Check datastore type and/or license.
Level: 32
Type: ERROR
Impact: Other

ODI-10065: You license does not include these features. Please contact your reseller.
Cause: You license does not include these features.
Action: Please contact your reseller.
Level: 32
Type: ERROR
Impact: Other

ODI-10066: The interface is using a Datastore defined in Model "{0}" which is linked to a logical schema "{1}" that no longer exists.
Cause: Logical schema was not found.
Action: Correct interface.
Level: 32
Type: ERROR
Impact: Other

ODI-10067: Target file already exists.
Cause: Target file already existed.
Action: Choose another target file name.
Level: 32
Type: ERROR
Impact: File

ODI-10068: SnpsConnection: Current Isolation level: {0}. The new Isolation level: {1}, not supported
  Cause: Isolation level not supported.
  Action: Check isolation level.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10069: Unsupported XML Character Set: {0}
  Cause: Unsupported XML Character Set.
  Action: Check XML charset.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10070: Cannot delete this object. It is being edited or viewed
  Cause: Object was being edited or viewed.
  Action: Stop edit or view object and try again.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10071: Cannot delete this object
  Cause: Could not delete this object.
  Action: Check object state.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10073: A repository already exists on this data server
  Cause: A repository already existed on this data server.
  Action: Choose another data server.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10074: An object with the wrong type was given to an object representative
  Cause: An object with the wrong type was given to an object representative
  Action: Check object type.
  Level: 32
  Type: ERROR
  Impact: Other
ODI-10075: An object is in an unidentified state {0}
  Cause: An object is in an unidentified state.
  Action: Check object state.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10076: A collection object is the wrong class
  Cause: A collection object is the wrong class.
  Action: Check collection object's class
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10077: Undefined action performed on an object: {0}
  Cause: An undefined action was performed on an object.
  Action: Check action and object.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10078: An object will be in an unidentified state (it is in the state "{0}" and "{1}" is currently being performed on it)
  Cause: An object would have been in an unidentified state.
  Action: Check object state.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10080: Incorrect License ....
  Cause: Incorrect License.
  Action: Contact your seller.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10081: You are not authorized to Insert the Object: {0}: {1} / {2}
  Cause: You were not authorized to Insert the Object.
  Action: Login with user with right privileges.
  Level: 32
  Type: ERROR
  Impact: Security

ODI-10082: You are not authorized to View the Object: {0}: {1}
Cause: You were not authorized to View the Object.
Action: Login with user with right privileges.

Level: 32
Type: ERROR
Impact: Security

ODI-10083: You are not authorized to Delete the Object: {0}: {1} / {2}

Cause: You were not authorized to Delete the Object.
Action: Login with user with right privileges.

Level: 32
Type: ERROR
Impact: Security

ODI-10084: You are not authorized to Edit the Object: {0}: {1} / {2}

Cause: You were not authorized to Edit the Object.
Action: Login with user with right privileges.

Level: 32
Type: ERROR
Impact: Security

ODI-10085: You cannot consult this object

Cause: You could not consult this object.
Action: Login with user with right privileges.

Level: 32
Type: ERROR
Impact: Security

ODI-10086: You cannot edit this object

Cause: You could not edit this object.
Action: Login with user with right privileges.

Level: 32
Type: ERROR
Impact: Security

ODI-10087: You can only give Supervisor Access Privileges if you are a Supervisor.

Cause: You could only give Supervisor Access Privileges if you are a Supervisor.
Action: Login with user with right privileges.

Level: 32
Type: ERROR
Impact: Security

ODI-10088: Empty Java Character Set.

Cause: Java Character Set was empty.
Action: Fill Java charset.
Level: 32
Type: ERROR
Impact: Other

**ODI-10089: You cannot modify another user's password**

*Cause:* You cannot modify another user’s password

*Action:* Login with user with right privileges.

Level: 32
Type: ERROR
Impact: Security

**ODI-10090: Object \{0\} \{1\} is referenced by: \{2\}. Cannot remove.**

*Cause:* Object was referenced by another one.

*Action:* Check object’s references.

Level: 32
Type: ERROR
Impact: Other

**ODI-10091: not connected**

*Cause:* not connected

*Action:* Check connection.

Level: 32
Type: ERROR
Impact: Other

**ODI-10092: Some objects cannot be exported. They do not exist in the repository.**

*Cause:* Objects did not exist in the repository.

*Action:* Check objects” state.

Level: 32
Type: ERROR
Impact: Other

**ODI-10093: You are importing an object from another repository with the same identifier. It is forbidden.**

*Cause:* You tried to import an object from another repository with the same identifier.

*Action:* Change repository ID.

Level: 32
Type: ERROR
Impact: Other

**ODI-10094: Problem while computing new name.**

*Cause:* A problem occurred while computing new name.

*Action:* Try again.
Level: 32
Type: ERROR
Impact: Other

ODI-10095: Exception while getting the children list
Cause: Exception while getting the children list.
Action: Try again.

Level: 32
Type: ERROR
Impact: Other

ODI-10096: Error while parsing fields
Cause: Error occurred while parsing fields.
Action: Check fields value.

Level: 32
Type: ERROR
Impact: Other

ODI-10097: Impossible to find text with ID {0} in text list.
Cause: Text was not found.
Action: Check text ID

Level: 32
Type: ERROR
Impact: Other

ODI-10098: No connection available. Check connection parameters.
Cause: No connection was available.
Action: Check connection parameters.

Level: 32
Type: ERROR
Impact: Network

ODI-10099: Object cannot be exported because the file with name {0} could not be created.
Cause: Object could not be exported because the file could not be created.
Action: Check your system rights to write files and file name.

Level: 32
Type: ERROR
Impact: Other

ODI-10100: Empty XML Version
Cause: XML version was empty.
Action: Fill XML Version.

Level: 32
Type: ERROR
Impact: Other

ODI-10101: Invalid XML Version: {0}
  Cause: XML Version was invalid.
  Action: Check XML version.
  Level: 32

Type: ERROR
Impact: Other

ODI-10102: Alias with the name {0} already exists.
  Cause: Alias already exists.
  Action: Change alias.
  Level: 32

Type: ERROR
Impact: Other

ODI-10103: Alias with the name {0} does not exist.
  Cause: Alias doesn't exist.
  Action: Check alias name ant try again.
  Level: 32

Type: Error
Impact: Other

ODI-10104: File {0} is not a Smart Export file and cannot be imported by Smart Import.
  Cause: Smart Export file not specified for Smart Import.
  Action: Specify a Smart Export file for importing via Smart Import.
  Level: 32

Type: ERROR
Impact: Other

ODI-10105: Smart Import file name cannot be null.
  Cause: Smart Export file name not specified for Smart Import.
  Action: Specify a Smart Export file for importing via Smart Import.
  Level: 32

Type: ERROR
Impact: Other

ODI-10106: Smart Import response file name cannot be null.
  Cause: Smart import response file name not specified for Smart Import.
  Action: Specify a Smart Import response file.
  Level: 32

Type: ERROR
Impact: Other

ODI-10107: Smart Import file {0} not found.
  Cause: File does not exist.
  Action: Specify an existing Smart Export file for importing via Smart Import.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10108: Smart Import response file {0} not found.
  Cause: Response file does not exist.
  Action: Specify an existing Smart Import response file.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10109: File {0} is not a valid Smart Import Response file.
  Cause: File is not a valid Smart Import response.
  Action: Specify an existing Smart Import response file.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10110: {0} with the same {1} exists.
  Cause: An object with the same alternative key value(s) exists.
  Action: Change the alternative key value to be unique.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10111: {0} <{1}> referenced by {2} <{3}> is missing.
  Cause: A referenced object does not exist.
  Action: Either import the missing object or change to reference a different object.
  Level: 32
  Type: WARNING
  Impact: Other

ODI-10112: Project code will be changed from <{0}> to <{1}>.
  Cause: The import will make a change to an existing project code.
  Action: Determine whether the change to project code is desired or not.
  Level: 32
  Type: WARNING
  Impact: Other

ODI-10113: {0} with {1} <{2}> does not exist.
Causes:

- A referenced object does not exist.
  
  **Action:** Either import the missing object or change to reference a different object.
  
  **Level:** 32
  
  **Type:** WARNING
  
  **Impact:** Other

**ODI-10114:** {0} with {1} id <{2}> does not exist.

**Causes:**

- A referenced object does not exist.
  
  **Action:** Either import the missing object or change to reference a different object.
  
  **Level:** 32
  
  **Type:** WARNING
  
  **Impact:** Other

**ODI-10115:** {0} with the same name <{1}> already exists.

**Causes:**

- A different object with the same name already exists.
  
  **Action:** Either change the name of the object being imported or use match by name to match to the already existing object with the same name.
  
  **Level:** 32
  
  **Type:** WARNING
  
  **Impact:** Other

**ODI-10116:** Model code will be changed from <{0}> to <{1}>.

**Causes:**

- The import will make a change to an existing model code.
  
  **Action:** Determine whether the change to model code is desired or not.
  
  **Level:** 32
  
  **Type:** WARNING
  
  **Impact:** Other

**ODI-10117:** Sub-model code will be changed from <{0}> to <{1}>.

**Causes:**

- The import will make a change to an existing sub-model code.
  
  **Action:** Determine whether the change to sub-model code is desired or not.
  
  **Level:** 32
  
  **Type:** WARNING
  
  **Impact:** Other

**ODI-10118:** A different Physical Schema is already set as the default physical schema for the same data server.

**Causes:**

**Action:**

**Level:** 32

**Type:** WARNING

**Impact:** Other

**ODI-10119:** A different Context is already set as the default Context.
ODI-10120: Context code will be changed from \(<\{0\}\> \text{to} \langle{1}\rangle\).

**Cause:** The import will make a change to an existing context code.

**Action:** Determine whether the change to context code is desired or not.

**Level:** 32

**Type:** WARNING

**Impact:** Other

ODI-10121: Logical schema name will be changed from \(<\{0\}\> \text{to} \langle{1}\rangle\).

**Cause:** The import will make a change to an existing logical schema name.

**Action:** Determine whether the change to logical schema name is desired or not.

**Level:** 32

**Type:** WARNING

**Impact:** Other

ODI-10122: Logical agent name will be changed from \(<\{0\}\> \text{to} \langle{1}\rangle\).

**Cause:** The import will make a change to an existing logical agent name.

**Action:** Determine whether the change to logical agent name is desired or not.

**Level:** 32

**Type:** WARNING

**Impact:** Other

ODI-10123: \(\{0\}\) with \(\{1\}\) \(<\{2\}\> \text{and} \langle{3}\rangle \langle{4}\rangle\) does not exist.

**Cause:** A referenced object does not exist.

**Action:** Either import the missing object or change to reference a different object.

**Level:** 32

**Type:** WARNING

**Impact:** Other

ODI-10124: Smart import of file \(\{0\}\) cannot be run due to unfixed critical issues.

**Cause:** Critical issues exist for objects in the Smart Import.

**Action:** A fix must be provided for all critical issues before the Smart Import can be run.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-10125: Smart Export file name cannot be null.

**Cause:** Smart Export file name not specified for Smart Export.
**Action:** Specify a Smart Export file via Smart Export.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-10126: File \{0\} already exists.

**Cause:** The file already exists.

**Action:** Specify another file name.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-10127: Column position \{0\} is being used by another object \((1)\).

**Cause:** The position value is already in use.

**Action:** Specify a unique position value.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-10128: Multiple primary keys found. Only one primary key can be defined per datastore.

**Cause:** Multiple primary keys defined.

**Action:** Delete or match primary keys so that only one is defined.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-10129: Object with id \{0\} and type \{1\} is not a smart exportable object.

**Cause:** Smart Export does not support the type of object specified.

**Action:** Do not export this object.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-10130: Smart Import Response file \{0\} is not valid for Smart Export file \{1\}.

**Cause:** Smart Import Response file was not generated for the Smart Export file being imported.

**Action:** Specify a Smart Import response file that belongs to the Smart Export file being imported.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-10131: Entity of type \{0\} cannot be merged.

**Cause:** Wrong entity type.
Action: Check entity type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10132: Entity of type {0} cannot be removed.
Cause: Wrong entity type.
Action: Check entity type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10133: Cannot create a transaction against the extended persistent context [{0}].
Cause: Another persistence context is already bound to the current thread.
Action: Unbound persistence context from current thread.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10134: You don't have READ permission on at least one object from the collection/list.
Cause: Insufficient level of permissions.
Action: Check your permissions
Level: 32
Type: ERROR
Impact: Security

ODI-10135: Max value (11) reached for sequence {0} and reset is not allowed.
Cause: Reset is not allowed.
Action: Check configuration of sequence behaviour.
Level: 32
Type: ERROR
Impact: Other

ODI-10136: Illegal transaction state: transaction synchronization is active but entity manager is not synchronized within the transaction.
Cause: Entity manager is not synchronized within the transaction.
Action: Synchronize entity manager and try again.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10137: Your program needs to set authentication first.
Cause: There is no authentication set.
**Action:** Set authentication via
odiInstance.getSecurityManager().setGlobalAuthentication() or
odiInstance.getSecurityManager().setCurrentThreadAuthentication(), see the
SecurityManager API for more detail.

**Level:** 32
**Type:** ERROR
**Impact:** Security

ODI-10138: Unable to create DwgConnectConnection to [0] repository.
**Cause:** Exception during connection.
**Action:** Check repository configuration.

**Level:** 32
**Type:** ERROR
**Impact:** Other

ODI-10139: [0] must not be null or empty.
**Cause:** Parameter is null or empty.
**Action:** Check parameter name.

**Level:** 32
**Type:** ERROR
**Impact:** Configuration

ODI-10140: [0] must be greater or equal 0.
**Cause:** Parameter is negative.
**Action:** Check parameter value.

**Level:** 32
**Type:** ERROR
**Impact:** Configuration

ODI-10141: Unable to create datasource provider from class [0].
**Cause:** Exception during creation.
**Action:** Check configuration.

**Level:** 32
**Type:** ERROR
**Impact:** Configuration

ODI-10142: Active transaction is required to use the method [0] on the
TransactionalOdiEntityManager.
**Cause:** Transaction isn’t active.
**Action:** Check transaction state.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

ODI-10143: Error while accessing the [0] repository.
Error Messages

Cause: Network problems.
Action: Check the network connection and the database status.
Level: 32
Type: ERROR
Impact: Network

ODI-10144: OdiInstance is closed.
Cause: OdiInstance is closed.
Action: Check OdiInstance status.
Level: 32
Type: ERROR
Impact: Other

ODI-10145: Limited persistence support.
Cause: Limited persistence support.
Action: Check OdiInstance configuration.
Level: 32
Type: ERROR
Impact: Other

ODI-10146: Cannot create JDBC DataSource for this type of DataServer.
Cause: Invalid connection provider.
Action: Check connection provider.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10147: Repository type mismatches.
Cause: Wrong repository type.
Action: Check repository type.
Level: 32
Type: ERROR
Impact: Configuration

ODI-10148: Repository is in error install/upgrade state and needs to be repaired. Connection has been disabled.
Cause: Repository install/upgrade did not complete successfully.
Action: Check install/upgrade log files and/or ODI user documentation for information on reparation process.
Level: 32
Type: ERROR
Impact: Configuration

ODI-10149: Local Repository table is empty.
Cause: Local Repository table is empty.
Action: Check repository configuration.
Level: 32
Type: ERROR
Impact: Configuration

ODI-10150: Work repository with ID {0} is not bound to master: Definition in master ID:{0}, Name:{1}, Timestamp:{2} Definition in work ID:{3}, Name:{4}, Timestamp:{5}.
Cause: Work repository with ID is not bound to master repository.
Action: Check work and master repositories configuration.
Level: 32
Type: ERROR
Impact: Configuration

ODI-10151: Unable to get ID for entity {0}.
Cause: Wrong entity ID.
Action: Check entity properties.
Level: 32
Type: ERROR
Impact: Security

ODI-10152: I_OBJECTS for entity class {0} is not found.
Cause: Entity type is not mapped to I_OBJECTS.
Action: Check entity class.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10153: {0} is denied.
Cause: Insufficient level of permissions.
Action: Check permissions.
Level: 32
Type: ERROR
Impact: Security

ODI-10154: {0} is denied for {1}.
Cause: Insufficient level of permissions.
Action: Check permissions.
Level: 32
Type: ERROR
Impact: Security
ODI-10155: You don't have {0} permission on at least one object from the collection/list.
Cause: Insufficient level of permissions.
Action: Check permissions.
Level: 32
Type: ERROR
Impact: Security

ODI-10156: Impossible to connect to JPS MBean Server.
Cause: Exception during connection.
Action: Check configuration.
Level: 32
Type: ERROR
Impact: Configuration

ODI-10157: {0}: must call preWebLogic() before postWebLogic().
Cause: Wrong API usage.
Action: Call preWebLogic() before postWebLogic().
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10158: The credential with map name {0} and key {1} already exists.
Cause: Wrong credential.
Action: Check credential configuration.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10159: The user {0} hasn't required CONNECT profile.
Cause: The user hasn't required profile.
Action: Grant the user CONNECT profile first.
Level: 32
Type: ERROR
Impact: Security

ODI-10160: Unable to load user.
Cause: Exception during user loading.
Action: Check repository connection.
Level: 32
Type: ERROR
Impact: Other
ODI-10161: Trying to create authentication with Subject parameter which should be applicable when OPSS authentication is used, but ODI shows it is using ODI internal authentication.

**Cause:** ODI internal authentication is used instead of OPSS authentication.

**Action:** Check authentication type.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

ODI-10162: This OPSS user "{0}" is not registered to Oracle Data Integrator.

**Cause:** The user is not registered to ODI.

**Action:** Check user name.

**Level:** 32  
**Type:** ERROR  
**Impact:** Configuration

ODI-10163: This OPSS user "{0}" has different GUID than the one found in Oracle Data Integrator repository.

**Cause:** OPSS user differs from ODI user in GUID.

**Action:** Check user GUID.

**Level:** 32  
**Type:** ERROR  
**Impact:** Security

ODI-10164: Only supervisor user can invoke this API.

**Cause:** Insufficient level of permissions.

**Action:** Check user role.

**Level:** 32  
**Type:** ERROR  
**Impact:** Security

ODI-10165: The RunAsUser {0} is not a valid user from external user identity store.

**Cause:** User isn’t valid.

**Action:** Check user.

**Level:** 32  
**Type:** ERROR  
**Impact:** Security

ODI-10166: The RunAsUser: {0} has different GUID in ODI repository and external user identity store.

**Cause:** User from external user identity store differs from ODI user in GUID.

**Action:** Check user.

**Level:** 32  
**Type:** ERROR
Impact: Security

ODI-10167: Authentication is missing.
Cause: Authentication is missing.
Action: Check authentication configuration.
Level: 32
Type: ERROR
Impact: Security

ODI-10168: There is already an Authentication bound to this thread.
Cause: There is already an Authentication bound to this thread.
Action: Check authentication configuration.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10169: Trying to set authentication object which is not created by this security manager.
Cause: Authentication object isn't created by this security manager.
Action: Check authentication configuration.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10170: There is currently no Authentication bound to this thread.
Cause: There is currently no Authentication bound to this thread.
Action: Check authentication configuration.
Level: 32
Type: ERROR
Impact: Security

ODI-10171: There is already an Authentication bound as global Authentication.
Cause: There is already an Authentication bound as global Authentication.
Action: Check authentication configuration.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10172: There is currently no global Authentication bound to this SecurityManager.
Cause: There is currently no global Authentication bound to this SecurityManager.
Action: Check authentication configuration.
Level: 32
Type: ERROR
Impact: Security

ODI-10173: You are not authorized to change the password for external user '{0}'

Cause: Insufficient level of permissions.

Action: Check permissions.

Level: 32

Type: ERROR

Impact: Security

ODI-10174: You are not authorized to change the password for user '{0}'

Cause: Insufficient level of permissions.

Action: Check permissions.

Level: 32

Type: ERROR

Impact: Security

ODI-10175: You are not authorized to change the password for external user.

Cause: Insufficient level of permissions.

Action: Check permissions.

Level: 32

Type: ERROR

Impact: Security

ODI-10176: Authentication is needed to change password.

Cause: Authentication is missed.

Action: Authenticate first.

Level: 32

Type: ERROR

Impact: Security

ODI-10177: ODI was not able to load the jdbc driver class '{0}' provided on {1}

Cause: Wrong jdbc driver class.

Action: Check that the driver class name is correct and that this driver is available to ODI classloader.

Level: 32

Type: ERROR

Impact: Other

ODI-10178: The jdbc URL '{1}' was not accepted by the jdbc driver class '{0}' provided on {2}

Cause: Insufficient jdbc URL.

Action: Check that the jdbc URL and the driver class name are matching.

Level: 32

Type: ERROR
Impact: Other

ODI-10179: Client requires a repository with version {0} but the repository version found is {1}.
Cause: Insufficient repository version.
Action: Check repository configuration.
Level: 32
Type: ERROR
Impact: Other

ODI-10180: ODI was not able to load the jdbc driver class {0} specified in ODI topology for work repository {1}.
Cause: Wrong jdbc driver class.
Action: Check that the driver class name is correct and that this driver is available to ODI classloader. If the driver class name is incorrect please connect to ODI topology to fix it.
Level: 32
Type: ERROR
Impact: Other

ODI-10181: Uncategorized configuration exception.
Cause: An unexpected error occurred.
Action: Check exception cause for details.
Level: 32
Type: ERROR
Impact: Configuration

ODI-10182: Uncategorized exception during repository access.
Cause: An unexpected error occurred.
Action: Check exception cause for details.
Level: 32
Type: ERROR
Impact: Other

ODI-10183: {0} is an invalid finder class.
Cause: Wrong finder class.
Action: Check finder class.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10184: Could not get ESS {0}.
Cause: Exception during session retrieving.
Action: Check configuration and try again.
Level: 32
Type: ERROR
Impact: Session

ODI-10185: Operation is not granted.
  Cause: Current level of permission is not sufficient.
  Action: Check your permissions.

  Level: 32
Type: ERROR
Impact: Security

ODI-10186: User {0} is inactive.
  Cause: There is no GUID defined for this User in ODI repository
  Action: Check user GUID.

  Level: 32
Type: ERROR
Impact: Security

ODI-10187: The authentication API is used in wrong way.
  Cause: The authentication API is used in wrong way.
  Action: Check usage of API.

  Level: 32
Type: ERROR
Impact: Programmatic

ODI-10188: Error while login from OPSS.
  Cause: Exception was thrown during login process.
  Action: Make sure OPSS is configured correctly for this installation.

  Level: 32
Type: ERROR
Impact: Other

ODI-10189: The password violates the following rule: "Password policy {0}". Select another password.
  Cause: Weak password
  Action: Check password policy and correct password.

  Level: 32
Type: ERROR
Impact: Security

ODI-10190: The user {0} has its account expired.
  Cause: Account expired
  Action: Request supervisor for account unlocking.

  Level: 32
Type: ERROR
Impact: Security

ODI-10191: Unable to create datasource provider.
Cause: Exception during creation.
Action: Check configuration.
Level: 32
Type: ERROR

Impact: Configuration

ODI-10192: Unable to retrieve user GUID.
Cause: Exception during GUID retrieving.
Action: Check repository connection.
Level: 32
Type: ERROR

Impact: Other

ODI-10193: Unexpected null value in port.
Cause: JPS port value is null.
Action: Check JPS configuration.
Level: 32
Type: ERROR

Impact: Programmatic

ODI-10194: Uncategorized security exception.
Cause: An unexpected error occurred.
Action: Check exception cause for details.
Level: 32
Type: ERROR

Impact: Programmatic

ODI-10195: CsfAccessor is only available for CsfPasswordStorageConfiguration
Cause: Password storage configuration is internal.
Action: Check storage configuration.
Level: 32
Type: ERROR

Impact: Programmatic

ODI-10196: Error while accessing the repository.
Cause: Network problems.
Action: Check the network connection and the database status.
Level: 32
Type: ERROR

Impact: Network

ODI-10197: Instance is not connected to a work repository
Cause: Work datasource is null.
Action: Check work datasource.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10198: Context with code '{0}' wasn't found.
Cause: Context wasn't found.
Action: Check context code.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10199: Incorrect ODI username or password.
Cause: Incorrect ODI username or password.
Action: Check username and password.
Level: 32
Type: ERROR
Impact: Security

ODI-10200: Work repository {0} wasn't found.
Cause: Wrong repository name or repository isn't defined.
Action: Check repository name.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10201: The user {0} has its password expired.
Cause: Account expired
Action: Request supervisor for changing password.
Level: 32
Type: ERROR
Impact: Security

ODI-10202: Supervisor privilege is required to setup repository.
Cause: Insufficient level of permissions.
Action: User supervisor account for this operation.
Level: 32
Type: ERROR
Impact: Security

ODI-10203: Transaction state is illegal.
Cause: Transaction state is illegal.
Action: Check transaction state.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10204: Inappropriate usage of a ODI transaction API.
Cause: Inappropriate usage of a ODI transaction API.
Action: Check ODI transaction API.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10205: Unexpected rollback.
Cause: Attempt to commit a transaction resulted in an unexpected rollback.
Action: Check transaction.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10206: Transaction can't be created.
Cause: Exception was thrown during transaction creation.
Action: Check transaction.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10207: Uncategorized exception during transaction system usage.
Cause: An unexpected error occurred.
Action: Check exception cause for details.

Level: 32
Type: ERROR
Impact: Other

ODI-10208: Error when changing password for user {0}.
Cause: An unexpected error occurred.
Action: Check exception cause for details.

Level: 32
Type: ERROR
Impact: Other

ODI-10209: Cannot access a closed IOdiEntityManager.
Cause: IOdiEntityManager has been closed.
Action: Check IOdiEntityManager state.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10210: File {0} does not contain any objects to be imported by Smart Import.
Cause: Smart Export file specified for Smart Import is empty.
Action: Specify a Smart Export file with objects for importing via Smart Import.
Level: 32
Type: ERROR
Impact: Other

ODI-10211: Unsupported Java Character Set: {0}
Cause: Unsupported Java Character Set.
Action: Check Java charset.
Level: 32
Type: ERROR
Impact: Other

ODI-10212: Parent object {0}: "\{1\}" already has child {2}: "\{3\}". Technical details: {2} : "\{3\}" (with global id: {7} and internal id: {8}) violates alternate key constraint {4} {5} for values {6}
Cause: Object violated alternate key constraint.
Action: Check object properties and constraint's values.
Level: 32
Type: ERROR
Impact: Other

ODI-10213: Fixed format file field {0} (starts at {1} ends at {2}) has a file position that overlaps with the file position of field {3} (starts at {4} ends at {5}).
Cause: Two fields from a fixed format file have overlapping file positions.
Action: Modify the file positions or remove a field if the overlapping file positions are not correct.
Level: 32
Type: ERROR
Impact: Other

ODI-10214: Fixed format file fields {0} (starts at {1} ends at {2}) and {3} (starts at {4} ends at {5}) have unused file positions between them.
Cause: Two fields from a fixed format file have unused file positions between them.
Action: Modify the file positions if having unused file positions is not correct.
Level: 32
Type: ERROR
Impact: Other

ODI-10215: It is forbidden to import a log into a repository using any other import mode except "Synonym Mode Insert".
Cause: Import mode is not "Synonym Mode Insert".
Action: Correct import mode.
Level: 32
Type: Error
Impact: Other

ODI-10216: Upgrade key cannot be null when importing objects from before ODI 12C.
Cause: Upgrade key is not set for import that must upgrade objects to have global ids.
Action: Specify the upgrade key to be used.
Level: 32
Type: Error
Impact: Other

ODI-10217: Permission check failed for instance object {0}.
Cause: Permission check failed for instance object.
Action: Need to grant initial permission for creator on object.
Level: 32
Type: NOTIFICATION
Impact: Other

ODI-10218: Invalid WAS_HOME ("{0}") set or WebSphere library jar ("{1}") not found under WAS_HOME/plugins.
Cause: Wrong WAS_HOME set (or) WebSphere libraries (com.ibm.ws.admin.core.jar, com.ibm.ws.admin.services.jar, com.ibm.ws.runtime.jar) are moved
Action: Check that the environment-variable WAS_HOME is set properly to point to WebSphere Application Server root. Also, ensure the libraries exist under WAS_HOME/plugins.
Level: 32
Type: ERROR
Impact: Other

ODI-10219: ODI Library for WebSphere access ("{0}") not found.
Cause: Library could be moved / deleted
Action: Check that the specified library present
Level: 32
Type: ERROR
Impact: Other

ODI-10220: ODI was unable to find the technology "{0}".
Cause: Missing technology.
Action: Check that this technology is defined in the repository.
Level: 32
Type: ERROR
Impact: Other
ODI-10221: It's taken {0} second to synchronize Snp_Ent_Principal table content.
  Cause:
  Action:
  Level: INFO
  Type: NOTIFICATION
Impact: Other
ODI-10222: The compatible Mapping/ReusableMapping {0} can only be modified by 11g SDK.
  Cause: An attempt was made to modify compatible Mapping using 12c SDK.
  Action: Modify compatible Mapping using 11g Interface SDK.
  Level: 32
  Type: ERROR
Impact: Other
ODI-10223: A non-legacy compatible import source cannot be imported into a legacy compatible repository.
  Cause: An attempt was made to import a non-legacy compatible import source into a legacy compatible repository.
  Action: Import a legacy compatible import source or make repository not legacy compatible.
  Level: 32
  Type: Error
Impact: Other
ODI-10224: You are not authorized to create new user.
  Cause: Only SUPERVISOR could create users.
  Action: Check permissions.
  Level: 32
  Type: ERROR
Impact: Security
ODI-10225: Invalid wallet password: A valid password must have a minimum length of eight characters and contain alphabetic characters combined with numbers or special characters.
  Cause: Invalid wallet password.
  Action: Please choose a valid wallet password accordingly.
  Level: 32
  Type: ERROR
Impact: Security
ODI-10226: Wallet already exists.
  Cause: Try to create a wallet which already exists.
  Action: Please stop creating a wallet. Instead use the existing one.
Level: 32
Type: ERROR
Impact: Security

ODI-10227: Wallet new password is same as old password.
Cause: You provide a new wallet password which is the same as the old one.
Action: Please choose different wallet password than the old one.

Level: 32
Type: ERROR
Impact: Security

ODI-10228: Repository with id "{0}" or with name "{1}" has been already used in your master repository.
Cause: Master repository has already work repository with the same name or id.
Action: Check your master repository and work repository.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10229: Repository with id "{0}" has been already used in your master repository.
Cause: Master repository has already work repository with the same id.
Action: Check your master repository and work repository.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10230: Repository with name "{0}" has been already used in your master repository.
Cause: Master repository has already work repository with the same name.
Action: Check your master repository and work repository.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10231: Interface {0} cannot be imported because source temporary interface / mapping {1} is not found.
Cause: An attempt was made to import an interface with a source temporary interface / mapping that cannot be found in the import source or target repository.
Action: Import the missing source temporary interface / mapping.

Level: 32
Type: ERROR
Impact: Other

ODI-10232: The password violates the following rule: "New password must be different from old one". Select another password.
ODI-01100 to ODI-999999

38-135

Cause: Weak password
Action: Check password policy and correct password.
Level: 32
Type: ERROR
Impact: Security

**ODI-10234: Object cannot be imported since it contains non XML files**

Cause: ZipFolder to be imported should not contain non XML files
Action: Check ZipFolder to be imported
Level: 32
Type: ERROR
Impact: Other

**ODI-10235: No Importable files found**

Cause: None of XML files imported from ZipFolder
Action: Check XML files to be imported from Zip Folder
Level: 32
Type: ERROR
Impact: Other

**ODI-10236: Object must be replaced with an object of same KM type**

Cause: KM of different type to the existing KM was selected for import replace.
Action: Import Replace KM with existing KM type
Level: 32
Type: ERROR
Impact: Other

**ODI-10237: Object not replaced**

Cause: A KM was selected for the Import Replace with a different type to the current KM.
Action: Select a KM of the same type for import replace.
Level: 32
Type: WARNING
Impact: Other

**ODI-10238: Object must be replaced with an object of same type**

Cause: Different ODI object is used to Import Replace KM
Action: Import Replace KM with Same type
Level: 32
Type: ERROR
Impact: Other

**ODI-10239: Importing file "[0]"...**

Cause:
Action:
Level: 32
Type: NOTIFICATION
Impact: Files
ODI-10240: Updating dataservers...
Cause:
Action:
Level: 32
Type: NOTIFICATION
Impact: Topology
ODI-10241: Removing Error Tables for Physical Schema with id '{0}'
Cause:
Action:
Level: 32
Type: NOTIFICATION
Impact: Topology
ODI-10242: Removing Error Table "{0}" 
Cause:
Action:
Level: 32
Type: NOTIFICATION
Impact: Topology
ODI-10243: Cannot import an export file with parents using regular import and INSERT_UPDATE mode. Use smart import instead.
Cause: An attempt was made to import an export file created with parent objects using regular import and INSERT_UPDATE mode. This would cause all other objects under the parent objects and not in the import file to be deleted.
Action: Use smart import to import an export file created with parent objects when INSERT_UPDATE functionality is needed.
Level: 32
Type: ERROR
Impact: Other
ODI-10244: Cannot import {0} {1} (with global id: {2} and internal id: {3}) because referenced {4} with global id {5} does not exist.
Cause: The referenced object for a foreign key cannot be found in order to set the reference and a missing reference cannot be created.
Action: Import the missing referenced object before importing the referencing object.
Level: 32
Type: ERROR
Impact: Other

ODI-10245: Cannot import {0} {1} (with global id: {2} and internal id: {3}) belonging to {4} {5} (with global id: {6} and internal id: {7}) because its referenced object is not found in the target repository.
Cause: The object was imported in a SYNONYM UPDATE mode and the referenced object was not found in the repository.
Action: Change the import mode to INSERT_UPDATE or import the file twice first in INSERT MODE and then in UPDATE mode.

Level: 32
Type: ERROR
Impact: Other

ODI-10246: No Exportable objects found in the repository.
Cause: No objects are present in the repository for export
Action: Create repository objects

Level: 32
Type: ERROR
Impact: Other

ODI-10247: Specified project {0} does not exist in the repository.
Cause: The repository did not contain the specified project.
Action: Choose another project or create the project with the specified name.

Level: 32
Type: ERROR
Impact: Other

ODI-10248: {0} : Not an ODI special driver.
Cause: Invalid Special driver.
Action: Check that this technology is part of the special driver list.

Level: 32
Type: ERROR
Impact: Other

ODI-13700: Unable to set the role OWB_USER for this user.
Cause: An attempt was made to set the role OWB_USER for the connected user.
Action: Check that the role exists and the connected user is an OWB user.

Level: 1
Type: ERROR
Impact: Other

ODI-13701: Unable to set the workspace {0} for this user.
Cause: An attempt was made to select the OWB workspace for the connected user.
Action: Check that the workspace exists and the connected user has got privilege to access it.
Level: 1
Type: ERROR
Impact: Other

ODI-13702: Unexpected error when connecting to OWB workspace {0}.
Cause: An unexpected error occurred when connecting to workspace.
Action: Verify that the Owb repository is up and running.

Level: 1
Type: ERROR
Impact: Other

ODI-13703: Unexpected error when locating object {0} in OWB workspace {1}.
Cause: An unexpected error occurred when locating an object in a workspace.
Action: Verify that the Owb repository is up and running and the object exists.

Level: 1
Type: ERROR
Impact: Other

ODI-13704: Could not locate the physical schema associated with OWB workspace {0} in context {1}.
Cause: An error occurred when finding the schema related to an OWB workspace in a context.
Action: Verify that the OWB workspace is related to a physical schema in the context.

Level: 1
Type: ERROR
Impact: Other

ODI-13800: Cannot locate the monitor configuration file: {0} using JVM argument: {1}={2} or the environment variable: {3}={4}.
Cause:
Action:

Level: 32

  Impact: Security

ODI-14146: Incorrect Export Key
  Cause: The Export Key provided is incorrect for the import source
  Action: Provide a valid Export Key that was used during Export of object
  Level: 32
  Type: ERROR
  Impact: Security

ODI-14147: An error occurred while migrating cipher text in object {0} - '{1}' (with Internal ID: {2} and Global ID: {3})
  Cause: Invalid Cipher content or Invalid Export Key
  Action: If exporting, check if the cipher data present in the object is correct. If importing, check if Export Key is correct.
  Level: 32
  Type: ERROR
  Impact: Security

ODI-14148: An Error occurred while creating Cipher for migration.
  Cause: An error occurred while creating ODI Cipher.
  Action: Refer to stack trace for more details
  Level: 32
  Type: ERROR
  Impact: Security

ODI-14149: Invalid Encoder/Decoder for Cipher Text Migration.
  Cause: The ODI Encoder/Decoder is invalid.
  Action: Create valid Encoder/Decoder for Cipher Text Migration.
  Level: 32
  Type: ERROR
  Impact: Security
ODI-14150: An Error occurred while migrating password cipher text
   Cause: An error occurred while migrating the password cipher text
   Action: Refer to stack trace for more details
   Level: 32
   Type: ERROR
   Impact: Security

ODI-14151: An error occurred while retrieving parameters from ODI Tool Command.
   Cause: Invalid ODI Tool Command.
   Action: Check ODI Tool Command text.
   Level: 32
   Type: ERROR
   Impact: Security

ODI-14152: Package name is not unique.
   Cause: Duplicate package name. Package with the same name already exists in this folder.
   Action: Choose another package name.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-14153: Procedure name is not unique.
   Cause: Duplicate procedure name. Procedure with the same name already exists in this folder.
   Action: Choose another procedure name.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-14154: Context name is not unique.
   Cause: Context with the same name already exists.
   Action: Check your context name.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-14155: Context code is not unique.
   Cause: Context with the same code already exists.
   Action: Check your context code.
   Level: 32
   Type: ERROR
   Impact: Other
ODI-14156: KM name is not unique.
  Cause: Duplicate KM name. KM with the same name already exists.
  Action: Choose another KM name.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-14157: Procedure option name is not unique.
  Cause: Duplicate procedure option name. Procedure option with the same name already exists.
  Action: Choose another procedure option name.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-14158: A Supervisor user can be updated only by another Supervisor user.
  Cause: The logged-in user is not a Supervisor user, but trying to update another Supervisor user.
  Action: Login as a user with right privileges.
  Level: 32
  Type: ERROR
  Impact: Security

ODI-14159: An error occurred while validating the Export Key.
  Cause: An error occurred while validating the export key
  Action: Please check the Logs
  Level: 32
  Type: ERROR
  Impact: Security

ODI-14160: Skipping Data migration on IP Text {0} . Failed with Exception : {1} . Please fix manually.
  Cause: An error occurred while migrating the password cipher text
  Action: Refer to Error Message for more details
  Level: 32
  Type: ERROR
  Impact: Security

ODI-14161: Duplicate name objects are found in the repository. Please check the upgrade log file.
  Cause: Some objects with same names are under same parents
  Action: Check the log file for the duplicate name objects. Remove them before upgrade
  Level: 32
Type: ERROR
Impact: Other

ODI-14162: User cannot login ODI with blank password. Please contact SUPERVISOR to reset the password.
Cause: User cannot login ODI with blank password. Please contact SUPERVISOR to reset the password.
Action: Please contact SUPERVISOR to reset the password.

Level: 32
Type: ERROR
Impact: Security

ODI-14163: User cannot create master repository through import with blank supervisor password.
Cause: User cannot create master repository through import with blank supervisor password.
Action: Please provide valid supervisor password to the API while create master repository through import.

Level: 32
Type: ERROR
Impact: Security

ODI-14164: Work repository name must not be null or empty
Cause: Work repository name is null or empty.
Action: Check Work repository name.

Level: 32
Type: ERROR
Impact: Other

ODI-15000: BSF Not Present
Cause: Bean Scripting Framework manager cannot be found.
Action: Ensure that class org.apache.bsf.BSFManager is available in the classpath.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15001: No End Separator for the following text:
Cause: No end delimiter found for a delimited text in the expression.
Action: Add an end delimiter to the delimited text.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15002: The string to be transformed cannot be null.
Cause: Parsing failed for an expression reference tag.
Action: Fix the expression.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15003: Error during Code Interpreter creation
Cause: Code generator internal error.
Action: Contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15005: The datatype "\{0\}" does not exist in technology: \{1\}.
Cause: The datatype for a column is not supported by the technology.
Action: Change the datatype or the technology of the execution location.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15006: The source datatype is null for the column: \{0\}, and the technology: \{1\}
Cause: The datatype for a column is null for the technology.
Action: Change the datatype or the technology of the execution location.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15007: Syntax not set for 'Create Table' for the datatype: \{0\} for the technology: \{1\}
Cause: The execution location technology does not have any "Create Table" syntax set up.
Action: Edit the technology definition and add "Create Table" syntax.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15009: No text for the 'Writable Datatype Syntax' for the datatype: \{0\} in technology: \{1\}
Cause: The datatype does not have a "Writable Datatype Syntax" property value set up for the execution location technology.
Action: Edit the datatype in the technology to add a "Writable Datatype Syntax".

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15010: No conversion for the datatype \{0\}, for the source technology \{1\} and for the target technology \{2\}
Cause: No conversion is defined for the source technology datatype to the target technology datatype.

Action: Edit the source or target technology datatype to add a conversion from the source to the target datatype.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15011: The variable does not exist in the database.
Cause: A variable is being referenced but it does not exist in the repository.
Action: Create the variable in the repository.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15012: Sequence does not exist in database
Cause: A sequence is referenced but does not exist in the repository.
Action: Create the sequence in the repository.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15013: The table {0} has fatal errors.
Cause: The table cannot be processed.
Action: Check the table for inconsistencies.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15014: The referenced text does not exist in the database.
Cause: The text reference in the expression does not exist in the repository.
Action: Repository corruption has occurred, contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15015: Too much recursion in this text resolution.
Cause: The expression text references other text recursively too many times.
Action: Review the expression and try to simplify.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15016: Commands Undefined.
**Cause:** KM is missing a block of lines.
**Action:** Check the KM.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15017: Table not selected (null).**  
**Cause:** Target table not found.  
**Action:** Check interface for consistency.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15018: CKM not selected.**  
**Cause:** The CKM is not selected for the object.  
**Action:** Select a CKM.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15019: Missing context**  
**Cause:** The context object cannot be found.  
**Action:** Check the context selection.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15020: No JKM available**  
**Cause:** JKM has not been set or is not found.  
**Action:** Set a valid JKM for the interface.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15021: Journalizing requires a Primary Key on the Table:**  
**Cause:** Journalizing is enabled, but the target table has no primary key.  
**Action:** Add a primary key to the target table.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15022: No RKM Set.**  
**Cause:** RKM has not been set or is not found.  
**Action:** Set a valid RKM for the object.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15023: Cannot perform standard reverse. Choose customized reverse and set RKM.
Cause: Standard reverse engineering is not supported for this object.
Action: Select customized reverse engineering for the object and select an RKM.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15025: The interface clause text does not exist.
Cause: The interface clause refers to text that does not exist.
Action: Check interface clauses for (join, filter, etc.) for consistency.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15026: Interface clauses are missing.
Cause: The code generator cannot find the clause collection for the interface.
Action: Check the interface for consistency.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15027: Interface source tables are missing.
Cause: The code generator cannot find the source table collection for the interface.
Action: Check the interface for consistency.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15028: Interface result collection is null.
Cause: Internal error.
Action: Contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15029: Interface error clause collection is missing.
Cause: Internal error.
Action: Contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15030: Interface is missing the integration work table collection.
Cause: Internal error.
Action: Contact Oracle support.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15031: Technology not selected.
Cause: No technology is selected for the interface target execution location.
Action: Check the technology selection for the interface target.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15032: Unknown object in interface source table collection
Cause: Internal Error.
Action: Contact Oracle support.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15033: The expression: {0} does not have an associated column.
Cause: The expression should represent a column, but no column is found for the name.
Action: Fix the expression.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15034: A scenario with the same name and the same number already exists. Please select other values.
Cause: Cannot create a duplicate scenario with the same name and version number as an existing scenario.
Action: Give the scenario a different name or version.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15036: Scenario's name and/or number are missing.
Cause: A scenario must have a name and version, but the name or version is missing.
Action: Set values for name and version for the scenario.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15037: The interface {0} has fatal errors.
Cause: The interface has fatal errors.
Action: Check and fix interface issues.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15038: The scenario name substitution pattern {0} is not supported. Please check the user parameter for the scenario naming convention.
Cause: Invalid substitution pattern used for scenario name.
Action: Change the substitution pattern.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15039: The interface {0} use native sequence. Native sequence are not allowed for Derived Table (sub select statement)
Cause: Native sequence was used in a sub-select or derived interface.
Action: Remove the native sequence usage.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15040: Errors detected when building SQL clauses.
Cause: An error occurred when generating code for the SQL clauses.
Action: Fix the interface clauses.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15041: An aggregation function may not be used in a join condition. Please use a separate interface for the aggregation and join the result in this interface.
Cause: An aggregation function was used inside a join condition expression.
Action: Change the join condition to remove the aggregation function.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15042: Unable to regenerate this scenario. It references an package that does not exist.
Cause: The scenario must reference a package, but it doesn’t.
Action: Delete the scenario and create a new one.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15043: Unable to regenerate this scenario from a Runtime repository.
Cause: The scenario must cannot be regenerated from the runtime repository.
Action: Delete the scenario and create a new one.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15044: Invalid pScenSource type when calling SnpGeneratorSQLCIT.mainGenScenSourceScenario
Cause: Internal error.
Action: Contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15045: Invalid value for KM type.
Cause: An invalid value was specified for the KM type.
Action: Specify a valid value.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15046: The column cache is null during code generation.
Cause: Internal Error.
Action: Contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15047: The cached column is null in the column cache during code generation.
Cause: Internal Error.
Action: Contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15050: Flow Control not possible if no key is declared in your target datastore
Cause: Flow control is enabled for the interface, but the target datastore has no primary key defined.
Action: Define a primary key for the target datastore object, and re-add the target datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15051: Missing mapping instance for interface.
Cause: The target column does not have any mapping.
Action: Add a mapping expression for the target column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15052: The interface is missing a dataset.
Cause: There is no dataset for the interface source.
Action: Check the interface for consistency.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15054: Scenario generation error: Cannot regenerate the scenario. The physical mapping design used to generated the scenario is not found.
Cause: The physical mapping design used to generated the scenario is not found.
Action: Choose to create or replace the scenario.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15055: Character ""]" missing in: {0}.
Cause: A bracketed tag inside a KM line is missing a closing bracket ("]") character.
Action: Fix the KM line.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15057: Non-ordered outer join not supported for technology.
Cause: Non-ordered outer join syntax disabled for technology.
Action: Correct join.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15058: Variable scenario generation error: Logical schema is required.
Cause: Variable scenario cannot be generated if logical schema is not set.
Action: Set the logical schema.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15059: I_TXT is mandatory.
Cause: A call was made to SnpTxtCachedHashMap.getInstance, but the pITxt parameter was null.
Action: Contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15060: The JKM line {0} uses an unsupported execution channel: {1}
Cause: A line in the JKM uses an execution channel that is not supported.
Action: Change the line in the JKM to use a supported channel.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15061: The JKM line {0} uses an unsupported commit type: {1}
Cause: A line in the JKM uses a commit type that is not supported.
Action: Change the line in the JKM to use a supported commit type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15062: Invalid commit type: {0}
Cause: An invalid commit type was passed to SnpServiceGenerator.convertCommitType
Action: Contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15063: The alternate key {0} is not unique.
Cause: An alternate key defined by the repository is found to be non-unique.
Action: Check the data or the alternate key definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15064: The primary key {0} is not unique.
Cause: A primary key defined by the repository is found to be non-unique.
Action: Check the data or primary key definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15065: Join error (0) between the table (1) and the table (2).
Cause: A foreign key relationship is not found.
Action: A foreign key relationship between 2 tables defined in the repository is not valid.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15066: The column (0) cannot be null.
Cause: The column is marked in the repository as not nullable.
Action: Check the data, or change the not null value.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15067: The datatype value "(0)" is incorrect.
Cause: An invalid datatype has been found.
Action: The repository table contains an invalid datatype.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15068: Unknown flexfield code (0).
Cause: An undefined flex field code is being referenced
Action: Check the flex field references in the KM, and the flex field definitions

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15069: (0) Is not valid without session context.
Cause: A current session context does not exist.
Action: Check session definition.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15070: Unable to find method object: PythonInterpreter.initialize(Properties, Properties, String[]) method
Cause: The python method used by the script is not found.
Action: Check the KM step.
Level: 32
Type: ERROR
Impact: Other

ODI-15071: Error occurred
Cause: An exception was thrown while executing a python script in the KM step.
Action: Check the cause.
Level: 32
Type: ERROR
Impact: Other

ODI-15072: There is no PK constraint
Cause: There is a call to "getPK" in the KM, but no PK is found.
Action: Check the KM and the PK definitions.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15073: There is no index
Cause: There is a call to "getIndex" in the KM, but no index is found.
Action: Check the KM and the index definitions.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15076: no dataset
Cause: A KM line is calling "getDataSet", but no data set is found.
Action: Check the KM or the DataSet definitions.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15077: No Current Model Set
Cause: There is a call to "getModel" in the KM, but no model is found.
Action: Check the KM and the model definitions.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15078: There is no Not Null column
Cause: There is a call to "getNotNullCol" in the KM, but no not null column is found.
Action: Check the KM and the not null column definitions.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15079: There is no current Pop.
Cause: There is a call to "getPop" in the KM, but no interface is found.
Action: Check the KM and the interface definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15080: There is no Step
Cause: There is a call to "getStep" in the KM, but no step is found.
Action: Check the KM and the step definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15081: There is no Target Table
Cause: There is a call to "getTargetTable" in the KM, but no target table is found.
Action: Check the KM and the interface target table definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15083: Multiple Primary Keys have been detected for {0}.
Cause: A repository table can only have one primary key defined, but multiple primary keys are defined.
Action: Edit the table's primary key definitions and remove all but one.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15084: There is no session
Cause: There is a call to "getSession" in the KM, but no session is found.
Action: Check the KM and the session definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15085: The value : "{(0)}" is unknown.
Cause: A KM line has a templated call which contains an unknown bracketed property.
Action: Fix the KM.
Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15086: There is no Temporary Index  
Cause: There is a call to "getTemporaryIndex" in the KM, but no temporary index is found.  
Action: Check the KM and the temporary index definitions.  

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15087: There is no current execution context defined.  
Cause: There is a call to "getContext" in the KM, but no context is found.  
Action: Check the KM and the context definitions.  

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15088: Not in designer mode  
Cause: A KM line has a call to access design information, but the interpretation location is not set to designer.  
Action: Make sure that the interpretation location is set to designer when this line is executed.  

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15089: asked '{0}' and available value are between 0 and '{1}'.  
Cause: A KM line is calling "getDataSet", but the specified index is out of range.  
Action: Fix the KM or the DataSet definitions.  

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15090: Table '{0}' not found on model '{1}', schema '{2}'  
Cause: Attempt to initialize data services from a table that cannot be found  
Action: Change data services reference or make sure that table exists  

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15091: Impossible to connect to JPS MBean Server  
Cause: Cannot connect to JPS MBean server.  
Action: Internal Error.
Level: 32
Type: ERROR
Impact: Other

ODI-15092: Unable to generate data service - the column [0] does not exist in the database.
Cause: A data service references a column that does not exist
Action: Fix the data service reference or make sure that the column exists

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15093: Unable to regenerate this scenario. It references a null package.
Cause: The scenario must reference a package, but the package is null.
Action: Delete the scenario and create a new one.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15094: You must give a name for the published entity for each datastore.
Cause: A web services data store does not have a name.
Action: Give the data store a name.

Level: 32
Type: ERROR
Impact: Other

ODI-15095: Invalid entity for datastore: [0]
Cause: A web services data store has an invalid entity.
Action: Associate the data store with a valid entity.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15096: Property name must not be null.
Cause: The KM line is calling "isColAttrChanged", but the property value is null.
Action: Internal error, contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15097: Unknown value [0] for property
Cause: The KM line is making a templated call, but the property value is unknown.
Action: Fix the KM.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15098: You must define a data source for the model.
Cause: The model used by a web service does not have any data source.
Action: Define a data source for the model.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15099: You must specify a JKM for the model.
Cause: The model used by a web service does not have an associated JKM.
Action: Define a JKM for the model.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15100: You must define a Java package for the model.
Cause: The model used by a web service does not have an associated Java package.
Action: Define a Java package for the model.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15101: Invalid Java package format: {0}
Cause: The Java package associated with a model has an invalid package format.
Action: Correct the package format for the model.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15102: You must specify an XML namespace for the model.
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15103: Invalid namespace: {0}
Cause: A model namespace used by a web service is invalid.
Action: Correct the namespace for the model.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15104: You must specify an SKM for the model.
Cause: A model used by a web service does not have an associated SKM.
Action: Add an SKM to the model.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15105: You must specify which schema the model will be deployed to.
Cause: No web service deployment schema is specified for the model.
Action: Specify a schema to which the model will be deployed.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15106: You must specify a name for the Data Service for the model.
Cause: The data service for the model does not have a name.
Action: Set a valid name for the data service.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15107: Invalid model code: [0]. It should follow the Java identifiers naming conventions.
Cause: The web service model name does not follow the standard Java identifier naming convention.
Action: Set a valid name for the model.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15108: Invalid model Data Service name: [0]. It should follow the Java identifiers naming conventions.
Cause: The web service model Data Service name does not follow the standard Java identifier naming convention.
Action: Set a valid name for the model Data Service.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15109: Invalid web service name for datastore: [0]
Cause: The web service model data store has an invalid name.
Action: Set a valid name for the model data store.
Level: 32  
Type: SET_AT_RUNTIME  
Impact: Other

ODI-15110: SKM is empty  
Cause: The web service SKM has no valid lines.  
Action: Add some lines to the SKM.

Level: 32  
Type: SET_AT_RUNTIME  
Impact: Other

ODI-15111: Problem during deployment  
Cause: Internal error.  
Action: Contact Oracle support.

Level: 32  
Type: SET_AT_RUNTIME  
Impact: Deployment

Cause: An attempt was made to reverse engineer a table, but it already exists in the model.  
Action: Move or rename the data store in the model, or skip reverse engineering for the table.

Level: 32  
Type: SET_AT_RUNTIME  
Impact: Other

ODI-15116: There is not enough data in the target file to proceed with the reverse-engineering. Please make sure the file has at least one non-empty line and number of rows to skip is correct.  
Cause: An attempt was made to reverse engineer a target file that is empty, or the number of skipped rows is larger than the number of rows in the file.  
Action: Set the number of skipped lines to a lower value, or add some data to the file.

Level: 32  
Type: SET_AT_RUNTIME  
Impact: Other

ODI-15117: Not allowed (OLD and NEW are involved)  
Cause: The KM line is calling "getColumn", but the ADH action origin is not "NEW" or "OLD".  
Action: Change the ADH action origin.

Level: 32  
Type: ERROR  
Impact: Programmatic
ODI-15118: Invalid FTP URL
Cause: The URL given for a web services FTP connection is not correct.
Action: Check the URL for the FTP connection.
Level: 32
Type: SET_AT_RUNTIME
Impact: Network

ODI-15119: Column {0} has no Java datatype.
Cause: The column being processed has no java datatype.
Action: Internal Error: contact Oracle support.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-15120: Column {0} has no String datatype.
Cause: The column being processed has no string datatype.
Action: Internal Error: contact Oracle support.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-15121: Selector must be not null
Cause: The ADH selector value must not be null when "getColumn" is called from the KM line.
Action: Change the ADH selector value.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15122: Exception getPKColList
Cause: An exception was found when calling "getPKColList" during KM execution.
Action: Fix the KM or the PK definitions.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15123: There is no AK constraint
Cause: There is a call to "getAK" in the KM, but no AK is found.
Action: Check the KM and the AK definitions.
Level: 32
Type: ERROR
Impact: Programmatic
ODI-15124: Unable to regenerate the following scenario:
  Cause: Cannot regenerate the scenario.
  Action: Delete the scenario and create a new one.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15125: Missing DataSet.
  Cause: The interface is missing a dataset.
  Action: Check interface for consistency.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15126: The sub-model must be set.
  Cause: The sub-model is not set for the source or target.
  Action: Check the interface for consistency.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15127: There is no CK constraint
  Cause: There is a call to "getCK" in the KM, but no CK is found.
  Action: Check the KM and the CK definitions.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15128: There is no FK constraint
  Cause: There is a call to "getFK" in the KM, but no FK is found.
  Action: Check the KM and the FK definitions.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15129: Selector value must be 'OLD' or 'NEW'
  Cause: The ADH selector value must be 'OLD' or 'NEW' when "getColumn" is called from the KM line.
  Action: Change the ADH selector value.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15130: Unknown object in interface source table list
Cause: Internal Error.
Action: Contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15131: You must define the name of each web service to be generated for each datastore.
Cause: A web service associated with a data store has no name.
Action: Give a name to the web service.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15132: Exception getPK
Cause: An exception was found when calling "getPK" during KM execution.
Action: Fix the KM or the PK definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15135: There is no current index.
Cause: The current index can not be found for the property name.
Action: Check the reference.

Level: 32
Type: ERROR
Impact: Other

ODI-15141: Repository is not a development work repository
Cause: When getting a connection used to execute the KM, it was determined that the provided connection information does not point to a development work repository
Action: Fix the connection information

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15142: [PROPERTY: {0} not found.]
Cause: The bracketed property in the KM line (e.g. "[COL_NAME]") is not found.
Action: Fix the KM line to specify a correct property name.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-15143: Invalid isolation level : {0}
  Cause: An invalid isolation level value was passed to
  SnpServiceGenerator.convertIsolationLevel
  Action: Contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15144: KM not encrypted since it is empty.
  Cause: KM was not encrypted since it is empty.
  Action: Skip encryption.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-15146: Data Type can't be null
  Cause: null DataType passed.
  Action: Pass non null DataType.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15147: The changes on this target column will be lost since it is not saved (it
has no mapping text)
  Cause: Target column will not be saved.
  Action: Enter mapping text if the column requires to be saved.
  Level: 32
  Type: WARNING
  Impact: Interface Issue

ODI-15148: The target datastore is not on the Oracle Technology: this interface
cannot be used with the platform compiler
  Cause: Target datastore is not on Oracle.
  Action: Move target datastore to an Oracle schema.
  Level: 32
  Type: WARNING
  Impact: Interface Issue

ODI-15149: The staging area is not on the Oracle Technology: this interface cannot
be used with the platform compiler
  Cause: Staging Area is not on Oracle.
  Action: Move Staging Area to an Oracle schema.
  Level: 32
  Type: WARNING
Impact: Interface Issue

ODI-15150: The source datastore is not on the Oracle Technology: this interface cannot be used with the platform compiler
Cause: Source DataStore not on Oracle.
Action: Use only DataStores located on an Oracle technology.
Level: 32
Type: WARNING
Impact: Interface Issue

ODI-15151: Non ordered outer joins cannot be used with the platform compiler
Cause: An outer join is not ordered.
Action: Make the join ordered.
Level: 32
Type: WARNING
Impact: Interface Issue

ODI-15152: Unhandled Action [0]
Cause: This shouldn't happen. Programmer added an action in the enum and forgot to add it in switch.
Action: Add action in switch.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15153: The column is already the first column and cannot be moved up
Cause: Column already first and cannot be moved up.
Action: Do not try to move first column up.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15154: The column is already the last column and cannot be moved down
Cause: Column already last and cannot be moved down.
Action: Do not try to move last column down.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15155: Cannot move a target column to a position that is 0 or negative: [0]
Cause: Trying to move a column beyond the boundaries of column positions.
Action: Use a value between 1 and the number of columns.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15156: Cannot move a target column to a position beyond the size of the column list: \(0\) is greater than \(1\)
Cause: Trying to move a column beyond the boundaries of column positions.
Action: Use a value between 1 and the number of columns.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15157: Cannot remove the only dataset of interface \(0\)
Cause: Trying to remove the last dataset of an interface is not permitted.
Action: Make sure there are more than one dataset in the interface before deleting it.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15159: Cannot move target columns on a non temporary DataStore.
Cause: Trying to move columns on a non temporary DataStore.
Action: Make sure that the target DataStore is temporary before attempting to move target columns.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15160: Native Sequences may not be supported by the target technology after transforming with the Platform Compiler
Cause: Using Native Sequence and Platform Compiler Enabled User Param Set
Action: Make sure that all target technologies will support native sequences

Level: 32
Type: WARNING
Impact: Programmatic

ODI-15162: The interface \(0\) use native sequence. Native sequence are not allowed for Derived Table (sub select statement)
Cause: Using native sequence in derived sub interface
Action: Make sure that none sub interface using native sequence

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15200: Tried to retrieve an int with an \(0\) object
Cause: Attempted to read the column from RDB as an integer, but the column type is not integer
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15201: Tried to retrieve a short with an {0} object
Cause: Attempted to read the column from RDB as a short type, but the column type is not short
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15202: This resultset accepts only FETCHFORWARD requests
Cause: Attempted to set the fetch direction to something other than FETCH_FORWARD for a RDB result set read
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15203: This function is unsupported: the software you are using might not be compatible with this driver.
Cause: A jdbc call was made that is not supported by the currently loaded jdbc driver for RDB
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15204: The {0} call is not implemented in this result set class.
Cause: A result set call was made that is not implemented by the ODI RDB result set class
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15205: The call is not supported in this result set class.
Cause: A result set call was made that is not supported by the ODI RDB result set class
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15206: Unmanaged numeric type {0}
Cause: The RDB inserter class was passed a data value of a numeric type that is not handled
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15207: Strange: a PK has multiple lines
Cause: When selecting a parent row based on a primary key, multiple rows were returned
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15208: The PK column of the root table has an unknown type: {0}
Cause: When unloading data from the RDB, the PK column of the parent table has an unknown type
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15209: Unsupported technology (Driver: {0}, Url: {1})
Cause: The jdbc driver is not supported by the ODI RDB
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15210: Unsupported technology: HSQL cannot create FKs after the tables have been created
Cause: The Hypersonic SQL engine cannot create FK after the table is already created
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15211: Unsupported technology: HSQL cannot create PKs after the tables have been created
Cause: The Hypersonic SQL engine cannot create PK after the table is already created
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15212: Datatype NULL (0) unsupported
Cause: The Hypersonic SQL engine does not support the null datatype
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15213: JDBC Datatype '{0}' unsupported
Cause: The Hypersonic SQL engine does not support the datatype
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15214: JDBC Datatype '{0}' with length parameter unsupported
Cause: The Hypersonic SQL engine does not support the datatype with length
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15215: JDBC Datatype '{0}' with length and scale parameters unsupported
Cause: The Hypersonic SQL engine does not support the datatype with scale
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15216: JDBC Datatype '{0}' unsupported
Cause: The internal MS Sql Server database does not support the datatype
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15217: JDBC Datatype '{0}' with length parameter unsupported
Cause: The internal MS SQL Server database does not support the datatype with length
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15218: JDBC Datatype '{0}' with length and scale parameters unsupported

Cause: The internal MS SQL Server database engine does not support the datatype with length and scale

Action: Internal Error: contact Oracle support

Level: 32

Type: ERROR

Impact: Programmatic

ODI-15219: Please transform your URL into: {0};SelectMethod=cursor

Cause: The internal MS SQL Server database engine does not recognize the supplied URL

Action: Change the format of the connection URL

Level: 32

Type: ERROR

Impact: Programmatic

ODI-15220: need length param

Cause: The internal Oracle database does not support the selected type without a length param

Action: Internal Error: contact Oracle support

Level: 32

Type: ERROR

Impact: Programmatic

ODI-15221: Datatype NULL (0) unsupported

Cause: The internal Oracle SQL engine does not support the null datatype

Action: Internal Error: contact Oracle support

Level: 32

Type: ERROR

Impact: Programmatic

ODI-15222: JDBC Datatype '{0}' unsupported

Cause: The internal Oracle database does not support the datatype

Action: Internal Error: contact Oracle support

Level: 32

Type: ERROR

Impact: Programmatic

ODI-15223: JDBC Datatype '{0}' with length parameter unsupported

Cause: The internal Oracle database does not support the datatype with length

Action: Internal Error: contact Oracle support

Level: 32

Type: ERROR
Impact: Programmatic

ODI-15224: JDBC Datatype '{0}' with length and scale parameters unsupported
  Cause: The internal Oracle database engine does not support the datatype with length and scale
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15225: No key found on table {0}
  Cause: The internal database table does not have a key
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15226: The root table {0} has no data
  Cause: The internal database table does not have any data
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15227: Multiple keys found on table {0}
  Cause: The internal database table has multiple keys
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15228: *** FATAL *** Table {0} could not be validated
  Cause: The internal database cannot validate the table
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15229: *** FATAL *** Table {0} could not be found
  Cause: The internal database cannot find the table
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15230: Could not convert object {0} to a {1}
   Cause: The internal database cannot convert the datatype of the selected column
   Action: Internal Error: contact Oracle support
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15231: No '=' sign found on line {0} of bundle {1}
   Cause: The internal database engine encountered a syntax error when reading the property file
   Action: Fix the property file
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15232: The alias {0} for table {1} is already used by another table, when reading bundle {2}
   Cause: The internal database found a duplicate table alias in a property file
   Action: Fix the property file
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15233: Table {0} is used twice. Make sure that the table names and aliases do not conflict.
   Cause: The internal database found a duplicate table name in the property bundle
   Action: Fix the property file
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15234: Internal RDB database table {0} not found
   Cause: The requested table cannot be found in the internal database
   Action: Internal Error: contact Oracle support
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15235: Internal RDB database key {0} not found
   Cause: The requested key cannot be found in the internal database
   Action: Internal Error: contact Oracle support
   Level: 32
   Type: ERROR
   Impact: Programmatic
ODI-15236: Unknown table [0]
  Cause: The requested table cannot be found in the internal database
  Action: Correct the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15237: Duplicate table
  Cause: The internal database table is a duplicate table
  Action: Correct the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15238: Could not find table although we should have created it!
  Cause: The newly created table cannot be found
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15239: Only SnpsRDBDiffActionImportDifference are supported for now.
  Cause: When processing diff actions in a diff operation, an unsupported diff action class was found
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15240: Unknown key [0]
  Cause: When processing diff actions in a diff operation, a nonexistent key was specified by the diff action
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15241: This type of difference is not managed for now: [0]
  Cause: When processing diff actions in a diff operation, an unsupported diff action class was found
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15242: Unknown difference type: [0]
  Cause: When processing diff actions in a diff operation, an unknown diff class was found
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15243: Bad model number: [0]
  Cause: When processing diff actions in a diff operation, the 2 models that are being compared are internally numbered as model 1 and 2. A model number other than 1 or 2 was used internally in a call to getModel.
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15244: Could not add a key because [0] is not an ID key.
  Cause: When building a model, the specified key class instance was not an id key
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15245: Unknown key type: [0]
  Cause: When building a model, an unknown key class was found
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15246: Key [0].[1] is of unknown type: [2]
  Cause: When building a model, an unknown key class was found
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15247: The table [0] cannot be found. It is referenced by key: [1].
  Cause: When building a model, an table name is referenced by a key, but the table cannot be found
  Action: Check the model
  Level: 32
  Type: ERROR
Impact: Programmatic

ODI-15248: The column {0} in table {1} cannot be found. It is referenced by key: {2}.
   Cause: When building a model, an column name is referenced by a key, but the
column cannot be found
   Action: Check the model
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15249: An {0} was caught while adding a key which is not an FK. Very strange.
   Cause: When building a model, an column name is referenced by a key, but the
column cannot be found
   Action: Check the model
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15250: The key {0} referenced by table {1} cannot be found.
   Cause: When building a model, a key name is referenced by a table, but the key
cannot be found
   Action: Check the model
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15251: A duplicate key was found: {0}
   Cause: When dropping a model, a duplicate key was found in the model
   Action: Check the model
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15252: Key already exists: {0}
   Cause: When updating a model, a duplicate key was found in the model
   Action: Check the model
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15253: Key not found: {0}
   Cause: When updating a model, the key was not found
   Action: Check the model
   Level: 32
   Type: ERROR
   Impact: Programmatic
ODI-15254: Could not find a constructor with a key name for class {0}
Cause: When creating a key class instance, the constructor could not be found
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15255: Could not instantiate an object of class {0}
Cause: Could not instantiate the key class
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15256: Could not create an object for class {0} for security reasons
Cause: Could not instantiate the key class, due to a security failure
Action: Check security settings

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15257: Could create an object for class {0} because a {1} occurred saying {2}
Cause: Could not instantiate the key class, due to an invocation target exception
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15258: Column {0} not found
Cause: The column could not be found
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15259: The key class {0} is not an ID key class.
Cause: The specified key class instance was not a SnpsRDBIdKey instance
Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15260: Could not add column {0}: Unsupported datatype: {1}
Cause: Cannot add the column to the model because the datatype is not supported by the technology
Action: Correct the model
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15261: Unsupported action: {0}
  Cause: The action class is not supported by the ODI RDB
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15262: Cannot drop column {0}. It is used in a foreign key!
  Cause: An attempt was made to drop a column that participates in a foreign key
  Action: Drop the key first, then the column
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15263: Cannot drop column {0}. It is used in a primary key!
  Cause: An attempt was made to drop a column that participates in a primary key
  Action: Drop the key first, then the column
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15264: Cannot modify this column. It is used in a foreign key!
  Cause: An attempt was made to modify a column that participates in a foreign key
  Action: Drop the key first, then modify the column
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15265: Cannot modify this column. It is used in a primary key!
  Cause: An attempt was made to modify a column that participates in a primary key
  Action: Drop the key first, then modify the column
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15268: Table not found: {0}
  Cause: When attempting to drop a table during an update, the table name is not found
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15270: Key type {0} is not supported here.
  Cause: The key type is not supported
  Action: Correct the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15272: An error occurred while executing a RDB command: {0}
  Cause: When executing a command action, an exception was thrown
  Action: Check root cause
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15273: {0}: action is not accepted: {1}
  Cause: Attempt to execute a command action, but it is not accepted
  Action: Check root cause
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15274: Multiple PKs are not allowed on a table
  Cause: When reverse engineering a primary key, multiple primary keys were found for the table
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15275: An exception occurred while retrieving a table primary key: {0}
  Cause: When reverse engineering a table, a primary key could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15276: An exception occurred while retrieving the indexes of a table: {0}
  Cause: When reverse engineering a table, the indexes could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15277: An exception occurred while retrieving a table foreign keys: {0}
  Cause: When reverse engineering a table, the foreign keys could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15278: An exception occurred while retrieving the check constraints of a table: {0}
  Cause: When reverse engineering a table, the check constraints could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15279: An exception occurred while retrieving the alternate keys of a table: {0}
  Cause: When reverse engineering a table, the alternate keys could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15280: *** FATAL *** Table {0} is duplicate as root
  Cause: The table is duplicated as the root when determining the root tables of the model
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15281: *** FATAL ** Table {0} is unknown
  Cause: The root table is unknown
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15282: Table [0] is unknown though it was reversed
   Cause: The table cannot be found in the ODI model, although it was reversed
   Action: Retry the reverse engineering
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15283: Duplicate declaration for table [0]
   Cause: The model XML contains a duplicate table declaration
   Action: Fix the XML
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15285: FK [0] references a table with no PK.
   Cause: The model XML contains a foreign key that references a table with no
   defined primary key
   Action: Fix the XML
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15286: Unknown PK table for foreign key [0]: please check the name and order
   of the tables and FK.
   Cause: The model XML contains a foreign key that references an unknown
   primary key table
   Action: Fix the XML
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15287: Unknown element: [0]
   Cause: The model XML contains an unknown element
   Action: Fix the XML
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15288: An [0] error occurred with the following message: [1]
   Cause: An error occurred when writing the model to a file
   Action: See root cause
   Level: 32
   Type: ERROR
   Impact: Programmatic
ODI-15290: Column [0] was not found in table [1]
   Cause: The column was not found when building the columns from column names
   Action: Check the model
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15291: *** FATAL *** Could not rename table [0] to [1]
   Cause: Could not rename table
   Action: Check permissions and security settings
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15292: *** FATAL *** Could not rename table [0] because it was not found in the model!
   Cause: Could not rename table, because the table to be renamed does not exist
   Action: Check the model
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15293: Unknown FK table for foreign key [0]: please check the name and order of the tables and FK.
   Cause: The model XML contains a foreign key that references an unknown table
   Action: Fix the XML
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15294: unknown element: [0]
   Cause: The model XML contains an unknown XML element
   Action: Fix the XML
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15295: Unsupported datatype: [0]
   Cause: The datatype is unsupported when creating the column from attributes
   Action: Check the model
   Level: 32
   Type: ERROR
   Impact: Programmatic
ODI-15300: A {0} occurred while creating the helper of class {1}. Error message: {2}
  Cause: INTERNAL ERROR: A helper cannot be created.
  Action: Internal error: contact Oracle support.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-15301: Choose: {0}
  Cause: Choose one of the displayed options.
  Action: Choose one of the displayed options.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-15302: FK is null: {0}
  Cause: The FK is null, may indicate repository corruption.
  Action: Internal error: contact Oracle support.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-15303: JDBC Datatype '{0}' with length '{1}' parameter unsupported
  Cause: MySQL database does not support the datatype with length
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15304: JDBC Datatype '{0}' with length '{1}' and scale '{2}' parameter unsupported
  Cause: MySQL database does not support the datatype with scale
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15305: JDBC Datatype '{0}' unsupported
  Cause: MySQL database does not support the datatype
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15306: Column data type "{0}" not supported. Refer documentation for supported types.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15307: Metadata format of element with identifier "{0}" is incorrect. Found value "{1}"
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15308: Error unloading CLOB for column "{0}" 
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15309: Error unloading BLOB for column "{0}" 
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15400: Error in generating data service
Cause: Exception thrown when creating the data service used for DDL generation and reverse engineering.
Action: Check the root cause.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15401: Unknown key {0} 
Cause: Unknown key encountered when processing diff class instances during DDL generation.
Action: Check the model.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15402: Exception thrown in the DDL generation service: {0}
Cause: An exception was thrown while generating DDL.
Action: Check the root cause.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15403: The method is not supposed to sort something else than the expected actors. Attempting to sort class instances: {0}, {1}
Cause: While sorting action commands, the DDL generator service encountered an unknown class instance type.
Action: Internal Error: contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15404: Scenario generation has not been implemented for this container.
Cause: During DDL generation, an attempt was made to generate a scenario for an object that does not support it.
Action: Internal Error: contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15405: Scenario generation exception: {0}
Cause: An exception was thrown during scenario generation.
Action: Check root cause.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15406: Oozie workflow generation exception: {0}
Cause: An exception was thrown during Oozie workflow generation.
Action: Check root cause.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15500: Column {0} is executed on the target
Cause: Possible Cause
Action: Suggested Action

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15501: Cannot attach a data store to a target mapping because column \{0\} is not found.
   Cause: The specified target column was not found.
   Action: Verify that the correct column has been specified.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15502: Target mapping not found for column \{0\}
   Cause: The specified column is not mapped.
   Action: Map the specified column.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15503: Cannot set the attached datastore because the mapping is not executed on the SOURCE
   Cause: The mapping has been configured for execution on the target.
   Action: Configure the mapping for execution on the source.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15504: Unknown indicator type: \{0\}
   Cause: An invalid indicator type has been specified.
   Action: Specify one of the following indicator types from the IndicatorType enumeration: CHECK_NOT_NULL, INSERT, UPDATE, or UPDATE_KEY.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15505: Invalid UD number: \{0\}
   Cause: An invalid UD number has been specified.
   Action: Specify a UD number 1 to 10.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15506: The specified target column was not found: \{0\}
   Cause: The specified target column was not found when attempting to remove a column from a temporary data store.
   Action: Only remove columns which exist in the temporary target datastore.
   Level: 32
Type: ERROR
Impact: Programmatic

ODI-15507: Column {0} may not be removed. It is used in other mappings, join clauses, or filter clauses
Cause: The specified target column is used in other mappings, filters, or joins. This dependency prevents removal of the column.
Action: Only remove a column after mapping, filter, or join dependencies have been removed.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15508: Column {0} may not be removed because it is referenced in interface {1}.
Cause: The specified target column is referenced in a filter or join clause in another interface. This dependency prevents removal of the column.
Action: Only remove a column after other references have been removed.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15509: The specified target column was not found: {0}
Cause: The specified target column was not found.
Action: Verify the column name.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15510: A column was not found while updating the key
Cause: The update key contains a column that does not exist.
Action: Check the columns of the update key.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15511: The join must be attached to the datastore to expand a lookup.
Cause: The join is not attached to a datastore, so a valid lookup does not exist.
Action: Only use the lookup expansion, with a pCreateLookup parameter value of false, on valid lookups.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15512: Cannot transform a normal datastore into a normal lookup.
Cause: The data store is already a non-lookup data store.
Action: Do not use this transformation on a non-lookup data store. If the datastore and join are non-lookup, use a pCreateLookup parameter value of true to create a lookup from a normal join and normal datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15513: Cannot transform a normal, non-lookup join into a normal join.
Cause: The join is already a normal join, not a lookup join, so expansion to a normal, non-lookup join is not possible.
Action: Do not use this transformation on a normal join. If the datastore and join are non-lookup, use a pCreateLookup parameter value of true to create a lookup from a normal join and normal datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15514: Cannot transform a lookup datastore into a lookup.
Cause: The data store is already designated as a lookup, so transforming to a lookup is not possible.
Action: Do not use this transformation on a lookup. If the datastore and join are designated for lookup, use a pCreateLookup parameter value of false to expand a lookup to a normal join and normal datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15515: Cannot transform a lookup join into a lookup.
Cause: The join is already designated as a lookup, so transforming to a lookup is not possible.
Action: Do not use this transformation on a lookup. If the datastore and join are designated for lookup, use a pCreateLookup parameter value of false to expand a lookup to a normal join and normal datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15516: The join must be attached to the datastore to make a lookup.
Cause: The join is not properly attached to data sources, so transforming to a lookup is not possible.
Action: Designate data sources for the join.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15517: Cannot add a column with the same name as an existing target column: {0}.
Cause: The column being added already exists.
Action: Add a column with a unique name.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15518: A dataset is already assigned the order: [0].
Cause: Another dataset has already been assigned the order that is being set.
Action: Assign a unique order to the dataset.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15519: The target datastore cannot be changed. Interface [0] is used in interface(s) [1] as a source datastore.
Cause: The interface is used as a source datastore of another interface, so the target datastore cannot be changed.
Action: Create a separate interface to avoid the source datastore dependency in the other interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15520: Temporary interface from another project is not allowed.
Cause: The interface is used as a source datastore of another interface, so the target datastore cannot be changed.
Action: Create a separate interface to avoid the source datastore dependency in the other interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15521: A source datastore with alias [0] already exists.
Cause: The datastore alias has already been used.
Action: Specify a unique alias.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15522: Cannot transform a join into a CrossJoin or natural join if it does not have both attached datastores set.
Cause: The join does not have datastores attached yet.
Action: Attach both join datastores before transforming to a cross join.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15523: LKM {0} not accepted for source set {1}
  Cause:
  Action:
  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15524: LKM {0} not accepted for staging area to target
  Cause:
  Action:
  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15525: CKM {0} not accepted for target technology
  Cause:
  Action:
  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15526: IKM {0} not accepted for staging and target technology
  Cause:
  Action:
  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15527: IKM {0} not accepted for target technology
  Cause:
  Action:
  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15528: Mapping expression cannot be set because the target column {0} was not found.
  Cause: The column was not found when setting the expression for a mapping.
  Action: Specify a valid column for the expression.
  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15529: Action was not reversible.

  Cause: The actions causing an impact are not reversible.
  Action: Avoid the sequence of actions causing the impact.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15530: The interface does not have a source set.

  Cause: The interface does not have a source set.
  Action: Add a source set to the interface.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15531: The execution location parameter for the computeExpression method is invalid.

  Cause: The execution location parameter for the computeExpression method is invalid.
  Action: Specify an execution location parameter of ExecutionLocation.SOURCE, ExecutionLocation.WORK, or ExecutionLocation.TARGET.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15532: The pExecutableTextHolder parameter for the getLogicalSchemaForTextHolder method does not have a valid execution location.

  Cause: The pExecutableTextHolder parameter for the getLogicalSchemaForTextHolder method does not have a valid execution location.
  Action: Specify an execution location parameter of ExecutionLocation.SOURCE, ExecutionLocation.WORK, or ExecutionLocation.TARGET.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15533: The physical schema could not be mapped from logical schema {0} and context {1}.

  Cause: The getPhysicalSchema method failed to map and logical schema and context to a physical schema.
  Action: Ensure that logical to physical schema mappings are created or check the logical schema and context parameters.

  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15534: Sub interface must not be null.
   Cause: The pSubInterface parameter passed to the checkSubInterfaceValid method is null.
   Action: A non-null sub interface parameter is required for the checkSubInterfaceValid method.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15535: The technology [0] of the source temporary interface [1] used as a derived table does not support derived tables.
   Cause: The pSubInterface parameter passed to the checkSubInterfaceValid method is null.
   Action: A non-null sub interface parameter is required for the checkSubInterfaceValid method.
   Level: 32
   Type: ERROR
   Impact: Programmatic

   Cause: The temporary interface cannot be used because a physical schema has not been mapped to the logical schema for the source.
   Action: Create a mapping between the logical schema, context, and physical schema for the source data store.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15537: Source temporary interface [0] cannot be used as a derived table. The logical schema of the target datastore [1] has no associated physical schema in context [2].
   Cause: The temporary interface cannot be used because a physical schema has not been mapped to the logical schema for the target.
   Action: Create a mapping between the logical schema, context, and physical schema for the target data store.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15538: Source temporary interface [0] cannot be used as a derived table. The logical schema of the staging area [1] has no associated physical schema in the optimization context [2].
   Cause: The temporary interface cannot be used because a physical schema has not been mapped to the logical schema for the staging area.
**Action:** Create a mapping between the logical schema, context, and physical schema.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15539:** Source temporary interface [0] cannot be used as a derived table. Source datastore [1] is not on the same data server as the target.

**Cause:** The temporary interface cannot be used because the source data store is not on the same data server as the target.

**Action:** Ensure that the source and target datastores are on the same data server.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15540:** Source temporary interface [0] cannot be used as a derived table. Staging area and target datastores are not in the same data server. You may have forced the target context to a different context than the optimization context.

**Cause:** The temporary interface cannot be used because the staging data store is not on the same data server as the target.

**Action:** Ensure that the staging and target datastores are on the same data server.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15541:** Source temporary interface [0] uses a journalized datastore and cannot be used as a derived table.

**Cause:** The temporary interface cannot be used because it uses a journalized datastore.

**Action:** Use only non journalized data stores in temporary interfaces.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15542:** Source temporary interface [0] cannot be used as a derived table. All source datastores of this interface should be in the same data server as the target and should not be journalized.

**Cause:** The temporary interface cannot be used because it uses a journalized datastore.

**Action:** Use only non journalized data stores in temporary interfaces.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15543:** Another interface with the same name already exists in this folder. Please choose a unique interface name.
Cause: Another interface with the same name already exists in this folder.
Action: Specify a unique interface name.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15544: The interface must have a name.
Cause: The interface does not have a name.
Action: Specify a unique interface name.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15545: Temporary target datastore has no name.
Cause: The temporary target datastore has no name
Action: Specify a unique datastore name.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15546: The interface must have a logical schema.
Cause: The interface does not have a logical schema.
Action: Specify a logical schema for the interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15547: Could not fix a missing reference correctly.
Cause: The interface is missing one or more references.
Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15548: The source datastore has already been set.
Cause: The source datastore has already been set.
Action: Only invoke setSourceDataStore once.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15549: Cannot set the source filter because the source datastore is not set.
Cause: The source datastore has not been set prior to setting the filter.
Action: Set the source datastore prior to setting the filter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15550: The target datastore has already been set.
Cause: The source datastore has already been set.
Action: Only invoke setSourceDataStore once.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15551: Mappings on the target are not allowed in this helper.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15552: A source filter requires a source datastore.
Cause: The interface cannot be saved because it contains a filter without a source datastore.
Action: Create a source datastore before creating a source filter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15553: The target datastore must be set.
Cause: The target datastore for the interface has not been set.
Action: Set the target datastore before saving the interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15554: An LKM must be set on the source set.
Cause: A loading knowledge module has not been assigned to the source set.
Action: Set the LKM for the source set before saving the interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15555: Target IKM must be set on the target table.
Cause: An integration knowledge module has not been assigned to the target table.
Action: Set the IKM for the target before saving the interface.
Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15556: Unknown generic clause type: {0}  
Cause: An unknown generic clause class was passed to the createSnpPopClauseFromGenericClause method.  
Action: Pass only generic clause classes for join or filter.

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15557: Unknown execution location type: {0}  
Cause: An unknown execution location enumeration was passed to the getStringExeDbFromExecutionLocation method.  
Action: Pass only location enumerations of ExecutionLocation.SOURCE, ExecutionLocation.WORK, ExecutionLocation.TARGET.

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15558: There is a conflict between physical schemas  
Cause: There is a conflict between the various physical schemas used to obtain the data, such as multiple data stores in the same source set connected using different physical schemas.  
Action: Ensure that physical schemas of a source set have consistent connection information.

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15559: Unsupported component: {0}  
Cause: An unsupported component was passed as a parameter to createDataAccessinfo.  
Action: For the pInterfaceSubComponents parameter, supported components are SourceDataStore, ISourceColumn, TargetMapping, and GenericClause.

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15560: Fatal interface condition: {0}  
Cause: A fatal issue was discovered while saving or verifying an interface.  
Action: Correct the interface issue before saving it.

Level: 32  
Type: ERROR
Impact: Programmatic

ODI-15561: Could not find column `{0}` which choosing a mapping.
  Cause: The `MappingChooserFirst.chooseMapping` method was called with an column name that does not exist.
  Action: Check the column name passed to `chooseMapping`.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15562: Source sets cannot be computed because one execution area doesn't have a physical schema. Check the errors on the interface.
  Cause: Source sets cannot be computed because one execution area doesn't have a physical schema.
  Action: Check the errors on the interface.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15563: Source sets cannot be computed because the staging area is not properly defined. Check your target datastore and the staging area's physical schema in the Definition tab.
  Cause: Source sets cannot be computed because the staging area is not properly defined.
  Action: Check your target datastore and the staging area's physical schema in the Definition tab.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15564: There should be one source set on the interface.
  Cause: The interface has more than one source set.
  Action: Ensure that only one source set is defined.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15565: Column `{0}` not found while setting the update key.
  Cause: A column specified for the update key does not exist.
  Action: Recheck the column names used to define the update key.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15566: No target column was found while setting the target data store.
  Cause: No target column was found while setting the target data store.
Action: Define columns before setting the target datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15567: Target column [0] was not found.
Cause: No specified target column was not found in the target data store.
Action: Check the column name parameter in the
RealBasicInterfaceCreationHelper.getTargetColumn method call.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15568: Column [0] not found on datastore [1].
Cause: A referenced column was not found in a source data store.
Action: Check the source datastore columns and references for a mismatch.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15569: Cannot create a data source.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15570: Cannot add a datastore of type [0] as source.
Cause: An invalid datastore type has been specified.
Action: Specify a datastore of type TargetDataStore, SourceDataStore, or
OdiDataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15571: Unexpected join type [0]
Cause: An invalid join type has been specified when setting join properties.
Action: Specify a join type of INNER, CROSS, or NATURAL.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15572: Unexpected join state.
Cause: An invalid join state has been reached. The expected join type is CROSS or
NATURAL.
ODI-15573: Failed to create an interface helper instance.
   Cause: A general exception was encountered while constructing an interface helper.
   Action:
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15574: General exception encountered in the interface helper while preparing to persist.
   Cause: General exception encountered in the interface helper while preparing to persist.
   Action:
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15575: Two journalized datastores have been found. There should be only one.
   Cause: Two journalized datastores have been found. There should be only one.
   Action:
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15576: Two journalized filters have been found. There should be only one.
   Cause: Two journalized filters have been found. There should be only one.
   Action:
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15577: Unmanaged type: {0}
   Cause: An invalid element type was passed to the prepareSQLStatement method.
   Action: Pass only valid element types such as GenericClause, SourceDataStore, TargetDataStore, ISourceColumn, TargetMapping, SourceSet, DataSet, or TargetColumn.
   Level: 32
   Type: ERROR
   Impact: Programmatic
ODI-15578: No interface was found in the elements.
   Cause: No interface could be traced to the elements passed to the prepareSQLStatement method.
   Action: Create an interface.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15579: No dataset was found in the elements.
   Cause: No data set could be traced to the elements passed to the prepareSQLStatement method.
   Action: Ensure that a dataset has been created first.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15580: The target is a temporary table.
   Cause:
   Action:
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15581: Cannot build the query because the ordered joins are not correct.
   Cause: The SQL clause cannot be generated because the ordered joins are not correct.
   Action: Ensure that all joins are correct.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15582: This operation is not supported on joined file datastores.
   Cause:
   Action:
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15583: This operation is not supported on multiple file datastores.
   Cause: More than one source datastore was found.
   Action:
   Level: 32
   Type: ERROR
   Impact: Programmatic
ODI-15584: Elements are from different interfaces.
   Cause: The components passed to prepareSQLStatement are from different interfaces.
   Action:
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15585: Elements are from different datasets.
   Cause: The components passed to prepareSQLStatement are from different datasets.
   Action:
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15586: Unsupported component: {0}
   Cause: An invalid component type was passed to connectionForData.
   Action: Only pass components of type SourceDataStore, ISourceColumn, TargetMapping, TargetColumn, GenericClause, or TargetDataStore.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15587: Journalization filter not found for the journalized table.
   Cause: The journalized table does not have a filter.
   Action: Define a journalizing filter for the table.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15588: The SQL join clause is not valid for a cross join.
   Cause: A join clause has been specified for a cross join.
   Action: Remove the join condition or change the join type.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15589: Cannot change the ON_TARGET indicator on a temporary interface.
   Cause: An attempt was made to set the ON_TARGET indicator for a temporary datastore.
   Action: Do not change the ON_TARGET indicator for a temporary datastore.
   Level: 32
   Type: ERROR
Impact: Programmatic

ODI-15590: Unknown indicator type: {0}
  Cause: An unknown value was passed to the constructor for InterfaceActionOnStagingAreaSetIndicator.
  Action: Use valid values of DISTINCT_ROW, ON_TARGET, or ON_USER_DATABASE_SCHEMA for the pIndicatorType parameter.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15591: Staging Area is on the target and cannot be switched to another logical schema.
  Cause: The staging area is on the target and uses the target schema. It cannot be switched.
  Action: Do not attempt to switch the schema, or use a separate staging area.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15592: GenericClause is of unknown type: {0}
  Cause: InterfaceActionRemoveGenericClause was constructed with an invalid generic clause.
  Action: Use a generic clause type of JOIN or FILTER.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15593: Could not set LKM for object of type {0}
  Cause: An LKM is being set for a TargetDataStore or some other invalid type.
  Action: Only set an LKM for a SourceSet or StagingArea.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15594: Could not set the CKM for a holder of type {0}
  Cause: A CKM is being set for a SourceSet, StagingArea, or some other invalid type.
  Action: Only set a CKM for a TargetDataStore.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15595: Could not set the IKM for a holder of type {0}
  Cause: An IKM is being set for a SourceSet, StagingArea, or some other invalid type.
**Action:** Only set an IKM for a TargetDataStore.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15596: Invalid KM type:** [0]

**Cause:** An invalid object type is being used to set a KM.

**Action:** Only set a KM of type LKM, CKM, or IKM.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15597: Could not set the LKM option for a holder of type:** [0]

**Cause:** An LKM is being set for a TargetDataStore or some other invalid type.

**Action:** Only set an LKM option for a SourceSet or StagingArea.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15598: Could not set the CKM option for a holder of type:** [0]

**Cause:** A CKM option is being set for a SourceSet, StagingArea, or some other invalid KM holder type.

**Action:** Only set a CKM option for a KM holder of type TargetDataStore.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15599: Could not set the IKM option for a holder of type:** [0]

**Cause:** An IKM option is being set for a SourceSet, StagingArea, or some other invalid KM holder type.

**Action:** Only set an IKM option for a KM holder of type TargetDataStore.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15600: Dataset 1 was not found in the list of the interface datasets used with the interface.**

**Cause:** The first dataset given as a parameter in the construction of the InterfaceActionSwitchDataSetOrders class is not used in the interface.

**Action:** Recheck the datasets being switched for this interface. Both datasets must be used in the interface.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic
ODI-15601: Dataset 2 was not found in the list of the datasets used with the interface.
   Cause: The second dataset given as a parameter in the construction of the InterfaceActionSwitchDataSetOrders class is not used in the interface.
   Action: Recheck the datasets being switched for this interface. Both datasets must be used in the interface.

   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15602: Dataset 2 was not found in the list of the datasets used with the interface.
   Cause: An unimplemented method has been called. This is an ODI internal error.
   Action: Do not call this method.

   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15603: Cannot create an alias for a datastore of type {0}
   Cause: The method computeAliasForDataStore was called with an invalid datastore type.
   Action: Only call computeAliasForDataStore for datastores of type TargetDataStore or OdiDataStore.

   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15604: A non ordered clause was passed to the buildTreeSet method.
   Cause: A non ordered clause is passed to the construction of ordered joins trees method.
   Action: Use ordered join clauses with this method.

   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15605: Multiple ordered joins in this dataset use the same order number.
   Cause: One or more join clauses uses the same order number in the call to buildTreeSet.
   Action: Ensure that all clauses of an ordered join have unique order numbers.

   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15606: Join references the same table twice (directly or indirectly).
   Cause: A join clause contains two references to the same table.
   Action: Ensure that the join clause only references one table.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15607: Join references the same table twice through other joins.
Causes: A join clause contains two references to the same table.
Action: Ensure that the join clause only references one table.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15608: Subcomponent type of [0] is not supported.
Causes: An unsupported type was passed to getIssuesComputer.
Action: Only pass types of OdiInterface, DataSet, SourceDataStore, Filter, Join, StagingArea, TargetDataStore, SourceSet, TargetMapping, or TargetColumn.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15609: Invalid KM holder type: [0]
Causes: An invalid KM holder type was passed to InterfaceKMHolderFactory.getKMHolderFor
Action: Only pass KM holder types of SOURCE_SET_LKM, STAGING_AREA_LKM, TARGET_CKM, or TARGET_IKM.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15610: Component must be a source datastore or a source column.
Causes: ReferenceManagerAbstract.getReferencesTo was called with an invalid subcomponent.
Action: Only pass subcomponent types of SourceDataStore or ISourceColumn.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15611: Column not found from an xref.
Causes: A column referenced in an expression was not found in a datastore. It may have been deleted.
Action: Ensure that all columns referenced in the expression exist.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15612: Failed to attach an element of type [0] to a source set.
Cause: An invalid type of component was found when attaching elements to a source set.

Action: Elements being attached to a source set must be of type SourceDataStore, Join, Filter, or TargetMapping.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15613: Interface must have only one dataset.
Cause: This sourceset computer can only handle a single dataset, and more than one was found.

Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15614: Interface must have only one source table.
Cause: This sourceset computer can only handle a single table, and more than one dataset was found.

Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15615: Interface must not have joins.
Cause: This sourceset computer can only handle a single table, and the interface contains a join.

Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15616: Source datastore must be a real table
Cause: This sourceset computer can only handle a single, real table.

Action:

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15617: Invalid type for a TextHolder: {0}
Cause: The method getExecutableTextHolderFor was called with an invalid TextHolder component type.

Action: Valid types are TargetMapping, TargetColumn, Filter, and Join.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15618: Cannot set a source set on a target column.
Cause: SetSourceSet was called for a target column, which is not a valid usage.
This method is specified for the interface, but is not valid for this class.
Action: SetSourceSet should never be invoked for this class.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15619: Inconsistent filter with a clauseType of [0]
Cause: The Filter.getFilterType method was called, but the clause type was not a
filter type.
Action: Ensure that the filter has a type of SnpPopClause.CLAUSE_TYPE_FILTER
or SnpPopClause.CLAUSE_TYPE_JRN_FILTER.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15620: Execution location is null. Target technology cannot be determined
Cause: The execution filter for the location was not set.
Action: The execution location should be set in the Filter constructor or by
invoking setExecutionLocation.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15621: Attached dataStore is null. Target technology cannot be determined
Cause: The attached datastore for the execution location was not set.
Action: The datastore should be set in the Filter constructor or by invoking
setAttachedDataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15622: Staging area does not have a logical schema. Target technology cannot
be determined
Cause: The attached datastore for the execution location was not set.
Action: The datastore should be set in the Filter constructor or by invoking
setAttachedDataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15623: Invalid technology for the given index type
Cause: The technology of the clause and index type do not match.
Action: Ensure that the index type technology matches the clause technology.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15624: Inconsistent join with clauseType = {0} and joinType = {1}
Cause: The join clause type is invalid.
Action: This exception is thrown from a deprecated method. Use isCross or isOrdered methods instead.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15625: Cannot set OdiDataType on a journalized source column
Cause: The setDataType method has been invoked for a journalized source column, but the datatype cannot be set for journalized columns.
Action: Do not invoke this method for a journalized column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15626: Cannot set the length on a journalized source column
Cause: The setLength method has been invoked for a journalized source column, but the length cannot be set for journalized columns.
Action: Do not invoke this method for a journalized column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15627: Cannot set the scale on a journalized source column
Cause: The setScale method has been invoked for a journalized source column, but the scale cannot be set for journalized columns.
Action: Do not invoke this method for a journalized column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15628: Cannot set the data type on a source column
Cause: The setDataType method has been invoked for a source column, but the datatype cannot be set for source columns.
Action: Do not invoke this method for a source column.

Level: 32
Type: ERROR
ODI-15629: Cannot set the length on a source column
   Cause: The setLength method has been invoked for a source column, but the length cannot be set for source columns.
   Action: Do not invoke this method for a source column.
   Level: 32
   Type: ERROR

ODI-15630: Cannot set the scale on a source column
   Cause: The setScale method has been invoked for a source column, but the scale cannot be set for source columns.
   Action: Do not invoke this method for a source column.
   Level: 32
   Type: ERROR

ODI-15631: Connection information is not available.
   Cause: The physical schema has not been set.
   Action: Define physical and logical schemas.
   Level: 32
   Type: ERROR

ODI-15632: Column [0] may not be removed because it is mapped in interface [1].
   Cause: The specified target column is mapped in another interface. This dependency prevents removal of the column.
   Action: Only remove a column after mapping dependencies have been removed.
   Level: 32
   Type: ERROR

ODI-15633: Data Type must be set first.
   Cause: Data Type is null.
   Action: Set Data Type.
   Level: 32
   Type: ERROR

ODI-15634: Length is not allowed for the current Data Type
   Cause: Data Type doesn't support length.
   Action: Check Data Type.
   Level: 32
   Type: ERROR
Impact: Programmatic

ODI-15635: Scale is not allowed for the current Data Type.
Cause: Data Type doesn't support scale.
Action: Check Data Type.

Level: 32
Type: ERROR

Impact: Programmatic

ODI-15636: Cannot change the column because it's not a temporary column.
Cause: Column isn't temporary.
Action: Check column state.

Level: 32
Type: ERROR

Impact: Programmatic

ODI-15637: Execution location must be either null or target.
Cause: Wrong Execution location state.
Action: Check Execution location.

Level: 32
Type: ERROR

Impact: Programmatic

ODI-15638: Scenario {0} contains invalid characters. Try {1}.
Cause: String contains invalid characters.
Action: Check scenario name.

Level: 32
Type: ERROR

Impact: Other

ODI-15639: Scenario version is not set.
Cause: Scenario version is not set.
Action: Set scenation version.

Level: 32
Type: ERROR

Impact: Programmatic

ODI-15640: No Scenario was found through the Tag : {0}.
Cause: No Scenario was found.
Action: Check tag.

Level: 32
Type: ERROR

Impact: Other
ODI-15641: The refresh SQL statement of a variable cannot contain sequence references when the variable is added to a load plan.

Cause: SQL statement contains sequence references.

Action: Check refresh SQL statement.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15642: Scenario name must be {0} characters long max.

Cause: Scenario name is too long.

Action: Check name length.

Level: 32
Type: ERROR
Impact: Other

ODI-15643: No Physical Mapping Design from Mapping: {0}.

Cause: Cannot find any Physical Mapping Design from Mapping.

Action: Check there is valid Physical Mapping Design.

Level: 32
Type: ERROR
Impact: Other

ODI-15644: The physical data server for the source code and for sequence(s) {0} is not the same, this may result in the same sequence value being used for each row.

Cause: The sequence may be remote so a single nextval is calculated and reused per row.

Action: Make sure the sequence and task have the same data server if you want the sequences to use distinct values per row.

Level: 32
Type: INFO
Impact: Other

ODI-15645: The physical data server for the target code and for sequence(s) {0} is not the same, this may result in the same sequence value being used for each row.

Cause: The sequence may be remote so a single nextval is calculated and reused per row.

Action: Make sure the sequence and task have the same data server if you want the sequences to use distinct values per row.

Level: 32
Type: INFO
Impact: Other

ODI-15700: Exception thrown in the Odi shortcut service: {0}

Cause: An exception was thrown while materializing a shortcut object.

Action: Check the root cause.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-16000: Dataset has no sources: {0}
Cause: The Dataset has no source or the source is not available.
Action: Check sources.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16001: Dataset {0} contains only one source.
Cause: The Dataset has only one source.
Action: Check sources.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16002: Dataset has added default join condition with cartesian product: {0}
Cause: Dataset has added default join condition with cartesian product.
Action: 

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16003: Multiple joins in the same dataset have the same order number: {0}
Cause: Multiple joins in the same dataset have the same order number.
Action: Check the order numbers of join components in the dataset.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16004: ANSI join: {0} has no user-defined order. The default order -1 (meaning "random order") is assigned.
Cause: An ANSI join component does not have a join order assigned to it.
Action: Assign an order number that is not -1.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16005: Join component inside dataset has no valid source references in the join condition. Join: {0} , condition = {1}.
Cause: Join component inside dataset has no valid source references in the join condition.
Action: Check source references in the join condition.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16006: Join component inside dataset has only one source references in the join condition, must have at least 2 references. Join: {0}, condition = {1}
Cause: Join component inside dataset has only one source references in the join condition, must have at least 2 references.
Action: Check join condition.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16008: There is no possible pairwise join order that satisfies both the join condition references and the user order numbers.
Cause: There is no possible pairwise join order that satisfies both the join condition references and the user order numbers.
Action: Check both the join condition references and the user order numbers.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16009: Lookup component creation is not complete: it misses either driving and/or lookup source information.
Cause: Lookup component: {0} in dataset: {1} is incomplete. (Driving source: {2}, lookup source: {3})
Action: Set the missing driving and/or lookup source on the lookup component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16010: Dataset has sources that are not referenced by any join condition.
Dataset: {0}, unconnected sources: {1}.
Cause: Dataset has sources that are not referenced by any join condition.
Action: Check sources.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16011: INTERNAL ERROR: Dataset error when connecting joins in order. Cannot find source for join: {0}, referenced source name: {1}.
Cause: Dataset error when connecting joins in order. Cannot find source for join.
Action: Check sources.
Impact: Programmatic

ODI-16012: Cannot find ordered join connection in dataset for: {0}
Cause: Cannot find ordered join connection in dataset.
Action: Check ordered join connection.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16013: Cannot find a valid pairwise tree of join connections for dataset: {0}
unconnected join: {1} ({2})
Cause: Cannot find a valid pairwise tree of join connections for dataset.
Action: Check join connections.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16014: Cannot find a valid pairwise tree of join connections for dataset: {0}
Cause: Cannot find a valid pairwise tree of join connections for dataset.
Action: Check join connections.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16015: Missing expression for aggregate component {0}, attribute: {1}
Cause: Missing expression for aggregator attribute.
Action: Check aggregator attribute.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16016: Could not find an output signature for point: {0}
Cause: Could not find an output signature for point.
Action: Check output signature for the connection point.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16017: The join component: {0} has more than 2 input connector points. This is not recommended. ANSI SQL join syntax may not be supported.
Cause: The join component has more than 2 input connector points. This is not recommended. ANSI SQL join syntax may not be supported.
Action: Check the join component.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16018: The join condition for component: {0} only references {1} sources, but there are {2} input connector points. Expression text: {3}

Cause: The number of references sources is less than the number of input connector points.

Action: Check the join condition and input connector points.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16019: Set component output attribute {0} contains {1} expressions, but there are only {2} input connector points.

Cause: The number of input expressions is greater than the number of input connector points.

Action: Check expressions and input connector points.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16020: Set component output attribute expression for attribute: {0} does not have a scoping input connector point specified. Set component input expressions must have an associated scoping input connector point.

Cause: A scoping input connector point need to be specified.

Action: Check If set component input expressions have an associated scoping input connector point.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16021: The immediate downstream node {0} of the AP node {1}, which uses a push style LKM, is not a target.

Cause: A push style LKM is assigned to an AP node but its immediate downstream node is not a target.

Action: Either change the LKM to a pull style LKM or move some physical nodes to source execution unit(s).

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16022: Set component output attribute: {0} does not have an expression that references through input: {1}.

Cause: Not all input connector points have been referenced by one expression.

Action: Check input connector points and expressions.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16023: Expression cross reference object is null: {0}.
Cause: Expression cross reference object is null.
Action: Check expression cross reference object.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16024: The expression contains unresolved attribute references. {0} Expression:
(1) Unresolved identifiers: {2}.
Cause: The expression contains identifiers that were not resolved as attribute
references.
Action: Check all identifiers in the expression for accessibility through a valid
input connector point.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16025: An access point (AP) node has been created in the physical graph, but it
does not have any columns: {0}.
Cause: ERROR: An access point (AP) node has been created in the physical graph,
but it does not have any columns.
Action: Check access points.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16026: Cannot move an existing physical node to a different physical design!
Node: {0}.
Cause: Cannot move an existing physical node to a different physical design!
Action: The action attempted is not supported.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16027: No path exists from physical node: {0} to: {1}.
Cause: No path exists between physical nodes.
Action: Check paths between physical nodes.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16028: Expression push is not allowed because it would push the expression
through projector node: {0}.
Cause: Expression push is not allowed because it would push the expression through projector node.
Action: The action attempted is not supported.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16029: Expression {0} ({1}) owned by: {2} has blank value, but a non-blank value is required.
Cause: Expression has blank value, but a non-blank value is required.
Action: Check the expression text.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16030: An attribute expression must reference only one projector or joiner source. Attribute: {0}.
Cause: An attribute expression must reference only one projector or joiner source.
Action: Check attribute expressions.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16031: The lookup component must have a driver and a lookup source input connection.
Cause: The lookup component is not properly connected, it must have 2 input connections.
Action: Connect the lookup component.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16032: Unsupported component type: {0}: component: {1} in dataset: {2}.
Cause: The dataset does not support the component type.
Action: Remove the component from the dataset.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16033: Aggregate filter: {0} is not supported in dataset: {1}.
Cause: The dataset does not support aggregate filters.
Action: Remove the aggregate filter.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16034: A transparent target LKM was picked for: {0}, but the AP node has more than one downstream target component.
Cause: An AP node with a transparent target LKM can only have one downstream target.
Action: Pick a different LKM.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16035: Target node {0} has assigned IKM {1}. The IKM will be ignored.
Cause: A target node that is loaded by an upstream AP node with a transparent target LKM assigned does not need an IKM assigned, since the loading functionality will be handled by the LKM transparent push.
Action: Set IKM to null.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16036: No target connected to AP node: {0} with SQL multi-connect LKM assigned.
Cause: An AP node with SQL multi-connect LKM assigned has no target.
Action: Add a target component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16037: Only one target allowed for AP node: {0} with SQL multi-connect LKM assigned.
Cause: An AP node with multi-connect LKM assigned cannot have multiple targets.
Action: Pick different LKM, or remove all but one of the targets in the mapping.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16038: No extra logical components are allowed downstream from AP node: {0} with SQL multi-connect LKM assigned. The AP node must have a direct connection to target.
Cause: An AP node with multi-connect LKM assigned must be connected directly to the target, with no intervening nodes.
Action: Pick a different LKM, or reconfigure the physical graph such that the AP nodes connects directly to the target.

Level: 32
Type: SET_AT_RUNTIME
**Impact:** Programmatic

**ODI-16039:** The AP node: {0} has a transparent target LKM assigned, but it is not connected directly to the target.

**Cause:** An AP node with transparent target LKM assigned must be connected directly to the target, with no intervening nodes.

**Action:** Pick a different LKM, or reconfigure the physical graph such that the AP nodes connects directly to the target.

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-16040:** Non-ANSI full outer join for component: {0} is not supported.

**Cause:** Full outer join is set to generate non-ANSI syntax.

**Action:** Check the box for "Generate ANSI Syntax" under Join properties.

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-16041:** The manual group by clause is missing a required attribute: {0}

**Cause:** The manual group-by expression is missing one or more attributes required for the SQL group-by clause.

**Action:** Edit the manual group-by expression to included the missing attribute.

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-16042:** The expression for attribute: {0} does not contain an aggregate function, but the group by column setting is NO. Non aggregate attributes should be part of the group-by clause.

**Cause:** The group-by column setting for an attribute is NO, but it should be part of the group-by clause because the expression does not contain an aggregate function.

**Action:** If the attribute expression does not contain an aggregate, set the group by column setting to YES.

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-16043:** The expression for attribute: {0} contains an aggregate function, but the group by column setting is YES. Only non aggregate attributes should be included in the group-by clause.

**Cause:** The group by column setting for an attribute is YES, but it should not be part of the group-by clause because the expression contains an aggregate function.

**Action:** If the attribute expression contains an aggregate, set the group by column setting to NO.

**Level:** 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16044: The having clause references aggregate attribute: {0}, but an aggregate function is not specified.
Cause: An aggregated attribute is used in a having clause without an aggregate function.
Action: If the having clause references an aggregated attribute, include the aggregate function used with that attribute.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16045: Input connector point {0} is not referenced by any attribute expression. That input to the set component is unused.
Cause: An input connector point for a set component is unused because no attribute expressions reference attributes scoped through that connector.
Action: At least one attribute expression should reference an attribute through the input connector in order to use that input to the set.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16046: Set components must have a minimum of two input connector points.
Cause: The set component has less than two input connector points.
Action: Add an input connector point. Set components must have at least two sources.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16047: Set component output attribute: {0} must have a non empty expression for input connector point {1}.
Cause: The number of input expressions is less than the number of input connector points.
Action: Specify a non empty expression for each input. Specify null if no attribute reference is used.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16048: Reusable mapping component: {0} must have a connection for input connector point {1}.
Cause: An input connector point is not connected to another map component.
Action: Connect the input connector point to a source component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16049: Reusable mapping component {0} has one or more output connector points, but none are connected or contain target components. DML cannot be generated without a target component connected downstream or within the reusable mapping.
Cause: None of the output connector points for the reusable mapping component are connected or contain target components.
Action: Add a connection for at least one output connector point.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16050: Native sequence and ORDER BY operation are performed on the same flow. This might not be allowed in some technologies such as Oracle.
Cause: Sequence is used before order by, this is now allowed in Oracle.
Action: Remove sorter component or place sorter in an execution unit different from the sequence expression.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16051: The Sub select option may not be set for reusable mappings having an input signature.
Cause: The reusable mapping component setSubSelect method was called with a value of true, but sub select is not allowed if an input signature is present.
Action: Avoid calling the setSubSelect method or specify false for the value parameter.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16052: The Sub select option may not be set for reusable mappings having more than one output signature.
Cause: The reusable mapping component setSubSelect method was called with a value of true, but sub select is not allowed if more than one output signature is present.
Action: Avoid calling the setSubSelect method or specify false for the value parameter.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16053: Mixed non-ordered (outer) join and ordered join is not supported.
Cause: Outer join is set to non-ordered.
Action: Change the join to ordered join.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16054: An unparsed identifier, {0}, was found in the aggregate HAVING clause. This identifier was not found in any other aggregate or group by expressions.
Cause: An identifier was found in the HAVING clause, but is invalid because it is not present in any aggregation or group by expression.
Action: Remove this expression from the HAVING clause or use it in one of the aggregate output attribute expressions.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16055: Reusable mapping {0} for reusable mapping component {1} contains errors or warnings.
Cause: A reusable mapping used by this mapping has errors or warnings.
Action: See following error or warning messages regarding the reusable mapping.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16056: The driver connection for lookup component {0} is not connected to any source.
Cause: A connection has not been made between the source and driving connection of the lookup component.
Action: Connect a source to the lookup component driver connection.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16057: The lookup connection for lookup component {0} is not connected to any source.
Cause: A connection has not been made between the source and lookup connection of the lookup component.
Action: Connect a source to the lookup component lookup connection.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16058: Output signature {0} of reusable mapping {1} is not connected to any input source.
Cause: An output signature is not connected to any upstream component.
Action: Connect the output signature to an upstream component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16059: Error adding lines to task container for KM {0}: {1}
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16060: Error finding helper component KM for AST processing of a node with 11g KM assigned: node={0}, helper KM={1}, error={2}
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16061: Error when calling generation delegate for component KM {0}: {1}
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16062: Cannot create node variable binding map for component KM {0}: {1}
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16063: No target multi-connect IKM found when processing an AP node with a SQL multi-connect LKM assigned.
Cause: A multi-connect IKM could not be found for a target.
Action: Check the target IKM assignment.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16064: When processing an AP node with SQL multi-connect LKM assigned, the downstream target node does not have a multi-connect IKM assigned.
Cause: The IKM assigned to the target is not a multi-connect IKM. If an AP node uses a multi-connect LKM, a multi-connect IKM is required on the target.
Action: Assign a multi-connect IKM to the target.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16065: Cannot get an entity manager for the mapping object. The entity manager must be set for the owning mapping or reusable mapping by calling IODiEntityManager.persist() or Mapping.setEntityManager(), before this operation can be done. Mapping object= {0}
Cause: An mapping operation is being performed that requires the mapping to resolve a reference, but the mapping entity manager has not been set.
Action: Set the entity manager for the mapping, by calling IODiEntityManager.persist() or Mapping.setEntityManager().

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16066: Target datastore column {0} is mandatory column and should be mapped.
Cause: Missing expression for mandatory target datastore column.
Action: Check target datastore mandatory column expression.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16067: The Sub select option may not be set for reusable mappings having no output signature.
Cause: The reusable mapping component setSubSelect method was called with a value of true, but sub select is not allowed if no output signature is present.
Action: Avoid calling the setSubSelect method or specify false for the value parameter.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16068: A parse error was encountered when parsing the expression: {0}. The default parser supports ANSI SQL delimiters. If a non-standard syntax is desired, use the free-form expression delimiters /%% and %%/ around the expression.
Cause: Expression is syntactically incorrect.
Action: Make sure the expression is well-formed.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16069: Technology {0} does not support the WHERE clause and cannot process the join.
Cause: Technology "Where" indicator is set to false.
Action: Check the technology setting or remove the join.
ODI-16070: Ordered joins are not supported in technology {0}.
  Cause: Technology Join Support Ordered indicator is set to false.
  Action: Set join to non-ordered (Generate ANSI syntax = false).

ODI-16071: Cross joins are not supported in technology {0}.
  Cause: Technology Cross Join indicator is set to false.
  Action: Set join type to non-cross join.

ODI-16072: Natural joins are not supported in technology {0}.
  Cause: Technology Natural Join indicator is set to false.
  Action: Set join type to non-natural join.

ODI-16073: Non-ordered natural joins are not supported.
  Cause: Natural Join is set to non-ordered (generate ANSI syntax = false).
  Action: Set 'Generate ANSI syntax' to true.

ODI-16074: Non-ordered joins are not supported in technology {0}.
  Cause: Join is set to non-ordered (generate ANSI syntax = false).
  Action: Set join to ordered (Generate ANSI syntax = true).

ODI-16075: Non-ordered outer joins are not supported in technology {0}.
  Cause: Outer Join is set to non-ordered (generate ANSI syntax = false).
  Action: Set 'Generate ANSI syntax' to true.
Impact: Programmatic
ODI-16076: Outer joins are not supported in technology {0}.
  Cause: Join is set to outer join.
  Action: Set join to non-outer join.
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Programmatic
ODI-16077: Full outer joins are not supported in technology {0}.
  Cause: Join is set to full outer join.
  Action: Set join to non-full outer join.
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Programmatic
ODI-16078: Inner joins are not supported in technology {0}.
  Cause: Join is set to inner join.
  Action: Set join to non-inner join.
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Programmatic
ODI-16079: Reusable mapping {0} is not compatible with dataset {1}. A reusable mapping within a dataset must have no input signatures and exactly one output signature.
  Cause: An incompatible reusable mapping is being added to the dataset. The reusable mapping must have no input signatures and exactly one output signature.
  Action: Choose a different compatible reusable mapping or modify the reusable mapping to contain just a single output signature and no input signatures.
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Programmatic
ODI-16080: Mapping component type {0} is not supported within a {1}.
  Cause: An unsupported component is being added to a mapping or composite component.
  Action: Use a supported component.
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Programmatic
ODI-16081: Physical Mapping Design {0} cannot be calculated with no optimization context.
**Cause:** The optimization context of the physical design is not set, or it becomes invalid because the referenced context is deleted.

**Action:** Check the optimization context of the physical design and specify an appropriate context.

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-16082:** The physical node {0} cannot be supported by technology {1} on execution unit {2} of mapping {3}.

**Cause:** The physical node cannot be moved to the execution unit because its technology does not support the node.

**Action:** Do not move the physical node to this execution unit.

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-16083:** Input Attribute {0} of reusable mapping component {1} does not have an expression to connect it to any source, but is referenced in the reusable mapping.

**Cause:** An input signature attribute in a reusable mapping is referenced by another component, but the input is not connected in the parent mapping.

**Action:** Assign an expression to the reusable mapping component input attribute.

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-16084:** The proposed connection would create a circular graph.

**Cause:** The proposed connection would create a logical graph which contains a circular path, which connects a source component through some other components and back to itself.

**Action:** Fix the connections to get rid of the circular path.

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-16085:** Cannot set an expression for attribute {0} because the attribute was not found. Available attributes: {1}.

**Cause:** SetAttributeExpressionText was called with an invalid attribute name.

**Action:** Specify a valid attribute name.

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-16086:** Set component {0} input connector point {1}: set operator {2} is not valid for {3} technology.
Cause: The set operation chosen for the connector point is not valid for the technology.

Action: Choose a set operation valid for the technology.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16087: Generation of set component {0} failed because of an incompatibility with the technology.

Cause: The set operation chosen for the connector point is not valid for the technology.

Action: Choose a set operation valid for the technology.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16088: Map component {0}, attribute {1} contains an aggregate function.
Aggregate functions are only supported by the aggregate component.

Cause: An aggregate function is used in the expression of a datastore attribute. The Datastore component does not support aggregate functions and will not generate the required GROUP BY clause.

Action: Create an aggregate component to contain the aggregate function.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16089: "Cannot connect to component {0}, no input connector points are available.

Cause: An attempt was made to connect to the component, but no input connector points are available.

Action: Fix the connection graph.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16090: "Attempt connect a component to itself. from={0}, to= {1}

Cause: An attempt was made to connect an output of the component back into an input of the same component.

Action: Do not connect a component to itself.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16091: Expression component {0} has no attributes.

Cause: An expression has no attributes. Expression components are projectors and must have attributes in order to be referenced by downstream components.
Action: Add one or more attributes to the expression component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16092: Datastore component {0}, attribute {1} is mandatory but not active.
 Cause: A datastore attribute is mandatory, but has been tagged as non active.
Action: Set the mandatory attribute to active.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16093: The subselect option is not valid for reusable mapping component {0}
because the reusable mapping contains an expression referencing a native sequence.
Cause: The reusable mapping has an expression referencing a native sequence, and the subselect option has been chosen for the reusable mapping component.
Action: Avoid using the subselect option for reusable mappings having expressions which reference native sequences.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16094: Physical node {0} is associated with logical schema {1}, but it is not mapped to a physical server in context {2}.
Cause: The physical schema of the physical node cannot be resolved, as its logical schema is not mapped in the execution context.
Action: Associate the logical schema with a physical schema in the context specified.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16095: "Scenario Generation failed for mapping {0} because no physical design was found."
Cause: No physical design was found during scenario generation for a mapping.
Action: Correct any errors preventing physical design generation.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16096: A mapping with name {0} already exists in folder {1}.
Cause: A mapping with the same name already exist in the same folder.
Action: Use a different name for the mapping.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16097: A reusable mapping with name \{0\} already exists in folder \{1\}.
Cause: A reusable mapping with the same name already exist in the same folder.
Action: Use a different name for the reusable mapping.

Level: 32

Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16098: A reusable mapping with name \{0\} already exists in global project.
Cause: A reusable mapping with the same name already exist in the global project.
Action: Use a different name for the reusable mapping.

Level: 32

Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16099: Name \{0\} already exists in \{1\} \{2\}.
Cause: The given name is already used. Object name needs to be unique with the parent object.
Action: Provide a different name for the object.

Level: 32

Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16100: Name cannot be an empty string.
Cause: Name of an object cannot be empty.
Action: Provide a name for the object.

Level: 32

Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16101: Name \{0\} contains invalid characters. Only letters, digits or underscore characters are allowed.
Cause: Proposed name contains invalid characters, such as space. Only letters, digits or underscore characters are allowed.
Action: Provide a different name for the object.

Level: 32

Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16102: Name \{0\} contains invalid characters. Only uppercase letters, digits or underscore characters are allowed, and the first character needs to be a letter.
**Cause:** Proposed name contains invalid characters, such as space. Only uppercase letters, digits or underscore characters are allowed, and the first character needs to be a letter.

**Action:** Provide a different name for the object.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16103:** Name {0} is longer than {1} characters.

**Cause:** Proposed name is too long.

**Action:** Shorten the proposed name.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16104:** The expression for attribute {0} cannot be resolved because it references an input signature which could not be redirected to an upstream expression. Input connector connections may be incorrect.

**Cause:** An expression references an input signature, but it could not be redirected to an expression upstream of the input signature. Invalid input connector point connections are the most common cause.

**Action:** Check all input connector points for correct upstream connections.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16105:** Expression of attribute {0} does not refer to any upstream attribute. If {0} is an attribute of an input signature component, the corresponding attribute of the reusable mapping component does not have an expression text, or the input connector point of the reusable mapping component is not properly connected.

**Cause:** The expression is not set or the input connector point is not properly connected.

**Action:** Verify the expression or the connection to the input connector point.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16106:** No columns are set to update column in Target datastore {0}.

**Cause:** The update indicator is not set in target datastore.

**Action:** Verify the targetDatastore attribute and set the update indicator.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16107:** The data type for datastore component {0}, attribute {1} is not defined.
Cause: The data type of the column to which the datastore attribute is bound is null. This may occur when reverse engineering an unknown data type.

Action: Add the data type to the technology and set the data type of the column.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16108: Preset Staging Location explicitly set to target location. This may result in the addition of another execution unit and decreased performance. Consider using the default Preset Staging Location, which is already set to use the target location.

Cause: The preset staging location has been explicitly set, instead of using the default value. When an explicit value is set, and execution unit will be created, even if the location is the same as the target location.

Action: Consider using the default value for the preset staging location.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16109: Encountered [0] at line [1] column [2]. Was expecting one of: [3]. The default parser supports ANSI SQL delimiters. If a non-standard syntax is desired, use the free-form expression delimiters /*%*/ and %/% around the expression.

Cause: A parser error was encountered when parsing the expression.

Action: Fix the syntax of the expression.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16110: Non-ANSI natural join for component: [0] is not supported.

Cause: Natural join is set to generate non-ANSI syntax.

Action: Check the box for "Generate ANSI Syntax" under Join properties.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16111: Cannot remove [0] connector point for component [1] due to minimum connector point count violation.

Cause: Removal of connector point will result in connector point count less than minimum count.

Action: Do not remove connector point.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic
ODI-16112: Reusable mapping component {0}, output connector point {1} is not connected.
Cause: An output connector point of a reusable mapping component is not connected.
Action: Check that connections from all output connector points are optional.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16113: Mapping component {0} has no input or output connections.
Cause: An mapping component has not been connected.
Action: Connect the component to a source and/or target component.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16114: Error when ordering the components for physical design:{0}, component re-ordering is not valid. A skipped component was not able to be placed in an execution unit because of dependency errors.
Cause: When attempting to reorder the component nodes in the physical graph, an error was found.
Action: Do not reorder the component.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16115: Cannot reorder an outer join node around another kind of node.
Cause: Cannot reorder an outer join node around another kind of node.
Action: Cannot reorder an outer join node around another kind of node.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16116: Cannot reorder a join around another join if one of the joins does not have at least 2 references in its join condition.
Cause: Illegal reordering.
Action: Do not reorder the component.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16117: Cannot reorder a join around another join if one is generating ANSI and the other is not.
Cause: Illegal reordering.
Action: Do not reorder the component.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16118: Cannot reorder a join around another join if one is a left or right outer join and the other is not the same type, for non-ANSI joins.
Cause: Illegal reordering.
Action: Do not reorder the component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16119: Cannot reorder a join around another join if either one is a left outer or right outer join, for ANSI joins.
Cause: Illegal reordering.
Action: Do not reorder the component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16120: Warning: Target Load Order -- Child component is ordered before parent component.
Cause: A datastore component with foreign key relationships is ordered before its parent datastore component.
Action: Change the load order to put parent component before child component or keep the load order knowing that it may result in error in loading due to missing primary record.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16121: Error: Target Load Order -- Load order is not consistent with processing graph from source to target. Please modify the graph or change the load order.
Cause: A target component is ordered before its source component.
Action: Change the load order to put source component before target component or change the mapping design.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16122: Cannot create physical design due to mapping validation errors: {0}.
Cause: Validation errors.
Action: Fix the mapping.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16123: Node pushed upstream causes conflicts due to multiple upstream connections from different execution units. Pushed node={0}.
Cause: Illegal node push.
Action: Do not push the node to this location.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16124: Not allowed to reorder node {0}: {1}
Cause: Illegal node push.
Action: Do not push the node to this location.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16125: Not allowed to push node {0} past node {1}: {2}
Cause: Illegal node push.
Action: Do not push the node to this location.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16126: Physical graph re-ordering is causing a referencing problem for component: {0}.
Cause: Illegal node push.
Action: Do not push the node to this location.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16127: Cannot reorder component that is not a selector: {0}.
Cause: Illegal node push.
Action: Do not push the node to this location.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16128: Cannot reorder component that does not have at least one input and output connector point: {0}.
Cause: Illegal node push.
Action: Do not push the node to this location.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16129: Cannot reorder a component that has multiple downstream targets: {0}.
  Cause: Illegal node push.
  Action: Do not push the node to this location.
  Level: 32
  Type: SET_AT_RUNTIME

ODI-16130: Cannot reorder an outer join component: {0}.
  Cause: Illegal node push.
  Action: Do not push the node to this location.
  Level: 32
  Type: SET_AT_RUNTIME

ODI-16131: The node will not be moved.
  Cause: Illegal node push.
  Action: Do not push the node to this location.
  Level: 32
  Type: SET_AT_RUNTIME

ODI-16132: Cannot reorder node {0} downstream of {1}, since {1} has expression
  references to {0}.
  Cause: Illegal node push.
  Action: Do not push the node to this location.
  Level: 32
  Type: SET_AT_RUNTIME

ODI-16133: Cannot reorder node {0} upstream of {1}, since {0} has expression
  references to {1}.
  Cause: Illegal node push.
  Action: Do not push the node to this location.
  Level: 32
  Type: SET_AT_RUNTIME

ODI-16134: Cannot set journalizing for datastore component {0}, since its bound
datastore is not journalized.
  Cause: Cannot set journalizing since the bound datastore is not journalized.
  Action: Make sure the bound datastore is CDC enabled.
  Level: 32
  Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16135: File technology has limited capability to serve as a staging area. Consider switching the staging area to another technology, such as in-memory engine.

Cause: File technology unit set as staging area.
Action: Set staging area to non-file technology.

Level: 32
Type: SET_AT_RUNTIME

Impact: Programmatic

ODI-16136: Join {0} has type {1}, so its non-blank {2} will be ignored.

Cause: With Join Type CROSS or NATURAL, the Join Condition will be ignored.
Action: Check the Join Type. If correct, set the Join Condition to blank.

Level: 32
Type: SET_AT_RUNTIME

Impact: Programmatic

ODI-16137: IKM {0} is selected for physical node {1}, but the corresponding logical component {2} of reusable mapping {3} is not marked as derived sub-select.

Cause: An IKM is used for extraction of a physical node, but derived sub-select is not enabled.
Action: Change the KM selected for the physical node, or mark the logical component as derived sub-select.

Level: 32
Type: SET_AT_RUNTIME

Impact: Programmatic

ODI-16138: Internal error occurred during mapping metadata conversion. Please check the original 11g interface to see if it is complete and valid. Only interfaces that pass validation are supported during the upgrade process. If the 11g interface validates properly (in 11g) and then fails to upgrade cleanly, you should contact Oracle Support. The detailed exceptions information can be found in log file.

Cause: Internal error occurred or unexpected exception received during mapping metadata conversion.
Action: Make sure the original 11g interface is valid. If the 11g interface validates properly (in 11g) and then fails to upgrade cleanly, you should contact Oracle Support. The detailed exceptions information can be found in log file.

Level: 32
Type: SET_AT_RUNTIME

Impact: Programmatic

ODI-16139: Execution unit {0} does not have a location.

Cause: The execution unit does not have a logical schema selected for its location.
Action: Select a logical schema as the location of the execution unit.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16140: Mapping component {0} must have a connection for input connector point {1}.
Cause: An input connector point is not connected to another map component.
Action: Connect the input connector point to a source component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16141: Mapping component {0} must have a connection for output connector point {1}.
Cause: An output connector point is not connected to another map component.
Action: Connect the output connector point to a downstream component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16142: Cannot bind a datastore component to file model datastore {0}, use a file component instead.
Cause: Attempt to bind a datastore component to a datastore with file technology.
Action: Use a file component instead, and bind the file object to it.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16143: Cannot bind a file component to non-file model datastore {0}, use a datastore component instead.
Cause: Attempt to bind a file component to a datastore with non-file technology.
Action: Use a datastore component instead, and bind the file object to it.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16144: The expression cannot be pushed to execution unit {0} because its references would be out of scope.
Cause: Illegal push-to target execution unit for expression.
Action: Do not push the expression to this execution unit.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16145: The lookup match nth rows for lookup component {0} should be positive number.
Cause: The match nth row property has not been correctly configured for lookup component.
Action: Correct the match nth row property for lookup component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16146: The join condition for component {0} contains a filter expression that does not reference a different schema on each side of the equality operator: {1}. Filter expressions may not behave as expected in joins.
Cause: The join condition contains a filter expression. Filter expressions may not be effective in joins, and are inherently problematic in outer joins.
Action: Move the extra filter condition to a separate filter component to eliminate interaction with the join.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16147: The join condition for component {0} does not contain an identifiable equality operator to join the input sources: {1}.
Cause: The join condition may be missing an equality operator needed to match rows when joining the input sources.
Action: Check the join expression for a valid equality operator.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16148: The size of map attribute {0} ({1}) is greater than the size of attribute {2} ({3}), to which it is mapped. Truncation or runtime errors are possible, depending on the technology.
Cause: A map attribute is mapped to an attribute of smaller size. This may result in data truncation or DML errors.
Action: Verify the size of both attributes and make any adjustments necessary to avoid truncation. Add an expression to explicitly truncate the data if necessary.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16149: For lookup component {0}, the option {1} for non matching rows may only be selected if option {2} is selected for multiple matching rows.
Cause: The no match rows property has not been correctly configured for lookup component. It may only be used if the multiple matching rows option specifies all rows.
Action: Correct the no match rows property for lookup component.

Level: 32
Type: SET_AT_RUNTIME
**Impact:** Programmatic

**ODI-16150:** Multiple non-ANSI outer joins exist within a dataset for the same datastore [0].
*Cause:* A datastore is outer joined to more than one datastore. This may result in execution errors.
*Action:* Create joins outside of datasets.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16151:** The context value {0} for map component {1} does not map to a physical location.
*Cause:* The forced context value of a data storage component, combined with the model and logical schema, does not map to a physical schema. A map physical design cannot be created.
*Action:* Use the logical schema editor or SDK to set a physical schema for the chosen component context.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16152:** Error processing KM target expression for mapping: {0}, KM line: {1}, KM error: {2}
*Cause:* An exception was thrown during KM processing of the target expression for a particular line.
*Action:* Review the KM line and error to determine the cause.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16153:** Error processing KM source expression for mapping: {0}, KM line: {1}, KM error: {2}
*Cause:* An exception was thrown during KM processing of the source expression for a particular line.
*Action:* Review the KM line and error to determine the cause.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16154:** No expressions have been defined on the attributes for map component {0}.
*Cause:* A target datastore is connected, but none of its attributes have expressions defined.
*Action:* Create expressions to map one or more attributes to a source.

**Level:** 32  
**Type:** SET_AT_RUNTIME
Impact: Programmatic

ODI-16155: Join or Lookup component {0} is inactive. Components joining sources must be active.
Cause: A join or lookup component has been set to inactive. Components which join sources must be active because all sources will not be in scope without the join.
Action: Set the component to active.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16156: Join type {0} in {1} cannot be supported due to circular relationships in Dataset {2}.
Cause: If a circle of relationships exist in a Dataset, one of the joinis must be reduced to a filter. The join type defined on it could be lost.
Action: Examine the logic in the Dataset and try to reduce the number of outer joins if possible as the currently specified logic in Dataset cannot be translated to a SQL query.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16157: Ambiguous expression reference due to split path. {0} Expression: {1}, Available paths: {2}
Cause: The connection path to the referenced attribute is split and the reference does not include a path specifier with a sufficient number of connector names to specify an unambiguous path.
Action: Add a path specifier qualifier to the expression reference.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16158: Component in path specifier has multiple output connector points. {0} Expression: {1}, Component={2}
Cause: A map component specified in the expression path specifier has multiple output connector points.
Action: A specific connector point must be specified in the path specifier.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16159: Path specifier contains nonexistent identifier. {0} Expression: {1}, Identifier={2}
Cause: An identifier specified in the expression path specifier is not found in the set of upstream components or connector points.
Action: Fix the path specifier in the expression.
ODI-16160: Path specifier contains out-of-scope identifier. [0] Expression: [1], Identifier=[2].
  Cause: An identifier specified in the expression path specifier is not found in the set of upstream components or connector points.
  Action: Fix the path specifier in the expression.

ODI-16161: No matching path can be found. [0] Expression: [1].
  Cause: A path specifier is included in the expression, but it does not match any actual path in the map.
  Action: Fix the path specifier in the expression.

ODI-16162: Final parsing of [0] command [0] failed with exception [1].
  Cause: A final parsing of the command was performed and hit an error.
  Action: Report as an ODI bug.

ODI-16163: Cannot parse identifier "[0]" because there are multiple instances of "[1]" in the mapping.
  Cause: An identifier in the expression can not be parsed because it refers to multiple components.
  Action: Fix the identifier in the expression.

ODI-16164: Internal Error: Cannot find input query select item for expression cross reference: [0].
  Cause: The code generator cannot generate code for the map expression cross reference because the upstream query does not include the referenced object.
  Action: Fix the expression.
ODI-16165: An attribute input expression for a set component must reference upstream attributes through only one input connector point. Attribute: {0}.

Cause: An attribute input expression for a set component must reference upstream attributes through only one input connector point.

Action: Check input expressions for the set component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16166: Cannot parse the syntax of user defined function or language element {0}: {1}.

Cause: The syntax text of the user defined function or language element cannot be parsed by the code generator.

Action: Check the syntax text of the user defined function or language element.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16167: The function call {0} does not match the number of parameters defined for user defined function or language element {1}.

Cause: The function call in the expression text does not match the number of parameters of the user defined function or language element.

Action: Check the function call in the expression.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16168: Invalid parameter syntax in the syntax text of user defined function or language element {0}: {1}.

Cause: One of the parameters in the syntax text contains invalid parameter syntax.

Action: Check the syntax text of the user defined function or language element.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16169: Invalid parameter syntax in the implementation text of user defined function or language element {0}: {1}.

Cause: One of the parameters in the implementation text contains invalid parameter syntax.

Action: Check the implementation text of the user defined function or language element.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic
ODI-16170: Cannot locate calling parameter \{0\} in implementation text from the syntax text of user defined function or language element \{1\}.

**Cause:** The calling parameter in the implementation text does not match any parameters that are defined in the syntax of the user defined function or language element.

**Action:** Check the implementation text of the user defined function or language element.

**Level:** 32
**Type:** SET_AT_RUNTIME
**Impact:** Programmatic

ODI-16171: KM \{0\} is not valid for physical node \{1\}. The default KM is \{2\}.

**Cause:** The KM being set is not valid for the physical node.

**Action:** Set the KM using the default KM or another compatible KM.

**Level:** 32
**Type:** SET_AT_RUNTIME
**Impact:** Programmatic

ODI-16172: An expression in map component \{0\} cannot be resolved because it references an input signature which could not be redirected to an upstream expression. Input connector connections may be incorrect.

**Cause:** An expression references an input signature, but it could not be redirected to an expression upstream of the input signature. Invalid input connector point connections are the most common cause.

**Action:** Check all input connector points for correct upstream connections.

**Level:** 32
**Type:** SET_AT_RUNTIME
**Impact:** Programmatic

ODI-17500: Invalid old password.

**Cause:** Old password did not match current password.

**Action:** Provide the correct password.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

ODI-17501: Temporary table has no column.

**Cause:** No column have been defined for the temporary table.

**Action:** Define a column mapping to the temporary table.

**Level:** 32
**Type:** ERROR
**Impact:** Other

ODI-17502: No next value returned.

**Cause:** No sequence next value was found for given context code.

**Action:** Verify sequence definition or context code.
Error Messages

Level: 32
Type: ERROR
Impact: Other

ODI-17503: Internal error: object ConnectConnection
Cause: Missed connection.
Action: Try reconnect.

Level: 32
Type: ERROR
Impact: Other

ODI-17504: An ordered join references the same table twice (directly or indirectly).
Cause: A same table was referenced twice by a join.
Action: Check interface definition.

Level: 32
Type: ERROR
Impact: Other

ODI-17505: An ordered join references the same table twice through another join.
Cause: A join was referencing the same table twice through another join.
Action: Check interface definition.

Level: 32
Type: ERROR
Impact: Other

ODI-17506: Variable has no value
Cause: Variable had no value.
Action: Provide value for variable.

Level: 32
Type: ERROR
Impact: Other

ODI-17507: Key does not exist
Cause: Key was unknown.
Action: Provide a known key.

Level: 32
Type: ERROR
Impact: Other

ODI-17508: No conversion for data type "[0]" from source technology "[1]" to destination technology "[2]"
Cause: No data type conversion between technology was found.
Action: Define corresponding data type conversion.

Level: 32
Type: ERROR
Impact: Other

ODI-17509: Query to access value for specific sequence {0} has failed. Query="{1}"
Cause: Query for sequence has failed.
Action: Check sequence definition.

Type: ERROR
Impact: Other

ODI-17510: Driver does not exist.
Cause: Driver was not found.
Action: Check repository.

Type: ERROR
Impact: Other

ODI-17511: No value to be set to variable "{0}".
Cause: No value was returned to be set to the variable.
Action: Check variable value.

Type: ERROR
Impact: Other

ODI-17512: Sequence is already locked
Cause: The sequence was already locked.
Action: Unlock the sequence.

Type: ERROR
Impact: Other

ODI-17513: Variable "{0}" does not exist.
Cause: Variable was not found.
Action: Check variable.

Type: ERROR
Impact: Other

ODI-17514: Unrecognized Oracle Data Integrator built-in function: {0}
Cause: Oracle Data Integrator built-in function was not recognized.
Action: Check function syntax.

Type: ERROR
Impact: Other
ODI-17515: Invalid loading command (INSERT,UPDATE...).
  Cause: Loading command was invalid.
  Action: Check loading command.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17516: Internal error within the connection list
  Cause: Internal error within the connection list.
  Action: Try again.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17517: Error during task interpretation. Task: {0} {1} Text: {2}.
  Cause: A task interpretation error has occurred.
  Action: Check tasks and try again.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17518: Error while interpreting the user name.
  Cause: User name interpretation has failed.
  Action: Check user name.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17519: Error while interpreting the URL
  Cause: URL interpretation has failed
  Action: Check URL.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17520: Error while interpreting the password
  Cause: Password interpretation has failed.
  Action: Check password.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17521: Error while interpreting the driver
  Cause: Driver interpretation has failed.
Action: Check driver.
Level: 32
Type: ERROR
Impact: Other

ODI-17522: Empty column name are not allowed
Cause: A empty column name was found.
Action: Fill column name.
Level: 32
Type: ERROR
Impact: Other

ODI-17523: There is no connection for this logical schema / context pair: {0} / {1}.
Cause: No connection was found for this logical schema / context pair.
Action: Check schema and context assignment.
Level: 32
Type: ERROR
Impact: Other

ODI-17524: Cannot set an empty alias for a source table.
Cause: Source table’s alias was empty.
Action: Fill alias of source table.
Level: 32
Type: ERROR
Impact: Other

ODI-17525: Cannot set an empty source set name.
Cause: Source set name was empty.
Action: Fill alias of a source table.
Level: 32
Type: ERROR
Impact: Other

ODI-17526: Cannot set Longc value in a PopCol having a column
Cause: Cannot set Longc value in a PopCol having a column.
Action: Check interface’s columns.
Level: 32
Type: ERROR
Impact: Other

ODI-17527: Cannot set SourceDt value in a PopCol having a column
Cause: Cannot set SourceDt value in a PopCol having a column.
Action: Check interface’s columns.
Level: 32
Type: ERROR
Impact: Other

ODI-17528: Cannot set Scalec value in a PopCol having a column
Cause: Cannot set Scalec value in a PopCol having a column.
Action: Check interface’s columns.

Level: 32
Type: ERROR
Impact: Other

ODI-17529: Reference check failure
Cause: Reference check has failed.
Action: Check control conditions.

Level: 32
Type: ERROR
Impact: Other

ODI-17530: Incomplete join may result in partial cross join
Cause: An incomplete join was found.
Action: Check joins.

Level: 32
Type: ERROR
Impact: Other

ODI-17531: KM already encrypted.
Cause: KM has been already encrypted.
Action: Skip encryption.

Level: 32
Type: ERROR
Impact: Other

ODI-17532: KM not encrypted.
Cause: KM was not encrypted.
Action: Check KM.

Level: 32
Type: ERROR
Impact: Other

ODI-17533: Clause set to cross join on a technology that does not support cross joins.
Cause: Technology did not support cross joins.
Action: Correct joins.

Level: 32
Type: ERROR  
Impact: Other

ODI-17534: Clause set to full join on a technology that does not support full joins.  
Cause: Technology did not support full joins.  
Action: Correct joins.

Level: 32
Type: ERROR  
Impact: Other

ODI-17535: Clause set to outer join on a technology that does not support left outer joins or right outer joins.  
Cause: Technology did not support left outer joins.  
Action: Correct joins.

Level: 32
Type: ERROR  
Impact: Other

ODI-17536: Incomplete clause (Missing order number).  
Cause: Order number was missing.  
Action: Correct clause.

Level: 32
Type: ERROR  
Impact: Other

ODI-17537: Incomplete clause (table1 and/or table2 must be set).  
Cause: Table1 and/or table2 were undefined.  
Action: Set clause’s table1 and/or table2 tables.

Level: 32
Type: ERROR  
Impact: Other

ODI-17538: Filter is not properly set (The table must be defined)  
Cause: The table must have been set.  
Action: Set filter’s table.

Level: 32
Type: ERROR  
Impact: Other

ODI-17539: Clause is ordered on a technology that does not support it  
Cause: Technology did not support ordering.  
Action: Remove ordering.

Level: 32
Type: ERROR
ODI-17540: Connection is not set for this source set {0}.
    Cause: Source set’s connection was not set.
    Action: Set connection.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-17541: Method SnpTrt::getAllTrtOfTypeForTechnosAndProject requires not
null parameters for technologies
    Cause: Method requires not null parameters
    Action: Specify correct parameters.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-17542: Sequence must be locked before using this function
    Cause: Sequence was not locked.
    Action: Lock sequence and try again.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-17543: Technology does not support joins
    Cause: Technology did not support joins.
    Action: Check technology and/or joins.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-17544: This Technology does not support the WHERE clause
    Cause: Technology did not support the WHERE clause
    Action: Check technology and/or clause.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-17545: Technology not set for this source set {0}
    Cause: Source set’s technology was undefined.
    Action: Set technology.
    Level: 32
    Type: ERROR
    Impact: Other
ODI-17546: Specified variable not found in the Repository
   Cause: Variable was not found in the Repository.
   Action: Define variable and try again.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17547: Data type "{0}" for the technology "{1}" does not exist.
   Cause: Data type for the technology did not exist.
   Action: Check data type and/or technology.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17548: The file reverse-engineering is only possible for delimited files.
   Cause: The file reverse-engineering was performed against a not delimited file.
   Action: Use delimited files.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17549: Source data type "{0}" for the technology "{1}" does not exist.
   Cause: Source data type was not found.
   Action: Check data type and/or technology.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17550: Missing default Physical Schema for Data Server "{0}"
   Cause: Default Physical Schema was undefined.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17551: Duplicate clause order numbers
   Cause: Duplicated order numbers were found.
   Action: Check clause definition.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17552: Duplicate join order numbers
   Cause: Duplicated join order numbers were found.
Action: Check join.
Level: 32
Type: ERROR
Impact: Other

ODI-17553: Exceeded the maximum number of errors allowed.
Cause: The maximum number of errors allowed were exceeded.
Action: Check maximum error numbers.
Level: 32
Type: ERROR
Impact: Other

ODI-17554: Agent "[0]" does not exist.
Cause: Agent was not found.
Action: Check agent definition.
Level: 32
Type: ERROR
Impact: Other

ODI-17555: You cannot unlock this object. Only the lock owners and Supervisors can unlock objects.
Cause: An attempt was made to unlock objects that were locked by another user.
Action: Login as Supervisor or as the lock owners and try again.
Level: 32
Type: ERROR
Impact: Other

ODI-17556: Error during decryption of text.
Cause: Text decryption has failed.
Action: Try again.
Level: 32
Type: ERROR
Impact: Other

ODI-17557: No condition defined for this rule.
Cause: No condition have been defined for this rule.
Action: Define conditions.
Level: 32
Type: ERROR
Impact: Other

ODI-17558: The field for this rule is not specified.
Cause: The field was unspecified.
Action: Specify field for this rule.
Level: 32
Type: ERROR
Impact: Other

ODI-17559: The operator for this rule is not specified.
  Cause: The operator was unspecified.
  Action: Specify operator for this rule.

Level: 32
Type: ERROR
Impact: Other

ODI-17560: The value to test is not defined.
  Cause: The value to test was not defined.
  Action: Specify value.

Level: 32
Type: ERROR
Impact: Other

ODI-17561: This operator is not supported.
  Cause: This operator was not supported.
  Action: Correct operator.

Level: 32
Type: ERROR
Impact: Other

ODI-17562: This operator cannot be used with this field.
  Cause: The operator could not be used with the given field.
  Action: Correct operator.

Level: 32
Type: ERROR
Impact: Other

ODI-17563: There is no work repository matching the name "{0}".
  Cause: Work repository was not found.
  Action: Check work repository with the given name exists.

Level: 32
Type: ERROR
Impact: Other

ODI-17564: More than one work repository found with the name "{0}" for this master repository.
  Cause: More than one work repository with the specified name was found for this master repository.
  Action: Contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

ODI-17565: Scenario has been already encrypted. No encryption was performed.
Cause: Scenario has been already encrypted.
Action: Decrypt and try again.

Level: 32
Type: ERROR
Impact: Other

ODI-17566: Scenario is not encrypted. No decryption was performed.
Cause: Scenario was not encrypted.
Action: Check Scenario.

Level: 32
Type: ERROR
Impact: Other

ODI-17567: A Scenario generated from a Variable cannot be encrypted or decrypted.
Cause: An attempt was made to encrypt or decrypt a Scenario generated from a Variable.
Action: Change Scenario’s source component.

Level: 32
Type: ERROR
Impact: Other

ODI-17568: Could not connect to the database referenced by the context and the logical schema
Cause: Connection to the database failed.
Action: Check context and logical schema.

Level: 32
Type: ERROR
Impact: Network

ODI-17569: Unable to update sequence''s next value.
Cause: Updating sequence was not possible.
Action: Check sequence definition.

Level: 32
Type: ERROR
Impact: Other

ODI-17570: Your text is too long. Please shorten it or choose the "LONG TEXT" datatype.
Cause: Text was too long.
Action: Shorten the text or choose the LONG TEXT data type.
Level: 32  
Type: ERROR  
Impact: Other

ODI-17571: Password does not respect the following rule: "{0}".  
Cause: The password did not respect the rule.  
Action: Choose another password.

Level: 32  
Type: ERROR  
Impact: Security

ODI-17572: This SnpFfValue does not exist.  
Cause: Value was not found.  
Action: Check FlexField value.

Level: 32  
Type: ERROR  
Impact: Other

ODI-17573: This SnpFfValuem does not exist.  
Cause: Value was not found.  
Action: Check FlexField value.

Level: 32  
Type: ERROR  
Impact: Other

ODI-17574: This SnpFfValuew does not exist.  
Cause: Value was not found.  
Action: Check FlexField value.

Level: 32  
Type: ERROR  
Impact: Other

ODI-17575: SnpLicense does not exist.  
Cause: SnpLicense was not found.  
Action: Check License.

Level: 32  
Type: ERROR  
Impact: Other

ODI-17576: Unknown actual constraint type for an interface constraint.  
Cause: Interface constraint type was unknown.  
Action: Check constraint type.

Level: 32  
Type: ERROR
Impact: Other

ODI-17577: Unknown variable data type.
  Cause: Variable data type was unknown.
  Action: Check variable data type.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17578: Name "[0]" is already used.
  Cause: Name was already used.
  Action: Use another name or change mode of import.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17579: Type of clause is not set.
  Cause: Type of clause was not set.
  Action: Set type of clause.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17580: Type of join is not set.
  Cause: Type of join was not set.
  Action: Set type of join.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17581: A non ordered clause is passed to the construction of ordered joins trees method.
  Cause: A non ordered clause was passed to the construction of ordered joins trees method.
  Action: Check clauses.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17582: Missing order number for an ordered clause.
  Cause: Clause order was not set.
  Action: Set the clause order.
  Level: 32
  Type: ERROR
Impact: Other

ODI-17583: More than one unique constraint associated to an interface constraint.
  Cause: More than one unique constraint associated to an interface constraint was found.
  Action: Check constraints.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17584: URL does not exist.
  Cause: URL was not found.
  Action: Check URL.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17585: Key cannot be checked.
  Cause: Key could not be checked.
  Action: Check key definition.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17586: Field separator is mandatory for a delimited file.
  Cause: Field separator was missing.
  Action: Check separator and/or file type.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17587: Object name "[0]" is too long for the technology "[1]" (Logical schema : "[2]" ; Context Code : "[3]"
  Cause: Object name was too long.
  Action: Correct object name.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17588: Unable to load work repository info.
  Cause: Work repository was not found.
  Action: Contact Oracle Support Services.
  Level: 32
  Type: ERROR
Impact: Other

ODI-17589: Logical schema has not been specified for sequence "{{0}}"
Cause: Logical schema was not specified.
Action: Specify logical schema.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17590: Code {{0}} for model "{{1}}" is already used by another model.
Cause: An already used code was assigned.
Action: Change code for model.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17591: Name "{{0}}" is already used.
Cause: A name already used was assigned.
Action: Change name.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17592: Object is not in execution work repository.
Cause: Object was not in execution work repository.
Action: Check object and/or repository.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17593: Maximum number or source/target technologies exceeded. Current limit is {{0}}.
Cause: Maximum number or source/target technologies was exceeded.
Action: Check limit and number of technologies.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17594: Cannot encrypt already encrypted action.
Cause: This action has been already encrypted.
Action: Skip encryption.

  Level: 32
  Type: ERROR
  Impact: Other
ODI-17595: This action is not encrypted.
  Cause: This action was not encrypted.
  Action: Check parameters and try again.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17596: Query to retrieve value for native sequence "{0}" has failed Query="{1}"
  Cause: Query has failed.
  Action: Check query.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17597: Cannot mix ordered and non-ordered join syntax within a dataset for technology.
  Cause: Mixed join not allowed within a dataset.
  Action: Change all joins in dataset to same join syntax (either ordered or non-ordered).

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17598: Non-ordered natural join is not supported.
  Cause: Non-ordered natural join is not supported.
  Action: Change natural join to use ordered syntax.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17599: Ordered inner join is not supported.
  Cause: Ordered inner join is disabled for technology.
  Action: Change join type.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17600: Ordered left outer join is not supported.
  Cause: Ordered left outer join is disabled for technology.
  Action: Change join type.

  Level: 32
  Type: ERROR
  Impact: Other
ODI-17601: Ordered right outer join is not supported.
  Cause: Ordered right outer join is disabled for technology.
  Action: Change join type.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17602: Non-ordered full outer join is not supported.
  Cause: Non-ordered full outer join is not supported.
  Action: Change full outer join to use ordered syntax.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17603: Sql error checking a condition. {0}
  Cause: Sql error checking a condition.
  Action: Correct the Sql in the condition.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17604: Reference column isn't associated with this instance of reference.
  Cause: Reference column isn't associated with this instance of reference.
  Action: Check reference column.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17605: Column is not associated to this datastore.
  Cause: Datastore doesn't have this column.
  Action: Check datastore and column.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17606: {0} already belongs to another OdiDataStore.
  Cause: Object belongs to another datastore.
  Action: Check object and datastore.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17607: Parameter pReference is not an outbound reference for this OdiDataStore.
Cause: Parameter is not an outbound reference for OdiDataStore.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17608: Invalid technology for the given data type.
Cause: Invalid technology for the given data type.
Action: Check technology.
Level: 32
Type: ERROR
Impact: Other

ODI-17609: Invalid data type code.
Cause: Invalid data type code.
Action: Check data type code.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17610: Found NULL in STEP_TYPE.
Cause: Step type is null.
Action: Check step type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17611: STEP_TYPE is not valid.
Cause: Step type isn't valid.
Action: Check step type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17612: MultiConnectionSupported is not settable for [0].
Cause: MultiConnectionSupported is not settable.
Action: Check knowledge module.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17613: Cannot handle [0] of type [1].
Cause: Cannot handle object.
Action: Check object's type.
Level: 32
Type: ERROR
Impact: Programmatic
ODI-17614: Unknown key type: {0}.
Cause: Unknown key type.
Action: Check key.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-17615: The command is not an ODI Tool command.
Cause: Wrong command.
Action: Check command.

Level: 32
Type: ERROR
Impact: Other
ODI-17616: No WorkTextOrig was found for ID: {0}.
Cause: Invalid ID.
Action: Check ID.

Level: 32
Type: ERROR
Impact: Other
ODI-17617: Class descriptor for WorkTextOrig [ {0} ] is null.
Cause: Descriptor is null.
Action: Check class descriptors.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-17618: Unable to deal with an AliasedColumnCrossRef with type {0}.
Cause: Incorrect column type.
Action: Check column type.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-17619: Unexpected CrossRef [0] type.
Cause: Incorrect CrossRef type.
Action: Check CrossRef.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17620: Object type is not valid.
   Cause: Object type is not valid.
   Action: Check object type.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-17621: Unable to manage crossRef for object from class \{0\}.
   Cause: Illegal object type.
   Action: Check object type.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-17622: pSqlIndGroup is not a valid group type.
   Cause: Invalid group type.
   Action: Check type.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-17623: Too many parameters for function \{0\}, Object \{1\}, Language \{2\}.
   Cause: Too many parameters.
   Action: Check parameters count.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17624: Missing parameter for function \{0\}, Object \{1\}, Language \{2\}.
   Cause: Missing parameter.
   Action: Check parameters count.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17625: Only OdiColumns are currently supported for SnpsExpressionTag.
   Cause: Wrong column type.
   Action: Check column type.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-17626: Cannot reassign a DataType.
Cause: Technology has been assigned yet.
Action: Check DataType
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17627: Inconsistent connection settings.
Cause: Inconsistent connection settings.
Action: Check connection settings type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17628: Unknown IConnectionSettings implementation.
Cause: Unknown IConnectionSettings implementation.
Action: Check settings type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17629: Connection Settings for repository server must be instanceof JdbcSettings.
Cause: Wrong settings type.
Action: Check settings type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17630: Unknown OptionType.
Cause: Unknown OptionType.
Action: Check option type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17631: The given class has no matching OverridenOptionOrig.
Cause: The given class has no matching OverridenOptionOrig.
Action: Check class.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17632: Unexpected variable type.
Cause: Unexpected variable type.
Action: Check variable type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17633: {0} datatype is expected.
Cause: Wrong value datatype.
Action: Check value datatype.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17634: Parameter must have text; it must not be null or empty.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17635: Parameter must have text; it must not be null, empty, or blank.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17636: Parameter {0} must be false.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17637: Parameter must not be null.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17638: Parameter {0} must be null.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17639: Parameter must be null.
Cause: Wrong parameter value.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17640: Parameter [0] must have text; it must not be null or empty.
Cause: Wrong parameter value.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17641: No [0] matches this IObject: {1}.
Cause: IObject is not matched.
Action: Check class.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17642: No Entity Class matches this Snp Class: {0}.
Cause: No Entity Class matches Snp Class.
Action: Check Entity Class.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17643: No Snp Class matches this Entity Class: {0}.
Cause: No Snp Class matches Entity Class.
Action: Check Snp Class.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17644: Unknown FlexFieldType.
Cause: Unknown FlexFieldType.
Action: Check FlexFieldType type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17645: Parameter must be instance of \{0\}.
  Cause: Wrong parameter type.
  Action: Check parameter.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17646: It is forbidden to use a variable of one project in a package of another project.
  Cause: Variable and package have different parents.
  Action: Check variable and package.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17647: Unable to create the expression element, Object \{0\}, Language \{1\}.
  Cause: Unable to create the expression element.
  Action: Check expression parameters.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17648: A mapping cannot be on the target.
  Cause: A mapping cannot be on the target.
  Action: Check execution location.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17649: Can't create join between 2 source datastore from different DataSet.
  Cause: Source datastores are from different DataSet.
  Action: Correct join.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17650: A \{0\} was expected as value since \{1\} is \{2\}.
  Cause: Wrong type.
  Action: Check type.
  Level: 32
  Type: ERROR
  Impact: Other
ODI-17651: Parameter {0} must be instance of [{1}].
  
  **Cause:** Wrong parameter class.
  **Action:** Check parameter class.
  
  **Level:** 32
  **Type:** ERROR
  **Impact:** Programmatic

ODI-17652: Class {0} is not assignable to {1}.
  
  **Cause:** Inconsistent classes.
  **Action:** Check classes.
  
  **Level:** 32
  **Type:** ERROR
  **Impact:** Programmatic

ODI-17653: {0} line isn't found.
  
  **Cause:** Missed line.
  **Action:** Check line count.
  
  **Level:** 32
  **Type:** ERROR
  **Impact:** Other

ODI-17654: Parameter {0} must be not null.
  
  **Cause:** Parameter must be not null.
  **Action:** Check parameter.
  
  **Level:** 32
  **Type:** ERROR
  **Impact:** Programmatic

ODI-17655: Parameter {0} must be {1} characters long max.
  
  **Cause:** Parameter length is too long.
  **Action:** Check parameter length.
  
  **Level:** 32
  **Type:** ERROR
  **Impact:** Programmatic

ODI-17656: Can't define variable override for steps in exception tree.
  
  **Cause:** Step is in exception tree.
  **Action:** Check step and variable for consistency.
  
  **Level:** 32
  **Type:** ERROR
  **Impact:** Other

ODI-17657: Cannot add a reference column to an OdiReference with type [{0}].
  
  **Cause:** Reference type isn’t ReferenceType.COMPLEX_REFERENCE.
Action: Check reference type.
Level: 32
Type: ERROR
Impact: Other

ODI-17658: Cannot change the target table because it's not a temporary datastore.
Cause: Datastore isn't temporary.
Action: Check target table and datastore.
Level: 32
Type: ERROR
Impact: Other

ODI-17659: Cannot get the journalized columns of a non-journalized datastore.
Cause: Datastore isn't journalized.
Action: Check datastore.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17660: Cannot set a clause on the target.
Cause: Wrong execution location.
Action: Check execution location.
Level: 32
Type: ERROR
Impact: Other

ODI-17661: \{0\} is not supported for this Technology.
Cause: Object is not supported for this Technology.
Action: Check topology.
Level: 32
Type: ERROR
Impact: Other

ODI-17662: Parameter \{0\} must have text; it must not be null, empty, or blank.
Cause: Incorrect parameter.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17663: Parameter \{0\} must be uppercase.
Cause: Parameter is lower case.
Action: Check parameter case.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17664: Parameter {0} must not contain whitespaces.
Cause: Parameter contains whitespaces.
Action: Consider to replace whitespace with another symbol (e.g. underscore)

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17665: Column is not associated with this instance of OdiKey.
Cause: Column is not associated with instance of OdiKey.
Action: Check column and OdiKey.

Level: 32
Type: ERROR
Impact: Other

ODI-17666: Column is not present in the key.
Cause: Column is not present in the key.
Action: Check column and key.

Level: 32
Type: ERROR
Impact: Other

ODI-17667: Data type should be set before accessing value.
Cause: Illegal method usage.
Action: Set Data type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17668: Datastore already has a Primary Key.
Cause: Datastore already has a Primary Key.
Action: Remove the current primary key before adding a new one.

Level: 32
Type: ERROR
Impact: Other

ODI-17669: {0} must be set before calling method {1}.
Cause: Illegal method usage.
Action: Set actual value.

Level: 32
Type: ERROR
**Impact:** Programmatic

**ODI-17670: Default implementation already exists.**
**Cause:** Default implementation already exists.
**Action:** Check function implementation.

Level: 32  
Type: ERROR

**Impact:** Programmatic

**ODI-17671: [0] must not be negative.**
**Cause:** Wrong parameter value.
**Action:** Set value to 0 or greater.

Level: 32  
Type: ERROR

**Impact:** Programmatic

**ODI-17672: FlexFields isn"t initialized.**
**Cause:** FlexFields isn”t initialized.
**Action:** Call initFlexFields method first.

Level: 32  
Type: ERROR

**Impact:** Programmatic

**ODI-17673: Foreign key column"s datastore must be equals to this reference"s foreign datastore.**
**Cause:** Inconsistent datastores.
**Action:** Check datastore.

Level: 32  
Type: ERROR

**Impact:** Other

**ODI-17674: IncrementValue is not set.**
**Cause:** IncrementValue is not set.
**Action:** Set IncrementValue with setVariable method.

Level: 32  
Type: ERROR

**Impact:** Programmatic

**ODI-17675: Invalid step log's status.**
**Cause:** Step status is not RUNNING.
**Action:** Check step status.

Level: 32  
Type: ERROR

**Impact:** Other
ODI-17676: Invalid value type.
   Cause: Invalid value type.
   Action: Check value type.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-17677: Cycle could be defined in [0] hierarchy.
   Cause: It is forbidden to define cycle in [0] hierarchy.
   Action: Check hierarchy.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17678: It is forbidden to fill a key with columns from another datastore.
   Cause: It is forbidden to fill a key with columns from another datastore.
   Action: Check datastore.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17679: It is forbidden to link two steps from different packages.
   Cause: Steps are from different packages.
   Action: Check steps and packages.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17680: Line wasn't found.
   Cause: Line wasn't found.
   Action: Check procedure lines.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17681: Maximum number of sessions must be positive.
   Cause: Wrong value.
   Action: Check maximum number.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17682: Method is not valid unless MultiConnectionSupported.
   Cause: MultiConnectionSupported is true.
Action: Check procedure.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17683: Model must be in Customized mode.
Cause: Wrong model mode.
Action: Call setReverseType(ReverseType.CUSTOMIZED).

Level: 32
Type: ERROR
Impact: Other

ODI-17684: Name can't be set.
Cause: Name is computed.
Action: Check name.

Level: 32
Type: ERROR
Impact: Other

ODI-17685: No \{0\} is defined for this model.
Cause: Missed definition.
Action: Define CKM for model.

Level: 32
Type: ERROR
Impact: Other

ODI-17686: No valid \{0\} name was found from this qualified name.
Cause: Valid name wasn't found.
Action: Check qualified name.

Level: 32
Type: ERROR
Impact: Other

ODI-17687: No valid qualified name was provided.
Cause: Name is invalid.
Action: Check qualified name.

Level: 32
Type: ERROR
Impact: Other

ODI-17688: OdiScenario is undefined.
Cause: OdiScenario is undefined.
Action: Check OdiScenario definition.
Level: 32
Type: ERROR
Impact: Other

ODI-17689: Option must be in the same procedure as line.
  Cause: Option procedure is inconsistent.
  Action: Check option procedure.

Level: 32
Type: ERROR
Impact: Other

ODI-17690: Package and procedure must be owned by the same project.
  Cause: Procedure parent is inconsistent.
  Action: Check procedure parent.

Level: 32
Type: ERROR
Impact: Other

ODI-17691: Primary key column's datastore must be equals to this reference's primary datastore.
  Cause: Column datastore is inconsistent.
  Action: Check datastores.

Level: 32
Type: ERROR
Impact: Other

ODI-17692: Reference column doesn't belong to this reference.
  Cause: Column is inconsistent.
  Action: Check column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17693: Reference's foreign datastore is not equal to this datastore.
  Cause: Datastores are inconsistent.
  Action: Check datastores.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17694: Steps can't be moved from one package to another.
  Cause: Steps can’t be moved from one package to another.
  Action: Consider not to move steps.

Level: 32
Type: ERROR
Impact: Other

ODI-17695: The new position is not valid.
  Cause: The new position is not valid.
  Action: Check new position.

  Level: 32
Type: ERROR
Impact: Other

ODI-17696: The option already exists.
  Cause: The option already exists.
  Action: Check option.

  Level: 32
Type: ERROR
Impact: Other

ODI-17697: The option owner has already been set.
  Cause: The option owner has already been set.
  Action: Check option owner.

  Level: 32
Type: ERROR
Impact: Other

ODI-17698: The reference type must be [ {0} ] in order to define a complex SQL expression.
  Cause: Wrong reference type.
  Action: Check reference type.

  Level: 32
Type: ERROR
Impact: Programmatic

ODI-17699: The reference type must be [ {0} ] in order to obtain the complex SQL expression.
  Cause: Wrong reference type.
  Action: Check reference type.

  Level: 32
Type: ERROR
Impact: Programmatic

ODI-17700: The string value length should not exceed MAX_SHORT_TEXT_LENGTH since FlexFieldType is SHORT_TEXT.
  Cause: FlexFieldType is SHORT_TEXT.
  Action: Check FlexFieldType and string value length.

  Level: 32
Type: ERROR
Impact: Other

**ODI-17701: This OdiLoadPlanInstanceRun is not ESS Job related.**
- **Cause:** OdiLoadPlanInstanceRun is not ESS Job related.
- **Action:** Check OdiLoadPlanInstanceRun.
- **Level:** 32

Type: ERROR
Impact: Other

**ODI-17702: This session is not ESS Job related.**
- **Cause:** Session is not ESS Job related.
- **Action:** Check session.
- **Level:** 32

Type: ERROR
Impact: Other

**ODI-17703: This OdiReference must be from type [{0}] in order to access the primary DataStore alias.**
- **Cause:** Wrong OdiReference type.
- **Action:** Check OdiReference type.
- **Level:** 32

Type: ERROR
Impact: Programmatic

**ODI-17704: This OdiReference must be from type [{0}] in order to set the primary DataStore alias.**
- **Cause:** Wrong OdiReference type.
- **Action:** Check OdiReference type.
- **Level:** 32

Type: ERROR
Impact: Programmatic

**ODI-17705: This file descriptor is not consistent with the parent model's technology.**
- **Cause:** File descriptor is not consistent.
- **Action:** Check file descriptor and parent technology.
- **Level:** 32

Type: ERROR
Impact: Other

**ODI-17706: This setVariable is used for increment.**
- **Cause:** Increment value is set.
- **Action:** Use method getIncrementValue().
- **Level:** 32
Type: ERROR
Impact: Programmatic

ODI-17707: Unable to add an alien main partition.
Cause: Main partition datastore is inconsistent.
Action: Check main partition.
Level: 32

Type: ERROR
Impact: Other

ODI-17708: Unable to compute name.
Cause: Name has been set on this physical schema.
Action: Do not compute name.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17709: Parameter must be false.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17710: Parameter {0} must be true.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17711: Undefined ODI work repository name.
Cause: Undefined repository name.
Action: Check repository name.
Level: 32

Type: ERROR
Impact: Other

ODI-17712: Variable and Step should be defined in the same Load Plan.
Cause: Variable and Step have different parent Load Plans.
Action: Define variable and step in the same Load Plan.
Level: 32

Type: ERROR
Impact: Other
ODI-17713: VariableDataType should be set before accessing DefaultValue.
  Cause: VariableDataType is undefined.
  Action: Set VariableDataType.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17714: You can only set KMs contained in the OdiProject containing of the OdiInterface.
  Cause: KM has different parent project than OdiInterface.
  Action: Check KM.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17715: Can't add a null variable to load plan.
  Cause: Variable is null.
  Action: Check variable value.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17716: DataTypes must be consistent.
  Cause: DataTypes is inconsistent.
  Action: Check DataTypes.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17717: Constraint is not a condition.
  Cause: Inconsistent constraint type.
  Action: Check parameter.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17718: Constraint is not a key.
  Cause: Inconsistent constraint type.
  Action: Check constraint.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17719: Option is not associated to this procedure.
Cause: Option is not associated to this procedure.
Action: Check option and procedure.
Level: 32
Type: ERROR
Impact: Other

ODI-17720: Constraint is not a reference.
Cause: Inconsistent constraint type.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17721: Parameter {0} already belongs to {1}.
Cause: Parameter has parent.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17722: Parameter {0} does not belong to this instance of {1}.
Cause: Parameter has different parent.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17723: Parameter {0} must belong to this {1}.
Cause: Parameter parent is inconsistent.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17724: Parameter {0} can't be moved to an other {1}.
Cause: Parameter can’t be moved.
Action: Do not move parameter.
Level: 32
Type: ERROR
Impact: Other

ODI-17725: Parameter {0} must start with {1} prefix.
Cause: Parameter has wrong prefix.
Action: Check parameter prefix.
Level: 32
Type: ERROR
Impact: Other
ODI-17726: Logical Agent [0] must be mapped to a Physical Agent in the ContextCode [1].
Cause: Agent is null.
Action: Check agents.

Level: 32
Type: ERROR
Impact: Other
ODI-17727: pDataServiceContainer is not a data service.
Cause: pDataServiceContainer is not a data service.
Action: Check pDataServiceContainer.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-17728: Package and interface must be owned by the same project.
Cause: Package and interface have different parents.
Action: Check package and interface.

Level: 32
Type: ERROR
Impact: Other
ODI-17729: Parameter must be true.
Cause: Wrong parameter value.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-17730: Not legal for shortcut.
Cause: Object is shortcut.
Action: Use getShortcutBaseObject() to access the real object.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-17731: Not legal to construct a shortcut from a datastore in a model with a different technology.
Cause: Inconsistent technologies.
Action: Check model and datastore.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17732: Odi object Must be shortcut after materialize.
Cause: Object isn't shortcut.
Action: Check object.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17733: Reference's primary datastore must be not null in order to define a ReferenceColumn.
Cause: Primary DataStore is null.
Action: Check DataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17734: pDataServiceContainer [0] has no technology defined.
Cause: Data Service Container has no technology defined.
Action: Define technology.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17735: Reference's foreign datastore is not equals to this datastore.
Cause: Reference's foreign datastore is not equals to this datastore.
Action: Check DataStores.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17736: You can only set global KMs or KMs contained in the OdiProject containing the OdiInterface.
Cause: Wrong KM.
Action: Check KM and project.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17737: StepLog and Variable don't belong to the same session.
Cause: Inconsistent session.
Action: Check Session value for StepLog and Variable.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17738: Unable to find '{0}' as variable used by the scenario '{1}' in version '{2}'.
Cause: Variable is null.
Action: Check variable name.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17739: Unable to override '{0}' variable for execution. It is marked as read-only for scenario '{1}' in version '{2}'.
Cause: Variable is read-only.
Action: Check variable.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17740: Error while connecting to the Application Server at URL {0}.
Cause: Exception was thrown during connection.
Action: Ensure that the Application Server is running and accepting requests.

Level: 32
Type: ERROR
Impact: Network

ODI-17741: Datastore isn't used as a lookup source.
Cause: Datastore isn't used as a lookup source.
Action: Check Datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17742: Parameter {0} must be greater or equal than {1} and less or equal than {2}.
Cause: Wrong parameter value
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17743: Variable should be related to the same {0}.
Cause: Wrong parent for variable.
Action: Check variable.
ODI-17744: The status can only be switched from ERROR to DONE or from DONE to ERROR.
Cause: Wrong status
Action: Check status.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17745: Parameter {0} must be greater or equal than {1}.
Cause: Wrong parameter value.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17746: Parameter {0} must be greater than {1}.
Cause: Wrong parameter value.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17747: Array {0} must not be empty.
Cause: Array length is 0.
Action: Check array.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17748: Parameter {0} is not relevant to this schedule.
Cause: Wrong parameter.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17749: Invalid value was specified. Cannot create {0} with the value {1}.
Cause: Invalid value was specified.
Action: Check value.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17750: Parent folder already has the release tag set.
Cause: Setting the release tag when the parent already has the release tag set.
Action: Set the release tag in parent.
Level: 32
Type: ERROR

Impact: Programmatic

ODI-17751: Shortcut and the base object are under same folder.
Cause: Cannot create shortcut {0} with the base object under same folder {1}.
Action: Create shortcut in different folder.
Level: 32
Type: ERROR

Impact: Programmatic

ODI-17752: Shortcut and the base object are in different projects.
Cause: Cannot create shortcut {0} in project {1} which is different from the project of the base object.
Action: Create shortcut in same project as the base object.
Level: 32
Type: ERROR

Impact: Programmatic

ODI-17753: Shortcut with same reference object in same folder.
Cause: There is other shortcut object with same reference object as {0} in the same folder.
Action: Create shortcut in different folder.
Level: 32
Type: ERROR

Impact: Programmatic

ODI-17754: Shortcut and the base object are under same model.
Cause: Cannot create shortcut {0} with the base object under same model {1}.
Action: Create shortcut in different model.
Level: 32
Type: ERROR

Impact: Programmatic

ODI-17755: Shortcut with same reference object in same model.
Cause: There is other shortcut object with same reference object as {0} in the same model.
Action: Create shortcut in different model.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17756: Scenario "[0]", which is referenced by RunScenario step "[1]", has variable "[2]" but LoadPlan does not have variable with the same name.
Cause: Missed variable in Load Plan
Action: Check Load Plan’s variables.
Level: 32
Type: WARNING

Impact: Programmatic

ODI-17757: Scenario "[0]", which is referenced by RunScenario step "[1]", has a newer version "[2]" in the repository
Cause: Scenario has newer version.
Action: Consider to use latest version.
Level: 32
Type: NOTIFICATION

Impact: Programmatic

ODI-17758: LoadPlan Variable "[0]" SQL is different than the design repository Variable "[1]" SQL.
Cause: Variable’s SQL was redefined.
Action: Check LoadPlan’s variable.
Level: 32
Type: NOTIFICATION

Impact: Programmatic

ODI-17759: LoadPlan Variable "[0]" LogicalSchema "[1]" is different than the design repository Variable "[2]" LogicalSchema "[3]".
Cause: Variable’s Logical Schema was redefined.
Action: Check LoadPlan’s variable.
Level: 32
Type: NOTIFICATION

Impact: Programmatic

ODI-17760: Exception "[0]" is not used in the Load Plan.
Cause: Exception is not used.
Action: Consider to delete or disable unused exception.
Level: 32
Type: NOTIFICATION

Impact: Programmatic

ODI-17761: LoadPlan Variable "[0]" is refreshed at step "[1]", but it has no SQL.
Cause: LoadPlan Variable doesn’t have refresh SQL.
Action: Check variable’s SQL or disable variable refreshing.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17762: Context is specified on a step "{0}", but it's no longer present in the topology.
Cause: Context was removed.
Action: Check step's context.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17763: Logical Agent is specified on a step "{0}", but it is no longer present in the topology
Cause: Logical Agent was removed.
Action: Check step's Logical Agent.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17764: Context "{0}" and Logical agent "{1}" on a step "{2}" does not map to any physical agent.
Cause: Physical Agent doesn’t exist.
Action: Check agents” mapping.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17765: Scenario variable "{0}" type and LoadPlan variable "{1}" type mismatch.
Cause: Variables have different datatype.
Action: Check variables.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17766: Scenario "{0}" wasn't found.
Cause: Scenario doesn’t exist
Action: Check scenario and Load Plan step.

Level: 32
Type: WARNING
Impact: Programmatic

ODI-17767: LoadPlan has variable "{0}", but repository doesn't have variable with the same name.
Cause: Variable was deleted.
Action: Check variables.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17768: LoadPlan Variable "(0)" has SQL, which could not be validated.
Cause: OdiVariableTextGeneratorException during validation.
Action: Check variable and variable text generator.

Level: 32
Type: WARNING
Impact: Programmatic

ODI-17769: OdiRef: Internal ID (0) of IObjects (1) should not be used when the repository is 12c mode.
Cause: Internal ID is used in 12c mode.
Action: Use Global Id instead of internal id.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17770: Profile (0) is not assigned to role (1).
Cause: Profile is not assigned to role.
Action: Check role's profiles.

Level: 32
Type: ERROR
Impact: Security

ODI-17771: Enterprise principal with unique ID/name (0) is not mapped to role (1).
Cause: Enterprise principal is not mapped to role.
Action: Check role's mapped enterprise principals.

Level: 32
Type: ERROR
Impact: Security

ODI-17772: Parameter (0) should be (1) or (2).
Cause: Wrong parameter value.
Action: Check parameter value.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17773: Enterprise User or Role (0) does not exist.
Cause: Enterprise principal with such name could be found at LDAP server.
Action: Check principal name and LDAP server.

Level: 32
Type: ERROR
Impact: Security

ODI-17774: **Maximum number of concurrent threads must be positive.**
  Cause: Wrong value.
  Action: Check maximum number provided.
  Level: 32

Type: ERROR
Impact: Other

ODI-17775: **Maximum number of threads per session can not be negative.**
  Cause: Wrong value.
  Action: Check maximum number provided.
  Level: 32

Type: ERROR
Impact: Other

ODI-17776: **Maximum number of concurrent threads must not be less than maximum session count.**
  Cause: Wrong value.
  Action: Check maximum numbers provided.
  Level: 32

Type: ERROR
Impact: Other

ODI-17777: **Maximum number of threads per session must be not greater than maximum number of threads.**
  Cause: Wrong value.
  Action: Check maximum numbers provided.
  Level: 32

Type: ERROR
Impact: Other

ODI-17778: **Maximum number of cache entries in Session Blueprint queue cannot be negative.**
  Cause: Wrong value.
  Action: Check value.
  Level: 32

Type: ERROR
Impact: Other

ODI-17779: **Maximum idle time for Session Blueprint in cache cannot be negative.**
  Cause: Wrong value.
  Action: Check value.
  Level: 32
Type: ERROR
Impact: Other

ODI-17780: Package and mapping must be owned by the same project.
Cause: Package and mapping have different parents.
Action: Check package and mapping.
Level: 32

Type: ERROR
Impact: Other

ODI-17781: Physical Mapping Design must be owned by the mapping.
Cause: Physical Mapping Design is not owned by mapping.
Action: Check mapping and physical design.
Level: 32

Type: ERROR
Impact: Other

ODI-17782: OdiRef: Internal ID is retrieved in method [0],[1] for 12c repository.
Cause: Internal ID is retrieved in 12c mode.
Action: Retrieve Global Id instead of internal id.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17783: Mapping metadata version mismatch. Expected [0], but was [1].
Cause: Mapping metadata version mismatch.
Action: Check the expected and actual Mapping metadata version.
Level: 32

Type: ERROR
Impact: Other

ODI-17784: Reusable Mapping metadata version mismatch. Expected [0], but was [1].
Cause: Reusable Mapping metadata version mismatch.
Action: Check the expected and actual Reusable Mapping metadata version.
Level: 32

Type: ERROR
Impact: Other

ODI-17785: Option positions in knowledge module must be unique.
Cause: Option position undefined or multiple option in knowledge module has same position.
Action: Modify the position of options to be unique and not null.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17786: JKM is not Oracle Golden Gate JKM.
Cause: Model doesn't have JKM set or JKM is not Oracle Golden Gate JKM.
Action: Set Oracle Golden Gate JKM for the model.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17787: Extract and initial extract processes cannot be the same.
Cause: Extract and initial extract processes are the same.
Action: Choose another extract or initial extract process.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17788: Replicat and initial replicat processes cannot be the same.
Cause: Replicat and initial replicat processes are the same.
Action: Choose another replicat or initial replicat process.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17789: Positions must be set positive.
Cause: Position is not a positive integer.
Action: Set the position to be a positive integer.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17790: {0} should be {1}
Cause: Type is not correct
Action: Set the correct type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-20001: ODI-20001: Cannot check the key because the Datastore does not exist in the database.
Cause: The Datastore referenced by this key did not exist in the database.
Action: Ensure the Datastore refers to an existing database table.

Level: 32
Type: ERROR
Impact: Other

ODI-20002: The selected file is not a valid key file.
Cause: An invalid encryption key file was selected.
Action: Select a valid encryption key file.

Level: 32
Type: ERROR
Impact: Other

ODI-20003: Cannot edit the condition
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20004: Cannot edit the reference
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20005: Cannot edit the variable
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20006: Cannot display table's data. Data is probably already displayed.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20007: Cannot display table's data.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other
ODI-20008: ODI-20008: You cannot Display this Attribute Data. Data is probably already displayed
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20009: ODI-20009: Cannot display data. The datastore resource name is {0} characters long which is longer than allowed by the technology ({1}). Please review the technology settings in Topology.
Cause: The datastore resource name exceeded the limit allowed by its technology.
Action: Ensure the maximum table name length setting in the corresponding technology is correct. Consider changing the datastore resource name to comply.
Level: 32
Type: ERROR
Impact: Other

ODI-20010: ODI-20010: Cannot display this Attribute Data
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20011: ODI-20011: Cannot perform this action: a Column of this Datastore is currently being edited
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20012: ODI-20012: Cannot perform this action: the Datastore containing this Column is currently being modified
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20013: ODI-20013: Unable to perform the action because the package is currently being modified
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20014: ODI-20014: Cannot encrypt the Procedure: it is currently being modified
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20015: ODI-20015: Cannot initialize the Flexfields values
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20016: ODI-20016: Unable to add project user functions
Cause: An unsupported action was attempted.
Action: No action required as Project user functions are not a valid selection to be added to a solution.

Level: 32
Type: ERROR
Impact: Other

ODI-20017: ODI-20017: Unable to add project sequences
Cause: An unsupported action was attempted.
Action: No action required as Project sequences are not a valid selection to be added to a solution.

Level: 32
Type: ERROR
Impact: Other

ODI-20018: ODI-20018: Unable to add project variables
Cause: An unsupported action was attempted.
Action: No action required as Project variables are not a valid selection to be added to a solution.

Level: 32
Type: ERROR
Impact: Other

ODI-20019: ODI-20019: Unable to get GBO object
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20020: ODI-20020: Cannot change CKM
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20021: ODI-20021: Cannot change the order of this Command because you do not have 'Edit' privileges on this Object
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20022: ODI-20022: Could not change the KM
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20023: ODI-20023: Cannot Duplicate a Command
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20024: ODI-20024: Cannot create the cross reference for the condition
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20025: ODI-20025: Cannot create the cross references for the reference
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20026: Cannot view this Datastore: one of its Columns is currently being edited
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20027: Cannot view this Column: its Datastore is currently being edited
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20028: Cannot start execution.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20029: Cannot move a line
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20030: Cannot start the generation. The file is probably already open.
Cause: Attempt to open report file for output failed.
Action: Ensure the specified file is not currently open and the file permissions allow for write access before retrying the operation. Consider choosing a different file for output.

Level: 32
Type: ERROR
Impact: Other

ODI-20031: Cannot Delete a Command being Edited.

Level: 32
Type: ERROR
Impact: Other

ODI-20035: ODI-20035: Could not find a description for the KM
   Cause:
   Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20036: ODI-20036: Impossible to find the technology name, please check your privileges.
   Cause: The ODI security permissions were insufficient to allow access to the specified technology.
   Action: Ensure the ODI user security permissions are correct.

Level: 32
Type: ERROR
Impact: Other

ODI-20037: ODI-20037: Cannot find data transferred by the Drag'n'Drop
   Cause:
   Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20038: Could not connect
Cause: A connection was not established to the selected Logical Schema.
Action: Ensure the connection data for the Physical Schema of the selected Logical Schema is valid.

Level: 32
Type: ERROR
Impact: Other

ODI-20039: Incorrect context
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20040: Problem encountered when determining the context
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20041: No candidate datastore was found.
Cause: There were no datastores in the current model usable as candidates for generating OUT mappings.
Action: Consider creating an mapping to load data into a datastore of the current model.

Level: 32
Type: ERROR
Impact: Other

ODI-20042: Property key is empty
Cause: The Property key for one of the specified Data Server's properties was not specified.
Action: Ensure a non-empty key value is supplied or remove the property with this key.

Level: 32
Type: ERROR
Impact: Other

ODI-20043: Invalid property key entered. Property key maximum length is 250 characters
Cause: The Property key for one of the specified Data Server's properties had a length greater than 250 characters.
Action: Ensure a key value with the valid length is supplied or remove the property with this key.

Level: 32
Type: ERROR
Impact: Other

ODI-20044: ODI-20044: Invalid property value entered. Property value maximum length is 250 characters
Cause: The Property value for one of this Data Server's properties had a length greater than 250 characters.
Action: Ensure a value with the valid length is supplied or remove the property with this value.

Level: 32
Type: ERROR
Impact: Other

ODI-20046: ODI-20046: Unable to change an open object
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20047: ODI-20047: Unable to change Value
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20048: ODI-20048: Invalid Value entered. Value maximum length is 250 characters
Cause: The Value for one of this object's Flexfields had a length greater than 250 characters.
Action: Ensure the value supplied has a valid length.

Level: 32
Type: ERROR
Impact: Other

ODI-20049: ODI-20049: You cannot copy a folder into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Folders cannot be copied into hierarchy of another projects.
Level: 32

Type: ERROR
Impact: Other

ODI-20052: You cannot copy an interface into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20053: You cannot copy a procedure into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20054: You cannot move a folder into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Folders cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20055: You cannot move a knowledge module into another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20056: ODI-20056: You cannot move a package into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Packages cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20057: ODI-20057: You cannot move an interface into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20058: ODI-20058: You cannot move a procedure into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20059: ODI-20059: You cannot copy a knowledge module into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be copied into packages from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20060: ODI-20060: You cannot copy an interface into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be copied into packages from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20061: ODI-20061: You cannot copy a procedure into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be copied into packages from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20062: ODI-20062: You cannot move a knowledge module into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be moved into packages from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20063: ODI-20063: You cannot move an interface into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be moved into packages from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20064: ODI-20064: You cannot move a step into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Package steps cannot be moved into packages from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20065: ODI-20065: You cannot move a procedure into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be moved into packages from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20066: ODI-20066: You cannot copy a folder into another project.
Cause: An unsupported operation was attempted.
Action: Folders cannot be copied into hierarchy of another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20067: You cannot copy a procedure into another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20068: You cannot copy a variable into another project.
Cause: An unsupported operation was attempted.
Action: Variables cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20069: You cannot move a folder into another project.
Cause: An unsupported operation was attempted.
Action: Folders cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20070: You cannot move a sequence into another project. Copy the sequence instead.
Cause: An unsupported operation was attempted.
Action: Sequences cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20071: You cannot move a procedure into another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20072: You cannot move a variable into another project.
Cause: An unsupported operation was attempted.
Action: Variables cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20073: ODI-20073: You cannot copy a schedule into a scenario belonging to another project.
Cause: An unsupported operation was attempted.
Action: Schedules cannot be copied into hierarchy of another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20074: ODI-20074: You cannot move a schedule into a scenario belonging to another project.
Cause: An unsupported operation was attempted.
Action: Schedules cannot be moved into hierarchy of another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20075: ODI-20075: You cannot move a folder into one of its subfolders.
Cause: An unsupported operation was attempted.
Action: Folders cannot be moved into their subfolders.
Level: 32
Type: ERROR
Impact: Other

ODI-20076: ODI-20076: You cannot copy a knowledge module into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be copied into package steps from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20077: ODI-20077: You cannot copy an interface into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be copied into package steps from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20078: ODI-20078: You cannot copy a procedure into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be copied into package steps from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20079: ODI-20079: You cannot move a knowledge module into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be moved into package steps from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20080: ODI-20080: You cannot move an interface into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be moved into package steps from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20081: ODI-20081: You cannot move a step into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Steps cannot be moved into package steps from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20082: ODI-20082: You cannot move a procedure into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be moved into package steps from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20083: ODI-20083: Unable to perform the operation. [0] is being edited.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other
ODI-20084: Only variables from the same project can be placed in a package.
    Cause: An unsupported operation was attempted.
    Action: Variables from another projects cannot be placed in packages.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-20085: Only mappings from the same project can be placed in a package.
    Cause: An unsupported operation was attempted.
    Action: Mappings from another project cannot be placed in packages.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-20086: Only procedures from the same project can be placed in a package.
    Cause: An unsupported operation was attempted.
    Action: Procedures from another projects cannot be placed in packages.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-20087: Error while duplicating
    Cause:
    Action:
    Level: 32
    Type: ERROR
    Impact: Other

ODI-20088: Error while generating the scenario
    Cause:
    Action:
    Level: 32
    Type: ERROR
    Impact: Other

ODI-20089: Error during parameter initialization
    Cause:
    Action:
    Level: 32
    Type: ERROR
    Impact: Other
ODI-20090: ODI-20090: Error while duplicating
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20091: ODI-20091: An unexpected error occurred.
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20092: ODI-20092: An error occurred while replacing the version.
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20093: ODI-20093: Scenario generation is not allowed for non-saved object
  Cause: Scenario generation could not be performed because the source object was not saved.
  Action: Ensure the source object is saved before attempting scenario generation for it.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20094: ODI-20094: Specify the object name to generate Scenario
  Cause: Scenario generation could not be performed because the source object's name was not specified.
  Action: Ensure the source object's name is specified before attempting scenario generation for it.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20095: ODI-20095: Marker Group save was cancelled
  Cause: Marker group save was cancelled by a user.
  Action: No action required.
  Level: 32
  Type: ERROR
Impact: Other

ODI-20096: ODI-20096: Unable to edit the action line.
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20097: ODI-20097: The line Name is mandatory
Cause: A value for the Action Line Name field was not specified.
Action: Enter a non-empty value for the Action Line Name field.
Level: 32
Type: ERROR
Impact: Other

ODI-20098: ODI-20098: Some Datatype Conversions between current and new Technologies are absent
Cause: Changing the selected Model's Technology failed because the Physical Architecture did not provide datatype conversion rules for datatypes used by attributes of datastores belonging to the selected model.
Action: Ensure datatype conversion rules exist for all datatypes used by attributes of datastores belonging to the selected model or do not use datatypes that cannot be converted.
Level: 32
Type: ERROR
Impact: Other

ODI-20099: ODI-20099: Unable to create execution window
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-20100: ODI-20100: Unable to access a join or a filter
Cause: Access to a join or filter failed due to insufficient ODI security permissions.
Action: Ensure the ODI user security permissions are correct for the join or filter object.
Level: 32
Type: ERROR
Impact: Other

ODI-20101: ODI-20101: Unable to find mapping alias
Cause: Access to the target mapping failed due to insufficient ODI security permissions.
Action: Ensure the ODI user security permissions are correct for the target mapping.
Level: 32
Type: ERROR
Impact: Other

ODI-20102: ODI-20102: Unable to find source table alias
Cause: Access to the source table failed due to insufficient ODI security permissions.
Action: Ensure the ODI user security permissions are correct for the source table.
Level: 32
Type: ERROR
Impact: Other

ODI-20103: ODI-20103: Unable to access a target column
Cause: Access to the target column failed due to insufficient ODI security permissions.
Action: Ensure the ODI user security permissions are correct for the target column.
Level: 32
Type: ERROR
Impact: Other

ODI-20105: ODI-20105: "Schema", "Table", "Column" and "Filter" are mandatory fields.
Cause: Values for the mandatory "Schema", "Table", "Column" and "Filter" fields were not supplied.
Action: Ensure values are supplied for these mandatory fields.
Level: 32
Type: ERROR
Impact: Other

ODI-20106: ODI-20106: Schema and Native sequence name are mandatory fields
Cause: Values for the mandatory Schema and Native sequence name fields were not supplied.
Action: Ensure values are supplied for these mandatory fields.
Level: 32
Type: ERROR
Impact: Other

ODI-20107: ODI-20107: A project sequence with the name "{0}" already exists in the project "{1}"
Cause: Saving the project sequence failed because the Sequence name was not unique within the Project.
Action: Ensure the sequence name entered is unique.

Level: 32
Type: ERROR
Impact: Other

ODI-20108: ODI-20108: A global sequence with the name "{0}" already exists
Cause: Saving the Global sequence failed because the Global Sequence name was not unique.
Action: Ensure the sequence name entered is unique.

Level: 32
Type: ERROR
Impact: Other

ODI-20109: ODI-20109: Error while restoring the version
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20110: ODI-20110: No version of this element exist.
Cause: The selected version of this object was not found in version repository.
Action: Create or restore the selected version of the object.

Level: 32
Type: ERROR
Impact: Other

ODI-20111: ODI-20111: Sub-model code cannot be empty.
Cause: A value of the mandatory Sub-model code field was not supplied.
Action: Enter a non-empty value for the Sub-model code field.

Level: 32
Type: ERROR
Impact: Other

ODI-20112: ODI-20112: The path defined in the logical schema is incorrect.
Cause: Incorrect path was specified in physical schema which is linked to the logical schema of this datastore in the current context.
Action: Ensure the path specified in physical schema is correct.

Level: 32
Type: ERROR
Impact: Other

ODI-20113: ODI-20113: The GUID that was supplied does not match the GUID for this user in the external identity store. Please retrieve the correct GUID before saving.
Cause: The supplied GUID did not match GUID from external identity store.
Action: Provide a valid GUID.

Level: 32
Type: ERROR
Impact: Other

ODI-20114: ODI-20114: Error while subscribing
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20115: ODI-20115: Error while stopping journalizing
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20116: ODI-20116: Aliases are specified and are not unique.
Cause: Duplicate Alises were detected.
Action: Change the name of the join key alias.

Level: 32
Type: ERROR
Impact: Other

ODI-20117: ODI-20117: Error while executing command line.
Cause: An unexpected error occurred while trying to open the Report.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20118: ODI-20118: Error while building the menu.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

Cause: An unexpected error occurred during the report generation.
Action: Review the error details for further information.
ODI-20120: ODI-20120: Error while journalizing
Cause:
Action:

ODI-20121: ODI-20121: Error while saving the diagram
Cause: An unexpected error occurred during the saving the diagram.
Action: Review the error details for further information.

ODI-20122: ODI-20122: Error while unsubscribing
Cause: An unexpected error occurred during the unsubscribing action.
Action: Review the error details for further information.

ODI-20123: ODI-20123: Error while executing query
Cause: An unexpected error occurred during the unsubscribing action.
Action: Review the error details for further information.

ODI-20124: ODI-20124: Operation cancelled by user.
Cause: Operation cancelled by user
Action: Review the other messages for further actions.

ODI-20126: ODI-20126: TreeTableColumn cannot be added
Cause: TreeTableColumn with this order number already exists
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other
ODI-20127: This TreeTableColumn cannot be removed.
    Cause: TreeTableColumn does not exist.
    Action: Contact Oracle Support Services.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-20128: Could not rollback.
    Cause: An error occurred during rollback operation.
    Action: Review other messages for further information.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-20129: Exception occurred.
    Cause:
    Action:
    Level: 32
    Type: ERROR
    Impact: Other

ODI-20130: You must select a folder.
    Cause: A folder was not selected.
    Action: Select a folder before attempting this action.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-20131: Cannot retrieve the table list
    Cause: An error occurred while trying to retrieve a list of tables.
    Action: Review the message log for more information. If problem persists contact Oracle Support Services.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-20132: An interface cannot be moved to another project
    Cause: An unsupported drag and drop operation was attempted.
    Action: No action required.
    Level: 32
    Type: ERROR
    Impact: Other
ODI-20133: A procedure cannot be moved to another project
  Cause: An unsupported drag and drop operation was attempted.
  Action: No action required.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20134: A variable cannot be moved to another project
  Cause: An unsupported drag and drop operation was attempted.
  Action: No action required
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20135: A step cannot be moved to another package
  Cause: An unsupported drag and drop operation was attempted.
  Action: No action required
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20138: An error occurred during: dragGesture
  Cause: An unexpected error occurred while dragging an object.
  Action: Review the message log for more information. If problem persists contact Oracle Support Services.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20139: An error occurred during: dragEnter
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20140: An error occurred during: Drop
  Cause: An unexpected error occurred while dropping an object.
  Action: Review the message log for more information. If problem persists contact Oracle Support Services.
  Level: 32
  Type: ERROR
  Impact: Other
ODI-20141: ODI-20141: Login Creation Error
   Cause: An unexpected error occurred while creating a new Login.
   Action: Review the error details for further information.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20142: ODI-20142: Popup Menu Creation Error
   Cause: An unexpected error occurred while creating a popup menu.
   Action: Review the error details for further information.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20144: ODI-20144: Error while Deleting
   Cause: An unexpected error occurred while deleting a tree object.
   Action: Review the error details for further information.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20145: ODI-20145: Error while Opening splitframe.
   Cause:
   Action:
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20146: ODI-20146: Error occurred during duplication
   Cause: An unexpected error occurred while duplicating an object.
   Action: Review the error details and message log for more information.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20148: ODI-20148: An error occurred during: drag over the object
   Cause: An unexpected error occurred while dragging an object over another object.
   Action: Review the error details and message log for more information.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20149: ODI-20149: Logical schema can't be undefined
Cause: A Logical schema was not defined.
Action: Define a Logical schema.

Level: 32
Type: ERROR
Impact: Other

ODI-20150: ODI-20150: KM or Procedure already encrypted. No encryption was performed.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20151: ODI-20151: File is not found. Invalid file location
Cause: The specified file could not be located in the file system.
Action: Ensure file location specified is valid and accessible.

Level: 32
Type: ERROR
Impact: Other

ODI-20152: ODI-20152: Object cannot be deleted
Cause: The specified object could not be deleted.
Action: Ensure the specified object exists and the security permissions permit deletion.

Level: 32
Type: ERROR
Impact: Other

ODI-20153: ODI-20153: The following field is missing: Syntax
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20155: ODI-20155: Changing the Logical Schema may require a re-generation of your Mappings. It may be better to modify the Topology information instead.
Cause:
Action:

Level: 32
Type: WARNING
Impact: Other
   Cause: An error occurred during the datastore distribution process.
   Action: Review the message details and message log for more information. If problem persists contact Oracle Support Services.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20159: ODI-20159: The Attribute {0} is used as a Reference
   Cause: An attempt was made to delete an attribute referenced by another object.
   Action: Delete the object which references this attribute then retry deleting this attribute.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20160: ODI-20160: The table {0} does not exist.
   Cause: An error occurred while executing the SQL request
   Action: Review the message details for more information. If problem persists contact Oracle Support Services.
   Level: 32
   Type: ERROR
   Impact: Other

   Cause: An error occurred during the standard reverse-engineering process.
   Action: Ensure the technology or driver supports standard reverse-engineering. Otherwise choose Customized Reverse and select an appropriate RKM for the technology.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20162: ODI-20162: The context is not valid.
   Cause: A Context was not specified.
   Action: Specify a Context.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20163: ODI-20163: Unable to add object
   Cause: An error occurred while dragging and dropping an object.
   Action: Review the message details and message log for more information.
   Level: 32
Type: ERROR
Impact: Other

ODI-20164: ODI-20164: The line Name is mandatory
   Cause: A name was not specified.
   Action: Specify a Line name.
   Level: 32

Type: ERROR
Impact: Other

ODI-20165: ODI-20165: The project name {0} is a reserved word.
   Cause: A reserved word was used as the name of a project.
   Action: Enter a different project name.
   Level: 32

Type: ERROR
Impact: Other

ODI-20166: ODI-20166: The project code {0} is a reserved word.
   Cause: A reserved word was used as the project code.
   Action: Enter a different project code.
   Level: 32

Type: ERROR
Impact: Other

ODI-20167: ODI-20167: Logical schema is not set for the current context
   Cause: A Logical schema was not set for the current context.
   Action: Ensure the Logical Schema is not set to "Undefined" in the Context editor.
   Level: 32

Type: ERROR
Impact: Other

ODI-20168: ODI-20168: Logical schema is not set for the current context
   Cause: A Logical schema was not set for the current context.
   Action: Ensure the Logical Schema is not set to "Undefined" in the Context editor.
   Level: 32

Type: ERROR
Impact: Other

ODI-20169: ODI-20169: The field {0} is mandatory.
   Cause: A mandatory field was not specified.
   Action: Enter a value for this field.
   Level: 32

Type: ERROR
Impact: Other
ODI-20170: You are trying to insert this versioned object but the version was deleted. Please re-create a version for this object.

Cause: The requested version of the object did not exist in the repository.

Action: Recreate the required version of this object.

Level: 32
Type: ERROR
Impact: Other

ODI-20171: The solution already contains a child of [0]. To add [1] to the solution, you should delete [2] [3]. It is advised to use the button "synchronize" later to check the solution's coherence.

Cause: The solution already contained the specified object as a child.

Action: Delete the child object from the solution before retrying the addition. Consider using the synchronize option to verify the solution's coherence.

Level: 32
Type: ERROR
Impact: Other

ODI-20172: The solution already contains a parent of [0]. To add [1] to the solution, you should delete [2] [3]. It is advised to use the button "synchronize" later to check the solution's coherence.

Cause: The solution has already contained the specified object as a parent of [0].

Action: Delete the parent object from the solution before retrying the addition. Consider using the synchronize option to verify the solution's coherence.

Level: 32
Type: ERROR
Impact: Other

ODI-20173: An error occurred while generating the procedure

Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20174: Folder [0] already contains an mapping named [1]

Cause: An mapping of the same name already existed in the specified folder.

Action: Specify another name for the mapping.

Level: 32
Type: ERROR
Impact: Other

ODI-20175: You cannot give an empty name to an mapping

Cause: The Mapping's name was not specified.

Action: Enter a non-empty value for the mapping's name.
Level: 32
Type: ERROR
Impact: Other

ODI-20176: You cannot create multiple mappings with the same name
Cause: An mapping of the same name already existed.
Action: Specify a different name for the mapping.

Level: 32
Type: ERROR
Impact: Other

ODI-20177: You must select a generation folder
Cause: The Generation folder was not selected.
Action: Select a generation folder.

Level: 32
Type: ERROR
Impact: Other

ODI-20180: You cannot choose an expiration date in the past.
Cause: Entered expiration date was in the past.
Action: Enter valid expiration date.

Level: 32
Type: ERROR
Impact: Other

ODI-20181: You cannot set an expiration date if there is no password.
Cause: No password was entered.
Action: Enter a password before setting an expiration date.

Level: 32
Type: ERROR
Impact: Other

ODI-20182: Error while opening window
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20183: Error while refreshing Solution
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-20184: ODI-20184: The request to retrieve the sequence list has not been defined on the technology.

Cause:

**Action:**

Level: 32  
Type: ERROR  
Impact: Other

ODI-20342: Cannot open the Expression Editor

**Cause:** An unexpected error has occurred.

**Action:** Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-20343: ODI-20343: There are errors in your diagram
Cause: The diagram may contain objects that are not connected, or objects that are not completely defined.
Action: Check the diagram and ensure that all objects are connected and fully defined.
Level: 32

Type: ERROR
Impact: Other

ODI-20344: ODI-20344: Cannot launch the editor for this expression
Cause: An error occurred while retrieving the language for the expression. This may be due to an unexpected exception, or the language may not be available for the schema’s technology.
Action: Review the message log for additional errors. Ensure that the schema has a valid technology for which the language is set.
Level: 32

Type: ERROR
Impact: Other

ODI-20345: ODI-20345: Cannot change the clause position
Cause: An unexpected internal exception has occurred.
Action: Contact Oracle Support Services.
Level: 32

Type: ERROR
Impact: Other

ODI-20346: ODI-20346: Cannot get the boolean value of an option
Cause: The boolean value of the option could not be retrieved due to a security error.
Action: Review the message log and contact Oracle Support Services for further assistance.
Level: 32

Type: ERROR
Impact: Other

ODI-20347: ODI-20347: Error during data transfer for drag and drop
Cause: An internal error occurred while dropping the object into the diagram.
Action: Review the message log for additional information and contact Oracle Support Services for further assistance.
Level: 32

Type: ERROR
Impact: Other
ODI-20348: An interface with the same name already exists in this folder. Please change the name of the new interface.

**Cause:** An interface with the specified name exists in the folder. The interface name must be unique within a folder.

**Action:** Enter a new interface name that is unique within the folder.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20349: Unknown event detected by the event manager. Please contact Oracle Support Services.

**Cause:** The Package Event Manager was called to action an unknown event.

**Action:** Contact Oracle Support Services for further assistance.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20350: Your diagram contains one or more FATAL/CRITICAL errors preventing display of the Flow Editor

**Cause:** The diagram is incomplete or contains errors that prevent the Flow Editor being displayed.

**Action:** Return to the diagram tab and review the error messages using the errors and warnings button in the toolbar. Fix the errors in order to access the Flow Editor.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20351: Error adding source to Quick Edit source table.

**Cause:** An internal error occurred which prevented the source being added.

**Action:** Contact Oracle Support Services for further assistance.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20352: Error adding target datastore to Quick Edit mapping table.

**Cause:** An internal error occurred which prevented the target being added.

**Action:** Contact Oracle Support Services for further assistance.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20353: Only a single column may be pasted into a Quick Edit table.

**Cause:** The clipboard contains multiple columns. Quick Edit only supports pasting a single cell into a table.

**Action:** Select the cells to be copied and paste them one at a time.
Level: 32
Type: ERROR
Impact: Other

ODI-20354: ODI-20354: Paste targets must be in the same column as the previous copy. This does not apply to Expression columns (Lookup Expression, Join Expression, Filter Expression, and Mapping Expression).

Cause: You have selected a value from one column, and tried to paste it into a different column. This is only supported for Expression Columns.

Action: Please enter the values into the cell manually.

Level: 32
Type: ERROR
Impact: Other

ODI-20355: ODI-20355: Duplicate value is not supported on this column.

Cause: The paste operation is not permitted in the Alias and Target Column Name fields as these fields must contain a unique value.

Action: Please enter the Alias or Name field manually.

Level: 32
Type: ERROR
Impact: Other

ODI-20356: ODI-20356: Can not perform paste into a read-only column.

Cause: The Paste operation is not permitted on read-only columns.

Action: You may not update this value in the table.

Level: 32
Type: ERROR
Impact: Other

ODI-20357: ODI-20357: Can not perform deletion because the target datastore is not temporary.

Cause: An attempt was made to delete a row in the target, but the target datastore is not a temporary table. Only rows in a temporary target table may be deleted.

Action: You cannot delete the row.

Level: 32
Type: ERROR
Impact: Other

ODI-20358: ODI-20358: Interface cannot be saved because it has a fatal error: {0}.

Cause: The Interface could not be saved because it contains a fatal error which must be resolved.

Action: Review the errors in the Diagram tab and resolve the fatal errors.

Level: 32
Type: ERROR
Impact: Other
ODI-20359: Only one cell can be copied one at a time.
   Cause: More than one cell was selected. Quick Edit only supports copying a single cell.
   Action: Select and copy a single cell.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

ODI-20360: Only Expression columns support Copy and Paste from other applications. For all other columns, please perform a copy first on that column before pasting.
   Cause: Only values from other applications may be copied into Expression columns.
   Action: For all other columns, perform a copy first on that column before pasting.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

   Cause: Values may not be copied between tables in Quick Edit, apart from between Expression columns.
   Action: Please enter the values manually.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

ODI-20362: Couldn't connect to Web Service
   Cause: An error occurred while creating a connection to the Web Service.
   Action: Ensure that the Web Service is accessible and WSDL URL is correct.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20363: Error while exporting request
   Cause: The request could not be exported
   Action: Check that there is sufficient disk space and that the target directory is accessible.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-20364: Error while parsing the XML file
   Cause: An error occurred while parsing the XML file
Action: Ensure that the correct XML file is specified and that it is correctly structured

Level: 32
Type: ERROR
Impact: Other

ODI-20365: ODI-20365: There is no port with SOAP binding defined on this service
Cause: The referenced service does not support the specified port
Action: Specify a valid port for the service

Level: 32
Type: ERROR
Impact: Other

ODI-20366: ODI-20366: The timeout must be an integer value.
Cause: The value entered for the timeout is not a valid integer
Action: Enter a valid integer value

Level: 32
Type: ERROR
Impact: Other

ODI-20367: ODI-20367: Export directory {0} does not exist.
Cause: The specified directory does not exist
Action: Create the directory and repeat the operation

Level: 32
Type: ERROR
Impact: Other

ODI-20368: ODI-20368: WSDL URL is null or empty, ODI can not initialize the current request.
Cause: WSDL URL is null
Action: Set the WSDL URL or remove the soap request.

Level: 32
Type: ERROR
Impact: Other

ODI-20370: ODI-20370: Shortcuts within a project can only refer to objects that belong to that same project
Cause: Shortcuts within a project can only refer to objects that belong to that same project
Action: Try another folder destination

Level: 32
Type: ERROR
Impact: Other
ODI-20371: No two shortcut objects within a folder may refer to the same base object
Cause: No two shortcut objects within a folder may refer to the same base object
Action: Try another folder destination or fix folder contents
Level: 32
Type: ERROR
Impact: Other

ODI-20372: The source and destination models must be defined with the same Technology
Cause: The source and destination models must be defined with the same Technology
Action: Try another model destination or fix model properties.
Level: 32
Type: ERROR
Impact: Other

ODI-20373: No two shortcuts within a model may contain the same base object
Cause: No two shortcuts within a model may contain the same base object
Action: Try another folder destination or fix model contents.
Level: 32
Type: ERROR
Impact: Other

ODI-20374: A model cannot contain a datastore and a datastore shortcut to another datastore with the same datastore name
Cause: A model cannot contain a datastore and a shortcut to another datastore with the same datastore name
Action: Try another folder destination or fix model contents.
Level: 32
Type: ERROR
Impact: Other

ODI-20701: The Name field is mandatory.
Cause: The Name field was not entered.
Action: Enter a name for the Load Plan.
Level: 32
Type: ERROR
Impact: Other

ODI-20702: The name given for the Load Plan is already used by another load plan. Please provide another name.
Cause: The name provided for the Load Plan was not unique.
Action: Enter a unique name for the Load Plan.
Level: 32
Type: ERROR
Impact: Other

ODI-20703: Variable "{0}" is not found.
Cause: The variable could not be found.
Action: Provide another name for the variable.

Level: 32
Type: ERROR
Impact: Other

ODI-20704: Datatype of variable "{0}" has been changed.
Cause: The datatype of the original variable is different to the datatype of the load plan variable.
Action: Verify the datatype of the variable and ensure that the types of the original and load plan variables match.

Level: 32
Type: ERROR
Impact: Other

ODI-20705: This variable is used in one or more case steps. Removing it will trigger deletion of those case steps, and all of their child steps. Do you want to continue?
Cause: An attempt was made to remove a variable which is used in one or more case steps.
Action: To remove the variable and its associated case steps, click Yes. Otherwise, click No, and nothing will be removed.

Level: 32
Type: WARNING
Impact: Other

ODI-20706: The Step Name is mandatory.
Cause: The Step Name field was not entered.
Action: Enter a name for the Step.

Level: 32
Type: ERROR
Impact: Other

ODI-20707: The Variable is mandatory.
Cause: A Variable was not selected.
Action: Select a variable.

Level: 32
Type: ERROR
Impact: Other

ODI-20708: The Scenario is mandatory.
Cause: A Scenario was not selected.
Action: Select a Scenario.

Level: 32
Type: ERROR
Impact: Other

ODI-20709: ODI-20709: The Value is mandatory.
Cause: A Value was not provided.
Action: Enter a Value.

Level: 32
Type: ERROR
Impact: Other

ODI-20710: ODI-20710: The Value format is not valid.
Cause: An incorrect format was given for the Value.
Action: Check the format of the Value and correct it.

Level: 32
Type: ERROR
Impact: Other

ODI-20711: ODI-20711: The Step Name is mandatory.
Cause: The Step Name field was not entered.
Action: Provide the name of the Step.

Level: 32
Type: ERROR
Impact: Other

ODI-20712: ODI-20712: The Variable is mandatory.
Cause: A Variable was not selected.
Action: Select a Variable.

Level: 32
Type: ERROR
Impact: Other

ODI-20713: ODI-20713: The Scenario is mandatory.
Cause: A Scenario was not selected.
Action: Select a Scenario.

Level: 32
Type: ERROR
Impact: Other

Cause: A Context was not selected for execution.
Action: Select an execution Context.
Level: 32
Type: ERROR
Impact: Other

ODI-20715: ODI-20715: The Logical Agent is mandatory.
Cause: A Logical Agent was not selected for execution.
Action: Select a Logical Agent.

Level: 32
Type: ERROR
Impact: Other

ODI-20716: ODI-20716: No Physical Agent is defined for the selected Logical Agent and Context. Edit Logical Agent "[0]", and define a Physical Agent for Context "[1]."
Cause: There was no Physical Agent associated with this Logical Agent in the specified context.
Action: Associate a Physical Agent with the Logical Agent in the selected context.

Level: 32
Type: ERROR
Impact: Other

ODI-20717: ODI-20717: No Physical Agents are running. A Physical Agent must be running in order to Restart a Load Plan.
Cause: There were no Physical Agents running.
Action: Start a Physical Agent before restarting the Load Plan.

Level: 32
Type: ERROR
Impact: Other

ODI-20718: ODI-20718: No Physical Agents are running. A Physical Agent must be running in order to Stop a Load Plan.
Cause: There were no Physical Agents running.
Action: Start the Agent before executing the Load Plan.

Level: 32
Type: ERROR
Impact: Other

ODI-20719: ODI-20719: Scenario "[0]" is not found.
Cause: The scenario was not found.
Action: Specify an existing scenario.
ODI-20720: Physical Agent "[0]" - which is defined in Logical Agent "[1]" to be used for Context "[2]" - is not responding. Verify that Physical Agent "[0]" has been started.
Cause: The Physical Agent was not reachable.
Action: Check the Physical Agent and start it.

Level: 32
Type: ERROR
Impact: Other

ODI-20721: Interface contains one or more errors. You should correct the errors before attempting to execute it
Cause: The interface contains errors which prevent it from being executed.
Action: Review the errors shown in the interface editor and update the interface to fix the problems.

Level: 32
Type: ERROR
Impact: Other

ODI-20722: Cannot display data. Source alias is [0] characters long which is longer than allowed by the technology ([1]). Please review the technology settings in Topology.
Cause: Source alias exceeded the limit allowed by its technology.
Action: Ensure the maximum table name length setting in the corresponding technology is correct. Consider changing source alias to comply.

Level: 32
Type: ERROR
Impact: Other

ODI-20723: There is no any version of scenario [0] found. A scenario of the step [1] cannot be refreshed.
Cause: The scenario of step was not found.
Action: Check if specified scenario for this step is correct.

Level: 32
Type: WARNING
Impact: Other

ODI-20724: Journalized data not found. Journal data view: [0]
Cause: Journal is not started or is stopped.
Action: Ensure the journal is started: select Changed Data Capture > Journal Data.

Level: 32
Type: ERROR
Impact: Other

ODI-20726: The Step Name is mandatory.
Cause: The Step Name field was not entered.
Action: Enter a name for the Step.
Level: 32  
Type: WARNING  
Impact: Other  
ODI-20727: ODI-20727: Scenario "{0}" parent is not found.  
Cause: The Scenario source object does not exist.  
Action: Check if the source object, from which the Scenario was generated, does exist.

Level: 32  
Type: ERROR  
Impact: Other  
ODI-20728: ODI-20728: The attribute name is mandatory  
Cause: The datastore attribute could not be saved because the mandatory Name field was not entered.  
Action: Enter a value in the attribute name field.

Level: 32  
Type: ERROR  
Impact: Other  
ODI-20729: ODI-20729: {0} is a dependant object of the following object(s) {1} and cannot be removed  
Cause: Selected object for removal is a dependent object.  
Action: Remove the dependent object first.

Level: 32  
Type: ERROR  
Impact: Other  
ODI-20731: ODI-20731: The parent from which this scenario is generated does not exist anymore so the editor couldn't show the parent related information.  
Cause: The editor couldn't show the parent related information because the scenario parent does not exist anymore. This could happen, for example, if you imported the scenario, but didn’t import it’s parent object.  
Action: Try to figure out, why the scenario parent object does not exist. Try to restore the parent.

Level: 32  
Type: ERROR  
Impact: Other  
ODI-20732: ODI-20732: You cannot move a submodel into another model.  
Cause: An unsupported operation was attempted.  
Action: Submodels cannot be moved into hierarchy of another models.
ODI-20733: ODI-20733: You cannot copy a submodel into another model.

**Cause:** An unsupported operation was attempted.

**Action:** Submodels cannot be copied into hierarchy of another models.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20734: ODI-20734: Changing the name of a user function only impacts the user function itself; Users need to manually change object(s) which reference the old user function name.

**Cause:** The user function name has been updated

**Action:** It is the user’s responsibility to determine where the user function is referenced and to manually change the name of the user function in those places.

**Level:** 32

**Type:** WARNING

**Impact:** Other

ODI-20735: ODI-20735: The name given for the Physical Agent is already used by another agent. Please provide another name

**Cause:** The name provided for the Physical Agent was not unique.

**Action:** Enter a unique name for the Physical Agent.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20736: ODI-20736: The Name field is mandatory.

**Cause:** The value for the Name field was not specified.

**Action:** Enter a name for the Object.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20737: ODI-20737: Could not build WSDL Model.

**Cause:**

**Action:**

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20741: ODI-20741: This is not a valid Cobol Copybook.

**Cause:** The file chosen in the Reverse Engineering Cobol Copybook process is not a valid Cobol Copybook.

**Action:** Ensure the file is a valid Cobol Copybook.

**Level:** 32
ODI-20742: You cannot copy a mapping into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Mappings cannot be copied into hierarchy of another projects.

ODI-20743: You cannot copy a reusable mapping into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Reusable mappings cannot be copied into hierarchy of another projects.

ODI-20744: You cannot move a mapping into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Mappings cannot be moved into hierarchy of another projects.

ODI-20745: You cannot move a reusable mapping into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Reusable mappings cannot be moved into hierarchy of another projects.

ODI-20746: You cannot move a global reusable mapping into a folder.
Cause: An unsupported operation was attempted.
Action: Global Reusable mappings cannot be moved into a folder.

ODI-20747: You cannot copy a global reusable mapping into a folder.
Cause: An unsupported operation was attempted.
Action: Global Reusable mappings cannot be copied into a folder.
Level: 32
Type: ERROR
Impact: Other

ODI-20748: Open is not valid for this node.
Cause: The editor is not applicable for this node.
Action: Editor cannot be opened for this node.

Level: 32
Type: ERROR
Impact: Other

ODI-20749: Selected Capture/Initial Load Capture process is associated with another model. This may cause conflicts during 'Start Journal' action, if the logical process instance selected uses the same physical process instance.
Cause: Selected Goldengate Capture/Initial Load Capture process is used in a different model.
Action: Select a different set of process instances for this model.

Level: 32
Type: ERROR
Impact: Other

ODI-20750: Selected Delivery/Initial Load Delivery process is associated with another model. This may cause conflicts during 'Start Journal' action, if the logical process instance selected uses the same physical process instance.
Cause: Selected Goldengate Delivery/Initial Load Delivery process is used in a different model.
Action: Select a different set of process instances for this model.

Level: 32
Type: ERROR
Impact: Other

ODI-20751: Load Plan Debugging is not supported: {0}.
Cause: An unsupported operation was attempted.
Action: Load Plan can't be debug.

Level: 32
Type: ERROR
Impact: Other

ODI-20752: Format can not be empty for File datastore's Date type column
Cause: Column added for the File datastore has Date as type but Format is not given
Action: Ensure the Format is entered for File datastore's column of type Date.

Level: 32
Type: ERROR
Impact: Other

ODI-20753: ODI-20753 : Shortcuts in a Model can not be moved
Cause: Shortcuts in a Model can not be moved to another Model
Action: Please get the base object of the shortcut first and then try to move

Level: 32
Type: ERROR
Impact: Other

ODI-20754: ODI-20754 : Driver name cannot be empty
Cause: Driver is not assigned for the Data Server
Action: Please choose the appropriate driver for the datastore.

Level: 32
Type: ERROR
Impact: Other

ODI-20755: ODI-20755: A Data Server with the name {0} already exists. Please provide another name.
Cause: The name provided for the Data Server is not unique.
Action: Enter a unique name for the Data Server.

Level: 32
Type: ERROR
Impact: Other

ODI-20756: ODI-20756: A Logical Schema with the name {0} already exists. Please provide another name.
Cause: The name provided for the Logical Schema is not unique.
Action: Enter a unique name for the Data Server.

Level: 32
Type: ERROR
Impact: Other

ODI-20757: ODI-20757: If logical schema is specified, WSDL URL can not differ from physical schema's WSDL URL.
Cause: You have specified different WSDL URL compared to physical schema WSDL URL.
Action: WSDL URL and physical schema WSDL URL should be same when logical schema is specified.

Level: 32
Type: ERROR
Impact: Other

ODI-20758: ODI-20758: If logical schema is specified, HTTP User can not differ from physical schema's/data server's HTTP User.
Cause: You have specified different user compared to physical schema/data server HTTP user.
**Action:** User and physical schema/data server HTTP user should be same when logical schema is specified.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-20759:** ODI-20759: If logical schema is specified, Port Type can not differ from physical schema's port type.

**Cause:** You have specified different port type compared to physical schema port type.

**Action:** Port type and physical schema port type should be same when logical schema is specified.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-20760:** ODI-20760: Choice names should be unique.

**Cause:** You have added duplicate choice names.

**Action:** Ensure only unique choice names are used.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-23001:** ODI-23001: The import process failed

**Cause:** The work repository export file specified could not be imported.

**Action:** Ensure the specified file is readable and is a valid work repository export file.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-23006:** ODI-23006: Agent Test failed

**Cause:** Agent could not be contacted using the specified connection details.

**Action:** Ensure the Agent connection details are correct and the Agent is running.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-23007:** ODI-23007: Data Source already exists for "[0]".

**Cause:** The Data Source has already been associated with this Agent.

**Action:** No action is necessary as the Data Source is already associated with this Agent. Consider removing the Data Source from this Agent and retrying this action.

**Level:** 32

**Type:** ERROR
Impact: Other

ODI-23010: Please enter first a name, an expression and a help text for this language element.

Cause: The Name, Expression or Help Text parameter values for this Language Element were not entered in the Definition panel. These are mandatory parameters.

Action: Return to the Definition panel and ensure the Name, Expression and Help Text parameters have valid values.

Level: 32
Type: ERROR

Impact: Other

ODI-23011: Name is empty

Cause: A value for the Name parameter of the Language Element Implementation was not entered. This is a mandatory parameter.

Action: Enter a valid value for the Name parameter before saving this Language Element.

Level: 32
Type: ERROR

Impact: Other

ODI-23012: Expression is empty

Cause: A value for the Expression parameter of the Language Element Implementation was not entered. This is a mandatory parameter.

Action: Enter a valid value for the Expression parameter before saving this Language Element.

Level: 32
Type: ERROR

Impact: Other

ODI-23013: Help is undefined

Cause: A value for the Help Text parameter of the Language Element Implementation was not entered. This is a mandatory parameter.

Action: Enter a valid value for the Help Text parameter before saving this Language Element.

Level: 32
Type: ERROR

Impact: Other

ODI-23014: Technology is undefined

Cause: A value for the Technology parameter of the Language Element Implementation was not entered. This is a mandatory parameter.

Action: Enter a valid value for the Technology parameter before saving this Language Element.

Level: 32
Type: ERROR
Impact: Other

ODI-23015: Logical Schema [0] is already linked to a physical schema in context [1].
Cause: A Physical Schema has already been defined for this Context and Logical Schema combination.
Action: Remove the Context and Logical Schema combination from the Context editor, then retry saving the Physical Schema.

Level: 32
Type: ERROR
Impact: Other

ODI-23016: The context is either invalid or no longer exists in the database.
Cause: One of the Contexts used by the Physical Schema is invalid or no longer exists in the Master Repository.
Action: Ensure the Context for the Physical Schema is correct by either selecting a valid Context for the Physical Schema or recreating the missing Context.

Level: 32
Type: ERROR
Impact: Other

ODI-23017: This Physical Schema already exists for this data server.
Cause: A Physical Schema referencing this Data Server has already been defined in the Master Repository.
Action: Specify the correct Physical Schema for this Data Server to use.

Level: 32
Type: ERROR
Impact: Other

ODI-23018: Unable to connect to Work Repository
Cause: The Work Repository could not be accessed using the connection details defined for it. This may be due to the database or host not being available, or the password could have changed.
Action: Ensure the Work Repository host and database are active. Using the Work Repository editor, ensure the connection details for it are correct.

Level: 32
Type: ERROR
Impact: Other

ODI-23019: Error Detected during Repository Installation. Invalid connection parameters.
Cause: The repository installation process was unable to connect to the repository database.
Action: Correct any errors identified in the installation log and retry the installation. If the problem persists then contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

Cause: The ODI Supervisor credentials supplied did not match the credentials held in the External Password Store.
Action: Retry the installation, ensuring the Supervisor user name and password match those held in the external store.

Level: 32
Type: ERROR
Impact: Other

Cause: A connection to the External Authentication Store could not be established.
Action: Ensure the External Authentication Store is available and the connection details specified in the JPS configuration file are valid.

Level: 32
Type: ERROR
Impact: Other

ODI-23022: ODI-23022: An error occurred during the generation of the Data Service.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-23023: ODI-23023: The Schema path (\(0\)) is not supported
Cause: The Model's Physical Schema attempted to define the Schema path using an unsupported protocol (ftp, http or file).
Action: Change the Physical Schema to not use ftp, http or file protocol to reference the file.

Level: 32
Type: ERROR
Impact: Other

ODI-23024: ODI-23024: The URL is mandatory.
Cause: The URL field has not been entered and is a mandatory parameter.
Action: Enter the URL parameter. A template chosen from the drop down list may help to ensure the syntax is correct.

Level: 32
Type: ERROR
Impact: Other
ODI-23025: The ID is mandatory.
  Cause: The Repository ID parameter has not been entered and is a mandatory parameter.
  Action: Enter an integer value for the Repository ID parameter.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-23026: The ID must be an integer value.
  Cause: The value entered for the Repository ID is not a valid integer.
  Action: Enter an integer value for the Repository ID parameter.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-23027: The driver is mandatory.
  Cause: A JDBC Driver was not specified and is a mandatory parameter.
  Action: Select a JDBC Driver from the list of values.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-23028: The password is mandatory.
  Cause: The Supervisor user's Password parameter was not specified.
  Action: Enter the Supervisor password.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-23029: The confirm password is mandatory.
  Cause: The Supervisor user's Confirm Password parameter was not specified.
  Action: Enter the Supervisor user's password in the Confirm Password parameter.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-23030: Password and Confirm Password are different
  Cause: The Password and Confirm Password parameters are not the same.
  Action: Ensure the same value is entered for both the Password and Confirm Password parameters.
  Level: 32
  Type: ERROR
  Impact: Other
ODI-23031: **The Supervisor username is mandatory.**

*Cause:* The Supervisor User parameter was not entered.

*Action:* Enter a value for the Supervisor User parameter ensuring it matches a user in the external enterprise identify store, or switch to ODI Authentication.

*Level:* 32  
*Type:* ERROR  
*Impact:* Other

ODI-23032: **Maximum number of sessions cannot be less or equal to 0.**

*Cause:* The Maximum Number of Sessions parameter value was specified as 0.

*Action:* Change the Maximum Number of Sessions parameter in the Agent Definition tab to a value greater than 0.

*Level:* 32  
*Type:* ERROR  
*Impact:* Other

ODI-23033: **The file reverse-engineering is only possible for delimited files.**

*Cause:* The file format for the specified file was not delimited.

*Action:* Select a delimited format file and retry the reverse-engineering action.

*Level:* 32  
*Type:* ERROR  
*Impact:* Other

ODI-23035: **Can not update the scheduling - This agent may not be running**

*Cause:* The Update Scheduling action could not be performed because the ODI Client could not connect to the Agent.

*Action:* Check that the Agent connection details are correct and that the agent is running. Use the Agent Test button to check the connection details.

*Level:* 32  
*Type:* ERROR  
*Impact:* Other

ODI-23036: **Logical Schema not set for this Context**

*Cause:* A Logical Schema entry in the Physical Schema’s Context was specified as <Undefined>.

*Action:* Ensure none of the Logical Schemas on the Physical Schema's Context tab are set to <Undefined>.

*Level:* 32  
*Type:* ERROR  
*Impact:* Other

ODI-23037: **To use scheduling please associate a Logical Agent to a Physical Agent via the Logical Architecture Accordion in the Topology Navigator**
Cause: There are no logical agents available to use for scheduling.

Action: Associate a logical agent with a physical agent using the Topology Navigator and then resubmit your schedule request.

Level: 32
Type: ERROR
Impact: Other

ODI-23038: ODI-23038: Cannot resolve the table name. Check the masks defined for this physical schema.

Cause: The table and schema format could not be calculated. This is because the object mask has not been set for the Physical Schema that contains this table.

Action: From the Topology Navigator edit the Physical Schema containing this table and ensure the Masks parameter value is valid for the schema based on its technology (for example "%SCHEMA.%OBJECT").

Level: 32
Type: ERROR
Impact: Other

ODI-23039: ODI-23039: You cannot carry out this type of export.

Cause: The export type specified is not supported.

Action: Retry the export. If the problem persists then contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-23040: ODI-23040: Import file "[0]" error

Cause: An error occurred during the import file process.

Action: Correct any errors identified in the error log and retry the import process. If the problem persists then contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-23042: ODI-23042: An error occurred while changing the repository number.

Cause: An error occurred while changing the repository number.

Action: Correct any errors identified in the message log and retry the action. If the problem persists then contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-23043: ODI-23043: The Repository ID must be numeric.

Cause: The value specified for the Repository ID parameter was not a valid numeric value.

Action: Enter a valid numeric value for the Repository ID parameter.
Level: 32
Type: ERROR
Impact: Other

ODI-23044: ODI-23044: The new ID you have chosen is already in use as a table "[0]"
primary key. The renumbering has been aborted. No changes have been made.
Cause: The Repository ID specified is already used by an existing object.
Action: Enter a different value for the Repository ID parameter ensuring it is
unique within the repository.

Level: 32
Type: ERROR
Impact: Other

ODI-23045: ODI-23045: You may not renumber a repository before version 11. Please
upgrade your repository first.
Cause: The renumber functionality is not supported for ODI Repository versions
prior to version 11.
Action: Upgrade the repository to version 11 (or higher) and then renumber it.

Level: 32
Type: ERROR
Impact: Other

ODI-23046: ODI-23046: An error was encountered during the test.
Cause: An attempt to connect a Work Repository failed.
Action: Correct any errors identified in the message log. Ensure the Work
Repositories are available and the connection information is correctly specified in
the Master Repository. Retry the test.

Level: 32
Type: ERROR
Impact: Other

ODI-23047: ODI-23047: Could not connect to the work repository. The renumbering
process has been aborted. No changes have been made.
Cause: An attempt to connect a Work Repository failed.
Action: Correct any errors identified in the message log. Ensure the Work
Repositories are available and the connection information is correctly specified in
the Master Repository. Retry the test.

Level: 32
Type: ERROR
Impact: Other

ODI-23048: ODI-23048: Import report generation error
Cause: The import was performed, but there was an unexpected error while
opening the Import Report.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-23049: ODI-23049: Error Detected during Repository Installation
Cause: An error occurred during the creation or import of the Master Repository.
Action: Correct any errors described in the message log and retry the installation process. If the problem persists then contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-23050: ODI-23050: The password you entered doesn't match the actual password
Cause: The password you entered doesn't match the actual password
Action: Ensure that the password entered matches the actual password

Level: 32
Type: ERROR
Impact: Other

ODI-23051: ODI-23051: Maximum number of threads must be greater than zero.
Cause: Values for maximum number of threads is not valid
Action: Enter valid value for maximum number of threads

Level: 32
Type: ERROR
Impact: Other

ODI-23052: ODI-23052: Maximum number of thread per session cannot be less than zero.
Cause: Values for maximum number of thread per session is not valid
Action: Enter valid value for maximum number of threads per session

Level: 32
Type: ERROR
Impact: Other

ODI-23053: ODI-23053: Maximum number of threads cannot be less than maximum number of threads per session.
Cause: Maximum number of threads less than maximum number of threads per session
Action: Enter valid values for maximum number of threads and maximum number of threads per session

Level: 32
Type: ERROR
Impact: Other

ODI-23054: ODI-23054: Maximum number of cache entries cannot be less than zero.
Cause: Values for maximum number of cache entries is not valid
Action: Enter valid values for maximum number of cache entries
Level: 32
Type: ERROR
Impact: Other

ODI-23055: ODI-23055: Session Blueprint Lifetime cannot be less than zero.
   Cause: Value for session blueprint lifetime is not valid
   Action: Enter valid values for session blueprint lifetime

Level: 32
Type: ERROR
Impact: Other

ODI-23056: ODI-23056: Syntax of condition "[0]" is not valid.
   Cause: The entered condition has invalid syntax.
   Action: Specify the valid condition expression.

Level: 32
Type: ERROR
Impact: Other

ODI-23057: ODI-23057: The Registry Database is mandatory for MySQL Technology.
   Cause: The Registry Database was not specified for MySQL Technology.
   Action: Enter the Registry Database for MySQL Technology.

Level: 32
Type: ERROR
Impact: Other

ODI-23058: ODI-23058: This Technology does not support multiple schemas.
   Cause: Attempt to create multiple Physical Schemas for Technologies that support only one Schema.
   Action: The solution for Technologies that do not support multiple Physical Schemas is to create separate Data Dervers from the Physical Schemas.

Level: 32
Type: ERROR
Impact: Other

ODI-23059: ODI-23059: No Agent selected
   Cause: No Agent has been selected for the selected DataSource.
   Action: Make sure an Agent is selected for the DataSource.

Level: 32
Type: ERROR
Impact: Other

ODI-23060: ODI-23060: Update Import Modes are not valid for Interfaces
   Cause: An invalid import mode of Update is selected for an Interface export file.
Action: Use an import mode other than Update or alternatively only import Mapping export files

Level: 32
Type: ERROR
Impact: Other

ODI-23061: Syntax of expression "[0]" is not valid.
Cause: The entered expression has invalid syntax.
Action: Specify the valid expression.

Level: 32
Type: ERROR
Impact: Other

ODI-23062: Maximum number of threads cannot be less then the maximum number of sessions.
Cause: Value for maximum number of threads is less than the maximum number of sessions
Action: Ensure that maximum number of threads is equal to or greater than the maximum number of sessions

Level: 32
Type: ERROR
Impact: Other

ODI-23064: Language Name must be specified
Cause: Language name is not specified.
Action: Enter Language name on the Languages table.

Level: 32
Type: ERROR
Impact: Other

ODI-23065: Invalid Parameter values. Key names not unique
Cause: Invalid values.
Action: Parameter values need to be valid including uniquenames for keys.

Level: 32
Type: ERROR
Impact: Other

ODI-23066: Letter used in the icon input "[0]" is not valid. No Special Characters are allowed to be entered.
Cause: The entered input is invalid.
Action: Enter the valid value.

Level: 32
Type: ERROR
Impact: Other
ODI-23068: Degree Of Parallelism For Target has to be in the range of 1 to 99.

Cause: Value entered for Degree Of Parallelism is not in the range 1-99.

Action: Please choose the appropriate Degree Of Parallelism For Target.

Level: 32
Type: ERROR
Impact: Other

ODI-23069: Web Application Context must be provided

Cause: No value entered for the Web Application Context.

Action: Please enter value for the Web Application Context.

Level: 32
Type: ERROR
Impact: Other

ODI-23070: Port number must be an integer between 0 and 65535.

Cause: The value for the Port Number was not valid.

Action: Enter a valid integer value between 0 and 65535 for the Port Number.

Level: 32
Type: ERROR
Impact: Other

ODI-23071: Invalid Override Endpoint URL.

Cause: Override Endpoint URL entered is invalid.

Action: Please enter a valid Override Endpoint URL.

Level: 32
Type: ERROR
Impact: Other

ODI-23072: Invalid WSDL URL.

Cause: WSDL URL entered is invalid.

Action: Please enter a valid WSDL URL.

Level: 32
Type: ERROR
Impact: Other

ODI-24004: There are no supervisor accounts in the ODI repository with matching entries in the identity store. Please provide a suitable supervisor account.

Cause: The ODI repository does not have any supervisor account that matches the entries in the identity store.

Action: Create a supervisor account in the ODI repository that matches an entry in the identity store.

Level: 32
Type: ERROR
Impact: Other

ODI-24005: ODI-24005: An error occurred while checking the status of the master repository.
Cause: An unexpected error occurred.
Action: Check the exception to see if it gives details about the error and contact Oracle Support Services for further assistance.

Level: 32
Type: ERROR
Impact: Other

ODI-24006: ODI-24006: An error occurred while switching the authentication mode for the master repository.
Cause: An unexpected error occurred.
Action: Check the exception to see if it gives details about the error and contact Oracle Support Services for further assistance.

Level: 32
Type: ERROR
Impact: Other

ODI-24007: ODI-24007: Rules should not have empty conditions.
Cause: Rules associated with policy have empty conditions.
Action: Create rules with conditions associated with them.

Level: 32
Type: ERROR
Impact: Other

ODI-25001: ODI-25001: Unable to input a larger element
Cause: The total length of all keywords exceeds the maximum length.
Action: Remove one or more of the keywords, or decrease their lengths.

Level: 32
Type: ERROR
Impact: Other

ODI-25002: ODI-25002: The end date cannot be before the start date.
Cause: The end date is before the start date.
Action: Set the end date to be after the start date.

Level: 32
Type: ERROR
Impact: Other

ODI-25003: ODI-25003: Error while starting session
Cause: An unexpected error occurred while starting the session.
Action: Check the error details for further information and contact Oracle Support Services for further assistance.
Level: 32
Type: ERROR
Impact: Other

ODI-25004: ODI-25004: Date Format Not Valid
Cause: One of the Date fields is invalid. This may be the From or To Date.
Action: Click the button to the right of the field to invoke a dialog for entering a valid Time and Date.

Level: 32
Type: ERROR
Impact: Other

ODI-25005: ODI-25005: Incorrect date format. The format is {0}.
Cause: The date format is incorrect.
Action: Use the format that is presented in the error message.

Level: 32
Type: ERROR
Impact: Other

ODI-25006: ODI-25006: At least one agent must be selected.
Cause: Agent selection is mandatory.
Action: Select at least one agent to clean stale sessions.

Level: 32
Type: ERROR
Impact: Other

ODI-25007: ODI-25007: At least one work repository must be selected.
Cause: Work repository selection is mandatory.
Action: Select at least one work repository to clean stale sessions.

Level: 32
Type: ERROR
Impact: Other

ODI-25008: ODI-25008: You are not allowed to delete session variable.
Cause: User attempt to delete session variable.
Action: Cancel deleting session variable.

Level: 32
Type: ERROR
Impact: Other

ODI-25009: ODI-25009: You are not allowed to delete scenario variable.
Cause: User attempt to delete scenario variable.
Action: Cancel deleting scenario variable.

Level: 32
Type: ERROR
Impact: Other

ODI-26001: Boolean does not correspond to the Field Update Object Layer.
Cause: The repository contained an invalid value of the Field Update property for a checkbox or radio group.
Action: Ensure the repository value is a boolean for checkbox or a valid action command for a radio group.

Level: 32
Type: ERROR
Impact: Other

ODI-26002: This object is referenced by another object. View the details for more information. You may also see where this object is used in the hierarchy.
Cause: The specified object could not be used because it is referenced by another object.
Action: Remove references to this object. The "Uses" hierarchy may be useful in finding objects references.

Level: 32
Type: ERROR
Impact: Other

ODI-26003: This object cannot be removed: it is referenced by another object.
Cause: The specified object could not be deleted because it is referenced by another object.
Action: Remove references to this object before deleting it. The "Uses" hierarchy may be useful in finding objects references.

Level: 32
Type: ERROR
Impact: Other

ODI-26004: Action denied:
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26005: You are importing an object from another repository with the same identifier. It is forbidden.
Cause: An object in the import file has an identifier which already exists in the repository.
**Action:** Consider manually changing the "com.sunopsis.dwg.dwgobj.SnpImportRep" object section of the import XML file to use a unique identifier.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26006:** ODI-26006: The specified encryption key is invalid.  
**Cause:** The encryption key specified was found to be invalid during the decrypting phase.  
**Action:** Ensure a valid encryption key is utilized.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26007:** ODI-26007: KM or Procedure not encrypted. No decryption was performed.  
**Cause:** Decryption was requested for a non-encrypted KM or Procedure.  
**Action:** Do not attempt to decrypt a non-encrypted KM or Procedure.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26008:** ODI-26008: Scenario not encrypted. No decryption was performed.  
**Cause:** Decryption was requested for a non-encrypted Scenario.  
**Action:** Do not attempt to decrypt a non-encrypted Scenario.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26009:** ODI-26009: Action not encrypted. No decryption was performed.  
**Cause:** Decryption was requested for a non-encrypted Action.  
**Action:** Do not attempt to decrypt a non-encrypted Action.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26010:** ODI-26010: Decryption failed due to incompatible key.  
**Cause:** The key provided to decrypt was an invalid key.  
**Action:** Ensure the decryption key is correctly specified.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26011:** ODI-26011: unable to find specified encryption API
Cause: The specified cryptographic algorithm requested was not available in the environment.

Action: Ensure the environment can access the DES/ECB/PKCS5Padding algorithms and padding.

Level: 32
Type: ERROR
Impact: Other

ODI-26012: ODI-26012: invalid encrypted data.
Cause: The BASE64 content may be invalid or the zip file contents may be corrupted.
Action: Ensure the encrypted data is correct and the decryption key is correctly specified.

Level: 32
Type: ERROR
Impact: Other

ODI-26013: ODI-26013: Your security parameters are insufficient to perform this action.
Cause: The ODI user security parameters do not specifically permit the user to perform this particular action.
Action: Ensure this ODI user is granted the security access to perform this action.

Level: 32
Type: ERROR
Impact: Other

ODI-26014: ODI-26014: The code of your {0} is already used by another {1}. Please give another code to save this {2}.
Cause: The value entered for code must be unique for the entire work repository.
Action: Ensure the unique value is entered.

Level: 32
Type: ERROR
Impact: Other

ODI-26015: ODI-26015: You do not have sufficient privileges to perform this operation.
Cause: The ODI user security parameters do not specifically permit the user to perform this particular operation.
Action: Ensure this ODI user is granted the security access to perform this operation.

Level: 32
Type: ERROR
Impact: Security

ODI-26016: ODI-26016: The requested operation cannot succeed. The object no longer exists.
Cause: The specified ODI object cannot be accessed because it no longer exists in the repository (it may have been deleted by another ODI user).
Action: Recreate the specified ODI object. Consider importing the object from a backup.

Level: 32
Type: ERROR
Impact: Other

Cause:
Action:

Level: 32

Impact: Other

ODI-26018: ODI-26018: Key Error.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

Cause: Retrieve method is incorrect. Must be "set" or "get".
Action: Please change the retrieve method to "set" or "get".

Level: 32
Type: ERROR
Impact: Other

ODI-26021: ODI-26021: Object initialization denied.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

**Cause:** The object could not be saved. This is possibly due to a repository connection error, or inconsistent data values supplied. It’s also possible that the object was modified by another user.

**Action:** Ensure the repository database is available and the data values supplied are valid. Try to save changed data, then refresh edited object and apply changed data again.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26023: ODI-26023: Cannot create object.**

**Cause:** An unexpected error occurred during the object creation process.

**Action:** Contact Oracle Support Services.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26024: ODI-26024: Cannot stop update operation.**

**Cause:** An unexpected error occurred during the update operation.

**Action:** Contact Oracle Support Services.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26025: ODI-26025: Display Initialization denied.**

**Cause:** An unexpected error occurred during the display initialization process.

**Action:** Contact Oracle Support Services.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26026: ODI-26026: Cannot refresh.**

**Cause:** An unexpected error occurred during the refresh process.

**Action:** Contact Oracle Support Services.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26027: ODI-26027: Security not set for the instance. The instance will not be added to the tree.**

**Cause:** Instance security permissions “By repository” were chosen but a concrete repository is not specified.

**Action:** Ensure a repository is specified.

**Level:** 32
Type: ERROR
Impact: Security

ODI-26028: ODI-26028: Cannot save your modifications.

Cause:

Action:

Level: 32

Type: ERROR
Impact: Other

ODI-26029: ODI-26029: Could not deploy the datasource automatically.

Cause: Weblogic Administration server is not up and running, the server connection parameters are wrong.

Action: Please check Weblogic Administration server connection parameters and the server state.

Level: 32

Type: ERROR
Impact: Other

ODI-26030: ODI-26030: The new password does not meet the password policy. Your change could not be saved.

Cause: The new password does not meet the password policy.

Action: Please verify that the new password meets the password policy (go to the "Security Navigator -> Password policies...").

Level: 32

Type: ERROR
Impact: Other

ODI-26031: ODI-26031: You may not delete work repository {0} because you are connected to it. To delete this repository, reconnect to a different work repository or use a master repository only connection.

Cause: Deletion of a work repository which is currently connected is not supported.

Action: Disconnect from the repository and then connect utilizing a Master Repository Only connection or a different work repository before attempting to delete the specified work repository.

Level: 32

Type: ERROR
Impact: Other

ODI-26032: ODI-26032: This object was modified by {0} on {1} at {2}. Your changes cannot be saved.

Cause: The object was changed in the repository after the editor was opened for this object.

Action: Close the editor without saving changes. Open the editor again and reapply the edits and save. Note: consider using the lock object facility to disallow current modifications to an object.
Level: 32
Type: ERROR
Impact: Other

ODI-26033: ODI-26033: You cannot edit this object because it is locked by another user ((0)). You can only view it.
Cause: The ODI object opened for editing is locked by another user. Other ODI users can only view such objects.
Action: Try to edit the object later.

Level: 32
Type: ERROR
Impact: Other

ODI-26034: ODI-26034: An error occurred while deleting executions.
Cause: The specified executions could not be deleted. This is possibly caused by the repository database connection problems.
Action: Retry to delete the executions. If problem persists, contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26036: ODI-26036: Error while encrypting.
Cause: A general error occurred during the encrypting process, possibly caused by repository database access problems, lack of security permissions, or encryption engine failures.
Action: Retry the encrypt action again.

Level: 32
Type: ERROR
Impact: Other

ODI-26037: ODI-26037: Encryption key is not valid.
Cause: An invalid encryption key was entered causing an encryption engine failure.
Action: Enter a valid encryption key and retry the action.

Level: 32
Type: ERROR
Impact: Other
ODI-26038: Unable to execute, the selected Logical Agent is not associated to a Physical Agent in the desired Context.

Cause: A Logical Agent was not associated with this Physical Agent in this Context.

Action: Ensure a valid "Logical Agent - Physical Agent" association exists in the desired Context.

Level: 32
Type: ERROR
Impact: Other

ODI-26039: Connection failed.

Cause: The attempt to connect to the repository failed. This may be due to one or more of the following: invalid connection parameters specified, database problems, network problems.

Action: Ensure the repository database is available and accessible and the repository connection parameters are correct.

Level: 32
Type: ERROR
Impact: Other

ODI-26040: error while updating

Cause: Failed to update the ODI logins file: snps_login_work.xml.

Action: Ensure write-access is granted to the ODI logins file: snps_login_work.xml.

Level: 32
Type: ERROR
Impact: Other

ODI-26041: Error while attempting to get FieldData from ObjectDisplay.

Cause: An unexpected error occurred obtaining FieldData from ObjectDisplay.

Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-26042: Error while attempting to set FieldUpdate from ObjectUpdate.

Cause: An unexpected error occurred updating FieldUpdate from ObjectUpdate.

Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-26043: Window closing cancelled by the User.

Cause: User asked to close the parent window where child lines were modified.

Action: No action performed on that.
ODI-26044: Host Variable Not Found.
   Cause:
   Action:

ODI-26045: Unable to perform the drop operation.
   Cause: Dropped entity is invalid.
   Action: Check whether the dropped entity is valid and perform the drag-n-drop action again.

ODI-26046: MethodGetter was not found
   Cause: An unexpected error occurred obtaining the getter method.
   Action: Contact Oracle Support Services.

ODI-26047: Object on method setObjectDisplay(Object pObjectDisplay) is not an array.
   Cause: This is caused by programmatic error.
   Action: ODI users should normally never see this message.

ODI-26048: Object on method setObjectDisplay(Object pObjectDisplay) is not a vector.
   Cause: This is caused by programmatic error.
   Action: ODI users should normally never see this message.

ODI-26049: Parameters not valid.
   Cause: An unexpected error occurred due to an invalid parameter value.
   Action: Contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

ODI-26050: Master repository not installed on this connection.
Cause: This is caused by programmatic error.
Action: ODI users should normally never see this message.

Level: 32
Type: ERROR
Impact: Other

ODI-26051: XML Export Error.
Cause: An error occurred during the creation of the XML Export file.
Action: Ensure the repository is accessible and the export file and its directory are writable.

Level: 32
Type: ERROR
Impact: Other

ODI-26052: XML Import Error.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26053: An error occurred during initialization.
Cause: Initialization failed possibly due to a repository access failure or insufficient ODI security permissions.
Action: Ensure the repository database is available, and the ODI user security permissions permit connection.

Level: 32
Type: ERROR
Impact: Other

ODI-26054: Page not available.
Cause: The selected page number was invalid.
Action: Ensure the page number entered is greater than 0 and less than the total number of pages.

Level: 32
Type: ERROR
Impact: Other

ODI-26056: Error while disconnecting.
Cause: This error is occurred while closing the repository database connection after "Test query" action completed.
Action: This error may be ignored.

Level: 32
Type: ERROR
Impact: Other

ODI-26057: ODI-26057: Unable to connect the agent. The agent is probably not started.
Cause: The connection request to the agent failed.
Action: Ensure the agent is started and available. Ensure the connection information is valid.

Level: 32
Type: ERROR
Impact: Other

ODI-26058: ODI-26058: Unable to connect the agent. The agent URL cannot be found.
Cause: The connection request to the agent failed using the given URL.
Action: Ensure the agent is started and available. Ensure the connection URL information is valid.

Level: 32
Type: ERROR
Impact: Other

ODI-26059: ODI-26059: Object on method setObjectDisplay(Object pObjectDisplay) is not a List.
Cause: An unexpected error occurred setting ObjectData.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

Cause: The values entered for Password and Confirmation Password did not match.
Action: Enter the same value for Password and Confirmation Password.

Level: 32
Type: ERROR
Impact: Other

ODI-26061: ODI-26061: The minimum password length is {0} characters.
Cause: The length of the Password entered is less than specified in password policy rule.
Action: Enter a Password whose length is greater than or equal to the specified minimum length.
Level: 32
Type: ERROR
Impact: Other

ODI-26062: ODI-26062: The password violates the following rule: "{0}". Select another password.
Cause: The password supplied was invalid.
Action: Enter a valid password.

Level: 32
Type: ERROR
Impact: Other

Cause: The password supplied was invalid.
Action: Enter a valid password.

Level: 32
Type: ERROR
Impact: Other

ODI-26064: ODI-26064: Error while exporting.
Cause: An error occurred during the creation of the Export file.
Action: Ensure the repository is accessible and the export file and its directory are writable.

Level: 32
Type: ERROR
Impact: Other

ODI-26065: ODI-26065: You must specify all the options.
Cause: This is caused by programmatic error.
Action: ODI users should normally never see this message.

Level: 32
Type: ERROR
Impact: Other

ODI-26066: ODI-26066: An unexpected error has occurred.
Cause: An unexpected error occurred this process.
Action: Retry action. If problem persists then contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-26067: ODI-26067: mandatory field "Java charset" not entered
Cause: A value for the "Java character set" field was not entered.
Action: Enter a value for the "Java character set" field.
Level: 32
Type: ERROR
Impact: Other

ODI-26068: ODI-26068: unable to load export list in the module: [0]
Cause: The contents of the export file list was not formatted correctly.
Action: Correct the format of the export list file specified.

Level: 32
Type: ERROR
Impact: Other

ODI-26069: ODI-26069: The specified export directory does not exist.
Cause: The specified export directory is invalid.
Action: Ensure the specified export directory exists and is writable.

Level: 32
Type: ERROR
Impact: Other

ODI-26070: ODI-26070: The Open Tool class name must not begin with "Snp" or "Odi".
Cause: The Open Tool class name begins with "Snp" or "Odi".
Action: Ensure the Open Tool class name does not begin with "Snp" or "Odi".

Level: 32
Type: ERROR
Impact: Other

ODI-26071: ODI-26071: Open Tool not activated. Your Open Tool references a class which not found.
Cause: The class name specified in this Open Tool was not found.
Action: Ensure the Open Tool class name specified is valid and available in the class path.

Level: 32
Type: ERROR
Impact: Other

ODI-26072: ODI-26072: Your Open Tool has been installed. You can now use it in a procedure or package.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26073: ODI-26073: Could not activate Open Tool. Check that it is in the "oracledi/userlib" directory.
Cause: The Open Tool references a class which was not found.
Action: Ensure the Open Tool class exists in the "oracledi/userlib" directory.

Level: 32
Type: ERROR
Impact: Other

ODI-26074: Policy "Name" is a mandatory field.
Cause: A value for the Policy "Name" field value was not entered.
Action: Enter a value for the Policy "Name" field.

Level: 32
Type: ERROR
Impact: Other

ODI-26075: Policy "Name" must be unique.
Cause: A Policy with the same name already exists.
Action: Enter a unique value in Policy "Name" field.

Level: 32
Type: ERROR
Impact: Other

ODI-26076: You do not have enough memory to generate this report.
Cause: There was not enough memory allocated to generate the report.
Action: Increase the maximum Java heap size value by using the "-Xmx" JVM option.

Level: 32
Type: ERROR
Impact: Other

ODI-26077: Target file name is not specified.
Cause: The Target file name is mandatory and was not specified.
Action: Enter a value for the target file name.

Level: 32
Type: ERROR
Impact: Other

ODI-26078: Error while creating the version
Cause: 
Action: 

Level: 32
Type: ERROR
Impact: Other

ODI-26079: Version already exists, versioning aborted.
Cause: A version with the specified version number already exists.
Action: Enter a unique version number.

Level: 32
Type: ERROR
Impact: Other

ODI-26080: ODI-26080: Unable to delete version {0} for {1} {2}. It is referenced by solution {3}
Cause: Deletion of a version of an object referenced by a Solution was attempted.
Action: Delete the solution referencing the object version. Then retry deleting the object version.

Level: 32
Type: ERROR
Impact: Other

ODI-26081: ODI-26081: Unable to delete version {0} for {1} {2}. It is referenced by version {3} of solution {4}
Cause:
Action:

Type: ERROR
Impact: Other

ODI-26082: ODI-26082: No difference found
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26083: ODI-26083: No difference found.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26084: ODI-26084: Could not compare versions of different objects.
Cause: Objects of different types were selected for comparison.
Action: Select objects of the same type before performing comparison.

Level: 32
Type: ERROR
Impact: Other
ODI-26085: You cannot restore several versions of the same object.
   Cause: Multiple versions were selected for restoring.
   Action: Select a single version when performing this action.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-26086: You cannot select more than one version at the same time.
   Cause: Multiple version were selected for this action.
   Action: Select a single version when performing this action.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-26087: You must select a version.
   Cause: A version was not selected.
   Action: Select a version before performing this action.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-26088: You must select the version to restore.
   Cause: A version to restore was not selected.
   Action: Select a version to restore.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-26089: This object is currently locked by user: {0}. Version restoration cancelled.
   Cause: The object selected for restoration was locked by another user.
   Action: Ensure the selected object is not locked by another user before retrying the operation.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-26090: Object version list is empty.
   Cause: The object selected was not versioned.
   Action: Select a versioned object before retrying the operation.

   Level: 32
   Type: ERROR
   Impact: Other
ODI-26091: An array with an invalid size was passed to SnpsObjectTableColumnTextIntrospectMapper.createMapFromArrayOfArrays.
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26092: Table Model must have at least one Column.
  Cause: The Model for this Table did not contain any Columns.
  Action: Add at least one Column to the Table's Model.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26093: Unable to open window.
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26094: Your license does not allow Changed Data Capture operations.
  Cause:
  Action:
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26095: This object is locked by \{0\}. You cannot edit it unless it is unlocked.
  Cause: Object could not be opened for write access because it was already locked by another user.
  Action: Ensure the selected object is not locked by another user before retrying the operation.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26096: Replacement of object failed.
  Cause: The file specified did not contain correctly formed XML.
  Action: Ensure the XML in the specified file is valid before retrying the operation.
  Level: 32
Type: ERROR
Impact: Other

ODI-26097: ODI-26097: Replace failed due to an SQL exception.
Cause: The file used to replace this object is not a valid XML format.
Action: Select a valid XML file format before performing this replace object action.
Level: 32

Type: ERROR
Impact: Other

ODI-26098: ODI-26098: You must specify an Export Path or File.
Cause: Either the Export Path or File was not specified.
Action: Specify a value for either the Export Path or File.
Level: 32

Type: ERROR
Impact: Other

ODI-26099: ODI-26099: You don't have the appropriate license to use this KM
Cause:
Action:
Level: 32

Type: ERROR
Impact: Other

ODI-26100: ODI-26100: You don't have the appropriate privileges on Step objects.
Cause: Package Steps operation failed due to insufficient ODI security permissions.
Action: Ensure the ODI user security permissions are correct for the Package Steps object.
Level: 32

Type: ERROR
Impact: Other

ODI-26101: ODI-26101: The Data Check cannot be performed. A CKM is not selected on the Model.
Cause: No CKM was assigned to the Model.
Action: Enter a CKM for the Model before performing the Data Check. Consider using the Model editor to make this entry.
Level: 32

Type: ERROR
Impact: Other

ODI-26102: ODI-26102: The Service cannot be generated. An Application Server is not selected on the Model.
Cause: No Application Server was assigned to the Model.
Action: Enter an Application Server for the Model before performing Generate Service. Consider using the Model editor to make entry.

Level: 32
Type: ERROR
Impact: Other

ODI-26103: ODI-26103: You must specify a connection parameter
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26104: ODI-26104: You must specify a query parameter
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26105: ODI-26105: Test failed
Cause: The value of Schema, Table, Column or Filter was invalid.
Action: Ensure the Schema, Table, Column and Filter are valid. Consult the details for additional information.

Level: 32
Type: ERROR
Impact: Other

ODI-26106: ODI-26106: Decryption failed. Data has been restored.
Cause: The Decryption process failed.
Action: Consult the details for additional information.

Level: 32
Type: ERROR
Impact: Other

ODI-26107: ODI-26107: Cannot find this [0] icon
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26108: ODI-26108: The specified path is not valid.
Cause: The specified path was invalid or was not found on the file system.
Action: Ensure a valid file system path is entered.
Level: 32
Type: ERROR
Impact: Other

ODI-26109: ODI-26109: Error while reading the search criteria. Invalid file
Cause: The selected file did not contain search criteria in a valid format.
Action: Ensure the selected file is one exported from the ODI search UI and contains correctly formatted search criteria information.
Level: 32
Type: ERROR
Impact: Other

ODI-26110: ODI-26110: An error occurred while saving.
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-26111: ODI-26111: Error while accessing the file
Cause: The specified file could not be opened.
Action: Ensure the specified file exists and is accessible.
Level: 32
Type: ERROR
Impact: Other

ODI-26112: ODI-26112: Error while performing the search
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-26113: ODI-26113: XML parser configuration error
Cause: The selected file is not a valid search criteria file format.
Action: Select a valid search criteria file exported from the ODI search UI.
Level: 32
Type: ERROR
Impact: Other

ODI-26114: ODI-26114: Host cannot be empty.
Cause: The Host field is mandatory and was not specified.
Action: Enter a valid Host name.
Level: 32
Type: ERROR
Impact: Other

ODI-26115: ODI-26115: Port number must be an integer between 1024 and 65535.
Cause: The value for Port Number was not valid.
Action: Enter a valid integer value between 1024 and 65535 for Port Number.

Level: 32
Type: ERROR
Impact: Other

Cause: The User field is mandatory and was not supplied.
Action: Enter a valid User Name.

Level: 32
Type: ERROR
Impact: Other

ODI-26117: ODI-26117: Connection failed. Reason:
Cause: Could not connect to a repository with the specified connection details.
Action: Ensure the repository database is available and valid connection details are supplied.

Level: 32
Type: ERROR
Impact: Other

Cause: Could not connect to the external password storage with the specified connection details.
Action: Ensure the external password storage is available and valid connection details are supplied.

Level: 32
Type: ERROR
Impact: Other

ODI-26119: ODI-26119: Exception when computing the value
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26120: ODI-26120: Fields compared are not the same
Cause:
Action:
Level: 32
Type: ERROR
Impact: Other

ODI-26121: ODI-26121: Error while exploring version
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26122: ODI-26122: Exception when getting the children list
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26123: ODI-26123: Cannot connect to the repository with the provided login information.
Cause: Could not connect to a repository with the specified connection details.
Action: Ensure the repository database is available and valid connection details are supplied.

Level: 32
Type: ERROR
Impact: Other

ODI-26124: ODI-26124: Exception during connection to the repository with the provided login information:
Cause: Could not connect to a repository with the specified connection details.
Action: Ensure the repository database is available and valid connection details are supplied.

Level: 32
Type: ERROR
Impact: Other

ODI-26125: ODI-26125: The configured external password storage is still accessible. Instead, use the Password Storage Switch service to change the configuration.
Cause: Could not connect to the external password storage with the specified connection details.
Action: Ensure the external password storage is available and valid connection details are supplied. Consider using the Password Storage Switch service to change the configuration.

Level: 32
Type: ERROR
Impact: Other

ODI-26126: Error while opening window.
Cause: An unexpected error occurred while opening window.
Action: Contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

ODI-26127: The selected master repository configured to use internal password storage. Recovery is possible only for external storages.
Cause: Recovery was attempted for a master repository configured to use internal password storage.
Action: Select a master repository not configured to use internal password storage.
Level: 32
Type: ERROR
Impact: Other

ODI-26128: Unable to open Editor
Cause: 
Action: 
Level: 32
Type: ERROR
Impact: Other

ODI-26129: Unable to open Editor: Technology could not be opened twice
Cause: 
Action: 
Level: 32
Type: ERROR
Impact: Other

ODI-26130: Could not connect to repository
Cause: Could not connect to a repository with the specified connection details.
Action: Ensure the repository database is available and valid connection details are supplied.
Level: 32
Type: ERROR
Impact: Other

ODI-26131: Specify Import Path
Cause: A value for Import Path is a mandatory and it was not supplied.
Action: Enter the correct value for the Import Path.
ODI-26132: Repository id {0} or Repository name {1} is already used in your master repository.
Cause: The ID or Name specified for the master repository were already used.
Action: Enter valid unique values for Repository ID and Repository name.

ODI-26134: Invalid number format for port number.
Cause: The value specified for Port Number was not in a valid format and number range.
Action: Enter a valid Port Number. See SQL*Net documentation for additional information regarding format and range.

ODI-26135: The Network Adapter could not establish the connection.
Cause: Connection via the Network Adapter could not be established.
Action: Ensure the network resource is available and the connection details in the Network Adapter are correct.

ODI-26136: The specified character set is not supported.
Cause: The specified character set was not supported.
Action: Select a supported character set.

ODI-26137: The context or type are incorrect.
Cause: The selected ODI context is invalid: it was probably removed from the repository database.
Action: Reopen Execution dialog again so that the list of ODI contexts will be reloaded.

ODI-26150: Incorrect Context.
Cause: A valid Context was not specified.
Action: Select a Context from the list. If none are available then create one from the Topology Navigator.
Level: 32
Type: ERROR
Impact: Other

ODI-26153: ODI-26153: Connection failed; JDBC Error
Cause: An unexpected JDBC error was encountered during the connection process.
Action: Ensure the resource referenced is available and the connection information is correct.
Level: 32
Type: ERROR
Impact: Other

ODI-26155: ODI-26155: No Master Repository on this connection
Cause: A connection to the Master Repository could not be established.
Action: Ensure the Master Repository is available and valid connection details are provided.
Level: 32
Type: ERROR
Impact: Other

ODI-26156: ODI-26156: Designer cannot connect to an Execution repository. The operation will be canceled.
Cause: Unable to establish a connection to the Execution repository.
Action: Ensure the Execution repository is available and the connection details are correct.
Level: 32
Type: ERROR
Impact: Other

ODI-26157: ODI-26157: Connection Error
Cause: A connection to the Master Repository could not be established.
Action: Ensure the Master Repository is available and valid connection details are provided.
Level: 32
Type: ERROR
Impact: Other

ODI-26158: ODI-26158: Work Repository Attachment Error
Cause: A connection to the Work Repository could not be established.
Action: Ensure the Work Repository is available and valid connection details are provided.
Level: 32
Type: ERROR
Impact: Other

ODI-26159: ODI-26159: Error while creating Work Repository
Cause: An unexpected error occurred while creating the Work Repository.
Action: Correct any issues described in the error details.

Level: 32
Type: ERROR
Impact: Other

ODI-26160: ODI-26160: URL not referenced in the list.
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26161: ODI-26161: File Not Found
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26162: ODI-26162: Connection failure
Cause: A connection to the repository could not be established.
Action: Ensure the repository is available and valid connection details are provided.

Level: 32
Type: ERROR
Impact: Other

ODI-26163: ODI-26163: Access Denied
Cause: A connection to the repository could not be established because of insufficient user privilege.
Action: Ensure the ODI user has sufficient privilege to connect to the specified repository.

Level: 32
Type: ERROR
Impact: Other

ODI-26164: ODI-26164: The reverse cannot be executed. Your Model will be created.
Cause: The specified technology or driver did not support standard reverse-engineering.
Action: Ensure the technology or driver supports standard reverse-engineering. Otherwise choose Customized Reverse and select an appropriate RKM for the technology.

Level: 32
Type: ERROR
Impact: Other

ODI-26165: ODI-26165: This driver has no match in the URL list
Cause:
Action:

Level: 32
Type: ERROR
Impact: Other

ODI-26166: ODI-26166: The template was not generated: [0]
Cause: The WLS Template could not be generated.
Action: Correct any errors identified in the error log and retry the operation.

Level: 32
Type: ERROR
Impact: Other

ODI-26167: ODI-26167: File System Error: [0]
Cause: Creation of the Server Template file failed due to an error detected by the file system.
Action: Correct any errors identified in the error log. Ensure the file system location is accessible and retry the operation.

Level: 32
Type: ERROR
Impact: Other

ODI-26168: ODI-26168: Client requires a repository with version [0] but the repository version found is [1]
Cause: Could not connect to the repository due to the old repository version.
Action: Update repository to the latest version.

Level: 32
Type: ERROR
Impact: Other

ODI-26169: ODI-26169: JDBC driver is mandatory.
Cause: JDBC driver was not entered.
Action: Provide JDBC driver for database connection.

Level: 32
Type: ERROR
Impact: Other
ODI-26170: JDBC URL is mandatory.
Cause: JDBC URL was not entered.
Action: Provide JDBC URL for database connection.
Level: 32
Type: ERROR
Impact: Other

ODI-26171: User is mandatory.
Cause: User was not entered.
Action: Provide user for database connection.
Level: 32
Type: ERROR
Impact: Other

ODI-26172: Id is mandatory.
Cause: Id was not entered.
Action: Provide work repository ID.
Level: 32
Type: ERROR
Impact: Other

ODI-26173: Name is mandatory.
Cause: Name was not entered.
Action: Provide work repository name.
Level: 32
Type: ERROR
Impact: Other

ODI-26174: Database connection is not available.
Cause: Connection error occurred while connecting to the database.
Action: Verify that the Database Connection details are correct and the database is available.
Level: 32
Type: ERROR
Impact: Other

ODI-26175: Import folder does not exist or not a valid folder.
Cause: Non-existing or invalid folder was specified.
Action: Ensure the specified folder path is correct and refers to an existing folder.
Level: 32
Type: ERROR
Impact: Other

ODI-26176: Import file does not exist or not a valid file.
Cause: Non-existing or invalid file was specified.
Action: Ensure the specified file path is correct and refers to an existing file.
Level: 32
Type: ERROR
Impact: Other

ODI-26177: ODI-26177: Unable to connect to the DBA user.
Cause: Unable to connect to the DBA account.
Action: Check that the DBA username and password are correct.
Level: 32
Type: ERROR
Impact: Other

ODI-26178: ODI-26178: Unable to connect to the Repository user.
Cause: Unable to connect to the Repository account.
Action: Check that the Repository connection details are correct.
Level: 32
Type: ERROR
Impact: Other

ODI-26179: ODI-26179: Invalid Date Format
Cause: An Invalid Date format was entered in the date filter.
Action: Ensure the date entered is of the required format.
Level: 32
Type: ERROR
Impact: Other

ODI-26180: ODI-26180: Changing the name of a sequence only impacts the sequence itself; Users need to manually change object(s) which reference the old sequence name.
Cause:
Action:
Level: 32
Type: WARNING
Impact: Other

ODI-26181: ODI-26181: Unable to add a Project knowledge module
Cause: An unsupported action was attempted.
Action: No action required as Project knowledge modules are not a valid selection to be added to a solution.
Level: 32
Type: ERROR
Impact: Other
ODI-26182: Object was modified by another user and cannot be saved.  
Cause: The object could not be saved. It's possible that the object was modified by another user.  
Action: Try to save changed data, then refresh edited object and apply changed data again.  
Level: 32  
Type: ERROR  
Impact: Other

ODI-26183: The maximum password length is [0] characters.  
Cause: The entered work repository password length is greater than allowed.  
Action: Provide a shorter password.  
Level: 32  
Type: ERROR  
Impact: Other

ODI-26184: SQL error occurred. See error details for more information.  
Cause: SQL error occurred while performing UI action.  
Action: If this error is not expected, contact Oracle Support Services.  
Level: 32  
Type: ERROR  
Impact: Other

ODI-26185: File does not exist or cannot be created. See error details for more information.  
Cause: UI action tried to open a file which did not exist, or create a file which could not be created due to some reasons.  
Action: Make sure the file path is typed correctly. Make sure application has enough file system permissions in order to create a file at the specified path.  
Level: 32  
Type: ERROR  
Impact: Other

ODI-26186: Character set is not supported. See error details for more information.  
Cause: UI action tried to use character encoding which is not supported.  
Action: Make sure character set is typed correctly.  
Level: 32  
Type: ERROR  
Impact: Other

ODI-26187: Unexpected I/O error occurred. See error details for more information.  
Cause: UI action caused unexpected I/O error.  
Action: Contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

ODI-26188: ODI-26188: There is no enough memory to perform this UI action. Increase the maximum Java heap size value (-Xmx).
Cause: UI action requires more memory than available at the current moment.
Action: Increase the maximum Java heap size value by using the "-Xmx" JVM option.

Level: 32
Type: ERROR
Impact: Other

Cause: UI action caused unexpected report generation error.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-26190: ODI-26190: A user with same name {0} already exists in ODI. Note: LDAP user name is case insensitive. You have to first drop that user prior to registering or changing this one.
Cause: Due to LDAP user name is case insensitive so ODI will follow same rule in external authentication mode.
Action: Please drop the existing user with same name(ignoring case) first prior to registering this one.

Level: 32
Type: ERROR
Impact: Other

ODI-26191: ODI-26191: You cannot move this object because it is locked by another user ({0}).
Cause: This object was locked by another user.
Action: Wait until object is unlocked.

Level: 32
Type: ERROR
Impact: Other

ODI-26192: ODI-26192: You cannot drag & drop this object because it is locked by another user ({0}).
Cause: This object was locked by another user.
Action: Wait until object is unlocked.

Level: 32
Type: ERROR
Impact: Other

ODI-26193: You are not allowed to delete master repository.

**Cause:** User attempt to delete master repository.

**Action:** Cancel deleting master repository.

Level: 32
Type: ERROR
Impact: Other

ODI-26194: Database Connection User is mandatory.

**Cause:** Database Connection User was not entered.

**Action:** Provide Database Connection User.

Level: 32
Type: ERROR
Impact: Other

ODI-26195: Database Connection Password is mandatory.

**Cause:** Database Connection Password was not entered.

**Action:** Provide Database Connection Password.

Level: 32
Type: ERROR
Impact: Other

ODI-26196: Failed to migrate login information to new format.

**Cause:** ODI was not able to migrate login information from old format into the new format.

**Action:** Make sure that directory `%ODI_HOME%/oracledi` has write permissions. Try manually copying `%ODI_HOME%/oracledi/snps_login_work.xml` into `%ODI_HOME%/oracledi/snps_login_work_12.xml` file.

Level: 32
Type: ERROR
Impact: Other

ODI-26197: Failed to delete old login information.

**Cause:** ODI was not able to delete old login information after migration from old format into the new format.

**Action:** Make sure that directory `%ODI_HOME%/oracledi` and file `%ODI_HOME%/oracledi/snps_login_work.xml` have write permissions. Try manually removing `%ODI_HOME%/oracledi/snps_login_work.xml` file.

Level: 32
Type: ERROR
Impact: Other

ODI-26198: Passwords do not match.

**Cause:** Password confirmation doesn't match the entered password.

**Action:** Make sure that password and password confirmation are the same.
Level: 32
Type: ERROR
Impact: Other

ODI-26199: ODI-26199: User {0} is not authorized to grant object {1}.
Cause: Current user is not authorized to grant generic object privileges
Action: Assign generic object privileges to user.

Level: 32
Type: ERROR
Impact: Security

ODI-26200: ODI-26200: User {0} is not authorized to grant method {1}.
Cause: Current user is not authorized to grant generic method privileges
Action: Assign generic method privileges to user.

Level: 32
Type: ERROR
Impact: Security

ODI-26201: ODI-26201: Invalid Export Key. Export Key must have a minimum length of eight characters and maximum length of 100 characters, contain at least one alphabetic (lower/upper case) character, at least one numeric-digit or a special characters (@ # $ % + / =).
Cause: Export Key must have a minimum length of eight characters and maximum length of 100 characters, contain at least one alphabetic (lower/upper case) character, at least one numeric-digit or a special characters (@ # $ % + / =).
Action: Provide a valid Export Key

Level: 32
Type: ERROR
Impact: Other

ODI-26202: ODI-26202: The Export Key and the confirmed Export Key are not the same.
Cause: Export Key confirmation doesn't match the entered Export Key.
Action: Make sure that the Export Key and confirmed Export Key are the same.

Level: 32
Type: ERROR
Impact: Other

ODI-26203: ODI-26203: The provided Export Key is not correct for the selected file.
Cause: The provided Export Key is not the same as the Export Key of this selected file.
Action: Provide a correct Export Key

Level: 32
Type: ERROR
Impact: Other
ODI-26204: The incorrect Export Key is entered three times. The Export Key field will be disabled now. You can Import this file without an Export Key (the cipher data will not be imported) or Cancel import.  
**Cause:** The incorrect Export Key entered 3 times.  
**Action:** Continue import this file without importing cipher data or Cancel import.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-26205: The incorrect Export Key is entered three times. The Export Key field will be disabled now. Please consider other options or Cancel import.  
**Cause:** The incorrect Export Key entered 3 times.  
**Action:** Continue import this file or all files without importing cipher data, or Skip the file, or Cancel import.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-26206: Unable to connect Registry Database to the DBA user.  
**Cause:** Unable to connect Registry Database by DBA Account.  
**Action:** Check Registry Database and the DBA username and password are correct.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-26207: An Option with the name {0} already exists. Please provide another name.  
**Cause:** The name provided for the Option is not unique.  
**Action:** Enter a unique name for the Option.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-26208: Unable to perform move because {0} already exists in folder {1}.  
**Cause:** A folder already consists a such type of object with the same name as a moving object.  
**Action:** Rename an object, which you want to move, or rename, or delete an existing object from a folder.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-26209: The repository contains map component definitions that are newer than the ones supported by the current client version. Certain operations
involving mappings may not function correctly. It is recommended to update your client to a newer version. Do you want to continue?

**Cause:** A client of an older version is used to connect to a repository containing newer map component definitions.

**Action:** Update the current client by downloading and installing the latest patch. Insure other clients that connect to the same repository are also at the same patch version.

**Level:** 32

**Type:** WARNING

**Impact:** Other

ODI-26210: ODI-26210: The repository contains map component definitions that are older than the ones supported by the current client version. Clicking Yes will continue the login and the map component definitions will be updated. Clicking No will disconnect from the repository without updating. Do you want to continue?

**Cause:** The current client contains map component definitions that are newer than the ones recorded in the repository.

**Action:** Continuing the connection will update the repository with map component definitions at the same version as the client. Check and update other clients that connect to the same repository to the same patch version as the current client.

**Level:** 32

**Type:** WARNING

**Impact:** Other

ODI-30000: Error while parsing request file.

**Cause:**

**Action:**

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Files

ODI-30001: One of the following parameters: {0} or {1} must be defined.

**Cause:**

**Action:**

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Configuration

ODI-30002: Parameters {0} and {1} cannot be set at the same time.

**Cause:**

**Action:**

**Level:** 32

**Type:** SET_AT_RUNTIME

ODL-52001: deleting log file: {0}, size: {1} bytes
   Cause: A log file was deleted because of the rules defined in the current configuration.
   Action: This is an information message, no action is needed.

   Level: 16
   Type: NOTIFICATION
   Impact: Logging

ODL-52002: invalid value for parameter {0}: {1}. Value must be greater than zero.
   Cause: An invalid value was assigned to a numeric parameter that require a positive value.
   Action: Use a value that is greater than zero value for the parameter.

   Level: 1
   Type: ERROR
   Impact: Logging

ODL-52003: invalid value for parameter maxLogSize: {0}. Value must be greater than
the value of maxFileSize ({1}).
   Cause: The value used for the maxLogSize parameter is smaller than the value used for the maxFileSize parameter, which is not valid.
   Action: Enter a value for the maxLogSize parameter that is greater than the value of the maxFileSize parameter.

   Level: 1
   Type: ERROR
   Impact: Logging

ODL-52004: invalid encoding: {0}
   Cause: The value used for encoding parameter is not valid.
   Action: Enter a valid encoding value.

   Level: 1
   Type: ERROR
   Impact: Logging
ODL-52005: invalid path: {0}. This path is already being used by another log writer instance of a different type.
Cause: There was an attempt to create a log using a path that is already being used by another log, but the two logs are of different types.
Action: Contact Oracle support services.
Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52006: Path cannot be null.
Cause: A null value was used for the log file path.
Action: Enter a non-null value for the path.
Level: 1
Type: ERROR
Impact: Logging

ODL-52007: The log path is not a directory: {0}.
Cause: The value used for the log path is not a directory. Some log types require that the log path be a directory, not a file, because the log file name is fixed.
Action: Enter a directory path instead of a file path.
Level: 1
Type: ERROR
Impact: Logging

ODL-52008: unable to create log directory: {0}
Cause: One or more directories that were used in the log path could not be created.
Action: Make sure that the process has permission to create the directories, or enter a different path. It may also be possible to create the directories manually.
Level: 1
Type: ERROR
Impact: Logging

ODL-52009: The log directory is not writable: {0}.
Cause: The process could not write to the log directory.
Action: Make sure that the process has permission to write to the log directory, or enter a different path.
Level: 1
Type: ERROR
Impact: Logging

ODL-52010: no permission to access log directory: {0}
Cause: The process could not access the log directory.
Action: Make sure that the process has permission to access the log directory, or enter a different path.
Level: 1
Type: ERROR
Impact: Logging

**ODL-52011: attempting to operate on a closed LogWriter**

*Cause:* There was an attempt to perform an operation on a log writer that is already closed.

*Action:* This is possible a programming error. Contact Oracle Support Services. If the problem occurs during process shut down, it is possible that some component is attempting to log a message after the logging system has already shut down.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

**ODL-52012: attempting to write to a closed LogWriter**

*Cause:* There was an attempt to write a message to a log writer that is already closed.

*Action:* This is possible a programming error. Contact Oracle Support Services. If the problem occurs during process shut down, it is possible that some component is attempting to log a message after the logging system has already shut down.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

**ODL-52013: attempting to flush a closed LogWriter**

*Cause:* There was an attempt to flush a log writer that is already closed.

*Action:* This is possible a programming error. Contact Oracle Support Services. If the problem occurs during process shut down, it is possible that some component is attempting to log a message after the logging system has already shut down.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

**ODL-52014: Maximum log size is reached.**

*Cause:* The maximum size for the log defined in the configuration was reached and the current configuration does not enable automated removal of older log messages.

*Action:* Review the logging configuration. It may be necessary to increase the maxLogSize parameter, or enable a policy for the automatic removal of older messages.

Level: 1
Type: ERROR
Impact: Logging

**ODL-52015: unable to delete old archived file**

*Cause:* There was an attempt to delete an old log file, but the file could not be deleted.
Action: Check that the process has permission to delete the log file.

Level: 1
Type: ERROR
Impact: Logging

ODL-52016: failure to rotate log file: {0}
Cause: There was an attempt to rename a log file, but the operation failed.
Action: Check that the process has permission to rename files.

Level: 1
Type: ERROR
Impact: Logging

ODL-52017: out of log file names
Cause: There was an attempt to rename a log file, but there are no more names that can be used.
Action: Remove some or all of the archived files.

Level: 1
Type: ERROR
Impact: Logging

ODL-52018: unable to write to log "(0)": {1}
Cause: There was an error when writing messages to a log file.
Action: See the error message for the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52019: unable to close log "(0)": {1}
Cause: There was an error when closing a log file.
Action: See the error message for the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52020: failed to get a lock on file "(0)" after {1} milliseconds
Cause: A log file lock could not be acquired within the specified time period, and the log write operation has time-out.
Action: Check that other processes are not holding a lock to the log file.

Level: 1
Type: ERROR
Impact: Logging

ODL-52021: thread interrupted while waiting to lock file "(0)"
Cause: The thread was interrupted while waiting to acquire a lock on a lock file.
Action: Check that other processes are not holding a lock to the log file.

Level: 1
Type: ERROR
Impact: Logging

ODL-52029: recursive logging detected that exceeds the recursion depth limit of {0}. The handler will not log the message.

Cause: The handler detect recursive logging calls that exceed that maximum configured recursion depth limit.

Action: Review the source code to eliminate logging calls within code that may be called while formatting a log message.

Level: 1
Type: ERROR
Impact: Logging

ODL-52030: invalid property name: {0}

Cause: An invalid property name was used in the logging configuration.

Action: Review the configuration and enter a valid property name.

Level: 1
Type: ERROR
Impact: Logging

ODL-52031: required property "{0}" is not found

Cause: A required property was not present in the configuration of a log handler.

Action: Review the configuration and add the required property.

Level: 1
Type: ERROR
Impact: Logging

ODL-52032: invalid format: {0}. Valid formats are: {1}.

Cause: An invalid value for the 'format' property was used in the configuration of an ODLHandler.

Action: Review the configuration and add a valid value for the format property.

Level: 1
Type: ERROR
Impact: Logging

ODL-52033: invalid value for property {0}: {1}.

Cause: An invalid value for used for an ODLHandler property.

Action: Review the configuration and add a valid value for the property.

Level: 1
Type: ERROR
Impact: Logging

ODL-52034: Configuration is invalid: {0} cannot be less than {1}.
Cause: An invalid value for used for a size property in an ODLHandler configuration.
Action: Review the configuration and make sure that the value of the 'maxFileSize' property is not greater than the value of the 'maxLogSize' property.

Level: 1
Type: ERROR
Impact: Logging

ODL-52035: failure to create ODLHandler: {0}
Cause: An ODLHandler instance could not be created.
Action: Check the error message for the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52036: invalid level: {0}. Check spelling and verify that the value is a valid ODL or Java level.
Cause: An invalid level was used in the configuration of a logger or handler.
Action: Review the configuration and enter a valid level.

Level: 1
Type: ERROR
Impact: Logging

ODL-52040: failure to initialize class {0}: property {1} must be defined.
Cause: A required system property was not defined.
Action: Review the process configuration and make sure that the required system property is defined.

Level: 1
Type: ERROR
Impact: Logging

ODL-52041: Use of {0} in logging configuration is deprecated; replacing it with {1}. (File: {2}).
Cause: A deprecated property was used in the logging configuration.
Action: Review the logging configuration and consider replacing the deprecated property. While the configuration may be valid, use of deprecated properties should be avoided.

Level: 1
Type: WARNING
Impact: Logging

ODL-52042: undefined property: {0}.
Cause: An undefined property was used in the logging configuration.
Action: Review the logging and process configuration and either replace the invalid property in the logging configuration, or define a value for the property.
Level: 1
Type: ERROR
Impact: Logging

ODL-52043: expecting one element of type "(0)"
    Cause: The logging configuration contained more than one XML element of a given type, when only one was expected.
    Action: Review the logging configuration and remove the extra XML elements.

Level: 1
Type: ERROR
Impact: Logging

ODL-52044: cannot find handler: (0)
    Cause: The logging configuration assigned a handler to one or more loggers, but the handler was not defined.
    Action: Review the logging configuration and either add the missing handler, or remove any references to the handler.

Level: 1
Type: ERROR
Impact: Logging

ODL-52045: invalid class: (0)
    Cause: The logging configuration defined an invalid class for a handler.
    Action: Review the logging configuration and make sure that the handler class is valid. The handler class must be either a subclass of java.util.logging.Handler, or implement the oracle.core.ojdl.logging.HandlerFactory interface.

Level: 1
Type: ERROR
Impact: Logging

ODL-52046: cannot find class: (0)
    Cause: The logging configuration defined a handler, filter, or error manager class, but that class could not be found.
    Action: Review the logging and process configuration and make sure that the class is available in the system classpath, or that the class is visible to the classloader that loads the ODL configuration classes.

Level: 1
Type: ERROR
Impact: Logging

ODL-52047: cannot load or link class "(0)": (1)
    Cause: The logging configuration defined a handler, filter, or error manager class, but that class could not be loaded due to a linkage error.
    Action: Review the logging and process configuration and make sure that the class is available in the system classpath, or that the class is visible to the classloader that loads the ODL configuration classes, or that the correct version of the class is being used.
Level: 1
Type: ERROR
Impact: Logging

ODL-52048: Class "\{0\}" is not of expected type "\{1\}".
Cause: The logging configuration defined a handler, filter, or error manager class, but that class is not a handler, filter or error manager instance.
Action: Review the logging and process configuration and make sure that the class is of the correct type.

Level: 1
Type: ERROR
Impact: Logging

ODL-52049: cannot create instance of class "\{0\}": \{1\}
Cause: The logging configuration defined a handler, filter, or error manager class, but an instance of that class could not be created.
Action: Review the error message for the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52050: unable to process file "\{0\}", XML parse exception (line: \{1\}, column: \{2\}): \{3\}
Cause: The logging configuration could not be processed due to an XML error in the configuration file.
Action: Review the error message for a description of the XML error, and correct the problem in the configuration file.

Level: 1
Type: ERROR
Impact: Logging

ODL-52051: unable to process file "\{0\}"; exception: \{1\}
Cause: The logging configuration could not be processed due to a unexpected XML parser error.
Action: Review the error message for a description of the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52052: unable to find resource: \{0\}
Cause: The logging configuration could not be processed due to a missing XML schema or DTD.
Action: Contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52053: unable to create handler instance using class "{0}"; exception: {1}
  Cause: The creation of a handler instance failed because the handler factory threw an exception.
  Action: Review the error message for the root cause.
  Level: 1
  Type: INCIDENT_ERROR
  Impact: Logging

ODL-52054: The logger "{0}" is already defined.
  Cause: There was an attempt to add a new logger to the configuration file, but the logger is already defined.
  Action: Verify that the logger name is correct.
  Level: 1
  Type: ERROR
  Impact: Logging

ODL-52055: The handler "{0}" is already defined.
  Cause: There was an attempt to add a new handler to the configuration file, but a handler is already defined.
  Action: Verify that the handler name is correct.
  Level: 1
  Type: ERROR
  Impact: Logging

ODL-52056: The logger "{0}" is not defined.
  Cause: There was an attempt to access a logger in the logging configuration but the logger is not defined.
  Action: Verify if the logger name is correct.
  Level: 1
  Type: ERROR
  Impact: Logging

ODL-52057: The handler "{0}" is not defined.
  Cause: There was an attempt to access a handler in the logging configuration but the handler is not defined.
  Action: Verify if the handler name is correct.
  Level: 1
  Type: ERROR
  Impact: Logging

ODL-52058: The handler "{0}" cannot be removed because it is being used by logger "{1}".
  Cause: There was an attempt to remove a handler from the logging configuration, but the handler could not be removed because it is being used by a logger.
**Action:** Verify that the handler name is correct, or remove the handler from all the loggers first before attempting to remove the handler.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging  

**ODL-52059:** The logger "{0}" already has handler "{1}".  
**Cause:** There was an attempt to add a handler to a logger but the logger already has the given handler.  
**Action:** Verify if the logger and handler names are correct.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52060:** The logger "{0}" does not have handler "{1}".  
**Cause:** There was an attempt to remove a handler from a logger, but the logger does not contain the given handler.  
**Action:** Verify if the logger and handler names are correct.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52061:** The handler "{0}" does not have property "{1}".  
**Cause:** There was an attempt to remove a property from a handler, but the handler does not have a property with the given name.  
**Action:** Verify if the handler and property are correct.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52062:** Illegal value for "{0}": {1}  
**Cause:** There was an attempt to set a property for a handler or logger, but the value of the property is not valid.  
**Action:** Verify if the handler or loggers properties are valid.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52063:** Unable to load logging configuration from "{0}"; exception: {1}  
**Cause:** There was an error while loading the logging configuration file.  
**Action:** Review the error message for the root cause.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging
ODL-52064: The handler "\{0\}" is already defined in the target logging configuration document.
    Cause: There was an attempt to add a handler to a logging configuration file, but a handler with the given name already exists in the target file.
    Action: Review the definition of the new handler.

    Level: 1
    Type: ERROR
    Impact: Logging

ODL-52065: The logger "\{0\}" or a descendant is already defined in the target logging configuration document.
    Cause: There was an attempt to add a logger to a logging configuration file, but the logger or one of its descendants is already defined in target logging configuration.
    Action: Review the definition of the new logger.

    Level: 1
    Type: ERROR
    Impact: Logging

ODL-52080: Reading logging configuration from \"\{0\}\".
    Cause: 
    Action: 

    Level: 1
    Type: NOTIFICATION
    Impact: Logging

ODL-52081: unable to read logging configuration from file \"\{0\}\"; exception: \{1\}
    Cause: There was an error reading the logging configuration from the given file.
    Action: Review the error message for the root cause.

    Level: 1
    Type: INCIDENT_ERROR
    Impact: Logging

ODL-52082: unable to register logging runtime MBean; exception: \{0\}
    Cause: 
    Action: 

    Level: 1
    Type: ERROR
    Impact: Logging

ODL-52083: unable to register log dump; exception: \{0\}
    Cause: There was an error registering the log dump with the FMW Diagnostics Framework.
    Action: Review the error message for the root cause. The system may still work, but the log dump will not be available.
ODL-52084: unable to initialize ODL; exception: {0}

Cause: There was an error initializing Oracle Diagnostic Logging (ODL).

Action: Review the error message for the root cause. Oracle Diagnostic Logging is not properly configured in this system.

ODL-52085: Reloading logging configuration from "{0}".

ODL-52086: unable to reload logging configuration from file "{0}"; exception: {1}

Cause: There was an error reloading the logging configuration from the given file.

Action: Review the error message for the root cause.

ODL-52087: suspicious logging configuration reload. The original configuration was read from file "{0}"; but the new configuration is being read from "{1}".

Cause: The logging configuration is being reloaded, but the configuration file is different from the configuration file used for the initial configuration.

Action: This is probably an error, there should only be one configuration file.

ODL-52088: The java.util.logging configuration was reloaded.

Cause: The java.util.logging configuration was reloaded, probably via the invocation of LogManager.readConfiguration.

Action: The java.util.logging configuration should not be reloaded programmatically, as this can override the ODL configuration.

ODL-52501: Unable to get OPMN connection for instance "{0}"; check that the instance name is valid and that OPMN is running.
**Cause:** There was an attempt to invoke an operation on a OPMN managed target, but a connection to that target could not be created.

**Action:** Check the target argument and make sure that the instance and component names are valid, and that OPMN is running.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52502:** Invalid target. The server name "{0}" is not a valid server name, the server is not running, or JRF is not enabled on the server.

**Cause:** There was an attempt to invoke an operation on a Java EE server target, but the target does not exist or is not valid for the operation.

**Action:** Check the target argument and make sure that the server name is correct, the server is running, and that JRF is enabled on the server.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52801:** There is already an active trace with ID "{0}". Use a different trace ID or stop the active trace first before starting a new trace with the same ID.

**Cause:** There was an attempt to start a trace using an ID value that is already being used by another active trace.

**Action:** Use a different trace ID or disable the existing active trace first before starting a new one with the same ID.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52802:** There is already an active trace for attribute "{0}" with value "{1}". The existing active trace must be disabled first before a new one can be started for the same attribute value.

**Cause:** There was an attempt to start a trace using an attribute value that is already used by an active trace.

**Action:** Use a different attribute value or disable the existing active trace first before starting a new one with the same attribute value.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52803:** Unable to complete the start tracing operation. The operation failed on target "{0}"; cause: {1}

**Cause:** The start tracing operation cannot be completed because one or more servers are unable to complete the operation.

**Action:** See the error message for more information on the cause of the server failure.

**Level:** 1
Type: ERROR
Impact: Logging

**ODL-52804: The start tracing operation failed for provider "[0]"; cause: [1]**

*Cause:* The start tracing operation cannot be completed because a trace provider is unable to complete the operation. See the error message for more information on the cause for the provider failure.

*Action:* See the error message for more information on the cause of the provider failure. You may try to disable the failing provider to obtain trace data from the other trace providers.

*Level:* 1

**Type: ERROR**

**Impact: Logging**

**ODL-52805: Unable to complete the start tracing operation. The operation failed for one or more providers and could not be rolled back. The tracing configuration may be in an inconsistent state. Disable all active traces or restart the servers to reset the selective tracing configuration.**

*Cause:* The start tracing operation failed for one or more providers or servers but could not be rolled back on all servers or providers.

*Action:* The tracing system may be on an inconsistent state. Disable all active traces or restart the servers to reset the selective tracing configuration.

*Level:* 1

**Type: ERROR**

**Impact: Logging**

**ODL-52806: The stop tracing operation failed for provider "[0]"; cause: [1]**

*Cause:* The stop tracing operation cannot be completed because a trace provider is unable to complete the operation. See the error message for more information on the reason for the provider failure.

*Action:* See the error message for more information on the cause of the provider failure.

*Level:* 1

**Type: ERROR**

**Impact: Logging**

**ODL-52807: Unable to create incident for trace with ID "[0]"; cause: [1]**

*Cause:* A trace was stopped but an incident could not be created for the trace data.

*Action:* See the error message for more information on the root cause of the incident creation failure.

*Level:* 1

**Type: ERROR**

**Impact: Logging**

**ODL-52808: Invalid expression: [0]**

*Cause:* An invalid expression was passed as a parameter to the startTracing operation.
Action: Review the list of active traces and disable some of the duplicate traces.

Level: 1
Type: ERROR
Impact: Logging

ODL-52809: Multiple active traces match the current request. The request is already being traced with ID "[0]" and it will not be traced with ID "[1]."
Cause: There are multiple active traces that can be started for the current request, but the request can only be associated with one trace. One or more traces will not be started.
Action: Review the expression and check for incorrect spelling or syntax. See the documentation for details on the expression syntax.

Level: 1
Type: WARNING
Impact: Logging

ODL-52810: A new trace cannot be started because there are too many traces currently active in the system.
Cause: A new trace cannot be started because there are too many traces currently active in the system. There are multiple active traces that can be started for the current request.
Action: Wait until some of the other traces are stopped before trying to start a new one. Contact your system administrator for more information.

Level: 1
Type: ERROR
Impact: Logging

ODL-52811: A new trace cannot be started or stopped for the current HTTP session because there is no current HTTP session.
Cause: A request to start or stop tracing the current HTTP session cannot be executed because there is no HTTP session associated with the current request.
Action: The HTTP session must be already active before tracing operations can be executed for the session.

Level: 1
Type: ERROR
Impact: Logging

ODL-52812: A new trace cannot be started for the current HTTP session because the session is already being traced.
Cause: A request to start tracing the current HTTP session cannot be executed because the session is already being traced.
Action: Stop the active trace before starting a new trace for the same session.

Level: 1
Type: ERROR
Impact: Logging
ODL-52813: A request to stop tracing an HTTP request cannot be executed because the request is not being traced.

**Cause:** A request to stop tracing an HTTP request cannot be executed because the request is not being traced.

**Action:** Check if the HTTP request is being traced before trying to stop tracing.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

ODL-52814: Unable to send notification for start tracing event. Tracing will continue on the local server, but may not be enabled on other servers. Cause: {0}

**Cause:** A JMX notification for a start tracing event could not be sent due to an unexpected exception.

**Action:** See the error message for more information on the root cause.

**Level:** 1  
**Type:** WARNING  
**Impact:** Logging

ODL-52815: Unable to send notification for stop tracing event. Tracing is stopped on the local server, but may not be stopped on other servers. Cause: {0}

**Cause:** A JMX notification for a stop tracing event could not be sent due to an unexpected exception.

**Action:** See the error message for more information on the root cause.

**Level:** 1  
**Type:** WARNING  
**Impact:** Logging

ODL-52816: Unable to propagate a {0} event; cause: {0}

**Cause:** A selective tracing event originating from one server could not be propagated to other servers.

**Action:** See the error message for more information on the root cause.

**Impact:** Programmatic

ORABPEL-00007: failure to decrypt cipher text with transformation "(0)"; exception reported is: {1}

**Cause:** This was an internal error. It may have been caused by an incorrect cipher state or an invalid padding size being specified.

**Action:** Contact Oracle Support Services. Provide the error message and the process that appeared to cause the problem.

**Level:** 1  
**Type:** INCIDENT_ERROR  
**Impact:** Programmatic

ORABPEL-00008: failure to encrypt plain text with transformation "(0)"; exception reported is: {1}

**Cause:** This was an internal error. It may have been caused by an incorrect cipher state or an invalid padding size being specified.

**Action:** Contact Oracle Support Services. Provide the error message and the process that appeared to cause the problem.

**Level:** 1  
**Type:** INCIDENT_ERROR  
**Impact:** Programmatic

ORABPEL-00015: failure to create jar file {0}

**Cause:** The Sun tools.jar may not have been installed on the local machine or included in the class path.

**Action:** Verify that tools.jar is installed on this machine and is included in the class path.

**Level:** 1
Type: ERROR
Impact: Programmatic

ORABPEL-00016: failure to execute javac compiler on file(s) "\{0\}"; exception reported is: \{1\}
Cause: The Sun tools.jar may not have been installed on the local machine or included in the class path.
Action: Verify that tools.jar is installed on this machine and is included in the class path.
Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-00017: failure to compile file(s) "\{0\}"; exception reported is: \{1\}
Cause: The generated Java class(es) had errors and/or all the required libraries to compile the class(es) were not available.
Action: Verify that the file named in the error message is valid Java file and that all required libraries are included in the class path.
Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-00018: cannot find the Java source directory "\{0\}"
Cause: The specified Java source directory did not exist or it could not be written to.
Action: Create the source directory named in the error message and set the write permission accordingly.
Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-00019: cannot create the Java destination directory "\{0\}"
Cause: The parent directory permissions prevented the creation of this directory.
Action: Verify that the parent directory for the directory named in the error message is writable.
Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-00020: failure to write the Javadoc argument file "\{0\}"; exception reported is: "\{2\}"
Cause: The Javadoc file named in the error message was not written to the directory "\{1\}".
Action: Verify that the directory "\{1\}" can be written to.
Level: 1
Type: ERROR
Impact: Programmatic

**ORABPEL-00021: failure to execute Javadoc with the argument file "(0)"
***
**Cause:** The Javadoc executable was not found in the system path or was not executed.
**Action:** Verify that Javadoc is installed on this machine in the `<JDK>\bin` directory and that this directory is included in the machine system path.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**ORABPEL-00024: failure to schedule the "(0)" agent with the scheduler; exception reported is: {1}
***
**Cause:** The Quartz scheduler did not schedule the job named in the error message. This is typically an internal scheduler error.
**Action:** Contact Oracle Support Services. Provide the error message and the exception trace in the log files (with the logging level set to debug mode).

**Level:** 1  
**Type:** INCIDENT_ERROR  
**Impact:** Programmatic

**ORABPEL-00025: failure to unschedule the "(0)" agent with the scheduler; exception reported is: {1}
***
**Cause:** The Quartz scheduler did not unschedule the job named in the error message. This is typically an internal scheduler error.
**Action:** Contact Oracle Support Services. Provide the error message and the exception trace in the log files (with the logging level set to debug mode).

**Level:** 1  
**Type:** INCIDENT_ERROR  
**Impact:** Programmatic

**ORABPEL-00026: error while attempting to execute the job "(0)" for agent "(1)"; exception reported is: {2}
***
**Cause:** This error was a wrapper for an internal exception thrown by the underlying scheduler job.
**Action:** Contact Oracle Support Services. Provide the error message and the exception trace in the log files (with the logging level set to debug mode).

**Level:** 1  
**Type:** INCIDENT_ERROR  
**Impact:** Programmatic

**ORABPEL-00201: cannot return system authentication token for caller "(0)"
***
**Cause:** This was an internal error. The agent "(0)" was not added to the allowed callers list for the system token.
**Action:** Contact Oracle Support Services. Provide the error message and the exception trace in the log files (with logging level set to debug mode).

**Level:** 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-00209: The domain identifier "{0}" is not registered with the server.
Cause: All domain identifiers were kept in the domain table; this table may have been modified incorrectly.
Action: Restart the application server; if the domain directory is present, the identifier will be automatically registered again.

Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-00210: domain ref "{0}" is not registered with the server.
Cause: All domain identifiers were kept in the domain table; this table may have been modified incorrectly.
Action: Restart the application server; if the domain directory is present, the identifier will be automatically registered again.

Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-00214: The OraBPEL server has not finished initializing yet; the initialization process may be complete in a few moments.
Cause: A request was sent to the server before it finished initializing.
Action: Resubmit the request. If this does not solve the problem, check the logs (with logging level set to debug mode) for error messages.

Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-00215: error while attempting to instantiate the JDK adapter class "{0}" for run-time version "{1}"; exception reported is: {2}
Cause: The JDK adapter class named in the error message was not in the system class path or there was an incompatibility with the JDK used to compile the class and the current JVM version.
Action: Contact Oracle Support Services. Provide the error message and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-00216: JDK adapter class "{0}" for run-time version "{1}" does not implement the IJDKAdapter interface
Cause: This was an internal error. All JDK adapters registered with the system must conform to the IJDKAdapter interface.
Action: Contact Oracle Support Services. Provide the error message and the exception trace in the log files (with logging level set to debug mode).
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-00217: JDK version "(0)" is not supported by the OraBPEL run-time; currently only JDK versions 1.4 and 1.5 are supported
Cause: A JDK adapter was not specified for the JVM version with which the container was started.
Action: Contact Oracle Support Services. Provide the error message and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-00219: cannot instantiate an instance for the class "(0)"
Cause: The class "{1}" was not granted sufficient permissions by the JVM to instantiate the class "(0)".
Action: Verify that the OraBPEL run-time class "{1}" has the necessary security permissions to access the class specified in the error message.

Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-00220: class "{0}" (for the platform adapter for platform "{1}") does not implement the IPlatformAdaptor interface
Cause: This was an internal error. All platform adapters registered with the system must conform to the IPlatformAdaptor interface.
Action: Contact Oracle Support Services. Provide the error message and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-00221: error while attempting to instantiate the class "(0)" as the adapter for platform "{1}"; exception reported is: {2}
Cause: The platform adapter class "{0}" was not in the system class path, or there was an incompatibility with the JDK used to compile the class and the current JVM version.
Action: Contact Oracle Support Services. Provide the error message and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-00222: class for platform adapter "(0)" (platform "{1}") cannot be found
Cause: The platform adapter class "{0}" was not in the system class path.
Action: Ensure that Oracle BPEL libraries are set correctly in the system class path.

Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-00227: class "\{0\}" (for the database adapter for "\{1\}) does not implement the IDatabaseAdaptor interface

Cause: This was an internal error. All database adapters registered with the system must conform to the IDatabaseAdaptor interface.

Action: Contact Oracle Support Services. Provide the error message and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-00228: error while attempting to instantiate the class "\{0\}" as the database adapter, data source "\{1\}"; exception reported is: \{3\}

Cause: The database adapter class "\{0\}" was not in the system class path, or there was an incompatibility with the JDK used to compile the class and the current JVM version.

Action: Contact Oracle Support Services. Provide the error message and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-00229: database adapter class name for data source "\{0\}" has not been specified

Cause: The database adapter class "\{0\}" was not in the system class path.

Action: Ensure that the Oracle BPEL libraries are set correctly in the system class path. If the libraries are configured correctly, the adapter configuration files may have been modified incorrectly.

Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-00230: adapter resource file "\{0\}" cannot be found in the current class path

Cause: The resource file named in the error message contained all the JNDI mappings required for the BPEL process domain to initialize.

Action: Contact Oracle Support Services. Provide the error message and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic
ORABPEL-00231: error while attempting to instantiate the class ",(0)" as the adapter manifest for "(1)", data source "(2)"; exception reported is: (3)

Cause: The adapter manifest class ",(0)" was not in the system class path, or there was an incompatibility with the JDK used to compile the class and the current JVM version.

Action: Contact Oracle Support Services. Provide the error message and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-00232: class ",(0)" (for the adapter manifest for "(1)", data source "(2)") does not implement the IServerAdaptorManifest interface; all adapter manifests used by the OraBPEL server must implement this interface

Cause: This was an internal error. All adapter manifests registered with the system must conform to the IServerAdaptorManifest interface.

Action: Contact Oracle Support Services. Provide the error message and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-00233: adapter manifest class name for "(0)", data source "(1)" is not specified.

Cause: The adapter manifest class ",(0)" was not in the system class path.

Action: Ensure that the Oracle BPEL libraries are set correctly in the system class path. If the libraries are configured correctly, the adapter configuration files may have been modified incorrectly.

Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-00235: The component identifier "(0)" has not been registered with the server.

Cause: All component identifiers were kept in the "component" table; this table may have been modified incorrectly.

Action: Restart the application server; when the component is loaded, the identifier will be automatically registered again.

Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-00236: The component reference "(0)" is not registered with the server.

Cause: All component references were kept in the "component" table; this table may have been modified incorrectly.

Action: Restart the application server; when the component is loaded, the reference will be automatically registered again.
Level: 1
Type: ERROR
Impact: Programmatic

**ORABPEL-00237: failure to create the component reference for "[0]"**

**Cause:** The maximum number of components ([1]) were reached.

**Action:** Contact Oracle Support Services. At the current time, the maximum number of components has been set to 32767.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

**ORABPEL-00238: exception while reading the component index from the data source; the exception reported is: [0]**

**Cause:** There was a problem with connecting to the data source where the component index is stored.

**Action:** There are three things to verify. Verify that the machine hosting the data source is physically connected to the network. Verify that the connection pool properties as defined in the application server startup properties are valid. Verify that the database schema for the OraBPEL server has been installed in the data source.

Level: 1
Type: ERROR
Impact: Programmatic

**ORABPEL-00239: exception while writing the component index (application_name "[0]", composite_name "[1]", revision "[2]", label "[3]", component_name "[4]") to the data source; the exception reported is: [5]**

**Cause:** There was a problem with connecting to the data source where the component index is stored.

**Action:** There are three things to verify. Verify that the machine hosting the data source is physically connected to the network. Verify that the connection pool properties as defined in the application server startup properties are valid. Verify that the database schema for the OraBPEL server has been installed in the data source.

Level: 1
Type: ERROR
Impact: Programmatic

**ORABPEL-00240: exception occurs while removing the component index (dn "[0]", ref "[1]") from the data source; the exception reported is: [2]**

**Cause:** There was a problem with connecting to the data source where the component index is stored.

**Action:** There are three things to verify. Verify that the machine hosting the data source is physically connected to the network. Verify that the connection pool properties as defined in the application server startup properties are valid. Verify that the database schema for the OraBPEL server has been installed in the data source.
Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-01005: failure to compile the generated BPEL classes for BPEL process "{0}" of composite "{1}"
Cause: The class path setting is incorrect.
Action: Ensure that the class path is set correctly. If this happens on the server side, verify that the custom classes or jars which this BPEL process is depending on are deployed correctly. Also verify that the run time is using the same release/version.

Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-01007: build directory "{0}" for the BPEL process "{1}" of composite "{2}" cannot be found or accessed
Cause: The compiler could not find or create the directory "{0}".
Action: Ensure that the parent directory of "{0}" is a valid directory and that it is not read-only.

Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-01010: failure to generate the BPEL process file "{0}".
Cause: Could not generate named BPEL process file. The exception reported was "{1}".
Action: Ensure that the file "{0}" is a valid file to be generated.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-01027: trying to manipulate the nonexistent part "{1}" in a message of type "{0}"
Cause: An invalid request was made to manipulate the invalid part "{1}".
Action: Ensure that the client request is correct.

Level: 1
Type: ERROR
Impact: Programmatic

ORABPEL-01028: cannot find propertyAlias definition that associates the BPEL correlation "{0}" of correlationSet "{1}" to messageType "{2}"
Cause: A propertyAlias must be defined to associate the BPEL correlation to a correlationSet. The run time could not find it.
Action: Ensure that the mentioned propertyAlias is in one of the WSDL files that are referenced by the composite. Redeploy the composite.
Level: 1
Type: ERROR
Impact: Programmatic

**ORABPEL-01029: cannot find property definition for "{0}" in any of the WSDL files**

*Cause:* The BPEL correlation property needs to be defined. But the run time could not find it.

*Action:* Define the mentioned BPEL property in one of the WSDL files referenced by the composite.

Level: 1
Type: ERROR
Impact: Programmatic

**ORABPEL-01030: cannot generate debug model file "{0}"**

*Cause:* The named BPEL debug model file was not generated. The exception reported was: "{1}".

*Action:* Correct the error reported by the error message.

Level: 1
Type: ERROR
Impact: Programmatic

**ORABPEL-01032: specified process ID "{0}" is invalid**

*Cause:* The specified process identifier did not follow the naming constraints.

*Action:* Valid process identifiers might start with a letter, a `$` or `_` character; process characters (other than the first character) include a letter, a digit, a `$`, a `_` or `-` character. The max length permitted is 100. Ensure that the component name specified in the composite descriptor conforms to the above mentioned constraints.

Level: 1
Type: ERROR
Impact: Programmatic

**ORABPEL-02000: The class "{0}" for the block element "{1}" does not implement the ICubeBlock interface.**

*Cause:* This was an internal error. All block elements contained within the process domain must implement this interface.

*Action:* Contact Oracle Support Services. Provide the error message, the composite source and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

**ORABPEL-02001: error while attempting to instantiate the class "{1}" for the block element "{0}"; exception reported is: {2}**
- **Cause:** This was an internal error. The block class "[0]" was not in the composite class path, or there was an incompatibility with the JDK used to compile the class and the current JVM version.

- **Action:** Contact Oracle Support Services. Provide the error message, the composite source and the exception trace in the log files (with logging level set to debug mode).

- **Level:** 1

- **Type:** INCIDENT_ERROR

- **Impact:** Programmatic

**ORABPEL-02002: block element "[0]" missing its class name; this element cannot be created without its class name**

- **Cause:** This was an internal error. The block element class "[0]" was not in the composite class path.

- **Action:** Contact Oracle Support Services. Provide the error message, the composite source and the exception trace in the log files (with logging level set to debug mode).

- **Level:** 1

- **Type:** INCIDENT_ERROR

- **Impact:** Programmatic

**ORABPEL-02003: A Cube element is missing its "ID" property. Every Cube element in the process domain is uniquely identified by its "ID" property.**

- **Cause:** This was an internal error. The element was not generated correctly by the BPEL compiler.

- **Action:** Contact Oracle Support Services. Provide the error message, the composite source and the exception trace in the log files (with logging level set to debug mode).

- **Level:** 1

- **Type:** INCIDENT_ERROR

- **Impact:** Programmatic

**ORABPEL-02005: The parent block element "[0]" specified by node or block element "[1]" is not defined in the service class map. All nodes or blocks contained in the map must be bound to a valid parent block element.**

- **Cause:** This was an internal error. The element was not generated correctly by the BPEL compiler.

- **Action:** Contact Oracle Support Services. Provide the error message, the composite source and the exception trace in the log files (with logging level set to debug mode).

- **Level:** 1

- **Type:** INCIDENT_ERROR

- **Impact:** Programmatic

**ORABPEL-02006: The node or block element "[0]" is missing a parent block identifier. All nodes or blocks contained in the service class map must be bound to a parent block element.**
Cause: This was an internal error. The element was not generated correctly by the BPEL compiler.

Action: Contact Oracle Support Services. Provide the error message, the composite source and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-02007: Multiple method block elements are specified in the service class map. A valid map can only contain one method block element.
Cause: This was an internal error. The element was not generated correctly by the BPEL compiler.
Action: Contact Oracle Support Services. Provide the error message, the composite source and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-02008: No block elements are specified in the service class map. All valid maps must contain at least one block element (the root block).
Cause: This was an internal error. The block map was not generated correctly by the BPEL compiler.
Action: Contact Oracle Support Services. Provide the error message, the composite source and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-02009: No node elements are specified in the service class map. All valid maps must contain at least one node element.
Cause: This was an internal error. The block map was not generated correctly by the BPEL compiler.
Action: Contact Oracle Support Services. Provide the error message, the composite source and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-02010: No method block element is specified for the service class map. All valid maps must contain one method block element.
Cause: This was an internal error. The block map was not generated correctly by the BPEL compiler.
Action: Contact Oracle Support Services. Provide the error message, the composite source and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-02011: The class "[0]" for the node element "[1]" does not implement the ICubeNode interface.
Cause: This was an internal error. All node elements contained within the process domain must implement this interface.
Action: Contact Oracle Support Services. Provide the error message, the composite source and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-02012: error while attempting to instantiate the class "[1]" for the node element "[0]"; the exception reported is: [2]
Cause: This was an internal error. The node class "[0]" was not in the composite class path or there was an incompatibility with the JDK used to the compile the class and the current JVM version.
Action: Contact Oracle Support Services. Provide the error message, the composite source and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

ORABPEL-02013: The class "[0]" cannot be found in the current class path.
Cause: This was an internal error. The node element class "[0]" was not in the composite class path.
Action: Contact Oracle Support Services. Provide the error message, the composite source and the exception trace in the log files (with logging level set to debug mode).

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic
